

Court File No.

FEDERAL COURT OF APPEAL

BETWEEN:

AITCHELITZ, SKOWKALE, SHXWHÁ:Y VILLAGE, SOOWAHLIE,
SQUIALA FIRST NATION, TZEACHTEN, and YAKWEAKWIOOSE

APPLICANTS

AND:

ATTORNEY GENERAL OF CANADA and
TRANS MOUNTAIN CORPORATION

RESPONDENTS

AFFIDAVIT #1 OF TANNY NGUYEN

I, Tanny Nguyen, Project Manager, of Miller Titerle Law Corporation, located at 300 – 638 Smithe Street, Vancouver, British Columbia V6B 1E3, SWEAR THAT:

1. I am a Project Manager at Miller Titerle Law Corporation, counsel for the Applicants in this matter, and as such I have personal knowledge of the facts and matters hereinafter deposed to, save and except where the same are stated to be based on information and belief and where so stated I verily believe the same to be true.
2. The documents attached as Exhibits A-WW to my Affidavit were filed in the National Energy Board (the “**NEB**”) reconsideration hearing (MH-052-2018) (the “**Reconsideration Hearing**”) in respect of Trans Mountain Corporation’s (“**TM Canada**”) Trans Mountain Expansion Project (the “**Project**”), and were accessed via the electronic National Energy Board Regulatory Document Index folder entitled

"Reconsideration (MH-052-2018)", which is available online at <https://apps.neb-one.gc.ca/REGDOCS/Item/View/3614457>.

3. Attached as **Exhibit "A"** to my Affidavit is a true copy of a letter from the NEB to Indigenous participants and other potential intervenors (the "**Intervenors**") containing directions regarding applying to participate in the Reconsideration Hearing and requesting public comments on the scope and process of the Reconsideration Hearing (the "**Comment Request Letter**"), dated September 26, 2018 and entitled "A94153-1 NEB Letter – Application to Participate process and comment process MH-052-2018 – A6H7Q6".
4. Attached as **Exhibit "B"** to my Affidavit is a true copy of the NEB's explanatory note to the OIC, published in the *Canada Gazette Part I*, Vol. 152, No. 39 on September 29, 2018 and entitled "A94793-5 NEB Explanatory Note to OIC P.C. 2018-1177 – Trans Mountain Expansion – Reconsideration – A6I7J0".
5. Attached as **Exhibit "C"** to my Affidavit is a true copy of the Stó:lō Collective's Application to Participate dated October 3, 2018 entitled "A94480 Stó:lō Collective – Application To Participate – A6I2G4".
6. Attached as **Exhibit "D"** to my Affidavit is a true copy of a letter from the Stó:lō Collective to the NEB dated October 3, 2018 responding to the Comment Request Letter, entitled "A94494-1 Stó:lō Collective LT NEB in response to request for comments (MH-052-2018) – A6I2J2".
7. Attached as **Exhibit "E"** to my Affidavit is a true copy of a letter from the NEB to the Intervenors requesting additional comments on the appropriate special limit for Project-related marine shipping ("**Additional Comments Letter**"), dated October 5, 2018 and entitled "A94631-1 NEB Letter – All Parties – Trans Mountain Expansion –

Reconsideration – Request for additional comments on the spatial limit of Project-related marine shipping – A6I4Q5”.

8. Attached as **Exhibit “F”** to my Affidavit is a true copy of the NEB’s Hearing Order for the Reconsideration Hearing, dated October 12, 2018 and entitled “A94793-3 NEB HO – Trans Mountain Expansion – Reconsideration – A6I7I8”.
9. Attached as **Exhibit “G”** to my Affidavit is a true copy of the Procedural Direction No. 1 issued by the NEB to all Intervenor, dated October 12, 2018 and entitled “A94804-1 NEB PD No. 1 – Trans Mountain Expansion – Reconsideration – Oral Indigenous traditional evidence – A6I7X2”.
10. Attached as **Exhibit “H”** to my Affidavit is a true copy of a letter from the NEB to all Intervenor containing its decisions (“**Scope and Process Decisions**”) following the comments received to the Comment Request Letter and Additional Request Letter, dated October 12, 2018 and entitled “A94793-1 NEB Letter – Parties – Trans Mountain Expansion – Reconsideration – A6I7I6”.
11. Attached as **Exhibit “I”** to my Affidavit is a true copy of a letter from the NEB to various federal authorities requesting specialist or expert information or knowledge in relation to the Reconsideration Hearing, dated October 12, 2018 and entitled “A94793-8 NEB Letter to Federal Authorities – Request pursuant of the CEAA 2012 – Trans Mountain Expansion – Reconsideration – French included – A6I7J4”.
12. Attached as **Exhibit “J”** to my Affidavit is a true copy of a letter from the Stó:lō Collective to the NEB in response to TM Canada’s request that the NEB hold the Project-related orders, outstanding application review processes and condition compliance determinations and

processes in abeyance, dated October 17, 2018 and entitled "A94920-1 LT NEB re Response to TM Abeyance Request - A6I9Y0".

13. Attached as **Exhibit "K"** to my Affidavit is a true copy of a letter from the Stó:lō Collective to the NEB regarding the Stó:lō Collective's intention to provide oral traditional evidence ("**OTE**") and containing an objection regarding the same, dated October 23, 2018, entitled "A95070-1 Notice of Intent and Objection re Oral Traditional Evidence – A6J2J2".
14. Attached as **Exhibit "L"** to my Affidavit is a true copy of a letter from the NEB to all Intervenor containing its reasons for the Scope and Process Decisions ("**Reasons Letter**"), dated October 29, 2018 and entitled "A95187-1 NEB Letter – Parties – Trans Mountain Expansion – Reconsideration – Reasons for the Board's decisions reached in its 12 October 2018 letter – A6J4X3".
15. Attached as **Exhibit "M"** to my Affidavit is a true copy of Appendix 1 to the Reasons Letter, dated October 29, 2018 and entitled "A95187-3 NEB Appendix 1 – Trans Mountain Expansion – Reconsideration – reasons for marine shipping between the WMT and the 12-nautical-mile territorial sea limit – A6J4X5".
16. Attached as **Exhibit "N"** to my Affidavit is a true copy of Appendix 2 to the Reasons Letter, dated October 29, 2018 and entitled "A95187-5 NEB Appendix 2 – Trans Mountain Expansion – Reconsideration – reasons to the List of Issues, Amended Factors Document, design of the hearing process and which government departments that require information – A6J4X7".
17. Attached as **Exhibit "O"** to my Affidavit is a true copy of a letter from the Stó:lō Collective to the NEB containing further objections regarding the OTE hearings, dated October 30, 2018 and entitled "A95245-1 LT

NEB re Objection to Locations and Limitations re OTE Hearings (with enclosures) – A6J5Q0”.

18. Attached as **Exhibit “P”** to my Affidavit is a true copy of a letter from the NEB to all Intervenor requesters on the locations chosen for OTE hearings, dated October 31, 2018 and entitled “A95289-1 NEB Letter – Parties – Trans Mountain Expansion – Reconsideration – oral Indigenous traditional evidence locations – comments – A6J6L1”.
19. Attached as **Exhibit “Q”** to my Affidavit is a true copy of a letter from the NEB to all Intervenor requesters on the Notice of Motion filed by Squamish Nation on November 5, 2018 (“**Squamish Motion**”) requesting additional time to file its Opening Statement and Written Evidence, dated November 6, 2018 and entitled “A95485-1 NEB Letter – Parties – Trans Mountain Expansion – Reconsideration – Notice of motion from Squamish Nation requesting more time for filing opening statement and evidence – comment – A6K0I2”.
20. Attached as **Exhibit “R”** to my Affidavit is a true copy of Ruling No. 7 of the NEB in response to requests from Indigenous Intervenor requesters regarding the OTE hearings, dated November 7, 2018 and entitled “A95517-1 NEB Ruling No. 7 – Indigenous Groups – Trans Mountain Expansion – Reconsideration – requests from Indigenous intervenors – oral Indigenous traditional evidence locations, time limitations and costs – A6K0Y0”.
21. Attached as **Exhibit “S”** to my Affidavit is a true copy of Procedural Direction No. 2 issued by the NEB to all Intervenor requesters regarding OTE hearings, dated November 7, 2018 and entitled “A95518-1 NEB PD No. 2 – All Parties – Trans Mountain Expansion – Reconsideration – Oral Indigenous traditional evidence – Procedures, guidance, session locations and schedules – A6K0Y3”.

22. Attached as **Exhibit “T”** to my Affidavit is a true copy of Appendix 1 to Procedural Direction No. 2, dated November 7, 2018 and entitled “A95518-3 NEB Appendix 1 – Trans Mountain Expansion – Reconsideration – Oral Indigenous traditional evidence schedule – revised 28 November 2018 – A6K0Y5”.
23. Attached as **Exhibit “U”** to my Affidavit is a true copy of Appendix 2 to Procedural Direction No. 2, dated November 7, 2018 and entitled “A95518-5 NEB Appendix 2 – Trans Mountain Expansion – Reconsideration – Procedures and guidance for oral Indigenous traditional evidence – A6K0Y7”.
24. Attached as **Exhibit “V”** to my Affidavit is a true copy of a letter from the NEB to all Intervenors regarding the Marine Technical Advisor appointed by the federal government, dated November 8, 2018 and entitled “A95542-1 NEB Letter – All Parties – Trans Mountain Expansion – Reconsideration – Federal government-appointed Marine technical advisor – A6K1I0.”
25. Attached as **Exhibit “W”** to my Affidavit is a true copy of a letter from the Stó:lō Collective to the NEB regarding the Squamish Motion, dated November 8, 2018 and entitled “A95575-1 SC - LT NEB re Response to Notice of Motion of Squamish – Nov 8, 2018 – A6K1X5”.
26. Attached as **Exhibit “X”** to my Affidavit is a true copy of Ruling No. 9 of the NEB regarding the Squamish Motion, dated November 13, 2018 and entitled “A95640-1 NEB Ruling No. 9 – Squamish and TWN – Trans Mountain Expansion – Reconsideration – Notices of motion for extension to the deadline for intervenor evidence – A6K3E2”.
27. Attached as **Exhibit “Y”** to my Affidavit is a true copy of Procedural Direction No. 3 issued by the NEB to all Intervenors regarding the revised hearing schedule for OTE hearings, dated November 13, 2018

and entitled “A95641-1 NEB PD No. 3 – All Parties – Trans Mountain Expansion – Reconsideration – Oral Indigenous traditional evidence – Revised hearing events and steps table – A6K3E5”.

28. Attached as **Exhibit “Z”** to my Affidavit is a true copy of a Notice of Motion filed by Living Oceans Society and Raincoast Conservation Foundation (“**Living Oceans Motion**”) making various requests of the NEB, dated November 16, 2018 and entitled “A95798-2 2018 11 16 – Notice of Motion re risk assessment – A6K5U1”.
29. Attached as **Exhibit “AA”** to my Affidavit is a true copy of an Application for Review filed by Living Oceans Society and Raincoast Conservation Foundation (“**Living Oceans Application**”) requesting that the NEB revisit certain conclusions made as part of the Hearing Order, dated November 16, 2018 and entitled “A95804-2 2018 11 16 – Application for review of Spatial Limit Decision – A6K5V5”.
30. Attached as **Exhibit “BB”** to my Affidavit is a true copy of an Application for Review filed by TWN (“**TWN Application**”) requesting that the NEB revisit certain conclusions made as part of the Hearing Order, dated November 16, 2018 and entitled “A95819-1 Application for Review – A6K5Y8”.
31. Attached as **Exhibit “CC”** to my Affidavit is a true copy of a letter from the NEB to all Intervenors requesting comments on the Living Oceans Motion, Living Oceans Application, and TWN Application (collectively, the “**Living Oceans and TWN Notices**”), dated November 21, 2018 and entitled “A96006-1 NEB Letter – Comment processes to parties – Trans Mountain Reconsideration – A6K8K4”.
32. Attached as **Exhibit “DD”** to my Affidavit is a true copy of a letter from the Stó:lō Collective to the NEB regarding the Stó:lō Collective’s intention to withdraw from the OTE hearing, dated November 26, 2018

and entitled "A96126-1 LT NEB re Withdrawing from OTE Hearing – A6L0H7".

33. Attached as **Exhibit "EE"** to my Affidavit is a true copy of a transcript of an OTE hearing of the NEB for the Project held on November 29, 2018 in which Chief Dalton Silver provides evidence for the Stó:lō Collective, entitled "A96243-1 18-11-29 - Volume 7 – A6L2F4".
34. Attached as **Exhibit "FF"** to my Affidavit is a true copy of a letter from the Stó:lō Collective to the NEB regarding the Living Oceans and TWN Notices, dated November 30, 2018 and entitled "A96297-1 LT NEB re TWN and Living Oceans Applications and Motion – A6L2Z3".
35. Attached as **Exhibit "GG"** to my Affidavit is a true copy of the Stó:lō Collective's Opening Statement, dated December 5, 2018 and entitled "A96432-1 Opening Statement of the Stó:lō Collective – A6L5S8".
36. Attached as **Exhibit "HH"** to my Affidavit is a true copy of the Stó:lō Collective's Written Evidence, dated December 5, 2018 and entitled "A96432-2 Written Evidence of the Stó:lō Collective – A6L5S9".
37. Attached as **Exhibit "II"** to my Affidavit is a true copy of Ruling No. 18 of the NEB to TM Canada regarding its notice of motion for an extension to file reply evidence, dated December 7, 2018 and entitled "A96529-1 NEB Ruling No. 18 – Trans Mountain – Extension to reply evidence – Trans Mountain Reconsideration – A6L8L6".
38. Attached as **Exhibit "JJ"** to my Affidavit is a true copy of the information request ("**IR**") filed by the Stó:lō Collective, seeking specific information from the federal government, dated December 17, 2018 and entitled "A96753-2 Information Request #1 to Government of Canada – A6Q2A0".

39. Attached as **Exhibit “KK”** to my Affidavit is a true copy of Ruling No. 22 of the NEB regarding the Living Oceans and TWN Notices, dated December 27, 2018 and entitled “A96969-1 NEB Ruling No. 22 – Trans Mountain Expansion – Reconsideration – Applications for review from Living Oceans and Raincoast and TWN – A6Q5C9”.
40. Attached as **Exhibit “LL”** to my Affidavit is a true copy of TM Canada’s response to the IR filed by the Stó:lō Collective, dated December 29, 2018 and entitled “A97002-5 Response to Information Request from Sto lo Collective – A6Q5X1”.
41. Attached as **Exhibit “MM”** to my Affidavit is a true copy of a letter from the NEB to all Intervenors and TM Canada requesting comments on the Notice of Motion filed by Raincoast Conservation Foundation on January 7, 2019 to file late evidence containing expert opinion regarding the health of Southern resident killer whales (“**Raincoast Motion**”), dated January 7, 2019 and entitled “A97086-1 NEB Letter – All Parties – Trans Mountain Expansion – Reconsideration – Raincoast notice of motion to file late evidence – comment process – A6Q7I3”.
42. Attached as **Exhibit “NN”** to my Affidavit is a true copy of a letter from the Stó:lō Collective to the NEB regarding the Raincoast Motion, dated January 9, 2019 and entitled “A97159-1 LT NEB re Raincoast Notice of Motion (filing late evidence) – A6Q8H9”.
43. Attached as **Exhibit “OO”** to my Affidavit is a true copy of Procedural Direction No. 4 issued by the NEB regarding affidavits, written argument-in-chief, containing the NEB’s draft conditions and recommendations, dated January 10, 2019 and entitled “A97236-1 NEB PD No. 4 – All Parties – Trans Mountain Expansion – Reconsideration – Affidavits and written argument-in-chief, including comments on draft conditions and recommendations – A6Q9I3”.

44. Attached as **Exhibit “PP”** to my Affidavit is a true copy of a letter from the Stó:lō Collective to the NEB containing confirmation that the Stó:lō Collective adopted its Written Evidence, dated January 14, 2019 and entitled “A97289-1 LT NEB re Adopting Written Evidence – A6Q9X4”.
45. Attached as **Exhibit “QQ”** to my Affidavit is a true copy of Ruling No. 27 of the NEB regarding the Raincoast Motion, dated January 14, 2019 and entitled “A97278-1 NEB Ruling No. 27 – Raincoast – Trans Mountain Expansion – Reconsideration – Notice of motion to file late evidence – A6Q9V1”.
46. Attached as **Exhibit “RR”** to my Affidavit is a true copy of the NEB’s Erratum to Ruling No. 27, dated January 16, 2019 and entitled “A97367-1 NEB Letter – Parties MH-052-2018 – Erratum to Ruling No. 27 – A6R1F5”.
47. Attached as **Exhibit “SS”** to my Affidavit is a true copy of the Stó:lō Collective’s Argument-in-Chief, dated January 22, 2019 and entitled “A97548-1 Argument-in-Chief of Stolo Collective – A6R3Z2”.
48. Attached as **Exhibit “TT”** to my Affidavit is a true copy of Part 1 of the Stó:lō Collective’s Book of Authorities, dated January 22, 2019 and entitled “A97567-1 Book of Authorities (Part 1) – A6R4F4”.
49. Attached as **Exhibit “UU”** to my Affidavit is a true copy of Part 2 of the Stó:lō Collective’s Book of Authorities, dated January 22, 2019 and entitled “A97567-2 Book of Authorities (Part 2) – A6R4F5”.
50. Attached as **Exhibit “VV”** to my Affidavit is a true copy of Part 3 of the Stó:lō Collective’s Book of Authorities, dated January 22, 2019 and entitled “A97567-3 Book of Authorities (Part 3) – A6R4F6”.

51. Attached as **Exhibit "WW"** to my Affidavit is a true copy of relevant excerpts from the NEB's Reconsideration Report, dated February 22, 2019 and entitled "A98021-1 NEB Reconsideration Report – Reconsideration – Trans Mountain Expansion - MH-052-2018 – A6S2D8".

All interested persons and groups

**Trans Mountain Pipeline ULC (Trans Mountain)
Application for the Trans Mountain Expansion Project (Project)
National Energy Board (Board) reconsideration of aspects of its Recommendation
Report (Report) as directed by Order in Council (OIC) P.C. 2018-1177
MH-052-2018**

**Application to Participate process; and comment process on the draft List of Issues,
the draft Amended Factors and Scope of the Factors for the Environmental
Assessment under the *Canadian Environmental Assessment Act, 2012* (CEAA 2012),
and the design of the hearing process**

A. Overview

On 20 September 2018, through OIC P.C. 2018-1177, the Governor in Council (GIC) referred aspects of the Board's Report for the Project back to the Board for reconsideration (Reconsideration). The GIC's direction follows a 30 August 2018 decision² of the Federal Court of Appeal that quashed the GIC's approval of the Project. The GIC has imposed a time limit of 155 calendar days for the Reconsideration. Therefore, the Board must complete the Reconsideration process and issue its Reconsideration report no later than **22 February 2019**.

The Board will hold a public hearing in carrying out the Reconsideration. The Chair of the Board has assigned a Panel of three Board Members (Lyne Mercier – presiding, Alison Scott, and Murray Lytle) to conduct the Reconsideration.

../2

¹ Those remaining in the hearing process at the time that the Board issued its Recommendation Report in May 2016, as listed in Appendix 6 of the Report.

² *Tsleil-Waututh Nation v. Canada (Attorney General)*, 2018 FCA 153.

As detailed in this letter, the Board is now seeking public comments on:

- 1) whether, “on a principled basis,”³ Project-related marine shipping should be included in the “designated project” to be assessed under the [CEAA 2012](#);
- 2) the draft Amended Factors and Scope of the Factors for the Environmental Assessment pursuant to the CEAA 2012 (Appendix 1), and the draft List of Issues to be considered in the Reconsideration hearing (Appendix 2); and
- 3) the design of the hearing process to be used for the Reconsideration;
- 4) which government departments or bodies that the Board should require information from during the hearing.

Directions on how to file comments with the Board on the above matters are provided in Part G below.

This letter also provides background and guidance on how those interested in participating in the hearing as an intervenor can apply or register to do so.

The deadline for filing all comments, and for applying or registering to participate, is 3 October 2018.

Once the Board has considered the filed comments and Application to Participate (ATP) forms, it will:

- release a Hearing Order setting out the hearing process that will be followed;
- confirm the Amended Factors and Scope of the Factors for the Environmental Assessment pursuant to the CEAA 2012, and the List of Issues for the Reconsideration hearing; and
- announce the intervenors that will be participating in the hearing.

In determining the Amended Factors and Scope of the Factors for the Environmental Assessment pursuant to the CEAA 2012 and the List of Issues for the Reconsideration hearing, in addition to considering the comments received, the Board will be guided by the GIC’s direction, the Federal Court of Appeal’s decision, and relevant provisions of the CEAA 2012 and the *National Energy Board Act* (NEB Act).

B. Background

On 19 May 2016, the Board issued its Report for the Project, which recommended that the GIC approve the Project.

On 29 November 2016, the GIC accepted the Board’s recommendation and issued OIC P.C. 2016-1069. That OIC directed the Board to issue a certificate of public convenience and necessity approving the construction and operation of the Project, subject to the conditions recommended by the Board, which the Board did on 1 December 2016 ([Certificate OC-064](#)).

³ *Tsleil-Waututh Nation v. Canada (Attorney General)*, *supra* note 2 at para. 770.

On 30 August 2018, the Federal Court of Appeal overturned the GIC's approval of the Project, in part because, in the Court's view, the Board unjustifiably excluded Project-related marine shipping from the definition of the "designated project" under the CEAA 2012. The Court noted that this resulted in successive deficiencies, including limiting the Board's consideration of mitigation measures and of section 79 of the [*Species at Risk Act*](#) (SARA). The Court noted that the Board had considered Project-related marine shipping under the NEB Act, and that this was adequate for the purposes of informing the GIC of the effects of Project-related marine shipping on Southern resident killer whales and their use by Indigenous groups, as well as of the significance of these effects.

The Federal Court of Appeal quashed OIC 2016-1069, rendering Certificate OC-064 a nullity. The Court stated that the issue of Project approval should be remitted to the GIC for redetermination, and, in that redetermination, the GIC must refer the Board's recommendations and its terms and conditions back to the Board for reconsideration. At paragraph 770 of its judgment, the Court stated:

Specifically, the Board ought to reconsider on a principled basis whether Project-related shipping is incidental to the Project, the application of section 79 of the [SARA] to Project-related shipping, the Board's environmental assessment of the Project in the light of the Project's definition, the Board's recommendation under subsection 29(1) of the [CEAA 2012] and any other matter the [GIC] should consider appropriate.

In OIC 2018-1177 dated 20 September 2018, the GIC, on the recommendation of the Minister of Natural Resources, pursuant to section 53 of the NEB Act and section 30 of the CEAA 2012:

- a) refers back to the National Energy Board for reconsideration the recommendations and all terms or conditions set out in its May 19, 2016 report entitled *Trans Mountain Expansion Project OH-001-2014* that are relevant to addressing the issues specified by the Federal Court of Appeal in paragraph 770 of *Tsleil-Waututh Nation v. Canada (Attorney General)* (2018 FCA 153), including conditions 91, 131 to 134, 144 and 151;
- b) directs that the Board conduct the reconsideration taking into account the following factors:
 - i) the environmental effects of Project-related marine shipping in view of the requirements of the *Canadian Environmental Assessment Act, 2012*, and
 - ii) the adverse effects of Project-related maritime shipping on species at risk, including the Northeast Pacific southern resident killer whale population, and their critical habitat, in view of any requirements of section 79 of the *Species at Risk Act* that may apply to the Project; and
- c) directs that the Board complete its reconsideration within 155 calendar days after the day on which this Order is made."

C. Including Project-related marine shipping as part of the “designated project” under the CEAA 2012

The Board invites public comments on whether, on a principled basis, Project-related marine shipping should be part of the “designated project” under the CEAA 2012, and the rationale for why or why not. More specifically, comments should address whether Project-related marine shipping is “incidental” to Project physical activities, as that term is used in the definition of “designated project” in subsection 2(1) of the CEAA 2012.

The Board is also seeking comments on a draft Amended Factors and Scope of the Factors for the Environmental Assessment pursuant to the CEAA 2012 (Appendix 1), which reflects a scenario where the Board determines that Project-related marine shipping is part of the “designated project” under the CEAA 2012.

D. Government departments or bodies that the Board should require information from during the hearing

Pursuant to paragraph 20(a) of the CEAA 2012, the Board intends to request specialist or expert information or knowledge from each of Fisheries and Oceans Canada, Environment and Climate Change Canada, and Transport Canada in relation to the Reconsideration.

The Board is seeking comments about which other government departments or bodies, if any, that the Board should require information from during the hearing.

E. Draft List of Issues for the Reconsideration hearing

The Board invites public comments on the appropriate List of Issues to be considered in the Reconsideration hearing. A draft List of Issues for the Reconsideration hearing is provided in Appendix 2.

F. Hearing process design

The Board invites public comments on the design of the hearing process that it should use to carry out its Reconsideration. Comments regarding the hearing process design should include a description of the hearing steps that are appropriate, the timing of these steps, and whether they should be written or oral.

Comments must take into account the **time limit and the limited focus** of the Reconsideration process, and that a portion of the time will be required by the Board to collect and consider comments in determining its hearing process and focus, and to prepare its Reconsideration Report. The Board’s hearing process will be, in accordance with subsection 11(4) of the NEB Act, carried out as expeditiously as the circumstances and considerations of fairness permit, but, in any case, within the time limit imposed by the GIC.

Given what will be an expedited hearing process, **all Parties, including individuals, groups and government departments and bodies, that intend to participate as intervenors, are strongly encouraged to start preparing any additional evidence immediately, based on the draft List of Issues for the Reconsideration hearing.** The Board intends for the entirety of the record filed in the OH-001-2014 Certificate hearing to be included as part of its record for the Reconsideration. **Parties will not be required to re-file or re-test evidence that was filed during the OH-001-2014 Certificate hearing.**

G. How to file comments

The deadline for filing all comments pertaining to Parts C to E above is 3 October 2018.

Comments can be filed online using the Board's [e-filing tool](#) (when asked to choose a project name, choose "Trans Mountain Expansion Project – Reconsideration – MH-052-2018").

All filings must refer to **Hearing Order MH-052-2018** and **File OF-Fac-Oil-T260-2013-03 59**, and be addressed to:

Ms. Sheri Young
 Secretary of the Board
 National Energy Board
 Suite 210, 517 Tenth Avenue SW
 Calgary, AB T2R 0A8
 Facsimile 403-292-5503 (toll-free 1-877-288-8803)

Alternatively, comments may be mailed or faxed to the Board using the contact information above. **The Board does not accept filings by email.**

Anyone filing comments with the Board should also provide a copy to Trans Mountain at regulatory@transmountain.com.

All comments received, and any future filings related to this Reconsideration hearing, will be found in the Board's online [public registry](#).

H. How to apply or register to participate in the Reconsideration hearing

The Board's Reconsideration hearing will involve:

- the participation of **intervenors**, which typically may file and challenge relevant evidence and submit final argument; and
- gathering **letters of comment from the public** – related to the final List of Issues for the Reconsideration Hearing or the Amended Factors and Scope of the Factors for the Environmental Assessment pursuant to the CEAA 2012 – by a deadline to be set by the Board at a later time.

Only those seeking to participate as an **intervenor** in this hearing are required to file an ATP form. Anyone wanting to file a letter of comment by this future deadline does **not** need to file an ATP form.

Intervenors in the OH-001-2014 Certificate hearing

Intervenors in the OH-001-2014 Certificate hearing at the time that the Board issued its Recommendation Report are **guaranteed intervenor status** in this Reconsideration hearing, should they choose to participate. These intervenors must file an ATP form as a means of "registering" only, though a number of the steps can be skipped.

The purpose of this registration process for these intervenors is to ensure that the Board and Parties to the hearing have their current contact information for the purpose of serving documents.

In the case of a **group** that was granted intervenor status during the OH-001-2014 Certificate hearing, the Board notes that intervenor status was tied to the **group** that participated; **not** to the representative(s) of that group. In other words, **only the group is guaranteed intervenor status** in this Reconsideration hearing. Any individual that represented a group and who wants to participate on his/her own as an individual must file an ATP form for the Board's consideration and decision.

Other interested persons or groups seeking intervenor status

Any other member of the public (individuals or groups) may apply to participate in this Reconsideration hearing as an intervenor. The Board will assess all filed ATP forms and decide who will be allowed to participate as an **intervenor**. Intervenor status will be granted to those who, in the Board's opinion, are directly affected or have relevant information or expertise. Applicants must demonstrate how they meet this criteria as they relate to the draft List of Issues for the Reconsideration hearing.

Those not granted intervenor status – as well as any other interested person or group – will be able to file a letter of comment by a deadline to be set by the Board at a later time.

How to file an ATP form

The ATP form for this Reconsideration hearing can be found on the Board's [website](#).

If you require a hard copy of the ATP form, please contact a Process Advisor (see Part J below).

I. Participant funding

Participant funding is available to facilitate eligible intervenors' participation in this hearing. A simplified funding process will be used for this hearing to reduce administrative burden. Eligible groups may request up to \$80,000, and individuals up to \$12,000.

For information about participant funding and eligible costs, please visit www.neb-one.gc.ca/pfp or contact a Participant Funding Program Coordinator at 1-800-899-1265.

The Participant Funding Request Form is found at the link above, and also attached to this letter as Appendix 3.

J. Where to find additional information

As information becomes available or is released regarding the Reconsideration hearing, the Board's will update its Project [webpage](#).

If you require additional information about this letter, including information on how to file an ATP form or comments, please contact a Process Advisor by phone at 1-800-899-1265 (toll-free) or by email at TMX.ProcessHelp@neb-one.gc.ca.

Trans Mountain is directed to serve this letter on its list of interested parties.

Yours truly,

Original signed by

Sheri Young
Secretary of the Board

Appendix 1

Draft Amended Factors and Scope of the Factors for the Environmental Assessment pursuant to the *Canadian Environmental Assessment Act, 2012*⁴

1.0 INTRODUCTION

On 16 December 2013, Trans Mountain Pipeline ULC (Trans Mountain) filed an application with the National Energy Board (Board or NEB) proposing to construct and operate the Trans Mountain Expansion Project (Project). As the Project would require more than 40 kilometres of new pipeline and would be regulated under the *National Energy Board Act* (NEB Act), it is a designated project under the *Canadian Environmental Assessment Act, 2012* (CEAA 2012) and requires a CEAA 2012 environmental assessment for which the NEB is the Responsible Authority. On 20 September 2018, through [OIC P.C. 2018-1177](#), the Governor in Council (GIC) referred aspects of the Board's [Report](#) for the Project back to the Board for reconsideration.

For the purposes of the environmental assessment under the CEAA 2012, the designated project includes the various components and physical activities as described by Trans Mountain in its 16 December 2013 application submitted to the NEB. The Board determined that Project-related marine shipping between the Westridge Marine Terminal and the 12-nautical-mile territorial sea limit is also part of the “designated project” under the CEAA 2012. ~~The Board has determined that the potential environmental and socio-economic effects of increased marine shipping activities to and from the Westridge Marine Terminal that would result from the designated project, including the potential effects of accidents or malfunctions that may occur, will be considered under the NEB Act (see the NEB's Letter of 10 September 2013 for filing requirements specific to these marine shipping activities). To the extent that there is potential for environmental effects of the designated project to interact with the effects of the marine shipping, the Board will consider those effects under the cumulative effects portion of the CEAA 2012 environmental assessment.~~

As noted in the List of Issues (attached to Hearing Order [OH-001-2014](#)), the Board does not intend to consider the environmental and socio-economic effects associated with upstream activities, the development of oil sands, or the downstream use of the oil transported by the pipeline.

In accordance with paragraph 79(2)(b) of the CEAA 2012, the following provides a description of the factors to be taken into account in the environmental assessment under the CEAA 2012 and of the scope of those factors.

⁴ Deletions from the original Scope of Factors are shown with in ~~black strikethrough~~ text, while draft additions are shown in red underlined text. While this document indicates that Project-related marine shipping is part of the designated project on a draft basis, the Board will consider comments on this issue.

2.0 FACTORS AND SCOPE OF THE FACTORS

2.1 Factors to be considered

The CEAA 2012 environmental assessment for the designated project will take into account the factors described in paragraphs 19(1)(a) through (h) of the CEAA 2012:

- (a) the environmental effects⁵ of the designated project, including the environmental effects of malfunctions or accidents that may occur in connection with the designated project and any cumulative environmental effects that are likely to result from the designated project in combination with other physical activities that have been or will be carried out;
- (b) the significance of the effects referred to in paragraph (a);
- (c) comments from the public or any interested party received in accordance with the CEAA 2012;
- (d) mitigation measures that are technically and economically feasible and that would mitigate any significant adverse environmental effects of the designated project;
- (e) the requirements of the follow-up program in respect of the designated project;
- (f) the purpose of the designated project;
- (g) alternative means of carrying out the designated project that are technically and economically feasible and the environmental effects of any such alternative means; and
- (h) any change to the designated project that may be caused by the environment.

In addition, the environmental assessment will also consider community knowledge and Aboriginal traditional knowledge.

2.2 Scope of the factors to be considered

The environmental assessment will consider the potential effects of the designated project within spatial and temporal boundaries within which the designated project may potentially interact with and have an effect on components of the environment. These boundaries will vary with the issues and factors considered, and will include, but not be limited to:

- construction, operation and maintenance, foreseeable changes, and site reclamation, as well as any other undertakings proposed by the proponent or that are likely to be carried out in relation to the physical works proposed by the proponent, including mitigation and habitat replacement measures;
- seasonal or other natural variations of a population or ecological component;
- any sensitive life cycle phases of species (e.g., wildlife, vegetation) in relation to the timing of Project activities;

⁵ Section 5 of the CEAA 2012 further describes the environmental effects that are to be taken into account.

- the time required for an effect to become evident;
- the area within which a population or ecological component functions; and
- the area affected by the Project.

Any works and activities associated with additional modifications or associated with the decommissioning or abandonment phase of the Project would be subject to a future application under the NEB Act and assessed in detail at that time. Therefore, at this time, any works or activities associated with these phases of the Project will be examined in a broad context only. As indicated above, the environmental assessment will consider cumulative environmental effects that are likely to result from the designated project in combination with effects from other physical activities that have been or will be carried out.

Subsection 2(1) of the CEAA 2012 provides definitions potentially relevant to the scope of the factors, including:

“environment” which means the components of the Earth, including

- (a) land, water and air, including all layers of the atmosphere;
- (b) all organic and inorganic matter and living organisms; and
- (c) the interacting natural systems that include components referred to in paragraphs (a) and (b);

and

“mitigation measures” which means measures for the elimination, reduction or control of the adverse environmental effects of a designated project, and includes restitution for any damage to the environment caused by those effects through replacement, restoration, compensation or any other means.

Appendix 2

Draft List of Issues for the Reconsideration Hearing

The Board's Reconsideration hearing will consider any necessary changes or additions to its May 2016 Report, in light of the inclusion of Project-related marine shipping in the "designated project" under the CEAA 2012. This includes issues related to factors described in paragraphs 19(1)(a) through (h) of the CEAA 2012 and to section 79 of the SARA:

- 1) The environmental effects of Project-related marine shipping, including adverse effects on species at risk, and the significance of those effects.
- 2) Measures that are technically and economically feasible, and that would mitigate any significant adverse environmental effects of Project-related marine shipping. *Given that the Board found four significant adverse effects related to Project-related marine shipping in its original assessment⁶ (i.e., greenhouse gas emissions, Southern resident killer whale, traditional Aboriginal use associated with Southern resident killer whale, and the potential effects of a large or credible worst-case spill), the consideration of mitigation measures will focus on these four matters. This will include consideration of whether the mitigation measures will change the Board's previous significance findings.*
- 3) Alternative means for carrying out Project-related marine shipping that are technically and economically feasible, and the environmental effects of such alternative means.⁷
- 4) Requirements of any follow-up program in respect of Project-related marine shipping.
- 5) Measures to avoid or lessen the adverse effects of Project-related marine shipping on SARA-listed wildlife species and their critical habitat, including monitoring, and consideration of how the undertaking of such measures could be ensured. *The Board's original assessment identified the SARA-listed marine fish, marine mammal, and marine bird species that could be found in the area of, or affected by, Project-related marine shipping,⁸ providing a focus for this issue. Any marine species that have been newly listed, or any species that have seen a change to their designation, since the issuance of the Board's Report and that could be affected by Project-related marine shipping would also require consideration under the SARA.*
- 6) Whether there should be any changes or additions to the Board's recommendations for the Project, or recommended terms or conditions, in light of the above issues.

⁶ See the Board's Report at pages 337, 350-351, 363, 378, and 397-398.

⁷ For greater clarification, the Board does not intend to reconsider alternate locations for the Westridge Marine Terminal as this was previously considered.

⁸ See the Board's Report at pages 338, 341, and 352.

The consideration of the above issues will be limited to Project-related marine shipping between the Westridge Marine Terminal to the 12-nautical-mile territorial sea limit.

The Board is of the view that certain issues described above, in particular Issue #1, were thoroughly canvassed in the OH-001-2014 Certificate hearing and may not require additional evidence. The Board is particularly interested in new, additional evidence (including comments from the public, community knowledge, and Indigenous traditional knowledge) on Issues #s 2 to 5.

Appendix 3 Participant Funding Request Form

MH-052-2018 – Participant Funding Request Form

The National Energy Board (NEB) administers a Participant Funding Program (PFP) independently of the hearing process. Funding is available for eligible intervenors, including Indigenous groups, individuals with a direct local interest, as well as non-industry not-for-profit groups. A simplified funding process has been approved for this hearing to reduce administrative burden. Eligible groups may request up to \$80,000, and individuals up to \$12,000, to participate in this hearing. For more information about the PFP and reimbursement of eligible costs, go to www.neb-one.gc.ca/pfp or contact a PFP Coordinator at 1-800-899-1265.

If you want to request funding, please return a completed form **on or before [ATP Deadline]** to the PFP by email pfppafp@neb-one.gc.ca or by fax 1-877-288-8803.

1. Funding Applicant

Legal name of entity or individual applying for funding

CRA Business # or Band #

Address 1 [apt.; street; city]

Address 2 [province; postal code, zip code; country]

Phone

Fax

Website

2. Funding requested

Please specify the amount of funding you are requesting: \$

Eligible groups may request up to \$80,000, and individuals up to \$12,000.

3. Primary contact for funding

Name and title of person the PFP will contact about funding

Phone

Fax

Email

4. Signing authority for funding

Name and title of person authorized by the applicant to sign funding agreement

Phone

Fax

Email

Important

Once a complete form is received, PFP staff will send you a contribution agreement to be signed. Once signed by both parties, the information provided will be used to administer funding in accordance with the NEB's PFP program, including public disclosure of the award. PFP is a reimbursement-based program, you must submit claims for eligible expenses incurred in order to receive payment.

Privacy notice statement

Your personal information is being collected to process your request to the PFP pursuant to the *National Energy Board Act*. Providing this information is voluntary however, missing information may affect our ability to communicate with you and assess your application. Your personal information will be protected in accordance with the *Privacy Act*. You have the right to access and correct any of your personal information held by the NEB. For more details contact the NEB's Access to Information and Privacy Coordinator at DLATIPCoordinator@neb-one.gc.ca and cite Personal Information Bank NEB PPU 025.

ORDERS IN COUNCIL

DEPARTMENT OF NATURAL RESOURCES

NATIONAL ENERGY BOARD ACT

Trans Mountain Expansion Project Reconsideration

P.C. 2018-1177

September 20, 2018

Whereas, on December 16, 2013, Trans Mountain Pipeline ULC ("Trans Mountain") applied to the National Energy Board ("the Board") pursuant to Part III of the *National Energy Board Act* for a certificate of public convenience and necessity in respect of the proposed construction and operation of the Trans Mountain Expansion Project ("Project");

Whereas, on May 19, 2016, having reviewed Trans Mountain's application and conducted an environmental assessment of the Project, the Board submitted its report on the Project entitled *Trans Mountain Expansion Project OH-001-2014* ("the Board's Report") to the Minister of Natural Resources, pursuant to section 29 of the *Canadian Environmental Assessment Act, 2012* and section 52 of the *National Energy Board Act*;

Whereas, on November 29, 2016, the Governor in Council issued Order in Council P.C. 2016-1069, which accepted the Board's recommendation that the Project will be, if the terms and conditions set out in Appendix 3 of the Board's Report are complied with, required by the present and future public convenience and necessity under the *National Energy Board Act* and will not likely cause significant adverse environmental effects under the *Canadian Environmental Assessment Act, 2012*;

Whereas, on December 1, 2016, at the direction of the Governor in Council, the Board issued Certificate of Public Convenience and Necessity OC-064 to Trans Mountain, in respect of the Project, making it subject to the terms and conditions set out in Appendix 3 of the Board's Report;

Whereas, on August 30, 2018, the Federal Court of Appeal ("the Court") quashed Order in Council P.C. 2016-1069 in its decision *Tsleil-Waututh Nation v. Canada (Attorney General)* (2018 FCA 153) ("*Tsleil-Waututh Nation*") and remitted the issue of Project approval to the Governor in Council for prompt redetermination;

And whereas, in *Tsleil-Waututh Nation*, the Court concluded, among other things, that the Board ought to reconsider on a principled basis whether Project-related marine shipping is incidental to the Project,

A Commissioner for taking affidavits for
British Columbia

DÉCRETS

MINISTÈRE DES RESSOURCES NATURELLES

LOI SUR L'OFFICE NATIONAL DE L'ÉNERGIE

Réexamen du projet d'agrandissement du réseau de Trans Mountain

C.P. 2018-1177

Le 20 septembre 2018

Attendu que, le 16 décembre 2013, Trans Mountain Pipeline ULC (Trans Mountain) a présenté à l'Office national de l'énergie (Office), sous le régime de la partie III de la *Loi sur l'Office national de l'énergie*, une demande visant l'obtention d'un certificat d'utilité publique concernant la construction et l'exploitation projetées quant au projet d'agrandissement du réseau de Trans Mountain (projet);

Attendu que, le 19 mai 2016, après avoir examiné la demande de Trans Mountain et effectué l'évaluation environnementale du projet, l'Office a présenté au ministre des Ressources naturelles son rapport sur le projet intitulé *Projet d'agrandissement du réseau de Trans Mountain OH-001-2014* (rapport de l'Office), conformément à l'article 29 de la *Loi canadienne sur l'évaluation environnementale (2012)* et à l'article 52 de la *Loi sur l'Office national de l'énergie*;

Attendu que, par le décret C.P. 2016-1069 du 29 novembre 2016, le gouverneur en conseil a accepté la recommandation de l'Office selon laquelle, si les conditions énoncées à l'annexe 3 du rapport de l'Office sont respectées, le projet présentera, aux termes de la *Loi sur l'Office national de l'énergie*, un caractère d'utilité publique, tant pour le présent que pour le futur, et que le projet n'est pas susceptible d'entraîner des effets environnementaux négatifs importants pour l'application de la *Loi canadienne sur l'évaluation environnementale (2012)*;

Attendu que, le 1^{er} décembre 2016, sur instruction du gouverneur en conseil, l'Office a délivré à Trans Mountain le certificat d'utilité publique OC-064, assortissant celui-ci des conditions énoncées à l'annexe 3 du rapport de l'Office;

Attendu que, le 30 août 2018, la Cour d'appel fédérale (Cour) a annulé le décret C.P. 2016-1069 dans la décision qu'elle a rendue dans l'affaire *Tsleil-Waututh Nation c. Canada (Procureur général)* (2018 CAF 153) (affaire *Tsleil-Waututh Nation*) et a renvoyé la question de l'approbation du projet à la gouverneure en conseil pour qu'elle prenne rapidement une nouvelle décision;

Attendu que, dans l'affaire *Tsleil-Waututh Nation*, la Cour a notamment conclu que l'Office devait réexaminer, à la lumière des principes, les questions suivantes, à savoir si le transport maritime associé au

the application of section 79 of the *Species at Risk Act* to Project-related shipping, the Board's environmental assessment of the Project in light of the Project's definition, the Board's recommendation under subsection 29(1) of the *Canadian Environmental Assessment Act, 2012* and any other matter the Governor in Council should consider appropriate;

Therefore, Her Excellency the Governor General in Council, on the recommendation of the Minister of Natural Resources, pursuant to section 53 of the *National Energy Board Act* and section 30 of the *Canadian Environmental Assessment Act, 2012*,

(a) refers back to the National Energy Board for reconsideration the recommendations and all terms or conditions set out in its May 19, 2016 report entitled *Trans Mountain Expansion Project OH-001-2014* that are relevant to addressing the issues specified by the Federal Court of Appeal in paragraph 770 of *Tsleil-Waututh Nation v. Canada (Attorney General)* (2018 FCA 153), including conditions 91, 131 to 134, 144 and 151;

(b) directs that the Board conduct the reconsideration taking into account the following factors:

(i) the environmental effects of Project-related marine shipping in view of the requirements of the *Canadian Environmental Assessment Act, 2012*, and

(ii) the adverse effects of Project-related maritime shipping on species at risk, including the Northeast Pacific southern resident killer whale population, and their critical habitat, in view of any requirements of section 79 of the *Species at Risk Act* that may apply to the Project; and

(c) directs that the Board complete its reconsideration within 155 calendar days after the day on which this Order is made.

projet est accessoire au projet, l'application de l'article 79 de la *Loi sur les espèces en péril* au transport maritime associé au projet, l'évaluation environnementale du projet par l'Office à la lumière de la définition du projet, la recommandation faite par l'Office sous le régime du paragraphe 29(1) de la *Loi canadienne sur l'évaluation environnementale (2012)* et toute autre question que la gouverneure en conseil estime indiquée,

À ces causes, sur recommandation du ministre des Ressources naturelles et en vertu de l'article 53 de la *Loi sur l'Office national de l'énergie* et de l'article 30 de la *Loi canadienne sur l'évaluation environnementale (2012)*, Son Excellence la Gouverneure générale en conseil :

a) renvoie à l'Office national de l'énergie, pour réexamen, les recommandations et les conditions contenues dans son rapport du 19 mai 2016 intitulé *Projet d'agrandissement du réseau de Trans Mountain OH-001-2014* qui sont pertinentes dans le cadre de l'examen des questions énoncées par la Cour d'appel fédérale au paragraphe 770 de la décision dans l'affaire *Tsleil-Waututh Nation c. Canada (Procureur général)* (2018 CAF 153), notamment les conditions 91, 131 à 134, 144 et 151;

b) donne instruction à l'Office de tenir compte des facteurs ci-après dans le cadre du réexamen :

(i) les effets environnementaux du transport maritime associé au projet, selon les exigences de la *Loi canadienne sur l'évaluation environnementale (2012)*,

(ii) les effets nocifs du transport maritime associé au projet sur les espèces en péril, y compris la population d'épaulards résidente du sud du Pacifique Nord-Est, et sur leur habitat essentiel, selon les exigences de l'article 79 de la *Loi sur les espèces en péril* pouvant s'appliquer au projet;

c) ordonne à l'Office de compléter le réexamen dans les cent cinquante-cinq jours civils suivant la prise du présent décret.

EXPLANATORY NOTE

(This note is not part of the Order.)

Proposal and objectives

This order in council reflects the Governor in Council's (GIC) decision to refer, pursuant to section 53 of the *National Energy Board Act* (NEB Act) and section 30 of the *Canadian Environmental Assessment Act, 2012* (CEAA, 2012), the National Energy Board's ("Board") recommendations as set out in its report of May 19, 2016, entitled *Trans Mountain Expansion Project OH-001-2014*

NOTE EXPLICATIVE

(La présente note ne fait pas partie du Décret.)

Proposition et objectifs

Le présent décret reflète la décision de la gouverneure en conseil (GC), conformément à l'article 53 de la *Loi sur l'Office national de l'énergie* (Loi sur l'Office) et à l'article 30 de la *Loi canadienne sur l'évaluation environnementale (2012)* [LCEE (2012)], de renvoyer à l'Office national de l'énergie (l'Office), pour réexamen, les recommandations de son rapport du 19 mai 2016, intitulé *Projet*

(“Report”), in respect of the proposed construction and operation of the Trans Mountain Expansion Project (“Project”), back to the Board for reconsideration. In carrying out the reconsideration, the GIC has also directed the Board to take into account specified factors regarding the issue of Project-related marine shipping, all of which is to be completed within the time limit specified by the GIC.

Reconsideration of the Report by the Board responds to the Federal Court of Appeal (“Court”) decision in *Tsleil-Waututh Nation v. Canada (Attorney General)* (2018 FCA 153) (“*Tsleil-Waututh Nation*”), which quashed Order in Council P.C. 2016-1069 and remitted the issue of Project approval to the GIC for prompt redetermination.

In the *Tsleil-Waututh Nation* decision, the Court concluded, among other things, that the Board ought to reconsider on a principled basis whether Project-related marine shipping is incidental to the Project, the application of section 79 of the *Species at Risk Act* (SARA) to Project-related marine shipping, the Board's environmental assessment of the Project in light of the Project's definition, the Board's recommendation under subsection 29(1) of the CEAA, 2012, and any other matter the GIC should consider appropriate.

Background

Trans Mountain Expansion Project background

Trans Mountain submitted its application to the Board for a certificate for the Project on December 16, 2013. The purpose of the Project is to increase capacity of the pipeline system from 300 000 barrels per day (bbl/d) to 890 000 bbl/d by twinning the existing Trans Mountain pipeline that currently transports oil from Edmonton to Burnaby. The Project has the potential to unlock large-scale access to world markets, including in the Pacific basin and Asia and create shipping options for Canadian oil producers to multiple markets. The proponent submitted that the largest contribution of the Project to tax revenues and investment is expected to come from higher prices that oil producers will receive when selling it to overseas markets.

The pipeline would follow an existing right-of-way for 89% of its 1 147 km length. The Project would also expand the Westridge Marine Terminal (WMT) by adding two berths to allow the terminal to increase, from 5 to 34, the number of tankers it receives per month. This would increase Project-related tanker traffic through the Burrard Inlet by up to 13.4% and in the Juan de Fuca Strait by 6.6% over current levels.

d'agrandissement du réseau de Trans Mountain OH-001-2014 (Rapport), portant sur la construction et l'exploitation projetées du Projet d'agrandissement du réseau de Trans Mountain (le Projet). Pour ce réexamen, la GC a également ordonné à l'Office de tenir compte des facteurs spécifiés et spécifiques à la question du transport maritime associé au Projet, et de terminer son travail dans les délais prescrits par la GC.

Le réexamen du Rapport que l'Office doit effectuer fait suite à la décision rendue par la Cour d'appel fédérale (la Cour) dans l'affaire *Tsleil-Waututh Nation c. Canada (Procureur général)* (2018 CAF 153) (affaire *Tsleil-Waututh Nation*), qui a annulé le décret C.P. 2016-1069 et renvoyé la question de l'approbation du Projet à la GC pour une nouvelle décision dans le délai imparti.

Dans la décision rendue dans l'affaire *Tsleil-Waututh Nation*, la Cour a conclu, entre autres choses, que l'Office devait réexaminer sur la base des principes : (i) si le transport maritime associé au Projet était accessoire au Projet; (ii) l'application de l'article 79 de la *Loi sur les espèces en péril* (LEP) au transport maritime associé au Projet; (iii) l'évaluation environnementale qu'il a effectuée à la lumière de la définition du Projet; (iv) sa recommandation en vertu du paragraphe 29(1) de la LCEE (2012) et toute autre question que la GC jugerait pertinente.

Contexte

Contexte du Projet d'agrandissement du réseau de Trans Mountain

Le 16 décembre 2013, Trans Mountain a présenté à l'Office sa demande de certificat pour le Projet. Le Projet vise à augmenter la capacité du réseau de pipelines de 300 000 barils de pétrole par jour (b/j) à 890 000 b/j en doublant le pipeline de Trans Mountain existant qui transporte actuellement le pétrole d'Edmonton à Burnaby. Le Projet a le potentiel de débloquer l'accès à grande échelle aux marchés mondiaux, notamment dans le bassin du Pacifique et en Asie, et d'offrir des options de transport aux producteurs de pétrole canadiens leur permettant l'accès à divers marchés. Le promoteur a indiqué que l'essentiel de la contribution du Projet aux recettes fiscales et aux investissements devrait provenir des prix plus élevés que les producteurs de pétrole obtiendront lorsqu'ils vendront le pétrole sur les marchés d'outre-mer.

Le pipeline longerait l'emprise existante sur 89 % de sa longueur totale de 1 147 km. Le projet agrandirait également le terminal maritime Westridge (TMW) par l'ajout de deux postes d'accostage, ce qui ferait passer de 5 à 34 le nombre de pétroliers qu'il accueille par mois. Cela augmenterait aussi le trafic de pétroliers lié au projet à concurrence de 13,4 % des niveaux actuels dans la baie Burrard et de 6,6 % dans le détroit Juan de Fuca.

Trans Mountain commenced construction on the Project on September 26, 2017. On May 29, 2018, the Government of Canada announced that it has reached an agreement with Kinder Morgan to purchase the company's Trans Mountain Expansion Project and related pipeline and terminal assets. The Government has now completed the purchase agreement.

NEB review process

In April 2014, the Board issued Hearing Order OH-001-2014, setting out the process for the public review of the Project. The Board received and considered a total of 2 118 applications to participate in the OH-001-2014 hearing for the Project. The Board granted standing to participate to 1 650 applicants. Out of these 1 650 hearing participants, 400 participated as intervenors and the remaining as commenters. Hearing participants were from various groups, including federal and provincial governments, business, Indigenous peoples, landowners, individuals and non-governmental organizations. A total of \$3,085,370 in participant funding was allocated to 72 intervenors.

On May 19, 2016, the Board found that the Project was in the public interest and recommended that a Certificate be issued under section 52 of the NEB Act for the construction and operation of the Project. The Certificate is subject to 157 terms and conditions that the Board considered necessary or desirable in the public interest. Pursuant to section 29 of the CEAA, 2012, the Report also stated that the Board is of the view that with the implementation of Trans Mountain's environmental protection procedures, and full compliance with the Board's recommended terms and conditions, the Project is not likely to cause significant adverse environmental effects.

On November 29, 2016, following seven months of consultations, which included a four-month extension of the legislated timeline to allow for deeper Indigenous consultations and public engagement on the Project, the Governor in Council issued Order in Council P.C. 2016-1069, accepting the Board's recommendation that the Project will be required by the present and future public convenience and necessity under the NEB Act and will not likely cause significant adverse environmental effects under the *Canadian Environmental Assessment Act, 2012*.

Under the January 2016 interim approach for major projects review, five principles were used to guide the Government's decision: (i) no project proponent will be asked to return to the starting line; (ii) decisions will be based on science, traditional knowledge of Indigenous peoples and other relevant evidence; (iii) the views of the public and affected communities will be sought and considered; (iv) Indigenous peoples will be meaningfully consulted and, where appropriate, impacts on their rights and

Le 26 septembre 2017, Trans Mountain a démarré les travaux de construction du projet. Le 29 mai 2018, le gouvernement du Canada a annoncé qu'il avait conclu une entente avec Kinder Morgan pour acheter son Projet d'agrandissement du réseau de Trans Mountain et les actifs de terminaux et de pipelines connexes. Le gouvernement a maintenant complété l'accord d'achat.

Processus d'examen de l'Office

En avril 2014, l'Office a émis l'ordonnance d'audience OH-001-2014 établissant le processus d'examen public du Projet. L'Office a reçu et examiné un total de 2 118 demandes de participation à l'audience OH-001-2014 sur le Projet. Il a accordé le droit de participer à 1 650 demandeurs du statut de participant. Sur ces 1 650 participants à l'audience, 400 ont pris part à titre d'intervenants, et les autres, à titre de commentateurs. Les participants à l'audience provenaient de divers groupes, dont les gouvernements fédéral et provinciaux, le milieu des affaires, les peuples autochtones, les propriétaires fonciers, les particuliers et les organisations non gouvernementales. Une aide financière totale de 3 085 370 \$ a été allouée à 72 intervenants.

Le 19 mai 2016, l'Office a conclu que le Projet était dans l'intérêt public et a recommandé qu'un certificat soit délivré en vertu de l'article 52 de la Loi sur l'Office pour la construction et l'exploitation du projet. Le certificat est assujéti à 157 conditions que l'Office juge souhaitables ou nécessaires dans l'intérêt public. En vertu de l'article 29 de la LCEE (2012), le Rapport précise également que l'Office estime que grâce à la mise en œuvre des procédures de protection de l'environnement proposées par Trans Mountain et à son respect de toutes les conditions et modalités recommandées par l'Office, le Projet ne sera pas susceptible d'entraîner des effets environnementaux négatifs importants.

Le 29 novembre 2016, après sept mois de consultations, dont quatre mois de prolongation du délai réglementaire pour permettre la tenue de consultations plus approfondies avec les Autochtones et la participation du public au Projet, la GC a pris le décret C.P. 2016-1069, acceptant ainsi la recommandation de l'Office selon laquelle le Projet sera d'utilité publique, tant pour le présent que pour le futur, en vertu de la Loi sur l'Office et qu'il ne sera pas susceptible d'entraîner des effets environnementaux négatifs importants en vertu de la LCEE (2012).

Dans le cadre de l'approche provisoire de janvier 2016 pour l'examen de grands projets, cinq principes ont été retenus pour orienter la décision du gouvernement, à savoir : (i) aucun promoteur n'aura à retourner au point de départ; (ii) les décisions seront fondées sur des données scientifiques, les connaissances traditionnelles des peuples autochtones et d'autres données pertinentes; (iii) on s'enquerra des points de vue du public et des collectivités concernées pour les prendre en compte; (iv) les

interests will be accommodated; and (v) direct and upstream greenhouse gas emissions ("GHG emissions") linked to the projects under review will be assessed.

At the direction of the Governor in Council, on December 1, 2016, the Board issued Certificate of Public Convenience and Necessity OC-064 to Trans Mountain Pipeline ULC in respect of the proposed construction and operation of the Trans Mountain Expansion Project, subject to terms and 157 conditions set out in Appendix 3 of the Board's Report of May 19, 2016, entitled *Trans Mountain Expansion Project OH-001-2014*, and issued to Trans Mountain Pipeline ULC Amending Orders AO-002-OC-49 and AO-003-OC-2.

Indigenous consultations

Seventy-three Indigenous groups (representing 83 Indigenous communities) participated as intervenors in the hearing and provided their comments, views and evidence through written submissions and oral evidence to the Board. A total of 35 Indigenous groups and individuals provided oral traditional evidence to the Board during the hearing. To date, the proponent concluded benefit agreements with 43 Indigenous groups.

Federal officials began consulting on this Project with Indigenous groups in 2013. The Crown identified a legal duty to consult with 117 Indigenous groups potentially impacted by the Project and offered these groups \$2 million in participant funding. Consultations following receipt of the Board's Report were carried out in partnership with British Columbia given the need for a provincial environmental assessment decision on the Project. Concerns from Indigenous groups expressed during the consultation process included cumulative impacts from increased marine shipping, risks related to land-based and marine spills, impacts to asserted title and need for consent, uncertainty around proponent compliance with NEB conditions, and concerns with the existing pipeline. To respond to what was heard during these consultations, the Government committed \$64.7 million in funding for an Indigenous Advisory and Monitoring Committee that has been working with federal regulators and the proponent to oversee environmental aspects throughout the Project's life cycle.

Federal Court of Appeal decision

On August 30, 2018, the Federal Court of Appeal quashed Order in Council P.C. 2016-1069 in its decision in *Tsleil-Waututh Nation* and remitted the issue of Project approval to the GIC for prompt redetermination.

peuples autochtones seront consultés sérieusement et, s'il y a lieu, on fera en sorte de tenir compte des répercussions sur leurs droits et intérêts; (v) les émissions de gaz à effet de serre directes et en amont attribuables à ces projets à l'étude seront évaluées.

Le 1^{er} décembre 2016 et sur instruction de la GC, l'Office a délivré à Trans Mountain Pipeline ULC le certificat d'utilité publique OC-064 autorisant la construction et l'exploitation du projet d'agrandissement du réseau de Trans Mountain, sous réserve des modalités et des 157 conditions énoncées à l'annexe 3 du Rapport de l'Office daté du 19 mai 2016 et intitulé *Projet d'agrandissement du réseau de Trans Mountain OH-001-2014*; l'Office a également délivré à Trans Mountain Pipeline ULC les ordonnances modificatrices AO-002-OC-49 et AO-003-OC-2.

Consultations des Autochtones

Soixante-treize groupes autochtones (représentant 83 collectivités autochtones) ont participé à l'audience à titre d'intervenants et ont donné leurs commentaires, leurs points de vue et des éléments de preuve par écrit et de vive voix à l'Office. Au total, 35 groupes et individus autochtones ont fourni des preuves traditionnelles de vive voix à l'Office durant l'audience. Jusqu'ici, le promoteur a conclu des ententes de prestations avec 43 groupes autochtones.

Des fonctionnaires du gouvernement fédéral ont commencé à consulter des groupes autochtones en 2013. La Couronne a établi qu'elle avait l'obligation légale de consulter 117 groupes autochtones susceptibles d'être touchés par le Projet; elle a par ailleurs offert 2 millions de dollars à ces groupes pour faciliter leur participation. Les consultations qui ont suivi la réception du Rapport de l'Office ont été menées en partenariat avec la Colombie-Britannique, puisqu'elle doit prendre une décision d'évaluation environnementale provinciale sur le Projet. Les préoccupations exprimées par les groupes autochtones lors de la consultation comprennent les effets cumulatifs engendrés par le transport maritime accru, les risques liés aux déversements terrestres et marins, les répercussions sur les titres revendiqués et la nécessité de consentement, l'incertitude liée au respect par le promoteur des conditions imposées par l'Office et les préoccupations relatives au pipeline existant. Pour répondre aux commentaires reçus lors de ces consultations, le gouvernement a offert une aide financière de 64,7 millions de dollars pour mettre sur pied un comité consultatif et de suivi autochtone qui travaille avec les organismes de réglementation fédéraux et le promoteur pour superviser les aspects environnementaux tout au long du cycle de vie du Projet.

Décision de la Cour d'appel fédérale

Le 30 août 2018, la Cour d'appel fédérale a annulé le Décret C.P. 2016-1069 dans la décision qu'elle a rendue dans l'affaire *Tsleil-Waututh Nation* et a renvoyé la question de l'approbation du Projet à la GC pour une nouvelle décision dans les meilleurs délais.

The Court decision noted the following: “Given the Board’s approach to the assessment and its findings, the Board’s report was adequate for the purpose of informing the Governor in Council about the effects of Project-related marine shipping on the Southern resident killer whales and their use by Indigenous groups.” However, the Court ruled that the Board’s decision to exclude Project-related shipping from its environmental assessment under CEAA, 2012 was not adequately justified. The Court concluded, among other things, that the Board ought to reconsider on a principled basis whether Project-related marine shipping is incidental to the scope of the Project, the application of section 79 of the *Species at Risk Act* to Project-related shipping, the Board’s environmental assessment of the Project in light of the Project’s scope, the Board’s recommendation under subsection 29(1) of the *Canadian Environmental Assessment Act, 2012* and any other matter the Governor in Council should consider appropriate. In addition, the Court concluded that Canada must redo its Phase III Indigenous consultation on the Project. Once that consultation is completed as well as any necessary accommodation, the Project will be put before the GIC for a decision on whether it should be approved.

Review of marine shipping impacts

The Board found that with the implementation of Trans Mountain’s proposed environmental protection procedures and mitigation measures, and the Board’s recommended conditions, pursuant to its authority under the CEAA, 2012, the Project is not likely to cause significant adverse environmental effects. However, The Board’s scope assessment of the Project under the CEAA, 2012 encompassed Edmonton to Burnaby, up to and including the WMT — the extent of the Board’s regulatory oversight of the Project. Under the NEB Act, the Board determined that potential environmental and socio-economic effects of Project-related tanker traffic, including the potential effects of accidents or malfunctions that may occur, are relevant to the Board’s consideration of the public interest.

While the Board did not include Project-related marine shipping activities in the Project under the CEAA, 2012, since it considered that these are not regulated by the Board and are outside its authority, the Board considered the potential effects of increased marine shipping activities as part of its overall public interest determination under the NEB Act. For instance, the Report found that GHG emissions from Project-related marine vessels are likely to be significant given the absence of emissions reporting thresholds for vessels. Marine shipping is primarily regulated by Transport Canada under the *Canada Shipping Act, 2001* and through international conventions.

Dans sa décision, la Cour a constaté ce qui suit : « Étant donné la méthode que l’Office a retenue pour faire son évaluation et ses conclusions, le Rapport de l’Office était suffisant pour informer le gouverneur en conseil des effets du transport maritime lié au Projet sur les épaulards résidents du sud et l’utilisation de cette ressource par des groupes autochtones ». Cependant, elle a conclu que la décision de l’Office d’exclure de son évaluation environnementale, en vertu de la LCEE (2012), le transport maritime associé au Projet, n’était pas adéquatement justifiée. En outre, elle a conclu, entre autres choses, que l’Office devrait réexaminer sur la base de principes, à savoir : (i) si le transport maritime lié au Projet était accessoire à la portée du Projet; (ii) l’application de l’article 79 de la LEP au transport maritime lié au Projet; (iii) l’évaluation environnementale de l’Office du Projet à la lumière de la portée du Projet; (iv) la recommandation de l’Office en vertu du paragraphe 29(1) de la LCEE (2012) et toute autre question que la GC jugerait pertinente. Par ailleurs, la Cour a estimé que le Canada devait reprendre la phase III de ses consultations auprès des Autochtones sur le Projet. Une fois que les consultations seront terminées et que toute mesure d’accommodement nécessaire aura été apportée, le Projet sera présenté à la GC pour qu’elle prenne la décision d’approuver ou non le Projet.

Examen des répercussions du transport maritime

L’Office a conclu que grâce à la mise en œuvre des procédures de protection de l’environnement et des mesures d’atténuation proposées par le promoteur, et grâce aux conditions qu’il recommandait conformément à son pouvoir en vertu de la LCEE (2012), le Projet n’était pas susceptible d’entraîner des effets environnementaux négatifs importants. Cependant, l’évaluation de la portée du Projet par l’Office en vertu de la LCEE (2012) comprenait la région s’étendant d’Edmonton à Burnaby, jusqu’au TMW inclusivement — ce qui correspond à l’étendue de la supervision réglementaire dont il jouit par rapport au Projet. En vertu de la Loi sur l’Office, l’Office a déterminé que les effets environnementaux et socioéconomiques potentiels découlant du trafic de pétroliers associé au Projet, y compris les effets potentiels d’accidents ou de défauts, étaient pertinents pour son examen de l’intérêt public.

Bien que l’Office n’ait pas inclus dans le Projet les activités du transport maritime associées au Projet en vertu de la LCEE (2012) puisqu’il considérait que celles-ci n’étaient pas réglementées par lui, et donc qu’elles ne relevaient pas de son autorité, il a néanmoins considéré les effets potentiels des activités du transport maritime accru dans sa décision sur l’intérêt public général en vertu de la Loi sur l’Office. Par exemple, le Rapport a établi que les émissions de gaz à effet de serre des navires associés au Projet seront probablement importantes, compte tenu de l’absence de seuils de déclaration des émissions pour les navires et du fait que le transport maritime est principalement régi par Transports Canada, en vertu de la *Loi sur la marine marchande du Canada de 2001* et des conventions internationales.

Marine shipping safety was also considered separately through a Technical Review Process of Marine Terminal Systems and Transshipment Sites (TERMPOL) process. TERMPOL is an extensive yet voluntary review process that proponents involved in building and operating a marine terminal system for bulk handling of oil, chemicals and liquefied gases can request. The review process was chaired and led by Transport Canada, with participation from other federal departments and stakeholders. The TERMPOL committee made 17 recommendations, which Trans Mountain supported. The TERMPOL report formed part of Transport Canada's written evidence before the National Energy Board.

Under the NEB Act, the Board was of the view that the operation of Project-related marine vessels would contribute to the total cumulative effects on the Southern resident killer whales, and would further impede the recovery of the Southern resident killer whale population, an endangered species that lives in the Salish Sea. The Board found that, as a result, the operation of Project-related marine vessels would likely result in significant adverse effects on the Southern resident killer whale, and on Aboriginal cultural uses associated with these marine mammals.

The Board encouraged other regulatory authorities, such as Transport Canada and the Department of Fisheries and Oceans, to explore initiatives that would aim to reduce the potential effects of marine vessels on marine mammals. In addition, Trans Mountain committed to a series of actions supporting the recovery of the Southern resident killer whale. For example, as part of its Marine Mammal Protection Program (Condition 132), Trans Mountain has committed to support the objectives and recovery measures identified in the action plan for the species.

In the Board's Report, there are conditions that relate to marine shipping, including Condition 91, Plan for implementing, monitoring and complying with marine shipping-related commitments; Condition 131, Marine Public Outreach Program; Condition 133, Marine shipping-related commitments, including spill response regime, tanker tug escort; Condition 134, Updated Tanker Acceptance Standard; Condition 144, Ongoing implementation of marine shipping-related commitments; and Condition 151, Post-construction environmental monitoring reports, among others. These and other conditions required the proponent to file plans, designs and reports on mitigation measures being implemented to address impacts from marine shipping. The proponent must also monitor and comply with all marine shipping-related commitments it made during the Board review process.

La sécurité du transport maritime a également été considérée séparément grâce au processus d'examen technique des terminaux maritimes et des sites de transbordement (TERMPOL). Le processus TERMPOL est un processus d'examen exhaustif, néanmoins volontaire, auquel peuvent adhérer, sur demande, les promoteurs de projets de construction et d'exploitation de systèmes de terminaux maritimes pour la manutention du pétrole en vrac, de produits chimiques et de gaz liquéfiés. Le processus d'examen a été présidé et dirigé par Transports Canada, avec la participation d'autres intervenants et ministères fédéraux. Le Comité du TERMPOL a formulé 17 recommandations auxquelles a souscrit Trans Mountain. Le rapport du TERMPOL faisait partie de la preuve écrite que Transport Canada a présentée à l'Office national de l'énergie.

En vertu de la Loi sur l'Office, l'Office était d'avis que l'exploitation des navires associés au Projet contribuerait aux effets cumulatifs totaux sur les épaulards résidents du Sud et nuirait davantage au rétablissement de la population de cette espèce en voie de disparition qui vit dans la mer Salish. En conséquence, l'Office a conclu que l'exploitation des navires associés au Projet serait susceptible d'entraîner des effets environnementaux négatifs importants sur les épaulards résidents du Sud, ainsi que sur les usages culturels que font les autochtones de ces mammifères marins.

L'Office a exhorté d'autres autorités réglementaires, notamment Transports Canada et Pêches et Océans Canada (POC), à examiner des initiatives susceptibles de réduire les effets potentiels des navires sur les mammifères marins. De plus, Trans Mountain s'est engagé à prendre une série de mesures pour soutenir le rétablissement de la population des épaulards résidents du Sud. Par exemple, dans le cadre de son Programme de protection des mammifères marins (condition 132), le promoteur s'est engagé à soutenir les objectifs et à poursuivre les mesures de rétablissement indiquées dans le plan d'action pour cette espèce.

Le Rapport de l'Office comporte des conditions qui ont trait au transport maritime, y compris la condition 91, Plan portant sur la mise en œuvre, la surveillance et l'observation des engagements relatifs au transport maritime; la condition 131, Programme d'éducation du public à la sécurité nautique; la condition 133, Engagements relatifs au transport maritime, notamment le système d'intervention d'urgence et l'escorte par remorqueur; la condition 134, Norme actualisée d'acceptation de pétroliers; la condition 144, Exécution continue des engagements liés à la marine marchande; la condition 151, Rapports de surveillance environnementale après construction, entre autres choses. Ces conditions, entre autres, exigeaient du promoteur de déposer des plans, des dessins et des rapports sur les mesures d'atténuation qui seront mises en œuvre afin de répondre aux effets des incidences du transport maritime. Le promoteur doit également surveiller

Oceans Protection Plan

On November 7, 2016, the Government of Canada launched the \$1.5 billion Oceans Protections Plan (OPP), the largest investment Canada has ever made to protect the country's coasts and marine environments. This funding will enhance marine safety along Canada's entire coastline — the longest in the world — supporting new and ongoing prevention, preparedness and response measures. The marine safety improvements from the Oceans Protection Plan, building on the robust system already in place, are putting extraordinary safeguards in place for all vessels, including those carrying petroleum products. To complement Canada's world-leading marine safety regime and response capacity, the Oceans Protection Plan will add to the already significant body of scientific knowledge concerning petroleum products in the marine context and incorporate Indigenous knowledge.

Action to support the recovery of the Northeast Pacific southern resident killer whale

The Government of Canada is taking action to support the recovery of the Northeast Pacific southern resident killer whale (SRKW) off the coast of British Columbia. Under the Oceans Protection Plan, Transport Canada has been working closely with industry stakeholders, Indigenous peoples, environmental non-governmental organizations, academia, the scientific community, and international partners to identify, test and analyze options to reduce underwater noise from vessels in order mitigate the increase in vessel traffic resulting from the Project. Building on this work, in June 2018, the Government of Canada announced the Whales Initiative, a \$167.4M investment in actions and necessary scientific research on the key threats affecting the SRKW, including prey availability, contaminants and underwater noise from vessels. DFO implemented fisheries management measures to provide more prey to SRKW in critical habitat and increased the mandatory distance for vessels. The Government is also strengthening research into cumulative effects to establish baselines to inform further actions.

tous les engagements pris en matière de transport maritime durant le processus d'examen de l'Office et s'y conformer.

Plan de protection des océans

Le 7 novembre 2016, le gouvernement du Canada a lancé le Plan de protection des océans (PPO), doté d'un budget de 1,5 milliard de dollars, le plus important investissement que le Canada ait jamais fait pour protéger les côtes et les environnements marins du pays. Ce financement améliorera la sécurité maritime sur tout le littoral du Canada — le plus long du monde — en appuyant de nouvelles mesures de prévention, de préparation et d'intervention. Les améliorations apportées à la sécurité maritime dans le cadre du PPO, en s'appuyant sur le solide système actuel, mettent en place des mesures de protection extraordinaires pour tous les navires, y compris ceux qui transportent des produits pétroliers. Pour compléter le régime de sécurité maritime et la capacité d'intervention de pointe du Canada, le PPO enrichira l'ensemble déjà considérable de connaissances scientifiques sur les produits pétroliers dans le contexte marin et incorporera les connaissances autochtones.

Mesures de soutien au rétablissement de la population d'épaulards résidente du sud du Pacifique Nord-Est

Le gouvernement du Canada prend des mesures pour soutenir le rétablissement de la population d'épaulards résidente du sud du Pacifique Nord-Est au large de la côte de la Colombie-Britannique. Dans le cadre du PPO, Transports Canada a travaillé étroitement avec les intervenants de l'industrie, les peuples autochtones, des organisations non gouvernementales de l'environnement, le monde universitaire, la communauté scientifique et des partenaires internationaux afin d'établir, de mettre à l'essai et d'analyser des options permettant de réduire le bruit subaquatique provenant des navires pour atténuer les répercussions du trafic de pétroliers accru découlant du Projet. Fort de ces travaux, le gouvernement du Canada a annoncé, en juin 2018, l'Initiative de protection des baleines, un investissement de 167,4 M\$ dans des mesures et la recherche scientifique nécessaire sur les principaux facteurs touchant l'épaulard résident du Sud, notamment la disponibilité des proies, les contaminants et le bruit subaquatique provenant des navires. POC a mis en œuvre des mesures de gestion des pêches pour accroître la disponibilité des proies des épaulards résidents du Sud dans leur habitat essentiel et a augmenté la distance obligatoire que doivent maintenir les navires. Le gouvernement est également en train de consolider la recherche sur les effets cumulatifs afin d'établir des données de base pour éclairer des mesures ultérieures.

Implications

Following the direction issued by the GIC pursuant to section 53 of the NEB Act and section 30 of the CEAA, 2012, the Board must

(a) Reconsider the recommendations and all terms or conditions set out in its May 19, 2016 report entitled *Trans Mountain Expansion Project OH-001-2014* that are relevant to addressing the issues specified by the Federal Court of Appeal in paragraph 770 of *Tsleil-Waututh Nation v. Canada (Attorney General)* (2018 FCA 153), including conditions 91, 131 to 134, 144 and 151; and

(b) Take into account the following factors:

(i) the environmental effects of Project-related marine shipping in view of the requirements of the *Canadian Environmental Assessment Act, 2012*,

(ii) the adverse effects of Project-related maritime shipping on species at risk, including the Northeast Pacific southern resident killer whale population, and their critical habitat, in view of any requirements of section 79 of the *Species at Risk Act* that may apply to the Project.

At the conclusion of the reconsideration process, the Board may revise its previous Recommendation Report entitled *Trans Mountain Expansion Project OH-001-2014*, to reflect its environmental assessment of Project-related marine shipping under the CEAA, 2012, its recommendation under subsection 29(1) of the CEAA, 2012, the application of section 79 of SARA, and its recommendation under the NEB Act on whether a certificate should be issued for any or all portions of the Project and any condition it considers necessary or desirable in the public interest.

The Board is directed to submit a report on its reconsideration to the Minister of Natural Resources no later than 155 calendar days from the issuance of the order.

Conclusion

The order in council is issued in consideration of, among other things, the Court's decision, the existing evidence on the record following the Board's Trans Mountain Expansion hearings and recommendation report, certificate conditions and proponent commitments, progress to date in the implementation of the Oceans Protection Plan and actions to support the recovery of SRKW.

Répercussions

À la suite des directives de la GC, conformément à l'article 53 de la Loi sur l'Office et à l'article 30 de la LCEE (2012), l'Office doit :

a) réexaminer les recommandations et les conditions contenues dans son rapport du 19 mai 2016 intitulé *Projet d'agrandissement du réseau de Trans Mountain OH-001-2014* qui sont pertinentes dans le cadre de l'examen des questions énoncées par la Cour d'appel fédérale au paragraphe 770 de sa décision dans l'affaire *Tsleil-Waututh Nation c. Canada (Procureur général)* (2018 CAF 153), notamment les conditions 91, 131 à 134, 144 et 151;

b) tenir compte des facteurs suivants :

(i) les effets environnementaux du transport maritime associé au Projet, selon les exigences de la LCEE (2012),

(ii) les effets nocifs du transport maritime associé au Projet sur les espèces en péril, y compris la population d'épaulards résidente du sud du Pacifique Nord-Est, et sur leur habitat essentiel, selon les exigences de l'article 79 de la LEP pouvant s'appliquer au Projet.

Au terme de son réexamen, l'Office pourra réviser son précédent rapport sur les recommandations intitulé *Projet d'agrandissement du réseau de Trans Mountain OH-001-2014* afin qu'il reflète son évaluation environnementale du transport maritime associé au Projet en vertu de la LCEE (2012), sa recommandation en vertu du paragraphe 29(1) de la LCEE (2012), l'application de l'article 79 de la LEP et ses recommandations en vertu de la Loi sur l'Office, à savoir si un certificat devrait être délivré pour le Projet, en tout ou en partie, et toute condition qu'il juge nécessaire ou souhaitable dans l'intérêt public.

L'Office doit soumettre au ministre des Ressources naturelles un rapport sur son nouvel examen au plus tard 155 jours civils à compter de la date de la prise du présent décret.

Conclusion

Le présent décret est pris en tenant compte, entre autres choses, de la décision de la Cour, de la preuve au dossier à la suite des audiences et du rapport de recommandations de l'Office au sujet du Projet d'agrandissement du réseau de Trans Mountain; des conditions du certificat et des engagements du promoteur; du progrès réalisé jusqu'ici au chapitre de la mise en œuvre du PPO et des mesures de soutien au rétablissement de la population des épaulards résidents du Sud.

Attention: Sheri Young, Secretary of the Board

Dear Ms. Young,

**Re: Trans Mountain Expansion Project – Reconsideration
Hearing Order MH-052-2018 & File OF-Fac-Oil-T260-2013-03 59
Comments and Objection of the Stó:lō Collective**

We are counsel for the Stó:lō Collective in relation to the National Energy Board (“NEB”) reconsideration hearing (the “**Reconsideration Hearing**”) directed by the Governor in Council (“GIC”) through OIC P.C. 2018-1177. The purpose of this letter is to respond to the request for comments set out in the letter of the NEB dated September 26, 2018 (the “**Participation Letter**”).

Pursuant to Hearing Order OH-001-2014, the Stó:lō Collective was granted intervenor status in the initial NEB hearing (the “**First Hearing**”) to consider the application by Trans Mountain Pipeline ULC (“**Trans Mountain**”) to the NEB for the Trans Mountain Expansion Project (the “**Project**”). The Stó:lō Collective remained intervenors as of the time the NEB issued its Recommendation Report recommending approval of the Project. As such, the Stó:lō Collective is guaranteed intervenor status in the Reconsideration Hearing. An application to participate noting this guaranteed status has been separately filed.

For the purposes of the Reconsideration Hearing, the Stó:lō Collective continues to represent the interests of Aitchelitz, Soowahlie, Yakwekwioose, Leq’á:mél, Skawahlook, Skowkale, Squiala, Skwah, Sumas, Shxwhà:y Village, Tzeachten, and Scowlitz. Members of these Stó:lō villages or bands are Stó:lō people and Aboriginal peoples within the meaning of the *Constitution Act, 1982* and the *Canada Environmental Assessment Act, 2012* (“**CEAA 2012**”). Aitchelitz, Shxwhà:y Village, Skowkale, Skwah, Soowahlie, Squiala, Tzeachten, and Yakwekwioose were also among the successful Indigenous applicants in the Federal Court of Appeal’s decision quashing the Project approval.¹

¹ *Tsleil-Waututh Nation v. Canada (Attorney General)*, 2018 FCA 153 (“**TWN**”).

1. OBJECTION ON TIMING

At the outset, we wish to record the Stó:lō Collective's objection to the limited time provided by the NEB to consider the matters listed for comment in the Participation Letter and, more generally, the unrealistic timeline set by the GIC for completion of the Reconsideration Hearing and delivery of the NEB's reconsideration report (the "**Reconsideration Report**").

As a public authority that makes administrative decisions that affects rights and interests, the NEB owes a duty of procedural fairness to the parties before it. The concept of procedural fairness is animated by the desire to ensure fair play.² There can be no "fair play" where the timelines have been stacked against the intervenors from the outset.

In the Participation Letter, the NEB states that the Reconsideration Hearing process will be carried out "as expeditiously as the circumstances and considerations of fairness permit, but, in any case, within the time limit imposed by the GIC." [Emphasis added.] A one week timeline to allow comments on the draft amended factors and scope of the factors, the environmental assessment under CEAA 2012, the draft list of issues to be considered in the Reconsideration Hearing, and the design of the Reconsideration Hearing process itself is unnecessarily restrictive. Placing significant limitations on the ability of the intervenors to respond fully is not consistent with considerations of fairness. The difficulties in responding in an unnecessarily short time frame are compounded for intervenors such as the Stó:lō Collective, a representative of 12 communities.

Further, the GIC's imposition of a time limit of 155 calendar days for the completion of both the Reconsideration Hearing and the NEB's submission of the Reconsideration Report to the GIC pursuant to section 53(5) of the *National Energy Board Act* suggests that it is timing, and not procedural fairness, or the ability to fully canvas and consider the potentially significant adverse impacts of Project-related marine shipping on, *inter alia*, Aboriginal rights and title, the environment and species at risk, that is the most significant factor in the Reconsideration Hearing.

The timing restrictions also place into sharp focus the difficulties in establishing a procedurally fair, rigorous and transparent process given the conflicting roles the Federal government has now placed itself in in relation to the Project. It is the Project proponent with a significant interest in seeing the Project proceed within the earliest possible time frame; the regulator tasked with conducting the Reconsideration Hearing and delivering the Reconsideration Report on a unilaterally set expedited schedule; the body who unilaterally set the expedited schedule for the Reconsideration Hearing and who will ultimately determine whether to approve the Project; and the Crown who has a duty to act honorably in all dealings with Indigenous peoples and to meaningfully consult whenever it contemplates a decision that may impact their asserted rights and title which, with respect to the Stó:lō Collective, the Project undoubtedly does.

The Stó:lō Collective has been an active participant throughout the regulatory approval process for the Project and will continue to do so but has significant concerns that the Reconsideration Hearing will repeat and exacerbate the mistakes of the past identified by the Federal Court of Appeal in *TWN*.

² Ibid at para. 231.

2. COMMENTS ON THE PARTICIPATION LETTER

The NEB has requested public comments on the following four issues:

- whether, on a “principled basis”, Project-related marine shipping should be included in the “designated project” to be assessed under the CEAA 2012;
- the draft Amended Factors and Scope of Factors for the Environmental Assessment pursuant to the CEAA 2012, and the Draft List of Issues to be considered in the Reconsideration Hearing;
- the design of the hearing process to be used for the Reconsideration Hearing; and
- which government departments or bodies the NEB should require information from during the Reconsideration Hearing.

We will deal with each topic in turn.

a. **Inclusion of Project-related Marine Shipping**

There is no principled basis not to include Project-related marine shipping as part of the “designated project” to be assessed under CEAA 2012. Its inclusion ensures that the factors enumerated in section 19 of CEAA 2012 are specifically considered by the NEB in relation to the seven-fold increase in tanker traffic that will result from the Project, and the significant adverse environmental effects that could be the consequence of this increase. In *TWN*, the Court specifically found that the exclusion of Project-related marine shipping from the scope of “designated project” in the First Hearing was “unjustifiable” and that this “unjustified exclusion” led to “successive, unacceptable deficiencies in the Board’s report and recommendations”.³ In order to remedy such deficiencies, the NEB must include Project-related marine shipping as part of the designated project and complete the required environmental assessment accordingly. To do otherwise is inconsistent with the reasoning clearly articulated by the Court in *TWN*.

b. **Factors and Scope of Factors to be Considered**

Pursuant to section 19 of CEAA 2012, the environmental assessment for the designated project must take into account, *inter alia*, the environmental effects of the designated project, including those arising from malfunctions or accidents that may occur in connection with it, the significance of such effects, and mitigation measures that would mitigate any significant adverse effects. Section 5(c)(i) of CEAA 2012 provides that environmental effects to be taken into account in relation to a designated project are, with respect to Aboriginal peoples, an effect occurring in Canada of any change that may be caused to the environment on:

- health and socio-economic conditions;
- physical and cultural heritage;
- the current use of lands and resources for traditional purposes; or

³ Ibid at para. 5.

- any structure, site or thing that is of historical, archaeological, paleontological or architectural significance.

The members of the Stó:lō Collective are Halkomelem-speaking Coast Salish Indigenous peoples. Since time immemorial, the Stó:lō Collective members have inhabited, controlled and relied on *S'olh Temexw*, their traditional territory in the lower Fraser River watershed. Stó:lō exercise Indigenous rights throughout *S'olh Temexw*, including hunting, gathering, trapping, fishing and spiritual practice, and are one of the few Indigenous peoples in Canada to have an established (non-treaty) right under section 35 of the *Constitution Act*, 1982. This established right to fish for food and ceremonial purposes was affirmed by the Supreme Court of Canada in *R. v. Van der Peet*,⁴ acknowledged by the Crown during the course of consultation on the Project, and recognized by the Court in its reasons in *TWN*.⁵ The Stó:lō Collective are culturally, spiritually, physically, and psychologically interconnected to *S'olh Temexw* and this interconnectivity is evident in all of the areas identified in section 5(c)(i) of CEAA 2012 set out above.

In the course of discussing why the exclusion of consideration of Project-related shipping as part of the designated project during the First Hearing was an important issue, the Court in *TWN* stated: “[p]roject-related tankers carry the risk of significant, if not catastrophic, adverse environmental and socio-economic effects should a spill occur.”⁶ The possibility of contamination of the lower Fraser River watershed and the “significant, if not catastrophic” consequences as a result of Project-related marine shipping cannot be negated. Accordingly, in considering the environmental effects of Project-related marine shipping as part of the environmental assessment, the effects on the Stó:lō Collective’s use and occupation of *S'olh Temexw* (including on health and socio-economic conditions, physical and cultural heritage, the use of land and resources for traditional purposes, and on any structure, site or thing that is of cultural, historical, archaeological, paleontological or architectural significance) must be given specific consideration pursuant to section 5 and 19 of CEAA 2012. The factors to be considered, the scope of factors to be considered, and the draft list of issues for the Reconsideration Hearing should be revised to specifically reflect this.

c. Design of the Process for the Reconsideration Hearing

Unlike the First Hearing, the Reconsideration Hearing should include the following elements:

- oral evidence from the Project proponent that is subject to cross-examination by intervenors with an interest in the subject matter of the particular evidence;
- alternatively, if evidence is submitted by the Project proponent in writing, an intervenor with an interest in the subject matter of that particular evidence may request cross-examination on it;
- in the further alternative, if the Project proponent’s evidence is only subject to questions through written information requests (“IRs”), any incomplete, inaccurate or misleading responses to IRs may be subject to cross-examination by the intervenor who delivered the IR. In addition, the intervenor who delivered the IR be permitted to file responsive evidence; and

⁴ [1996] 2 S.C.R. 507.

⁵ *TWN*, *supra*, note 1 at para. 40.

⁶ *Ibid* at para. 400.

- the process for the relaying of Indigenous traditional knowledge will be reflective of the specific cultural practices of the Indigenous group leading such evidence.

d. Involvement of Government Departments and Bodies

The Stó:lō Collective submits that the NEB should require information from the following government departments or bodies during the Reconsideration Hearing:

- All responsible authorities tasked with carrying out activities under the *Species at Risk Act*, in particular:
 - Department of Environment and Climate Change;
 - Department of Fisheries and Oceans;
 - Parks Canada Agency;
 - Canadian Endangered Species Conservation Council;
 - Committee on the Status of Endangered Wildlife in Canada; and
 - National Aboriginal Council on Species at Risk;
- Canadian Coast Guard; and
- Any other government departments or bodies bearing responsibility for prevention, response or clean up in relation to marine shipping accidents or malfunctions that are not otherwise identified in the foregoing list.

Yours truly,

This is Exhibit E referred to in the Affidavit
of Tanny Nguyen sworn before me at
Vancouver, BC this 6th day of July, 2019.

A Commissioner for taking affidavits for
British Columbia

File OF-Fac-Oil-T260-2013-03 59
5 October 2018

To: All Parties¹

**Trans Mountain Pipeline ULC (Trans Mountain)
Application for the Trans Mountain Expansion Project (Project)
National Energy Board (Board) reconsideration of aspects of its Recommendation
Report (Report) as directed by Order in Council (OIC) P.C. 2018-1177
MH-052-2018
Request for additional comments on the spatial limit of Project-related marine
shipping**

A. Overview and Request for Additional Comments

On 20 September 2018, through OIC P.C. 2018-1177, the Governor in Council (GIC) referred aspects of the Board's Report for the Project back to the Board for reconsideration (Reconsideration). The GIC's direction follows a 30 August 2018 decision² of the Federal Court of Appeal that quashed the GIC's approval of the Project. The GIC has imposed a time limit of 155 calendar days for the Reconsideration. Therefore, the Board must complete the Reconsideration process and issue its Reconsideration report no later than **22 February 2019**.

On 26 September 2018, the Board sought public comments on the following matters. Comments were due by 3 October 2018.

- 1) whether, "on a principled basis," Project-related marine shipping should be included in the "designated project" to be assessed under the Canadian Environmental Assessment Act, 2012 (CEAA 2012);
- 2) the draft Amended Factors and Scope of the Factors for the Environmental Assessment pursuant to the CEAA 2012, and the draft List of Issues to be considered in the Reconsideration hearing;
- 3) the design of the hearing process to be used for the Reconsideration; and
- 4) which government departments or bodies the Board should require information from during the hearing.

.../2

¹ The Parties include Trans Mountain Pipeline ULC and all intervenors.

² *Tsleil-Waututh Nation v. Canada (Attorney General)*, 2018 FCA 153.

The Board's draft Amended Factors and Scope of the Factors for the Environmental Assessment pursuant to the CEAA 2012 stated that the "designated project" includes Project-related marine shipping between the Westridge Marine Terminal (WMT) and the 12-nautical-mile territorial sea limit. The Board has received some comments to the effect that the spatial limit for Project-related marine shipping should be extended to include Canada's 200-nautical-mile exclusive economic zone (EEZ). Other comments either supported the 12-nautical-mile territorial sea limit, or were silent on this specific issue.³

The Board has decided to seek additional, focused comments from the Parties to the hearing on the following limited issue:

Assuming Project-related marine shipping is included in the "designated project" to be assessed under the CEAA 2012, should the designated project be defined as including:

- a) Project-related marine shipping between the WMT and the territorial sea limit; **or**
- b) Project-related marine shipping between the WMT and the outer boundary of Canada's EEZ?

The deadline for Parties to file comments on this limited issue is 9 October 2018. The Board will not consider additional comments that do not relate to this issue.

B. Additional direction regarding comments

The Board wishes to be clear that it is not requesting comments on whether *environmental effects* of the designated project can be considered outside of the territorial sea limit. Section 5 of the CEAA 2012 specifies that environmental effects include changes that may be caused to the environment outside of Canada. Rather, the issue is directed at whether the *designated project itself* should extend to the territorial sea limit or to Canada's EEZ.

Parties that file comments on this issue may wish to consider the following:

- the definition of "designated project" in subsection 2(1) of the CEAA 2012 and its reference in paragraph (a) to physical activities that are on federal lands, including whether this reference encompasses "incidental" physical activities;
- the definition of "federal lands" in subsection 2(1) of the CEAA 2012 and its reference to the territorial sea and Canada's EEZ;
- the purposes of the CEAA 2012, including, but not limited to, paragraph 4(1)(a) and its reference to the legislative authority of Parliament;
- the Canadian Environmental Assessment Agency's criteria relevant to the question of whether physical activities should be considered "incidental," including differences (if any) in the application of the criteria to Project-related marine shipping within and outside of the territorial sea;
- whether OIC P.C. 2018-1177 or the Federal Court of Appeal decision provide any guidance or assistance in addressing this issue; and

³ Examples of filed comments that addressed this issue are found at Filing IDs [A94257](#), [A94491](#), [A94445](#), [A94336](#), [A94518](#), [A94514](#), [A94412](#), [A94502](#), [A94460](#), [A94534](#), [A94543](#), [A94563](#), [A94525](#), and [A94495](#).

- any legal authority or precedent relevant to this issue, including whether other environmental assessments under the CEAA 2012 have addressed this issue.

Once the Board has considered all comments received, it will:

- release a Hearing Order setting out the hearing process that will be followed; and
- confirm the Amended Factors and Scope of the Factors for the Environmental Assessment pursuant to the CEAA 2012, and the List of Issues for the Reconsideration hearing.

C. How to file comments

The deadline for Parties to file comments pertaining to the issue set out in Part A above is 9 October 2018.

Intervenors that have an NEB Account through which they applied to participate in this hearing may use the Participation Portal to file their comments. After logging into your NEB Account, in the list of hearings, choose this Reconsideration hearing (MH-052-2018) and follow the online steps to make your filing.

Comments can be also filed online using the Board's [e-filing tool](#) (when asked to choose a project name, choose "Trans Mountain Expansion Project – Reconsideration – MH-052-2018").

All filings must refer to **Hearing Order MH-052-2018** and **File OF-Fac-Oil-T260-2013-03 59**, and be addressed to:

Ms. Sheri Young
Secretary of the Board
National Energy Board
Suite 210, 517 Tenth Avenue SW
Calgary, AB T2R 0A8
Facsimile 403-292-5503 (toll-free 1-877-288-8803)

Alternatively, comments may be mailed or faxed to the Board using the contact information above. **The Board does not accept filings by email.**

Anyone e-filing comments with the Board should also provide a copy or Filing ID number to Trans Mountain at regulatory@transmountain.com.

All comments received, and any future filings related to this Reconsideration hearing, will be found in the Board's online [public registry](#).

D. Where to find additional information

As information becomes available or is released regarding the Reconsideration hearing, the Board will update its Project [webpage](#).

For any questions, please contact a Process Advisor by phone at 1-800-899-1265 (toll-free) or by email at TMX.ProcessHelp@neb-one.gc.ca.

1 HEARING OVERVIEW

1.1 Introduction

On 20 September 2018, through [Order in Council \(OIC\) P.C. 2018-1177](#), the Governor in Council (GIC) referred aspects of the National Energy Board's (Board or NEB) [Recommendation Report](#) for the Trans Mountain Expansion Project (Project) back to the Board for reconsideration (Reconsideration). The GIC's direction follows a 30 August 2018 [decision](#)¹ of the Federal Court of Appeal that quashed the GIC's approval of the Project.

The Board will hold a public hearing for this Reconsideration. During the hearing, the Board will receive written evidence and other filings, which will be available in the Board's online [public registry](#). The hearing may also include oral portions. The Board will use various ways to gather and test evidence and will review and consider all of the evidence on the record in completing its Reconsideration Report. The Board will rely only on the evidence on the record. This includes relevant evidence previously submitted and any new relevant evidence filed.

The steps and deadlines in the hearing, as outlined in this Hearing Order, are important to make the hearing fair, transparent, and efficient, and they provide certainty to all those involved.

The Board's Reconsideration Report will be submitted to the GIC for a decision.

1.2 Time limit

The OIC requires that the Board complete the Reconsideration within 155 calendar days from the date of the OIC. Therefore, the Board must complete the Reconsideration hearing and submit its Reconsideration Report to the GIC no later than **22 February 2019**. This represents the maximum time to complete the review.

In accordance with subsection 11(4) of the *National Energy Board Act* (NEB Act), this hearing will be carried out as expeditiously as the circumstances and considerations of fairness permit, but, in any case, within the time limit imposed by the GIC. The deadlines in this Hearing Order are important to allow this hearing to be completed within that time limit.

1.3 What issues will the Board consider?

The issues that the Board will consider in this Reconsideration hearing are found in the List of Issues attached to this Hearing Order as **Appendix 1**. An Amended Factors and Scope of the Factors for the Environmental Assessment under the *Canadian Environmental Assessment Act, 2012* (CEAA 2012) is found as **Appendix 2**.

Both of these documents were finalized following a public [comment period](#) held between 26 September and 3 October 2018.

¹ *Tsileil-Waututh Nation v. Canada (Attorney General)*, 2018 FCA 153.

1.4 Where can I get help or more information about the hearing process?

The Board has many staff members that can answer questions throughout the hearing process. This includes dedicated Process Advisors to provide you with information and assistance on how to effectively participate. The Process Advisors' role is fully described on the Board's [website](#). See Section 5 of this Hearing Order for contact information.

The Board has set up a dedicated [Reconsideration webpage](#) where you can access valuable information about the Reconsideration hearing.

The Board has developed a [Hearing Process Handbook and related video](#) that provide an overview of its hearing processes, in general. You can request copies of Board publications [online](#) or by calling 1-800-899-1265 (toll-free).

The [National Energy Board Rules of Practice and Procedure, 1995](#) (Rules) provide detailed information about the Board's hearing processes. In the event of an inconsistency between the Rules and this Hearing Order, this Hearing Order should be followed.

2 PARTICIPATION IN THE HEARING

In addition to Trans Mountain's participation, the Board's Reconsideration hearing will involve:

- the **participation of intervenors**; and
- gathering **letters of comment from the public**.

Intervenors in the OH-001-2014 Certificate hearing at the time that the Board issued its Recommendation Report were guaranteed intervenor status in this Reconsideration hearing, if they chose to participate and register.

Any other member of the public was able to apply to participate as an intervenor through an [application process](#) held between 26 September and 3 October 2018. The confirmed intervenors in this hearing are named in the [List of Parties](#). The Board's reasons for its decisions in this regard are found [here](#).

The "**Parties**" consist of Trans Mountain and all intervenors (including Federal Departments and Agencies²).

² "Federal Departments and Agencies" include those federal departments and agencies that have registered as intervenors in this hearing, as well as those from which the Board has requested information under paragraph 20(a) of the CEAA 2012. Federal Departments and Agencies are denoted on the List of Parties with the prefix "AA".

2.1 Letters of comment

As noted above, any member of the public – including those that applied to participate as intervenors, but were not granted that status – may file a letter of comment with the Board by **20 November 2018**. Letters of comment will be placed on the online public registry, will form part of the hearing record, and the Board will read and consider them.

A letter of comment should be in one of Canada's official languages (English or French). It should describe your views pertaining to the Board's Reconsideration and include:

- your name, mailing address, and phone number;
- the name of your organization, if you represent one;
- comments on how you would be impacted positively or negatively by Project-related marine shipping, or any relevant information or expertise that you can offer to assist in the Board's Reconsideration (considering the List of Issues); and
- any information that explains or supports your comments.

There is no page limit to your letter, although clear, succinct and well-organized letters are encouraged. Generally, the Board does not find mass form letters to be helpful in its deliberations in any hearing.

2.2 Intervenors

In this Reconsideration hearing, an intervenor will have the opportunity and may choose to, among other things:

- file an opening statement;
- file written evidence;
- ask written questions about Trans Mountain's and other intervenors' evidence;
- file, and potentially respond to, notices of motion; and
- present written argument and, if deemed necessary by the Board, oral argument.

If you file evidence, or information in response to the Board's request under paragraph 20(a) of the CEEA 2012, you must, in writing, answer any written questions (i.e., information requests) asked about it by the Board or the other Parties.

Intervenors will be notified of, or receive, all documents that are filed or placed on the hearing record. This includes evidence, notices of motion, and all related materials.

Depending on how active you are as an intervenor, you may face a significant time commitment during the hearing. You have a number of responsibilities. You also have various privileges and participation opportunities afforded to you. Detailed information on intervenor deadlines and responsibilities is found in the table in Section 3.

2.3 Can I withdraw?

If you have been allowed to participate as an intervenor, you can withdraw from the hearing at any time by telling the Board in writing, although you are not required to formally withdraw if you no longer wish to participate. You may choose to still retain your participation status, take no action, and simply monitor the hearing's progress.

As an intervenor, unless you formally withdraw, you will continue to regularly receive regular email notifications and/or hard copies of documents.

3 HEARING EVENTS, STEPS, AND DEADLINES

Throughout the Reconsideration hearing, the Board may issue procedural directions that will fully describe certain identified events and steps so that all participants understand what is expected and how to fulfil their responsibilities. Cover letters to documents and information that the Board releases may also contain valuable information about hearing procedures.

Board: - releases Hearing Order MH-052-2018 with the List of Issues and the Amended Factors and Scope of the Factors for the Environmental Assessment pursuant to the CEAA 2012 - sends Filing Requirements to Trans Mountain - sends requests to Federal Departments and Agencies pursuant to paragraph 20(a) of the CEAA 2012	12 October 2018
Board releases procedural direction asking Indigenous ⁴ intervenors if they wish to provide oral traditional evidence	12 October 2018

³ All produced documents must be filed with the Board so they can be placed on the hearing record and considered.

⁴ The Board's use of the term "Indigenous" or "Indigenous peoples" in this hearing has the meaning assigned by the definition of "aboriginal peoples of Canada" in subsection 35(2) of the *Constitution Act, 1982*.

Hearing events and steps (responsible person[s] in bold, guidance in italics)³	Date or deadline (3:00 pm Pacific time [4:00 pm Mountain time])
Indigenous intervenors notify the Board of their intent to provide new or supplemental oral traditional evidence	23 October 2018
Trans Mountain files opening statement and direct evidence <i>Evidence must be relevant to one or more of the issues identified in Appendix 1.</i> <i>Evidence must be served on all intervenors</i>	31 October 2018
Federal Departments and Agencies file opening statements, direct evidence, and information requested by the Board under paragraph 20(a) of the CEEA 2012 <i>Evidence must be relevant to one or more of the issues identified in Appendix 1.</i> <i>Evidence must be served on all other Parties</i>	31 October 2018
Intervenors (other than Federal Departments and Agencies) file opening statement and direct evidence <i>Evidence must be relevant to one or more of the issues identified in Appendix 1.</i> <i>Evidence must be served on all other Parties</i>	20 November 2018
Members of the public file letters of comment <i>Letters of comment must be served on Trans Mountain</i>	20 November 2018
Trans Mountain files reply evidence <i>Reply evidence must be served on all intervenors</i>	26 November 2018
All Parties file information requests regarding other Parties' evidence <i>Information requests must be relevant to one or more of the issues identified in Appendix 1, and also to the evidence of the Party to which the questions are asked</i> <i>Information requests must be served on all other Parties</i>	3 December 2018
Oral hearing session: to collect, and allow questioning of, oral Indigenous traditional evidence	late-November or early-December 2018
All Parties respond to information requests asked of them <i>Responses to information requests must be served on all other Parties</i>	13 December 2018
Motion Day – As considered necessary, Parties file notices of motion on the adequacy of other Parties' responses to their own information requests ("motions to compel") <i>Motions to compel must be served on all other Parties</i>	17 December 2018
All Parties file affidavits adopting their written evidence	9 January 2019

Hearing events and steps (responsible person[s] in bold, guidance in italics)³	Date or deadline (3:00 pm Pacific time [4:00 pm Mountain time])
Trans Mountain and Federal Departments and Agencies file written argument-in-chief, including comments on draft conditions (which the Board will release for comment) <i>Comments on conditions must be included in written argument-in-chief; they cannot be raised for the first time during oral argument. No new evidence can be provided in written argument-in-chief</i> <i>Written argument-in-chief must be served on all intervenors</i>	9 January 2019
Intervenors (other than Federal Departments and Agencies) file written argument-in-chief, including comments on draft conditions and any reply argument to Trans Mountain and Federal Departments and Agencies. <i>Comments on conditions must be included in written argument-in-chief; they cannot be raised for the first time during oral argument. No new evidence can be provided in written argument-in-chief</i> <i>Written argument-in-chief must be served on all other Parties</i>	14 January 2019
Optional oral hearing session: to hear all Parties' oral summary argument and/or reply argument <i>Oral summary argument or summary argument on specific issues only may be held if needed and time permits</i> <i>Parties should include all pertinent argument in their written argument-in-chief, as this step may not be held</i> <i>Should oral summary argument take place, Trans Mountain can provide reply argument during this period; otherwise a date for filing written reply argument will be announced by the Board</i>	mid-January 2019
Hearing record closes	Immediately after finishing argument
Board releases its Reconsideration Report to the Governor in Council, and provides it to the Minister of Natural Resources	22 February 2019 or earlier (time limit end)

3.1 More information about written steps

3.1.1 What is evidence?

Evidence is what the Board will consider in the Reconsideration hearing. Evidence is comprised of the reports, statements, oral Indigenous traditional evidence, photographs, letters, and other material that hearing participants file during the hearing. Evidence is used to support one's position in relation to the List of Issues.

The entirety of the evidence filed in the OH-001-2014 Certificate hearing will be included as part of its record for this Reconsideration hearing, and will be considered by the Board to the extent it is relevant to the List of Issues for the Reconsideration hearing. **Parties are not required to re-file or re-test evidence that was filed during the OH-001-2014 Certificate hearing.**

3.1.2 What is an opening statement?

Opening statements are neither argument, nor evidence. A Party's written opening statement should contain a summary of their opening position on the Reconsideration, an executive summary or "road-map" to their evidence (which is due on the same day as the opening statement), and an explanation of how their evidence is new or different than what was filed, tested, and considered during the OH-001-2014 Certificate hearing.

The Board is providing the Parties with the opportunity to file a written opening statement. The Board considers that, in the unique circumstances of this Reconsideration hearing, opening statements will support efficiency, and will assist the Board and all participants in focusing on key matters of importance to them as the hearing proceeds.

Opening statements must be concise, and no longer than five pages in length.

3.2 More information about the oral hearing sessions

Board staff will be available in the hearing room prior to any oral hearing session(s) to explain the layout of the hearing room and answer any process questions.

3.2.1 Oral Indigenous traditional evidence

The Board understands that Indigenous peoples have an oral tradition for sharing knowledge from generation to generation. This information cannot always be shared adequately or appropriately in writing.

In **late-November or early-December 2018**, Indigenous intervenors may choose to provide traditional evidence orally. This would be in addition to their written evidence, if any. This oral traditional evidence may be questioned orally by other intervenors, Trans Mountain, or the Board. Indigenous intervenors may choose to provide responses to questions orally or in writing, or a combination of both.

Additional details about how the Board will gather oral traditional evidence from those Indigenous intervenors who wish to provide it will be provided in a Procedural Direction in the near future.

3.2.2 Oral argument

If deemed necessary by the Board and the time permits, the Board may hold an oral hearing session in **mid-January 2019** to hear oral summary argument and/or reply argument from all Parties.

If the Board decides to proceed with this oral hearing session, it will issue a procedural direction requiring all Parties to notify the Board of their intent to present oral summary argument and/or reply argument. Full details on oral argument (including procedures, time limits, dates, location[s]) will be provided at a later time, if required. The Parties should include all pertinent argument in their written argument-in-chief, as this step may not be held.

3.3 Oral hearing broadcasts and transcripts

The Board will live-stream the oral hearing sessions via its [website](#). Media files of each day's broadcast will also be available for download.

Daily written transcripts will be found on the online public registry by the following morning. Anyone can order paper copies of the transcripts directly from International Reporting Inc. This can be done in the hearing room, by emailing bprouse@irri.net, or by calling 613-748-6043. There may be a fee for this service.

4 PROCEDURES AND GUIDANCE

4.1 How do I prepare documents?

Every document you file with the Board must refer to **Hearing Order MH-052-2018** and **File OF-Fac-Oil-T260-2013-03 59**.

Address all documents to the proper recipient. For example, anything intended for the Board should be addressed to the Secretary of the Board (see Section 4.2.4 for contact information). Documents directed at others (e.g., responses to a specific Party's information requests) should be addressed to them using the List of Parties as a guide.

All documents must be in PDF format. Number document pages consecutively, including blank pages, so that the electronic page numbers match the page numbers showing in your document.

Do not provide references to websites. Instead, provide the actual information you want to refer to. **If using information sourced from a website, it must be filed in PDF format with an indication of the date the information was taken from the website.**

4.2 How do I file documents with the Board?

The Board **requires** you to file your documents online if you are able to do so. This can be done through the Participation Portal once logging into your [NEB Account](#) (if you have one already), or through the Board's [e-filing system](#) (**no** login necessary).

The Board does not accept filings by email. Documents received by email will not form part of the hearing record and will not be considered by the Board.

4.2.1 Participation Portal

If you have an NEB Account through which you applied to participate in this hearing, you may use the Participation Portal to file your future documents with the Board.

After logging into your NEB Account, in the list of hearings, choose this Reconsideration hearing (MH-052-2018) and follow the online steps to make your filing.

The Participation Portal will also email you a filing receipt where you can verify your attachments, as well as instructions about providing a hard copy to the Board.

4.2.2 E-filing

If you do not have an NEB Account, you may use the Board's e-filing system for filing documents. No login is required. While this system provides step-by-step instructions, you may refer to the [Filer's Guide to Electronic Submission](#) for more information.

When you complete a filing by e-filing, you will be emailed a filing receipt, which you must print and sign. You must send the Board that signed filing receipt – as well as one signed hard copy of the e-filed document(s) – by mail/courier, fax, or hand delivery (see Section 4.2.4 for contact information).

4.2.3 What if I do not have Internet access?

Electronic filings are efficient, and allow all Parties to view documents immediately once filed. For this reason, and as noted in Section 4.2, the Board requires the use of the online filing methods described in Sections 4.2.1 and 4.2.2, if the filer has Internet access.

If an intervenor cannot file documents online using the methods described in Sections 4.2.1 or 4.2.2, they **must** advise the Board in writing of the reasons for this. If the Board accepts your reasons, it will inform you in writing that you can file documents in person, by mail/courier, or by fax. An exception to this requirement is when a document cannot be scanned and made into an electronic copy (e.g., if it is physically too large to scan). In these cases, an electronic placeholder will be placed in the online public registry indicating that the document is available in the Board's library, but cannot be viewed online.

Physical documents that are received after a filing deadline, but are date-stamped by the post office or courier on or before the deadline, will be considered as filed on time. If filing hard copies, you must sign each document you file.

4.2.4 Who do I send or address documents to at the Board?

Use the following information when sending correspondence and documents to the Board.

Ms. Sheri Young
Secretary of the Board
National Energy Board
Suite 210, 517 Tenth Avenue SW
Calgary, AB T2R 0A8
Fax: 403-292-5503 (toll-free: 1-877-288-8803)

4.3 How do I serve documents on others?

Serving a document on someone means to provide them with a filing or with a notification that a filing was made.

Intervenors are required to serve their filings on Trans Mountain and its counsel, and on all other intervenors.

Members of the public that are filing letters of comment must serve their letters on Trans Mountain and its counsel only.

Trans Mountain is required to serve its filings on each intervenor.

4.3.1 Participation Portal users

The Participation Portal can send an email notification on your behalf to all those requiring service and who have provided a valid email address. To use this service, when prompted, click on “Yes, I want to use the Participation Portal’s Automated Service Notification option for all Participants who have provided an email address.” The Board will accept this as equivalent to the service of documents required under the Rules.

If you do not choose the automated service option, you must serve the required Parties yourself, using any of the methods allowed under section 8 of the Rules. For **intervenors**, this would also apply in the case of any Party that has not provided a valid email address. This will be indicated in the List of Parties and in one of the emails that the Participation Portal will send you when your filing is completed.

4.3.2 E-filing users

Unless otherwise specified in the List of Parties, the listed intervenors have indicated that they are able to access documents online. The easiest way to serve the required Parties is to forward them the filing receipt you receive by email when you make your filing (see Section 4.2.2). Since you will need to send an email to multiple intervenors, you may want to consider creating an email group/list so that you can send one email to several addresses, as opposed to separate emails to individual addresses. **As a courtesy, please place all email addresses in the blind copy (i.e., BCC) line of your emails.**

Where the List of Parties indicates that an intervenor requires a hard copy, you must provide them with one (e.g., by mail/courier or fax).

4.3.3 Those without Internet access

If you cannot serve documents electronically (e.g., by email, as described in Section 4.3.2), you must serve each of the required Parties with a hard copy (e.g., by mail/courier or fax).

4.4 How do I raise a question of procedure or substance that requires a Board decision?

If you want to ask the Board to do something, such as to extend a particular deadline, you must file a request. This is called a notice of motion. A notice of motion must include:

- a concise statement of the facts;
- the grounds for the request;
- the decision or relief requested;
- the impact of granting the request on other hearing participants; and
- any other information which supports the request.

Your notice of motion must be:

- in writing;
- signed by the person making the request, or by an authorized representative;
- served on, as applicable, Trans Mountain and all intervenors; and
- filed separately from any other correspondence.

If you are relying on case law or other authorities to support your position, you must include these authorities and highlight the specific passages you are relying on.

The Board may provide an opportunity for the Parties to comment on a notice of motion. This decision would be based on the nature of the request, and the circumstances surrounding it.

Given the expedited nature of this hearing, Parties must raise any question of procedure or substance with the Board **at the earliest opportunity possible**. Delay in filing a notice of motion may result in the Board declining to consider it.

The Board will not consider a question of procedure or substance unless it is clearly marked as a “notice of motion” and filed separately from any other materials that the Party is filing.

4.5 Will you keep my evidence confidential?

All evidence in this hearing will be available on the online public registry, unless you file a notice of motion to keep your evidence confidential under sections 16.1 or 16.2 of the NEB Act, and the Board grants your request for confidentiality. If you plan to file a document under these sections, please read Section 1.5 (Confidential Filing) of the Board’s [Filing Manual](#), which explains the steps you need to take to ensure that evidence does not appear publically.

If the Board grants your request for confidentiality, there are specific and important procedures to follow when filing that evidence. Please contact a Process Advisor to discuss these steps (see Section 5 of this Hearing Order for contact information).

5 WHO CAN I CONTACT FOR HELP?

You are encouraged to contact a Process Advisor with any questions you may have during the hearing process. A Process Advisor can be reached by calling 403-292-4800 or 1-800-899-1265 (toll-free), or by emailing TMX.ProcessHelp@neb-one.gc.ca. Any call-back numbers left will be followed-up on as soon as possible.

NATIONAL ENERGY BOARD

Sheri Young
Secretary of the Board

Appendix 1

List of Issues for the Reconsideration Hearing

The National Energy Board's (Board) Reconsideration hearing will consider any necessary changes or additions to its May 2016 [Recommendation Report](#) (Report), in light of the inclusion of Project-related marine shipping between the Westridge Marine Terminal and the 12-nautical-mile territorial sea limit in the "designated project" under the *Canadian Environmental Assessment Act, 2012* (CEAA 2012). This includes issues related to factors described in paragraphs 19(1)(a) through (h) and subsection 19(3) of the CEAA 2012, and to section 79 of the *Species at Risk Act* (SARA).

1. The environmental¹ effects of Project-related marine shipping, and the significance of these effects.

This includes adverse effects on species at risk, the environmental effects of malfunctions or accidents that may occur, and any cumulative environmental effects.

2. Measures that are technically and economically feasible, and that would mitigate any significant adverse environmental effects of Project-related marine shipping.

Given that the Board found four significant adverse effects related to Project-related marine shipping in its previous assessment² (i.e., greenhouse gas emissions, Southern resident killer whale, traditional Indigenous use associated with Southern resident killer whale, and the potential effects of a large or credible worst-case spill), the consideration of mitigation measures will include these four matters. This issue will also include consideration of whether the mitigation measures will change the Board's previous significance findings.

3. Alternative means of carrying out Project-related marine shipping that are technically and economically feasible, and the environmental effects of such alternative means.
4. Requirements of any follow-up program in respect of Project-related marine shipping.
5. Measures to avoid or lessen the adverse effects of Project-related marine shipping on SARA-listed wildlife species and their critical habitat, monitoring of the measures, and consideration of how to ensure the measures and monitoring are undertaken.

¹ All references to environmental effects in this List of Issues include health and socio-economic matters as described in section 5 of the CEAA 2012.

² See the Board's Report at pages 337, 350-351, 363, 378, and 397-398.

The Board's previous assessment identified the SARA-listed marine fish, marine mammal, and marine bird species that could be found in the area of, or affected by, Project-related marine shipping.³ Consideration will also be given to any species that have been newly listed or have seen a change to their designation since the issuance of the Board's Report and that could be affected by Project-related marine shipping.

6. The potential impacts of Project-related marine shipping on Indigenous⁴ interests.
7. Whether there should be any changes or additions to the Board's recommendations set out in its Report, or to the recommended terms or conditions, including Conditions 91, 131 to 134, 144, and 151.

Parties are expected to limit their evidence filings to **new or updated** evidence (including comments from the public, community knowledge, and Indigenous traditional knowledge) relevant to the above issues. Parties are not required to re-file or re-test evidence on the record of the OH-001-2014 Certificate hearing. It is recommended that Parties focus their evidence on aspects of the above issues that were not fully canvassed in the OH-001-2014 Certificate hearing. The Board's Filing Requirements for Trans Mountain, and its requests for specialist or expert information or knowledge in the possession of Federal Authorities pursuant to paragraph 20(a) of the CEAA 2012, reflect this.

³ See the Board's Report at pages 338, 341, and 352.

⁴ The Board's use of the term "Indigenous" or "Indigenous peoples" in this hearing has the meaning assigned by the definition of "aboriginal peoples of Canada" in subsection 35(2) of the *Constitution Act, 1982*.

Appendix 2

Amended Factors and Scope of the Factors for the Environmental Assessment pursuant to the *Canadian Environmental Assessment Act, 2012*

1.0 INTRODUCTION

On 16 December 2013, Trans Mountain Pipeline ULC (Trans Mountain) filed an application with the National Energy Board (Board or NEB) proposing to construct and operate the Trans Mountain Expansion Project (Project). As the Project would require more than 40 kilometres of new pipeline and would be regulated under the *National Energy Board Act* (NEB Act), it is a designated project under the *Canadian Environmental Assessment Act, 2012* (CEAA 2012) and requires a CEAA 2012 environmental assessment for which the NEB is the Responsible Authority. On 20 September 2018, through [OIC P.C. 2018-1177](#), the Governor in Council (GIC) referred aspects of the Board's [Report](#) for the Project back to the Board for reconsideration.

For the purposes of the environmental assessment under the CEAA 2012, the designated project includes the various components and physical activities as described by Trans Mountain in its 16 December 2013 application submitted to the NEB. On 12 October 2018, the Board determined that Project-related marine shipping between the Westridge Marine Terminal and the 12-nautical-mile territorial sea limit is also part of the “designated project” under the CEAA 2012.

As noted in the List of Issues (attached to Hearing Order [OH-001-2014](#)), the Board does not intend to consider the environmental and socio-economic effects associated with upstream activities, the development of oil sands, or the downstream use of the oil transported by the pipeline.

In accordance with paragraph 79(2)(b) of the CEAA 2012, the following provides a description of the factors to be taken into account in the environmental assessment under the CEAA 2012 and of the scope of those factors.

2.0 FACTORS AND SCOPE OF THE FACTORS

2.1 Factors to be considered

The CEAA 2012 environmental assessment for the designated project will take into account the factors described in paragraphs 19(1)(a) through (h) of the CEAA 2012:

- (a) the environmental effects¹ of the designated project, including the environmental effects of malfunctions or accidents that may occur in connection with the designated project and

¹ Section 5 of the CEAA 2012 further describes the environmental effects that are to be taken into account.

any cumulative environmental effects that are likely to result from the designated project in combination with other physical activities that have been or will be carried out;

- (b) the significance of the effects referred to in paragraph (a);
- (c) comments from the public or any interested party received in accordance with the CEAA 2012;
- (d) mitigation measures that are technically and economically feasible and that would mitigate any significant adverse environmental effects of the designated project;
- (e) the requirements of the follow-up program in respect of the designated project;
- (f) the purpose of the designated project;
- (g) alternative means of carrying out the designated project that are technically and economically feasible and the environmental effects of any such alternative means; and
- (h) any change to the designated project that may be caused by the environment.

In addition, the environmental assessment will also consider community knowledge and Aboriginal traditional knowledge.

2.2 Scope of the factors to be considered

The environmental assessment will consider the potential effects of the designated project within spatial and temporal boundaries within which the designated project may potentially interact with and have an effect on components of the environment. These boundaries will vary with the issues and factors considered, and will include, but not be limited to:

- construction, operation and maintenance, foreseeable changes, and site reclamation, as well as any other undertakings proposed by the proponent or that are likely to be carried out in relation to the physical works proposed by the proponent, including mitigation and habitat replacement measures;
- seasonal or other natural variations of a population or ecological component;
- any sensitive life cycle phases of species (e.g., wildlife, vegetation) in relation to the timing of Project activities;
- the time required for an effect to become evident;
- the area within which a population or ecological component functions; and
- the area affected by the Project.

Any works and activities associated with additional modifications or associated with the decommissioning or abandonment phase of the Project would be subject to a future application under the NEB Act and assessed in detail at that time. Therefore, at this time, any works or activities associated with these phases of the Project will be examined in a broad context only. As indicated above, the environmental assessment will consider cumulative environmental effects that are likely to result from the designated project in combination with effects from other physical activities that have been or will be carried out.

Subsection 2(1) of the CEAA 2012 provides definitions potentially relevant to the scope of the factors, including:

“environment” which means the components of the Earth, including

- (a) land, water and air, including all layers of the atmosphere;
- (b) all organic and inorganic matter and living organisms; and
- (c) the interacting natural systems that include components referred to in paragraphs (a) and (b);

and

“mitigation measures” which means measures for the elimination, reduction or control of the adverse environmental effects of a designated project, and includes restitution for any damage to the environment caused by those effects through replacement, restoration, compensation or any other means.

National Energy
Board

Office national
de l'énergie

This is Exhibit G referred to in the Affidavit of Tanny Nguyen sworn before me at Vancouver, BC this 6th day of July, 2019.

A Commissioner for taking affidavits for British Columbia

File OF-Fac-Oil-T260-2013-03 59
12 October 2018

To: All Parties

**Trans Mountain Pipeline ULC (Trans Mountain)
Application for the Trans Mountain Expansion Project**

**National Energy Board (Board) reconsideration of aspects of its Recommendation
Report as directed by Order in Council P.C. 2018-1177 (Reconsideration)
MH-052-2018**

Procedural Direction No. 1 – Oral Indigenous traditional evidence

The Board understands that Indigenous peoples have an oral tradition for sharing knowledge from generation to generation. This information cannot always be shared adequately or appropriately in writing, and the Board believes it would be valuable in this Reconsideration. Therefore, the Board is extending an invitation to Indigenous intervenors to provide oral traditional evidence, as set out in Section 3.2.1 of Hearing Order MH-052-2018.

Indigenous intervenors that wish to provide oral traditional evidence must file a written Notice of Intent with the Board on or before 3:00 pm Pacific time (4:00 pm Mountain time) on 23 October 2018. Section I below explains what must be included in the Notice of Intent.

This Procedural Direction No. 1 provides information to assist Indigenous intervenors that are interested in providing oral traditional evidence.

The Board must complete the Reconsideration process and issue its Reconsideration report by 22 February 2019. As a result, and similar to other hearing steps, there may be limited time for the Board to hear oral traditional evidence. Indigenous intervenors are encouraged to also make use of their opportunity to file written evidence, to the extent adequate and appropriate, so as much time as possible can be spent listening to evidence that can only be provided orally. Prior to hearing oral traditional evidence, the Board Members assigned to undertake the Reconsideration will have read the transcripts of the oral traditional evidence provided in the OH-001-2014 Certificate hearing. Therefore, it is not necessary to repeat the oral traditional evidence previously provided.

A. Location

By **23 October 2018**, the Board will know which Indigenous intervenors wish to provide oral traditional evidence. The Board plans to hold oral traditional evidence sessions in late-November/early-December at a location or locations **on Vancouver Island**.

.../2

Suite 210, 517 Tenth Avenue SW
Calgary, Alberta T2R 0A8

517, Dixième Avenue S.-O., bureau 210
Calgary (Alberta) T2R 0A8

Canada

Telephone/Téléphone : 403-292-4800
Facsimile/Télocopieur : 403-292-5503
www.neb-one.gc.ca

Telephone/Téléphone : 1-800-899-1265
Facsimile/Télocopieur : 1-877-288-8803

B. Time limits for oral traditional evidence presentations

In order to hear from all Indigenous intervenors that wish to present oral traditional evidence, time limits on presentations may apply. The exact amount of time available for each presenter will be announced after 23 October 2018 when the Board knows how many Indigenous intervenors will be presenting in person at the location or locations on Vancouver Island.

C. Interpreters

If those providing oral traditional evidence are speaking in a language other than French or English, the intervenor must provide their own interpreter and incur those costs (or use participant funding approved for that purpose). Only the English translation will be included in the hearing transcript. It is up to the intervenor to confirm the accuracy of the translation.

D. Swearing-in or affirming information

Before providing oral traditional evidence, presenters will be asked to swear or affirm that the information they are presenting is accurate and truthful to the best of their knowledge and belief. If they prefer to be sworn in, they will be asked to place their hand on a Bible or another sacred item. If they want to swear on a sacred item other than a Bible, they will need to bring that item to the hearing.

If they prefer to be affirmed, they will simply be asked to make a statement that the information they are presenting is accurate to the best of their knowledge and belief.

E. Remote participation

The Board understands that the selected location or locations may not be the best option for some presenters. Therefore, if there are presenters who cannot physically be present or would prefer to give oral evidence in a different manner, oral traditional evidence may be given by phone or video conference. Interest in such options should be included in Indigenous intervenors' Notice of Intent (see Section I). If there is interest in remote options, details about these options will be provided at a later date.

F. Questioning

Procedural fairness requires that Trans Mountain and intervenors be given the opportunity to test the evidence, including oral traditional evidence. The Board may also ask questions of clarification. Questions can be answered orally at the hearing, or they can be answered and submitted in writing, or a combination of both. A deadline for filing any written responses would be set by the Board.

G. Visual aids in effectively presenting oral traditional evidence

If presenters will refer to any visual aids during their presentation (e.g., photographs, maps, slideshows, videos, or other forms of media), those visual aids must be filed and served as written evidence at least one day in advance of the scheduled time for their oral traditional evidence.

Details about how to file documents on the public record and how to serve other Parties are found in Section 4 of the Hearing Order.

H. Online broadcasts and transcripts

The Board will offer a live audio stream of the oral presentations via its [website](#). Media files of each day's broadcast will also be available for download.

Daily written transcripts will be found on the online [public registry](#) by the following morning. Anyone can order paper copies of the transcripts directly from International Reporting Inc. This can be done in the hearing room, by emailing bprouse@irri.net, or by calling 613-748-6043. There may be a fee for this service.

I. Notice of Intent to present oral traditional evidence

The Board requires the following information be provided in the Notice of Intent:

1. Name of the Indigenous intervenor as it appears on the List of Parties
2. Name of the presenter(s) who will be providing the oral traditional evidence
3. Any request for remote participation (see Section E above)
4. Any other information the Board should consider in relation to the Notice of Intent

J. Additional Information

For information about the Board's hearing process, please see Hearing Order MH-052-2018.

If you require additional information about this Procedural Direction No. 1, oral traditional evidence presentations, or the hearing process, please contact a Process Advisor by phone at 1-800-899-1265 (toll-free) or by email at TMX.ProcessHelp@neb-one.gc.ca.

File OF-Fac-Oil-T260-2013-03 59
12 October 2018

To: List of Parties

**Trans Mountain Pipeline ULC (Trans Mountain)
Application for the Trans Mountain Expansion Project (Project)
National Energy Board (Board) reconsideration of aspects of its Recommendation
Report (Report) as directed by Order in Council (OIC) P.C. 2018-1177
MH-052-2018**

Various matters:

- Decisions following comment processes
- Hearing Order MH-052-2018
- Explanatory Note to OIC P.C. 2018-1177
- Filing requirements for Trans Mountain
- Request to Federal Authorities pursuant to paragraph 20(a) of the *Canadian Environmental Assessment Act, 2012* (CEAA 2012)
- Offer to consult and cooperate with certain jurisdictions pursuant to section 18 of the CEAA 2012

A. Background

On 20 September 2018, through OIC P.C. 2018-1177, the Governor in Council (GIC) referred aspects of the Board's Report for the Project back to the Board for reconsideration (Reconsideration). The GIC's direction followed a 30 August 2018 decision¹ of the Federal Court of Appeal that quashed the GIC's approval of the Project.

The GIC has imposed a time limit of 155 calendar days for the Reconsideration. Therefore, the Board must complete the Reconsideration process and issue its Reconsideration report no later than **22 February 2019**.

The Board is holding a public hearing to carry out the Reconsideration.

On 5 October 2018, the Board released the List of Parties for the hearing. The "Parties" consist of Trans Mountain and all intervenors (including Federal Departments and Agencies²).

.../2

¹ *Tsleil-Waututh Nation v. Canada (Attorney General)*, 2018 FCA 153.

² "Federal Departments and Agencies" include those federal departments and agencies that have registered as intervenors in this hearing, as well as those from which the Board has requested information under paragraph 20(a) of the CEAA 2012 (see Part F of this letter). Federal Departments and Agencies are denoted on the List of Parties with the prefix "AA".

B. Decisions following comment processes

In its 26 September 2018 [letter](#), the Board sought public comments on:

- 1) whether, “on a principled basis,”³ Project-related marine shipping should be included in the “designated project” to be assessed under the CEAA 2012;
- 2) the draft Amended Factors and Scope of the Factors for the Environmental Assessment pursuant to the CEAA 2012, and the draft List of Issues to be considered in the Reconsideration hearing;
- 3) the design of the hearing process to be used for the Reconsideration; and
- 4) which government departments or bodies the Board should require information from during the hearing.

In its 5 October 2018 [letter](#), the Board sought additional, focused comments from the Parties on the following limited issue:

Assuming Project-related marine shipping is included in the “designated project” to be assessed under the CEAA 2012, should the designated project be defined as including:

- a) Project-related marine shipping between the Westridge Marine Terminal and the territorial sea limit; *or*
- b) Project-related marine shipping between the Westridge Marine Terminal and the outer boundary of Canada’s EEZ?

Comments received are found in the Board’s online [public registry](#).

Board decisions

The Board has decided, on a principled basis, to include Project-related marine shipping between the Westridge Marine Terminal and the 12-nautical-mile territorial sea limit in the “designated project” to be assessed under the CEAA 2012.

The Board has decided to make adjustments to the List of Issues for the Reconsideration hearing. The List of Issues for the Reconsideration hearing is included as Appendix 1 to Hearing Order MH-052-2018.

The Board has decided not to make adjustments to the Amended Factors and Scope of the Factors for the Environmental Assessment pursuant to the CEAA 2012. The Amended Factors and Scope of the Factors for the Environmental Assessment is included as Appendix 2 to Hearing Order MH-052-2018.

The Board has decided on the hearing process set out in the attached Hearing Order MH-052-2018.

The Board has decided to request specialist or expert information or knowledge in the possession of each of Fisheries and Oceans Canada, Environment and Climate Change Canada, Transport Canada, Vancouver Fraser Port Authority, Pacific Pilotage Authority, Health Canada, Parks Canada, and Natural Resources Canada (see Part F below).

The Board’s written reasons for the all of the above decisions will follow.

³ *Tsleil-Waututh Nation v. Canada (Attorney General)*, *supra* note 2 at para. 770.

C. Hearing Order MH-052-2018

The Board is now releasing Hearing Order MH-052-2018, which details the steps and deadlines that will be followed during the public Reconsideration hearing. In addition to Trans Mountain's participation, the Reconsideration hearing will involve:

- the participation of **intervenors**; and
- gathering **letters of comment**⁴ **from the public**.

The hearing will include written steps and may include oral steps. It also provides information on the Board's procedures, as well as on the roles, responsibilities, and opportunities of those participating in the hearing.

D. Explanatory Note to OIC P.C. 2018-1177

In the interests of transparency, the Board is placing the Explanatory Note to OIC P.C. 2018-1177 (as published in the Canada Gazette, Part 1) onto the record of this Reconsideration hearing. The Board notes that the Explanatory Note is not part of the OIC.

E. Filing Requirements for Trans Mountain

The Board has issued a letter to Trans Mountain describing the additional Filing Requirements for Trans Mountain that the Board requires for the Reconsideration. Trans Mountain must file the required information on or before **3:00 pm Pacific time (4:00 pm Mountain time) on 31 October 2018**.

F. Requests to Federal Authorities pursuant to paragraph 20(a) of the CEAA 2012

The Board has issued a letter, pursuant to paragraph 20(a) of the CEAA 2012, to request specialist or expert information or knowledge in the possession of each of Fisheries and Oceans Canada, Environment and Climate Change Canada, Transport Canada, Vancouver Fraser Port Authority, Pacific Pilotage Authority, Health Canada, Parks Canada, and Natural Resources Canada in relation to the Reconsideration.

These Federal Authorities are required to provide the requested information or knowledge on or before **3:00 pm Pacific time (4:00 pm Mountain time) on 31 October 2018**.

G. Offer to consult and cooperate with certain jurisdictions pursuant to section 18 of the CEAA 2012

Under section 18 of the CEAA 2012, the Board must:

...offer to consult and cooperate with respect to the environmental assessment of the designated project with any jurisdiction referred to in paragraphs (c) to (h) of the definition ***jurisdiction*** in subsection 2(1) if that jurisdiction has powers, duties or functions in relation to an assessment of the environmental effects of the designated project.

⁴ The Board notes that some applicants and other members of the public have already submitted substantive comments regarding the Board's Reconsideration, which may or may not constitute their letters of comment. These will remain on the hearing record and will be considered by the Board in completing its Reconsideration Report. For persons or groups where this is the case, those letters do not need to be re-filed.

In accordance with section 18, the Board has posted its offer to consult and cooperate on the [Canadian Environmental Assessment Registry Internet Site](#).

H. Where to find additional information or help

As information becomes available or is released regarding the Reconsideration hearing, the Board will update its Project [webpage](#).

All filings received, and Board correspondence related to, this hearing will be found in a dedicated [folder](#) in the Board's online public registry.

For any questions about this hearing process, please contact a Process Advisor by phone at 1-800-899-1265 (toll-free) or by email at TMX.ProcessHelp@neb-one.gc.ca.

I. Direction to Trans Mountain

Trans Mountain is directed to serve this letter and Hearing Order MH-052-2018 (including its appendices) on those listed in the attached distribution list.

Yours truly,

Original signed by

Sheri Young
Secretary of the Board

Trans Mountain Pipeline ULC
Application for the Trans Mountain Expansion Project (Project)
National Energy Board (Board) reconsideration of aspects of its Recommendation
Report (Report) as directed by Order in Council P.C. 2018-1177 (Reconsideration)
MH-052-2018
Requests to Federal Authorities pursuant to paragraph 20(a) of the *Canadian*
***Environmental Assessment Act*, 2012 (CEAA 2012)**

A. Overview

Pursuant to paragraph 20(a) of the CEAA 2012, the purpose of this letter is to request specialist or expert information or knowledge in the possession of each of Fisheries and Oceans Canada (DFO), Environment and Climate Change Canada (ECCC), Transport Canada (TC), Vancouver Fraser Port Authority (VFPA), Pacific Pilotage Authority (PPA), Health Canada (HC), Parks Canada (PC), and Natural Resources Canada (NRCan) [collectively, the Federal Authorities] in relation to the Reconsideration, the background for which is described in the Board's letter of 26 September 2018.

The Federal Authorities must provide the information or knowledge required by the Board on or before **3:00 pm Pacific time (4:00 pm Mountain time) on 31 October 2018**. By this date, Federal Authorities may also file any other evidence that, in their view, is relevant to the List of Issues for the Reconsideration hearing.

The Federal Authorities have been automatically registered as intervenors in this proceeding, regardless of whether a particular Federal Authority registered for that role or not. This means that they must answer any information requests from the Board or the other Parties about the information or knowledge filed in response to this letter, or any other evidence they may file. For more information on the responsibilities of intervenors, see the Board's Hearing Order MH-052-2018.

Telephone/Téléphone : 1-800-899-1265
Facsimile/Télocopieur : 1-877-288-8803

The Federal Authorities can expect additional follow-up questions from the Board throughout the hearing process.

The particulars of the Board's request are detailed in Parts C and D below.

B. Comment processes and Board decisions

In its letter of 26 September 2018, the Board sought public comments with respect to the Reconsideration hearing, including whether Project-related marine shipping should be part of the "designated project" under the CEAA 2012, and comments on a draft List of Issues.

On 5 October 2018, the Board [sought](#) additional, focused comments from the Parties on the spatial limit of Project-related marine shipping.

In its letter of 12 October 2018, the Board decided, on a principled basis, to include Project-related marine shipping between the Westridge Marine Terminal and the 12-nautical-mile territorial sea limit in the "designated project" to be assessed under the CEAA 2012.

On 12 October 2018, the Board also issued the List of Issues for the Reconsideration hearing, which is attached to Hearing Order MH-052-2018 as Appendix 1.

The Board's written reasons for the above decisions will follow.

C. Basis for requests

The List of Issues includes issues related to factors described in paragraphs 19(1)(a) through (h) of the CEAA 2012, such as mitigation measures, alternative means, and requirements of any follow-up program, each in relation to Project-related marine shipping. It also includes issues related to section 79 of the *Species at Risk Act* (SARA), such as measures to avoid or lessen adverse effects of Project-related marine shipping on species at risk.

The Board's requests for specialist or expert information or knowledge are based on the following with respect to each Federal Authority:

Federal Authority	Basis
DFO	Responsibilities and expertise include marine protected areas and certain species at risk that could be affected by marine shipping
ECCC	Responsibilities and expertise include certain species at risk that could be affected by marine shipping
TC	Regulatory authority and expertise includes marine shipping
VFPA	• Regulatory authority and expertise includes marine shipping • Has relevant environmental interests, such as its Enhancing Cetacean Habitat and Observation (ECHO) program

Federal Authority	Basis
PPA	• Regulatory authority and expertise includes marine shipping • Mandate is to establish, operate, maintain, and administer in the interests of safety an efficient pilotage service
HC	Possesses information or knowledge with respect to human health effects
PC	Mandate is to ensure that Canada's national parks and national marine conservation areas are protected
NRCan	Has consulted with Indigenous groups since the date of the Board's Report

Only the latest or most up-to-date information or knowledge is requested. The Board has stated that the record filed in the OH-001-2014 Certificate hearing is included as part of its record for the Reconsideration. Therefore, **if relevant information is already on the Board's online [public registry](#), provide links and page numbers rather than refiling that information.** Where the information or knowledge is lengthy, provide a summary.

D. Requests

The Board requests specialist or expert information or knowledge in the possession of each of DFO, ECCC, and TC in relation to each of the matters in the List of Issues.

Without limiting the generality of that request, the Board includes some particular requests below, which also pertain to VFPA, PPA, HC, PC, and NRCan. Although the Board has suggested particular Federal Authorities for each topic below, it does not preclude other Federal Authorities from providing the information or knowledge if they possess it.

Topic 1: Greenhouse gas (GHG) emissions

Federal Authority(ies): ECCC and TC

Request: With regard to potential mitigation measures for GHG emissions from Project-related marine shipping, provide:

- a) an update of any changes to the relevant regulatory requirements since the date of the Board's Report;
- b) any information or knowledge concerning other plausible mitigation measures (including monitoring measures) to avoid, reduce, and/or offset the GHG emissions of Project-related marine shipping; and
- c) any information or knowledge concerning the safety, and technical and economic feasibility, of each such mitigation measure.

Topic 2: SARA-listed species

Federal Authority(ies): DFO and ECCC

Request: With regard to any SARA-listed species that are likely affected by Project-related marine shipping, or that have critical habitat that is likely to be affected by such shipping (including Southern resident killer whale [SRKW]), provide:

- a) a list of any species that have been newly listed, or any species that have seen a change to their designation, since the date of the Board's Report;
- b) a copy of the latest recovery documents (Recovery Strategies, Action Plans, and Management Plans) for all likely affected species (if these recovery documents have already been filed on the Board's record for the Project, provide links to them);
- c) any updates on the current status and planning for the survival and recovery actions noted in each recovery document;
- d) any updates on any monitoring that is underway or planned to determine the success of survival and recovery actions noted in each recovery document;
- e) for any species that does not have recovery documents, any information or knowledge concerning plausible mitigation measures (including monitoring measures) to avoid or lessen the effects of Project-related marine shipping; and
- f) any further information or knowledge concerning the safety, technical, and economic feasibility of each such survival, recovery, mitigation, and monitoring action or measure.

Topic 3: SRKW

Federal Authority(ies): DFO, TC, VFPA, and PPA

Request: With regard to SRKW, in addition to the request under Topic 2 above, provide:

- a) the most recent copies of the following:
 - o Recovery Strategy and any proposed updates or amendments;
 - o Action Plan and any proposed updates or amendments;
 - o Southern Resident Killer Whale: imminent threat assessment;
 - o Southern resident killer whale – A science based review of recovery actions for three at-risk whale populations;
 - o Oceans Protection Plan, and any relevant implementation information; and

- o any status updates on the ECHO Program as it relates to mitigation measures to reduce potential threats to SRKW as a result of shipping activities, such as acoustic disturbance (underwater noise), physical disturbance (ship collisions), environmental contaminants, and availability of prey;
- b) any information or knowledge concerning the relationship between a vessel's speed and tonnage (including the different types of Project-related marine vessels under both loaded and unloaded conditions) and how much underwater noise the vessel creates;
- c) any information or knowledge concerning the potential effectiveness, safety, and technical and economic feasibility of each of the following potential mitigation measures, including how each could be implemented and monitored, and who (i.e., what authority, body, or organization) would be responsible for each aspect of implementation and monitoring:
 - o altering shipping lanes to reduce adverse effects on SRKW, such as shifting lanes away from marine mammal congregation areas;
 - o speed restrictions and altered shipping patterns, such as convoys, in order to reduce potential adverse effects such as underwater noise or the potential for ship strikes;
 - o use of marine mammal on-board observers on Project-related marine vessels, and what actions need to be taken if SRKW are observed;
 - o measures to increase abundance of prey to offset adverse effects from Project-related marine shipping;
 - o vessel design (including hull and propeller) and maintenance measures for reducing adverse effects such as underwater noise from Project-related marine vessels;
 - o any other measure that could avoid, reduce, and/or offset the adverse effects of Project-related marine shipping on SRKW; and
 - o measures that could avoid or reduce cumulative adverse effects on SKRW.

Topic 4: Marine birds

Federal Authority(ies): ECCC

Request: With regard to marine bird species at risk that are potentially affected by Project-related marine shipping, in addition to the requests under Topic 2 above, provide:

- a) any information or knowledge on potential measures to avoid or reduce adverse effects such as mortality and sensory disturbance as a result of Project-related marine shipping; and

- b) any information or knowledge concerning the development and implementation of relevant monitoring systems.

Topic 5: Marine oil spills

Federal Authority(ies): ECCC, DFO, TC, VFPA, and PPA

Request: Provide:

- a) any information on research and findings, since the date of the Board's Report, related to the fate and behaviour and clean-up of oil (including diluted bitumen) spilled in marine environments that would be applicable to Project-related marine shipping; and
- b) any information or knowledge on any enhancements to marine oil spill prevention, emergency preparedness, and response measures since the date of the Board's Report, including any updates and information on the status of the implementation of the enhanced marine oil spill response regime, as referenced in Condition 133 set out in the Board's Report.

Topic 6: Marine safety, navigation, and disturbance

Federal Authority(ies): TC, VFPA, and PPA

Request: With regard to potential safety, navigation, and disturbance of other vessels, provide:

- a) any information or knowledge on the impacts of wakes created by Project-related marine shipping vessels at varying speeds on non-Project-related vessels crossing those wakes;
- b) any information or knowledge concerning measures to avoid, reduce, and/or offset the impacts of Project-related marine shipping vessels on non-Project-related vessels, including private recreational vessels;
- c) a copy of the most recent Port Information Guide;
- d) any proposed updates or amendments to marine pilotage services and measures to mitigate risks to persons, vessels, and the environment; and
- e) any updates on legislative or policy changes regarding tug escort requirements that would be applicable to Project-related marine shipping.

Topic 7: National parks and/or national marine conservation areas

Federal Authority(ies): PC and DFO

Request: Provide:

- a) a list of all current areas and any future areas under consideration (e.g., parks, protected areas, reserves, conservation areas) under PC's and DFO's responsibilities in the areas of Project-related marine shipping; and

- b) any information or knowledge concerning mitigation and monitoring measures to avoid, reduce, and/or offset the impacts of Project-related marine shipping on marine and shoreline ecosystem components, including any relevant information on legislative requirements or guidelines or best practices to conserve and protect these ecosystems.

Topic 8: Mitigation and monitoring measures for human health effects

Federal Authority(ies): HC

Request: Provide any additional information or knowledge, since the date of the Board's report, concerning mitigation and monitoring measures for human health effects that are likely to result from Project-related marine shipping.

Topic 9: Mitigation, accommodation, and monitoring measures proposed by Indigenous groups

Federal Authority(ies): NRCan, VFPA, and PPA

Request: Provide any information or knowledge, including any Indigenous traditional knowledge, that was raised by Indigenous groups since the date of the Board's Report concerning:

- a) the environmental and socio-economic effects of Project-related marine shipping;
- b) the potential impacts of Project-related marine shipping on Indigenous interests; and
- c) mitigation, accommodation, and monitoring measures in order to avoid, reduce, and/or offset adverse effects from Project-related marine shipping.

For any questions, please contact a Process Advisor by phone at 1-800-899-1265 (toll-free) or by email at TMX.ProcessHelp@neb-one.gc.ca.

Yours truly,

Dossier OF-Fac-Oil-T260-2013-03 59
Le 12 octobre 2018

Destinataires : Liste de distribution

Trans Mountain Pipeline ULC

**Demande visant le projet d'agrandissement du réseau de Trans Mountain
(le « projet »)**

**Réexamen par l'Office national de l'énergie de certains aspects de son rapport
de recommandation (le « rapport »), conformément au décret 2018-1177 de
la gouverneure en conseil (le « réexamen »)
MH-052-2018**

**Demandes présentées à des autorités fédérales aux termes de l'alinéa 20a) de la *Loi
canadienne sur l'évaluation environnementale (2012)* [« LCEE (2012) »]**

A. Aperçu

Conformément à l'alinéa 20a) de la LCEE (2012), la présente vise à demander l'expertise ou les connaissances voulues que possèdent Pêches et Océans Canada (« MPO »), Environnement et Changement climatique Canada (« ECCC »), Transports Canada (« TC »), l'Administration portuaire de Vancouver Fraser (« APVF »), l'Administration de pilotage du Pacifique (« APP »), Santé Canada (« SC »), Parcs Canada (« PC ») et Ressources naturelles Canada (« RNCAN ») [collectivement « les autorités fédérales »] en vue du réexamen, dont le contexte est décrit dans la [lettre](#) de l'Office du 26 septembre 2018.

Les autorités fédérales doivent transmettre à l'Office les renseignements demandés au plus tard **à 15 heures, heure du Pacifique (16 heures, heure des Rocheuses) le 31 octobre 2018**. Pour cette même date, les autorités fédérales peuvent aussi déposer tout autre élément de preuve qu'elles estiment se rapporter à la liste des questions de l'audience de réexamen.

L'Office a accordé *de facto* aux autorités fédérales le statut d'intervenant à la présente instance, qu'elles en aient fait la demande ou non. Par conséquent, elles doivent répondre aux demandes de renseignements que pourraient leur adresser l'Office ou les autres parties au sujet de l'expertise ou des connaissances voulues qu'elles fourniront en réponse à la présente lettre ou de tout autre élément de preuve qu'elles pourraient verser au dossier de l'audience. Pour plus d'information sur les attributions des intervenants, vous êtes prié de consulter l'ordonnance d'audience MH-052-2018 de l'Office.

.../2

Les autorités fédérales peuvent s’attendre à ce que l’Office leur pose d’autres questions pendant le processus d’audience.

Les détails de la demande de l’Office se trouvent aux parties C et D plus loin.

B. Processus de commentaires et décisions de l’Office

Dans sa lettre du 26 septembre 2018, l’Office sollicitait les observations du public sur l’audience de réexamen, y compris sur la question de savoir si le transport maritime connexe au projet devait être inclus dans le « projet désigné » en vertu de la LCEE (2012), ainsi que des commentaires sur une version préliminaire de la liste des questions.

Le 5 octobre 2018, l’Office a [invité](#) les parties à lui faire part d’autres observations sur la question précise de la limite spatiale du transport maritime connexe au projet.

Dans sa lettre datée du 12 octobre 2018, l’Office a décidé, à la lumière des principes, d’inclure le transport maritime connexe au projet entre le terminal maritime Westridge et la limite des eaux territoriales de 12 miles nautiques dans le « projet désigné » devant être soumis à une évaluation en vertu de la LCEE (2012).

Le 12 octobre 2018, l’Office a également rendu publique la liste des questions qui seront étudiées à l’audience de réexamen; cette liste est jointe à l’ordonnance d’audience MH-052-2018, dont elle constitue l’annexe 1.

Les motifs écrits des décisions de l’Office sur les questions qui précèdent suivront.

C. Fondement des demandes

La liste des questions énumère des enjeux qui se rapportent à des éléments décrits aux alinéas 19(1)a) à h) de la LCEE (2012), en l’occurrence les mesures d’atténuation, les solutions de rechange et les exigences de tout programme de suivi, dans le contexte du transport maritime connexe au projet pour chacun de ces éléments. Elle renferme aussi des questions qui se rapportent à l’article 79 de la *Loi sur les espèces en péril*, comme les mesures visant à éviter ou à amoindrir les effets nocifs du transport maritime connexe au projet sur des espèces en péril.

Les demandes de l’Office visant à obtenir l’expertise ou les connaissances voulues reposent sur ce qui suit pour chacune des autorités fédérales.

Autorité fédérale	Fondement
MPO	Ses attributions et son expertise couvrent certaines aires protégées et certaines espèces en péril susceptibles d’être touchées par le transport maritime.
ECCC	Ses attributions et son expertise couvrent certaines espèces en péril susceptibles d’être touchées par le transport maritime.
TC	Son autorité réglementaire et son expertise englobent le transport maritime.

Autorité fédérale	Fondement
APVF	• Son autorité réglementaire et son expertise englobent le transport maritime. • Elle possède un intérêt relativement à l'environnement, notamment en raison de son programme d'observation et d'amélioration de l'habitat des cétacés (« ECHO »).
AAP	• Son autorité réglementaire et son expertise englobent le transport maritime. • Sa mission vise la mise en place, la conduite, le maintien et l'administration d'un service de pilotage pour des raisons de sécurité.
SC	Il possède l'expertise ou les connaissances voulues se rapportant aux effets sur la santé humaine.
PC	Sa mission est de veiller à ce que les parcs nationaux canadiens et les aires marines nationales de conservation soient protégés.
RNCAN	Il a consulté les groupes autochtones depuis la date du rapport de l'Office.

La demande ne vise que l'expertise ou les connaissances voulues les plus récentes ou les plus actuelles. Il a déjà annoncé que le dossier de la présente audience de réexamen comprendrait l'ensemble de la preuve déposée dans le cadre de l'audience OH-001-2014 relative au certificat. Par conséquent, **si des renseignements pertinents se trouvent déjà dans le [registre public](#)** en ligne de l'Office, vous êtes prié de fournir les liens et les numéros de page plutôt que de déposer ces documents de nouveau. Si cette expertise ou ces connaissances voulues sont volumineuses, nous vous prions de bien vouloir fournir un résumé.

D. Demandes

L'Office demande au MPO, à ECCC et à TC de lui fournir l'expertise ou les connaissances voulues qu'ils possèdent sur chacun des éléments mentionnés dans la liste des questions.

Sans restreindre la généralité de cette demande, l'Office relève ci-dessous quelques volets précis, qui visent également l'APVF, l'APP, SC, PC et RNCAN. Bien qu'il identifie certaines autorités fédérales pour chaque volet ci-dessous, cela ne dégage pas d'autres autorités fédérales de lui fournir l'expertise ou les connaissances voulues qu'elles possèdent.

Premier volet : Émissions de gaz à effet de serre (GES)

Autorités fédérales : ECCC et TC

Demande : En ce qui concerne d'éventuelles mesures d'atténuation des émissions de GES découlant du transport maritime connexe au projet, veuillez fournir ce qui suit :

- a) tout élément nouveau dans les exigences réglementaires pertinentes, depuis la date du rapport de l'Office;
- b) l'expertise ou les connaissances voulues sur d'autres mesures d'atténuation envisageables (y compris des mesures de suivi) afin d'éviter, de réduire et/ou de contrebalancer les émissions de GES découlant du transport maritime connexe au projet;

- c) l'expertise ou les connaissances voulues concernant la sécurité et la faisabilité, sur les plans technique et économique, pour chacune de ces mesures.

Deuxième volet : Espèces inscrites sur la liste de la LEP

Autorités fédérales : MPO et ECCC

Demande : En ce qui concerne toute espèce inscrite sur la liste de la LEP susceptible d'être touchée par le transport maritime connexe au projet, ou dont l'habitat est susceptible d'être touché par ce même transport, y compris l'épaulard résident du sud, veuillez fournir ce qui suit :

- a) une liste des espèces nouvellement inscrites sur la liste ou de celles dont la désignation a changé depuis la date du rapport de l'Office;
- b) un exemplaire des plus récentes versions des documents relatifs au rétablissement (stratégies de rétablissement, plans d'action et plans de gestion) pour chaque espèce qui sera vraisemblablement touchée – si ces documents ont déjà été versés au dossier de l'instance du projet, vous êtes prié de fournir des liens vers ceux-ci;
- c) toute mise à jour sur la situation actuelle et la préparation de mesures de survie et de rétablissement faite à chaque document se rapportant au rétablissement;
- d) toute mesure de suivi à jour ou projetée visant à vérifier la réussite des mesures de survie et de rétablissement mentionnées dans chaque document relatif au rétablissement;
- e) pour toute espèce qui n'est pas visée par des documents se rapportant au rétablissement, l'expertise ou les connaissances voulues relatives à des mesures d'atténuation envisageables (y compris des mesures de suivi) afin d'éviter ou d'amoindrir les effets du transport maritime connexe au projet;
- f) l'expertise ou les connaissances voulues complémentaires sur la sécurité et la faisabilité, sur les plans technique et économique, pour chacune des mesures de survie, d'atténuation ou de suivi.

Troisième volet : Épaulard résident du sud

Autorités fédérales : MPO, TC, APVF et APP

Demande : En ce qui concerne l'épaulard résident du sud, en plus de la demande formulée pour le deuxième volet ci-dessus, veuillez fournir ce qui suit :

- a) les versions les plus récentes de ce qui suit :
 - o stratégie de rétablissement et toute mise à jour ou modification proposée;
 - o plan d'action et toute mise à jour ou modification proposée;
 - o épaulard résident du sud : évaluation de la menace imminente pour l'espèce

- o épaulard résident du sud : un examen scientifique des mesures de rétablissement pour trois populations d'épaulards en péril;
 - o plan de protection des océans et toute information pertinente sur la mise en œuvre du plan;
 - o état de la situation du programme ECHO sur les mesures d'atténuation pour réduire les menaces sur l'épaulard résident du sud en raison des activités de transport maritime, comme les perturbations acoustiques (bruits sous-marins), les perturbations physiques (collisions avec des navires, les contaminants environnementaux, la disponibilité de proies;
- b) l'expertise ou les connaissances voulues sur le lien qui existe entre, d'une part, la vitesse et le tonnage des navires (y compris les divers types de navires associés au projet, chargés et déchargés) et, d'autre part, l'intensité du bruit sous-marin que le navire produit;
- c) l'expertise ou les connaissances voulues sur l'efficacité potentielle, la sécurité et la faisabilité, sur les plans technique et économique, de chacune des éventuelles mesures d'atténuation ci-dessous, y compris, pour chacune, la façon dont elle pourrait être mise en œuvre et suivie, et l'entité (autorité, organisme ou organisation) qui pourrait en être chargée :
- o modifications des couloirs de navigation afin de réduire les effets nocifs sur l'épaulard résident du sud, par exemple le déplacement des couloirs de navigation pour les éloigner des zones de rassemblement de mammifères marins;
 - o limitations de vitesse et modifications des trajets habituels de navigation, comme des convois, pour réduire les effets nocifs éventuels, par exemple les bruits sous-marins ou les risques de collision avec des navires;
 - o recours à des observateurs de mammifères marins à bord des navires liés au projet, et les mesures qui devraient être prises dans le cas où l'on constaterait la présence d'épaulards résidents du sud;
 - o mesures pour accroître l'abondance de proies pour contrebalancer les effets du transport maritime connexe au projet;
 - o mesures de conception (y compris la coque et l'hélice) et d'entretien des navires pour réduire les effets nocifs, comme les bruits sous-marins produits par les navires liés au projet;
 - o toute autre mesure susceptible d'éviter, de réduire et/ou de contrebalancer les effets nocifs du transport maritime connexe au projet;
 - o mesures susceptibles d'éviter ou de réduire les effets nocifs cumulatifs sur l'épaulard résident du sud.

Quatrième volet : Oiseaux de mer

Autorités fédérales : ECCC

Demande : En ce qui concerne les espèces d'oiseaux de mer en péril qui sont susceptibles d'être touchés par le transport maritime connexe au projet, en plus des demandes formulées pour le deuxième volet, veuillez fournir ce qui suit :

- a) l'expertise ou les connaissances voulues sur d'éventuelles mesures pour éviter ou réduire les effets nocifs, comme la mortalité et les perturbations sensorielles, du transport maritime connexe au projet;
- b) l'expertise ou les connaissances voulues concernant l'élaboration et la mise en œuvre de systèmes de suivi pertinents.

Cinquième volet : Déversements de pétrole en milieu marin

Autorités fédérales : ECCC, MPO, TC, APVF et APP

Demande : Fournir ce qui suit :

- a) toute information sur la recherche et les découvertes depuis la date du rapport de l'Office sur le devenir et le comportement ainsi que le nettoyage du pétrole (y compris le bitume dilué) déversé dans des milieux marins, qui se rapporteraient au transport maritime connexe au projet;
- b) l'expertise ou les connaissances voulues sur des améliorations qui auraient été apportées, depuis la date du rapport de l'Office, en matière de prévention des déversements en milieu marin et de sécurité, ainsi qu'en ce qui a trait aux mesures de préparation et d'intervention en cas d'urgence et à toute information à jour sur la mise en œuvre du régime renforcé d'intervention en cas de déversement de pétrole, dont il est fait état à la condition 133 du certificat du rapport de l'Office.

Sixième volet : Sécurité maritime, navigation et perturbation

Autorités fédérales : TC, APVF et APP

Demande : En ce qui concerne les risques potentiels à la sécurité et à la navigation et les perturbations des autres navires, veuillez fournir ce qui suit :

- a) l'expertise ou les connaissances voulues sur l'incidence des sillages des navires du transport maritime connexe au projet à diverses vitesses sur les navires non liés au projet qui croisent ces mêmes sillages;
- b) l'expertise ou les connaissances sur des mesures visant à éviter, à réduire et/ou à contrebalancer les effets des navires du transport maritime connexe au projet sur les navires non liés au projet, y compris les embarcations privées de plaisance;

- c) un exemplaire de la plus récente version du guide d'information du port (« *Port Information Guide* »);
- d) les mises à jour ou modifications apportées aux services de pilotage maritimes et aux mesures visant à atténuer les risques pour les personnes, les navires et l'environnement, s'il y a lieu;
- e) les mises à jour des changements législatifs ou de politique concernant les exigences relatives aux remorqueurs d'escorte qui s'appliqueraient au transport maritime connexe au projet, s'il y a lieu.

Septième volet : Parcs nationaux et/ou aires maritimes nationales de conservation

Autorités fédérales : PC et MPO

Demande : Fournir ce qui suit :

- a) une liste des aires actuelles et à l'étude (parcs, aires protégées, réserves, aires de conservation) relevant de PC et du MPO dans les zones visées par le transport maritime connexes au projet;
- b) l'expertise ou les connaissances voulues sur des mesures d'atténuation et de suivi visant à éviter, à réduire et/ou à contrebalancer les effets des navires du transport maritime connexe au projet sur les composantes des écosystèmes marins et côtiers, notamment tout renseignement pertinent sur les exigences prévues par la loi ou lignes directrices ou pratiques exemplaires relatives à la conservation et à la protection de ces écosystèmes.

Huitième volet : Mesures d'atténuation et de suivi des effets sur la santé humaine

Autorités fédérales : SC

Demande : Veuillez fournir l'expertise ou les connaissances voulues supplémentaires, acquises depuis la date du rapport de l'Office, qui se rapportent aux mesures d'atténuation et de suivi des effets sur la santé humaine qui sont susceptibles de découler du transport maritime connexe au projet.

Neuvième volet : Mesures d'atténuation, d'accommodement et de suivi proposées par les groupes autochtones

Autorités fédérales : RNCan, APVF et APP

Demande : Veuillez fournir l'expertise ou les connaissances voulues, y compris les connaissances traditionnelles autochtones, qui ont été communiquées par des groupes autochtones depuis la date du rapport de l'Office sur les sujets suivants :

- a) les effets environnementaux et socioéconomiques du transport maritime connexe au projet;

- b) les effets éventuels du transport maritime connexe au projet sur les intérêts des Autochtones;
- c) les mesures d'atténuation, d'accommodement et de suivi visant à éviter, à réduire et/ou à contrebalancer les effets nocifs du transport maritime connexe au projet.

Pour toute question, veuillez communiquer avec l'équipe de conseillers, par téléphone au numéro sans frais 1-800-899-1265, ou par courriel à l'adresse TMX.Aide@neb-one.gc.ca.

Veuillez agréer, Madame, Monsieur, mes sincères salutations.

La secrétaire de l'Office,

VIA NEB e-Filing

National Energy Board
Suite 210, 517 Tenth Avenue SW
Calgary, AB T2P 5J2

Attention: Sheri Young, Secretary of the Board

Dear Ms. Young,

**Re: Trans Mountain Request to hold NEB Orders and Application Processes in
Abeyance dated September 21, 2018**

We are counsel for the Stó:lō applicants, Aitchelitz, Shxwhà:y Village, Skowkale, Skwah, Soowahlie, Squiala, Tzeachten, and Yakweakwioose (the "**Stó:lō Applicants**"), who were among the successful Indigenous applicants in the Federal Court of Appeal's decision in Tseil-Waututh Nation v. Canada (Attorney General), 2018 FCA 153 ("**TWN**"). The Stó:lō Applicants are also part of the Stó:lō Collective, a broader group who participated as an Intervenor in the National Energy Board ("**NEB**") review of the Trans Mountain expansion project (the "**Project**") and has been granted intervenor status in the Reconsideration Hearing.

We write in response to the letter dated September 21, 2018 from counsel for Trans Mountain to the NEB (the "**Abeyance Letter**") requesting that the NEB hold the Project-related orders, outstanding application review processes and condition compliance determinations and processes in abeyance "pending the issuance of a valid Certificate of Public Convenience and Necessity". Trans Mountain did not deliver a copy of the Abeyance Letter to the Stó:lō Applicants.

We have reviewed the responses to the Abeyance Letter delivered to the NEB to date by counsel for the City of Burnaby, Tseil-Waututh Nation, Squamish, Upper Nicola and Stk'emlupsemc te Secwepemc and agree with the submissions made by those counsel with respect to the relief sought by Trans Mountain. In the circumstances, the NEB must either: (a) decline to provide the relief sought by Trans Mountain; or alternatively (b) not proceed to consider the relief sought unless and until a proper hearing process is in place to provide an opportunity for all of the affected applicants to address the issues raised by Trans Mountain in the Abeyance Letter.

We also wish to note that it is a significant concern that Trans Mountain would deliver a letter to the NEB, without notice to any of the successful applicants in TWN, in which Trans Mountain is

seeking relief from the NEB that is in direct conflict with the relief granted by the Federal Court of Appeal to those successful applicants. It is clear that the Stó:lō Applicants' interests are affected by the relief sought by Trans Mountain in the Abeyance Letter. Trans Mountain has not appealed the decision in TWN, or sought a stay of the decision through the proper appellate route. Instead, it has chosen a route intended to circumvent the remedy granted by the Federal Court of Appeal in a manner meant to avoid the objections of those affected.

We have copied counsel for Trans Mountain on our letter.

Yours truly,

MILLER TITERLE LAW CORPORATION

Our File: 101024-038

VIA NEB e-Filing

National Energy Board
Suite 210, 517 Tenth Avenue SW
Calgary, AB T2P 5J2

Attention: Sheri Young, Secretary of the Board

Dear Ms. Young,

**Re: Trans Mountain Expansion Project – Reconsideration
Hearing Order MH-052-2018 & File OF-Fac-Oil-T260-2013-03 59
Notice of Intent and Objection of the Stó:lō Collective**

We are counsel for the Stó:lō Collective in relation to the National Energy Board ("**NEB**") reconsideration hearing (the "**Reconsideration Hearing**"). The purpose of this letter is to provide the Stó:lō Collective's Notice of Intent to provide oral Indigenous traditional knowledge ("**Oral Traditional Evidence**") pursuant to Practice Direction No. 1 of the NEB dated October 12, 2018 ("**PD #1**"), as well as object to the process provided therein.

During the first hearing (the "**First Hearing**") to consider the application by Trans Mountain Pipeline ULC ("**Trans Mountain**") to the NEB for the Trans Mountain Expansion Project (the "**Project**"), the NEB established a process for the hearing of Oral Traditional Evidence, which imposed time limits on that evidence, set limitations on the nature of the knowledge that could be shared orally, and permitted Trans Mountain, other intervenors and the NEB to cross-examine the witnesses. By letter dated December 5, 2014 (the "**Objection Letter**"), the Stó:lō Collective objected to the process prescribed by the NEB, advising, among other things, that the process was unfair, culturally inappropriate and imbalanced. In particular, the Stó:lō Collective stated that the process chosen conflicted with Stó:lō customs and traditions that support knowledge transfer and honouring their Elders. The Stó:lō Collective also explained in the Objection Letter that the process chosen by the NEB had resulted in internal division, including the loss of two communities from the Stó:lō Collective.

As a result of the Stó:lō Collective's dissatisfaction with the NEB's process for hearing Oral Traditional Evidence, it chose to abstain from it entirely.

1. OBJECTION TO PROCESS FOR COLLECTION OF ORAL TRADITIONAL EVIDENCE

In light of the Stó:lō Collective's concerns about the treatment of Oral Traditional Evidence in the First Hearing, in the letter of comment to the NEB dated October 3, 2018, the Stó:lō Collective requested that Oral Traditional Evidence be collected in a manner that was reflective of the specific cultural practices of the Indigenous group providing such evidence. PD #1 disregards

this entirely. As a result, the Stó:lō Collective wishes to again record an objection to the Oral Traditional Evidence process prescribed by the NEB in PD #1 for this Reconsideration Hearing.

1.1 Timing

As the NEB has repeatedly reminded intervenors, it must complete the Reconsideration Hearing and issue its Reconsideration report by February 22, 2019. Consequently, the rushed pace of the Reconsideration Hearing has truncated the Oral Traditional Evidence process in a manner that the Stó:lō Collective considers culturally insensitive and procedurally unfair. For instance, the time constraint has or is likely to result in the following issues:

- (a) there is inadequate time for the Stó:lō Collective to identify appropriate knowledge holders to provide Oral Traditional Evidence;
- (b) there is limited time for the NEB to hear Oral Traditional Evidence or to design a schedule which accommodates the needs of particular communities;
- (c) Oral Traditional Evidence sessions are scheduled to be held in late-November/early-December which conflicts with the Stó:lō Bighouse season, wherein many of the traditional knowledge holders are occupied with Bighouse duties and are providing spiritual and ceremonial support thereof;
- (d) there has been inadequate consideration of cultural protocols and ceremony surrounding the sharing of Oral Traditional Evidence by Stó:lō knowledge keepers; and
- (e) the NEB has demonstrated a lack of understanding for and protection of Stó:lō intellectual property and confidential and culturally-sensitive information.

1.2 Intellectual Property

The Stó:lō Collective is particularly concerned about the lack of proper safeguards for intellectual property and confidential and culturally-sensitive information which may be shared during the course of Oral Traditional Evidence sessions. The NEB has not taken any steps to ensure that Oral Traditional Evidence remains subject to confidentiality restrictions rather than being subject to public disclosure.

1.3 Cross-examination

As in the First Hearing, the NEB is again allowing Trans Mountain to cross-examine witnesses during the Oral Traditional Evidence sessions. The Stó:lō Collective objected to this aspect of the process in its Objection Letter, and maintains its objection for the Reconsideration Hearing. As stated previously, in Stó:lō cultural practices, it is neither customary nor appropriate to question Elders' expression of traditional knowledge. To do so is to show great disrespect, not just to the particular Elder, but also to their ancestors, name bearers, the land, and the spirits from which the Elder gains their knowledge.

The Stó:lō Collective has been an active participant throughout the regulatory approval process for the Project and will continue to do so but has significant concerns that the Reconsideration

Hearing will repeat and exacerbate the mistakes of the past identified by the Federal Court of Appeal in *Tsleil-Waututh Nation v. Canada (Attorney General)*, 2018 FCA 153. To reiterate what the Stó:lō Collective previously expressed in its Objection Letter: the process of oral traditional hearings must reflect a basic understanding of First Nations culture and society. Without an adequate understanding of Stó:lō culture and society, this process, too, is destined to be fatally flawed.

2. NOTICE OF INTENT

Notwithstanding the Stó:lō Collective's objection to the process chosen by the NEB, the Stó:lō Collective wishes to provide Oral Traditional Evidence. Please note, however, that due to time constraints, the Stó:lō Collective is unable to identify the appropriate knowledge keeper at this stage. As these individuals have not yet been identified, we are also unable to indicate whether any of the Stó:lō Collective's witnesses will require the assistance of remote participation. The Stó:lō Collective has circulated a request to each of its member communities to appoint a representative as soon as possible. We anticipate that we will be in a position to provide the NEB with the individual name(s) shortly, as well as any respective requests for remote participation.

Yours truly,

This is Exhibit L referred to in the Affidavit
of Tanny Nguyen sworn before me at
Vancouver, BC this 6th day of July, 2019.

A Commissioner for taking affidavits for
British Columbia

File OF-Fac-Oil-T260-2013-03 59
29 October 2018

To: All Parties

**Trans Mountain Pipeline ULC (Trans Mountain)
Application for the Trans Mountain Expansion Project (Project)
National Energy Board (Board) reconsideration of aspects of its Recommendation
Report as directed by Order in Council P.C. 2018-1177 (Reconsideration)
MH-052-2018
Reasons for the Board's decisions reached in its 12 October 2018 letter**

A. Background

On 26 September 2018, the Board sought public comments by 3 October 2018 on:

- 1) whether, “on a principled basis,”¹ Project-related marine shipping should be included in the “designated project” to be assessed under the *Canadian Environmental Assessment Act, 2012* (CEAA 2012);
- 2) the draft Amended Factors and Scope of the Factors for the Environmental Assessment pursuant to the CEAA 2012 (Amended Factors Document), and the draft List of Issues to be considered in the Reconsideration hearing;
- 3) the design of the hearing process to be used for the Reconsideration; and
- 4) which government departments or bodies the Board should require information from during the hearing.

In its 5 October 2018 letter, the Board sought additional, focused comments from the Parties by 9 October 2018 on the following limited issue:

Assuming Project-related marine shipping is included in the “designated project” to be assessed under the CEAA 2012, should the designated project be defined as including:

- a) Project-related marine shipping between the Westridge Marine Terminal (WMT) and the territorial sea limit; *or*
- b) Project-related marine shipping between the WMT and the outer boundary of Canada's exclusive economic zone?

.../2

¹ *Tsleil-Waututh Nation v. Canada (Attorney General)*, *supra* note 2 at para. 770.

Comments received are found in the Board's online [public registry](#). The Board considered all comments received, including, in this instance, those comments filed late.

On 12 October 2018, the Board released a [series of documents](#), including Hearing Order MH-052-2018 outlining the hearing steps and schedule, to which the List of Issues and the Amended Factors Document are attached. These documents also included a letter requesting specialist or expert information or knowledge in the possession of various Federal Authorities, pursuant to paragraph 20(a) of the CEAA 2012, and Filing Requirements for Trans Mountain. These documents, along with the associated cover letter, provided the Board's decisions on the matters for which it sought comments. The cover letter stated that the Board's reasons for its decisions would follow.

Attached to this letter are the Board's reasons for the decisions it reached in its 12 October 2018 letter and attachments.

Appendix 1 provides the Board's reasons to, on a principled basis, include Project-related marine shipping between the WMT and the 12-nautical-mile territorial sea limit in the "designated project" to be assessed under the CEAA 2012.

Appendix 2 provides the Board's reasons with respect to the List of Issues, the Amended Factors Document, the design of the hearing process, and which government departments or bodies the Board will require information from during the hearing.

For any questions, please contact a Process Advisor by phone at 1-800-899-1265 (toll-free) or by email at TMX.ProcessHelp@neb-one.gc.ca.

This is Exhibit M referred to in the Affidavit of Tanny Nguyen sworn before me at Vancouver, BC this 6th day of July, 2019.

A Commissioner for taking affidavits for British Columbia

Appendix 1

These are the National Energy Board's (Board or NEB) reasons for its decision in its letter of 12 October 2018 to, on a principled basis, include Trans Mountain Expansion Project- (Project-) related marine shipping between the Westridge Marine Terminal (WMT) and the 12-nautical-mile territorial sea limit in the "designated project" to be assessed under the *Canadian Environmental Assessment Act, 2012* (CEAA 2012).

Views of Trans Mountain Pipeline ULC (Trans Mountain)

Inclusion of Project-related marine shipping in the "designated project"

Trans Mountain said that the specific facts of this case, the application of the Canadian Environmental Assessment Agency's (CEA Agency) Guide to Preparing a Description of a Designated Project under the *Canadian Environmental Assessment Act, 2012* (CEA Agency Guidance)¹, and the need for certainty of process, can reasonably lead the Board to conclude that Project-related marine shipping is "incidental" to the Project and part of the "designated project" under the CEAA 2012.

Extent of Project-related marine shipping

Trans Mountain said that the "designated project" should include Project-related marine shipping between the WMT and the territorial sea limit. It said that Canada does not have jurisdiction over shipping beyond the territorial sea limit. Further, Trans Mountain's ability to impose and enforce requirements on tankers in Canada's 200 nautical mile exclusive economic zone (EEZ) is extremely limited. Trans Mountain pointed out that comparable environmental assessments (EAs) have included shipping to the territorial sea limit.

Trans Mountain also said that there are no established shipping lanes in the EEZ. An assessment of effects from routine shipping operations in the EEZ would be impractical and results would be subject to a high degree of inaccuracy, rendering the effort largely ineffectual. Trans Mountain said that the risk of marine shipping accidents is higher in coastal waters, and that an assessment of effects within the 12-nautical-mile territorial sea limit reasonably balances risk and value. It interpreted the Federal Court of Appeal's decision in *Tsleil-Waututh Nation v. Canada (Attorney General)*,² as a confirmation that Trans Mountain's assessment of effects – which considered Project-related tanker traffic to the territorial sea limit – was adequate.

² 2018 FCA 153 at para 770 [*Tsleil-Waututh Nation*].

Views of participants³

Inclusion of Project-related marine shipping in the “designated project”

Participants were in agreement that Project-related marine shipping should be included in the “designated project” to be assessed under the CEAA 2012. Arguments raised by the participants in support of this include the language in [Order in Council P.C. 2018-1177](#) (OIC), findings of the Federal Court of Appeal in *Tsleil-Waututh Nation*, the dictionary definition of “incidental,” the purposes of the CEAA 2012 and the *Species at Risk Act* (SARA), and the CEA Agency Guidance.

Extent of Project-related marine shipping

The Government of Canada and the Government of Alberta support including Project-related marine shipping up to the territorial sea limit. The Government of Alberta said that the Federal Court of Appeal specifically did not criticize the Board’s decision to limit its assessment of Project-related marine shipping to the 12-nautical-mile territorial sea limit, and that any reconsideration should be limited in scope. It said that the legislative scheme of the CEAA 2012 suggests that there must be a certain level of proximity connecting the incidental physical activities to the designated project itself.

Most participants said that Project-related marine shipping between the WMT and EEZ should be included in the “designated project.” Certain participants said that the assessment should extend beyond the EEZ. For example, BC Nature and Nature Canada said that the spatial limit of Project-related marine shipping should not be restricted, but, in the alternative, it should extend to the EEZ. Stk’emlupsemc te Secwepemc of the Secwepemc Nation also said that potential adverse effects of carbon and carbon equivalent emissions must be considered for the entire route of the marine tankers, from the WMT to the end destination terminal for the oil.

Many participants said that including the EEZ is consistent with the scheme and object of the CEAA 2012 and the intention of Parliament. In particular, a broader assessment is supported by the purposes of the CEAA 2012 to protect components of the environment that are within the legislative authority of Parliament and to consider designated projects in a careful and precautionary manner. Some participants also referenced the purpose of the SARA to prevent wildlife species from being extirpated or becoming extinct and to provide for the recovery of wildlife species. Other participants noted that the definition of “environmental effects” in the CEAA 2012 mentions “components of the environment that are within the legislative authority of Parliament” and includes effects on federal lands (which includes the EEZ) and outside Canada. Many participants also relied on the plain meaning of “designated project” and “incidental.” Some submitted that the reference to “federal lands” in the definition of “designated project” is relevant to determining the scope of what is “incidental.” However, other participants had a differing interpretation and said that incidental activities are not restricted to the boundary of Canada or the EEZ.

³ For the purposes of this document, the term “participants” includes intervenors and interested members of the public that filed comments relevant to the issues discussed in these reasons.

Many participants said that Parliament has legislative authority within the EEZ. Some participants pointed to Canada's sovereign rights for conserving and managing living resources within the EEZ and its jurisdiction over the protection and preservation of the marine environment within the EEZ under the *United Nations Convention on the Law of the Sea* and the *Oceans Act*. In addition to the CEAA 2012, participants provided other examples of Parliament's authority in the EEZ including the SARA; *Canada Shipping Act, 2001*; *Canadian Environmental Protection Act, 1999*; *Fisheries Act*; *Migratory Birds Convention Act, 1994*; and *Constitution Act, 1867*. The Washington Department of Ecology also provided some examples from the United States.

Some participants said that the CEA Agency's five criteria regarding "incidental" physical activities make no distinction with respect to where activities occur. Participants said that the Federal Court of Appeal's findings regarding these criteria apply equally to Project-related marine shipping within Canada's territorial sea, the EEZ, and beyond.

Several Indigenous groups said that extending the designated project to the outer boundary of the EEZ is necessary to ensure impacts on their Treaty rights and the environment within their traditional territories are thoroughly assessed and adequately accommodated. Pacheedaht First Nation said that Swiftsure Bank is a critical fishing area that appears to be partially outside of the territorial sea limit.

Many participants expressed concerns about potential effects on wildlife and species at risk, including the Southern resident killer whale, which use the spatial area beyond the territorial sea limit or have critical habitat in the EEZ. Some participants said that large marine spills within the EEZ can occur, which could impact wildlife throughout the EEZ and territorial sea. Participants said that the effects of an oil spill within the territorial sea could be felt well beyond that zone, into the EEZ itself. Living Oceans Society and Raincoast Conservation Foundation said that the Board should request up-to-date information from Fisheries and Oceans Canada about fisheries activities, and the extent of the range and habitats of species at risk within the EEZ.

Some participants said that limiting the assessment of Project-related marine shipping to the territorial sea limit would hinder the Board's ability to adequately collect the information and conduct the assessment necessary for the Governor in Council (GIC) to properly make a final determination.

Views of the Board

1. Introduction

In accordance with paragraph (a) of the OIC, and paragraph 770 of the Federal Court of Appeal's decision in *Tsleil-Waututh Nation*, the Board must reconsider, on a principled basis, whether Project-related marine shipping should be included in the "designated project" to be assessed under the CEAA 2012.⁴ This issue turns on whether Project-related marine shipping is a "physical activity that is incidental" to the pipeline component of the Project, as that phrase is

⁴ *Supra* note 2.

used in section 2 of the CEAA 2012.⁵ The Court stated that “[t]his is not a pure issue of statutory interpretation. Rather, it is a mixed question of fact and law heavily suffused by evidence.”⁶

If Project-related marine shipping is to be included as part of the defined designated project, a subsidiary question arises as to the geographic extent of Project-related marine shipping. Neither *Tsleil-Waututh Nation*, nor the OIC, expressly define “Project-related marine shipping” and, in particular, its geographic extent. In the Board’s [OH-001-2014 Report](#), it assessed, under the *National Energy Board Act*, the environmental effects of Project-related marine shipping to the territorial sea limit, using a similar approach to the EA conducted under the CEAA 2012 for the pipeline component to the extent appropriate.⁷ The study areas applied by the Board to carry out its assessment centered around established inbound and outbound shipping lanes.⁸

2. Executive summary

The Project includes a new onshore pipeline longer than 40 kilometres and is, therefore, a “designated project” subject to an EA by the Board under the CEAA 2012. Subsection 2(1) of the CEAA 2012 defines “designated project” as including any “incidental” physical activity.

First, the Board must determine whether Project-related marine shipping should be included in the “designated project.” When the OIC is considered in combination with the views of the Federal Court of Appeal in *Tsleil-Waututh Nation*, it strongly suggests that Project-related marine shipping should be included in the “designated project.”

The Board finds that the statutory scheme of the CEAA 2012 also supports the conclusion that Project-related marine shipping should be included in the “designated project.” The term “incidental” is not defined in the CEAA 2012. However, in the Board’s view, the additional tanker loads at the WMT are tied to and dependent on the pipeline component of the Project. Further, the purposes of the CEAA 2012 include the protection of the components of the environment within the legislative authority of Parliament from significant adverse environmental effects, and ensuring that designated projects are considered in a careful and precautionary manner. The inclusion of Project-related marine shipping will provide the GIC with a more fulsome understanding of the potential environmental effects of this marine shipping, and how those effects can be mitigated to reduce or avoid environmental harm.

The Board finds that the CEA Agency’s criteria are not decisive, but viewed together with *Tsleil-Waututh Nation*, the OIC, and the statutory scheme, the criteria support the inclusion of Project-related marine shipping in the “designated project.”

⁵ *Ibid* at para 391.

⁶ *Ibid* at para 391.

⁷ National Energy Board, *Trans Mountain Expansion Project* - OH-001-2014 (May 2016) online: NEB <<https://apps.neb-one.gc.ca/REGDOCS/File/Download/2969681>> at 332 [*OH-001-2014 Report*].

⁸ *Ibid*. The spatial boundaries (or study areas) for the Board’s assessment of Project-related marine shipping are described in Appendix 11 of the OH-001-2014 Report.

Secondly, having reached the conclusion that Project-related marine shipping is “incidental” to the “designated project,” the Board must determine the appropriate geographic extent of Project-related marine shipping.

The Board is of the view that that geographic extent should not be so broad as to frustrate the CEAA 2012’s purpose of timely EAs, or to produce results that are not useful in protecting the environment and reducing harm. The Board is of the view that the CEA Agency Guidance provides limited clarity with respect to the appropriate geographic extent of Project-related marine shipping. However, relevant case law suggests that the word “incidental” should be interpreted to require a “certain level of proximity as well as possibly a causal connection between activities and the designated project.”⁹ The Board is not persuaded that a sufficient “level of proximity” exists once the tankers exit the territorial sea.

A key fact that the Board must consider in conducting any EA is the geographical extent of the project, and the spatial boundaries within which that project is expected to have potential effects on the selected valued components. In order to define the spatial boundaries, knowing the project location or route is fundamental.

There is a marked and material difference between marine shipping within the territorial sea limit and the EEZ. Given that there are no defined shipping lanes in the EEZ – a vast area of ocean – no shipping “route” for the Project can be identified with any degree of certainty. Destinations can vary from Washington State, California, or Asia. The lack of a certain route means, in turn, that appropriate spatial boundaries cannot be identified with certainty. It is not possible to predict the project-environment interactions and the full impacts of that project, nor can one adequately evaluate technically and economically feasible mitigation as required by the CEAA 2012.¹⁰ It would produce speculative, as opposed to meaningful, information about project impacts. Such an EA would not be useful as a planning and decision-making tool for the GIC.

The Board assessed Project-related marine shipping to the territorial sea limit in its OH-001-2014 Report. The Board finds it compelling that the Federal Court of Appeal, in *Tsleil-Waututh Nation*, did not raise concerns with this geographic scope, and was able to conclude, among other things, that “[g]iven the Board’s approach to the assessment and its findings, the Board’s report was adequate for the purpose of informing the GIC about the effects of Project-related marine shipping on the Southern resident killer whales and their use by Indigenous groups.”¹¹

Several other EAs carried out under the CEAA 2012 have included consideration of project-related marine shipping; however, only to a maximum geographical extent of the territorial sea limit.¹² It is telling that other expert tribunals have consistently limited the assessment of project-related marine shipping to the territorial sea limit or to a lesser limit.

⁹ *Canada (Canadian Environmental Assessment Agency) v Taseko Mines Limited*, 2018 BCSC 1034 at para 66 [Taseko].

¹⁰ For example, the CEAA 2012, s 19(1)(a), (b) & (d).

¹¹ *Supra* note 2 at para 439.

¹² See Section 4.4 of these reasons for specific project information.

These other EAs solidify the Board's view that incremental marine shipping within the EEZ is not "incidental" and should not be included in the "designated project."

The Board has considered the applicable statutory scheme, the Federal Court of Appeal's decision in *Tsleil-Waututh Nation*, the OIC, case law, the CEA Agency Guidance, and practical EA considerations. The Board has applied all of this to the specific facts in this case and has concluded that Project-related marine shipping between the WMT and the 12-nautical-mile territorial sea limit is "incidental" to the pipeline component of the Project.

The Board's full reasons are below.

3. Overview of relevant facts

3.1 Project facts

The proposed Project would result in the looping (or twinning) of the existing 1,147-kilometre-long Trans Mountain Pipeline system between Edmonton, Alberta and Burnaby, British Columbia, increasing the system's capacity from 300,000 bbl/d to 890,000 bbl/d of crude petroleum and refined products.¹³ Up to 71 per cent (630,000 bbl/d) of that capacity could be loaded onto tankers at the WMT for transport to Pacific Rim destinations, such as Washington State, California, and Asia.¹⁴

Trans Mountain would not own or operate the tankers loaded at the WMT.¹⁵ However, Trans Mountain's Tanker Acceptance Standard would prevent any tanker not approved by it from loading at the WMT.¹⁶ The existing WMT loads approximately five tankers per month. The expanded system associated with the Project would increase the WMT's loads to approximately 34 Aframax tankers per month, with actual demand driven by market conditions.¹⁷ The whole sailing route from the WMT to the Juliet Buoy outside the Strait of Juan de Fuca (in the vicinity of the territorial sea limit) has a Traffic Separation Scheme that encompasses inbound and outbound shipping lanes.¹⁸ Figure 1 below shows the inbound and outbound shipping lanes for Project-related marine shipping within the territorial sea.

Figure 1 – Inbound and outbound shipping lanes for Project-related marine shipping within the territorial sea

3.2 Regulatory framework

The territorial sea begins at the baseline (low-water mark) and extends 12 nautical miles into the ocean.¹⁹ The territorial sea is part of Canada, and is subject to a broad and detailed Canadian regulatory framework governing safety, security, and environmental protection in relation to marine shipping.²⁰ For example, parts of the *Canada Shipping Act, 2001* relating to personnel, safety, incidents, accidents and casualties, and navigation apply to Canadian vessels everywhere and in respect of foreign vessels in Canadian waters.²¹ Canadian waters means the territorial sea of Canada and all internal waters of Canada;²² it does not include the EEZ. Furthermore, the *Canada Shipping Act, 2001* allows for the establishment of vessel traffic service zones, which can involve traffic separation schemes and shipping lanes, within Canadian waters.²³ Under the *Pilotage Act*, the regions which the pilotage authorities operate are all within Canadian waters.²⁴ Another example is the *Marine Transportation Security Act*, which applies to vessels and marine facilities in Canada and Canadian ships outside Canada.²⁵

Transport Canada has primary responsibility for regulating marine vessels, including shipping lanes and marine traffic safety measures. Several other government agencies, including the Vancouver Fraser Port Authority, Pacific Pilotage Authority, and the Canadian Coast Guard, also impose legal and regulatory requirements in the territorial sea.

Beyond the territorial sea limit is Canada's EEZ. The EEZ is a creation of the *United Nations Convention on the Law of the Sea* (UNCLOS), now reflected in Canadian domestic law, and extends to 200 nautical miles from the baseline.²⁶ Under the *Oceans Act*, Canada has limited rights and jurisdiction within the EEZ that are generally related to "managing the natural resources, whether living or non-living" and the "protection and preservation of the marine environment."²⁷ These rights are not unqualified, and must be exercised in a manner consistent with generally accepted international rules and standards. Furthermore, there are no established shipping lanes within the EEZ.

Examples of Canada's authority within the EEZ include pollution prevention and pollution response under the *Canada Shipping Act, 2001*.²⁸ Similarly, prohibitions and requirements relating to disposal at sea under the *Canadian Environmental Protection Act, 1999* apply to the EEZ.²⁹ The EEZ is also referenced in the SARA in the context of emergency orders and

¹⁹ *Oceans Act*, s 4.

²⁹ Part 7, Division 3.

prohibition regarding the destruction of critical habitat.³⁰ The CEAA 2012 refers to the EEZ in its definition of “federal lands,” which is discussed in more detail below.

4. Analysis

Since the Project includes a new onshore pipeline longer than 40 kilometres in length, it is a “designated project” subject to an EA by the Board under the CEAA 2012.³¹ Subsection 2(1) of the CEAA 2012 defines “designated project” as including any “incidental” physical activity.

The Board must determine whether Project-related marine shipping is a physical activity that is “incidental” to the pipeline component of the Project. If Project-related marine shipping is to be included as part of the defined “designated project,” the Board must also determine the geographic scope and extent of marine shipping.

“Incidental” is not defined in the CEAA 2012. The interpretation of that term must be based on the modern principle of statutory interpretation, which requires that the words of a statute are to be read in their entire context and in their grammatical and ordinary sense harmoniously with the scheme of the statute, and the intention of Parliament.³²

Also relevant to the analysis is the Federal Court of Appeal’s decision in *Tsleil-Waututh Nation*, the OIC, case law, the CEA Agency Guidance, and EA considerations.

4.1 *Tsleil-Waututh Nation* and the OIC

The Federal Court of Appeal, in *Tsleil-Waututh Nation*, indicated that “marine shipping is, at the least, an element that accompanies the Project.”³³ The Court went on to say that the Board’s view that it was required to have regulatory authority over shipping in order to include marine shipping as part of the Project is inconsistent with the purposes of the CEAA 2012 and impermissibly restrictive.³⁴ The Court stated that “[t]he Board’s reasons do not well-explain its scoping decision, do not grapple with the relevant criteria, and appear to be based on a rationale that is not supported by the statutory scheme.”³⁵

Accordingly, the resulting OIC:

- (b) directs that the Board conduct the reconsideration taking into account the following factors:
 - (i) the environmental effects of Project-related marine shipping in view of the requirements of the CEAA 2012, and

³⁰ Ss 58(1)(a) & 80.

³¹ *Regulations Designating Physical Activities*, s 46.

³² *Rizzo & Rizzo Shoes Ltd., Re*, [1998] 1 SCR 27 at para 21.

³³ *Supra* note 2 at para 396.

³⁴ *Ibid* at para 402.

³⁵ *Ibid* at para 409.

- (ii) the adverse effects of Project-related maritime shipping on species at risk, including the Northeast Pacific southern resident killer whale population, and their critical habitat, in view of any requirements of section 79 of the SARA that may apply to the Project;

The OIC, in combination with the views of the Federal Court of Appeal in *Tsleil-Waututh Nation*, strongly suggest that Project-related marine shipping should be included in the “designated project.” However, under the CEAA 2012, the Board is the responsible authority with respect to the designated project, and must ensure an EA of the designated project is conducted.³⁶ As a result, the Board must conduct a principled analysis of this issue. The OIC also instructs the Board to address paragraph 770 of *Tsleil-Waututh Nation*, which requires such an analysis.

The Board must also determine the geographic extent of the marine shipping to be included in the “designated project.” The OIC and *Tsleil-Waututh Nation* do not give express instruction on this point. However, the Board notes that Project-related marine shipping was assessed to the territorial sea limit in its OH-001-2014 Report. The Board finds it compelling that the Federal Court of Appeal did not raise concerns with this geographic scope, and was able to conclude, among other things, that, “[g]iven the Board’s approach to the assessment and its findings, the Board’s report was adequate for the purpose of informing the GIC about the effects of Project-related marine shipping on the Southern resident killer whales and their use by Indigenous groups.”³⁷ This conclusion of the Court was also referenced in the GIC’s [explanatory note](#) to the OIC.³⁸

4.2 Statutory interpretation

Environmental legislation, such as the CEAA 2012, should be given a generous interpretation to allow effective response to environmental harm, in keeping with the precautionary principle and the role of EA as a planning tool.³⁹

In their comments, several participants pointed to the fact that the definition of “designated project” in subsection 2(1) of the CEAA 2012 makes reference, in paragraph (a), to physical activities that are carried out “on federal lands.”

designated project means one or more physical activities that

- (a) are carried out in Canada or **on federal lands**;
- (b) are designated by regulations made under paragraph 84(a) or designated in an order made by the Minister under subsection 14(2); and
- (c) are linked to the same federal authority as specified in those regulations or that order.

³⁶ CEAA 2012 s 15(1)(b) & 22.

³⁷ *Supra* note 2 at para 439.

³⁸ Canada Gazette Part I, Vol 152, No 39 (29 Sept 2018) at 3279.

³⁹ *Taseko*, *supra* note 9 at para 38 citing *Friends of the Oldman River Society v Canada (Minister of Transport)*, [1992] 1 SCR 3 at 71 and *Castonguay Blasting Ltd. v Ontario (Environment)*, 2013 SCC 52 at paras 9, 20.

It includes any physical activity that is **incidental** to those physical activities [emphasis added].

federal lands means

- (a) lands that belong to Her Majesty in right of Canada, or that Her Majesty in right of Canada has the power to dispose of, and all waters on and airspace above those lands...;
- (b) the following lands and areas:
 - (i) the internal waters of Canada, in any area of the sea not within a province,
 - (ii) the territorial sea of Canada, in any area of the sea not within a province,
 - (iii) the ***exclusive economic zone of Canada***, and
 - (iv) the continental shelf of Canada... [Emphasis added]

Some participants said that this means that Project-related marine shipping in the EEZ should be included in the scope of the “designated project.” Other participants submitted that the reference to federal lands in paragraph (a) of the definition only applies to the primary project activities (in this case, the pipeline), and not those that are “incidental” to them. For example, the Federation of BC Naturalists and Nature Canada commented as follows:⁴⁰

This definition distinguishes between two types of physical activities. The first type encompasses those physical activities that meet the three criteria under the definition. Particularly, such physical activities must be “carried out in Canada or on federal lands.” These physical activities form the core of the designated project. The second type consists of incidental activities, which are defined as “any physical activity that is incidental *to those physical activities*.” The words “*to those physical activities*” refer to those physical activities that meet the three criteria and form the core of the designated project. None of the three criteria applicable to the core physical activities applies to incidental activities.

The CEAA 2012 clearly allows for the possibility that a “designated project” *could* take place in the EEZ and be subject to an EA. Certain offshore drilling projects are an obvious example.⁴¹ However, there appears to be a degree of ambiguity in the definition of “designated project” with respect to what is “incidental.” Therefore, the Board’s analysis must look beyond the definition of “designated project.”

Some participants referred the Board to the fact that paragraph 5(1)(b) of the CEAA 2012 requires that the “environmental effects” to be taken into account in an EA include changes to the environment that are on federal lands (which is defined as including the EEZ), as well as outside Canada:

⁴⁰ Comments of BC Nature and Nature Canada on the spatial limit of Project-related marine shipping (9 October 2018) at pp 2-3. Living Oceans Society and Raincoast Conservation Foundation made a similar argument.

⁴¹ *Regulations Designating Physical Activities*, ss 40-42.

- 5 (1) For the purposes of this Act, the environmental effects that are to be taken into account in relation to an act or thing, a physical activity, a designated project or a project are...
- (b) a change that may be caused to the environment that would occur
- (i) on federal lands...or
- (iii) outside Canada;

The Board is not questioning that environmental *effects* of a “designated project” can extend outside of Canada, including in the EEZ. However, this does not address the issue of the geographical extent of the “*designated project*” *itself*, including its incidental activities.

In looking at the CEAA 2012 as a whole, the Board finds its purposes to be instructive. These purposes include the protection of the components of the environment within the legislative authority of Parliament from significant adverse environmental effects, ensuring that designated projects are considered in a careful and precautionary manner, and ensuring EAs are completed in a timely manner.⁴² Additionally, responsible authorities must exercise their powers in a manner that protects the environment and human health and applies the precautionary principle, in the administration of the CEAA 2012.⁴³

The Board is of the view that the purposes of the CEAA 2012 support the conclusion that Project-related marine shipping is “incidental” to the pipeline, and included in the “designated project.” The inclusion of Project-related marine shipping will provide the GIC with a more fulsome understanding of the potential environmental effects of this marine shipping, and how those effects can be mitigated to reduce or avoid environmental harm. However, the Board also notes that the extent of what is “incidental” should not be too broad as to frustrate the other the CEAA 2012 purpose of timely EAs. The other limitation of an overly broad assessment is that results may not be useful in protecting the environment and reducing harm.

In the specific context of the CEAA 2012, the term “incidental” has been judicially considered by the Supreme Court of British Columbia in *Canada (Canadian Environmental Assessment Agency) v. Taseko Mines Limited*. The Court noted that the word “incidental” has been judicially construed to mean “occurring or liable to occur in fortuitous or subordinate conjunction with something else.”⁴⁴ The Court also referred to the *Shorter Oxford English Dictionary* definition of “incidental” as “liable to happen,” “naturally attaching to,” “occurring as something causal or of secondary importance,” and “following upon as a subsequent circumstance.”⁴⁵

The Court was “not persuaded that the word ‘incidental’ should be interpreted to include all physical activities that are in subordinate conjunction with and or consequent upon” the project. The Court concluded that the “above definitions, read within the scheme of the CEAA 2012, support that “incidental” requires a **certain level of proximity** as well as possibly causal connection between activities and the designated project” [emphasis added].⁴⁶

⁴² CEAA 2012 at s 4(1).

⁴³ *Ibid* at s 4(2).

⁴⁴ *Taseko*, *supra* note 9 at para 65.

⁴⁵ *Ibid*.

⁴⁶ *Ibid* at para 66.

Tsleil-Waututh Nation notes that the primary purpose of the Project is “to provide additional transportation capacity for crude oil from Alberta to markets in the Pacific Rim.”⁴⁷ In the Board’s view, the addition of up to approximately 29 tanker loads from the WMT is tied to and dependent on the pipeline component of the Project. This supports an interpretation of “incidental” that includes Project-related marine shipping. The Board also finds that the “level of proximity” identified by the Federal Court of Appeal is an important consideration in determining the geographic extent of Project-related marine shipping. Based on the analysis below, the Board is not persuaded that a sufficient level of proximity exists once the tankers exit the territorial sea.

4.3 CEA Agency Guidance

The interpretation of the term “incidental” can be assisted by reference to the CEA Agency Guidance. While such guidance documents are not legally binding nor determinative, they can assist in understanding the meaning of “incidental.” The CEA Agency Guidance provides a set of five criteria relevant to the question of whether certain activities should be considered “incidental” to a project:

- i. *The nature of the proposed activities and whether they are subordinate or complementary to the designated project*

The additional tanker loads at the WMT are tied to and dependent on the pipeline component of the Project. Accordingly, the Board finds that marine shipping is subordinate and complimentary to the pipeline. This criterion points towards marine shipping being incidental.

- ii. *Whether the activity is within the care and control of the proponent*

Marine shipping is undertaken by third parties, not Trans Mountain. Shipping cannot, therefore, be said to be within the care or ultimate control of Trans Mountain. This points against marine shipping being incidental.

- iii. *If the activity is to be undertaken by a third party, the nature of the relationship between the proponent and the third party and whether the proponent has the ability to “direct or influence” the carrying out of the activity*

With respect to this criterion, in *Tsleil-Waututh Nation* the Court noted:

In this regard, Trans Mountain stated...that while it did not own or operate the vessels calling at the Westridge Marine Terminal, “it is an active member in the maritime community and works with BC maritime agencies to promote best practices and facilitate improvements to ensure the safety and efficiency of tanker traffic in the Salish Sea.” Trans Mountain also referenced its Tanker Acceptance Standard whereby it can prevent any tanker not approved by it from loading at the Westridge Marine Terminal. The Board

⁴⁷ *Supra* note 2 at para 395.

recognized Trans Mountain's ability to give directions to tanker operators in Conditions 133, 134 and 144...⁴⁸

However, the Board notes that pipeline shippers own the product shipped on the Trans Mountain Pipeline system and the shippers are responsible for chartering tankers to transport the product that arrives at the WMT. Pipeline shippers have their own screening and selection process to ensure that tankers calling on the WMT meet international regulations and Trans Mountain's Tanker Acceptance Standard. It is also the pipeline shipper that arranges for a local shipping agent to assist the vessel with local logistical and regulatory requirements.⁴⁹

The Board accepts that Trans Mountain does have the ability to direct or influence the carrying out of *some* aspects of marine shipping, primarily through its Tanker Acceptance Standard. Some requirements of the Tanker Acceptance Standard only apply within the territorial sea,⁵⁰ while a couple of requirements also apply in the EEZ.⁵¹ However, this is far from the level of direction Trans Mountain exerts over the pipeline component of the Project (for example, the ability to direct the shutdown of the pipeline, at any point in time, in the event of a safety concern). Once a tanker leaves the WMT, Trans Mountain's ability to enforce any requirements is very minimal.

This criterion is inconclusive in terms of marine shipping being incidental within the territorial sea and slightly leans against being incidental outside of the territorial sea.

iv. Whether the activity is solely for the benefit of the proponent or is available for other proponents as well

The oil delivered to the WMT is not owned by Trans Mountain, but by a variety of shippers. In this sense, the marine shipping benefits other proponents (i.e., oil producers in Western Canada).

At the same time, there are no other pipelines or sources that deliver oil to the WMT for the purpose of export.

The Board finds this criterion to be equivocal, but is slightly persuaded that it leans towards marine shipping being incidental.

v. The federal and/or provincial regulatory requirements for the activity

⁴⁸ *Supra* note 2 at para 405 & 406.

⁴⁹ *Supra* note 7 at 369.

⁵⁰ For example, section 4.8.1 of the Tanker Acceptance Standard states that "all vessels shall conduct operations within Canada, specifically PMV [Port Metro Vancouver], in accordance with any additional guidance provided by the Terminal." Section 4.8.3 states that the "vessel shall always navigate within the designated marine traffic corridors and comply with relevant rules of the Pacific Pilotage Authority and Port Metro Vancouver."

⁵¹ Section 4.8.4 of the Tanker Acceptance Standard states that "a vessel planning to depart Canada via the Juan de Fuca Straits shall agree that, upon exiting the Juan de Fuca Straits, it will steer a course no more northerly than due West (270°) till the vessel is outside Canadian EEZ". Section 4.8.5 states that "the Terminal may monitor the vessel's position from the time her nomination to load is accepted until she leaves the Canadian EEZ."

The Board does not have the legislative mandate to regulate marine shipping. Parliament, however, does have such authority, and its control over marine shipping is more extensive than Trans Mountain's. Within the territorial sea, save for the exception of allowing for the right of innocent passage, Canada exercises full authority over marine shipping through a comprehensive legal and regulatory regime addressing safety, security, and environmental protection. This includes confinement of marine traffic to shipping lanes.

Beyond the territorial sea, Parliament's authority is materially reduced. Parliament does not have the ability to regulate shipping traffic in the EEZ beyond what is consistent with international rules and standards, and there are no established shipping lanes in this area.

This criterion points towards marine shipping being incidental within the territorial sea, but slightly leans against being incidental outside of the territorial sea.

Conclusion

The Board finds that the criteria do not decisively favor one side, but, when viewed together with *Tsleil-Waututh Nation*, the OIC, and the statutory scheme, the criteria support a finding that Project-related marine shipping is "incidental" and included in the "designated project." Criteria i), iv), and v) point towards marine shipping being incidental, Criterion ii) does not, and Criterion iii) is inconclusive.

The Board is also of the view that this guidance provides limited clarity with respect to the appropriate geographic extent of Project-related marine shipping. However, the circumstances of Criteria iii) and v) change with distance and slightly lean against incremental marine shipping being incidental outside of the territorial sea.

4.4 EA considerations

As noted above, the determination of whether Project-related marine shipping is incidental to the pipeline is "a mixed question of fact and law heavily suffused by evidence."⁵² A key fact that the Board must consider in conducting any EA is the geographical extent of the project, and the spatial boundaries within which that project is expected to have potential effects on the selected valued components. There are usually several scales of spatial boundaries that are relevant to an assessment. Typically, the scale ranges from the project footprint to the regional study area. Well-defined spatial boundaries result in useful and meaningful data regarding project effects.

In order to define the spatial boundaries, knowing the project location or route is fundamental. The CEA Agency Guidance requires proponents to provide the project location, identify project-environment interactions, and describe the potential effects of the project.⁵³

The Board accepts that all project EAs involve some level of uncertainty and the outcomes when a project is built can differ, to some degree, from the predictions made in the EA. However, given that there are no defined shipping lanes in the EEZ – a vast area of ocean – no shipping

⁵² Supra note 2 at para 391.

⁵³ Supra note 1.

“route” for the Project can be identified with any degree of certainty. Even if tankers exiting the Juan de Fuca Straight are assumed to take the most direct route out of the EEZ, the routes and speeds of incoming and outgoing vessels in the EEZ are still uncertain given that destinations can vary from Washington State, California, or Asia.

The lack of a certain route means, in turn, that appropriate spatial boundaries cannot be identified. It is not possible to predict the project-environment interactions and the full impacts of that project, nor can one adequately evaluate technically and economically feasible mitigation as required by the CEAA 2012.⁵⁴ Attempting to conduct an EA in the EEZ would be akin to conducting an EA for a pipeline without knowing the proposed path or corridor for that pipeline. It would produce speculative, as opposed to meaningful, information about project impacts and, accordingly, would not be useful as a planning and decision-making tool for the GIC. No participant adequately explained to the Board how an EA could be carried out in a meaningful way in the EEZ in the circumstances where the route of the tankers is uncertain. This is a marked and material difference from marine shipping within the territorial sea limit. As noted previously, the Board’s study areas for its original assessment of Project-related marine shipping centered around established inbound and outbound shipping lanes.

Several other EAs carried out under the CEAA 2012 have included consideration of project-related marine shipping; however, only to a maximum geographical extent of the territorial sea limit. Most only considered shipping to a pilotage station (which is within the territorial sea) or closer to shore.

Project	Spatial boundary for project-related marine shipping assessment
Roberts Bank Terminal 2 Project	Marine traffic within the Port Metro Vancouver area only ⁵⁵
Enbridge Northern Gateway Project	Up to the 12-nautical-mile territorial sea limit ⁵⁶
Wespac Tilbury Marine Jetty Project	Up to the pilotage station ⁵⁷
Pacific NorthWest LNG Project	Up to Triple Island pilotage station ⁵⁸
LNG Canada Export Terminal Project	Up to Triple Island pilotage station ⁵⁹

Project	Spatial boundary for project-related marine shipping assessment
Prince Rupert LNG Project	Up to Triple Island pilotage station ⁶⁰
Woodfibre LNG Project	Howe Sound ⁶¹
Marine Terminal Project on the North Shore of the Saguenay	Downstream as far as the mouth of the Saguenay river ⁶²
Saguenay Energy Project – Liquefied Natural Gas Export Terminal	As far as the mouth of the Saguenay river ⁶³
Port of Quebec Deep-Water Multipurpose Wharf Project – Beauport 2020	Within the Port of Quebec area ⁶⁴

The above EAs were all conducted by the CEA Agency or the BC Environmental Assessment Office as permitted by Canada’s Minister of the Environment under a substitution decision. Specific reasons for these scoping decisions were generally not given, with the exception of Pacific Northwest LNG:

The spatial scope of assessment of marine shipping for the Project was determined based on consideration of the potential environmental effects, care and control by the proponent as it pertains to the Agency’s ability to establish enforceable conditions, and comparable scoping to other LNG Project EAs.⁶⁵

⁶⁰ CEA Agency, [Environmental Impact Statement Guidelines for the Prince Rupert LNG Project](https://www.ceaa-acee.gc.ca/050/documents/p80042/93670E.pdf) (20 August 2013) at 12, online: CEAA <<https://www.ceaa-acee.gc.ca/050/documents/p80042/93670E.pdf>>.

⁶² CEA Agency, [Guidelines for the Preparation of an Environmental Impact Statement – Marine Terminal Project on the North Shore of the Saguenay](https://www.ceaa-acee.gc.ca/050/documents/p80103/102207E.pdf), section 9.2 (21 August 2015) at 32, online: CEAA <<https://www.ceaa-acee.gc.ca/050/documents/p80103/102207E.pdf>>. Note that the mouth of the Saguenay river is not as far as the Les Escoumins pilot station or territorial sea limit.

⁶³ CEA Agency, [Guidelines for the Preparation of an Environmental Impact Statement – Saguenay Energy Project Liquefied Natural Gas Export Terminal](https://www.ceaa-acee.gc.ca/050/documents/p80115/108257E.pdf), section 9.2 (14 March 2016) at 37, online: CEAA <<https://www.ceaa-acee.gc.ca/050/documents/p80115/108257E.pdf>>.

⁶⁴ CEA Agency, [Guidelines for the Preparation of an Environmental Impact Statement – Port of Quebec Deep-Water Multipurpose Project – Beauport 2020](https://www.ceaa-acee.gc.ca/050/documents/p80107/103179E.pdf), section 3.1 (16 October 2015) at 3, online: CEAA <<https://www.ceaa-acee.gc.ca/050/documents/p80107/103179E.pdf>>.

⁶⁵ *Supra* note 58 at 169. Reasons for scoping marine shipping well within the territorial sea limit were also provided in the [Marine Terminal Project on the North Shore of the Saguenay – Environmental Assessment Report](https://www.ceaa-acee.gc.ca/050/documents/p80103/125802E.pdf) (October 2018) at 6, online: CEAA <<https://www.ceaa-acee.gc.ca/050/documents/p80103/125802E.pdf>>. The Board did not rely on this EA report as it was released after the Board’s 12 October 2018 decision, but is referencing it for completeness on this topic. The CEA Agency concluded that marine shipping that would occur outside the Saguenay Port Authority’s area of jurisdiction is not an incidental physical activity and therefore is not part of the designated project: “Although shipping outside the proponent’s area of jurisdiction is still an activity that is complementary to the Project, shipping outside the area of jurisdiction is not within the care and control of the proponent and the degree of influence that the proponent could exert on the third parties shipping outside its area of jurisdiction is not sufficient to make it an incidental activity to the Project. In addition, marine shipping outside the proponent’s area of jurisdiction is an activity regulated under various laws and would not be solely for the benefit of the proponent.”

The Board is not aware of an EA that considered project-related marine shipping outside of the territorial sea⁶⁶ (this can be distinguished from EAs of designated projects where the primary activities themselves have an identified location in the EEZ, such as offshore drilling).

The EAs for these projects support the inclusion of Project-related marine shipping as an “incidental” activity and provide insight into its appropriate geographic extent. The Board finds persuasive the consistent approach taken by expert tribunals in other EAs, which have not considered project-related marine shipping beyond the territorial sea limit. This points to a sufficient “level of proximity” as discussed in *Taseko* and strongly indicates that this approach is reasonable within the context of the CEAA 2012 statutory scheme. These other EAs solidify the Board’s view that incremental marine shipping within the EEZ is not “incidental” and should not be included in the “designated project.”

The Board acknowledges and appreciates the concerns expressed by participants about environmental effects of marine shipping in the EEZ, including adverse effects on species at risk. However, project-specific EAs are not meant to accomplish what might be considered akin to a regional study of marine shipping in a large area such as the EEZ. The authority for conducting a regional study lies with the Minister of Environment and Climate Change and the process is set out in a separate part of the CEAA 2012.⁶⁷ Furthermore, the Board notes that the probability and consequence of a marine incident declines with distance from the coast, in light of traffic volume and navigational hazards.⁶⁸ Thus, risk reduction measures such as pilotage, tug escorts, and traffic separation schemes are focused within the territorial sea.⁶⁹

Lastly, it is important to distinguish the effects from the designated project from the extent of the designated project itself. Under paragraph 5(1)(b) of the CEAA 2012, effects can be considered even if they occur in the EEZ or elsewhere outside of Canada. For example, effects of a spill from the Project having an impact in the EEZ can be considered. Thus, although only Project-related marine shipping within the territorial sea is to be considered as part of the “designated project,” effects from that shipping that occur outside of the territorial sea can still be considered by the Board, including certain trans-boundary effects.

5. Conclusion

The Board has considered the applicable statutory scheme, the Federal Court of Appeal’s decision in *Tsleil-Waututh Nation*, the OIC, case law, the CEA Agency Guidance, and practical EA considerations. The Board has applied all of this to the specific facts in this case and has concluded that Project-related marine shipping between the WMT and the 12-nautical-mile territorial sea limit is “incidental” to the pipeline component of the Project.

⁶⁶ Nor did any participant provide such an example.

⁶⁷ Ss 73-77.

1. General matters

1.1 Reconsideration of overall recommendation

The Board heard comments that it would have to reconsider its overall recommendation on the Project after taking Trans Mountain Expansion Project- (Project-) related marine shipping into account under the *Canadian Environmental Assessment Act, 2012* (CEAA 2012), as well as recommendations concerning the significance of effects and whether any likely significant adverse effects can be justified in the circumstances. The Board also heard that it should reconsider its recommendations in light of the requirements of subsection 79(2) of the *Species at Risk Act* (SARA) for all of the SARA-listed species that would be affected by Project-related marine shipping.

In this Reconsideration hearing, the Board will carry out an environmental assessment (EA) of Project-related marine shipping under the CEAA 2012.¹ In carrying out this EA, the Board will consider new or updated evidence related to the List of Issues that is filed in this hearing, along with evidence from the OH-001-2014 Certificate hearing. The Board will make its recommendations under subsection 30(4) of the CEAA 2012 and, if required, it will also make recommendations on whether any significant adverse environmental effects are justified. The Board will also consider the measures to avoid or lessen the adverse effects of Project-related marine shipping under the CEAA 2012 and section 79 of the SARA.

This approach reflects the direction contained in the Governor in Council's (GIC) [Order in Council P.C. 2018-177](#) (OIC). The OIC directed the Board to conduct a reconsideration of the recommendations and terms or conditions set out in its [OH-001-2014 Report](#) for the Project that are relevant to addressing paragraph 770 of the Federal Court of Appeal's [decision](#) in *Tsleil-Waututh Nation v. Canada (Attorney General)*². That paragraph made reference to the EA of the Project and the Board's recommendation under the CEAA 2012, as well as the application of section 79 of the SARA.

The Board will then consider whether its recommendation under the CEAA 2012 results in changes or additions to the recommendations (including recommended terms or conditions) that it set out in its OH-001-2014 Report. This is consistent with the OIC, and the [explanatory note](#) accompanying the OIC.³ After completing its Reconsideration Report, the Board will submit it to the GIC for decision.

¹ Project-related marine shipping between the Westridge Marine Terminal and the 12-nautical-mile territorial sea limit will be included in the "designated project" assessed under the CEAA 2012.

² *Tsleil-Waututh Nation v Canada (Attorney General)*, 2018 FCA 153 at para 770 [*Tsleil-Waututh*].

³ The explanatory note, under "Implications," states that "[a]t the conclusion of the reconsideration process, the Board may revise its OH-001-2014 Report ...to reflect its environmental assessment of Project-related marine shipping under CEAA, 2012, its recommendation under subsection 29(1) of the CEAA, 2012, the application of section 79 of SARA, and its recommendation under the NEB Act on whether a certificate should be issued..."

This approach is also set out in the List of Issues (Appendix 1 of [Hearing Order MH-052-2018](#)), as it includes issues related to the factors described in paragraphs 19(1)(a) through (h) of the CEAA 2012, subsection 19(3) of the CEAA 2012, and section 79 of the SARA. Considerations relating to recommendations concerning significance and justifications are covered by Issue Nos. 2 and 7 in the List of Issues.⁴

2. List of Issues

2.1 Whether effects were actually “thoroughly canvassed”

The Board’s draft List of Issues for the Reconsideration, [issued](#) on 26 September 2018, stated that certain issues – particularly the environmental effects of Project-related marine shipping – were thoroughly canvassed in the OH-001-2014 Certificate hearing and may not require additional evidence. The Board received comments that questioned whether the effects of Project-related marine shipping were actually thoroughly canvassed. Some comments specifically questioned why the Board made this statement in the draft List of Issues.

The Board remains of the view that its OH-001-2014 Report extensively canvassed certain issues set out in the List of Issues; for example, the environmental effects of Project-related marine shipping. Despite the fact that the Board did not include Project-related marine shipping under its CEAA 2012 EA and its recommendations in the OH-001-2014 Report, it did determine that potential environmental and socio-economic effects of Project-related tanker traffic (including the potential effects of accidents or malfunctions) were relevant under the *National Energy Board Act* (NEB Act).

When carrying out its analysis under the NEB Act, the Board followed an approach similar to the EA conducted for the pipeline component under the CEAA 2012. As a result of this approach, the Board collected extensive evidence relevant to Project-related marine shipping. For example, Chapter 14 of the Board’s OH-001-2014 Report extensively considered the effects of Project-related marine shipping, and the significance of those effects. Chapter 8 considered the environmental behaviour of spilled oil, and related environmental effects. This is reflected in the Federal Court of Appeal’s decision in *Tsleil-Waututh*, when it stated that the Board, among other things, considered the effects of Project-related marine shipping on Southern resident killer whales (SRKW) and the significance of those effects,⁵ and that the OH-001-2014 Report was adequate for the purposes of informing the GIC about the effects of Project-related marine shipping on SRKW and their use by Indigenous groups, and of the significance of these effects.⁶

The Board has indicated that the entirety of the evidence filed in the OH-001-2014 Certificate hearing will be included as part of its record for this Reconsideration hearing, and will be considered by the Board to the extent it is relevant to the List of Issues for the Reconsideration hearing. Parties are not required to re-file or re-test evidence on the record of the OH-001-2014 Certificate hearing.

⁴ On its own initiative, and to provide further clarity, the Board has updated Issue No. 7 to more closely mirror the wording of the OIC.

⁵ *Supra* note 2 at para 438.

⁶ *Ibid* at para 439.

Given the above, the Board's focus during the Reconsideration hearing will be on gathering information relating to the issues in the List of Issues that, in its view, were not fully canvassed in the OH-001-2014 Certificate hearing. The Board's [Filing Requirements for Trans Mountain](#), and [requests for specialist or expert information or knowledge](#) in the possession of Federal Authorities further show the Board's focus in the Reconsideration hearing.

Notwithstanding the views above, the Board remains open to **new or updated evidence** (including comments from the public, community knowledge, and Indigenous traditional knowledge) **relevant to its List of Issues**. This includes new or updated evidence regarding matters that were extensively canvassed in the OH-001-2014 Certificate hearing. However, the Board recommends that Parties focus their evidence on aspects of the List of Issues that were not fully canvassed in the OH-001-2014 Certificate hearing, and reminds Parties to take into account the Board's analysis and recommendations in its OH-001-2014 Report. For example, the OH-001-2014 Report made findings of significant adverse effects related to Project-related marine shipping. The Board is interested in measures that may avoid or reduce those significant adverse effects.

The Board has amended the wording in the List of Issues to better reflect the above.

2.2 Additional consideration of spills

The Board received comments that the List of Issues should be amended to reflect the need for the consideration (or re-consideration) of the potential effects and risks of spills from Project-related marine shipping, including the fate and behavior of any spilled product and the potential effectiveness of response. The Board heard, for example, that there are new scientific reports concerning spills, the fate and behavior of oil in marine environments, and the use of dispersants. The Board heard comments that the assessment of spills should include not only large or credible worst case spills, but also smaller spills and chronic oil pollution, and spills in different seasons and under adverse weather conditions. The Board also heard comments that effects of spills on United States' (U.S.) water, shorelines, and interests should be considered.

For clarity, the Board has updated Issue No. 1 to include **environmental effects of malfunctions or accidents that may occur**, as noted in paragraph 19(1)(a) of the CEAA 2012. The Board is of the view that the other matters raised by Parties are already covered by the List of Issues. For example, the wording in Issue No. 1 includes the effects of all spills (including smaller spills), as well as the effects of spills from Project-related marine shipping that may extend into the U.S. (the words "environmental effects" used in the List of Issues include those effects set out in section 5 of the CEAA 2012).⁷

That said, the Board notes that its OH-001-2014 Report extensively considered the environmental behavior of spilled oil, the effects of spills, and the risks associated with spills that might occur. The evidence filed in the OH-001-2014 Certificate hearing is part of the record for the Reconsideration hearing. As noted at the bottom of the List of Issues, Parties are expected to restrict their submissions to **new and updated evidence** only.

⁷ Effects of spills from Project-related marine shipping on the U.S. is covered by sub-paragraph 5(1)(b)(iii) of the CEAA 2012.

2.3 Specific or broader reference to SRKW

The Board received comments that the List of Issues should explicitly address the effects of Project-related marine shipping on SRKW, including cumulative effects, new data, potential mitigation measures, potential marine protected areas, and alternative routing of the shipping lanes. All of these matters are included under the List of Issues, particularly under Issue Nos. 1 through 5.

In the Board's view, its OH-001-2014 Report extensively considered the potential for effects on SRKW, including physical and acoustic disturbance, vessel strikes, chemical and biological contaminants, and reduction in the availability or quality of prey (primarily chinook and chum salmon). The evidence that the Board's OH-001-2014 Report considered is part of the record for the Reconsideration hearing. The Board has added a note at the bottom of the List of Issues to explain that Parties are expected to limit their evidence filings to **new or updated evidence** only.

2.4 Addition of other species (besides SRKW)

The Board received comments that the List of Issues should include species in addition to the SRKW. It also heard comments about the potential for Project-related marine shipping to affect other species at risk, including those that have been recently listed or re-designated since the issuance of the Board's OH-001-2014 Report. Other comments talked about the importance of considering effects on other species, including salmon species, species of importance to Indigenous peoples, and species not yet at risk but with declining populations. The Board heard concerns about the importance of considering cumulative effects, and to consider the potential introduction and spread of invasive species.

These matters are already covered by the List of Issues. For example, Issue No. 1 includes potential effects on all species, including cumulative effects, Issue No. 5 explicitly mentions any newly listed species or species that have seen a change to their designation. Issue No. 6 speaks to potential impacts of Project-related marine shipping on Indigenous interests.

Notwithstanding the above, the Board has decided to adjust Issue No. 1 to more explicitly note that it includes **cumulative effects**, consistent with paragraph 19(1)(a) of the CEAA 2012. The wording in Issue No. 5 has also been changed in order to clarify that both measures and **monitoring** will be considered.

2.5 Specific reference to Indigenous rights and interests

Comments were received suggesting that the List of Issues explicitly include reference to the rights and interests of Indigenous peoples,⁸ including section 35 Indigenous⁹ and Treaty rights. The Board also heard concerns about how the Reconsideration hearing will account for the significance of effects on Indigenous people.

⁸ The Board's use of the term "Indigenous" or "Indigenous peoples" in this hearing has the meaning assigned by the definition of "aboriginal peoples of Canada" in subsection 35(2) of the *Constitution Act, 1982*.

⁹ "Indigenous rights" has the meaning assigned by the definition of "aboriginal rights" in subsection 35(1) of the *Constitution Act, 1982*.

The Board has amended the List of Issues to include Issue No. 6 – **The potential impacts of Project-related marine shipping on Indigenous interests**. This amendment more clearly reflects that the Board must carry out its responsibilities in a manner consistent with the *Constitution Act, 1982*, including subsection 35(1).

The Board's OH-001-2014 Report extensively considered the potential impacts from Project-related shipping on Indigenous interests, consistent with its constitutional obligations under section 35. In addition, the Federal Court of Appeal, in *Tsleil-Waututh*, stated that it was satisfied that the Board's OH-001-2014 Certificate process was "adequate for fulfilling its consultation obligations."¹⁰

In the Reconsideration hearing, the Board will assess evidence on, among other things, the potential impacts of Project-related marine shipping on Indigenous interests and mitigation measures to avoid, reduce, or offset potential adverse effects. The Board's Reconsideration Report will consider whether there has been adequate consultation and accommodation for the purposes of this Reconsideration hearing, consistent with the recognition of the rights recognized and affirmed in section 35 of the *Constitution Act, 1982*. The Board will also have to decide whether any of its conclusions on consultation, accommodation, and section 35 regarding the Reconsideration will result in changes or additions to its recommendations (including recommended terms or conditions) that it had set out in its OH-001-2014 Report.

The Board generally expects that evidence filings related to Issue No. 6 will be limited to **new or updated evidence**. However, the Board recognizes that systems of Indigenous traditional knowledge often adopt a holistic approach to issues, particularly so when delivering evidence through the oral traditional evidence process that the Board offers (and more generally for evidence addressing impacts to Indigenous interests). The Board's approach to gathering oral traditional evidence is discussed in subsequent sections.

2.6 Alternate locations for the marine terminal

The Board heard comments that the List of Issues should provide for the reconsideration of the suitability of the location of the marine terminal at Westridge. Certain comments argued that the Board will now have to consider alternative means for Project-related marine shipping under the CEAA 2012, and whether any significant adverse effects of that shipping are justified under the CEAA 2012. They questioned how justification can be given if other alternatives have not been fully considered.

The Board has decided to remove Footnote 7 from the draft List of Issues which said that "the Board does not intend to reconsider alternate locations for the Westridge Marine Terminal as this was previously considered." However, the Board is of the view that the technical and economic feasibility of alternative terminal locations was extensively considered in the OH-001-2014 Certificate hearing. That evidence will be used by the Board in its consideration of the issues relevant to the Reconsideration. As noted at the bottom of the List of Issues, Parties are expected to restrict their submissions to **new and updated evidence** only.

¹⁰ *Supra* note 2 at para 531.

2.7 Greenhouse Gas (GHG) emissions from Project-related marine shipping

The Board received comments suggesting that GHG emissions from Project-related marine shipping should be included in the List of Issues. Some comments said that consideration of such emissions should extend to the destination port.

The List of Issues already covers issues relating to GHG emissions from Project-related marine shipping. Issue No. 1 includes GHG emissions from Project-related marine shipping and Issue No. 2 includes consideration of mitigation related to those emissions.

The Board is of the view that its OH-001-2014 Report exhaustively considered the GHG emissions from Project-related shipping to the limit of Canada's territorial sea, as well as the resulting increase in marine GHG emissions in the region, in British Columbia, and in Canada. The Board's OH-001-2014 Report also noted that any incremental contribution from Project-related marine shipping would increase the burden at a global scale, regardless of how large or small the contribution. The evidence that the Board's OH-001-2014 Report considered is part of the record for the Reconsideration hearing. As noted at the bottom of the List of Issues, the Board expects Parties to file only **new or updated evidence** on GHG emissions from Project-related marine shipping.

2.8 Upstream and downstream effects, including GHG emissions

The Board received comments that the List of Issues should address effects of other upstream and downstream activities. Comments said that upstream oil production and downstream refining and end-use should be considered in addition to the GHG emissions from such activities. A number of comments referenced the Board's List of Issues for the Energy East Project, which included incremental indirect GHG emissions from any incremental upstream oil production and upgrading, incremental downstream refining and end-use, and incremental third-party electricity generation. Some comments said that there is a constitutional obligation under the *Canadian Charter of Rights and Freedoms* (Charter) to consider the total contribution of the Project to climate change, taking into account the fact that the Crown will now own the Project.

During the OH-001-2014 Certificate hearing, in [Ruling No. 25](#), the Board denied motions requesting that the Board include in the List of Issues the environmental and socio-economic effects associated with upstream activities and downstream use. The Board provided several reasons for doing so, including that the effects from upstream production are not directly linked or necessarily incidental to the Project. Similarly, the Board stated that the Project is not tied to, or dependent on, any particular use in any particular destination. Leave to appeal Ruling No. 25 was subsequently dismissed without reasons by the Federal Court of Appeal.¹¹ The Board is of the view that the analysis in Ruling No. 25 applies in this case.

The CEAA 2012 does not require the Board to consider upstream or downstream effects. Paragraph 5(2)(a) of the CEAA 2012 requires the Board to take into account changes in the environment that are directly linked or necessarily incidental to the Project. The Project does not include upstream production and is not dependent on any particular upstream development. As

¹¹ *City of Vancouver v National Energy Board* (16 October 2014), Ottawa 14-A-55, (FCA).

was stated in Ruling No. 25, shippers cannot ship all of their oil on the existing Trans Mountain pipeline, yet oil sands projects continue to be built or are in development. No commenter provided submissions addressing these facts, or otherwise explained why upstream development is directly linked or necessarily incidental to the Project.

Similarly, the effects of downstream refining and end use are not directly linked or necessarily incidental to the Project. The Board continues to be of the view expressed in Ruling No. 25 that the Project does not include downstream use and is not tied to, or dependent on, any particular use in any particular destination. Oil will go where the demand is, whether or not the Project proceeds. No commenter provided submissions that directly rebutted these points.

In the case of the Energy East Project, the Board determined that upstream and downstream effects were relevant to the EA under paragraph 19(1)(j) of the CEAA 2012, due to “increasing public interest in GHG emissions, together with increasing governmental actions and commitments,” and because indirect GHG emissions are an “environmental concern.” For the reasons described above, the Board is not persuaded by the rationale provided for the Energy East Project, or the submissions arguing that it should adopt that rationale. In any event, the Board is not bound by the decisions it made during the Energy East Project proceeding, which were specific to that project.

The Board is also not persuaded that it has a constitutional obligation under the Charter to consider the total contribution of the Project to climate change. While Parties indicated that there was a possibility that sections 7 and 15 of the Charter could be breached, they failed to provide appropriate detail as to how, or relevant case law from a Canadian jurisdiction on these points.¹²

For the reasons above, the Board declines to amend the List of Issues to address effects of upstream and downstream activities proposed by the comments received.

2.9 Section 79 of the SARA – monitoring of measures

The Board heard comments that Issue No. 5 does not accurately reflect the wording in subsection 79(2) of the SARA. For example, under that subsection, it is necessary to both ensure that measures are taken to avoid or lessen adverse effects, and to monitor those effects.

The Board has decided to amend Issue No. 5 to more closely reflect the words of subsection 79(2) of the SARA.

2.10 Socio-economic issues and human health effects

The Board received comments that socio-economic issues should be included explicitly in the List of Issues. The Board also received comments that the socio-economic issue of human health should be included explicitly in the List of Issues. Some comments pertained to the potential effects on human health from Project-related marine shipping, including comments concerning

¹² The Board previously considered section 7 of the Charter in [Ruling No. 29](#), dated 19 August 2014, where Mr. L.D. Harvey filed a motion on this issue that was dismissed by the Board. Leave to appeal was dismissed by the Federal Court of Appeal, *Harvey v National Energy Board* (24 October 2014), Ottawa 14-A-59 (FCA). Any further motions on section 7 would need to address Ruling No. 29.

health risks from increased marine vessel traffic, and health impacts from exposure to a marine oil spill on residents, water users, and first responders. Some also suggested that Health Canada be involved in the process.

As noted above, the Board will be carrying out a CEAA 2012 EA of Project-related marine shipping. Accordingly, certain socio-economic issues will be included in the assessment due to the definition of “environmental effects” in section 5 of the CEAA 2012. That definition includes, among other things, the effects of any change that is caused to the environment on health and socio-economic conditions and physical and cultural heritage. The Board has clarified the List of Issues by adding a footnote to explain that **all references to environmental effects in the List of Issues include health and socio-economic matters as described in section 5 of the CEAA 2012.**

The Board is of the view that its OH-001-2014 Report adequately considered the potential socio-economic effects and the potential effects on human health from Project-related shipping, including the effects on human health from the routine operations of marine transportation associated with the Project and on human health in the event of a spill in the marine environment during shipping. The evidence that the Board’s OH-001-2014 Report considered is part of the record for the Reconsideration hearing. As noted at the bottom of the List of Issues, the Board expects Parties to file only **new or updated evidence** on health and socio-economic matters as described in section 5 of the CEAA 2012.

The Board will not carry out an assessment of socio-economic effects under the NEB Act. As noted below in Section 2.13, the OIC was specific about the issues the Board was to reconsider under the CEAA 2012 and the SARA. The Board was not directed to reconsider all issues from the OH-001-2014 Certificate hearing.

2.11 Questions as to why mitigation is for only four significant effects

The Board received comments that it was not appropriate that Issue No. 2 limited mitigation to just four significant adverse effects. Other comments suggested that Issue No. 2 (as well as other issues) should be amended to clarify that they apply to measures that were not previously considered by the Board.

The Board confirms that it is not limiting its consideration of mitigation measures to the four matters referenced in Issue No. 2 (i.e., GHG emissions, SRKW, traditional Indigenous use associated with SRKW, and the potential effects of a large or credible worst-case spill). The Board will be taking into account **all** mitigation measures that are technically and economically feasible (whether or not previously considered) and that will mitigate **any** significant adverse environmental effects of Project-related marine shipping, as required by paragraph 19(1)(d) of the CEAA 2012.

In light of the comments received, the Board has amended Issue No. 2 to indicate that its consideration of mitigation measures will **include** GHG emissions, SRKW, traditional Indigenous use associated with SRKW, and the potential effects of a large or credible worst-case spill. Issue No. 2 continues to note that, as part of its assessment, the Board will consider whether mitigation measures will change the Board's previous significance findings for these four matters.

2.12 Navigation, including collision with bridges

The Board received comments that its List of Issues should include reference to difficult navigation and potential bridge collisions associated with tankers.

The Board is of the view that this issue is covered by Issue Nos. 1 and 2. Issue No. 1 was amended to include the environmental effects of malfunctions and accidents that may occur. Issue No. 2 was amended to clarify that the Board will consider mitigation measures for all significant adverse environmental effects of Project-related marine shipping. The Board does not consider it necessary to make further changes to the List of Issues.

The Board notes that the issues of difficult navigation and potential bridge collisions associated with tankers were extensively covered in Chapter 14 of the Board's OH-001-2014 Report and, in particular, the TERMPOL review process. The evidence that the Board's OH-001-2014 Report considered is part of the record for the Reconsideration hearing. As noted at the bottom of the List of Issues, the Board expects Parties to file only **new or updated evidence** that pertains to these issues.

2.13 Reconsideration of the need for the Project, economic feasibility, and other financial matters

The Board received comments that, due to the lapse of time and the federal government's purchase of the Project, the List of Issues should include a re-evaluation of the economics of the Project, including the need for the Project and its economic feasibility. Comments were also received that there should be corrections made to the OH-001-2014 Report due to either changed facts or errors in certain aspects of the report. In some cases, comments were of the effect that the views of Parties in the OH-001-2014 Report were incorrect and, in other cases, that there were factual errors within the Board's views.

The Board does not consider it necessary to make any changes to the List of Issues as a result of these comments. The Board is also not persuaded that it should re-examine issues that are outside of the GIC's direction in the OIC. In the Board's view, it is consistent with the purpose of section 53 of the NEB Act for the GIC to direct the Board to conduct a reconsideration focused on a specific issue or issues.¹³ To interpret section 53 as requiring new evidence or *de novo* findings on all issues, despite the direction in the OIC, would not be consistent with the statutory scheme of the NEB Act, including the requirement for expeditious proceedings under subsection 11(4). In this case, the OIC was specific about the issues the Board was to reconsider under the CEAA 2012 and the SARA. The Board was not directed to reconsider all issues from the

¹³ In *Tsileil-Waututh* the Federal Court of Appeal recognized, at paragraph 769, the GIC's ability to direct the Board to conduct a reconsideration taking into account any factor specified by the GIC.

OH-001-2014 Certificate hearing, nor does paragraph 770 of the Federal Court of Appeal's decision speak to all issues.¹⁴ The Board accepts that, as time passes, there will always be some changes in facts and short-term changes in markets. However, the need for the Project is not negated by short-term market fluctuations. As the Board stated in its OH-001-2014 Report, "[t]here is always a degree of uncertainty in projecting the long term utilization of transportation facilities since utilization is influenced by many variables, including supply, market development and the evolution of transportation infrastructure overall."

In this context, the Board responded to concerns about shipper contracts discussed during the OH-001-2014 Certificate hearing by imposing Condition 57, requiring Trans Mountain to file with the Board, 90 days prior to construction, signed confirmation that secured agreements or contracts remain in force with shippers for a minimum 60 per cent of its total capacity of 141 500 m³/d (890,000 bbl/d) and any rights to terminate held by shippers that may have existed in any agreements or contracts between Trans Mountain and shippers (which may have reduced the Project's contracted total capacity to less than 60 per cent for a minimum term of 15 years) have lapsed and or expired because their conditions precedent have been satisfied or waived. This "commercial support" condition ensures that the pipeline will be used and useful. If Trans Mountain cannot maintain support for the pipeline at the level specified in Condition 57, it may not construct the pipeline.

Those that requested that the Board re-evaluate the economics of the Project did not sufficiently address Condition 57, or the terms of the OIC. Comments also did not sufficiently consider a purposive approach to the NEB Act, including section 53. As a result, the Board is not persuaded to make changes to the List of Issues based on comments received about economic and financial issues.

2.14 Other requested issues

The Board heard comments that the List of Issues should reflect a reconsideration of the safety of the Burnaby tank farm, watercourse crossing construction methods for the pipeline with regard to chinook salmon, and the risks of transporting oil by rail absent alternate routes by pipeline, and to consider the conversion of the oil to anhydrous ammonia or to bitumen pellets or "pucks" prior to transport. The Board heard comments that it should also consider "alternatives to" the Project pursuant to paragraph 19(1)(j) of the CEAA 2012.

The Board declines to make any changes to the List of Issues as a result of these comments.

As noted above, the Board was not directed by the GIC to reconsider all issues from the OH-001-2014 Certificate hearing. As a result, the Board will not reconsider the safety of the Burnaby tank farm, or watercourse crossing construction methods for the pipeline with regard to chinook salmon, all of which were considered by the Board in its OH-001-2014 Report.

¹⁴ *Supra* note 2 at 770.

The OIC was specific that the Board was to reconsider Project-related marine shipping under the CEAA 2012 and the SARA. The conversion of oil to anhydrous ammonia or bitumen pellets, the transportation of oil by rail, and other “alternatives to” the Project are not relevant to the scope of the OIC and to the Reconsideration hearing, both of which focus on Project-related marine shipping.

2.15 Number of tankers

The Board heard comments that the evidence relating to Project-related tanker traffic on the hearing record, upon which the Board’s OH-001-2014 Report relied, is materially flawed because it suggests 29 tankers per month as the incremental Project-related tanker traffic. One commenter was of the view that the incremental volume is more accurately 32 tankers per month, and that an incremental volume of 32 tankers per month would show that a large spill from Project-related tankers is likely.

The OH-001-2014 Report states that the existing Westridge Marine Terminal *typically* loads five tankers per month and that the expanded system associated with the Project would require *approximately* 34 Aframax class vessels per month, with actual demand driven by market conditions. The Board also heard evidence during the OH-001-2014 Certificate hearing that actual tanker numbers *could vary* depending on whether Panamax or Aframax class tankers were used. Similarly, the TERMPOL Review Committee report notes an average number of tanker transits. Given the above, the Board is of the view that project-related variations in incremental tanker shipments above the base/current project tanker shipments has been addressed in the OH-001-2014 Report.

The Board is of the view that the List of the Issues for the Reconsideration hearing does not require amendments as a result of these comments.

The Board has stated that the entirety of the evidence filed in the OH-001-2014 Certificate hearing will be included as part of its record for this Reconsideration hearing. The Board has noted in its List of Issues that **new or updated relevant evidence** that pertains to the List of Issues would be considered. However, the Board reminds Parties to take into account the Board’s analysis and recommendations in its OH-001-2014 Report.

3. Scope of the factors and Amended Factors Document

The Board heard comments that the Board’s Filing Manual does not explicitly address the marine components associated with the Project, and that more details should be provided in the Amended Factors Document, similar to the document prepared by the Canadian Environmental Assessment Agency titled *Scope of Factors – Northern Gateway Pipeline Project*. The Board also heard that the Board’s Amended Factors Document omitted mention of certain other matters noted in the CEAA 2012, such as community knowledge, Indigenous traditional knowledge, sustainable development, and the precautionary principle.

The Board does not consider it necessary to make any changes to the List of Issues or the Amended Factors Document as a result of these comments, other than to add a reference to subsection 19(3) of the CEAA 2012 in the List of Issues (to clarify that the Board will be considering community knowledge and Indigenous traditional knowledge).

The Board has issued Filing Requirements for Trans Mountain, and is requesting specialist or expert information or knowledge in the possession of Federal Authorities. These documents were developed after considering the requirements of the CEAA 2012, section 79 of the SARA, and the evidence that already exists on the Board's record. The evidence filed by Trans Mountain and Federal Authorities as a result of these documents, as well as any evidence filed by intervenors, will allow the Board to fully address the requirements of the CEAA 2012 and section 79 of the SARA.

As noted above, the Board will carry out a CEAA 2012 EA of the Project through the Reconsideration hearing. To do so, it must take into account the relevant provisions under the CEAA 2012, including subsection 4(2), which requires the Board, in the administration of the CEAA 2012, to exercise its powers in a manner that applies the precautionary principle. The Board must also consider the purposes of the CEAA 2012, which include sustainability. Community knowledge and Indigenous traditional knowledge will also be taken into account by the Board under subsection 19(3).

The List of Issues and Amended Factors Document are both express and clear that all factors in paragraphs 19(1)(a) through (h) of the CEAA 2012 are relevant to the Reconsideration. While the Board may determine, based on the existing record, that it requires differing degrees of additional *evidence* with respect to each of these factors, all factors are relevant to the Reconsideration and Parties may lead **new or updated evidence** on them should they choose to do so.

All other comments on the scope of the factors are addressed in the Board's comments on the List of Issues in Section 2.

4. Legal matters

4.1 Alleged bias of the Panel

The Board received a few comments suggesting that the Panel is biased.

All comments concern the background and knowledge of the Panel Members. Several of the comments express a view that the Panel is "one-sided" or not balanced enough because their background involves energy owners and operators. There was also a suggestion that the Panel ought to have more Indigenous or environmental experience or representation.

The Supreme Court of Canada set out the test for reasonable apprehension of bias in *Committee for Justice and Liberty et al. v. National Energy Board et al.*:¹⁵

¹⁵ [1978] 1 SCR 369 at 394, in dissent, but subsequently adopted by the Court, for example: *Baker v Canada (Minister of Citizenship and Immigration)*, [1999] 2 SCR 817 at para 46.

[T]he apprehension of bias must be a reasonable one, held by reasonable and right minded persons, applying themselves to the question and obtaining thereon the required information. In the words of the Court of Appeal, the test is “what would an informed person, viewing the matter realistically and practically – and having thought the matter through – conclude. Would he think that it is more likely than not that [the decision-maker], whether consciously or unconsciously, would not decide fairly.”

There were no detailed comments about why a reasonable and fully informed person would consider that the Panel or its individual Members would have a reasonable apprehension of bias. Allegations of bias are a serious allegation and must be supported by evidence. As the Federal Court of Appeal has stated, they cannot rest on mere suspicion, conjecture, or impressions.¹⁶ In this case, there is no detailed evidence supporting the allegations.

Having considered the comments, the Panel Members are each of the view that they can continue to objectively review the evidence and materials for this Reconsideration in an open-minded manner. The Panel notes that all three Panel Members have had significant experience at the Board related to Indigenous and environment issues. The Panel is also supported by technical experts from a broad variety of backgrounds.

The Board, therefore, dismisses these concerns.

4.2 Potential conflicts of interest

The Board heard comments that there is a potential conflict of interest if federal agencies are called to provide expert information, given that the federal Crown now owns the Project.

The Board is an expert quasi-judicial tribunal that operates at arms-length from the government.

With respect to experts working at federal government departments, it is worth noting that acceptance and adherence to the [*Values and Ethics Code for the Public Sector*](#) is a condition of employment for every public servant in the federal public sector, regardless of their level or position. In particular, the value of integrity includes the expected behavior to:

- act at all times with integrity and in a manner that will bear the closest public scrutiny, an obligation that may not be fully satisfied by simply acting within the law; and
- never use their official roles to inappropriately obtain an advantage for themselves or to advantage or disadvantage others.

The Board recognizes the federal government’s ownership of the Project and has set out a process that it considers to be fair to all Parties in this circumstance. This includes written questioning by intervenors of federal government departments and agencies responding to the Board’s requests for information under paragraph 20(a) of the CEAA 2012. Eligible intervenors are being provided participant funding and all intervenors will have the opportunity to bring forward their own expert information.

¹⁶ *Arthur v Canada (Attorney General)*, 2001 FCA 223 at para 8.

The Board will consider all evidence filed on the record before making its recommendation in this Reconsideration. Tribunals make decisions involving a government proponent from time to time, and no comments included legal authority to support the claim that this creates a potential conflict of interest. The Board will review the evidence in a manner that is free from the influence of extraneous factors.

4.3 *De novo* process

The Board received comments that a *de novo* hearing is required because the Panel undertaking the Reconsideration did not *hear* the original evidence.

It is important to state up front that most evidence in the OH-001-2014 Certificate hearing was filed in writing. This included responses to information requests. Indigenous traditional evidence, as well as summary argument, was heard orally in the OH-001-2014 Certificate hearing, and this was recorded in written transcripts. All other evidence was filed in writing.

The rule that “he who hears must decide” does not apply where legislation expressly, or by necessary implication, ousts its application.¹⁷ In this case, the legislative scheme ousts the application of this rule. The addition of the reconsideration provision in the NEB Act in 2012 indicates Parliament’s intention to have an option that is distinct from a new project application. Subsection 53(2) provides specific authorization for the GIC to “direct the Board to conduct the reconsideration taking into account any factor specified in the order.” It is clear from this wording that Parliament intended that the Board could be directed to reconsider specific issues only, in which case there is no requirement for a *de novo* hearing or for all previous evidence heard orally to be reheard.

A careful reading of the NEB Act suggests that the legislation does not *require* a reconsideration to be carried out by the same Panel, but it does not prevent it either. Section 53 does not refer to the Board Panel, but says only that any recommendation can be referred back to “the Board.” Under the NEB Act, any quorum¹⁸ of the Board is “the Board” and can carry out the statutory obligations of the Board. The fact that an exception to quorum requirements exists for the original section 52 proceeding (see subsection 7(2.1)), but not for the section 53 reconsideration, also indicates that the reconsideration does not require the same Panel.¹⁹

The rule that “he who hears must decide” can also be ousted by necessary implication in these circumstances. The legislation does not set a limit on the number of times that a report can be reconsidered. It would not be practical to expect the original Panel Members to remain available through an unlimited number of reconsiderations.

¹⁷ *IWA v Consolidated-Bathurst Packaging Ltd*, [1990] 1 SCR 282 at 329-30.

¹⁸ Subsection 7(2) of the NEB Act states that three Members constitute a quorum of the Board. By implication, fewer than three Members is not a quorum and, therefore, is not “the Board,” unless there is a statutory exception.

¹⁹ In a scenario where a single Member is appointed by the Chair to ensure a section 52 time limit is met using subsection 7(2.1), it is unlikely that this single Member could carry out the responsibilities of the Board in respect of a reconsideration as there is no statutory exception to quorum for section 53 reconsiderations.

As regards the hearing of oral traditional evidence, the Board issued [Procedural Direction No. 1](#) on 12 October 2018. The procedural direction noted that the Board Members assigned to undertake the Reconsideration will have read the transcripts of the oral traditional evidence provided in the OH-001-2014 Certificate hearing. This relieves Indigenous intervenors of the requirement to repeat the oral traditional evidence previously provided.

However, the Board emphasizes that decisions as to whether to present oral traditional evidence, how to do so, and what evidence to provide in the Reconsideration hearing are ultimately for each Indigenous intervenor to make, taking into account the guidance provided by the Board here, as well as the discussion above in Section 2.5.

5. Departments to consult

5.1 Indigenous groups

The Board received comments that it should consult with Indigenous groups and that, under the CEAA 2012, the Board is under a legal obligation to consult and cooperate with other jurisdictions.

The Board notes that more than 40 Indigenous groups are participating in the Reconsideration hearing as intervenors. Many of these groups were intervenors in the OH-001-2014 Certificate hearing and provided valuable evidence in that proceeding. The Board anticipates they will do so again in this proceeding.

In addition, as required by section 18 of the CEAA 2012, the Board posted on the [Canadian Environmental Assessment Registry Internet Site](#) an offer to consult and cooperate with other jurisdictions with respect to the EA of the designated project.²⁰

5.2 Canadian government departments

The Board received comments that it should seek input into the Reconsideration from a broad range of government agencies. Under paragraph 20(a) of the CEAA 2012, the Board can request specialist or expert information or knowledge from federal departments and agencies. In this hearing, on 12 October 2018, the Board asked for such information from the following:

- Fisheries and Oceans Canada
- Environment and Climate Change Canada
- Transport Canada
- Vancouver Fraser Port Authority
- Pacific Pilotage Authority
- Health Canada
- Parks Canada
- Natural Resources Canada

²⁰ The definition of “jurisdiction” is found in section 2 of the CEAA 2012. It includes Indigenous groups as defined under part (f).

The Board's 12 October 2018 letter identifies the basis for its requests of the various federal departments and agencies. The requests identify specifically what the Board is interested in receiving, which was guided by the scope of its review outlined in the List of Issues and Amended Factors Document.

5.3 Other third party / external experts

The Board heard suggestions that it should seek information from various other entities, such as provincial and municipal government agencies, the Western Canada Marine Response Corporation, non-government organizations, researchers and other subject matter experts.

The Board notes that individuals and groups with expertise have been accepted as intervenors in this Reconsideration hearing. The Board is of the view that the process will be enhanced by their involvement.

5.4 U.S. government departments and experts

The Board heard suggestions that it should seek information from various U.S. entities, such as U.S. federal and state government agencies.

The Board notes that individuals and groups from the U.S. have been accepted as intervenors in this Reconsideration hearing. The Board is of the view that the process will be enhanced by their involvement.

6. Hearing process

6.1 Need for more time

The Board received comments stating that the timeline for the hearing, including the time allotted for the initial comment process, is too short. Others commented that the Board should extend the timeline or seek an extension from the GIC.

The Board acknowledges that the timeline is not lengthy. This requires an expedited process and the need for Parties to stay focused on the hearing steps and to work diligently. Section 53 of the NEB Act authorizes the GIC to direct the Board to undertake a reconsideration based on any factor specified, and to specify a time limit for the Board to complete its reconsideration. In this focused Reconsideration, it is not necessary that the Board have the same timelines as a new application. There is already significant evidence on the record on numerous topics being examined. Many of the Parties will also be familiar with the record from the OH-001-2014 Certificate hearing. Consistent with subsection 11(4) of the NEB Act, there is a need for proceedings to be conducted expeditiously and fairly and, in any case, within the time limit set by the GIC.

The Board has set out a process that, while expedited, is fair to all Parties, given the focused nature of the Reconsideration, and would allow the Board to deliver its Reconsideration Report to the GIC on or before 22 February 2019.²¹

While the Board must meet the 22 February 2019 deadline, it is also required to conduct a hearing that is procedurally fair. As determined recently by the Federal Court of Appeal, the content of the duty of procedural fairness in this case is significant.²² This required that:

The parties were entitled to a meaningful opportunity to present their cases fully and fairly. Included in the right to present a case fully is the right to effectively challenge evidence that contradicts that case.

The Board accepts that the same is required for the Reconsideration and that similar opportunities are provided. In the OH-001-2014 Certificate hearing, there were instances where Trans Mountain filed new evidence on specific topics, and intervenors were provided an opportunity to challenge that evidence, including by providing their own evidence in response within reasonably expedited time lines.²³

If a Party feels there are particular circumstances requiring additional time, the Board will consider such individual requests. Any requests should be made reasonably ahead of the deadline and, unless and until an extension is granted, Parties should continue to work toward the existing deadline. Parties should not assume that deadlines can be adjusted materially, given the time limit specified. In many cases, moving one Party's deadline could create prejudice for another Party, which the Board would consider when an extension request is filed.

6.2 Oral cross-examination

The Board heard many comments from those who wanted a process that includes oral cross-examination. Some suggested that cross-examination could be limited by subject matter or that only certain Parties could take part.

In [Ruling No. 14](#), the Board said:

“In the Board’s view, the legislation makes it clear that the Board is master of its own procedure and can establish its own procedures for each public hearing with regard to the conduct of hearings. This includes the authority to determine for a particular public hearing the manner in which evidence will be received and tested. In the circumstances of this hearing, where there are 400 intervenors and much of the information is technical in nature, the Board has determined that it is appropriate to test the evidence through written processes. All written evidence submitted will be subject to written questioning by up to 400 parties, and the Board.”

²¹ The Federal Court of Appeal also had an expedited pre-hearing process with respect to the consolidated judicial reviews.

²² *Supra* note 2 at para 235.

²³ For instance, [Ruling No. 61](#) dated 15 April 2015 accepted late evidence from Trans Mountain regarding a Seismic Hazard Update and provided a schedule for intervenors to test this evidence and file evidence in response.

After reviewing Ruling No. 14, the Federal Court of Appeal concluded that the duty of fairness was not breached by the Board's decision not to allow oral cross-examination and that the Board's procedure did allow the Parties "a meaningful opportunity to present their cases fully and fairly."²⁴ The Board is of the view that the reasoning in Ruling No. 14 applies equally in this case. A mostly written process provides a fair opportunity to test the evidence, and is relatively predictable and manageable in the time permitted.

In this Reconsideration hearing, the Board already has a more limited scope of issues to cover. It has over 100 intervenors and approximately 5 months to consult on and set a hearing process; to gather and test evidence, and to receive argument.²⁵ It must also write and submit a Reconsideration Report.

6.3 Collaborative and open hearing process

The Board received comments that it should design a process that allows for collaboration between those interested, and that is open to the public. Some comments said that the process should include oral statements from the public as was done in the hearing for the Enbridge Northern Gateway Project. Some felt that the hearing itself should be designed through a collaborative process.

The Board acknowledges that bringing Parties together to discuss and resolve certain issues during a hearing process can be effective. The Board has used this "conference" approach in the past. It is used to complement the required hearing steps that must be implemented to meet the rules of natural justice and the requirements of the NEB Act. Such an approach cannot substitute for certain required hearing steps such as filing new evidence.

In this case, it is not possible to build in time for a "conference" approach. The Board has set out a process that, while it does not include any opportunities for "conferences," is fair to all Parties and that allows the Board to deliver its Reconsideration Report to the GIC on or before 22 February 2019. The Board also provided early comment opportunities for Indigenous groups and members of the public, and took the comments received into consideration in designing the hearing process.

The Board is of the view that hearing from a broad range of people and groups would be beneficial. Given the time constraints, the Board cannot take these submissions in person via oral statements. However, the Board will consider all letters of comment that are filed on or before the 20 November 2018 deadline.

²⁴ *Supra* note 2 at para 257.

²⁵ While there are fewer intervenors registered for the Reconsideration hearing, 100+ intervenors is a significant number and a greater percentage may be active in comparison to the OH-001-2014 Certificate hearing.

6.4 Oral Indigenous traditional evidence

The Board heard comments that Indigenous intervenors wanted the opportunity to provide traditional evidence orally. Some of the comments requested that these oral sessions take place in the communities where the evidence holders reside. The Board also heard comments that Indigenous knowledge should not be restricted to oral traditional evidence, and should be meaningfully incorporated into the review *process*.

Hearing oral traditional evidence from Indigenous peoples and groups was very helpful to the Board in the OH-001-2014 Certificate hearing. The Board has scheduled time to hear oral traditional evidence in central locations. In the circumstances of this case, it is not possible to travel to each of the individual Indigenous communities. Indigenous intervenors may also choose to provide oral traditional evidence by remote means if that is more convenient. See the Board's [Procedural Direction No. 1](#) for more information on this hearing step. Indigenous intervenors are reminded that participant funding is available to travel to hearing locations.

In addition to participating in the oral traditional evidence sessions, the Board encourages Indigenous intervenors to also participate in other hearing steps to facilitate the incorporation of Indigenous knowledge throughout the entire hearing process.

6.5 Lack of funding for commenters

The Board received comments that it should provide funding to groups that wish to provide written comments to the Board, as opposed to only providing funding for intervenors.

The Participant Funding Program is independent from the Board's regulatory hearing process. For information and questions about participant funding, please visit the Board's [website](#) or contact a Participant Funding Program Coordinator at 1-800-899-1265.

6.6 Matters for future letters of comment

Many comments received provided substantive comments on the matters to be considered in the hearing itself. The Board will consider these comments in its consideration of the broader issues in the hearing, just as it will consider all evidence filed. These comments do not need to be re-filed.

6.7 Break in hearing process over Christmas

The Board heard comments that participants want a break from the hearing process over the Christmas period.

While the time limit does not allow the Board to schedule a break *per se*, the Board has devised a schedule that should require relatively limited work for intervenors during this period.

Attention: Sheri Young, Secretary of the Board

Dear Ms. Young,

**Re: Trans Mountain Expansion Project – Reconsideration
Hearing Order MH-052-2018 & File OF-Fac-Oil-T260-2013-03 59
Objection of the Stó:lō Collective**

Further to our letter of October 23, 2018 ("**NOI Letter**") containing the Stó:lō Collective's Notice of Intent to provide oral Indigenous traditional knowledge ("**Oral Traditional Evidence**"), and in response to the National Energy Board's ("**NEB**") email correspondence of October 24-26, 2018 (the "**OTE Email**"), a copy of which is enclosed, we write to object to the locations chosen for the Oral Traditional Evidence hearings and the limitations imposed thereon.

Background

In the NOI Letter, the Stó:lō Collective objected to the NEB's process for the hearing of Oral Traditional Evidence, as it had done previously in the first hearing (the "**First Hearing**") of the Trans Mountain Expansion Project by letter dated December 5, 2014 (the "**First Objection**"). In both the First Objection and the NOI Letter, the Stó:lō Collective objected to the process prescribed by the NEB, advising, among other things, that the process was unfair, culturally inappropriate and imbalanced. In particular, the Stó:lō Collective stated that the process chosen conflicted with Stó:lō customs and traditions that support knowledge transfer and honouring their Elders.

Prior to sending the NOI, and in light of the Stó:lō Collective's concerns about the treatment of Oral Traditional Evidence in the First Hearing, the Stó:lō Collective requested that Oral Traditional Evidence be collected in a manner that reflects the specific cultural practices of the Indigenous group providing such evidence in its letter of comment to the NEB ("**Letter of Comment**") dated October 3, 2018. Despite the First Objection, Letter of Comment, and NOI, the NEB has chosen to proceed with a process for collecting Oral Traditional Evidence that disrespects the Stó:lō Collective's cultural practices and Elders. This has been compounded by the NEB's unilateral and inexplicable decision to only hold Oral Traditional Evidence hearings on Vancouver Island.

As a result, the Stó:lō Collective wishes to again record an objection to the Oral Traditional Evidence process prescribed by the NEB for this Reconsideration Hearing.

Objection

The Stó:lō Collective objects to the locations chosen, and time limitations imposed, by the NEB for the Oral Traditional Evidence hearings. In the OTE Email, the NEB asked the Stó:lō Collective to choose between travelling to Victoria or Nanaimo to attend an Oral Traditional Evidence hearing, during which its intervenors will be entitled to 1½ to 2 hours to present. The NEB is aware that the Stó:lō Collective is composed of twelve First Nations, all of whom are located in the Fraser Valley, and whose Elders cannot easily travel to Vancouver Island to provide Oral Traditional Evidence. Accordingly, these locations might prevent the Stó:lō Collective's Elders from attending a hearing to provide Oral Traditional Evidence.

Despite our enquiries, NEB has not provided an adequate reason for choosing two locations on Vancouver Island, despite the fact that many of the Indigenous intervenors are located on the mainland of British Columbia, in Alberta, and/or in Washington, and would be considerably less inconvenienced travelling to a location such as Vancouver, BC.

In the LOI, the Stó:lō Collective advised that the rushed pace of the Reconsideration Hearing would result in, among other things:

- (a) limited time for the NEB to hear Oral Traditional Evidence or to design a schedule which accommodates the needs of particular communities; and
- (b) inadequate consideration of cultural protocols and ceremony surrounding the sharing of Oral Traditional Evidence by Stó:lō knowledge keepers.

In the Federal Court of Appeal's recent decision quashing the approval of the Trans Mountain Expansion Project, the court held that the duty of fairness owed by the NEB to the parties was significant and the parties were entitled to a meaningful opportunity to present their cases fully and fairly. The NEB's chosen locations for, and time limitations imposed on, the Oral Traditional Evidence hearings only serve to again validate the Stó:lō Collective's concerns about this process and further demonstrate the NEB's ongoing struggle to design a hearing process that safeguards procedural fairness.

Notice of Intent

Notwithstanding the Stó:lō Collective's objection to the locations chosen by the NEB, the Stó:lō Collective is not withdrawing its Notice of Intent to participate. We ask that you please reconsider the locations chosen, and advise us of your decision as soon as possible.

Yours truly,

Hello Joelle – sorry for the delay. I had to leave the office early yesterday and am playing catch-up today.

I am not privy to the actual deliberations of the Board on these logistics but have been informed that the decision regarding holding OTE on Vancouver Island was influenced by three factors: the narrow timelines of this Hearing, the scope of the reconsideration hearing being limited to marine shipping, and the limited availability of venues.

Hope this helps and let me know if you would like to discuss options for remote participation

Thanks, Shirley

Shirley:

Thank you for your quick response. We realize the reconsideration hearing is being conducted on extremely aggressive timelines but we are wondering why Vancouver Island was chosen as the location for OTE hearings instead of the Lower Mainland given the number of Indigenous intervenors whose respective territories are not located on Vancouver Island?

Thank you in advance for your assistance.

Regards,

Joelle

Hi Joelle.

We are holding sessions only on Vancouver Island because we have timing limitations due the high amount of interest from Indigenous intervenors, the narrow timelines of this Hearing, the scope of the reconsideration hearing being limited to marine shipping, and the limited availability of venues.

The Board understands that the selected locations may not be the best option for some presenters. Therefore, we will also likely hold sessions at the Board's offices in Calgary. Oral traditional evidence may also be given at a mutually agreed upon time by phone or video conference.

Let me know if I can help further.

Shirley

Subject: OTE - Sto:lo Collective

We received the Notice of Intent to provide OTE for Sto:lo Collective. We are currently working to put together a schedule. As you can imagine, we have timing limitations due the high amount of interest from Indigenous intervenors, the narrow timelines of this Hearing, and the limited availability of venues.

We are looking to receive OTE in probably two locations on Vancouver Island (Victoria and Nanaimo) the last week of November and first week of December. Timing constraints would allow for 1 ½ to 2 hours per community/intervenor with up to four sessions each day.

Would you be most interested in booking a session in Victoria or Nanaimo?

Would your group be available for an evening session or is there a preferred time of day?

Thank you Shirley

Attention: Sheri Young, Secretary of the Board

Dear Ms. Young,

**Re: Trans Mountain Expansion Project – Reconsideration
Hearing Order MH-052-2018 & File OF-Fac-Oil-T260-2013-03 59
Notice of Intent and Objection of the Stó:lō Collective**

We are counsel for the Stó:lō Collective in relation to the National Energy Board (“NEB”) reconsideration hearing (the “**Reconsideration Hearing**”). The purpose of this letter is to provide the Stó:lō Collective’s Notice of Intent to provide oral Indigenous traditional knowledge (“**Oral Traditional Evidence**”) pursuant to Practice Direction No. 1 of the NEB dated October 12, 2018 (“**PD #1**”), as well as object to the process provided therein.

During the first hearing (the “**First Hearing**”) to consider the application by Trans Mountain Pipeline ULC (“**Trans Mountain**”) to the NEB for the Trans Mountain Expansion Project (the “**Project**”), the NEB established a process for the hearing of Oral Traditional Evidence, which imposed time limits on that evidence, set limitations on the nature of the knowledge that could be shared orally, and permitted Trans Mountain, other intervenors and the NEB to cross-examine the witnesses. By letter dated December 5, 2014 (the “**Objection Letter**”), the Stó:lō Collective objected to the process prescribed by the NEB, advising, among other things, that the process was unfair, culturally inappropriate and imbalanced. In particular, the Stó:lō Collective stated that the process chosen conflicted with Stó:lō customs and traditions that support knowledge transfer and honouring their Elders. The Stó:lō Collective also explained in the Objection Letter that the process chosen by the NEB had resulted in internal division, including the loss of two communities from the Stó:lō Collective.

As a result of the Stó:lō Collective’s dissatisfaction with the NEB’s process for hearing Oral Traditional Evidence, it chose to abstain from it entirely.

1. OBJECTION TO PROCESS FOR COLLECTION OF ORAL TRADITIONAL EVIDENCE

In light of the Stó:lō Collective’s concerns about the treatment of Oral Traditional Evidence in the First Hearing, in the letter of comment to the NEB dated October 3, 2018, the Stó:lō Collective requested that Oral Traditional Evidence be collected in a manner that was reflective of the specific cultural practices of the Indigenous group providing such evidence. PD #1 disregards

this entirely. As a result, the Stó:lō Collective wishes to again record an objection to the Oral Traditional Evidence process prescribed by the NEB in PD #1 for this Reconsideration Hearing.

1.1 Timing

As the NEB has repeatedly reminded intervenors, it must complete the Reconsideration Hearing and issue its Reconsideration report by February 22, 2019. Consequently, the rushed pace of the Reconsideration Hearing has truncated the Oral Traditional Evidence process in a manner that the Stó:lō Collective considers culturally insensitive and procedurally unfair. For instance, the time constraint has or is likely to result in the following issues:

- (a) there is inadequate time for the Stó:lō Collective to identify appropriate knowledge holders to provide Oral Traditional Evidence;
- (b) there is limited time for the NEB to hear Oral Traditional Evidence or to design a schedule which accommodates the needs of particular communities;
- (c) Oral Traditional Evidence sessions are scheduled to be held in late-November/early-December which conflicts with the Stó:lō Bighouse season, wherein many of the traditional knowledge holders are occupied with Bighouse duties and are providing spiritual and ceremonial support thereof;
- (d) there has been inadequate consideration of cultural protocols and ceremony surrounding the sharing of Oral Traditional Evidence by Stó:lō knowledge keepers; and
- (e) the NEB has demonstrated a lack of understanding for and protection of Stó:lō intellectual property and confidential and culturally-sensitive information.

1.2 Intellectual Property

The Stó:lō Collective is particularly concerned about the lack of proper safeguards for intellectual property and confidential and culturally-sensitive information which may be shared during the course of Oral Traditional Evidence sessions. The NEB has not taken any steps to ensure that Oral Traditional Evidence remains subject to confidentiality restrictions rather than being subject to public disclosure.

1.3 Cross-examination

As in the First Hearing, the NEB is again allowing Trans Mountain to cross-examine witnesses during the Oral Traditional Evidence sessions. The Stó:lō Collective objected to this aspect of the process in its Objection Letter, and maintains its objection for the Reconsideration Hearing. As stated previously, in Stó:lō cultural practices, it is neither customary nor appropriate to question Elders' expression of traditional knowledge. To do so is to show great disrespect, not just to the particular Elder, but also to their ancestors, name bearers, the land, and the spirits from which the Elder gains their knowledge.

The Stó:lō Collective has been an active participant throughout the regulatory approval process for the Project and will continue to do so but has significant concerns that the Reconsideration

Hearing will repeat and exacerbate the mistakes of the past identified by the Federal Court of Appeal in *Tsleil-Waututh Nation v. Canada (Attorney General)*, 2018 FCA 153. To reiterate what the Stó:lō Collective previously expressed in its Objection Letter: the process of oral traditional hearings must reflect a basic understanding of First Nations culture and society. Without an adequate understanding of Stó:lō culture and society, this process, too, is destined to be fatally flawed.

2. NOTICE OF INTENT

Notwithstanding the Stó:lō Collective's objection to the process chosen by the NEB, the Stó:lō Collective wishes to provide Oral Traditional Evidence. Please note, however, that due to time constraints, the Stó:lō Collective is unable to identify the appropriate knowledge keeper at this stage. As these individuals have not yet been identified, we are also unable to indicate whether any of the Stó:lō Collective's witnesses will require the assistance of remote participation. The Stó:lō Collective has circulated a request to each of its member communities to appoint a representative as soon as possible. We anticipate that we will be in a position to provide the NEB with the individual name(s) shortly, as well as any respective requests for remote participation.

Yours truly,

Before deciding on this request, the Board will accept comments on it from Trans Mountain and the intervenors on or before **3:00 pm Pacific time (4:00 pm Mountain time) on 8 November 2018**.

Squamish Nation may file reply comments on or before **3:00 pm Pacific time (4:00 pm Mountain time) on 9 November 2018**.

As the Board has previously stated, the timeline requires an expedited process and the need for Parties to stay focused on the hearing steps and to work diligently. The Board expects all Parties to continue working on submissions using the **deadlines set out in the Hearing Order** while decisions are pending.

For any questions, please contact a Process Advisor by phone at 1-800-899-1265 (toll-free) or by email at TMX.ProcessHelp@neb-one.gc.ca.

**Trans Mountain Pipeline ULC (Trans Mountain)
Application for the Trans Mountain Expansion Project (Project)
National Energy Board (Board) reconsideration of aspects of its Recommendation
Report (Report) as directed by Order in Council P.C. 2018-1177 (Reconsideration)
MH-052-2018**

**Ruling No. 7 – Letters and requests from Indigenous intervenors regarding oral
Indigenous traditional evidence locations, time limitations, and costs**

Background

On 20 September 2018, through Order in Council P.C. 2018-1177, the Governor in Council (GIC) referred aspects of the Board's Report for the Project back to the Board for reconsideration. The GIC's direction follows a 30 August 2018 decision¹ of the Federal Court of Appeal that quashed the GIC's approval of the Project. The GIC has imposed a time limit of 155 calendar days for the Reconsideration. Therefore, the Board must complete the Reconsideration process and issue its Reconsideration Report no later than 22 February 2019.

On 12 October 2018, in Procedural Direction No. 1, the Board announced that it planned to hold oral traditional evidence sessions in late-November/early-December at a location or locations on Vancouver Island, British Columbia (BC). The procedural direction explained that, as a result of GIC's imposed time limit, there may be limited time for the Board to hear oral traditional evidence. The procedural direction also said that, prior to hearing oral traditional evidence, the Board Members assigned to undertake the Reconsideration will have read the transcripts of the oral traditional evidence provided in the OH-001-2014 Certificate hearing. Therefore, it is not necessary for Indigenous intervenors to repeat the oral traditional evidence previously provided.

.../2

¹ *Tsileil-Waututh Nation v. Canada (Attorney General)*, 2018 FCA 153.

The Board asked Indigenous intervenors that wished to provide oral traditional evidence to notify the Board of their intent to do so by 23 October 2018 (Notices of Intent).

In response to Procedural Direction No. 1, the Board received comments about the Board's intention to hold oral traditional evidence sessions on Vancouver Island. These comments came within the Notices of Intent and in separate letters to the Board. After receiving separate letters of objection from Shxw'ōwhámel First Nation (Shxw'ōwhámel), the Stó:lō Collective, and Little Shuswap Lake Indian Band (LSLIB), the Board [established](#) a comment period on 31 October 2018.

1. Letters of objection

1.1 Shxw'ōwhámel

In its [Notice of Intent](#), Shxw'ōwhámel said that, on a number of occasions, it has explained to the Board its customary belief that the sharing of oral traditional evidence must be done in person. Shxw'ōwhámel requested that the Board hold oral traditional evidence hearings in Hope or Vancouver, BC to facilitate First Nations' participation in the Lower Mainland.

On 29 October 2018, Shxw'ōwhámel filed a [letter](#) in which it objects to the chosen locations and reiterated its request for the Board to schedule oral traditional evidence sessions in Vancouver or Hope, in order to facilitate participation by Shxw'ōwhámel and other similarly impacted groups.

Shxw'ōwhámel submits that the Board owes a duty of procedural fairness to the Parties before it, citing *Baker v. Canada (Minister of Citizenship and Immigration)*.² Shxw'ōwhámel is of the view that the cost and effort for it to travel to Vancouver Island is prohibitive and unfair and that, while the Board has granted Shxw'ōwhámel participant funding, the fairness of the Board's process is compromised if intervenors must expend limited funding on travel costs.

1.2 Stó:lō Collective

On 30 October 2018, the Stó:lō Collective filed a [letter](#) in which it requested that the Board reconsider its chosen locations. The Stó:lō Collective objected to the locations chosen for oral traditional evidence and submitted that 1.5 to 2 hours is insufficient time to provide oral traditional evidence. It noted that it is composed of 12 First Nations, all of which are located in the Fraser Valley, and whose Elders cannot easily travel to Vancouver Island to provide oral traditional evidence.

1.3 LSLIB

In its [Notice of Intent](#), LSLIB indicated that it intended to provide oral traditional evidence and one of its Elders may need to testify remotely.

² [1999] 2 S.C.R. 817 (*Baker*).

On 31 October 2018, LSLIB filed a [letter](#) in which it requested that the Board reconsider the locations and schedule an oral traditional evidence session in Kelowna, Kamloops, or Vancouver, BC. LSLIB provided views on the purpose of participatory rights within the duty of fairness, citing, as Shxw'ōwhámel did, *Baker v. Canada (Minister of Citizenship and Immigration)*.

LSLIB also said the cost and effort for LSLIB to travel to Vancouver Island is an unreasonable burden and unfair for an Indigenous community with a significant stake in the proceedings. It also argued that remote participation was not adequate because it does not allow for a meaningful two-way dialogue. In addition, LSLIB raised concerns regarding the potential for weather conditions to affect travel.

2. Comments received

2.1 Squamish Nation (Squamish)

In its [Notice of Intent](#), Squamish said that it intends to provide oral traditional evidence, including about the cultural and spiritual importance of the orca to Squamish. It said that, in order to satisfy its own internal protocols with cultural advisors and Elders, it anticipates that it will want to present its evidence, in part, in the form of a sacred ceremony that can only be performed and discussed in the Squamish longhouse at Xwmelch'stn, in confidence, and with a limited audience present and no recording devices. It said that this is the only culturally appropriate way in which evidence regarding this ceremony can be presented.

In a follow-up [letter](#) of 31 October 2018, Squamish reiterated its statement that the only culturally appropriate way to present its evidence is in the Squamish longhouse as described earlier. The Board notes that this letter was received on the same day, and just before, the Board released its request for comments on the three letters described in Section 1 above.

Squamish declined to provide oral traditional evidence via telephone or video conference.

2.2 Tsartlip First Nation

Tsartlip First Nation filed [comments](#) on 1 November 2018 in which it said that it takes no position on the letters of objection, save to say that, in its view, Victoria ought to be maintained as a hearing location due to its centrality for a number of Vancouver Island-based First Nations.

2.3 Trans Mountain

Trans Mountain filed [comments](#) on 2 November 2018 in which it said that it does not take a position on the location of the oral traditional evidence sessions, provided that the process can proceed efficiently and within the timeframes established in [Hearing Order MH-052-2018](#).

2.4 Province of BC

The Province of BC filed [comments](#) on 2 November 2018 in which it said that it would support the Board hearing matters in Indigenous communities.

2.5 Stk'emplupsemc te Secwepemc of the Secwepemc Nation

Stk'emplupsemc te Secwepemc of the Secwepemc Nation filed [comments](#) on 2 November 2018 in which it supported the letters of objection and requested that hearings be held in Vancouver or Kamloops.

2.6 Musqueam Indian Band

Musqueam Indian Band filed [comments](#) in support of the letters of objection.

3. Views of the Board

The Board acknowledges the objections raised by Shxw'ōwhámel, the Stó:lō Collective, and LSLIB, as well as the comments filed by other Parties, which focus on concerns regarding Vancouver Island locations to hear oral traditional evidence. The Board further acknowledges related concerns raised about the cost of travel, the time permitted to collect oral traditional evidence, and the expedited nature of the Reconsideration process. In addition, the Board acknowledges Squamish's request to provide oral traditional evidence in the form of a sacred ceremony that can only occur in the Squamish longhouse on its traditional territory.

While several Indigenous groups raised concerns as summarized above, a large number did not raise concerns.

The Board is mindful of the scope of the Reconsideration hearing and the expedited timeline, which was explained in Section 6.1 of the Board's 29 October 2018 [reasons on process design](#). The GIC has directed the Board to reconsider the environmental effects of Project-related marine shipping in view of the requirements of the *Canadian Environmental Assessment Act, 2012*, and the adverse effects of Project-related marine shipping on species at risk in view of any requirements of section 79 of the *Species at Risk Act*. The GIC has given the Board until 22 February 2019 to complete the Reconsideration.

Travel concerns

The Board appreciates that, for a number of Indigenous intervenors, travel would have been more straightforward if an appropriate venue was available on the Lower Mainland. However, this is not possible in the circumstances and time restrictions of the Reconsideration process. Normally, the Board books venues many months ahead and all venues are reviewed carefully with safety and security considerations in mind. The Board checked the availability of venues previously used in the Lower Mainland and it was not possible to find a suitable venue that had availability during the November-December period for an appropriate number of days. In order to complete the Reconsideration by 22 February 2019, oral traditional evidence must be heard in this timeframe.

In the Board's view, the Vancouver Island locations for oral traditional evidence allow Indigenous intervenors to be adequately heard. The Board acknowledges that travel times will vary depending on the intervenor, but the Board does not consider travelling from the Lower Mainland to Vancouver Island to be unreasonable in the circumstances of an expedited hearing,

with limited scope, and where participant funding is available for travel costs.³ Should weather conditions on certain days compromise the ability of Indigenous intervenors to attend, the Board will do what it can to make alternative arrangements. In addition to the Vancouver Island locations, the Board has added Calgary as a location to facilitate hearing oral traditional evidence remotely. Indigenous intervenors may also choose to provide the Board with audio or video recordings of their oral traditional evidence in lieu of, or in addition to, any oral presentations.

The oral traditional evidence sessions set up for the Reconsideration hearing do not replace the oral traditional evidence sessions held during the OH-001-2014 Certificate hearing. These new sessions will supplement the oral traditional evidence already provided with respect to the issues⁴ being considered in this Reconsideration. All evidence from the OH-001-2014 Certificate hearing – including the [transcripts](#) from past oral traditional evidence sessions – is on the record of the Reconsideration hearing and that evidence will be considered to the extent it applies to the current List of Issues. A considerable portion of past oral traditional evidence was focused on marine effects of the Project.

Time limits

The Board has previously addressed concerns about the expedited nature of the Reconsideration hearing in its [reasons on process design](#), as well as in Procedural Direction No. 2, also of today's date. Those reasons apply here.

With respect to concerns regarding the two-hour time limit, the Board is of the view that, while it would have been preferable not to have limits on the time allowed for each Indigenous intervenor to present oral traditional evidence, that was not possible with the number of intervenors presenting and the time limit imposed for the Reconsideration. As noted above, a previous opportunity for oral traditional evidence was provided in the OH-001-2014 Certificate hearing. For Indigenous intervenors comfortable in doing so, the Board will also accept oral traditional evidence by video or audio recordings.

The Board acknowledges the Stó:lō Collective's view that 1.5 to 2 hours may not be sufficient time for its oral traditional evidence given that it is a collective of 12 First Nations. The Board is mindful that there are Indigenous intervenors providing oral traditional evidence that represent more than one First Nation, and that two of these have requested additional time for their presentations.⁵

Accordingly, for each of these three Indigenous intervenors, the Board has decided to increase the amount of time allotted for oral traditional evidence. This additional time is reflected in the detailed oral traditional evidence schedule attached to Procedural Direction No. 2.

³ Indigenous groups can request \$80,000 in participant funding to facilitate their participation in the Board's hearing. The Participant Funding Program specifically lists travel expenses as costs eligible for reimbursement by that fund. The choice on how to use funding in a given hearing is entirely up to the intervenor.

⁴ The List of Issues for the Reconsideration hearing are set out in Appendix 1 to [Hearing Order MH-052-2018](#).

⁵ The Stó:lō Collective; Swinomish Indian Tribal Community, Tulalip Tribes, Suquamish Tribe, and Lummi Nation (U.S. Tribes); and the Indigenous Caucus for the Trans Mountain Indigenous Advisory and Monitoring Committee

Squamish ceremony at Xwmelch'stn

The Board understands that Squamish proposes to share traditional knowledge in the form of a sacred ceremony that can only be performed and discussed in the Squamish longhouse at Xwmelch'stn in confidence, with a limited audience present and with no recording devices.

The Board appreciates and is honoured by Squamish's request and invitation. As set out in Section 6.4 of the Board's [reasons on process design](#), in the circumstances of this case, it is not possible to travel to individual Indigenous communities. If the Board were to accept Squamish's proposal, then, in fairness, it would also have to consider requests from other Indigenous intervenors to visit their territories as well. It would have also been necessary to find appropriate ways to address the limitations on attendance and recording proposed by Squamish.

The Board's hearing process is public and transparent so that all Parties are aware of the evidence that the Board will consider in reaching its recommendation in this Reconsideration. The Board recognizes that the sacred ceremony can only occur at Xwmelch'stn, but invites Squamish to consider whether it wishes to provide another form of oral traditional evidence on Vancouver Island. The Board notes that Squamish previously provided oral traditional evidence in the OH-001-2014 Certificate hearing and the Board Members assigned to undertake the Reconsideration will have read the transcripts of that evidence prior to hearing oral traditional evidence in the current hearing.

Procedural fairness

With respect to comments received regarding procedural fairness, the Board acknowledges that the duty of fairness owed by the Board to the Parties is significant and the Parties are entitled to a meaningful opportunity to present their cases fully and fairly. In considering the design of the overall hearing process, the Board finds that it is procedurally fair to all Indigenous intervenors, including those from the Lower Mainland.

Indigenous intervenors will have an opportunity to present their case fully and fairly. This takes into account the procedural steps offered, including to:

- 1) file written evidence in response to the evidence of Trans Mountain and Federal Departments and Agencies, and to address the List of Issues for the Reconsideration;
- 2) present oral traditional evidence, either in person or remotely, on Vancouver Island or in Calgary, or through an audio or video recording (participant funding is available for travel costs or other hearing steps undertaken);
- 3) ask information requests of other Parties written evidence, and an opportunity to file motions to compel full and adequate answers if the responses are not considered adequate; and
- 4) file written-argument-in chief, including replying to the argument of Trans Mountain and Federal Departments and Agencies.

Taking into account all these rights and hearing steps, the Board is of the view that the significant duty of procedural fairness owed to Indigenous intervenors is satisfied. This takes into account the context of a large multi-party proceeding, the statutory scheme, and the Board's

choice of procedures.⁶ Also relevant to whether the hearing is procedurally fair is the time limit for the Reconsideration, the practical limits on the availability of suitable venues in the Lower Mainland, and the potential for the Project to adversely affect Indigenous and Treaty rights protected under subsection 35(1) of the *Constitution Act, 1982*. While not all factors point the same way, on an overall basis, the requirement for significant procedural fairness is satisfied by providing here a meaningful opportunity for Indigenous intervenors to present their case and to effectively challenge opposing evidence.⁷

While the Reconsideration hearing steps are not identical to those in the OH-001-2014 Certificate hearing, they are comparable. Having to travel to provide oral traditional evidence, while not ideal, is still procedurally fair in the circumstances. No legal authority was provided for the argument advanced that travelling to present oral traditional evidence, or remote participation, was procedurally unfair in the circumstances. The Board notes that mere inconvenience does not amount to unfairness.⁸

Disposition

As stated, the Board appreciates the concerns and suggestions of a number of Indigenous intervenors. Where the Board was able to make revisions to its process, it did so. However, it is necessary to retain the Vancouver Island venues to hear oral traditional evidence. The Board looks forward to hearing further from those Indigenous intervenors that are able to provide oral traditional evidence.

For more information, please contact a Process Advisor by phone at 1-800-899-1265 (toll-free) or by email at TMX.ProcessHelp@neb-one.gc.ca.

**Procedural Direction No. 2 – Oral Indigenous traditional evidence – Procedures,
guidance, and session locations and schedules**

A. Overview

On 12 October 2018, in Procedural Direction No. 1, the Board announced that it planned to hold oral traditional evidence sessions in late-November/early-December at a location or locations on Vancouver Island, British Columbia (BC). It also asked Indigenous intervenors that wish to provide oral traditional evidence to notify the Board of their intent to do so by 23 October 2018 (Notices of Intent). In their Notices of Intent, Indigenous intervenors had the opportunity to provide any other information they thought the Board should consider regarding the process for gathering oral traditional evidence.

Thirty-one Indigenous intervenors provided Notices of Intent. Comments received in these Notices of Intent are summarized and addressed in Parts C and D below.

The Board will hear oral traditional evidence at three locations – Calgary, Alberta (AB) and Victoria and Nanaimo, BC – at the venues and during the date ranges noted below:

Session 1 19 – 23 November 2018
Board Hearing Room
517 Tenth Avenue SW
Calgary, AB

Session 2 26 – 29 November 2018
Delta Hotels Victoria Ocean Pointe Resort
100 Harbour Road
Victoria, BC

Telephone/Téléphone : 1-800-899-1265
Facsimile/Télocopieur : 1-877-288-8803

Session 3 3 – 6 December 2018
Vancouver Island Conference Centre
101 Gordon Street
Nanaimo, BC

If presenters cannot appear at any of the locations listed above, they can provide their oral traditional evidence remotely during the time that the Panel is sitting in Calgary, or they may provide the Board with an audio or video recording. For those that present in person at a particular session but feel that more time is required to share their oral traditional evidence, they may also provide the Board with an audio or video recording. It is up to each Indigenous intervenor to decide which method of participation is appropriate and acceptable to them.

B. Attendance

For each oral traditional evidence session, access to the hearing room will be limited to those that are presenting the evidence, members of their communities, registered intervenors, Trans Mountain, and accredited media.

The Board must ensure a safe and respectful environment for everyone attending and participating in its oral traditional evidence sessions. Experiences at previous Board hearings, which have included physical and verbal threats against hearing attendees and participants requiring intervention by security and law enforcement staff, combined with security assessments for the upcoming oral hearing sessions, have given the Board reason to limit access to the hearing room. Minimizing these risks is necessary for ensuring the safety of all hearing participants and attendees. The Board notes that it does not have the full range of security measures as courts, where certain safeguards are in place by virtue of the physical attributes of courthouses and their staffing.

The Board recognizes that public access to hearings is a presumptive right. In the Board's view, the restrictions on physical access are as limited in scope as is necessary to address safety and security concerns. The Board is ensuring the transparency and accessibility to the upcoming hearings to all members of the public through live audio streams, downloadable media files, and transcripts of all sessions. The Board continually updates its [website](#) regarding the Reconsideration hearing, and all documents related to the hearing are available in the Board's online [public registry](#). In addition, accredited media can attend and report on the oral traditional evidence sessions.

C. Comments received in Notices of Intent

Some Indigenous intervenors requested that the Board hear oral traditional evidence in additional towns or cities. Others also filed subsequent letters objecting to, and requesting that the Board reconsider, the chosen locations. The Board has considered and addressed all such requests in Ruling No. 7, also of today's date. Please see that ruling for details on those submissions, the Board's views on them, and its reasons for selecting the chosen locations.

Comments received on other topics are summarized below.

Stó:lō Collective

The Stó:lō Collective said that, during the OH-001-2014 Certificate hearing, it had objected to the process used by the Board to collect oral Indigenous traditional evidence and chose not to provide such evidence during that proceeding. The Stó:lō Collective objects to the oral traditional evidence process for this Reconsideration hearing, but still wishes to provide it. The Stó:lō Collective's concerns include:

- i) **Timing:** The rushed pace of the Reconsideration hearing has truncated the oral traditional evidence process in a manner that the Stó:lō Collective considers culturally insensitive and procedurally unfair.
- ii) **Intellectual property:** The lack of proper safeguards for intellectual property and confidential and culturally-sensitive information that may be shared during the oral traditional evidence sessions.
- iii) **Cross-examination:** It is not customary, nor appropriate, to question Elders' expression of traditional knowledge.

Swinomish Indian Tribal Community, Tulalip Tribes, Suquamish Tribe, and Lummi Nation (U.S. Tribes)

The U.S. Tribes noted that the List of Issues for the Reconsideration hearing (Appendix 1 to [Hearing Order MH-052-2018](#)) includes "potential impacts of Project-related marine shipping on Indigenous interests," yet defines "indigenous" as being limited to "aboriginal peoples of Canada." The U.S. Tribes said that Project-related marine shipping will have impacts to Indigenous peoples on both sides of the international border and that the impacts and risk of increased marine vessel traffic do not stop at the border, nor do the orcas, salmon, and other marine life.

Other comments

A number of Indigenous intervenors – including [Tsawout First Nation](#), [Tsuut'ina Nation](#), the Stó:lō Collective, and the U.S. Tribes – specified or suggested that they plan to have several knowledge holders attend and share their oral traditional knowledge.

D. Views of the Board

Stó:lō Collective

The Board must set a hearing process that fulfills its legislative mandate, the statutory time limits, and that is fair to all Parties. However, the Board also recognizes the importance of accounting for the cultural norms and practices of Indigenous participants. The Board values the unique knowledge and perspectives held by Indigenous intervenors and intends to treat the collection of oral traditional evidence with dignity, respect, and sensitivity. Presenters can choose to swear on a sacred item, and ceremonies, prayers, or other cultural practices can be incorporated into the oral traditional evidence presentations. The Board encourages the Stó:lō

Collective to contact the Board's Process Advisors so that appropriate arrangements can be made.

With respect to the Stó:lō Collective's concerns about the timeline for the Reconsideration hearing, as explained in Section 6.1 of the Board's 29 October 2018 [reasons on process design](#), the Board is bound to work within the mandate set for it in the *National Energy Board Act* (NEB Act). Section 53 of the NEB Act authorizes the Governor in Council (GIC) to direct the Board to undertake a reconsideration based on any factor specified, and to specify a time limit for the Board to complete its reconsideration. In this case, the GIC has specified that the Board must reconsider the environmental effects of Project-related marine shipping in view of the requirements of the *Canadian Environmental Assessment Act, 2012*, and the adverse effects of Project-related marine shipping on species at risk in view of any requirements of section 79 of the *Species at Risk Act*. This is a focused Reconsideration and the GIC has given the Board until 22 February 2019 to deliver its Reconsideration Report. There is already significant evidence on the record on numerous topics being examined. Consistent with subsection 11(4) of the NEB Act, there is a need for proceedings to be conducted expeditiously and fairly and, in any case, within the time limit set by the GIC.

The Board is mindful that oral traditional evidence may include confidential or culturally sensitive information. The Board is not asking Indigenous intervenors to share more than is culturally appropriate for their individual communities. The Board may also take measures to ensure the confidentiality of information under sections 16.1 or 16.2 of the NEB Act, should an intervenor make, and the Board grant, a request for such treatment. More details can be found in Section 4.5 of the Hearing Order and Section 1.5 of the Board's [Filing Manual](#).

With respect to the Stó:lō Collective's objection to cross-examining witnesses during the oral traditional evidence sessions, the Board notes that questions may be answered and submitted in writing, as indicated in Procedural Direction 1 (Part F). Questions put to Elders, if any, should be courteous and respectful. This balances cultural practices and the procedural fairness requirement for Trans Mountain and intervenors to be given the opportunity to test the evidence. This approach was affirmed by the Federal Court of Appeal in *Tsleil-Waututh Nation v. Canada (Attorney General)*.¹

U.S. Tribes

The U.S. Tribes raised a concern around the definition of "Indigenous" in the List of Issues. The purpose of Footnote 4 in the List of Issues was to acknowledge the language used in the *Canadian Constitution Act, 1982*. The Board is also aware of its responsibilities in relation to paragraphs 5(1)(b) and (c) of the *Canadian Environmental Assessment Act, 2012*, to take into account environmental effects, including changes "outside Canada" and "with respect to aboriginal peoples." The footnote does *not* restrict the Board's consideration of impacts to *only* those on Indigenous peoples of Canada.

¹ 2018 FCA 153 at para 258.

The U.S. Tribes have been accepted as an intervenor in this hearing because the Board is aware that Project-related marine shipping may have impacts on them. The Board acknowledges the oral traditional evidence that the U.S. Tribes provided on [22](#) and [23](#) October 2014 in Chilliwack, BC during the OH-001-2014 Certificate Hearing. That evidence is on the record of this Reconsideration hearing and the Board believes it will be valuable to hear further evidence from the U.S. Tribes.

Other comments

The Board acknowledges all oral traditional evidence [provided](#) by various Indigenous intervenors during the OH-001-2014 Certificate hearing. That evidence is on the record of this Reconsideration hearing and is valuable to the Board.

A number of Indigenous intervenors in the Reconsideration hearing have identified several knowledge holders who will attend and share their oral traditional knowledge. The Board will be on Vancouver Island for only eight days. Should presenters at those locations feel that more time is required to share their oral traditional evidence, they may provide the Board with an audio or video recording.

Please see **Appendix 1** for the detailed oral traditional evidence schedule, which was developed based on the Notices of Intent received and discussions between Indigenous intervenors and the Board's Process Advisors. The Process Advisors will continue to discuss scheduling matters with these intervenors in the time leading up to the oral hearing sessions.

As a result, it is possible that the detailed schedule will change as the sessions approach. Presenters will not have their schedule changed without notice. Based on requests from Indigenous intervenors, and in consultation with any other Parties involved, the Board will update Appendix 1 on the public registry as this occurs. The Board asks the Parties to revisit the schedule online for the most up-to-date scheduling information.

In **Appendix 2**, the Board provides procedures, guidance, and other details to assist the Parties in understanding how the sessions will unfold.

For information about the Board's hearing process, please see Hearing Order MH-052-2018.

The Board's Process Advisors can be reached by phone at 1-800-899-1265 (toll-free) or by email at TMX.ProcessHelp@neb-one.gc.ca.

Yours truly,

Appendix 2 Procedures and guidance for oral Indigenous traditional evidence

A. What is oral traditional evidence?

The Board understands that Indigenous peoples have an oral tradition for sharing knowledge from generation to generation. This information cannot always be shared adequately or appropriately in writing.

The oral traditional evidence previously provided in the OH-001-2014 Certificate hearing is on the record of this Reconsideration hearing and is valuable to the Board. Prior to hearing oral traditional evidence, the Board Members assigned to undertake the Reconsideration will have read the transcripts of the oral traditional evidence previously provided. This relieves Indigenous intervenors of the requirement to repeat that evidence in the current Reconsideration hearing.

Indigenous intervenors are encouraged to also make use of their opportunity to file written evidence, to the extent adequate and appropriate, so the Board can spend as much time as possible listening to evidence that can only be provided orally. For example, scientific studies or other expert reports should be provided as written evidence.

The Board recognizes that, ultimately, each Indigenous intervenor decisions will make its own decisions as to whether to present oral traditional evidence, how to do so, and what evidence to provide in the Reconsideration hearing, taking into account the guidance provided by the Board in the List of Issues (Appendix 1 to Hearing Order MH-052-2018) and its associated reasons.

B. Who can provide oral traditional evidence?

Presenters must be representatives of Indigenous groups or individuals that have been granted intervenor status in this Reconsideration hearing and that provided the Board with a Notice of Intent to present oral traditional evidence, as outlined in Procedural Direction No. 1. Those who have not previously registered to present oral traditional evidence will not be allowed to provide it.

C. How much time do I have to make my oral traditional evidence presentation?

In order to hear from all presenting individuals and groups, and in an effort to be fair, each Indigenous intervenor has been allotted up to two hours to present its oral traditional evidence. Participating groups and individuals are welcome to use part of their two-hour time allotment to share a prayer or ceremony, if they wish.

For those that present in person at a particular session but feel that more time is required to share their oral traditional evidence, they may also provide the Board with an audio or video recording.

This is Exhibit U referred to in the Affidavit of
Tanny Nguyen sworn before me at
Vancouver, BC this 6th day of July, 2019.

A Commissioner for taking affidavits for British
Columbia

D. Can I use visual aids during my oral traditional evidence presentation?

Visual aids or other written materials referred to during presentations (e.g., a map illustrating traditional land use, a PowerPoint presentation, or a sacred item), should only be used as a tool for illustrating the oral traditional evidence. Normally, most written materials should be filed with an intervenor's written evidence rather than being part of the oral presentation.

Any visual aids that presenters intend to use during their oral traditional evidence presentation **must be filed and served as written evidence at least one day in advance of their oral traditional evidence presentation.** The Hearing Order provides instructions on how to file and serve documents.

E. If I cannot attend the location or time that has been scheduled for my presentation, can I still participate?

If presenters cannot appear at one of the three hearing venues in person, they can provide their oral traditional evidence remotely during the time that the Panel is sitting in Calgary, or they may provide the Board with an audio or video recording.

To discuss scheduling or remote participation, please contact a Process Advisor by phone at 1-800-899-1265 (toll-free) or by email at TMX.ProcessHelp@neb-one.gc.ca.

F. What will happen when I arrive at the venue to give my oral traditional evidence?

Upon arriving at the hearing venue, please check in with a Process Advisor who will explain the process for that venue. This will allow Board staff to confirm attendance and answer any questions.

G. Will I be “sworn in” prior to presenting my oral traditional evidence?

Before providing oral traditional evidence, presenters will be asked to either swear or affirm that the information they are presenting is accurate and truthful to the best of their knowledge and belief.

If presenters prefer to be sworn in, they will be asked to place their hand on a Bible or another sacred item. If they want to swear on a sacred item other than a Bible, they will need to bring that item to the hearing.

If they prefer to be affirmed, they will be asked to make a statement that the information they are presenting is accurate to the best of their knowledge and belief.

Presenters may also swear or affirm their information through other methods, such as a traditional ceremony or prayer. Please note any such preferences to the Board's Process Advisors so that necessary arrangements can be made.

H. Can I present my evidence in a language other than English?

If those providing oral traditional evidence are speaking in a language other than English, the intervenor must provide their own interpreter and incur those costs (or use participant funding approved for that purpose). Only the English translation will be included in the hearing transcript. It is up to the presenting intervenor to confirm the accuracy of the translation. The presentation, including interpretation, must be no longer than two hours in total (with exceptions for those representing more than one group and as reflected in Appendix 1).

I. Will anyone ask me questions during my presentation?

Since all other evidence will be tested with written questioning, the Board is of the view that it is fair that there also be an opportunity for Parties to respectfully ask questions about oral traditional evidence. The Board may also ask questions of clarification. Questions may be answered orally at the hearing, or they can be answered and submitted in writing, or a combination of both. The choice of how to answer questions, if any, is entirely up to each Indigenous intervenor.

J. Online broadcast and transcripts

The Board will provide a live audio stream of the oral traditional evidence sessions via its [website](#). Media files of each day's broadcast will also be available for [downloading](#).

Daily written transcripts will be found on the online [public registry](#) by the following morning. Anyone can order paper copies of the transcripts directly from International Reporting Inc. This can be done in the hearing room, by emailing bprouse@irri.net, or by calling 613-748-6043. There may be a fee for this service.

File OF-Fac-Oil-T260-2013-03 59
8 November 2018

To: All Parties

Trans Mountain Pipeline ULC
Application for the Trans Mountain Expansion Project
National Energy Board (Board) reconsideration of aspects of its Recommendation
Report as directed by Order in Council P.C. 2018-1177 (Reconsideration)
MH-052-2018
Federal government-appointed Marine technical advisor

On 1 November 2018, in Order in Council P.C. 2018-1341, the federal government appointed Mr. Nigel S. Greenwood of Victoria, British Columbia as a Marine technical advisor to the Board. Specifically, Mr. Greenwood has been appointed by the Governor in Council pursuant to section 10 of the *National Energy Board Act* (NEB Act) to assist the Board in an advisory capacity.

The Board is aware that Mr. Greenwood prepared a *Ship Noise Mitigation Risk Assessment*, which has been filed by certain Parties as part of their direct evidence in the Reconsideration, including the following:

- A95292-9 – Department of Justice, on behalf of Fisheries and Oceans Canada and Canadian Coast Guard, Environment and Climate Change Canada, Health Canada, Natural Resources Canada, Parks Canada, and Transport Canada, Part 1, Annex 3.F.4;
- A95296-14 – Vancouver Fraser Port Authority, Appendix 9.1.

The Board values transparency and recognizes that the content of the duty of procedural fairness owed to the Parties in this Reconsideration is significant.¹ For clarity, the Panel Members assigned to the Reconsideration have not had any interaction with Mr. Greenwood. Out of an abundance of caution, the Board has decided on its own volition to respectfully decline using Mr. Greenwood in an advisory capacity with respect to the Reconsideration.

.../2

¹ This is consistent with the Federal Court of Appeal's determination in *Tsleil-Waututh Nation v. Canada (Attorney General)*, 2018 FCA 153 at para 235.

Public confidence in the National Energy Board's impartiality is integral to the Board's role in this hearing. Section 10 of the NEB Act does not override the need for a hearing process that is and is perceived to be fair to all Parties.

Yours truly,

Attention: Sheri Young, Secretary of the Board

Dear Ms. Young,

**Re: Trans Mountain Expansion Project – Reconsideration
Hearing Order MH-052-2018 & File OF-Fac-Oil-T260-2013-03 59
Notice of Motion for Extension to File (the “Motion”) by Squamish Nation
(“Squamish”) dated November 6, 2018**

We write further to the Motion and the corresponding direction from the National Energy Board (“NEB”) dated November 6, 2018 requesting responses to the Motion. The Stó:lō Collective supports the relief sought by Squamish for an order extending the deadline of November 20, 2018 for intervenors to file their opening statement and direct evidence, as set out in the Hearing Order MH-052-2018, by 15 days to December 5, 2018. The Stó:lō Collective agrees that such an order is appropriate in the circumstances and that it should apply to all intervenors.

Procedural Fairness

It bears repeating that the NEB owes intervenors a significant degree of procedural fairness in this Reconsideration Hearing, and that the intervenors are entitled to “a meaningful opportunity to present their cases fully and fairly”.¹ The Federal Court of Appeal recently explained the NEB’s duty of procedural fairness in *Tsleil-Waututh Nation v. Canada*²:

[230] The Board, as a public authority that makes administrative decisions that affect the rights, privileges or interests of individuals, owes a duty of procedural fairness to the parties before it. However, the existence of a duty of fairness does not determine what fairness requires in a particular circumstance.

[231] It is said that the concept of procedural fairness is eminently variable, and that its content is to be decided in the context and circumstances of each case. The concept is animated by the desire to ensure fair play. The purpose of the participatory rights contained within the duty of fairness has been described to be:

¹ *Tsleil-Waututh Nation v. Canada*, 2018 FCA 153 at para. 235.

² *Ibid.*

... to ensure that administrative decisions are made using a fair and open procedure, appropriate to the decision being made and its statutory, institutional, and social context, with an opportunity for those affected by the decision to put forward their views and evidence fully and have them considered by the decision-maker. [Emphasis added.]

(*Baker v. Canada (Minister of Citizenship and Immigration)*, 1999 CanLII 699 (SCC), [1999] 2 S.C.R. 817, 174 D.L.R. (4th) 193, at paragraph 22).

As pointed out in the Motion, Trans Mountain and the Federal authorities filed a substantial volume of materials as their opening statements and direct evidence. It is not a reasonable or fair process to expect the Stó:lō Collective and other intervenors to read, digest, and meaningfully respond to these materials, totalling over 8,000 pages, by November 20, 2018.

Duty to Consult

Based on a review of filings made to date in the Reconsideration Hearing, it appears Canada has advised certain intervenors (Squamish Nation and Malahat First Nation)³ that it will be relying on the Reconsideration Hearing to the extent possible to fulfil its constitutional duty to consult with Indigenous intervenors. In such circumstances, “the Board’s process serves the additional purpose of contributing to the extent possible to the constitutional imperative not to approve a project if the duty to consult was not satisfied”.⁴ A timeline which requires Indigenous intervenors to consider thousands of pages of evidence in three weeks is entirely inconsistent with any meaningful consultation, and clearly does not contribute in any meaningful way to the discharge of Canada’s duties.

The Supreme Court of Canada (“**SCC**”) has confirmed that the Crown may rely on steps taken by an administrative body to fulfil the duty to consult, in part or in full, so long as the agency possesses the statutory powers to do what the duty to consult requires in the particular circumstances.⁵ However, where the Crown intends to rely on a regulatory process to discharge the duty to consult, it should be made clear to the affected Indigenous groups that the Crown is so relying.⁶ In addition, if the NEB does not provide adequate consultation and accommodation, the Crown must provide further avenues for meaningful consultation and accommodation in order to fulfill the duty prior to project approval.⁷

Contrary to the SCC’s clear directions in the companion cases of *Chippewas* and *Clyde River*:

- a. Canada has not made it clear to all affected Indigenous groups that it intends to rely on the Reconsideration Hearing to discharge its constitutional duty to consult with the Indigenous intervenors;

³ Motion at page 4 [**NEB Filing ID A95463-2**], and Malahat First Nation Application to Participate at page 1 [**NEB Filing ID A95347-1**], respectively.

⁴ *TWN*, *supra*, note 1, at para. 526.

⁵ *Clyde River v. Petroleum Geo-Services Inc.*, 2017 SCC 40 [“**Clyde River**”] at para. 30; *Chippewas of the Thames First Nation v. Enbridge Pipelines Inc.*, 2017 SCC 41 [“**Chippewas**”] at para 32.

⁶ *Chippewas*, para 44; *Clyde River*, para 23.

⁷ *Chippewas*, para. 32.

- b. Canada has filed voluminous evidence which cannot be thoroughly reviewed and responded to by November 20 making any meaningful consultation within the Reconsideration Hearing process impossible; and
- c. Canada has not provided any clear guidance or engaged with the Stó:lō Collective about any consultation framework to address additional or outstanding concerns of the Stó:lō Collective following what has already proven to be a flawed and insufficient Reconsideration Hearing process.

Given Canada's stated intention (to some) that it will rely on the Reconsideration Hearing to discharge its duty to consult with respect to Project-related marine shipping, the NEB must ensure that its process is consistent with the honour of the Crown. In light of the evidentiary record put forward by Canada and Trans Mountain, the current timelines simply do not meet this standard.

For the reasons set out in the Motion and herein, the Stó:lō Collective respectfully requests that the NEB grant the relief sought by Squamish.

In closing and for clarity, the Stó:lō Collective's submissions are in support of the Motion and expressly without prejudice to any position(s) it, or any of the members of the Stó:lō Collective, may advance regarding the fairness of the procedure underlying the Reconsideration Hearing or the sufficiency of the Crown's actions in seeking to fulfill its duty to consult.

Yours truly,

Dear Mr. Kirchner, Mr. Seaman, and Mr. Smith:

**Trans Mountain Pipeline ULC (Trans Mountain)
Application for the Trans Mountain Expansion Project
National Energy Board (Board) reconsideration of aspects of its Recommendation
Report as directed by Order in Council P.C. 2018-1177 (Reconsideration)
MH-052-2018
Ruling No. 9 – Notices of motion from Squamish Nation (Squamish) and Tsleil-
Waututh Nation (TWN) for an extension to the deadline for intervenor evidence**

1. Background

On 26 September 2018, the Board issued a letter that, among other things, stated:

“Given what will be an expedited hearing process, all Parties, including individuals, groups and government departments and bodies, that intend to participate as intervenors, are strongly encouraged to start preparing any additional evidence immediately, based on the draft List of Issues for the Reconsideration hearing.”
(Emphasis in original.)

On 12 October 2018, the Board issued Hearing Order MH-052-2018 outlining the hearing steps and schedule. The Hearing Order established the following deadlines for Parties to file opening statements and evidence:

- Trans Mountain and the Federal Departments and Agencies – 31 October 2018
- All other intervenors – 20 November 2018.

.../2

Suite 210, 517 Tenth Avenue SW
Calgary, Alberta T2R 0A8

Telephone/Téléphone : 403-292-4800
Facsimile/Télocopieur : 403-292-5503
www.neb-one.gc.ca
Telephone/Téléphone : 1-800-899-1265
Facsimile/Télocopieur : 1-877-288-8803

On 31 October 2018, Trans Mountain filed an opening statement and evidence consisting of approximately 800 pages. The Federal Departments and Agencies' opening statement and evidence consisted of over 7,000 pages.

2. Squamish's notice of motion

On 5 November 2018, Squamish filed a [notice of motion](#) in which it seeks a 15-day extension to the deadline for intervenors to file their opening statements and evidence. This request would result in the deadline moving from 20 November to 5 December 2018.

Squamish submitted that, since the Board's letter of 26 September 2018, it has worked diligently to identify evidence for its submission to the Board and experts who are available to provide that evidence, as well as to secure resources to retain those experts. It stated that it has coordinated its efforts with other Indigenous intervenors in order to work efficiently.

According to Squamish, its experts cannot, within the timeline provided by the Board, carry out quantitative analyses to properly respond to the evidence submitted by the Federal Departments and Agencies and Trans Mountain on 31 October 2018.

Squamish is of the view that the overall timeline for the Reconsideration hearing is unduly short. However, for the purposes of its notice of motion, it is seeking a 15-day extension to the deadline for intervenors' opening statements and evidence.

3. Comment period

On 6 November 2018, the Board established a [comment period](#) with respect to Squamish's notice of motion. Trans Mountain and intervenors were given until 8 November 2018 to provide comments, while Squamish was given until 9 November 2018 to provide its reply to any comments filed.

In the Board's letter, it stated its expectation that all Parties should continue working on submissions using the deadlines set out in the Hearing Order while decisions are pending.

4. Comments received

Most of the comments received (and listed below) were in support of Squamish's notice of motion, and a number of Parties provided their own evidence in support:

[Friends of Ecological Reserves](#)

[Cheam First Nation](#)

[Seabird Island Band](#)

[Stó:lō Tribal Council](#)

[Indigenous Caucus for the Trans Mountain](#)

[Indigenous Advisory and Monitoring Committee](#)

[Stk'emlupsemc te Secwepemc of the Secwepemc Nation](#)

[Barkley Sound Stewardship Alliance](#)

[Musqueam Indian Band](#)

[Shxw'ōwhámel First Nation](#)

[North Shore No Pipeline Expansion](#)

[Chawathil First Nation](#)

[Kwantlen First Nation](#)

[Georgia Strait Alliance](#)

[Swinomish Indian Tribal Community, Tulalip Tribes, Suquamish Tribe, and Lummi Nation \(U.S. Tribes\)](#)

[Raincoast Conservation Foundation and Living Oceans Society](#)

[Province of British Columbia](#)

[Stz'uminus First Nation](#)

[Snuneymuxw First Nation](#)

[Stó-lō Collective](#)

[Tsawout First Nation](#)

[Malahat First Nation](#)

[Cowichan Tribes](#)

[Pro Information Pro Environment United
People Network](#)

[Little Shuswap Lake Indian Band](#)

[Metro Vancouver](#)

[Tsartlip First Nation](#)

[Pacheedaht First Nation](#)

[T'Sou-ke First Nation](#)

[Tsuut'ina Nation, Whitefish Lake First Nation,
Driftpile Cree Nation, Louis Bull Tribe](#)

Dr. Katherine Dunster filed [comments](#) on 9 November 2018, after the comment deadline had passed. Dr. Dunster provided no explanation for the late filing, so it was not considered by the Board.

In addition, TWN filed a supporting [notice of motion](#) on 8 November 2018 in which it adopted the arguments in Squamish's notice of motion. TWN also argued that, if the extension is not granted, the issues would have to be raised during the Government's Phase III consultation, but that this is not an adequate alternative.

Comments objecting to Squamish's notice of motion were received from:

- [Trans Mountain](#), which noted the limited scope of the Reconsideration hearing and that the majority of the evidence filed by Trans Mountain and the Federal Departments and Agencies was publicly available prior to the filings. Trans Mountain suggested that a brief extension, such as three to five days, may be reasonably accommodated. It expressed concerns about prejudice if less time is available for subsequent steps in the process.
- [Department of Justice \(on behalf of the Federal Departments and Agencies\)](#), which noted that the Board's website was inaccessible for a short period, so an extension of up to five days may be reasonable.
- [Government of Alberta](#), which argued that the Board must ensure that, if an extension is granted, it must be as brief as reasonably possible and must not prejudice other Parties in subsequent hearing steps. Alberta also reiterated the importance of completing the Reconsideration in the established timeframe.

5. Reply to comments

Squamish filed its [reply](#) on 9 November 2018. In it, Squamish argued that the resources available to it are not comparable to those available to Trans Mountain and the Government of Canada, making it unfair to expect it to have obtained and reviewed the studies referred to in the evidence prior to them being filed on 31 October 2018.

In addition, Squamish reiterated that 15 days is the minimum extension that would allow it to prepare its evidence. An extension of three to five days would not be sufficient.

6. Views of the Board

The Board has considered Squamish's notice of motion, supporting affidavit, and reply submissions; TWN's additional arguments and affidavit; as well as all the submissions and affidavits received from other Parties. The Board finds that there was a large volume of evidence filed by the Federal Departments and Agencies and, to a lesser extent, Trans Mountain, and accepts the argument that the intervenors are unable to adequately review and respond to that volume of evidence before 20 November 2018.

As previously stated by the Board in Section 6.1 of its 29 October 2018 [reasons for process design](#), consistent with subsection 11(4) of the *National Energy Board Act*, there is a need for proceedings to be conducted expeditiously and fairly and, in any case, within the time limit set by the Governor in Council. However, while the Board must meet the 22 February 2019 deadline, it is also required to conduct a hearing that is procedurally fair, and the content of the duty of procedural fairness in this case is significant. This requires that the “parties [are] entitled to a meaningful opportunity to present their cases fully and fairly.”¹

The Board is of the view that, while Parties must work in an expedited manner, having time to prepare evidence in order to fully present a case is of fundamental importance, and this requires the Board to re-examine the timeframes established in the Hearing Order. However, in the context of a hearing subject to an overall time limit (in this case, 155 days), any adjustment in the filing deadlines for any individual step necessarily requires adjustment and compression in subsequent steps in the hearing. In order to accommodate a 15-day extension and still respect the 22 February 2019 deadline, the Board has shortened the time between the Parties’ responses to information requests being filed and written argument-in-chief, as well as the Board’s own time for writing the Reconsideration Report after the close of the hearing record.

By reducing the time available for writing the Reconsideration Report, the Board has, to the extent possible, taken upon itself the consequences of a further compression of the schedule. The Board’s usual service standard for releasing a report is 12 weeks after the close of record; however, under the adjusted schedule, this is reduced to 4 weeks.

With respect to submissions regarding the Board’s website being inaccessible for a period of time, this was not the main reason for the notice of motion being granted. The website was down for approximately 11 hours on Saturday afternoon and evening due to an unexpected outage. The Board will attempt to limit any periods of future inaccessibility, but Parties should download critical filings ahead of time.

Also, to ensure the efficiency and usefulness of the information request process, Parties are reminded that information requests should be about new or updated evidence only, and Parties are encouraged to continue to work together to promote efficiency and avoid duplication, as some intervenors have indicated they are already doing. The extension has been granted in recognition of the importance of preparing evidence that supports an intervenor’s case and challenges the evidence of those that do not. However, to accommodate this, Parties will have to be judicious in their use of the information request process. For Parties planning on filing information requests, the Board strongly encourages them to start preparing and collaborating on potential information requests at the same time that they are preparing evidence.

The changes to the schedule only permit a short period for notices of motion on the adequacy of other Parties’ responses to information requests (known as “motions to compel”). The Board encourages all Parties to answer information requests as fully as possible and to carefully consider the need for motions to compel.

With the resulting changes to the schedule set out in Procedural Direction No. 3 (also of today’s date), the Board will be extremely constrained in its ability to accommodate any further extensions. The Board again encourages and expects Parties to stay focused on the List of Issues for this Reconsideration hearing and to work diligently on and towards the established, and now revised, hearing steps and deadlines. In some instances, this will require Parties to work ahead of having all filings as they prepare for future hearing steps in an expedited manner.

¹ *Tsleil-Waututh Nation v Canada (Attorney General)*, 2018 FCA 153 at para 235.

Disposition

Even with the very real constraints ensuing from the Governor in Council's imposed time limit, the Board has decided to extend the deadline for intervenors to file opening statements and evidence by 15 days. **The new deadline for this step is 5 December 2018.** This change and the other resulting schedule changes are shown in Procedural Direction No. 3, also of today's date.

For any questions, please contact a Process Advisor by phone at 1-800-899-1265 (toll-free) or by email at TMX.ProcessHelp@neb-one.gc.ca.

Procedural Direction No. 3 – Revised hearing events and steps table

On 12 October 2018, the Board released Hearing Order MH-052-2018, which included, in Section 3, a table outlining the hearing events and steps, and associated deadlines.

The Board has recently issued:

- Procedural Direction No. 2, which announced the dates and locations that the Board will hear oral Indigenous traditional evidence; and
- Ruling No. 9 that resulted in an extension to the deadline for intervenors to file their opening statements and direct evidence, and which impacted subsequent steps and deadlines in the hearing.

In addition, the Board has determined additional deadlines associated with the optional step for Parties to file notices of motion on the adequacy of other Parties' responses to information requests.

At this time, the Board is releasing the attached revised hearing events and steps table to reflect these changes. Parties should refer to this revised table as their guide for making filings and participating in the remaining hearing steps.

For any questions, please contact a Process Advisor by phone at 1-800-899-1265 (toll-free) or by email at TMX.ProcessHelp@neb-one.gc.ca.

Intervenors (other than Federal Departments and Agencies) file opening statements and direct evidence <i>Evidence must be relevant to one or more of the issues identified in Appendix 1 to Hearing Order MH-052-2018.</i> <i>Evidence must be served on all other Parties</i>	5 December 2018 (formerly 20 November 2018)
Trans Mountain files reply evidence <i>Reply evidence must be served on all other Parties</i>	11 December 2018 (formerly 26 November 2018)
Oral hearing session: to collect, and allow questioning of, oral Indigenous traditional evidence	20 November to 6 December 2018 (formerly late-November or early-December 2018)
All Parties file information requests regarding other Parties' evidence <i>Information requests must be relevant to one or more of the issues identified in Appendix 1 to Hearing Order MH-052-2018, and also to the evidence of the Party to which the questions are asked</i> <i>Information requests must be served on all other Parties</i>	17 December 2018 (formerly 3 December 2018)
All Parties respond to information requests asked of them <i>Responses to information requests must be served on all other Parties</i>	31 December 2018 (formerly 13 December 2018)

¹ All produced documents must be filed with the Board so they can be placed on the hearing record and considered.

Hearing events and steps (responsible person[s] in bold, guidance in italics) ¹	Date or deadline (3:00 pm Pacific time [4:00 pm Mountain time])
Motion Day – As considered necessary, Parties may file notices of motion on the adequacy of other Parties’ responses to their own information requests (“motions to compel”) ² <i>To help the Board and Parties follow the filed motions to compel and related comments, the attached chart format (or something similar) should be used. Parties are encouraged to provide each other with editable documents, if possible, as the motion to compel process unfolds. Board staff will email the Parties a fillable electronic version.</i> <i>Motions to compel must be served on all other Parties</i>	4 January 2019 (formerly 17 December 2018)
Parties that have motions to compel directed at them may respond to those motions to compel <i>See the guidance included above under “Motion Day”</i> <i>Responses must be served on all other Parties</i>	8 January 2019
Parties that filed motions to compel, <u>and</u> had responses provided by the other Party, may reply to those responses <i>See the guidance included above under “Motion Day”</i> <i>Replies must be served on all other Parties</i>	10 January 2019
All Parties file affidavits adopting their written evidence	17 January 2019 (formerly 9 January 2019)
Trans Mountain and Federal Departments and Agencies file written argument-in-chief, including comments on draft conditions (which the Board will release for comment) <i>Comments on conditions must be included in written argument-in-chief; they cannot be raised for the first time during oral summary argument. No new evidence can be provided in written argument-in-chief</i> <i>Written argument-in-chief must be served on all other Parties</i>	17 January 2019 (formerly 9 January 2019)

² Information on **what constitutes a motion to compel and how the Board considers them** can be found in the Board’s 20 January 2015 [Procedural Direction No. 9](#), which was issued during the OH-001-2014 Certificate hearing. The deadlines in this **current** Procedural Direction No. 3 should be followed for the motions to compel process in this Reconsideration hearing.

Hearing events and steps (responsible person[s] in bold, guidance in italics) ¹	Date or deadline (3:00 pm Pacific time [4:00 pm Mountain time])
Intervenors (other than Federal Departments and Agencies) file written argument-in-chief, including comments on draft conditions and any reply argument to Trans Mountain and Federal Departments and Agencies. <i>Comments on conditions must be included in written argument-in-chief; they cannot be raised for the first time during oral argument. No new evidence can be provided in written argument-in-chief</i> <i>Written argument-in-chief must be served on all other Parties</i>	22 January 2019 (formerly 14 January 2019)
Optional oral hearing session: to hear all Parties' oral summary argument and/or reply argument <i>Oral summary argument or summary argument on specific issues only may be held if needed and time permits</i> <i>Parties should include all pertinent argument in their written argument-in-chief, as this step may not be held</i> <i>Should oral summary argument take place, Trans Mountain can provide reply argument during this period; otherwise a date for filing written reply argument will be announced by the Board</i>	late-January 2019 (formerly mid-January 2019)
Hearing record closes	Immediately after finishing argument
Board releases its Reconsideration Report to the Governor in Council, and provides it to the Minister of Natural Resources	22 February 2019 or earlier (time limit end)

Attachment to revised hearing events and steps table (13 November 2018) – Organizational chart for motions to compel and related comments

Guidance:

- A Party **can only** file a motion to compel in relation to its own information requests (IRs).
- A Party filing a motion to compel must explain in detail why it considers each individual IR response (or sub-parts of an IR) to be inadequate.
- The Parties are encouraged to provide each other with editable documents, if possible, as the motion to compel process unfolds.

Name of Party to which this motion to compel is directed (referred to as the Respondent)		[name of Party]			
IR #	IR wording ¹	Response to IR ²	Motion filer’s explanation for claiming IR response to be inadequate	Respondent’s comments on motion to compel	Motion filer’s reply comments ³

¹ Insert the relevant text of the IR that was asked. If the entire question is relevant to your submission, insert the full text. References and preambles can be removed, unless they are essential to your submission.

² Insert the relevant text of the IR response. If the entire response is relevant to your submission, insert the full text.

³ The motion filer may only provide reply comments if the Respondent has filed comments on the motion to compel. The motion filer’s reply comments may only deal with matters raised by the Respondent in its comments.

Hearing Order MH-052-2018
File No. OF-Fac-Oil-T260-2013-03 59

**IN THE MATTER OF
TRANS MOUNTAIN PIPELINE ULC
TRANS MOUNTAIN EXPANSION PROJECT**

NOTICE OF MOTION

Name of person bringing motion: LIVING OCEANS SOCIETY and
RAINCOAST CONSERVATION FOUNDATION

Decision or order

1. That the Board require Trans Mountain to conduct a proper risk assessment of Project-related marine shipping that includes all Species at Risk Act ("SARA")-listed species that may be affected by Project-related marine shipping.
2. Such other relief as the Board may consider appropriate.

November 16, 2018

E-mail: dtuytel@ecojustice.ca, mventon@ecojustice.ca

Statement of Facts

1. In the previous hearing, Living Oceans filed an expert report by Dr. Jeffrey Short in which Dr. Short identified shortcomings in Trans Mountain's Ecological Risk Assessment (the "ERA") with respect to oil spills. Dr. Short found that the ERA:
 - a) failed to integrate exposure to oil based on multiple locations, instead choosing a few locations where there might be a higher risk of collision, and omitting some of the most sensitive habitats from its analysis;
 - b) "failed to assess hazard based on species sensitivity to oiling independently of oiling probability", took an inappropriately generic approach to assessing sensitivity of species to oiling, and conflated the two concepts of probability and consequence of exposure to oil, which should have been evaluated independently;
 - c) failed to assess the possibility of organisms being exposed to submerged oil; and
 - d) failed to consider all of the ways that oil can harm organisms.¹
2. In the previous hearing, the proponent used an indicator species approach to assess effects of Project-related marine shipping on SARA-listed marine species.
3. For the purposes of the Reconsideration, the Board has identified 35 SARA-listed species that are likely to be affected by Project-related marine shipping.²
4. The proponent has not provided a new risk assessment in the Reconsideration, and the proponent continues to rely on an indicator species approach to the SARA s. 79(2) requirement to identify and ensure measures with respect to every SARA-listed species.³

Grounds

5. Raincoast Conservation Foundation ("Raincoast") and Living Oceans Society ("Living Oceans") bring this motion pursuant to Rule 35 of the *National Energy Board Rules of Practice and Procedure*, 1995, SOR/95-208 ("NEB Rules").

¹ Dr. Jeffrey Short, Fate and Effect of Oil Spills from the Trans Mountain Expansion Project in Burrard Inlet and the Fraser River Estuary, prepared for Tsleil-Waututh Nation, City of Vancouver, and Living Oceans Society (4 May 2015), Filing ID A4L9R7.

² A95671 National Energy Board – Letter to Ministers of Environment and Fisheries and Oceans – Trans Mountain Expansion – Reconsideration – Potential effects on species listed under the Species at Risk Act, online at <https://apps.neb-one.gc.ca/REGDOCS/Item/Filing/A95671>; A95280-2 Trans Mountain Direct Evidence - A6J6F4-1 at 13-14.

³ A95280 Trans Mountain Pipeline ULC – Opening Statement and Direct Evidence, A95280-2 Direct Evidence – A6J6F4, online: <https://apps.neb-one.gc.ca/REGDOCS/Item/View/3643427>.

6. Raincoast and Living Oceans submit that the proponent's approach described above prevents the accurate evaluation of risks to marine species, including SARA-listed species.
7. Subsection 79(2) of SARA requires the Board to identify, and ensure measures to avoid or lessen, all adverse effects of Project-related marine shipping on all of the listed wildlife species that are likely to be affected by Project-related marine shipping, and their critical habitat.
8. Subsection 79(2) requires more than a generic approach. It requires identification of all effects and measures to mitigate all effects on each SARA-listed species. The proponent has not done this.
9. More broadly, the proponent's risk assessment still fails to live up to the standard of a proper risk assessment, for the reasons identified in paragraph 1. The Reconsideration is an opportunity to correct the shortcomings and produce a proper risk assessment.
10. Therefore, Raincoast and Living Oceans submit that the Board should require the proponent to identify effects and measures with respect to the s. 79(2) requirements for each SARA-listed marine species. They further submit that the Board should require the proponent to complete a proper risk assessment that addresses effects of Project-related marine shipping, including effects of an oil spill from Project-related marine shipping. That risk assessment should include a less generic approach to sensitivity of species to oiling. It should also include effects on all of the SARA-listed species that are likely to be affected by the Project, not only on selected species.

Suggestion for more efficient retrieval of documents

11. Raincoast and Living Oceans further note that it would be of assistance to them if the Board would include the Filing ID or hyperlinks when it referred to documents on the record in the Board's Reasons. Raincoast and Living Oceans strive to do this to assist the Board in reading their filings. Given the short timeline of this hearing, efforts to save all parties time in locating documents are essential.

Decision Sought

12. Living Oceans and Raincoast request that the Board order:
 1. that the Board include Project-related marine shipping between the WMT and the EEZ as part of the "designated project" under CEAA 2012;

2. that the Board require Trans Mountain to conduct a proper risk assessment of Project-related marine shipping that includes all Species at Risk Act (“SARA”)-listed species that may be affected by Project-related marine shipping; and
3. such other relief as the Board may consider appropriate.

TRANS MOUNTAIN EXPANSION PROJECT

APPLICATION FOR REVIEW

Names of persons bringing application: LIVING OCEANS SOCIETY and
RAINCOAST CONSERVATION FOUNDATION

- Decision or order:
1. That the Board review its decision to limit the scope of the Reconsideration to Project-related marine shipping between the Westridge Marine Terminal (the "WMT") and the 12-nautical-mile territorial sea limit.
 2. That the Board issue a new decision that includes Project-related marine shipping between the WMT and the outer boundary of Canada's exclusive economic zone (the "EEZ") is part of the "designated project" under the *Canadian Environmental Assessment Act, 2012* ("CEAA 2012").
 2. Such other relief as the Board may consider appropriate.

Overview

1. Raincoast Conservation Foundation (“Raincoast”) and Living Oceans Society (“Living Oceans”) bring this application pursuant to s. 21(1) of the *National Energy Board Act*, RSC, 1985, c N-7 (“NEB Act”) and s. 44 of the *National Energy Board Rules of Practice and Procedure*, 1995, SOR/95-208 (“NEB Rules”).
2. Raincoast and Living Oceans submit that the Board erred in excluding Project-related marine shipping within the EEZ from the “designated project” to be assessed under CEAA 2012 in this Reconsideration.
3. Raincoast and Living Oceans therefore submit that the Board should review its decision concerning the spatial limit of the “designated project” and issue a new decision that defines the “designated project” to include Project-related marine shipping between the WMT and the outer boundary of the EEZ.

Statement of Facts

4. On October 5, 2018, the Board sought comments on the following question with respect to the scope of the Reconsideration:

Assuming Project-related marine shipping is included in the “designated project” to be assessed under the CEAA 2012, should the designated project be defined as including:

- a) Project-related marine shipping between the Westridge Marine Terminal (WMT) and the territorial sea limit; or
 - b) Project-related marine shipping between the WMT and the outer boundary of Canada’s exclusive economic zone?
5. On October 9, 2018, Raincoast Conservation Foundation (“Raincoast”) and Living Oceans Society (“Living Oceans”) filed [comments](#) that the designated project should be defined as including Project-related marine shipping between the WMT and the outer boundary of Canada’s exclusive economic zone (the “EEZ”) (Filing ID A6I5L7).
 6. On October 12, 2018, the Board issued the [Hearing Order](#) (Filing ID A6I7I8), which stated that the Board had “determined that Project-related shipping between the WMT and the 12-nautical-mile territorial sea limit is [...] part of the ‘designated project’ under the CEAA 2012” (the “Spatial Limit Decision”).
 7. On October 29, 2018, the Board provided a [letter](#) to the parties (Filing ID A95187) attaching reasons for various decisions in the Hearing Order. Reasons for the Spatial Limit Decision were set out in Appendix 1 to the letter (the “Board’s Reasons”).

Grounds

8. Raincoast and Living Oceans submit that the Board should review the Spatial Limit Decision and issue a new decision that defines the “designated project” to include Project-related marine shipping between the WMT and the outer boundary of the EEZ.
9. Subsection 21(1) of the NEB Act provides that “the Board may review, vary or rescind any decision or order made by it”.
10. Rule 44 of the NEB Rules provides for applications for review or rehearing pursuant to s. 21(1) of the NEB Act. Rule 44(2)(b) requires applications for review to set out grounds that raise a doubt as to the correctness of the decision at issue – in this case, the Spatial Limit Decision.
11. The Spatial Limit Decision concerns the extent of the “designated project” for the purposes of CEAA 2012.
12. Subsection 2(1) of CEAA 2012 defines a “designated project” as follows:
designated project means one or more physical activities that
 - (a) are carried out in Canada or on federal lands;
 - (b) are designated by regulations made under paragraph 84(a) or designated in an order made by the Minister under subsection 14(2); and
 - (c) are linked to the same federal authority as specified in those regulations or that order.It includes any physical activity that is incidental to those physical activities.
13. Project-related marine shipping is “incidental” to the Project and therefore captured by this definition.
14. Raincoast and Living Oceans submit that Project-related marine shipping not only within the 12-nautical mile territorial sea limit (the “Territorial Sea”) but from the WMT to the outer boundary of the EEZ is “incidental” to the Project and therefore captured by this definition. As Raincoast and Living Oceans submitted in their October 9 comments to the Board on this topic, Project-related marine shipping from WMT to the outer boundary of the EEZ is within the legislative authority of Parliament, there is no basis under CEAA 2012 for excluding it from the designated project, and it would be contrary to the purposes of CEAA 2012 and SARA to exclude it.¹

¹ Filing ID A6I5L7.

15. Raincoast and Living Oceans submit that the factual and legal errors in the Spatial Limit Decision, set out below, raise doubts as to the correctness of that decision.
16. Raincoast and Living Oceans therefore submit that the Board should include Project-related marine shipping from the WMT to the outer boundary of the EEZ is part of the “designated project” under CEAA 2012.

Overly narrow interpretation of “designated project” and “incidental”

17. The Board states at page 10 of the Board’s Reasons that “[e]nvironmental legislation, such as the CEAA 2012, should be given a generous interpretation to allow effective response to environmental harm, in keeping with the precautionary principle and the role of EA as a planning tool.” The Board has failed to give a generous interpretation to CEAA 2012.
18. The Board states at page 4 of the Board’s Reasons that “the additional tanker loads at the WMT are tied to and dependent on the pipeline component of the Project”, and that “the purposes of the CEAA 2012 include the protection of the components of the environment within the legislative authority of Parliament from significant adverse environmental effects, and ensuring that designated projects are considered in a careful and precautionary manner”. The Board states that this supports the inclusion of Project-related marine shipping in the “designated project”. Raincoast and Living Oceans submit that it also supports inclusion of Project-related marine shipping from WMT to the outer limit of the EEZ in the “designated project”.
19. The Board unduly emphasizes the timeliness of environmental assessment - a purpose of CEAA 2012 identified in s. 4(1)(f) – relative to other purposes of CEAA 2012. The Board states at page 12 of the Board’s Reasons that “the extent of what is ‘incidental’ should not be so broad as to frustrate the CEAA 2012 purpose of timely EAs”. With respect, to the extent that the environmental assessment of the Project has not been “timely”, it is not over-inclusiveness but rather the under-inclusiveness of the original hearing that is to blame for delays, as it resulted in litigation and the need for this Reconsideration.
20. Conducting a review that considers all environmental effects of a designated project under CEAA 2012 cannot be said to “frustrate” timely environmental assessment. Timeliness must be balanced against the other purposes of CEAA 2012, including:

- a) “to protect the components of the environment that are within the legislative authority of Parliament from significant adverse effects caused by a designated project” (s. 4(1)(a)); and
 - b) “to ensure that designated projects that require the exercise of a power or performance of a duty or function by a federal authority under any Act of Parliament other than this Act to be carried out, are considered in a careful and precautionary manner to avoid significant adverse environmental effects” (s. 4(1)(b).
21. The FCA in *Tsleil-Waututh Nation v Canada (Attorney General)*, 2018 FCA 153 (“*Tsleil-Waututh*”) emphasized that the Board must address the Project’s effects on all components of the environment that are within the legislative authority of Parliament in order for its environmental assessment to be consistent with the purposes of CEAA 2012.² The Order in Council simply orders the Board to take into account the requirements of CEAA 2012 and s. 79 of SARA.
22. As Raincoast and Living Oceans noted in their previous comments with respect to the purposes of CEAA 2012, protection of the environment within the EEZ is within the authority of Parliament.³ This requires the Board to address effects of Project-related marine shipping occurring within the EEZ.
23. The NEB cites a single decision of the Supreme Court of British Columbia with respect to the meaning of “incidental” (at page 12 of the Board’s Reasons). That decision offers a number of definitions drawn from case law and a dictionary definition: “occurring or liable to occur in fortuitous or subordinate conjunction with something else”; and “liable to happen”, “naturally attaching to”, “occurring as something causal or of secondary importance”, and “following upon a subsequent circumstance.”⁴ The Court concluded that these definitions in the context of CEAA 2012 “support that ‘incidental’ requires a certain level of proximity as well as possibly causal connection between activities and the designated project.”⁵
24. The Board further notes at page 13 of the Board’s Reasons that the FCA in *Tsleil-Waututh* stated that the Project’s primary purpose is “to provide additional transportation capacity for crude oil from Alberta to markets in the Pacific Rim.” The Board notes that Project-related marine shipping is “tied to and dependent on the pipeline component of the Project” and that “[t]his supports an interpretation of ‘incidental’ that includes

² *Tsleil-Waututh Nation v Canada (Attorney General)*, 2018 FCA 153 [*Tsleil-Waututh*] at para 402.

³ Filing ID A615L7.

⁴ *Canada (Canadian Environmental Assessment Agency) v Taseko Mines Limited*, 2018 BCSC 1034 at para 65.

⁵ *Ibid* at para 66.

Project-related marine shipping.” However, the Board finds that there is not a “sufficient level of proximity [...] once the tankers exit the territorial sea.”

25. Raincoast and Living Oceans submit that the same Project-related marine shipping continuing beyond the Territorial Sea into the EEZ is still incidental to the Project, and that the Board’s decision to cut off its environmental assessment before the EEZ is arbitrary. The causal connection is the same in the EEZ as it is in the Territorial Sea. Proximity is not to be understood in terms of miles but in terms of the relationship between the Project-related marine shipping and the Project, which is the same regardless of whether it occurs within the Territorial Sea or the EEZ.
26. Furthermore, the Board is not bound by the approaches taken by other responsible authorities in other environmental assessments cited in the Board’s Reasons.
27. Finally, the Board states at page 18 of the Board’s Reasons that “project-specific EAs are not meant to accomplish what might be considered akin to a regional study of marine shipping in a large area such as the EEZ”, which is a separate process under ss. 73-77 of CEAA 2012. Raincoast and Living Oceans are not asking for the equivalent of a regional study, which is an optional exercise, but rather for the Board’s current, mandatory review of the Project to address the environmental effects of the entirety of the Project, including mitigation, as required by CEAA 2012, and to ensure mitigation of the Project’s effects on SARA-listed species as required under s. 79(2) of SARA.

Results are necessary for protecting the environment and reducing harm

28. The Board states at page 5 of the Board’s Reasons that “geographic extent should not be so broad as to [...] produce results that are not useful in protecting the environment and reducing harm.” Raincoast and Living Oceans submit that the results of assessing Project-related marine shipping between the WMT and the outer boundary of the EEZ would be useful in protecting the environment and reducing harm.
29. Canada has jurisdiction over, and the proponent can influence, Project-related marine shipping within the EEZ, to protect the environment from its effects.
30. As the Board states at page 8 of the Board’s Reasons, Canada has jurisdiction over “the protection and preservation of the marine environment” within the EEZ.⁶

⁶ *United Nations Convention on the Law of the Sea*, 1982, 1833 UNTS 3 (entered into force 1994, ratified by Canada 7 November 2003) [UNCLOS], article 56, para 1(a), (b)(iii); *Oceans Act*, SC 1996, c 31, s 14(a)-(b).

31. The Board further states at page 14 of the Reasons that some of the proponent's Tanker Acceptance Standards apply beyond the Territorial Sea, within the EEZ.

32. The Transport Canada TERMPOL Review Process Report on the Project (the "TERMPOL Report"), filed in the previous hearing, stated that:

Trans Mountain is proposing to add a requirement to its tanker acceptance criteria that Project tankers planning to leave Canada via the Juan de Fuca Strait must agree that, upon exiting the Juan de Fuca Strait, they will steer a course no more northerly than due West (270°), until the tankers are outside the Canadian Exclusive Economic Zone (EEZ), 200 nautical miles from Canada's coast. The routing requirement will ensure Project tankers will use the shortest route to exit the EEZ.⁷

Transport Canada found that this would "enhance safety and protection of the marine environment".

33. As such, including Project-related marine shipping between WMT and the outer boundary of the EEZ would result in recommendations and recommended conditions that would take into account the effects of Project-related marine shipping occurring within that area and would be useful in protecting the environment and reducing harm in a more complete manner than under the current Spatial Limit Decision.

34. The ability to influence Project-related marine shipping within the EEZ also undermines the Board's conclusion at page 15 of the Board's Reasons that the CEA Agency criteria "slightly lean against" including Project-related marine shipping within the EEZ being "incidental". It indicates that a generous, and correct, interpretation of CEAA 2012 would include Project-marine shipping within the EEZ in the "designated project".

35. The Board notes at pages 5 and 8 of the Board's Reasons that there are not defined shipping lanes in the EEZ, and that destinations can vary, such that environmental effects cannot be predicted and mitigation cannot be evaluated, and an environmental assessment would be speculative.

36. Project-related shipping cannot simply proceed without an environmental assessment on the basis that the Board assumes that it cannot figure out where vessels go. Impacts of an oil spill within the EEZ may be different than impacts of an oil spill within the Territorial Sea. These different impacts must be assessed.

⁷ C353-4-4 – TMEP TERMPOL Report December 11 2014 – A4F8Z4 at 15.

37. The Board notes that the CEA Agency Guidance “requires proponents to provide the project location, identify project-environment interactions, and describe the potential effects of the project.” The proponent should be able to ascertain where tankers go when travelling to the destinations to which it seeks to ship oil, and inform the Board so that it can determine acceptable spatial boundaries and conduct the environmental assessment. It strains credulity to suggest that no one knows, and the proponent and Board cannot find out, where and how Project-related oil tankers would travel within the EEZ.
38. Furthermore, even without more information on routes within the EEZ, it is already clear from the facts in paragraphs 41 and 44 below and the government recovery documents cited therein that ships travelling into the EEZ by any route will pass through habitat for SARA-listed species, which for many species runs along the continental shelf.

The Board’s Reasons neglect species at risk outside of the Territorial Sea

39. The Federal Court of Appeal (“FCA”) in *Tsleil-Waututh* clearly stated that the Board must address the Project’s effects on all components of the environment that are within the legislative authority of Parliament in order for its environmental assessment to be consistent with the purposes of CEAA 2012.⁸
40. Section 79 of SARA requires that:
- (1) Every person who is required by or under an Act of Parliament to ensure that an assessment of the environmental effects of a project is conducted, and every authority who makes a determination under paragraph 67(a) or (b) of the *Canadian Environmental Assessment Act, 2012* in relation to a project, must, without delay, notify the competent minister or ministers in writing of the project if it is likely to affect a listed wildlife species or its critical habitat.
 - (2) The person must identify the adverse effects of the project on the listed wildlife species and its critical habitat and, if the project is carried out, must ensure that measures are taken to avoid or lessen those effects and to monitor them. The measures must be taken in a way that is consistent with any applicable recovery strategy and action plans.
41. The Board states at page 10 of the Board’s Reasons that it “finds it compelling” that the FCA concluded in *Tsleil-Waututh* that “the Board’s report was adequate for the purpose of informing the GIC about the effects of Project-related marine shipping on the Southern resident killer whales and their use by indigenous groups.”

⁸ *Tsleil-Waututh* at para 402.

42. However, since the Board's report, new critical habitat for Southern Resident Killer Whales has been identified and proposed for designation by Fisheries and Oceans Canada, most of which falls outside of the Territorial Sea, within the EEZ.⁹
43. Furthermore, the Board must meet SARA s. 79(2) requirements for all SARA-listed species that are likely to be affected by the Project. Southern Resident Killer Whales are not the only SARA-listed species likely to be affected by Project-related marine shipping. While Raincoast and Living Oceans, and others, used their limited resources to focus on effects on the endangered Southern Resident Killer Whales during the previous hearing, and therefore also in the litigation before the FCA, the requirements of s. 79(2) of SARA apply to all SARA-listed species.
44. The Board has identified 35 SARA-listed species that are likely to be affected by Project-related marine shipping.¹⁰
45. The habitat of many of these species extends beyond the Territorial Sea, to the continental shelf and the EEZ¹¹:
- c) the recently published Recovery Strategy for the Offshore Killer Whale states that "Offshore Killer Whales seem to predominantly inhabit continental shelf-edge waters along the British Columbia coast"¹²;
 - d) the Black-footed Albatross "visit[s] Canada's Pacific EEZ to forage during the breeding and post-breeding season", and they are "abundant over the outer continental shelf, particularly at the shelf break"¹³;
 - e) the Action Plan for Blue, Fin, Sei and North Pacific Right Whales states that "Blue, Fin, Sei and North Pacific Right Whale habitat in Canadian Pacific Waters

Unsupported conclusions about the Order in Council and *Tsleil-Waututh*

46. The Board relies in part on the fact that the Order in Council ordering the Reconsideration (P.C. 2018-1177) (the “Order in Council”) and the FCA’s decision *Tsleil-Waututh* do not specifically address the geographic scope of Project-related marine shipping (at page 10 of the Board’s Reasons).
47. The question before the FCA was whether the wholesale exclusion of Project-related marine shipping from the designated project was unlawful. The fact that it did not answer a question that was not before it cannot be understood as an answer to that question. Similarly, the fact that the Order in Council, which is intended to implement the FCA’s orders in *Tsleil-Waututh*, does not speak to this question cannot be understood as an answer to the question.

Reliance on unproven facts

48. At page 18 of the Board’s Reasons, the Board “notes that the probability and consequences of a marine incidence declines with distance from the coast, in light of traffic volumes and navigational hazards. Thus, risk reduction measures [...] are focused within the territorial sea.” In support of this factual conclusion, which it uses to justify the Spatial Limit Decision, the Board cites only a bald assertion by the Project proponent made in the proponent’s comments with respect to the spatial limit.²¹
49. Rather than rely on unsupported claims to avoid hearing any evidence of the effects of marine shipping that occurs outside of the Territorial Sea, the Board should consider Project-related marine shipping between WMT and the outer limit of the EEZ. If the Board finds, after reviewing the evidence, that fewer risk reduction measures are required outside of the Territorial Sea, that finding will be reflected in its recommendations and recommended conditions.

Conclusions

50. The above grounds raise doubts as to the correctness of the Spatial Limit Decision.
51. The Board has erred in interpreting the “designated project” to exclude the EEZ, based on a flawed interpretation of what is “incidental” to the Project, a flawed interpretation of what is “proximate” to the Project, a lack of attention to facts about the federal

²¹ See Trans Mountain, Comments on Spatial Limit of Project-Related Marine Shipping (9 October 2018) at 6-7 (Filing ID A6I5J9).

government's and the proponent's ability to influence Project-related shipping within the EEZ, and a lack of attention to facts concerning effects of Project-related shipping within the EEZ on Southern Resident Killer Whales and other SARA-listed species.

52. If the Spatial Limit Decision is not reviewed it will result in prejudice and damage in the form of a lack of recommendations and recommended conditions for environmental protection within the EEZ, including with respect to SARA-listed species.

53. As such, Raincoast and Living Oceans submit that the Board should review the Spatial Limit Decision and issue a new decision that includes Project-related marine shipping between the WMT and the EEZ as part of the "designated project" under CEAA 2012.

Suggestion for more efficient retrieval of documents

54. Raincoast and Living Oceans further note that it would be of assistance to them if the Board would include the Filing ID or hyperlinks when it referred to documents on the record in the Board's Reasons. Raincoast and Living Oceans strive to do this to assist the Board in reading their filings. Given the short timeline of this hearing, efforts to save all parties time in locating documents are essential.

Decision Sought

55. Living Oceans and Raincoast request that the Board order:

1. that the Board include Project-related marine shipping between the WMT and the EEZ as part of the "designated project" under CEAA 2012;
2. that the Board require Trans Mountain to conduct a proper risk assessment of Project-related marine shipping that includes all Species at Risk Act ("SARA")-listed species that may be affected by Project-related marine shipping; and
3. such other relief as the Board may consider appropriate.

This is Exhibit BB referred to in the Affidavit of Tanny Nguyen sworn before me at Vancouver, BC this 6th day of July, 2019.

TSLEIL-WAUTUTH NATION'S APPLICATION FOR REVIEW OF NATIONAL ENERGY BOARD HEARING ORDER MH-052-2018

November 16, 2018

I. INTRODUCTION & OVERVIEW

1. This application for review by the Tsleil-Waututh Nation (“**TWN**”) is made pursuant to s. 21(1) of [NEBA](#) and Rules 43 and 44 of the [National Energy Board Rules of Practice and Procedure, 1995](#) (“**Rules**”).
2. TWN submits that the Board erred in the following three respects in its approach to this Reconsideration hearing:
 - (a) excluding Project-related marine shipping activities in the Exclusive Economic Zone (“**EEZ**”) from the “designated project” that must be assessed under the [Canadian Environmental Assessment Act, 2012](#) (“**CEAA 2012**”);
 - (b) failing to conduct a *de novo* hearing because the Panel appointed to undertake this Reconsideration hearing did not hear the original evidence and submissions of the parties; and
 - (c) excluding the need for and the socio-economic effects of the Project from the List of Issues.
3. TWN requests that the Board revisit the determinations made as part of, or flowing from, the Hearing Order in this proceeding by (i) including Project-related marine shipping in the EEZ as part of the “designated project” that must be assessed under *CEAA, 2012*, (ii) including the need for and the socio-economic effects of the Project from the List of Issues, and (iii) requiring a *de novo* hearing, owing to the addition of new panel members to conduct this Reconsideration hearing.

II. STATEMENT OF FACTS

4. On September 26, 2018, the Board [requested](#) that the parties provide comments by October 3, 2018 on several issues, including:
 - (a) whether, “on a principled basis,” Project-related marine shipping should be included in the “designated project” to be assessed under *CEAA 2012*; and

- (b) the draft Amended Factors and Scope of Factors for the environmental assessment of the Project pursuant to *CEAA 2012* and the draft List of Issues to be considered in the Reconsideration hearing.
5. On October 3, 2018, TWN provided [comments](#) to the Board to the effect that Project-related marine shipping should be included in the “designated project” to be assessed under *CEAA 2012* and other comments associated with on the draft Amended Factors and Scope of Factors, the draft List of Issues, and the design of the hearing process applicable to this Reconsideration hearing.
6. Of relevance to this Application for Review, TWN argued in those comments that the Board had breached the applicable principles of natural justice, specifically the maxim that “he who decides must hear” by appointing a new panel to oversee this Reconsideration hearing, without conducting a *de novo* hearing.¹
7. TWN also argued that the need for and the socio-economic effects of the Project had to be included in the List of Issues because, *inter alia*, the economics of the Project and other context relevant to this issue have changed in a fundamental way since Trans Mountain submitted its evidence on this issue several years ago.²
8. On October 5, 2018, the Board [sought further comments](#) from the parties on the following question with respect to the scope of the Reconsideration:

Assuming Project-related marine shipping is included in the “designated project” to be assessed under the *CEAA 2012*, should the designated project be defined as including:

- a) Project-related marine shipping between the Westridge Marine Terminal (WMT) and the territorial sea limit; or
- b) Project-related marine shipping between the WMT and the outer boundary of Canada's exclusive economic zone?

¹ Tsleil-Waututh Nation, “Comments on the draft Amended Factors and Scope of the Factors of the Environmental Assessment under the *Canadian Environmental Assessment Act, 2012* (“*CEAA 2012*”), the draft List of Issues, and the design of the hearing process”, October 3, 2018 – A94536-1 at pp. 3-5.

² Tsleil-Waututh Nation Comments at pp. 15-16.

9. On October 9, 2018, TWN filed [further comments](#) in response to the Board's October 5, 2018 request, to the effect that the "designated project" should indeed be defined as including Project-related marine shipping between the WMT and the outer boundary of Canada's EEZ.
10. On October 12, 2018, the Board issued its [Hearing Order](#) in this matter, which provides that the Board has "determined that Project-related marine shipping between the WMT and the 12 nautical mile territorial sea limit is [...] part of the 'designated project' under the CEAA 2012" (the "**Spatial Limit Decision**").³
11. On October 29, 2018, the Board provided a [letter](#) to the parties with reasons associated with various decisions in the Hearing Order. Reasons for the Spatial Limit Decision were set out in [Appendix I](#) to the October 29 letter, and reasons were set out in [Appendix II](#) in connection with the Board's disagreement that it had breached the principles of natural justice by violating the maxim "he who decides must hear" by appointing a new panel to oversee this Reconsideration hearing without conducting a *de novo* hearing.⁴
12. The Board summarized Trans Mountain's submissions in its Reasons for the Spatial Limit Decision as follows:

Further, Trans Mountain's ability to impose and enforce requirements on tankers in Canada's 200 nautical mile exclusive economic zone (EEZ) is extremely limited ...

Trans Mountain also said there are no established shipping lanes in the EEZ. An assessment of effects from routine shipping operations in the EEZ would be impractical and results would be subject to a high degree of inaccuracy, rendering the effort largely ineffectual.⁵
13. The Spatial Limit Decision turned on this issue. In the Board's words, "knowing the project location or route is fundamental". The Board held as follows:

A key fact that the Board must consider in conducting any EA is the geographical extent of the project, and the spatial boundaries within which that project is expected to have potential effects on the selected valued components. In order to define the spatial boundaries, knowing the project location or route is fundamental.

³ Hearing Order MH-052-2018, Appendix I and Appendix II.

⁴ Appendix II at pp. 16-17.

⁵ Appendix I at p. 1.

There is a marked and material difference between marine shipping within the territorial sea limit and the EEZ. Given that there are no defined shipping lanes in the EEZ – a vast area of ocean – no shipping “route” for the Project can be identified with any degree of certainty. Destinations can vary from Washington State, California, or Asia. The lack of a certain route means, in turn, that appropriate spatial boundaries cannot be identified with certainty. It is not possible to predict the project-environment interactions and the full impacts of that project, nor can one adequately evaluate technically and economically feasible mitigation as required by the CEAA 2012. It would produce speculative, as opposed to meaningful, information about project impacts. Such an EA would not be useful as a planning and decision-making tool for the GIC.⁶

14. In short, the factual basis underlying the Board’s Spatial Limit Decision is incorrect.
15. In the TERMPOL Review Process Report on the Trans Mountain Expansion Project, Transport Canada observed as follows:

Trans Mountain is proposing to add a requirement to its tanker acceptance criteria that Project tankers planning to leave Canada via the Juan de Fuca Strait must agree that, upon exiting the Juan de Fuca Strait, they will steer a course no more northerly than due West (270°), until the tankers are outside the Canadian Exclusive Economic Zone (EEZ), 200 nautical miles from Canada’s coast. The routing requirement will ensure Project tankers will use the shortest route to exit the EEZ.⁷

16. Transport Canada incorporated Trans Mountain’s proposal into TERMPOL Recommendation 9:

Trans Mountain’s commitment to require via its tanker acceptance process that Project tankers steer a course no more northerly than due West (270°) upon exiting the Juan de Fuca Strait will enhance safety and protection of the marine environment by providing the shortest route out of the Canadian EEZ.⁸

17. Trans Mountain subsequently agreed to adopt and implement all of the TERMPOL recommendations.⁹ As a result, and contrary to Trans Mountain’s submissions which formed the factual basis for the Spatial Limit Decision, the route for Project-related marine shipping in the EEZ is known, can be identified with certainty, and appropriate spatial boundaries for the CEAA 2012 environmental assessment can therefore also be identified with certainty.

III. GROUNDS FOR REVIEW

18. Subsection 21(1) of *NEBA* provides that the Board may review, vary or rescind any decision or order made by it:

21. (1) ... the Board may review, vary or rescind any decision or order made by it or rehear any application before deciding it.

19. Subsection 44(2) of the Rules establishes the parameters for applications for review. It states as follows:

44. (2) An application for review or rehearing shall contain

(a) a concise statement of the facts;

(b) the grounds that the applicant considers sufficient, in the case of an application for review, to raise a doubt as to the correctness of the decision or order or, in the case of an application for rehearing, to establish the requirement for a rehearing, including

(i) any error of law or of jurisdiction,

(ii) changed circumstances or new facts that have arisen since the close of the original proceeding, or

(iii) facts that were not placed in evidence in the original proceeding and that were then not discoverable by reasonable diligence;

(c) the nature of the prejudice or damage that has resulted or will result from the decision or order; and

(d) the nature of the relief sought.

20. When the Board receives a s. 21 *NEBA* application for review, the Board's Filing Manual provides that it must: "first [determine] whether the decision or order should be reviewed or the application reheard. In order to find that a review or rehearing is required, the Board must be satisfied that the applicant has raised a doubt as to the correctness of the decision or order under review or has demonstrated that a rehearing is required."¹⁰

¹⁰ National Energy Board, Filing Manual – Guide O – Review, Rehearing or Variance applications (NEBA s. 21) (January 2012), online: <https://www.neb-one.gc.ca/bts/ctrg/gnnb/flngmnl/fmgdo-eng.html>.

21. Raising a doubt as to the correctness of the decision or order under review has been described as an onus for the applicant to “satisfy the Board that a *prima facie* case for review exists in the particular circumstances of any case”.¹¹
22. The Board has held that in exercising its s. 21(1) review power:¹²
- (a) The Board should exercise it with care;
 - (b) It is within the Board’s discretion whether circumstances exist to warrant its use;
 - (c) In exercising that discretion, the Board should consider the following factors:
 - (i) Whether a sufficient doubt has been raised as to the correctness of the prior Board order or decision;
 - (ii) Whether circumstances have changed or new facts have arisen since an order or decision was made which justify a Board review;
 - (iii) The timeliness of the application for review;
 - (iv) The relationship of the application for review to other proceedings pending before the Board; and,
 - (v) The extent to which the relief sought is available under other provisions of *NEBA*, its regulations, or an order of the Board.
23. The primary justification for review is the significant doubt as to the correctness of the Board’s decisions. However, the Board has previously held that grounds for review are not limited to those listed in section 44(2)(b) of the Rules, and that other grounds for review will be considered if they raise a doubt as to the correctness of a Board decision.¹³

¹¹ National Energy Board – Newfoundland & Labrador Hydro Application for Review under Section 17 (June 1984) at 1, as cited in Canadian Institute of Resources Law, *Canada Energy Law Service* (Toronto: Carswell, 2017) (loose-leaf updated 2018, Release 1) (“**Canada Energy Law Service**”), Ch. VIII at §311, Tsleil-Waututh Nation’s Book of Authorities (“**BOA**”) Tab D3.

¹² Westcoast Transmission Co. – Application for Review of Order No. TG-5-79 and for an Order Fixing Interim Tolls (August 1980) at p. 4, as cited in *Canada Energy Law Service*, Ch. VIII at §310, BOA Tab D5.

¹³ National Energy Board, Letter Decision, “Application for Review of the Decision of Members Ballem and Lytle, in Report GH-003-2015 (Towerbirch Report), Respecting the Toll Treatment of the Tower Lake Section (TLS)”, March 16, 2017, at p. 5, online: <https://apps.neb-one.gc.ca/REGDOCS/File/Download/3210070>, BOA Tab B1.

(a) *The Spatial Limit Decision is Factually Incorrect*

24. The Board's Spatial Limit Decision is factually incorrect in that the Board erroneously concluded that "no shipping 'route' for the Project can be identified with any degree of certainty" and "[t]he lack of a certain route means...that appropriate spatial boundaries cannot be identified with certainty".¹⁴
25. The Board's conclusion in that regard is manifestly flawed. It is contradicted by the existing facts before the Board. Although the Board made reference to certain of these facts in its reasons, the Board appears to have misapprehended the degree to which Trans Mountain can "direct or influence" marine shipping in the EEZ and, as a result, the extent to which shipping routes, and corresponding appropriate spatial boundaries, within the EEZ can be identified with certainty.¹⁵
26. Importantly, the factual basis for the Spatial Limit Decision is directly contradicted by Trans Mountain's evidence:
 - (a) Trans Mountain has the ability to impose and enforce requirements on tankers within the EEZ through its Tanker Acceptance Standards, a fact which the Board has acknowledged;¹⁶
 - (b) the routes Project-related marine shipping will use within the EEZ can indeed be determined with precision:
 - (i) there are a limited number of destinations for Project-related marine shipping that may require tankers to transit within the EEZ, namely California and Asia (movements to Washington State do not require transit within or through the EEZ);¹⁷

¹⁴ Appendix at p. 5.

¹⁵ Appendix I, at p. 14.

¹⁶ Appendix I, at p. 14.

¹⁷ Appendix I, at p. 16.

- (ii) Trans Mountain, through its Tanker Acceptance Standards, has already agreed to require tankers to “steer a course no more northerly than due West (270°) upon exiting the Juan de Fuca Strait”, with a view to enhancing safety and protection of the marine environment by providing the shortest route out of Canada’s EEZ;¹⁸ and
 - (iii) Trans Mountain can refuse vessels calling at the WMT if they do not abide by this EEZ sailing requirement.
27. As a result, and contrary to the Board’s erroneous findings of fact (which are directly contradicted by the evidence before it), the route(s) for Project-related marine shipping within the EEZ are known, can be identified with certainty and, as a result, appropriate spatial boundaries for the *CEAA 2012* environmental assessment can also be identified with certainty.
28. The Board has also unlawfully returned to the unduly narrow approach it applied to the phrase “incidental to” in the earlier hearing, an approach which was ultimately rejected by the Federal Court of Appeal in *Tsleil-Waututh*. There, the Court held that the Board’s view that it “must itself have regulatory oversight over a particular subject matter” to include incidental physical activities in the designated project was to impermissibly rewrite the relevant section of *CEAA 2012* as “[including] any physical activity that is incidental to those physical activities *and that is regulated by the responsible authority*” and without regard to *CEAA 2012*’s purposes.¹⁹
29. Here, the Board is again impermissibly looking to rewrite the relevant section of *CEAA 2012*, but this time to state that it “includes any physical activity that is incidental to those physical activities *and that the proponent controls in the same manner as all other physical activities*” and, again, without reference or regard to *CEAA 2012*’s purposes.

¹⁸ TERMPOL Report, at p. 47.

¹⁹ [Tsleil-Waututh Nation v. Canada \(Attorney General\)](#), 2018 FCA 153 (“*Tsleil-Waututh*”) at para. 401, BOA Tab A14.

30. The Board has acknowledged that (i) “the determination of whether Project-related marine shipping is incidental to the pipeline is ‘a mixed question of fact and law heavily suffused by evidence’” and (ii) a “key fact that the Board must consider in conducting any EA is the geographical extent of the project, and the spatial boundaries within which that project is expected to have potential effects on the selected valued components.”²⁰
31. In view of these factual errors, the Board’s overall conclusion that no shipping route can be ascertained with any degree of certainty appears to be in significant doubt and must be revisited.

(b) *The Spatial Limit Decision is Legally Incorrect*

32. Even if there is some degree of uncertainty about the precise location of Project-related marine shipping routes, nothing in *CEAA 2012* authorizes the Board to “scope out” Project-related marine shipping activities within the EEZ from the “designated project” it must assess. Rather, the plain language of *CEAA 2012* is clear that such activities must form part of the “designated project”.
33. In that regard, TWN submits the Board, in making the Spatial Limit Decision, incorrectly and/or unreasonably interpreted *CEAA 2012* in a manner which does not accord with the text, context, and purpose of the relevant provisions within the meaning of the Supreme Court of Canada’s leading decision on statutory interpretation in *Rizzo & Rizzo Shoes Ltd (Re)*.²¹

²⁰ Appendix I, at p. 15.

²¹ *Rizzo & Rizzo Shoes Ltd. (Re)*, [1998] 1 SCR 27 at para. 21: “Today there is only one principle or approach, namely, the words of an Act are to be read in their entire context and in their grammatical and ordinary sense harmoniously with the scheme of the Act, the object of the Act, and the intention of Parliament.”, BOA Tab A13.

34. In particular, the Board did not properly apply the *Rizzo Shoes* test in considering whether the 12 nautical mile territorial sea limit or the EEZ was the proper spatial limit to be applied to the circumstances before it. While the Board reasoned that a “designated project” *could* take place in the EEZ and be subject to an environmental assessment,²² it nonetheless purported to depart from the plain language of the definition of “designated project” on the basis that in its view that “there appears to be a degree of ambiguity in the definition of ‘designated project’ with respect to what is ‘incidental’.”²³
35. First, statutory interpretation cannot go against the plain language of the statute. The words, of a statute “if clear, will dominate; if not, they yield to an interpretation that best meets the overriding purpose of the statute.”²⁴ While the text, context, and purpose of a provision must always be examined, a purposive approach cannot be used to ground unexpressed legislative intentions, nor can so-called ‘policy’ or ‘practical’ considerations be used override the clear language of an enactment.²⁵
36. Here, the plain language of *CEAA 2012* must indeed dominate. The starting point for this exercise is the definition of “designated project” found in s. 2(1) of *CEAA 2012*. Parliament has defined it as meaning “one or more physical activities that (a) are carried out in Canada or on federal lands; (b) are designated by regulations made under paragraph 84(a) or designated in an order made by the Minister under subsection 14(2); and (c) are linked to the same federal authority as specified in those regulations or that order. It includes any physical activity that is incidental to those physical activities.”
37. The definition of “federal lands” also found in s. 2(1) of *CEAA 2012* in turn expressly includes “the exclusive economic zone of Canada” in subsection (b)(iii) of that definition.
38. A plain reading of *CEAA 2012* supports the conclusion that physical activities of any kind (whether incidental or not) that occur in the EEZ are part of the “designated project” that must be assessed.

²² Appendix I, at p. 11.

²³ Appendix I, at p. 11.

²⁴ *Celgene Corp. v. Canada (Attorney General)*, 2011 SCC 1 at para. 21, BOA Tab A7.

²⁵ *Canada v. Craig*, 2012 SCC 43 at para. 38, BOA Tab A6; *65302 British Columbia Ltd. v. Canada*, [1999] 3 SCR 804 (“*65302 British Columbia Ltd.*”) at para. 50-51, BOA Tab A1; *Markevich v. Canada*, 2003 SCC 9 (“*Markevich*”) at para. 34, BOA Tab A11.

39. There is therefore no ambiguity present which would allow the Board to resort to purposive, policy or practical considerations to disregard the plain language of *CEAA 2012*.²⁶ These words are not ambiguous and are incapable of supporting multiple interpretations.
40. The Board has determined that marine shipping is “incidental to” the pipeline portion of the Project. It follows, then, that marine shipping carried out in Canada on “federal lands” (i.e. the EEZ) is *ipso facto* ‘included’ in the “designated project”. There is no provision which allows the Board to make a secondary determination relating to the degree of ‘incidental’ to be associated with marine shipping in the EEZ. The Board’s further focus on ‘incidental’ in that regard was, with respect, misguided.
41. The fundamental flaws in the Board’s reasoning are further revealed by the following rhetorical question: how can Project-related marine be “incidental to” the pipeline within the 12 nautical mile territorial sea limit, but somehow cease to be “incidental to” the pipeline once those very same tankers transit the EEZ?
42. In both cases, Project-related marine shipping is liable to happen as a consequence of the pipeline or, put another way, without marine shipping transiting the EEZ the Project would, again, constitute the proverbial pipeline to nowhere.
43. An examination of *CEAA 2012*’s scheme as a whole, as required by *Rizzo Shoes*, in concert with the federal statute book as coherent and logical whole,²⁷ also lends further support to the conclusion that Project-related marine shipping within the EEZ is part of the “designated project” that must be assessed:

²⁶ [Bell ExpressVu Limited Partnership v. Rex](#), 2002 SCC 42 at para. 29, BOA Tab A3; [Markevich](#) at para. 34, BOA Tab A11.

²⁷ In [65302 British Columbia Ltd.](#) at para. 7, BOA Tab A1 Mr. Justice Bastarache noted that “[t]he statute book as a whole forms part of the legal context in which an act ... is passed ... The legislature is presumed to know its own statute book and to draft each new provision with regard to the structures, conventions, and habits of expression as well as the substantive law embodied in existing legislation. When courts examine a provision in the context of the statute book as a whole, they are concerned primarily with two things. One is avoiding conflict with the provisions of other statutes. It is presumed that the legislature does not intend to contradict itself; it is presumed to create coherent schemes ...”. See also [R. v. Ambrosi](#), 2014 BCCA 325 at para. 22, BOA Tab A12 and Ruth Sullivan, *Sullivan on the Construction of Statutes*, 6th ed. (Toronto: LexisNexis, 2014) at 403, 416-17, BOA Tab D4 and cases cited therein.

- (a) Sections 5(1)(a) and 5(1)(b)(i) of *CEAA 2012* set out the environmental effects that must be taken into account in relation to a “designated project”. These include (i) “a change that may be caused to the components of the environment that are within the legislative authority of Parliament”²⁸ and (ii) “a change that may be caused to the environment that would occur on federal lands”²⁹ (i.e. again referencing the EEZ), respectively;
- (b) The Board’s obligations pursuant to ss. 79(1) of the [Species at Risk Act](#), S.C. 2002, c. 29 (“**SARA**”) refer to a “project”, and ss. 79(3) incorporates the definition of “designated project” from *CEAA 2012* by reference (which, as noted above, also in turn relies on the definition of “federal lands” from *CEAA 2012* that expressly includes the EEZ); and
- (c) Sections 13 and 14 of the [Oceans Act](#), S.C. 1996, c. 31 define the EEZ and, *inter alia*, (i) declare Canada’s “sovereign rights in the [EEZ] for the purpose of exploring and exploiting, conserving and managing the natural resources, whether living or non-living, of the waters superjacent to the seabed and of the seabed and its subsoil” and (ii) asserts Canada’s “jurisdiction in the exclusive economic zone of Canada with regard to ... the protection and preservation of the marine environment.”³⁰

44. An interpretation that includes Project-related marine shipping between the WMT and the outer boundary of Canada’s EEZ also best accords with the express purposes of *CEAA 2012*, in particular those found at ss. 4(1)(a) and (b),³¹ and the primary purpose stated at s. 6 of *SARA*.³²

²⁸ *CEAA 2012*, s. 5(1)(a) (emphasis added).

²⁹ *CEAA 2012*, s. 5(1)(b)(i) (emphasis added).

³⁰ [Oceans Act](#), S.C. 1996, c. 31, ss. 14(a) and (b)(iii), BOA Tab C1.

³¹ “(a) to protect the components of the environment that are within the legislative authority of Parliament from significant adverse environmental effects caused by a designated project; (b) to ensure that designated projects that require the exercise of a power or performance of a duty or function by a federal authority under any Act of Parliament other than this Act to be carried out, are considered in a careful and precautionary manner to avoid significant adverse environmental effects”.

³² “The purposes of this Act are to prevent wildlife species from being extirpated or becoming extinct, to provide for the recovery of wildlife species that are extirpated, endangered or threatened as a result of human activity and to manage species of special concern to prevent them from becoming endangered or threatened.”

45. In contrast, the Board's exclusion of Project-related marine shipping within the EEZ from the "designated project" is an incorrect and unreasonable departure from the plain language of *CEAA 2012* and Parliament's obvious, manifest intent that it should be included.
46. Moreover, the Board also misinterpreted and misapplied the B.C. Supreme Court's decision in *Taseko Mines*. The issue in *Taseko Mines* was whether the initial activities authorized under a provincial exploration permit for a proposed mine were sufficiently related to the carrying out of a designated project.³³ The Court responded in the negative, that the exploration activities "[did] not have a sufficient relationship to the actual construction, operation, decommissioning or abandonment of the [mine]."³⁴
47. Here, the Board has already determined that marine shipping is "incidental to" the pipeline. As a result, the holding in *Taseko Mines* is of no moment and its reasoning not useful to determining the issue that was before the Board.
48. Finally, the Board erroneously purported to rely on the fact that the Court in *Tsleil-Waututh* (i) "did not raise concerns with this geographic scope" [i.e. that the Board assessed Project-related marine shipping pursuant to *NEBA* to the 12 nautical mile territorial sea limit in its OH-001-2014 Report], and (ii) concluded that "the Board's report was adequate for the purpose of informing the GIC about the effects of Project-related marine shipping on the Southern resident killer whales and their use by indigenous groups."³⁵
49. However, the Board's reliance on the Court's finding on this point is misplaced for at least two reasons:

³³ [*Canada \(Canadian Environmental Assessment Agency\) v Taseko Mines Limited*](#), 2018 BCSC 1034 ("*Taseko Mines*") at para. 22, BOA Tab A5.

³⁴ *Taseko Mines* at para. 66, BOA Tab A5.

³⁵ Appendix I, at p. 10.

- (a) The issue of proper spatial boundaries of the environmental assessment of the “designated project” under *CEAA 2012* was not a live issue before the Court, and thus the issue of whether it was appropriate to apply the 12 nautical mile territorial sea limit or EEZ was not argued or, for that matter, considered by the Court. It therefore cannot be assumed from the comments cited by the Board that the Court was endorsing the 12 nautical mile territorial sea limit over the EEZ. Indeed no weight can be attached to those comments in this case: as the Court commented elsewhere in its reasons on another issue, no weight can be attached to decisions where an argument on a particular point has not been put in issue by the parties to the case.³⁶
- (b) New critical habitat for southern resident killer whales has been identified and proposed for designation by Fisheries and Oceans Canada, most of which falls outside of the territorial sea.³⁷ This significantly undermines the Board’s finding that examining impacts on the EEZ would “frustrate” the purpose of timely EAs under *CEAA 2012*, and the Board’s conclusion that “[t]he other limitation of an overly broad assessment is that results may not be useful in protecting the environment and reducing harm.”³⁸ Surely there is clear utility consonant with the purposes of *CEAA 2012* in protecting the environment and reducing harm to the critical habitat of species at risk in areas which clearly fall within the definition of “federal lands” under *CEAA 2012*.
50. TWN therefore submits that a correct appreciation of the facts supports the inclusion of Project-related marine shipping from the WMT to the outer limit of the EEZ in the “designated project” at issue here.

³⁶ *Tsleil-Waututh* at para. 186, BOA Tab A14.

³⁷ Fisheries and Oceans Canada, Recovery Strategy for the Northern and Southern Resident Killer Whales (*Orcinus orca*) in Canada [Proposed] (2018), online at http://www.registrelep-sararegistry.gc.ca/virtual_sara/files/plans/Rs%2DResidentKillerWhale%2Dv00%2D2018Aug%2DEng%2Epdf.

³⁸ Appendix I, at p. 15.

(c) *The Board incorrectly determined that a de novo hearing was not required*

51. The Board held that a *de novo* hearing is not required because the Panel undertaking the Reconsideration did not hear the original evidence, and that *NEBA* ousts the application of the maxim “he who decides must hear.”³⁹ TWN agrees with the Board that this rule “does not apply where legislation expressly, or by necessary implication, ousts its application.”⁴⁰ However, neither exception applies here.
52. First, the Board has pointed to no express provision of *NEBA* that ousts this principle. It does cite “[t]he addition of the reconsideration provision in the NEB Act in 2012” as evidence of Parliament’s intention “that the Board could be directed to reconsider specific issues only, in which case there is no requirement for a *de novo* hearing or for all previous evidence heard orally to be reheard.”⁴¹
53. This argument is, with respect, a red herring. There is no suggestion by TWN that on reconsideration, this triggers a *de novo* hearing, or a requirement “or for all previous evidence heard orally to be reheard.” Rather, TWN’s position is that the same panel members must hear the reconsideration, failing which a *de novo* hearing is required. Again, the Board was required to apply the *Rizzo Shoes* analysis to this question, to determine whether the application of “he who decides must hear” was expressly or impliedly excluded by Parliament.⁴²
54. In this case, again, Parliament’s addition of the reconsideration power to *NEBA* provides no support for the Board’s conclusion that this bedrock rule of administrative law has been ousted. The plain meaning of the word “reconsider” is, literally, “to discuss or take up (a matter) again”⁴³ or “to consider again”,⁴⁴ directly implying that the same panel members would be expected to hear a matter “again” during a reconsideration process.

³⁹ Appendix II, at p. 16.

⁴⁰ Appendix II, at p. 16.

⁴¹ Appendix II, at p. 16.

⁴² [*ATCO Gas & Pipelines Ltd. v. Alberta \(Energy & Utilities Board\)*](#), 2006 SCC 4 (“ATCO”) at paras. 37-38, BOA Tab A2.

⁴³ *Black’s Law Dictionary*, 10th ed., p. 1464, *sub verbo* “reconsider”, BOA Tab D1.

⁴⁴ *The Concise Oxford English Dictionary*, 11th ed. (revised), p. 1202, *sub verbo* “reconsider”, BOA Tab D2.

55. The Board's reasoning that "an exception to quorum requirements exists for the original section 52 proceeding (see subsection 7(2.1)), but not for the section 53 reconsideration, also indicates that the reconsideration does not require the same Panel" similarly does not comport with a proper *Rizzo Shoes* analysis. Again, the word "reconsideration" chosen by Parliament has a plain meaning associated with it which does not expressly or impliedly provide the Board an ability to substitute in other panel members at will.
56. Moreover, the Board's cites s. 7(2) of *NEBA* for the authority that "any quorum of the Board is 'the Board' and can carry out the statutory obligations of the Board."⁴⁵ However, as the Federal Court of Appeal confirmed in *Johnny v. Adams Lake Indian Band*, a quorum provision of this nature simply means that if all members of a panel are not eligible or available to participate in an inquiry, then "a majority of the members may nonetheless embark upon the inquiry."⁴⁶ A quorum provision "does not authorize members to come and go and participate in a decision when they have not heard all of the evidence or the submissions of the parties."⁴⁷
57. The Board's comment that "[i]t would not be practical to expect the original Panel Members to remain available through an unlimited number of reconsiderations" also does not comport with a proper *Rizzo Shoes* analysis. As outlined above, "practical considerations" may only be considered where there is genuine ambiguity present, and the words at issue may bear more than one meaning. Here, the plain meaning of "reconsideration" is obvious and does not require resort to such considerations, nor does the Board justify, with evidence or past practice, its speculative conclusion regarding the possibility of "multiple reconsiderations" occurring.⁴⁸

⁴⁵ Appendix II, at p. 16.

⁴⁶ [*Johnny v. Adams Lake Indian Band*](#), 2017 FCA 146 ("*Johnny*") at paras. 31-32, BOA Tab A10.

⁴⁷ *Johnny* at paras. 31-32, BOA Tab A10.

⁴⁸ Appendix II, at p. 16.

58. Importantly, in determining whether implied powers exist, the Board must presume Parliament “to have a mastery of existing law, both common law and statute law [and] to have known all of the circumstances surrounding the adoption of new legislation.”⁴⁹ However, notwithstanding this, and notwithstanding that the courts’ view that “nothing is more fundamental to administrative law” than the “he who decides must hear” maxim,⁵⁰ there is no indication whatsoever that Parliament intended to abrogate it under *NEBA* nor provide the Board with the express or implied power to do so.
59. Rather, the structure of *NEBA* and the Board’s powers lead to the opposite conclusion: the Board is established under s. 11(1) of *NEBA* as “a court of record” and s. 11(4) provides that “all applications and proceedings before the Board are to be dealt with as expeditiously as the circumstances and considerations of fairness permit, but, in any case, within the time limit provided for under this Act, if there is one.”
60. In TWN’s submission, the Board’s status as a court of record that has been expressly bound by “considerations of fairness” further suggests that a court-like procedure must be followed, and the principles of natural justice, including the “he who decides must hear” maxim, have not been expressly or impliedly ousted from *NEBA*.
61. TWN submits that the Board’s consideration of this issue was therefore also doubtful and must be revisited.
- (d) *The Board incorrectly excluded the need for and the socio-economic effects of the Project from the List of Issues***
62. The economics of the Project have changed in a fundamental way since Trans Mountain submitted its evidence on this issue: as the Board is aware, two new pipelines have been approved (one of which, Line 3, is now under construction), new capacity is being added to the Enbridge mainline, the costs of building the Project have increased significantly, and oil production forecasts have decreased.

⁴⁹ ATCO at para. 59, BOA Tab A2.

⁵⁰ Johnny at para. 31, BOA Tab A10.

63. Given these material changes in Project economics, new evidence is required on a wide range of issues in connection with the justification analysis under *CEAA, 2012* and the Board's consideration of the public interest under *NEBA*. As such, this issue requires new evidence which is essential to the Board's recommendation and the Governor in Council's ultimate decision on justification. It would be unfathomable to attempt to justify significant adverse environmental effects of a Project for which there was no need, that would provide limited economic benefits, or on the basis of stale-dated evidence.

IV. NATURE OF THE PREJUDICE OR DAMAGE FROM THE DECISION OR ORDER

64. The above errors cause prejudice to TWN, other parties, and the public interest in several significant ways.

65. First, respecting the requirement that "he who decides must hear" which is already acknowledged as a fundamental principle of Canadian administrative law,⁵¹ it takes on added significance in an instance such as this, where oral Aboriginal history and tradition evidence has been transmitted as part of the initial hearing process.

66. In this regard, the Supreme Court of Canada has stated that that the laws of evidence must "operate to ensure that the aboriginal perspective is 'given due weight by the courts'" and requires a sensitive application of rules of evidence.⁵²

67. Further, the Supreme Court of Canada has also recognized that "the purpose of repeating oral accounts from the past is broader than the role of written history in western societies. It may be to educate the listener, to communicate aspects of culture, to socialize people into a cultural tradition, or to validate the claims of a particular family to authority and prestige ..."⁵³

⁵¹ *Johnny* at para. 31, BOA Tab A10.

⁵² *Delgamuukw v. British Columbia*, [1997] 3 SCR 1010 ("*Delgamuukw*") at paras. 84-85, BOA Tab A9.

⁵³ *Delgamuukw* at para. 87, BOA Tab A9.

68. The case law first makes clear that it does not suffice for panel members to advise those who were not present as to what happened when they were not, nor does it suffice to read, *ex post facto*, written accounts or summaries of that evidence.⁵⁴ Further, as Member Scott will no doubt recall, the TWN oral evidence included traditional songs, a teaching and communication method which cannot be readily captured by a transcript.
69. There is also prejudice associated with the exclusion of Project-related marine shipping in the EEZ and the need for and the socio-economic effects of the Project from the List of Issues. From TWN's perspective, the Board's exclusion of these matters puts matters as they relate to marine shipping back into the state they were in as of April 2, 2014, when the Board excluded marine shipping altogether, and respecting evidence of the need for the Project that goes to the justification decision under *CEAA, 2012*, as of the date of the close of the Board's hearing record nearly three years ago.
70. Respecting marine shipping, given TWN's rights and uses associated with the southern resident killer whales, the Board's latest exclusions significantly prejudice the considerations of its associated rights and interests with respect to killer whales. This is particularly so in light of Fisheries and Oceans Canada's proposed expansion of the critical habitat of those whales into the EEZ, which may well be impacted by Project-related marine shipping activities therein.
71. Respecting the need to re-examine the need for and the socio-economic effects of the Project, it would be unfathomable, for example, to attempt to justify significant adverse environmental effects of a Project for which there was no need, that would provide limited economic benefits, or on the basis of stale-dated evidence.
72. This exclusion operates to also prejudice any examination of justification of any environmental effects to the southern resident killer whales and TWN's rights and uses associated with them, and indeed prejudices the significant public interest in an accurate examination of this issue as part of this Reconsideration hearing.

⁵⁴ Johnny at paras. 33-39, BOA Tab A10.

73. Further, it is no answer to state that TWN can raise these matters with the Governor-in-Council during future Phase III consultation, because TWN does not itself have the ability to trigger a reconsideration, and the Governor in Council has consistently refused to do so. Phase III therefore does not represent an adequate alternative remedy to TWN within the meaning of the case law.⁵⁵
74. The statutory timeline in place in this matter is also no answer. A legislative timeline cannot operate to constrain or “box in” a lawful environmental assessment pursuant to *CEAA 2012* or the proper consideration of Aboriginal concerns. Canada has stated that it intends to rely on this Reconsideration process, to the extent possible, to discharge its duty to consult and accommodate TWN. However, as the Federal Court has observed, “[i]t is not sufficient to set up some form of elaborate system and then put it on auto-pilot and hope for success.”⁵⁶
75. Rather, if these issues are not addressed, further litigation will become more likely, which will cause prejudice to all concerned. As the Supreme Court of Canada recently observed in *Clyde River*, discharging the duty to consult Aboriginal peoples is a “constitutional imperative” that must be met, and “[n]o one benefits — not project proponents, not Indigenous peoples, and not non-Indigenous members of affected communities — when projects are prematurely approved only to be subjected to litigation.”⁵⁷

V. RELIEF SOUGHT

76. TWN requests that for the above reasons, the Board revisit the conclusions made as part of, or flowing from, the Hearing Order, including the following:
- (a) determine that Project-related marine shipping in the EEZ forms part of the “designated project” to be assessed under *CEAA 2012* in this Reconsideration hearing;

⁵⁵ [Buenaventura Jr. v. Telecommunications Workers Union](#), 2012 FCA 69 at paras. 30-31, BOA Tab A4.

⁵⁶ [Yellowknives Dene First Nation v. Canada \(Attorney General\)](#), 2010 FC 1139 para. 102, BOA Tab A15.

⁵⁷ [Clyde River \(Hamlet\) v. Petroleum Geo-Services Inc.](#), 2017 SCC 40 at para. 24, BOA Tab A8.

- (b) determine that a *de novo* hearing is required in view of the newly-reconstituted panel members involved in this Reconsideration hearing not hearing the original evidence and submissions of the parties; and
- (c) determine that the need for and the socio-economic effects of the Project must be included in the List of Issues.

National Energy Board (Board) reconsideration of aspects of its Recommendation
Report as directed by Order in Council P.C. 2018-1177
MH-052-2018
Comment processes on 16 November 2018 requests from Living Oceans Society
and Raincoast Conservation Foundation (Living Oceans/Raincoast), and
Tsleil-Waututh Nation (TWN)**

On 16 November 2018, the Board received a notice of motion and applications for review from Living Oceans/Raincoast and TWN. These filings make various requests which are described in more detail below.

A. Notice of motion regarding risk assessment

The Living Oceans/Raincoast notice of motion makes the following request:

Request 1 That the Board require Trans Mountain to conduct a proper risk assessment of Project-related marine shipping that includes all *Species at Risk Act*-listed species that may be affected by Project-related marine shipping.

Before deciding on Request 1, the Board will accept comments from the Parties in accordance with the following schedule.

Request 1 – Risk assessment

Party(ies) and submission	Deadline
All intervenors (other than Living Oceans/Raincoast) may file comments	30 November 2018
Trans Mountain may file comments	4 December 2018
Living Oceans/Raincoast may file reply comments	6 December 2018

B. Review regarding 12 October 2018 dec

The TWN review [application](#) makes the following requests:

- Request 2** That the Board revisit the conclusions made as part of, or flowing from, the Hearing Order, including the following:
- a) determine that Project-related marine shipping in the exclusive economic zone (EEZ) forms part of the “designated project” to be assessed under the *Canadian Environmental Assessment Act, 2012* (CEAA 2012) in this Reconsideration hearing;
 - b) determine that a *de novo* hearing is required in view of the newly-reconstituted panel members involved in this Reconsideration hearing not hearing the original evidence and submissions of the parties; and
 - c) determine that the need for and the socio-economic effects of the Project must be included in the List of Issues.

The Living Oceans/Raincoast review [application](#) makes the following requests:

- Request 3** That the Board:
- a) review its decision to limit the scope of the Reconsideration to Project-related marine shipping between the Westridge Marine Terminal (WMT) and the 12 nautical-mile territorial sea limit.
 - b) issue a new decision that includes Project-related marine shipping between the WMT and the outer boundary of Canada’s EEZ as part of the “designated project” under the CEAA 2012.¹

Request 2 and Request 3 relate to [decisions](#) made by the Board on 12 October 2018, which are associated with [Hearing Order MH-052-2018](#). The Board issued its [reasons](#) for these decisions on 29 October 2018.

Process determinations by the Board

Subsection 21(1) of the *National Energy Board Act* provides that the Board may review, vary or rescind any decision made by it. Part III of the *National Energy Board Rules of Practice and Procedure, 1995* (Rules) describe the procedures and grounds for a review.

It is within the Board’s discretion whether circumstances exist to warrant the use of the Board authority to review its decisions. The Board considers applications for review through a two-step process. In the first step, the Board considers the threshold question of whether the applicant has raised a doubt as to the correctness of the Board’s decision. If the Board decides to review the decision, it proceeds to the second step where it reviews the decision on its merits.

The Board has decided in this case to receive submissions on both the threshold question and the merits at the same time. This approach is consistent with subsection 45(2) of the Rules and, in the Board’s view, this is in keeping with the expedited nature of this hearing and may avoid some duplication of submissions. Given this procedure, TWN and Living Oceans/ Raincoast will

¹ Living Oceans/Raincoast made Requests 3a) and 3b) at Page 1 of its review application. At the conclusion of its review application, at Page 12, it repeated Request 3b) but not 3a). At Page 12, it also requested that the Board “require Trans Mountain to conduct a proper risk assessment of Project-related marine shipping that includes all *Species at Risk Act* (“SARA”)-listed species that may be affected by Project-related marine shipping.” Living Oceans/Raincoast made the same request in its notice of motion described above.

have an opportunity to file supplemental information in order to address the merits of their respective Requests.

The Board invites Parties to provide comments on both Step 1 (threshold question) and Step 2 (merits of the review application) of the review process for Request 2 and Request 3 in accordance with the following schedules.

Request 2a) and Request 3 – Project-related marine shipping in the EEZ

Party(ies) and submission	Deadline
TWN and Living Oceans/Raincoast may file supplemental information, if needed, since the Board is seeking comment on both Step 1 and Step 2	27 November 2018
All other intervenors may file comments	30 November 2018
Trans Mountain may file comments	4 December 2018
TWN and Living Oceans/Raincoast may file reply comments	6 December 2018

Requests 2b) and c) – *De novo* hearing, and the need for, and socio-economic effects of, the Project

Party(ies) and submission	Deadline
TWN may file supplemental information, if needed, since the Board is seeking comment on both Step 1 and Step 2	27 November 2018
All other intervenors may file comments	30 November 2018
Trans Mountain may file comments	4 December 2018
TWN may file reply comments	6 December 2018

C. General information

All comments must be filed with the Board and served on the other Parties by **3:00 pm Pacific time (4:00 pm Mountain time)** on the dates specified in the above schedules.

Parties must be clear regarding which specific Requests their comments are about. **Parties are directed to make a single filing for each of the deadlines.** For example, if an intervenor is commenting on more than one Request on 30 November 2018, it should include all comments in the same letter, but organize the comments in relation to each individual Request.

For any questions, please contact a Process Advisor by phone at 1-800-899-1265 (toll-free) or by email at TMX.ProcessHelp@neb-one.gc.ca.

Yours truly,

Attention: Natalia Churilova

Dear Ms. Churilova,

**Re: Trans Mountain Expansion Project – Reconsideration
Hearing Order MH-052-2018 & File OF-Fac-Oil-T260-2013-03 59
Oral Traditional Evidence**

We write to inform you that, despite the considerable effort of community members, the Stó:lō Collective will not be participating in the Oral Traditional Evidence session scheduled to take place on November 29, 2018 in Victoria, BC.

The Stó:lō Collective cannot participate in the Oral Traditional Evidence sessions for the reasons previously raised with the NEB in our letters of October 23 and 30, 2018 containing, respectively, the Stó:lō Collective's Notice of Intent to provide Oral Traditional Evidence, and the Stó:lō Collective's objections to the locations chosen for the Oral Traditional Evidence hearings and the limitations imposed thereon. In addition, in the Stó:lō Collective's original letter of comment dated October 3, 2018, we suggested that the process for the relaying of Indigenous traditional knowledge should be reflective of the specific cultural practices of the Indigenous group leading such evidence.

In our previous letters, the Stó:lō Collective expressed, among other things, concern and frustration over the locations chosen for the Oral Tradition Evidence sessions – Nanaimo and Victoria – as both are located on Vancouver Island and impose undue travel requirements on Elders. Our letters also explained that webcam sessions are an inappropriate, and frankly insensitive, substitute for traditional hearings conducted in person. Despite our numerous inquiries, the NEB did not provide an adequate reason for choosing two locations on Vancouver Island, nor did it agree to add a location in the lower mainland for its many Indigenous intervenors who are located on the mainland of British Columbia.

In addition to the issues with the locations chosen, the Stó:lō Collective advised the NEB that the date range chosen for the Oral Traditional Evidence sessions conflict with the Stó:lō Bighouse season. Consequently, many of the traditional knowledge holders are occupied with Bighouse duties and are providing spiritual and ceremonial support thereof. Accordingly, the Stó:lō Collective advised that these dates and locations might prevent their Elders from providing Oral Traditional Evidence entirely.

Further, the Stó:lō Collective's date to provide Oral Traditional Evidence – November 29, 2018 – is also the date reserved by the Province of British Columbia and the First Nations Leadership Council to hold the 4th annual BC Cabinet and First Nations Leaders' Gathering in Vancouver. Other Stó:lō Collective members who may have otherwise been able to attend the Oral Traditional Evidence session in Victoria, BC, will be occupied with the Leadership Gathering.

Rather than a process that is reflective of cultural practices, the NEB has structured a process which is unduly burdensome, unaccommodating and restrictive. For all of these reasons, the Stó:lō Collective is withdrawing from the upcoming Oral Traditional Evidence sessions, and maintains its objections previously stated.

Yours truly,

MILLER TITERLE LAW CORPORATION

Squamish Nation
Oral Traditional Evidence

--- Upon commencing at 12:31 p.m./L'audience débute à 12h31

3045. **THE CHAIRPERSON:** Before we commence our hearing today, the Board wishes to acknowledge with respect the Lekwungen-speaking people in whose traditional territory we are gathered, and the Songhees, the Esquimalt and the Saanich people whose historical relationships with the land continue to this day. It is with truth and respect we would like to acknowledge all the Indigenous ancestors of this place and reaffirm our relationship with one another.

3046. Good afternoon, everyone. Welcome to the Oral Traditional Evidence phase of the National Energy Board's hearing regarding the Trans Mountain Expansion Project Reconsideration. My name is Lyne Mercier. I am the Chair of the Panel. With me and on my left is Alison Scott and on my right is Murray Lytle. We want to welcome everyone who is here today, both in the hearing room, and those listening in to the webcast.

3047. As a matter of housekeeping, I'd like to describe the evacuation procedures in the event of an emergency. If the building's evacuation tone begins sounding and we are asked to leave the building, the muster point for the venue is the waterfront walkway. Please exit in an orderly fashion through the lobby. At the muster point, please ensure your party is accounted for.

3048. In addition to the Panel, we have staff in the room to answer process-related questions that you may have. You will be able to recognize them by their brass name tags.

3049. With respect to our schedule for hearing traditional evidence, today we have scheduled time to hear from two Indigenous groups. We will normally plan to take breaks if it is required.

3050. In order to be fair to all presenters we have allotted up to two hours to hear from you. If two hours are not enough, at the end of the session please feel free to file additional oral traditional evidence by electronic means, such as a video or some other method.

3051. Before we get underway, I would remind parties of the Panel's guidance in the Hearing Order and Procedural Directions in regards to oral traditional evidence.

3052. The Board understands that the Squamish First Nation has an oral

**Squamish Nation
Oral Traditional Evidence**

tradition for sharing knowledge from generation to generation and this information cannot always be adequately shared in writing.

3053. Sharing your traditional knowledge and stories about the use of your traditional territory is of value to us. We appreciate that you have chosen to be here today.
3054. Following oral traditional evidence, Trans Mountain, other intervenors, or the Board may have questions for the witnesses. If so, witnesses can choose whether they will answer questions orally, or at a later date in writing, or a combination of both.
3055. With that, I believe we are ready to get underway. Before I call onto the Squamish First Nation to present their evidence, I'd like to have the representatives of the Proponent, Trans Mountain, identify themselves.
3056. **MR. DUNCANSON:** Thank you, Madam Chair.
3057. Good afternoon, everyone. My name is Sander Duncanson with the law firm Osler, Hoskin, and Harcourt representing Trans Mountain. With me is Cassie Richards who is also from our office, and Max Nock with Trans Mountain. Good afternoon.
3058. **THE CHAIRPERSON:** And I would also ask if there are any other intervenors in the room who would like to introduce themselves or if there are any preliminary matters they would like to raise. And for the record, if you could please indicate who you are and who you are representing. Thank you.
3059. **MR. MURRAY:** Thank you, Madam Chair. Thank you, Panel Members.
3060. My name is David Murray and I'm a Senior Policy Advisor with Natural Resources Canada. I am here as a representative of the federal Crown to hear the witnesses' oral traditional evidence in relation to the reconsideration of the Trans Mountain Expansion Project.
3061. I do not intend to ask any questions today, but rather, I am here as a representative of several federal department and agencies that are registered intervenors.

**Squamish Nation
Oral Traditional Evidence**

3062. If necessary, we will ask additional questions through the NEB's Information Request process.
3063. Finally, I'd like to note that I'm honoured to be present at this hearing in traditional territory of the Coast Salish. Thank you.
3064. **THE CHAIRPERSON:** Thank you, Mr. Murray.
3065. Any other intervenors? I see no other intervenors or any preliminary matters.
3066. So I understand that the members of the Squamish First Nation wish to affirm to indicate that the information they are presenting is accurate, truthfully, and to the best of their knowledge and belief.
3067. Ms. Comte, can you please proceed?
- IAN CAMPBELL: Affirmed**
VANESSA CAMPBELL: Affirmed
CHRIS LEWIS: Affirmed
3068. **THE CHAIRPERSON:** With that, we are now underway, so I will turn to the lawyer, Mr. Arbeau, to lead his witness. You can use yours. It's just that mine was not turned off. So just give me a second, please.
3069. **MR. ARBEAU:** Thank you, Madam Chair.
3070. Good afternoon, Madam Chair, Panel Members, representatives of Trans Mountain, and Board staff.
3071. My name is Jamie Arbeau. I am legal counsel for the Squamish Nation. The Squamish Nation will have three witnesses presenting evidence today. Starting on the far end we have Chief Ian Campbell who is a councillor in the Squamish Nation. In the middle we have Vanessa Campbell who is a Squamish Nation elder. And sitting immediately to my right is Councillor Chief Lewis -- Councillor Chris Lewis, my apologies.
3072. The Squamish intends to proceed today by way of a relaxed, direct examination style. I'll be asking questions to kind of guide the witnesses through

their evidence.

3073. The witnesses are happy to answer questions in order to clarify their evidence, but any substantive matters, we would prefer to be answering in writing. And I just would note that Squamish Nation continues to rely on the evidence provided to the Board in October of 2014.

3074. Chief Campbell, welcome to the hearing. I believe you would like to acknowledge the ground that we're on?

--- ORAL PRESENTATION BY/REPRÉSENTATION ORALE PAR SQUAMISH FIRST NATION:

3075. **CHIEF IAN CAMPBELL:** (Speaking in Native language). I just wanted to say hello. And good afternoon. It's wonderful to be here. I appreciate this opportunity to speak on behalf of our Squamish Nation and certainly want to recognize my relatives from the Songhees, Esquimalt, and Saanich First Nations, whose territories we are on.

3076. My ancestral name is Sekyú. I am a hereditary chief of the Squamish Nation and I've been elected for four consecutive terms as an elected representative for the Squamish, along with my colleague Councillor Chris Lewis.

3077. And I'm very honoured to be here with my Aunty Iyal, who is one of our historians and our language experts.

3078. I've been fortunate to be raised by my grandparents with my language and my culture. Myself and my sister were immersed from a young age in the oral tradition of our people.

3079. And my late grandfather Chief Lawrence Baker was an orator in our longhouse ceremonies, so we visited all of our families along the Salish Sea, including the families here on Vancouver Island, as well as Puget Sound, Fraser Valley, the Lower Mainland, where we continue to practise our culture to this day. Our spiritual ceremonies have maintained in the face of adversity our authenticity to our ancient spiritual beliefs.

3080. I find it ironic -- and I have to make this on the record -- that we swear to tell the truth here when in fact we invited the NEB representatives to our longhouse to swear in this exact format. So I want to ensure that there's mutual

**Squamish Nation
Oral Traditional Evidence**

reciprocation in us swearing to share our sacred information with you that this will be used in the best of your ability; that you will weigh this and that you will take it to your heart and your minds.

3081. And that's something that I -- I had the privilege of presenting to the NEB in 2014 as an intervenor representing the Squamish Nation, and it was not clear as to how NEB representatives would take this information and use it. So that's something I'm still not clear on in sharing today.
3082. Nonetheless, I will make it very clear that there's some information we cannot tell you in this setting, because in our laws, in our teachings, much of the spiritual and cultural beliefs can only be demonstrated to you in context, which is in ceremony in our longhouses or out on the land, in our canoes, which becomes our place of governance. It becomes our church, our hospital, our place of economy. It continues to this today throughout the Salish Sea.
3083. And that's something I continue to invite you to take into consideration. Please join us in our communities and see firsthand what it is as a government, as a people, as a nation, that we continue to maintain to this day.
3084. In saying that, I am happy to share what I can with you today, along with my relatives from the Squamish Nation to talk about some of the cultural and spiritual beliefs that we hold near and dear to us.
3085. So as I mentioned, we continue our spiritual practices around the Salish Sea where our people are initiated in longhouse ceremonies, and they live in our longhouses for many months out of the year.
3086. I'm a speaker in our longhouses. I've been groomed from a young age to continue those traditions. So I travel to many different longhouses and speak on behalf of different families when they're hosting gatherings.
3087. And at these gatherings you will observe specific types of ceremonies that we cannot sing those songs here to you. They are not public songs. We cannot tell you those stories. They are in context in ceremony. But we have been immersed in these types of traditions from birth.
3088. And what is challenging in sharing this today is that there was a deliberate attempt by Canada to eradicate our entire language and way of life and culture stemming from B.C. joining Confederation in 1872, paired with the *Indian*

**Squamish Nation
Oral Traditional Evidence**

Act in 1876. It is quite blatant in the tactics used to try and annihilate the oral tradition of the Squamish people and the continuity of our use in spiritual practices throughout the Salish Sea.

3089. Alienation and marginalization is a reality in today's imposition of Canada issuing rights to third party interests that continues to affect our cultural and spiritual values and connection to our lands and resources.
3090. I was raised as a hunter and a fisher, and that's something I continue to do to this day is get out into our lands and our waters annually throughout the various seasons to continue our cultural and spiritual practices.
3091. So this morning, for example, I did go to our creeks, known as Xa7élcha, as one of our traditional creeks in north Vancouver, to conduct what we call *shopum*, which is a cleansing ceremony to go the water at daybreak and give thanks and to purify, strengthen our mind, our body, our spirit and our emotions to prepare ourselves for the responsibilities that we have.
3092. And I invite you to join me at the creek to purify yourselves, for the task that you have is not an easy one, and I want to commend you for the work.
3093. Speaking of spiritual connections, today we bring with us a strong mythological connection that we call (speaking in Native language), which goes back -- if you look at the mythology of our people, just like many cultures around the world, we have our creation stories that talk about the universe in darkness.
3094. We talk about (speaking in Native language), which refers to the spirit of raven, the seagull and the fox of daylight. The science community will call that the big bang theory, when the universe was created.
3095. We talk about our first ancestor stories, just as many cultures around the world.
3096. We talk about Si'nuscustan and (Native word), our first ancestors who appeared or were created with this physical realm. And we are the direct descendants of those people who have inhabited this part of the world for enumerable generations. Again science will try and define us as crossing some land bridge as a one-way door, which is not our story.
3097. We talk about the great mythological times when there were giant

**Squamish Nation
Oral Traditional Evidence**

beings that inhabited this part of the world. We don't believe in evolution, that all of the sudden the sabretooth tiger shrunk its fangs and became a cougar. We have stories that talk about relationship to all of the animal beings, both on land, and in the water, and in the sky.

3098. And those are spiritual and cultural foundations of our responsibilities as stewards of our lands and water, and it's built into our ceremonial structures as well as our governance structures. So as a hereditary chief we're raised to understand that respect and our responsibilities as a part of the ecosystem.
3099. Our mythology is important to continue to illustrate to you from the mythological times pre-glaciation.
3100. We also talk about our ancestral names, our lineages that connect us to our homelands through direct succession of lineage of ancestral names that are handed down from generation to generation. So you'll see big names in our territories like Xatslanexw, who some of you may recognize as Kitsilano, or (Native word), which some people may recognize as Capilano. These are anglicized ways of saying our ancestral family names. And with those names they connect us to specific stories of the ice ages.
3101. We then continue post-glaciation to an era, a universal story of the great flood, where we have sacred mountains in our territory that became the safe haven for our people, so Nch'Kay is known as Mount Garibaldi to the north of our territory, we have Sxeltskwu7, which is Ice Cap Peak in the western part of our territory and Xwsa7k, which is just to the south of us, southeast, which is known as Mount Baker.
3102. So these points of land become the stronghold of our Squamish people and our connection to the rest of our family, our kinship ties to other Coast Salish peoples, and that's something we maintain today, and it's verified through those stories that have been handed down through the millennia.
3103. If we go post-flood, which is a universal story all over the world -- I've been to about 36 countries now and many cultures talk about these chapters of change and transformation. We then transition into an era of what we call ta swa7s ts'its'ap, which would be an era of professionals that comprised our society prior to contact with European cultures in 1791 with Narváez followed by Vancouver in 1792.

**Squamish Nation
Oral Traditional Evidence**

3104. So prior to that arrival we had many leagues of professionals that had responsibility and stewardship to maintain a strong economy of trade and commerce, not only internally amongst the Squamish but through marriage and kinship ties to all other tribes around the Salish Sea.
3105. With that, you have the toolmakers, you have the *tchatwe* (ph), the canoe carvers, you have the *tl'elhnáyem*, the mountain goat hunters, the (Native word), the small fur bearing hunters and trappers, you have *nuxtlunts* (ph), the weavers, you have a multitude of specialists. And those specialists could not just go out into someone else's territory and do as they please to issue rights to third-party interests, if you will.
3106. There was protocols and there was special permission that was granted the authority of our (speaking in Native language), of our chiefs and our matriarchs. We're the ones who would grant, if you will, in today's context, permits and licensing and the ability to extract the value chains from extraction to manufacturing to implementation and trade and beyond. Our people were quite affluent prior to contact with European cultures.
3107. If you go to 1791 with Narváez where we discovered him in our waters, you'll see that that's a catalyst of change where new tools were introduced to our people and we readily embraced those tools, in particular, (speaking in Native language) which are steel products like guns, ammunition, the ability to move beyond stone, bone, and antler. In being some of the best natural carpenters in the world, we then implemented new tools.
3108. And that's where we fast forward today to Confederation as well as the *Indian Act*, 1876. We sent delegations to England in 1906 to implore the Crown to seek honour in the Crown in their alienation of our lands and resources and the deliberate attempt to usurp power from Indigenous peoples and allocate jurisdiction to the provincial and federal governments atop of our Aboriginal title.
3109. We were never -- we never provided consent or were compensated for the loss and alienation of our lands and resources and our tribes were dissected in half by the Canada-U.S. border during these formulative times of Canada and U.S.A.
3110. We weren't even citizens in our land until about 1960, I believe. We had no legal recourse to hold governments accountable to their actions, to develop and issue rights to third-party interests. But amongst all of this challenge, we

continued to maintain our spiritual context and connections.

3111. So at one point in time, simply in my grandparents' era, the (speaking in Native language) known as orcas would calve in what we call (speaking in Native language) which is known as Burrard Inlet, in particular, the elbow of Indian Arm and Burrard Inlet where the current Trans Mountain project is located on Burnaby Mountain. That was the traditional calving grounds of the orcas before the advent of much of the industrial activity in Burrard Inlet.
3112. Another prominent area would be (speaking in Native language) which is known as Thornborough Channel in (speaking in Native language) which is Howe Sound. These were two of the critical calving areas for orcas which we no longer see orcas calving in these areas due to acoustic and other impacts to their habitat.
3113. I want to bring you now briefly before I hand it over to our elder and my colleague to some of the practices that we go through in our rites of passage, what we call (speaking in Native language). We're immersed from a young age to watch, observe, and listen to our elders. So the information I'm going to share with you isn't my opinion; it isn't something that I am making up. It's stories that are handed down through my grandparents, and my grandfather was taught this by his grandmother Tsiyáliya who lived in the 1800s. Many of these old timers were very humble and very respectful in how they shared this information.
3114. They would bring us to the ocean, to the Salish Sea to bathe and purify ourselves in the salt water for specific purposes before we go on long canoe journeys or hunting. We would have to purify ourselves. And there's different ways in which we do that that are proprietary. We can't tell you all the details of how we get involved in some of those specific ceremonies but there are areas that we continue to do this, but it's been impeded. And we have grave concern over the projection of increased tanker traffic that will continue to impact and disrupt our cultural and spiritual values.
3115. We're in an era of reconciliation where we don't go to other people's churches and tell them what they can and cannot do or what to believe. But we still live in a society that will impose projects and alienation to First Nations people to marginalize and remove us from our cultural and spiritual practices. So places like (speaking in Native language) or down at (speaking in Native language) or (speaking in Native language), these are all issues that I presented back in 2014 on cultural and traditional uses of Burrard Inlet and connections to

the Salish Sea.

3116. I invite you to go back and review that once again, and I'd be happy to elaborate on any of that information or clarify or add to that information, because it's hard to share thousands of years of history with you in two hours although it is important to have you consider the information we're about to share.
3117. So I do invite you to return to our longhouses and to our communities so that we can immerse you properly and you can be called as a witness, you could be blanketed, you could be welcomed, and observe first hand what it is we would like to portray to you as our cultural and spiritual practices.
3118. Today, our people continue to go on tribal journeys. We have many of our young people, in fact, thousands of young people gather every year throughout the Salish Sea. We have a resurgence in canoe culture since 1993 where we paddled to Heiltsuk territory, known as Bella Bella, Central Coast, B.C. Last year we paddled to Puyallup which is in Puget Sound where we had 110 canoes congregate from Oregon, California, Washington State, and B.C. as far as Alaska.
3119. And about 10,000 Indigenous youth gathered where we're seeing a resurgence in traditional culture where it was once forbidden for us to practise these traditions. I'm the first generation out of residential schools in my family, so my parents weren't allowed to speak their language in residential schools or practise their culture. It was even tougher for my grandparents who were sent to Sechelt and Kamloops and Mission to the residential schools where it was strictly forbidden for them to practise their culture or to speak their language. But our young people today are hungry and they're reaching out to our elders like Iyal to be immersed and to be mentored in our traditions.
3120. We also are practising rites of passage for our young people. Our young women go through specific ceremonies when their body goes through changes and they're bestowed an ancestral name. Our young men are put through rigorous training where they're in isolation. They fast, they do solos. That's just something we do with our children today. I was fortunate to experience those things. And we also do a number of cultural camps where we share the mythology and the songs and the dances and the traditions.
3121. I do want to describe the ceremonies more to you but refrain from that because I have to adhere to my elders' teachings that it's inappropriate for us to try

**Squamish Nation
Oral Traditional Evidence**

and simply tell you these without context of showing you. So I hesitate and I apologize for that.

3122. But I think at this point I'm happy to look to my (speaking in Native language), to my Auntie Iyal to share with us a little bit more about the language and the culture around our connection to the marine life. And I would ask her to speak a little bit more about (speaking in Native language) which is a term I introduced to you earlier in my remarks that talks about our ability to converse with all beings, that in our spiritual beliefs, we look to the (speaking in Native language) or any of the animal beings in a spiritual context. They take their skins off and were in our spirit form and we can (speaking in Native language), we understand, we could talk to each other. And these are ancient teachings. And then when we see them in the physical realm, we then have reverence and we have a connection, a spiritual connection to these beings, so the orca, the wolf, the mountain goat, all of the beings to the eagle all have stories of transformation that inform us of our relationship to them.

3123. And we have a concern over the salmon, which I'm going to invite Councillor Lewis to talk and to speak a little bit more about the connection to Sts'úłwí7 and our laws and our teachings around salmon and the grave concerns we have over the current state of our salmon stocks on the mighty Fraser River and our other systems. We can spend all day telling you stories, and I would love to, but I'm going to pass it on at this time.

3124. So thank you very much.

3125. **MR. ARBEAU:** Ms. Campbell, would you like to take up Chief Campbell's invitation?

3126. **ELDER VANESSA CAMPBELL:** (Speaking in Native language).

3127. I just wanted to say it is good to be here with you today, to know that you understand and value the kind of information that you're asking for. In the past it's never been asked. There's lots of times when things have been taken and we've been told, "Oh, this is for the good of everyone." But it's never been good for us. So it's time we have to say we know our land, we know the creatures that we share our life with. You know these creatures too.

3128. There are people all over the world who are saying this is a time when you can do something so that the world that we inherited does not disintegrate

into darkness, and cold, and disaster.

3129. I want to share with you. (Speaking in Native language).
3130. In the long ago it is said everyone that walked this earth, that swam in the waters, and that flew in the sky, we understood one another, we talked to one another, we learned from one another. This is the way all of our stories began. This is the first understanding that we give our children, that we are only here to share the earth; we don't own it. We are here to take care of each other, to take care of them. It's not some kind of cliché.
3131. This is the role that we take when we are part of a community, when we are a parent, when we are an aunt and uncle, when we are grandparents. We are here to make sure there's something for the future.
3132. What are the ways we can do these things? Those are the things we're starting to understand now. We're not alone in this. We know that it's true.
3133. I know that there are concepts that seem strange or fantastic. For sure there are years and years when, in a very public way, we were never allowed to share, to teach, to celebrate the kind of world view that our elders learned at their parents' and grandparents' knees. These are the things now that we are starting to be able to share more openly, but still we hesitate. We don't want to be ridiculed, as we have been in the past. We don't want to be brushed aside and dismissed because we have no scientific proof. But we know and understand that all the creatures around us can tell us about our lives all the time.
3134. When I was young, the beaches all along Burrard Inlet, there were mussels, and clams, and oysters. One of the very famous incantations for our people was, "The tide is out, the table is set."
3135. Now, we know that food comes from everywhere around the world and we can think, "Oh, okay. We can get that -- it can come in from such and such a place." How many places are going to stay healthy like that if we don't stop doing the things that we have done that have made us unable to get the food that we need right from where we are? What are the steps we can take to make sure that we can do that?
3136. I would love to be able to just go down to the beach again, but now I have to go further and further away to find the healthy food, the healthy food that

**Squamish Nation
Oral Traditional Evidence**

- my body absorbs. If I have salmon, if I have clam, if I have any kind of game, my body takes it right away. But the food that I buy in the stores, it will sit inside my body and it takes a long time for my body to use it.
3137. These are the big changes that we've seen in our lives, in the way that our bodies are reacting to the things around us. So yes, we still try to teach our children these same values, to look at every creature with respect. Even if we're going to have an animal that we need for food, we say a prayer that tells that animal, that spirit of that animal, that we really appreciate who you are, we really appreciate that you can give us life, that we can share life with you. These seem like it's a very small gesture, but it has a great big meaning in our life, because it teaches our children to respect everything around them.
3138. I know that a lot of places in the world now are dealing with the same kinds of struggles that we're talking about here. But as an elder in my community, as leaders in our community, as leaders in your community that you are, you have to think about what is best, not what is going to be expedient.
3139. So I'm asking you to think about the things that we're saying, because they are heartfelt. We don't want our whole world to disappear. (Speaking in Native language).
3140. **MR. ARBEAU:** Thank you, Ms. Campbell.
3141. Councillor Lewis, I'd ask you to speak a little bit about Squamish's interaction with the marine life; you could even focus on the mouth of the Fraser, that could be useful as well.
3142. **MR. CHRIS LEWIS:** Okay.
3143. **MR. ARBEAU:** Thank you.
3144. **MR. CHRIS LEWIS:** Thank you, Jamie.
3145. And I just really want to thank everyone in the room.
3146. (Speaking in Native language). Just opening in our language saying it's great to see each and everyone of you today.
3147. My ancestral name, as I mentioned, is Syetáxtn. That name has been

**Squamish Nation
Oral Traditional Evidence**

- given to me by my grandparents, who raised me in X̱wemelch'stn, which is now known as Capilano IR Number 5, which is at the First Narrows, underneath the Lions Gate Bridge.
3148. So I was raised there from birth until I was a young man. And then I moved a block away. And then I moved a couple blocks away. And I'm still there. So I'm still very connected to my community.
3149. Everything we do as Skwxwú7mesh people is based in place. Our songs, our teachings, our ancestral names tell us of who we are and where we come from. My name is directly linked to Seṇák̓w, which is now known as Kitsilano underneath the Burrard Street Bridge. My ancestors have descended from there for time immemorial. The name also was first recorded in a village known as Chuck Chucks (ph), which is way up in the -- just before the confluence of the Elaho and Squamish River. It was recorded there and it was recorded in Seṇák̓w.
3150. The reason I tell you this is our people were seasonal people. We moved as a result of our kinship and our relationship with the resources.
3151. And I also want to recognize and thank the Songhees, the Esquimalt, and Saanich people for allowing us on their traditional territory to say these words. We are humbled. We are visitors. And we respect their hospitality at this time.
3152. As was mentioned by Xàlek and Iyal, that what we say has been passed down, or we have observed it ourselves in our lifetime.
3153. As was mentioned by Madam Chair, it is oral tradition that has been passed down from our grandparents.
3154. I think before I get to our relationship with the Salmon People, I do want to talk to you about a place called (Native word) which is in Stanley Park, which is up the hill from what we now know is Siwash Rock. It is a place where a woman was transformed while she was giving birth because her husband, who is now Siwash Rock was bathing himself to cleanse himself so that when his baby got into the world, he was just as pure as the baby and none of the negativity would go on to that child.
3155. At the same time, our supernatural links to the Creator, I guess you

**Squamish Nation
Oral Traditional Evidence**

- would say -- we call them the transformers, the (speaking in Native language), they were paddling in the water at the time and they told the man and the woman to make way while they were passing. And they defied them. And they turned them into stone, not as a punishment, but as a reward and a reminder to all the Sk̓wx̓wú7mesh people and the Coast Salish people of the responsibilities that we have as parents but also the responsibilities we have as Indigenous peoples to the connection to the supernatural realm and to the physical realm and all the realms that we know through our traditions.
3156. (Native word) was also known as a place where we would use it as a vantage point to harvest whales. And that's all that was told from us, that we would harpoon whales in the narrows. And we haven't done that for many, many, many generations but our teachings tell us that. And there's a teaching where the story of another chief up the inlet transformed a piece of wood into a whale. He breathed life into that whale. And the men harpooned the whale in the first narrows which we now know as Lions Gate or near Lions Gate Bridge or (speaking in Native language) to the Sk̓wx̓wú7mesh. And that imitation whale dragged our hunters, our whale hunters out, way out into the ocean and it took them a long time to get back.
3157. It was a teaching that we must not be greedy. We must let the whales do what they must do. And the story is that it was most likely porpoise and there was reference to the (Native word) which is the killer whales.
3158. The reason I mention this is because (Native word) which is the village on the north side and (Native word) is on the south side, and (Native word) which is the high bank where now Lions Gate Bridge comes on the south side, were strategic vantage points. (Native word) was a fortified village for a specific reason. It would keep outsiders out. And outsiders knew that if they didn't follow protocol, there would be troubles.
3159. The reason I say all of this is that connection to that place and to those narrows. (Native word) means "rolling at the mouth with fish". It's a testament to the tidal rollers that you see when you look over the Lions Gate Bridge and you see those big rollers, if you've ever been in a boat. And it's rolling with fish. And so no wonder why the whales were there because the fish were there.
3160. And I tell you this because my grandfather, along with my uncles and myself have observed transient killer whales, resident killer whales, training their young in the narrows where they line up side by side in the narrows as the tide

**Squamish Nation
Oral Traditional Evidence**

- comes out of Burrard Inlet. And everything is draining out of the inlet and the (Native word) are -- they're like a firing line almost. And you can see their dorsal fins. And if they're residents, how we know if they're residents is they start flipping the fish around. You start seeing the fish flipping around. And they're teaching their young how to hunt and how to catch the fish.
3161. If they're transients, you will see the fish jump by them and then you will see the harbour seals flipping in the air because the transients will eat the harbour seals.
3162. I was at the mouth of Xwmelchstn River which is Capilano River and we have a point there and we were fishing. And I witnessed this with my uncle. And I didn't know what was happening and my uncle is one of our fisheries guardians, so from June til October he sits down on that point and on that river for seven to eight hours a day ensuring that he's upholding our fishing rights and ensuring that people are respecting our people fishing at that time. He's one of our guardians.
3163. And he told me, "Nephew, those are residents. Those are the ones that eat the chinook." Because you can see the fish. And then he told me the story of when he witnessed the same thing with the transients. And then he would tell me the story that my grandfather told him and also myself about how we would use the high ground and (Native word) to harvest various different resources at the narrows.
3164. So that connection to that way of life is still alive and well and has been passed down. I'm not that old. I don't have any white hair. And I've been fortunate to hear those stories and I will be passing those on to my -- and I hope my kids see the (Native word) hunting and teaching their little ones how to hunt the seals or hunt the fish in the narrows at Xwmelchstn.
3165. *Sts'úkwí7* which is our word for salmon is a keystone species to the *Sḵw̓xwú7mesh* people. Everything we do from the time they arrive to the time they spawn is in relations to harvesting salmon. We have many stories from many elders where we would leave a village and travel to the Fraser River to harvest Sockeye, to harvest chinook, to harvest eulachon, to harvest smelts. We would go to a village we know as (Native word) which is now known as the Pattulo Bridge. We had a village on the north side. We were forcibly removed from the north side because New Westminster became the capital of British Columbia. And under the *Oliver Act*, there couldn't be any Indians close to a non-

**Squamish Nation
Oral Traditional Evidence**

Indian settlement. So they moved us across the river and created a reserve.

3166. In the meantime, they tore down any of our structures, killed any of our cattle, anything that we had.
3167. Our people and our ancestors are still buried on that hill. They are still in what we now know as Queen's Park. And our elders tell us -- they tell me that as one of the fisheries portfolio holders for Chief and Council, for Council of the Squamish Nation, never to forget that. And that village of (Native word) was an interaction place. We were there with our relatives, the Musqueam, the Tsleil-Waututh, the Kwikwetlem, our Stó:lō relatives up the river. We got to think of a time 200 years ago where what we now know as Richmond was probably all river mud. We have to think differently in terms of what the land looked like, and hence, why we would go upriver where the river narrowed to harvest *Sts'úkwí7*, salmon.
3168. Our teachings and our relations to the salmon people -- we call them the people because they occupy the underwater realm -- is if we don't treat them with the utmost respect, they will not come back. And we have many origin stories and many stories of the (Native word), the transformers going to find the salmon people and bringing them back because we wanted them to pity us because we've lost our way.
3169. So there's stories like that, origin stories that tell us that we must treat the salmon people with the utmost respect or they just won't return. And we have many stories where we've starved because the salmon didn't come back.
3170. The chinook, to us, the chinook salmon is the (Native word) of the salmon people. He is the chief. We must respect the chinook salmon. We must only carry the chinook salmon one at a time. We must not carry many. We must respect because that's like their chief.
3171. We also harvested smelts, herring, eulachon, skate, dogfish, sturgeon, rockfish, shellfish, trout, steelhead, seal, sea lion, and porpoise. So our connection to the underwater realm was very important to the *Skwxwú7mesh*.
3172. Our teachings tell us that when you go fishing you can't eat too much because a full fisherman doesn't deserve a fish. So you can't go out there with a full stomach. You've got to be a little bit hungry because you'll fish a little harder, regardless of what you're fishing for.

3173. It also tells us that if we're transporting something of significance, such as a person who has passed on, or something of significance to the people, we must cover our paddles with red ochre, because the paddles will go into the underwater realm and stir up the water and the currents. And we must respect that, and respect that whatever's in that canoe cannot enter that underwater realm and that we have to -- we have to tell them that we're here, not having any harm.
3174. So we have teachings where our ancestors were being transported from a village, after they had passed away, to another village, and we would have our Skwta'a7ts, our ritualistic, our medicine people on the canoes telling the salmon to move out of the way because we were coming.
3175. It's no different today about our responsibility in relations to this project, and what's in the big canoe -- we see big canoes all the time now, not our little wooden canoes -- and how we show the underwater people that respect of whatever's in that canoe. And our Elders will remind us as leaders that we're falling out of line our traditional ways.
3176. I'll bring you into a modern context now. As I mentioned we have fisheries guardians on the Capilano River from June to November, 24 hours a day, seven days a week because we have our own fisheries bylaw that controls the fishery at the mouth of the Capilano River. And we own both sides of the bank, so Department of Fisheries and Oceans has no jurisdiction there. We control it through our guardians and we ensure that our people have access to that resource, where it was a generation or two ago we had no access to that resource on the Capilano because we were forbidden to fish on that river.
3177. So our guardians are there ensuring that our young children have the ability to learn how to harvest the fish and how to respect the fish. And that teaching that I just mentioned to all of you in those stories get passed down on that river.
3178. So just imagine yourselves; if the salmon did not return, the stories would not be told because there's no salmon. So that connection to the salmon and the Squamish People is very significant.
3179. We continue to fight and lobby the Department of Fisheries and Oceans for our rightful place on the Fraser River to harvest the sockeye and the other resources there. We continue to work with our relatives, the ha-Musqueam

**Squamish Nation
Oral Traditional Evidence**

and the Stó:lō Nations, to ensure that governments aren't putting us against one another, because then nothing happens and no-one fishes.

3180. So I think that's all I have to say at this time. (Speaking in Native language); those are my words and that's the way it is. O siem.

3181. **MR. ARBEAU:** Thank you, Councillor Lewis.

3182. Councillor Campbell, did you have something to add to that?

3183. **CHIEF IAN CAMPBELL:** Sure.

3184. **MR. ARBEAU:** Thank you.

3185. **CHIEF IAN CAMPBELL:** (Speaking in Native language).
Thanking my relatives once again for their generosity in sharing.

3186. I just wanted to add a few more comments about our relationship to the natural world. One of the things that challenges us in presenting again today is cumulative impact throughout our territory. We've seen the loss and degradation of habitat, critical habitat, and the decline in resources due to Western management structures.

3187. Upon arrival with European cultures, there was a succession of gold rush mentality where you had the gold rush influx of settlers coming in, staking and claiming lands that belonged to the Squamish People and our Coast Salish kinship.

3188. You then have the fur trade, which was decimated in the west coast here by 1841. Paired with deforestation, that made a lot of settlers very affluent by stripping our most valuable forests, the old-growth forests, of the timbers that we use for our post-and-beam timber frame houses, known as longhouses, as well as our seven different makes and models of canoes; our hot rods and limousines that we used on the coast here.

3189. You then have, following the deforestation, the commercial salmon fishery that seen its heyday come and go, where the state today is very much in peril of the chinooks that my colleague spoke of, and the other aquatic resources.

3190. We have laws that he spoke of that are connected to our lineages and

**Squamish Nation
Oral Traditional Evidence**

our place names and the territory. We have our Elders who have recently passed on that remember their grandparents would catch a salmon and they would look at its nose, they would look at its scales, and they could tell which system that salmon came from. They had an intimate relationship that has largely come and gone because much of the streams around our territory have been culverted in Vancouver or the lower mainland, or impacted through forestry and other industrial practices.

3191. When you go beyond the salmon fishing heyday and the collapse of the salmon fishery due to Western management practices, you then have oil, gas, and mining, which represents another succession of a gold rush mentality to access our resources outside of treaty, atop of our Aboriginal rights and title, where the legitimacy of the Crown is at question to issue rights to third-party interests atop of our Aboriginal rights and title, where we did not cede or surrender our title, our jurisdiction, and our authority to our homelands and waters.
3192. And you see it now with the real estate crisis, the affordability issue, not only in a major urban centre like Vancouver and the lower mainland, but it is that influx that continues to pose a significant threat, not only to Squamish people but you see the symptoms of that management system with the state of our orcas that are in danger. They're in peril.
3193. As mentioned in my previous statements we know where they used to calve, the orcas. We know where the octopus rearing is. We know where there used to be eelgrass and kelp; they're no longer there. My auntie said -- referred to Western science but our traditional knowledge is traditional science, it's Indigenous science built into our vocabulary. Where Western management has removed cultural and spiritual language from their Western management practices, we maintain that cultural and spiritual value built in and instilled in our lineages and in our Western -- or in our management practices.
3194. So we see the scarcity of resources that continues to be a demand with over 7 billion people globally, increasing -- projected to increase by 2100. We recognize the demand on our lands and resources but we need to move beyond the old narrative in Canada that tried to alienate us and marginalize us from decision-making, so we've continued to advocate for a framework that would look to share decision-making, economic participation, and environmental stewardship that takes what we're saying to you into practice.

**Squamish Nation
Oral Traditional Evidence**

3195. That's something I don't feel assured of in sharing this with you today, that this is going to lead towards that kind of transformation and change collectively. So I remain optimistic, but nonetheless, the recent past will demonstrate that Canada will not listen to our traditional spiritual information, and I'm curious how you will weigh this, if at all; what this will mean to your decision-making.
3196. So, again, advocating for an improved relationship, because the state of the orca is a symptom of Western management practices. The state of the salmon is a symptom of colonial Western practices. The state of our Squamish Nation language and our culture is a symptom of colonialism and Western cultural practices that imposed regimes that were adversarial and detrimental to our entire way of life.
3197. The health indicators of our families as Indigenous people that my auntie spoke of; traditional foods versus Western foods have had a detrimental impact on our families' firsthand, diabetes in our families, and other health indicators.
3198. We would love to share with you places that are sacred to us in our territory, like Temtemixwtn, which is a portal into the spirit realm that connects us to a multitude of other realms of existence. I alluded to that briefly in the term "clayqustoi," the ability to converse in our spiritual context. There are a few portals in our territory that we believe very sacred but we've never disclosed those publicly.
3199. Our children are our future, and when we were paddling a couple summers ago, we did have a pod of orcas come underneath our canoes, which was a huge celebration for our young people to see the black and white just under the surface come right under our canoes. We considered that a blessing. It inspired our young people to find that connection and that awe-inspiring wonder that young people have to the natural world was invigorated.
3200. We also know from experience that when one of our prominent matriarchs or chiefs passes away, oftentimes the orcas will come into the village, such as in Burrard Inlet, and their presence shows us that there is a guardian spirit, that they will take our loved ones through those portals and transform them to continue their journey as a spiritual being.
3201. It's important for you to recognize that also what we're sharing isn't in

**Squamish Nation
Oral Traditional Evidence**

- a museum, that it's a living culture; that we're not capsuled in time that tradition is 200 years ago, tradition is today. What we do today will someday be traditional. So it's a continuity of tradition.
3202. We're not an assimilated people, although there was an attempt under the guise of assimilation in Canada. We're not assimilated. We adapt.
3203. My colleague spoke of herring and eulachons and we're experiencing revitalization of herring biomass in At'kats'hm (phonetic) and Tokno'its (phonetic), known as Howe Sound. After decades of absence we're seeing the revitalization that has brought back orcas, resident porpoise, minke, greys, humpbacks.
3204. Moving towards Xay Temíxw, our land use planning exercises, our marine use planning exercises, we're not asking other levels of government permission for us to engage in those activities. We're mobilizing our members within our nation to look at our visioning on what's important to us and what we can protect, but also what areas are open and conducive for development and our participation in economic activity.
3205. So we're not adversarial to development it just has to meet our metrics, and we have metrics that have been instilled and practiced for thousands of years.
3206. There's areas like Papiak, in what is now Stanley Park, that were our octopus hunting grounds. I love octopus -- eating octopus. I can only typically eat it in sushi restaurants now. But it would be nice to harvest seafood from our own homelands and waters but the contamination is pretty severe in the seals and sea lions in the fats, where we rely on other First Nations for access to traditional foods.
3207. There's another term that came to my mind listening to my relatives in our language called eshelhekwiws. My late grandfather talked about this as having great love for one another, but he also referred to it as our connections to all of creation so that eshelhekwiws recognizes all the other beings as our family because of our old, old stories of transformation and connection.
3208. And another term my grandfather shared with me and my sister growing up was exex'eiek, which he said is very hard to translate. It's kind of like the Creator or creation. That we're all a part of that exex'eiek, that breath of

**Squamish Nation
Oral Traditional Evidence**

- life, that energy that flows through all things in the universe that is sacred to us.
3209. That is what we represent through song, through dance, through ceremony, regalia, initiation ceremonies where you walk that life to honour your connections to creation.
3210. Our history is your history. We've been invisible in our own land for far too long, where the average person living, working, playing in our territory has no clue of whose lands they're on. They have no clue of who our heroes are, who our -- what our prominent mythology is that we shared insights with you today. Mountains transformed. Animals transformed. Places that are sacred to us. We would love to share that, but it has been systemically denied under Canadian oppressive legislation.
3211. There's areas like Nch'Kay that I spoke of earlier, Mount Garibaldi. That produced some of the best glassy obsidian on the west coast, next to Oregon. And the obsidians were traded far and wide. If you look at the tools that are in museums all over the world and you fingerprint them you'll see that a lot of the sources come from the outflows of some of our volcanoes in our territory which created a very strong economy where canoe-loads of obsidian would be traded across to these areas on Vancouver Island and throughout the Salish Sea Basin.
3212. So I implore you around the accountability of decision-making that we're simply relay runners, you know, we're really speaking on behalf of our future generations. And that loss of habitat, from our perspective, has been very detrimental to the continuity of our language and culture.
3213. So some terms in our language are associated with specific activities. Those activities have become obsolete because of marginalization or alienation. So we look to experts like my auntie to remember those old terms and revitalize them.
3214. So you see a lot of our young people getting back out onto the land and water to harvest and collect, but it means so much more to them when they can speak in their own language and understand that they are the direct embodiment of our ancestors.
3215. I think I'm going to leave it at that, that we're simply not a vanished race. That we are -- but we are invisible in our own lands. So these oral presentations, this would never be an option for my parents or my grandparents.

**Squamish Nation
Oral Traditional Evidence**

And I welcome it that it is -- we are evolving as a society and maturing as a society to at least engage in dialogue with each other to delve into deeper understandings of one another. That it's not just about us swearing to you that we pledge to tell the truth but we expect you to also afford us the same respect.

3216. And, again, I invite you to our longhouses to witness firsthand the way we really live rather than us trying to describe to you in English what it means to be Squamish and the responsibilities that we carry.

3217. We do want to be a part of Canada but this has been a very challenging exercise when we see the guise of national interest imposed upon Squamish Nation, where we've heard that before. And that's why I cited gold rush, fur trade, salmon, deforestation, oil, gas and mining, real estate; it's all under the guise of national interest. That it meets the quality of life for you as Canadians, and Canadians are quite complacent on these matters, when Indigenous people still live in abject poverty, and that's unacceptable in this day and age.

3218. So this project and these oral submissions are directly related to that broader context of relationship and 150 years of systemic oppression. We can do better. Canadians deserve better. Our children deserve better. So that's why I'm here to share with you a small little piece of what it means to be Squamish.

3219. Again I'd love to keep going on and on to actually tell you stories, but I'm going to open it up at this time if you have questions or comments.

3220. Thank you.

3221. **MR. ARBEAU:** Thank you, Chief Campbell.

3222. If the Board has any questions or points of clarification?

3223. **THE CHAIRPERSON:** Mr. Duncanson, you have a question clarification?

3224. **MR. DUNCANSON:** If I could just confer for one minute, please, Madam Chair?

--- (A short pause/Courte pause)

3225. **MR. DUNCANSON:** So we don't have any questions. But on behalf

**Squamish Nation
Oral Traditional Evidence**

of Trans Mountain, I'd like to thank each of you for coming and sharing your knowledge and perspectives.

3226. **THE CHAIRPERSON:** Member Murray?

3227. **MEMBER LYTLE:** Thank you, Madam Chair.

3228. And thank you, panel, for a very articulate and heartfelt rendering of your culture.

3229. I've heard a number of times over the past couple of days the concept of worldview. And it's a term that I've dedicated a lot of my life to studying. So my question is really whether, when Indigenous people use the concept of worldview, are they using that as sort of a bridging term, or does that concept come out of your culture? And if so, how do you see it coming out? How do you use it within your culture, and how do you use it for bridging across cultures?

3230. **CHIEF IAN CAMPBELL:** Yeah, thank you for your question.

3231. In my experience, it's a relatively new vocabulary for us. Growing up I never heard my Elders use the term worldview. They simply told us stories, exemplified the cultural practices, whether it was hunting, or fishing, or spiritual endeavors out on the land and in the water, canoeing, going to longhouses. It was often solely in our language, in Skwxwú7mesh snichim, the Squamish language, which is a dialect of the Coast Salish language family.

3232. The never explicitly said, "This is our worldview." I think that's a relatively new term. But we certainly embrace, in context to articulate to the broader community, our worldview, that why I started off with the universe and darkness, for example, is something we hear from cultures all over the world. So it's something we can readily identify in one another. The science community will call that the Big Bang theory.

3233. So we start from there and we sort of continue with the many chapters of change and transformation leading to modern present times and our aspirations for where we want to go in consideration of the information before us.

3234. So I think that, you know, I hope that we can mature as a society and start to embrace; again, my closing statement said our history is your history. For far too long the average Canadian did not have access to this information, or it

Squamish Nation
Oral Traditional Evidence

was systemically denied. And I think today is an exciting opportunity to utilize modern smoke signals through the Internet and live streaming, so that any and everyone can hear these stories and understand that this is told through the Squamish lens, but it's a story of humanity.

3235. It's a story of us moving forward in the face of adversity; we survive, we adapt, we pick up the best tools available to us and we ultimately pass that baton to the next generation to continue to invigorate culture. That culture is never stagnant, that we must continue to draw upon our rich history and past, but we want to celebrate that with all Canadians. And that's something that has never been achieved to date.

3236. **MEMBER LYTLE:** I think I'm going to give you a bit of a podium here with my next question.

3237. That is, how important is your language to your culture/worldview? I think I heard some of that already, but I'd like to hear you go into a little bit more detail.

3238. And I was encouraged when you said that there's a growing resurgence, I think was the term you used, of interest by young people in the language. And we haven't heard that from all the other groups that we've been talking to. So I would really like to hear more about that and why you think that is. And perhaps some of things, perhaps, that you've done that others may want to think about doing as well.

3239. **ELDER VANESSA CAMPBELL:** (Speaking in Native language).

3240. Just letting you know that the language is the way our Elders convey to us their understanding of our world, for us to have an understanding of how they see the world, how they saw the world, so that we can hand that down. We can see it through the way they used our language.

3241. Every language has terms that are distinct because it's related to where that language came from. And so I know that in our lifetime, say, when I was a young child, and I would hear my Elders talk to each other in our language, but they weren't encouraging me to learn, they weren't encouraging people -- people didn't speak our language in public because it was penalized, because it was considered primitive or something. But when you come to learn our language and understand all the things it says about who we are and how we saw things, you

realize that that was false.

3242. Every human community or society has a complex relationship with their environment. And understanding it and sharing it and teaching other people about it, including your own family and future generations, comes through that language.
3243. In our lifetime, we have seen our language become free again. I can go on a bus now and young people that are learning our language; we talk to each other in our language. And right away people understand that it's something they've never heard before and they're very interested. And that really encourages our children to say, "Yes, this is important to who we are."
3244. So this is the work we've been doing. Both the young men here were people who learned our language and are still learning. And we have many young people now who are doing the same, building a positive connection, another positive connection in our community through the language.
3245. So something that was very negative, that was -- you could be beaten for speaking the language, you could be denied work, you could be shamed, all these things no longer apply. And it's become a very positive way to be who we are to each other.
3246. **MR. CHRIS LEWIS:** Thank you for the question. I'll tie it in a little bit to worldview just because I had some thoughts around that, and then I'll connect it back to language a little bit.
3247. As I mentioned in my opening statement, our worldview is very much place-based. And our place names, as you heard throughout our presentation here, tell us about who we are and where we come from, but also how to conduct ourselves in certain places. It connects to the worldview that we explain things in a spiritual sense. So if something goes wrong, for an example, something happens, our Elders will put it in a spiritual context and they'll relate it back to a story, either an origin story or a story of a place, where they say we weren't following the rules, we weren't following the teachings that were passed down to us.
3248. A prime example is in the story I mentioned where the Kai's (phonetic) went out to the Salmon People and found them and brought them back. The teaching that came back was that when we finish the salmon, we must bring

**Squamish Nation
Oral Traditional Evidence**

- the carcass back to the water and place it in the river or the ocean. And we must not leave one bone behind because in our -- in the story, it talks about a reincarnation of the salmon. And if you do that, the salmon will come back in four years. It will come back. It will reincarnate.
3249. And so there's always been that teaching where it's just like, "What do I do with my bones," you know? I used to ask my grandfather that all the time. He goes, "Just bring it to the river and throw it in the river." And I would ask him why and he would tell me that story.
3250. As I got older, I kind of said, "We're just nutrient loading the river, Grandfather," when I started figuring it out. And he goes, "Yeah, that's what the scientists say," right? And he goes, "But we've been doing it since the beginning of time because if we don't do it, the salmon won't come back." And then he said, "We're nutrient loading because when those little ones hatch from the eggs, they will eat their parents. So we get to eat, they get to eat, everyone gets to eat and we have a balanced ecosystem."
3251. He wouldn't say "ecosystem"; he would use some other word, but I'm just trying to put it in a modern context here.
3252. So when things go wrong, our elders will say, "You didn't follow the way." And we have many chapters of change throughout our history. As Xàlek mentioned -- sekyú Siyam, that there's floods, famine, starvations, ice ages. Our people have reasons why that happened. They'll tell us we were out of balance with the natural rhythm of the land.
3253. And one of the questions I always have with my Elders is, I said, "There's this -- it's kind of like the wave. It's kind of like the tidal waters at Xwmelchstn that you're rolling." Our life and our history is kind of like this. So sometimes we're in times of prosperity and sometimes we're in recession and depression and then we kind of come up. Our stories have many chapters of change like that.
3254. As leaders, we tend to ask our Elders, "Where are we on that wave," I guess you would call it. Some would say, "We're on our way up," hence the language revitalization.
3255. The scary part about language revitalization and that it's happening is that a part of the language revitalization requires you to be out on the lands and

**Squamish Nation
Oral Traditional Evidence**

- the waters to teach the person. So, hence, I mentioned that we used to harvest porpoise; we used to do -- harvest seals, sea lions, all those types of things. Those things do not happen any more. We don't see that actively happening in Burrard Inlet or within our Coast Salish waters. We have to go somewhere else to do it or rely on someone else or go to someone else's -- up north or somewhere to go and do that.
3256. What happens is a whole segment of the language gets lost because you're no longer using those words. What is the Skwxwú7mesh word to cut open a seal, you know? If we're not doing it, it's not getting transmitted. The Elders have a harder time remembering that word because they're not doing it.
3257. So, hence, it's very -- language and cultural revitalization is, very -- again, place-based, it's very activity based, and if we're not doing those activities it's very hard to retain those languages because the Elders will say, "I did that once when I was a really young child, but I might not remember the word." But I bet if you put a seal in front of them or a porpoise or a salmon or a herring or an eulachon and they start doing it with their hands, the language would just come out of them because it's very much activity based.
3258. So I just wanted to add that context in terms of that worldview aspects. So when things go wrong our people in our community will tell us we are out of line with those teachings and the spiritual realm.
3259. So thank you.
3260. **MEMBER LYTLE:** Sorry; I was going to thank you.
3261. **CHIEF IAN CAMPBELL:** Getting us fired up now. So I just wanted to add a little bit to what my colleagues have said.
3262. Thank you for your questions. My grandmother is 89 and she grew up in Steveston. And they were very much on the water her whole life. And she talks about the blatant racism that she experienced towards anyone of colour at that time in the thirties, forties, and how her father was quite ashamed to be Native. And he served in World War II. When he came back, he basically assimilated, denied his -- that he was First Nations. It was really tough when you look at each generation in the complex trauma.
3263. I mentioned in my presentation that I'm the first generation of my

**Squamish Nation
Oral Traditional Evidence**

- family out of residential schools. So to see this resurgence is quite exciting because my grandmother uses a term called, "youth reach, Elders teach," and I spent a large part of my career working with young people, both in the school system and Child and Family Services, where often our young people were being labelled as "at risk".
3264. And it always made me writhe a little bit. I did not like that term "at risk" because our children were culturally deprived. Once we immersed them in the activities that Syetáxtn spoke of by getting them into the canoes, getting them into the hunting programs, going out on the spring break programs out on the land, the youth flourished. They started to then excel and they became hungry for mentors and hungry for more knowledge and more experience.
3265. I also had the privilege over the last number of years to attend much of the Murdered and Missing Indigenous Women Inquiries, where we listened firsthand to many of the families across the country articulate their trauma and that those were symptoms of poverty and discrimination and social issues plaguing First Nations. Very challenging to listen to, but nonetheless, very healing, that this isn't just a First Nations' story; this is a story of Canada.
3266. Also, going through a lot of the reconciliation events over the last number of years, we've listened to our Elders who have articulated their darkness that they've carried for decades since they were children being abducted by RCMP, being abducted by Indian agents, sent to residential schools where it was very strictly forbidden for them to speak language or to interface with their relatives or participate in traditional activities. Those Elders would often vomit. They would often cry. They would often scream because it was the first time they shed light on these deep pains that they carried.
3267. So we're seeing this pivotal moment where these stories are finally being told. And with that, it's allowing our young people to feel safe. As they all said, they can speak their language on the buses; they can learn it in the public schools. Three hours a week isn't going to learn fluency or proficiency; it's simply an opportunity to learn to read and write. We need to add more layers.
3268. So we've achieved different files such as the Sea-to-Sky Highway upgrade to Whistler where we put invisible presence of our language to showcase to the world that we're not a vanished race and to show everyone that there is an older way of describing relationship to the lands. And people have readily embraced that. And it's also instilled great pride in our young people to then get

**Squamish Nation
Oral Traditional Evidence**

- into ambassador programs, tourism, showcasing and interfacing with tourism up in Whistler, where that's also been an opportunity to heal and to grow and to feel a part of the society rather than segregated.
3269. Our demographics are about 60 percent youth in our tribe, which is pretty similar amongst most First Nations in Canada where we're about 60 percent under the age of 25. So we have a huge demographic of young people who now, you know, can hold their MBA in one hand and they're also being able to go to ceremonies and speak their language or get up and drum and sing traditional songs and be involved in wearing their regalia.
3270. When I did my MBA a few years ago, I wore my full regalia when I went to the convocation simply because my Elders couldn't, my parents and my grandparents, it was not an option for them. They weren't allowed to go to university as Status Indians in Canada without enfranchising or disenfranchising; had to give up their status.
3271. So slowly but surely we're changing, but the language is an integral part of the culture and that's why I wanted to share a few of the key terms with you today like, (speaking in Native language) or (speaking in Native language) or some of those terms that are vital because it's not readily translatable into English. They're more -- broader terms that we must grow and mature and learn to understand what those terms mean. And we're fortunate to have Elders like our auntie here to help guide us in deeper understandings of those terminologies.
3272. So thank you.
3273. **THE CHAIRPERSON:** Member Scott.
3274. **MEMBER SCOTT:** I, too, wanted to thank you for your testimony today. I found it to be not only heartfelt, but measured in the delivery, and I thank you for that, as well as informative.
3275. My question is for Chief Ian Campbell. And in your testimony, near the end you made the comment that Squamish are not averse to development, as long as it meets your metrics. I think I understood what your metrics were from some of your earlier testimony, but I wondered if you would confirm what you meant by those metrics?
3276. **CHIEF IAN CAMPBELL:** Yeah, thank you for your question.

**Squamish Nation
Oral Traditional Evidence**

3277. And we engaged in land use planning back in 2003 through extensive community consultation with our Squamish Nation members to look at territorial from the 30,000-foot level, sort of looking at the entire territory. Our membership felt safe to provide traditional information that their families held onto.
3278. We then were able to protect around 8 percent of our territory through what we call Kwekweyex Kwelhaynexw, which is very difficult to translate into English, but we settled on the term, “conservancies.” They represent about 8 percent of our territory, about 50,000 hectares.
3279. We also then engaged in economic activity such as the acquisition of Tree Farm Licence 38 from Interfor, where we’ve seen, for decades, truckload after truckload of old-growth forest being stripped from our territories, where others were benefitting while we were being marginalized onto Reserves.
3280. So our Reserves and our territory comprise .03 percent of our territory, so less than 1 percent has been allocated to Squamish under the Reserve system.
3281. So we had to be proactive to then remove ambiguity on where we see appropriate activity for development, and where we want to be involved in that activity. So forestry was one of those where we became one of the largest forest operators within our traditional territory.
3282. We also did a strategy on IPPs, Independent Power Projects, so small run-of-the-river hydro projects.
3283. So through our land use planning, we limited where proponents can apply for projects by not being reactive, but being proactive to say these areas are uncompromisable because of cultural and spiritual values, we will not allow or entertain development. While other areas we said, these are appropriate for development based on ecological knowledge, traditional knowledge, spiritual knowledge, as well as access to resources within our corridors and territory.
3284. We also have many examples of protocol agreements with our neighbouring First Nations where we were able to come together with the Lillooet Nation to the north of us around the 2010 Winter Olympics, as well as the Musqueam and Tsleil-Waututh so that we developed the four host First Nations to then be equal partners in the hosting and execution of the 2010 Winter Olympics and Paralympic Games.

3285. We didn't want beads and trinkets. We didn't want to say, "Go ahead, come in and just do whatever you please." We want to be fully involved in as partners. If we're going to do something, we want to look at decision-making, shared decision-making. We want to look at economic opportunities. So it's a triple bottom line, as well as environmental stewardship and social benefits or impacts.
3286. There are many examples of the MST, Musqueam, Squamish and Tsleil-Waututh here in Vancouver, that have come together to negotiate acquisitions of lands from the provincial and federal government, such as the Jericho Lands and other opportunities that are fee simple lands, but allow the nations to develop our corporate structures and proceed as new entrants in the market, to develop our market share in providing solutions to the affordability issue, as well as rental and long-term lease.
3287. Those are important aspects of where the nations were able to move beyond competition over scarcity of resources to a place of collaboration that then wasn't about solving all issues amongst our nations; it was about focusing and zeroing in on specific aspects of protocol agreements to allow us to demonstrate tangible results that will then allow us to then create revenues and assets and attract investment and partnerships.
3288. I should also cite, we were successful in conducting our own environmental assessment on the Woodfibre LNG project, which allowed the Squamish Nation to issue 25 legally binding conditions to the proponents, which the proponents have adhered to in agreeing to our process, which then, once we satisfied our environmental conditions, we were then able to move forward and contemplate the impact benefit agreement.
3289. But it wasn't until our criteria and metrics were met on effecting design changes and being fully involved in the stewardship and revitalization of Howe Sound that allowed the nation to then engage over multiple years with our membership to solicit feedback from our members on what their fears are, what their aspirations are, and where current case law is around Aboriginal rights of title, where we can advance a lot of these issues of UNDRIP and consent, free prior and informed consent. How do you actualize consent and move beyond simple consultation where you're checking boxes, to true and meaningful engagement where First Nations are involved in decision-making, as well as appropriate benefits throughout the life of the project that then must comply with

**Squamish Nation
Oral Traditional Evidence**

environmental stewardship, first and foremost, and then move towards other monetary and real estate transactions?

3290. So those are a few high-level examples of the types of metrics that have been based off of traditional knowledge and applied in a modern context in exercising our jurisdiction and authority in our governance over our lands and waters.
3291. **MEMBER SCOTT:** So in listening to you and relating it to your earlier testimony, what you're describing as your metrics are expressions, if I can put it that way, of the framework that you described earlier, which was shared decision-making, shared economic benefit, and shared management of resources?
3292. **CHIEF IAN CAMPBELL:** M'hm.
3293. **MEMBER SCOTT:** Okay. Thank you.
3294. **CHIEF IAN CAMPBELL:** Yes, that's been the framework that many generations of Squamish have been advocating for in relationship with the Crown.
3295. **MEMBER SCOTT:** Thank you.
3296. **CHIEF IAN CAMPBELL:** My pleasure.
3297. **THE CHAIRPERSON:** Thank you. Those are all our questions.
3298. And I want to convey that we truly understand that this is not the ideal setting. But, like you said, we're kind of working with two worlds, your world and our world. And you mentioned it twice, about the fact that our history is your history. So today, that was a tiny piece, but we do appreciate it.
3299. And so you're sharing your story, and other First Nations have shared their stories as well, so it's cumulating.
3300. And we hope, like you say, that the recording of those transcripts, you know, are kind of a small testimony to those things.
3301. So thank you for coming and sharing the traditional knowledge that you were able to share with us today, even though not in the ideal setting.

Stó:lō Collective
Oral Traditional Evidence

3302. We will consider all we have heard and we will decide on our recommendation in this hearing.
3303. We will reconvene this afternoon at 4:00 o'clock to hear from the Stó:lō Collective, which are your neighbour, we understand
3304. Thank you very much. And safe travels.
- Upon recessing at 2:09 p.m./L'audience est suspendue à 14h09
- Upon resuming at 4:09 p.m./L'audience est reprise à 16h09
3305. **THE CHAIRPERSON:** Before we commence our hearing today, the Board wishes to acknowledge with respect the Lekwungen-speaking peoples in whose traditional territory we are gathered, and the Songhees, the Esquimalt and the Saanich people whose historical relationships with the land continue to this day. It is with truth and respect we would like to acknowledge all the Indigenous ancestors of this place and reaffirm our relationship with one another.
3306. Good afternoon. Welcome to the Oral Traditional Evidence phase of the National Energy Board's hearing regarding the Trans Mountain Project Reconsideration. My name is Lyne Mercier; I'm the Chair of the Panel. With me on my left is Alison Scott, and on my right is Murray Lytle. We want to welcome everyone who is here today, both in the hearing room, and those listening in to the Webcast.
3307. As a matter of housekeeping, I'd like to describe the evacuation procedures in the event of an emergency. If the building's evacuation tone begins sounding and we are asked to leave the building, the muster point for the venue is the waterfront walkway. Please exit in an orderly fashion through the lobby. At the muster point, ensure your party is accounted for.
3308. In addition to the Panel, we have staff in the room to answer process-related questions that you may have. You are able to recognize them by their brass name tags.
3309. With respect to our schedule for hearing oral traditional evidence, today we have scheduled time to hear from two Indigenous groups. We had one earlier. We will normally plan to take breaks if it is required.

Stó:lō Collective
Oral Traditional Evidence

3310. In order to be fair to all presenters we have allotted up to two hours to hear from you. If two hours is not enough, at the end of the session please feel free to file additional oral traditional evidence by electronic means, such as a video or some other method.
3311. Before we get underway, I would remind parties of the Panel's guidance in the Hearing Order and Procedural Directions in regards to oral traditional evidence.
3312. The Board understands that the Stó:lō Collective has an oral tradition for sharing knowledge from generation to generation, and this information cannot always be shared in writing.
3313. Sharing your traditional knowledge and stories about the use of your traditional territory is of value to us. We appreciate that you've chosen to be here today.
3314. Following oral traditional evidence, Trans Mountain, other intervenors, or the Board may have questions for the witnesses. If so, witnesses can choose whether they will answer questions orally, or at a later date in writing, or a combination of both.
3315. With that, I believe we're ready to get underway. Before I call on the Stó:lō Collective to present their oral traditional evidence, I'd like to have the representatives of the Proponent, Trans Mountain, introduce themselves.
3316. **MR. DUNCANSON:** Thank you, Madam Chair.
3317. Good afternoon. My name is Sander Duncanson. I am with the law firm Osler, Hoskin, and Harcourt representing Trans Mountain. With me is Cassie Richards, also from our office. To my left is Phil Symington with Trans Mountain. And closest to you is Jamie Andrews, also with Trans Mountain. So good afternoon.
3318. **THE CHAIRPERSON:** Thank you, Mr. Duncanson.
3319. I'd also ask if there are any other intervenors in the room who would like to introduce themselves or if there are any preliminary matters they would like to raise. And for the record, please indicate who you are and who you are representing.

Stó:lō Collective
Oral Traditional Evidence

3320. **MR. MURRAY:** Thank you, Madam Chair. Thank you, Panel Members.
3321. My name is David Murray and I'm a Senior Policy Advisor with Natural Resources Canada. I am here as a representative of the Federal Crown to hear the witnesses' oral traditional evidence in relation to the reconsideration of the Trans Mountain Expansion Project.
3322. I do not intend to ask any questions today, but rather, I am here as a representative of several federal departments and agencies that are registered intervenors.
3323. If necessary, we will ask additional questions through the NEB's Information Request process.
3324. Finally, I'd like to note that I'm honoured to be present at this hearing in the traditional territory of the Coast Salish.
3325. Thank you.
3326. **THE CHAIRPERSON:** Thank you, Mr. Murray.
3327. I understand that you would wish to be affirmed to indicate that the information you're presenting is accurate truthfully and to the best of your knowledge.
3328. So, Ms. Comte, can you please proceed.

DALTON RICHARD SILVER: Affirmed

--- ORAL PRESENTATION BY/REPRÉSENTATION ORALE PAR STÓ:LŌ COLLECTIVE:

3329. **MS. WALKER:** Good afternoon. Before Chief Silver gets started, I just want to give a brief introduction to the Panel. My name is Joelle Walker. I'm counsel for the Stó:lō Collective.
3330. The Stó:lō Collective consists of 12 Stó:lō communities whose traditional territory is in the lower Fraser River watershed. Eight of those

Stó:lō Collective
Oral Traditional Evidence

communities were involved in the judicial review in which the CBCN originally for the project was quashed.

3331. With me today is Chief Dalton Silver of the Sumas First Nation, who will be presenting the oral traditional evidence on behalf of the Collective. Chief Silver was an elected Councillor and Chief of the Sumas First Nation for 27 years. He has numerous other positions and leadership roles which I will let him describe in his oral traditional evidence.

3332. Chief Silver is here today to provide information on who the Stó:lō people are, the connectivity they have to their land, how they relate to that land and how they have used it throughout time.

3333. As a means of a brief overview, the members of the Stó:lō Collective are Coast Salish Indigenous people. They have inhabited, controlled, and relied on their traditional territory in the lower Fraser River watershed since time immemorial. The Stó:lō exercise Indigenous rights throughout this territory, including hunting, gathering, trapping, fishing and spiritual practices, and they are one of the few Indigenous peoples in Canada to have an established non-treaty right protected under Section 35 of the *Constitution Act*.

3334. This established right to fish for food and ceremonial purposes was affirmed by the Supreme Court of Canada in *Van der Peet*, acknowledged by the Crown during the consultation on this project, and recognized by the court in its reasons in the *Tsleil-Waututh* decision.

3335. The Stó:lō Collective are culturally, spiritually, physically, and psychologically interconnected to their land and this interconnectivity is evident in all of the areas that must be taken into account in assessing the environmental affects with respect to Aboriginal peoples identified in Section 5 of CEAA 2012.

3336. If Chief Silver feels comfortable, he may answer questions on the information he is sharing today, however, any technical or substantive questions should be addressed through the IR process.

3337. Before Chief Silver begins, we would also like to make a couple of brief comments on the NEB reconsideration hearing process itself.

3338. First, unfortunately, as we have advised in our correspondence of October 23rd, October 30th, and November 26th, due to the scheduling of this oral

**Stó:lō Collective
Oral Traditional Evidence**

- traditional evidence hearing during Stó:lō Big House season, the provincial leadership gathering, which is also taking place in Vancouver today, and the difficulties in coordinating a dozen communities on an extremely tight and unilaterally imposed schedule not all of the traditional knowledge which bears on the issues being considered in this hearing can be shared with the Board today.
3339. In addition, we have learned through review of materials filed by other Indigenous intervenors in this hearing that the federal government intends to rely, to the extent possible, on the reconsideration hearing to fulfil its duty to consult with respect to project-related marine shipping. In the circumstances, the Collective is of the view that this process cannot discharge the Crown's constitutional obligation to consult and accommodate, in particular where the Stó:lō have an established right to fish. To date, neither the NEB hearing process, nor Canada, have adequately considered or taken into account this constitutionally protected right.
3340. Despite that, we are here today to share what we can to assist the Board in determining the issue before it.
3341. And so with that, I will pass it over to Chief Silver.
3342. **CHIEF DALTON SILVER:** Thank you, Joelle.
3343. I hope the microphone's working properly or -- I did turn it on.
3344. **THE CHAIRPERSON:** Ms. Walker, turn yours off.
3345. **CHIEF DALTON SILVER:** It's kind of kicking in and out. Oh, here it goes.
3346. Thanks very much, Joelle. And firstly, too, I would like to acknowledge the Lekwungen, the Songhees, the Esquimalt, the Saanich people, my Coast Salish relatives.
3347. As I mentioned earlier, I am (speaking in Native language) saying my name is (speaking in Native language) and I am Sema:th. The people on the Stó:lō, I am also Kw'ekw'e'l:qk. My name comes from the Chilliwack Tribe passed to me by my late grandfather.
3348. I'm part of the Coast Salish people as well. The Stó:lō are part of the

**Stó:lō Collective
Oral Traditional Evidence**

Coast Salish. I also have blood ties to the Nlaka'pamux and up to the Secwepemc people in the interior, my Interior Salish relatives.

3349. I'm thankful to be here to talk about very important subject, the environment. I want to say I'm involved also at the Coast Salish level as a member of the Steering Committee for the Coast Salish Gathering. We're comprised of -- I think there are 50, 52 communities in southwestern British Columbia that have ties to the Coast Salish. There are 22 tribes in Washington State. I sit with a Steering Committee comprised of those in the south and us in the north. We have Spee Pots, a leader from Washington State is our southern co-Chair. Chilquauim, one of our leaders from here, actually, on Vancouver Island is our northern co-chair.
3350. Our main objective for meeting with the Coast Salish leadership is environment. It's one thing the Coast Salish Nation can get together on is environment, something that we've all come together on in the last 16 years. We gather annually when we can, either on this side of the border or that side of the border.
3351. As Joelle mentioned, I've been involved in the politics of our people for 27 years as a council member. Four years during that time I served as Chief for Yakwekwioose and the Ts'elxwéyeqw Tribe under traditional governance where I was asked by my uncle to come to the longhouse because he was going to perform a ceremony and I was going to be their Chief. I told him, "Well, I'm still elected council for Sumas," so I had to talk to our Elders at Sumas and they told me that, "You can't say no to that. The family is calling. It's an honour."
3352. So for a four-year term I served as chief for Yakwekwioose and elected council for Sumas. But being Stó:lō, both communities, my late grandfather, who I learned many, many things from said, "We are always brothers and sisters." And he mentioned that as well amongst the Coast Salish peoples to the island here and to the south, that we'll find relations amongst all those tribes in the Coast Salish Nation.
3353. I want to say that a lot of what I want to talk about I learned from my late grandfather, Th'eláchiyatel. He was also known as Chief Richard Malloway. I heard him speak in 1975, actually, talking about being involved in what was called the land question then for 40 years, for over 40 years. And actually, at the time he said, "We haven't got any answers yet. Been to Ottawa. Been to Victoria."

**Stó:lō Collective
Oral Traditional Evidence**

3354. And he was also a member of the executive on what was once known as the North American Indian Brotherhood in the 1940s. He was the Secretary/Treasurer. He was also a founding member and on the executive of the Union of B.C. Union Chiefs at its formation in 1969.
3355. He never attended formal schooling. He learned to read and write at home. He was appointed as spokesman for the Stó:lō people when he was 19 years old because he had learned the English language.
3356. He was born in 1906. So he took me more or less under his wing when I had lost my father accidentally in 1971, so at 11 years old, actually, was the first time I'd attended a political meeting with the old Fraser East District Council at the time.
3357. My grandfather was also instrumental in maintaining the cultural ways of our people in the Fraser Valley. Joelle mentioned the Big House ceremonies, the longhouse ceremonies. Our winter ceremonies are starting now. Actually, I'll be back over here on Vancouver Island in Saanich on Saturday this week for a memorial potlatch where my relatives are involved there.
3358. The cultural ways of our people are such that there are still practices that we have that are not for public viewing. We have our sacred, sacred practices that we keep amongst ourselves.
3359. One of the things I really like to talk about is how sacred everything is to us. I've sat with a lot of different environment groups. I sit with fisheries groups, the Lower Fraser Fisheries Alliance; I'm on the executive council there. I'm a delegate to the Fraser Salmon Management Council, which is inclusive of tribes in Vancouver Island right up to the headwaters of the Fraser.
3360. I also sit with the Assembly of First Nations National Fisheries Committee, and I've been given the honour of speaking with them on occasion and speaking for them at Whitehorse. It was delegated to me.
3361. And I think in talking about these things, it's kind of a touchy subject for a lot of our people in that we've been more or less legislated out of control of our resources over the years. And I've talked with others at the national level, and internationally with our friends to the south, our relatives. And the strength of that in B.C. is that we have no formal arrangement whatsoever. Our inherent

rights have been acknowledged and protected.

3362. The governance of our natural resources has never been ceded or surrendered to anyone with no formal arrangements in our territories. There is hope now that we can move forward with the provincial and federal governments as they're talking now about government-to-government, nation-to-nation, and we're hopeful that that comes to fruition where we can assume that authority again over our territories and work together with the respective governments in looking after things as we're supposed to.

3363. I want to talk a bit about some stories that are being passed down. And as my grandfather was saying, people call that history, the oral histories of our people. In the past, before contact, one of the practices of Coast Salish peoples in looking after our loved ones that have gone to the other side, the burials are something that are fairly new to us because if you look at our historic burial mounds, they weren't really burials, per se. There was a little groove, more or less, in the ground and the mounds were built over them. A lot of work into those mounds.

3364. But before those were done, what our people did was build cedar boxes. One of the places my grandfather talked about was on Sumas Mountain where I live, where our ancestors that had gone, our loved ones that had gone, were put in the cedar boxes, they were tied in the trees. The boxes were not airtight. Over time -- and it was mentioned to me that our bodies are made up of about 80 to 85 percent water.

3365. Over time, when the remains of our ancestors were in those trees, the fluids, the flesh, the blood, the waters out of our ancestors ran down the trees and into the ground. When the bones were dried up, then our people would take them and wrap them. We had grave houses around our territories, much have been desecrated or gone now. But that was how we looked after our lost loved ones.

3366. And in saying that, over the millennia, thousands and thousands of years you look at that practice. We say we've been here since time immemorial. There have been, even here on Vancouver Island, footprints found 13,000 years ago. In my territory up the river, on the Stó:lō, there's a longhouse that's 12 or 13,000 years old.

3367. I was talking with government of today about opening that up for an interpretative centre to talk about the histories.

3368. Over those years, those thousands and thousands of years, you think about that. And I've been told and taught by our Elders the flesh and blood of our people, all around our territories in the Coast Salish area.
3369. The Coast Salish we talk of covered over 6,000 square miles of southwestern British Columbia and northwestern Washington State.
3370. The trees, the grasses, everything that grows has been nourished by our ancestors. Everything that we harvest, the plants that we use, the medicines, the foods, the animals come eat those grasses. All those plants grow along the waterways, provide food to those fish that help us survive, brought us sustenance. The affinity we feel for the nature around us, the s'iwes, the teachings of our people tell us those are our relatives.
3371. There's people saying in many different cultures in Indigenous communities, you'll hear people say, "All my relations." When that is said, we're talking about everything around us. It's not just your blood relatives, your cousins, your whatever, it's everything that's around us. There's a cycle that we know.
3372. And I've mentioned to others, if back in time, when we first made contact with the newcomers to our lands, and we talk about the management of resources -- our people say the mismanagement of our resources -- if we were treated equally at first contact, and our way of looking after things, our perspectives culturally, holistically, if they were put into the management decisions that have been happening over our territories, we would be in a lot better position today.
3373. One of the things one of my brothers talked about, before I came here was the orca. I said, well, those are my brothers and sisters. I am stóg:ya, the wolf.
3374. The Sema:th people are wolves. My mother's people, the Sq'ewá:lxw, are black bear. My relatives in the interior, coyote. Those, we are taught, are very close relatives. Our brothers and sisters.
3375. And you see, I'll talk about a story we have that I'm told started in a place in our territory, up on the Skagit, the Hozomeen.

**Stó:lō Collective
Oral Traditional Evidence**

3376. Stóg:ya, the black wolf. He was leader of his tribe, I'll tell you. He was out in the woods and he was having trouble. He actually stumbled on the bushes. And yexwelat, the eagle, flew over.
3377. The animals all communicated then. There was a time our people talk about when we communicated with all the animals, with all the wildlife.
3378. But yexwelat, noticing that his brother on the ground was having trouble, asked him, "Is there something wrong?" And he being the chief of his tribe, or you would say the pack now, he said he was having trouble, his eyesight was bothering him, and he was the provider of his tribe. He was in the woods, he was hunting. But there was something wrong with his eyes, which is why he stumbled on that bush. He almost walked into a tree.
3379. And yexwelat told him of a big water that he's told of that can help him. He told him, "It's to the west and to the south of here." He says, "Brother, if you want, I can help you. It will fix your eyes."
3380. So stóg:ya, the wolf, said to him, "You would help me, brother?" He says, "I really need that help."
3381. So yexwelat told him -- the eagle, he told him, "You listen to me. You go this way." And he says, "If there's trees or anything in front of you, if there's an obstacle, you listen for my whistle, I'll tell you."
3382. So wolf left from up there. This place is up near Hope, and I'm told Hozomeen, between what is now the Town of Hope and the U.S. border.
3383. But anyway, wolf got closer and closer to the ocean. And yexwelat was telling him, "Watch for this. Watch for that. Watch for the creek around this tree." And when wolf got closer, he could smell the saltwater. He could smell that big water. And he started to run, faster and faster.
3384. And the eagle noticed the direction he was running. They had come to a clearing by then, and he knew the path right to the water, but there was a cliff, a big cliff that wolf was running towards.
3385. And eagle tried to warn him, he whistled to him and he told him to, "Slow down. This is not the place to go to the water. You're at a cliff."

**Stó:lō Collective
Oral Traditional Evidence**

3386. And stóg:ya, being so excited, he wants to fix his eyes so he can help his people again, help his tribe. He wouldn't slow down. And then before he knew it, he ran off the edge of that cliff.
3387. And eagle, one who always helps everyone, very sacred to our people today, eagle went down to try and grab him and grabbed onto the top of him, on his back, but he was too late, the wolf was already jumped into the water. And the eagle, when he grabs on, when his talons grab on to something like a fish, he doesn't let go.
3388. Anyway, wolf hit the water and he swam. And he could feel the healing right away on his eyesight. And when he came up out of the water, he could see. And he dove into the water and he could see in the water. And he came up and he looked for eagle and he couldn't find him. He was wanting to thank him for saving him, for helping his eyesight.
3389. That story, for our people, is where the killer whale comes from.
3390. You see, when wolf came up, he found that he couldn't go back to the land. And when he looked around for eagle, he seen this fin on his back, which our people say is the eagle's wings, they folded up. And you see the white spot, white spots on the front of the killer whale, that comes from the white head of the bald eagle.
3391. And it's through these stories that I'll say that the orcas, the killer whales are my brothers and sisters, as my people are wolf.
3392. I just wanted to tell you some of these stories as to the stories passed down by our people from our ancestors. These stories will be passed down to more. More and more of our youth are wanting to know of their histories, of who they are and where they come from.
3393. I was told as a 13-year-old at a meeting of the Union of B.C. Indian Chiefs -- and really, I thought my grandfather had set me up, but there were a lot of great leaders at that gathering in Penticton. And one of the chiefs turned to me and said, "You young people here, know who you are and where you come from and learn as much as you can about who you are and where you come from because there will come a time when you need to pass that down to your young ones."

**Stó:lō Collective
Oral Traditional Evidence**

3394. And so it's with these stories I just wanted to let you know how close we are to the lands, to the waters, to the wildlife. Everything around us, we say is our relations. The resources, the exploitation of those resources is very hurtful to a lot of our people. A lot of the places desecrated our sacred sites that go back in the histories of our people. One place where I come from goes back to a flood story, some say 11,000 years ago. I live there. I've been doing what I can to try and protect that place from desecration.
3395. One of the things talked about is the vessel traffic. And that's what I'm getting at, is the effects of vessel traffic are already great on that what sustains us. I'm taught in our language, there's a word, stiahtin, looks down. Stiahtin is everything that comes from the water that sustains us, not just the salmon, but everything that comes from the water. Mekw'stám means everything.
3396. We're taught that we need to look after that. There are places in our territory that remind us of those things. I seen a picture recently of the orca swimming and in the background, Kulshan. Kulshan, to us, is a very sacred place. People call him a mountain. We say he's an old man; people know as Mount Baker. You can see from where I live. A very sacred place, so sacred that some would say the Great Spirit actually lived there one time, you know?
3397. There are powers our people talk about, the powers of the earth, the powers of fire, the powers of water, the powers of the air. They say Kulshan; he's made up of that earth.
3398. The glacier there is year round. The waters that come from there go into many different rivers, go into the Chilliwack River, into the Baker, into the Skagit. At one time, there were waters there that came into Sumas Lake that is non-existent, a lake that once was on the shore, I lived on the shore of, one time. Our people did, the village we were at on the Stó:lō.
3399. The fire, they say, is inside him. The air, you can see. Sometimes on a cold day you see Mount Baker, Kulshan as we know him, is a volcano. Hasn't erupted for some time, but our people have stories, old stories of when he was angry and the fire came out of him. There's talk about -- there's old stories that tell of fish being washed up on the shores at Nooksack River that were actually cooked when they hit the banks on the other side, on the side of the mountain, from the lava hitting the water.
3400. And you see I talk about that place as a powerful place because the old

**Stó:lō Collective
Oral Traditional Evidence**

stories of our people is we need to look after everything. Our people say, “S’olh temexw te ikw’elo,” this is our land. “Xolhemet to mekw’stam it kwelat,” we have to look after everything that belongs to us.

3401. If we don’t look after things the way we’re supposed to, if it’s us that are neglecting everything, that are destroying everything around us, the stories say Kulshan will get angry and he’ll spit that fire out. That’s a deterrent, I think, to our people to act in such a manner with everything around us that we need to hear, to listen, to try and abide by the s’iwesá:yhem, the teachings of our people. The s’iwesá:yhem, some people say is the laws of our people. And I would say that it’s time that the Indigenous laws of our people need to be heard, need to be recognized.
3402. There was a man, a Salish man from the south. This man was from Washington State, one of the Coast Salish peoples, Nisqually People. He said at the time at one time that the truth will guide us, and I really believe that. This man of -- we lost some few years back, the late Billy Frank, Junior, and he was such a strong advocate for the protection of fish, the protection of wildlife. He was still working when he was 86 years old. I was privileged and honoured to hear the last public speech he made at Seattle on a Thursday night. And Monday morning we lost him to heart attack.
3403. But he was such a strong advocate for our people. In the early days, he was arrested over 50 times for exercising his rights on the wildlife and on the fish, fishing and hunting and other things he was arrested for and for his protests against government officials for logging practices and other that were destroying habitat and wildlife.
3404. But people learned so much from this man, this Salish man, that ways were changed as to how management decisions were made in those areas in the United States. Actually, when he passed on, then-President Obama made a very good speech and acknowledged how he had taught people about managing the resources, managing wildlife, managing the environment.
3405. The effects of the vessel traffic are such that just the amount of fuels and things from derelict vessels, from vessels running, other things, even from recreational vehicles out on the waters, very detrimental to everything in the water. Everything that I was talking about is affected by that.
3406. I was talking with someone the other day and I said, "Why is it when

**Stó:lō Collective
Oral Traditional Evidence**

Fisheries and Oceans are talking about tidal waters, they say that stops at the Mission Bridge" -- which is right in my territory -- "when we know the tidal waters go up much further than that?" My relatives at Sts'ailes, the fluctuations in the levels there, they know happen daily, and it's because of the tide on the Salish Sea. It goes right up to Harrison Lake. Those guys see the water levels change daily. And I'm sure it goes much further up than that.

3407. We talk about our territories, our traditional territories and things, and then the Coast Salish people and the Stó:lō people. Traditionally the Stó:lō people went from what is now Yale B.C., Huklath (phonetic), the village up there. It's our border in that area with my grandmother's people, the nlaka'pamux. It's a border that's always been recognized as Coast Salish, Interior Salish. But there are strong ties we have, and we're reaffirming this as our people have told us, our ancestors, and our old people are telling us now, the ties we have with the Interior Salish people were such in the past that we have to renew those. We can't forget.
3408. There's an Elder now that speaks of this. She's a professor at a university. She identifies as Salish. She won't say Interior Salish. She won't say Coast Salish. She says, "I am a Salish person."
3409. But historically the Stó:lō people were right down to the mouth of what is now the Fraser. I mentioned the rivers around us. The Stó:lō people have been there since time immemorial. We've talked about different rivers over here; say, the Cowichan River, the Nooksak River, the Skagit River. Our people would say the Nooksak Stó:lō, the Sumac Stó:lō, the Cowichan Stó:lō, Staele (phonetic) Stó:lō. But when we talk of the river that people have come to know as the Fraser there's no other name to it than Stó:lō. To us it's the river of rivers; Stó:lō, period. Our people would say the giver of life. So many things.
3410. We found ancestry remains of our people on the beach of the Stó:lō in an old village where we don't have Reserve land anymore, but we know for a fact we would never, ever have given up that village site. Many of our fishing sites there, Liumkatil (phonetic), that's the village. We took those remains and had ceremony and they were reinterred.
3411. The place was dug up during the building of the railway. When they did that, they desecrated many of our old burial mound sites. So they removed -- our ancestral remains were moved. Funny though some of them didn't get moved to places that we wanted them to.

**Stó:lō Collective
Oral Traditional Evidence**

3412. I work with a committee where we're repatriating some of our ancestor remains from museums. Actually, inquiries were made just down the road here at the Royal B.C. Museum to try and bring some of our ancestors home. The process has started.
3413. But before our ancestor remains were reinterred after much debate amongst our Elders -- I'll have to say at the time I was the youngest member of our Repatriation Committee, but that's changed a little bit now. But it was a long debate that we allowed some tests to be done on the ancestor remains.
3414. And one of the findings was that the diet of those people found on the banks of the Stó:lō was about 80 to 85 percent marine.
3415. So the reliance on what I mentioned earlier, that which comes from the water, was very heavy. We had hunters and we had fishermen. We had people that specialized in different aspects of our culture, the medicine people and others.
3416. One of the things, the effects on those stocks, on everything that's in the water, on the wildlife in general, the desecration of our sacred places, the places where we gather.
3417. We've seen the health of our people deteriorate. The onslaught of diabetes amongst our people is such that it's reached what people consider epidemic proportions. Health experts and others have pointed to causes of diabetes and other diseases amongst our people to the change in diet, the lack of access to our traditional foods, the lack of access to that which comes from the waters, and the destruction of that which comes from the waters.
3418. I think the vessel traffic that occurs now on the Salish Sea and at the mouth of the Stó:lō has already done so much damage that I don't know that we can recover from that. I don't know that the wildlife, I don't know that the fish and everything else, (speaking in Native language), as my Elder said, I don't know if that can recover.
3419. There were times when I was a young kid with my late father and my uncles and our relatives at Semiahmoo, we used to dig clams. I so much enjoyed that when I was a kid. My dad would get the crabs from our relatives there. We enjoyed a lot from the Salish Sea, as well as the Stó:lō.
3420. There are people talk about how poor we were growing up. We didn't

**Stó:lō Collective
Oral Traditional Evidence**

- have the running water. We had the old outhouse outside that you had to be careful there might be a coyote or a bear or something walking around out there. But I was talking with one of my brothers and I said, “You know, when we were kids we had the gardens. Sure we pumped water from the ground but it was pure spring water from our old pumps. Our smoke houses were full. We had the salmon. We had the eulachon.” I talked to him, I said, “Remember walking out and pulling a cucumber out of the garden, going to the smokehouse and pulling off a couple sticks of eulachon, and then taking off to our swimming holes and things like that in the early summer.” I said, “People said we were poor.”
3421. Well, we didn’t have a whole lot as far as money went but we were rich with our resources. We always had deer. My father used to go with our relatives in the interior and hunt the moose. And we had fish all year round, whether it be smoked, whether it be salted, whether it’d be frozen.
3422. As a little kid I went and checked the smokehouse at 5 o’clock in the morning to make sure it was smoldering right. We had stacks of hard, smoked salmon inside that smokehouse between sheets of newspaper. That was our winter food supply.
3423. Our people were a lot healthier then.
3424. As we see the environment around us deteriorating, we also see ourselves deteriorating. And as I talked earlier about our kinship to everything around us, to the lands, to the environment, our people say, “The land is us and we are the land.” And that’s not just a spiritual saying. The practices I talked about earlier, that is very literal.
3425. Our own people look at certain places that they deem as very sacred and they see those places destroyed. That is why our people say that our Elders can feel that. They feel sick when they see those things, and their reasons for that are historic reasons.
3426. I’m glad to be able to be here. I’m not sure -- if I was going to come, I’m not sure that the words I share are going to be meaningful, because some of what I’ve talked of today are very sacred things. As I mentioned earlier, a lot of what we know, we keep amongst ourselves as Halq’eméylem, people of this land. Those words I say, Halq’eméylem, when we speak of the land, tém:éxw.
3427. As I mentioned earlier, I don’t know if I said it, our people say,

**Stó:lō Collective
Oral Traditional Evidence**

“temexw te ikw'elo. Xolhemet mekw'stam,” this is our land; everything.

3428. Whether you look at it from our Indigenous laws, or as I mentioned, British common law, or international, everybody knows this. And yet we have to go through long, lengthy processes to try and prove this. And it all has to do with the richness of this land as people see the resources, the exploitation of that.
3429. I think we need to change those things around, to have people walk in our moccasins, as we say, have a real look around, know how close we are to everything.
3430. And the healing that is happening amongst our people, I think there's still lots to be done, but we've made some strides of late, I think, that are giving us hope, where the government is willing to recognize who we truly are. And we're hoping to one day take our proper place in our lands, and cogoverning alongside yourselves over our resources and our lands.
3431. The health of our people is dependent on everything around us. The revival of our cultural ways is such that young people are wanting to know more. There was a time, I think, through the residential schools -- and I heard someone talk of this, and I heard some of my Elders were so close to the cultural ways and some, after spending a dozen years in the residential schools; they didn't want anything to do with the cultural ways anymore.
3432. Our people are holding their heads up again and there's a great pride in who we are. You'll see that amongst our young people now.
3433. And I just want to say that I am hoping that the words I've shared here will lead to something; that maybe there is someone that is hearing me, and hopefully maybe someone that will actually listen to what is being said.
3434. And as I've said, I was kind of reluctant to come and speak of the things that I'm speaking of today, and it's very close to me. There's some other stories that are spoken of amongst our people, some of our people say you should write some of these things down, then it would not be oral. The tradition of our peoples is oral.
3435. A lot of what I talked about, some of these stories are passed down in the ceremonies, our winter ceremonies, stories passed down from the Elders. I'm hoping that some of what I shared is accepted by our ancestors, is what I'm

- thinking. I'm hoping that they're okay with me sharing.
3436. There are some things, the cultural practices, that I would like to talk about but we can't. The practices of our people are such that we need the clean environment, we need the clean water, we need the salmon and other fish species, other wildlife for carrying out those ceremonies. They're very sacred winter ceremonies that happen in our longhouses and in other places actually out in wildlife.
3437. I can say to you that there are ceremonies that my brothers and I carry out that are so sacred that our mother doesn't even know. There are sacred ceremonies that our sister and others carry out that, as the sons and the brother, we don't know. Those aren't our practices.
3438. There are cultural practices we have for young men coming into manhood that are being relearned. There are cultural practices we have for young women coming into womanhood that I wouldn't know, but my mother and my grandmother do.
3439. But those practices, we need all our relations to be pure; the wildlife, the water, everything around us.
3440. Our very cultural survival is reliant on this. There are many Elders here in Vancouver Island very instrumental in keeping that culture alive. As my grandfather used to say, "Keep the fire burning." We have to maintain that.
3441. Our brothers and sisters on the Salish Sea, whatever happens on the Stó:lō affects them. And to an extent, what happens on the Salish Sea, certain times of day, comes upriver. And the tidal fluctuations do not stop at the Mission Bridge, they go much beyond that.
3442. The knowledge of our people, of our environment is so much that I can only relay a bit of what I know today what I've been taught.
3443. There are many others, I think, who could speak of different aspects of our cultural ways, of the environment, of the effects that so-called progress has had on our peoples and the environment around us. We would need a lot more than two hours to relay that to anyone. And I would need a lot longer to say what I have said now if I would have maintained the full language of my people, the Halkomelem. Traditionally, as my grandfather I'd seen do many times, he spoke

**Stó:lō Collective
Oral Traditional Evidence**

- first in our language. He would say it would take him 20 minutes to introduce himself.
3444. I didn't introduce myself totally as our ancestors used to. They talked about the lineage. They spoke of who their parents are. They spoke of who their matrilineal grandparents are, who their paternal grandparents are, and they went on to the great-grandparents and others.
3445. So traditionally, our other Coast Salish relatives would know exactly who they were by the time they finished the introduction. And then he would turn and talk in English to interpret those that are speaking English, to let them know what it is that he had just said.
3446. The language is coming back to our people. There's so much in our language. As I mentioned earlier, the s'iwes, the teachings of our people, shxweli is a word our people talk of that is so -- I haven't really heard the interpretation that I think would be satisfactory to our Elders and to our ancestors. The shxweli is the life in everything around us.
3447. I find it a little funny that scientists are discovering now things that our people had already known. The medicines that our people used, medicines that my grandmother talked about, and then I see a report in the news that scientists have discovered the medicinal qualities of such and such a berry and different things like that. I think, "Well, our grandma told us that a long time ago."
3448. So what I'm saying, if we had got to know each other much better those 150 years ago or more, we'd all be in a lot better place.
3449. I shared with someone that the management of the resources, we never had a problem over the thousand and thousand of years of conservation. We knew the cycles of the animals, of the wildlife, of the fish. We knew where they were going to be, when they were coming back. We didn't have any problems with the management of those, the interaction that we had with those, until we were, "discovered," as some people have said.
3450. I kind of say that in jest, but then the government still maintains this discovery position. I talk about the doctrine of discovery that is still used against our people in the courts, and that's one of the things that really has to change.
3451. And this land was not empty when this guy was lost out in sea and he

ended up landing on the shores.

3452. But I want to thank you. I don't even know how long I've been talking but I just wanted to share a few things with you and that what has already happened to our relations, with what's going on in our waters, if that was to increase, things are going to get worse. And we're looking to work with our neighbours and the respective governments to try and do what we can to make things better.

3453. And again, I thank you for your time. I could almost go on with some other things but I got to be careful as to what I say. It's got to meet the approval of some Elders that I have at home that with such a short time that we're given to prepare for this, there was an Elder I was trying to call to get a hold of and I was not able to confer to see if it was okay there was certain things that I could relay to you folks here today.

3454. But I want to thank you for hearing me and for listening to what it is that I had to contribute. I'm hoping as well that what I have shared is sufficient for relaying the thoughts of our people in the Stó:lō, those who I'm honoured to be here speaking on behalf of today, that I say (speaking in Native language).

3455. O siem.

3456. **MS. WALKER:** If the Panel has any questions, I can ask Chief Silver if he's comfortable answering those today or we could take those away and respond in writing, as well as any questions that Trans Mountain or the other intervenors may have.

3457. **THE CHAIRPERSON:** I'll start with Mr. Duncanson.

3458. **MR. DUNCANSON:** So Chief Silver, we don't have any questions for you, but thank you very much for coming here today and sharing your knowledge with us. It's much appreciated.

3459. Thank you.

3460. **THE CHAIRPERSON:** The Panel doesn't have any questions for you.

3461. And we want to thank you very much for coming, especially since we

**Stó:lō Collective
Oral Traditional Evidence**

recognize that the timing was not ideal for you to come. So for that, we are very grateful that you kind of made arrangements to come.

3462. So we are thankful for the traditional knowledge that you were willing to share with us, and we will consider what we have heard as we decide on our recommendation in this hearing.

3463. And we will reconvene on Monday, December 3rd at 12:30, Nanaimo, to hear from the TWN.

3464. And we wish you safe travel, and thanks again.

3465. **CHIEF DALTON SILVER:** I just wanted to say again, thank you all. I know it's not an easy task you have. It's not an easy task we have. But I want to thank you again for hearing me,

3466. HÍSWKE.

--- Upon adjourning at 5:17 p.m./L'audience est ajournée à 17h17

National Energy Board
Suite 210, 517 Tenth Avenue SW
Calgary, AB T2P 5J2

Attention: Sheri Young, Secretary of the Board

Dear Ms. Young,

**Re: Trans Mountain Expansion Project – Reconsideration
Hearing Order MH-052-2018 & File OF-Fac-Oil-T260-2013-03 59
Application of the Tsleil-Waututh Nation (“TWN”) and Notice of Motion (“Motion”)
and Application of Living Oceans Society and Raincoast Conservation Fund
(“Living Oceans”)**

We write in response to the Board’s letter dated November 21, 2018, requesting comments from Intervenor on the above-noted Applications and Motion, both of which were filed on November 16, 2018. We will deal with each individually below.

Living Oceans’ Motion – Request 1

In its Motion, Living Oceans requested that the Board require Trans Mountain to conduct a proper risk assessment of Project-related marine shipping that includes all species listed in the Species at Risk Act, SC 2002, c. 29 (“**SARA**”) that could be affected by Project-related marine shipping. Currently, the Board has identified 35 SARA-listed species that are likely to be affected by Project-related marine shipping.

The Stó:lō Collective supports the Motion in its entirety. The Stó:lō are one of few Indigenous peoples in this country to have an established (non-treaty) right under s. 35 of the Constitution Act, 1982. This established right to fish for food and ceremonial purposes was affirmed by the Supreme Court of Canada in *R. v. Van der Peet*, [1996] 2 SCR 507 after a long-fought court battle. Since then, courts have repeatedly recognized this established right, and the Crown has repeatedly conceded it in legal proceedings. Accordingly, the Stó:lō Collective requires from the proponent a complete risk assessment that identifies effects on all of the SARA-listed species that are likely to be affected by the Project, not only selected species. Until it has such a report, the Stó:lō Collective will not know the extent to which its established right to fish may be affected, directly or indirectly, by the Project.

TWN’s Application – Request 2

In its Application, TWN requested, pursuant to s. 21(1) of the National Energy Board Act, RSC 1985, c. N-7 (the “**Act**”), that the Board review its following determinations of October 12, 2018:

- (a) excluding Project-related marine shipping activities in the Exclusive Economic Zone (“**EEZ**”) from the “designated project” that must be assessed under the Canadian Environmental Assessment Act, 2012 (“**CEAA 2012**”);
 - (b) failing to conduct a de novo hearing because the Panel appointed to undertake this Reconsideration hearing did not hear the original evidence and submissions of the parties; and
 - (c) excluding the need for, and the socio-economic effects of the Project, from the List of Issues
- (the “**Determinations**”).

Specifically, TWN asserted that the Determinations were made in error, and requested they be corrected by:

- (a) including Project-related marine shipping in the EEZ as part of the “designated project” that must be assessed under CEAA 2012;
- (b) requiring a de novo hearing, owing to the addition of new panel members to conduct this Reconsideration hearing; and
- (c) including the need for, and the socio-economic effects of, the Project from the List of Issues.

The Stó:lō Collective supports TWN’s Application in its entirety, and specifically adopts the submissions made by TWN regarding the necessity of a de novo hearing at paragraphs 51-61 of its Application. The Board has repeatedly stated that intervenors are to file new evidence only, as all of the evidence previously filed and heard in the first hearing remains on the record and will be before the panel in this Reconsideration hearing. However, it is truly inconceivable that new panel members could review and consider all of the evidence from the previous hearing, in addition to new evidence filed in this Reconsideration hearing, within the 155-day period imposed by the Governor in Council, let alone render a decision on that evidence. If the same panel members who heard the evidence, procedural fairness necessitates a de novo hearing.

Living Oceans’ Application – Request 3

In its Application, Living Oceans also requested that the Board:

- (a) review its decision to limit the scope of the Reconsideration to Project-related marine shipping between the Westridge Marine Terminal (“**WMT**”) and the 12 nautical-mile territorial sea limit; and
- (b) issue a new decision that includes Project-related marine shipping between WMT and the outer boundary of Canada’s EEZ as part of the “designated project” under the CEAA 2012.

As with TWN’s request regarding the EEZ, the Stó:lō Collective supports the requests made in Living Oceans’ Application.

Accordingly, the Stó:lō Collective asks that the Board exercise its discretion pursuant to subsection 21(1) of the Act to review and vary the Determinations in accordance with the Applications brought by TWN and Living Oceans. The Stó:lō Collective further requests that the Board grant the orders sought in Living Oceans' motion.

Yours truly,

MILLER TITERLE LAW CORPORATION

Hearing Order MH-052-2018
OF-Fac-Oil-T260-2013-03 59

NATIONAL ENERGY BOARD

IN THE MATTER OF the *National Energy Board Act*, R.S.C. 1985, c. N-7, as amended ("**NEB Act**") and the Regulations made thereunder;

AND IN THE MATTER OF an application by Trans Mountain Pipeline ULC as General Partner of Trans Mountain Pipeline L.P. (collectively "**Trans Mountain**") for a Certificate of Public Convenience and Necessity and other related approvals pursuant to Part III of the NEB Act for the Trans Mountain Expansion Project ("**Project**");

AND IN THE MATTER OF the National Energy Board's (the "**Board**") reconsideration of aspects of its OH-001-2014 Report ("**Recommendation Report**") as directed by the Governor in Council ("**GIC**") through Order in Council P.C. 2018-1177 ("**OIC**").

OPENING STATEMENT OF THE INTERVENOR, STÓ:LŌ COLLECTIVE

December 5, 2018

Joelle Walker and Erin Reimer
Counsel for Stó:lō Collective
Miller Titerle Law Corporation
300 – 638 Smith Street
Vancouver, BC V6B 1E3

I. PROCEDURAL HISTORY

1. On September 20, 2018, through the OIC, the GIC referred aspects of the Recommendation Report on the Project back to the Board for reconsideration (“**Reconsideration Hearing**”). The GIC’s direction followed the August 30, 2018 decision of the Federal Court of Appeal (“**FCA Decision**”) that quashed the GIC’s approval of the Project.¹

2. The Stó:lō Collective was an intervenor in the first hearing before the Board to consider the Project (“**First Hearing**”) and on October 5, 2018, was granted intervenor status in the Reconsideration Hearing.²

3. On October 12, 2018, the Board issued Hearing Order MH-052-2018 (“**Hearing Order**”) that served to define the List of Issues, Amended Factors and Scope of the Factors for the Environmental Assessment under the *Canada Environmental Assessment Act, 2012* (“**CEAA 2012**”) process, and the timelines through which the hearing will be carried out.³

4. As directed by the Hearing Order, the purpose of this Opening Statement is to set out the Stó:lō Collective’s initial position on the Reconsideration Hearing and provide a summary of its new evidence.

II. THE STÓ:LŌ COLLECTIVE

5. The Stó:lō Collective continues to represent the interests of Aitchelitz, Soowahlie, Yakweakwioose, Leq’á:mél, Skawahlook, Skowkale, Squiala, Skwah, Sumas, Shxwhà:y Village, Tzeachten, and Scowlitz. Members of these Stó:lō villages or bands are Stó:lō people and Aboriginal peoples within the meaning of the *Constitution Act, 1982* and CEAA 2012. Aitchelitz, Shxwhà:y Village, Skowkale, Skwah, Soowahlie, Squiala, Tzeachten, and Yakweakwioose were also among the successful Indigenous applicants in the FCA Decision.

6. The Stó:lō are “People of the River”, being the Fraser River. Since time immemorial, the members of the Stó:lō Collective have inhabited, controlled and relied on S’ólh Téméxw, their traditional territory in the lower Fraser River watershed. The Stó:lō exercise Aboriginal rights throughout S’ólh Téméxw, including hunting, gathering, trapping and their established (non-treaty) right to fish.⁴

¹ 2018 FCA 153

² Ruling No. 1 to All Parties [NEB Filing ID A94624]

³ Hearing Order MH-052-2018 [NEB Filing ID A94793-3]

⁴ Integrated Cultural Assessment (“**ICA**”) dated March 2014, Introduction pp. 18-19 [NEB Filing ID A3Z4Z2, A3Z4Z3, A3Z4Z4, A3Z4Z5, A4C7K2]; Written Evidence of the Intervenor Stó:lō Collective filed

7. The Stó:lō have a deeply established connection to and reliance on salmon, sturgeon and other aquatic species, all of which are integral elements of their society, culture, economy, politics, and traditions. Water quality was and remains a core factor of this relationship.⁵

III. SUMMARY OF NEW EVIDENCE FILED IN THE RECONSIDERATION HEARING

8. In addition to the evidence filed in the First Hearing, the Stó:lō Collective will be relying on new evidence contained in the Affidavit of Shana Roberts, a project manager and researcher for the Stó:lō Research & Resource Management Centre. This new evidence includes details about:

- (a) the preparation of the ICA which was the Stó:lō Collective's key technical submission during the First Hearing; and
- (b) the Stó:lō Collective's inability to prepare additional technical submissions or update the ICA to more specifically address the environmental effects of Project-related marine shipping due to the timeline set by the GIC for the completion of the Board's reconsideration report ("**Reconsideration Report**").

9. Ms. Robert's evidence relates to the difficulties experienced by the Stó:lō Collective to fully participate in the Reconsideration Hearing due to the expedited schedule and limited capacity of the Stó:lō Collective, which is new evidence for the purposes of this Reconsideration Hearing. A copy of Ms. Roberts' affidavit has been filed separately.

10. In addition, on November 29, 2018, Chief Dalton Silver of the Sumas First Nation provided Oral Traditional Evidence on behalf of the Stó:lō Collective. Chief Silver's Oral Traditional Evidence included sharing of information and stories concerning Stó:lō's longstanding socio-cultural and socio-economic relations and values, and how Stó:lō well-being is linked to and dependent on the integrity of the land, air, water and resources of S'ólh Téméxw.

IV. POSITION ON RECONSIDERATION HEARING

A. The Reconsideration Hearing is Procedurally Unfair

11. At the outset, the Stó:lō Collective objects to the unrealistic timeline set by the GIC for completion of the Reconsideration Hearing and delivery of the Reconsideration Report. The

May 27, 2015 ("NEB Evidence"), Appendix 1 (Cultural Heritage Overview Assessment), [NEB Filing ID A4L7A3]

⁵ ICA section 12 p. 1; NEB Evidence, Appendix 1 (Cultural Heritage Overview Assessment)

GIC's imposition of a time limit of 155 calendar days for the completion of both the Reconsideration Hearing and the Board's submission of the Reconsideration Report to the GIC pursuant to section 53(5) of the NEB Act suggests that it is timing, and not procedural fairness, or the ability to fully canvas and consider the potentially significant adverse impacts of Project-related marine shipping on, *inter alia*, Aboriginal rights and title, the environment and species at risk, that is the most significant factor in the Reconsideration Hearing.

12. The unilaterally imposed and hurried schedule has also impacted on the ability of the Stó:lō Collective to provide Oral Traditional Evidence as outlined in the letters to the Board of October 23 and 30 and November 26, 2018, and to provide update or additional technical evidence focused solely on Project-related marine shipping as described in Ms. Robert's affidavit.⁶

B. The Reconsideration Hearing Cannot be Relied on to Fulfill the Duty to Consult

13. Canada has advised certain intervenors that it will be relying on the Reconsideration Hearing to the extent possible to fulfil its constitutional duty to consult with Indigenous intervenors. In such circumstances, "the Board's process serves the additional purpose of contributing to the extent possible to the constitutional imperative not to approve a project if the duty to consult was not satisfied".⁷ In addition, in Appendix 2 to the Board's letter of October 29, 2018 providing its reasons with respect to, *inter alia*, the List of Issues and the Amended Factors, the Board stated that it had amended the List of Issues to include Issue No. 6 – the potential impacts of Project-related marine shipping on Indigenous interests – to "more clearly reflect that the Board must carry out its responsibilities in a manner consistent with the *Constitution Act, 1982*, including subsection 35(1)".⁸ The Board went on to say that it will consider whether there has been adequate consultation and accommodation for the purposes of the Reconsideration Hearing consistent with the recognition of the rights recognized and affirmed in section 35.

14. It is the position of the Stó:lō Collective that the Reconsideration Hearing process as structured cannot fulfill this purpose as it does not in substance provide for an appropriate level of meaningful consultation, in particular, in the circumstances where Project-related marine shipping could have adverse impacts on the Stó:lō's constitutionally protected right to fish. The

⁶ Notice of Intent and Objection re Oral Traditional Evidence [NEB Filing ID A95070], Objection to Locations and Limitations re OTE Hearings [NEB Filing ID A95245], and Letter to NEB re Withdrawal from OTE Hearing [NEB Filing ID A96126], respectively

⁷ FCA Decision at para. 526

⁸ Appendix 2 to Letter from Board dated October 29, 2018 at p. 7 [NEB Filing ID A95187-5]

Stó:lō Collective has repeatedly raised concerns over the potential impacts with Canada and Canada has repeatedly failed to grapple with them.⁹ Further, unlike following the First Hearing where the consultation process expressly contemplated a Phase III in which outstanding concerns were supposed to be addressed by Canada following the release of the Recommendation Report, to date, Canada has not advised of further avenues for meaningful consultation and accommodation in order to fulfill its duty prior to any reconsideration by the GIC of approval of the Project.

C. Significance of Environmental Effects of Project-related Marine Shipping

15. Section 5(c)(i) of CEAA 2012 provides that environmental effects to be taken into account in relation to a designated project are, with respect to Aboriginal peoples, an effect occurring in Canada of any change that may be caused to the environment on:

- health and socio-economic conditions;
- physical and cultural heritage;
- the current use of lands and resources for traditional purposes; or
- any structure, site or thing that is of historical, archaeological, paleontological or architectural significance.

16. Given the Stó:lō Collective's cultural, spiritual, physical and psychological interconnection to S'ólh Téméxw, any impact from Project-related marine shipping could have environmental effects on all of the areas identified in section 5(c)(i) of CEAA 2012, posing a significant threat to the cultural integrity of the Stó:lō. To date, neither Canada nor Trans Mountain have put forward sufficient measures to mitigate these risks.

All of which is respectfully submitted this 5th day of December, 2018.

Hearing Order MH-052-2018

OF-Fac-Oil-T260-2013-03 59

NATIONAL ENERGY BOARD

IN THE MATTER OF the *National Energy Board Act*, R.S.C. 1985, c. N-7, as amended and the Regulations made thereunder;

AND IN THE MATTER OF an application by Trans Mountain Pipeline ULC as General Partner of Trans Mountain Pipeline L.P. for a Certificate of Public Convenience and Necessity and other related approvals pursuant to Part III of the NEB Act for the Trans Mountain Expansion Project ("**Project**");

AND IN THE MATTER OF the National Energy Board's (the "**Board**") reconsideration of aspects of its OH-001-2014 Report ("**Recommendation Report**") as directed by the Governor in Council ("**GIC**") through Order in Council P.C. 2018-1177 ("**OIC**").

WRITTEN EVIDENCE OF THE INTERVENOR, STÓ:LŌ COLLECTIVE

December 5, 2018

Joelle Walker and Erin Reimer
Counsel for Stó:lō Collective
Miller Titerle Law Corporation
300 – 638 Smith Street
Vancouver, BC V6B 1E3

I. INTRODUCTION

1. On September 20, 2018, through the OIC, the GIC referred aspects of the Recommendation Report on the Project back to the Board for reconsideration (“**Reconsideration Hearing**”). The GIC’s direction followed the August 30, 2018 decision of the Federal Court of Appeal that quashed the GIC’s approval of the Project.¹

2. The Stó:lō Collective was an intervenor in the first hearing before the Board to consider the Project (“**First Hearing**”) and on October 5, 2018, was granted intervenor status in the Reconsideration Hearing.²

3. On October 12, 2018, the Board issued Hearing Order MH-052-2018 (“**Hearing Order**”) that served to define the List of Issues, Amended Factors and Scope of the Factors for the Environmental Assessment under the *Canada Environmental Assessment Act, 2012* process, and the timelines through which the hearing will be carried out.³

4. As directed by the Hearing Order, this new written evidence of the Stó:lō Collective relates solely to issues identified in the List of Issues and is not duplicative of evidence filed in the First Hearing.

II. SUMMARY OF NEW EVIDENCE FILED IN THE RECONSIDERATION HEARING

5. In addition to the evidence filed in the First Hearing, the Stó:lō Collective will be relying on new evidence contained in the Affidavit of Shana Roberts, a project manager and researcher for the Stó:lō Research & Resource Management Centre, which is attached as Appendix I hereto. This new evidence includes details about:

- (a) the preparation of the Integrated Cultural Assessment (“**ICA**”)⁴ which was the Stó:lō Collective’s key technical submission during the First Hearing; and
- (b) the Stó:lō Collective’s inability to prepare additional technical submissions or update the ICA to more specifically address the environmental effects of Project-related marine shipping due to the timeline set by the GIC for the completion of the Board’s reconsideration report.

Affidavit of Shana Roberts sworn December 5, 2018

NATIONAL ENERGY BOARD

IN THE MATTER OF the *National Energy Board Act*, R.S.C. 1985, c. N-7, as amended ("**NEB Act**") and the Regulations made thereunder;

AND IN THE MATTER OF an application by Trans Mountain Pipeline ULC as General Partner of Trans Mountain Pipeline L.P. (collectively "**Trans Mountain**") for a Certificate of Public Convenience and Necessity and other related approvals pursuant to Part III of the NEB Act for the Trans Mountain Expansion Project ("**Project**");

AND IN THE MATTER OF the National Energy Board's ("**Board**") reconsideration of aspects of its OH-001-2014 Report ("**Reconsideration Hearing**") as directed by the Governor in Council ("**GIC**") through Order in Council P.C. 2018-1177 ("**OIC**").

AFFIDAVIT #1 OF SHANA ROBERTS

I, Shana Roberts, Project Manager and Researcher, with an address for service for these proceedings c/o Miller Titerle Law Corporation, 300 – 638 Smithe Street, Vancouver, British Columbia V6B 1E3, AFFIRM THAT:

1. I am the Project Manager and Researcher for the Stó:lō Research & Resource Management Centre ("**Stó:lō RRM**"), and as such I have personal knowledge of the facts and matters hereinafter deposed to, save and except where the same are stated to be based on information and belief and where so stated I verily believe the same to be true.
2. I swear this affidavit on behalf of the Stó:lō Collective.
3. The Stó:lō Collective is a group of communities who share common interests and territory in the lower Fraser River watershed. It was granted intervenor status in the initial Board hearing on the Project ("**First Hearing**"). For the purposes of this Reconsideration Hearing, the Stó:lō Collective represents the interests of Aitchelitz, Soowahlie, Yakwekwioose, Leq'á:mél, Skawahlook, Skowkale, Squiala, Skwah, Sumas, Shxwhà:y Village, Tzeachten, and Scowlitz.
4. The Stó:lō RRM offers a range of professional and technical services to Stó:lō communities, including those related to:
 - (a) archeological resource management;
 - (b) archives;

- (c) cultural interpretation and events;
- (d) cultural resource management;
- (e) curation;
- (f) educational tours;
- (g) environmental resource management;
- (h) fisheries management;
- (i) geographic information systems;
- (j) lands management; and
- (k) research.

Background

5. I received a Master's Degree in environmental design from the University of Calgary in or about 2009 and a Bachelor of Arts from the University of the Fraser Valley (formerly the University College of the Fraser Valley) in or about 2005.
6. I have worked with Stó:lō communities and entities since 2013 as follows:
 - (a) from about 2013 until about 2014, I was a Research Manager for Ts'elxwéyeqw Tribe Management Ltd. ("**TTML**"); and
 - (b) since in or about 2014, I have worked for the Stó:lō RRMC as a Project Manager and Researcher.

(TTML and Stó:lō RRMC, together, the "**Stó:lō Entities**").
7. My work with the Stó:lō Entities has included the following responsibilities:
 - (a) reviewing technical information and evidence regarding the Project for information-sharing within the communities;
 - (b) assisting with environmental impact assessments;
 - (c) reviewing proposed permit conditions for the Project;
 - (d) preparing climate change adaptation policies;
 - (e) navigating the regulatory processes of the First Hearing, such as preparing, reviewing, and responding to information requests, Notice of Motions, letters, and procedural directions, as applicable;
 - (f) providing, hosting and conducting workshops, council meetings, and meetings between technical working groups, political working groups, other First Nations organizations and Trans Mountain;
 - (g) collecting environmental and economic development information related to the Project;

- (h) assisting at main table meetings with Federal and Provincial governments;
- (i) coordinating tripartite and working group meetings and taking minutes thereof;
- (j) hiring necessary consultants; and
- (k) researching and reviewing information relating to s. 35 rights in Canada, other treaty agreements in principal and final agreements, and specific case studies and law.

The Project

8. Since in or about 2014, I have worked with Trans Mountain on the Project, to the extent that Stó:lō communities are affected, to communicate and advocate for Stó:lō interests.
9. The Stó:lō communities traditional language is Halq'eméylem. "S'ólh Téméxw" means "our world" or "our land" in Halq'eméylem and refers to Stó:lō traditional territory. One of my main responsibilities was and continues to be ensuring that Stó:lō's s. 35 Aboriginal rights are included in discussions relating to Project-based effects, direct or indirect, on S'ólh Téméxw.
10. During the First Hearing, in or about March 2014, the Stó:lō Collective provided Trans Mountain with its key technical submission, the Integrated Cultural Assessment ("ICA"), which was prepared by TTML, Stó:lō RRM, and Human Environment Group. I assisted in preparing the ICA for the Stó:lō Collective. The ICA was intended to form the basis for constructive and meaningful consultation with the Crown. It identifies potential impacts within S'ólh Téméxw that could be caused by the Project, such as impacts on Stó:lō traditional activities, culture, lands, and resources.
11. In developing the ICA, we worked with Stó:lō community members to identify and review:
 - (a) historic and contemporary Stó:lō uses of S'ólh Téméxw;
 - (b) geotechnical data and Indigenous knowledge relating to natural hazards in the S'ólh Téméxw;
 - (c) hydrologic data and Indigenous knowledge relating to water and waterways in the S'ólh Téméxw; and
 - (d) ground-truthing, data and Indigenous knowledge relating to fish and fish habitat in the S'ólh Téméxw.
12. The ICA was based on surveys, interviews, meetings, and workshops held with over 200 community members. It looked at eleven traditional activities, many of which represent the exercise of the Stó:lō's Aboriginal rights, to determine if these activities would be impacted by the Project and rated those impacts as high, medium or low. Seven activities (fishing, spiritual, manufacture of cultural items, travel corridors, governance, economic activities and community programs and services) were identified as potentially highly impacted. Four activities (gathering, settlement, hunting and trapping, and inter-nation gathering) were identified as potentially of medium impact.

13. The ICA concluded that the Project poses a significant risk and represents a significant threat to the cultural integrity and survival of core relationships at the heart of Stó:lō worldview, identity and well-being. It warned that if the Project were approved without deep, meaningful consultation and accommodation of Stó:lō land management goals, rights and title, and decision-making, the Project would negatively impact Stó:lō governance.
14. The ICA also concluded that fishing and spiritual activities – two critically important rights – would have “[s]ignificant post-mitigation adverse impacts”. It concluded that the Project represented a significant threat to the cultural integrity of the Stó:lō, and, as planned, “would significantly jeopardize the survival of the unique Indigenous lifeway of the Stó:lō and unjustifiably infringe upon Stó:lō’s Aboriginal rights, protected under s. 35 of the Canadian *Constitution*.”
15. Accordingly, the ICA included 89 recommendations (“**89 Recommendations**”) which, if implemented by Trans Mountain or the Crown, would mitigate the Project’s adverse effects on Stó:lō communities. The 89 Recommendations included measures to mitigate the Project’s impacts on the Stó:lō’s governance and established fishing rights, including the impact of oil spills into or near the Fraser River.
16. The ICA took approximately 12 months to complete.
17. The Board did not adopt any of the 89 Recommendations in its terms and conditions for the Project, nor did Trans Mountain provide a substantive response to the 89 Recommendations during the First Hearing.

The Reconsideration Hearing

18. The Stó:lō Collective has faced significant hardship participating substantively in this Reconsideration Hearing due to the 155-day timeline imposed by the GIC in the OIC.
19. Some examples of the Stó:lō Collective’s inability to participate substantively are:
 - (a) the Stó:lō Collective cannot prepare another integrated cultural assessment of, or update the ICA to include, Project-related marine shipping, as this would likely require months of information-gathering;
 - (b) there is limited time and capacity to engage with specialists and experts regarding the effects of Project-related marine shipping on marine ecosystems, tidal waters, and foreshore, all of which would require modelling and other intricate scientific processes;
 - (c) while there is some basic knowledge of hydrology and water-bitumen interactions available to the Stó:lō Collective, there remains limited understanding of the fate of diluted bitumen as it relates to the foreshore, brackish and fresh-water estuaries along the Fraser River, as well as its effects on the unique system of the Fraser River, such as its wandering gravel bed, meandering river, and the ancient streams that are tributaries therein. Amassing this knowledge requires new studies, which would take time and resources, both of which are not available to the Stó:lō Collective in the present circumstances;
 - (d) the Stó:lō Collective could not review and respond adequately to the evidence filed by Canada and Trans Mountain in the Reconsideration Hearing, as,

collectively, Canada and Trans Mountain filed over 8,000 pages of evidence to which the Stó:lō Collective initially only had three weeks to respond; and

- (e) the Stó:lō Collective does not employ a wildlife or marine biologist who could have researched and prepared a report, from either an Indigenous or Western perspective, of the species that could be affected by Project-related marine shipping, which, combined with the extremely short timelines imposed by the Board and GIC has forced the Stó:lō Collective to rely on what has been filed by Trans Mountain and Canada.
20. Consequently, the extremely short timeline does not allow for a holistic approach to the review of the impacts of Project-related marine shipping, which the Stó:lō Collective believes to be missing from Trans Mountain and Canada's filed evidence. The Stó:lō Collective worries that there will be impacts, including socio-economic, health and wellbeing, and spiritual, that are not being fully recognized.

Calgary, AB T2P 5H1
Email regulatory@transmountain.com

Dear Mr. Denstedt:

**Trans Mountain Pipeline ULC (Trans Mountain)
Application for the Trans Mountain Expansion Project
National Energy Board (Board) reconsideration of aspects of its Recommendation
Report as directed by Order in Council P.C. 2018-1177 (Reconsideration)
MH-052-2018**

**Ruling No. 18 – Trans Mountain notice of motion for an extension to reply evidence
deadline in relation to specific evidence**

On 6 December 2018, Trans Mountain filed a notice of motion requesting an extension to the
deadline to file any reply evidence it may have in relation to:

- i) any evidence from Tsleil-Waututh Nation (TWN) that the Board may decide to treat
confidentially (in relation to TWN's 4 December 2018 request for such treatment);
- ii) any evidence from Pacheedaht First Nation (Pacheedaht) that the Board may decide to treat
confidentially (in relation to Pacheedaht's 5 December 2018 request for such treatment);
and
- iii) any evidence of the Indigenous Caucus for the Trans Mountain Indigenous Advisory and
Monitoring Committee (IAMC) that was not successfully uploaded to the public registry
by the 5 December 2018 deadline, due to filing issues.

In its notice of motion, Trans Mountain notes that it had not yet received the unredacted
information for which TWN and Pacheedaht have sought confidential treatment, nor had it
received the IAMC's documents for which filing issues prevented its uploading to the public
registry.

Trans Mountain also notes that the current deadline for it to file reply evidence is
11 December 2018, which is four business days after the deadline for intervenors' evidence. It
asks for six days to respond to the specific evidence described above, once it receives it (in
relation to any confidential evidence) or once it appears on the public registry (in relation to the
IAMC's documents).

Telephone/Téléphone : 1-800-899-1285
Facsimile/Télocopieur : 1-877-288-8803

On 6 December 2018, the IAMC filed a [letter](#) in response to Trans Mountain's notice of motion. It notes that two of the filings it attempted to upload showed in its filing receipt, but do not appear online. The IAMC spoke to a Board Process Advisor, but the issue was not resolved by the evidence deadline. The IAMC notes that its counsel spoke with Trans Mountain's counsel and it was agreed to share the documents electronically, which was done at 1:37 pm Mountain time on 6 December 2018. The IAMC submits that Trans Mountain did not have access to the two subject documents for 21 hours after the intervenor evidence deadline. Therefore, the IAMC suggests an extension of one day for Trans Mountain's reply evidence.

Views of the Board

The Board notes that, on 6 December 2018, it issued [Ruling No. 17](#), granting TWN's request and advising the Parties how to proceed with sharing the subject information. The Board has not yet ruled on Pacheedaht's request. The Board confirms that the IAMC's documents were successfully uploaded on 6 December 2018.

The Board is of the view that, as a matter of procedural fairness, Trans Mountain should be afforded an appropriate amount of time to review the evidence it receives prior to being required to file any reply evidence particular to that information.

The Board has decided to provide Trans Mountain with four days to file reply evidence in relation to TWN's confidential evidence, once it receives the unredacted information. Similarly, if the Board grants Pacheedaht's request, Trans Mountain will have four days to file reply evidence in relation to Pacheedaht's confidential evidence, once it receives the unredacted information. In either case, the Board cannot indicate the specific deadlines prior to confirmation that Trans Mountain has received any unredacted information.

Due to the expedited nature of this Reconsideration, the Board encourages the efficient sharing of the unredacted information, in accordance with terms agreeable to the relevant Parties.

In the case of the IAMC's documents, Trans Mountain received the information one day late, so the deadline of **11 December 2018** remains unchanged.

For any questions, please contact a Process Advisor by phone at 1-800-899-1265 (toll-free) or by email at TMX.ProcessHelp@neb-one.gc.ca.

Yours truly,

NATIONAL ENERGY BOARD

IN THE MATTER OF the National Energy Board Act, R.S.C. 1985,
c. N-7, as amended ("**NEB Act**") and the Regulations made
thereunder;

AND IN THE MATTER OF an application by Trans Mountain
Pipeline ULC as General Partner of Trans Mountain Pipeline L.P.
(collectively "**Trans Mountain**") for a Certificate of Public
Convenience and Necessity and other related approvals pursuant
to Part III of the NEB Act for the Trans Mountain Expansion Project
("**Project**");

AND IN THE MATTER OF the National Energy Board's (the
"**Board**") reconsideration of aspects of its OH-001-2014 Report as
directed by the Governor in Council through Order in Council P.C.
2018-1177.

STÓ:LŌ COLLECTIVE

INFORMATION REQUEST #1 TO GOVERNMENT OF CANADA

December 17, 2018

Joelle Walker and Erin Reimer
Counsel for Stó:lō Collective

Miller Titerle Law Corporation
300 – 638 Smith Street
Vancouver, BC V6B 1E3

1. Impact Assessment and Exercised Established or Asserted Fishing Rights and/or Assertion of a Range of other Aboriginal Rights in the Vicinity of the WMT.

Reference: A95292-17 Annex 04.C.01 – A6J6R4 - Joint Federal/Provincial Consultation and Accommodation Report for the Trans Mountain Project including Relevant Annexes (the “**CAR**”)

Preamble: As outlined in the CAR, there are specific Stó:lō communities identified as having rights in the Salish Sea near the vicinity of the Westridge Marine Terminal (the “**WMT**”). The CAR concludes that, with the exception of effects on the Southern Resident Killer Whale population, the magnitude of effects of Project-related marine vessel traffic on traditional marine resource uses, activities, and sites is low.

The CAR describes, amongst other things, the following findings at page 84:

- Despite Burrard Inlet being a heavily urbanized environment, Aboriginal groups have managed to sustain minimal levels of harvesting while pursuing re-establishment of certain species, and remediation of polluted areas.
- The Crown understands that there are five Aboriginal group entities that either exercise established or asserted fishing rights and/or assert a range of other Aboriginal rights in the vicinity of the WMT: Tsleil-Waututh Nation, Squamish Nation, Musqueam Indian Band, First Nations of the Hul’qumi’num Treaty Group, and four Stó:lō groups (Shxw’ōw’hámél, Soowahlie, Skawahlook, and Seabird Island).
- Regarding the impacts of Project-related marine shipping, marine travel supporting potential marine harvesting in the vicinity of the WMT has been limited for quite some time, but has the potential to be further limited given increased traffic in the waters surrounding the WMT. The Vancouver Fraser Port Authority has been slowly making changes to its navigation channels and anchorages to align with modern demands; however, the Crown notes that the Project would result in more Project-related marine shipping in eastern Burrard Inlet and potential conflicts with Aboriginal groups.
- In general, the Crown considers there is a low possibility of navigational impacts affecting access to marine harvesting activities. Vessel traffic from the WMT will utilize existing deep-sea navigational channels and constraints for vessel interactions with these channels will remain unchanged. The Crown notes that Project-related impacts on navigation and cultural practices – specifically in eastern Burrard Inlet in proximity to the WMT – will exist for the lifetime of the Project, and will occur daily. While navigation is already significantly affected by

deep-sea vessel traffic in Burrard Inlet, the existing four anchorages south and east of Cates Park will be occupied consistently if terminal operations commence, which is not the case currently.

Request: We request the following:

- (a) Please provide a rationale for the conclusion that only those four Stó:lō groups have asserted or exercised rights within Burrard Inlet and the Salish Sea.
- (b) Please provide a foundation for the conclusion that increased marine traffic within the Salish Sea and increased anchoring outside of the Burrard inlet will have a low impact on Aboriginal rights.

2. The Fate of Diluted Bitumen

Reference:

- A95292-42 Annex 06.D.19 – A6J6T9 – A study of the 46-year-old Arrow oil spill: Persistence of oil residues and variability in oil contamination along Chedabucto Bay, Nova Scotia, Canada
- A95292-43 Annex 06.D.20 – A6I6U0 – Occurrence, source and ecological assessment of petroleum related hydrocarbons in intertidal marine sediments of the Bay of Fundy, New Brunswick, Canada
- A95292-48 Annex 06.D.24 – A6J6U5 – Flow Behaviour of Oil: What Makes Diluted Bitumen Different?
- A95299-3 Annex 06.D.29 – A6J6Y2 – Meso-scale studies on the penetration and retention of diluted bitumen in different types of shorelines, Northern British Columbia, Canada
- A95299-15 Annex 6.D.41 – A6J6Z7 – Fate of photodegraded dilbit in Seawater. Use of Cold Lake Blend and Access Western Blend with natural solar light in Ottawa, Canada over winter and summer seasons to assess the impact of sunlight on the chemical fate of dilbit
- A95299-23 Annex 07.G.06 – A6J7A5 – An estimate of the sinking rate of spilled diluted bitumen in sediment laden coastal waters

Preamble: All of the above-referenced documents discuss the fate of diluted bitumen through a variety of different lenses and a variety of different geographical locations. All of these locations are outside the geographical bounds and the watershed boundaries of the Fraser River Watershed and the Burrard Inlet and as such there is reason to question the validity of using such scientific studies

that investigate the fate of diluted bitumen in the discourse of the Salish Sea within the area defined through the Reconsideration Hearing. The environmental conditions contained in the methodology of these studies do not investigate the specific conditions of the Pacific Ocean, particularly the Strait of Juan de Fuca.

Request: We request answers from the Department of Fisheries and Oceans and the Department of Environment and Climate Change to the following questions:

- (a) Do the above-referenced case studies provide an accurate review of hydrocarbon in intertidal marine sediments given the difference in water temperatures, salinity and intertidal areas within the Pacific (especially the Fraser River)?
- (b) Are the above-referenced case studies an accurate review of weathering, degradation and natural attenuation given the differences in water temperatures, salinity, atmospheric pressures, temperatures, and storm confluences?
- (c) Given that the area of the Strait of Juan de Fuca, also known as the insular belt, is made up of metamorphic grades of rock, is it appropriate to compare the bedrock platforms overlaid with sedimentary rock of northern British Columbia with that of the insular belt metamorphic rocks?
- (d) Given that the Strait of Juan de Fuca has variable density stratification and temperature compared to the Douglas Channel in northern British Columbia, can the study located at Annex 07.G.06 accurately predict the fate of diluted bitumen within the Strait of Juan de Fuca or the Salish Sea?
- (e) Is it appropriate to use in this Reconsideration Hearing the findings of studies that do not investigate the fate of diluted bitumen in similar scenarios and similar conditions of the Pacific Ocean/Salish Sea and the Strait of Juan de Fuca?

3. Duty to Consult

Reference: A95463-2 - Notice of Motion of Squamish Nation - A6J9Z9

Preamble: Based on a review of filings made to date in the Reconsideration Hearing, it appears Canada has advised certain intervenors that it will be relying on the Reconsideration Hearing to the extent possible to fulfil its constitutional duty to consult with Indigenous intervenors. In such circumstances, “the Board’s process serves the additional purpose of contributing to the extent possible to the constitutional imperative not to approve a project if the duty to consult was not

satisfied”. At page 4 of Squamish Nation’s Notice of Motion¹ dated November 5, 2018, for example, Squamish references a letter dated October 5, 2018 that it received from the Minister of Natural Resources, Amarjeet Sohi which stated, among other things, that Canada intends to rely on the Board’s hearing process to the extent possible to fulfill its duty to consult in connection with the Reconsideration.

The Supreme Court of Canada has confirmed that the Crown may rely on steps taken by an administrative body to fulfil the duty to consult, in part or in full, so long as the agency possesses the statutory powers to do what the duty to consult requires in the particular circumstances.² However, where the Crown intends to rely on a regulatory process to discharge the duty to consult, it should be made clear to the affected Indigenous groups that the Crown is so relying.³ In addition, if the Board does not provide adequate consultation and accommodation, the Crown must provide further avenues for meaningful consultation and accommodation in order to fulfill the duty prior to project approval.⁴

Request:

- (a) Is the Crown in fact relying, to the extent possible, on the Board’s hearing process to fulfill its duty to consult in connection with the Reconsideration?
- (b) What are the Crown’s plans for fulfilling its duty to consult should the Board’s hearing process fall short of satisfying the Crown’s constitutional obligations?
- (c) Is Canada relying, to the extent possible, on the strength of claim assessments conducted in the first hearing on the TMEP, or is it conducting new assessments?
- (d) If Canada is conducting new assessments:
 - (i) what is Canada’s assessment of Stó:lō’s strength of claim in relation to Aboriginal title and rights?
 - (ii) how did Canada identify Stó:lō’s specific Aboriginal rights?

¹ NEB Filing ID A95463-2.

² *Clyde River v. Petroleum Geo-Services Inc.*, 2017 SCC 40 [“**Clyde River**”] at para. 30; *Chippewas of the Thames First Nation v. Enbridge Pipelines Inc.*, 2017 SCC 41 [“**Chippewas**”] at para 32.

³ *Chippewas*, para 44; *Clyde River*, para 23.

⁴ *Chippewas*, para. 32.

- (iii) what methodology is Canada using to assess potential adverse impacts to Stó:lō's rights and interests from Project-related marine shipping?
 - (iv) what is Canada's assessment of the potential adverse impacts to Stó:lō's rights and interests from Project-related marine shipping, including section 35 rights to fish, hunt and gather?
- (b) What procedural aspects of consultation with First Nations has the Crown delegated to Trans Mountain in this Reconsideration?

This is Exhibit KK referred to in the Affidavit of Tanny Nguyen sworn before me at Vancouver, BC this 6th day of July, 2019.

Dear Mr. Smith, Mr. Seaman, and Ms. Tuytel:

**Trans Mountain Pipeline ULC (Trans Mountain)
Application for the Trans Mountain Expansion Project (Project)
National Energy Board (Board) reconsideration of aspects of its Recommendation
Report (Report) as directed by Order in Council P.C. 2018-1177 (Reconsideration)
MH-052-2018
Ruling No. 22 – Applications for review from Living Oceans Society (Living Oceans)
and Raincoast Conservation Foundation (Raincoast), and Tsleil-Waututh Nation
(TWN)**

A. BACKGROUND

Upon receipt of Order in Council P.C. 2018-1177 dated 20 September 2018 (the OIC), the Board sought comments on a number of matters, including:

- 1) whether, “on a principled basis,” Project-related marine shipping should be included in the “designated project” to be assessed under the *Canadian Environmental Assessment Act, 2012* (CEAA 2012);
- 2) the draft Amended Factors and Scope of the Factors for the Environmental Assessment pursuant to the CEAA 2012, and the draft List of Issues to be considered in the Reconsideration hearing; and
- 3) the design of the hearing process to be used for the Reconsideration.

The Board received numerous comments on these general matters, including comments from TWN and Living Oceans/Raincoast.

Telephone/Téléphone : 1-800-899-1265
Facsimile/Télocopieur : 1-877-288-8803

In its 5 October 2018 [letter](#), the Board sought additional, focused comments from the Parties on the following limited issue:

Assuming Project-related marine shipping is included in the “designated project” to be assessed under the CEAA 2012, should the designated project be defined as including:

- a) Project-related marine shipping between the Westridge Marine Terminal (WMT) and the territorial sea limit; *or*
- b) Project-related marine shipping between the Westridge Marine Terminal and the outer boundary of Canada’s economic exclusion zone (EEZ)?

Many Parties provided comment on this spatial limit issue, including [TWN](#) and [Living Oceans/Raincoast](#).

On 12 October 2018, the Board issued various [decisions](#) regarding, amongst other things, the inclusion of Project-related marine shipping between the WMT and the 12-nautical-mile territorial sea limit in the “designated project” to be assessed under the CEAA 2012, the confirmed List of Issues, and design of the hearing process. On 29 October 2018, the Board issued [reasons](#) for its decision regarding the spatial limit for its assessment of Project-related marine shipping (Spatial Limit Decision),¹ as well as [reasons](#) for its conclusions on the List of Issues and the process to be used for the Reconsideration hearing (Process Design Decision).²

On 16 November 2018, the Board received a [review application](#) from TWN, in which it requests that the Board revisit the conclusions made as part of, or flowing from, [Hearing Order MH-052-2018](#), including that the Board:

- a) determine that Project-related marine shipping in the EEZ forms part of the “designated project” to be assessed under the CEAA 2012 in this Reconsideration hearing;
- b) determine that a *de novo* hearing is required in view of the newly-reconstituted Panel Members involved in this Reconsideration hearing not hearing the original evidence and submissions of the Parties (the **De Novo Hearing Review – addressed in Part E of this ruling**); and
- c) determine that the need for and the socio-economic effects of the Project must be included in the List of Issues (the **Need for and Socio-Economic Effects Review – addressed in Part F of this ruling**).

On 16 November 2018, Living Oceans/Raincoast jointly filed their own [review application](#), requesting that the Board:

- a) review its decision to limit the scope of the Reconsideration to Project-related marine shipping between the WMT and the 12-nautical-mile territorial sea limit; and
- b) issue a new decision that includes Project-related marine shipping between the WMT and the outer boundary of Canada’s EEZ as part of the “designated project” under the CEAA 2012.

The relief sought in Part a) of TWN’s request is essentially the same as Living Oceans/Raincoast’s request. Accordingly, these requests will collectively be referred to as the **Spatial Limits Review (addressed in Part D of this ruling)**.

¹ Board, Spatial Limit Decision (29 October 2018) ([A6J4X5](#)).

² Board, Process Design Decision (29 October 2018) ([A6J4X7](#)).

On 21 November 2018, the Board established a [comment period](#) for all Parties with respect to the review applications. With consideration to the expedited nature of the Reconsideration, the Board decided to receive submissions on both the threshold question and the merits at the same time.

TWN filed [supplemental information](#) on the threshold question and merits on 27 November 2018. Living Oceans/Raincoast did not file supplemental information. A number of intervenors filed comments in support of the review applications. The [Government of Alberta](#) (Alberta) and [Trans Mountain](#) provided submissions opposing the review applications. On 6 December 2018, [TWN](#), [Living Oceans](#), and [Raincoast](#) provided reply comments.

B. GENERAL PRINCIPLES ON AN APPLICATION FOR REVIEW

Subsection 21(1) of the *National Energy Board Act* (NEB Act) provides that the Board may review, vary, or rescind any decision made by it. Part III of the *National Energy Board Rules of Practice and Procedure, 1995* (Rules) describes the procedures and grounds for a review. There is no automatic right of review of a Board decision. The Board's power to review its decisions is discretionary, and must be exercised sparingly and with caution.³

The Board considers applications for review through a two-step process. In the first step, also known as Phase I, the Board considers the threshold question of whether the applicant has raised a doubt as to the correctness of the Board's decision. The grounds that the Board will consider in deciding whether the applicant has raised a doubt as to the correctness of the decision include, but are not limited to, any error of law or jurisdiction, changed circumstances or new facts that have arisen since the close of the original proceeding, or facts that were not placed in evidence in the original proceeding and that were then discoverable by reasonable diligence.⁴ The Board agrees with the submissions made by TWN in reply that these grounds are disjunctive.

If the Board, in its discretion, finds that the threshold for Phase I is met, then the Board will proceed to the second step (or Phase II) to review the decision on the merits.

C. DISPOSITION

The Board has considered the submissions filed in relation to the review applications and has decided the following:

- The Spatial Limits Review is denied on the merits.
- The De Novo Hearing Review is denied on the threshold question. In the event the Board erred in determining the threshold question, the merits of the review have been considered. The De Novo Hearing Review is also denied on the merits.
- The Need for and Socio-Economic Effects Review is denied on the threshold question.

Accordingly, TWN and Living Oceans/Raincoast's applications for review are dismissed.

The Board's full reasons are below. The Board has carefully considered all submissions filed in relation to these review applications, but has focused its reasons on those portions of the submissions which the Board has found to be most relevant to whether the applicants have raised

³ Board Filing Manual at 50-2; Board Ruling No. 3, NOVA Gas Transmission Ltd. Application for the Sundre Crossover Project, Hearing Order GH-002-2017 – Applications to Review Ruling No. 2, Amending Order AO-001-GH-002-2017 (27 October 2017) at 3 ([A87308](#)).

⁴ Rules, para 44(2)(b).

a doubt as to the correctness of the decisions, or their merits, as appropriate. The Board's reasons must be read as a whole to ensure that individual elements are not taken out of context.

D. SPATIAL LIMIT REVIEW

1. Executive summary of the Spatial Limit Review

The Board considered the new facts and submissions raised in the reviews regarding statutory interpretation, the Federal Court of Appeal's decision in *Tsleil-Waututh Nation*,⁵ the Governor in Council's (GIC) direction in the OIC, the Canadian Environmental Assessment Agency's (CEA Agency) Guide to Preparing a Description of a Designated Project under the CEAA 2012⁶ (CEA Agency Guidance), and environmental assessment (EA) considerations. The Board examined new evidence regarding Trans Mountain's proposal for voluntary route adjustments in relation to a special Deviation Point within the EEZ. The Board finds that this information does not materially change its original findings regarding the lack of certain or established routes within the EEZ and the extent of Trans Mountain's ability to direct and influence shipping in the EEZ.

Many of the arguments raised in the reviews are similar or identical to those from the comment process for the original Spatial Limit Decision. Such comments essentially invite the Board to reweigh arguments it has already considered in the course of its initial reasons on an issue that the Court has said is not one of pure statutory interpretation, but rather a mixed question of fact and law heavily suffused by evidence.

Many Parties disagreed with the Board's findings regarding EA considerations, but failed to provide evidence or facts to support their views. Parties did not provide the Board with detailed evidence regarding the specific locations of routes within the EEZ. Parties did not adequately explain how an EA could be carried out in a meaningful way in the EEZ where the route of the tankers is uncertain. Lastly, none of the Parties were able to provide an example of an EA under the CEAA 2012 that considered project-related marine shipping outside of the territorial sea where the primary physical activities for a project are onshore.

The Board's original decision to limit its assessment of Project-related marine shipping to the territorial sea was not arbitrary; it was made after weighing numerous factors. Faced with the possibility of delineating its assessment of Project-related marine shipping to the extent of the territorial sea, the EEZ, or indeed a foreign port, the Board conducted a principled analysis and chose a middle ground informed by the facts and the law heavily suffused by evidence. The new facts and submissions do not warrant overturning the Board's Spatial Limit Decision. The Board has decided to confirm the Spatial Limit Decision and deny Living Oceans/Raincoast's and TWN's requests to include Project-related marine shipping in the EEZ as part of the "designated project" to be assessed under the CEAA 2012.

2. Phase I – Have the applicants raised a doubt as to the correctness of the Spatial Limit Decision?

The issue of whether Project-related marine shipping should be included in the "designated project" to be assessed under the CEAA 2012 turns on whether Project-related marine shipping is a "physical activity that is incidental" to the pipeline component of the Project, as that phrase

⁵ *Tsleil-Waututh Nation v Canada (Attorney General)*, 2018 FCA 153 at para 391 [*Tsleil-Waututh Nation*].

⁶ (Updated March 2015), online: <<https://www.canada.ca/en/environmental-assessment-agency/services/policy-guidance/guide-preparing-description-designated-project-under-canadian-environmental-assessment-act-2012.html>>.

is used in section 2 of the CEEA 2012.⁷ In *Tsleil-Waututh Nation*, the Court stated that “[t]his is not a pure issue of statutory interpretation. Rather, it is a mixed question of fact and law heavily suffused by evidence.”⁸ An important component of this analysis of fact and law is the appropriate spatial limit of Project-related marine shipping.

The Board’s Spatial Limit Decision was based on careful consideration of the factual record before it, the statutory scheme, the CEA Agency Guidance, and submissions from various Parties with diverging views that the geographic extent should be at the border of the territorial sea, the border of the EEZ, or indeed extend to the final destination of the marine shipping associated with the Project.

TWN, Living Oceans/Raincoast, and various intervenors assert that the Spatial Limit Decision is both factually and legally incorrect. The Board notes that many of the legal arguments raised are similar or identical to those raised previously in the comment process for the original Spatial Limit Decision. The Board is of the view that a review application is not an opportunity to re-argue the same points previously raised. Other information raised was previously available and should have been brought forward during the earlier comment process. Further, although TWN, Living Oceans/Raincoast, and various intervenors submit that routes within the EEZ are known and can be identified with certainty, none of them provided new evidence to demonstrate the actual location of these routes. Disagreement with how the Board weighed the facts and the law is not sufficient to raise a doubt as to the correctness of the Spatial Limit Decision.

Despite the above, the Board does find that new facts have arisen, which may be relevant to its Spatial Limit Decision. TWN asserts that Trans Mountain’s direct evidence filed on 31 October 2018 regarding a special Deviation Point within the EEZ “clearly suggests” that Trans Mountain “can force ships to follow a particular route in the EEZ.”⁹ While, arguably, this should have been more properly included in TWN’s review application as opposed to its reply, the Board will still consider the submission. The Deviation Point may have relevance to routing within the EEZ and the extent of Trans Mountain’s ability to direct and influence shipping in the EEZ. The Board is mindful of the fact that it should not be delving deeply into the merits or weighing evidence at this step. Given that Phase I is meant to be an initial threshold merely requiring a *prima facie* case, the Board finds that there is a doubt as to the correctness of the Spatial Limit Decision to warrant a review of the decision on its merits. In light of this, the Board finds there is no need to look further at the other new facts in the context of Phase I.

3. Phase II – Review of the merits of the Spatial Limit Decision

3.1 New facts

The Board will start with addressing the new facts raised by the Parties. TWN provides information on its cultural relationship with Southern resident killer whale (SRKW), economics of the Project, and an oil spill on Husky Energy’s SeaRose floating production platform in Canada’s EEZ off the coast of Newfoundland & Labrador. The Board is of the view that TWN has not adequately explained how these facts are directly relevant to the analysis of what is “incidental” and what constitutes a “designated project” under the CEEA 2012.

Living Oceans/Raincoast and TWN also rely on the fact that an updated recovery strategy for SRKW has been released identifying new critical habitat for SRKW, most of which falls within the EEZ. The Board is of the view that neither Living Oceans/Raincoast nor TWN have justified

⁷ *Supra* note 5 at para 391.

⁸ *Ibid.*

⁹ TWN reply comments in connection with TWN’s application for review of November 16, 2018 (6 December 2018) at 7 ([A96516](#)).

how the presence of critical habitat within the EEZ ought to drive the definition of “designated project” under the CEAA 2012. The Board is not persuaded that this new critical habitat for SRKW has much relevance to the five criteria set out in the CEA Agency Guidance or the Board’s overall analysis of what is “incidental.” However, the identification of critical habitat for SRKW is an additional consideration for the Board when it looks at the environmental effects of the designated project under paragraph 5(1)(b) of the CEAA 2012. The Board discusses environmental effects in the EEZ in greater detail below in Section 3.5 – EA Considerations.

Another new fact is Trans Mountain’s direct evidence regarding routing in relation to a special Deviation Point within the EEZ. In particular, TWN submits:

[I]t is clear that Trans Mountain, through its existing Tanker Acceptance Standards or through new ones, can force ships to follow a particular route in the EEZ. Indeed, pp. 50-51 of Trans Mountain’s own direct evidence clearly suggests that Trans Mountain can do so. There, Trans Mountain itself sets out additional factors regarding how it can exercise “care and control” over Project-related marine shipping in an area “largely outside the 12 nm limit...”¹⁰

Trans Mountain’s evidence in this regard is contained in a chapter of its direct evidence titled “Topic 3: Southern Resident Killer Whale” under the subheading “Measure 1: Special Routing Instructions.” The evidence is provided in the context of Trans Mountain identifying three new plausible mitigation measures to address effects of Project-related marine shipping on SRKW. In its evidence, Trans Mountain states the following:

As discussed above, Trans Mountain is aware that the continental shelf off SWVI (largely outside the 12 nm limit), including Swiftsure and La Pérouse Banks, has recently been proposed as Northern and Southern Resident Killer Whale critical habitat.

In light of this, and incorporating guidance of the IMO on routing to mitigate effects of shipping in sensitive areas, **subject to receiving support from the responsible authority, TC, and confirmation from DFO** concerning potential environmental benefits, Trans Mountain would be prepared to take the following **voluntary steps** for passage of Project-related shipping:

- i) Noting in the WMTROG a special Deviation Point in the vicinity of 48° 07’ N¹¹ and 126° 07’ W, **bearing about 242° x 50 nm** from the Buoy J. It is approximately 50 nm distance from the west coast of Vancouver Island and the Olympic Peninsula; this location is within Canada’s EEZ.
- ii) Project-related vessels **would be requested to include** the Deviation Point as part of the vessel’s passage plan both for arrival and departure.
- iii) Project-related vessels (arriving and departing) **would be requested to proceed** at not more than 12 knots when transiting between the Deviation Point and Buoy J, **safe navigation permitting and, for arriving vessels, if feasible to do so given pilot and berthing arrangement.**
- iv) The current route advice for departing tankers would be adjusted to take effect from the vessels’ final departure from the Deviation Point.
- v) The area is within the coverage of MCTS Prince Rupert Traffic who would be the body charged with monitoring the above requirements.

¹⁰ *Ibid.* at 7.

¹¹ Trans Mountain made the correction from 46° 07’ N to 48° 07’ N in a 4 December 2018 letter ([A6L4H0](#)).

...

Trans Mountain recognizes that numerous factors need to be considered in assessing possible marine shipping route alternatives and that **could require cross-border discussions between relevant agencies in Canada and the US**. However, **if this measure were to be supported by DFO and approved by TC**, Trans Mountain is prepared to consider requesting **voluntary route adjustments** to protect productive foraging grounds as described above and to apply those adjustments to existing tanker traffic, subject to **monitoring** by MCTS [Emphasis added].¹²

The WMTROG (WMT Regulations and Operations Guide) was filed as part of Trans Mountain's evidence. The WMTROG is stated to be based on "international and local requirements, procedures, best practices and guidance" found in various documents.¹³ It explicitly states that Trans Mountain "provides the instructions in this guide for convenience only, and takes no responsibility for their accuracy or currency, as the official rules and procedures may be revised at any time,"¹⁴ though Trans Mountain does reserve the right to deny berth access to any vessel in breach of the WMTROG.¹⁵ Trans Mountain states that the WMTROG is a guide and includes advice on requirements of the WMT.¹⁶

The Board finds that TWN's characterization of Trans Mountain's ability to "force ships to follow a particular route in the EEZ" is overstated. Trans Mountain's direct evidence, viewed objectively, is that Trans Mountain is prepared to request that Project-related vessels include a set "Deviation Point" approximately 50 nautical miles into the EEZ as part of the vessel's passage plan. Trans Mountain is also apparently prepared to request that vessels proceed at no more than 12 knots, safe navigation permitting and if feasible given pilot and berthing arrangements. These route adjustments are voluntary. All of these proposals are subject to the support of Transport Canada and Fisheries and Oceans Canada (DFO) and are subject to monitoring by parties other than Trans Mountain. The assessment of possible marine shipping route alternatives could also require cross-border discussions between relevant agencies in Canada and the United States (US).

Trans Mountain's level of "control" associated with this special Deviation Point remains consistent with the Board's findings in its Spatial Limit Decision:

Trans Mountain does have the ability to direct or influence the carrying out of some aspects of marine shipping, primarily through its Tanker Acceptance Standard ... a couple of requirements also apply in the EEZ. However, this is far from the level of direction Trans Mountain exerts over the pipeline component of the Project (for example, the ability to direct the shutdown of the pipeline, at any point in time, in the event of a safety concern). Once a tanker leaves the WMT, Trans Mountain's ability to enforce any requirements is very minimal.¹⁷

Keeping in mind that this evidence regarding the Deviation Point has yet to be fully tested in this proceeding, it is not clear to the Board at this stage whether adding the Deviation Point to a passage plan means that vessels would be requested to travel in a straight line from Buoy J to the Deviation Point. In any event, this is merely a proposal subject to support from Transport

¹⁷ *Supra* note 1 at 14.

Canada, DFO, and, possibly, US agencies. The currently proposed Deviation Point only extends 50 nautical miles into the EEZ from Buoy J. Thus, even if vessels were somehow requested to follow a straight line from the Buoy J to the Deviation Point (which is not clear at this stage), that accounts for only a fraction of the distance into the EEZ, and still leaves a large area of open ocean within which ships could follow any number of routes, subject to the 270° west heading limit. The Board is of the view that the potential route adjustments related to the Deviation Point would not create a delineated route. Therefore, the new evidence regarding the Deviation Point does not warrant overturning the Board's Spatial Limit Decision.

3.2 *Tsleil-Waututh Nation and the OIC*

Living Oceans/Raincoast and TWN submit that the geographical extent of the marine shipping was not directly in issue before the Court in *Tsleil-Waututh Nation*, and they question the Board's reliance on the Court's conclusion that "[g]iven the Board's approach to the assessment and its findings, the Board's report was adequate for the purpose of informing the GIC about the effects of Project-related marine shipping on the Southern resident killer whales and their use by Indigenous groups."¹⁸ This conclusion of the Court was also referenced in the GIC's [explanatory note](#) to the OIC.¹⁹

In its Spatial Limit Decision, the Board recognized that the OIC and *Tsleil-Waututh Nation* did not give express instruction regarding the geographic extent of the marine shipping to be included in the "designated project."²⁰ However, based on the record before them, both the GIC and the Court were aware of the 12-nautical-mile spatial limit used in the Board's original assessment of Project-related marine shipping. If either were of the view that there was a glaring deficiency, they had the opportunity to make their concerns known. In any event, this factor was just one among many in the factual and legal matrix faced by the Board in reaching its conclusion. Therefore, this argument does not warrant overturning the Board's Spatial Limit Decision.

3.3 Statutory interpretation

Turning to the principles of statutory interpretation, the Board must reiterate that many of the legal arguments raised in the review are similar or identical to those from the comment process for the original Spatial Limit Decision. However, in the interest of clarity and transparency, the Board is providing reasons for some of the arguments regarding statutory interpretation.

TWN, Living Oceans/Raincoast, and various intervenors take issue with the Board's interpretation of "designated project" and "incidental." For example, some Parties argue that shipping within the EEZ is still incidental to the Project since the causal connection is the same. In another example, Living Oceans/Raincoast state that the Board unduly emphasized one purpose of the CEAA 2012 (timeliness) over others. Such comments essentially invite the Board to reweigh arguments it has already considered in the course of its initial reasons on an issue that the Court has said is not one of pure statutory interpretation, but rather a mixed question of fact and law heavily suffused by evidence. The fact that some Parties have a different view than the Board, or a preference for more weight to have been put on some factors compared to others, does not mean that the Board erred in its original decision. A different outcome than that desired by some Parties is not necessarily an incorrect outcome under the law.

¹⁸ *Supra* note 5 at para 439.

¹⁹ Canada Gazette Part I, Vol 152, No 39 (29 Sept 2018) at 3279.

²⁰ *Supra* note 1 at 10.

TWN submits that the “plain language of CEAA 2012 must indeed dominate” supporting the conclusion that “physical activities of any kind (whether incidental or not) that occur in the EEZ are part of the ‘designated project’ that must be assessed.”²¹ TWN further states there is “no ambiguity present which would allow the Board to resort to purposive, policy or practical considerations to disregard the plain language of CEAA 2012.”²² The Board is of the view that TWN’s emphasis on “plain language” is inconsistent with the guiding principle of statutory interpretation, which requires that the words of a statute are to be read in their entire context and in their grammatical and ordinary sense harmoniously with the scheme of the Act, and the intention of Parliament.”²³ TWN re-argues the same points it already made and ignores the different interpretations outlined in the Board’s Spatial Limit Decision, which indicate a degree of ambiguity in the definition of “designated project” with respect to what is “incidental.”²⁴

The Board also considered arguments regarding the *Taseko* case,²⁵ which, at the time of these reasons, remains good law. While TWN did note some distinguishing features of that case, as noted by Alberta, that case remains the only judicial consideration of the phrase “incidental to.” In particular, the Board remains of the view that the requirement of “proximity” discussed in that case remains relevant, and is indeed consistent with the intention of Parliament in the CEAA 2012 that some reasonable limits must exist within the EA process. It is, in the Board’s view, entirely possible to maintain some limits and, at the same time, fulfill the letter and spirit of the CEAA 2012. In any event, the *Taseko* case was only one factor considered along with many other factors that the Board took into account in its original reasons.

Therefore, the arguments regarding statutory interpretation do not warrant overturning the Board’s Spatial Limit Decision.

3.4 CEA Agency Guidance

Living Oceans/Raincoast and TWN only reference certain components of the CEA Agency Guidance criteria. The Board notes that no Party seriously disputed the Board’s findings regarding the following criteria:

- i) The nature of the proposed activities and whether they are subordinate or complementary to the designated project
- ii) Whether the activity is within the care and control of the proponent
- iv) Whether the activity is solely for the benefit of the proponent or is available for other proponents as well

The Board does not believe it is necessary to revisit its analysis of the five CEA Agency criteria in great detail, but will address submissions made by the Parties in relation to Criteria iii) and v).

- iii) *If the activity is to be undertaken by a third party, the nature of the relationship between the proponent and the third party and whether the proponent has the ability to “direct or influence” the carrying out of the activity*

²¹ TWN application for review of Board Hearing Order MH-052-2018 (16 November 2018) at 11 ([A95819](#)). The same argument was also put forward in TWN’s comments on the spatial limit of Project-related marine shipping (9 October 2018) at 2 ([A94687](#)).

²² *Ibid* at 12.

²³ *Rizzo & Rizzo Shoes Ltd., Re*, [1998] 1 SCR 27 at para 21.

²⁴ *Supra* note 1 at 11. Specifically, an alternative to TWN’s interpretation of “designated project” and “federal lands” was put forward by BC Nature and Nature Canada, Living Oceans, and Raincoast.

²⁵ *Canada (Canadian Environmental Assessment Agency) v Taseko Mines Limited*, 2018 BCSC 1034.

The degree to which Trans Mountain can “direct or influence” the carrying out of marine shipping is discussed earlier in these reasons. The new evidence regarding the Deviation Point does not change the Board’s findings in relation to Criterion iii).

TWN sought to elevate this criterion by claiming that the Board is “again impermissibly looking to rewrite the relevant section of CEAA 2012, but this time to state that it ‘includes any physical activity that is incidental to those physical activities *and that the proponent controls in the same manner as all other physical activities.*’”²⁶ To be clear, Trans Mountain’s limited ability to control marine shipping in the EEZ is merely one factor that the Board considered under the CEA Agency Guidance for interpretation of the term “incidental.”

Accordingly, this criterion still slightly leans against being incidental outside of the territorial sea.

v) *The federal and/or provincial regulatory requirements for the activity*

There was much argument regarding the regulatory regime applicable to marine shipping in the EEZ, including the *Oceans Act* and the *United Nations Convention on the Law of the Sea*, as well as the extent of Parliamentary authority over the protection of the marine environment. While it is true that Parliament has some authority to regulate marine shipping in the EEZ, it is very clearly not as extensive as its authority to regulate within the territorial sea. None of the arguments raised change the Board’s underlying conclusion that, beyond the territorial sea, Parliament’s authority over shipping is materially reduced. Accordingly, this criterion still slightly leans against being incidental outside of the territorial sea.

Therefore, a reassessment of the CEA Agency Guidance does not warrant overturning the Board’s Spatial Limit Decision.

3.5 EA considerations

The Board’s analysis in its Spatial Limits Decision was heavily informed by the facts and the Board’s technical expertise in relation to conducting an EA. Many Parties disagreed with the Board’s findings regarding EA considerations, but failed to provide evidence or facts to support their views.

None of the submissions have changed the Board’s view that knowing the project location or route is fundamental to conducting an EA.²⁷ The Board disagrees with TWN’s characterization that the Spatial Limit Decision “turned on this issue,”²⁸ but the lack of a certain route by vessels transiting the EEZ remains crucial to the Board’s ability to conduct an EA and was one of several important considerations in the Spatial Limit Decision.

TWN, Living Oceans/Raincoast, and various intervenors submit that routes within the EEZ are known and can be identified with certainty. Specifically, TWN points to Trans Mountain’s Tanker Acceptance Standard, which requires departing vessels to steer a course no more northerly than due West (270°) upon exiting the Juan de Fuca Strait to take the shortest route out of the EEZ, and the fact that there are a limited number of destinations for tankers (namely California and Asia).

²⁶ Supra note 21 at 9 (emphasis in original).

²⁷ Supra note 1 at 15.

²⁸ Supra note 21 at 4.

None of the Parties referred to any facts that call into question the Board's previous finding: "given that there are no defined shipping lanes in the EEZ – a vast area of ocean – no shipping 'route' for the Project can be identified with any degree of certainty."²⁹ Of particular significance is the fact that Parties have not provided the Board with detailed evidence regarding the specific locations of routes within the EEZ.

The 270° northerly limit raised by TWN was already considered by the Board in its Spatial Limits Decision.³⁰ There is a large area of open ocean south of the 270° northerly limit. Trans Mountain submits that there is an infinite number of routes that outbound ships could take in Canada's EEZ and remain in compliance with the Vessel Acceptance Standard, which only provides a northerly limit, to access markets in the US and the Pacific Rim.³¹ Even accepting TWN's argument that "movements to Washington State do not require transit within or through the EEZ,"³² the Board is of the view that there are still many possible routes within the EEZ to other destinations, including California and Asia. Further, weather, sea conditions, and hazards could all influence the most direct route out of the EEZ – in terms of time or distance.³³ The Board notes that the 270° northerly limit only applies to departing ships; the Board accepts that inbound ships can come from anywhere and, thus, from nearly any direction.³⁴

In contrast to the EEZ, designated shipping lanes in Canada's territorial sea require vessels to navigate in accordance with conditions set out in *Canada Shipping Act, 2001* and its regulations, including maps and charts that outline the designated shipping routes and are subject to enforcement.³⁵ Parliament does have limited authority, in accordance with international rules and standards, to implement ship routing measures in the EEZ to protect sensitive areas, but no such routing measures have been prescribed in Canada's EEZ. The Board cannot assess something that does not currently exist.

Living Oceans/Raincoast submit that extending the definition of "designated project" into the EEZ "would be useful in protecting the environment and reducing harm in a more complete manner than under the current Spatial Limit Decision" because "the geographical scope of the environmental assessment and its outcomes would be more complete if it included the entire area."³⁶ Importantly, as was the case with the Spatial Limit Decision, the Board must emphasize that none of the Parties adequately explained how an EA could be carried out in a meaningful way in the EEZ where the route of the tankers is uncertain.³⁷

TWN also provides examples of two offshore drilling projects within the EEZ, where the CEA Agency is assessing associated marine shipping activities in the EEZ as part of the designated project under the CEAA 2012. The Board is of the view that TWN has not adequately explained

²⁹ *Supra* note 1 at 15-16.

³⁰ *Supra* note 1 at 14 & 16. The Board is aware that the wording of this requirement has slightly changed in the updated versions of the WMTROG (10 October 2018) at s.14.12.1, at 73 ([A6J6H7](#)) and Master's Declaration and Vessel Information Checklist which forms part of the Trans Mountain Vessel Acceptance Standard (formerly known as the Tanker Acceptance Standard) (11 November 2018) at s.2.7.11, at 12 ([A6L2A5](#)). However, the primary concept of the 270° northerly limit remains the same.

³¹ Trans Mountain's reply to intervenor motion and applications of 16 November 2018 (4 December 2018) at 10 ([A96389](#)).

³² *Supra* note 21 at 8.

³³ See, for example, Trans Mountain's responses to information request from Pacheedaht First Nation (18 June 2014) response 1.07.2 at 76 ([A3Y3X4](#)).

³⁴ *Supra* note 31 at 10.

³⁵ *Supra* note 31 at 10.

³⁶ Living Oceans/Raincoast reply on application for review of spatial limit decision (6 December 2018) at 2-3 ([A96514](#)).

³⁷ *Supra* note 1 at 16.

how the assessment of marine support vessels for Mobile Offshore Drilling Units with known locations within the EEZ has any bearing on this case. In the Spatial Limit Decision, the Board already found that EAs of designated projects where the primary activities themselves have an identified location in the EEZ, such as offshore drilling, can be distinguished from the current situation.³⁸ TWN has merely provided an example of the former and the Board already considered this. The Board finds it telling that none of the Parties were able to provide an example of an EA under the CEAA 2012 that considered project-related marine shipping outside of the territorial sea where the primary physical activities for a project are onshore.

Living Oceans/Raincoast further submit that, in making the Spatial Limit Decision, the Board relied on unproven facts regarding the decline in probability and consequence of marine incidents with distance from the coast. As an expert tribunal, the Board has the discretion to determine the relevance and weight of the evidence before it. In this case, the Board was also mindful of the extensive record from both the OH-001-2014 Certificate hearing and this Reconsideration.³⁹ The Board notes that Living Oceans/Raincoast did not provide opposing evidence to contradict the contested statement. In any event, this was only one of many factors that the Board balanced in its overall reasons.

Lastly, the Board does not agree with the suggestion that environmental effects in the EEZ will be ignored if the EEZ is not included in the definition of “designated project.” The Board reiterates that it is important to distinguish the *effects* from the designated project from the extent of the designated project itself. The environmental *effects* of the project can still be considered under paragraph 5(1)(b) of the CEAA 2012 even if they occur in the EEZ or elsewhere outside of Canada. The Government of Canada’s evidence also discusses the Oceans Protection Plan, Whales Initiative, and other measures to preserve and restore marine ecosystems and habitats. Transport Canada is leading a Cumulative Effects of Marine Shipping initiative, which includes work on regional cumulative effects assessments.⁴⁰ It also remains open to the Minister of Environment and Climate Change to consider whether a regional study of marine shipping in the large area of the EEZ would be useful.⁴¹ These tools and initiatives are not an “excuse to avoid the mandatory requirements of CEAA 2012 and SARA” as alleged by Living Oceans/Raincoast.⁴² Rather, they are a way to address overall regional cumulative environmental effects in the EEZ, whereas a project-specific assessment in this case “would produce speculative, as opposed to meaningful, information about project impacts and, accordingly, would not be useful as a planning and decision-making tool for the GIC.”⁴³

Therefore, the arguments regarding EA considerations do not warrant overturning the Board’s Spatial Limit Decision.

³⁸ *Supra* note 1 at 18.

³⁹ For example, past evidence related to this point include Transport Canada, A Review of Canada’s Ship-source Oil Spill Preparedness and Response Regime – Setting the Course for the Future (15 November 2013) at 10-13 ([A4L7F7](#)); WSP Canada Inc., Risk Assessment for Marine Spills in Canadian Waters, Phase 1, Oil Spills South of the 60th Parallel (January 2014) at 72-88 ([A4L7L4](#)).

⁴⁰ Federal Authorities direct evidence (31 October 2018) at 27-29 ([A6J6L9](#)). The spatial and temporal boundaries for the regional cumulative effects assessment of marine shipping activities (including for South Coast British Columbia) are not yet known as these will be developed collaboratively through ongoing engagement. ⁴³ *Supra* note 1 at 16.

E. DE NOVO HEARING REVIEW

1. Executive summary of the De Novo Hearing Review

TWN filed a review application alleging, with respect to the Reconsideration hearing, a legal error by the Board in “failing to conduct a *de novo* hearing because the Panel appointed to undertake this Reconsideration hearing did not hear the original evidence and submissions of the parties.”⁴⁴

The Board finds that “he who hears must decide” is ousted expressly or by necessary implication. The Board considered that the nature of the focused Reconsideration is different than the original hearing. The Board also took into consideration that the NEB Act expressly provides that any quorum of the Board is “the Board.” The Board provides that Members have term limits, and that temporary members, as well as permanent members, may be assigned to hearings. The Chair of the Board has discretion in assigning Panels, and time limits are part of the scheme of the legislation. Section 53 contains different requirements than section 52. Section 53 is analogous to section 21 where review and variance applications are heard by any quorum of the Board.

In the relevant factual circumstances of this case, one of the original Panel Members’ term had expired and the GIC did not re-appoint him as a Board Member. Had only two of the original three Panel Members on the section 52 application been assigned to the Reconsideration, quorum requirements under the NEB Act would have been violated. If a *de novo* hearing had been set out, as TWN requests, the Reconsideration would have been unlikely to have concluded within the time limit set by the GIC. A *de novo* hearing would also have been inconsistent with the direction of the Federal Court of Appeal and the requirements of the OIC.

2. Factual background

On 16 December 2013, Trans Mountain filed its application with the Board for a Certificate of Convenience and Necessity and other relief.

On 9 July 2014, the Chair of the Board, pursuant to subsection 6(2) of the NEB Act, assigned a Panel of three Board Members (David Hamilton – presiding, Phil Davies, and Alison Scott) to consider the Project application.⁴⁵ Two of the Board Members, David Hamilton and Alison Scott, were temporary Members appointed under terms prescribed by the GIC.⁴⁶

A Hearing Order was issued, the scope of issues was identified in the List of Issues, and evidence and argument were received. On 16 May 2016, the Board issued its OH-001-2014 Report, including its recommendations, to the GIC under section 52 of the NEB Act and the CEAA 2012.

On 30 August 2018, the Federal Court of Appeal quashed the GIC’s approval of the Project. One of the reasons for quashing the GIC’s approval was that “the Board erred in unjustifiably excluding Project-related marine shipping from the Project’s definition.”⁴⁷ As a result of this conclusion, the Court directed that the GIC “must refer the Board’s recommendations and its terms and conditions back to the Board or its successor for reconsideration.”⁴⁸ The Court

⁴⁴ *Supra* note 21 at 2.

⁴⁵ Record of Decision of the Chair, Assignment of Panel (9 July 2014).

⁴⁶ In David Hamilton’s case, the [OIC](#) re-appointed him as a temporary Member of the Board, to hold an office for a term of three years, effective 1 July 2015. The GIC did not re-appoint David Hamilton after his term expired.

⁴⁷ *Supra* note 5 at para 468.

⁴⁸ *Ibid.* para. 769

directed that the Board reconsider on a principled basis whether Project-related shipping is incidental to the Project. If so, the Board was also to reconsider the application of section 79 of the *Species at Risk Act* (SARA) and the Board's EA, including the Board's significance recommendation under the CEAA 2012 and any other matter the GIC should consider appropriate.⁴⁹

On 20 September 2018, through the OIC,⁵⁰ the GIC referred specific aspects of the Board's Report for the Project back to the Board for reconsideration. The GIC referred back to the Board for reconsideration "the recommendations and all terms and conditions set out in its 19 May 2016 report ... **that are relevant to addressing the issues specified by the Federal Court of Appeal in paragraph 770 of *Tsleil-Waututh Nation***" [emphasis added]. The GIC further directed that the Board conduct the reconsideration taking into account environmental effects of Project-related marine shipping in view of the requirements of the CEAA 2012 and section 79 of the SARA. As directed by the OIC, the Board must complete its reconsideration by 22 February 2019 (within 155 calendar days after the Order was made).

On 24 September 2018, the Chair of the Board, pursuant to subsection 6(2) of the NEB Act, assigned a Panel of three Board Members (Lyne Mercier – presiding, Alison Scott, and Murray Lytle) to conduct the Reconsideration of the recommendation report on the Project pursuant to section 53 of the NEB Act.⁵¹ The Panel was assigned by the Chair of the Board to "make all decisions with respect to the National Energy Board's work in response to the 20 September Order in Council ... for reconsideration of the Report." At the time of the Panel assignment by the Chair of the Board, David Hamilton's appointment as a NEB Act section 4 temporary Member had expired. Prior to the end of his term, pursuant to subsection 16(6), the Chair of the Board had authorized David Hamilton to continue to inquire into, hear, and conclude certain specific proceedings that were already underway.⁵²

On 26 September 2018, the Board requested comment on a number of matters, including on the design of the hearing process to be used for the Reconsideration.

TWN provided submissions that:

[T]he case law and the Board's own rules recognize that a full *de novo* hearing is required as a consequence of the Board appointing a new panel for the Reconsideration Hearing. The age-old maxim of natural justice that 'he who decides must hear' applies to the Board. There is no statutory authority for the new panel members appointed by the Board to form opinions on evidence and submissions they did not hear, and agree with findings and conclusions they did not make. This clear breach of natural justice constitutes a reviewable error of law or jurisdiction.⁵³

In making its argument on this point, TWN referred the Board to *Johnny v. Adams Lake Indian Band*,⁵⁴ amongst other authorities.

⁴⁹ *Ibid.* para 770

⁵⁰ *Supra* note 19.

⁵¹ As referenced in Board letter (26 September 2018) at 1 ([A94153](#)).

⁵² Record of Decision of the Chair (20 June 2018).

⁵³ TWN comments on the draft Amended Factors and Scope of the Factors for the Environmental Assessment pursuant to the CEAA 2012, the draft List of Issues, and the design of the hearing process (3 October 2018) at 1-2 ([A612W8](#)).

⁵⁴ 2017 FCA 146 [*Johnny*].

After considering a number of comments received, the Board issued a Hearing Order MH-052-2018 and the List of Issues for the Reconsideration on 12 October 2018. On 29 October 2018, the Board issued the reasons for its decisions reached on 12 October 2018. On the issue of the *de novo* hearing that TWN has requested, the Board stated in part:

The rule that “he who hears must decide” does not apply where legislation expressly, or by necessary implication, ousts its application. In this case, the legislative scheme ousts the application of this rule. The addition of the reconsideration provision in the NEB Act in 2012 indicates Parliament’s intention to have an option that is distinct from a new project application. Subsection 53(2) provides specific authorization for the GIC to “direct the Board to conduct the reconsideration taking into account any factor specified in the order.” It is clear from this wording that Parliament intended that the Board could be directed to reconsider specific issues only, in which case there is no requirement for a *de novo* hearing or for all previous evidence heard orally to be reheard.

A careful reading of the NEB Act suggests that the legislation does not require a reconsideration to be carried out by the same Panel, but it does not prevent it either. Section 53 does not refer to the Board Panel, but says only that any recommendation can be referred back to “the Board.” Under the NEB Act, any quorum of the Board is “the Board” and can carry out the statutory obligations of the Board. The fact that an exception to quorum requirements exists for the original section 52 proceeding (see subsection 7(2.1)), but not for the section 53 reconsideration, also indicates that the reconsideration does not require the same Panel.

The rule that “he who hears must decide” can also be ousted by necessary implication in these circumstances. The legislation does not set a limit on the number of times that a report can be reconsidered. It would not be practical to expect the original Panel Members to remain available through an unlimited number of reconsiderations.⁵⁵

TWN now seeks a review of that determination.

3. Brief summary of comments in the review application

TWN’s comments⁵⁶ in support of its application included the following:

- While TWN agrees that the rule of “he who hears must decide” does not apply where legislation expressly or, by necessary implication, ousts its application, neither exception applies here.
- The same Panel must hear the Reconsideration that heard all previous evidence in the previous hearing, otherwise a *de novo* hearing is required.
- The plain meaning of “reconsideration” ought to be used, and quorum requirements referenced in the Board’s original decision as being different under section 52 then section 53 of the NEB Act “does not comport with a *Rizzo Shoes*⁵⁷ analysis.
- Practical considerations may only be considered when there is genuine ambiguity and, here, the plain meaning of “reconsideration” is obvious.

⁵⁵ *Supra* note 2 at 16-17.

⁵⁶ See TWN’s review application, *supra* note 21; TWN supplemental filing in support of TWN’s application for review (27 November 2018) ([A96156](#)); and reply, *supra* note 9.

⁵⁷ *Supra* note 23.

- The structure of the NEB Act leads to the opposite conclusion that the Board found since the Board is described as a “court of record” under section 11 of the NEB Act and is subject to fairness requirements.
- Cases from the Supreme Court of Canada, including *Ocean Port Hotel*,⁵⁸ directed that “courts will not lightly assume that legislators intended to enact procedures that run contrary to” fundamental principles of natural justice, and that a sound interpretation will always depend on statutory language, the nature of an agency’s task, and the type of decision it is required to make.
- To depart from the standard established by the Supreme Court requires “irresistible clearness.”
- When Trans Mountain submits that the Board is master of its own process, such an argument is misplaced because “he who decides must hear” is a principle of natural justice and not evidence.
- Reviewing a written transcript of past oral evidence is insufficient, particularly when singing and ceremony is involved.

A number of other intervenors provided comments supporting TWN’s review application. Many of the comments were consistent with those of TWN or, in many cases, were less detailed.

Trans Mountain and Alberta argue that there is no need for a *de novo* hearing. Their comments included the following points:

- Most of TWN’s arguments and case references simply repeat previous arguments and merely disagree with the result. The threshold question takes more than repeating an argument to raise doubt about correctness.
- Alberta cites *Consolidated Bathurst*⁵⁹ for the application of *audi alteram partem* rule where the Supreme Court discussed that the essence of the rule is that parties have a fair opportunity of answering the case against them. Citations by Alberta include paragraph 26 where the Court stated: “it has long been recognized that the rules of natural justice do not have a fixed content, irrespective of the nature of the tribunal and of the institutional constraints it faces.”
- For Indigenous intervenors, there was no impediment to providing whatever oral traditional evidence they wished during the Reconsideration.
- Alberta submits that the NEB Act ousts the application of the “he who decides must hear” rule. It points specifically to section 53 that provides for a referral back to “the Board” and that the Board includes “all Board Members.” It references that the Federal Court of Appeal also directed that the Reconsideration could be heard “by the Board or its successor.” Alberta also points to term limits, the unlimited number of reconsiderations that could occur, and the discretion of the Chair of the Board.
- Similar to Alberta’s arguments, Trans Mountain points to section 53 of the NEB Act as indicating an intention by Parliament to have an option distinct from a new project application. Further reference is made to the quorum provisions and the intention of Parliament to avoid an inflexible requirement.

⁵⁸ *Ocean Port Hotel v British Columbia (General Manager, Liquor Control and Licensing Branch)*, 2001 SCC 52 at para. 21.

⁵⁹ *IWA, Local 2-69 v Consolidated Bathurst Packaging Ltd*, [1990] 1 SCR 282 [*Consolidated Bathurst*].

- Trans Mountain focuses on the limited and discrete issues properly referenced in the OIC and identified by the Federal Court of Appeal, and these issues will be determined by the Panel assigned to the Reconsideration. It further states that the Reconsideration Panel will have access to all past filings, but that the Reconsideration Panel is not “rehearing” the original evidence or matters already decided.
- Trans Mountain points to *CRTC* where the Supreme Court found that the overarching scheme in that case did not require the imposition of a strict rule.⁶⁰
- Trans Mountain states that the GIC remains the final decision-maker.

4. Phase I – Has TWN raised a doubt as to the correctness of the Board’s decision not to have a *de novo* hearing?

The Board considers that many of the legal arguments raised and cases cited are similar or identical to those raised previously in comments received about the design of the hearing process for the Reconsideration. There are no new facts that were not discoverable at the time of the Board’s original decision not to have a *de novo* hearing. Any additional Court precedents referred to now could also have been discussed during that initial comment process.

With respect to its argument alleging an error of law, TWN agrees with the legal test the Board used: the Rule of “he who hears must decide” does not apply where legislation expressly, or by necessary implication, ousts its application. However, TWN disagrees with the Board’s previous determination that “the legislative scheme ousts the application of this rule.” In TWN’s original submissions, it acknowledged the time limit set by the OIC. It also discusses the case law on the *de novo* issue from the Supreme Court of Canada and Federal Court of Appeal, including the *Johnny* case which TWN discusses further in its review application.

Essentially, TWN does not like the conclusion reached after the Board considered TWN’s comments on hearing process at first instance, and TWN has re-argued the same points raised initially in somewhat more detail. TWN acknowledges that the Board relied in-part on an interpretation of subsection 53(2) that allows the GIC to direct a focused reconsideration hearing, but TWN argues the plain meaning of “reconsideration” ought to be used and that quorum requirements referenced in the Board’s original decision as being different under section 52 then section 53 of the NEB Act “does not comport with a *Rizzo Shoes* analysis.” Other than focusing on plain meaning, TWN does not say how the specific language of section 53, or the Board’s conclusion about quorum requirements, was an error of law.

TWN does include some brief comment about section 11 of the NEB Act and argues that taking into account this section will lead to an opposite conclusion than the Board found. However, TWN provides very little analysis regarding the overall structure of the NEB Act, or to sections other than section 11 that may have relevance, including those previously discussed by the Board.

The Board is mindful that it should not delve deeply into the merits or weighing evidence at this step and that Phase I is meant to be an initial threshold merely requiring a *prima facie* case. However, in this case the Board is of the view that TWN has not met the initial threshold requirement of establishing a *prima facie* case that an error of law was made in the circumstances of the Reconsideration. As the Board has stated previously:

⁶⁰ *Canadian Radio-Television & Telecommunications Commission v CTV Television Network Ltd. et al*, [1982] 1 SCR 530 [CRTC].

[A] review request is not an opportunity to re-argue the same points previously raised, or to provide new argument that could have been raised in the Original Motion.⁶¹

Here, TWN has provided a similar argument to the one it previously provided prior to the Board's decision on the *de novo* hearing issue. TWN disagrees with the Board's past conclusions without raising a *prima facie* case that a legal error was made, although largely it merely re-argues points that the Board previously considered. While not delving fully into all the case law discussed by all Parties, in *Ocean Port Hotels*,⁶² which TWN has cited, the Court stated: "interpretation will always depend on statutory language." The Board is of the view that TWN has provided minimal analysis about the overall statutory language of the NEB Act.

As a result of TWN failing to raise a doubt as to correctness, its review application is dismissed. However, should it be determined that the Board erred in its Phase 1 determination, the Board has gone on to consider the merits of TWN's arguments.

5. Phase II – Review of the merits of the Board's decision not to have a *de novo* hearing

5.1 Legal test

TWN, Trans Mountain, and Alberta agree that the Board used the correct legal test for determining if the rule that "he who hears must decide" applies in this case. At issue is whether the NEB Act expressly or, by necessary implication, ousts its application in the specifics of this Reconsideration.

As stated by the Supreme Court of Canada in *Consolidated Bathurst*:

[I]t has long been recognized that the rules of natural justice do not have a fixed content, irrespective of the nature of the tribunal and of the institutional constraints it faces. This principle was reiterated by Dickson J. (as he then was) in *Kane v. University of British Columbia Board of Governors*, [1980] 1 S.C.R. 1105 at 1113, 18 B.C.L.R. 124, [1980] 3 W.W.R. 125, 110 D.L.R. (3d) 311, 31 N.R. 214: 2. As a constituent of the autonomy it enjoys, the tribunal must observe natural justice which, as Harman L.J. said, [*Ridge v. Baldwin*, at p. 850] is only 'fair play in action'. In any particular case, the requirements of natural justice will depend on 'the circumstances of the case, the nature of the inquiry, the rules under which the tribunal is acting, the subject-matter which is being dealt with, and so forth', per Tucker L.J. in *Russell v. Duke of Norfolk*, at p. 118. **To abrogate the rules of natural justice, express language or necessary implication must be found in the statutory instrument.**

[Emphasis added.] The main issue is whether, given the importance of the policy issue at stake in this case and the necessity of maintaining a high degree of quality and coherence in Board decisions, the rules of natural justice allow a full Board meeting to take place subject to the conditions outlined by the Court of Appeal and, if not, whether a procedure which allows the parties to be present, such as a full Board hearing, is the only acceptable alternative.

Consistent with its decision in *Consolidated Bathurst*, the Supreme Court in *Ocean Port Hotel* discussed that it will not lightly assume that legislators intended to depart from the "he who hears must decide" principle and that it will depend **"on all circumstances, and in particular on the**

⁶¹ Board Ruling No. 122 – Pro Information Pro Environment United People's Network – 30 December 2015 request for a review of Ruling No. 101, 1 March 2016 ([A4Y4G2](#)).

⁶² *Supra* note 58.

language of the statute under which the agency acts, the nature of the task it performs and the type of decision it is required to make” [emphasis added].⁶³ As *Consolidated Bathurst* and other cases such as *Ocean Port Hotel* make clear, when deciding if this requirement of natural justice applies, it is necessary to look in detail at the nature of the Reconsideration, the language of the legislation, and the relevant factual circumstances. Those points will form the structure of the Board’s analysis.

5.2 Nature of the Reconsideration

As detailed above in the factual background, the Federal Court of Appeal directed that the Board reconsider, on a principled basis, whether Project-related marine shipping is incidental to the Project. If so, the Board is to reconsider the application of section 79 of the SARA and the Board’s EA, including the Board’s significance recommendation, under the CEAA 2012, and any other matter the GIC should consider appropriate.

The GIC, in its OIC, limited the reconsideration of the recommendations and terms and conditions to all those “that are relevant to addressing the issues specified by the Federal Court of Appeal in paragraph 770.” The Board, therefore, considers that the subject matter of the Reconsideration is distinct from a new project application and is focused on marine shipping that is incidental to the Project and on the application of the CEAA 2012 and section 79 of the SARA. While there can be changes to recommendations and certain conditions, it is a much more narrow mandate than the OH-001-2014 Certificate hearing. As a result, the List of Issues for the Reconsideration is also narrower than the original hearing. There have also been some changes in Parties, with a number of intervenors from the original hearing not participating in the Reconsideration, and new intervenors being added after submitting applications to participate.⁶⁴

TWN appears to assume that the original hearing and the Reconsideration hearing are the same. They are not. Section 53 allows the GIC to direct the Board to take into consideration only “factor(s) specified in the order.” Consistent with the direction of the Federal Court of Appeal, the GIC has directed the Board to conduct a focused reconsideration that is different than the scope of the original hearing. While the Board will have to reconsider its recommendation under the CEAA 2012 about significance, as well as its section 52 NEB Act recommendation about the present and future public convenience and necessity for the Project, the Board will only be considering changes related to the List of Issues in the Reconsideration. While Parties may refer to previous evidence as it is relevant to the List of Issues, the Board will not be reconsidering all of the benefits and burdens of the Project.

The Chair of the Board assigned a Panel for the original hearing and the Panel issued its Report. More than two years after the original Report was issued, the Federal Court of Appeal quashed the Project certificate. The Federal Court of Appeal directed that the Board’s recommendations must be referred back to “the Board or its successor, for reconsideration.” The resulting OIC then outlined specific factors for the reconsideration and imposed a time limit. The Chair of the Board then assigned a specific Panel consistent with both his authority under subsection 6(2) of the NEB Act and the direction of the Federal Court of Appeal.

Cases such as *Johnny*, which are relied on by TWN, are not helpful in understanding the specific nature of a reconsideration as set out under section 53 of the NEB Act. Here, the Board is dealing with a focused reconsideration about Project-related marine shipping and will submit a report and recommendations to the GIC. This can be contrasted to the facts in *Johnny* which involved a

⁶³ *Supra* note 56.

⁶⁴ The OH-001-2014 Certificate hearing had approximately 400 intervenors. The Reconsideration hearing has approximately 120 intervenors. Approximately 73 per cent of current intervenors were intervenors in the original hearing.

decision to remove a Councillor made by an elected Community Panel. In *Johnny*, some of the Members of the Community Panel were not present for significant portions of the oral evidence where credibility was at issue and yet they still participated in the removal decision. *Johnny* is not analogous to this Reconsideration.

5.3 Language of the legislation

At issue is whether the language of the NEB Act either expressly or, by necessary implication, ousts the strict application of “he who hears must decide.” The interpretation of the NEB Act must be based on the modern principle of interpretation, which requires the words in the statute to be read in their entire context and in their grammatical and ordinary sense, harmoniously with the scheme of the NEB Act and the intention of Parliament.⁶⁵

Section 11 refers to the Board as a “Court of record,” but it is one of a number of relevant sections, and it is not determinative. The Board disagrees that a plain reading of the word “reconsideration” is determinative as TWN does not appear to consider the language and provisions surrounding this term.

There are a number of sections of the NEB Act relevant to interpreting Parliament’s intent. These include the following:

- Board means the National Energy Board established by section 3.
- Section 4 allows for temporary Members appointed on terms the GIC may prescribe.
- Subsection 6(2) provides the Chair of the Board with discretion as to the formulation of any Panel of the Board.
- Subsection 7(2) establishes quorum requirements. As the original decision of the Board stated,⁶⁶ any quorum of the Board is “the Board” and can carry out the statutory obligations of the Board.
- Subsection 7(2.1) provides an exemption to quorum requirements for the original section 52 proceeding, but not for a section 53 reconsideration.
- Subsection 6(2.2) authorizes the Chair of the Board to take measures appropriate to ensure a time limit is met under section 52. Such authorization does not apply for section 53.
- Subsection 11(4) requires that “all applications and proceedings before the Board are to be dealt with as expeditiously as the circumstances and considerations of fairness permit, but, in any case, within the time limit provided for under this Act, if there is one.”
- Section 21 provides that the Board may review, vary and rescind any decision or order made by it.
- Section 52 sets out a broad list of factors that the Board may have regard to in preparing a report under this section.
- As discussed previously, section 53 provides for the option for the GIC to direct the Board to conduct a focused reconsideration “taking into account any factor specified in the order.”
- Section 53 also provides that the GIC may specify a time limit within which the Board must complete its reconsideration.

⁶⁵ *Supra* note 23.

⁶⁶ *Supra* note 2 at 16.

- Subsection 53(9) allows the GIC to refer the Board’s reconsideration report back to the Board for reconsideration again. There is no limit to the number of times a reconsideration can be directed.

Parliament expressly provides that, under the NEB Act, any quorum of the Board is “the Board” and can carry out the statutory obligations of the Board. Section 53 states that the GIC may refer the recommendation, or any terms and conditions, “back to the Board for reconsideration.” Had Parliament intended that only the original Panel Members could participate in a reconsideration, different language could have been used. Subsection 6(2) provides the Chair of the Board with broad authority in assigning a Panel of the Board.

Section 53 is analogous to section 21 where “the Board” may review, vary, or rescind any decision or order made by it. There is no time limit for when a review application may be filed. In some instances, the original Panel Members will hear a review application and, in other instances, the reviewing Panel may include different Members as they are a quorum of the Board.

Parliament would have known that it has appointed temporary Members as well as permanent Members, all with term limits. Such Members will not necessarily be available or eligible for any number of reconsiderations under section 53. Parliament also intended that reconsiderations require a quorum of three Board Members. As Alberta states, since nothing in the NEB Act precludes the reconsideration of a recommendation where a Board Member’s term has expired, by necessary implication, it follows that such a Member could be replaced.

Given the quorum requirements under section 53, it is not logical or practical that the GIC could specify a time limit under section 53, but yet if not all three original Members are available or eligible for assignment that a strict application of “he who hears must decide” would be required and a rehearing of the entire proceeding would follow. Focused hearings and time limits under section 53 would have no meaning if a *de novo* hearing were frequently required due to quorum requirements. It is a well-established principle of statutory interpretation that the legislature does not intend to produce absurd consequences.⁶⁷

For all of these reasons, a purposive approach to interpreting the NEB Act, expressly or by necessary implication, ousts the application of “he who hears must decide.”

While the language of the legislation is clear and persuasive, it is also informative to consider the relevant factual circumstances.

5.4 Relevant factual circumstances

As the Court directed in *Consolidated Bathurst*, it is necessary to look at the relevant factual circumstances in this situation.

In this case, the OIC directing a focused reconsideration was issued almost 2.5 years after the original Board Report was issued. When the Chair of the Board assigned a Panel of the Board to the Reconsideration, one of the original Panel Members’ (David Hamilton) term had expired. At that time, David Hamilton was only a Board Member for the limited purpose of concluding specific proceedings under subsection 16(6). David Hamilton was not re-appointed as a Board member by the GIC, and the Chair of the Board did not appoint him as a Member of the Reconsideration Panel. Had only two of the original Panel Members been assigned to hear the Reconsideration, quorum requirements under subsection 7(2) would not have been satisfied.

⁶⁷ *Supra* note 23 at para 27; Ruth Sullivan, *Sullivan on the Construction of Statutes*, 6th ed. (Markham, Ontario: LexisNexis Canada, 2014) at §10.4.

Directing a *de novo* hearing would not have been consistent with the direction of the Federal Court of Appeal or the OIC. It is also highly unlikely that a *de novo* hearing could have been completed in anywhere close to the time limit specified in the OIC.

In the context of this Reconsideration hearing, the Board is of the view that Indigenous intervenors and other Parties have a fair opportunity to answer the case. Just as an opportunity for Indigenous intervenors to present oral traditional evidence was provided in the original hearing, it has also been provided in this Reconsideration hearing. Decisions about what evidence to provide in the Reconsideration were left to each Indigenous intervenor.⁶⁸ Also, much of the evidence in the original hearing was written, as is the case in this Reconsideration hearing.

Notwithstanding that the procedural fairness owed in the Reconsideration is significant, it remains unchanged that the GIC is the ultimate decision-maker and will make its decision based on the entire record before it.

The overall factual circumstances support that the Board's initial decision on this issue was correct and should not be varied.

F. NEED FOR AND SOCIO-ECONOMIC EFFECTS REVIEW

Phase I – Has TWN raised a doubt as to the correctness of the Board's decision to exclude the need for and socio-economic effects of the Project from the List of Issues?

TWN submits that the economics of the Project have changed materially since the Board's OH-001-2014 Report was issued, and that new evidence is required as a result of a "wide range of issues" in connection with the justification analysis under the CEAA 2012 and the Board's consideration of the public interest under the NEB Act.⁶⁹ TWN further submits that "[i]t goes without saying that the Project is not in the public interest and the environmental effects it will visit upon the environment cannot be justified in the circumstances because it is not needed and it is uneconomic."⁷⁰ Various other intervenors provided comments in support of TWN. For example, Georgia Strait Alliance states that "it would not be reasonable for the Board to come to a justification recommendation by trying to weigh on the same scale the current information regarding Project-related marine shipping along with three-year-old evidence regarding other aspects of the Project."⁷¹ Trans Mountain and Alberta provided comments opposing TWN's Need for and Socio-Economic Effects Review.

The Board is not persuaded that the submissions raise a doubt as to the correctness of its Process Design Decision as it relates to the need for and socio-economic effects in the List of Issues. TWN's submissions in its review application are almost identical to its comments provided during the Board's initial comment process, which the Board already considered in its Process Design Decision. The Board must reiterate that a review application is not an opportunity to re-argue the same points previously raised. TWN fails to make an arguable case that there was any error of law or of jurisdiction. Although TWN filed evidence regarding Project need and economics, it does not adequately explain the basis for expanding the List of Issues in a manner that is inconsistent with the direction in the OIC and *Tsleil-Waututh Nation*.

⁶⁸ *Supra* note 2 at 17.

⁶⁹ *Supra* note 21 at 18-19.

⁷⁰ *Supra* note 9 at 15-16.

⁷¹ Georgia Strait Alliance comments on motion and applications (30 November 2018) at 4 ([A96424](#)).

TWN's review application does not change the Board's findings in relation to this issue:

The Board is also not persuaded that it should re-examine issues that are outside of the GIC's direction in the OIC. In the Board's view, it is consistent with the purpose of section 53 of the NEB Act for the GIC to direct the Board to conduct a reconsideration focused on a specific issue or issues. To interpret section 53 as requiring new evidence or *de novo* findings on all issues, despite the direction in the OIC, would not be consistent with the statutory scheme of the NEB Act, including the requirement for expeditious proceedings under subsection 11(4). In this case, the OIC was specific about the issues the Board was to reconsider under the CEAA 2012 and the SARA. The Board was not directed to reconsider all issues from the OH-001-2014 Certificate hearing, nor does paragraph 770 of the Federal Court of Appeal's decision speak to all issues. The Board accepts that, as time passes, there will always be some changes in facts and short-term changes in markets. However, the need for the Project is not negated by short-term market fluctuations. As the Board stated in its OH-001-2014 Report, "[t]here is always a degree of uncertainty in projecting the long term utilization of transportation facilities since utilization is influenced by many variables, including supply, market development and the evolution of transportation infrastructure overall."⁷²

Further, no Party dealt with the Board's reference to Condition 57, the "commercial support" condition, which ensures that the pipeline will be used and useful.

Lastly, while TWN's and other intervenors' submissions on this topic focused on the "need for" the Project, the grounds for review also include the Board's apparent decision to exclude the socio-economic effects of the Project from the List of Issues. The Board is of the view that this is not an accurate characterization of its treatment of socio-economic effects. In its Process Design Decision, the Board clarified the List of Issues by adding a footnote to explain that all references to environmental effects in the List of Issues include health and socio-economic matters as described in section 5 of the CEAA 2012.⁷³ None of the Parties adequately addressed this clarification.

The Board is not persuaded that TWN has raised a doubt as to the correctness of the Board's Process Design Decision with respect to the need for and socio-economic effects in the List of Issues. Therefore, the Need for and Socio-Economic Effects Review is denied.

G. CONCLUSION

For the reasons above, TWN's and Living Oceans/Raincoast's applications for review are dismissed.

Yours truly,

Information Request of Stó:lō Collective

**Trans Mountain Expansion Project
Reconsideration**

Question #	Stó:lō Collective 1 - Impact Assessment and Exercised Established or Asserted Fishing Rights and/or Assertion of a Range of other Aboriginal Rights in the Vicinity of the WMT
Reference:	A95292-17 Annex 04.C.01 – A6J6R4 - Joint Federal/Provincial Consultation and Accommodation Report for the Trans Mountain Project including Relevant Annexes (the “CAR”)
Preamble:	As outlined in the CAR, there are specific Stó:lō communities identified as having rights in the Salish Sea near the vicinity of the Westridge Marine Terminal (the “WMT”). The CAR concludes that, with the exception of effects on the Southern Resident Killer Whale population, the magnitude of effects of Project-related marine vessel traffic on traditional marine resource uses, activities, and sites is low. The CAR describes, amongst other things, the following findings at page 84: • Despite Burrard Inlet being a heavily urbanized environment, Aboriginal groups have managed to sustain minimal levels of harvesting while pursuing re-establishment of certain species, and remediation of polluted areas. • The Crown understands that there are five Aboriginal group entities that either exercise established or asserted fishing rights and/or assert a range of other Aboriginal rights in the vicinity of the WMT: Tsleil-Waututh Nation, Squamish Nation, Musqueam Indian Band, First Nations of the Hul’qumi’num Treaty Group, and four Stó:lō groups (Shxw’ōw’hámél, Soowahlie, Skawahlook, and Seabird Island). • Regarding the impacts of Project-related marine shipping, marine travel supporting potential marine harvesting in the vicinity of the WMT has been limited for quite some time, but has the potential to be further limited given increased traffic in the waters surrounding the WMT. The Vancouver Fraser Port Authority has been slowly making changes to its navigation channels and anchorages to align with modern demands; however, the Crown notes that the Project would result in more Project-related marine shipping in eastern Burrard Inlet and potential conflicts with Aboriginal groups. • In general, the Crown considers there is a low possibility of navigational impacts affecting access to marine harvesting activities. Vessel traffic from the WMT will utilize existing deep-sea navigational channels and constraints for vessel interactions with these channels will remain unchanged. The Crown notes that Project-related impacts on navigation and cultural practices – specifically in eastern Burrard Inlet in proximity to the WMT – will exist for the lifetime of the Project, and will occur daily. While navigation is already significantly affected by deep-sea vessel traffic in Burrard Inlet, the existing four anchorages south and east of Cates Park will be occupied consistently if terminal operations commence, which is not the case currently.
Request:	We request the following: (a) Please provide a rationale for the conclusion that only those four Stó:lō groups have asserted or exercised rights within Burrard Inlet and the Salish Sea.

	(b) Please provide a foundation for the conclusion that increased marine traffic within the Salish Sea and increased anchoring outside of the Burrard inlet will have a low impact on Aboriginal rights.
Response:	(a) As outlined in the 2016 Crown Consultation and Accommodation Report Appendix for the Stó:lō Collective (representing at that time: Aitchelitz First Nation, Kwaw-Kwaw-Apilt First Nation, Leq'á:mel First Nation, Shxwhá:y Village, Skawahlook First Nation, Skwah First Nation, Soowahlie Indian Band, Sq'éwlets First Nation, Squiala First Nation, Sumas First Nation, Tzeachten First Nation, and Yakweakwioose First Nation) [MH-052-2018; A95292-17, Annex 4.C.01, PDF page 429-470], the Crown's understanding of concerns raised by the Stó:lō Collective in 2016, including the Crown's conclusion of the impacts of the Project to Stó:lō Collective members' rights and title, and the depth of consultation owed to the Stó:lō Collective are described in further detail in Appendix C.19 of the CAR including input from individual communities of the Stó:lō Collective. The Crown's depth of consultation assessment is iterative and is expected to evolve as the NEB reconsideration hearing unfolds and as Indigenous communities, governments and nations engage in re-initiated consultations with the Crown. The Crown's interpretation of depth of consultation owed and impacts on rights will continue to be updated in collaboration with members of the Stó:lō Collective to ensure a thorough understanding of potential or established rights, and any potential impacts of the Project on those rights. (b) Please refer to response to information request 1a.
Responding FA:	Natural Resources Canada

Question #	Stó:lō Collective 2 – The Fate of Diluted Bitumen
Reference:	• A95292-42 Annex 06.D.19 – A6J6T9 – A study of the 46-year-old Arrow oil spill: Persistence of oil residues and variability in oil contamination along Chedabucto Bay, Nova Scotia, Canada • A95292-43 Annex 06.D.20 – A6I6U0 – Occurrence, source and ecological assessment of petroleum related hydrocarbons in intertidal marine sediments of the Bay of Fundy, New Brunswick, Canada • A95292-48 Annex 06.D.24 – A6J6U5 – Flow Behaviour of Oil: What Makes Diluted Bitumen Different? • A95299-3 Annex 06.D.29 – A6J6Y2 – Meso-scale studies on the penetration and retention of diluted bitumen in different types of shorelines, Northern British Columbia, Canada • A95299-15 Annex 6.D.41 – A6J6Z7 – Fate of photodegraded dilbit in Seawater. Use of Cold Lake Blend and Access Western Blend with natural solar light in Ottawa, Canada over winter and summer seasons to assess the impact of sunlight on the chemical fate of dilbit • A95299-23 Annex 07.G.06 – A6J7A5 – An estimate of the sinking rate of spilled diluted bitumen in sediment laden coastal waters
Preamble:	All of the above-referenced documents discuss the fate of diluted bitumen through a variety of different lenses and a variety of different geographical locations. All of these locations are outside the geographical bounds and the watershed boundaries of the Fraser River Watershed and the Burrard Inlet and as such there is reason to question to the validity of using such scientific studies that investigate the fate of diluted bitumen in the discourse of the Salish Sea within the area defined through the Reconsideration Hearing. The environmental conditions contained in the methodology of these studies do not investigate the specific conditions of the Pacific Ocean, particularly the Strait of Juan de Fuca.
Request:	We request answers from the Department of Fisheries and Oceans and the Department of Environment and Climate Change to the following questions: (a) Do the above-referenced case studies provide an accurate review of hydrocarbon in intertidal marine sediments given the difference in water temperatures, salinity and intertidal areas within the Pacific (especially the Fraser River)? (b) Are the above-referenced case studies an accurate review of weathering, degradation and natural attenuation given the differences in water temperatures, salinity, atmospheric pressures, temperatures, and storm confluences? (c) Given that the area of the Strait of Juan de Fuca, also known as the insular belt, is made up of metamorphic grades of rock, is it appropriate to compare the bedrock platforms overlaid with sedimentary rock of northern British Columbia with that of the insular belt metamorphic rocks? (d) Given that the Strait of Juan de Fuca has variable density stratification and temperature compared to the Douglas Channel in northern British Columbia,

	can the study located at Annex 07.G.06 accurately predict the fate of diluted bitumen within the Strait of Juan de Fuca or the Salish Sea? (e) Is it appropriate to use in this Reconsideration Hearing the findings of studies that do not investigate the fate of diluted bitumen in similar scenarios and similar conditions of the Pacific Ocean/Salish Sea and the Strait of Juan de Fuca?
Response:	(a) Environment and Climate Change Canada The studies were undertaken at different locations than the waters of southern British Columbia. Two of the studies are laboratory only. One is directly concerned with Pacific coastal shorelines: Annex 06.D.29, which examined several northern BC coast types. None of the ECCC studies (in Annex 06) directly report on conditions of the southern BC coast at this time. Collectively, these references, along with others ECCC has submitted into evidence and those from partner departments, are very valuable in understanding the range of behaviours possible in the waters of southern BC. While more work is pending, at this time, these studies provide a foundation of knowledge that answer many of the questions of how oil sands products, including diluted bitumen, may behave in the coastal waters of southern BC if spilled. The south coast of BC and the Fraser River is a priority research area for ECCC and others. This area has an extensive shoreline data set collected over many years by several agencies. At this time, ECCC utilizes shoreline data collected by the Province of British Columbia (BC) and shared with ECCC for spill preparedness and response related activities. Specific details on the date of the BC data would be available from the Province. Fisheries and Oceans Canada While not specific to the Salish Sea, the referenced papers provide data on hydrocarbon behaviour over a range of temperature, salinity and substrate types in the environment, as well as under controlled lab conditions. Taken together, the data may be used to make predictions for the fate and behaviour of oil in areas in which oil spills have not occurred. (b) Environment and Climate Change Canada A95292-42 Annex 06.D.19 - A6J6T9 reflects coastal Atlantic conditions, A95292-43 Annex 06.D.20 - A6J6U0 reflects those in the Bay of Fundy. A95299-3 Annex 06.D.29 - A6J6Y2 reports on studies of A95292-48 Annex 06.D.24 - A6J6U5 and A95299-15 Annex 06.D.41 - A6J6Z7 are laboratory studies reporting on examinations of temperature and salinity factors that may influence oil flow behaviour and chemical fates, respectively. Collectively, these references, along with others ECCC has submitted into evidence and those from partner departments, are very valuable in understanding the range of behaviours possible in the waters of southern BC. While more work is pending, at this time, these studies provide a foundation of knowledge that answer many of the questions of how oil sands products, including diluted bitumen, may behave in the coastal waters of southern BC if spilled.

Fisheries and Oceans Canada

The individual referenced papers cited provide insight on hydrocarbon behaviour over a range of temperature, salinity and substrate types in the environment, as well as under controlled lab conditions. DFO has not integrated the results to provide a review of weathering, degradation and natural attenuation, given the differences in water temperatures, salinity, atmospheric pressures, temperatures, and storm confluences.

(c) Environment and Climate Change Canada

Collectively, these references, along with others ECCC has submitted into evidence and those from partner departments, are very valuable in understanding the range of behaviours possible on those shorelines considered. While more work is pending, at this time, these studies provide a foundation of knowledge that answer many of the questions of how oil sands products, including diluted bitumen, may behave in the rock formations of southern BC if spilled.

The south coast of BC area, including the Strait of Juan de Fuca are priority areas for ECCC and others. In the past few years, several groups including the Indigenous Nations, ECCC and the Department of Fisheries and Ocean have undertaken work to update the shoreline data set. This included aerial overflights and ground surveys at selected location. The Burrard Inlet is one of the pilot areas in the Area Response Planning Initiative and recently surveyed in 2018. The Burrard Inlet shoreline data has been segmented and is currently being reviewed for quality control. Fact Sheets providing an overview of the survey are included as Stó-lō Collective 2-1 Annex: Current Condition Shoreline Survey, July 10 to July 16, 2018 and Stó-lō Collective 2-2 Annex: Updating Shoreline Information for the Central-North British Columbia Coast.

(d) Fisheries and Oceans Canada

The model equations developed in A95299-23 Annex 07.G.06 – A6J7A5 are idealized but quite general and not specific to Douglas Channel. However the application to Douglas Channel uses temperature and salinity profiles from Douglas Channel in both winter and summer. Therefore the results presented are specific to Douglas Channel. Application to other regions, such as the Strait of Juan de Fuca or the Salish Sea, would require temperature and salinity profiles for those regions. Note that the model is an idealized model and many processes are simplified. As stated in Section 6 Discussion and Summary (page 343) ‘Thus the sinking ratios here are best thought of as first estimates of the upper bounds on the sinking ratios.’

(e) Natural Resources Canada

With the accumulated knowledge from previous spill events of petroleum products from diesel to conventional crudes to diluted bitumen to bunker fuels into water environments, supplemented with lab- and tank-scale testing under specific conditions, there is sufficient knowledge to understand the range of behaviours that diluted bitumen may have if spilled in the Pacific Ocean/Salish Sea and the Strait of Juan de Fuca. In particular, there is scientific consensus (Reference 1) that behaviour of all crudes including diluted bitumen will depend upon the environmental conditions of the spill. As well, there is consensus that the behaviour of diluted bitumen products falls within the range of behaviours found for

	petroleum crude oils and products and so current spill response technologies for recovery of both floating and sunken oils can be used. However, as diluted bitumen viscosity increases relatively quickly after a spill, use of spill treatment agents such as dispersants have relatively short windows of opportunity for use. For any specific site there will be a range of conditions over different times of the year so behaviour at that site can be variable. Research simulations of spill conditions are closest to field spill scenarios in open tank systems. Under conditions tested to date (Reference 2), diluted bitumen oil masses tested have floated on fresh water for at least 21 days, allowing time for surface recovery. Portions of diluted bitumen have been found to submerge in fresh water after it has been exposed to salt water due to its tendency to pick up water (Reference 3) i.e. if it picks up salt water first, it will be more dense than fresh water and so submerge. However, research continues to develop more detailed knowledge particularly around the effects of air and water temperatures on the oil components distribution in the environment, and the resulting impacts on weathering processes and toxicity. CURRENT CONDITION SHORELINE SURVEY JULY 10 TO JULY 16, 2018

Environment and Climate Change Canada (ECCC) Emergency Science and Technology Section is an internationally recognized research Centre with an established oil spill research and development program focused on addressing shoreline issues. Under the Oceans Protection Plan, these scientists are carrying out a number of studies to gather current data about the conditions of the shoreline throughout Canada. This work is important because shorelines are environmentally essential to ecosystems and are key resources to protect.

The coastlines surveyed to date include the Douglas Channel, Grenville Channel and a number of islands along the eastern side of Hecate Strait British Columbia, including Haida Gwaii Island; Port Hawkesbury and the Straits of Canso, Nova Scotia; Saint John and the Bay of Fundy, New Brunswick; and Parc National du Bic, near the community of Baie du Ha Ha in Quebec.

In British Columbia, from July 10 to July 16, 2018, ECCC shoreline specialists will be conducting scientific survey

of selected shorelines throughout the priority coastline of the Burrard Inlet, in the Port of Vancouver area and Indian Arm. This work will be done with partners, including the Tsleil-Waututh Nation, Fisheries and Oceans Canada, local municipal government, the Province of British Columbia, and industry. ECCC is collaborating with many agencies to collect as much data as possible across all scientific fields.

The survey will include measuring the slope of the shoreline, taking photos, digging a few test pits to determine the types and depth of sediments and taking sediment samples. All surveys are being done at low tide so that scientists can study the exposed shoreline zones.

The environmental data gleaned from these studies will be used to strengthen our science-based decision-making and will help protect our marine environments and communities from the potential effects of spills and day-to-day vessel operations.

The ground survey will take place at specific sites around the Inlet.

INVENTAIRE DE L'ÉTAT ACTUEL DU LITTORAL DU 10 AU 16 JUILLET 2018

La Section des urgences – Science et technologie d'Environnement et Changement climatique Canada (ECCC) est un centre de recherche de renommée internationale qui a un programme établi de recherche et de développement sur les déversements de pétrole qui est axé sur les questions touchant le littoral. Dans le cadre du Plan de protection des océans, ces scientifiques réalisent des études pour recueillir des données actuelles sur l'état du littoral partout au Canada. Ce travail est important parce que le littoral est essentiel sur le plan environnemental pour les écosystèmes et qu'il est une ressource essentielle à protéger.

Jusqu'à présent, des inventaires du littoral ont été effectués dans le chenal Douglas, le chenal Grenville et plusieurs îles du côté est du détroit Hecate, en Colombie-Britannique, dont les îles Haida Gwaii; à Port Hawkesbury et dans le détroit de Canso, en Nouvelle-Écosse; à Saint John et dans la baie de Fundy, au Nouveau-Brunswick; au parc national du Bic, près de la collectivité de la baie du Ha! Ha!, au Québec.

En Colombie-Britannique, du 10 au 16 juillet 2018, les spécialistes du littoral d'ECCC effectueront un

inventaire scientifique de rivages sélectionnés le long de la côte prioritaire du bras de mer Burrard Inlet, dans le secteur du port de Vancouver et à Indian Arm. Ce travail sera réalisé avec des partenaires, dont la Nation Tsileil-Waututh, Pêches et Océans Canada, les municipalités locales, la Province de la Colombie-Britannique et l'industrie. ECCC collabore avec de nombreux organismes pour recueillir le plus de données possible dans tous les domaines scientifiques.

L'inventaire comprendra la mesure de la pente du littoral, la prise de photos, le creusage de quelques trous d'exploration pour déterminer les types et la profondeur des sédiments ainsi que le prélèvement d'échantillons de sédiments. Tous les relevés ont lieu à marée basse pour permettre aux scientifiques d'étudier les zones exposées du littoral.

Les données environnementales tirées de ces études serviront à renforcer notre processus décisionnel scientifique et contribueront à la protection de nos milieux marins et collectivités maritimes contre les effets possibles de déversements et de la navigation quotidienne.

Les relevés de terrain seront effectués à des endroits déterminés autour du bras de mer.

UPDATING SHORELINE INFORMATION FOR THE CENTRAL-NORTH BRITISH COLUMBIA COAST

SHORELINE CHARACTERIZATION

Environment and Climate Change Canada has created a database that contains a range of information that describes Canada's coast and shoreline. This information helps emergency responders to better plan and prepare for potential marine pollution events. For example, knowing what the shore looks like helps emergency officers better plan their onsite response and clean-up activities in the event of a spill. The database can also provide important information about the state of the shore prior to a pollution event.

Environment and Climate Change Canada always welcomes new information that meets established standards to expand its database to better support environmental emergencies preparedness and response.

HOW IS THE SHORELINE CHARACTERIZED?

There are two complementary ways to characterize the shoreline, both with their own standards.

1) COLLECTING GEOTAGGED VIDEOS

- Low-altitude helicopter surveys are conducted along the British Columbia coast to capture video of the shoreline.
- The camera focuses primarily on the upper part of the intertidal zone (the area of the shore between the high- and low-watermark). An audio commentary provides additional information, including a broader description of the shore.
- These videos can be viewed in a web-portal. Any location along the flight path can be selected, and a moving cursor shows the helicopter's location.

2) CREATING A SHORELINE DATABASE

- Shoreline segmentation means that the shoreline is split into segments and classified in a GIS (Geographic Information System).
- Each segment identifies the physical characteristics of the shoreline geomorphology in a database. Examples include substrate types (hard rock, semi-lithified sediment, sand, mud) and landform types (beaches, cliffs, shore platforms, rocky slopes).
- Interpreters divide the shoreline into alongshore segments according to changes noted in the upper intertidal zone. Other biological data (such as bird colonies, eelgrass meadow or kelp bed, marine mammal breeding/foraging areas) is also collected and incorporated in the database.

PRODUCTS

- The shoreline classification and its data can be combined with other coastal information in a database to produce maps that can be used when making decisions around events such as spills.
- Geo-located photos and videos can be easily accessed and viewed through various web-portals.

PROGRESS AND NEXT STEPS

- The shoreline characterization for the Kitimat-Douglas Channel area, including Haida Gwaii, has been completed using 2013-2015 aerial imagery.
- Environment and Climate Change Canada is currently working to complete the mapping of the BC coast from Alaska to Washington, beginning with the North/Central region. Interested partners and stakeholders may contribute information to this mapping project, provided it meets certain standards. In addition, flights may be undertaken in 2018-2019.

MISE À JOUR DES DONNÉES SUR LES RIVAGES DE LA CÔTE CENTRE NORD DE LA COLOMBIE-BRITANNIQUE

CARACTÉRISATION DES RIVAGES

Environnement et Changement climatique Canada a créé une base de données diverses qui décrivent les côtes du Canada. Ces données aident les intervenants en cas d'urgence à mieux se préparer à d'éventuels incidents de pollution marine. Par exemple, en sachant de quoi le rivage a l'air, ces intervenants peuvent mieux planifier leur intervention sur place et les activités de nettoyage en cas de déversement. La base de données peut également renseigner sur l'état du rivage avant un épisode de pollution.

Environnement et Changement climatique Canada accepte volontiers de nouvelles données qui satisfont aux normes établies et qu'il ajoute à sa base de données afin de mieux soutenir les activités de préparation et d'intervention en cas d'urgence environnementale.

COMMENT CARACTÉRISE-T-ON LES RIVAGES?

Il y a deux façons complémentaires de caractériser les rivages, et chacune a ses propres normes.

1) TOURNAGE DE VIDÉOS GÉOLOCALISÉES

- Des relevés par hélicoptère volant à basse altitude sont effectués le long de la côte de la Colombie-Britannique (C.-B.) pour tourner des vidéos du rivage.
- La caméra est braquée principalement sur la partie supérieure de la zone intertidale (la partie du rivage qui se trouve entre les laisses de haute et de basse mer). Des commentaires audio donnent des renseignements supplémentaires qui décrivent plus largement le rivage.
- Ces vidéos peuvent être visionnées dans un portail Web. On peut choisir tout endroit le long de la trajectoire de vol, et un curseur mobile montre la position de l'hélicoptère sur la carte.

2) CRÉATION D'UNE BASE DE DONNÉES SUR LES RIVAGES

- La segmentation du rivage consiste à le diviser en segments et à classer ceux-ci dans un SIG (système d'information géographique).
- Les caractéristiques physiques de la géomorphologie de chaque segment sont présentées dans une base de données, par exemple le type de substrat (roc, sédiments semilithifiés, sable, vase) et le type de relief (plage, falaise, plateforme littorale, pente rocheuse).
- Les interprètes divisent le rivage en segments selon les changements observés dans la zone intertidale supérieure. Des données biologiques (p. ex. colonie d'oiseaux, herbier de zostères ou de laminaires, aire de reproduction ou d'alimentation de mammifères marins) sont également recueillies et intégrées à la base de données.

PRODUITS

- Les données de classification des rivages peuvent être combinées avec d'autres renseignements sur les côtes afin de produire des cartes utiles pour prendre des décisions en cas de déversement.
- Les photos et vidéos géolocalisées peuvent être facilement visionnées au moyen de divers portails Web.

PROGRÈS ACCOMPLIS ET PROCHAINES ÉTAPES

- Les rivages dans la région de Kitimat et du chenal Douglas, y compris Haida Gwaii, ont été caractérisés au moyen d'images aériennes obtenues de 2013 à 2015.
- Environnement et Changement climatique Canada s'affaire actuellement à terminer la cartographie de la côte de la C. B., depuis l'Alaska jusqu'à l'État de Washington, en commençant par la région centre-nord. Les partenaires et intervenants intéressés peuvent contribuer à ce projet de cartographie en fournissant des renseignements qui satisfont à certaines normes. En outre, d'autres vols pourraient être effectués en 2018-2019.

Question #	Stó:lō Collective 3 – Duty to Consult
Reference:	A95463-2 - Notice of Motion of Squamish Nation - A6J9Z9
Preamble:	Based on a review of filings made to date in the Reconsideration Hearing, it appears Canada has advised certain intervenors that it will be relying on the Reconsideration Hearing to the extent possible to fulfil its constitutional duty to consult with Indigenous intervenors. In such circumstances, “the Board’s process serves the additional purpose of contributing to the extent possible to the constitutional imperative not to approve a project if the duty to consult was not satisfied”. At page 4 of Squamish Nation’s Notice of Motion¹ dated November 5, 2018, for example, Squamish references a letter dated October 5, 2018 that it received from the Minister of Natural Resources, Amarjeet Sohi which stated, among other things, that Canada intends to rely on the Board’s hearing process to the extent possible to fulfill its duty to consult in connection with the Reconsideration. The Supreme Court of Canada has confirmed that the Crown may rely on steps taken by an administrative body to fulfil the duty to consult, in part or in full, so long as the agency possesses the statutory powers to do what the duty to consult requires in the particular circumstances.² However, where the Crown intends to rely on a regulatory process to discharge the duty to consult, it should be made clear to the affected Indigenous groups that the Crown is so relying.³ In addition, if the Board does not provide adequate consultation and accommodation, the Crown must provide further avenues for meaningful consultation and accommodation in order to fulfill the duty prior to project approval.⁴ ¹ NEB Filing ID A95463-2. ² Clyde River v. Petroleum Geo-Services Inc., 2017 SCC 40 [“Clyde River”] at para, 30; Chippewas of the Thames First Nation v. Enbridge Pipelines Inc., 2017 SCC 41 [“Chippewas”] at para 32. ³ Chippewas, para 44; Clyde River, para 23. ⁴ Chippewas, para. 32.
Request:	(a) Is the Crown in fact relying, to the extent possible, on the Board’s hearing process to fulfill its duty to consult in connection with the Reconsideration? (b) What are the Crown’s plans for fulfilling its duty to consult should the Board’s hearing process fall short of satisfying the Crown’s constitutional obligations? (c) Is Canada relying, to the extent possible, on the strength of claim assessments conducted in the first hearing on the TMEP, or is it conducting new assessments? (d) If Canada is conducting new assessments: (i) what is Canada’s assessment of Stó:lō’s strength of claim in relation to Aboriginal title and rights? (ii) how did Canada identify Stó:lō’s specific Aboriginal rights?

	(iii) what methodology is Canada using to assess potential adverse impacts to Stó:lō's rights and interests from Project-related marine shipping? (iv) what is Canada's assessment of the potential adverse impacts to Stó:lō's rights and interests from Project-related marine shipping, including section 35 rights to fish, hunt and gather? (b) What procedural aspects of consultation with First Nations has the Crown delegated to Trans Mountain in this Reconsideration?
Response:	(a) The Crown will be relying on the NEB public hearing process to the extent possible to fulfil the legal duty to consult related to the reconsideration of Project-related marine shipping. The Crown has articulated this at several points, including in a letter from the Minister dated October 5, 2018 which was sent to all Indigenous groups on the Crown consultation list [A95026-1 Government of Canada Letter to Crown List, October 5 - A6J1T4]. The legal duty to consult rests with the Crown as per s.35 of the Constitution Act, 1982. However, the courts have affirmed that Canada can rely on existing regulatory processes, to the extent possible, to fulfill this responsibility. In this regard, the National Energy Board (NEB) review process is an effective means of gathering, distributing, and assessing information regarding any adverse impacts the Project may have on potential or established Aboriginal and Treaty rights. This approach avoids duplication and ensures that the NEB, which has broad powers to set conditions for the Project, has full access to relevant information on potential adverse impacts on Indigenous interests, including potential or established Aboriginal and treaty rights. (b) The Crown will re-engage in Phase III consultations, outside of the reconsideration hearing, with all potentially impacted Indigenous communities, governments and nations to meaningfully fulfill its duty to consult and, where appropriate, accommodate impacts to Aboriginal and Treaty rights. The Consultation Team has been mandated to engage in meaningful two-way dialogue and discuss the concerns of Indigenous communities, governments, and nations, including agreeing to accommodation measures, where appropriate (following Cabinet approval where required) to address those concerns. This will be an ongoing back-and-forth conversation between representatives of the Indigenous community, government, or nation, and the Crown. (c) The 2016 Crown Consultation and Accommodation Report Appendix for Stó:lō Collective (representing at that time: Aitchelitz First Nation, Kwaw-Kwaw-Apilt First Nation, Leq'á:mel First Nation, Shxwhá:y Village, Skawahlook First Nation, Skwah First Nation, Soowahlie Indian Band, Sq'éwlets First Nation, Squiala First Nation, Sumas First Nation, Tzeachten First Nation, and Yakweakwioose First Nation) [MH-052-2018; A95292-17, Annex 4.C.01, PDF page 429-470] provides the results of a preliminary strength of claim assessment, as well as background information, references, and context for the Crown's analysis of strength of claim, potential adverse

impacts, and the depth of consultation owed to Stó:lō Collective for the purposes of the environmental assessment and regulatory review under CEAA, 2012 and the NEB Act.

The Crown will re-engage in Phase III consultations, outside of the Reconsideration Hearing, with all impacted Indigenous communities, governments and nations to meaningfully fulfill its duty to consult through understanding, and identifying measures to avoid, mitigate or accommodate impacts, where appropriate, to Aboriginal and Treaty rights impacted by the Project. Through this process, the Crown's interpretation of the depth of consultation owed and potential impacts on rights of the project will continue to be updated in collaboration with each Indigenous community, government, or nation, to ensure a thorough understanding of potential or established rights, and any potential impacts of the Project on those rights.

- (d) The Crown's current understanding of Stó:lō Collective members' strength of claim in relation to Aboriginal title and rights in relation to the Project comes from their CAR Appendix (representing at that time: Aitchelitz First Nation, Kwaw-Kwaw-Apilt First Nation, Leq'á:mel First Nation, Shxwhá:y Village, Skawahlook First Nation, Skwah First Nation, Soowahlie Indian Band, Sq'éwlets First Nation, Squiala First Nation, Sumas First Nation, Tzeachten First Nation, and Yakweakwioose First Nation) [MH-052-2018; A95292-17, Annex 4.C.01, PDF page 435]:

The Crown's preliminary assessment of the Stó:lō Collective's Aboriginal title claim over the section of the Project running through approximately 195 km of the Stó:lō asserted traditional territory, as delineated by the Stó:lō Nation writ area, will also range from weak to strong.

As outlined in the 2016 Crown Consultation and Accommodation Report [MH-052-2018; A95292-17, Annex 4.C.01, PDF page 39], strength of claims are determined based on information currently available to government, and are subject to change should case law change or additional information become available, including any information that may be provided during consultation.

The Crown's purpose of assessing preliminary strength of claim information is to understand the nature and scope of Aboriginal and Treaty rights, whether established or asserted, so that the Crown can ensure that consultation is sufficiently broad and deep to address the potential adverse impacts that the Project could have on these rights, and to ensure that accommodation measures, if required, are appropriate. The starting point for these assessments is to work with information that the Crown has in hand, but Indigenous communities, governments and nations are invited to provide information that they believe could assist the Crown in understanding the nature and scope of the rights held or asserted by them.

The Crown's interpretation of depth of consultation owed, including an assessment of strength of claim and impacts on rights, will continue to be updated in collaboration with members of the Stó:lō Collective to ensure a thorough understanding of potential or established rights, and any potential impacts of the Project on those rights.

	(e) The Crown has a responsibility to determine whether the legal duty to consult has been adequately fulfilled and sufficient information is available to inform a decision on the Project. A recommendation on whether to approve the Project will only be considered by the Governor-in-Council once it is satisfied that: (1) the Crown has adequately fulfilled its duty to consult and that consultations with potentially impacted groups have been offered and/or carried out in a meaningful and responsive manner; and (2) accommodations have been considered, where appropriate, and responses have been provided to Indigenous communities, governments and Nations. The legal duty to consult rests with the Crown as per s.35 of the Constitution Act, 1982. The Crown has not delegated the procedural aspects of its duty to consult to the Project proponent. Trans Mountain Corporation (TMC) is a Crown Corporation, owned by the Canada Development Investment Corporation (CDEV), which is accountable to the Parliament of Canada through the Minister of Finance. TMC owns the operating entities of Trans Mountain, including Trans Mountain Pipeline ULC (TMP ULC), the project proponent, and Trans Mountain Canada Inc. (TMCI), the operator of the pipeline. Representatives of TMCI will be part of the consultation and accommodation process and participate in meetings with representatives of Indigenous communities, governments, and nations, where appropriate, although the ultimate responsibility for ensuring that the duty is adequately fulfilled remains with the Crown under the leadership of the Minister of Natural Resources. The Crown can, however, rely on existing regulatory processes, to the extent possible, to fulfill the duty to consult. As such, the Crown will rely, to the extent possible, on the National Energy Board (NEB) review process to fulfill this duty. The NEB review process is an effective means of gathering, distributing, and assessing information regarding any adverse impacts the Project may have on potential or established Aboriginal and treaty rights. This approach avoids duplication and ensures that the NEB which has broad powers to set conditions for the Project, has full access to relevant information on potential adverse impacts on Indigenous interests, including potential or established Aboriginal and treaty rights. In addition, the NEB process requires the proponent to work with and potentially accommodate Indigenous communities, governments and Nations impacted by the Project. The NEB filing manual provides information to the proponent on the requirement to engage with potentially affected Indigenous communities, governments and nations. This does not constitute delegation of the duty to consult. In addition to the Crown's direct consultation with Indigenous groups and consultation through the NEB, the Crown will also rely on the conduct of all of the proponent's past and future consultation activities, where appropriate, to fulfill its duty to consult.

Raincoast Conservation Foundation notice of motion to file late evidence – comment
process**

On 7 January 2019, the Board received a notice of motion from Raincoast Conservation Foundation in which it seeks to file late evidence.

Before deciding on this request, the Board will accept comments on it from Trans Mountain and the intervenors on or before **3:00 pm Pacific time (4:00 pm Mountain time) on 9 January 2019**.

Raincoast Conservation Foundation may file reply comments on or before **3:00 pm Pacific time (4:00 pm Mountain time) on 10 January 2019**.

For any questions, please contact a Process Advisor by phone at 1-800-899-1265 (toll-free) or by email at TMX.ProcessHelp@neb-one.gc.ca.

Attention: Sheri Young, Secretary of the Board

Dear Ms. Young,

**Re: Trans Mountain Expansion Project ("Project") – Reconsideration
Hearing Order MH-052-2018 & File OF-Fac-Oil-T260-2013-03 59
Notice of Motion of Raincoast Conservation Foundation ("Raincoast") to file late
evidence ("Motion")**

Pursuant to the letter of the National Energy Board ("**Board**") dated January 7, 2019, we write to notify the Board of the Stó:lō Collective's support for the Motion. As with all marine life located in British Columbia's coastal waters, the health of the southern resident killer whales and the effect of the Project thereon is of great concern the Stó:lō Collective.

As an administrative body, the Board owes a duty of fairness to participants which has been described as including a duty to ensure that decisions are made "with an opportunity for those affected by the decisions to put forward their views and evidence fully and have them considered by the decision-maker."¹ The Board has itself acknowledged its responsibility to conduct a hearing that is procedurally fair and that "this requires that the 'parties [are] entitled to a meaningful opportunity to present their cases fully and fairly.'"² As the master of its own procedure, the Board can and should make an effort to have all relevant evidence before it when rendering its decision in this Reconsideration Hearing.

Further, the Supplementary Giles Report was only very recently released (dated January 7, 2019) and is directly relevant to the Board's consideration of the effects of Project-related marine shipping on the southern resident killer whale population. Accordingly, the Stó:lō Collective requests that the Board grant Raincoast's Motion to late-file the Supplementary Giles Report.

This is Exhibit OO referred to in the Affidavit
of Tanny Nguyen sworn before me at
Vancouver, BC this 6th day of July, 2019.

A Commissioner for taking affidavits for British
Columbia

File OF-Fac-Oil-T260-2013-03 59
10 January 2019

To: All Parties

**Trans Mountain Pipeline ULC (Trans Mountain)
Application for the Trans Mountain Expansion Project (Project)
National Energy Board (Board) reconsideration of aspects of its Recommendation
Report as directed by Order in Council P.C. 2018-1177 (Reconsideration)
MH-052-2018
Procedural Direction No. 4 – Affidavits and written argument-in-chief, including
comments on draft conditions and recommendations**

A. Upcoming deadlines

Consistent with Procedural Direction No. 3, the Board will receive affidavits adopting evidence, written argument-in-chief, and reply argument according to the following timeline:

Step	Deadline (3:00 pm Pacific time (4:00 pm Mountain time))
Marine technical advisor files written argument-in-chief	15 January 2019
All Parties file affidavits adopting their written evidence	17 January 2019
Trans Mountain and Federal Departments and Agencies ¹ file written argument-in-chief	17 January 2019
Intervenors (other than Federal Departments and Agencies) file written argument-in-chief	22 January 2019
Trans Mountain files reply argument	25 January 2019

The Board has decided that it does not require oral summary argument. The Board did receive a letter from Tsleil-Waututh Nation on 9 January 2019 requesting that oral summary argument be held, as well as some comments in relation to it. The Board's Hearing Order was clear that oral summary argument was optional and may only be held "if needed and time permits." The Board is not persuaded that such argument is necessary. This takes into consideration that the

.../2

¹ The Federal Departments and Agencies are denoted on the List of Parties with the prefix "AA."

Board provided additional time for intervenors to prepare their evidence and an opportunity for Indigenous groups to provide oral traditional evidence at two locations on Vancouver Island. There is not sufficient time to also have oral summary argument, nor is oral argument considered necessary given the specific focus in the Reconsideration hearing and the List of Issues.

It is up to the Board's discretion whether it considers written versus oral argument to be the most helpful in making its decision or recommendation. As stated in the Hearing Order, "[t]he Parties should include all pertinent argument in their written argument-in-chief, as [oral summary argument] may not be held." The Board looks forward to considering written final argument from the Parties.

Parties that wish to comment on draft conditions and recommendations must include these comments in their written argument-in-chief. When filing written argument-in-chief, each Party must serve all other Parties. See the Hearing Order for information on how to file and serve documents.

B. Adoption of written evidence by affidavit

Throughout the hearing process, evidence has been filed on the public record. All documents on the public record can be found in the Board's online [public registry](#). As required by subsection 37(4) of the *National Energy Board Rules of Practice and Procedure, 1995*, the Board directs each Party that filed written evidence **in the Reconsideration hearing** to file with the Board and serve on all Parties an affidavit or affidavits adopting that evidence.

Adopting evidence means making a statement under oath, by way of an affidavit, that the evidence was prepared by you, or under your direction and control, and that it is truthful to the best of your knowledge and belief. Trans Mountain and intervenors must file their affidavits by 17 January 2019. If a Party filed evidence that was prepared by an expert and did not include their CV/résumé at the time of filing that evidence, that Party should file their expert's CV/résumé by this deadline as well.

In some instances, Trans Mountain or intervenors will not be able to adopt all parts of their evidence, if it was not prepared by them or under their direction and control. This may include documents that were prepared by third parties with which Trans Mountain or the intervenor has no connection (e.g., newspaper articles). Evidence that cannot be adopted is unsworn and remains on the public record.

To assist Parties in understanding and completing this process, the Board is including two forms of affidavits as **Appendix 1** to this procedural direction (Board staff will email the Parties fillable electronic versions).

- **Part A** is for Parties that have prepared their **own** evidence.
- **Part B** is for consultants, experts, or other individuals that have prepared evidence **for** a Party. Parties are responsible for ensuring that the applicable affidavit(s) is filed in relation to the evidence filed by them or on their behalf.

Affidavits must be signed by a Notary Public or Commissioner for Oaths.

Any evidence on the Board's record that has not been adopted and sworn (or affirmed) will be treated by the Board as unsworn evidence. Unsworn evidence may not be given as much weight (i.e., consideration) as evidence given under oath or solemn affirmation.

C. Argument-in-chief

In this Reconsideration hearing, Parties will file argument-in-chief **in writing**. Trans Mountain will also have the opportunity to file written reply argument. A Party may also choose not to undertake argument-in-chief.

Argument-in-chief is a Party's chance to persuade the Board to take certain positions on the issues and evidence at hand and on the Reconsideration as a whole. Parties may choose to address the weight that ought to be given to any evidence, or how the Board should consider conflicting evidence that is on the public record. A Party may also, during argument-in-chief, make submissions to the Board about matters within the List of Issues.

Argument-in-chief **must** be based upon evidence that is already on the record. **No new evidence can be provided during argument-in-chief**, and the Board will **not** consider any new evidence introduced.

A Party may refer to any filed evidence in their argument-in-chief, regardless of the Party that filed it. In other words, a Party is **not** limited to referring only to its own evidence. While there is no page limit for written argument-in-chief, Parties are encouraged to be as clear and concise as possible and to organize their views effectively.

D. Draft conditions and recommendations

The Board is releasing draft conditions (**Appendix 2**) and draft recommendations (**Appendix 3**) for comment by the Parties. All comments on draft conditions and recommendations must be included in the Parties' written argument-in-chief.

Releasing the draft conditions and recommendations at this time is not an indication of the Board's forthcoming recommendation to the Governor in Council (GIC) to either approve or deny the Project application.

As the conditions and recommendations are drafts, Parties are reminded that any of them may be deleted or modified. Parties may make comments and suggestions about the draft conditions and recommendations, and they may also suggest any additional conditions and recommendations for the Board's consideration. Any suggestion should include a justification to assist the Board in assessing its merits.

What are conditions?

Regardless of what the Board sets out in its Reconsideration Report, subsection 53(7) of the *National Energy Board Act* (NEB Act) requires the Board to set out in the report all the terms and conditions that it considers necessary or desirable in the public interest, should the Project be approved by the GIC.

The purpose of conditions is to mitigate potential risks and effects associated with a project so that the project can be designed, constructed, operated, and abandoned in a safe manner that protects the public and the environment. Conditions outline requirements that a company must meet in relation to a project. The draft conditions that are the focus of this Reconsideration are intended to reduce or eliminate the effects of Project-related marine shipping in accordance with the requirements of the *Canadian Environmental Assessment Act, 2012* and the *Species at Risk Act*. These also include the conditions that were explicitly listed in Order in Council P.C. 2018-1177. However, the remaining conditions from the Board's OH-001-2014 Recommendation Report would still apply to the overall Project.

The Board also intends to modify Condition 2 – compliance with commitments, as per below (modification in red text):

Without limiting Conditions 3, 4 and 6, Trans Mountain must implement all of the commitments it made in its Project application or to which it otherwise committed on the record of the OH-001-2014 proceeding **and the MH-052-2018 Reconsideration proceeding.**

This modified condition would ensure that Trans Mountain is accountable for all of the commitments it made during this Reconsideration hearing.

Conditions would be attached to any Board regulatory instruments (e.g., certificate of public convenience and necessity, or orders) if the Project were to be approved by the GIC. The conditions outline requirements that are within the scope of the Board's regulatory authority and which Trans Mountain, as the proponent, would be required to meet in order for the Project to be carried out. Conditions imposed by the Board are legally binding, and are enforced pursuant to the NEB Act.²

What are recommendations?

For the GIC's consideration in deciding whether or not to approve the Project, the Board intends to issue recommendations for measures to mitigate, avoid, or lessen the effects of Project-related marine shipping that are within the authority of the GIC, but are beyond the scope of the Board's regulatory authority. This is consistent with the direction of the Court of Appeal in *Tsleil-Waututh Nation v. Canada (Attorney General)*:

² For information on how the Board verifies company compliance with conditions, as well as on the Board's overall approach to compliance, see Appendix 1 of the Board's 16 April 2014 [letter](#) when it released draft conditions for viewing during the OH-001-2014 Certificate hearing.

“While the Board lacked authority to regulate marine shipping, the final decision-maker was not so limited... the Governor in Council required the Board’s exposition of all technically and economically feasible measures that are available to avoid or lessen the Project’s effects on the Southern resident killer whale.”³

Unlike conditions, recommendations would not be attached to any Board regulatory instruments or enforced by the Board. Recommendations are also generally beyond the control of Trans Mountain. Further, certain marine shipping-related conditions from the Board’s OH-001-2014 Recommendation Report may be revised into recommendations to the GIC, as marine shipping is not directly within Trans Mountain’s control and is not within the Board’s regulatory authority (as found by the Federal Court of Appeal in *Tsleil-Waututh Nation*).

Appendix 2 Draft conditions for comment

The defined terms for the conditions remain the same as outlined in pages 413 to 415 of the Board's OH-001-2014 [Recommendation Report](#).

In particular, for the purposes of the conditions and recommendations, the “**Project**” is defined to mean the Trans Mountain Expansion Project in all its components, including pipeline construction, reactivation, and changes to operating conditions resulting in operation as Line 1 and Line 2; deactivation, reactivation, construction, and operation of or at the respective pump stations; decommissioning of two tanks and construction and expanded operation at the existing Edmonton, Sumas, and Burnaby Terminals and the Westridge Marine Terminal; construction and operation of the new delivery pipelines; and all infrastructure. The Project does **not** include Project-related marine shipping.

From the OH-001-2014 Certificate hearing:

Condition 91 – [proposed amendments](#)

Plan for [marine spill prevention and response](#) commitments

Trans Mountain must file with the NEB, **at least 2 months prior to commencing construction**, a plan describing [how it will ensure](#) that it will meet the requirements of Condition 133 regarding [marine spill prevention and response](#). The plan must be prepared in consultation with Transport Canada, the Canadian Coast Guard, the Pacific Pilotage Authority, Vancouver Fraser Port Authority, British Columbia Coast Pilots, Western Canada Marine Response Corporation, Fisheries and Oceans Canada and the Province of British Columbia, and must identify any issues or concerns raised and how Trans Mountain has addressed or responded to them.

Trans Mountain must provide the plan to the above-mentioned parties at the same time as it is filed with the NEB.

From the OH-001-2014 Certificate hearing:

Condition 131 – [proposed change from a condition to a recommendation](#)

Marine Public Outreach Program

The Board is proposing a recommendation to the federal government which has the necessary authority to address such matters. See draft Recommendation 12.

From the OH-001-2014 Certificate hearing:

Condition 132 – [proposed amendments](#)

Marine Mammal Protection Program

Trans Mountain must file with the NEB, **at least 3 months prior to commencing operations**, a Marine Mammal Protection Program that focuses on [mitigating effects from the Project and associated cumulative effects, and on fulfilling Trans Mountain's commitments as a terminal operator with regard to Project-related marine shipping](#). The program must include:

- a) the goals and objectives of the program, including a discussion on how they align with the objectives of applicable Fisheries and Oceans marine mammal Recovery Strategies and Action Plans;
- b) a summary of the issues related to marine mammals [from the Project and](#) from Project-related marine vessels;
- c) a summary of the initiatives that Trans Mountain has supported or undertaken to-date, including the goals of each initiative and how they relate to the [goals and](#) objectives of the program;
- d) a discussion of the outcomes or progress updates of the initiatives identified in c), and how these outcomes have met or are contributing to the objectives of the program; [\[previous e\) and f\) deleted\]](#)
- e) any other initiatives that Trans Mountain intends to undertake or support in the future that are relevant to the program; and
- f) a description of how Trans Mountain has taken available and applicable Indigenous traditional land use and traditional ecological knowledge into consideration in developing the program, including demonstration that those Indigenous persons and groups that provided Indigenous traditional land use information and traditional ecological knowledge, as reported during the OH-001-2014 proceeding, [MH-052-2018 Reconsideration proceeding](#) and/or pursuant to Condition 97, had the opportunity to review and comment on the information.

**From the OH-001-2014 Certificate hearing:
Condition 133 – [proposed amendments](#)**

[Confirmation of marine spill prevention and response commitments](#)

Trans Mountain must file with the NEB, **at least 3 months prior to loading the first tanker at the Westridge Marine Terminal with oil transported by the Project**, confirmation, signed by an officer of the company that:

- a) [Trans Mountain has included in its Vessel Acceptance Standard and Westridge Marine Terminal Regulations and Operations Guide a requirement for tankers nominated to load at the Westridge Marine Terminal to have a suitable arrangement for the proposed enhanced tug escort between the Westridge Marine Terminal and Bouy J prior to departure. The tug escort should be suitable for foreseeable meteorological and ocean conditions and be based on tanker and cargo size.](#)
- b) An enhanced marine oil spill response regime capable of delivering 20,000 tonnes of capacity within 36 hours of notification, with dedicated resources staged within the study area is in place.

**From the OH-001-2014 Certificate hearing:
Condition 134 – [proposed amendments](#)**

[Updated Vessel Acceptance Standard and Westridge Marine Terminal Regulations and Operations Guide](#)

Trans Mountain must file with the NEB, **at least 3 months prior to loading the first tanker at the Westridge Marine Terminal with oil transported by the Project, and thereafter on or before 31 January of each of the first five years after commencing operations**, an updated Vessel Acceptance Standard [and Westridge Marine Terminal Regulations and Operations Guide](#), and a summary of any revisions made to each.

**From the OH-001-2014 Certificate hearing:
Condition 144 – proposed amendments**

Ongoing confirmation of marine spill prevention and response commitments

Trans Mountain must file with the NEB, **on or before 31 January of each year after commencing operations** confirmation, signed by an officer of the company, that it is continuing to meet the requirements of Condition 133 regarding Trans Mountain's marine spill prevention and response commitments.

Trans Mountain must provide each filing to Transport Canada, the Canadian Coast Guard, the Pacific Pilotage Authority, Vancouver Fraser Port Authority, British Columbia Coast Pilots, Western Canada Marine Response Corporation, Fisheries and Oceans Canada and the Province of British Columbia at the same time as it is filed with the NEB. If a particular party mentioned above requests that it not be provided the annual filing, Trans Mountain may cease providing it to that party.

From the OH-001-2014 Certificate hearing:

Condition 151 – no proposed amendments (while listed in the Governor in Council's Order in Council P.C. 2018-1177, this condition does not relate to Project-related marine shipping)

Post-construction environmental monitoring reports

Trans Mountain must file with the NEB, **on or before 31 January following the first, third, and fifth complete growing seasons after completing final clean-up**, a post-construction environmental monitoring report for the Project that must include:

- a) a description of the valued components or issues that were assessed or monitored;
- b) measurable goals for each valued component or issue;
- c) monitoring methods for each valued component or issue, results of the monitoring, and a comparison to the defined measurable goals;
- d) corrective actions taken, their observed success, and their current status;
- e) identification on a map or diagram of the locations where corrective actions were taken;
- f) any further corrective actions planned and a schedule for monitoring and reporting; and
- g) a summary of its consultations with appropriate government authorities and any potentially affected Aboriginal groups and affected landowners/tenants. In the environmental monitoring report filed after the fifth full growing season after completing clean-up,

Trans Mountain must include:

- i) an assessment of the effectiveness of mitigative and corrective actions and how learnings have been or will be applied to Trans Mountain's Environmental Protection Program;
- ii) a detailed description of all valued components or issues for which the measurable goals have not been achieved during the duration of the post-construction monitoring program; and
- iii) an evaluation of the need for any further corrective actions, measurable goals, assessments, or monitoring of valued components or issues, including a schedule for those.

All filed post-construction environmental monitoring reports must address issues related, but not limited, to: soils; weeds; watercourse crossings; riparian vegetation; wetlands; rare plants, lichens and ecological communities; municipal tree replacement; wildlife and wildlife habitat; fish and fish habitat; marine fish and fish habitat; marine mammals; marine birds; and species at risk.

Appendix 3 Draft recommendations for comment

The defined terms for the conditions remain the same as outlined in pages 413 to 415 of the Board’s OH-001-2014 [Recommendation Report](#).

In particular, for the purposes of the conditions and recommendations, the “**Project**” is defined to mean the Trans Mountain Expansion Project in all its components, including pipeline construction, reactivation, and changes to operating conditions resulting in operation as Line 1 and Line 2; deactivation, reactivation, construction, and operation of or at the respective pump stations; decommissioning of two tanks and construction and expanded operation at the existing Edmonton, Sumas, and Burnaby Terminals and the Westridge Marine Terminal; construction and operation of the new delivery pipelines; and all infrastructure. The Project does **not** include Project-related marine shipping.

Overall health of the Salish Sea	
	Recommendation 1: The Governor in Council should develop and implement a regional cumulative effects management plan that assesses the overall environmental state of, and cumulative effects on, the Salish Sea, and use that better understanding to help inform a long-term approach to managing those cumulative effects, as well as informing the consideration of future proposed projects. This plan should include, but not be limited to: a) consideration of the many impacts on the Salish Sea, including contamination from point and diffuse land-based sources, the multiple impacts on salmon and other fish stocks, and the impacts from all vessel traffic; b) incorporation of the work the federal authorities are already planning in the area, such as under the Coastal Environmental Baseline Program and the Cumulative Effects of Marine Shipping initiative (including its regional cumulative effects assessment); c) development of short-, medium-, and long-term targets for addressing cumulative effects, including consideration of the feasibility of reducing total underwater noise, strike/collision risk of vessels with marine species, and key contaminant levels over time; and d) any monitoring necessary to help determine the extent of cumulative effects, the success of measures to manage those effects, and progress towards meeting targets.
	Recommendation 2: The Governor in Council should report publicly, on an annual basis, on the oversight, progress, and status of initiatives and measures to address cumulative effects on, and to support the health of, the Salish Sea, including but not limited to: a) progress on addressing Recommendation 1 above; b) the Ocean Protection Plan, the Whales Initiative, and any other relevant commitments made by federal authorities during the Board’s MH-052-2018 Reconsideration hearing; c) relevant initiatives and measures being undertaken by others, such as the marine shipping measures of the Enhancing Cetacean Habitat and Observation Program (ECHO) Program; d) species status updates for <i>Species at Risk Act</i>-listed species, including any relevant measures proposed in recovery documents under the <i>Species at Risk Act</i>; e) progress on addressing Recommendations 3 through 13 below; and

- f) consultation activities related to these initiatives and measures, including with Indigenous peoples and other marine users.

The reporting should include an explanation of how these various initiatives and measures work together, the identification of any notable gaps, and plans for how those gaps will be addressed.

Species

Recommendation 3: The Governor in Council should implement, with support from industry, a marine bird monitoring program to better understand impacts of all vessel use within the Salish Sea on marine bird species, including species at risk. This program would allow for the implementation of adaptive measures by the Government of Canada to avoid or reduce marine bird mortality and sensory disturbance.

Recommendation 4: The Governor in Council should expedite the work in completing the feasibility study for establishing a Southern Strait of Georgia National Marine Conservation Area, publicly report on the outcomes of that study, and (if considered feasible) proceed to establish it.

Recommendation 5: The Governor in Council should implement a suite of measures to offset both the increased underwater noise and the increased strike risk posed to Species at Risk Act-listed marine mammal and fish species (including Southern resident killer whale) due to Project-related marine shipping, at each relevant section of the marine shipping route (i.e., Strait of Georgia, Boundary Pass, Haro Strait, Juan de Fuca Strait, and out to the 12-nautical-mile territorial sea limit), and at the relevant times of year. Each offset measure should apply to all appropriate vessels for that measure (i.e., not limited to Project-related vessels). There should be periodic reporting that includes measured or estimated underwater noise and strike risk due to Project-related marine shipping, and the extent over time to which that additional noise and strike risk has been offset by measures that apply to all appropriate vessels.

Recommendation 6: As part of Recommendation 5 to offset the underwater noise and strike risk added by Project-related marine shipping, the Governor in Council should further consider each of the following specific measures, each applicable to all appropriate vessels (i.e., not limited to Project-related vessels), and publicly report on the feasibility of each (including consideration of socio-economic effects):

- slowdowns in each section of the marine shipping route (i.e., Strait of Georgia, Boundary Pass, Haro Strait, Juan de Fuca Strait, and out to the 12-nautical-mile territorial sea limit) and that apply to all appropriate vessels;
- potential limits on the number of whale watching boats (and/or their time on water);
- explicit noise reduction targets for regularly operating ferries in the area;
- identification of specific whale congregation and migration areas (including for resident killer, humpback, grey, and fin whales, as well as basking shark) and consideration of specific routing and speed restrictions in those areas; and
- further incentives and requirements for quiet vessel design to address underwater noise over the long term.

Marine oil spill response	
	Recommendation 7: The Governor in Council should review and update federal marine shipping oil spill response requirements. This review should include consideration of the following: • updating response organization standards; • response planning methodologies; • public reporting by response organizations to promote transparency of information; • inclusion of Indigenous peoples and local communities in response planning; and • a requirement for additional response resources on all ocean-going vessels.
Marine shipping safety	
	Recommendation 8: The Governor in Council should develop a regulatory framework for making enhanced tug escort mandatory in the Salish Sea for appropriate ocean-going vessels, including Project-related tankers. The framework should include oversight and enforcement mechanisms.
	Recommendation 9: The Governor in Council should, in conjunction with relevant United States regulatory authorities, consider the need for a Canada/United States Transboundary Vessel Traffic Risk Assessment.
Greenhouse gases	
	Recommendation 10: The Governor in Council should accelerate the development and implementation of greenhouse gas reduction measures related to marine shipping that would support the final International Maritime Organization Strategy in year 2023 for reducing greenhouse gas emissions. These measures could include, but not be limited to: a) facilitating the use of low-carbon alternate fuels (such as liquefied natural gas) for marine vessels by developing any necessary marine safety regulatory framework, training programs, and bunkering infrastructure requirements; and b) market-based measures, such as providing economic incentives for industry investment in the development and use of energy efficient technologies, and offsetting any increases in ship emissions. In implementing the measures, the Governor in Council could also consider a mechanism to establish and monitor such reductions and to develop regulations under an appropriate legislation.
Indigenous Advisory and Monitoring Committee	
	Recommendation 11: The Governor in Council should, in conjunction with Transport Canada and the Canadian Coast Guard, facilitate opportunities, as appropriate, to engage and seek feedback from the Indigenous Advisory and Monitoring Committee on the marine safety system, including on the marine inspections and enforcement regime; in addition to identifying engagement opportunities for Project-related marine shipping activities that intersect with Canadian Coast Guard operational programs.

Small vessel safety	
	Recommendation 12: (in place of Condition 131 from the OH-001-2014 Certificate hearing): The Governor in Council should, in conjunction with the Pacific Pilotage Authority and Transport Canada, continue engagement and awareness activities targeting recreational boaters, fishing vessel operators, and operators of small vessels with respect to safety of navigation and prevention of collisions with larger vessels. This should include incorporating the resources and information that Trans Mountain has already provided or will provide to the Pacific Pilotage Authority, such as applicable information on Project-related vessel timing and scheduling.
	Recommendation 13: The Governor in Council should accelerate the development and implementation of the Enhanced Maritime Situational Awareness initiative and the proposed extension of the Automatic Identification System to smaller passenger vessels.

Attention: Sheri Young, Secretary of the Board

Dear Ms. Young,

**Re: Trans Mountain Expansion Project ("Project") – Reconsideration
Hearing Order MH-052-2018 & File OF-Fac-Oil-T260-2013-03 59
Adoption of Written Evidence by Affidavit**

In Procedural Direction No. 4, issued by the National Energy Board ("**Board**") on January 10, 2019, the Board instructed Parties to swear (or affirm) affidavits adopting their respective written evidence filed in the Reconsideration Hearing, and file those affidavits with the Board by January 18, 2019. We write to inform the Board that the Stó:lō Collective will not be filing such an affidavit, as its written evidence, filed on December 5, 2018, was provided in the form of an affidavit and therefore does not require further adoption.

If you have any questions, please contact us as soon as possible.

Yours truly,

Dear Ms. Tuytel:

**Trans Mountain Pipeline ULC (Trans Mountain)
Application for the Trans Mountain Expansion Project**

**National Energy Board (Board) reconsideration of aspects of its Recommendation
Report as directed by Order in Council P.C. 2018-1177 (Reconsideration)
MH-052-2018**

**Ruling No. 27 – Raincoast Conservation Foundation (Raincoast) notice of motion to
file late evidence**

A. Notice of motion

On 7 January 2019, the Board received a notice of motion from Raincoast in which it seeks leave to file late evidence in this Reconsideration hearing.

Raincoast submits that two 3 January 2019 articles discuss the compromised state of two Southern resident killer whales (SKRWs) and that one of the articles quotes Dr. Deborah Giles, the author of a report on SKRW that Raincoast previously filed in this hearing. Raincoast seeks to file as evidence a 7 January 2019 supplementary report prepared by Dr. Giles on the impacts of any potential loss of the two SKRWs on the SKRW population (Supplemental Report).

Raincoast states that effects on SKRW are central to this Reconsideration and that the Supplemental Report would assist the Board as it would ensure that the Board has the most up-to-date information on this issue. It is of the view that the benefit to the Board of having the Supplemental Report outweighs the prejudice that might result from its late filing. Raincoast does not believe that the brief report that updates the existing information, even at this time, is unduly burdensome.

B. Comments received

Intervenors

By the 9 January 2019 deadline [set](#) by the Board, several comments were received by Parties in support of the motion, included the following:

- Raincoast was diligent in bringing its notice of motion one business day after the discovery of the evidence, which did not exist by the evidence deadline.
- In [Ruling No. 23](#), the Board granted much broader relief in allowing a Party to file late evidence inadvertently omitted from its direct evidence filing. Raincoast's evidence is a highly relevant factual development of limited scope.
- It is essential for the Board to consider the potential death of two reproductive-aged SRKWs against the backdrop of a proposed Project that another Panel of the Board has already found is likely to result in significant adverse effects to SRKW and Indigenous cultural uses associated with them.
- The Board must have the benefit of the most up-to-date evidence on such a key, relevant issue to ensure that it can issue a report upon which the Governor in Council (GIC) can reasonably rely in making its decision on the Project. An update on the status of SRKW health would assist the Board in this respect.
- There would be minimal, if any, prejudice to other Parties at this stage of the hearing. Minimal steps have occurred since direct evidence was filed. Trans Mountain's and the Federal Departments and Agencies' 17 January 2019 deadline for written argument-in-chief affords a reasonable window to consider the Supplemental Report, in light of the Board's and Parties' existing expectations to make expeditious submissions in this hearing.
- As an administrative body, the Board owes a duty of fairness to participants which has been described as including a duty to ensure that decisions are made "with an opportunity for those affected by the decisions to put forward their views and evidence fully and have them considered by the decision-maker." In [Ruling No. 9](#), the Board acknowledged its responsibility to conduct a hearing that is procedurally fair and that "this requires that the parties [are] entitled to a meaningful opportunity to present their cases fully and fairly."
- If admitted, the highly probative nature of the Supplemental Report outweighs any risk of potential prejudice to another Party that may exist.

The [Department of Justice Canada](#) (representing various Federal Departments and Agencies) took no position.

Trans Mountain

[Trans Mountain](#) requests that the notice of motion be denied. Its submissions include the following:

- Accepting the late evidence at this stage in the process would prejudice Trans Mountain and other Parties by impacting subsequent deadlines. If accepted, Trans Mountain would require time to review and, if needed, reply to it. The Parties would need the ability to ask information requests (IRs), as appropriate, of Raincoast and Trans Mountain. These steps would jeopardize the current timeline for final argument and the Board's report to Cabinet, which is due on 22 February 2019.
- Without the above procedural steps, the credibility of the Supplemental Report would be untested and could not be relied upon without significant prejudice to Trans Mountain.
- In denying motions to file late evidence in [Ruling No. 105](#) and [Ruling No. 109](#) in the OH-001-2014 Certificate hearing, the Board held that "[t]he later in the process participants seek to file evidence, the greater the prejudice is likely to be to other participants." This is because the closer that a proceeding is to completion, the more steps need to be re-done if new evidence is accepted and the more difficult it becomes for the Board to mitigate overall delays.
- The Supplemental Report is consistent with evidence already on the record regarding the endangered status of the SRKW and its declining populations, and would provide no further assistance to the Board in determining the issues before it. Similarly, it is consistent with Trans Mountain's position that the environmental effects being experienced in the Salish Sea, including on SRKW, are regional and industry-wide issues requiring multi-party programs and solutions. It does not contain new information that would assist in developing such mitigation.
- The Board has recognized that there will always be further reports and studies that come into existence as time passes, but the bar remains high for admittance of new information at the late stage of a hearing.
- The probative value of the Supplemental Report is low and does not outweigh the significant prejudice that would be suffered by Trans Mountain and other Parties if admitted.

Raincoast's reply

In [reply](#), Raincoast's submissions include the following:

- No Party, other than Trans Mountain, suggested that granting the notice of motion may prejudice them.
- Trans Mountain did not file reply evidence concerning Dr. Giles' previous report, or test any of Raincoast's evidence, including Dr. Giles' evidence. Trans Mountain raised the spectre of needing to take these steps, but not whether it would actually do so. In light of its comments that the Supplemental Report is consistent with evidence already on the

record and with its position on the nature of the environmental effects on SRKW, it seems that Trans Mountain would have no reason to do so. Similarly, Trans Mountain did not take the opportunity to test Dr. Giles' credibility when it had the opportunity to ask IRs about her previous report.

- In response to IRs, the Parties have recently filed a large quantity of new evidence that the Parties will have no opportunity to test.
- Trans Mountain contradicts itself in saying that admitting the evidence will cause "significant prejudice," while also saying that the evidence contains no new information.

C. Views of the Board

In considering requests for filing late evidence, the Board considers:

- whether the evidence is relevant;
- whether there is a justifiable reason for the late filing;
- the prejudice that other Parties may suffer if the request were granted; and
- the probative value of the evidence weighed against any prejudice to other Parties at the current stage of the hearing.

There is no dispute that the Supplemental Report prepared by Dr. Giles is relevant to one or more issues the Board is considering in this Reconsideration hearing.

The Board is not persuaded that there is a justifiable reason for the late filing. Raincoast references newspaper articles dated 3 January 2019 containing various opinions, and states that the notice of motion was filed shortly thereafter. The Board does not find the newspaper articles or the information contained in them to be a convincing reason for the late filing. The Board would have expected Raincoast to explain why the information and conclusions expressed in the Supplemental Report were new, such that they could not be obtained at an earlier date. The Board is not convinced that the conclusions in the Supplemental Report were unavailable prior to the filing of the notice of motion.

Even if there was a justifiable reason for the late filing, the Board is of the view that the probative value of the Supplemental Report does not outweigh the prejudice to Trans Mountain. The Board places more weight on its reasons regarding the probative value and prejudice than on whether there was a justifiable reason for the late filing.

The Board does not agree with the position adopted by several Parties that there would be minimal prejudice to Trans Mountain because of the upcoming steps in the hearing. Consistent with previous Board Ruling No. 105 and Ruling No. 109, the later in the process Parties seek to file evidence, the greater the prejudice is likely to be to other Parties. In this particular case, and given the nature of the rights at stake, the Board finds that written argument-in-chief is not adequate for Trans Mountain to respond to the Supplemental Report. As a matter of procedural fairness, the Board is of the view that it would need to provide an opportunity to Trans Mountain for additional reply evidence.

The Board has previously stated that it is extremely constrained in its ability to accommodate further extensions to the hearing process.¹ While this should not suggest that extensions are impossible where warranted, at this late stage of the hearing (just prior to final argument), adjustments to the hearing process will only be made where justified. Any delays to the hearing process may impact the Board's ability to prepare its Reconsideration Report within the time limit set by the GIC.

Regarding probative value, the Board accepts Trans Mountain's submission that the Supplemental Report is consistent with evidence already on the record regarding the endangered status of the SRKW and its declining populations. While the Supplemental Report contains some information that is not currently available on the hearing record, the Board has always recognized that there will always be new reports and studies that will come into existence at future time periods, and which the Board will be unable to consider in its recommendation.

While all requests to file new evidence are treated on their merit, the Board has been clear that in the later stages of a hearing, the bar for admission of late evidence is generally quite high (see Ruling No. 105 and Ruling No. 109). In this case, Raincoast has presented the Supplemental Report to the Board well after the passing of deadlines for evidence and testing of evidence. The prejudice to Trans Mountain that would result from accepting the Supplemental Report is high, and it outweighs the probative value of the Supplemental Report. In addition, the Raincoast has failed to persuade the Board that there is a justifiable reason for the late filing.

For the above reasons, the Board denies the notice of motion. The Supplemental Report will not form part of the Board's evidentiary record for this Reconsideration.

MH-052-2018
Erratum to Ruling No. 27 – Raincoast Conservation Foundation (Raincoast) notice
of motion to file late evidence**

On 14 January 2019, the Board released Ruling No. 27 regarding Raincoast's 7 January 2019 notice of motion to file late evidence.

The Board has identified a typographical error in one sentence within the ruling. On PDF page 5, the Board had stated:

The prejudice to Trans Mountain that would result from accepting the Supplemental Report is high, and does not outweigh the probative value of the Supplemental Report.

Consistent with the view it expressed previously on PDF page 4, the Board intended for that sentence to read as follows:

The prejudice to Trans Mountain that would result from accepting the Supplemental Report is high, and it outweighs the probative value of the Supplemental Report.

The Board has updated Ruling No. 27 in the online public registry to reflect this correction.

But when we talk of the river that people have come to know as the Fraser there's no other name to it than Stó:lō. To us it's the river of rivers; Stó:lō, period. Our people would say the giver of life.¹

I. OVERVIEW

A. Background to the Reconsideration Hearing

1. Today, in continuity with thousands of years of history, the Stó:lō occupy and use *S'ólh Téméxw*, the lower Fraser River watershed of southwestern British Columbia. The Stó:lō Collective are Halkomelem-speaking Coast Salish people, culturally interlinked with many Coast Salish and culturally, spiritually, physically, psychologically, and economically interconnected with the land and resources of *S'ólh Téméxw*. The Project, if approved, will have direct and significant adverse impacts on *S'ólh Téméxw* and the ability of the members of the Stó:lō Collective, both present and future generations, to exercise their constitutionally protected inherent and established rights.
2. Due to the clear impacts on their rights and title that will result from the Project, the Stó:lō Collective has participated extensively in the regulatory approval process for the Project from the outset. They have done so in order to voice concerns about the risks posed to the Stó:lō Collective and ultimately to the Stó:lō's way of life. Five years later, the Stó:lō Collective is still waiting on a substantive response to their concerns.
3. Due to the federal government's decision in 2018 to purchase the Project, it has now placed itself in the shoes of Project proponent. As a result, Trans Mountain Corporation ("**TMC**") is now a Crown Corporation, owned by the Canada Development Investment Corporation, which is accountable to the Parliament of Canada through the Minister of Finance. TMC owns the operating entities of Trans Mountain, including Trans Mountain Pipeline ULC, the project proponent, and Trans Mountain Canada Inc., the operator of the pipeline.² The Trans Mountain entities, past and present, will be referred to collectively throughout this Argument as "**TM Canada**".
4. On September 20, 2018, through the OIC, the GIC referred aspects of the 2016 Recommendation Report released by the Board in May 2016 on the Project back to the Board for reconsideration ("**Reconsideration Hearing**"). The GIC's direction followed

¹ NEB Hearing Transcript for Oral Traditional Evidence Hearing on November 29, 2018 ("**OTE Hearing**") [NEB Filing ID A6L2F4], Stó:lō Collective at para. 3409.

² Canada Response to Information Request of Stó:lō Collective [NEB Filing ID A97002-5].

the August 30, 2018 decision (“**TWN Decision**”) of the Federal Court of Appeal (“**FCA**”) that quashed the GIC’s original approval of the Project.³

5. The Stó:lō Collective was formed for the sole purpose of coordinating and representing the interests of its membership in the regulatory approval process for the Project. It applied for and was granted intervenor status at the first NEB regulatory hearing concerning the Project (“**First Hearing**”) and, on October 5, 2018, the Stó:lō Collective was granted intervenor status in the Reconsideration Hearing.⁴
6. On October 12, 2018, the Board issued Hearing Order MH-052-2018 (“**Hearing Order**”) that served to define the List of Issues, Amended Factors and Scope of the Factors for the Environmental Assessment under the *Canada Environmental Assessment Act, 2012* (“**CEAA 2012**”) process, and the timelines through which the hearing will be carried out.⁵

B. The TWN Decision

7. In the TWN Decision, the FCA found, *inter alia*, that:
 - (a) the Board unjustifiably defined the scope of the Project under review to not include project-related tanker traffic which led to unacceptable deficiencies in the 2016 Recommendation Report, meaning that the GIC could not rely on it;⁶ and
 - (b) while Canada acted in good faith and selected an appropriate framework for consultation with First Nations, Canada’s execution of that framework resulted in an “unreasonable consultation process that fell well short of the required mark”.⁷
8. On the scope of the Project, the FCA found, *inter alia*, that, as the Board only considered mitigation measures through “the limited lens of its regulatory authority”, it:
 - (a) failed to take proper account of mitigation measures that could be taken outside of its regulatory authority;
 - (b) did not recommend any specific mitigation measures concerning to Project-related marine shipping in the 2016 Recommendation Report; and
 - (c) simply encouraged other regulatory authorities to “explore any such initiatives”.⁸

³ 2018 FCA 153 (“**TWN Decision**”).

⁴ NEB Ruling No. 1 to All Parties, October 5, 2018 [NEB Filing ID A94624].

⁵ NEB Hearing Order MH-052-2018, October 12, 2018 [NEB Filing ID A94793-3].

⁶ TWN Decision at para. 5.

⁷ *Ibid* at para. 762.

9. As a result of the Board's flawed scoping decision, the FCA found that the Board failed to engage all necessary legal requirements and thereby failed to provide the GIC with a legally sufficient report. Further, the FCA found that the 2016 Recommendation Report and recommendations contained therein were sufficient to put the GIC "on notice that the Board had unjustifiably excluded Project-related shipping from the Project's definition", and by simply relying on the Board's flawed 2016 Recommendation Report, the GIC – who had the ultimate decision-making authority – "could not functionally make the kind of assessment of the Project's environmental effects and the public interest that the legislation requires".⁹
10. On consultation, the FCA found, *inter alia*, that:
 - (a) Canada deployed note-takers to meet with the Indigenous applicants and transmit their concerns to Crown decision-makers, which would later be incorporated in the Crown Consultation Report, to Crown decision-makers;
 - (b) Crown decision-makers were rarely present, if at all. Rather than being a mechanism through which meaningful consultation could take place, the Joint Federal/Provincial Crown Consultation and Accommodation Report finalized in late November 2016 ("**CAR**") amounted to a 'what we heard' report wherein Canada diarized the Indigenous applicants' concerns while failing to address them;
 - (c) Canada was required to do more than receive and understand the concerns of the Indigenous applicants. Canada was required to engage in a considered, meaningful two-way dialogue; and
 - (d) the Indigenous applicants were entitled to a dialogue that demonstrated that Canada not only heard but also gave serious consideration to the specific and real concerns the Indigenous applicants put to Canada, gave serious consideration to proposed accommodation measures, and explained how the concerns of the Indigenous applicants impacted Canada's decision to approve the Project.¹⁰

⁸ *Ibid* at paras. 434, 438, and 456.

⁹ *Ibid* at para. 470.

¹⁰ *Ibid* at paras. 558, 563, 575, 591, and 603.

11. The Stó:lō Collective submits that the FCA's findings must be front of mind for the Board when reconsidering the issues in this hearing. The Reconsideration Hearing arises as part of a broader context in which Indigenous communities have expended substantial time and resources to ensure that they are adequately consulted and, where necessary, their Aboriginal rights and title are accommodated in relation to the Project only to be faced with a series of processes in which the Crown, a Crown regulator, or a proponent that is now owned by the Crown systematically fails to engage in the meaningful dialogue that true reconciliation demands.
12. The Stó:lō Collective and other Indigenous communities and organizations impacted by the Project have been forced to pursue recognition and accommodation of their constitutionally protected rights through: a regulatory hearing process that Canada has acknowledged is broken and requires modernization; a judicial review that was the largest of its kind before the FCA in which the Court expressly held that Canada failed in its constitutional obligations; and now in a Reconsideration Hearing that has been driven by unreasonable timelines dictated by the GIC which have curtailed the ability of the Indigenous intervenors to put forward their views and evidence fully.

C. Summary of Position on Reconsideration Hearing

13. It is the Stó:lō Collective's position on the Reconsideration Hearing that:
 - (a) The timeline imposed by the GIC for completion of the Reconsideration Hearing was unrealistic, favoured Canada and TM Canada, and led to a lack of procedural fairness overall;
 - (b) The Board cannot find that there has been adequate consultation through the Reconsideration Hearing because, *inter alia*:
 - (i) the process has failed to provide in substance an appropriate level of deep consultation; and
 - (ii) the Crown has failed to conduct a justification analysis of the infringements on the Stó:lō Collective's established right to fish;
 - (c) Despite the Stó:lō Collective's limited ability to put forward new evidence specific to Project-related shipping, a review of its previous technical submission, the oral traditional evidence and expert reports tendered by other intervenors

demonstrates that the Project impacts, including impacts from Project-related marine shipping, pose a significant risk to the cultural integrity of the Stó:lō Collective;

- (d) The Board has insufficient evidence before it to assess the adequacy of mitigation measures to address impacts of Project-related marine shipping in *S'ólh Téméxw* and the Fraser River; and
 - (e) In its report following the Reconsideration Hearing, the NEB should:
 - (i) not recommend that the GIC approve the Project; and
 - (ii) include the specific Project conditions which the Stó:lō Collective previously requested and which have never been properly considered by the NEB, TM Canada or Canada, nor incorporated into Project planning.
14. The Stó:lō Collective submits that the evidence on the hearing record from the First Hearing and the Reconsideration Hearing establishes that the Project, inclusive of Project-related marine shipping:
- (a) is likely to cause significant adverse environmental effects that cannot be justified in the circumstances;
 - (b) will infringe the Stó:lō Collective's proven Aboriginal rights; and
 - (c) is not in the public interest.
15. As a result, the Board should:
- (a) recommend that required consultation occurs before it issues its report or recommend against Project approval because of inadequate consultation;
 - (b) find that the Project is likely to cause significant adverse environmental effects that cannot be justified in the circumstances;
 - (c) find that the Project, inclusive of Project-related marine shipping, would seriously and permanently impair the Stó:lō Collective's ability to exercise its Aboriginal harvesting, cultural, and spiritual rights, as well as its established fishing rights; and
 - (d) recommend that a CPCN not be issued for the Project.

II. THE STÓ:LŌ COLLECTIVE: PEOPLE OF THE RIVER

A. The Stó:lō Collective

16. The Stó:lō Collective continues to represent the interests of Aitchelitz, Soowahlie, Yakwekwioose, Leq'á:mél, Skawahlook, Skowkale, Squiala, Skwah, Sumas, Shxwhà:y Village, Tzeachten, and Scowlitz. Members of these Stó:lō villages or bands are Stó:lō people and Aboriginal peoples within the meaning of the *Constitution Act, 1982* ("**Constitution**") and CEAA 2012. Aitchelitz, Shxwhà:y Village, Skowkale, Skwah, Soowahlie, Squiala, Tzeachten, and Yakwekwioose were also among the successful Indigenous applicants in the TWN Decision.
17. As an intervenor in the First Hearing, the Stó:lō Collective participated by, *inter alia*: filing technical and other written evidence;¹¹ issuing and responding to IRs;¹² bringing motions;¹³ and making written¹⁴ and oral summary argument.¹⁵
18. In this Reconsideration Hearing, the Stó:lō Collective has participated by, *inter alia*: filing letters of comment, objections, letters of support for motions of other intervenors, written evidence; as well as issuing IRs; providing Oral Traditional Evidence ("**OTE**"); and filing written Argument-in-Chief.¹⁶

¹¹ Stó:lō Collective Written Evidence, May 27, 2015 ("**NEB Evidence**") [NEB Filing ID A70240 (A4L7A2, A4L7A3, A4L7A4, A4L7A5, A4L7A6, A4L7A7, A4L7A8, A4L7A9, A4L7C0, A4L7C1, A4L7C2, A4L7C3, A4L7C4)].

¹² Stó:lō Collective Information Request No. 01 to Trans Mountain [NEB Filing ID A60225 (A3W6X8)]; Stó:lō Collective Comment on Adequacy of IR#1 Response [NEB Filing ID A61519 (A3Y8J4, A3Y8J5, A3Y8J6, A3Y8J7, A3Y8J8, A3Y8J9, A3Y8K0)]; Stó:lō Collective Round 2 Information Request [NEB Filing ID A65456 (A4G6F9, A4G6G0, A4G6G1, A4G6G2, A4G6G3, A4G6G4)]; Stó:lō Collective Round 2 IR's re-submission [NEB Filing ID A65488 (A4G7E6)]; Stó:lō Collective Letter re TM Response to NEB IR#3 [NEB Filing ID A68505 (A4J4F6)]; Stó:lō Collective Letter re TM Response to Stó:lō Collective Round 2 IRs [NEB Filing ID A68509 (A4J4G1)]; Stó:lō Collective Letter re TM Response to NEB IR#6 [NEB Filing ID A71939 (A4S3J8)]; and Stó:lō Collective IR45 Response [NEB Filing ID A71257 (A4R4T5)].

¹³ Stó:lō Collective Motion to request increased number of participants [NEB Filing ID A73706 (A4V1A6)].

¹⁴ Stó:lō Collective Final Argument [NEB Filing ID A75127 (A4X5T3, A4X5T4, A4X5T5)].

B. Stó:lō People + S'ólh Téméxw

19. The Stó:lō are “People of the River”, being the Fraser River, or to the Stó:lō, the “river of rivers”.¹⁷ Since time immemorial, the members of the Stó:lō Collective have inhabited, controlled and relied on *S'ólh Téméxw*, their traditional territory in the lower Fraser River watershed. The Stó:lō exercise Aboriginal rights throughout *S'ólh Téméxw*, including hunting, gathering, trapping and their established (non-treaty) right to fish.¹⁸
20. The Stó:lō are Halkomelem-speaking Coast Salish people who live in many villages in *S'ólh Téméxw*. The Stó:lō are culturally, spiritually, physically, psychologically and economically interconnected with *S'ólh Téméxw*. Stó:lō identity is based in enduring activities, such as fishing, language (Halkomelem), stories, songs and storytelling, and protection of cultural practices.¹⁹
21. The Stó:lō have a deeply established connection to and reliance on salmon, sturgeon and other aquatic species, all of which are integral elements of their society, culture, economy, politics, and traditions. Water quality was and remains a core factor of this relationship.²⁰
22. The Stó:lō maintain a wide range of political, socio-cultural, and economic ties, including occupation, use, and management of the land and resources within *S'ólh Téméxw*. The Stó:lō- Coast Salish have a long history of defending their lands from unwelcome outsiders.²¹
23. Stó:lō identity and societal health, including an interconnected set of spiritual, mental, physical, emotional relations are linked to and dependent upon the integrity of the land, air, water, and resources constituting *S'ólh Téméxw* and the Stó:lō cultural landscape.²² The activities of Stó:lō within *S'ólh Téméxw* provide a holistic view of economic, social, political, environmental, and spiritual connectivity; one cannot be successful or healthy without the other, for all things have shxwelí (spirit) and all things are interconnected.

²² *Ibid* at Introduction, p. 18.

C. Stó:lō Established Fishing Rights have not Been Considered

24. The Stó:lō are one of few Indigenous peoples in this country to have an established (non-treaty) right under s. 35 of the *Constitution*. This established right to fish for food and ceremonial purposes was affirmed by the Supreme Court of Canada (“**SCC**”) in *R. v. Van der Peet* after a long-fought court action.²³
25. Canada has acknowledged the Stó:lō Collective’s established right to fish in the Fraser River.²⁴ Despite this acknowledgement, at no time has Canada provided any analysis of how that constitutionally protected right to fish has been taken into account. Similarly, during the First Hearing, contrary to the requirement that the Board interpret its responsibilities in a manner consistent with section 35(1) of the *Constitution*,²⁵ the Board undertook no consideration of the fact that it was dealing with an established rights holder and that Project impacts and mitigation measures must be considered through that lens.
26. The terms and conditions included in the 2016 Recommendation Report provide no specific protection of the Stó:lō Collective’s established fishing rights.

D. Stó:lō Collective’s Participation in the First Hearing + Development of ICA

27. The Stó:lō Collective participated extensively in the First Hearing and expended substantial time and resources to be active intervenors despite significant reservations about the ability of the Board’s process to provide an appropriate level of consultation.
28. As part of its participation, in March 2014, the Stó:lō Collective provided TM Canada with its key technical submission, the Integrated Cultural Assessment (“**ICA**”) prepared by Ts’elxwéyeqw Tribe Management Limited, Stó:lō Research And Resource Management Centre, and Human Environment Group (“**ICA Authors**”). The ICA was intended to form the basis for constructive and meaningful consultation with the Crown. It identifies potential impacts within *S’olh Temexw* that could be caused by the Project, such as impacts on Stó:lō traditional activities, culture, lands, and resources.²⁶
29. In developing the ICA, the ICA Authors worked with Stó:lō community members to identify and review:

²³ [1996] 2 SCR 507 (“*Van der Peet*”).

²⁴ CAR, Appendix C-19 – Stó:lō Collective, p. 16.

²⁵ 2016 Recommendation Report [NEB Filing ID A77045], p. 45.

²⁶ Affidavit #1 of Shana Roberts, sworn December 5, 2018 at para. 10 [NEB Filing ID A96432-2].

- (a) historic and contemporary Stó:lō uses of *S'ólh Téméxw*;
 - (b) geotechnical data and Indigenous knowledge relating to natural hazards in the *S'ólh Téméxw*;
 - (c) hydrologic data and Indigenous knowledge relating to water and waterways in the *S'ólh Téméxw*; and
 - (d) ground-truthing, data and Indigenous knowledge relating to fish and fish habitat in the *S'ólh Téméxw*.²⁷
30. The ICA was based on surveys, interviews, meetings, and workshops held with over 200 community members and took approximately 12 months to complete. It looked at eleven traditional activities, many of which represent the exercise of the Stó:lō's Aboriginal rights, to determine if these activities would be impacted by the Project and rated those impacts as high, medium or low. Seven activities (fishing, spiritual, manufacture of cultural items, travel corridors, governance, economic activities and community programs and services) were identified as potentially highly impacted. Four activities (gathering, settlement, hunting and trapping, and inter-nation gathering) were identified as potentially of medium impact.²⁸
31. The ICA concluded that the Project poses a significant risk and represents a significant threat to the cultural integrity and survival of core relationships at the heart of Stó:lō worldview, identity and well-being. It warned that if the Project were approved without deep, meaningful consultation and accommodation of Stó:lō land management goals, rights and title, and decision-making, the Project would negatively impact Stó:lō governance.²⁹
32. The ICA also concluded that fishing and spiritual activities – two critically important rights – would have “[s]ignificant post-mitigation adverse impacts”, and that, as planned, the Project “would significantly jeopardize the survival of the unique Indigenous lifeway of the Stó:lō and unjustifiably infringe upon Stó:lō's Aboriginal rights, protected under s. 35 of the *Constitution*.”³⁰

²⁷ *Ibid* at para. 11.

²⁸ *Ibid* at paras. 12 and 16.

²⁹ *Ibid* at para. 13.

³⁰ *Ibid* at para. 14.

33. Accordingly, the ICA included 89 recommendations (“**89 Recommendations**”) which, if implemented by TM Canada or the Crown, would mitigate the Project’s adverse effects on Stó:lō communities. The 89 Recommendations included measures to mitigate the Project’s impacts on Stó:lō governance and established fishing rights, including the impact of oil spills into or near the Fraser River.³¹
34. The Board did not adopt any of the 89 Recommendations in its terms and conditions for the Project included with the 2016 Recommendation Report, nor did TM Canada provide a substantive response to the 89 Recommendations during the First Hearing.³² Similarly, to date, the 89 Recommendations have not been addressed by the Crown.
35. In the course of the TWN Decision, the FCA found:

...The ICA also contained 89 recommendations which, if implemented by Trans Mountain or the Crown, were believed by Stó:lō to mitigate the Project’s adverse effects on Stó:lō.

To illustrate the nature of the recommendations, section 17.2 of the ICA deals with recommendations to mitigate the Project’s impact on fisheries. Section 17.2.1 deals with Management and Planning in the context of fisheries mitigation. The recommended Management and Planning mitigation measures are:

17.2.1 Management and Planning

5. Stó:lō Fishing representatives will participate in the development and review of Fisheries Management Plans and water course crossing EPPs before construction and mitigation plans are finalized.
6. Stó:lō representatives will provide input on proposed locations for Hydrostatic test water withdrawal and release.
7. [The proponent] will consult with Stó:lō representatives to develop the Emergency Response Plans in the study area.
8. Stó:lō representatives will consult with community members to determine appropriate restoration plans for water crossings including bank armouring, seed mixes or replanting requirements.
9. Stó:lō fishing representatives must be notified if isolation methods will not work and [the proponent] is considering another crossing method.
10. Stó:lō representatives must be notified as soon as a spill or leak, of any size, is detected.

³¹ *Ibid* at para. 15.

³² *Ibid* at para. 17.

11. During water quality monitoring program, anything that fails to meet or exceed established guidelines will be reported to a Stó:lō Fisheries Representative within 12 hours.

These measures are specific, brief and generally measured and reasonable. If implemented they would provide more detail to the Board's generic conditions on consultation and require timely notification to the Stó:lō of events that may adversely impact their interests.

During the Board's Information Request process, the Stó:lō pressed Trans Mountain to respond to their 89 recommendations but Trans Mountain did not provide a substantive response. Instead, Trans Mountain provided a general commitment to work with Stó:lō to develop a mutually-acceptable plan for implementation.

The Board did not adopt any of the specific 89 recommendations made by the Stó:lō in its terms and conditions.³³ [Emphasis added]

E. Project Interference with the Stó:lō Collective's Rights + Title

36. TM Canada's existing pipeline and the Project's proposed new pipeline route cross approximately 195 km of *S'olh Temexw*, including by the base of Sumas Mountain and across a valley that was once Sumas Lake, which was an important feature for certain Stó:lō communities. Seven Project facilities (Hope Station, Wahleach Station, Sumas Station, Sumas Tank Farm, Port Kells Station, Burnaby Terminal and Westridge Marine Terminal) fall within *S'olh Temexw*.³⁴
37. The proposed pipeline right-of-way is immediately adjacent to a number of the Stó:lō Collective's members' communities and First Nation Reserves, crossing Grass No. 15 Reserve and Tzeachten IR No. 13.³⁵
38. The Project's new pipeline proposes to cross 131 waterbodies within *S'olh Temexw*. Of these, 84 have defined as bed and bank, 59 are designated as fish bearing and 31 are considered sensitive fish bearing. Over 240 Stó:lō fisherman rely on fish from these waterways for various purposes.³⁶
39. The Project will directly affect the established Aboriginal rights and title of the Stó:lō Collective and represents yet another in a series of linear corridors (including Highway #1, two railroads, the existing TM Canada pipeline, hydro lines, and roads) that have severed the Stó:lō from the Fraser River. The cumulative effects of all of these linear

³³ TWN Decision at paras. 682-686.

³⁴ CAR, Appendix C-19 – Stó:lō Collective, p. 8.

³⁵ *Ibid*, p. 8.

³⁶ ICA, Section 5, pp. 10-11.

corridors is to leave Stó:lo with very few places where they can access the river that gives them their name.³⁷

40. Although the timing of the Reconsideration Hearing meant it was not possible to undertake any further studies specific to Project-related marine shipping, on the basis of the evidentiary record, there is no doubt that Project-related marine shipping will exacerbate the Project's interference with the Stó:lo Collective's use of its land and resources for traditional purposes.

III. POSITIONS ON RECONSIDERATION HEARING

A. The Reconsideration Hearing is Procedurally Unfair

(i) A Significant Degree of Fairness is Owed

41. The Stó:lō Collective has repeatedly reminded the Board that it owes intervenors a significant degree of procedural fairness in this Reconsideration Hearing, and that the intervenors are entitled to "a meaningful opportunity to present their cases fully and fairly".³⁸

42. The FCA explained the Board's duty of procedural fairness in the TWN Decision:

The Board, as a public authority that makes administrative decisions that affect the rights, privileges or interests of individuals, owes a duty of procedural fairness to the parties before it. However, the existence of a duty of fairness does not determine what fairness requires in a particular circumstance.

It is said that the concept of procedural fairness is eminently variable, and that its content is to be decided in the context and circumstances of each case. The concept is animated by the desire to ensure fair play. The purpose of the participatory rights contained within the duty of fairness has been described to be:

... to ensure that administrative decisions are made using a fair and open procedure, appropriate to the decision being made and its statutory, institutional, and social context, with an opportunity for those affected by the decision to put forward their views and evidence fully and have them considered by the decision-maker.³⁹ [Emphasis added]

³⁷ *Ibid*, Section 7, p. 15.

³⁸ Letter of Comment regarding Reconsideration Hearing [NEB Filing ID A94494]; Objection to Locations and Limitations re OTE Hearings [NEB Filing ID A95245]; Response to Notice of Motion of Squamish Nation [NEB Filing ID A95575]; LT NEB re TWN and Living Oceans Applications and Motion [NEB Filing ID A96297]; Opening Statement and Written Evidence [NEB Filing ID A96432]; and LT NEB re Raincoast Notice of Motion [NEB Filing ID A97159].

³⁹ TWN Decision at paras. 230-231 citing *Baker v. Canada (Minister of Citizenship and Immigration)*, 1999 CanLII 699 (SCC), [1999] 2 S.C.R. 817, 174 D.L.R. (4th) 193 ("**Baker**") at para 22.

(ii) The Timeline is Unreasonable

43. The Stó:lō Collective has consistently communicated its concerns with the timing and process of this Reconsideration Hearing.⁴⁰ The Stó:lō Collective submits that the unrealistic 155 calendar days (“**Timeline**”) unilaterally set by the GIC for completion of the Reconsideration Hearing and delivery of its report has resulted in various breaches of the Board’s duty of procedural fairness owed to intervenors.⁴¹
44. The Timeline’s consequential, negative effects on the Reconsideration Hearing as a meaningful opportunity to present cases fully and fairly cannot be overstated. The GIC’s position on when this process must be concluded suggests that it is timing, and not procedural fairness, or the ability to fully canvas and consider the potentially significant adverse impacts of Project-related marine shipping on, *inter alia*, Aboriginal rights and title, the environment and species at risk, that is the most significant factor in the Reconsideration Hearing. This is particularly concerning in light of the fact that (as discussed below) Canada is in a position of conflict. The Timeline favours Canada and TM Canada, who have the resources and capacity to fully participate in the Reconsideration Hearing despite significant time pressures. Indigenous intervenors like the Stó:lō Collective do not.
45. Further, the Timeline has impacted the ability of the Stó:lō Collective to provide OTE as outlined in the letters to the Board of October 23 and 30 and November 26, 2018, and to provide updated or additional technical evidence focused solely on Project-related marine shipping as described in Ms. Robert’s affidavit.⁴²

⁴⁰ Letter of Comment regarding Reconsideration Hearing [NEB Filing ID A94494]; Notice of Intent and Objection re Oral Traditional Evidence [NEB Filing ID A95070]; Objection to Locations and Limitations re OTE Hearings [NEB Filing ID A95245]; Response to Notice of Motion of Squamish Nation [NEB Filing ID A95575]; LT NEB re Withdrawal from OTE Hearing [NEB Filing ID A96126]; LT NEB re TWN and Living Oceans Applications and Motion [NEB Filing ID A96297]; Opening Statement and Written Evidence [NEB Filing ID A96432]; Information Request #1 of the Stó:lō Collective [NEB Filing ID A96753]; and LT NEB re Raincoast Notice of Motion [NEB Filing ID A97159].

⁴¹ Letter of Comment regarding Reconsideration Hearing [NEB Filing ID A94494]; Notice of Intent and Objection re Oral Traditional Evidence [NEB Filing ID A95070]; Objection to Locations and Limitations re OTE Hearings [NEB Filing ID A95245]; Response to Notice of Motion of Squamish Nation [NEB Filing ID A95575]; LT NEB re Withdrawal from OTE Hearing [NEB Filing ID A96126]; LT NEB re TWN and Living Oceans Applications and Motion [NEB Filing ID A96297]; Opening Statement and Written Evidence [NEB Filing ID A96432]; Information Request #1 of the Stó:lō Collective [NEB Filing ID A96753]; and LT NEB re Raincoast Notice of Motion [NEB Filing ID A97159].

⁴² Notice of Intent and Objection re Oral Traditional Evidence [NEB Filing ID A95070]; Objection to Locations and Limitations re OTE Hearings [NEB Filing ID A95245]; Letter to NEB re Withdrawal from OTE Hearing [NEB Filing ID A96126]; and Affidavit #1 of Shana Roberts, sworn December 5, 2018 at para. 19 [NEB Filing ID A96432-2].

(iii) Limitations on Written Evidence

46. The Stó:lō Collective has faced significant hardship participating substantively in this Reconsideration Hearing due to the Timeline, including:
- (a) The Stó:lō Collective cannot prepare another integrated cultural assessment of, or update the ICA to include, Project-related marine shipping, as this would likely require months of information-gathering;
 - (b) There is limited time and capacity to engage with specialists and experts regarding the effects of Project-related marine shipping on marine ecosystems, tidal waters, and foreshore, all of which would require modelling and other intricate scientific processes;
 - (c) While there is some basic knowledge of hydrology and water-bitumen interactions available to the Stó:lō Collective, there remains limited understanding of the fate of diluted bitumen (“**dilbit**”) as it relates to the foreshore, brackish and fresh-water estuaries along the Fraser River, as well as its effects on the unique system of the Fraser River, such as its wandering gravel bed, meandering river, and the ancient streams that are tributaries therein. Amassing this knowledge requires new studies, which would take time and resources, both of which are not available to the Stó:lō Collective in the present circumstances;
 - (d) The Stó:lō Collective could not review and respond adequately to the evidence filed by Canada and TM Canada in the Reconsideration Hearing, as, collectively, Canada and TM Canada filed over 8,000 pages of evidence to which the Stó:lō Collective initially only had three weeks to respond; and
 - (e) The Stó:lō Collective does not employ a wildlife or marine biologist who could have researched and prepared a report, from either an Indigenous or Western perspective, of the species that could be affected by Project-related marine shipping, which, combined with the extremely short timelines imposed by the Board and GIC has forced the Stó:lō Collective to rely on what has been filed by TM Canada and Canada.⁴³

⁴³ Affidavit #1 of Shana Roberts, sworn December 5, 2018 at para. 19 [NEB Filing A96432-2].

47. Consequently, the extremely short timeline does not allow for a holistic approach to the review of the impacts of Project-related marine shipping, which the Stó:lō Collective believes to be missing from TM Canada and Canada's filed evidence. As described in Part IV of this Argument relating to Project impacts, the evidence establishes that there will be impacts, including socio-economic impacts, health and wellbeing, and spiritual impacts for the Stó:lō Collective, that are not being fully recognized.⁴⁴ It is deeply troubling that the Timeline dictated an inevitably unfair process from the outset.

(iv) Limitations on Oral Traditional Evidence

48. In its correspondence with the Board on OTE sessions for the Reconsideration Hearing, the Stó:lō Collective expressed, *inter alia*, concern and frustration over the locations chosen for the OTE sessions – Nanaimo and Victoria – as both are located on Vancouver Island and imposed undue travel requirements on Elders. The Stó:lō Collective also explained that webcam sessions were an inappropriate, and frankly insensitive, substitute for traditional hearings conducted in person. Despite the Stó:lō Collective's numerous inquiries, the Board did not provide an adequate reason for choosing two locations on Vancouver Island, nor did it agree to add a location in the lower mainland for its many Indigenous intervenors who are located on the mainland of British Columbia.⁴⁵
49. In addition to the issues with the locations chosen, the Stó:lō Collective advised the Board that the date range chosen for the OTE sessions conflicted with the Stó:lō Bighouse season. Consequently, many of the traditional knowledge holders were occupied with Bighouse duties and providing spiritual and ceremonial support thereof. Accordingly, the Stó:lō Collective advised that these dates and locations would prevent their Elders from providing OTE entirely.⁴⁶
50. Further, the Stó:lō Collective advised the Board that the date the Board unilaterally scheduled for the Stó:lō Collective to provide OTE – November 29, 2018 – was also the date reserved by the Province of British Columbia and the First Nations Leadership Council to hold the 4th annual BC Cabinet and First Nations Leaders' Gathering in

⁴⁴ *Ibid* at para. 20.

⁴⁵ Notice of Intent and Objection re Oral Traditional Evidence [NEB Filing ID A95070]; Objection to Locations and Limitations re OTE Hearings [NEB Filing ID A95245]; and Letter to NEB re Withdrawal from OTE Hearing [NEB Filing ID A96126].

⁴⁶ *Ibid*.

Vancouver. Other Stó:lō Collective members who may have otherwise been able to attend the OTE session in Victoria, BC, were occupied with the Leadership Gathering.⁴⁷

51. On October 30, 2018, the Stó:lō Collective filed a letter with the Board objecting to the locations chosen for the OTE sessions, and requested that the Board consider holding a session in the lower mainland. The Board also received letters containing similar requests from Shxw'ōwhámel First Nation, Little Shuswap Lake Indian Band and Squamish Nation. Rather than objecting to the locations chosen, Squamish Nation stated that it intended to provide OTE but only in the form of a sacred ceremony performed and discussed in the Squamish longhouse at Xwmelch'stn, in confidence, and with a limited audience present and no recording devices (collectively, the "**OTE Objections and Requests**").⁴⁸
52. In response to the OTE Objections and Requests, on October 31, 2018, the Board filed a request for comments from other intervenors regarding the locations chosen for the OTE sessions. Presumably, the Board wanted more opinions to inform its decision regarding OTE session locations.⁴⁹
53. The Board received letters from Stk'emlupsemc te Secwepemc of the Secwepemc Nation and Musqueam Indian Band, as well as from the Province of BC supporting the Board hearing matters in Indigenous communities. TM Canada filed comments on November 2, 2018, stating that it did not take a position on the location of the OTE sessions.⁵⁰
54. Despite the support from other Indigenous intervenors, the Province of BC, and the indifference of TM Canada, on November 7, 2018, the Board denied the OTE Objections and Requests, finding that it was procedurally fair to host all OTE sessions on, and make Elders and knowledge keepers travel to, Vancouver Island. Again, the Board cited the

⁴⁷ *Ibid.*

⁴⁸ Objection to Locations and Limitations re OTE Hearings [NEB Filing ID A95245]; Notice of Intent re Oral Traditional Evidence [NEB Filing ID A95072]; SFN LT NEB re Notice of Objection re Location for OTE [NEB Filing ID A95202]; Little Shuswap Lake Indian Band – Objection to in-Person Sessions to Provide Oral Traditional Evidence [NEB Filing ID A95281]; LT Squamish Nation to NEB re Intention to Provide Oral Indigenous Traditional Evidence [NEB Filing ID A95073]; and Letter to NEB from Squamish Nation re Oral Traditional Evidence [NEB Filing ID A95303].

⁴⁹ NEB Letter – Oral Indigenous Traditional Evidence Locations – Comments [NEB Filing ID A95289].

⁵⁰ SSN Comments on Location of Hearing OTE [NEB Filing ID A95402]; Musqueam Comments on Location of Oral Traditional Evidence Sessions [NEB Filing ID A95405]; Province of BC – Response Letter [NEB Filing ID A95399]; and Trans Mountain Letter to NEB re Location of Oral Traditional Evidence Sessions [NEB Filing ID A95377].

GIC's imposed Timeline, stating that the limited time for the Board to hear OTE was a factor in its decision and that the "mere inconvenience" of elders traveling to Vancouver Island "does not amount to unfairness".⁵¹

55. Fortunately, Chief Dalton Silver was able to attend and provide OTE on behalf of the Stó:lō Collective but the fact remains that, rather than a process that was reflective of cultural practices, the Board structured a process for OTE that was unduly burdensome, unaccommodating and restrictive.

(v) Limitations Imposed by the Board's Rulings

56. In addition to those indicated above, the Board has imposed other limitations throughout the Reconsideration Hearing that have prejudiced the intervenors' involvement in this process, including but not limited to:
- (a) Imposing a one-week timeline to allow comments on: the draft amended factors and scope thereof; the environmental assessment under CEAA 2012;⁵² the draft list of issues to be considered in the Reconsideration Hearing; and the design of the Reconsideration Hearing process itself. Despite the efforts of the intervenors on this short timeline, the ultimate Hearing Order and Procedural Direction No. 1 do not appear to incorporate the comments provided to the NEB by those intervenors;⁵³
 - (b) Providing only a 15-day extension for intervenors to file response materials to the over 8,000 pages of opening statements and direct evidence by TM Canada and the Federal authorities, only after receiving an extensive Notice of Motion from Squamish Nation⁵⁴ and comments from intervenors regarding the same;⁵⁵
 - (c) Not allowing intervenors to cross-examine TM Canada on its evidence, despite allowing TM Canada to question Elders and knowledge keepers on their OTE;⁵⁶

⁵¹ NEB Ruling No. 7 - Oral Indigenous Traditional Evidence Locations, Time Limitations and Costs [NEB Filing ID A95517].

- (d) Not allowing parties to make oral summary argument after unilaterally determining there is neither sufficient time nor need to hear oral argument;⁵⁷
 - (e) Dismissing applications and motions of Living Oceans Society and Raincoast Conservation Foundation (“**Living Oceans**”) and Tsleil-Waututh Nation requesting, *inter alia*, that the Board determine a *de novo* hearing of the Project was required due to the newly-reconstituted panel members involved in the Reconsideration Hearing not having heard the original OTE and oral submissions of the parties;⁵⁸
 - (f) Denying Living Oceans’ motion to require TM Canada to conduct a new risk assessment of Project-related marine shipping that includes all *Species at Risk Act*-listed species that may be affected by Project-related marine shipping;⁵⁹ and
 - (g) Denying Living Oceans’ motion seeking to late-file a 1.5-page report, prepared by Dr. Giles and dated January 7, 2019 (“**Supplementary Giles Report**”), which provides an update on the health of certain members of the southern resident killer whale population, despite the fact that the Supplementary Giles Report was highly relevant to the Board’s consideration of the effects of Project-related marine shipping on the southern resident killer whale population and that the Board has a responsibility to ensure that parties are provided a “meaningful opportunity to present their cases fully and fairly”.⁶⁰
57. While the Board attempted to justify all of these limitations by blaming the GIC’s Timeline, the fact remains that these limitations have rendered the Reconsideration Hearing so procedurally unfair that it cannot possibly be relied upon to inform a positive recommendation by the Board to the GIC.
58. In its Argument-in-Chief, TM Canada states that although the Timeline “did not allow for as much time as some of the Intervenors may have liked”, it was ultimately fair to all

parties.⁶¹ With respect, this conclusion is dismissive of the realities facing the Indigenous Intervenor. There is no equivalency between the capacity of TM Canada, a large Crown Corporation, owner of a multi-billion dollar existing pipeline and Project with employed technical staff at its disposal and experts at the ready, to participate fully in the Reconsideration Hearing and the capacity of the Indigenous Intervenor who, for the most part, do not have readily available staff that can be diverted to deal solely with the Reconsideration Hearing, unlimited resources or an army of experts waiting in the wings to prepare highly technical reports in mere weeks. The interests at stake for the Indigenous Intervenor required the Board to provide a greater degree of procedural protection in the circumstances.

59. Canada has recognized that the NEB needs modernization, including to ensure appropriate weight is given to traditional knowledge. Despite this, the GIC forced the Reconsideration Hearing under the current broken regulatory framework. Given Canada's acknowledgement concerning the NEB process, the Reconsideration Hearing should not have continued until that process is restructured to be able to meaningfully address the interests of First Nations.⁶²

B. The Board Must Find Consultation has been Inadequate

(i) The Process is Inadequate Generally

60. Canada has advised Indigenous intervenors that it will be relying on the Reconsideration Hearing to the extent possible to fulfil its constitutional duty to consult with Indigenous intervenors. In such circumstances, "the Board's process serves the additional purpose of contributing to the extent possible to the constitutional imperative not to approve a project if the duty to consult was not satisfied".⁶³ In addition, in Appendix 2 to the Board's letter of October 29, 2018 providing its reasons with respect to, *inter alia*, the List of Issues and the Amended Factors, the Board stated that it had amended the List of Issues to include Issue No. 6 – the potential impacts of Project-related marine shipping on Indigenous interests – to "more clearly reflect that the Board must carry out its responsibilities in a manner consistent with the *Constitution*, including subsection 35(1)".⁶⁴

⁶¹ Argument-in-Chief of TM Canada ("Argument of TM Canada"), p. 5 [NEB Filing ID A97422-2].

⁶² CAR, p. 147.

⁶³ TWN Decision at para. 526.

⁶⁴ Appendix 2 to Letter from Board dated October 29, 2018, p. 7 [NEB Filing ID A95187-5].

61. The Board went on to say that it will consider whether there has been adequate consultation and accommodation for the purposes of the Reconsideration Hearing consistent with the recognition of the rights recognized and affirmed in section 35.⁶⁵
62. While the Crown may choose to delegate procedural aspects of the duty to consult to the Board, the duty to consult will only be satisfied in such circumstances “if in substance”, and also procedurally, an appropriate level of consultation is provided. Ultimately, the legal responsibility for fulfilling the duty rests with the Crown alone as the “honour of the Crown cannot be delegated”.⁶⁶
63. The Reconsideration Hearing process in this instance has not, in substance, provided for an appropriate level of meaningful consultation between the Stó:lo Collective and the Crown. The procedural restraints imposed by the Board do not correspond to what was required to meet the requirements of deep consultation.
64. The same failings with the Reconsideration Hearing process outlined above concerning the lack of procedural fairness are also factors in the failure of this process to provide for adequate consultation.
65. First, the Timeline is entirely at odds with the legal obligations of the Crown and the interests of Indigenous peoples and undermines the legitimacy of consultation for the Project. Had the Crown instead engaged Indigenous peoples in determining an appropriate timeline for completing the Reconsideration Hearing and report, the resulting process would have moved closer to meeting the Crown’s legal obligations. Instead, the restrictive, time constrained process has provided limited (if any) opportunity for responsive, meaningful, two-way dialogue.
66. Second, the actual Reconsideration Hearing process fell far below the threshold required for consulting and accommodating the Stó:lo Collective:
 - (a) in this instance, the unilaterally-structured process did not create an appropriate mechanism for consultation, lacking any collaborative exchange with the Crown;
 - (b) the process placed an unreasonable burden on the Stó:lo Collective as intervenors to review significant volumes of evidence which it did not have capacity to investigate and challenge;

⁶⁵ *Ibid*, p. 7.

⁶⁶ *Haida Nation v. British Columbia (Minister of Forests)*, 2004 SCC 73 (“**Haida**”) at para 53.

- (c) with the exception of OTE, the Reconsidering Hearing was conducted solely in writing, and specifically precluded cross-examination. The IR process is not an adequate substitute; and
 - (d) between October 5, when Canada advised it would rely on the Reconsideration Hearing to fulfil its duty to consult and accommodate Indigenous intervenors and December 5, 2018, when the evidentiary record closed for intervenors, there was no direct engagement between the Stó:lō Collective and the Crown.
67. An imbalanced, one-way process does not contribute to the “mutual understanding” required in order for the Crown to fulfill the duty to consult.
68. For the consultation process to be meaningful, the Reconsideration Hearing must have provided an opportunity and capacity to engage fully in the Reconsideration Hearing process, to fully understand the impacts of Project-related marine shipping on the Stó:lō Collective, and to ensure that the Stó:lō Collective is able to communicate fully these impacts to the Board. The formal, adversarial nature of the Reconsideration Hearing and the voluminous evidence to be considered significantly limit the ability of this process to be meaningful. Overall the structure, rules, and the Timeline imposed are not conducive to nation-to-nation reconciliation, which underpins the Crown’s ability to consult and accommodate.
69. The Reconsideration Hearing has failed to provide a sufficient forum for meaningful consultation. The Stó:lō Collective submits that the Board must conclude that the Reconsideration Hearing has not been adequate to discharge any aspect of the Crown’s duty to consult and accommodate the Stó:lō Collective.

(ii) Failure to Consider Stó:lō Collective’s Established Right to Fish

70. The Stó:lō are one of few Indigenous peoples in this country to have an established (non-treaty) right to fish for food and ceremonial purposes. This established right is protected by s. 35 of the *Constitution*.
71. The Crown’s duty to consult and accommodate with respect to “potential, but yet unproven, interests” is grounded in the honour of the Crown. This duty to consult is distinct from the *fiduciary duty* that is owed in relation to particular *cognizable Aboriginal*

interests.”⁶⁷ The Stó:lō’s established fishing rights are “cognizable Aboriginal interests” giving rise to fiduciary obligations on the part of the Crown.

72. The Crown’s duty to consult and accommodate the Stó:lō as established rights holders clearly falls at the highest end of the *Haida* consultation spectrum, requiring “deep consultation”.⁶⁸ As the SCC stated in *Tsilhqot’in*: “The required level of consultation and accommodation is greatest where title [a form of right] has been established”.⁶⁹
73. Further, because the Stó:lō are established rights holders, consultation between the Crown and the Stó:lō Collective must include certain substantive elements. As noted in *Prophet River*, “it is without question that consideration of the issue of infringement of [established rights]” such as the Stó:lō’s fishing rights, “short of making an ultimate decision or determination, needs to be part of the consultation process”.⁷⁰
74. The Crown must consider whether its actions would constitute an infringement of an established right, and communicate that analysis on a timely basis as part of its consultation with the established rights holder. The requirement to communicate is essential to meet the “meaningful and responsive two-way dialogue” that the Crown agreed was necessary in this case. Failure to do so makes consultation inadequate.
75. Similarly, to uphold the Crown’s fiduciary duties, when considering and communicating on the issue of infringement, the Crown also ought to communicate why it considers any such infringement to be justified. Failure to do so also makes consultation inadequate.
76. The requirement that the Crown justify any infringement was first introduced in cases considering whether and when established Aboriginal rights may be lawfully infringed, which are not directly applicable here but which nevertheless inform this submission. In the leading case of *R. v. Sparrow*,⁷¹ the SCC unanimously held that the Crown must justify any *prima facie* infringement of established rights. Further, *prima facie* infringement is not a high burden to meet – to the contrary, an Indigenous rights holder

⁶⁷ *Haida* at paras. 27 and 54 (emphasis added).

⁶⁸ *Ibid* at paras. 27 and 54.

⁶⁹ *Haida; Tsilhqot’in Nation v. British Columbia*, 2014 SCC 44 (“*Tsilhqot’in*”) at para. 79.

⁷⁰ *Prophet River First Nation et al. v. Attorney General of Canada et al.*, 2015 FC 1030 at para. 53, aff’d 2017 FCA 15 at para. 47, leave denied 2017 CanLII 40511 (SCC).

⁷¹ [1990] 1 SCR 1075 (“*Sparrow*”).

need only show “government action has interfered with these rights in more than an insignificant or trivial way”.⁷²

77. Once *prima facie* infringement is established, the onus shifts to the Crown to justify its actions. In order for an infringement to be justified, the Crown must show the impugned action has a “compelling and substantial objective” and the proposed incursion is consistent with the Crown’s fiduciary duty towards Aboriginal people. The SCC in *Sparrow* further explained: “The special trust relationship and the responsibility of the government vis-à-vis aboriginals must be the first consideration in determining whether the legislation or action in question can be justified”.⁷³
78. Requiring the Crown to consider and communicate whether any infringement can be justified ensures the established right is engaged with, and treated with the appropriate degree of respect by the Crown. Such an approach is necessary in order to uphold the honour of the Crown generally, and its fiduciary duty specifically. In *Tsilhqot’in*, the SCC recognized the importance of the Crown’s justification obligation stating at para. 82: “As *Delgamuukw* explains, the process of reconciling Aboriginal interests with the broader interests of society as a whole is the *raison d’être* of the principle of justification. Aboriginals and non-Aboriginals are “all here to stay” and must of necessity move forward in a process of reconciliation.”⁷⁴
79. The obligation to justify infringements while engaging in consultation “may place a heavy burden on the Crown”, but it is necessary to uphold the honour of the Crown and ensure its fiduciary duty to Indigenous rights holders is fulfilled.⁷⁵ This approach also is consistent with the expectation articulated by the SCC in *Tsilhqot’in* that established rights require a justification analysis, and any compelling and substantial objective must be considered from the Aboriginal perspective, not just that of the general public.⁷⁶
80. If the Crown is not required to consider and communicate its infringement and justification analysis, then established rights holders may be treated no differently than

⁷² *Sparrow*, p. 1112; *R. v. Gladstone*, [1996] 2 SCR 723 at para. 43; *R. v. Morris*, 2006 SCC 59 at para. 53; *William v. British Columbia*, 2012 BCCA 285 at paras. 293-294, 322; rev’d on other grounds in *Tsilhqot’in*.

⁷³ *Sparrow* at para. 71; *Delgamuukw* at para 165; *Tsilhqot’in* at paras. 77, 80-88; *R. v. Nikal*, [1996] 1 S.C.R. 1013 at para. 110.

⁷⁴ *Tsilhqot’in* at para. 82; *Haida* at para. 42; *Van der Peet* at para. 24.

⁷⁵ *Sparrow*, pp. 1114-1115.

⁷⁶ *Tsilhqot’in* at paras. 80-81.

asserted rights holders in the Crown's consultation process, improperly minimizing the significance of proven rights. The Crown is legally required to consider these issues in advance of a decision, and ought to be required to communicate them – it is consistent with the honour of the Crown and the principles of consultation.

81. The honour of the Crown, including its fiduciary duty, dictate that the justification analysis must be conducted in good faith, in a transparent manner and in consultation with the holder of the Aboriginal right. None of that has occurred to date.
82. It was clear early on in the consultation process that the Stó:lō Collective's established fishing rights would be infringed by the Project, and the Crown has acknowledged that fishing activities would be impacted throughout the lifetime of the Project as a result of, *inter alia*, Project-related marine shipping:

In the course of this review Canada acknowledges the Board's finding that "Project-related activities could result in low to moderate magnitude effects on freshwater and marine fish and fish habitat, surface water and marine water quality." Appendix 12 to the Board report defines a moderate impact to be one that, among other things, noticeably affects the resource involved.

Canada also acknowledges that during the operational life of the Project fishing and harvesting activities directly affected by the construction and operation of the Westridge Marine Terminal would not occur within the expanded water lease boundaries.

Further, impacts on navigation, specifically in eastern Burrard Inlet, would exist for the lifetime of the Project, and would occur on a daily basis. Project-related marine vessels also would cause temporary disruption to the Stó:lō Collective's marine fishing and harvesting activities. These disruptions are said "likely to be temporary when accessing fishing sites in the Burrard Inlet that require crossing shipping lanes, as community members would be able to continue their movements shortly after the tanker passes." This too would occur on a daily basis if the Westridge Marine Terminal were to serve 34 Aframax tankers per month.⁷⁷ [Emphasis added.]

83. These are clear examples of *prima facie* infringement of the Stó:lō's established right to fish. Once such infringements were established, the burden shifted to the Crown to justify it. Canada has not done so.
84. The Crown has provided no analysis to the Stó:lō Collective, and there is no evidence before the Board to suggest it considered specifically or in any detail any of: the nature and content of the Stó:lō's established fishing rights; the type and degree of

⁷⁷ TWN Decision at paras. 724-726.

infringement; or justification for that infringement. It failed to conduct this analysis despite acknowledging the Stó:lō have these established rights.⁷⁸

85. Both the 2016 Recommendation Report and the CAR's assessment of Project impacts are incomplete and wholly unsatisfactory when it comes to the Stó:lō's fishing rights and cannot be said to be a discussion of infringement of an established right. Neither discuss the Stó:lō's established fishing rights in any detail. Without discussing and understanding the substantive content of the fishing right, it is impossible to adequately and fairly discuss Project impacts, including those related to Project-related marine shipping. The discussion of impacts that does appear in the CAR is far too general to satisfy the constitutional requirement to consider infringement in this case.
86. The Crown's lack of analysis and engagement on this issue is particularly egregious in light of the risks associated with a spill or contamination affecting the Fraser River, and the weaknesses in the scientific evidence on the fate and distribution of dilbit after a spill.⁷⁹ As the Crown acknowledged in the CAR, the "interaction between oil and sediments is still an active area of research."⁸⁰
87. The Board cannot find consultation has been adequate when the Crown has failed entirely to provide any justification analysis either in the course of the Reconsideration Hearing or otherwise, with respect to the Stó:lō's established right to fish.
88. On this basis alone, it is submitted, the Crown's consultation with the Stó:lō Collective was deficient and the Board must not recommend the Project's approval unless or until sufficient consultation has occurred, including preparation by Canada of its justification analysis.

(iii) Canada Cannot Rely on the CAR to Bolster its Consultation Record

89. In its direct evidence in the Reconsideration Hearing, Canada filed the CAR that was before the GIC when the Project was approved. Despite the FCA finding in the TWN Decision that the CAR was a result of a flawed Phase III consultation process, Canada continues to rely on it.

⁷⁸ CAR, p. 84; CAR Appendix C-19 – Stó:lō Collective, p. 16.

⁷⁹ Expert Report prepared by PGL Environmental Consultants, "Potential Effects of Trans Mountain Expansion Project-Related Vessel Traffic", December 2018 ("**PGL Report**"), Appendix "A" to Opening Statement and Evidence of Stó:lō Tribal Council [NEB Filing ID A96442-1].

⁸⁰ CAR, p. 113.

90. It is deeply concerning that the Board, in preparing its report on the Reconsideration Hearing, will have before it information concerning strength of claim and Project impacts on Aboriginal rights and title from the Crown's out of date and inaccurate consultation report. While Canada has advised that it will be revising the CAR prior to any further decision on Project approval by the GIC, the Board will not have the benefit of such revisions – meaning the Board process (which the Crown has stated forms an important part of its consultation process) will rely on a record that both the FCA and the Crown have acknowledged is flawed.
91. The Stó:lō Collective submits that, to the extent Canada seeks to rely on the CAR for the purpose of demonstrating the adequacy of consultation, the Board should give it no weight. The CAR is not evidence of actual consultation; to the contrary, as found by the FCA, the CAR represented note-taking and not “meaningful, two-way dialogue in response to Stó:lō's real and valid concerns about matters of vital importance to the Stó:lō”.⁸¹

(iv) Past Engagement with TM Canada Should not be Considered to Assess Adequacy of Consultation

92. In its response to the Stó:lō Collective's Information Request in the Reconsideration Hearing concerning whether any aspects of the duty to consult had been delegated to the proponent, Natural Resources Canada advised that, “[i]n addition to the Crown's direct consultation with Indigenous groups and consultation through the NEB, the Crown will also rely on the conduct of all of the proponent's past and future consultation activities, where appropriate, to fulfill its duty to consult.”⁸²
93. The Stó:lō Collective has serious concerns about the Crown's reliance on any of TM Canada's past engagement activities, and submits that the Board should not consider such engagement efforts in determining the adequacy of consultation.
94. Between 2014 and 2016, the Stó:lō Collective, repeatedly advised the Crown of the issues it had with TM Canada's engagement efforts, including: TM Canada's failure to honour commitments, its failure to accurately record information, its failure to incorporate traditional ecological knowledge into Project plans, and a pattern of responding to the Stó:lō Collective's requests by claiming that issues will be “discussed” or information

⁸¹ TWN Decision at para. 720; see also paras. 718 and 727.

⁸² Natural Resources Canada Response to Information Request from Stó:lō Collective (“**NRCan IR**”) [NEB Filing ID A6Q5X1].

would be provided at some point in the future (that point rarely came). The Crown has never substantively responded to these concerns. In the circumstances, the Crown cannot rely on TM Canada's past conduct to fulfill any part of its duty to consult, because the Proponent routinely mischaracterized its consultative activities in the past and the Crown failed to independently confirm the accuracy of the record despite the Stó:lō Collective's serious concerns.⁸³

C. Canada's Conflict of Interest

95. The deficient Reconsideration Hearing process and inadequate consultation must also be viewed in the context of the conflict of interest Canada has placed itself in as a result of its purchase of the Project.
96. Now that the federal government has acquired an ownership interest in the Project, the Crown is in the unique and delicate position of holding multiple conflicting roles. It is the owner and developer of the Project, who will enjoy significant financial benefits should the Project proceed; the regulator of the Project, who is tasked with ensuring that it is designed, constructed and operated in accordance with Canadian laws; a fiduciary in respect of Indigenous peoples (particularly where the Project crosses reserve lands); the Crown, who holds a unique position *vis a vis* Indigenous people, and has an obligation to act honourably in its dealings with them; a signatory to the *United Nations Declaration on the Rights of Indigenous Peoples*, who has committed to upholding the principles of free, prior and informed consent; and a trustee in respect of reserve lands, who holds that land - some of which is impacted by the Project - for the benefit of Indigenous peoples.
97. These different and conflicting roles place the Crown in a very difficult position, particularly with respect to meeting its legal obligations to Indigenous peoples. Given its role of "honourable Crown" and fiduciary/trustee, the Crown will be held to the highest standard in navigating these conflicting roles.
98. In *Blueberry River Indian Band v. Canada*,⁸⁴ Justice McLachlin stated that, in circumstances where the Crown is in a position of conflict of interest because its interests compete directly with those of the aboriginal group for which it must act as a fiduciary, the government must ensure that it does not benefit "personally" from the

⁸³ Draft Issues Tracking Table for TMX – IR45 – Stó:lō Collective [NEB Filing ID A4R4T5].

⁸⁴ [1995] 4 SCR 344, 1995 CanLII 50 (SCC).

exercise of its fiduciary powers. If a conflict of interest is established, the Crown will bear the onus of showing that it did not derive any personal benefit from the situation:

The trial judge was correct in finding that a fiduciary involved in self-dealing, i.e. in a conflict of interest, bears the onus of demonstrating that its personal interest did not benefit from its fiduciary powers: J. C. Shepherd, *The Law of Fiduciaries* (1981), at pp. 157-59; and A. H. Oosterhoff: *Text, Commentary and Cases on Trusts* (4th ed. 1992). The Crown, facing conflicting political pressures in favour of preserving the land for the Band on the one hand, and making it available for distribution to veterans on the other, may be argued to have been in a position of conflict of interest.⁸⁵

99. In the course of the decision, McLachlin J. upheld the following finding of the lower court:

Where there does exist a true fiduciary relationship such as in the case at bar, following the 1945 surrender, the same high degree of prudence and care must be exercised in dealing with the subject-matter to which the fiduciary duty relates, as in the case of a true trust (refer *Guerin et al. v. The Queen et al.*, *supra*, at page 376). The test to be applied is an objective one: good faith and a clear conscience will not suffice. It is also similar to a trust in another respect: where a trustee is in any way interested in the subject-matter of the trust, there rests upon him a special onus of establishing that all of the rights and interests both present and future of the beneficiary are protected and are given full and absolute priority and that the subject-matter is dealt with for the latter's benefit and to the exclusion of the trustee's interest to the extent that there might be a conflict. A similar onus rests on the Crown in the case at bar regarding the equitable obligation which it owed the plaintiffs.

...

It appears that, as in the case of *Kruger v. The Queen*, [1986] 1 F.C. 3 (C.A.), there existed in the case at bar a conflict of interest between the Department of Indian Affairs and The Director, The Veterans' Land Act: the former was seeking the best price available for the land and was interested in obtaining it immediately in order to purchase substitute reserves closer to the trap lines (See Exhibit 428). The latter, on the other hand, wanted to secure good agricultural land at the lowest possible price in order to allow the veterans to obtain a greater benefit from the purchase.

The statement of Heald J. at page 17 of the above cited report of the Kruger case is particularly relevant here:

Bearing in mind that it is the Crown which owes the fiduciary duty to the Indians, the facts of this case clearly raise the issue of conflict of interest, in my view. It seems evident that two Departments of the Government of Canada were in conflict concerning the manner in which the Indian occupants of Parcel A should be dealt with. The evidence seems to unquestionably establish that the officials of the Indian Affairs Branch were diligent in their efforts to represent the best interests of the Indian

⁸⁵ *Ibid.*, at para. 53.

occupants. On the other hand, the Department of Transport was anxious to acquire the additional lands in the interests of air transport. This situation resulted in competing considerations. Accordingly, the federal Crown was in a conflict of interest in respect of its fiduciary relationship with the Indians. The law is clear that "one who undertakes a task on behalf of another must act exclusively for the benefit of the other, putting his own interests completely aside" and that "Equity fashioned the rule that no man may allow his duty to conflict with his interest". On this basis, the federal Crown cannot default on its fiduciary obligation to the Indians through a plea of competing considerations by different departments of Government.⁸⁶ [Emphasis added.]

100. It is difficult in the circumstances to see past the apparent conflict between the Crown's role as fiduciary in respect of Indigenous peoples and, in particular the fiduciary duty it owes to the Stó:lō Collective arising from the Collective's cognizable Aboriginal interest, being their established fishing rights, and its role as ultimate owner of a Project that *prima facie* infringes that cognizable interest. Further, it is without question that the Crown will benefit if the Project is approved.
101. This conflict is even more glaring when comments by the federal government, including Prime Minister Trudeau and Finance Minister Morneau that the Project will proceed are considered.⁸⁷ The Crown cannot, on the one hand, pledge to ensure that no decision will be made until meaningful consultation has occurred, and on the other hand, assert that Project approval is a foregone conclusion. These competing, and potentially irreconcilable, interests are exemplified in the statements made in this Reconsideration Hearing. In response to the Information Request of the Stó:lō Collective, Natural Resources Canada stated that:

A recommendation on whether to approve the Project will only be considered by the Governor-in-Council once it is satisfied that: (1) the Crown has adequately fulfilled its duty to consult and that consultations with potentially impacted groups have been offered and/or carried out in a meaningful and responsive manner; and (2) accommodations have been considered, where appropriate, and responses have been provided to Indigenous communities, governments and Nations.⁸⁸ [Emphasis added.]

In contrast, TM Canada concludes the first paragraph of its Argument-in-Chief with the assertion, "Canada needs the Project now".⁸⁹ [Emphasis added.]

⁸⁶ *Apsassin v. Canada*, [1988] 3 FC 20 at paras. 56, 126-127.

⁸⁷ Minister Morneau Statement on the Trans Mountain Expansion Project, August 30, 2018 (Toronto, Ontario): <https://www.fin.gc.ca/news-nouvelles/speeches-discours/2018/2018-08-30-eng.asp>.

⁸⁸ NRCan IR at p. 19 [NEB Filing ID A6Q5X1].

⁸⁹ Argument of TM Canada, p. 1.

102. The Crown's competing interests cast doubt on the federal government's intentions, and without further action to address the conflict, the consultation cannot be said to be meaningful or that it upholds the honour of the Crown. To conduct the Reconsideration Hearing and to seek to remedy the failed Phase III under the spectre of this conflict of interest and the perception of bias is antithetical to reconciliation.

IV. PROJECT IMPACTS ON THE STÓ:LŦ COLLECTIVE

103. It is the Stó:lŦ Collective's position that this Reconsideration Hearing process is so inherently flawed that it cannot result in the Board recommending that the GIC issue a CPCN for the Project. However, in any event, it is imperative that the Board understand the significant adverse impacts the Project and Project-related marine shipping would have on the Stó:lŦ Collective, should it be approved.
104. The OTE and a review of impacts outlined in the ICA demonstrates that the loss of access to or availability of *S'ólh Téméxw* or the aquatic resources of the Fraser river would be devastating to Stó:lŦ culture and identity. The members of the Stó:lŦ Collective continue to rely on *S'ólh Téméxw* for food, educational, ceremonial, medicinal, and economic purposes. *S'ólh Téméxw* is integral to Stó:lŦ identity, and a risk to that land is a risk to that identity. Here that risk resulting from Project-related marine shipping cannot be negated.

A. Oral Traditional Evidence

105. In *Delgamuukw v. British Columbia*, the SCC stressed the importance of ensuring proper weight is given to OTE:

Notwithstanding the challenges created by the use of oral histories as proof of historical facts, the laws of evidence must be adapted in order that this type of evidence can be accommodated and placed on an equal footing with the types of historical evidence that courts are familiar with, which largely consists of historical documents. This is a long-standing practice in the interpretation of treaties between the Crown and aboriginal peoples: *Sioui*, *supra*, at p. 1068; *R. v. Taylor* (1981), 62 C.C.C. (2d) 227 (Ont. C.A.) at p. 232. To quote Dickson C.J., given that most aboriginal societies "did not keep written records", the failure to do so would "impose an impossible burden of proof" on aboriginal peoples, and "render nugatory" any rights that they have (*R. v. Simon*, [1985] 2 S.C.R. 387 (S.C.C.) at p. 408). This process must be undertaken on a case-by-case basis.⁹⁰

⁹⁰ [1997] 3 S.C.R. 1010 ("*Delgamuukw*") at para. 8.

106. On November 29, 2018, Chief Dalton Silver of the Sumas First Nation provided OTE on behalf of the Stó:lō Collective. The Stó:lō Collective submits that in considering this evidence, the Board must give it the same weight, and consider it on the same level of significance, as the scientific and technical evidence that has been tendered.
107. Chief Silver has been an elected council member and Chief of the Sumas First Nation for a total of 27 years, and, for a four-year term, he served as Chief for Yakwekwioose First Nation and, under traditional governance, the Ts'elxwéyeqw Tribe.⁹¹
108. Chief Silver's OTE was informed by knowledge passed down to him by his grandfather, Chief Richard Malloway. Chief Malloway was an executive member of the North American Indian Brotherhood in the 1940s and a founding member of the Union of British Columbia Union Chiefs. Chief Malloway did not attend formal school, but was taught to read and write and at 19 years old, was appointed spokesman for the Stó:lō. Chief Silver explained that his grandfather was instrumental in maintaining Stó:lō culture and ensuring the generational transfer of knowledge.⁹²
109. Chief Silver's OTE included sharing of information and stories concerning Stó:lō's longstanding socio-cultural and socio-economic relations and values, and how Stó:lō well-being is linked to and dependent on the integrity of the land, air, water and resources of *S'ólh Téméxw*.
110. Chief Silver began his OTE by explaining traditional Coast Salish burials to the Board. Historically, the Coast Salish would place their ancestors' remains in cedar boxes, which were then tied in trees. Over time, their ancestors' remains – fluids, flesh, blood – would run out of the boxes, down the trees, and into the ground. Because of this, the flesh and blood of Stó:lō people are all around their territories in the Coast Salish area:

The trees, the grasses, everything that grows has been nourished by our ancestors. Everything that we harvest, the plants that we use, the medicines, the foods, the animals come eat those grasses. All those plants grow along the waterways, provide food to those fish that help us survive, brought us sustenance. The affinity we feel for the nature around us, the s'iwes, the teachings of our people tell us those are our relatives.

There's people [sic] saying in many different cultures in Indigenous communities, you'll hear people say, "All my relations." When that is said, we're talking about

⁹¹ OTE Hearing at para. 3351.

⁹² OTE Hearing at para. 3353.

everything around us. It's not just your blood relatives, your cousins, your whatever, it's everything that's around us. ...⁹³

111. Chief Silver's explanation of Stó:lō interconnectedness indicates that the inevitable effects of Project-related marine shipping, and possible spills resulting therefrom, on the environment, salmon, the southern resident killer whales, and other Coast Salish communities, will impact the Stó:lō Collective as well. If there ever was a misconception that Project-related marine shipping would only affect First Nations living directly adjacent to the Salish Sea, Chief Silver's OTE on interconnectedness dispels this misconception.
112. Chief Silver told the Stó:lō story of how the orca came to be. By way of introduction, he described that he and his people are wolves, his mother's people are black bear, and his relatives in the interior are coyote. According to the story, Yexwelat, the eagle was trying to help Stóg:ya, the black wolf who was having trouble with his eyes. Yexwelat helped direct him to the ocean so that the salt water could fix his eyes, but ended up drowning in the ocean trying to save Stóg:ya. The story concludes with Stóg:ya looking for Yexwelat and discovering their transformation into the orca:

You see, when wolf came up, he found that he couldn't go back to the land. And when he looked around for eagle, he seen this fin on his back, which our people say is the eagle's wings, they folded up. And you see the white spot, white spots on the front of the killer whale, that comes from the white head of the bald eagle.

And it's through these stories that I'll say that the orcas, the killer whales are my brothers and sisters, as my people are wolf.⁹⁴

113. This story reveals that, despite being further inland, the Stó:lō have their own stories about and connection to the orca. The suffering resulting from the impacts on the southern resident killer whales as a result of Project-related marine shipping is felt throughout the interconnected Coast Salish community.
114. Moving inland from the coast, Project-related marine shipping could have detrimental effects on the Fraser River. In his OTE, Chief Silver explained the importance of the Fraser River to the Stó:lō peoples, stating:

But historically the Stó:lō people were right down to the mouth of what is now the Fraser. I mentioned the rivers around us. The Stó:lō people have been there since time immemorial. We've talked about different rivers over here; say, the

⁹³ OTE Hearing at paras. 3370-3371.

⁹⁴ *Ibid* at paras. 3390-3391.

Cowichan River, the Nooksak River, the Skagit River. Our people would say the Nooksak Stó:lō, the Sumac Stó:lō, the Cowichan Stó:lō, Staele (phonetic) Stó:lō. But when we talk of the river that people have come to know as the Fraser there's no other name to it than Stó:lō. To us it's the river of rivers; Stó:lō, period. Our people would say the giver of life.⁹⁵

115. Chief Silver went on to explain how a clean environment is essential to Stó:lō cultural integrity and security, stating:

The practices of our people are such that we need the clean environment, we need the clean water, we need the salmon and other fish species, other wildlife for carrying out those ceremonies. They're very sacred winter ceremonies that happen in our longhouses and in other places actually out in wildlife.

But...we need all our relations to be pure; the wildlife, the water, everything around us. Our very cultural survival is reliant on this."⁹⁶

116. Finally, regarding interconnectedness with other Coast Salish peoples, Chief Silver explained: "Our brothers and sisters on the Salish Sea, whatever happens on the Stó:lō affects them."⁹⁷

117. A similar sentiment was expressed by Tribal Chief Tyrone McNeil, member of the Seabird Island First Nation and tribal chief of the Stó:lō Tribal Council ("**STC**"), who presented OTE for the STC:

Just acknowledging that though I'm from Seabird and Stó:lō, Stó:lō people, the people of the river on the mainland of southwestern and British Columbia, that the people here are my relatives. We're Coast Salish, we're Halq'eméylem. We've got family connections, direct family connections, indirect family connections. We share a similar and common language, a similar and common culture, traditions, and a particular spirituality.

And it's in that sense here of being Coast Salish and in the past not having an opportunity to voice any concerns I or we may have with regards to the marine side of the proposed project, that I'm here today, as a Stó:lō person, as a Stó:lō leader, as a Coast Salish leader, within the context of extending my voice in support of my Coast Salish relatives, which I am obliged and obligated to do in such a way that over the course of this morning we'll be identifying concerns that are specific and direct to us as Stó:lō people, as somebody from Seabird Island, Sth'kwóllh of the Stó:lō people, but also some indirect that may more directly impact my Coast Salish relatives, who may be more directly impacted by all the

⁹⁵ *Ibid* at para. 3409.

⁹⁶ *Ibid* at paras. 3436, 3439-3440.

⁹⁷ *Ibid* at para. 3441.

aspects of marine, but because they are directly impacted, I'm indirectly impacted and our people are indirectly impacted.⁹⁸

B. Analysis of Impacts Based on ICA + Evidentiary Record

118. As described above, the ICA was a key technical submission from the Stó:lō Collective during the First Hearing. Due to the significant time restraints, the Stó:lō Collective has been unable to update the ICA to include specific analysis of the risks posed by Project-related marine shipping on Stó:lō rights, title and interest; however, for the purpose of ensuring that the Board has some understanding of the potential impacts of Project-related marine shipping on the Stó:lō Collective (albeit limited due to time constraints), the Stó:lō Collective has identified from the ICA and analyzed potential adverse impacts arising from Project-related marine shipping. In assessing these impacts, the Stó:lō Collective has also reviewed and relied on the oral traditional evidence presented by Chief Silver and other Coast Salish communities, and the written evidence filed in the First Hearing and the Reconsideration Hearing by Indigenous intervenors. The impact assessment provided for in this section is a result of that evidentiary review.
119. Stó:lō identity is not limited to tangible heritage or a geographically grounded place, but is based in enduring activities, such as fishing, language (Halkomelem), stories, songs, and storytelling, protection of cultural practices, and the protection from 'others' (i.e., non-Stó:lō). Many aspects of Stó:lō intangible heritage and traditional cultural expressions, including transformer narratives, songs, spiritual and cultural principles and practices, are shared among individuals and families of Stó:lō living throughout *S'ólh Téméxw* creating a collective identity that has both spatial and non-spatial linkages and connections. As a result, impacts to Stó:lō people and culture cannot be assessed or understood simply as a factor of 'spatial proximity' and direct spatial relations between the location of a resource or place of practice (i.e., site), an area of impact, and a particular community (i.e., reserve or Band).⁹⁹
120. Figure 1, below, provides a visual form of the main principles of Stó:lō culture. This image draws together some central concepts of Stó:lō culture described by Stó:lō community members in the ICA: identity, health, and paradigm.¹⁰⁰

⁹⁸ NEB Hearing Transcript for Oral Traditional Evidence Hearing on November 26, 2018 [NEB Filing ID A96127-1], Stó:lō Tribal Council at paras. 1253-1254.

⁹⁹ ICA, Introduction, pp. 18-19.

¹⁰⁰ ICA, Section 2, p. 14.

Figure 1 – Four Interconnected Dimensions of Stó:lō Culture

(i) Method and Process for ICA Impact Rating

121. The ICA was developed using participatory methods. A combination of interviews, focus groups, field studies and research provided community perspectives on how they felt their culture would be affected by the Project. The ICA prioritized and attempted to establish a Stó:lō worldview and epistemology as a fundamental framework within which to carry out its assessment of potential impacts to Sto:lo cultural heritage. The Stó:lō Cultural Model developed for the ICA portrays aspects of Sto:lo culture that are already under extreme pressure. Similarly, the impact rating criteria reflect Stó:lō perceptions of magnitude, duration, societal impact, and likelihood.¹⁰¹
122. Throughout the ICA, the ICA Authors use the Stó:lō Cultural Model which schematically depicts, according to the Stó:lō Collective's worldview, a suite of Stó:lō values and the inter-connected relations between people, places and things. The ICA uses this model, and a series of unique impact rating criteria to evaluate potentially linked environmental, social and economic effects that may be associated with the Project.¹⁰²
123. Stó:lō leadership and citizens prefer an impact rating method that allows them to track individual effects, but also allows comparison of the magnitude of different effects across different areas of interest (i.e. compounding effects to cultural values stemming from distinct impacts to water quality, spiritual sites and traffic etc.). For this reason, the Stó:lō model portrays Project impacts using different line types and different colours. The different line types illustrate how linkages between cultural activities and values have changed over time. For example, a solid line indicates a strong direct link between an activity and a cultural value, while a dotted line indicates that only very few people carry out the activity or that there are very few places to carry out the activity, severely diminishing the opportunity to instil this value.¹⁰³
124. The ICA Authors also employ different colours to help illustrate how the linkages between cultural activities and values may be affected by the Project. The Project's conformance with Stó:lō views of cultural sustainability (i.e., satisfying the needs of present generations without compromising the ability of future generations to meet their own needs) was a key consideration in determining significance of the impacts on the environmental and sociocultural aspects assessed in this ICA. An impact was

¹⁰¹ ICA, Section 2, p. 4.

¹⁰² ICA, Section 2, p. 7.

¹⁰³ ICA, Section 2, pp. 11-12.

considered significant if it weakened a cultural value linkage to the point that it compromised this objective. To assist in making the determination of significance, the level of importance of the impact and the likelihood of occurrence were considered, as shown in Table 2-11 below.¹⁰⁴

Colour Code	Line used on cultural model	Predicted Residual Impact Level
RED		Highly Significant Adverse Effect
YELLOW		Moderate Significant Adverse Effect
GREEN		Moderate or Highly Significant Positive Effect
GREY		Not significant Effect

Table 2-3: ICA Colour Legend for Cultural Model and Cultural Value Tables

¹⁰⁴ ICA, Section 2, p. 15.

		Likelihood		
		Unlikely	Likely	Highly Likely
Importance	Low	No to Low Adverse Effect Not significant	Moderate significant adverse effect	Moderate significant adverse effect
	Medium	Moderate significant adverse effect	Moderate significant adverse effect	High Significant adverse effect
	High	Moderate significant adverse effect	High Significant adverse effect	High Significant adverse effect

Table 2-11: ICA Table for Determination of Significance

125. The Stó:lō Cultural Model showing threats to inter-linked aspects of Stó:lō cultural integrity has been used throughout this section to illustrate impacts of the Project, inclusive of Project-related marine shipping on these traditional activities that will be adversely affected.
126. In addressing impacts, the Stó:lō Collective has looked at: general Project concerns, including spill risks, air quality, and oil spill trajectory; and how the Project, including Project-related marine shipping, adversely impacts specific Stó:lō traditional activities and cultural values.

(ii) Potential Adverse Impacts from Project-Related Marine Shipping

127. The potential adverse impacts identified from Project-related marine shipping that are of significant concern to the Stó:lō include:
- (a) Cumulative impacts of “acceptable losses” of dilbit during filling at Westridge Marine Terminal (“WMT”). Sufficient research on the nature of dilbit in marine, riverine, foreshore, and estuary environments within the Salish Sea has not been conducted and without fully comprehending the nature of dilbit in in this context, there is limited ability for emergency response planning or clean up;
 - (b) Cumulative impacts of air pollution as a result of increased vessel traffic, and/or due to spills. Airborne factors of contamination present a constant issue

impacting the wind dry salmon fishery in the Fraser Canyon, yet no emergency response plan for air as it relates to the pollution factors of a dilbit spill or marine traffic has been provided; and

- (c) Impact of spill or leak from the oil transport vessel or ATB at any point within the Salish Sea which will have long-term consequences in the marine, riverine, foreshore, and estuary environments and air.

128. As a result, the ability to scope sufficient mitigation measures is compromised.

(iii) Air Quality Concerns Resulting from Project-Related Marine Shipping

129. In 2015, the intervenor, Metro Vancouver, retained Levelton Consultants Ltd. (“**Levelton**”) to compile a report that assesses the effects of spilled dilbit on air quality (“**Levelton Report**”).¹⁰⁵ Levelton modeled air contaminant emissions at English Bay, First Narrows Bridge, Second Narrows Bridge, and WMT using the reasonable worst-case oil spill volumes estimated in a report conducted by Nuka Research Planning Group LLC.¹⁰⁶ The Levelton Report predicts that a spill would result in exceedances for a majority of pseudo components. This could exacerbate regional air quality issues in the Fraser Valley due to capture and release in snow caps, plants, and to meteorological effects. As stated in their Argument-in-Chief filed in the First Hearing, Tsleil-Waututh identified that there are gaps in the available information due to the study area being reduced and not all meteorological conditions considered.¹⁰⁷
130. Stó:lō people do not anticipate direct Project impacts on their ability to maintain the dry rack fishery of the Fraser Canyon, however there are concerns related to Project contributions to regional air quality issues and the contamination of the fish being wind

¹⁰⁵ Tsleil-Waututh Nation’s Record of Written Evidence, Volume 9 of 9, Appendix 5: Air Quality Impacts from Simulated Oil Spills in Burrard Inlet & English Bay, Air Quality Dispersion Modelling Report, submitted by Levelton Consultants Ltd., May 11, 2015, p. 1393 [NEB Filing ID A4L6C4].

¹⁰⁶ Oil Spill Response Analysis, Part 1, prepared by Nuka Research and Planning Group, LLC for Tsleil-Waututh Nation, City of Vancouver, and Tsawout First Nation, filed on December 2, 2015 [NEB Filing ID A4W1L4] (originally filed with the NEB by TWN on May 26, 2015 as Exhibits C358-13-18 to C358-13-22 [NEB Filing ID A70206]).

¹⁰⁷ Written Argument-in-Chief of the Intervenor Tsleil-Waututh Nation, January 12, 2015 at para. 173 [NEB Filing ID A4X4V2] citing TWN’s Record of Written Evidence, Volume 9 of 9, Appendix 5: Air Quality Impacts from Simulated Oil Spills in Burrard Inlet & English Bay, Air Quality Dispersion Modelling Report, submitted by Levelton Consultants Ltd., May 11, 2015, p. 1393 [NEB Filing ID A4L6C4].

dried. A thorough assessment of air quality effects was beyond the scope of the ICA, however this is a known area of significant concern among the Stó:lō people.¹⁰⁸

131. The following figures, contained within the Levelton Report, illustrate the predicted results of a “potential worst case oil spill” involving the Project in different spill locations along the coast:
 - (a) English Bay;
 - (b) Second Narrows; and
 - (c) WMT.¹⁰⁹
132. In addition, for each spill location, the maximum predicted concentrations at each receptor from 12 meteorological scenarios have been analyzed to represent the potential spatial distribution for four spill locations.¹¹⁰
133. The figures include indications of the acute inhalation exposure limit and “Protective Action Criteria” (“**PAC**”) from the US Department of Energy Emergency Management Issues Special Interest Group. The PAC was used as an additional health exposure guideline, in order to predict the potential health effects to the general public if they were exposed to a particular hazardous chemical if a spill were to occur. PAC have three theirs of exposure limits for each chemical:
 - (a) PAC-1: Mild, transient health effects;
 - (b) PAC-2: Irreversible or other serious health effects that could impair the ability to take protective action; and
 - (c) PAC-3: Life-threatening health effects.¹¹¹
134. Figures 4-2, 4-10, and 4-14 below, contained within Levelton Report, each show the maximum predicted one-hour contour plot of benzene, indicating the contours of the acute inhalation, PAC-1, ad PAC-2 exposure limits for different spill locations along the coast.

¹⁰⁸ ICA, Section 5, pp. 56.

Figure 4-10 Acute Inhalation, PAC-1, and PAC-2 Exposure Level Contours for Benzene for a Second Narrows Spill

Figure 4-14 Acute Inhalation, PAC-1, and PAC-2 Exposure Level Contours for Benzene for a Westridge Terminal Spill

135. The Stó:lō Collective raised air quality in the course of Phase III consultation with Crown:

The Stó:lō Collective has highlighted air quality as a key environmental concern in relation to the Project, particularly that pipeline development, terminal operation and marine shipping could increase the number of air pollutants within Stó:lō territory including in the Chilliwack area where the effects of air quality on cultural foods such as wind-dried salmon are well known. The Stó:lō Collective explained that air is funneled through the Fraser Valley and transports contaminants directly to their territory as seen by airport developments in Richmond and Abbotsford (another consideration overlooked by the NEB). In relation to environmental protection, the Stó:lō Collective commented at the September 23, 2016 meeting with the Crown that the last time they heard from the proponent was over a year ago and that since then, the Stó:lō Collective has asked about filing additional evidence and what they can do to move the process forward. The proponent responded that environmental experts were already in the field, which has left the Stó:lō Collective largely out of the process taking place within their territory; a fact which they deemed disappointing as they are the primary experts of their land.¹¹²

136. No steps have been taken by Canada in response to these concerns.

(iv) Assessment of Spill Risk and Fate and Effect of Oil Spills from the Project

137. According to a study assessing the spill risk for the Project (“**Spill Risk Study**”) which was provided by Tsleil-Waututh Nation, the probability of a tanker spill is greater than what has been provided by TM Canada, based on several proven and highly respected methodologies.¹¹³ The Spill Risk Study concluded that the modeling application used by TM Canada is inaccurate and unreliable.¹¹⁴ The study compared tanker spill probabilities using the TM Canada application, the United States Oil Spill Risk Analysis (“**OSRA**”) model, and the Vessel Traffic Risk Assessment (“**VTRA**”) model. Whereas the TM Canada application found that the likelihood of a spill within the next 30 years is 10 percent, the OSRA and VTRA models estimated that the risk was in fact between 52 and 89 percent without a tug, and 41 percent with a tug and that such risk increases in a 50-year scenario.¹¹⁵
138. According to an expert report prepared by Jeffrey W. Short, Ph.D. in 2015 for Tsleil-Waututh Nation, the City of Vancouver, and Living Oceans Society (“**Short Report**”):

¹¹² CAR, Appendix C-19 – Stó:lō Collective, p. 16.

¹¹⁴ *Ibid.*, p. 810 [NEB Filing ID A4L6A6].

¹¹⁵ *Ibid.*

The Salish Sea, and especially Burrard Inlet and the Fraser River estuary, is one of the most ecologically important coastal marine habitats along the entire Pacific coast of North America. It is seasonally inhabited by over a million sea and shorebirds, including more than 30% of the global population of snow geese. It is one of just 6 sites along the west coast of North America of international and hemispheric importance. It is the only site of comparable ecological importance from the Canadian border with the State of Washington to the Copper River delta in Alaska.¹¹⁶

The Fraser River is the largest single salmon-producing river on the Pacific coast of North America (including Alaska), supporting runs of sockeye salmon (*Oncorhynchus nerka*) that can number in the tens of millions, along with major runs chinook (*O. tshawytscha*), chum (*O. keta*), pink (*O. gorbuscha*) and coho (*O. kisutch*) salmon, as well as steelhead trout (*O. mykiss*).⁴ These returning adult salmon support several species of marine mammals, including the endangered southern resident killer whale (*Orcinus orca*) stock, commercial fisheries worth millions of dollars, and subsistence harvests for First Nations that depend on them for maintaining their cultural heritage as well as for nutrition. Juvenile salmon out-migrating from the Fraser River depend on the estuary's high biological productivity and in turn provide forage for the seabirds and other fish species.¹¹⁷

The combined aggregations of extraordinarily high densities and numbers of sea- and shorebirds, marine mammals and fish make them especially vulnerable to potentially devastating mortalities should a major oil spill occur in Burrard Inlet or the Fraser River estuary as a result of the Project. Seabirds and shorebirds are particularly sensitive to both internal and external oil exposure, and their foraging habits, preening behaviour and resting requirements lead to frequent contact with surface oil when present. Petroleum exposure alters feather microstructure, compressing plumage so that it loses its buoyancy, insulating function, and flight capability. Birds contaminated at sea thereby succumb from drowning, hypothermia, starvation, or dehydration.¹¹⁸

139. In the Short Report, Dr. Short is clear that a spill could cause significant ecological consequences including devastating impacts to fish, including juvenile salmon, free-swimming suspension feeders, adult salmon, sub-adult salmon, indirect contamination of prey, and jellyfish. This impact will not only directly impact the inherent rights of Stó:lō but will impact their culture, socio-economic, social, psychological, spiritual and physical health.¹¹⁹

¹¹⁶ TWN's Record of Written Evidence, Volume 7 of 9, Appendix 3: Fate and Effect of Oil Spills from the Trans Mountain Expansion Project in Burrard Inlet and the Fraser River Estuary, prepared by Dr. Jeffrey W. Short, dated May 11, 2015 at paras. 66-68, Appendix 1: Curriculum Vitae, pp. 1205-1216 [NEB Filing ID A4L6A8].

¹¹⁷ *Ibid.*

¹¹⁸ *Ibid.*

¹¹⁹ *Ibid.*

140. Dr. Short recognized, and included in his report, that oil spills can cause mortality of marine mammals, including harbor seals, sea otters, Orca whales, and have indeterminate impacts on river otters, harbor porpoise, Dall's porpoise, Pygmy Sperm and Grey whales, and many more species located in the Salish Sea that rely on intertidal and marine habitats for sustenance.¹²⁰ Moreover, there is high potential of high mortality rates for waterfowl.¹²¹

141. Of critical note is Dr. Short's conclusion that:

In addition, a small, medium or credible worst-case scenario sized spill has the potential to contaminate tens of kilometers of shorelines on time scales of decades.

In summary, the seasonally high abundances of sea- and shorebirds in the Fraser River estuary, dilbit occur there. These mortalities could lead to population-level ecosystem perturbations both regionally and farther afield if substantial proportions of species' populations are killed. Ensuing ecosystem perturbations in the Fraser River estuary might lead to disruptions in the recruitment of many other aquatic species, either because of higher consumption of plankton by forage fish released from predation by seabirds, or by poor nutritive value of forage fish for their seabird, marine mammal, and other fish that consume them. These effects should be evaluated by a comprehensive food-web analysis of the marine ecosystem.¹²²

(v) Oil Spill Trajectory and Impacts

142. Tsleil-Waututh Nation provided a study conducted by Dr. Jerry Galt that models oil spill trajectory. This study demonstrates that the interconnectedness of the Burrard Inlet, the Howe Sound, and the Fraser River tides, winds, and water movements.¹²³ Following the review of TWN's Oil Spill Trajectory Modeling, the first 24 hours of an instantaneous release and that of a continuous release are drastically different in consideration of oil spill trajectory due to tidal cycles, both ebb and flood tide. The latter, continuous release, having a greater propensity for contamination within tidal waters, intertidal waters and related foreshores. As noted by Chief Dalton Silver, the tidal impacts on the Fraser River extend as far upriver as to reach Harrison Lake and, potentially, beyond.

I was talking with someone the other day and I said, "Why is it when Fisheries and Oceans are talking about tidal waters, they say that stops at the Mission

¹²⁰ *Ibid*, pp. 84, 10, and 71.

¹²¹ *Ibid*. p. 81.

¹²² *Ibid*, p. 74.

¹²³ TWN's Record of Written Evidence, Volume 6 of 9, Appendix 2: Oil Spill Trajectory Modeling Report, prepared by Dr. Jerry Galt, Glenwest Systems Inc., dated March 26, 2015 [NEB Filing ID A4L7Y7], pp. 7, 15, and 20.

Bridge" -- which is right in my territory -- "when we know the tidal waters go up much further than that?" My relatives at Sts'ailes, the fluctuations in the levels there, they know happen daily, and it's because of the tide on the Salish Sea. It goes right up to Harrison Lake. Those guys see the water levels change daily. And I'm sure it goes much further up than that.¹²⁴

143. The tidal nature of the Fraser River referred to in Chief Silver's evidence is a specific example of where traditional knowledge is critical in order to properly understand the Project's impacts, and in particular significant adverse environmental effects resulting from Project-related marine shipping, such as oils spills.
144. This is also an example of where the Board in the 2016 Recommendation Report placed too much reliance on TM Canada and lost the benefit of considering this important traditional knowledge in the course of the First Hearing:

The Stó:lō representative stated that, among other things, Trans Mountain was directed by the Board to include Indigenous knowledge in Project planning, but did not. By way of example, the Stó:lō explained that the Fraser River is a tidal (at least up to Harrison River), meandering river, with a wandering gravel bed that is hydrologically connected to many wetlands and waterways crossed by the Project. A map of historical waterways was provided in the ICA, along with a table listing local and traditional knowledge of waterways crossed by the Project. None of this information was considered in Trans Mountain's technical reports. In Stó:lō's view, Trans Mountain's assumptions and maps about the Fraser River were wrong and did not include their traditional knowledge. A year after the ICA was provided to Trans Mountain the Stó:lō met with Trans Mountain's fisheries manager who had never seen the ICA or any of the technical information contained in it.¹²⁵

145. As part of its consultation "note-taking", Canada noted the concerns over traditional ecological knowledge:

At both the April 13, 2016 and September 23, 2016 meetings with the Crown, the Stó:lō Collective provided examples of relevant Traditional Ecological Knowledge (TEK) which they felt should have been considered within the Project design, the environmental assessment, and mitigation planning. They noted that this knowledge has been ignored by the proponent. Such examples include the in-depth knowledge of historic waterways and complex hydrologic systems of the lower Fraser Valley, knowledge related to historic flooding, connectivity between wetlands and waterways, landslides and historic cycles of fish species and seasonal variations affecting fish habitat. The Stó:lō Collective also provided multiple examples of important traditional use sites, for instance the locations of bathing sites identified by First Nations within the 150 metre (m) RoW alignment at Bridal Veil Falls near Chilliwack, which did not appear on the proponent's detailed alignment sheets; nor did important wetland areas targeted for medicinal

¹²⁴ OTE Hearing at para. 3406.

¹²⁵ TWN Decision, para. 688.

plant gathering, or harvesting areas for cultural species (such as eels traditionally used for harvesting sturgeon). Riverbank harvesting areas and various other spiritual and cultural sites also seemed to have been overlooked by the proponent in its more detailed planning work, which is alarming to the Stó:lō Collective.¹²⁶

146. The Stó:lō Collective has repeatedly stressed the importance of consulting with traditional knowledge holders due to the nature of the Fraser River, which is tidal (at least up to Harrison River), with a meandering gravel bed that is hydrologically connected to many wetlands and waterways. The Stó:lō Applicants also advised it was critical to ensure its people's' traditional ecological and other knowledge was fully integrated into Project planning (ie. field surveys, mapping and development of protection plans), and asked the Crown to require such a Project Condition. However, this particular issue has never been addressed.¹²⁷
147. It is clear that further work, study, and an appreciation of relevant traditional knowledge is required in order to understand the full scope of potential adverse impacts from Project-related marine shipping.

(vi) Stó:lō Fishing Practices

148. As stated in the ICA, fishing is a foundational aspect of Stó:lō society, culture, economy, politics and traditions. Stó:lō have customary laws and protocols that have been used since time immemorial in establishing and maintaining their fishing rights.¹²⁸
149. Today, over 240 Stó:lō fishermen rely on fish from the waterways, whether for food, social, ceremonial, or commercial purposes, providing food to Stó:lō families within Salish (both Coast and Interior Salish) territories. *Sia:teleq* are recognized caretakers of specific fishing spots. They are knowledgeable and practicing fishermen, and well respected elders of the Stó:lō community; today fewer Stó:lō people have a marked fishing spot that is taken care of by one individual. The title of *Sia:teleq*, therefore, is inherited by right.¹²⁹
150. Based on DFO sources and the table below, it is estimated that on an annual basis Stó:lō fishermen collectively harvest at least 2,000 – 2,700 lbs of salmon per individual household for food, a total of 2,700 lbs of salmon for ceremonial use, and a total of 1,800

¹²⁶ CAR, Appendix C-19 – Stó:lō Collective, p. 13.

¹²⁷ TWN Decision, para. 688.

¹²⁸ ICA, Section 5, p. 1.

¹²⁹ *Ibid*, p. 9.

lbs for social use. These calculations are based on an average of figures provided by DFO reports (2011-2013). Based on research conducted for the Project, ceremonial consumption accounted for approximately 6,075 lbs of salmon annually in support of Winter Dances alone that occur in Bighouses (9) listed in the ICA. This does not account for wind dried salmon, or consumption associated with other social or ceremonial gatherings that take place throughout the year. The commercial industry varies between types and other mitigating factors, such as borrowing versus owning a net, and varies from year to year due to the annual variation in population returns.¹³⁰

Reach of Fraser (KP for TMEP)	Food (lbs)	Social (lbs)	Ceremonial (lbs)	Commercial (lbs)
(1013 - 1042) - set net sites	2000 per household	1800	2700	
(1016-1018.5; 1029-1035 1035.5-1046) Drifting	2000 per household			
(1032-1033.1; 1033.4-1034) Beach seining and drifting				1,301,675 - 8,400,000 depending on type of fish (chum versus pink)

SOURCE: DFO RECORDS FOR ANNUAL ABORIGINAL FSC HARVEST (2011-2013); PERSONAL COMMUNICATIONS WITH STÓ:LŦ COMMERCIAL FISHERS

Table 5-5: Estimated Annual Harvest for Food, Social, and Ceremonial Purposes

151. Traditional methods, shared knowledge and learned stories surrounding the waterways of *S'ólh Téméxw* are not only passed on through *sxwóxwiyám* (narratives of the distant past “when the world was out of balance and not quite right”), but provides context for place names, and understanding of traditional property rights/laws, customary laws of inheritance and encourages use of the Halq'eméylem language.¹³¹

¹³⁰ ICA, Section 5, p. 29. Original source of Table 5-5 is the DFO records for annual Aboriginal FSC Harvest (2011-2013) and personal communications with Stó:lŦ commercial fishers.

¹³¹ *Ibid*, p. 30.

152. Based on information collected for the ICA including that from Stó:lō expert fishers and fisheries managers, approximately 2,213 Stó:lō individuals/households rely on fish. At least 420 Stó:lō people fish as part of a crew for commercial economic opportunity, and approximately 240 Stó:lō fishers have attachments to ancestral sites as *Sia:teleg* (caretakers of specific fishing spots) and all Stó:lō communities have an interest in the waterways crossed by the Project.¹³² The impact on the established right to fish must also be considered in light of the marked decrease in the availability and abundance of fish experienced by Indigenous communities across BC, including the Stó:lō Collective, as a result of government fisheries regulation and the rise of commercial fisheries that have grown to exclude extensive Indigenous participation:

When I was growing up, it was every weekend June to September every weekend, now it is just waiting, waiting, waiting, and we only get the one weekend, then have to wait for three weeks or more before we can go out there again, and you know it affects the families that practice culturally. You know my family we don't sell our fish, because we need our fish for the winter, we are a fish people, my mom eats fish for breakfast, lunch, and dinner, and so we need and we freeze or can it, wind dry it.¹³³

(vii) Project Impacts on Stó:lō Fishing Rights

153. It is clear from the OTE presented by Coast Salish knowledge keepers that fishing and protection of aquatic resources are extremely important to the Stó:lō and other Coast Salish people:

I think the vessel traffic that occurs now on the Salish Sea and at the mouth of the Stó:lō has already done so much damage that I don't know that we can recover from that. I don't know that the wildlife, I don't know that the fish and everything else, (speaking in Native language), as my Elder said, I don't know if that can recover.

There were times when I was a young kid with my late father and my uncles and our relatives at Semiahmoo, we used to dig clams. I so much enjoyed that when I was a kid. My dad would get the crabs from our relatives there. We enjoyed a lot from the Salish Sea, as well as the Stó:lō.¹³⁴

...

In terms of the types of fishing resources we have, it's predominantly salmon, but there's -- that's the known that everyone in the country, I think, knows that B.C. has salmon, but the majority of them come up the Fraser River. And we also, in our traditional territory, have, over time, accessed sturgeon, eulachon, herring,

¹³² *Ibid* Section 5, p. 47.

¹³³ *Ibid* Section 5, p. 164.

¹³⁴ OTE Hearing at paras. 3418-3419.

halibut, seals. Whatever is in the water, either fresh water or salt water, we've harvested over time and utilized as a part of our economy. And we did have a very vibrant economy.

And the people who accompanied this gentleman traded with that ship. They traded fish and they traded other goods. So it's been our economy for time immemorial.

The declaration on the right, the Musqueam declaration, attests to that. Musqueam has been and aspires to regain its self-governing and self-sustaining economy. The population is very strong in terms of what we are committed to in terms of upholding our rights. We know what our rights are, and fishing is always present. It's ever-present.

And some of the old-timers could actually tell which creeks fish came from, the salmon. They could tell you that they were going to spawn in the Musqueam Creek or the Chilliwack Creek or, you know, just by looking at the fish. So it's really a science that's undocumented in terms of how Aboriginal people can work with the fish.¹³⁵

...

When the Salmon return to the Fraser, our community is vibrating. It's -- everybody is -- there's -- everybody's getting ready. We have Elders teaching our youth how to mend nets, where to fish, when to fish, what species we are trying to target at various points of the year. And that's a key point that I wanted to make here today was that, in terms of traditional resources, a vast majority of them are no longer accessible to Musqueam within our reserve lands.

Only through traditional protocols with various neighbouring First Nations are we able to harvest other aquatic -- sorry -- other resources, including deer and elk.

So we're protectors of the river, along with our neighbours and on behalf of our neighbours at times, and also for the people who are further up the river who harvest the salmon that go up the Fraser River but don't have direct access at the mouth.¹³⁶

...

And I talked a little bit about how we lived seasonally. We lived at Təmtə́míxʷtən Mountain in the winter time. We were up at Inlailawatash in the fall time preserving food for the winter. In the spring and the summer, we lived along here and of course, around July and August we all went to the Fraser, which has the best, in my humble opinion, Sockeye salmon run.

The second story that Gabriel shared the first time was about Waut-Salk, who was one of our more important -- well, not more important -- he was an important figure, hereditary leader of our people, and two young men. These boys were up

¹³⁵ NEB Hearing Transcript for Oral Traditional Evidence Hearing on October 20, 2014 [NEB Filing ID A4D4G7], Musqueam Indian Band at paras. 3570, 3573, 3574, and 3594.

¹³⁶ *Ibid* at paras. 3580, 3581, and 3677.

here at Inlailawatash and they were messing around with the salmon that were in the river. They say that the salmon was so plentiful you could walk across the river and not get wet because there were so many fish in the river.

So Waut-Salk took the fish away because the boys were abusing them and the people were afraid because then if they didn't preserve enough fish for the winter, they wouldn't survive the winter. So the boys were made to apologize. And I'm telling you the Reader's Digest version, but know that the boys learned that there are consequences to your actions and those actions impact not just the individuals, but the entire community.

And Waut-Salk brought the fish back after the boys apologized.

And that shows the management of the resources and that our people took care of our environment. And as I said, there are consequences to actions in the same way that there will be consequences when oil spills occur.¹³⁷

154. Applying the methodology outlined in the ICA, Figure 2 below illustrates the potential impacts from Project-related marine shipping on Stó:lō fishing.

¹³⁷ NEB Hearing Transcript for Oral Traditional Evidence Hearing on November 26, 2018 [NEB Filing ID A96350-1], Tsleil-Waututh Nation, paras. 3546, 3548-51.

Figure 2 – Potential impacts of Project-Related Marine Shipping on Stó:lō Fishing

155. The following areas of concern have the potential to have significant adverse impacts on Stó:lō fishing rights:

- (a) Air pollution – vessels and spills;
- (b) Cumulative impacts of minor spills in the Salish Sea from the source point of WMT;
- (c) Impact of spill or leak from a tanker; and

(d) Impact of spill or leak from an ATB.

156. As noted in Tsleil-Waututh Nation's written evidence in 2014,¹³⁸ and as their export report shows,¹³⁹ there is a high spill probability which has the potential to affect air and water quality. While air quality impacts may only linger for the short term, an oil spill will have long term consequences to fish, fish habitat and the marine, foreshore, and estuary environments. All of these environments are integral to the survival of the different types of salmon on which the Stó:lō rely and to which they are culturally tied.

(viii) Stó:lō Spiritual Activities

157. Spiritual activities have always been a critically important element of Stó:lō culture that establish bonds that are central to individual and collective relations with the land and resources of *S'ólh Téméxw*. Shxwelí is a central means of connection between people and what is generally viewed as 'nature' or the environment. Stó:lō have cultural a belief that all things are interconnected: mental, physical, emotional, spiritual (individually) and spiritual (collective) and this interconnection to all things ensures individual and collective health¹⁴⁰. Spiritual activities are an essential part of Stó:lō cultural practices that are incorporated within their social fabric:¹⁴¹

The cultural ways of our people are such that there are still practices that we have that are not for public viewing. We have our sacred, sacred practices that we keep amongst ourselves.

And I think in talking about these things, it's kind of a touchy subject for a lot of our people in that we've been more or less legislated out of control of our resources over the years. And I've talked with others at the national level, and internationally with our friends to the south, our relatives. And the strength of that in B.C. is that we have no formal arrangement whatsoever. Our inherent rights have been acknowledged and protected.

The trees, the grasses, everything that grows has been nourished by our ancestors. Everything that we harvest, the plants that we use, the medicines, the foods, the animals come eat those grasses. All those plants grow along the waterways, provide food to those fish that help us survive, brought us sustenance. The affinity we feel for the nature around us, the s'iwes, the teachings of our people tell us those are our relatives.

¹³⁸ Written Argument-in-Chief of the Intervenor Tsleil-Waututh Nation, January 12, 2015 [NEB Filing ID A4X4V2] at para. 173.

¹³⁹ Tsleil-Waututh Nation's Record of Written Evidence, Volume 9 of 9, Appendix 5: Air Quality Impacts from Simulated Oil Spills in Burrard Inlet & English Bay, Air Quality Dispersion Modelling Report, submitted by Levelton Consultants Ltd., May 11, 2015, p. 1393 [NEB Filing ID A4L6C4].

¹⁴⁰ ICA, Introduction, p. 18.

¹⁴¹ ICA, Section 7, p. 1.

There's people saying in many different cultures in Indigenous communities, you'll hear people say, "All my relations." When that is said, we're talking about everything around us. It's not just your blood relatives, your cousins, your whatever, it's everything that's around us. There's a cycle that we know.

And I've mentioned to others, if back in time, when we first made contact with the newcomers to our lands, and we talk about the management of resources -- our people say the mismanagement of our resources -- if we were treated equally at first contact, and our way of looking after things, our perspectives culturally, holistically, if they were put into the management decisions that have been happening over our territories, we would be in a lot better position today.¹⁴²

158. For the Stó:lō, each person has a place, a role, a special understanding within the world; each person has a gift, and understanding these gifts, roles, and places is to be thankful and grateful to the Spirit. It is an understanding of balance: with nature, with the physical and psychological, between and among relationships between each other, between people and the environment, and a balance of health between all these things.¹⁴³
159. There are specific physical landmarks and sacred places that are integral to Stó:lō identity, which are related to traditions and stories, that create balance and continuity. Stories that integrate change and integrate specifics of the effects of those changes help the generations to understand and to heal from the experiences.¹⁴⁴
160. Based on interviews carried out for the ICA, over 360 individuals who are known as dancers and up to 75% of the Stó:lō population within *S'ólh Téméxw*, participate in seasonal ceremonies and/or cultural events each year. Participation in these events has been steadily increasing over the last several years. People travel from many different Coast Salish communities (for example, Lummi, Nooksack, Musqueam, Squamish, Cowichan, Capilano, Chemainus, East Saanich, Lower Skagit, Upper Skagit, Tulalip) as well as many of the Stó:lō communities, to attend events hosted in *S'ólh Téméxw*.¹⁴⁵ Critically important to the well-being of this system (i.e., a spiritual political-economic system of production, distribution, consumption and reproduction), are dependent relationships on the Stó:lō cultural landscape, education processes, and resources – particularly salmon and cedar.¹⁴⁶

¹⁴² OTE Hearing, pp. 3358, 3361, 3370-72.

¹⁴³ ICA, Section 7, p. 4.

¹⁴⁴ *Ibid.*

¹⁴⁵ *Ibid.*, p. 10.

¹⁴⁶ *Ibid.*, p. 15.

(ix) Project Impacts on Stó:lō Spiritual Activities

161. There has been extensive damage to Stl'áleqem (a gift exchange at a gathering or feasting event) sites within *S'ólh Téméxw* and more face ongoing disturbance due to development. For example, the loss and intrusion of several bathing sites, in Chilliwack, Sumas, Cheam and Wahleach. Of particular significance is the loss of over 199 streams and Sumas Lake, in *S'ólh Téméxw*, which had powerful connection to Stó:lō and Coast Salish spirituality.¹⁴⁷
162. Applying the methodology outlined in the ICA, Figure 3 below illustrates the potential impacts from Project-related marine shipping on Stó:lō spirituality.

¹⁴⁷ ICA, Section 7, p. 3.

Figure 3 – Potential impacts of Project-Related Marine Shipping on Stó:lō Spirituality

163. Due to the inherent connectivity of spirituality with air, land, water, four-legged, winged, finned, two legged, and so forth, any impact on any of them has a correlated impact on the spirituality of Stó:lō.
164. If there is an impact to fish or migratory birds, there is an impact to the syuwel, to the Big House, to the spiritual connection to the species and its shxwelí, to the connections to the gifts from the creator the sxexó:mes (all our gifts). This greatly impacts the core principles of Stó:lō tradition and culture: sxexó:mes, snoweyelh (teachings, principles, or

laws), tomiyeqw (great-great-grandparents/aunts/uncles and great-great-great-grandchildren/nieces/nephews), shxwelí, and sxwōxwiya:m. The sxwōxwiya:m provide understanding of the transformation times of Xa:als, the Creator, and the transformation of Stó:lō ancestors, that can be seen in the land forms within the Territory.¹⁴⁸

165. Some of the key sxwōxwiya:m include the Stl'áleqem of Sí:ilhqey, the two headed serpent that lives from Vancouver to Hope/Yale area, that created channels, and the tunnels created by Kwekwaytem, and the S'ó:lmexw.¹⁴⁹
166. Leah George Wilson, former chief of Tsleil-Waututh Nation described Shxwlá:m (spiritual mediator or healer):

The third story that Gabriel shared at that time was about *kwekwayten*. And he was a warrior that came out of *təmtəmíxwtən*, biggest place where the people here at Belcarra Regional Park currently. And that story explained how this boy began his journey to become that warrior and *Shxwlá:m* of our people. *Shxwlá:m* is -- he's a -- well, in English we say Indian doctor, but it doesn't really cover it, but Gabriel will explain more because he'll be referring to *kwekwayten* when we talk about the tunnels. And that story reminds us about the work that has to be put in to take care of the people and how important it is for the people to have somebody that -- like a *Shxwlá:m* that can help take care of them in a cultural, spiritual sort of way.

So *kwekwayten* was the one who slayed the two-headed serpent that was kind of around here that blocked access to the Indian River in Inlailawatash and actually he caused a drought and *kwekwayten* was the one who slew the dragon, demonstrating our responsibility, obligation to our people, our land, and our water. And in that story, Gabriel also shared the preparation for work and the kinds of -- how do you say -- the kinds of ceremony and ritual that he needed to undergo before he became the warrior that could do that work for the people.¹⁵⁰

167. Similarly, Naxaxalhts'i, Dr. Albert 'Sonny's McHalsie described s'ó:lmexw in his OTE for Shxw'ōwhámél First Nation:

Also, the waterways are home to what we call our s'ó:lmexw. S'ó:lmexw in our language is referred to as what is known as the -- well, quite often referred to as "water babies." They're actually little people that live under water. We have a very important ceremony that's very strong in our culture right now; it's a huge revival started back in around 1988. It's up to the point now where we're not worried about losing it. It's two main categories of our culture that have been

¹⁴⁸ ICA, Introduction, p. 14.

¹⁴⁹ NEB Hearing Transcript for Oral Traditional Evidence Hearing on October 16, 2014 [NEB Filing ID A4D3E6], Shxw'ōwhámél First Nation at para. 2348.

¹⁵⁰ NEB Hearing Transcript for Oral Traditional Evidence Hearing on November 26, 2018 [NEB Filing ID A96350-1], Tsleil-Waututh Nation, paras. 3552-53.

really protected and really hidden away, and that is the *sxwō:yxwey*, which is the mask dance, and then also the *smilha*, which is the winter dance. Both of those ceremonies are both practised by our relatives, our *siyá:ye*, down in this area, and also up in -- up in our area.¹⁵¹

168. Stl'áleqem are a connection to the ancestors, to the land, to rootedness, and to place. The Stl'áleqem and the related ancestry provides a sense of pride and understanding. Impacts to Stl'áleqem have different effects on Stó:lō, all of which are negative. They are loss of connectivity to their *sxexó:mes*, their *Snoweyelh*, their *tomiyeqw*, their *sxwōxwiyá:m* and their *Shxwelí*.
169. Whether or not Westerners believe in the *sxwōxwiyá:m* of the Stó:lō, there is proof of existence of the interconnectedness of lakes and waterbodies through underground tunnels throughout the Fraser Valley, leading to and from the Salish Sea and the Fraser River. These underwater tunnels throughout the Fraser River increase the propensity and risk of impacts occurring throughout *S'ólh Téméxw* as a result of the Project and Project-related marine shipping.
170. The images of maps below, originally appearing in the Stó:lō Collective's Cultural Heritage Overview Assessment Map Book,¹⁵² provide a visual representation of Stó:lō interests along the proposed pipeline route.

¹⁵¹ NEB Hearing Transcript for Oral Traditional Evidence Hearing on December 4, 2018 [NEB Filing ID A96392], *Shxw'ōwhámél* First Nation at para. 4571.

¹⁵² Written Evidence of the Stó:lō Collective, Appendix 2 – Cultural Heritage Overview Assessment Map Book [NEB Filing ID A4L7A4].

(x) Stó:lō Governance

171. Stó:lō governance has always been linked to resource access and management at the individual, extended family, village and tribal levels. The ability to maintain strong inter-dependent relationships with *S'ólh Téméxw* via traditional governance, is extremely important to the Stó:lō identity and cultural health, and central to Stó:lō understandings of self-determination and nationhood.¹⁵³ Stó:lō responsibility to this relationship involves managing activities and development in *S'ólh Téméxw*.
172. Stó:lō leaders were meant to provide for the community, especially during hard times, and, as such, were highly knowledgeable in terms of both public and private knowledge; some with specific areas of knowledge within the culture. Resource ownership and access was directly linked to leadership and governance that was collectively linked to the individual and extended family.¹⁵⁴
173. Many types of activities and events, including *stl'e'áleq* (large scale gatherings among Northwest Coast peoples, commonly referred to as potlatches), were directly linked to governance structures. Namings, weddings, and funerals were all significant events

¹⁵³ ICA, Section 12, p. 10.

¹⁵⁴ *Ibid*, Section 12, p. 1.

involving the inheritance of rights associated with specific resource sites. Such gatherings were also associated with the resolution of disputes among family or between villages regarding such rights. These gatherings were key processes in building and maintaining social and political capital, and gaining access (customary rites) to specific sites. The Longhouse (the Bighouse or Smokehouse of today) played an important role in governance as it was a domestic centre and place where particular rites and ceremonies took place, especially those that were important to future *Siyá:m*, and established a place for relations of rights, roles and responsibilities among the populace.¹⁵⁵

174. Much of the resurgence of Stó:lō governance has taken place within the Bighouse, and the renewal of *Smílha* (winter dance ceremonies). Cultural practices associated with the Bighouse are increasing their profile through increased community participation. Many of these activities, previously practiced underground, are emerging to foster unification and connectivity among Stó:lō communities. During ICA information gathering sessions, it became clear that participation in traditional activities and political movements is increasing throughout *S'ólh Téméxw*.¹⁵⁶

¹⁵⁵ *Ibid*, Section 12, p. 2.

¹⁵⁶ *Ibid*, Section 12, p. 5.

(xi) **Project Impacts on Stó:lō Governance**

Figure 4 - Potential impacts of Project-Related Marine Shipping on Stó:lō Governance

175. Anything that upsets the balance and connectivity of Stó:lō and the Bighouse, has an impact on traditional and customary rites of governance within and outside of the Bighouse. This impact has a direct effect upon governance as a whole, due to the impact on naming ceremonies, roles, relations, and links to ancestors. Current management and stewardship done by Stó:lō leaders rely on aspects of protection, tomiyeqw, continuity, potlatch, reciprocity and naming. Family governance, including management and stewardship of family resources is protected and cared for by the

family. These governance systems have been a part of Stó:lō since time immemorial. While Chiefs and councils have been created under the *Indian Act*, a critical component of Stó:lō traditional governance relies on land use planning, stewardship, and self-determination under the key principles of Snoweyelh and tomiyeqw. Any impact affecting *S'ólh Téméxw* from Project-related marine shipping or contamination would reduce that capacity and directly impact the core principles of Snoweyelh and tomiyeqw. The impacts would continue until such time as total reparation and rehabilitation have been completed, if even possible.¹⁵⁷

176. Applying the methodology outlined in the ICA, Figure 4 above illustrates the potential impacts from Project-related marine shipping on Stó:lō governance.

(xii) Stó:lō Gathering Activities

177. Collecting plants and gathering medicines, supports a range of values from spiritual to material production closely linked to the social-spatial relations of the Stó:lō. Gathering requires spending time on the land as a factor of education and maintaining connection to land, air, water of *S'ólh Téméxw*, and gifts of the Creator.¹⁵⁸
178. Resource utilisation and collection sites for medicinal plants are important in ways that differentiate this form of gathering practice from other focuses of resource gathering, such as berry picking sites. Stó:lō gathered a wide range of plants for many purposes including food, social, ceremonial, economic, and medicinal uses. Gathering is a holistic and fundamental element of Stó:lō community relations, land use patterns, and resource use. Gathering is tied to tradition; connectivity of ancestors; cohesion among family; keen awareness of the rhythm of nature; responsibility for the plants and community health; and connection and caring among and between families, villages, and tribes. Gathering linked seasonality and broad-based use of the landscape, and connecting systems of governance associated with ancestral names; access rights and privileges; and identities. Gathering continues to be closely associated with a number of key cultural values.¹⁵⁹
179. It is estimated that over 75% of the Stó:lō population still continues to harvest traditional materials for food, social, and ceremonial purposes. This includes individuals gathering

¹⁵⁷ ICA, Section 12, p. 4.

¹⁵⁸ ICA, Section 6, p. 1.

¹⁵⁹ *Ibid.*

food, medicines, or materials to manufacture cultural items. The Stó:lō people continue to target specific harvesting areas based on tradition, the spiritual potency, personal and spiritual preferences, and environmental quality of the site. Increasing development has limited access to some areas and changed the way individuals move across the landscape, however Stó:lō people continue to relate to the land and their history that is embedded in the landscape.¹⁶⁰

(xiii) **Project Impacts on Stó:lō Gathering Activities**

¹⁶⁰ ICA, Section 6, pp. 8-9.

Figure 5 - Potential impacts of Project-Related Marine Shipping on Stó:lō Gathering

180. Increased Project-related marine shipping will result in increased components of airborne contamination, particularly in the tops of watersheds and in the hydrologic cycle in relation to watersheds. Higher concentrations of pollution and contamination in the Fraser Valley, especially Chilliwack and Hope, will considerably impact flora throughout the Fraser Valley as a result of absorption of pollutants within the soils, flora stems and stamina, and due to cross contamination. This will have a corresponding impact on Stó:lō health.¹⁶¹
181. Applying the methodology outlined in the ICA, Figure 5 above illustrates the potential impacts from Project-related marine shipping on Stó:lō gathering.

(xiv) Stó:lō Economy

182. The Stó:lō economy was linked to social, political, spiritual and ceremonial activities, and both tangible and intangible cultural properties including fishing sites, resource patches and gathering areas, fish weirs, houses or house-planks, inherited names that carried particular privileges and rights, songs, designs, dances and histories/narratives. These cultural properties and activities formed the framework for the historical Stó:lō economy. Status, wealth and prestige were related to ownership of intangible names, songs, and private knowledge, as well as material possessions such as canoes, weapons, slaves, clothing/blankets, and tools.¹⁶²
183. *Stl'e'áleq* (potlatch) gatherings were a central feature of the Stó:lō interconnected political, spiritual, and material economy. The pre-contact Stó:lō economy was diverse and founded on wide-spread networks of interaction, trade, and exchange.¹⁶³
184. In the contemporary world, economic strife and disparity among Stó:lō citizens are commonplace – described as a diasporic relationship with Canada, within the Canadian economy.¹⁶⁴

¹⁶¹ ICA, Section 6, p.16.

¹⁶² ICA, Section 14, p. 1.

¹⁶³ *Ibid*, Section 14, p. 1.

¹⁶⁴ ICA, Section 14, pp.1-3.

(xv) **Project Impacts on Stó:lō Economy**

Figure 6 - Potential impacts of Project-Related Marine Shipping on Stó:lō Economy

185. There are three aspects of Stó:lō economy which could be impacted by Project-related marine shipping:
- (a) food, social and ceremonial fisheries;
 - (b) commercial fisheries; and

- (c) tourism based on the environment, which includes Eagle Festival Fishing, camping, hiking, and aspects of environmental tourism.

186. With the high probability of a spill and the resultant impacts on fish, fish habitat, marine/estuary/foreshore environment, and other sea-faring animals, the traditional economies of Stó:lō may greatly be impacted with ripple effects on contemporary economies. There is potential for a great impact on Stó:lō as fishers, and as community-based leaders that are tied to their land, water, and air through their sense of place, tradition, and connectedness with their community, ancestors, and families.
187. Applying the methodology outlined in the ICA, Figure 6 above illustrates the potential impacts from Project-related marine shipping on Stó:lō economy.

(xvi) Stó:lō Hunting and Trapping Activities

188. Hunting and trapping played a vital role in Stó:lō cultural as it related to food, social, ceremonial, and economic purposes. All men were expected to be able to hunt, with few being exceptional or *tewít* (professional hunters). Hunting was done throughout all seasons including winter, exploiting a wide range of resources and habitats between the lowlands and alpine landscape of *S'ólh Téméxw*. Hunting was carried out in a manner that was linked seasonally to the life cycles of the prey species and to the scheduling of other important activities including gathering and fishing. There was great pride, responsibility, and knowledge associated with being an exceptional hunter.¹⁶⁵
189. Many animals were hunted and trapped, and as such became a key to the socio-economics of trade relations between Indigenous trade partners (via potlatch for example) and in the emergent European fur trade and relations (along with fishing). Hunting, as with all aspects of Stó:lō land and resource use including fishing and gathering, was part of Indigenous systems of resource management.¹⁶⁶

(xvii) Project Impacts on Stó:lō Hunting and Trapping Activities

¹⁶⁵ ICA, Section 11, p. 1.

¹⁶⁶ *Ibid*, Section 11, p. 1.

Figure 7 - Potential impacts of Project-Related Marine Shipping on Stó:lō Hunting and Trapping

190. The Stó:lō Collective is particularly concerned about the following hunting and trapping activities, which could be impacted by Project-related marine shipping as a result of absorption of contaminants by fauna through water and flora due to airborne contamination:

- (a) Trapping and hunting in wetlands and foreshore, specifically waterfowl and other birds, such as eagles, ducks, geese, and blue heron, all of which are culturally significant to the Stó:lō; and
 - (b) Impacts to regalia procured by hunting and trapping.
191. Hunting and trapping are directly connected to economy, governance and spirituality of the Stó:lō. Such places as Whale Rock where seals were hunted, Coqualeetza where fish were caught, and the connection to river otters, mice, beaver, and many other animals are part of the connectivity and continuity through *sxwōxwiyá:m*. Trapping, a source for food staples, trading and bartering, is a critical activity potentially impacted by any spill that may affect the marine environment, foreshore, estuaries, and intertidal confluences.
192. Applying the methodology outlined in the ICA, Figure 7 above illustrates the potential impacts from Project-related marine shipping on Stó:lō hunting and trapping.

V. INSUFFICIENT INFORMATION TO ASSESS MITIGATION

193. While the current evidentiary record clearly establishes that there will be significant adverse environment effects as a result of Project-related marine shipping, there has been insufficient study of the full scope of these, in particular as they relate to *S'ólh Téméxw* and the Fraser River. As a result, the Board does not have sufficient information to determine whether the mitigation measures proposed will adequately address the risks, and cannot make a recommendation that the Project be approved.
194. In its evidence on the Reconsideration Hearing, the Stó:lō Tribal Council tendered an expert report prepared by PGL Environmental Consultants (“**PGL**”) dated December 2018 entitled “Potential Effects of Trans Mountain Expansion Project-Related Vessel Traffic” (“**PGL Report**”).¹⁶⁷ After identifying several programs relied on by Canada which have been developed as part of the Ocean Protection Plan, the PGL Report concludes:

A meaningful determination of effects cannot be made until results from many of these programs are available. Until that point, potential adverse effects cannot be understood with precision and the efficacy of any of the proposed mitigations is unknown. Without these vital pieces of information, attempts to make a reliable statement about effects and their significance- that is, on with low uncertainty in which decision-makers can therefore have high confidence- are

¹⁶⁷ PGL Report, Appendix “A” to Opening Statement and Evidence of Stó:lō Tribal Council [NEB Filing ID A96442-1].

premature, reflective of poor EA practice, and if insufficiently cautious, may underestimate adverse effects.¹⁶⁸

195. The PGL Report further concluded, *inter alia*, that:

- (a) Where impact assessment is concerned, it is inappropriate to equate, as the Board had done in the 2016 Recommendation Report, conflicting data or uncertainty with absence of effect, “Rather, the absence of a substantial degree of certainty argues in favour of taking the precautionary approach with respect to conclusions and actions based on those conclusions”.¹⁶⁹ Work completed since the 2016 Recommendation Report was released “suggests that the potential effects of noise on fish and invertebrates are potentially wide-ranging and, in light of the already precarious position of a number of salmonoid stocks, potentially significant”.¹⁷⁰
- (b) In the 2016 Recommendation Report, the Board concluded that the understanding of the behaviour of dilbit when spilled into the marine environment is relatively poor. New expert reports submitted by TM Canada and Squamish/Tseil-Waututh Nations reach differing conclusions on the rate at which dilbit can be expected to sink- a major factor in determining the scope of potential effects and appropriate mitigation measures. The PGL Report states that, as a result of these differences in the expert evidence, “At minimum, the differences between the reports suggests that there remains no consensus regarding the behaviour of dilbit in the environment and that myriad gaps remain in our understanding of bitumen effects and how to manage them”.¹⁷¹
- (c) Further studies are necessary regarding the movement of entrained oils in order to understand whether a spill in the Salish Sea near the mouth of the Fraser River could be entrained in the salt wedge and carried upriver, the effects of this, and how far upriver these effects may occur “in order to better predict potential adverse effects and identify appropriate response times and techniques”.¹⁷²
- (d) Response planning in the Fraser River lags significantly and it is unclear whether required data and Geographic Response Strategies can be developed or tested

¹⁶⁸ *Ibid*, p. 23.

¹⁶⁹ *Ibid*, p. 25.

¹⁷⁰ *Ibid*, p. 25.

¹⁷¹ *Ibid*, p. 27.

¹⁷² *Ibid*, p. 28.

prior to the Project's proposed in-service date. According to PGL, "This information gap poses an uncertainty in the sufficiency of spill response to address effect on the Fraser River estuary, including salmon habitat, SRKW food, and cultural values".¹⁷³

- (e) Given the factors impacting the Fraser River, the probability based Trajectory Analysis Planner or similar modelling product should be applied to determine whether the two-hour response time established for the Fraser River is sufficient.¹⁷⁴

196. It is clear from the conclusions reached in the PGL Report that there is not a fulsome understanding of the potential adverse environmental effects of Project-related marine shipping on the Fraser River and *S'ólh Téméxw* at this time. However, it is equally clear from the Project impacts on the Stó:lō Collective outlined above that the risks to Stó:lō culture, values, and identity are great. Consequently, the Board cannot make a determination that mitigation measures proposed are adequate in light of the information gaps and the substantive risks. In the circumstances, the Board must recommend that the GIC not approve the Project.

VI. THE ENVIRONMENTAL ASSESSMENT UNDER CEAA, 2012

197. Pursuant to the OIC, the Board must consider whether, taking into account any mitigation measures, the Project, inclusive of Project-related marine shipping will cause significant adverse environmental effects. In order to make this determination, the Board must decide whether the Project's residual environmental effects (those environmental effects that, or are predicted to occur after mitigation measures are implemented) are: (i) adverse; (ii) significant; and (iii) likely.¹⁷⁵
198. Section 5 of CEAA 2012 describes the environmental effects that must be considered, while section 19 specifies the factors to be taken into account, including the environmental effects described in section 5 and the significance of these effects. This includes cumulative environmental effects that are likely to result from the designated project in combination with other physical activities that have been or will be carried out,

¹⁷³ *Ibid*, p.29.

¹⁷⁴ *Ibid*, pp. 29-30.

¹⁷⁵ Canada. Canadian Environmental Agency, "Operational Policy Statement: Determining Whether a Designated Project is Likely to Cause Significant Adverse Environmental Effects under the Canadian Environmental Assessment Act, 2012", November 2015, Authorities at Tab 14, p. 3/7.

as well as environmental effects of accidents and malfunctions that may occur in relation to a designated project.¹⁷⁶

199. Pursuant to section 5(c)(i) of CEAA 2012, environmental effects to be taken into account in relation to a designated project are, with respect to Aboriginal peoples, an effect occurring in Canada of any change that may be caused to the environment on:
 - (a) health and socio-economic conditions;
 - (b) physical and cultural heritage;
 - (c) the current use of lands and resources for traditional purposes; or
 - (d) any structure, site or thing that is of historical, archaeological, paleontological or architectural significance.
200. Given the Stó:lō Collective's cultural, spiritual, physical and psychological interconnection to *S'ólh Téméxw*, the adverse impacts from Project-related marine shipping would correlate to environmental effects on all of the areas identified in section 5(c)(i) of CEAA 2012, ultimately posing a significant threat to the cultural integrity of the Stó:lō.
201. While the Board must take into account mitigation measures in considering whether there will be significant adverse environmental effects, to date, neither Canada nor TM Canada have put forward sufficient measures to mitigate risks within *S'ólh Téméxw* and neither has agreed to implement the specific measures identified in the 89 Recommendations. Further, there has not been sufficient time or capacity to fully understand the environmental effects of Project-related marine shipping on *S'ólh Téméxw* and thus adequately identify the appropriate measures.

VII. THE TERMS AND CONDITIONS MUST BE REVISITED

202. On January 10, 2019, the Board issued Procedural Direction No. 4, which contained draft conditions ("**Conditions**") and recommendations ("**Recommendations**") for comment by all Parties. The Board indicated that the Conditions and Recommendations are intended to reduce or eliminate the effects of Project-related marine shipping in

¹⁷⁶ *Ibid*, p. 2/7.

accordance with the requirements of CEAA 2012 and the *Species at Risk Act*.¹⁷⁷ Parties were also informed that, in addition to providing comments on the Conditions and Recommendations, suggestions for additional conditions and recommendations for the Board's consideration were welcome.

A. Additional Terms and Conditions

203. It is the position of the Stó:lō Collective that the Board cannot recommend approval of the Project. However, irrespective of the recommendation, pursuant to section 52(b) of the *NEB Act*, all the terms and conditions that the Board considers necessary or desirable in the public interest to which the CPCN will be subject if the GIC were to direct the Board to issue the certificate are to be included in its report. Given Canada's complete failure to address accommodation measures during Phase III of consultation, the Stó:lō Collective submits that the Board should include in the terms and conditions the specific Project conditions previously requested by the Stó:lō Collective which have never been adequately considered or incorporated into Project planning.
204. Accordingly, at the outset, the Stó:lō Collective asks the Board to add the following conditions to the terms and conditions that must be attached to any Project approval. TM Canada must:
- (a) following good faith consultation with the Stó:lō Collective, adopt and implement the 89 Recommendations provided by the Stó:lō Collective in the ICA, and must file with the Board for Board approval, at least 180 days prior to commencing construction of the Project, a report on progress made on implementation of such conditions, which report must be approved by the Stó:lō Collective and which report must include a summary of the implementation activities undertaken, including: 1) the methods, dates and locations of implementation activities; 2) a summary of the comments and concerns raised or information provided by the Stó:lō Collective; 3) a summary of TM Canada's response to all of the comments and concerns raised or information provided; 4) a summary of any outstanding steps required to implement the 89 Recommendations; and 5) a description of the resources provided to the Stó:lō Collective that supported its participation in such implementation activities;

¹⁷⁷ NEB Procedural Direction No. 4 – Affidavits and written argument-in-chief, including comments on draft conditions and recommendations [NEB Filing ID A97236-1].

- (b) file with the Board for Board approval, at least 30 days prior to commencing construction of the Project, a report on consultation activities with the members of the Stó:lō Collective, which report must be approved by the Stó:lō Collective prior to its submission. The report must include, but will not be limited to:
 - (i) A summary of the consultation activities undertaken, including: 1) the methods, dates and locations of consultation activities; 2) a summary of the comments and concerns raised or information provided by the Stó:lō Collective; 3) a summary of TM Canada's response to all of the comments and concerns raised or information provided; 4) a summary of any outstanding concerns about the Project's potential effects raised by the members of the Stó:lō Collective, any steps that will be taken to address these outstanding concerns, or an explanation why no further steps are required; and 5) a description of the resources provided to the Stó:lō Collective that supported its participation in consultation activities; and
 - (ii) a summary of the assessment of the Project's potential effects on identified interests of the Stó:lō Collective, including: 1) a description of any such interests; 2) a description of the measures identified to reduce, eliminate or offset potential Project effects on such interests; and 3) a description of how any concerns raised or information provided by the Stó:lō Collective are addressed by, or incorporated into, the measures identified to reduce, eliminate or offset potential Project effects on such interests;
- (c) include the Stó:lō Collective in decision-making throughout the life of the Project and introduce mechanisms into the regulation of the Project to adequately take into account Stó:lō traditional knowledge. The Stó:lō Collective has specifically stressed the importance of consulting with traditional knowledge holders due to the nature of the Fraser River, and has also advised that it is critical that its peoples' traditional ecological and other knowledge is fully integrated into Project planning (ie. field surveys, mapping and development of protection plans);
- (d) ensure the Stó:lō Collective will be actively involved in the lifecycle of the Project including planning, survey work, monitoring, and reporting;

- (e) develop a Stó:lō Engagement Plan, and adequately resource Stó:lō Collective participation in planning, survey work, monitoring and reporting;
- (f) engage with the Stó:lō Collective when updating its construction alignment sheets and Environmental Protection Plans to reflect information provided in the ICA;
- (g) establish an Indigenous Oversight Committee with an ability to ensure that traditional ecological and other knowledge is fully integrated into Project planning and local benefits are maximized. Unlike the Indigenous Advisory and Monitoring Committee, such a Committee must have decision-maker powers and give the Stó:lō Collective the ability to monitor and enforce TM Canada's commitments; and
- (h) communicate with Coast Salish Nations annually to identify times of the year when those Nations plan to be in the Project-related marine shipping area for cultural purposes, and ensure that there is appropriate mitigation for conflict of use of the Salish Sea.

B. Comments on Draft Conditions and Recommendations

205. The Stó:lō Collective has reviewed the Conditions and provides the following comments in response:
- (a) regarding Condition 91, "Plan for marine spill prevention and response commitments", the Stó:lō Collective is not convinced that TM Canada can prevent a marine spill, except through ensuring that there are no "acceptable loss" scenarios. Accordingly, the Stó:lō Collective suggests that Condition 91 be renamed "Plan for marine spill mitigation and response commitments";
 - (b) regarding Condition 132, "Marine Mammal Protection Program", a specific emergency response plan for marine mammals is notably absent, and should be included; and
 - (c) regarding Condition 151, "Post-construction environmental monitoring reports", there is a need for post-spill recovery and environmental health monitoring.
206. The Stó:lō Collective has reviewed the Recommendations and provides the following comments in response:

- (a) Recommendation 1 states, *inter alia*, that the GIC should develop and implement a regional cumulative effects management plan that assesses the overall environmental state of, and cumulative effects on, the Salish Sea; however, this plan should be developed and implemented in conjunction with the Coast Salish Nations, through Coast Salish gatherings – not in Ottawa by the GIC alone. To develop and implement such a report requires understanding of the unique properties of the Salish Sea, which can only come through collaboration with Coast Salish peoples;
- (b) Recommendation 2 states, *inter alia*, that the GIC should report publicly, on an annual basis, on the oversight, progress and status of initiatives and measures to address cumulative effects on, and to support the health of, the Salish Sea. This reporting needs to be directed and delivered to Coast Salish Nations for input and truthing of the report before being released publicly to ensure that the report accurately portrays such efforts and status thereof;
- (c) Recommendation 3 states, *inter alia*, that the GIC should implement, with the support of industry, a marine bird monitoring program. This process should include an aspect of First Nation monitoring and involvement, and should provide funding opportunities for such involvement; and
- (d) Recommendation 7 states, *inter alia*, that the GIC should review and update the federal marine shipping oil spill response requirements. Again, this review and update should involve Coast Salish Nations who will be the first, and most, impacted by such a spill.

VIII. CONCLUSION

- 207. On the basis of the evidentiary record, the Board should make the following findings and recommendations:
 - (a) the Reconsideration Hearing is fatally flawed. Due largely to the GIC's Timeline, there is neither sufficient nor accurate evidence before the Board that would enable it to fulfil its statutory requirements with respect to determining the potential adverse effects of the Project on the rights, title and interests of the members of the Stó:lō Collective and other Indigenous intervenors, and, accordingly, the Board cannot make a positive recommendation to the GIC that the Project be approved;

- (b) the Reconsideration Hearing did not provide an opportunity for sufficient consultation by the Crown with Indigenous intervenors on the Project;
- (c) the Project is likely to cause significant adverse environmental effects that cannot be justified in the circumstances;
- (d) a CPCN should not be issued for the Project; and
- (e) include in its report that any approval of the Project must include the conditions outlined above.

208. In making its decision, the Stó:lō Collective respectfully requests that the Board consider the efforts they and other Indigenous intervenors have made over the past several years (just in relation to this Project) to seek protection and recognition of what are their constitutionally protected rights. It has been long, frustrating, and in many respects a one-way street in which none of the Crown actors- Canada, the NEB or TM Canada- have fully engaged and responded in the manner required if the promised commitment to reconciliation is to be achieved. Despite these frustrations, the Stó:lō Collective has once again come forward to advocate for the protection of the rights and title of their members and *S'ólh Téméxw*:

And you see I talk about that place as a powerful place because the old stories of our people is we need to look after everything. Our people say, "*S'ólh temexw te ikw'elo*," this is our land. "*Xolhemet to mekw'stam it kwelat*," we have to look after everything that belongs to us.¹⁷⁸

All of which is respectfully submitted this 22nd day of January, 2019.

Joelle Walker
Counsel for Stó:lō Collective

Joseph Apsassin, Chief of the Blueberry River Indian Band, and Jerry Attachie, Chief of Doig River Indian Band, on behalf of themselves and all other members of the Doig River Indian Band, the Blueberry River Indian Band and all present descendants of the Beaver Band of Indians (*Plaintiffs*)

v.

The Queen in right of Canada as represented by the Department of Indian Affairs and Northern Development and the Director of the Veterans Land Act (*Defendant*)

INDEXED AS: APSASSIN v. CANADA (DEPARTMENT OF INDIAN AFFAIRS AND NORTHERN DEVELOPMENT)

Trial Division, Addy J.—Vancouver, January 12-15, 20-22, 26-30, February 2-6, 9-13, 16-19, 23-27, March 9-12, 23-27; Ottawa, November 4, 1987.

Native peoples — Lands — Title to former Indian reserve and mineral rights therein — Effect of surrender of mineral rights and validity of subsequent surrender of reserve — Whether full, free and informed consent given by Indians — Formalities — Nature of Indians' title to reserve land — Nature of fiduciary relationship between Crown and Indians, and of Crown's duty thereunder — Validity of transfer of reserve land by Department of Indian Affairs to The Director, The Veterans' Land Act — Inclusion of mineral rights in transfer — Breach of fiduciary duty by Department with respect to sufficiency of sale price — Director having neither duty nor unfettered power to transfer lands or mineral rights back to Indians — Under original treaty setting aside reserve, Indians not entitled, after surrender of reserve, to same number of acres of reserve land.

Constitutional law — Charter of Rights — Life, liberty and security — Charter unavailable to challenge B.C. Limitations Act s. 8 as not applying to interest in or damages pertaining to disposal of property (surrender and transfer of Indian reserve land) — Charter not retrospective — S. 7 referring to bodily wellbeing of person, not extending to protection of property — Limitation period applicable to all residents of province not offending principles of fundamental justice.

Constitutional law — Charter of Rights — Equality rights — B.C. Limitations Act s. 8 barring action challenging validity of surrender and transfer of Indian reserve land — S. 8 not contrary to Charter s. 15 as equality rights guarantee providing for similar treatment for persons similarly situated, not for identical treatment for all regardless of circumstances — S. 15

Joseph Apsassin, chef de la bande indienne de la rivière Blueberry, et Jerry Attachie, chef de la bande indienne de la rivière Doig, en leur nom et en celui de tous les autres membres de la bande indienne de la rivière Doig, de la bande indienne de la rivière Blueberry et de tous les descendants encore vivants de la bande indienne des Castors (*demandeurs*)

c.

Sa Majesté la Reine du chef du Canada, représentée par le ministère des Affaires indiennes et du Nord canadien et le Directeur des terres destinées aux anciens combattants (*défenderesse*)

RÉPERTORIÉ: APSASSIN c. CANADA (MINISTÈRE DES AFFAIRES INDIENNES ET DU NORD CANADIEN)

Division de première instance, juge Addy—Vancouver, 12 au 15, 20 au 22, 26 au 30 janvier, 2 au 6, 9 au 13, 16 au 19, 23 au 27 février, 9 au 12, 23 au 27 mars; Ottawa, 4 novembre 1987.

Peuples autochtones — Terres — Titre juridique sur une ancienne réserve indienne et les droits miniers y afférents — Conséquence de la cession des droits miniers et validité de la cession subséquente de la réserve — Les Indiens ont-ils donné un consentement libre et éclairé — Formalités — Nature du droit des Indiens sur les terres de la réserve — Nature des liens de fiduciaire entre la Couronne et les Indiens et des obligations de la Couronne à cet égard — Validité de la cession des terres de la réserve par le ministère des Affaires indiennes au Directeur des terres destinées aux anciens combattants — Inclusion des droits miniers dans le transfert — Violation des obligations fiduciaires par le Ministère à l'égard du prix de vente — Le Directeur n'a ni l'obligation ni le pouvoir de rétrocéder les terres ou les droits miniers aux Indiens — En vertu du traité original portant sur la mise de côté de la réserve, les Indiens n'ont pas droit, après la cession, au même nombre d'acres de terres de réserve.

Droit constitutionnel — Charte des droits — Vie, liberté et sécurité — La Charte ne peut être invoquée pour contester l'art. 8 de la Limitations Act de la C.-B. parce qu'elle ne s'applique pas aux droits ni aux dommages-intérêts relatifs à l'aliénation de biens (cession et transfert de terres de réserve indienne) — Non-rétroactivité de la Charte — L'art. 7 porte sur le bien-être physique de la personne et ne comprend pas la protection des biens — Un délai de prescription applicable à tous les résidents de la province ne contrevient pas aux principes de justice fondamentale.

Droit constitutionnel — Charte des droits — Droits à l'égalité — L'art. 8 de la Limitations Act de la C.-B. empêche la contestation de la validité de la cession et du transfert des terres des réserves indiennes — L'art. 8 ne contrevient pas à l'art. 15 de la Charte qui garantit à chacun un traitement semblable dans des circonstances semblables et non un traite-

not requiring identical laws in all provinces as not meant to destroy federalism.

Bill of Rights — Equality before the law — B.C. Limitations Act s. 8 not contrary to Bill of Rights s. 1(b) — No requirement under Bill of Rights for Parliament to enact uniform laws throughout country — Limitations differences from province to province not constituting discrimination.

Bill of Rights — Due process — Limitation provisions of general application, as in B.C. Limitations Act, not denial of due process — Ultimate limitation period not denying right to litigate nor right of access to court — Merely imposing time limitation for commencing action.

Practice — Limitation of actions — Pursuant to Federal Court Act s. 38, British Columbia law on prescriptions and limitations applicable — Action brought after expiration of ultimate limitation period of 30 years — Limitation provisions of Act prevailing over provisions in other Acts.

Practice — Evidence — Commission evidence — Videotaping — Recommendations as to how to film witnesses, how judge should view videotape, use of sound — Recommendation Court consider videotaping testimony at trial — Inadequacy of transcripts.

Practice — Evidence — Commission evidence — Interpreters — Interpreter should translate questions and answers word for word, not merely substance of conversation with witness — Commission hearings should be conducted in presence of legally qualified and experienced persons, such as judge or prothonotary, familiar with rules of evidence and courtroom procedure.

Indian Reserve No. 172 (I.R. 172), consisting of 18,168 acres, was set aside for the plaintiff Bands in 1916, pursuant to "Treaty 8", the validity of which is admitted. In 1940, the plaintiff Bands surrendered the mineral rights under I.R. 172, for leasing, to the Department of Indian Affairs (D.I.A.). The validity of this surrender is not disputed. In 1945, the whole reserve was surrendered to the D.I.A. In 1948, the D.I.A. transferred I.R. 172 to The Director, The Veterans' Land Act for the sum of \$70,000 and the Director subsequently disposed of parts of that land, including mineral rights, to individual veterans and others. In 1976, there was a major oil find on I.R. 172. This action centres around title to I.R. 172 and the mineral rights under that land.

The plaintiffs allege (1) that between 1916 and 1945, the defendant was guilty of several acts and omissions which constituted negligence and breaches of its fiduciary obligations towards them in allowing unauthorized land use and improper provincial regulation; (2) that the 1945 surrender was void or voidable; (3) that the defendant was guilty of fraud in securing

ment identique pour tous, quelles que soient les circonstances — L'art. 15 n'exige pas des lois identiques dans chaque province, car il ne doit pas avoir pour effet de détruire le fédéralisme.

a *Déclaration des droits — Égalité devant la loi — L'art. 8 de la Limitations Act de la C.-B. ne contrevient pas à l'art. 1b) de la Déclaration des droits — La Déclaration des droits n'oblige pas le Parlement à adopter des lois uniformes dans tout le pays — Les différences, d'une province à l'autre, quant aux délais de prescription ne constituent pas de la discrimination.*

b *Déclaration des droits — Application régulière de la loi — Les dispositions portant prescription qui sont d'application générale, comme dans la Limitations Act de la C.-B., ne constituent pas une violation de l'application régulière de la loi — Une disposition portant prescription finale ne prive pas du droit d'intenter un procès ni du droit d'accès aux tribunaux — Elle impose simplement un délai dans lequel l'action doit être intentée.*

d *Pratique — Prescription — En vertu de l'art. 38 de la Loi sur la Cour fédérale, les lois de la Colombie-Britannique en matière de prescription sont applicables — Action intentée après l'expiration de la prescription finale de 30 ans — Les dispositions de la loi portant prescription ont préséance sur les autres lois.*

e *Pratique — Preuve — Commission rogatoire — Enregistrement magnétoscopique — Recommandations sur la façon de filmer les témoins, de visionner les vidéocassettes, d'employer le son — Recommandation portant que la Cour étudie la possibilité d'enregistrer les témoignages aux audiences sur vidéocassette — Caractère inadéquat des notes de transcription.*

f *Pratique — Preuve — Commission rogatoire — Interpreters — L'interprète devrait traduire les questions et les réponses mot à mot et non seulement l'essentiel de la conversation tenue avec le témoin — Les audiences en commission rogatoire devraient être tenues en présence de juristes compétents et expérimentés, comme un juge ou un protonotaire, qui connaissent les règles de preuve et de procédure.*

g *La réserve indienne n° 172 (R.I. 172), comprenant 18 168 acres, a été mise de côté pour les bandes demandereses en 1916, en vertu du Traité n° 8 dont les parties reconnaissent la validité. En 1940, les bandes demandereses ont cédé les droits miniers afférents à la R.I. 172, aux fins de location, au ministère des Affaires indiennes (M.A.I.). La validité de cette cession n'est pas contestée. En 1945, toute la réserve a été cédée au M.A.I. En 1948, le M.A.I. a transféré la R.I. 172 au Directeur des terres destinées aux anciens combattants pour la somme de 70 000 \$ et le Directeur a par la suite aliéné des parties de ces terres, y compris les droits miniers y afférents, à des anciens combattants et à d'autres personnes. En 1976, on a trouvé une quantité considérable de pétrole sur la R.I. 172. L'action concerne principalement le titre juridique sur la R.I. 172 et les droits miniers afférents à ces terres.*

j *Les demandeurs allèguent que (1) entre 1916 et 1945, la défenderesse s'est rendue coupable de plusieurs actes et omissions équivalant à de la négligence et elle a violé ses obligations fiduciaires envers les demandeurs en permettant l'utilisation non autorisée de terres et la réglementation inadéquate par la province; (2) la cession effectuée en 1945 était nulle ou annula-*

the Bands' consent to the 1945 surrender; (4) that the defendant's acceptance of the 1945 surrender was void because it did not conform to section 51 of the *Indian Act*; (5) that the 1948 transfer to the Director did not conform to section 54 of the *Indian Act*; (6) that the 1948 transfer was void with respect to the mineral rights since they were never surrendered for sale and since the surrender did not conform to section 54 of the *Indian Act* and section 41 of the *Dominion Lands Act*; (7) that in transferring the land in 1948 to the Director, the defendant breached its fiduciary duties and acted fraudulently; (8) that since 1948, the defendant and the Director acted in breach of their fiduciary duty and fraudulently with respect to the mineral rights; (9) that all transfers of mineral rights to the Director since 1952 were void as they did not meet the requirements of the *Indian Act*.

The plaintiffs claimed a declaration that the 1945 surrender and the 1948 transfer were null and void regarding I.R. 172 as a whole or, at least, regarding the mineral rights. They also sought a declaration that they continue to be entitled, pursuant to Treaty 8, to the same number of acres of reserve land as was originally set aside for them.

The defendant pleaded that the action was statute-barred. The plaintiffs replied that limitations could not run against them in view of the defendant's continuing fraud and breaches of fiduciary duties. They also questioned the validity of sections 8 and 9 of the B.C. *Limitations Act* under the Charter and the Bill of Rights.

Held, the action is dismissed.

A—Videotaped commission evidence. The videotaped evidence of seven witnesses had to be reviewed for accuracy because it had not been obtained properly, the interpreters being advised in each case of the substance of the information counsel wished to obtain and reporting the net result of the conversation with the witness. The videotape should give a direct frontal close-up of the witness' face. It should include full sound recording. At trial, the monitor should be placed in front of the judge. Whenever possible, commission evidence should be taken before a legally qualified and experienced person. It might be worthwhile to consider whether the Rules of the Court should provide for the videotaping of oral testimony at certain trials, as an adjunct to the normal transcription services. Transcripts can be misleading and considerable technical advances had recently been made in videotaping and sound recording.

B—Nature of title, relationship and duty. It had to be stated, at the outset, that there is little doubt that, in the 1940's, the plaintiff Bands did not possess the required skills to engage in

ble; (3) la défenderesse s'est rendue coupable de fraude en obtenant le consentement des bandes indiennes à la cession effectuée en 1945; (4) l'acceptation par la défenderesse de la cession effectuée en 1945 était nulle parce qu'elle ne respectait pas l'article 51 de la *Loi sur les Indiens*; (5) le transfert effectué en 1948 au Directeur ne respectait pas l'article 54 de la *Loi sur les Indiens*; (6) le transfert de 1948 était nul en ce qui concerne les droits miniers parce que la bande indienne n'avait jamais cédé ces droits pour qu'ils soient vendus et que la cession ne respectait pas les exigences de l'article 54 de la *Loi sur les Indiens* et de l'article 41 de la *Loi des terres fédérales*; (7) en transférant ces terres en 1948 au Directeur, la défenderesse s'est rendue coupable de plusieurs violations à ses obligations fiduciaires et a en outre agi frauduleusement; (8) depuis 1948, la défenderesse et le Directeur ont tous les deux violé les obligations fiduciaires auxquelles ils étaient tenus et ont agi frauduleusement en ce qui concerne les droits miniers; et (9) tous les transferts de droits miniers au Directeur effectués depuis 1952 sont nuls parce qu'ils ne respectaient pas les exigences de la *Loi sur les Indiens*.

Les demandeurs sollicitent un jugement déclarant que la cession de 1945 et le transfert de 1948 sont nuls en ce qui concerne l'ensemble de la R.I. 172 ou, du moins, qu'ils sont nuls en ce qui a trait aux droits miniers. Ils demandent en outre un jugement déclarant qu'ils continuent à avoir droit, en vertu du Traité n° 8, à la même superficie de réserve que celle qui avait été mise de côté pour eux à l'origine.

La défenderesse a plaidé que l'action était prescrite. En réponse, les demandeurs ont fait valoir que la prescription ne pouvait courir contre eux à cause de la fraude continue de la défenderesse à leur égard et des violations de ses obligations fiduciaires. Ils ont également contesté la validité des articles 8 et 9 de la *Limitations Act* de la C.-B., en vertu de la Charte des droits et de la Déclaration des droits.

Jugement: l'action est rejetée.

A—Enregistrement magnétoscopique des dépositions faites devant une commission rogatoire. Les dépositions enregistrées par sept témoins ont dû être révisées pour en vérifier l'exactitude parce qu'elles n'avaient pas été obtenues de façon adéquate; dans chaque cas, les avocats indiquaient à l'interprète la nature des renseignements qu'ils souhaitaient obtenir du témoin et l'interprète rapportait en quelques mots ce qu'il considérait l'essentiel de sa conversation avec le témoin. La caméra devrait être installée de manière à prendre le visage du témoin en gros plan et de face. Elle devrait également enregistrer le son. À l'instruction, l'écran de télévision devrait être placé en face du juge. Lorsque c'est possible, le témoignage par commission rogatoire devrait être reçu par un juriste compétent et expérimenté. Il vaudrait peut-être la peine d'examiner la possibilité de prévoir dans les Règles de la Cour, à titre de complément au service ordinaire de transcription, l'enregistrement magnétoscopique de témoignages au cours de certains procès. Les transcriptions de témoignages sont parfois trompeuses et des progrès techniques considérables ont été réalisés récemment dans le domaine de l'enregistrement, image et son, sur ruban magnétoscopique.

B—Nature du titre, du rapport et de l'obligation. Il fallait établir, dès le début, qu'il était presque indubitable que, dans les années 1940, les bandes demanderesses n'avaient pas les

any financial planning or budgeting or to generally manage their affairs from a financial standpoint.

It is established that the Indians' interest in real property is not a legal property interest but merely a "personal and usufructuary interest." The Indians' interest is inalienable except upon surrender and places upon the Crown the equitable fiduciary obligation, enforceable at law, to deal with the land for the benefit of the Indians. This obligation is subject to principles very similar to those which govern the law of trust concerning, for example, the measure of damages for breach. There is no special fiduciary relationship or duty owed by the Crown with respect to reserve lands previous to surrender nor after the surrendered lands have been transferred. Except for certain restrictions in the *Indian Act*, Indians are not to be treated at law as if they were not *sui juris*. However, when advice is sought or proffered, there exists a duty on the Crown to take reasonable care. The onerousness of that duty will vary according to the degree of awareness or sophistication on the part of the Indians. And where there does exist a true fiduciary relationship, as in the case at bar following the 1945 surrender, the Crown must exercise the same high degree of prudence and care as in the case of a true trust.

The portion of the reasons dealing with evidence on the mineral rights has been summarized in an Editor's Note. Based on that evidence, there was no breach of the Crown's fiduciary duties towards the plaintiffs. The Crown's officers, servants or agents could not reasonably be expected to have anticipated, in 1948 or previously, that there would be any real value attached to potential mineral rights under I.R. 172 or that there would be any reasonably foreseeable advantage in retaining them.

C—Treaty 8. In 1950, after surrender and disposal of I.R. 172, which comprised 18,168 acres, the plaintiffs received three new reserves comprising 6,194 acres. The plaintiffs claim to be entitled, under the Treaty, to the difference, 11,974 acres. However, even the most liberal interpretation leads to the inevitable conclusion that once the Crown has laid aside as a reserve the required amount of land, the obligation of the Crown pursuant to the Treaty has been fulfilled insofar as reserve land is concerned. There is no subsisting right, after proper surrender and disposal of the reserve, to an area of land equal to the original acreage set aside pursuant to the Treaty.

D—1940 and 1945 surrenders. As to whether the 1945 surrender included the mineral rights which had been surrendered in 1940, the rule is that when, as here, there is no restriction or reservation expressed in the description of the property granted or ceded, all of the property mentioned, whether it be real or personal, and all interest in that property, whether it be legal, equitable or usufructuary, is presumed to be the subject-matter of the grant.

The 1940 surrender did not sever the mineral rights from the Indians' other interests in I.R. 172. The 1940 surrender was not a surrender of "a portion of" the reserve as defined in para-

compétences nécessaires pour s'occuper de planification financière ou de l'établissement d'un budget ni, en général, d'administrer financièrement leurs affaires.

Il est entendu que le droit des Indiens sur des biens immobiliers n'est pas un droit de propriété reconnu par la loi mais simplement un [TRADUCTION] «droit personnel, de la nature d'un usufruit». Le droit des Indiens est inaliénable, sauf dans le cas d'une cession et il impose par sa nature à la Couronne une obligation d'*equity*, exécutoire en justice, d'utiliser ces terres au profit des Indiens. Cette obligation est soumise à des principes très semblables à ceux qui régissent le droit des fiducies, en ce qui concerne notamment le montant des dommages-intérêts en cas de manquement. La Couronne n'est tenue par aucune obligation ou rapport fiduciaire spécial en ce qui concerne les terres des réserves avant qu'elles ne soient cédées et une fois que les terres cédées ont été transférées. Sauf certaines restrictions prévues dans la *Loi sur les Indiens*, les Indiens ne doivent pas être légalement traités comme s'ils étaient incapables d'exercer pleinement leurs droits. Toutefois, lorsque des conseils sont demandés ou qu'ils sont offerts, la Couronne est tenue de faire preuve d'une prudence raisonnable. Cette obligation dépendra du degré de connaissance ou de subtilité dont font preuve les Indiens. Et lorsqu'il existe un véritable rapport fiduciaire, comme c'est le cas en l'espèce par suite de la cession de 1945, la Couronne doit faire preuve du même degré de prudence et de diligence que lorsqu'il s'agit d'une véritable fiducie.

La partie des motifs portant sur la preuve afférente aux droits miniers a été résumée dans la note de l'arrêtiste. D'après cette preuve, la Couronne n'a pas manqué à ses obligations fiduciaires envers les demandeurs. On ne pouvait raisonnablement s'attendre à ce que les fonctionnaires, préposés ou mandataires de la Couronne prévoient, en 1948 ou avant, que les droits miniers éventuels afférents à la R.I. 172 auraient une valeur réelle ou qu'il y aurait un avantage raisonnablement prévisible à conserver ces droits.

C—Traité n° 8. En 1950, après la cession et l'aliénation de la R.I. 172 dont la superficie était de 18 168 acres, les demandeurs ont obtenu trois nouvelles réserves couvrant quelque 6 194 acres. Ils prétendent avoir droit, en vertu du Traité, à la différence, soit une superficie de 11 974 acres. Même la plus libérale des interprétations nous amène inévitablement à conclure que, une fois que la Couronne a mis de côté à titre de réserve l'étendue de terre requise, elle a rempli l'obligation que lui impose le Traité en ce qui concerne les terres de la réserve. Il ne subsiste aucun droit permettant à la bande indienne de recevoir, après la cession et l'aliénation de la réserve, d'autres terres dont la superficie égale celle de la réserve initialement mise à part conformément au Traité.

D—Cessions de 1940 et de 1945. Quant à savoir si la cession de 1945 comprenait les droits miniers cédés en 1940, il faut se souvenir, comme en l'espèce, que lorsque la description d'un bien cédé ne comporte aucune restriction ni réserve, l'ensemble du bien mentionné, qu'il s'agisse d'un bien réel ou personnel, et tous les droits afférents, qu'il s'agisse de droits légaux, en *equity* ou usufruitier, sont présumés faire partie de la cession.

La cession de 1940 n'a pas séparé les droits miniers des autres droits que les Indiens possédaient relativement à la R.I. 172. La cession de 1940 n'était pas celle d'une partie de

graph 2(e) of the *Indian Act* but only of a right in a part of the whole reserve. Mineral rights could not therefore be considered "Indian lands" which could not be surrendered, and the 1940 surrender, with its trust for lease, did not render the mineral rights incapable of any other type of alienation except by means of lease even if both parties agreed to it.

E—Breaches of duty between 1916 and 1945. With respect to the alleged acts of negligence and breaches of fiduciary duty between 1916 and 1945, there was no legal duty upon the Department to actively police the reserves nor to interfere with legitimate provincial legislation of general application merely because it happened to affect the Indians. Furthermore the claims were statute barred.

F—1945 Surrender. The decision to accept the surrender was an operational rather than a policy decision and, as such, it is reviewable.

Based on the available evidence, the members of the Band fully understood and freely consented to the surrender of I.R. 172 in September 1945. There was no evidence that the surrender meeting was not summoned in accordance with subsection 51(1) of the Act. And, applying subsection 31(1) of the *Interpretation Act*, the person who held the surrender meeting was duly authorized pursuant to subsection 51(1) of the Act.

Since subsection 51(3) of the Act was merely directory and not mandatory, non-compliance with the formalities provided for therein, had such non-compliance been proven, would not have rendered the surrender null and void.

G—1948 transfer to The Director, The Veterans' Land Act. The argument that since the 1948 transfer is silent as to minerals, it does not have the effect of transferring them cannot be sustained at law: unless an interest is specifically withheld, and absolute conveyance of land includes all interests except precious metals.

While there was no evidence of fraud at the time of the 1948 transfer, there was a breach of fiduciary duty in that the defendant has not discharged the onus of establishing that a full and fair price was obtained in 1948. That claim, however, was statute barred.

The Director, The Veterans' Land Act did not hold the lands in trust for the Indians. Nothing in the Act provides for such a trust. Nor were the mineral rights reserved from all sales as they had been previously by statute. Furthermore, the Act provides that the Director may hold and transfer property only for the purposes of the Act. There is no power, without consent of the veteran concerned, to reconvey lands or any mineral rights to the Crown for the benefit of Indians or to any other person.

H—Alleged breaches since 1948. While the defendant did not obtain mineral rights to the replacement reserves, there is no evidence that it undertook to do so, nor did it have a duty to do so. Nor was there any duty or promise to obtain the same

réserve telle que prévue à l'alinéa 2e) de la *Loi sur les Indiens*, mais plutôt d'un droit sur une partie de l'ensemble de la réserve. Les droits miniers ne pouvaient donc pas être considérés comme des «terres indiennes» qui ne pouvaient être cédées, et la cession de 1940, prévoyant une fiducie limitée à la location, ne s'opposait pas à ce que les droits miniers fassent l'objet de tout autre genre d'aliénation, sauf de location, même avec le consentement des deux parties.

E—Violations des obligations de fiduciaire entre 1916 et 1945. Quant aux actes de négligence et à la violation non frauduleuse des obligations de fiduciaire qui, selon les demandeurs, se seraient produits entre 1916 et 1945, il n'existe aucune obligation légale en vertu de laquelle le Ministère est tenu de surveiller activement les réserves indiennes ni d'intervenir pour annuler une loi provinciale légitime d'application générale, pour la simple raison qu'elle touche également les droits des Indiens. De plus, les réclamations sont prescrites.

F—La cession de 1945. La décision d'accepter la cession relève davantage du domaine de «l'exécution» que de celui de la «politique administrative» et, à ce titre, elle peut faire l'objet d'un contrôle.

D'après la preuve disponible, les membres de la bande ont donné librement leur consentement éclairé au projet de cession de la R.I. 172, en septembre 1945. Aucune preuve n'a été produite pour établir que l'assemblée n'a pas été convoquée conformément au paragraphe 51(1) de la Loi. Par application du paragraphe 31(1) de la *Loi d'interprétation*, l'assemblée a été tenue devant une personne dûment autorisée conformément au paragraphe 51(1) de la Loi.

Puisque les dispositions du paragraphe 51(3) de la Loi sont simplement supplétives et non impératives, l'inobservation des formalités prescrites, si la preuve en avait été faite, n'aurait pas invalidé la cession elle-même.

G—Transfert des terres au Directeur des terres destinées aux anciens combattants effectué en 1948. L'argument des demandeurs qui prétendent que, puisque le document ne mentionne pas les droits miniers, il n'a pas pour effet de les transférer, ne peut être soutenu en droit: à moins qu'un droit ne soit expressément retenu, une cession absolue des terres comprend tous les droits sauf ceux afférents aux métaux précieux.

Même s'il n'y a pas de preuve de fraude au moment de la cession de 1948, la Couronne a manqué à ses obligations de fiduciaire parce qu'elle ne s'est pas acquittée du fardeau d'établir qu'un prix pleinement équitable avait été obtenu en mars 1948. Toutefois, cette réclamation est prescrite.

Le Directeur des terres destinées aux anciens combattants ne détenait pas les terres en fiducie pour les Indiens. Aucune disposition de la Loi ne prévoit cette fiducie. Les minéraux n'étaient pas non plus réservés dans toutes les ventes, comme le prévoyaient les lois antérieures. De plus, la Loi prévoit que le Directeur peut détenir et transférer des biens aux seules fins de la Loi. Il ne peut absolument pas, sans le consentement de l'ancien combattant concerné, rétrocéder des terres ou des droits miniers à la Couronne, au profit d'Indiens, ou à tout autre personne.

H—Manquements imputés depuis 1948. Même si la défenderesse n'a pas obtenu les droits miniers sur les terres de remplacement, il n'est pas démontré qu'elle s'était engagée à le faire ni qu'elle en avait l'obligation. Il n'y avait pas non plus d'obliga-

acreage of land in the new reserves as was surrendered in I.R. 172.

I—Limitations. Pursuant to section 38 of the *Federal Court Act*, the *Limitations Act* of British Columbia applies in this case. The statement of claim in this case was issued in September 1978, five and one half months beyond the ultimate limitation period of thirty years from the time the cause of action arose—March 1948. No other legislation applies to override this limitations period.

The validity of section 8 of the *Limitations Act* cannot be challenged under section 7 of the Charter. The latter is not applicable as it relates to the protection of the person and to personal rights and freedoms and does not apply to interest in or damages pertaining to the disposal of property. Furthermore, the Charter, generally speaking, is not retrospective. And such a limitation period applicable to all residents of a province does not offend against the principles of fundamental justice.

The retrospective effect rule also applies to section 15 of the Charter. It does not provide for identical treatment for all regardless of circumstances. It is not discriminatory for the Crown to be subject to provincial limitation provisions like ordinary citizens. As far as civil law is concerned, section 15 does not require each province to enact the same laws, as this would be a denial of federalism and be destructive of the federal system itself.

Nor does section 8 of the *Limitations Act* violate paragraph 1(b) of the Bill of Rights. As in the case of the Charter, there is no requirement under the Bill of Rights for Parliament to enact uniform laws throughout the country. It has been recently decided that even where the matter falls within federal jurisdiction, where federal law is silent on the subject, the provincial law where the cause of action arose and is being litigated is to be exclusively applied in determining the rights of the litigants. And there is no more discrimination contrary to paragraph 1(b) than under sections 7 or 15 of the Charter.

Section 8 of the *Limitations Act* does not violate the due process provision in paragraph 1(a) of the Bill of Rights. An ultimate limitation period does not deny the plaintiffs the right to litigate nor the right of access to the court. It merely imposes a time limitation within which the action must be commenced. The claim for insufficiency of the sale price to the Director in 1948 is therefore statute barred and also extinguished pursuant to sections 8 and 9 of the B.C. *Limitations Act*.

STATUTES AND REGULATIONS JUDICIALLY CONSIDERED

- Canada Evidence Act*, R.S.C. 1970, c. E-10, s. 30.
- Canadian Bill of Rights*, R.S.C. 1970, Appendix III, ss. 1(a), (b), 2.

- Constitution Act*, 1867, 30 & 31 Vict., c. 3 (U.K.) [R.S.C. 1970, Appendix II, No. 5] (as am. by *Canada*

tion ou de promesse d'obtenir des terres d'une même superficie que celle de la R.I. 172.

I—Prescription. En application de l'article 38 de la *Loi sur la Cour fédérale*, la loi applicable en l'espèce est la *Limitations Act* de la Colombie-Britannique. La déclaration a été déposée en septembre 1978, cinq mois et demi après l'expiration de la prescription de trente ans à compter de la date à laquelle la cause d'action a pris naissance, c'est-à-dire en mars 1948. Aucun autre texte législatif ne peut avoir priorité sur cette prescription.

La validité de l'article 8 de la *Limitations Act* ne peut être contestée en vertu de l'article 7 de la Charte. Cette dernière n'est pas applicable puisqu'elle concerne la protection de la personne et des droits et libertés personnels, et elle ne vise pas à garantir les droits ni les dommages-intérêts relatifs à l'aliénation des biens. De plus, la Charte, d'une manière générale, ne s'applique pas rétroactivement. Et une période de prescription de ce genre, applicable à tous les résidents de la province, ne contrevient pas aux principes de la justice fondamentale.

La règle de la non-rétroactivité s'applique également à l'article 15 de la Charte. Elle ne prévoit pas un traitement identique pour tous, quelles que soient les circonstances. Il n'est pas discriminatoire d'assujettir la Couronne aux dispositions portant prescription de la législation provinciale comme tout simple citoyen de la province. En ce qui concerne le droit civil, l'article 15 n'oblige pas chaque province à adopter les mêmes lois, ce qui équivaldrait à nier le fédéralisme et à détruire le système fédéral lui-même.

L'article 8 de la *Limitations Act* ne contrevient pas non plus à l'alinéa 1b) de la Déclaration des droits. À l'instar de la Charte, la Déclaration des droits n'oblige pas le Parlement à adopter des lois uniformes dans tout le pays. Dans un arrêt récent, il a été conclu que, même lorsque le litige est de compétence fédérale, le droit de la province dans laquelle le litige a pris naissance et est jugé doit s'appliquer de façon exclusive afin de déterminer les droits des plaideurs, si le droit fédéral ne prévoit rien à cet égard. Et il n'y a pas plus de discrimination à l'encontre de l'alinéa 1b) de la Déclaration des droits qu'en vertu des articles 7 ou 15 de la Charte.

L'article 8 de la *Limitations Act* n'est pas incompatible avec l'alinéa 1a) de la Déclaration des droits qui porte sur l'application régulière de la loi. Une prescription finale ne prive pas les demandeurs du droit d'intenter un procès ni du droit d'accès aux tribunaux. Elle impose simplement le délai dans lequel l'action doit être intentée. L'action intentée pour insuffisance du prix de vente demandé au Directeur, en 1948, est donc prescrite en vertu des articles 8 et 9 de la *Limitations Act* de la Colombie-Britannique.

EDITOR'S NOTE

The Executive Editor has decided that His Lordship's 121 page reasons for judgment herein should be reported as abridged. Some 31 pages have been deleted in the published report. Two portions of the reasons have been omitted. The first was a review of the testimony concerning the I.R. 172 mineral rights and the second, a review of the oral and documentary evidence on the question of free informed consent to the 1945 surrender. No editor's note has been prepared in respect of the last-mentioned issue in that Addy J. has provided a summary of his findings of fact in that regard.

The following are the reasons for judgment rendered in English by

ADDY J.:

THE PLAINTIFFS:

As the style of cause indicates, the two Indian Chief plaintiffs are suing in their personal capacity and on behalf of the members of their respective Bands. Their right to represent all members of the Bands, including former members who are still alive, is undisputed. There is also an allegation in the statement of claim, which allegation is admitted by the defendant, to the effect that the Chiefs represent all past and future members of their Bands. Although I entertain some very serious doubts as to the legal validity of any such claim, I refrain from making any finding on this issue, since it is not before me to be tried.

The members, whose ancestors for many centuries lived as hunters and gatherers in the territory north of Fort Saint John, British Columbia, for some years had formed the Beaver Band which in 1962 was re-named the Fort Saint John Band. It included people known as Dunne-za or Beavers who spoke the Dunne-za or Beaver language and members ethnically known as Crees who spoke the Cree language. They are at times collectively referred to as "Dunne-za/Crees". The Fort Saint John Band was divided into 2 bands in 1977: the Doig River Indian Band and the Blueberry River

NOTE DE L'ARRÊTISTE

a Le Directeur général a décidé de publier les motifs du jugement de 121 pages en version abrégée. Quelque 31 pages ont été retranchées dans la décision publiée. Deux parties des motifs ont été omises. Il s'agit de l'examen des témoignages relatifs aux droits miniers afférents à la R.I. 172 et de l'examen des preuves orales et écrites déposées sur la question du consentement libre et éclairé à la cession de 1945. L'arrê-
b tiste n'a pas rédigé de note sur cette dernière question puisque le juge Addy a soumis un sommaire de ses conclusions de fait à cet égard.
c

Ce qui suit est la version française des motifs du jugement rendus par

LE JUGE ADDY:

LES DEMANDEURS

e Comme l'indique l'intitulé de la cause, les deux chefs indiens demandeurs ont engagé la présente action en leur nom et au nom des membres de leur bande respective. Leur droit de représenter tous les membres de ces bandes ainsi que les anciens mem-
f bres qui sont encore vivants n'est pas contesté. La déclaration renferme également une allégation portant que lesdits chefs représentent tous les membres passés et futurs de leurs bandes, ce que reconnaît la défenderesse. Même si j'ai des doutes
g sérieux sur la validité juridique d'une telle prétention, je m'abstiens de statuer sur ce point, car on ne me l'a pas demandé.

h Les membres des bandes indiennes en cause, dont les ancêtres ont vécu, pendant plusieurs siècles, dans le territoire situé au nord de Fort Saint John (Colombie-Britannique) où ils chassaient et cueillaient des fruits sauvages, ont constitué pendant quelques années la bande des Castors qui, en
i 1962, a pris le nom de bande indienne de Fort Saint John. Cette dernière bande se composait de Dunne-za ou Castors qui parlaient la langue dun-
j ne-za ou castor et de membres faisant partie de l'ethnie crie et parlant la langue crie. On les appelle parfois collectivement les «Cri-Dunne-za». En 1977, la bande indienne de Fort Saint John a été divisée en deux pour former la bande indienne

Indian Band who are presently based in 2 separate reserves, north of Fort Saint John.

THE ISSUES

The action centers around title to a former Indian reserve, the Moberley reserve (subsequently known as Indian Reserve No. 172 or I.R. 172), and especially around the mineral rights under that land.

There are issues pertaining to or arising out of:

1. A treaty known as "Treaty 8" signed in 1900 with the Beaver Band;
2. The setting aside in 1916 of I.R. 172 which consisted of some 18,168 acres;
3. A surrender in 1940 to the Department of Indian Affairs (D.I.A.) by the Band of petroleum, natural gas and mining rights under I.R. 172 for the leasing of those rights;
4. The validity of and the extent or effect of a further surrender to the D.I.A. of I.R. 172 in 1945;
5. The transferring of I.R. 172 in 1948 by the D.I.A. to The Director, The Veterans' Land Act for the sum of \$70,000; and
6. The subsequent disposal of parts of that land including mineral rights by The Director, The Veterans' Land Act to individual veterans and others.

The validity of Treaty 8 and the surrender of 1940 is admitted but there is some dispute as to the interpretation of those documents as well as the legal effects flowing from them. There are many contentious matters pertaining to and arising out of I.R. 172. The claims and allegations of the plaintiffs may be briefly summarized as follows:

1. That between 1916 and 1945 the defendant was guilty of several acts and omissions which constituted negligence and breaches of its fiduciary obligations towards them, in allowing unauthorized use of lands in which the plaintiffs had an

de la rivière Doig et la bande indienne de la rivière Blueberry qui habitent actuellement dans deux réserves distinctes situées au nord de Fort Saint John.

^a LES POINTS LITIGIEUX

L'action concerne principalement le titre juridique sur une ancienne réserve indienne, la réserve de Moberley (appelée par la suite la réserve indienne n° 172 ou R.I. 172) et, en particulier, les droits miniers afférents à ces terres.

Les points litigieux concernent les éléments suivants ou en découlent:

- ^c 1. un traité appelé «Traité n° 8», conclu en 1900 avec la bande indienne des Castors;
2. la mise de côté en 1916 de la R.I. 172 dont la superficie était de 18 168 acres;
- ^d 3. la cession, en 1940, au ministère des Affaires indiennes (M.A.I.) par la bande indienne, de ses droits pétroliers, gaziers et miniers afférents à la R.I. 172 aux fins de leur location;
- ^e 4. la validité et la portée ou les conséquences d'une autre cession au M.A.I. effectuée en 1945 relativement à la R.I. 172;
- ^f 5. le transfert, en 1948, de la R.I. 172 par le M.A.I. au Directeur des terres destinées aux anciens combattants pour la somme de 70 000 \$;
- ^g 6. l'aliénation subséquente, par le Directeur des terres destinées aux anciens combattants, de parties de ces terres, y compris les droits miniers y afférents, à des anciens combattants et à d'autres personnes.

Les parties reconnaissent la validité du Traité n° 8 et la cession effectuée en 1940, mais elles ne s'entendent pas sur l'interprétation à donner à ces documents ainsi que sur les effets juridiques qui en découlent. Un bon nombre de points litigieux se rapportent à la R.I. 172 ou en découlent. Voici un bref résumé des revendications et des allégations des demandeurs:

1. Entre 1916 et 1945, la défenderesse s'est rendue coupable de plusieurs actes et omissions équivalant à de la négligence et elle a violé ses obligations fiduciaires envers les demandeurs en permettant l'utilisation non autorisée de terres sur lesquelles

interest and improper regulation of land use by the Province of British Columbia.

2. That the 1945 surrender of I.R. 172 was void or, in the alternative, voidable.

3. That by various acts and omissions, the defendant acted both in breach of a fiduciary relationship and also fraudulently in securing the consent of the Band to the 1945 surrender and in accepting the surrender.

4. That the defendant's acceptance of the 1945 surrender was void because it did not conform to section 51 of the *Indian Act* [R.S.C. 1927, c. 98].

5. That the defendant's transfer in 1948 to The Director, The Veterans' Land Act was void as it did not conform to section 54 of the *Indian Act*.

6. That, if the 1948 transfer was valid, it had no force and effect or was void regarding the mineral rights under I.R. 172, on the grounds that those rights were never surrendered by the Band for sale nor did the surrender meet the requirements of section 54 of the *Indian Act* and section 41 of *The Dominion Lands Act*, S.C. 1908, c. 20, section 1.

7. That in transferring the land in 1948 to The Director, The Veterans' Land Act the defendant was guilty of numerous breaches of its fiduciary duties towards the Band and, in addition, acted fraudulently.

8. That since 1948 the defendant and The Director, The Veterans' Land Act as such, acted both in breach of their fiduciary duties to the plaintiff and fraudulently in respect of the mineral rights under I.R. 172.

9. That all transfers of mineral rights to The Director, The Veterans' Land Act since 1952 were void as they did not meet the requirements of the *Indian Act* [R.S.C. 1952, c. 149].

The plaintiffs claim a declaration that both the 1945 surrender and the 1948 transfer to the Direc-

les demandeurs possédaient un droit et en autorisant la réglementation inadéquate par la province de la Colombie-Britannique de l'utilisation de ces terres.

2. La cession effectuée relativement à la R.I. 172 en 1945 était nulle ou annulable.

3. Par ses actes et omissions, la défenderesse a violé un rapport fiduciaire et elle s'est rendue coupable de fraude en obtenant le consentement de la bande indienne à la cession effectuée en 1945 et en acceptant celle-ci.

4. L'acceptation par la défenderesse de la cession effectuée en 1945 était nulle parce qu'elle ne respectait pas l'article 51 de la *Loi des Indiens* [S.R.C. 1927, chap. 98].

5. Le transfert effectué en 1948 par la défenderesse au Directeur des terres destinées aux anciens combattants était nul parce qu'il ne respectait pas l'article 54 de la *Loi des Indiens*.

6. Si le transfert de 1948 était valide, il n'avait aucun effet ou était nul en ce qui concerne les droits miniers afférents à la R.I. 172 pour le motif que la bande indienne n'avait jamais cédé ces droits pour qu'ils soient vendus et que la cession ne respectait pas les exigences de l'article 54 de la *Loi des Indiens* et de l'article 41 de la *Loi des terres fédérales*, S.C. 1908, chap. 20, article 1.

7. En transférant ces terres en 1948 au Directeur des terres destinées aux anciens combattants, la défenderesse s'est rendue coupable de plusieurs violations à ses obligations fiduciaires envers la bande indienne et elle a en outre agi frauduleusement.

8. Depuis 1948, la défenderesse et le Directeur des terres destinées aux anciens combattants ont tous les deux violé les obligations fiduciaires auxquelles ils étaient tenus à l'égard des demandeurs et ils ont agi frauduleusement en ce qui concerne les droits miniers afférents à la R.I. 172.

9. Tous les transferts de droits miniers au Directeur des terres destinées aux anciens combattants effectués depuis 1952 étaient nuls parce qu'ils ne respectaient pas les exigences de la *Loi sur les Indiens* [S.R.C. 1952, chap. 149].

Les demandeurs sollicitent un jugement déclarant que la cession de 1945 et le transfert de 1948

tor are null and void and of no force and effect regarding I.R. 172 as a whole or, alternatively, that they are of no force and effect regarding the I.R. 172 mineral rights, and, in addition, a declaration that the plaintiffs continue to be entitled, pursuant to Treaty 8, to 18,168 acres of reserve land. The plaintiffs also claim an accounting and damages under various heads.

The defendant denies all of the above claims and allegations of the plaintiffs and, in addition, pleads that the action is prescribed by various statutory limitation provisions to which I shall later refer.

With regard to limitations, counsel for the plaintiffs advanced the proposition that limitations could not even begin to run against their clients for many years following the surrender, as they had no knowledge that they could apply for any recourse before the courts because of their subordinate position with regard to the Department of Indian Affairs. It was also alleged by the plaintiffs that there had been, during the intervening years, a continuing fraud on the part of the defendant perpetuated on the plaintiffs as well as continuing breaches of the fiduciary duties owed to the plaintiffs. Because of the nature and possible effect of these allegations, counsel agreed that the question of when any limitations would begin to run could best be determined only after firm findings had been arrived at on these issues and would therefore have to be deferred until the end of the trial, after all relevant evidence had been adduced.

SEVERANCE OF LIABILITY AND DAMAGES

At the outset of trial, because of what appeared to be the very complex number of issues affecting liability and also because of the estimates by counsel as to how long these matters would take to resolve, I ordered that the issues of liability and the quantum of damages be severed, the latter to form the subject matter of a reference, subject to

au Directeur sont nuls en ce qui concerne l'ensemble de la R.I. 172 ou, à titre subsidiaire, qu'ils sont nuls en ce qui a trait aux droits miniers afférents à la R.I. 172; ils demandent en outre un jugement déclarant qu'ils continuent à avoir droit à des terres de réserve couvrant une superficie de 18 168 acres et ce, conformément au Traité n° 8. Les demandeurs cherchent également à obtenir une reddition de comptes et des dommages-intérêts sous divers postes.

La défenderesse nie toutes les allégations et revendications des demandeurs, et elle plaide en outre que l'action est prescrite en vertu de diverses dispositions législatives relatives à la prescription des actions, dispositions sur lesquelles je reviendrai plus loin.

Pour ce qui est de la prescription, les avocats des demandeurs ont fait valoir que la prescription n'a pas pu commencer à courir contre leurs clients pendant de nombreuses années après la cession parce que ces derniers ignoraient qu'ils possédaient un recours devant les tribunaux en raison de leur situation de dépendance vis-à-vis le ministère des Affaires indiennes. Les demandeurs ont également allégué que, pendant les années s'étant écoulées dans l'intervalle, la défenderesse et ses représentants ont continué leur fraude à leur égard et ont continué à violer les obligations fiduciaires auxquelles ils étaient tenus envers eux. En raison de la nature et des conséquences possibles de ces allégations, les avocats ont reconnu qu'il serait préférable de statuer sur la question du point de départ de la prescription une fois seulement que la Cour serait arrivée à des conclusions finales sur les points litigieux et, par conséquent, cette question ne devrait être examinée qu'à la fin de l'instruction, une fois tous les éléments de preuve soumis.

SÉPARATION DE LA QUESTION DE LA RESPONSABILITÉ DE CELLE DES DOMMAGES-INTÉRÊTS

En raison du nombre de points litigieux concernant la responsabilité et également des prévisions des avocats quant au temps qu'il faudrait pour régler cette question, j'ai ordonné dès le début de l'instruction que les questions de la responsabilité et du montant des dommages-intérêts soient séparées, cette dernière devant faire l'objet d'une référence, sous réserve des instructions qui pourraient être jugées souhaitables une fois que la Cour se

such directions as might be deemed advisable after the evidence as to liability had been determined.

LENGTH OF TRIAL

The trial, with 5 days being allocated for oral argument in addition to comprehensive written arguments, occupied 10 weeks of court time. The issues, although complex to some extent, were, in my view, unnecessarily further complicated by the adducing of a substantial amount of evidence with little or no relevancy or probative value. Both sides seemed to some extent committed to the very questionable practice of submitting evidence both oral and documentary when they did not appear to be convinced of its probative value at the time. The "short statement giving a concise outline of the facts" referred to in Rule 494(1) [*Federal Court Rules*, C.R.C., c. 663] involved some 186 numbered pages and took three and one half days to deliver; 150 documents, which eventually would become exhibits, were referred to therein. An opening statement should normally not take more than one half to one hour and, in complicated cases, 2 to 3 hours should suffice to inform the judge generally what the case involves since he must be assumed to be acquainted with the contents of the certified record. Some allegations which apparently could never be established in evidence were maintained until the very end of the trial.

The tendering of massive details on the assumption that this might help the court to more fully understand the background of the case, more often than not, serves to confuse the real issues and, far from facilitating the court's task, merely complicates it unnecessarily.

DOCUMENTARY EVIDENCE

Counsel for the parties had jointly caused to be prepared a series of books containing some 916 documents, the authenticity of which would not be contested. Most of the documents produced as exhibits at trial were contained in these books. A few additional exhibits were also produced but authenticity was never an issue.

sera prononcée sur les éléments de preuve relatifs à la responsabilité.

DURÉE DE L'INSTRUCTION

a L'instruction a duré dix semaines, cinq jours étant consacrés aux plaidoiries et à la présentation d'arguments écrits exhaustifs. La présentation d'éléments de preuve plus ou moins pertinents ou probants a inutilement compliqué, à mon avis, les points litigieux qui étaient malgré tout assez complexes. Les deux parties semblent avoir suivi la pratique discutable consistant à présenter des témoignages oraux et des preuves documentaires alors même qu'elles n'étaient apparemment pas convaincues de leur force probante. Le « bref exposé concis des faits » dont il est question à la Règle 494(1) [Règles de la Cour fédérale, C.R.C., chap. 663] comportait quelque 186 pages numérotées, et il a duré trois jours et demi; il y était question de 150 documents qui seraient finalement produits comme pièces. Une déclaration préliminaire ne devrait habituellement durer que de trente à soixante minutes et, dans les affaires compliquées, de deux à trois heures devraient suffire pour donner au juge un aperçu général de l'affaire, car il faut présumer que ce dernier est au courant du contenu du dossier certifié. Certaines allégations qui, apparemment, n'ont jamais pu être prouvées, ont été maintenues jusqu'à la toute fin de l'instruction.

g Plus souvent qu'autrement, la présentation d'une avalanche de détails sous prétexte que cela pourrait aider la cour à mieux comprendre les faits de l'affaire, contribue à créer de la confusion relativement aux véritables points litigieux et, au lieu de faciliter la tâche du juge, la complique inutilement.

h

PREUVE DOCUMENTAIRE

i Les avocats des parties ont conjointement fait préparer une série de recueils contenant quelque 916 documents dont l'authenticité ne serait pas contestée. La plupart des documents produits comme pièces à l'instruction figuraient dans ces recueils. Quelques autres pièces ont également été déposées, mais leur authenticité n'a jamais été en cause.

A serious misunderstanding arose however during the hearing regarding the purposes for which the documents might be used as exhibits.

In presenting the plaintiffs' case, their counsel tendered some 500 exhibits. Until the end of the seventh week of trial, the Court as well as counsel for the defendant, had been considering the evidence on the basis that all documents being tendered had been offered for all purposes including proof of the truth of the contents.

When the plaintiffs were about to close their case and the defendant had been requested, for the convenience of the Court, to furnish a list of the documents which they would eventually be submitting as exhibits, counsel for the plaintiffs then made it known that they would be objecting to their production as proof of the facts mentioned therein unless the provisions of section 30 of the *Canada Evidence Act* [R.S.C. 1970, c. E-10] were complied with. Counsel for the defendant, however, stated that there had been an agreement that any of the documents contained in the book of documents could be used as evidence of the facts stated therein subject, of course, to normal considerations of relevancy, weight, probative value, etc. It was at that time only, when the plaintiffs denied any such agreement that the Court and the defendant became aware of the fact that, with the exception of a couple of exhibits presented through witnesses, such as reports of the plaintiffs' experts, none of the exhibits in the plaintiffs' case had been tendered to establish the truth of their contents but that each and every one of them was tendered solely to establish either the state of mind of the writer or the course of conduct of the defendant or its agents. In order to make perfectly clear the limited purposes for which I will be considering the documents tendered in-chief on behalf of the plaintiffs, I quote from the transcript of the 28th of February 1987, as counsel for the plaintiffs were about to close their case (See Volume 30 of the transcript at pages 3951 and 3956):

Il y a eu toutefois un malentendu important au cours de l'audience relativement aux fins pour lesquelles les documents pourraient être utilisés comme pièces.

^a Les avocats des demandeurs ont présenté quelque 500 pièces au cours de leur argumentation. Jusqu'à la fin de la septième semaine de l'instruction, la Cour ainsi que les avocats de la défenderesse et de ses représentants ont examiné les éléments de preuve soumis en considérant que tous les documents produits pouvaient être utilisés à toutes fins utiles, y compris pour faire preuve de leur contenu.

^c Au moment où les demandeurs s'apprêtaient à terminer leur plaidoirie et où la Cour a demandé à la défenderesse, pour des raisons pratiques, de lui fournir une liste des documents qu'elle déposerait ^d finalement comme pièces, les avocats des demandeurs ont fait savoir qu'ils s'opposeraient à la production de ces documents à titre de preuve des faits qui y étaient mentionnés, à moins que les dispositions de l'article 30 de la *Loi sur la preuve au Canada* [S.R.C. 1970, chap. E-10] ne soient respectées. ^e Toutefois, les avocats de la défenderesse ont invoqué une entente selon laquelle n'importe quel des documents figurant dans les recueils de documents pourrait être employé pour prouver ^f les faits dont il y était question, sous réserve évidemment des considérations normales quant à leur pertinence, leur force et leur valeur probante, etc. Ce n'est qu'à ce moment précis, lorsque les demandeurs ont nié l'existence d'une telle entente, ^g que la Cour et la défenderesse ont compris que, à l'exception d'une ou deux pièces déposées par l'intermédiaire de témoins, par exemple les rapports des experts des demandeurs, aucune des pièces déposées en preuve par les demandeurs n'était ^h destinée à faire preuve de son contenu, mais que ces pièces avaient plutôt été produites pour établir soit l'état d'esprit de l'auteur des documents soit la ligne de conduite suivie par la défenderesse ou ses ⁱ mandataires. Afin d'indiquer clairement les fins limitées pour lesquelles je tiendrai compte des documents déposés en preuve principale par les demandeurs, voici un extrait tiré des notes sténographiques prises le 28 février 1987, au moment où ^j les avocats des demandeurs s'apprêtaient à terminer leur plaidoirie (voir le Volume 30 de la transcription des débats, aux pages 3951 et 3956):

MR. PAPE: I have no difficulty with answering your question, my Lord. The documents we've tendered are for the purposes I said.

THE COURT: Are what purpose?

MR. PAPE: Are for the purposes I said, that is to prove a course of conduct and to prove the state of mind of the person who wrote the document.

THE COURT: Only, solely?

MR. PAPE: That's correct, my Lord.

THE COURT: All right.

MR. PAPE: My Lord, as far as I know there is no document which we will ask you to take as evidence tending to prove the truth of its contents. Perhaps if I give a couple of examples of the kinds of documents—

THE COURT: Well as long as you make that statement you don't have to give examples.

MR. PAPE: Fine.

The announcement by the counsel for the plaintiffs regarding the purpose for which the documents had been tendered during the previous weeks was totally unexpected and could only be described as a bombshell, as it cast a completely different light on the case. The defendant requested and was immediately granted a lengthy adjournment to prepare to meet the requirements of section 30 of the *Canada Evidence Act* and to decide which documents including those already submitted by the plaintiffs would be required to be tendered by it as to proof of the truth of contents.

During the argument on that issue it turned out that the plaintiffs had indeed, during the second week of trial, furnished to the Court and the defendant a 62 page document enumerating some 446 documents which they intended to submit as exhibits and referring to specific portions of these documents on which they wished to rely. At page 3 and in other sections of that list when referring to some specific documents there was a statement to the effect that the plaintiffs would be relying on the documents for the purpose of establishing intention of the writer and the course of conduct. There was no statement that no such documents could be relied upon to establish the truth of contents. More importantly however that limitation directly contradicts in many ways how plaintiffs' counsel in their opening address stated that their case would be established. A written version

[TRADUCTION] M^e PAPE: Je peux facilement répondre à votre question, monsieur le juge. Les documents que nous avons déposés l'ont été aux fins que je vous ai mentionnées.

LA COUR: À quelles fins?

M^e PAPE: Aux fins que j'ai mentionnées, c'est-à-dire pour prouver la ligne de conduite adoptée ainsi que l'état d'esprit de la personne qui a rédigé le document.

LA COUR: Tout simplement?

M^e PAPE: C'est cela, monsieur le juge.

LA COUR: Très bien.

M^e PAPE: monsieur le juge, autant que je sache, il n'y a aucun document que nous vous demanderons de considérer comme un élément de preuve tendant à faire preuve de son contenu. Je pourrais peut-être vous donner un ou deux exemples du genre de documents...

LA COUR: Tant que c'est ce que vous déclarez, vous n'avez pas besoin de donner d'exemples.

M^e PAPE: Très bien.

La déclaration de l'avocat des demandeurs relativement aux fins pour lesquelles les documents avaient été déposés au cours des semaines précédentes était tout à fait inattendue, et tout ce qu'on peut dire est qu'elle a eu l'effet d'une bombe parce qu'elle jetait une lumière complètement différente sur l'affaire. La défenderesse et ses représentants ont demandé et obtenu immédiatement un long ajournement afin de prendre les mesures nécessaires pour se conformer aux exigences de l'article 30 de la *Loi sur la preuve au Canada* et pour déterminer quels documents, outre ceux déjà déposés par les demandeurs, ils devraient produire à titre de preuve de leur contenu.

Il est ressorti des débats sur cette question qu'en réalité, les demandeurs avaient fourni à la Cour ainsi qu'à la défenderesse et à ses représentants, pendant la deuxième semaine de l'instruction, un document de 62 pages où figurait une liste de quelque 446 documents qu'ils avaient l'intention de produire comme pièces et où ils indiquaient les parties particulières de ces documents qu'ils voulaient invoquer. À la page 3 ainsi que dans d'autres sections de la liste où ils invoquent des documents précis, les demandeurs ont déclaré qu'ils utiliseraient ces documents pour établir l'intention de leur auteur et la ligne de conduite adoptée. Ils n'ont nulle part ajouté que de tels documents ne pourraient être invoqués pour prouver leur contenu. Toutefois, ce qui est plus important, cette restriction contredit directement, à de nombreux égards, l'exposé introductif où les avocats des

of the opening address was furnished to the Court and to the defendant before trial began. A cursory reading of the first 140 pages of that document revealed that over 100 documents were alluded to therein in support of various factual allegations other than state of mind or course of conduct.

It is equally important to note that, even in the written version of their final argument, exhibits which counsel for the plaintiffs, on the 28th of February, insisted had been produced for those two limited purposes, were in fact being referred to as proof of the matters mentioned in them e.g.: at page 11 of the argument, the statement of the commissioners in exhibit 1 is argued as being evidence that the Indians had no developed institutions at the time; at page 27 of the argument, in order to prove that the potential of I.R. 172 was lost to the community, that lands to the North were cut off, that good lands for the re-establishment of veterans was at a premium, etc., Exhibits 289 and 301 were referred to. These are but a few examples, and I cite them and refer to Mr. Pape's assertions of the 28th of February, for the sole purpose of making it abundantly clear that none of the exhibits submitted by the plaintiffs in-chief will be considered by me for any purpose, other than to show the state of mind and intention of the originator of the document or a course of conduct of the defendant or its agents, unless the document has been duly confirmed by a witness as being his own document or as being true or unless there has been a formal agreement on the record between counsel as to the truth of contents. This ruling, of course, does not apply to exhibit 896 which was admitted in rebuttal as to truth of contents or to exhibits such as 713 which, although originally submitted by the plaintiffs, were subsequently admitted on motion by the defendant as to proof of contents, nor would it apply to any other of the defendant's exhibits admitted for that purpose.

demandeurs ont expliqué comment ils prouveraient leur cause. La version écrite de cet exposé a été fournie à la Cour ainsi qu'à la défenderesse et à ses représentants avant le début de l'instruction. Il ressort d'une lecture rapide des 140 premières pages de ce document que les demandeurs ont invoqué plus de cent documents au soutien des diverses allégations factuelles autres que celles portant sur l'état d'esprit ou la ligne de conduite adoptée.

Il est également important de souligner que, même dans le texte écrit de l'argumentation finale des demandeurs, les pièces au sujet desquelles les avocats de ces derniers ont insisté pour dire, le 28 février, qu'elles avaient été produites pour ces deux fins restreintes, ont en fait été invoquées comme faisant preuve de leur contenu; par exemple, il est allégué à la page 11 de l'argumentation que la déclaration des commissaires figurant dans la pièce 1 constitue une preuve que les Indiens ne possédaient à l'époque aucune institution importante; on a invoqué les pièces 289 et 301 à la page 27 de l'argumentation afin de prouver que le potentiel de la R.I. 172 avait échappé à la collectivité, que les terres situées au nord avaient été retranchées, que les bonnes terres avaient été accordées à titre de prime aux anciens combattants pour leur réinstallation, etc. Il ne s'agit là que de quelques exemples; je les cite et je mentionne les déclarations faites par M^e Pape le 28 février dans le seul but d'indiquer très clairement que je ne considérerai qu'aucune des pièces soumises en preuve principale par les demandeurs n'a d'autres fins que de montrer l'état d'esprit et l'intention de l'auteur du document ou la ligne de conduite suivie par la défenderesse ou ses mandataires, sauf si un témoin a dûment confirmé qu'il est l'auteur du document ou que celui-ci est authentique, ou si les avocats se sont formellement entendus dans le dossier sur l'authenticité du document. Cette décision ne s'applique évidemment pas à la pièce 896 qui a été admise pour réfuter l'authenticité de son contenu ni à des pièces comme la pièce 713 qui, bien qu'elles aient été produites à l'origine par les demandeurs, ont été par la suite acceptées sur requête de la défenderesse comme faisant preuve de leur contenu; elle ne s'appliquera pas non plus à d'autres pièces déposées par la défenderesse à cette fin.

In some instances, during final argument, for the apparent purpose of establishing not merely the state of mind of the writer but the state of certain conditions and situations, counsel for the plaintiffs referred to opinions expressed in documents which he had insisted were not admitted for the purpose of establishing the truth of contents. It is difficult to understand the logic of how opinions referred to in such documents could be relied upon as evidence when the factual assertions do not so qualify.

Regarding the exhibits of the defendant and the purpose for which they will be considered as evidence, they have been dealt with in an order which I rendered on the 20th of March 1987. To avoid further encumbering these excessively voluminous reasons for judgment, a copy of the aforesaid order is annexed hereto as Schedule "A" [reported at [1988] 3 F.C. 3].

VIDEOTAPED COMMISSION EVIDENCE

The evidence of 7 witnesses had been taken several years previously (i.e. between 1980 and 1982) pursuant to 3 orders of this Court, mainly because the witnesses were ill and getting very old at the time and it was therefore deemed preferable by both parties that their evidence be taken while they were still available and capable of testifying.

The videotaped evidence was taken before an official court reporter who acted as commissioner, the orders having stated that either a prothonotary of the court or an official court reporter could act as commissioner.

Five of the witnesses testified in their native language and an interpreter was used in each case. It is unfortunate that they not only appeared to lack any experience as legal interpreters but that they also were members of the plaintiff Indian Bands and therefore every bit as interested personally in the outcome of the trial as their elders being interrogated. It is even more unfortunate that the questioning of these witnesses was not properly conducted by counsel. In each case the examination had merely begun when, in lieu of addressing

Dans certains cas au cours de leur argumentation finale, les avocats des demandeurs ont invoqué les opinions exprimées dans des documents au sujet desquels ils avaient affirmé qu'ils n'avaient pas été admis pour faire preuve de leur contenu et ce, apparemment pour établir non seulement l'état d'esprit de l'auteur des documents mais aussi certaines conditions et situations existantes. Il est difficile de comprendre comment il serait logique de conclure que les opinions exprimées dans de tels documents pourraient être invoquées en preuve alors que les allégations factuelles ne peuvent l'être.

Pour ce qui est des pièces présentées par la défenderesse et des fins pour lesquelles elles seront considérées comme éléments de preuve, je me suis prononcé dans une ordonnance en date du 20 mars 1987. Afin de ne pas surcharger davantage les présents motifs de jugement qui sont déjà beaucoup trop longs, une copie de cette ordonnance est jointe à l'annexe A [publiée dans [1988] 3 C.F. 3].

ENREGISTREMENT MAGNÉTOSCOPIQUE DES DÉPOSITIONS FAITES DEVANT UNE COMMISSION ROGATOIRE

Les dépositions de sept témoins ont été prises plusieurs années plus tôt (c'est-à-dire entre 1980 et 1982), conformément à trois ordonnances de cette Cour, les deux parties ayant jugé préférable d'obtenir les dépositions de ces témoins, qui étaient malades et très âgés à l'époque, pendant qu'ils étaient encore vivants et capables de témoigner.

Les dépositions enregistrées sur ruban magnétoscopique ont été faites devant un sténographe judiciaire officiel qui a agi à titre de commissaire, les ordonnances ayant prévu qu'un protonotaire de la cour ou un sténographe judiciaire officiel pouvait agir en qualité de commissaire.

Cinq des témoins ont déposé dans leur langue maternelle, et on a eu recours aux services d'un interprète dans chaque cas. Il est regrettable de constater que, non seulement ces interprètes semblaient n'avoir aucune expérience comme interprète judiciaire, mais qu'ils étaient membres des bandes indiennes demandresses et étaient donc tout aussi intéressés par le résultat de l'affaire que leurs aînés interrogés. Il est encore plus dommage que l'interrogatoire de ces témoins n'ait pas été mené selon les règles par les avocats. Dans chaque

questions directly to the witness, they proceeded to address inquiries to the interpreter indicating to the latter the substance of the information they wished to obtain from the witness. The interpreter would then address the witness following which, on many occasions, lengthy exchanges between the two would occur. The interpreter would then turn to counsel conducting the examination and deliver in a very few words what he, in turn, considered to be the net result of each conversation. This method of proceeding is of course, totally improper and would never have occurred had the commission hearings been conducted in the presence of a judge or some other legally qualified person such as a prothonotary, possessing a proper knowledge of the rules of evidence and especially of court room procedure.

For the above reasons, after listening to and viewing some of the videotaped evidence, I became quite concerned as to possible inaccuracies in both the relaying of the inquiry by the interpreter to the witness and the interpretation of the substance of the replies into English. Upon inquiring from counsel for the parties whether, in the intervening years, anyone had taken the precaution of having the interpretations verified, I was quite surprised to hear that nothing had been done in this regard. I immediately demanded that the required steps be taken to ensure that, in the case of all videotaped commission evidence, where interpretation was involved, the English record represented at least the true substance of each reply.

The end result was that, following verification by other interpreters, counsel agreed that the interpretation of the commission evidence of one of the Indian witnesses was so inaccurate that it had to be discarded and they also requested that the record regarding another one of the witnesses be modified in certain places to reflect the true meaning of the replies of the witness.

There, of course, still remains the fact that the trier of facts is entitled to hear the *verbatim* interpretation of all words spoken by a witness and to judge their substance and effect for himself and

cas, l'interrogatoire avait à peine commencé qu'au lieu de poser directement leurs questions au témoin, les avocats indiquaient à l'interprète la nature des renseignements qu'ils souhaitaient obtenir du témoin. L'interprète s'adressait ensuite au témoin et, dans de nombreux cas, il s'ensuivait une longue conversation entre ceux-ci. S'adressant ensuite à l'avocat procédant à l'interrogatoire, l'interprète rapportait en quelques mots ce qu'il considérait l'essentiel de chaque conversation. Cette façon d'agir est évidemment tout à fait contraire aux règles normales; cela ne se serait pas produit si les audiences de la commission rogatoire avaient été tenues en présence d'un juge ou d'une autre personne légalement compétente, comme un prothonotaire, connaissant les règles de preuve et, en particulier, la procédure à suivre en salle d'audience.

Pour ces motifs et après avoir entendu et vu une partie des enregistrements magnétoscopiques des dépositions, je me suis inquiété de la possibilité que des erreurs se soient glissées dans la traduction des questions au témoin par l'interprète et dans la traduction en anglais de l'essentiel des réponses données. Après avoir demandé aux avocats si, dans les années qui se sont écoulées depuis, quelqu'un a pris la précaution de faire vérifier les traductions, j'ai été fort surpris d'apprendre qu'aucune mesure n'avait été prise à cet égard. J'ai immédiatement exigé que les démarches nécessaires soient faites pour vérifier que, dans chaque cas où il a été nécessaire de recourir aux services d'un interprète au cours de l'enregistrement magnétoscopique des dépositions faites devant une commission rogatoire, la traduction anglaise reflète au moins l'essentiel de chaque réponse.

En fin de compte, par suite des vérifications faites par d'autres interprètes, les avocats ont reconnu que la traduction de la déposition de l'un des témoins indiens était si inexacte qu'il a fallu la laisser de côté et ils ont également demandé que certains passages de la transcription de la déposition de l'un des autres témoins soient modifiés afin de rendre le sens véritable des réponses de ce témoin.

Évidemment, il n'en demeure pas moins que le juge des faits a le droit d'entendre la traduction textuelle des propos d'un témoin et d'évaluer leur contenu et leurs conséquences par lui-même et non

not have them judged by an interpreter. However, since both counsel finally agreed as to the substance and since at least one of the witnesses was now deceased and some others are now too old or senile to testify, I am accepting the recorded translations of the evidence of those witnesses as accurate for the purposes of the case at bar, subject to the modifications agreed upon by counsel.

The experience of listening to videotaped evidence in lieu of *viva voce* evidence at trial has led to several observations and conclusions which possibly might be of some assistance to parties applying for an order for commission evidence of that type and to judges considering under which conditions such applications should be granted.

In the first place, the camera, as was done in the case at bar, should be focused in such a way as to give a direct frontal close-up of the witness' face. For TV viewing at the trial it should be placed in front of the judge since he would normally, as I did, have before him a transcript of the evidence and thus would not be required to take notes. He is then, in my opinion, in an even better position to concentrate on, observe and therefore come to the required conclusions regarding the demeanour of the witness, all the voice inflections and generally the manner in which the questions are answered, than in the case of testimony received in a normal way from a witness testifying orally from the witness box. At trial a witness seldom faces the judge, as a person being interrogated naturally turns towards the questioner. However, it is much more tedious and trying to listen to videotaped evidence as it lacks the life and reality of oral evidence at trial and as the judge can exercise no control whatsoever over how it is adduced. Should improper, leading, hearsay or irrelevant questions be asked or answers given, he obviously is in no position to interrupt the flow of evidence and must, at a later date, decide what answers are to be disregarded. Should the record contain many such inadmissible answers from various witnesses in a lengthy case such as the present one, the task of dealing with them *ex post facto* can become unnecessarily tedious. For that reason, as well as for proper control of interpreted evidence as previ-

par l'intermédiaire d'un interprète. Toutefois, étant donné que les avocats des deux parties se sont finalement entendus sur l'essentiel et qu'au moins un des témoins est maintenant décédé et que quelques autres sont séniles ou trop âgés pour déposer, je considère que les traductions enregistrées des dépositions de ces témoins sont exactes aux fins de l'espèce, sous réserve des modifications convenues par les avocats.

L'audition de dépositions enregistrées sur ruban magnétoscopique au lieu de témoignages oraux à l'instruction m'a amené à formuler quelques observations et conclusions qui pourraient probablement être de quelque utilité aux parties demandant une ordonnance prévoyant la tenue d'une commission rogatoire de ce genre et aux juges se demandant à quelles conditions de telles demandes devraient être accueillies.

Je dois d'abord dire que la caméra, comme ce fut le cas en l'espèce, devrait être installée de manière à prendre le visage du témoin en gros plan et de face. À l'instruction, l'écran de télévision devrait être placé en face du juge puisque normalement, comme ce fut le cas pour moi, il devrait avoir sous la main la transcription de la déposition et il ne devrait donc pas avoir besoin de prendre des notes. À mon avis, il est alors en meilleure position pour concentrer toute son attention sur le témoin, l'observer et tirer les conclusions qui s'imposent en ce qui a trait à son comportement, aux inflexions de sa voix et, en général, à la manière dont il répond aux questions, que lorsque la déposition est reçue de la manière habituelle, donnée par une personne témoignant oralement à la barre des témoins. À l'instruction, un témoin fait rarement face au juge, une personne interrogée se tournant tout naturellement vers la personne qui lui pose les questions. Toutefois, il est beaucoup plus ennuyeux et pénible d'écouter l'enregistrement magnétoscopique d'un témoignage, car celui-ci n'est pas aussi vivant et réel qu'une déposition faite de vive voix à l'instruction et le juge n'a aucune influence sur la manière dont il est présenté. Dans les cas où des questions ou réponses irrégulières, suggestives, non pertinentes ou constituant du oui-dire sont posées ou données, il ne peut évidemment pas interrompre la déposition et il doit décider plus tard quelles réponses doivent être écartées. Lorsque le dossier renferme un bon nombre de ces réponses inadmis-

ously mentioned, it is my view that commission evidence be taken wherever possible before a legally qualified and experienced person who, in certain circumstances, might well be a judge.

In the case at bar, the taking of commission evidence was not controlled and counsel generally examined the witnesses as if they were conducting examinations for discovery of parties to the action. Finally, and perhaps most importantly, in the case of the witnesses who testified in the English language, it became abundantly clear that in many instances, the transcript, although faithfully reproducing the spoken words, often failed to convey to the reader the true meaning of and conclusions to be drawn from the witnesses' answers. One can well imagine the even greater discrepancies which occur when the text of the transcript is the product of an interpretation.

Although appellate tribunals have for many years quite properly adopted the principle that one must proceed very cautiously before relying on a transcript of testimony to vary or reverse a finding of fact resulting from oral evidence, the basic validity of that principle becomes crystal clear when one listens to and observes videotaped evidence with the written text in hand. It also brings to light the obvious advantage of having videotaped evidence at hand as part of the record where any question might arise on appeal as to the validity of a finding of fact in the context of certain answers of a witness. The spoken word and the visual impression are both preserved as part of the record to explain and at times to modify and even upset the conclusions that one might otherwise come to by a mere reading of the transcript. Having read the transcripts previously, I was quite surprised to note the degree to which some of my original impressions as to the effects of the evi-

sibles de la part de divers témoins, comme c'est le cas dans une longue affaire comme l'espèce, il peut devenir inutilement pénible de s'occuper de celles-ci après le fait. Pour cette raison et, comme je a l'ai déjà dit, afin également d'exercer un meilleur contrôle sur les dépositions traduites, j'estime que le témoignage par commission rogatoire devrait être reçu, lorsque c'est possible, par une personne légalement compétente et expérimentée qui, dans b certains cas, pourrait être un juge.

En l'espèce, la prise des dépositions par la commission rogatoire n'a nullement été contrôlée et les avocats ont en général interrogé les témoins c comme ils l'auraient fait au cours des interrogatoires préalables des parties à l'action. Enfin, et ce qui est peut-être plus important, il est manifeste qu'il est arrivé souvent dans le cas des témoins qui ont déposé en anglais que la transcription, même si d elle rapportait fidèlement les paroles échangées, ne transmettait pas au lecteur le sens véritable des réponses données par les témoins et les conclusions qu'il fallait en tirer. On peut facilement imaginer les contradictions encore plus graves qui se produisent lorsque le texte de la transcription est celui de e la traduction des propos du témoin.

Bien que, depuis de nombreuses années, les cours d'appel aient appliqué, à juste titre, le principe suivant lequel il faut faire preuve d'une extrême prudence avant d'invoquer la transcription d'un témoignage pour modifier ou infirmer une conclusion de fait découlant d'un témoignage oral, la validité fondamentale de ce principe devient g claire comme le jour lorsqu'on écoute et regarde l'enregistrement magnétoscopique d'un témoignage en ayant en main le texte de celui-ci. Cela montre bien également l'avantage évident d'avoir h au dossier l'enregistrement magnétoscopique d'un témoignage lorsqu'une question se pose en appel relativement à la validité d'une question de fait dans le contexte de certaines réponses du témoin. Les propos d'un témoin et l'impression visuelle qui s'en dégage sont conservés au dossier et permettent i d'expliquer et, parfois, de modifier et même d'infirmer les conclusions qu'aurait pu autrement susciter la simple lecture de la transcription. Après avoir lu la transcription des diverses dépositions, j j'ai été très surpris de constater dans quelle mesure certaines de mes impressions originales quant aux conséquences des témoignages se sont modifiées ou

dence were either modified or completely changed upon viewing the actual videotaped recordings.

As Collier J. stated in the case of *Xerox of Canada Ltd. et al. v. IBM Canada Ltd.* (1977), 33 C.P.R. (2d) 24 (F.C.T.D.), at page 42:

It is almost trite to observe that no matter how gifted the Court reporter in recording words he cannot (and is forbidden to do so) record the pauses in answers, the hesitancy of a witness, the silent resistance to yielding the obvious, the demeanour and manner in exchanges with counsel, the tone of voice and the nuances of expression, facial and otherwise. Some of the illustrations (earlier set out) for my critical assessment may, possibly, seem unexceptional. But the print does not record the atmosphere of the arena at the particular moment.

In conclusion, it seems very obvious that all commission evidence should normally be videotaped with full sound recording. Furthermore, having regard to the considerable technical advances recently made in this field and to the fact that both sound and video-recording are now combined in one small portable camera, it might be worthwhile that, as an adjunct to the normal transcription services, some consideration be given to provision being made in the Rules of the Court for videotaping oral testimony of certain trials. The true weight, probative value and effect of the testimony would then be preserved with all the important inflections, pauses, hesitations and attitudes of the witnesses none of which are apparent in the arid transcripts, which in fact are at times so misleading.

TOPOGRAPHY

In order to better understand the evidence, the location in relation to I.R. 172 of certain places most frequently referred to, are described in Schedule "B" attached to these reasons.*

THE DUNNE-ZA CREE SOCIETY

An appreciation of the culture of the Dunne-za Cree, their way of life and degree of sophistication, as well as how the society was organized and functioned, is of some importance in determining many of the issues raised, such as how the surren-

ont complètement changé après avoir vu les enregistrements magnétoscopiques.

Comme l'a déclaré le juge Collier à la page 42 de l'affaire *Xerox of Canada Ltd. et autre c. IBM Canada Ltd.* (1977), 33 C.P.R. (2d) 24 (C.F. 1^{re} inst.):

Il est presque banal de dire que nonobstant la compétence du sténographe judiciaire, il ne peut enregistrer (et il lui est interdit de le faire) les pauses dans les réponses, les hésitations d'un témoin, les résistances silencieuses à admettre ce qui est évident, la façon d'agir et la manière de répondre à l'avocat, le ton de la voix et les nuances des expressions, faciale et autres. Quelques-uns des exemples (précités) qui ont servi de base à mon évaluation sévère peuvent sembler formels. Mais la transcription ne fait pas état de l'atmosphère qui régnait à la cour à ce moment particulier.

En conclusion, il semble évident que tous les témoignages pris par une commission rogatoire devraient être enregistrés, images et son, sur ruban magnétoscopique. Qui plus est, étant donné les progrès techniques considérables réalisés récemment dans ce domaine et vu qu'une petite caméra portative permet maintenant d'enregistrer à la fois les images et le son, il vaudrait peut-être la peine d'examiner la possibilité de prévoir dans les règles de la Cour, à titre de complément aux services ordinaires de transcription, l'enregistrement magnétoscopique de témoignages faits de vive voix au cours de certains procès. Il serait alors possible de préserver la véritable force ou valeur probante d'un témoignage ainsi que les inflexions significatives de la voix des témoins, leurs pauses, leurs hésitations et leurs attitudes, éléments qui ne ressortent pas des seules transcriptions des témoignages qui, en fait, sont parfois si trompeuses.

TOPOGRAPHIE

Afin de mieux comprendre les témoignages, l'emplacement par rapport à la R.I. 172 de certains des lieux les plus fréquemment mentionnés est décrit à l'annexe B jointe aux présents motifs*.

LA SOCIÉTÉ CRI-DUNNE-ZA

Il est important d'examiner la culture des Cri-Dunne-za, leur mode de vie et leur niveau de développement ainsi que l'organisation et le fonctionnement de leur société pour trancher un bon nombre des points litigieux soulevés, notamment

* Editor's Note: The Schedules have been omitted.

* Note de l'arrêstiste: Les annexes n'ont pas été reproduits.

der meeting of 1945 was in fact conducted, how it should have been conducted, whether the Crown owed any special duty to or stood in any special fiduciary relationship to the Dunne-za Cree, the extent of their comprehension and whether or not they consented to the surrender with sufficient knowledge of the basic relevant facts.

A considerable amount of testimony was heard on their way of life, culture and other related matters from the Indian witnesses themselves and other witnesses called both by plaintiffs and the defendant including an expert anthropologist called by the plaintiffs. It is not my intention to comment extensively on these matters, but to merely touch on some of the highlights. The evidence of the anthropologist will be dealt with more fully at a later stage.

The Dunne-za Cree who, for some centuries, had been living in northeastern B.C. and were originally engaged exclusively in hunting, fishing and the gathering of berries, had also, for many years previous to the 1940s, added trapping as an integral part of their livelihood. Although they remained hunters and gatherers, trapping in fact had become the principal means of obtaining money or credit and therefore goods, clothing, amenities and supplies from the white man.

From 1930, the Provincial government of British Columbia required that all trappers, including Indians, confine their trapping activities to registered trap lines. By 1945, the Department of Indian Affairs had managed to obtain from B.C. the registration of several trap lines all situated together in a large area to the north and northeast of I.R. 172, for the exclusive use of the Dunne-za Cree. One further line was obtained in 1949. The various hunting, fishing, trapping and berry picking areas of the two Bands are indicated on maps filed at trial as Exhibits 919 to 928 inclusively. Although these maps show the areas exploited during 1978 and 1979, they appear, generally speaking, to represent approximately the same areas as those used in the 1940s. Although they hunted all year round, their trapping activities took place in the fall and winter and also extended

comment s'est effectivement déroulée l'assemblée de la cession de 1945 et quel aurait dû en être le déroulement, l'existence pour la Couronne d'une obligation spéciale ou d'un rapport fiduciaire spécial entre elle et les Cri-Dunne-za, la portée de cette obligation ou de ce rapport et la question de savoir si les Indiens ont consenti à la cession en toute connaissance des faits pertinents.

Les témoins indiens ainsi que d'autres témoins cités par les demandeurs et la défenderesse, notamment un anthropologue cité par les demandeurs, ont abondamment parlé du mode de vie des Indiens, de leur culture ainsi que d'autres questions connexes. Je n'ai pas l'intention de m'étendre longuement sur ces questions, mais d'effleurer simplement certains des points les plus importants et j'examinerai la déposition de l'anthropologue plus loin.

Les Cri-Dunne-za qui, pendant quelques siècles, ont habité au nord-est de la Colombie-Britannique et dont les principales activités étaient à l'origine la chasse, la pêche et la cueillette des fruits sauvages, ont également ajouté le piégeage à leurs moyens de subsistance, de nombreuses années avant les années 1940. Même s'ils ont continué à chasser et à cueillir des fruits sauvages, le piégeage est effectivement devenu pour eux le principal moyen de se procurer de l'argent ou d'obtenir du crédit et, par conséquent, d'acheter à l'homme blanc des marchandises, des vêtements, des objets de luxe et des provisions.

À compter de 1930, le gouvernement provincial de la Colombie-Britannique a exigé que tous les trappeurs, y compris les Indiens, limitent leur piégeage aux sentiers de piégeage enregistrés. En 1945, le ministère des Affaires indiennes avait réussi à obtenir du gouvernement de la Colombie-Britannique, pour une vaste région située au nord-nord-est de la R.I. 172, l'enregistrement de plusieurs sentiers de piégeage réservés à l'usage exclusif des Cri-Dunne-za. Un autre sentier a été obtenu en 1949. Les diverses régions où les deux Bandes se livraient à la chasse, à la pêche, au piégeage et à la cueillette des fruits sauvages sont indiquées sur des cartes qui ont été déposées à l'instruction comme pièces 919 à 928 inclusivement. Bien que ces cartes indiquent les régions exploitées en 1978 et en 1979, il semble en général que ces régions soient approximativement les

until the middle of May for beaver furs. They trapped beaver, muskrat, lynx, fisher, squirrel and other fur bearing animals and hunted such animals as bear, moose, deer, rabbit and porcupine as well as grouse and other game birds. They would generally eat the flesh of all animals trapped and hunted except lynx, marten and fisher.

They would all meet every summer for a few weeks in a summer gathering place where they would rest, visit, exchange information, play games, engage in various activities and generally enjoy and benefit from various social exchanges.

Their life was essentially a nomadic one. They hunted and trapped in small hunting groups of between 3 and 10 male members. The women also took part in the hunting and trapping activities. Each group recognized one Indian, generally the eldest or, at times, the most skilful hunter, as the leader. There were 7 such groups. They would follow their trap lines during the trapping season. During the remainder of the year, they would spend some time at their summer gathering place but most of the time gathering berries and looking for game in their various hunting areas. Some winter cabins were built along the various trap lines. In the summer they originally used tepees and, later on, tents.

In addition to the group leaders, there was in the 1940s a Chief of the Band, Chief Succona and also a Headman or Sub-Chief, one Joe Apsassin. Until approximately 1954, the Chiefs were appointed for life. Since then, they are elected pursuant to procedures laid down by the Department of Indian Affairs. I find that, even when the Chiefs were appointed for life, they could nevertheless be removed if they were deemed to no longer be wise or good as Chiefs and another Chief could be chosen. The witness John Davis at first denied this but then subsequently admitted it upon being faced, on cross-examination, with his previous testimony given on commission.

mêmes que celles utilisées pendant les années 1940. Ces Indiens chassaient pendant toute l'année; toutefois, ils trappaient pendant l'automne et l'hiver et jusqu'à la mi-mai pour attraper des castors. Ils attrapaient au piège des castors, des rats musqués, des lynx, des pékans, des écureuils et d'autres animaux à fourrure et ils chassaient l'ours, l'orignal, le chevreuil, le lièvre et le porc-épic ainsi que la perdrix et d'autres gibiers. En général, il mangeaient les animaux qu'ils avaient chassés ou pris au piège, à l'exception des lynx, des marteaux et des pékans.

Ils se rencontraient chaque été pendant quelques semaines dans un lieu de rassemblement estival où ils se reposaient, se rendaient visite, échangeaient des connaissances, s'amusaient, participaient à diverses activités et, en général, profitaient de divers échanges sociaux.

Ils vivaient essentiellement comme des nomades. Ils chassaient et trappaient par petits groupes de trois à dix hommes. Les femmes participaient aussi à la chasse et au piégeage. Chaque groupe choisissait un chef, en général le membre le plus âgé ou, parfois, le chasseur le plus habile. Il existait sept groupes de ce genre. Ils suivaient leurs sentiers de piégeage pendant la saison du trappage. Le reste de l'année, ils passaient quelque temps dans leur lieu de rassemblement estival, mais la plupart du temps ils cueillaient des fruits sauvages et cherchaient du gibier dans leurs diverses régions de chasse. Ils construisaient quelques habitations d'hiver le long des sentiers de piégeage. Pendant l'été, ils utilisaient à l'origine des tipis et plus tard, des tentes.

En plus des chefs de groupes, il y avait aussi dans les années 1940 un chef de bande, le chef Succona, ainsi qu'un sous-chef, un certain Joe Apsassin. Jusqu'en 1954 environ, les chefs étaient nommés à vie. Depuis, ils sont élus conformément aux procédures établies par le ministère des Affaires indiennes. Je constate que, même lorsqu'ils étaient nommés à vie, les chefs pouvaient néanmoins être destitués si on jugeait qu'ils ne remplissaient plus leurs tâches de chef avec sagesse ou efficacité et alors, un autre chef pouvait être choisi. Le témoin John Davis a tout d'abord nié ce fait, mais il l'a ensuite admis lorsqu'au moment du contre-interrogatoire, on lui a rappelé sa déposition antérieure devant une commission rogatoire.

In the 1940s the Dunne-za Cree mixed very little with white society although white settlers were gradually moving north and their contacts with white trappers and with some of the farmers settling in the general area were becoming somewhat more frequent. They maintained contact with the Department of Indian Affairs through the Indian Agent whose office was situated in Fort Saint John. The Indian Agent would, throughout the year, visit the Indians from time to time and would also see them when they came to Fort Saint John to trade their furs and would also meet with them at treaty time wherever treaty money was to be paid.

There seems to be little doubt that, in the 1940s, the Dunne-za Cree did not possess the required skills to engage in any financial planning or budgeting or to generally manage their affairs from a financial standpoint. They had no true organized system of government or real law makers. They also lacked to a great extent the ability to plan or manage, with any degree of success, activities or undertakings other than fishing, hunting and trapping. It seems that many of their decisions even regarding these activities, could better be described as spontaneous or instinctive rather than deliberately planned. The witness Johnson-Watson testified that, even during the years 1975 and 1978 when he was district manager for the Fort Saint John district office, he found that the Dunne-za Cree were greatly limited in the ability to manage the financial aspect of their affairs, that they were not successful farmers and that they still relied to a large extent on advice and guidance from the Department's staff. Most of the other bands were considerably more advanced in these areas. The society was individualistic, having to rely on one another and the members were not inclined to be competitive.

NATURE OF TITLE, RELATIONSHIP AND DUTY

The leading case pertaining to the nature of the interest of status Indians in lands and of the relationship existing between them and the Crown is, without a doubt, the case of *Guerin et al. v. The Queen et al.*, [1984] 2 S.C.R. 335.

Dans les années 1940, les Cri-Dunne-za se mêlaient très peu à la société blanche même si des colons blancs se déplaçaient graduellement vers le nord et que leurs contacts avec des trappeurs blancs et quelques fermiers blancs s'installant dans la région devenaient un peu plus fréquents. Ils maintenaient le contact avec le ministère des Affaires indiennes par l'intermédiaire de l'agent des Indiens dont le bureau était situé à Fort Saint John. Pendant l'année, l'agent des Indiens leur rendait visite à l'occasion et il les rencontrait lorsqu'ils venaient à Fort Saint John pour vendre leurs fourrures et au moment de la conclusion de traités, chaque fois que des sommes étaient payables en vertu d'un traité.

Il semble presque indubitable que, dans les années 1940, les Cri-Dunne-za n'avaient pas les compétences nécessaires pour s'occuper de planification financière ou de l'établissement d'un budget ni, en général, d'administrer financièrement leurs affaires. Aucune véritable structure gouvernementale n'était en place et personne n'était chargé de légiférer. Ils n'avaient pas non plus la capacité d'organiser ou de diriger, avec plus ou moins de succès, des activités ou entreprises autres que la pêche, la chasse et le piégeage. Il semble qu'on pourrait qualifier d'instinctives ou de spontanées plutôt que de volontairement planifiées un bon nombre de leurs décisions relatives à ces activités. Le témoin Johnson-Watson a déclaré dans sa déposition que, même pendant les années 1975 à 1978 lorsqu'il était directeur régional du bureau régional de Fort Saint John, il a constaté que les Cri-Dunne-za étaient fort peu compétents pour administrer leurs affaires financières, qu'ils n'étaient pas de bons fermiers et qu'ils dépendaient encore dans une large mesure des conseils et avis du personnel du Ministère. La plupart des autres bandes indiennes étaient sensiblement plus avancées dans ces domaines. Leur société était individualiste, chaque membre ayant à compter l'un sur l'autre et ayant peu l'esprit de compétition.

NATURE DU TITRE, DU RAPPORT ET DE L'OBLIGATION

L'arrêt faisant autorité relativement à la nature du droit des Indiens inscrits sur des terres et au rapport existant entre ceux-ci et la Couronne est sans contredit *Guerin et autres c. La Reine et autre*, [1984] 2 R.C.S. 335.

All of the judges recognized and reaffirmed that the Indians' interest in real property was not a legal property interest but merely a "personal and usufructuary interest", as laid down by the Privy Council in the case of *St. Catherine's Milling and Lumber Company v. Reg.* (1888), 14 App. Cas. 46, and recently approved by the Supreme Court in *Smith v. The Queen*, [1983] 1 S.C.R. 554.

In her reasons, concurred in by Ritchie and McIntyre JJ., Wilson J. stated that, although subsection 18(1) of the *Indian Act* [R.S.C. 1952, c. 149] did not *per se* create a fiduciary obligation on the part of the Crown, it did recognize the existence of such a relationship which has its roots in aboriginal title and also did acknowledge the historic reality that Indians have a beneficial interest in reserves and that the Crown has a responsibility to protect it. The Crown does not, previous to surrender, hold the land in trust. However, upon surrender the fiduciary relationship which previously existed at large is crystalized into an express trust.

The Chief Justice [then Puisne Judge], whose reasons were concurred in by three of the Judges namely, Beetz, Chouinard and Lamer JJ., took a somewhat different view of the relationship.

The nature of the Indians' interest is that it is inalienable except upon surrender and places upon the Crown the equitable obligation, enforceable at law, to deal with the land for the benefit of the Indians. They agreed with Le Dain J., who had delivered the judgment in that case on behalf of the Federal Court of Appeal [[1983] 2 F.C. 656; (1982), 143 D.L.R. (3d) 416], that the Crown does not hold land in trust for the Indians after surrender. They did not agree that, at the time of surrender, the Crown's obligation crystallized into a trust either express or implied. They felt that upon unconditional surrender, the Indians' right in the land disappears. No property interest is transferred which could constitute the *res* of the trust nor is there a constructive trust created by the surrender. The Crown must however hold the surrendered land for the use and benefit of the surrendering band and that obligation is [at page 387] "subject to principles very similar to those which govern the law of trusts concerning for example,

Tous les juges ont reconnu et reconfirmé dans cet arrêt que le droit des Indiens sur des biens immobiliers n'était pas un droit de propriété reconnu par la loi, mais simplement un [TRADUCTION] «droit personnel, de la nature d'un usufruit», comme l'a statué le Conseil Privé dans l'affaire *St. Catherine's Milling and Lumber Company v. Reg.* (1888), 14 App. Cas. 46, à laquelle a souscrit récemment la Cour suprême dans l'arrêt *Smith c. La Reine*, [1983] 1 R.C.S. 554.

Dans ses motifs auxquels ont souscrit les juges Ritchie et McIntyre, le juge Wilson a déclaré que même si le paragraphe 18(1) de la *Loi sur les Indiens* [S.R.C. 1952, chap. 149] n'imposait pas en soi à la Couronne une obligation de fiduciaire, il reconnaissait l'existence d'une telle obligation ayant sa source dans le titre aborigène et il reconnaissait également la réalité historique que les Indiens ont un droit de bénéficiaire sur les réserves et qu'il incombe à la Couronne de protéger ce droit. La Couronne ne détient pas les terres en fiducie, avant la cession. Toutefois, au moment de la cession, le rapport fiduciaire général qui existait préalablement se cristallise en fiducie explicite.

Le juge en chef [alors juge puîné], dont les motifs ont reçu l'appui des juges Beetz, Chouinard et Lamer, a adopté un point de vue un peu différent en ce qui concerne ce rapport.

Le droit des Indiens sur les terres est inaliénable, sauf dans le cas d'une cession, et il impose par sa nature à la Couronne une obligation d'*equity*, exécutoire en justice, d'utiliser ces terres au profit des Indiens. Tout comme le juge Le Dain, qui avait prononcé le jugement de la Cour d'appel fédérale [(1982), 143 D.L.R. (3d) 416] dans cette affaire, ces juges estimaient que la Couronne ne possède pas les terres en fiducie pour les Indiens après la cession. Ils n'étaient toutefois pas d'accord pour dire qu'au moment de la cession, l'obligation de la Couronne se cristallisait d'une manière ou d'une autre en fiducie explicite ou implicite. Ils étaient d'avis que, par suite d'une cession inconditionnelle, il y a disparition du droit des Indiens sur le bien-fonds. Aucun droit de propriété pouvant constituer l'objet de la fiducie n'est transféré et la cession n'engendre pas non plus de fiducie par interprétation. Toutefois, la Couronne doit détenir les terres à l'usage et au profit de la bande qui les a cédées et cette obligation est [à la page 387]

the measure of damages for breach". They also stated that, although the relationship does bear some similarity to an agency, it does not constitute an agency at law, as the Crown's authority to act is not based on contract and the band is not a party to the ultimate disposal of the land, which would be the case if there were an agency relationship.

After analyzing the effect of the *Royal Proclamation, 1763* [R.S.C. 1970, Appendix II, No. 1], the reasons of the Chief Justice contained the following statement at page 383:

The purpose of this surrender requirement is clearly to interpose the Crown between the Indians and prospective purchasers or lessees of their land, so as to prevent the Indians from being exploited. This is made clear in the Royal Proclamation itself, which prefaces the provision making the Crown an intermediary with a declaration that "great Frauds and Abuses have been committed in purchasing Lands of the Indians, to the great Prejudice of our Interests, and to the great Dissatisfaction of the said Indians. . . ."

It appears clear however that the special fiduciary relationship arises upon surrender. The Chief Justice states at page 382:

... it is also true, as will presently appear, that the interest gives rise upon surrender to a distinctive fiduciary obligation on the part of the Crown to deal with the land for the benefit of the surrendering Indians. These two aspects of the Indian title go together, since the Crown's original purpose in declaring the Indians' interest to be inalienable otherwise than to the Crown was to facilitate the Crown's ability to represent the Indians in dealings with third parties. The nature of the Indians' interest is therefore best characterized by its general inalienability, coupled with the fact that the Crown is under an obligation to deal with the land on the Indians' behalf when the interest is surrendered. Any description of Indian title which goes beyond these two features is both unnecessary and potentially misleading. [Emphasis added.]

Estey J., for his part, chose to dispose of the case strictly on the basis of an agency relationship, without considering the problem of whether there existed any trust, fiduciary relationship or pre-surrender duty.

I feel that the views expressed by the Chief Justice and the three Justices who concurred, are binding upon me and also appear to be the most plausible. This approach has since been followed by Urie J. in the appeal of *Kruger v. The Queen*, reported in [1986] 1 F.C. 3 (abridged); (1985), 58

«soumise à des principes très semblables à ceux qui régissent le droit des fiducies, en ce qui concerne notamment le montant des dommages-intérêts en cas de manquement». Les juges ont également ajouté que, même si le rapport fiduciaire présente une certaine analogie avec le mandat, il n'y a pas mandat suivant la loi, car le pouvoir d'agir de la Couronne n'a aucun fondement contractuel et la bande indienne n'est pas partie à la vente finalement conclue, comme ce serait le cas s'il y avait mandat.

Après avoir analysé les conséquences de la *Proclamation royale, 1763* [S.R.C. 1970, Appendice II, n° 1], le juge en chef déclare à la page 383 de ses motifs de jugement:

Cette exigence d'une cession vise manifestement à interposer Sa Majesté entre les Indiens et tout acheteur ou locataire éventuel de leurs terres, de manière à empêcher que les Indiens se fassent exploiter. Cet objet ressort nettement de la Proclamation royale elle-même qui porte, au début de la disposition qui fait de Sa Majesté un intermédiaire, «qu'il s'est commis des fraudes et des abus dans les achats de terres des sauvages au préjudice de Nos intérêts et au grand mécontentement de ces derniers . . . »

Cependant, il semble évident que le rapport fiduciaire spécial naît lorsqu'il y a cession. Le juge en chef dit à la page 382:

... mais il est également vrai, comme nous allons le constater plus loin, que ce droit, lorsqu'il est cédé, a pour effet d'imposer à Sa Majesté l'obligation de fiduciaire particulière d'utiliser les terres au profit des Indiens qui les ont cédées. Ces deux aspects du titre indien vont de pair, car, en stipulant que le droit des Indiens ne peut être aliéné qu'à elle-même, Sa Majesté voulait au départ être mieux en mesure de représenter les Indiens dans les négociations avec des tiers. Le droit des Indiens se distingue donc surtout par son inaliénabilité générale et par le fait que Sa Majesté est tenue d'administrer les terres pour le compte des Indiens lorsqu'il y a eu cession de ce droit. Toute description du titre indien qui va plus loin que ces deux éléments est superflue et risque d'induire en erreur. [C'est moi qui souligne.]

Pour sa part, le juge Estey a choisi de trancher l'action en fonction uniquement du rapport mandant-mandataire, sans se demander s'il existait une fiducie, un rapport fiduciaire ou une obligation antérieure à la cession.

J'estime être lié par les opinions exprimées par le juge en chef et les trois juges qui y ont souscrit, opinions qui me paraissent également être les plus plausibles. Ce point de vue a depuis été suivi par le juge Urie dans l'appel interjeté dans l'affaire *Kruger c. La Reine*, [1986] 1 C.F. 3 (version

N.R. 241 (C.A.), at pages 47-48 F.C.; 257 N.R., paras. 52 and 53. With the exception of any special obligations which might be created by treaty, there is no special fiduciary relationship or duty owed by the Crown with regard to reserve lands previous to surrender nor, *a fortiori*, is there any remaining after the surrendered lands have been transferred and disposed of subsequently. The duty from that moment attaches to the proceeds of disposition. There might indeed exist a moral, social or political obligation to take special care of the Indians and to protect them (especially those bands who are not advanced educationally, socially or politically) from the selfishness, cupidity, cunning, stratagems and trickery of the white man. That type of political obligation, unenforceable at law, which the Federal Court of Appeal in the *Guerin* case (*supra*) felt should apply to the Crown following surrender (which concept was, of course, rejected by the Supreme Court), would be applicable previous to surrender. This legal issue is of some importance in the present case since counsel for the plaintiffs argued that, previous to the surrender and also following final disposition of the lands the Crown was in breach of certain alleged fiduciary duties such as the duty to take action to prevent some white farmers from grazing cattle on certain parts of the reserve.

Although, as previously stated, three justices of the Supreme Court (Ritchie, McIntyre and Wilson JJ.) held that there existed, previous to surrender, a fiduciary duty regarding the lands, neither they nor anyone else at any time suggested that there might continue to subsist some general continuing legally recognized fiduciary duty regarding the lands, once they have been disposed of.

The *Indian Act* does impose certain restrictions on the actions and on the rights of status Indians. Except insofar as those specific restrictions might prevent them from acting freely, the Indians are not to be treated at law somehow as if they were not *sui juris* such as infants or persons incapable of managing their own affairs, which would cause

abrégée); (1985), 58 N.R. 241 (C.A.), pages 47 et 48 C.F.; paragraphes 52 et 53, page 257 N.R. À l'exception des obligations spéciales que peuvent créer les traités, la Couronne n'est tenue par aucune obligation ou rapport fiduciaire spécial en ce qui concerne les terres des réserves avant qu'elles ne soient cédées et, *a fortiori*, elle ne l'est pas non plus une fois que les terres cédées ont été transférées et subséquemment vendues. L'obligation naissant à ce moment concerne les produits de la vente. Il est possible qu'il existe effectivement une obligation morale, sociale ou politique de prendre particulièrement soin des Indiens et de les protéger (en particulier, les bandes indiennes qui ne sont pas avancées aux points de vue social et politique ni en ce qui concerne l'éducation) contre l'égoïsme, la cupidité, les ruses, les stratagèmes et les supercheries de l'homme blanc. Ce genre d'obligation politique, non exécutoire en justice, qui, selon la Cour d'appel fédérale, s'appliquait à la Couronne dans l'arrêt *Guerin* (précité) par suite de la cession (principe qui a évidemment été rejeté par la Cour suprême), serait applicable avant que la cession soit effectuée. Cette question juridique revêt une certaine importance en l'espèce, les avocats des demandeurs ayant allégué qu'avant la cession et par suite de la vente finalement conclue relativement aux terres cédées, la Couronne a violé certaines des obligations fiduciaires auxquelles elle aurait été tenue, par exemple l'obligation de prendre des mesures pour empêcher certains fermiers blancs de faire paître leurs troupeaux dans certaines parties de la réserve.

Même si, je le répète, trois juges de la Cour suprême (les juges Ritchie, McIntyre et Wilson) ont statué qu'il existait une obligation fiduciaire à l'égard des terres avant qu'elles ne soient cédées, ni ces juges ni personne d'autre n'a laissé entendre qu'il serait possible qu'une obligation fiduciaire générale reconnue par la loi continue à exister en ce qui concerne les terres une fois qu'elles ont été vendues ou autrement aliénées.

La *Loi sur les Indiens* apporte certaines restrictions aux actes et aux droits des Indiens inscrits. Sauf dans la mesure où ces restrictions particulières pourraient les empêcher d'agir librement, les Indiens ne doivent pas être légalement traités comme s'ils étaient incapables d'exercer pleinement leurs droits, comme le sont les mineurs ou les

some legally enforceable fiduciary duty to arise on the part of the Crown to protect them or to take action on their behalf. They are fully entitled to avail themselves of federal and provincial laws and of our judicial system as a whole to enforce their rights, as they are indeed doing in the case at bar.

Finally, the provisions of our Constitution are of no assistance to the plaintiffs on this issue. The *Indian Act* was passed pursuant to the exclusive jurisdiction to do so granted to the Parliament of Canada by subsection 91(24) of the *Constitution Act 1867*, [30 & 31 Vict., c. 3 (U.K.) [R.S.C. 1970, Appendix II, No. 5] (as am. by *Canada Act 1982*, 1982, c. 11 (U.K.) Schedule to the *Constitution Act, 1982*, Item 1)]. This does not carry with it the legal obligation to legislate or to carry out programs for the benefit of Indians any more than the existence of various disadvantaged groups in society creates a general legally enforceable duty on the part of governments to care for those groups although there is of course a moral and political duty to do so in a democratic society where the welfare of the individual is regarded as paramount.

I must hasten to state however, that, wherever advice is sought or whenever it is proffered, regardless of whether or not it is sought or whether action is taken, there exists a duty on the Crown to take reasonable care in offering the advice to or in taking any action on behalf of the Indians. Whether or not reasonable care and prudence has been exercised will of course depend on all of the circumstances of the case at that time and, among those circumstances, one must of course include as most important any lack of awareness, knowledge, comprehension, sophistication, ingenuity or resourcefulness on the part of the Indians of which the Crown might reasonably be expected to be aware. Since this situation exists in the case at bar, the duty on the Crown is an onerous one, a breach of which will bring into play the appropriate legal and equitable remedies.

Where there does exist a true fiduciary relationship such as in the case at bar, following the 1945 surrender, the same high degree of prudence and

personnes incapables de s'occuper de leurs affaires, ce qui créerait pour la Couronne une obligation fiduciaire, exécutoire en justice, de les protéger ou d'intenter des actions en leur nom. Ils sont pleinement habilités à recourir aux lois fédérales et provinciales ainsi qu'à notre système judiciaire pour faire valoir leurs droits, comme ils le font d'ailleurs en l'espèce.

Enfin, les dispositions de la Constitution ne sont d'aucune utilité pour les demandeurs sur ce point. La *Loi sur les Indiens* a été adoptée en vertu du pouvoir exclusif conféré au Parlement du Canada par le paragraphe 91(24) de la *Loi constitutionnelle de 1867* [30 & 31 Vict., chap. 3 (R.-U.) [S.C.R. 1970, Appendice II, n° 5] (mod. par la *Loi de 1982 sur le Canada*, 1982, chap. 11 (R.-U.), annexe de la *Loi constitutionnelle de 1982*, n° 1)]. Cette disposition ne comporte pas plus l'obligation légale de légiférer ou de mettre en œuvre des programmes pour le bénéfice des Indiens que l'existence de divers groupes défavorisés dans la société crée pour les gouvernements une obligation générale, exécutoire en justice, de prendre soin de ces groupes, même s'il existe évidemment une obligation morale et politique de le faire dans une société démocratique où le bien-être de l'individu est jugé primordial.

Toutefois, je m'empresse d'ajouter que chaque fois que des conseils sont demandés ou qu'ils sont offerts, qu'ils aient été sollicités ou non, ou lorsqu'une action est intentée, la Couronne est tenue de faire preuve d'une prudence raisonnable en offrant ces conseils aux Indiens ou en intentant une action en leur nom. La question de savoir si la Couronne a fait preuve de prudence ou de diligence raisonnable dépendra évidemment de toutes les circonstances de l'affaire; parmi ces circonstances, il faut bien sûr inclure l'inconscience, l'ignorance, le manque de compréhension, de subtilité, d'ingéniosité ou de ressources de la part des Indiens, dont on peut raisonnablement s'attendre que la Couronne soit au courant. Étant donné qu'il s'agit d'une telle situation en l'espèce, la Couronne est tenue d'une lourde obligation dont la violation permettra l'utilisation des recours en *equity* et de ceux prévus dans la loi.

Lorsqu'il existe un véritable rapport fiduciaire, comme c'est le cas en l'espèce par suite de la cession de 1945, il faut faire preuve du même

care must be exercised in dealing with the subject-matter to which the fiduciary duty relates, as in the case of a true trust (refer *Guerin et al. v. The Queen et al.*, *supra*, at page 376). The test to be applied is an objective one: good faith and a clear conscience will not suffice. It is also similar to a trust in another respect: where a trustee is in any way interested in the subject-matter of the trust, there rests upon him a special onus of establishing that all of the rights and interests both present and future of the beneficiary are protected and are given full and absolute priority and that the subject-matter is dealt with for the latter's benefit and to the exclusion of the trustee's interest to the extent that there might be a conflict. A similar onus rests on the Crown in the case at bar regarding the equitable obligation which it owed the plaintiffs.

EDITOR'S NOTE

With the exception of a one-year exploration permit granted in 1940, no oil, gas or other mineral leases in respect of I.R. 172 were sought or granted until several years after the transfer to The Director, The Veterans' Land Act in 1948. By that year, no oil or gas field had been discovered closer than 340 miles away (Leduc) except for a small gas field at Pouce Coupé some 50 miles distant on the Alberta-B.C. border. As late as 1981 there was no oil field in the Pouce Coupé area. No actual exploration for gas or oil was done on I.R. 172 prior to 1976. Nor did I.R. 172 lie within any of the 14 large areas of land in north-eastern British Columbia targeted for oil exploration in 1950 by a consortium of major oil companies.

It was in 1976 that there was a major oil find, in an unusual trap between rock layers, on I.R. 172. The opinion of the plaintiffs' expert, that "by the 1940s it would have been obvious even to a casual observer that the Peace River area of B.C. had attracted serious commercial interest for oil and gas", could not be accepted as the evidence did not support that conclusion. The opinion of the defendant's geologist was to be preferred. The excitement over the discovery at Leduc in 1947 was restricted to the areas around Edmon-

degré de prudence et de diligence pour traiter de l'objet de l'obligation fiduciaire que lorsqu'il s'agit d'une véritable fiducie (voir l'arrêt *Guerin et autres c. La Reine et autre*, précité, page 376). Le critère applicable est un critère objectif: la bonne foi et une conscience tranquille ne suffiront pas. Il existe une autre similitude avec une fiducie: lorsqu'un fiduciaire possède un droit quelconque relativement à l'objet d'une fiducie, il lui incombe de prouver que tous les droits présents et futurs du bénéficiaire sont protégés et qu'il leur accorde priorité absolue, et qu'il s'occupe de l'objet de la fiducie pour l'avantage du bénéficiaire et à l'exclusion de son propre droit dans la mesure où il peut y avoir un conflit entre ceux-ci. En l'espèce, une obligation semblable incombe à la Couronne en ce qui concerne l'obligation d'*equity* à laquelle elle est tenue à l'égard des demandeurs.

NOTE DE L'ARRÉTISTE

À l'exception d'un permis d'exploration d'un an accordé en 1940, aucun bail n'a été consenti ni demandé relativement à l'exploitation pétrolière, gazière ou minière de la R.I. 172 si ce n'est plusieurs années après le transfert au Directeur des terres destinées aux anciens combattants, en 1948. À cette époque, aucun champ pétrolier ou minier n'avait été découvert à moins de 340 milles (Leduc), sauf un petit champ gazier à Pouce Coupé, à quelque 50 milles de là, sur la frontière Alberta-Colombie-Britannique. Jusqu'en 1981, aucun gisement pétrolier n'a été relevé dans la région Pouce Coupé. Aucune exploration n'a été effectuée en vue de trouver du gaz ou du pétrole dans la R.I. 172 avant 1976. La R.I. 172 n'était pas non plus comprise dans les quatorze grandes régions situées au nord-est de la Colombie-Britannique et choisies comme lieux d'exploration pétrolière en 1950 par un consortium pétrolier.

Ce n'est qu'en 1976 que s'est produite la principale découverte de pétrole dans la R.I. 172, dans une poche anormale entre les couches de roche. L'opinion de l'expert des demandeurs, selon laquelle [TRADUCTION] «dans les années 1940, il aurait été évident, même pour un simple observateur, que la région de la Peace River en Colombie-Britannique avait suscité un intérêt commercial important en ce qui concerne le pétrole et le gaz», n'a pu être retenue parce que la preuve ne permettait tout simplement pas d'en

ton and Calgary and had little if any effect in British Columbia. In that year the question was not considered as being whether there was oil on I.R. 172 but whether there were any economic oil or gas accumulations anywhere in northeastern B.C. The opinion of the defendant's expert was not destroyed by the evidence that, in 1950, Sun Oil Company had acquired exploration rights in respect of I.R. 172. That company had risked a limited amount of money but nothing resulted therefrom for many years. There was evidence that the oil discovery, made a quarter century after 1947, was accidental and that the accumulation was so unique that it could not have been anticipated in 1948. Until that discovery, the mineral rights under I.R. 172 would have carried a modest value. That opinion was supported by the fact that mineral rights were apparently not considered worthy of mention in the sale to the Director and in the land sales to veterans.

I find that, taking into account the fiduciary relationship then existing between Her Majesty the Queen and the plaintiffs, none of her officers, servants or agents, exercising due care, consideration and attention in the discharge of those fiduciary duties, could reasonably be expected to have anticipated at any time during 1948 or previously that there would be any real value attached to potential mineral rights under I.R. 172 or that there would be any reasonably foreseeable advantage in retaining them.

TREATY 8

The plaintiffs formally adhered to Treaty 8 in May 1900 (Exhibit 1 at trial). In 1916, pursuant to that Treaty, they obtained I.R. 172 which comprised 18,168 acres. The three new reserves which they eventually received in 1950 after surrender and disposal of I.R. 172, comprised some 6,194 acres. They claim to be entitled to the difference, that is 11,974 acres, of new reserves as a loss of the benefits of Treaty 8 because they allege that,

arriver à cette conclusion. L'opinion du géologue de la défenderesse devait être retenue. L'intérêt qu'a suscité la découverte du champ Leduc en 1947 n'a touché que les régions situées près d'Edmonton et de Calgary et n'a eu peu ou pas d'effet en Colombie-Britannique. Cette année-là, la question n'était pas de savoir s'il y avait du pétrole dans la R.I. 172, mais plutôt s'il était possible de trouver des gisements rentables de pétrole ou de gaz naturel, où que ce soit dans la région nord-est de la Colombie-Britannique. L'opinion de l'expert de la défenderesse n'a pas été détruite par la preuve que, en 1950, Sun Oil Company avait acquis des droits d'exploration relativement à la R.I. 172. Cette société avait risqué une somme limitée mais n'en a rien tiré pendant de nombreuses années. Il a été démontré que la découverte de pétrole, un quart de siècle après 1947, était l'effet du hasard et que le gisement était exceptionnel, aussi ne pouvait-il en aucune façon avoir été prévu en 1948. Jusqu'à cette découverte, les droits miniers afférents à la R.I. 172 avaient une valeur minime. D'ailleurs, le fait que les droits miniers n'aient jamais été mentionnés dans la vente au Directeur ou dans les ventes aux anciens combattants vient confirmer cette opinion.

J'estime que, si on tient compte du rapport fiduciaire liant alors Sa Majesté la Reine aux demandeurs, on ne pouvait raisonnablement s'attendre à ce qu'aucun des fonctionnaires, préposés ou mandataires de cette dernière, exerçant toute la prudence et l'attention voulues dans l'exécution de ses obligations fiduciaires, ait pu prévoir à quelque moment que ce soit, en 1948 ou avant, que les droits miniers éventuels afférents à la R.I. 172 auraient une valeur réelle ou qu'il y aurait un avantage raisonnablement prévisible à conserver ces droits.

TRAITÉ N° 8

Les demandeurs ont officiellement adhéré au Traité n° 8 en mai 1900 (pièce 1 déposée à l'instruction). Conformément à ce traité, ils ont obtenu en 1916 la R.I. 172 dont la superficie était de 18 168 acres. Les trois nouvelles réserves qu'ils ont finalement obtenues en 1950 après la cession et la vente de la R.I. 172 couvraient quelque 6 194 acres. Les demandeurs prétendent avoir droit à la différence comme nouvelles réserves, soit une

pursuant to its terms, the Crown was obliged to secure for them in perpetuity a fair portion of the ceded treaty territory.

There is no dispute over the fact that when the plaintiffs received the 18,168 acres, they received their full reserve land entitlement under the Treaty. The three paragraphs dealing with reserve land rights are to be found at the bottom of page 12 and top of page 13 of the Treaty. They read as follows:

And Her Majesty the Queen hereby agrees and undertakes to lay aside reserves for such bands as desire reserves, the same not to exceed in all one square mile for each family of five for such number of families as may elect to reside on reserves, or in that proportion for larger or smaller families; and for such families or individual Indians as may prefer to live apart from band reserves, Her Majesty undertakes to provide land in severalty to the extent of 160 acres to each Indian, the land to be conveyed with a promise as to non-alienation without the consent of the Governor General in Council of Canada, the selection of such reserves, and lands in severalty, to be made in the manner following, namely, the Superintendent General of Indian Affairs shall depute and send a suitable person to determine and set apart such reserves and lands, after consulting with the Indians concerned as to the locality which may be found suitable and open for selection.

Provided, however, that Her Majesty reserves the right to deal with any settlers within the bounds of any lands reserved for any band as She may see fit; and also that the aforesaid reserves of land, or any interest therein, may be sold or otherwise disposed of by Her Majesty's Government for the use and benefit of the said Indians entitled thereto, with their consent first had and obtained.

It is further agreed between Her Majesty and Her said Indian subjects that such portions of the reserves and lands above indicated as may at any time be required for public works, buildings, railways, or roads of whatsoever nature may be appropriated for that purpose by Her Majesty's Government of the Dominion of Canada, due compensation being made to the Indians for the value of any improvements thereon, and an equivalent in land, money or other consideration for the area of the reserve so appropriated.

In *The Queen v. George*, [1966] S.C.R. 267, at page 279, we find the following statement of the law regarding an 1827 treaty:

We should, I think endeavour to construe the treaty of 1827 and those Acts of Parliament which bear upon the question before us in such manner that the honour of the Sovereign may be upheld and Parliament not made subject to the reproach of

superficie de 11 974 acres, pour compenser la perte des avantages qui leur étaient garantis par le Traité n° 8 parce qu'ils allèguent que, selon le libellé du Traité, la Couronne était obligée de mettre à part pour eux, à perpétuité, une juste partie du territoire cédé par traité.

Les parties ne contestent pas que, lorsque les demandeurs ont reçu les 18 168 acres de terre, ils ont obtenu un droit absolu sur les terres de la réserve conformément au Traité. Les trois paragraphes du Traité traitant des droits afférents aux terres de la réserve se trouvent à la page 15; en voici le texte:

Et Sa Majesté la Reine par les présentes convient et s'oblige de mettre à part des réserves pour les bandes qui en désireront, pourvu que ces réserves n'excèdent pas en tout un mille carré pour chaque famille de cinq personnes pour tel nombre de familles qui désireront habiter sur des réserves, ou dans la même proportion pour des familles plus ou moins nombreuses ou petites; et pour les familles ou les sauvages [sic] particuliers qui préféreront vivre séparément des réserves des bandes, Sa Majesté s'engage de fournir une terre en particulier de 160 acres à chaque sauvage [sic], la terre devant être cédée avec une restriction quant à l'inaliénation sans le consentement du Gouverneur général du Canada en conseil, le choix de ces réserves et terres en particulier devant se faire de la manière suivante, savoir: le Surintendant général des Affaires des Sauvages [sic] devra députer et envoyer une personne compétente pour déterminer et assigner ces réserves et terres après s'être consulté avec les sauvages [sic] intéressés quant à la localité que l'on pourra trouver convenable et disponible pour le choix.

Pourvu, néanmoins, que Sa Majesté se réserve le droit de régler avec tous les colons établis dans les limites de toute terre réservée pour une bande de la manière qu'elle trouvera convenable, et aussi que lesdites réserves de terre ou tout droit sur ces terres pourront être vendus et adjugés par le gouvernement de Sa Majesté pour le bénéfice et avantage des dits sauvages [sic] qui y auront droit, après qu'on aura au préalable obtenu leur consentement.

Il est de plus convenu entre Sa Majesté et ses dits sujets sauvages que telles parties des réserves et des terres ci-dessus indiquées qui pourront de temps à autre être requises pour des travaux publics, des édifices, des chemins de fer, ou des routes de quelque nature que ce soit, pourront être prises dans ce but par le gouvernement de Sa Majesté du Dominion du Canada, et il sera accordé une indemnité convenable en compensation des améliorations qui y auront été faites, et un équivalent en terre, en argent ou autre considération pour l'étendue de la réserve ainsi appropriée.

On trouve à la page 279 de l'arrêt *The Queen v. George*, [1966] R.C.S. 267, l'exposé suivant du droit en ce qui concerne le traité de 1827:

[TRADUCTION] J'estime que nous devrions essayer d'interpréter le traité de 1827 et les lois du Parlement qui ont une incidence sur la question dont nous avons été saisis de manière que l'honneur de la Souveraine soit préservé et qu'on ne puisse

having taken away by unilateral action and without consideration the rights solemnly assured to the Indians and their posterity by treaty.

This same principle would certainly apply to Treaty 8.

Even the most liberal interpretation, in accordance with the above mentioned principle in *The Queen v. George* of the above quoted treaty clauses, leads one to the inevitable conclusion that, once the Crown had laid aside as a reserve the required amount of land, the obligation of the Crown pursuant to the Treaty had been fulfilled insofar as reserve land is concerned. In other words, the second and third paragraphs are inconsistent with any perpetual obligation to continue providing reserve bases from time to time to the extent of that acreage, after a reserve has been legally and properly surrendered by the Band and subsequently disposed of and the proceeds of disposition have been set aside to the credit of or paid to the Band. There is no subsisting right on the part of the Band under the Treaty itself to receive, over and above the proceeds of disposition, additional reserve land up to the amount of acreage initially set aside pursuant to the Crown's treaty obligations.

Counsel for the plaintiffs relied on certain statements of the report of the Commissioners for Treaty 8, dated 22nd September 1899. The report is annexed to the Treaty as part of Exhibit 1 at trial.

The Commissioners were responsible to negotiate and obtain the adhesion of various Indian bands who were within the territory to be covered by the Treaty. It was argued by counsel that representations made by the Commissioners, as evidenced by the report, created the obligation to continue to supply reserve land to the extent mentioned in the Treaty, notwithstanding the fact that the land might have at one time been properly disposed of with the full consent of the Indians.

Because of the special relationship existing between the Crown and the Indians, the illiteracy of the latter and their dependency on the advice of

reprocher au Parlement d'avoir retiré aux Indiens par un acte unilatéral et sans leur accorder de contrepartie les droits qui leur sont solennellement garantis par le traité ainsi qu'à leurs descendants.

Ce même principe s'appliquerait très certainement au Traité n° 8.

Même la plus libérale des interprétations, faite conformément au principe dégagé dans l'arrêt *The Queen v. George* relativement aux clauses précitées du Traité, nous amène inévitablement à conclure que, une fois que la Couronne a mis de côté à titre de réserve l'étendue de terre requise, elle a rempli l'obligation que lui impose le Traité en ce qui concerne les terres de la réserve. En d'autres termes, les deuxième et troisième paragraphes sont incompatibles avec l'existence d'une obligation perpétuelle de continuer à fournir des terres jusqu'à concurrence de la superficie prévue, une fois que la bande indienne a légalement cédé une réserve et que celle-ci a, par la suite, été vendue et que les produits de sa vente ont été portés au crédit de la bande ou lui ont été versés. En vertu du Traité, il ne subsiste aucun droit permettant à la bande indienne de recevoir, en plus des produits de la vente, d'autres terres dont la superficie égale celle de la réserve initialement mise à part conformément aux obligations imposées à la Couronne par le Traité.

Les avocats des demandeurs ont invoqué certaines des déclarations figurant dans le rapport des commissaires sur le Traité n° 8, en date du 22 septembre 1899. Ce rapport est annexé au Traité comme élément de la pièce 1 déposée à l'instruction.

Les commissaires étaient chargés de négocier avec diverses bandes indiennes se trouvant dans le territoire qui devait être visé par le Traité et d'obtenir leur adhésion. Les avocats ont allégué que les déclarations des commissaires, comme en fait foi le rapport, ont créé l'obligation de continuer à fournir des terres jusqu'à concurrence de la superficie mentionnée dans le Traité, malgré le fait que ces terres puissent avoir été cédées à un moment ou un autre, selon les règles et avec le consentement des Indiens.

Étant donné le rapport spécial existant entre la Couronne et les Indiens, l'analphabétisme de ces derniers et leur dépendance à l'égard des manda-

agents of the Crown, if there was in fact a special representation made to the Indians to that effect previous to signature, any such representation would be fully binding at law on the Crown, notwithstanding the fact that it might not have been incorporated in the formal terms of the Treaty.

The plaintiffs rely specifically on the underlined sentence of the following paragraph contained in the report of the Commissioners:

The Indians are given the option of taking reserves or land in severalty. As the extent of the country treated for made it impossible to define reserves or holdings, and as the Indians were not prepared to make selections, we confined ourselves to an undertaking to have reserves and holdings set apart in the future, and the Indians were satisfied with the promise that this would be done when required. There is no immediate necessity for the general laying out of reserves or the allotting of land. It will be quite time enough to do this as advancing settlement makes necessary the surveying of the land. Indeed, the Indians were generally averse to being placed on reserves. It would have been impossible to have made a treaty if we had not assured them that there was no intention of confining them to reserves. We had to very clearly explain to them that the provision for reserves and allotments of land were made for their protection and to secure to them in perpetuity a fair portion of the land ceded, in the event of settlement advancing. [Emphasis added.]

I simply cannot read into that statement the meaning which the plaintiffs urge that I attribute to it: the undertaking is to provide reserve lands when required by the Indians up to the amount stipulated. Once that land has been provided it will be theirs in perpetuity and they cannot then be deprived of it without their consent. That is the effect and substance of the statement. There is no mention whatsoever that, if a reserve is subsequently disposed of with the properly obtained consent of the Indians, new reserves will be furnished. There might well exist in certain circumstances a political or moral obligation to do so, but not a legal one pursuant to Treaty 8. The provisions of fresh reserve lands might also be one of the conditions imposed by the Indians or suggested and agreed upon by the Crown at the time of the surrender of a reserve but this would be the subject-matter of a new agreement and has nothing to do with Treaty 8 nor is it dealt with either directly or indirectly in the Treaty or by the Commissioners in their report.

taires de la Couronne, si une déclaration spéciale en ce sens avait effectivement été faite aux Indiens avant la signature du Traité, elle lierait légalement la Couronne, même s'il était possible qu'elle n'ait pas été incorporée dans le libellé formel du Traité.

Les demandeurs invoquent expressément la phrase soulignée dans le paragraphe suivant figurant dans le rapport des commissaires:

On donna aux sauvages le choix de prendre des réserves ou des terres en particulier. Comme l'étendue du pays couverte par le traité rendait impossible de définir des réserves ou des propriétés, et comme les sauvages n'étaient pas prêts à faire un choix, nous nous contentâmes d'entreprendre de mettre à part à l'avenir les réserves et les propriétés, et les sauvages furent satisfaits de la promesse que cela se ferait lorsqu'ils le demanderaient. Il n'y a aucune nécessité immédiate de faire un tracé général des réserves ou de faire une répartition des terres. Il sera bien assez tôt de le faire lorsque l'avancement de la colonisation rendra nécessaire l'arpentage des terres. De fait les sauvages s'opposaient en général à être placés sur les réserves. Il eût été impossible de faire un traité si nous ne leur avions pas assuré que nous n'avions aucune intention de les confiner dans des réserves. Nous avons dû leur expliquer que la disposition relative aux réserves et à la répartition des terres était faite pour les protéger et pour leur assurer à perpétuité une portion raisonnable de la terre cédée, dans le cas où la colonisation avancerait. [C'est moi qui souligne.]

Je ne peux tout simplement pas attribuer à cette déclaration le sens que les demandeurs me pressent de lui donner, soit que l'engagement consiste à fournir des terres de réserve lorsque les Indiens le demandent jusqu'à concurrence de la superficie prévue. Une fois que ces terres leur ont été fournies, elles leur appartiennent à perpétuité et elles ne peuvent leur être retirées sans leur consentement. Tels sont l'effet et l'essence de la déclaration. Il n'est nulle part mentionné que, si une réserve est par la suite aliénée avec le consentement des Indiens obtenu suivant les règles, de nouvelles réserves seront fournies. Une obligation politique ou morale de le faire pourrait exister dans certains cas, mais le Traité n° 8 ne crée pas une telle obligation légale. Il se pourrait également que l'octroi de nouvelles terres de réserve constitue l'une des conditions imposées par les Indiens ou proposées et acceptées par la Couronne au moment de la cession d'une réserve, mais cela ferait l'objet d'un nouvel accord et n'a rien à voir avec le Traité n° 8; il n'en est pas non plus question directement ou indirectement dans le Traité ni dans le rapport des commissaires.

1940 SURRENDER

On the 9th of July, 1940 the plaintiffs surrendered to the Crown their mineral rights in I.R. 172 "in trust to lease the same to such person or persons and upon such terms as the Government of Canada may deem most conducive to our welfare and that of our people". That surrender document was executed by Succona and Joseph Apsassin, the same Chief and Headman who subsequently signed the 1945 surrender. The 1940 surrender was also signed by 3 councillors or "principal men".

Section 51 of the Act prescribes the requirements for a valid release or surrender of "Indian lands". The first part of that section reads as follows:

51. Except as in this Part otherwise provided, no release or surrender of a reserve, or a portion of a reserve, held for the use of the Indians of any band, or of any individual Indian, shall be valid or binding, unless the release or surrender shall be assented to by a majority of the male members of the band of the full age of twenty-one years, at a meeting or council thereof summoned for that purpose, according to the rules of the band, and held in the presence of the Superintendent General, or of any officer duly authorized to attend such council, by the Governor in Council or by the Superintendent General.

As previously stated, neither the validity of that surrender nor, presumably, the Indians' informed consent to it were, unlike the subsequent surrender of 1945, disputed. The latter was for sale or lease and the issue between the parties regarding the 1940 surrender of the mineral rights for lease was whether it resulted in the mineral rights not being included in the 1945 surrender or not being capable of being included in it.

It is of some importance to remember that the title of the reserve lands remained in the Crown at all times. What might be termed the granting clause in the 1940 surrender effectively released to the King whatever usufructuary interests the plaintiffs had in "the petroleum and natural gas and the mining rights in connection therewith" pertaining to I.R. 172. The 1945 surrender, on the other hand, refers to the reserve itself and not to any particular limited right in the reserve and purports to release to His Majesty for ever the entire reserve. This, of course, can only mean whatever usufructuary interest or rights the Indi-

LA CESSION DE 1940

Le 9 juillet 1940, les demandeurs ont cédé à la Couronne leurs droits miniers afférents à la R.I. 172 [TRADUCTION] «en fiducie aux fins de leur cession à bail à une ou plusieurs personnes et selon les conditions que le gouvernement du Canada peut juger les plus appropriées pour assurer notre bien-être et celui de notre peuple». L'acte de cession a été signé par Succona et Joseph Apsassin, les mêmes chef et sous-chef qui ont signé par la suite la cession de 1945. La cession de 1940 a également été signée par trois conseillers ou [TRADUCTION] «membres principaux».

L'article 51 de la Loi prévoit les exigences relatives à la validité d'une cession ou d'une rétrocession de «terres indiennes». Voici le libellé de la première partie de cet article:

51. Sauf dispositions contraires de la présente Partie, nulle cession ou rétrocession d'une réserve ou d'une partie de réserve à l'usage d'une bande, ou d'un Indien en particulier, n'est valide ni obligatoire, à moins que la cession ou rétrocession ne soit ratifiée par la majorité des hommes de la bande qui ont vingt et un ans révolus, et ce à une assemblée ou à un conseil de la bande convoqué pour en délibérer conformément aux usages de la bande, et tenu en présence du surintendant général, ou d'un fonctionnaire régulièrement autorisé par le gouverneur en son conseil ou par le surintendant général à y assister.

Je le répète, ni la validité de cette cession ni non plus le consentement éclairé des Indiens à celle-ci n'ont été contestés contrairement à ce qui fut le cas pour la cession subséquente de 1945. Cette dernière visait la vente ou la location et le point litigieux entre les parties en ce qui concerne la cession des droits miniers en 1940 aux fins de leur location consistait à savoir si, par conséquent, les droits miniers n'étaient pas inclus dans la cession de 1945 ou ne pouvaient y être inclus.

Il est important de se rappeler que le titre sur les terres de la réserve appartenait en tout temps à la Couronne. Par ce qu'on pourrait appeler la clause de concession dans l'acte de cession de 1940, tous les droits usufruitiers que les demandeurs possédaient relativement [TRADUCTION] «au pétrole et au gaz naturel ainsi qu'aux droits miniers connexes» en ce qui concerne la R.I. 172 ont été effectivement cédés au Roi. Par contre, il est question dans la cession de 1945 de la réserve elle-même et non d'un droit restreint afférent à celle-ci, et, par cette cession, l'ensemble de la réserve est cédé pour toujours à Sa Majesté. Évidemment,

ans might have in the entire reserve. There is no restriction in the granting clause; the habendum clause mentions that it is "in trust to sell or lease ... and moneys received shall be placed to our credit in the usual way." When there is no restriction or reservation expressed in the description of the property granted or ceded all of the property mentioned, whether it be real or personal and all of the interest in that property whether it be legal, equitable or usufructuary, is presumed to be the subject-matter of the grant. This is not only a rule of common law but one of common sense.

Assuming for the moment that full, free and informed consent was given by the plaintiffs to the 1945 surrender, one would normally conclude on the mere reading of those two documents and failing evidence to the contrary, that it was intended by both parties on executing the 1945 surrender, that all of the property rights of the plaintiffs, including any property or other rights in minerals which they might possibly have were being surrendered for the purposes mentioned in that document, that is, for sale or lease by the Crown for the benefit of the Indians. I find that, in interpreting the document pursuant to the principle mentioned in *The Queen v. George* (*supra*), the wording imposes, upon sale or absolute disposal of the reserve, the obligation on the part of the Crown to set aside for the plaintiffs not only whatever consideration might be attributable to the usufructuary interests ceded, but also whatever part of the total consideration might arguably be attributable to the remainder of the absolute title. In any event, the absolute title, when subject to the burden of a perpetual unlimited usufructuary interest affecting the whole of the land involved, would have no real value.

Counsel for the plaintiffs argued however that, whatever meaning one might attempt to attribute to the 1945 surrender document, their clients' interests in the petroleum and natural gas rights were no longer capable at law of being surrendered by that document because they were no longer encompassed within the reserve: upon surrender in 1940 and acceptance of the surrender by Order-in-

cela ne peut que viser les droits usufruitiers ou autres droits que les Indiens peuvent posséder sur l'ensemble de la réserve. Il n'y a aucune restriction dans la clause de concession; la clause de l'*habendum* prévoit qu'il y a cession [TRADUCTION] «en fiducie aux fins de vendre ou de louer ... et que les sommes reçues seront portées à notre crédit de la manière habituelle.» Lorsque la description d'un bien cédé ne comporte aucune restriction ni réserve, l'ensemble du bien mentionné, qu'il s'agisse d'un bien réel ou personnel, et tous les droits afférents, qu'il s'agisse de droits légaux, en *equity* ou usufruitiers, sont présumés faire partie de la cession. Il ne s'agit pas seulement d'une règle de *common law*, mais de bon sens.

Si on présume pour l'instant que les demandeurs ont librement consenti, en toute connaissance de cause, à la cession effectuée en 1945, on pourrait normalement conclure à la simple lecture des deux documents, et en l'absence de preuve contraire, que les deux parties voulaient, en signant la cession de 1945, que tous les droits de propriété des demandeurs, y compris les droits de propriété ou autres droits qu'ils pouvaient posséder sur les minéraux de la réserve, soient cédés aux fins mentionnées dans cet acte, c'est-à-dire leur vente ou leur location par la Couronne pour le profit des Indiens. J'estime que cet acte, lorsqu'on l'interprète en fonction du principe dégagé dans l'arrêt *The Queen v. George* (précité), impose à la Couronne, au moment de la vente ou de l'aliénation absolue de la réserve, l'obligation de mettre à part pour les demandeurs non seulement toute contrepartie qui pourrait être attribuable aux droits usufruitiers cédés, mais aussi toute partie de la contrepartie totale qui pourrait être accordée pour le reste du titre de propriété absolu. De toute manière, un titre de propriété absolu n'a aucune valeur réelle lorsqu'il est assorti d'un droit usufruitier illimité et perpétuel, afférent à l'ensemble des terres en cause.

Toutefois, les avocats des demandeurs ont allégué que, quel que soit le sens que l'on puisse essayer d'attribuer à l'acte de cession de 1945, les droits de leurs clients sur le pétrole et le gaz naturel ne pouvaient désormais plus être légalement cédés par cet acte parce qu'ils ne faisaient plus partie de la réserve: par suite de la cession de 1940 qui a été acceptée par décret du conseil, ils

Council they became "Indian lands" and were unavailable for re-surrender in 1945. The mineral rights were, by the 1940 surrender, severed from the Indians' other interest in I.R. 172.

The 1940 instrument of surrender was, pursuant to the requirements of subsection 51(4) of the *Indian Act* duly accepted by the Governor in Council in November 1941 by Q.C. 8939 (Exhibit 214 at trial).

The argument rests mainly on the definitions of "Indian lands" and "reserve" as they are found in the 1927 Act. Paragraph 2(e) of that act defines "Indian lands" as:

2. ...

(e) any reserve or portion of a reserve which has been surrendered to the Crown;

"Reserve" is defined in paragraph 2(j) as follows:

2. ...

(j) "reserve" means any tract or tracts of land set apart by treaty or otherwise for the use or benefit of or granted to a particular band of Indians, of which the legal title is in the Crown, and which remains set apart and has not been surrendered to the Crown, and includes all the trees, wood, timber, soil, stone, minerals, metals and other valuables thereon or therein;

Based on these definitions, counsel for the plaintiffs argued that, once the 1940 surrender was taken, the petroleum and gas became "Indian lands" and therefore no longer a reserve or a portion of a reserve and subject only to disposal as petroleum and natural gas rights on reserves pursuant to the 1930 Regulations, paragraph 1(a) of which provided that they could be leased at a rental of 50¢ per acre for the first year and then at \$1 an acre for each subsequent year, if they had been released to His Majesty in trust in accordance with section 50 of the *Indian Act*. They relied mainly on the case of *St. Ann's Fishing Club v. The King*, [1950] S.C.R. 211, at page 215, where Taschereau J. stated:

These lands in question were formerly part of a "Reserve" for the use or benefit of the Chippewa and Pottawatomie Indians of Walpole Island, and there is no doubt that they could not be originally leased in May, 1881, to the predecessors

sont devenus «terres indiennes» et ils ne pouvaient être rétrocédés en 1945. Par suite de la cession de 1940, les droits miniers ont été séparés des autres droits que les Indiens possédaient relativement à la R.I. 172.

L'acte de cession de 1940 a été dûment accepté par le gouverneur en conseil en novembre 1941, par le Q.C. 8939 (pièce 214 produite à l'instruction) et ce, conformément aux exigences du paragraphe 51(4) de la *Loi des Indiens*.

L'argumentation repose essentiellement sur les définitions de «terres indiennes», «terres des Indiens» et de «réserve» figurant dans la Loi de 1927. L'alinéa 2l) de cette Loi définit «terres indiennes» et «terres des Indiens» comme suit:

2. ...

l) «terres indiennes», «terres des Indiens» signifie toute réserve ou partie de réserve qui a été cédée à la Couronne;

Le mot «réserve» est défini comme suit à l'alinéa 2h):

2. ...

h) «réserve» signifie toute étendue de terre mise à part, par traité ou autrement, pour l'usage ou le profit d'une bande particulière d'Indiens ou concédée à cette bande, et dont le titre légal est attribué à la Couronne, et qui fait encore partie de la réserve et n'a pas été rétrocédée à la Couronne, et comprend les arbres, le bois, la terre, la pierre, les minéraux, les métaux et autres choses de valeur qui se trouvent à la surface ou à l'intérieur du sol;

Se fondant sur ces définitions, les avocats des demandeurs ont allégué que, une fois la cession effectuée en 1940, le pétrole et le gaz naturel sont devenus des «terres indiennes» et ne constituaient donc plus une réserve ou une partie de réserve; ils ne pouvaient donc être aliénés qu'à titre de droits pétroliers et gaziers afférents aux réserves, conformément aux Règlements de 1930 dont l'alinéa 1a) prévoyait qu'ils pouvaient être loués 0,50 \$ l'acre pour la première année et ensuite, 1 \$ l'acre pour chaque année subséquente, s'ils avaient été cédés en fiducie à Sa Majesté conformément à l'article 50 de la *Loi des Indiens*. Les avocats ont invoqué principalement l'arrêt *St. Ann's Fishing Club v. The King*, [1950] R.C.S. 211, où le juge Taschereau a déclaré à la page 215:

[TRADUCTION] Les terres en cause faisaient anciennement partie d'une «Réserve» pour l'usage ou le profit des Chippewa et des Pottawatomie de Walpole Island, et il ne fait aucun doute qu'elles ne pouvaient à l'origine être louées en mai 1881 aux

of the appellant, unless they had been *surrendered* to the Crown. The effect of a surrender is to make a reserve or part of a reserve, "Indian Lands", defined in section 2 of the *Indian Act*, para. (k) ((i.e. 2(e) of the 1927 Act)) as "any reserve or portion of a reserve which has been surrendered to the Crown". [Emphasis and text in double parentheses added.]

They also relied on the following statement by Kerwin J. at pages 212 and 213 of the same case:

During the argument a question was asked as to whether a contention could be advanced that the surrender "to the end that said described territory may be leased to the applicants for the purpose of shooting and fishing for such term and on such conditions as the Superintendent of Indian Affairs may consider best for our advantage", was really a surrender upon condition, and that if the condition were not fulfilled the land would revert. It was suggested in answer thereto that this would not assist the appellant and this was made quite clear by Mr. Jacket when he pointed to ss. 2(i) and (k) ((i.e. 2(j) & (e) of 1927 Act)), 19, 48 and 49 of the *Indian Act*, c. 81, R.S.C. 1906. If by some means the lands again became part of the reserve, then s. 49 ((i.e. see 51 of 1927 Act)) would apply and, except as in Part I otherwise provided, no release or surrender of a reserve or a portion thereof shall be valid or binding unless the release or surrender complies with the specified conditions. [Emphasis and text in double parentheses added.]

The *St. Ann's Fishing Club* case can clearly be distinguished from the present one as it involved the surrender of an entire island being a portion of a reserve while the gas and oil rights are merely an interest in the whole of the reserve. The 1940 surrender was not a surrender of "a portion of" the reserve as defined in paragraph 2(e) and as considered in the *St. Ann's Fishing Club* case but only of a right in a part of the whole reserve. Furthermore, in the Act, a reserve is contemplated as being an extent or stretch of territory which is defined therein as a "tract or tracts of land set apart ... and includes ... the trees, wood ... minerals, metals and other valuables". That simply means that the land of the reserve includes these objects and does not mean that a right or interest such as a leasehold interest in any of these objects constitutes a reserve. The inclusion of those objects in the term "reserve" might have been deemed preferable as the Indians do not have a title to the reserve but merely an usufructuary interest in it and there does not exist in such a case a common law rule which, as in the case of an absolute title, provides that all of these objects are necessarily

prédécesseurs de l'appellant, à moins qu'elles n'aient été *cédées* à la Couronne. Une cession a pour effet de faire d'une réserve ou d'une partie de réserve des «terres indiennes», expression définie à l'alinéa 2k) de la *Loi des Indiens* ((c'est-à-dire à l'alinéa 2l) de la Loi de 1927)) comme «toute réserve ou partie de réserve qui a été cédée à la Couronne». [C'est moi qui souligne et qui ajoute le texte entre doubles parenthèses.]

Ils ont également invoqué la déclaration suivante du juge Kerwin aux pages 212 et 213 du même arrêt:

[TRADUCTION] Au cours des débats, on a demandé si on pouvait prétendre que la cession «ayant pour but de permettre que le territoire décrit puisse être loué aux requérants aux fins d'y chasser et d'y pêcher pour la durée et aux conditions que le surintendant des Affaires indiennes peut juger dans notre intérêt», constituait effectivement une cession conditionnelle et si, dans l'éventualité où cette condition ne serait pas remplie, les terres seraient rendues. On a laissé entendre qu'une réponse à cette question ne serait d'aucune utilité à l'appellant, ce qu'a indiqué très clairement M. Jackett lorsqu'il a invoqué les alinéas 2i) et k) ((c'est-à-dire les alinéas 2h) et l) de la Loi de 1927)) et les articles 19, 48 et 49 de la *Loi sur les sauvages*, chap. 81, S.R.C. 1906. Si d'une manière ou d'une autre les terres redevenaient une partie de la réserve, l'article 49 ((c'est-à-dire l'article 51 de la Loi de 1927)) s'appliquerait et, sous réserve de ce que prévoit la Partie I, aucune concession ou cession d'une réserve ou d'une partie de réserve ne sera valide ou ne liera les parties que si ladite concession ou cession respecte les conditions prévues. [C'est moi qui souligne et qui ajoute le texte entre doubles parenthèses.]

On peut clairement établir une distinction entre l'arrêt *St. Ann's Fishing Club* et l'espèce, car il s'agissait de la cession d'une île entière constituant une partie de la réserve alors que les droits pétroliers et gaziers ne constituent qu'un simple droit sur l'ensemble de la réserve. La cession de 1940 n'était pas celle d'une partie de réserve telle que prévue à l'alinéa 2l) et comme cela a été le cas dans l'arrêt *St. Ann's Fishing Club*; il s'agissait plutôt de la cession d'un droit sur une partie de l'ensemble de la réserve. En outre, la Loi prévoit qu'une réserve est une étendue de territoire qu'elle définit comme suit: «étendue de terre mise à part ... et comprend les arbres, le bois ... les minéraux, les métaux et autres choses de valeur». Cela signifie simplement que les terres de la réserve comprennent ces objets et non qu'un droit tel qu'une tenure à bail sur l'un quelconque de ces objets constitue une réserve. Il se peut que l'inclusion de ces objets dans le mot «réserve» ait été jugée préférable parce que les Indiens ne possèdent pas un titre de propriété sur la réserve mais plutôt un droit usufruitier et qu'il n'existe pas, dans un tel cas, une règle de *common law* prévoyant,

included in a fee simple unless specifically excepted.

Finally, there is nothing in the *Indian Act* prohibiting the Band from changing its mind and giving approval and consent to another arrangement with the Crown. Counsel for the plaintiffs were in fact arguing that, because of the trust for lease imposed on the Crown by the 1940 surrender, that surrender rendered the interests of the Indians in mineral rights incapable of any other type of alienation except by means of lease even if both the Crown and the Indians subsequently agreed to a sale or to a further type of alienation as part of the whole reserve. This would lead to the absurd conclusion that these oil and gas rights would be forever incapable of sale although the remaining rights in the reserve could be surrendered for that purpose. In order to arrive at any such extraordinary conclusion, there would have to be a clear and unequivocal provision in the *Indian Act* to that effect. No such restraint on alienation exists therein. Legislative enactments do at times lead to absurdities, but, before accepting them, the Courts must, at the very least, insist that in such cases the intention of the legislators be not only clearly and unequivocally expressed but that the text be completely incapable of supporting any other interpretation.

Counsel for the plaintiffs, in their argument regarding severance of oil and gas rights from the remaining rights in the reserve and the consequences of such severance, referred to several cases as well as to *Armour on Real Property*, 2nd Ed., 1916. The cases referred to were *Humphries v. Brogden* (1850), 12 Q. B. 739; *Algoma Ore Properties Ltd. v. Smith*, [1953] 3 D.L.R. 343 (Ont. C.A.); *Stoughton v. Leigh*, (1808), 1 Taunt. 402; 127 E.R. 889 (H.C. Ch.); *Ex p. Jackson*, [1925] 1 D.L.R. 701 (Alta. S.C., App. D.), at page 702; *Berkheiser v. Berkheiser and Glaister*, [1957] S.C.R. 387; *Martyn v. Williams* (1857), 1 H. & N. 817; 156 E.R. 1430 (Exch.), and *Earl of Lonsdale v. Lowther*, [1900] 2 Ch. 687. That jurisprudence does not affect the fundamental issue of whether the rights surrendered for lease in

comme c'est le cas pour un titre de propriété absolu, que tous ces objets font nécessairement partie d'un fief simple à moins d'en être expressément exclus.

^a Enfin, rien dans la *Loi sur les Indiens* n'interdit à la bande indienne de changer d'avis et d'approuver et de conclure un autre arrangement avec la Couronne. Les avocats des demandeurs ont, en fait, allégué qu'en raison de la fiducie obligeant la location, fiducie qui a été imposée à la Couronne par la cession de 1940, les droits miniers des Indiens ne pouvaient désormais plus, par suite de cette cession, être autrement aliénés que par bail, même si la Couronne et les Indiens devaient subseq-
^b uemment consentir à leur vente ou à leur aliénation à titre de partie de la réserve. Cela nous amènerait à conclure illogiquement que ces droits pétroliers et gaziers ne pourraient plus jamais être
^c vendus alors que les autres droits afférents à la réserve pourraient être cédés à cette fin. Pour pouvoir arriver à une conclusion aussi extraordinaire, il faudrait qu'il existe une disposition claire et sans équivoque à cet effet dans la *Loi sur les Indiens*. Celle-ci ne contient aucune disposition
^d limitant de cette manière le droit d'aliénation. Les dispositions législatives entraînent parfois des absurdités, mais avant d'accepter celles-ci, les tribunaux doivent tout au moins exiger que, dans de
^e tels cas, l'intention du législateur soit exprimée clairement et sans équivoque et que le libellé utilisé ne puisse absolument pas donner lieu à une autre interprétation.

^g Dans leur argumentation concernant la séparation des droits pétroliers et gaziers des autres droits afférents à la réserve et les conséquences d'une telle séparation, les avocats des demandeurs ont invoqué l'ouvrage *Armour on Real Property*, 2^e éd., 1916, ainsi que les affaires *Humphries v. Brogden* (1850), 12 Q. B. 739; *Algoma Ore Properties Ltd. v. Smith*, [1953] 3 D.L.R. 343 (C.A. Ont.); *Stoughton v. Leigh* (1808), 1 Taunt. 402; 127 E.R. 889 (H.C. Ch.); *Ex p. Jackson*, [1925] 1 D.L.R. 701 (C.S. Alb., Div. d'appel), à la page 702; *Berkheiser v. Berkheiser and Glaister*, [1957] R.C.S. 387; *Martyn v. Williams* (1857), 1 H. & N. 817; 156 E.R. 1430 (Exch.); et *Earl of Lonsdale v. Lowther*, [1900] 2 Ch. 687. Cette jurisprudence n'a aucune incidence sur la question fondamentale de savoir si les droits cédés aux fins de

1940 were legally capable of forming part of the 1945 surrender and of being eventually sold free of any trust for lease in favour of the plaintiffs originally created by the 1940 surrender.

I therefore find that the oil and petroleum rights surrendered for the purpose of leasing in 1940 were still at law capable of being surrendered with the remainder of the reserve in 1945 for either leasing or sale or both.

BREACHES OF DUTY BETWEEN 1916 AND 1945

The acts of negligence and of non-fraudulent breach of fiduciary duty alleged by the plaintiffs to have occurred between 1916 and 1945, in allowing unauthorized use of the lands in which the plaintiffs had an interest and also in allowing the Province of British Columbia to improperly regulate the use of certain lands are without foundation at law. There is no legal duty statutory, fiduciary or otherwise, cast upon the Department of Indian Affairs to actively police the Indian reserves nor is there any legal duty on the part of the defendant to interfere with or to use its constitutional power to override legitimate provincial legislation of general application merely because it also happens to affect the Indians.

By reason of their very nature, the incidents complained of must necessarily have been known to the plaintiffs at the time they occurred. There is no evidence that any complaint was ever made to Superintendent General or to the departmental officials regarding these alleged trespassers which might bring into play any duty on the part of the Department to prosecute trespassers as mentioned in sections 35 and 36 of the *Indian Act* of 1927.

For the reasons which I will be dealing with subsequently these claims are also statute barred by the mere fact that they are all alleged to have occurred during a period well over 30 years previous to the institution of the action and no fraud on the part of the defendant pertaining thereto has even been alluded to.

leur location en 1940 pouvaient légalement faire partie de la cession de 1945 et être finalement vendus libres de toute fiducie obligeant leur location en faveur des demandeurs, fiducie originellement créée par la cession de 1940.

Par conséquent, j'estime que les droits pétroliers et gaziers cédés aux fins de leur location en 1940 pouvaient encore être légalement cédés avec le reste de la réserve en 1945 soit aux fins de leur location ou de leur vente, soit à ces deux fins.

VIOLATIONS DE L'OBLIGATION ENTRE 1916 ET 1945

Il n'existe aucun fondement juridique aux actes de négligence et à la violation non frauduleuse de l'obligation fiduciaire qui, selon les demandeurs, se seraient produits entre 1916 et 1945 et qui consistaient à avoir permis l'utilisation non autorisée de terres sur lesquelles les demandeurs possédaient un droit et à avoir autorisé la province de la Colombie-Britannique à réglementer inadéquatement l'utilisation de certaines terres. Il n'existe aucune obligation légale, fiduciaire ou autre, en vertu de laquelle le ministère des Affaires indiennes est tenu de réglementer activement les réserves indiennes; la défenderesse n'est pas non plus légalement tenue d'intervenir ou d'utiliser son pouvoir constitutionnel pour annuler une loi provinciale légitime d'application générale, pour la simple raison qu'elle touche également les droits des Indiens.

En raison de la nature même des incidents reprochés, les demandeurs devaient en être au courant au moment où ils se sont produits. Rien dans la preuve n'indique qu'une plainte a été portée auprès du surintendant général ou des fonctionnaires du Ministère en ce qui concerne ces prétendus intrus, ce qui ferait entrer en jeu l'obligation du Ministère de poursuivre les intrus comme le prévoyaient les articles 35 et 36 de la *Loi des Indiens* de 1927.

Pour les motifs que j'examinerai plus loin, ces réclamations sont également prescrites parce que les incidents se seraient produits il y a déjà plus de trente ans avant l'introduction de la présente action et qu'on n'a même pas allégué qu'il y avait eu fraude de la part de la défenderesse à cet égard.

1945 SURRENDERa) Statute Law applicable:

In order to be valid, the 1945 surrender must, among other things, have been carried out in accordance with the provisions of the *Indian Act* applicable at that time, namely sections 4, 50 [as am. by S.C. 1938, c. 31, s. 1] and 51. They read as follows:

4. The Minister of the Interior, or the head of any other department appointed for that purpose by the Governor in Council, shall be the Superintendent General of Indian Affairs, and shall, as such, have the control and management of the lands and property of the Indians in Canada.

50. Except as in this Part otherwise provided, no reserve or portion of a reserve shall be sold, alienated or leased until it has been released or surrendered to the Crown for the purposes of this part; but the Superintendent General may lease, for the benefit of any Indian, upon his application for that purpose, the land to which he is entitled without such land being released or surrendered, and may, without surrender, dispose to the best advantage, in the interests of the Indians, of wild grass and dead or fallen timber.

2. The Governor in Council may make regulations enabling the Superintendent General in respect of any Indian reserve, to issue leases upon such terms as may be considered proper in the interest of the Indians and of any other lessee or licensee of surface rights,

(a) upon surrender in accordance with this part, of any land deemed to contain salt, petroleum, natural gas, coal, gold, silver, copper, iron or other minerals and to grant in respect of such land the right to prospect for, mine, recover and take away any or all such mineral, and

(b) without surrender, to any person authorized to mine any of the minerals in this section mentioned, of surface rights over such area of any land within a reserve containing any such minerals as may be necessary for the mining thereof.

(As amended by S.C. 1938, c. 31, s. 1.)

51. Except as in this Part otherwise provided, no release or surrender of a reserve, or a portion of a reserve, held for the use of the Indians of any band, or of any individual Indian, shall be valid or binding, unless the release or surrender shall be assented to by a majority of the male members of the band of the full age of twenty-one years, at a meeting or council thereof summoned for that purpose, according to the rules of the band, and held in the presence of the Superintendent General, or of any officer duly authorized to attend such council, by the Governor in Council or by the Superintendent General.

2. No Indian shall be entitled to vote or be present at such council, unless he habitually resides on or near, and is interested in the reserve in question.

3. The fact that such release or surrender has been assented to by the band at such council or meeting shall be certified on

LA CESSION DE 1945a) Loi applicable

Pour être valide, la cession de 1945 doit notamment avoir été exécutée conformément aux dispositions de la *Loi des Indiens* en vigueur à cette époque, savoir les articles 4, 50 [mod. par S.C. 1938, chap. 31, art. 1] et 51. Ils sont rédigés en ces termes:

4. Le ministre de l'Intérieur, ou le chef de tout autre ministère désigné à cet effet par le gouverneur en son conseil, est le surintendant général des affaires indiennes, et, à ce titre, gère et administre les terres et propriétés indiennes en Canada.

50. Sauf dispositions contraires de la présente Partie, nulle réserve ou portion de réserve ne peut être vendue, aliénée ni affermée, avant d'avoir été cédée ou rétrocédée à la Couronne pour les objets de la présente Partie; mais le surintendant général peut donner à bail, au profit de quelque Indien, sur sa demande, la terre à laquelle celui-ci a droit, sans cession ni abandon, et il peut, sans qu'il y ait eu abandon, disposer de la manière la plus avantageuse possible pour les Indiens des graminées sauvages et du bois mort sur pied ou du chablis.

2. Le gouverneur en conseil peut établir des règlements permettant au surintendant général, à l'égard d'une réserve indienne, de donner à bail, aux conditions jugées pertinentes dans l'intérêt des Indiens et de tout autre locataire ou titulaire de droits de surface,

a) sur abandon conformément à la présente Partie, tout terrain censé contenir du sel, du pétrole, du gaz naturel, du charbon, de l'or, de l'argent, du cuivre, du fer ou d'autres minéraux, et de conférer, à l'égard de ce terrain, le droit de prospecter ou de faire des travaux miniers pour obtenir l'un quelconque de ces minéraux, ou le droit de le récupérer ou emporter, et

b) sans abandon, à toute personne autorisée à extraire l'un des minéraux mentionnés au présent article, des droits de surface sur telle étendue de terrain, à l'intérieur d'une réserve contenant lesdits minéraux, qui peut être nécessaire à leur extraction.

(Mod. par S.C. 1938, chap. 31, art. 1.)

51. Sauf dispositions contraires de la présente Partie, nulle cession ou rétrocession d'une réserve ou d'une partie de réserve à l'usage d'une bande, ou d'un Indien en particulier, n'est valide ni obligatoire, à moins que la cession ou rétrocession ne soit ratifiée par la majorité des hommes de la bande qui ont vingt et un ans révolus, et ce à une assemblée ou à un conseil de la bande convoqué pour en délibérer conformément aux usages de la bande, et tenu en présence du surintendant général, ou d'un fonctionnaire régulièrement autorisé par le gouverneur en son conseil ou par le surintendant général à y assister.

2. Nul Indien ne peut voter ni assister à ce conseil, à moins de résider habituellement dans ou près de la réserve en question, ou d'y avoir un intérêt.

3. Le fait que la cession ou rétrocession a été consentie par la bande, à ce conseil ou à cette assemblée, doit être attesté sous

oath by the Superintendent General, or by the officer authorized by him to attend such council or meeting, and by some of the chiefs or principal men present thereat and entitled to vote, before any person having authority to take affidavits and having jurisdiction within the place where the oath is administered.

4. When such assent has been so certified, as aforesaid, such release or surrender shall be submitted to the Governor in Council for acceptance or refusal. R.S., c. 81, s. 49; 1918, c. 26, s. 2.

b) Status of decision to surrender

In dealing with the decision of the Department in 1945 to sell I.R. 172, counsel for the defendant argued that the question of whether a particular surrender should be taken and accepted was a policy function of the Department as opposed to an operational function and was therefore not reviewable by the Courts. He relied on a statement by Lord Diplock in *Dorset Yacht Co. Ltd. v. Home Office*, [1970] A.C. 1004 (H.L.), at page 1067, wherein he is quoted as stating:

It is, I apprehend, for practical reasons of this kind that over the past century the public law concept of *ultra vires* has replaced the civil law concept of negligence as the test of the legality, and consequently of the actionability, of acts or omissions of government departments or public authorities done in the exercise of a discretion conferred upon them by Parliament as to the means by which they are to achieve a particular public purpose. According to this concept Parliament has entrusted to the department or authority charged with the administration of the statute the exclusive right to determine the particular means within the limits laid down by the statute by which its purpose can best be fulfilled.

That statement of the law was reaffirmed and followed subsequently by the House of Lords in *Anns v. Merton London Borough Council*, [1978] A.C. 728 (H.L.), at page 754:

Most, indeed probably all, statutes relating to public authorities or public bodies, contain in them a large area of policy. The courts call this "discretion" meaning that the decision is one for the authority or body to make, and not for the courts. Many statutes also prescribe or at least presuppose the practical execution of policy decisions: a convenient description of this is to say that in addition to the area of policy or discretion, there is an operational area. Although this distinction between the policy area and the operational area is convenient, and illuminating, it is probably a distinction of degree; many "operational" powers or duties have in them some element of "discretion." It can safely be said that the more "operational" a power or duty may be, the easier it is to superimpose upon it a common law duty of care.

serment par le surintendant général ou par le fonctionnaire qu'il a autorisé à assister à ce conseil ou à cette assemblée, et par l'un des chefs ou des anciens qui y a assisté et y a droit de vote, devant toute personne autorisée à faire prêter serment et ayant juridiction dans l'endroit où le serment est prêté.

a

4. Après que ce consentement a été ainsi attesté, comme susdit, la cession ou rétrocession est soumise au gouverneur en son conseil, pour qu'il l'accepte ou la refuse. S.R., c. 81, art. 49; 1918, c. 26, art. 2.

b

b) Nature de la décision de procéder à la cession

Au sujet de la décision prise par le Ministère de vendre la R.I. 172 en 1945, l'avocat de la défenderesse a soutenu que la question de savoir s'il faut accepter une cession donnée relevait de la politique administrative du Ministère plutôt que du domaine de l'exécution. Par conséquent, elle ne pouvait faire l'objet d'un contrôle judiciaire. Il s'est appuyé sur une déclaration faite par lord Diplock dans l'arrêt *Dorset Yacht Co. Ltd. v. Home Office*, [1970] A.C. 1004 (H.L.), à la page 1067:

[TRADUCTION] C'est, je crois, pour des raisons d'ordre pratique de ce genre qu'au cours du dernier siècle le concept de l'*ultra vires* du droit public a remplacé la notion de négligence du droit civil à titre de critère pour juger de la légalité (et donc de la possibilité de poursuivre) des actes ou omissions des ministères ou des organismes publics dans l'exercice du pouvoir discrétionnaire dont ils sont investis par le Parlement en ce qui concerne les moyens de réaliser un objectif public déterminé. Selon ce concept, le Parlement a accordé au Ministère ou à l'organisme chargé de l'administration de la loi le droit exclusif de choisir, dans le cadre fixé par le texte législatif, les moyens qui lui permettront le mieux de s'acquitter de sa mission.

Cet énoncé du droit a été confirmé à nouveau et appliqué par la suite par la Chambre des lords dans l'arrêt *Anns v. Merton London Borough Council*, [1978] A.C. 728 (H.L.), à la page 754:

[TRADUCTION] Les lois ayant trait aux autorités ou organismes publics comportent, pour la plupart sinon toutes, une large mesure de politique administrative. Les cours appellent cela «pouvoir discrétionnaire» pour signifier que la décision appartient à ces autorités ou organismes, et non pas aux tribunaux judiciaires. Plusieurs lois prescrivent aussi ou du moins présupposent l'exécution pratique des décisions de politique: une façon utile de décrire ce phénomène consiste à dire qu'en plus du domaine de la politique administrative ou du pouvoir discrétionnaire, il existe un domaine d'exécution. Bien que la distinction entre ce qui relève de la politique et ce qui relève de l'exécution soit utile et nous éclaire, il s'agit probablement d'une distinction de degré; un bon nombre de pouvoirs et d'obligations «d'exécution» comportent certains éléments de «discretion». On peut affirmer sans contredit que plus un pouvoir ou une obligation relève du domaine de l'exécution, plus il est facile de lui superposer une obligation de diligence qui relève de la *common law*.

The principle was also approved by the Supreme Court of Canada in *Kamloops (City of) v. Nielsen et al.*, [1984] 2 S.C.R. 2, and by the British Columbia Court of Appeal in *Toews v. MacKenzie* (1980), 12 C.C.L.T. 263 (B.C.C.A.).

I do not accept the argument that, in the circumstances of this case, the decision to accept the surrender cannot be reviewed or that an action in damages could not be founded on its improper exercise. The decision is more properly characterized as being in the "operational" rather than in the "policy" field. Although it is a provision in a statute which confers powers on the Department, the scale and the extent to which the power can be exercised is left to the Department. The discretion is not absolute but must be accompanied by a properly obtained consent on the part of the Indians and the Department in effect can only recommend: the approval depends ultimately on acceptance by the Governor General in Council. Finally, in the case at bar, the consent of the Indians depended to some extent at least on the advice and guidance which they sought and received from the Department and the decision to accept the surrender cannot logically be considered separately from that advice given by the same authorities. Finally, the plaintiffs are, in essence, not complaining of the policy, but rather of the manner in which it was actually implemented. That is reviewable and, if improper, can form the basis of an action for damages.

c) Surrender documents

One of the main issues to be tried was whether the members of the Band fully understood and freely consented to the surrender of I.R. 172 on the 22nd of September, 1945. A closely related issue was whether an individual vote was taken at the meeting.

The indenture of surrender (Exhibit 295) and the reporting letter by Mr. Grew (Exhibit 294) dated September 24, 1945 are, of course, important exhibits to be considered on these issues.

The surrender document, witnessed by Mr. Grew and Mr. Galibois, was executed on behalf of

Le principe a également été approuvé par la Cour suprême du Canada dans l'arrêt *Kamloops (Ville de) c. Nielsen et autres*, [1984] 2 R.C.S. 2, et par la Cour d'appel de la Colombie-Britannique dans l'arrêt *Toews v. MacKenzie* (1980), 12 C.C.L.T. 263 (C.A.C.-B.).

Je ne puis admettre l'argument voulant que, dans les circonstances de l'espèce, la décision d'accepter la cession ne puisse faire l'objet d'un contrôle ni qu'une action en dommages-intérêts ne puisse être fondée sur son exercice irrégulier. La décision relève davantage du domaine de «l'exécution» que de celui de la «politique administrative». Bien que les pouvoirs du Ministère lui aient été conférés par une loi, l'étendue de leur exercice est laissé à la discrétion de celui-ci. Ce pouvoir discrétionnaire n'est cependant pas absolu, car le consentement des Indiens doit avoir été obtenu de façon régulière, et, en réalité, le Ministère ne peut que recommander l'acceptation du projet de cession, celui-ci devant être soumis en définitive à l'approbation du gouverneur en conseil. En l'espèce, les conseils prodigués par le Ministère à la demande des Indiens ont déterminé ceux-ci, dans une certaine mesure du moins, à donner leur consentement. La décision d'accepter la cession ne peut logiquement être dissociée des opinions émises par les autorités qui cherchaient à obtenir le consentement. Pour l'essentiel enfin, les demandeurs ne se plaignent pas de la politique mais plutôt de sa mise en œuvre qui, elle, peut faire l'objet d'un contrôle et pourrait servir de fondement à une action en dommages-intérêts si elle s'avérait contraire aux règles.

c) Documents relatifs à la cession

L'un des principaux points en litige est la question de savoir si les membres de la bande ont parfaitement compris la portée de leur décision et s'ils ont consenti librement à la cession de la R.I. 172 le 22 septembre 1945. Étroitement liée à la première, une deuxième question concerne la tenue d'un vote individuel à l'assemblée.

L'acte de cession (pièce 295) et le compte rendu de M. Grew (pièce 294) en date du 24 septembre 1945 sont, bien sûr, des pièces importantes dont il faut tenir compte à ce sujet.

L'acte de cession, attesté par MM. Grew et Galibois, a été signé au nom de la bande par le

the Band by Chief Succona and four other members of the Band, one of whom was the Headman Joseph Apsassin and two of the remaining three were leaders of their respective groups. Attached to the actual surrender document is what counsel described as an improperly executed affidavit taken by Mr. Grew and also by Chief Succona and Headman Joseph Apsassin, before one J. S. Young described therein as "a Justice of the Peace in and for British Columbia". Since the validity of this document has been strongly objected to by counsel for the plaintiffs, it is set out hereunder textually:

DOMINION OF CANADA
Province of British Columbia
County of Cariboo

To Wit:

Personally appeared before me

J. L. Grew
of the city of Ottawa
in the Province of Ontario

and Chief Succona and Headman Jos Apsassin Chiefs of the
St. John Beaver Band of Indians

And the said J. L. Grew

for himself saith:—

That the annexed release or surrender was assented to by a majority of the male members of the said band of Indians of the full age of twenty-one years entitled to vote, all of whom were present at the meeting or council.

That such assent was given at the meeting or council of the said Band summoned for that purpose and according to its rules or the rules of the Department.

That the terms of the said surrender were interpreted to the Indians by an interpreter qualified to interpret from the English language to the language of the Indians.

That he was present at such meeting or council and heard such assent given.

That he was duly authorized to attend such council or meeting by the Deputy Superintendent General of Indian Affairs.

That no Indian was present or voted at said council or meeting who was not a member of the band or interested in the land mentioned in the said release or surrender.

And the said Chief Succona and Headman Joseph Apsassin

say:—

That the annexed release or surrender was assented to by them and a majority of the male members of the said band of Indians of the full age of Twenty-one years.

That such assent was given at a meeting or council of the said band of Indians summoned for that purpose as hereinbefore stated, and held in the presence of the said

J. L. Grew

chef Succona et quatre autres membres de la bande, dont le sous-chef Joseph Apsassin. Deux des trois autres signataires étaient chefs de leur groupe respectif. Un affidavit à l'égard duquel l'avocat prétend que les formalités prescrites n'ont pas été accomplies est joint à l'acte de cession proprement dit. L'affidavit a été souscrit par M. Grew, le chef Succona et le sous-chef Joseph Apsassin devant J. S. Young en sa qualité de [TRADUCTION] «juge de paix pour la Colombie-Britannique». Comme la validité de ce document a été vivement contestée par l'avocat des demandeurs, le texte intégral de l'affidavit est reproduit ci-dessous:

^c [TRADUCTION] DOMINION DU CANADA
Province de la Colombie-Britannique
Comté de Cariboo

Ont personnellement comparu devant moi

^d J. L. Grew
de la ville d'Ottawa
dans la province de l'Ontario

le chef Succona et le sous-chef Jos Apsassin, chefs de la bande indienne de St John Beaver.

^e Ledit J. L. Grew a déclaré ce qui suit:

L'acte de cession ou de rétrocession ci-joint a été sanctionné par la majorité des membres de sexe masculin de ladite bande indienne, ayant atteint l'âge de vingt et un ans et ayant le droit de vote, qui tous ont assisté à l'assemblée ou conseil.

^f Ce consentement a été donné à l'assemblée ou conseil de ladite bande convoqué à cette fin conformément à son règlement ou à celui du Ministère.

^g Les termes dudit acte de cession ont été traduits pour les Indiens par un interprète qualifié pour traduire de l'anglais vers la langue des Indiens.

J'ai assisté à cette assemblée ou conseil et j'ai entendu les Indiens donner leur consentement.

J'ai été dûment autorisé à assister à ce conseil ou assemblée par l'assistant-surintendant général des Affaires indiennes.

^h Aucun Indien n'appartenant pas à la bande ou n'ayant aucun intérêt sur les terres mentionnées dans ledit acte de cession ou de rétrocession n'a assisté à l'assemblée ou conseil ni n'y a voté.

Ledit chef Succona et le sous-chef Joseph Apsassin ont déclaré ce qui suit:

ⁱ L'acte de cession ou de rétrocession ci-joint a été sanctionné par la majorité des membres de sexe masculin de ladite bande indienne ayant atteint l'âge de vingt et un ans et nous.

^j Ce consentement a été donné à une assemblée ou conseil de ladite bande indienne convoqué à cette fin, comme il a été déclaré ci-dessus, et tenu en présence dudit

J. L. Grew.

That no Indian was present or voted at such council or meeting who was not a habitual resident on the reserve of the said band of Indians and interested in the land mentioned in the said release or surrender.

That the terms of the said surrender were interpreted to the Indians by an interpreter qualified to interpret from the English language to the language of the Indians.

That they are Chief and Headman of the said band of Indians and entitled to vote at the said meeting or council.

Sworn before me by the deponents
at the P.O. of Rose Prairie
In the County of Cariboo
This 22 day of September
A.D. 1945

J. E. Young
A Justice of the Peace
in and for British Columbia

Also annexed to the surrender document is what is described as a complete list of voters dated September 22, 1945. It lists 27 members as having been present and having voted in favour of the surrender, 4 as having been absent and none as being against the surrender. The list was certified as correct by J. L. Grew.

In his reporting letter (Exhibit 294) addressed to Mr. Hoey, the Director of the Indian Affairs Branch, Mr. Grew stated that he was enclosing the signed surrender papers together with the voters list and also informed Mr. Hoey that, on Saturday, September 21, the Fort Saint John Band of Indians unanimously agreed to the surrender for sale of their reserve.

The documents to which I have referred constitute at least *prima facie* evidence to the effect that the Band had freely consented to the surrender of I.R. 172 for the purpose of sale and, in the absence of convincing evidence to the contrary, the plaintiffs would fail on this issue.

Regarding the actual subject-matter of the surrender and the conditions attached to it, I have already discussed to some extent the granting and habendum clauses of the document when dealing with the 1940 surrender (refer page 53 *supra*). To summarize: the document purports to grant all of the interest of the Band in I.R. 172 subject only to the fiduciary obligation of the Crown to sell or lease to such persons and upon such conditions as the Crown may deem conducive to the welfare of the Band, with the proceeds to be placed "to our

Aucun Indien n'étant pas résident habituel de la réserve de ladite bande indienne et n'ayant aucun intérêt sur les terres mentionnées dans ledit acte de cession ou de rétrocession n'a assisté à l'assemblée ou conseil ni n'y a voté.

Les termes dudit acte de cession ont été traduits pour les Indiens par un interprète qualifié pour traduire de l'anglais vers la langue des Indiens.

Nous sommes le chef et le sous-chef de ladite bande indienne et nous avons le droit de voter à ladite assemblée ou conseil.

Fait sous serment devant moi par les déposants
au B.P. de Rose Prairie
dans le comté de Cariboo
Ce 22^e jour du mois de septembre de l'an de
grâce 1945

J. E. Young
Juge de paix
pour la Colombie-Britannique

Un document décrit comme étant une liste complète des votants en date du 22 septembre 1945 est également annexé à l'acte de cession. Selon ce document, 27 membres de la bande étaient présents et ont voté en faveur de la cession, quatre membres étaient absents et personne ne s'est opposé à la cession. La liste a été certifiée exacte par J. L. Grew.

Dans son compte rendu (pièce 294) adressé à M. Hoey, directeur de la Direction des Affaires indiennes, M. Grew a indiqué qu'il faisait parvenir les papiers de la cession signés ainsi que la liste des votants. Il informait également M. Hoey du fait que, le samedi 21 septembre, la bande indienne de Fort Saint John avait unanimement accepté la cession de la réserve en vue de sa vente.

Les documents auxquels je fais référence constituent au moins une preuve *prima facie* du fait que la bande a librement consenti à la cession de la R.I. 172 en vue de sa vente et, en l'absence d'une preuve contraire convaincante, les demandeurs n'auraient pas gain de cause sur ce point.

Quant à l'objet véritable de la cession et à ses modalités, j'ai déjà traité, dans une certaine mesure, des clauses de concession et de l'*habendum* lorsque j'ai abordé la cession de 1940 (voir la page 53 ci-dessus). Rappelons brièvement que le document vise à céder tous les droits détenus par la bande sur la R.I. 172, sous réserve seulement de l'obligation de fiduciaire de la Couronne de vendre ou de louer les terres aux personnes et aux conditions qu'elle juge de nature à favoriser le bien-être de la bande, le produit devant être porté «à notre

credit in the usual way". It is obvious that, although the surrender is drawn as if the fee simple were being granted, it could not operate as such since the title of the lands was in the Crown before the surrender. The legal effect could only be to grant or surrender whatever rights the plaintiffs had in I.R. 172.

d) Informed consent:

The plaintiffs argued that the majority of the Band did not consent and that, in any event, if consent was given it was not an informed consent: the matter having been put to the Indians too suddenly, they did not have time to consider the matter and really know what the implications of the surrender were. It is further alleged that not only was there a failure to disclose important matters but improper advice was actually given and it was given because the Crown actually had an interest in obtaining the surrender and that that interest was the governing reason for the action. In support of the above arguments and what might be described as the superior position of the Crown in relation to the Indians, the plaintiffs relied greatly on the doctrine of undue influence as defined in such cases as *Brusewitz v. Brown*, [1923] N.Z. L.R. 1106 (S.C.); *Tufton v. Sporni*, [1952] 2 *The Times* L.R. 516 (E.C.A.); *Allcard v. Skinner* (1887), [1886-90] All E.R. Rep. 90 (E.C.A.); *Lloyds Bank Ltd v Bundy*, [1974] 3 All ER 757 (E.C.A.) and other cases. In the *Brusewitz* case (*supra*) we find the following statement at page 1109:

Where there is not merely an absence or inadequacy of consideration for the transfer of property, but there also exists between the grantor and the grantee some special relation of confidence, control, domination, influence, or other form of superiority, such as to render reasonable a presumption that the transaction was procured by the grantee through some unconscientious use of his power over the grantor, the law will make that presumption, and will place on the grantee the burden of supporting the transaction by which he so benefits, and of rebutting the presumption of its invalidity.

In the *Lloyds Bank* case (*supra*) Sir Eric Sachs states at page 768 of the report:

crédit de la manière habituelle». Bien que l'acte de cession soit formulé comme si la propriété absolue était cédée, il est évident que cette cession ne pouvait s'opérer puisque la Couronne possédait le titre de propriété sur les terres avant la cession. Seuls les droits que les demandeurs détenaient sur la R.I. 172 pouvaient être légalement cédés.

b d) Consentement éclairé

Les demandeurs prétendent que la majorité des membres de la bande n'a pas donné son consentement et que, de toute façon, s'il y a eu consentement, celui-ci n'était pas un consentement éclairé: la question aurait été posée aux Indiens de façon trop soudaine, ils n'auraient pas eu le temps de peser le pour et le contre et de véritablement prendre connaissance des incidences de la cession. De plus, les demandeurs soutiennent que non seulement des faits importants ont été passés sous silence, mais que des conseils intéressés ont été donnés aux Indiens parce qu'il était réellement dans l'intérêt de la Couronne d'obtenir la cession et qu'il fallait y voir la raison primordiale des mesures prises. Pour étayer cette argumentation et ce qu'on pourrait appeler la position supérieure de la Couronne par rapport aux Indiens, les demandeurs se sont fortement appuyés sur la doctrine de l'abus d'influence telle qu'elle est définie notamment dans les décisions *Brusewitz v. Brown*, [1923] N.Z. L.R. 1106 (S.C.); *Tufton v. Sporni*, [1952] 2 *The Times* L.R. 516 (E.C.A.); *Allcard v. Skinner* (1887), [1886-1890] All E.R. Rep. 90 (E.C.A.); *Lloyds Bank Ltd v Bundy*, [1974] 3 All ER 757 (E.C.A.) et dans d'autres jugements. Voici un extrait de l'affaire *Brusewitz*, précitée, à la page 1109:

[TRANSDUCTION] Lorsqu'il n'y a pas simplement absence ou insuffisance de la contrepartie pour la cession des biens mais que le concédant et le concessionnaire sont également liés par quelque rapport spécial de confiance, de subordination, de domination, de pouvoir ou tout autre rapport de supériorité qui rend raisonnable l'hypothèse selon laquelle la transaction a été obtenue par le concessionnaire grâce à l'exercice peu scrupuleux de son pouvoir sur le concédant, la loi établit une présomption et fait peser sur le concessionnaire le fardeau d'étayer la transaction dont il profite et de réfuter la présomption voulant que la transaction ne soit pas valide.

Dans l'affaire *Lloyds Bank*, précitée, sir Eric Sachs déclare à la page 768 du recueil de jurisprudence:

As regards the second class of undue influence, however, that word in the context means no more than that once the existence of a special relationship has been established, then any possible use of the relevant influence is, irrespective of the intentions of the persons possessing it, regarded in relation to the transaction under consideration as an abuse—unless and until the duty of fiduciary care has been shown to be fulfilled or the transaction is shown to be truly for the benefit of the person influenced. This approach is a matter of public policy.

I fully accept as authoritative the statements of law expressed in those cases when considered in the light of the factual situations to which they relate. Based on those principles, counsel for the plaintiffs however, in their oral argument, went on to state that, in view of the relationship existing between the parties, it was now incumbent upon the defendant to prove positively that some 16 matters enumerated at pages 29, 30 and 31 of their written argument (which I have not reproduced here) had been explained to the Band before informed consent could be found to have existed and that, failing the discharge of this burden, the plaintiffs would succeed. In the first place, I totally reject the argument that all these matters had to be explained. Many of them are redundant or irrelevant, others would obviously be known to the Indians, and others would be required only if they were not only dependant persons but actually *non compos mentis*, in which case no consent could validly be obtained. In the second place, it would be manifestly ludicrous to require now, 40 years after the event, when all of the persons who might have given the advice are either deceased or too senile to testify, that the defendant establish positively that advice was given on all these matters. It would have to have been communicated orally in any event as none of the Indians could read or write. Finally, even where there exists a special relationship between the parties, when an agreement in writing is being challenged and especially an indenture under seal such as the present one, it seems that there would have to be something more than a bare allegation of improper conduct before there is any duty on the person in the dominant position to adduce evidence to establish that the special duty was properly fulfilled.

[TRADUCTION] En ce qui concerne la deuxième catégorie d'abus d'influence cependant, ce mot pris dans le contexte signifie simplement que lorsque l'existence d'un rapport spécial est établie, tout exercice de l'influence en question est considéré comme un abus relativement à la transaction à l'étude, peu importe les intentions des personnes détenant ce pouvoir, jusqu'à ce qu'il soit démontré que les obligations du fiduciaire ont été remplies ou que la transaction profite véritablement à la personne sur laquelle s'est exercée l'influence. Cette solution est d'intérêt public.

b

J'accepte pleinement l'autorité des énoncés de droit exprimés dans ces affaires dans la perspective des situations de fait auxquelles ils se rapportent. Invoquant ces principes, les avocats des demandeurs ont cependant soutenu, dans leur plaidoirie, qu'en raison du rapport qui unissait les parties, il incombait maintenant à la défenderesse d'établir par une preuve positive que les seize points énumérés aux pages 29, 30 et 31 de son argumentation écrite (que je n'ai pas reproduite ici) ont été expliqués aux membres de la bande avant qu'on puisse conclure à l'existence d'un consentement éclairé, faute de quoi les demandeurs auraient gain de cause. En premier lieu, je rejette absolument l'argument voulant que tous ces points doivent avoir été expliqués aux Indiens. Bon nombre sont redondants ou ne sont pas pertinents. D'autres auraient évidemment été connus des Indiens. Enfin, l'explication de certains autres points n'aurait été requise que s'il s'agissait non pas seulement de personnes à charge mais de véritables aliénés, auquel cas aucun consentement valable n'aurait pu être obtenu. En second lieu, il serait manifestement ridicule d'exiger maintenant, quarante ans plus tard, alors que toutes les personnes qui auraient pu donner des conseils sont soit décédées, soit trop séniles pour témoigner, que la défenderesse démontre par une preuve positive que des avis ont été émis sur tous ces points. De toute façon, il aurait fallu que les renseignements soient communiqués oralement aux Indiens, car ceux-ci ne pouvaient ni lire ni écrire. Enfin, même s'il existe un rapport spécial entre les parties, lorsqu'un accord écrit est contesté, en particulier un acte scellé comme en l'espèce, il semble qu'il faut plus qu'une simple allégation de conduite irrégulière pour que la personne placée en situation dominante soit tenue de produire des preuves pour démontrer que les obligations spéciales ont été régulièrement remplies.

In the case at bar, there was, however, at the outset, sufficient evidence adduced by the plaintiffs to put in issue from a factual standpoint the question of whether informed consent was in fact given. This casts upon the defendant the burden of establishing on a balance of probabilities that there was no failure in the performance of any of the duties entailed by the existence of the special relationship. The duties to which that burden will extend will depend, among other things, on the nature of the relationship on the subject-matter in issue, and on the capability of the subordinate party to fully understand and consent to the issue.

* * * *

Review of evidence on consent to the 1945 surrender deleted. See findings of fact infra.

* * * *

To summarize, with regard to the question of informed consent to the 1945 surrender, I make the following findings of fact:

1. That the plaintiffs had known for some considerable time that an absolute surrender of I.R. 172 was being contemplated;
2. That they had discussed the matter previously on at least three formal meetings where representatives of the Department were present;
3. That, contrary to what has been claimed by the plaintiffs, it would be nothing short of ludicrous to conclude that the Indians would not also have discussed it between themselves on many occasions in an informal manner, in their various family and hunting groups;
4. That, at the surrender meeting itself, the matter was fully discussed both between the Indians and with the departmental representatives previous to the signing of the actual surrender;
5. That neither Mr. Grew, Mr. Galibois nor Mr. Peterson appeared to have attempted to influence the plaintiffs either previously or during the surrender meeting but that, on the contrary, the matter appears to have been dealt with most conscientiously by the departmental representatives concerned;

En l'espèce toutefois, dès le départ, les demandeurs ont présenté des preuves suffisantes pour mettre en doute l'existence du consentement éclairé. Il incombe donc à la défenderesse de prouver, selon la prépondérance des probabilités, qu'elle n'a pas manqué aux obligations découlant du rapport spécial. L'étendue des obligations visées par ce fardeau dépend, entre autres choses, de la nature du rapport, de l'objet du litige et de l'aptitude de la partie subordonnée à comprendre pleinement de quoi il s'agit et à donner son consentement.

* * * *

La revue de la preuve relative au consentement de la cession de 1945 a été omise. Voir les conclusions de fait ci-dessous.

* * * *

Bref, en ce qui concerne le consentement éclairé, j'émetts les conclusions de fait suivantes:

1. Les demandeurs savaient depuis longtemps qu'une cession absolue de la R.I. 172 était envisagée;
2. Ils en avaient discuté auparavant au moins à trois reprises à l'occasion d'assemblées officielles tenues en présence de représentants du Ministère;
3. Contrairement à ce que prétendent les demandeurs, il serait absurde de conclure que les Indiens n'auraient pas débattu la question entre eux à de nombreuses occasions et de façon informelle au sein des groupes familiaux et des groupes de chasse;
4. À l'assemblée de la cession elle-même, la question avait fait l'objet d'un débat complet. Les Indiens en avaient discuté entre eux et avec les représentants du Ministère avant la signature de l'acte de cession;
5. M. Grew, M. Galibois ni M. Peterson n'ont semblé avoir essayé d'influencer les demandeurs soit avant, soit pendant l'assemblée de la cession. Au contraire, la question semble avoir été résolue de façon très consciencieuse par les représentants du Ministère concernés;

6. That Mr. Grew fully explained to the Indians the consequences of a surrender;

7. That, although they would not have understood and probably would have been incapable of understanding the precise nature of the legal interest they were surrendering, they did in fact understand that by the surrender they were giving up forever all rights to I.R. 172, in return for the money which would be deposited to their credit once the reserve was sold and with their being furnished with alternate sites near their trapping lines to be purchased from the proceeds;

8. That the said alternate sites had already been chosen by them, after mature consideration.

I therefore conclude that not only the majority of but all of the male members of the Band present at the surrender meeting gave their free and informed consent to the surrender and that each, in turn, orally signified his consent in accordance with the voters list attached to the surrender document. There is also evidence which I accept to the effect that the voters list included all of the Indians of the Fort Saint John Band who were entitled to vote and no others.

e) Other objections to 1945 surrender:

Several further arguments regarding the validity of the surrender were raised by counsel for the plaintiffs. They all relate to section 51 of the *Indian Act*, R.S.C. 1927, c. 98, in force at the time. I am reproducing again for the sake of convenience the relevant portions of section 51:

51. Except as in this Part otherwise provided, no release or surrender of a reserve, or a portion of a reserve, held for the use of the Indians of any band, or of any individual Indian, shall be valid or binding, unless the release or surrender shall be assented to by a majority of the male members of the band of the full age of twenty-one years, at a meeting or council thereof summoned for that purpose, according to the rules of the band, and held in the presence of the Superintendent General, or of any officer duly authorized to attend such council, by the Governor in Council or by the Superintendent General.

3. The fact that such release or surrender has been assented to by the band at such council or meeting shall be certified on oath by the Superintendent General, or by the officer authorized by him to attend such council or meeting, and by some of the chiefs or principal men present thereat and entitled to vote, before any person having authority to take affidavits and having jurisdiction within the place where the oath is administered.

6. M. Grew avait expliqué aux Indiens toutes les conséquences d'une cession;

7. Même s'ils n'ont pas saisi exactement la nature du droit, en *common law*, qu'ils cédaient, ils en étaient probablement incapables, ils ont bel et bien compris, dans les faits, que par la cession ils renonçaient pour toujours à tous leurs droits sur la R.I. 172 en échange de l'argent qui serait versé à leur crédit après la vente de la réserve, et d'autres terrains situés près de leurs sentiers de piégeage qui seraient achetés avec le produit de la vente;

8. Lesdits terrains avaient déjà été choisis par les Indiens, après mûre réflexion.

J'en conclus que tous les membres de sexe masculin de la bande qui assistaient à l'assemblée de cession, et non pas seulement la majorité d'entre eux, ont donné librement leur consentement éclairé au projet de cession. À tour de rôle, ils ont exprimé oralement leur accord suivant la liste des votants jointe à l'acte de cession. Des éléments de preuve, que j'accepte, montrent que seul figurait sur la liste des votants le nom des Indiens de la bande de Fort Saint John qui avaient le droit de voter.

e) Autres objections à la cession de 1945

Plusieurs autres arguments relatifs à la validité de la cession ont été présentés par les avocats des demandeurs. Ils se rapportent tous à l'article 51 de la *Loi des Indiens*, S.R.C. 1927, chap. 98, en vigueur à l'époque. Pour plus de commodité, je reproduis à nouveau les dispositions pertinentes de l'article 51:

51. Sauf dispositions contraires de la présente Partie, nulle cession ou rétrocession d'une réserve ou d'une partie de réserve à l'usage d'une bande, ou d'un Indien en particulier, n'est valide ni obligatoire, à moins que la cession ou rétrocession ne soit ratifiée par la majorité des hommes de la bande qui ont vingt et un ans révolus, et ce à une assemblée ou à un conseil de la bande convoqué pour en délibérer conformément aux usages de la bande, et tenu en présence du surintendant général, ou d'un fonctionnaire régulièrement autorisé par le gouverneur en son conseil ou par le surintendant général à y assister.

3. Le fait que la cession ou rétrocession a été consentie par la bande, à ce conseil ou à cette assemblée, doit être attesté sous serment par le surintendant général ou par le fonctionnaire qu'il a autorisé à assister à ce conseil ou à cette assemblée, et par l'un des chefs ou des anciens qui y a assisté et y a droit de vote, devant toute personne autorisée à faire prêter serment et ayant juridiction dans l'endroit où le serment est prêté.

4. When such assent has been so certified, as aforesaid, such release or surrender shall be submitted to the Governor in Council for acceptance or refusal. R.S., c. 81, s. 49; 1918, c. 26, s. 2.

The objections raised were the following:

1. The meeting was not summoned in accordance with subsection 51(1) of the Act.
2. The meeting was not held before a duly authorized officer in accordance with that section.
3. The required certificate under subsection 51(3) was not obtained and furnished.

With regard to the first objection, there is no evidence whatsoever that the Fort Saint John Band had any rules regarding the summoning of its meetings or councils. The Indians were informed in plenty of time of the meeting. Witnesses of the plaintiffs also admit that they were convened to the meeting although some claim that they were unaware of the purpose. There were four members of the Band absent but there is no evidence that they were not aware of the meeting or that they ever complained of insufficient notice. In any event the onus on this issue is clearly on the plaintiffs and it has not been met.

On the question of whether Mr. Grew was duly authorized pursuant to subsection 51(1) to hold a surrender meeting it is of some importance that he was directed to do so by Mr. Hoey who at the time was the Director of Indian Affairs Branch of the Department and possessed all the powers of the Deputy Minister pursuant to subsection 9(2) of *The Department of Mines and Resources Act* [S.C. 1936, c. 33] which read as follows:

9. ...

(2) The chief officer in charge of the branch of the Department in which is included Indian Affairs may, under the Deputy Minister, perform and exercise all the duties, powers and functions with respect to Indian Affairs which are or may be vested in the Deputy Superintendent General of Indian Affairs by any Act of the Parliament of Canada or by any order or regulation made under the authority thereof.

Paragraph 31(1) of the *Interpretation Act* [R.S.C. 1927, c.1] in effect in 1927 provides that a

4. Après que ce consentement a été ainsi attesté, comme susdit, la cession ou rétrocession est soumise au gouverneur en son conseil, pour qu'il l'accepte ou la refuse. S.R., c. 81, art. 49; 1918, c. 26, art. 2.

a Les objections soulevées sont les suivantes:

1. L'assemblée n'a pas été convoquée conformément au paragraphe 51(1) de la Loi.
2. L'assemblée n'a pas été tenue devant un fonctionnaire régulièrement autorisé conformément à cet article.
3. L'attestation requise en application du paragraphe 51(3) n'a pas été obtenue ni fournie.

c Quant à la première objection, aucune preuve n'a été produite pour établir que la bande de Fort Saint John avait adopté un règlement concernant la convocation de ses réunions ou conseils. Les d Indiens ont été informés de l'assemblée bien assez tôt. Les témoins des demandeurs ont également reconnu qu'ils avaient été invités à l'assemblée bien que certains prétendent ne pas avoir été mis au courant de l'objet de la réunion. Quatre des e membres de la bande étaient absents, mais on n'a pas prouvé qu'ils ne savaient pas qu'une assemblée serait tenue ni qu'ils se soient jamais plaints de l'insuffisance du préavis. De toute façon, le fardeau de la preuve sur ce point pèse clairement sur f les demandeurs qui n'ont pas réussi à s'en acquitter.

En ce qui concerne la question de savoir si M. Grew a été régulièrement autorisé à tenir l'assemblée de la cession en application du paragraphe 51(1), il est assez important de constater que ses instructions lui venaient de M. Hoey qui à l'époque était à la tête de la Direction des affaires indiennes du Ministère et était investi de tous les pouvoirs du sous-ministre en vertu du paragraphe 9(2) de la *Loi du ministère des Mines et des ressources* [S.C. 1936, chap. 33] qui est formulé comme suit:

9. ...

i (2) Le fonctionnaire en chef de la division du ministère dans laquelle sont comprises les affaires indiennes peut, sous l'autorité du sous-ministre, accomplir et exercer les devoirs, pouvoirs et fonctions concernant les affaires indiennes qui sont ou peuvent être attribuées au surintendant général adjoint des affaires indiennes pour toute loi du Parlement du Canada ou par tout règlement ou ordonnance établi sous son empire.

j L'alinéa 31(1) de la *Loi d'interprétation* [S.R.C. 1927, chap. 1] en vigueur en 1927 prévoit que le

Deputy Minister may exercise a Minister's power in administering the Department. That provision reads as follows:

31. ...

(1) words directing or empowering a minister of the Crown to do any act or thing, or otherwise applying to him by his name of office, include a minister acting for, or, if the office is vacant, in the place of such minister, under the authority of an order in council, and also his successors in such office, and his or their lawful deputy;

There is nothing in section 51 of the *Indian Act* to indicate that the Parliament intended that the Superintendent General rather than his Deputy was to personally authorize any individual to attend the surrender meeting. Paragraph 31(1) of the *Interpretation Act* would therefore apply. Finally, there is nothing to say that the Superintendent General could not authorize the person orally or instruct Mr. Hoey to direct Mr. Grew to attend the meeting. There is no evidence that this was not in fact what happened. The onus of establishing that Mr. Grew was not authorized rests with the plaintiffs and that onus is not discharged by simply establishing that Mr. Grew was directed by Mr. Hoey to attend the meeting and to take the surrender since, as previously stated, this might well have been done with the full authority, approval and direction of the Superintendent General.

On the question of whether non compliance with all of the provisions of subsection 51(3) of the Act would invalidate the surrender, a legal issue arises as to whether those provisions are mandatory or merely directory. In the latter case non-compliance would not render void the surrender itself nor its subsequent acceptance by the Governor in Council.

In considering this issue the actual wording of the other provisions of section 51 are of some importance. Subsection (1) provides that "no surrender ... shall be valid or binding unless assented to". This is clearly a substantial or mandatory provision. Subsection (2) defines who is entitled to vote at a meeting and subsection (4) provides that the Governor in Council may either accept or refuse the surrender. These provisions are also clearly substantial or mandatory. Subsection (3), however, provides the means by which the fact

sous-ministre peut exercer les pouvoirs du ministre pour gérer le Ministère. Cette disposition est formulée comme suit:

31. ...

(1) Les mots par lesquels ordre ou pouvoir est donné à un ministre de la Couronne de faire un acte ou une chose, ou qui de toute autre manière lui sont applicables à raison de son titre officiel, impliquent tout ministre agissant pour lui, ou, s'il y a vacance, tenant sa place par intérim en vertu d'un arrêté en conseil, et impliquent aussi ses successeurs dans sa charge et son substitut ou leur substitut légalement nommé;

Aucune disposition de l'article 51 de la *Loi des Indiens* n'indique que le Parlement voulait que le surintendant général, plutôt que son substitut, autorise personnellement un individu à assister à l'assemblée de la cession. L'alinéa 31(1) de la *Loi d'interprétation* s'applique donc. Enfin, rien ne dit que le surintendant général ne pouvait autoriser oralement la personne ni donner des instructions à M. Hoey pour qu'il ordonne à M. Grew d'assister à l'assemblée. Aucune preuve ne montre que dans les faits il n'en a pas été ainsi. Il incombe aux demandeurs de prouver que M. Grew n'a pas été autorisé, et ils ne peuvent s'acquitter de ce fardeau en démontrant simplement que M. Hoey a donné pour instructions à M. Grew d'assister à l'assemblée et de recevoir la cession puisque, répétons-le, ces directives peuvent fort bien avoir été données avec l'autorisation du surintendant général et sur son ordre.

Lorsqu'il s'agit de savoir si le fait de ne pas observer toutes les dispositions du paragraphe 51(3) de la Loi pourrait rendre nulle la cession, une question de droit se pose: ces dispositions sont-elles impératives ou simplement supplétives? Dans ce dernier cas, l'inobservation n'invaliderait pas la cession elle-même ni son acceptation subséquente par le gouverneur en conseil.

Pour trancher cette question, il faut consulter le libellé même des autres dispositions de l'article 51, qui est assez important. Le paragraphe (1) dispose que «nulle cession ... n'est valide ni obligatoire, à moins que la cession ... ne soit ratifiée». Il s'agit clairement d'une disposition impérative ou substantielle. Le paragraphe (2) détermine qui a le droit de voter à l'assemblée, et le paragraphe (4) porte que le gouverneur en conseil peut soit accepter, soit refuser la cession. Ces dispositions sont également clairement impératives ou substantielles.

that the surrender has been properly taken and executed is to be evidenced or established.

The leading decision in this area of the law is the Privy Council case of *Montreal Street Railway Company v. Normandin*, [1917] A. C. 170. This case involved a claim that a jury verdict should be set aside due to the failure of the sheriff to update voters' lists to empanel juries. In it the Privy Council laid down the general principles to guide courts on this issue. At pages 174 and 175 they stated as follows:

The statutes contain no enactment as to what is to be the consequence of non-observance of these provisions. It is contended for the appellants that the consequence is that the trial was *coram non iudice* and must be treated as a nullity.

It is necessary to consider the principles which have been adopted in construing statutes of this character, and the authorities so far as there are any on the particular question arising there. The question whether provisions in a statute are directory or imperative has very frequently arisen in this country, but it has been said that no general rule can be laid down, and that in every case the object of the statute must be looked at. The cases on the subject will be found collected in Maxwell on Statutes, 5th ed. p. 596 and following pages. When the provisions of a statute relate to the performance of a public duty and the case is such that to hold null and void acts done in neglect of this duty would work serious general inconvenience, or injustice to persons who have no control over those entrusted with the duty, and at the same time would not promote the main object of the Legislature, it has been the practice to hold such provisions to be directory only, the neglect of them, though punishable, not affecting the validity of the acts done.

The *Montreal Street Railway* case was followed in this Court in *Melville (City of) v. Attorney General of Canada*, [1982] 2 F.C. 3 (T.D.), by Mr. Justice Collier, whose decision was upheld by the Federal Court of Appeal in the parallel case of *Jasper Park Chamber of Commerce v. Governor General in Council*, [1983] 2 F.C. 98.

The *City of Melville* case involved the allegation that the failure to register an Order in Council within the prescribed time limits, relating to the discontinuance of rail service, was fatal. Mr. Justice Collier dealt with this claim at page 14 of the report, applying the principles set out in the *Montreal Street Railway* case. The Federal Court

les. Cependant, le paragraphe (3) prévoit les moyens par lesquels sera prouvé le fait que la cession a été reçue de façon régulière et que toutes les formalités requises ont été remplies.

^a La décision qui fait autorité dans ce domaine du droit est l'affaire *Montreal Street Railway Company v. Normandin*, [1917] A. C. 170, entendue par le Conseil privé. Dans cette cause, on prétendait que le verdict du jury devait être rejeté parce ^b que le shérif n'avait pas mis à jour la liste des votants pour former le jury. Le Conseil privé a énoncé les principes généraux qui guident les tribunaux sur cette question. Voici un extrait de ^c l'avis du Conseil privé (aux pages 174 et 175):

[TRADUCTION] Les lois sont silencieuses sur les conséquences de l'inobservance de ces dispositions. On soutient au nom des appelantes que cela a pour conséquence que l'instruction fut *coram non iudice* et qu'elle doit être considérée comme une nullité.

^d Il est nécessaire d'examiner les principes adoptés pour l'interprétation des lois de ce genre et la jurisprudence, dans la mesure où il y en a, sur le point particulier soulevé ici. On s'est souvent demandé si les dispositions d'une loi étaient supplétives ou impératives dans ce pays; on a répondu qu'aucune règle ^e générale ne pouvait être énoncée et qu'il fallait considérer chaque cas d'espèce que visait la loi. On trouvera la jurisprudence sur le sujet rassemblée dans *Maxwell on Statutes*, 5^e éd., aux p. 596 et suivantes. Lorsque les dispositions d'une loi concernent l'exercice d'une fonction publique et que juger nuls et non avenus des actes exécutés en ignorance de cette obligation causerait des inconvénients généralisés sérieux, ou encore ^f une injustice à des individus n'ayant aucun contrôle sur les responsables de cette fonction, tout en ne favorisant pas l'objet principal recherché par le législateur, il a été d'usage de statuer que ces dispositions n'étaient que supplétives et que cette ignorance, quoique condamnable, n'invaliderait pas ces actes.

^g L'arrêt *Montreal Street Railway* a été suivi par la Cour dans l'affaire *Melville (City of) c. Procureur général du Canada*, [1982] 2 C.F. 3 (1^{re} inst.). Cette dernière décision rendue par le juge ^h Collier a été confirmée par la Cour d'appel fédérale dans l'affaire *Chambre de commerce de Jasper Park c. Gouverneur général en conseil*, [1983] 2 C.F. 98, qui portait sur une action parallèle.

ⁱ Dans la décision *City of Melville*, les demandeurs soutenaient que le défaut d'enregistrer dans les délais prescrits un décret concernant la suppression du service ferroviaire le rendait invalide. ^j Le juge Collier a battu en brèche cet argument à la page 14, en appliquant les principes énoncés dans l'affaire *Montreal Street Railway*. La Cour

upheld his finding at pages 118 and 119 of the *Jasper Park* case (*supra*).

As stated in the *Montreal Street Railway* case, the object of the statute must be considered. It seems clear that section 51 has been enacted to ensure that the assent of the majority of adult members of the Band has been properly obtained before a surrender can be accepted by the Governor in Council and become valid and effective. The object of that section is to provide the means by which the general restrictions imposed on the surrender sale or alienation of Indian reserve lands by section 50 of the Act can be overcome. In other words, the sale or lease of Indian reserve lands must be made pursuant to the wishes of the Indian Band and must, of course, also be approved by the Governor in Council. The last requirement would presumably involve the Governor in Council being satisfied that the surrender has been properly approved, that it is for the general welfare of the Indians and that they are not being unfairly deprived of their lands.

Examination of the object of the statute reveals that a decision which would render the surrender null and void solely because of non-compliance with the formalities of subsection 51(3) would certainly not promote the main object of the legislation where all substantial requirements have been fulfilled; it might well cause serious inconveniences or injustice to persons having no control over those entrusted with the duty of furnishing evidence of compliance in proper form. In the subsection, unlike subsection (1), where it is provided that unless it is complied with no surrender shall be valid or binding, there is no provision for any consequences of non-observance. I therefore conclude that the provisions of subsection 51(3) are merely directory and not mandatory.

It is also of some importance that the subsection does not state specifically that an affidavit must be submitted attesting to those facts but merely provides that:

51. ...

3. The fact that such release or surrender has been assented to by the band ... shall be certified on oath ... before any

fédérale a confirmé ses conclusions aux pages 118 et 119 de la décision *Jasper Park*, précitée.

Comme il a été précisé dans l'arrêt *Montreal Street Railway*, il faut tenir compte de l'objet de la Loi. Il semble clair que l'article 51 a été édicté pour garantir l'obtention régulière de l'assentiment de la majorité des membres adultes de la bande avant que la cession ne puisse être acceptée par le gouverneur en conseil et ne prenne effet. Cette disposition vise à fournir des moyens de surmonter les restrictions générales apportées par l'article 50 de la Loi à la cession, la vente ou l'aliénation des terres d'une réserve indienne. En d'autres termes, la vente ou la location des terres d'une réserve indienne doit être conclue conformément aux vœux de la bande, en plus d'être bien sûr approuvée par le gouverneur en conseil. Cette dernière exigence suppose vraisemblablement que le gouverneur en conseil est convaincu que la cession a été approuvée de façon régulière, qu'elle a pour objectif le bien-être général des Indiens et que ceux-ci ne sont pas injustement privés de leurs terres.

L'examen de l'objet de la Loi montre qu'une décision invalidant la cession pour la seule raison que les formalités prescrites par le paragraphe 51(3) n'ont pas été respectées ne favoriserait certainement pas la réalisation du principal objectif de la législation lorsque toutes les exigences essentielles ont été remplies. Il se pourrait fort bien que des personnes n'ayant aucune autorité sur ceux qui sont chargés de prouver l'observation des formalités prescrites subissent de ce fait de graves inconvénients ou fassent l'objet d'une injustice. Contrairement au paragraphe (1) qui porte qu'en cas d'inobservation de ces dispositions, la cession n'est ni valide ni obligatoire, le paragraphe 51(3) n'envisage pas les conséquences du non-respect de ses exigences. Je conclus donc que les dispositions du paragraphe 51(3) sont simplement supplétives, et non impératives.

Il est également assez révélateur que le paragraphe ne dispose pas expressément qu'un affidavit doit être soumis pour attester ces faits mais qu'il porte simplement ce qui suit:

51. ...

3. Le fait que la cession ou rétrocession a été consentie par la bande ... doit être attestée sous serment ... devant toute

person having authority to take affidavits and having jurisdiction

This was in fact done and J. E. Young, whose signature is admitted and whose authority as a justice of the peace in and for the Province of British Columbia is uncontested and which I must accept (in the absence of any evidence to the contrary) has stated that the deponents were sworn before him and that they testified as mentioned in the document. The failure to actually require the deponents to sign or affix their mark to the document can well be understood when one considers the lack of legal training or knowledge of some persons who are granted commissions as justices of the peace in remote areas of Canada.

Finally, the Department, in addition to this document, had before it for submission to the Governor General in Council if required, the surrender document itself, the attached voters list and Mr. Grew's letters of the August 8, 1945 (Exhibit 283) and September 24, 1945 (Exhibit 294). There was therefore ample evidence that the substantial requirements of section 51 had been complied with. In addition, I have found as a fact that the surrender was fully assented to.

To summarize, I find that subsection 51(3) was in fact sufficiently complied with and, if not, the plaintiffs' objection on this ground must nevertheless fail as subsection (3) is merely directory and not mandatory.

1948 TRANSFER TO THE DIRECTOR, THE VETERANS' LAND ACT

a) Effect of the transfer

Section 54 of the *Indian Act*, 1927 provides that all reserve lands "shall be managed, leased and sold as the Governor in Council directs, subject to the conditions of surrender and the provisions of this Part." The special provisions in the Act which apply to the facts of this case are sections 50 and 51. I have already dealt with them as well as the terms of the surrender. The Department obviously had the right to alienate the lands by absolute sale. There were no special directions given by the Governor in Council and the letters patent (Exhib-

personne autorisée à faire prêter serment et ayant juridiction . . .

C'est ce qui a été fait. J. E. Young, dont la signature est admise et dont la compétence à titre de juge de paix pour la province de la Colombie-Britannique n'est pas contestée et que je dois accepter (en l'absence de toute preuve contraire) a déclaré que les déposants avaient prêté serment devant lui et qu'ils avaient rendu témoignage tel qu'il est mentionné dans le document. Le fait de ne pas avoir exigé des déposants qu'ils signent le document ou qu'ils y apposent leur marque se comprend bien si l'on tient compte de l'absence de formation ou de connaissance juridique de certaines personnes nommées juges de paix dans les régions éloignées du Canada.

Enfin outre ce document, le Ministère avait en main l'acte de cession lui-même, la liste des votants y annexée et les lettres de M. Grew datées du 8 août 1945 (pièce 283) et du 24 septembre 1945 (pièce 294) qu'il pouvait, au besoin, soumettre au gouverneur général en conseil. Il y avait donc de nombreuses preuves de l'observation des exigences essentielles de l'article 51. De plus, j'en viens à la conclusion que la cession a été pleinement sanctionnée.

Pour résumer, l'objection soulevée par les demandeurs doit échouer, si ce n'est parce que je conclus que les formalités du paragraphe 51(3) ont été suffisamment respectées, du moins parce que cette disposition est simplement supplétive, et non impérative.

TRANSFERT DES TERRES AU DIRECTEUR DES TERRES DESTINÉES AUX ANCIENS COMBATTANTS EFFECTUÉ EN 1948

a) Effet du transfert

L'article 54 de la *Loi des Indiens* de 1927 porte que toutes les terres qui sont des réserves «sont administrées, affermées et vendues selon que le gouverneur en son conseil le prescrit, sauf les conditions de la rétrocession et les dispositions de la présente Partie.» Les dispositions spéciales de la Loi applicables aux faits en l'espèce sont les articles 50 et 51. J'ai déjà traité de ces dispositions de même que des conditions de la cession. À l'évidence, le Ministère avait le droit d'aliéner les terres par vente définitive. Le gouverneur en con-

it 506) transferring the lands from the Department of Indian Affairs to the Director contain no reservation whatsoever except for the public road allowance reserved through the parcel. The grant is to the Director, his heirs and successors forever and is absolute in every way.

The plaintiffs claim that, since the document is silent as to minerals, it does not have the effect of transferring them. This argument cannot be sustained at law: unless an interest is specifically withheld, an absolute conveyance of land includes all interests except precious metals (*Attorney-General of British Columbia v. Attorney-General of Canada* (1889), 14 App. Cas. 295 (P.C.), at pages 302, 303 and 306).

b) Whether the Department of Indian Affairs had the duty to retain the minerals

The plaintiffs also claim that the Department of Indian Affairs had a fiduciary duty to retain the minerals for the plaintiff Band in March 1948 when the letters patent were granted to the Director. They argue that the Department should have noticed the error subsequently and should have required that the letters patent be corrected.

I have already made several findings affecting this issue in dealing with the value and foreseeability of potential mineral rights under I.R. 172 (refer pages 48-49 *supra*) and, in the concluding paragraph, I held that the defendant had sufficiently established that, in 1948, no fiduciary could reasonably have anticipated or foreseen that there would be any value to those rights.

The evidence indicated that no importance was attached to minerals either at the time of the transfer to the Director nor until many, if not all of the veterans, had at least taken possession pursuant to their respective agreements to purchase and, as a result, no mention whatsoever was made of mineral rights in those documents. A duty on the Department of Indian Affairs to retain the minerals has not been established.

seil n'avait émis aucune directive spéciale, et les lettres patentes (pièce 506) transférant les terres du ministère des Affaires indiennes au Directeur ne comportaient aucune réserve, sinon pour l'emprise d'un chemin public sur la parcelle de terre. La cession, absolue en tous points, est consentie au Directeur, à ses héritiers et successeurs, définitivement.

Les demandeurs prétendent que, puisque le document ne mentionne pas les droits miniers, il n'a pas pour effet de les transférer. Cet argument ne peut être soutenu en droit. À moins qu'un droit ne soit expressément retenu, une cession absolue des terres comprend tous les droits sauf ceux afférents aux métaux précieux (*Attorney-General of British Columbia v. Attorney-General of Canada* (1889), 14 App. Cas. 295 (P.C.), aux pages 302, 303 et 306).

b) Le ministère des Affaires indiennes avait-il l'obligation de conserver les droits miniers?

Les demandeurs prétendent également que le ministère des Affaires indiennes était tenu, en vertu de ses obligations de fiduciaire, de retenir les droits miniers pour la bande demanderesse en mars 1948 lorsque les lettres patentes ont été accordées au Directeur. Ils soutiennent que le Ministère aurait dû voir l'erreur par la suite et qu'il aurait dû exiger que les lettres patentes soient corrigées.

J'ai déjà tiré plusieurs conclusions sur cette question en traitant de la valeur et de la prévisibilité d'éventuels droits miniers afférents à la R.I. 172 (voir les pages 48 et 49 ci-dessus). Dans le dernier paragraphe, j'ai décidé que la défenderesse avait suffisamment démontré qu'en 1948, aucun fiduciaire n'aurait raisonnablement pu prévoir que ces droits auraient quelque valeur.

D'après la preuve, on n'a attaché aucune importance aux minéraux au moment du transfert consenti au Directeur ni avant que bon nombre d'anciens combattants, sinon la totalité d'entre eux, ne prennent au moins possession des terres aux termes de leur promesse de vente respective et, par conséquent, aucune mention des droits miniers n'est faite dans ces documents. Il n'a pas été établi que le ministère des Affaires indiennes avait l'obligation de retenir les droits miniers.

c) Breach of duty of defendant upon transfer to the Director

The plaintiffs also argue that, at the time of the transfer to the Director in 1948, the defendant acted fraudulently and also in breach of the fiduciary duties which it owed the Band at the time. With regard to the allegations of fraud, I find that they have failed completely to establish that the defendant had, in any way, through its agents or servants, been guilty of fraud towards them at any times relevant to this action. The allegations of breaches of fiduciary duty at the time of the transfer to the Director, however, have much greater substance. Mr. Justice Dickson (as he then was) stated in the *Guerin* case (*supra*) that upon unconditional surrender, the Indians' right in the land disappeared but that there subsisted however an obligation of the Crown to the Indians which was trust-like in that "the Crown must hold the surrendered land for the use and benefit of the surrendering Band". (Refer *Guerin* case (*supra*) at page 387.) Regardless of whether the opinion of the majority expressed by Chief Justice Dickson in the *Guerin* case, that no true trust whether constructive or otherwise is created, or whether one adopts the view of Wilson J. concurred in by Ritchie and McIntyre JJ. to the effect that an express trust is created, the duty cast upon the defendant as represented by the Department of Indian Affairs, which arises upon surrender of the land by the Indians, is equally as onerous, since the obligation is at least "trust-like".

It appears that, as in the case of *Kruger v. The Queen*, [1986] 1 F.C. 3 (C.A.), there existed in the case at bar a conflict of interest between the Department of Indian Affairs and The Director, The Veterans' Land Act: the former was seeking the best price available for the land and was interested in obtaining it immediately in order to purchase substitute reserves closer to the trap lines (See Exhibit 428). The latter, on the other hand, wanted to secure good agricultural land at the lowest possible price in order to allow the veterans to obtain a greater benefit from the purchase.

c) Manquement à l'obligation de la défenderesse au moment du transfert consenti au Directeur

a Les demandeurs prétendent aussi qu'au moment du transfert consenti au Directeur en 1948, la défenderesse a agi de façon frauduleuse et qu'elle ne s'est pas acquittée des obligations de fiduciaire qu'elle avait envers les Indiens à cette époque. En ce qui a trait aux allégations de fraude, je conclus qu'ils n'ont pas réussi à prouver que la défenderesse avait, de quelque façon que ce soit, par l'entremise de ses mandataires ou préposés, commis une fraude à leur égard pendant la période visée par la présente action. Toutefois, les allégations de manquement à l'obligation de fiduciaire à l'époque du transfert consenti au Directeur, elles, ont beaucoup plus de poids. Le juge Dickson (alors juge puîné) a déclaré dans l'arrêt *Guerin*, précité, que si la cession inconditionnelle entraînait la disparition du droit des Indiens sur le bien-fonds, la Couronne n'en demeurerait pas moins tenue de s'acquitter à l'égard des Indiens d'une obligation semblable à une fiducie, car «... Sa Majesté doit détenir les terres à l'usage et au profit de la bande qui les a cédées» (voir l'arrêt *Guerin*, précité, à la page 387). Qu'on se range à l'opinion de la majorité exprimée par le juge en chef Dickson dans l'affaire *Guerin* et selon laquelle la cession ne crée pas de fiducie au sens strict, soit une fiducie par interprétation ou autre, ou que l'on adopte le point de vue du juge Wilson auquel ont souscrit les juges Ritchie et McIntyre et voulant que la cession engendre une fiducie explicite, l'obligation pesant sur la défenderesse, représentée par le ministère des Affaires indiennes, par suite de la cession des terres par les Indiens est tout aussi lourde, étant au moins semblable à une fiducie.

h En l'espèce, comme dans la décision *Kruger c. La Reine*, [1986] 1 C.F. 3 (C.A.), il semble y avoir un conflit d'intérêt entre le Directeur des terres destinées aux anciens combattants et le Ministère des Affaires indiennes. Celui-ci cherchait à obtenir le meilleur prix possible pour les terres et à l'obtenir immédiatement en vue d'acheter des terres pour remplacer les réserves, qui soient situées plus près des sentiers de piégeage (voir pièce 428), celui-là désirait acheter de bonnes terres agricoles au plus bas prix possible afin que l'achat soit plus profitable pour les anciens combattants.

The statement of Heald J. at page 17 of the above cited report of the *Kruger* case is particularly relevant here:

Bearing in mind that it is the Crown which owes the fiduciary duty to the Indians, the facts of this case clearly raise the issue of conflict of interest, in my view. It seems evident that two Departments of the Government of Canada were in conflict concerning the manner in which the Indian occupants of Parcel A should be dealt with. The evidence seems to unquestionably establish that the officials of the Indian Affairs Branch were diligent in their efforts to represent the best interests of the Indian occupants. On the other hand, the Department of Transport was anxious to acquire the additional lands in the interests of air transport. This situation resulted in competing considerations. Accordingly, the federal Crown was in a conflict of interest in respect of its fiduciary relationship with the Indians. The law is clear that "one who undertakes a task on behalf of another must act exclusively for the benefit of the other, putting his own interests completely aside" and that "Equity fashioned the rule that no man may allow his duty to conflict with his interest". On this basis, the federal Crown cannot default on its fiduciary obligation to the Indians through a plea of competing considerations by different departments of Government.

There is also the argument that there might well be an element of self-dealing involved. As stated in the case of *Reference re Saskatchewan Natural Resources*, [1931] S.C.R. 263, at page 275:

There is only one Crown, and the lands belonging to the Crown are and remain vested in it, notwithstanding that the administration of them and the exercise of their beneficial use may, from time to time, as competently authorized, be regulated upon the advice of different Ministers charged with the appropriate service.

There is, of course, a rather important distinction to be drawn between the last mentioned case and the case at bar. We are not dealing with a question of the land being administered for the Crown by one Minister or another on behalf of their respective departments but of the transfer from a department of government, namely the Department of Indian Affairs, to a corporation sole, namely The Director, The Veterans' Land Act, created by Parliament for the express purpose of acquiring, administering and disposing of lands for the exclusive benefit of veterans in accordance with the specific provisions of the Act and independently of the control normally exercised by a Minister over his department. Be that as it may, I find that, in the case at bar, there rested an onerous fiduciary duty upon the Department of

La déclaration faite par le juge Heald dans l'affaire *Kruger*, précitée, à la page 17, est particulièrement pertinente:

À mon avis, étant donné que la Couronne a une obligation de fiduciaire envers les Indiens, la question du conflit d'intérêts se pose clairement dans ce cas-ci. De toute évidence, deux Ministères du gouvernement canadien ne s'entendaient pas sur la façon de traiter les occupants indiens du lot A. La preuve semble incontestablement montrer que les fonctionnaires de la direction des Affaires indiennes ont fait preuve de diligence lorsqu'il s'est agi de défendre au mieux les intérêts des occupants indiens. D'autre part, le ministère des Transports était anxieux d'acquérir les nouvelles terres dans l'intérêt des transports aériens. Cette situation a entraîné l'existence de considérations incompatibles les unes avec les autres. Par conséquent, en sa qualité de fiduciaire des Indiens, la Couronne fédérale faisait face à un conflit d'intérêts. En droit, il est clair que [TRADUCTION] «une personne qui se charge d'une tâche pour le compte d'une autre doit agir exclusivement au bénéfice de cette dernière, sans tenir compte de ses propres intérêts» et que [TRADUCTION] «Selon la règle établie en *equity*, personne ne peut laisser son devoir entrer en conflit avec son intérêt». Ceci étant, on ne saurait reprocher à la Couronne fédérale d'avoir manqué à son obligation de fiduciaire envers les Indiens en invoquant l'existence de considérations incompatibles entre les différents ministères du gouvernement.

On a également prétendu qu'il pourrait fort bien y avoir un élément de transaction intéressée en l'espèce. Comme il a été précisé dans l'arrêt *Reference re Saskatchewan Natural Resources*, [1931] R.C.S. 263, à la page 275:

[TRADUCTION] Il n'y a qu'une seule Couronne, et les terres qui lui appartiennent lui sont dévolues et le demeurent, en dépit du fait que leur administration et leur utilisation par le bénéficiaire, approuvée par les autorités compétentes, peuvent être régies selon l'avis des divers ministres chargés du service approprié.

Bien entendu, il convient d'établir une distinction importante entre la dernière affaire mentionnée et le cas qui nous occupe. Il ne s'agit pas ici de l'administration d'un bien-fonds pour la Couronne par un ministre ou un autre au nom de leur ministère respectif mais plutôt de son transfert d'un ministère du gouvernement, savoir le ministère des Affaires indiennes, au Directeur des terres destinées aux anciens combattants, corporation constituée d'une seule personne physique, qui a été créée par le Parlement en vue précisément d'acquérir, d'administrer et de transporter des terres au profit exclusif des anciens combattants conformément aux dispositions spécifiques de la Loi et indépendamment de l'autorité normalement exercée par un ministre sur son ministère. Quoi qu'il en soit, je conclus qu'en l'espèce, il incombait au

Indian Affairs to ensure that all reasonable efforts were made to obtain the best price possible for the land at the time of sale.

Where such a fiduciary duty exists there also rests upon the person by whom the duty is owed, an onus of proving that it has been discharged.

The evidence establishes that an appraiser engaged by the Department of Indian Affairs appraised the value of the land at \$93,160 (Exhibit 414). After lengthy negotiations between that department and The Director, The Veterans' Land Act, who would not purchase at that price, the land was finally sold to him for the sum of \$70,000 on March 30, 1978 (Exhibit 506). In addition, the cost of survey was borne by the Department of Indian Affairs.

There is a lack of evidence adduced by the defendant to justify the discrepancy between the appraised price and the actual sale price. Although I am not making any finding as to the actual value, since the question of damages is not before me and also because Exhibit 414 is not in evidence for the purpose of establishing the truth of the assertion that the land was in fact worth \$93,160, the evidence does establish that the defendant was fully aware of a discrepancy between the appraised price of its own appraiser and the sale price. The sufficiency of the sale price is therefore a real issue and not merely a speculative or a theoretical one. The defendant had a duty to convince the Court that it could not reasonably have been expected to obtain a better price. There was no evidence as to what other offers were sought and what efforts were made to obtain a better price elsewhere. Since the onus of establishing that a full and fair price was in fact obtained in March 1948 has not been discharged by the defendant, I find that the latter was guilty of a breach of its fiduciary duty towards the plaintiffs in that regard. Unless the claim is statute barred, the amount of damages sustained by the plaintiffs due to the possible insufficiency of the sale price would thus remain to be determined at a later hearing or upon a reference for assessment of damages. However, as previously stated, the evidence does not establish the

ministère des Affaires indiennes de s'acquitter d'une lourde obligation de fiduciaire et de s'assurer que tous les efforts raisonnables avaient été faits pour obtenir le meilleur prix possible pour les terres au moment de la vente.

L'existence d'une telle obligation fait également peser sur la personne qui doit s'en acquitter le fardeau de prouver qu'elle a accompli sa mission.

La preuve établit qu'un évaluateur dont les services avaient été retenus par le ministère des Affaires indiennes avait fixé la valeur des terres à 93 160 \$ (pièce 414). À l'issue de longues négociations entre le Ministère et le Directeur des terres destinées aux anciens combattants, qui ne voulait pas acheter les terres à ce prix, celles-ci lui avaient finalement été vendues pour la somme de 70 000 \$ le 30 mars 1978 (pièce 506). En outre, les frais d'arpentage avaient été supportés par le ministère des Affaires indiennes.

La défenderesse n'a produit aucune preuve pour justifier l'écart entre le prix fixé par l'évaluateur et le prix de vente réel. Bien que je ne tire aucune conclusion relativement à la valeur réelle, puisque je n'ai pas à me prononcer sur les dommages-intérêts et que la pièce 414 n'a pas été produite aux fins d'établir la véracité de l'affirmation voulant que les terres valaient en réalité 93 160 \$, la preuve montre tout à fait que la défenderesse savait très bien qu'il y avait un écart entre le prix fixé par son propre évaluateur et le prix de vente. La suffisance du prix de vente pose par conséquent un véritable problème, il ne s'agit pas d'une question théorique. Il incombait à la défenderesse de convaincre la Cour qu'elle ne pouvait raisonnablement s'attendre à obtenir un meilleur prix. Aucune preuve n'a été présentée pour établir que d'autres offres avaient été recherchées ni pour montrer que des efforts avaient été faits pour obtenir un meilleur prix ailleurs. Comme la défenderesse ne s'est pas acquittée du fardeau d'établir qu'un prix équitable avait en réalité été obtenu en mars 1948, je conclus qu'elle a manqué sur ce point à ses obligations de fiduciaire à l'égard des demandeurs. À moins que la demande ne soit prescrite, le montant des dommages subis par les demandeurs en raison de l'insuffisance possible du prix de vente devra donc être déterminé au cours d'une audience ultérieure ou d'une référence pour évaluer les domma-

probability of fraud, of fraudulent intent or of willful concealment.

d) Whether The Director, The Veterans' Land Act held in trust for Indians ^a

The plaintiffs argued that, following the transfer to The Director, The Veterans' Land Act, in 1948, the latter continued to hold the mineral rights in trust for the plaintiffs and should have transferred them back when some interest in obtaining exploration permits subsequently arose.

Regarding title to minerals, the present case is clearly distinguishable from the matters which arose under and were dealt with under the former *The Soldier Settlement Act, 1917* [S.C. 1917, c. 21] later replaced by *The Soldier Settlement Act, 1919* [S.C. 1919, c. 71] which were enacted for the resettlement of veterans of the first Great War. Section 57 of the 1919 Act specifically provided that "mines and minerals shall be and shall be deemed to have been reserved" from all sales made by the Board. Therefore, one could not obtain from the Board any title or claim to mines or minerals regardless of whether or not they were reserved or regardless of any statement in the document of conveyance. When Parliament in 1942 enacted *The Veterans' Land Act, 1942*, [S.C. 1942-43, c. 33] for the benefit of the veterans of the 1939-45 War it chose to omit any such reservations or limitations. The general law must therefore be applied.

In addition, however, there would have been a serious legal impediment to any conveyance by the Director to the Department of Indian Affairs or to any person other than a veteran. *The Veterans' Land Act, 1942* (R.S.C. 1970, c. V-4) provides that the Director is a corporation sole with perpetual succession, having power to hold and transfer property which he is "by this Act authorized to acquire, hold, convey, transfer, agree to convey or agree to transfer, but for such purposes only" [underlining added] (subsection 5(1)), and that "All property acquired for any of the purposes of

ges-intérêts. Cependant, comme il a déjà été dit, la preuve n'établit pas la probabilité d'une fraude, d'une intention frauduleuse ni d'une dissimulation volontaire.

d) Le Directeur des terres destinées aux anciens combattants détenait-il les droits miniers en fiducie pour les Indiens?

Les demandeurs soutiennent qu'à la suite du transfert consenti au Directeur des terres destinées aux anciens combattants en 1948, celui-ci a continué à détenir les droits miniers en fiducie pour les demandeurs. Ils prétendent qu'il aurait dû les rétrocéder lorsque l'obtention de permis d'exploration a commencé à susciter de l'intérêt.

En ce qui concerne le titre sur les minéraux, on peut établir une distinction nette entre le cas qui nous occupe et les litiges résolus sous le régime de l'ancienne *Loi d'Établissement de Soldats, 1917*, [S.C. 1917, chap. 21] remplacée par la suite par la *Loi d'établissement de soldats, 1919*, [S.C. 1919, chap. 71] qui avaient été adoptées en vue de l'établissement des anciens combattants de la Première Guerre mondiale. L'article 57 de la Loi de 1919 dispose expressément que «toutes les mines et tous les minéraux doivent être, et sont censés avoir été réservés» dans toutes les ventes conclues par la Commission. Par conséquent, la Commission ne pouvait accorder de titre ni de droit de réclamation sur les mines ou les minéraux, peu importe qu'ils aient été réservés ou non et en dépit des stipulations de l'acte de cession. Lorsque le Parlement a adopté en 1942 la *Loi de 1942 sur les terres destinées aux anciens combattants* [S.C. 1942-43, chap. 33] dans l'intérêt des anciens combattants de la guerre de 1939-1945, il a choisi d'omettre ces réserves ou limitations. Les règles générales du droit doivent donc être appliquées.

Au surplus, un grave obstacle juridique aurait empêché la cession par le Directeur au ministère des Affaires indiennes ou à toute autre personne qui n'était pas un ancien combattant. La *Loi de 1942 sur les terres destinées aux anciens combattants* (S.R.C. 1970, chap. V-4) dispose que le Directeur est une corporation constituée d'une seule personne physique jouissant d'une succession perpétuelle et habilité à détenir et à transférer les biens «que la présente loi l'autorise à acquérir, détenir, transporter, transférer ou convenir de transporter ou de transférer, mais pour ces fins

this Act shall vest in the Director as such corporation sole" (subsection 5(4), formerly subsection 5(3)). The Director obtains land by grant in fee simple from the Crown as in the case of any other person or corporation. In order for the Crown to obtain title to those lands, they must be reconveyed by the Director. The powers of disposition of land of the Director and the purposes for which land is to be acquired by him are strictly defined in considerable detail in the Act. There are provisions for reconveyance of the land to the Crown where it is required for a public purpose or for conveyance to any person with the consent of the interested veteran or for the sale of land which eventually might not be required for the purposes of the Director. There is no power however, without consent of the veteran concerned, to reconvey lands or any mineral rights to the Crown for the benefit of Indians or to any other person for that matter.

Section 3 of the Act as amended in 1946 [S.C. 1946, c. 70, s. 1] renders the Director responsible to the Minister of Veterans Affairs and subject to the latter's direction. It is obvious, however, that the Director must comply strictly with the provisions of the *Veterans' Land Act* and that the Minister cannot instruct him to exercise powers as Director which are not contained in the *Veterans' Land Act* nor to act in any way contrary to the statute.

If any authority were needed to support the proposition that the Director's powers and authority are strictly limited to those conferred upon him by the *Veterans' Land Act*, the case of *The Queen v. Richard L. Reese et al.*, [1956] Ex.C.R. 94, could be cited as relevant and authoritative. In that case, a promise made to convey mineral rights under the *Soldier Settlement Act* was declared to be unenforceable against the Crown even though the undertaking was given to a soldier. Since the Director (formerly "the Board" under the *Soldier Settlement Act*) can only bind the Crown for the purposes mentioned in the Act, the latter cannot be vicariously liable for the Director's failure to

seulement» [c'est moi qui souligne] (paragraphe 5(1)) et «Tous les biens acquis pour l'un des objets de la présente loi sont dévolus au Directeur en sa qualité de corporation constituée d'une seule personne physique» (paragraphe 5(4), ancien paragraphe 5(3)). Le Directeur obtient les terres en vertu d'une cession de la propriété absolue consentie par la Couronne comme toute autre personne ou société. Pour que la Couronne puisse obtenir le titre sur ces terres, celles-ci doivent être rétrocédées au Directeur. Les pouvoirs relatifs à l'aliénation des terres accordés au Directeur et les raisons pour lesquelles il doit acquérir des terres sont strictement définies par le menu détail dans la Loi. Des dispositions prévoient la rétrocession des terres à la Couronne lorsque celles-ci sont requises pour cause d'utilité publique, la rétrocession à toute personne avec le consentement de l'ancien combattant intéressé et la vente éventuelle des terres dont le Directeur n'aura pas besoin. La Loi ne prévoit toutefois aucun pouvoir de rétrocéder des terres ou tout droit minier à la Couronne au profit des Indiens ou de toute autre personne d'ailleurs, sans le consentement de l'ancien combattant concerné.

Selon l'article 3 de la Loi, modifiée en 1946 [S.C. 1946, chap. 70, art. 1], le Directeur relève du ministre des Affaires des anciens combattants de qui il reçoit des directives. Cependant, il est évident que le Directeur doit se conformer strictement aux dispositions de la *Loi sur les terres destinées aux anciens combattants* et que le ministre ne peut lui ordonner d'exercer des pouvoirs qui ne sont pas prévus par la *Loi sur les terres destinées aux anciens combattants* ni de contrevenir de quelque façon à la Loi.

S'il était nécessaire d'étayer la proposition selon laquelle les pouvoirs du Directeur sont strictement limités à ceux qui lui sont conférés par la *Loi sur les terres destinées aux anciens combattants*, on pourrait citer l'affaire *The Queen v. Richard L. Reese*, [1956] R.C.É. 94, qui fait autorité. Dans cette affaire, une promesse de céder des droits miniers faite sous le régime de la *Loi d'établissement de soldats* a été déclarée inexécutable à l'encontre de la Couronne même si l'engagement avait été passé avec un soldat. Puisque le Directeur (anciennement «la Commission» en vertu de la *Loi d'établissement de soldats*) ne peut lier la Couronne que pour les fins mentionnées dans la Loi, la

either administer or reconvey the land for the benefit of the Indians, nor can the Crown order him to do so without an amendment to the *Veterans' Land Act*.

Finally, once the letters patent had been issued, the full purchase price had been paid by the Director to the Department of Indian Affairs and the latter had set aside the funds as required by the Act for the benefit of the Indians, the lands of I.R. 172 no longer formed the object of the trust, if it was a trust, or, alternatively, no longer constituted the object to which the special fiduciary duty of the defendant related. From that moment on, namely from March 30, 1948, the proceeds of the sale in lieu of the land were to be administered by the defendant for the benefit of the plaintiffs.

For the above reasons the plaintiffs' argument on the issue of the Director's duty to reconvey mineral rights to or on behalf of the Indians cannot succeed.

e) Non-compliance with *The Dominion Lands Act*, 1908

There is no merit to the argument founded on paragraph 78 of the statement of claim that the 1948 transfer of mineral rights in I.R. 172 would be void as regards those rights because of non-compliance with the requirements of section 41 of *The Dominion Lands Act*, 1908, c. 20. This section refers exclusively to terms of payment of the purchase price of school lands. No part of I.R. 172 was ever designated as school lands pursuant to the Act nor is there any evidence that any part was used for such purpose.

ALLEGED BREACHES SINCE 1948

Numerous breaches of trust and of duty towards the Indians are alleged to have occurred since 1948. Unlike the issue of sufficiency of the sale price of I.R. 172, the onus of proof of these allegations rests upon the plaintiffs.

It has not been established as alleged in paragraph 35 of the statement of claim that the defendant undertook to obtain replacement

Couronne ne peut être tenue responsable du fait que le Directeur n'a pas géré ni rétrocédé les terres au profit des Indiens, et la Couronne ne peut lui ordonner de le faire si la *Loi sur les terres destinées aux anciens combattants* n'est pas modifiée.

Enfin, après que les lettres patentes eurent été délivrées, que la totalité du prix d'achat eut été versé par le Directeur au ministère des Affaires indiennes et que celui-ci eut réservé le produit au profit des Indiens comme le prescrit la Loi, les terres de la R.I. 172 n'étaient plus détenues en fiducie, si fiducie il y avait, ou subsidiairement, elles ne faisaient plus l'objet de l'obligation de fiduciaire spéciale qui pesait sur la défenderesse. À compter de cette date, savoir le 30 mars 1948, le produit de la vente, et non plus les terres, devait être géré par la défenderesse au profit des Indiens.

Pour les motifs précités, l'argument des demandeurs relativement à l'obligation du Directeur de rétrocéder les droits miniers aux Indiens ou en leur nom ne peut être retenu.

e) Inobservation des dispositions de la *Loi des terres fédérales de 1908*

L'argument invoqué au paragraphe 78 de la déclaration voulant que le transfert des droits miniers sur la R.I. 172 effectué en 1948 soit invalide en raison de l'inobservation des dispositions de l'article 41 de la *Loi des terres fédérales* de 1908, chap. 20, n'est pas fondé. Cet article se rapporte exclusivement aux modalités de versement du prix d'achat des terres réservés pour les écoles. Aucune partie de la R.I. 172 n'a jamais été désignée à ce titre en application de la Loi et aucune preuve n'a été produite pour établir qu'une partie des terres de la réserve était utilisée à cette fin.

MANQUEMENTS IMPUTÉS DEPUIS 1948

De nombreux manquements à l'obligation et aux devoirs de fiduciaire envers les Indiens seraient survenus depuis 1948. Il incombe aux demandeurs de prouver ces affirmations, contrairement à la suffisance du prix de vente de la R.I. 172 que la défenderesse devait établir.

Il n'a pas été établi comme les demandeurs le soutiennent au paragraphe 35 de la déclaration, que la défenderesse a cherché à obtenir des terres

reserves which would be situated beyond the area of future agricultural settlements.

With regard to the alleged delay in actually acquiring legal title until 1950 to the reserves from the Province of British Columbia, since I.R. 172 was actually sold in 1948 and some time was required to complete surveys I do not feel that the delay was excessive. More importantly, however, there can be no damage since the evidence indicates that the plaintiffs apparently continued to enjoy the benefit and use of those reserves between 1945 and 1950. The evidence establishes also that they had in the past been making very limited use of reserve lands.

The plaintiffs also complained that they did not obtain mineral rights to the replacement reserves. Treaty lands normally carried mineral rights, since those rights had been held by the Crown in right of Canada in the first place. This did not apply to the replacement reserves after the mineral rights had been transferred to the Province. Unlike I.R. 172, the replacement reserves were merely reserves obtained for the benefit of the plaintiffs under the provisions of the *Indian Act* and in pursuance of the conditions of the 1945 surrender of I.R. 172, and were not treaty reserves. It turned out that the Department could not, in view of the general policy of the Provincial Government regarding reservation of all mineral rights, obtain title to those rights for the benefit of the Indians. The Department was apparently not aware of this policy nor of the reservation of rights until some time later when, in error, some of its officials indicated a readiness to grant an exploration licence on the replacement reserves to an oil company. Furthermore, although the defendant, had it obtained mineral rights in the replacement reserves, would undoubtedly have considered them as forming an integral part of the reserve, there is a lack of evidence that the defendant, as a condition of the 1945 surrender, undertook in any way to obtain mineral rights in the replacement reserves. There is also evidence which might tend to indicate the contrary. Before being chosen, the areas were considered by both parties merely from the standpoint of their suitability for habitation, their proximity to the hunting, fishing and trap-

de remplacement situées plus loin que les terrains destinés à accueillir de futurs établissements agricoles.

a En ce qui concerne le retard imputé à la défenderesse, qui n'a obtenu qu'en 1950 de la province de la Colombie-Britannique le titre de propriété en *common law* sur les réserves, j'estime que ce délai n'était pas excessif compte tenu du fait que la R.I. 172 avait été vendue en 1948 et qu'il avait fallu un certain temps pour compléter l'arpentage. Fait plus important encore, il ne saurait y avoir préjudice puisque la preuve montre que les demandeurs ont continué apparemment d'utiliser ces réserves de 1945 à 1950. Il est également établi que par le passé ils avaient très peu utilisé les terres de réserve.

d Les demandeurs soutiennent aussi qu'ils n'ont pas obtenu les droits miniers sur les terres de remplacement. Les droits miniers étaient d'ordinaire attachés aux terres conférées par traité puisqu'ils étaient détenus par la Couronne du chef du Canada. Il n'en va pas de même des terres de remplacement après que les droits miniers eurent été transférés à la province. Contrairement à la R.I. 172, les terres achetées pour remplacer les réserves étaient simplement des réserves acquises au profit des demandeurs en application des dispositions de la *Loi des Indiens* et conformément aux conditions de la cession de 1945 de la R.I. 172, et elles ne constituaient donc pas des réserves conférées par traité. Le Ministère ne pouvait pas, en raison de la politique adoptée par le gouvernement provincial relativement à la retenue de tous les droits miniers, obtenir le titre sur ces droits au profit des Indiens. Le Ministère n'a apparemment été informé de cette politique que plus tard lorsque, par erreur, certains de ses fonctionnaires s'étaient montrés disposés à accorder un permis d'exploration visant les terres de remplacement à une société pétrolière. En outre, bien que la défenderesse eût sans doute considéré les droits miniers sur les terres de remplacement comme une partie intégrante de la réserve, si elle les avait obtenus, il n'est pas démontré qu'elle s'était engagée de quelque façon, aux termes de l'acte de cession de 1945, à obtenir des droits miniers sur les terres de remplacement. Des éléments de preuve tendent également à indiquer le contraire. Avant d'arrêter leur choix, les deux parties avaient exploré la région à

ping grounds of the Indians, their distance from white settlements in the vicinity and the possible future development of the lands for agricultural or cattle farming by the Indians. There is no evidence of any thought whatsoever having been given to mineral rights under the new reserves.

Although there were rumours at some time during 1950 that the British Columbia Government was contemplating a change of policy regarding the granting of lands for the purpose of establishing Indian reserves, it was only in January 1951 that the Canadian Government was advised that the Provincial Government had, in November 1950, formally decided that, altogether apart from the reservation of mineral rights, no more lands would henceforth be transferred in fee to the Department of Indian Affairs to be used for Indian reserves unless an equivalent amount of land was obtained in exchange. As a result of that decision many, if not all, proposed land purchases by the defendant for the benefit of other Indian bands in the Province had to be abandoned (refer Exhibit 688). No promise of the defendant was established to the effect that the same acreage of land would be obtained in the new reserves as was surrendered in I.R. 172 nor does there seem to be any evidence that the plaintiffs at that time expected the defendant to do so. There was a considerable amount of correspondence pertaining to the proposed replacement and to the reserves themselves when they were obtained and in none of this correspondence or the memoranda of the various officials does there appear to be any question of equivalent acreage.

Sales under the agreements which the Director had entered into with the veterans gave each veteran purchaser a right to immediate possession of the lands upon the signing of the agreement and payment of the deposit and also the right, upon payment in full of the purchase price, to a deed and fee simple free of all encumbrances. Paragraph 14 of the agreement reads as follows:

14. It is agreed that upon punctual payment by the Veteran of all moneys hereby by him agreed to be paid and subject to

la recherche de terrains sur lesquels on pourrait construire des habitations et situés à proximité des territoires de chasse et de pêche ainsi que des sentiers de piégeage. Ils ont également tenu compte de la distance qui les séparait des établissements des blancs dans la région et de l'éventuelle mise en valeur des terres par les Indiens, par l'agriculture ou l'élevage. Il n'a pas été démontré que l'on s'était le moins préocculté des droits miniers sur les nouvelles réserves.

Bien que le bruit ait couru en 1950 que le gouvernement de la Colombie-Britannique envisageait de modifier la politique relative à l'octroi des terres pour l'établissement des réserves indiennes, ce n'est qu'en janvier 1951 que le gouvernement fédéral était informé du fait que le gouvernement provincial avait en novembre 1950 décidé officiellement que, mise à part la retenue des droits miniers, aucun droit de propriété sur des terres ne serait plus désormais transféré au ministère des Affaires indiennes en vue de former des réserves à moins que des terres d'une même superficie ne soient obtenues en échange. Par suite de cette décision, bon nombre, sinon la totalité, des projets d'achat de terrains de la défenderesse au profit d'autres bandes indiennes de la province ont dû être abandonnés (voir pièce 688). Il n'a pas été établi que la défenderesse avait promis que des terres d'une même superficie que celles de la R.I. 172 seraient obtenues ni, semble-t-il, que les demandeurs à cette époque s'attendaient à ce que la défenderesse le fasse. Une correspondance volumineuse a été produite relativement aux terres de remplacement proposées et aux réserves elles-mêmes à l'époque où elles ont été achetées. Cependant, il ne semble pas être question d'obtenir des terres d'une superficie équivalente dans aucune des lettres ni aucun des mémoires rédigés par les divers fonctionnaires.

En vertu des ententes conclues par le Directeur avec les anciens combattants, chaque acheteur avait droit à la possession immédiate des terres dès la signature de l'entente et le versement du dépôt. Au paiement de l'intégralité du prix d'achat, l'ancien combattant recevait un acte scellé, et la propriété absolue du terrain, libre de toute charge, lui était transmise. Le paragraphe 14 de l'entente est formulé comme suit:

[TRADUCTION] 14. Les parties conviennent qu'au paiement ponctuel par l'ancien combattant des montants qu'il accepte

performance of all and singular the aforesaid provisions, conditions and agreements, and upon the surrender of this contract, he shall be entitled to a conveyance of the said land in fee simple free from all encumbrances other than such as may have resulted through the act and neglect of the Veteran, but subject to all reservations, limitations, provisos and conditions contained or expressed in the title held by the Director. (Refer Exhibit 986 D)

There were no reservations, limitations, provisions or conditions contained or expressed in the title held by the Director. Paragraph 14 above is a complete answer to the argument of plaintiffs' counsel to the effect that, until the deeds in fee simple were actually delivered to the veterans, the Director could have somehow repossessed the lands for the benefit of the Indians. Sales by agreements for sale to veterans were made as follows: 1948: 19; 1949: 13; 1950: 2; 1951: 1; 1956: 1. Thus, by the end of 1950 all but two of the lots were in the possession of veterans who had a contractual right to an absolute title in fee simple.

Four of the lots which were in surplus to the Director's requirements were disposed of by the Director in 1952 by public auction in accordance with the terms of the statute.

In any event, all of the above allegations regarding subsequent dealings with the land by the Director are of no real help to the plaintiffs. As I have already held, from March 30, 1948 the plaintiffs were no longer entitled to any part of I.R. 172 and the Director, who then held the lands in fee simple, could not in the circumstances and because of the provisions of the *Veterans' Land Act*, be considered a fiduciary or a trustee, constructive or otherwise, for the benefit of the Indians.

The plaintiffs have failed to establish any practical requirement for further reserves, even up to the time of trial. The question of trap lines has already been dealt with. The Department, many years ago, secured numerous registered trap lines for their exclusive use and there is a lack of evidence as to the requirement for any additional lines or for large hunting and fishing areas reserved for their exclusive use as now claimed by the plaintiffs.

par les présentes de payer, sous réserve de l'exécution de toutes les dispositions, conditions et ententes susmentionnées, et à la délivrance du présent contrat, il aura droit au transport de la propriété absolue desdites terres, libres de toutes charges autres que celles pouvant résulter des actes et de la négligence de l'ancien combattant mais sous réserve des restrictions et conditions stipulées dans le titre détenu par le directeur. (Voir pièce 986 D)

Aucune restriction ni condition n'est énoncée dans le titre détenu par le Directeur. Le paragraphe 14 ci-dessus détruit de manière absolue l'argument des avocats des demandeurs voulant que jusqu'à ce que l'acte scellé reconnaissant le transport de la propriété absolue soit délivré à l'ancien combattant, le Directeur pouvait d'une façon ou d'une autre reprendre possession des terres au profit des Indiens. Aux termes des promesses de vente passées avec les anciens combattants, les ventes suivantes ont été conclues: 1948: 19, 1949: 13, 1950: 2, 1951: 1 et 1956: 1. Donc à la fin de 1950, les anciens combattants qui étaient en droit, aux termes d'un contrat, d'obtenir un titre absolu de propriété étaient entrés en possession de tous les lots, à l'exception de deux.

En 1952, le Directeur avait vendu aux enchères quatre lots dont il n'avait pas besoin, conformément aux dispositions de la Loi.

De toute manière, toutes les affirmations susmentionnées relatives à la gestion subséquente des terres par le Directeur ne sont d'aucune utilité aux demandeurs. Comme il a déjà été décidé, dès le 30 mars 1948, les demandeurs n'avaient plus droit à aucune partie de la R.I. 172, et le Directeur qui détenait alors les terres en propriété absolue ne pouvait, dans les circonstances et en raison des dispositions de la *Loi sur les terres destinées aux anciens combattants*, être considéré comme un fiduciaire, sous le régime d'une fiducie par interprétation ou autrement créée au profit des Indiens.

Les demandeurs n'ont pas démontré la nécessité pratique de former d'autres réserves, même au moment de l'instruction. La question des sentiers de piégeage a déjà été résolue. Il y a bien des années, le Ministère avait obtenu de nombreux sentiers de piégeage enregistrés à l'usage exclusif des Indiens, et il n'a pas été démontré qu'il était nécessaire d'obtenir des sentiers de piégeage additionnels ou de vastes territoires de chasse et de pêche réservés à leur usage exclusif, comme le demandent maintenant les demandeurs.

The evidence contained in the Band council resolutions which were filed together with annual budgets deposited in evidence, points to the fact that the funds received from the sale were duly retained for the benefit of the plaintiffs and that all accrued interest thereon was duly credited to their account. Payments from this account plus additional monies from the general appropriations of the Department of Indian Affairs were, from time to time throughout the years, spent for their benefit. There is no evidence whatsoever that any of such monies were misappropriated as claimed. On the contrary, the evidence indicates that all disbursements from those monies and accrued interest were made for the benefit of the plaintiffs, who also received additional monies to which they were not contractually entitled, for their various undertakings, projects, social and collective requirements, etc.

To summarize with regard to alleged breaches since 1948, I find that the onus of proof resting upon the plaintiffs has not been satisfied but that, on the contrary, whatever credible and admissible evidence which does exist regarding these issues would tend to lead one to conclusions contrary to those which they seek.

LIMITATIONS

a) Application

Pursuant to section 38 of the *Federal Court Act* [R.S.C. 1970 (2nd Supp.), c. 10] the law to be applied regarding prescriptions and limitations in this action is clearly that of British Columbia (*Kruger v. The Queen*, [1986] 1 F.C. 3; (1985), 58 N.R. 241 (C.A.)).

Because counsel were unaware of what my ultimate findings might be regarding various claims and allegations of fraud and of continuing breaches of fiduciary responsibilities, considerable argument was addressed to the Court and numerous authorities were quoted and statutory provisions referred to on the question of limitations, in order to cover all possibilities. Since I have found that there was but a non-fraudulent breach of fiduciary duty which related to the sufficiency of the amount received by the Department of Indian Affairs on March 30, 1948 and have found no continuing negligence, breaches of trust or other

Les résolutions des conseils de bande qui ont été versées au dossier avec les budgets annuels font ressortir le fait que le produit de la vente avait été dûment conservé au profit des demandeurs et que tous les intérêts courus avaient été dûment versés au crédit de leur compte. Des sommes tirées de ce compte et des montants additionnels provenant des crédits affectés au ministère des Affaires indiennes ont été dépensées au fil des années à leur profit. Aucune preuve n'a été produite pour démontrer que ces sommes avaient été détournées, comme le prétendent les demandeurs. Au contraire, la preuve indique que tous les versements provenant de ces sommes et les intérêts courus ont été payés à l'avantage des demandeurs qui ont également reçu des montants supplémentaires auxquels ils n'avaient pas droit par contrat pour leurs divers entreprises, projets et besoins sociaux et collectifs, etc.

En résumé, en ce qui concerne les manquements imputés depuis 1948, je conclus que les demandeurs ne se sont pas acquittés du fardeau de la preuve qui pesait sur eux. Du reste, les quelques preuves crédibles et admissibles qui ont été produites relativement à ces questions tendent à appuyer des conclusions contraires à celles que les demandeurs recherchent.

PRESCRIPTION

a) Application

En application de l'article 38 de la *Loi sur la Cour fédérale* [S.R.C. 1970 (2^e Supp.), chap. 10], il est évident qu'en l'espèce, la loi applicable en matière de prescription est celle de la Colombie-Britannique (*Kruger c. La Reine*, [1986] 1 C.F. 3; (1985), 58 N.R. 241 (C.A.)).

Ne sachant pas quelles conclusions définitives je tirerais au sujet des diverses réclamations et allégations de fraude et de manquement continu aux obligations de fiduciaire, les avocats ont cité une jurisprudence volumineuse, et ils ont fait référence à des dispositions législatives dans une longue argumentation sur la prescription afin de prévoir toutes les possibilités. Comme j'ai conclu qu'il y avait eu simplement un manquement non frauduleux à l'obligation de fiduciaire en ce qui concerne le montant reçu par le ministère des Affaires indiennes le 30 mars 1948 et qu'à mon avis, il n'y avait eu ni négligence continue, ni violation de

breaches of duty, whether fiduciary or statutory, the issues regarding limitations are considerably simplified.

The cause of action must therefore be held to have arisen on the 30th of March 1948. The statement of claim was issued on September 19, 1978, i.e. five and one half months beyond thirty years from the time the cause of action arose.

b) Sections 8 and 9 of the B.C. *Limitations Act*

British Columbia is apparently the only province in Canada with a statute providing for what is termed an ultimate limitation period. The new *Limitation Act* was enacted in 1975 [*Limitations Act*, S.B.C. 1975, c. 37] and may be found in the 1979 Revised Statutes, R.S.B.C. 1979, c. 236. The relevant portions of section 8 of that Act read as follows:

8. (1) Subject to section 3 (3), but notwithstanding a confirmation made under section 5 or a postponement or suspension of the running of time under section 6, 7 or 12, no action to which this Act applies shall be brought after the expiration of 30 years from the date on which the right to do so arose, . . .

(2) Subject to subsection (1), the effect of sections 6 and 7 is cumulative.

Subsection 3(3) refers to special classes of action, none of which are applicable to the findings in the case at bar. Section 6 mentioned in subsection (2) above provides for the postponement of the running of time in certain specific instances and section 7 deals with persons under disability. Section 12 is not applicable. It seems clear that, on reading section 8, although the effects of sections 6 and 7 are cumulative, those sections are not to be taken into account in calculating the 30 year period mentioned in subsection (1). Thus, neither disability nor knowledge come into play with respect to the 30 year ultimate limitation.

The Court of Appeal of B.C. dealt with the effect of section 8 in the case *Bera v. Marr* (1986), 1 B.C.L.R. (2d) 1. In that case Esson J.A., with whom Cheffins J.A. concurred, stated at page 27:

fiducie ni autre manquement à des obligations fiduciaires ou prévues par la loi, les questions relatives à la prescription sont considérablement simplifiées.

^a Il convient donc de décider que la cause d'action a pris naissance le 30 mars 1948. La déclaration a été déposée le 19 septembre 1978, c'est-à-dire cinq mois et demi après l'expiration d'un délai de trente ans à compter de la date à laquelle la cause d'action a pris naissance.

b) Les articles 8 et 9 de la *Limitations Act* de la C.-B.

^c Apparemment, la Colombie-Britannique est la seule province canadienne qui ait adopté une loi prévoyant ce qu'on appelle une prescription finale. La nouvelle *Limitation Act*, R.S.B.C. 1979, chap. 236, a été édictée en 1975 [*Limitations Act*, S.B.C. 1975, chap. 37]. Les passages pertinents de l'article 8 de la Loi sont formulés comme suit:

[TRADUCTION] 8. (1) Sous réserve du paragraphe 3(3), mais nonobstant la confirmation faite en application de l'article 5 ou l'interruption ou la suspension du délai en vertu des articles 6 et 7 ou de l'article 12, aucune action à laquelle s'applique la présente loi ne doit être intentée après l'expiration d'un délai de trente ans à compter de la date à laquelle le droit de le faire a pris naissance, . . .

^f (2) Sous réserve du paragraphe (1), l'effet des articles 6 et 7 est cumulatif.

^g Le paragraphe 3(3) concerne des catégories spéciales d'action dont aucune n'est applicable aux conclusions tirées en l'espèce. L'article 6 mentionné au paragraphe (2) ci-dessus prévoit également l'interruption de la prescription dans certains cas précis, et l'article 7 vise les personnes incapables. L'article 12 ne s'applique pas ici. À la lecture de l'article 8, il ne fait pas de doute que même si l'effet des articles 6 et 7 est cumulatif, ces dispositions ne doivent pas être prises en considération dans le calcul du délai de trente ans mentionné au paragraphe (1). Par conséquent, ni l'incapacité ni la connaissance n'entrent en jeu dans la prescription finale de trente ans.

^j La Cour d'appel de la Colombie-Britannique a examiné l'effet de l'article 8 dans la décision *Bera v. Marr* (1986), 1 B.C.L.R. (2d) 1. Dans cette affaire, le juge d'appel Esson, dont le juge d'appel Cheffins a partagé l'avis, a déclaré à la page 27 ce qui suit:

A significant part of the "balance" created by ss. 6, 7 and 8 is that the 30-year ultimate limitation is long enough so that no action by an infant can be barred before he comes of age and other actions falling within ss. 6 and 7 cannot be ultimately barred for more than a generation.

Craig J.A., who dissented on another point, was of the same view regarding section 8 (refer pages 11 and 12 of the above-mentioned report).

Subsection 9(1) is also of some importance since it provides that on expiration of a limitation period in an action to recover a debt, damages or for an accounting, etc., not only is the right to sue prescribed but the cause of action itself is extinguished. This is clearly a provision of substantive law of general application throughout the Province. The statute also provides (section 14) that no cause of action that was statute barred on July 1, 1975, is revived and also that the statute applies to prescribe an action that arose before that date, by July 1, 1977, at the latest, if the limitation period under the 1975 Act would expire by that date and is shorter than the former limitation.

The 30 year period, after the right to sue for whatever damages might have resulted from the insufficiency of the sale price, expired on March 30, 1978. Since the statement of claim was only filed on September 19, 1978, unless some other legislation either statutory or constitutional could lead to a different conclusion, the right of action would have already been prescribed under section 8 of the Act and, by virtue of section 9, the cause of action itself would also have been extinguished.

c) Other Legislation

Insofar as other legislation is concerned, subsection 2(11) of the former *Laws Declaratory Act*, R.S.B.C. 1948, c. 179, declared that, except as provided in the *Trustee Act*, [R.S.B.C. 1948, c. 345], no claim of a *cestui que trust* against his trustee, held upon an express trust, could be barred by any statute of limitations. On the other hand, subsection 93(1) of the *Trustee Act* in 1948 [s. 86(1)] which may be found in R.S.B.C. 1960, c. 390, provided that, unless the claim was founded upon a fraud to which the trustee was a party or

[TRADUCTION] L'un des éléments importants de «l'équilibre» créé par les articles 6, 7 et 8 est que la prescription finale de trente ans est assez longue pour qu'aucune action intentée par un enfant en bas âge ne puisse être jugée irrecevable avant qu'il n'ait atteint sa majorité. Les autres actions visées par les articles 6 et 7 ne peuvent être prescrites définitivement pendant plus d'une génération.

Le juge d'appel Craig, dissident sur un autre point, a souscrit à cette opinion en ce qui concerne l'article 8 (voir les pages 11 et 12 du recueil de jurisprudence précité).

Le paragraphe 9(1) a également une certaine importance, car il dispose qu'à l'expiration du délai de prescription fixé pour une action intentée en vue de recouvrer une dette, des dommages-intérêts ou pour obtenir une reddition de compte, etc., non seulement le droit de poursuivre est-il prescrit mais la cause d'action elle-même est éteinte. Il s'agit clairement ici d'une règle de fond applicable dans toute la province. La Loi précise aussi (article 14) qu'aucune cause d'action prescrite le 1^{er} juillet 1975 ne renaît; elle dispose également que la prescription atteint l'action ayant pris naissance avant cette date, au plus tard le 1^{er} juillet 1977, si le délai de prescription prévu par la loi de 1975 est expiré à cette date et s'il est plus court que l'ancien délai de prescription.

Le 30 mars 1978, trente ans s'étaient écoulés depuis que le droit de poursuivre pour tout dommage subi par suite de l'insuffisance du prix d'achat avait pris naissance. Comme la déclaration n'a été déposée que le 19 septembre 1978, à moins que quelque autre texte législatif ou constitutionnel ne permette de tirer une conclusion différente, le droit de poursuivre était déjà prescrit en vertu de l'article 8 de la Loi et, en application de l'article 9, la cause d'action elle-même était déjà éteinte.

h) c) Autres textes législatifs

En ce qui concerne les autres textes législatifs pertinents, le paragraphe 2(11) de l'ancienne *Laws Declaratory Act*, R.S.B.C. 1948, chap. 179, disposait que, sous réserve des dispositions de la *Trustee Act* [R.S.B.C. 1948, chap. 345], aucune réclamation présentée par le *cestui que trust* contre son fiduciaire, sous le régime d'une fiducie explicite, ne pouvait être déclarée irrecevable en vertu d'un texte législatif. En revanche, le paragraphe 93(1) de la *Trustee Act* de 1948 [86(1)] que l'on trouve dans R.S.B.C. 1960, chap. 390, disposait que, sauf

was for the recovery of trust property, the trustee would enjoy all the rights and privileges of the limitation statutes of the Province. Even if it could have been argued that, contrary to the majority finding of the Supreme Court of Canada in the *Guerin* case (*supra*), the surrender created an express trust, the claim could not be considered as one of recovery of trust property and, more importantly, limitations provisions of these two statutes were repealed by the 1975 Act, which now deals in some considerable detail with trust property and breaches of trust. Finally, the wording of the sections of the 1975 Act, to which I have referred, make it quite clear that the provisions of section 8 would prevail.

d) Charter of Rights

The plaintiffs sought to challenge the validity of section 8 also under the *Canadian Charter of Rights and Freedoms* [being Part I of the *Constitution Act, 1982*, Schedule B, *Canada Act 1982*, 1982, c. 11 (U.K.)] and paragraphs 1(a) and 1(b) of the *Canadian Bill of Rights* [R.S.C. 1970, Appendix III]. In arguing that section 8 of the *B.C. Limitations Act* infringed the Charter, and more particularly section 7 which protects the right not to be deprived of one's life, liberty and security of the person, against the principles of fundamental justice, counsel for the plaintiffs referred to recent decisions such as *R. v. Antoine* (1983), 5 C.C.C. (3d) 97 (Ont. C.A.); *Re McDonald and The Queen* (1985), 51 O.R. (2d) 745 (C.A.); *R. v. Konechny* (1983), 10 C.C.C. (3d) 233 (B.C.C.A.) and several other such cases. I find however that these cases are not applicable and that none of the plaintiffs' Charter arguments can be sustained for two very simple reasons, the first one being that the Charter relates to the protection of the person and to personal rights and freedoms and does not apply to interest in or damages pertaining to the disposal of property. The second one is that the Charter, generally speaking, is not retrospective. It was held, in cases such as the ones cited above, to be applicable where there has been a continuing injustice following the date of promulgation of the Charter such as cases where

si la demande était fondée sur une fraude à laquelle avait participé le fiduciaire ou si elle visait le recouvrement de biens détenus en fiducie, le fiduciaire pouvait invoquer les lois prévoyant des délais de prescription dans la province. Même si on avait pu soutenir que, contrairement à l'opinion majoritaire exprimée par la Cour suprême du Canada dans l'arrêt *Guerin*, précité, la cession créait une fiducie explicite, la réclamation ne pourrait être considérée comme une action en recouvrement de biens détenus en fiducie, et fait plus important encore, les dispositions relatives à la prescription de ces deux lois ont été abrogées par la Loi de 1975 dont les dispositions visent maintenant de façon détaillée les biens détenus en fiducie et les violations de fiducie. Enfin, la formulation des articles de la Loi de 1975, auxquels j'ai fait référence, fait ressortir clairement que les dispositions de l'article 8 l'emportent.

d) La Charte des droits

Les demandeurs contestent la validité de l'article 8 en invoquant la *Charte canadienne des droits et libertés* [qui constitue la Partie I de la *Loi constitutionnelle de 1982*, annexe B, *Loi de 1982 sur le Canada*, 1982, chap. 11 (R.-U.)] ainsi que les alinéas 1a) et 1b) de la *Déclaration canadienne des droits* [S.R.C. 1970, Appendice III]. Pour étayer ces prétentions voulant que l'article 8 de la *Limitations Act* de la Colombie-Britannique déroge à la Charte, et plus particulièrement à l'article 7 qui garantit le droit à la vie, à la liberté et à la sécurité de la personne, auquel il ne peut être porté atteinte qu'en conformité avec les principes de la justice fondamentale, les avocats des demandeurs ont cité des décisions récentes telles *R. v. Antoine* (1983), 5 C.C.C. (3d) 97 (C.A. Ont.); *Re McDonald and The Queen* (1985), 51 O.R. (2d) 745 (C.A.); *R. v. Konechny* (1983), 10 C.C.C. (3d) 233 (C.A.C.-B.) et plusieurs autres affaires similaires. Toutefois, j'estime que ces décisions ne sont pas applicables et qu'aucun des arguments fondés sur la Charte et mis de l'avant par les demandeurs ne peut être retenu pour deux raisons très simples. D'une part, la Charte concerne la protection de la personne et des droits et libertés personnels, et elle ne vise pas à garantir les droits ni les dommages-intérêts relatifs à l'aliénation des biens. D'autre part, la Charte, d'une manière générale, ne s'applique pas rétroactive-

incarceration of a person continued beyond that date, where the law pursuant to which he was incarcerated at the time now infringes the Charter. This has been characterized as a prospective application of the Charter as opposed to a retrospective one. There is no question of prospective application here as the source of the complaint arose in 1948 and does not constitute a cause of action continuing beyond that time.

Two recent decisions of the B.C. Court of Appeal, namely *Grabbe v. Grabbe* and *Davidson v. Davidson Estate*, both reported in [1987] 2 W.W.R., at pages 642 and 657 respectively have held that section 15 of the Charter does not operate retrospectively.

I also subscribe to the argument that the equality rights provided for in subsection 15(1) of the Charter merely guarantee that persons similarly situated should receive similar treatment. They do not provide for identical treatment for all regardless of circumstances (*Smith, Kline & French Laboratories Limited v. Attorney General of Canada*, [1986] 1 F.C. 274 (T.D.)).

In the recent case of *R. v. Hamilton* (1986), 57 O.R. (2d) 412, which was referred to at trial, the Court of Appeal of Ontario found that section 15 of the Charter had been infringed because the equal application of criminal law, which is exclusively within federal jurisdiction, once enacted, cannot depend on the acquiescence of Provincial Attorneys General. That same case, however, recognizes the validity of the principle insofar as civil law is concerned in any event that section 15 of the Charter does not require each Province to enact the same laws within its own jurisdiction, as this would constitute a denial of federalism and would be destructive of the federal system itself. The Supreme Court of Canada in *R. v. Burnshine*, [1975] 1 S.C.R. 693; (1974), 15 C.C.C. (2d) 505, although dealing with the Bill of Rights and not

ment. Dans des affaires semblables à celles qui ont été citées, ce texte législatif a été jugé applicable dans les cas d'injustice se poursuivant après la date de la promulgation de la Charte, par exemple, dans les cas où une personne était maintenue en détention après cette date lorsque la loi en vertu de laquelle elle avait été incarcérée à l'époque était jugée maintenant incompatible avec les dispositions de la Charte. Il s'agit d'une application prospective de la Charte par opposition à une application rétroactive. Il n'est pas question d'une application prospective en l'espèce, car les faits à l'origine de la réclamation sont survenus en 1948, et ne sauraient donner naissance à un droit d'action après cette date.

Dans deux jugements rendus récemment, *Grabbe v. Grabbe* et *Davidson v. Davidson Estate*, [1987] 2 W.W.R. aux pages 642 et 657 respectivement, la Cour d'appel de la Colombie-Britannique a décidé que l'article 15 de la Charte n'avait pas un effet rétroactif.

Je souscris également à la thèse selon laquelle les droits à l'égalité prévus par le paragraphe 15(1) de la Charte garantissent simplement un traitement similaire aux personnes placées dans des situations similaires. Ces droits ne prévoient pas un traitement identique pour tous, quelles que soient les circonstances (*Smith, Kline & French Laboratories Limited c. Procureur général du Canada*, [1986] 1 C.F. 274 (1^{re} inst.)).

Dans un jugement rendu récemment, *R. v. Hamilton* (1986) 57 O.R. (2d) 412, qui a été cité à l'instruction, la Cour d'appel de l'Ontario a jugé qu'il avait été porté atteinte à l'article 15 de la Charte parce que l'application uniforme des règles du droit pénal adoptées par le gouvernement fédéral, qui a compétence exclusive dans ce domaine fédéral, ne saurait être subordonnée au consentement des procureurs généraux des provinces. Cette même décision reconnaît toutefois la validité du principe en ce qui concerne le droit civil en tout cas. L'article 15 de la Charte n'oblige pas chaque province à adopter les mêmes lois dans les domaines qui relèvent de sa compétence, ce qui équivaldrait à nier le fédéralisme et à détruire le système fédéral lui-même. Dans l'arrêt *R. c. Burnshine*, [1975] 1 R.C.S. 693; (1974), 15 C.C.C. (2d) 505, la Cour suprême du Canada a tiré la même conclusion relativement à la nature du fédéralisme

with the Charter, came to the same conclusion regarding the nature of federalism.

Where, in situations such as the present one, to the extent that federal legislation is silent on the matter, the liability of the Crown as well as the quantum and nature of damages which would be recoverable are to be determined by provincial law, it cannot logically be argued that it is discriminatory in a pejorative sense for the Crown to be subject to and to also enjoy the benefit provincial limitation provisions to the same extent as ordinary citizens of the province.

Insofar as section 7 of the Charter is concerned it has also been held in several cases, including *Smith, Kline & French (supra)* that life, liberty and security of the person mentioned therein refers to the bodily wellbeing of a person: it does not extend to the protection of property. Furthermore, a 30 year ultimate limitation period applicable to all residents of a province does not offend against the principles of fundamental justice.

e) Bill of Rights

The plaintiffs also submit that section 8 of the new *Limitation Act* violates paragraph 1(b) of the *Canadian Bill of Rights* and is, to the extent of that inconsistency, of no force or effect. The text of that legislation on which they rely is as follows:

1. It is hereby recognized and declared that in Canada there have existed and shall continue to exist without discrimination by reason of race, national origin, colour, religion or sex, the following human rights and fundamental freedoms, namely,

(b) the right of the individual to equality before the law and the protection of the law;

As in the case of the Charter, there is no requirement under the Bill of Rights for Parliament to enact uniform laws throughout the country. The plaintiffs are subject to section 8 of the *Limitation Act* in the same manner as are all other British Columbia litigants. In its as yet unreported decision in the case of *Algonquin Mercantile Corp. v. Dart Industries Canada Ltd.*, judgment dated June 17, 1987, Federal Court file A-692-86, our

bien que cette affaire porte sur l'application de la *Déclaration canadienne des droits* et non sur celle de la Charte.

Lorsque, dans des situations comme l'espèce et dans la mesure où la législation fédérale est silencieuse sur la question, la responsabilité de la Couronne de même que le montant et la nature des dommages-intérêts recouvrables doivent être déterminés par la loi provinciale, on ne peut soutenir logiquement qu'il est discriminatoire, dans le sens péjoratif du terme, d'assujettir la Couronne aux dispositions portant prescription de la législation provinciale tout en lui permettant d'en invoquer le bénéfice comme tout simple citoyen de la province.

En ce qui concerne l'article 17 de la Charte, il a également été décidé dans plusieurs affaires, y compris le jugement *Smith, Kline & French*, précité, que le droit à la vie, à la liberté et à la sécurité de la personne susmentionné se rapporte au bien-être physique de la personne: le texte législatif n'étend pas la protection aux biens. En outre, une période de prescription finale de trente ans applicable à tous les résidents de la province ne contrevient pas aux principes de la justice fondamentale.

e) La Déclaration des droits

Les demandeurs prétendent également que l'article 8 de la nouvelle *Limitation Act* est incompatible avec l'alinéa 1b) de la *Déclaration canadienne des droits* et qu'il n'a, dans cette mesure, aucune force. Voici le texte de la disposition législative qu'ils invoquent:

1. Il est par les présentes reconnu et déclaré que les droits de l'homme et les libertés fondamentales ci-après énoncés ont existé et continueront à exister pour tout individu au Canada quels que soient sa race, son origine nationale, sa couleur, sa religion ou son sexe:

b) le droit de l'individu à l'égalité devant la loi et à la protection de la loi;

À l'instar de la Charte, la Déclaration des droits n'oblige pas le Parlement à adopter des lois uniformes dans tout le pays. Les demandeurs sont visés par l'article 8 de la *Limitation Act* de la même façon que tous les autres plaideurs, en Colombie-Britannique. Dans une décision qui n'est pas encore publiée, l'affaire *Algonquin Mercantile Corp. c. Dart Industries Canada Ltd.*, en date du 17 juin 1987, n° de greffe: A-692-86, la Cour

Court of Appeal approved and applied the principle that even where the matter falls within federal jurisdiction, the provincial law where the cause arose and is being litigated, is to be exclusively applied in determining the rights of the litigants, where federal law is silent on the subject. The decision dealt with rates of interest to be applied and recognizes that the mere fact that the result would have been different had the law of some other province been applicable, is not to be taken into account.

Section 38 of the *Federal Court Act* meets the test that those who are similarly situated should receive similar treatment. The mere fact that litigants in other Provinces are not subject to an ultimate 30 year limitation does not constitute discrimination against paragraph 1(b) of the *Bill of Rights* any more than it does under sections 7 or 15 of the Charter. Although the Bill of Rights has been in effect for over 27 years, counsel for the plaintiffs were unable to cite one authoritative case capable of supporting this territorial argument for civil cases.

The plaintiffs also argued that paragraph 1(a) of the Bill of Rights which protects their right to "life, liberty, security of the person and enjoyment of property, and the right not to be deprived thereof except by due process of law" would render inoperative section 8 of the (B.C.) *Limitation Act* by reason of the overriding provisions of section 2 of the Bill of Rights.

In support of this proposition, counsel for the plaintiffs referred to a statement of Laskin C.J., speaking for the minority in the case of *Morgentaler v. The Queen*, [1976] 1 S.C.R. 616, at page 633; (1975), 20 C.C.C. (2d) 449, at page 462, and to another statement of Ritchie J. in *Curr v. The Queen*, [1972] S.C.R. 889. Neither of these statements support the proposition advanced by the plaintiffs.

Reliance by the courts on limitation provisions of general application does not constitute a denial of due process nor does the legislation itself constitute such a denial. An ultimate limitation period

d'appel fédérale a approuvé et appliqué le principe selon lequel, même lorsque le litige est de compétence fédérale, le droit de la province dans laquelle le litige a pris naissance et est jugé doit s'appliquer de façon exclusive afin de déterminer les droits des plaideurs, si le droit fédéral ne prévoit rien à cet égard. Cette affaire portait sur les taux d'intérêt qui doivent s'appliquer, et le juge a reconnu qu'il ne faut pas tenir compte du simple fait que l'issue aurait été différente si la loi d'une autre province s'était appliquée.

L'article 38 de la *Loi sur la Cour fédérale* satisfait au critère selon lequel il faut garantir un traitement similaire aux personnes placées dans des situations similaires. Le simple fait que les plaideurs d'autres provinces ne sont pas assujettis à une prescription finale de trente ans ne constitue pas de la discrimination, à l'encontre de l'alinéa 1b) de la *Déclaration des droits*, pas plus que c'en est une en vertu des articles 7 ou 15 de la Charte. Bien que la Déclaration des droits soit en vigueur depuis plus de vingt-sept ans, les avocats des demandeurs n'ont pu citer une affaire ayant fait jurisprudence leur permettant d'étayer cet argument de nature territoriale en matière civile.

Les demandeurs ont également soutenu que l'alinéa 1a) de la Déclaration des droits, qui protège leur droit «à la vie, à la liberté, à la sécurité de la personne ainsi qu'à la jouissance de ses biens, et le droit de ne s'en voir privé que par l'application régulière de la loi», rendrait inapplicable l'article 8 de la *Limitation Act* de la C.-B. du fait des dispositions dérogatoires de l'article 2 de la Déclaration des droits.

À l'appui de cette proposition, les avocats des demandeurs se sont reportés à une déclaration du juge en chef Laskin, lorsqu'il s'est exprimé au nom de la minorité dans l'arrêt *Morgentaler c. La Reine*, [1976] 1 R.C.S. 616, à la page 633; (1975), 20 C.C.C. (2d) 449, à la page 462, et à une déclaration du juge Ritchie dans l'arrêt *Curr c. La Reine*, [1972] R.C.S. 889. Ni l'une ni l'autre de ces déclarations n'appuie la proposition avancée par les demandeurs.

Le fait que les tribunaux invoquent les dispositions d'application générale portant prescription ne constitue pas un déni de l'application régulière de la loi, et les lois elles-mêmes ne constituent pas non

does not deny the plaintiffs the right to litigate nor the right of access to the court. It merely imposes a time limitation within which the action must be commenced. Thus it does not, as argued by the plaintiffs, fall within the situation which was before the Supreme Court of Newfoundland in *Piercey v. General Bakeries Ltd.; The Queen in right of Newfoundland et al., Intervenors* (1986), 31 D.L.R. (4th) 373.

f) Conclusion re: limitations

I conclude that the claim for insufficiency of the sale price to the Director in 1948 is statute barred and also extinguished pursuant to sections 8 and 9 of the 1975 B.C. *Limitation Act*, R.S.B.C. 1979, c. 236.

LACHES AND OTHER LIMITATION PROVISIONS

Counsel for the defendant raised the defence of laches and also relied upon other sections of the B.C. *Limitation Act* and also the former Act to be found in R.S.B.C. 1960, c. 370. Considerable argument was advanced and numerous authorities referred to by both counsel on these subjects.

In view of my finding regarding the 30 year ultimate limitation provisions, no useful purpose would be served in referring to these arguments nor to my findings of fact pertaining to them. I will however add that, after taking into account the saving provisions of sections 6 and 7 and the transitional provision of section 14 of the 1975 Act, I would have concluded that the action was in any event, also barred by reason of the former *Limitations Act* and also by reason of section 3(4) of the new Act.

FINDING

For the above reasons, judgment will issue dismissing the action. Costs will follow the event.

plus un tel déni. Une prescription finale ne prive pas les demandeurs du droit d'intenter un procès ni du droit d'accès devant les tribunaux. Elle impose simplement le délai dans lequel l'action doit être intentée. Ainsi, ce cas n'est pas, comme le prétendent les demandeurs, visé par la situation dont était saisie la Cour suprême de Terre-Neuve dans l'affaire *Piercey v. General Bakeries Ltd.; The Queen in right of Newfoundland et al., Intervenors*, (1986), 31 D.L.R. (4th) 373.

f) Conclusion relative à la prescription

Je conclus que l'action intentée pour insuffisance du prix de vente demandé au Directeur, en 1948, est prescrite en vertu des articles 8 et 9 de la *Limitation Act* de la C.-B. de 1975, R.S.B.C. 1979, chap. 236.

MANQUE DE DILIGENCE ET AUTRES DISPOSITIONS PORTANT PRESCRIPTION

Les avocats de la défenderesse ont invoqué en défense le manque de diligence et se sont également appuyés sur d'autres articles de la *Limitation Act* de la C.-B. ainsi que de l'ancienne Loi (R.S.B.C. 1960, chap. 370). Les avocats des deux parties ont avancé un grand nombre d'arguments et présenté une abondante jurisprudence à cet égard.

Compte tenu de ma conclusion relative aux dispositions portant prescription finale de trente ans, il serait inutile de me reporter à ces arguments ou à mes conclusions de fait connexes. Toutefois, j'ajouterais qu'après avoir tenu compte des dispositions d'exception des articles 6 et 7 ainsi que de la disposition transitoire de l'article 14 de la loi de 1975, j'aurais conclu que l'action était, quoi qu'il en soit, également prescrite du fait de l'ancienne *Limitations Act* ainsi que du paragraphe 3(4) de la nouvelle Loi.

CONCLUSION

Pour les motifs qui précèdent, la présente action est rejetée. Les frais suivront la cause.

Mavis Baker *Appellant*

v.

Minister of Citizenship and Immigration *Respondent*

The Canadian Council of Churches, the Canadian Foundation for Children, Youth and the Law, the Defence for Children International-Canada, the Canadian Council for Refugees, and the Charter Committee on Poverty Issues *Interveners*

INDEXED AS: BAKER v. CANADA (MINISTER OF CITIZENSHIP AND IMMIGRATION)

File No.: 25823.

1998: November 4; 1999: July 9.

Present: L'Heureux-Dubé, Gonthier, Cory, McLachlin, Iacobucci, Bastarache and Binnie JJ.

ON APPEAL FROM THE FEDERAL COURT OF APPEAL

Immigration — Humanitarian and compassionate considerations — Children's interests — Woman with Canadian-born dependent children ordered deported — Written application made on humanitarian and compassionate grounds for exemption to requirement that application for immigration be made abroad — Application denied without hearing or formal reasons — Whether procedural fairness violated — Immigration Act, R.S.C., 1985, c. I-2, ss. 82.1(1), 114(2) — Immigration Regulations, 1978, SOR/93-44, s. 2.1 — Convention on the Rights of the Child, Can. T.S. 1992 No. 3, Arts. 3, 9, 12.

Administrative law — Procedural fairness — Woman with Canadian-born dependent children ordered deported — Written application made on humanitarian and compassionate grounds for exemption to requirement that application for immigration be made abroad — Whether participatory rights accorded consistent with duty of procedural fairness — Whether failure to provide reasons violated principles of procedural fairness — Whether reasonable apprehension of bias.

Mavis Baker *Appelante*

c.

Le ministre de la Citoyenneté et de l'Immigration *Intimé*

et

Le Conseil canadien des églises, la Canadian Foundation for Children, Youth and the Law, la Défense des enfants-International-Canada, le Conseil canadien pour les réfugiés et le Comité de la Charte et des questions de pauvreté *Intervenants*

RÉPERTORIÉ: BAKER c. CANADA (MINISTRE DE LA CITOYENNETÉ ET DE L'IMMIGRATION)

N° du greffe: 25823.

1998: 4 novembre; 1999: 9 juillet.

Présents: Les juges L'Heureux-Dubé, Gonthier, Cory, McLachlin, Iacobucci, Bastarache et Binnie.

EN APPEL DE LA COUR D'APPEL FÉDÉRALE

Immigration — Raisons d'ordre humanitaire — Intérêts des enfants — Mesure d'expulsion contre une mère d'enfants nés au Canada — Demande écrite fondée sur des raisons d'ordre humanitaire sollicitant une dispense de l'exigence de présenter à l'extérieur du Canada une demande d'immigration — Demande rejetée sans audience ni motifs écrits — Y a-t-il eu violation de l'équité procédurale? — Loi sur l'immigration, L.R.C. (1985), ch. I-2, art. 82.1(1), 114(2) — Règlement sur l'immigration de 1978, DORS/93-44, art. 2.1 — Convention relative aux droits de l'enfant, R.T. Can. 1992 n° 3, art. 3, 9, 12.

Droit administratif — Équité procédurale — Mesure d'expulsion contre une mère d'enfants nés au Canada — Demande écrite fondée sur des raisons d'ordre humanitaire sollicitant une dispense de l'exigence de présenter à l'extérieur du Canada une demande d'immigration — Les droits de participation accordés étaient-ils compatibles avec l'obligation d'équité procédurale? — Le défaut d'exposer les motifs de décision a-t-il enfreint les principes d'équité procédurale? — Y a-t-il une crainte raisonnable de partialité?

Courts — Appellate review — Judge on judicial review certifying question for consideration of Court of Appeal — Legal effect of certified question — Immigration Act, R.S.C., 1985, c. I-2, s. 83(1).

Immigration — Humanitarian and compassionate considerations — Standard of review of humanitarian and compassionate decision — Best interests of claimant's children — Approach to be taken in reviewing humanitarian and compassionate decision where children affected.

Administrative law — Review of discretion — Approach to review of discretionary decision making.

The appellant, a woman with Canadian-born dependent children, was ordered deported. She then applied for an exemption, based on humanitarian and compassionate considerations under s. 114(2) of the *Immigration Act*, from the requirement that an application for permanent residence be made from outside Canada. This application was supported by letters indicating concern about the availability of medical treatment in her country of origin and the effect of her possible departure on her Canadian-born children. A senior immigration officer replied by letter stating that there were insufficient humanitarian and compassionate reasons to warrant processing the application in Canada. This letter contained no reasons for the decision. Counsel for the appellant, however, requested and was provided with the notes made by the investigating immigration officer and used by the senior officer in making his decision. The Federal Court — Trial Division, dismissed an application for judicial review but certified the following question pursuant to s. 83(1) of the Act: "Given that the Immigration Act does not expressly incorporate the language of Canada's international obligations with respect to the International Convention on the Rights of the Child, must federal immigration authorities treat the best interests of the Canadian child as a primary consideration in assessing an applicant under s. 114(2) of the *Immigration Act*?" The Court of Appeal limited its consideration to the question and found that the best interests of the children did not need to be given primacy in assessing such an application. The order that the appellant be removed from Canada, which was made after the immigration officer's decision, was stayed pending the result of this appeal.

Tribunaux — Contrôle en appel — Certification, par le juge siégeant en contrôle judiciaire, d'une question à soumettre à la Cour d'appel — Effet juridique d'une question certifiée — Loi sur l'immigration, L.R.C. (1985), ch. I-2, art. 83(1).

Immigration — Raisons d'ordre humanitaire — Norme de contrôle d'une décision fondée sur des raisons d'ordre humanitaire — Intérêt supérieur des enfants de la demanderesse — Approche du contrôle d'une décision fondée sur des raisons d'ordre humanitaire touchant des enfants.

Droit administratif — Contrôle du pouvoir discrétionnaire — Approche du contrôle de décisions discrétionnaires.

Une mesure d'expulsion a été prise contre l'appelante, mère d'enfants à charge nés au Canada. Elle a alors demandé d'être dispensée de faire sa demande de résidence permanente de l'extérieur du Canada, pour des raisons d'ordre humanitaire, conformément au par. 114(2) de la *Loi sur l'immigration*. Sa demande était appuyée de lettres exprimant des inquiétudes quant à la possibilité d'obtenir un traitement médical dans son pays d'origine et quant à l'effet de son départ éventuel sur ses enfants nés au Canada. Un agent d'immigration supérieur a répondu par lettre qu'il n'y avait pas suffisamment de raisons humanitaires pour justifier de traiter sa demande au Canada. Cette lettre ne donnait pas les motifs de la décision. L'avocat de l'appelante a cependant demandé et reçu les notes de l'agent investigateur, que l'agent supérieur d'immigration avait utilisées pour rendre sa décision. La Section de première instance de la Cour fédérale a rejeté une demande de contrôle judiciaire mais a certifié la question suivante en application du par. 83(1) de la Loi: «Vu que la Loi sur l'immigration n'incorpore pas expressément le langage des obligations internationales du Canada en ce qui concerne la Convention internationale relative aux droits de l'enfant, les autorités d'immigration fédérales doivent-elles considérer l'intérêt supérieur de l'enfant né au Canada comme une considération primordiale dans l'examen du cas d'un requérant sous le régime du par. 114(2) de la *Loi sur l'immigration*?» La Cour d'appel a limité son examen à cette question et a conclu qu'il n'était pas nécessaire d'accorder la primauté à l'intérêt supérieur des enfants dans l'appréciation d'une telle demande. Un sursis à la mesure d'expulsion de l'appelante prononcée après la décision de l'agent d'immigration, a été ordonné jusqu'à l'issue du présent pourvoi.

Held: The appeal should be allowed.

Per L'Heureux-Dubé, Gonthier, McLachlin, Bastarache and Binnie JJ.: Section 83(1) of the *Immigration Act* does not require the Court of Appeal to address only the certified question. Once a question has been certified, the Court of Appeal may consider all aspects of the appeal lying within its jurisdiction.

The duty of procedural fairness is flexible and variable and depends on an appreciation of the context of the particular statute and the rights affected. The purpose of the participatory rights contained within it is to ensure that administrative decisions are made using a fair and open procedure, appropriate to the decision being made and its statutory, institutional and social context, with an opportunity for those affected to put forward their views and evidence fully and have them considered by the decision-maker. Several factors are relevant to determining the content of the duty of fairness: (1) the nature of the decision being made and process followed in making it; (2) the nature of the statutory scheme and the terms of the statute pursuant to which the body operates; (3) the importance of the decision to the individual or individuals affected; (4) the legitimate expectations of the person challenging the decision; (5) the choices of procedure made by the agency itself. This list is not exhaustive.

A duty of procedural fairness applies to humanitarian and compassionate decisions. In this case, there was no legitimate expectation affecting the content of the duty of procedural fairness. Taking into account the other factors, although some suggest stricter requirements under the duty of fairness, others suggest more relaxed requirements further from the judicial model. The duty of fairness owed in these circumstances is more than minimal, and the claimant and others whose important interests are affected by the decision in a fundamental way must have a meaningful opportunity to present the various types of evidence relevant to their case and have it fully and fairly considered. Nevertheless, taking all the factors into account, the lack of an oral hearing or notice of such a hearing did not constitute a violation of the requirement of procedural fairness. The opportunity to produce full and complete written documentation was sufficient.

It is now appropriate to recognize that, in certain circumstances, including when the decision has important significance for the individual, or when there is a statutory right of appeal, the duty of procedural fairness will require a written explanation for a decision. Reasons are

Arrêt: Le pourvoi est accueilli.

Les juges L'Heureux-Dubé, Gonthier, McLachlin, Bastarache et Binnie: Le paragraphe 83(1) de la *Loi sur l'immigration* n'exige pas que la Cour d'appel traite seulement la question certifiée. Lorsqu'une question a été certifiée, la Cour d'appel peut examiner tous les aspects de l'appel qui relèvent de sa compétence.

L'obligation d'équité procédurale est souple et variable et repose sur une appréciation du contexte de la loi et des droits visés. Les droits de participation qui en font partie visent à garantir que les décisions administratives sont prises au moyen d'une procédure équitable et ouverte, adaptée au type de décision et à son contexte légal, institutionnel et social, comprenant la possibilité donnée aux personnes visées de présenter leur point de vue et des éléments de preuve qui seront dûment pris en considération par le décideur. Plusieurs facteurs sont pertinents pour déterminer le contenu de l'obligation d'équité procédurale: (1) la nature de la décision recherchée et le processus suivi pour y parvenir; (2) la nature du régime législatif et les termes de la loi régissant l'organisme; (3) l'importance de la décision pour les personnes visées; (4) les attentes légitimes de la personne qui conteste la décision; (5) les choix de procédure que l'organisme fait lui-même. Cette liste de facteurs n'est pas exhaustive.

L'obligation d'équité procédurale s'applique aux décisions d'ordre humanitaire. En l'espèce, il n'y avait pas d'attente légitime ayant une incidence sur la nature de l'obligation d'équité procédurale. Compte tenu des autres facteurs, bien que certains indiquent des exigences plus strictes en vertu de l'obligation d'équité, d'autres indiquent des exigences moins strictes et plus éloignées du modèle judiciaire. L'obligation d'équité dans ces circonstances est plus que minimale, et le demandeur et les personnes dont les intérêts sont profondément touchés par la décision doivent avoir une possibilité valable de présenter les divers types de preuves qui se rapportent à leur affaire et de les voir évalués de façon complète et équitable. Néanmoins, compte tenu de tous ces facteurs, le fait qu'il n'y ait pas eu d'audience ni d'avis d'audience ne constituait pas un manquement à l'obligation d'équité procédurale. La possibilité de produire une documentation écrite complète était suffisante.

Il est maintenant approprié de reconnaître que, dans certaines circonstances, notamment lorsque la décision revêt une grande importance pour l'individu, ou lorsqu'il existe un droit d'appel prévu par la loi, l'obligation d'équité procédurale requerra une explication écrite de

required here given the profound importance of this decision to those affected. This requirement was fulfilled by the provision of the junior immigration officer's notes, which are to be taken to be the reasons for decision. Accepting such documentation as sufficient reasons upholds the principle that individuals are entitled to fair procedures and open decision-making, but recognizes that, in the administrative context, this transparency may take place in various ways.

Procedural fairness also requires that decisions be made free from a reasonable apprehension of bias, by an impartial decision-maker. This duty applies to all immigration officers who play a role in the making of decisions. Because they necessarily relate to people of diverse backgrounds, from different cultures, races, and continents, immigration decisions demand sensitivity and understanding by those making them. They require a recognition of diversity, an understanding of others, and an openness to difference. Statements in the immigration officer's notes gave the impression that he may have been drawing conclusions based not on the evidence before him, but on the fact that the appellant was a single mother with several children and had been diagnosed with a psychiatric illness. Here, a reasonable and well-informed member of the community would conclude that the reviewing officer had not approached this case with the impartiality appropriate to a decision made by an immigration officer. The notes therefore give rise to a reasonable apprehension of bias.

The concept of discretion refers to decisions where the law does not dictate a specific outcome, or where the decision-maker is given a choice of options within a statutorily imposed set of boundaries. Administrative law has traditionally approached the review of decisions classified as discretionary separately from those seen as involving the interpretation of rules of law. Review of the substantive aspects of discretionary decisions is best approached within the pragmatic and functional framework defined by this Court's decisions, especially given the difficulty in making rigid classifications between discretionary and non-discretionary decisions. Though discretionary decisions will generally be given considerable respect, that discretion must be exercised in accordance with the boundaries imposed in the statute, the principles of the rule of law, the principles of administrative law, the fundamental values of Canadian society, and the principles of the *Charter*.

la décision. Des motifs écrits sont nécessaires en l'espèce, étant donné l'importance cruciale de la décision pour les personnes visées. Cette obligation a été remplie par la production des notes de l'agent subalterne, qui doivent être considérées comme les motifs de la décision. L'admission de ces documents comme motifs de la décision confirme le principe selon lequel les individus ont droit à une procédure équitable et à la transparence de la prise de décision, mais reconnaît aussi qu'en matière administrative, cette transparence peut être atteinte de différentes façons.

L'équité procédurale exige également que les décisions soient rendues par un décideur impartial, sans crainte raisonnable de partialité. Cette obligation s'applique à tous les agents d'immigration qui jouent un rôle significatif dans la prise de décision. Parce qu'elles visent nécessairement des personnes de provenances diverses, issues de cultures, de races et de continents différents, les décisions en matière d'immigration exigent de ceux qui les rendent sensibilité et compréhension. Elles exigent la reconnaissance de la diversité, la compréhension des autres et l'ouverture d'esprit à la différence. Les déclarations contenues dans les notes de l'agent d'immigration donnent l'impression qu'il peut avoir tiré des conclusions en se fondant non pas sur la preuve dont il disposait, mais sur le fait que l'appelante était une mère célibataire ayant plusieurs enfants, et était atteinte de troubles psychiatriques. En l'espèce, un membre raisonnable et bien informé de la communauté conclurait que l'agent n'a pas traité cette affaire avec l'impartialité requise dans une décision rendue par un agent d'immigration. Les notes donnent donc lieu à une crainte raisonnable de partialité.

La notion de pouvoir discrétionnaire s'applique dans les cas où le droit ne dicte pas une décision précise, ou quand le décideur se trouve devant un choix d'options à l'intérieur de limites imposées par la loi. Le droit administratif a traditionnellement abordé le contrôle judiciaire des décisions discrétionnaires séparément de décisions sur l'interprétation de règles de droit. Le contrôle des éléments de fond d'une décision discrétionnaire est mieux envisagé selon la démarche pragmatique et fonctionnelle définie par la jurisprudence de notre Cour, compte tenu particulièrement de la difficulté de faire des classifications rigides entre les décisions discrétionnaires et les décisions non discrétionnaires. Même si en général il sera accordé un grand respect aux décisions discrétionnaires, il faut que le pouvoir discrétionnaire soit exercé conformément aux limites imposées dans la loi, aux principes de la primauté du droit, aux principes du droit administratif, aux valeurs fondamentales de la société canadienne, et aux principes de la *Charte*.

In applying the applicable factors to determining the standard of review, considerable deference should be accorded to immigration officers exercising the powers conferred by the legislation, given the fact-specific nature of the inquiry, its role within the statutory scheme as an exception, and the considerable discretion evidenced by the statutory language. Yet the absence of a privative clause, the explicit contemplation of judicial review by the Federal Court — Trial Division, and the individual rather than polycentric nature of the decision also suggest that the standard should not be as deferential as “patent unreasonableness”. The appropriate standard of review is, therefore, reasonableness *simpliciter*.

The wording of the legislation shows Parliament’s intention that the decision be made in a humanitarian and compassionate manner. A reasonable exercise of the power conferred by the section requires close attention to the interests and needs of children since children’s rights, and attention to their interests, are central humanitarian and compassionate values in Canadian society. Indications of these values may be found in the purposes of the Act, in international instruments, and in the Minister’s guidelines for making humanitarian and compassionate decisions. Because the reasons for this decision did not indicate that it was made in a manner which was alive, attentive, or sensitive to the interests of the appellant’s children, and did not consider them as an important factor in making the decision, it was an unreasonable exercise of the power conferred by the legislation. In addition, the reasons for decision failed to give sufficient weight or consideration to the hardship that a return to the appellant’s country of origin might cause her.

Per Cory and Iacobucci JJ.: The reasons and disposition of L’Heureux-Dubé J. were agreed with apart from the effect of international law on the exercise of ministerial discretion under s. 114(2) of the *Immigration Act*. The certified question must be answered in the negative. The principle that an international convention ratified by the executive is of no force or effect within the Canadian legal system until incorporated into domestic law does not survive intact the adoption of a principle of law which permits reference to an unincorporated convention during the process of statutory interpretation.

Dans l’application des facteurs pertinents à la détermination de la norme de contrôle appropriée, on devrait faire preuve d’une retenue considérable envers les décisions d’agents d’immigration exerçant les pouvoirs conférés par la loi, compte tenu de la nature factuelle de l’analyse, de son rôle d’exception au sein du régime législatif et de la large discrétion accordée par le libellé de la loi. Toutefois, l’absence de clause privative, la possibilité expressément prévue d’un contrôle judiciaire par la Cour fédérale — Section de première instance, ainsi que la nature individuelle plutôt que polycentrique de la décision, tendent aussi à indiquer que la norme applicable ne devrait pas en être une d’aussi grande retenue que celle du caractère «manifestement déraisonnable». La norme de contrôle appropriée est celle de la décision raisonnable *simpliciter*.

Le libellé de la législation révèle l’intention du Parlement de faire en sorte que la décision soit fondée sur des raisons d’ordre humanitaire. L’exercice raisonnable du pouvoir conféré par l’article exige que soit prêtée une attention minutieuse aux intérêts et aux besoins des enfants puisque les droits des enfants, et la considération de leurs intérêts, sont des valeurs humanitaires centrales dans la société canadienne. Une indication de ces valeurs se trouve dans les objectifs de la Loi, dans les instruments internationaux, et dans les lignes directrices régissant les décisions d’ordre humanitaire publiées par le ministre. Étant donné que les motifs de la décision n’indiquent pas qu’elle a été rendue d’une manière réceptive, attentive ou sensible à l’intérêt des enfants de l’appelante, ni que leur intérêt a été considéré comme un facteur décisionnel important, elle constituait un exercice déraisonnable du pouvoir conféré par la loi. En outre, les motifs de la décision n’accordent pas suffisamment d’importance ou de poids aux difficultés qu’un retour de l’appelante dans son pays d’origine pouvait lui susciter.

Les juges Cory et Iacobucci: Les motifs du juge L’Heureux-Dubé et le dispositif qu’elle propose sont acceptés sauf pour ce qui concerne la question de l’effet du droit international sur l’exercice du pouvoir discrétionnaire conféré au ministre par le par. 114(2) de la *Loi sur l’immigration*. La question certifiée devrait recevoir une réponse négative. Le principe qu’une convention internationale ratifiée par le pouvoir exécutif n’a aucun effet en droit canadien tant qu’elle n’est pas incorporée dans le droit interne ne peut pas survivre intact après l’adoption d’un principe de droit qui autorise le recours dans le processus d’interprétation des lois, aux dispositions d’une convention qui n’a pas été intégrée dans la législation.

The judgment of L'Heureux-Dubé, Gonthier, McLachlin, Bastarache and Binnie JJ. was delivered by

L'HEUREUX-DUBÉ J. — Regulations made pursuant to s. 114(2) of the *Immigration Act*, R.S.C., 1985, c. I-2, empower the respondent Minister to facilitate the admission to Canada of a person where the Minister is satisfied, owing to humanitarian and compassionate considerations, that admission should be facilitated or an exemption from the regulations made under the Act should be granted. At the centre of this appeal is the approach to be taken by a court to judicial review of such decisions, both on procedural and substantive grounds. It also raises issues of reasonable apprehension of bias, the provision of written reasons as part of the duty of fairness, and the role of children's interests in reviewing decisions made pursuant to s. 114(2).

I. Factual Background

Mavis Baker is a citizen of Jamaica who entered Canada as a visitor in August of 1981 and has remained in Canada since then. She never received permanent resident status, but supported herself illegally as a live-in domestic worker for 11 years. She has had four children (who are all Canadian citizens) while living in Canada: Paul Brown, born in 1985, twins Patricia and Peter Robinson, born in 1989, and Desmond Robinson, born in 1992. After Desmond was born, Ms. Baker suffered from post-partum psychosis and was diagnosed with paranoid schizophrenia. She applied for welfare at that time. When she was first diagnosed with mental illness, two of her children were placed in the care of their

and the Law, la Défense des enfants-International-Canada et le Conseil canadien pour les réfugiés.

Barbara Jackman et Marie Chen, pour l'intervenant le Conseil canadien des églises.

Version française du jugement des juges L'Heureux-Dubé, Gonthier, McLachlin, Bastarache et Binnie rendu par

LE JUGE L'HEUREUX-DUBÉ — Le règlement passé en vertu du par. 114(2) de la *Loi sur l'immigration*, L.R.C. (1985), ch. I-2, autorise le ministre intimé à faciliter l'admission au Canada d'une personne quand il est convaincu, pour des raisons d'ordre humanitaire, que l'admission devrait être facilitée ou qu'une dispense d'application des règlements passés aux termes de la Loi devrait être accordée. Le présent pourvoi porte essentiellement sur la démarche à suivre lorsqu'un tribunal procède au contrôle judiciaire de ces décisions, à la fois sur le fond et sur le plan de la procédure. Ce pourvoi soulève également des questions relatives à la crainte raisonnable de partialité, à la rédaction de motifs écrits dans le cadre de l'obligation d'agir équitablement et au rôle de l'intérêt des enfants dans le contrôle judiciaire de décisions rendues conformément au par. 114(2).

I. Les faits

Mavis Baker, citoyenne de la Jamaïque, est entrée au Canada à titre de visiteur en août 1981 et y vit depuis. Elle n'a jamais obtenu le statut de résidente permanente, mais a subvenu illégalement à ses besoins en travaillant pendant 11 ans comme travailleur domestique. Elle a eu quatre enfants (qui sont tous citoyens canadiens) au Canada: Paul Brown, né en 1985, les jumeaux Patricia et Peter Robinson, nés en 1989, et Desmond Robinson, né en 1992. Après la naissance de Desmond, M^{me} Baker a souffert d'une psychose post-partum et on a diagnostiqué qu'elle était atteinte d'une schizophrénie paranoïde. À cette époque, elle a présenté une demande d'assistance sociale. Quand

natural father, and the other two were placed in foster care. The two who were in foster care are now again under her care, since her condition has improved.

on a découvert qu'elle était atteinte de troubles mentaux, deux de ses enfants ont été confiés aux soins de leur père naturel et les deux autres ont été placés en foyer d'accueil. Son état s'étant amélioré, elle a de nouveau la garde des deux enfants placés en foyer d'accueil.

3 The appellant was ordered deported in December 1992, after it was determined that she had worked illegally in Canada and had overstayed her visitor's visa. In 1993, Ms. Baker applied for an exemption from the requirement to apply for permanent residence outside Canada, based upon humanitarian and compassionate considerations, pursuant to s. 114(2) of the *Immigration Act*. She had the assistance of counsel in filing this application, and included, among other documentation, submissions from her lawyer, a letter from her doctor, and a letter from a social worker with the Children's Aid Society. The documentation provided indicated that, although she was still experiencing psychiatric problems, she was making progress. It also stated that she might become ill again if she were forced to return to Jamaica, since treatment might not be available for her there. Ms. Baker's submissions also clearly indicated that she was the sole caregiver for two of her Canadian-born children, and that the other two depended on her for emotional support and were in regular contact with her. The documentation suggested that she too would suffer emotional hardship if she were separated from them.

En décembre 1992, une ordonnance d'expulsion a été prise contre l'appelante, lorsqu'on a découvert qu'elle avait travaillé illégalement au Canada et avait séjourné au-delà de son visa de visiteur. En 1993, M^{me} Baker a demandé d'être dispensée de faire sa demande de résidence permanente de l'extérieur du Canada, pour des raisons d'ordre humanitaire, conformément au par. 114(2) de la *Loi sur l'immigration*. Elle a obtenu l'aide d'un avocat pour remplir cette demande, et a notamment ajouté, comme documents additionnels, des observations de son avocat, une lettre de son médecin et une lettre d'un travailleur social de la Société d'aide à l'enfance. Les documents présentés indiquaient que, même si elle éprouvait toujours des problèmes psychiatriques, elle faisait des progrès, mais qu'elle pourrait retomber malade si elle était forcée de retourner en Jamaïque, parce qu'elle ne pourrait peut-être pas y bénéficier d'un traitement. Madame Baker a aussi clairement indiqué qu'elle était la seule à pouvoir prendre soin de deux de ses enfants nés au Canada et que ses deux autres enfants avaient besoin de son soutien affectif et étaient régulièrement en contact avec elle. Les documents mentionnaient également qu'elle subirait aussi des difficultés d'ordre émotionnel si elle était séparée d'eux.

4 The response to this request was contained in a letter dated April 18, 1994 and signed by Immigration Officer M. Caden, stating that a decision had been made that there were insufficient humanitarian and compassionate grounds to warrant processing Ms. Baker's application for permanent residence within Canada. This letter contained no reasons for the decision.

En réponse à cette demande, une lettre datée du 18 avril 1994 et signée par l'agent d'immigration M. Caden a informé M^{me} Baker de la décision qu'il n'y avait pas suffisamment de raisons humanitaires pour justifier de traiter au Canada sa demande de résidence permanente, sans toutefois donner les motifs de la décision.

5 Upon request of the appellant's counsel, she was provided with the notes made by Immigration Officer G. Lorenz, which were used by Officer Caden when making his decision. After a summary

À la demande de l'avocat de l'appelante, les notes de l'agent d'immigration G. Lorenz, que l'agent Caden a utilisées pour rendre sa décision, ont été remises à l'appelante. Après un résumé de

of the history of the case, Lorenz's notes read as follows:

PC is unemployed — on Welfare. No income shown — no assets. Has four Cdn.-born children — four other children in Jamaica — HAS A TOTAL OF EIGHT CHILDREN

Says only two children are in her "direct custody". (No info on who has ghe [*sic*] other two). There is nothing for her in Jamaica — hasn't been there in a long time — no longer close to her children there — no jobs there — she has no skills other than as a domestic — children would suffer — can't take them with her and can't leave them with anyone here. Says has suffered from a mental disorder since '81 — is now an outpatient and is improving. If sent back will have a relapse.

Letter from Children's Aid — they say PC has been diagnosed as a paranoid schizophrenic. — children would suffer if returned — Letter of Aug. '93 from psychiatrist from Ont. Govm't. Says PC had post-partum psychosis and had a brief episode of psychosis in Jam. when was 25 yrs. old. Is now an out-patient and is doing relatively well — deportation would be an extremely stressful experience.

Lawyer says PS [*sic*] is sole caregiver and single parent of two Cdn born children. Pc's mental condition would suffer a setback if she is deported etc.

This case is a catastrophe [*sic*]. It is also an indictment of our "system" that the client came as a visitor in Aug. '81, was not ordered deported until Dec. '92 and in APRIL '94 IS STILL HERE!

The PC is a paranoid schizophrenic and on welfare. She has no qualifications other than as a domestic. She has FOUR CHILDREN IN JAMAICA AND ANOTHER FOUR BORN HERE. She will, of course, be a tremendous strain on our social welfare systems for (probably) the rest of her life. There are no H&C factors other than her FOUR CANADIAN-BORN CHILDREN. Do we let her stay because of that? I am of the opinion that Canada can no longer afford this type of generosity. However, because of the circumstances involved, there

l'historique de l'affaire, les notes de M. Lorenz se lisent:

[TRADUCTION] PC est sans emploi — reçoit l'assistance sociale. Aucun revenu connu — pas de biens. A quatre enfants nés au Canada, quatre autres en Jamaïque — HUIT ENFANTS AU TOTAL

Dit que seulement deux enfants sont sous sa garde directe. (Aucun renseignement sur la garde des deux autres). Il n'y a rien qui l'attend en Jamaïque — n'y est pas allée depuis longtemps — n'est plus proche de ses enfants qui s'y trouvent — pas d'emplois — n'a pas d'autre métier que celui de domestique — les enfants souffriraient — elle ne peut pas les emmener avec elle et elle n'a personne ici à qui les confier. Dit qu'elle souffre de troubles mentaux depuis 1981 — elle est actuellement une patiente en consultation externe et son état s'améliore. Si elle est renvoyée là-bas, elle fera une rechute.

Lettre de la Société d'aide à l'enfance — dit que PC souffre d'une schizophrénie paranoïde — les enfants souffriraient, si elle était renvoyée. Lettre d'août 1993 d'un psychiatre du gouvernement de l'Ontario — dit que PC a une psychose post-partum et a eu une brève période de psychose en Jamaïque quand elle avait 25 ans. Elle est maintenant patiente en consultation externe et se porte relativement bien — l'expulsion serait une expérience extrêmement stressante.

L'avocat dit que PC est une mère célibataire et qu'elle est la seule à pouvoir prendre soin de deux de ses enfants nés au Canada. L'état mental de PC se détériorerait si elle devait être déportée etc.

Cette affaire est une catastrophe. C'est aussi une condamnation de notre système: la cliente est arrivée comme visiteur en août 1981, une ordonnance d'expulsion n'a été prise qu'en décembre 1992 et en AVRIL 1994 ELLE EST TOUJOURS ICI!

PC est atteinte de schizophrénie paranoïde et reçoit l'assistance sociale. Elle n'a pas d'autres qualifications que de domestique. Elle a QUATRE ENFANTS EN JAMAÏQUE ET QUATRE AUTRES NÉS ICI. Elle sera, bien entendu, un fardeau excessif pour nos systèmes d'aide sociale (probablement) pour le reste de sa vie. Il n'existe pas d'autres facteurs d'ordre humanitaire que ses QUATRE ENFANTS NÉS AU CANADA. Devons-nous lui permettre de rester pour ça? Je suis d'avis que le Canada ne peut plus se permettre cette sorte de générosité. Toutefois, compte tenu des circonstances, il est possible qu'il y ait une mauvaise presse.

is a potential for adverse publicity. I recommend refusal but you may wish to clear this with someone at Region.

There is also a potential for violence — see charge of “assault with a weapon” [Capitalization in original.]

⁶ Following the refusal of her application, Ms. Baker was served, on May 27, 1994, with a direction to report to Pearson Airport on June 17 for removal from Canada. Her deportation has been stayed pending the result of this appeal.

II. Relevant Statutory Provisions and Provisions of International Treaties

⁷ *Immigration Act*, R.S.C., 1985, c. I-2

82.1 (1) An application for judicial review under the *Federal Court Act* with respect to any decision or order made, or any matter arising, under this Act or the rules or regulations thereunder may be commenced only with leave of a judge of the Federal Court — Trial Division.

83. (1) A judgment of the Federal Court — Trial Division on an application for judicial review with respect to any decision or order made, or any matter arising, under this Act or the rules or regulations thereunder may be appealed to the Federal Court of Appeal only if the Federal Court — Trial Division has at the time of rendering judgment certified that a serious question of general importance is involved and has stated that question.

114. . . .

(2) The Governor in Council may, by regulation, authorize the Minister to exempt any person from any regulation made under subsection (1) or otherwise facilitate the admission of any person where the Minister is satisfied that the person should be exempted from that regulation or that the person's admission should be facilitated owing to the existence of compassionate or humanitarian considerations.

Immigration Regulations, 1978, SOR/78-172, as amended by SOR/93-44

2.1 The Minister is hereby authorized to exempt any person from any regulation made under subsection 114(1) of the Act or otherwise facilitate the admission to

Je recommande le rejet, mais vous désirerez peut-être obtenir l'approbation de quelqu'un au centre régional.

Violence possible — voir l'accusation d'agression armée. [Majuscules dans l'original.]

À la suite du rejet de sa demande, M^{me} Baker a reçu signification, le 27 mai 1994, de l'ordre de se présenter à l'aéroport Pearson le 17 juin pour son renvoi du Canada. Un sursis d'expulsion a été ordonné jusqu'à l'issue du présent pourvoi.

II. Les dispositions législatives et des traités internationaux

Loi sur l'immigration, L.R.C. (1985), ch. I-2

82.1 (1) La présentation d'une demande de contrôle judiciaire aux termes de la *Loi sur la Cour fédérale* ne peut, pour ce qui est des décisions ou ordonnances rendues, des mesures prises ou de toute question soulevée dans le cadre de la présente loi ou de ses textes d'application — règlements ou règles — se faire qu'avec l'autorisation d'un juge de la Section de première instance de la Cour fédérale.

83. (1) Le jugement de la Section de première instance de la Cour fédérale rendu sur une demande de contrôle judiciaire relative à une décision ou ordonnance rendue, une mesure prise ou toute question soulevée dans le cadre de la présente loi ou de ses textes d'application — règlements ou règles — ne peut être porté en appel devant la Cour d'appel fédérale que si la Section de première instance certifie dans son jugement que l'affaire soulève une question grave de portée générale et énonce celle-ci.

114. . . .

(2) Le gouverneur en conseil peut, par règlement, autoriser le ministre à accorder, pour des raisons d'ordre humanitaire, une dispense d'application d'un règlement pris aux termes du paragraphe (1) ou à faciliter l'admission de toute autre manière.

Règlement sur l'immigration de 1978, DORS/78-172, modifié par DORS/93-44

2.1 Le ministre est autorisé à accorder, pour des raisons d'ordre humanitaire, une dispense d'application d'un règlement pris aux termes du paragraphe 114(1) de

Canada of any person where the Minister is satisfied that the person should be exempted from that regulation or that the person's admission should be facilitated owing to the existence of compassionate or humanitarian considerations.

Convention on the Rights of the Child, Can. T.S. 1992 No. 3

Article 3

1. In all actions concerning children, whether undertaken by public or private social welfare institutions, courts of law, administrative authorities or legislative bodies, the best interests of the child shall be a primary consideration.

2. States Parties undertake to ensure the child such protection and care as is necessary for his or her well-being, taking into account the rights and duties of his or her parents, legal guardians, or other individuals legally responsible for him or her, and, to this end, shall take all appropriate legislative and administrative measures.

Article 9

1. States Parties shall ensure that a child shall not be separated from his or her parents against their will, except when competent authorities subject to judicial review determine, in accordance with applicable law and procedures, that such separation is necessary for the best interests of the child. Such determination may be necessary in a particular case such as one involving abuse or neglect of the child by the parents, or one where the parents are living separately and a decision must be made as to the child's place of residence.

2. In any proceedings pursuant to paragraph 1 of the present article, all interested parties shall be given an opportunity to participate in the proceedings and make their views known.

3. States Parties shall respect the right of the child who is separated from one or both parents to maintain personal relations and direct contact with both parents on a regular basis, except if it is contrary to the child's best interests.

4. Where such separation results from any action initiated by a State Party, such as the detention, imprisonment, exile, deportation or death (including death arising from any cause while the person is in the custody of the State) of one or both parents or of the child, that State Party shall, upon request, provide the parents, the child or, if appropriate, another member of the family

la Loi ou à faciliter l'admission au Canada de toute autre manière.

Convention relative aux droits de l'enfant, R.T. Can. 1992 n° 3

Article 3

1. Dans toutes les décisions qui concernent les enfants, qu'elles soient le fait des institutions publiques ou privées de protection sociale, des tribunaux, des autorités administratives ou des organes législatifs, l'intérêt supérieur de l'enfant doit être une considération primordiale.

2. Les États parties s'engagent à assurer à l'enfant la protection et les soins nécessaires à son bien-être, compte tenu des droits et des devoirs de ses parents, de ses tuteurs ou des autres personnes légalement responsables de lui, et ils prennent à cette fin toutes les mesures législatives et administratives appropriées.

Article 9

1. Les États parties veillent à ce que l'enfant ne soit pas séparé de ses parents contre leur gré, à moins que les autorités compétentes ne décident, sous réserve de révision judiciaire et conformément aux lois et procédures applicables, que cette séparation est nécessaire dans l'intérêt supérieur de l'enfant. Une décision en ce sens peut être nécessaire dans certains cas particuliers, par exemple lorsque les parents maltraitent ou négligent l'enfant, ou lorsqu'ils vivent séparément et qu'une décision doit être prise au sujet du lieu de résidence de l'enfant.

2. Dans tous les cas prévus au paragraphe 1 du présent article, toutes les parties intéressées doivent avoir la possibilité de participer aux délibérations et de faire connaître leurs vues.

3. Les États parties respectent le droit de l'enfant séparé de ses deux parents ou de l'un d'eux d'entretenir régulièrement des relations personnelles et des contacts directs avec ses deux parents, sauf si cela est contraire à l'intérêt supérieur de l'enfant.

4. Lorsque la séparation résulte de mesures prises par un État partie, telles que la détention, l'emprisonnement, l'exil, l'expulsion ou la mort (y compris la mort, quelle qu'en soit la cause, survenue en cours de détention) des deux parents ou de l'un d'eux, ou de l'enfant, l'État partie donne sur demande aux parents, à l'enfant ou, s'il y a lieu, à un autre membre de la famille les renseignements

with the essential information concerning the whereabouts of the absent member(s) of the family unless the provision of the information would be detrimental to the well-being of the child. States Parties shall further ensure that the submission of such a request shall of itself entail no adverse consequences for the person(s) concerned.

Article 12

1. States Parties shall assure to the child who is capable of forming his or her own views the right to express those views freely in all matters affecting the child, the views of the child being given due weight in accordance with the age and maturity of the child.

2. For this purpose, the child shall in particular be provided the opportunity to be heard in any judicial and administrative proceedings affecting the child, either directly, or through a representative or an appropriate body, in a manner consistent with the procedural rules of national law.

III. Judgments

A. *Federal Court — Trial Division* (1995), 101 F.T.R. 110

8

Simpson J. delivered oral reasons dismissing the appellant's judicial review application. She held that since there were no reasons given by Officer Caden for his decision, no affidavit was provided, and no reasons were required, she would assume, in the absence of evidence to the contrary, that he acted in good faith and made a decision based on correct principles. She rejected the appellant's argument that the statement in Officer Lorenz's notes that Ms. Baker would be a strain on the welfare system was not supported by the evidence, holding that it was reasonable to conclude from the reports provided that Ms. Baker would not be able to return to work. She held that the language of Officer Lorenz did not raise a reasonable apprehension of bias, and also found that the views expressed in his notes were unimportant, because they were not those of the decision-maker, Officer Caden. She rejected the appellant's argument that the *Convention on the Rights of the Child* mandated that the appellant's interests be given priority in s. 114(2) decisions, holding that the Convention did not apply to this situation, and was not part of domestic law. She also held that the evidence

essentiels sur le lieu où se trouvent le membre ou les membres de la famille, à moins que la divulgation de ces renseignements ne soit préjudiciable au bien-être de l'enfant. Les États parties veillent en outre à ce que la présentation d'une telle demande n'entraîne pas en elle-même de conséquences fâcheuses pour la personne ou les personnes intéressées.

Article 12

1. Les États parties garantissent à l'enfant qui est capable de discernement le droit d'exprimer librement son opinion sur toute question l'intéressant, les opinions de l'enfant étant dûment prises en considération eu égard à son âge et à son degré de maturité.

2. À cette fin, on donnera notamment à l'enfant la possibilité d'être entendu dans toute procédure judiciaire ou administrative l'intéressant, soit directement, soit par l'intermédiaire d'un représentant ou d'un organisme approprié, de façon compatible avec les règles de procédure de la législation nationale.

III. Les jugements

A. *Cour fédérale — Section de première instance* (1995), 101 F.T.R. 110

Le juge Simpson a prononcé à l'audience les motifs rejetant la demande de contrôle judiciaire de l'appelante. Elle a statué que, puisque l'agent Caden n'avait pas motivé sa décision, qu'aucun affidavit n'avait été fourni, et qu'aucun motif n'était requis, elle présumerait, en l'absence de preuve contraire, qu'il avait agi de bonne foi et avait rendu la décision en se fondant sur des principes appropriés. Elle a rejeté l'argument de l'appelante selon lequel l'affirmation dans les notes de l'agent Lorenz que M^{me} Baker serait un fardeau pour le système d'aide sociale n'était pas étayée par la preuve, concluant qu'il était raisonnable de conclure au vu des rapports fournis que M^{me} Baker ne pourrait pas reprendre le travail. Elle a conclu que le langage de l'agent Lorenz ne donnait pas lieu à une crainte raisonnable de partialité, et a également conclu que les opinions exprimées dans ses notes étaient sans importance parce qu'elles n'étaient pas celles du décideur, l'agent Caden. Elle a rejeté l'argument de l'appelante selon lequel la *Convention relative aux droits de l'enfant* commandait que l'intérêt de l'appelante prime dans les décisions fondées sur le par. 114(2), concluant que

showed the children were a significant factor in the decision-making process. She rejected the appellant's submission that the Convention gave rise to a legitimate expectation that the children's interests would be a primary consideration in the decision.

Simpson J. certified the following as a "serious question of general importance" under s. 83(1) of the *Immigration Act*: "Given that the Immigration Act does not expressly incorporate the language of Canada's international obligations with respect to the International Convention on the Rights of the Child, must federal immigration authorities treat the best interests of the Canadian child as a primary consideration in assessing an applicant under s. 114(2) of the *Immigration Act*?"

B. Federal Court of Appeal, [1997] 2 F.C. 127

The reasons of the Court of Appeal were delivered by Strayer J.A. He held that pursuant to s. 83(1) of the *Immigration Act*, the appeal was limited to the question certified by Simpson J. He also rejected the appellant's request to challenge the constitutional validity of s. 83(1). Strayer J.A. noted that a treaty cannot have legal effect in Canada unless implemented through domestic legislation, and that the Convention had not been adopted in either federal or provincial legislation. He held that although legislation should be interpreted, where possible, to avoid conflicts with Canada's international obligations, interpreting s. 114(2) to require that the discretion it provides for must be exercised in accordance with the Convention would interfere with the separation of powers between the executive and legislature. He held that such a principle could also alter rights and obligations within the jurisdiction of provincial legislatures. Strayer J.A. also rejected the argument that any articles of the Convention could be interpreted to impose an obligation upon the government to give primacy to the interests of the children in a proceeding such as deportation. He

la Convention ne s'appliquait pas à cette situation, et ne faisait pas partie du droit interne. Elle a également conclu que la preuve démontrait que les enfants avaient constitué un facteur important dans le processus décisionnel et a rejeté l'argument de l'appelante selon lequel la Convention donnait lieu à une attente légitime que l'intérêt des enfants serait une considération primordiale dans la décision.

Le juge Simpson a certifié la question suivante comme «question grave de portée générale» en vertu du par. 83(1) de la *Loi sur l'immigration*: «Vu que la Loi sur l'immigration n'incorpore pas expressément le langage des obligations internationales du Canada en ce qui concerne la Convention internationale relative aux droits de l'enfant, les autorités d'immigration fédérales doivent-elles considérer l'intérêt supérieur de l'enfant né au Canada comme une considération primordiale dans l'examen du cas d'un requérant sous le régime du par. 114(2) de la *Loi sur l'immigration*?»

B. Cour d'appel fédérale, [1997] 2 C.F. 127

Les motifs de la Cour d'appel sont exposés par le juge Strayer. Il déclare que, conformément au par. 83(1) de la *Loi sur l'immigration*, l'appel est limité à la question certifiée par le juge Simpson. Il rejette également la contestation par l'appelante de la constitutionnalité du par. 83(1). Le juge Strayer note qu'un traité ne peut pas avoir d'effet juridique au Canada s'il n'a pas été mis en vigueur par une loi adoptée à cet effet, et que la Convention n'avait pas été adoptée par une loi fédérale ou provinciale. Il conclut que, bien que la loi doive, dans la mesure du possible, être interprétée de façon à ne pas entraîner de conflit avec les obligations internationales du Canada, dire que le par. 114(2) exige que le pouvoir discrétionnaire conféré s'exerce conformément à la Convention enfreindrait la séparation des pouvoirs entre l'exécutif et le législatif. Il conclut qu'un tel principe pourrait également toucher des droits et obligations relevant de la compétence des législatures provinciales. Le juge Strayer rejette également l'argument selon lequel quelque article de la Convention peut s'interpréter de façon à imposer l'obligation au gouvernement d'accorder priorité à l'intérêt des

9

10

held that the deportation of a parent was not a decision “concerning” children within the meaning of article 3. Finally, Strayer J.A. considered the appellant’s argument based on the doctrine of legitimate expectations. He noted that because the doctrine does not create substantive rights, and because a requirement that the best interests of the children be given primacy by a decision-maker under s. 114(2) would be to create a substantive right, the doctrine did not apply.

IV. Issues

11 Because, in my view, the issues raised can be resolved under the principles of administrative law and statutory interpretation, I find it unnecessary to consider the various *Charter* issues raised by the appellant and the interveners who supported her position. The issues raised by this appeal are therefore as follows:

(1) What is the legal effect of a stated question under s. 83(1) of the *Immigration Act* on the scope of appellate review?

(2) Were the principles of procedural fairness violated in this case?

(i) Were the participatory rights accorded consistent with the duty of procedural fairness?

(ii) Did the failure of Officer Caden to provide his own reasons violate the principles of procedural fairness?

(iii) Was there a reasonable apprehension of bias in the making of this decision?

(3) Was this discretion improperly exercised because of the approach taken to the interests of Ms. Baker’s children?

I note that it is the third issue that raises directly the issues contained in the certified question of general importance stated by Simpson J.

enfants dans une procédure comme l’expulsion. Il conclut que l’expulsion du père ou de la mère n’est pas une décision «concernant» les enfants au sens de l’article 3. Enfin, le juge Strayer, examinant l’argument de l’appelante fondé sur la doctrine de l’attente légitime, conclut que puisque l’attente légitime ne crée aucun droit matériel et que le fait d’exiger qu’un décideur donne priorité à l’intérêt supérieur des enfants sous le régime du par. 114(2) aurait pour effet de créer un droit matériel, la doctrine ne s’appliquait pas.

IV. Les questions en litige

Comme, à mon avis, l’appel peut être tranché en vertu des principes du droit administratif et de l’interprétation des lois, il n’est pas nécessaire d’examiner les divers moyens fondés sur la *Charte* qui ont été invoqués par l’appelante et les intervenants qui l’ont appuyée. Par conséquent, les questions examinées sont les suivantes:

(1) Quel effet juridique la question énoncée aux termes du par. 83(1) de la *Loi sur l’immigration* a-t-elle sur la portée de l’examen en appel?

(2) Les principes d’équité procédurale ont-ils été enfreints en l’espèce?

(i) Les droits de participation accordés étaient-ils compatibles avec l’obligation d’équité procédurale?

(ii) Le défaut de l’agent Caden d’exposer les motifs de sa décision a-t-il enfreint les principes d’équité procédurale?

(iii) Y avait-il une crainte raisonnable de partialité dans la prise de cette décision?

(3) Le pouvoir discrétionnaire a-t-il été incorrectement exercé en raison de la façon d’aborder l’intérêt des enfants de M^{me} Baker?

Je note que c’est la troisième question qui soulève directement les points mentionnés dans la question certifiée de portée générale énoncée par le juge Simpson.

V. AnalysisA. *Stated Questions Under Section 83(1) of the Immigration Act*

The Court of Appeal held, in accordance with its decision in *Liyanagamage v. Canada (Minister of Citizenship and Immigration)* (1994), 176 N.R. 4, that the requirement, in s. 83(1), that a “serious question of general importance” be certified for an appeal to be permitted restricts an appeal court to addressing the issues raised by the certified question. However, in *Pushpanathan v. Canada (Minister of Citizenship and Immigration)*, [1998] 1 S.C.R. 982, at para. 25, this Court held that s. 83(1) does not require that the Court of Appeal address only the stated question and issues related to it:

The certification of a “question of general importance” is the trigger by which an appeal is justified. The object of the appeal is still the judgment itself, not merely the certified question.

Rothstein J. noted in *Ramoutar v. Canada (Minister of Employment and Immigration)*, [1993] 3 F.C. 370 (T.D.), that once a question has been certified, all aspects of the appeal may be considered by the Court of Appeal, within its jurisdiction. I agree. The wording of s. 83(1) suggests, and *Pushpanathan* confirms, that if a “question of general importance” has been certified, this allows for an appeal from the judgment of the Trial Division which would otherwise not be permitted, but does not confine the Court of Appeal or this Court to answering the stated question or issues directly related to it. All issues raised by the appeal may therefore be considered here.

B. *The Statutory Scheme and the Nature of the Decision*

Before examining the various grounds for judicial review, it is appropriate to discuss briefly the nature of the decision made under s. 114(2) of the *Immigration Act*, the role of this decision in the statutory scheme, and the guidelines given by the Minister to immigration officers in relation to it.

V. AnalyseA. *Les questions énoncées en vertu du par. 83(1) de la Loi sur l'immigration*

La Cour d'appel a conclu, conformément à son arrêt *Liyanagamage c. Canada (Ministre de la Citoyenneté et de l'Immigration)* (1994), 176 N.R. 4, que le par. 83(1), en exigeant qu'une «question grave de portée générale» soit certifiée pour qu'un appel puisse être autorisé, limite l'appel aux questions soulevées par la question certifiée. Toutefois, dans l'arrêt *Pushpanathan c. Canada (Ministre de la Citoyenneté et de l'Immigration)*, [1998] 1 R.C.S. 982, au par. 25, notre Cour a conclu que le par. 83(1) n'exige pas que la Cour d'appel traite uniquement de la question énoncée et des points qui s'y rapportent:

Sans la certification d'une «question grave de portée générale», l'appel ne serait pas justifié. L'objet de l'appel est bien le jugement lui-même, et non simplement la question certifiée.

Le juge Rothstein dit, dans le jugement *Ramoutar c. Canada (Ministre de l'Emploi et de l'Immigration)*, [1993] 3 C.F. 370 (1^{re} inst.), que lorsqu'une question a été certifiée, la Cour d'appel peut examiner tous les aspects de l'appel qui relèvent de sa compétence. Je suis d'accord. Le libellé du par. 83(1) indique, et l'arrêt *Pushpanathan* le confirme, que la certification d'une «question grave de portée générale» permet un appel du jugement de première instance qui, normalement, ne serait pas autorisé, mais ne limite pas la Cour d'appel ni notre Cour à la question énoncée ou aux points qui s'y rapportent directement. Par conséquent, nous pouvons examiner tous les points soulevés dans le pourvoi.

B. *Le régime législatif et la nature de la décision*

Avant d'examiner les divers moyens invoqués dans la demande de contrôle judiciaire, il est nécessaire d'aborder brièvement la nature de la décision rendue en vertu du par. 114(2) de la *Loi sur l'immigration*, du rôle que joue cette décision dans le régime législatif, et des directives données par le ministre aux agents d'immigration à ce sujet.

14 Section 114(2) itself authorizes the Governor in Council to authorize the Minister to exempt a person from a regulation made under the Act, or to facilitate the admission to Canada of any person. The Minister's power to grant an exemption based on humanitarian and compassionate (H & C) considerations arises from s. 2.1 of the *Immigration Regulations*, which I reproduce for convenience:

The Minister is hereby authorized to exempt any person from any regulation made under subsection 114(1) of the Act or otherwise facilitate the admission to Canada of any person where the Minister is satisfied that the person should be exempted from that regulation or that the person's admission should be facilitated owing to the existence of compassionate or humanitarian considerations.

For the purpose of clarity, I will refer throughout these reasons to decisions made pursuant to the combination of s. 114(2) of the Act and s. 2.1 of the Regulations as "H & C decisions".

15 Applications for permanent residence must, as a general rule, be made from outside Canada, pursuant to s. 9(1) of the Act. One of the exceptions to this is when admission is facilitated owing to the existence of compassionate or humanitarian considerations. In law, pursuant to the Act and the Regulations, an H & C decision is made by the Minister, though in practice, this decision is dealt with in the name of the Minister by immigration officers: see, for example, *Minister of Employment and Immigration v. Jiminez-Perez*, [1984] 2 S.C.R. 565, at p. 569. In addition, while in law, the H & C decision is one that provides for an exemption from regulations or from the Act, in practice, it is one that, in cases like this one, determines whether a person who has been in Canada but does not have status can stay in the country or will be required to leave a place where he or she has become established. It is an important decision that affects in a fundamental manner the future of individuals' lives. In addition, it may also have an important impact on the lives of any Canadian children of the person whose humanitarian and compassionate application is being considered, since they may be separated from one of their parents and/or uprooted from their country of

Le paragraphe 114(2) habilite le gouverneur en conseil à autoriser le ministre à accorder une dispense d'application d'un règlement pris aux termes de la Loi, ou à faciliter l'admission d'une personne au Canada. Le pouvoir du ministre d'accorder une dispense pour des raisons d'ordre humanitaire découle de l'art. 2.1 du *Règlement sur l'immigration*:

Le ministre est autorisé à accorder, pour des raisons d'ordre humanitaire, une dispense d'application d'un règlement pris aux termes du paragraphe 114(1) de la Loi ou à faciliter l'admission au Canada de toute autre manière.

Pour plus de clarté, je référerai aux décisions rendues conformément à une combinaison du par. 114(2) de la Loi et de l'art. 2.1 du règlement de «décisions d'ordre humanitaire».

Les demandes de résidence permanente doivent normalement être présentées à l'extérieur du Canada, conformément au par. 9(1) de la Loi. L'une des exceptions à cette règle est l'admission fondée sur des raisons d'ordre humanitaire. En droit, conformément à la Loi et au règlement, c'est le ministre qui prend les décisions d'ordre humanitaire, alors qu'en pratique, ces décisions sont prises en son nom par des agents d'immigration: voir, par exemple, *Ministre de l'Emploi et de l'Immigration c. Jiminez-Perez*, [1984] 2 R.C.S. 565, à la p. 569. En outre, même si, en droit, une décision d'ordre humanitaire est une décision qui prévoit une dispense d'application du règlement ou de la Loi, en pratique, il s'agit d'une décision, dans des affaires comme celle dont nous sommes saisis, qui détermine si une personne qui est au Canada, mais qui n'a pas de statut, peut y demeurer ou sera tenue de quitter l'endroit où elle s'est établie. Il s'agit d'une décision importante qui a des conséquences capitales sur l'avenir des personnes visées. Elle peut également avoir des répercussions importantes sur la vie des enfants canadiens de la personne qui a fait la demande fondée sur des raisons d'ordre humanitaire puisqu'ils peuvent être séparés d'un de leurs parents ou déracinés de leur pays de

citizenship, where they have settled and have connections.

Immigration officers who make H & C decisions are provided with a set of guidelines, contained in chapter 9 of the *Immigration Manual: Examination and Enforcement*. The guidelines constitute instructions to immigration officers about how to exercise the discretion delegated to them. These guidelines are also available to the public. A number of statements in the guidelines are relevant to Ms. Baker's application. Guideline 9.05 emphasizes that officers have a duty to decide which cases should be given a favourable recommendation, by carefully considering all aspects of the case, using their best judgment and asking themselves what a reasonable person would do in such a situation. It also states that although officers are not expected to "delve into areas which are not presented during examination or interviews, they should attempt to clarify possible humanitarian grounds and public policy considerations even if these are not well articulated".

The guidelines also set out the bases upon which the discretion conferred by s. 114(2) and the Regulations should be exercised. Two different types of criteria that may lead to a positive s. 114(2) decision are outlined — public policy considerations and humanitarian and compassionate grounds. Immigration officers are instructed, under guideline 9.07, to assure themselves, first, whether a public policy consideration is present, and if there is none, whether humanitarian and compassionate circumstances exist. Public policy reasons include marriage to a Canadian resident, the fact that the person has lived in Canada, has become established, and has become an "illegal de facto resident", and the fact that the person may be a long-term holder of employment authorization or has worked as a foreign domestic. Guideline 9.07 states that humanitarian and compassionate grounds will exist if "unusual, undeserved or disproportionate hardship would be caused to the person seeking consideration if he or she had to leave Canada". The guidelines also directly address

citoyenneté, où ils se sont installés et ont des attaches.

Les agents d'immigration qui prennent des décisions d'ordre humanitaire reçoivent une série de lignes directrices, figurant au chapitre 9 du *Guide de l'immigration: examen et application de la loi*, qui leur servent d'instructions sur la façon d'exercer le pouvoir discrétionnaire qui leur est délégué. Le public a aussi accès à ces lignes directrices. Dans ces lignes directrices, plusieurs énoncés s'appliquent à la demande de M^{me} Baker. La directive 9.05 met l'accent sur le devoir des agents de décider quelles affaires devraient recevoir une recommandation favorable, en étudiant avec soin les cas sous tous leurs aspects, en faisant preuve de discernement, et en se demandant ce qu'une personne sensée ferait dans une telle situation. Elle dit également que les agents ne doivent pas «tente[r] d'approfondir des questions qui ne sont pas soulevées au cours des examens ou des entrevues. Toutefois, ils doivent essayer d'obtenir des précisions relativement à des raisons possibles d'intérêt public ou d'ordre humanitaire, même si celles-ci ne sont pas clairement formulées».

Ces directives définissent également les fondements de l'exercice du pouvoir discrétionnaire conféré par le par. 114(2) et le règlement. Deux types de raisons pouvant mener à une décision favorable sont indiqués — les raisons d'intérêt public et les considérations humanitaires. Conformément à la directive 9.07, les agents d'immigration doivent s'assurer d'abord qu'il n'existe pas de raisons d'intérêt public, et, s'il n'y en a pas, s'il existe des considérations humanitaires. Les raisons d'intérêt public comprennent, notamment, le mariage à un résident du Canada, le fait qu'une personne a vécu au Canada, s'y est établie et est devenue un résident «de fait en situation administrative irrégulière», et le fait que la personne est titulaire d'un permis de travail de longue date ou a travaillé comme travailleur domestique étranger. La directive 9.07 dit qu'il existe des considérations humanitaires lorsque «des difficultés inhabituelles, injustes ou indues seraient causées à la personne sollicitant l'examen de son cas si celle-ci devait quitter le Canada». Les directives traitent expressé-

16

17

situations involving family dependency, and emphasize that the requirement that a person leave Canada to apply from abroad may result in hardship for close family members of a Canadian resident, whether parents, children, or others who are close to the claimant, but not related by blood. They note that in such cases, the reasons why the person did not apply from abroad and the existence of family or other support in the person's home country should also be considered.

C. Procedural Fairness

18 The first ground upon which the appellant challenges the decision made by Officer Caden is the allegation that she was not accorded procedural fairness. She suggests that the following procedures are required by the duty of fairness when parents have Canadian children and they make an H & C application: an oral interview before the decision-maker, notice to her children and the other parent of that interview, a right for the children and the other parent to make submissions at that interview, and notice to the other parent of the interview and of that person's right to have counsel present. She also alleges that procedural fairness requires the provision of reasons by the decision-maker, Officer Caden, and that the notes of Officer Lorenz give rise to a reasonable apprehension of bias.

19 In addressing the fairness issues, I will consider first the principles relevant to the determination of the content of the duty of procedural fairness, and then address Ms. Baker's arguments that she was accorded insufficient participatory rights, that a duty to give reasons existed, and that there was a reasonable apprehension of bias.

20 Both parties agree that a duty of procedural fairness applies to H & C decisions. The fact that a decision is administrative and affects "the rights, privileges or interests of an individual" is sufficient to trigger the application of the duty of fairness: *Cardinal v. Director of Kent Institution*,

ment de situations où il existe des liens familiaux de dépendance, et soulignent que l'obligation de quitter le Canada pour présenter une demande de l'étranger peut occasionner des difficultés à certains membres de la famille proche d'un résident canadien, parents, enfants ou autres proches qui n'ont pas de liens de sang avec le demandeur. Elles précisent que dans de tels cas, il faut aussi tenir compte des raisons pour lesquelles la personne n'a pas présenté sa demande à l'étranger et de la présence d'une famille ou d'autres personnes susceptibles de l'aider dans son pays d'origine.

C. L'équité procédurale

Comme premier moyen pour contester la décision de l'agent Caden, l'appelante allègue qu'elle n'a pas bénéficié de l'équité procédurale. L'appelante estime que l'obligation d'agir équitablement exige le respect des procédures suivantes quand des parents ayant des enfants canadiens présentent une demande fondée sur des raisons d'ordre humanitaire: une entrevue orale devant le décideur, un avis de la tenue de cette entrevue aux enfants et à l'autre parent, un droit pour les enfants et l'autre parent de présenter des arguments au cours de cette entrevue, un avis à l'autre parent de la tenue de l'entrevue et du droit de cette personne d'être représentée par un avocat. Elle allègue également que l'équité procédurale exige que le décideur, soit l'agent Caden, motive sa décision, et que les notes de l'agent Lorenz donnent lieu à une crainte raisonnable de partialité.

En traitant des questions d'équité, j'examinerai d'abord les principes applicables à la détermination de la nature de l'obligation d'équité procédurale, et ensuite les arguments de M^{me} Baker sur l'insuffisance des droits de participation qui lui ont été accordés, sur l'existence d'une obligation de motiver la décision et sur la crainte raisonnable de partialité.

Les deux parties admettent que l'obligation d'équité procédurale s'applique aux décisions d'ordre humanitaire. Le fait qu'une décision soit administrative et touche «les droits, privilèges ou biens d'une personne» suffit pour entraîner l'application de l'obligation d'équité: *Cardinal c.*

[1985] 2 S.C.R. 643, at p. 653. Clearly, the determination of whether an applicant will be exempted from the requirements of the Act falls within this category, and it has been long recognized that the duty of fairness applies to H & C decisions: *Sobrie v. Canada (Minister of Employment and Immigration)* (1987), 3 Imm. L.R. (2d) 81 (F.C.T.D.), at p. 88; *Said v. Canada (Minister of Employment and Immigration)* (1992), 6 Admin. L.R. (2d) 23 (F.C.T.D.); *Shah v. Minister of Employment and Immigration* (1994), 170 N.R. 238 (F.C.A.).

(1) Factors Affecting the Content of the Duty of Fairness

The existence of a duty of fairness, however, does not determine what requirements will be applicable in a given set of circumstances. As I wrote in *Knight v. Indian Head School Division No. 19*, [1990] 1 S.C.R. 653, at p. 682, “the concept of procedural fairness is eminently variable and its content is to be decided in the specific context of each case”. All of the circumstances must be considered in order to determine the content of the duty of procedural fairness: *Knight*, at pp. 682-83; *Cardinal*, *supra*, at p. 654; *Old St. Boniface Residents Assn. Inc. v. Winnipeg (City)*, [1990] 3 S.C.R. 1170, *per* Sopinka J.

Although the duty of fairness is flexible and variable, and depends on an appreciation of the context of the particular statute and the rights affected, it is helpful to review the criteria that should be used in determining what procedural rights the duty of fairness requires in a given set of circumstances. I emphasize that underlying all these factors is the notion that the purpose of the participatory rights contained within the duty of procedural fairness is to ensure that administrative decisions are made using a fair and open procedure, appropriate to the decision being made and its statutory, institutional, and social context, with an opportunity for those affected by the decision to put forward their views and evidence fully and have them considered by the decision-maker.

Directeur de l'établissement Kent, [1985] 2 R.C.S. 643, à la p. 653. Il est évident que la décision quant à savoir si un demandeur sera dispensé des exigences prévues par la Loi entre dans cette catégorie, et il est admis depuis longtemps que l'obligation d'équité s'applique aux décisions d'ordre humanitaire: *Sobrie c. Canada (Ministre de l'Emploi et de l'Immigration)* (1987), 3 Imm. L.R. (2d) 81 (C.F. 1^{re} inst.), à la p. 88; *Said c. Canada (Ministre de l'Emploi et de l'Immigration)* (1992), 6 Admin. L.R. (2d) 23 (C.F. 1^{re} inst.); *Shah c. Ministre de l'Emploi et de l'Immigration* (1994), 170 N.R. 238 (C.A.F.).

(1) Les facteurs ayant une incidence sur la nature de l'obligation d'équité

L'existence de l'obligation d'équité, toutefois, ne détermine pas quelles exigences s'appliqueront dans des circonstances données. Comme je l'écrivais dans l'arrêt *Knight c. Indian Head School Division No. 19*, [1990] 1 R.C.S. 653, à la p. 682, «la notion d'équité procédurale est éminemment variable et son contenu est tributaire du contexte particulier de chaque cas». Il faut tenir compte de toutes les circonstances pour décider de la nature de l'obligation d'équité procédurale: *Knight*, aux pp. 682 et 683; *Cardinal*, précité, à la p. 654; *Assoc. des résidents du Vieux St-Boniface Inc. c. Winnipeg (Ville)*, [1990] 3 R.C.S. 1170, le juge Sopinka.

Bien que l'obligation d'équité soit souple et variable et qu'elle repose sur une appréciation du contexte de la loi particulière et des droits visés, il est utile d'examiner les critères à appliquer pour définir les droits procéduraux requis par l'obligation d'équité dans des circonstances données. Je souligne que l'idée sous-jacente à tous ces facteurs est que les droits de participation faisant partie de l'obligation d'équité procédurale visent à garantir que les décisions administratives sont prises au moyen d'une procédure équitable et ouverte, adaptée au type de décision et à son contexte légal institutionnel et social, comprenant la possibilité donnée aux personnes visées par la décision de présenter leur points de vue complètement ainsi que des éléments de preuve de sorte qu'ils soient considérés par le décideur.

23

Several factors have been recognized in the jurisprudence as relevant to determining what is required by the common law duty of procedural fairness in a given set of circumstances. One important consideration is the nature of the decision being made and the process followed in making it. In *Knight, supra*, at p. 683, it was held that “the closeness of the administrative process to the judicial process should indicate how much of those governing principles should be imported into the realm of administrative decision making”. The more the process provided for, the function of the tribunal, the nature of the decision-making body, and the determinations that must be made to reach a decision resemble judicial decision making, the more likely it is that procedural protections closer to the trial model will be required by the duty of fairness. See also *Old St. Boniface, supra*, at p. 1191; *Russell v. Duke of Norfolk*, [1949] 1 All E.R. 109 (C.A.), at p. 118; *Syndicat des employés de production du Québec et de l'Acadie v. Canada (Canadian Human Rights Commission)*, [1989] 2 S.C.R. 879, at p. 896, per Sopinka J.

La jurisprudence reconnaît plusieurs facteurs pertinents en ce qui a trait aux exigences de l'obligation d'équité procédurale en common law dans des circonstances données. Un facteur important est la nature de la décision recherchée et le processus suivi pour y parvenir. Dans l'arrêt *Knight*, précité, à la p. 683, on a conclu que «la mesure dans laquelle le processus administratif se rapproche du processus judiciaire est de nature à indiquer jusqu'à quel point ces principes directeurs devraient s'appliquer dans le domaine de la prise de décisions administratives». Plus le processus prévu, la fonction du tribunal, la nature de l'organisme rendant la décision et la démarche à suivre pour parvenir à la décision ressemblent à une prise de décision judiciaire, plus il est probable que l'obligation d'agir équitablement exigera des protections procédurales proches du modèle du procès. Voir également *Vieux St-Boniface*, précité, à la p. 1191; *Russell c. Duke of Norfolk*, [1949] 1 All E.R. 109 (C.A.), à la p. 118; *Syndicat des employés de production du Québec et de l'Acadie c. Canada (Commission canadienne des droits de la personne)*, [1989] 2 R.C.S. 879, à la p. 896, le juge Sopinka.

24

A second factor is the nature of the statutory scheme and the “terms of the statute pursuant to which the body operates”: *Old St. Boniface, supra*, at p. 1191. The role of the particular decision within the statutory scheme and other surrounding indications in the statute help determine the content of the duty of fairness owed when a particular administrative decision is made. Greater procedural protections, for example, will be required when no appeal procedure is provided within the statute, or when the decision is determinative of the issue and further requests cannot be submitted: see D. J. M. Brown and J. M. Evans, *Judicial Review of Administrative Action in Canada* (loose-leaf), at pp. 7-66 to 7-67.

Le deuxième facteur est la nature du régime législatif et les «termes de la loi en vertu de laquelle agit l'organisme en question»: *Vieux St-Boniface*, précité, à la p. 1191. Le rôle que joue la décision particulière au sein du régime législatif, et d'autres indications qui s'y rapportent dans la loi, aident à définir la nature de l'obligation d'équité dans le cadre d'une décision administrative précise. Par exemple, des protections procédurales plus importantes seront exigées lorsque la loi ne prévoit aucune procédure d'appel, ou lorsque la décision est déterminante quant à la question en litige et qu'il n'est plus possible de présenter d'autres demandes: voir D. J. M. Brown et J. M. Evans, *Judicial Review of Administrative Action in Canada* (feuilles mobiles), aux pp. 7-66 et 7-67.

25

A third factor in determining the nature and extent of the duty of fairness owed is the importance of the decision to the individual or individuals affected. The more important the decision is to the lives of those affected and the greater its

Le troisième facteur permettant de définir la nature et l'étendue de l'obligation d'équité est l'importance de la décision pour les personnes visées. Plus la décision est importante pour la vie des personnes visées et plus ses répercussions sont

impact on that person or those persons, the more stringent the procedural protections that will be mandated. This was expressed, for example, by Dickson J. (as he then was) in *Kane v. Board of Governors of the University of British Columbia*, [1980] 1 S.C.R. 1105, at p. 1113:

A high standard of justice is required when the right to continue in one's profession or employment is at stake. . . . A disciplinary suspension can have grave and permanent consequences upon a professional career.

As Sedley J. (now Sedley L.J.) stated in *R. v. Higher Education Funding Council, ex parte Institute of Dental Surgery*, [1994] 1 All E.R. 651 (Q.B.), at p. 667:

In the modern state the decisions of administrative bodies can have a more immediate and profound impact on people's lives than the decisions of courts, and public law has since *Ridge v. Baldwin* [1963] 2 All E.R. 66, [1964] A.C. 40 been alive to that fact. While the judicial character of a function may elevate the practical requirements of fairness above what they would otherwise be, for example by requiring contentious evidence to be given and tested orally, what makes it "judicial" in this sense is principally the nature of the issue it has to determine, not the formal status of the deciding body.

The importance of a decision to the individuals affected, therefore, constitutes a significant factor affecting the content of the duty of procedural fairness.

Fourth, the legitimate expectations of the person challenging the decision may also determine what procedures the duty of fairness requires in given circumstances. Our Court has held that, in Canada, this doctrine is part of the doctrine of fairness or natural justice, and that it does not create substantive rights: *Old St. Boniface, supra*, at p. 1204; *Reference re Canada Assistance Plan (B.C.)*, [1991] 2 S.C.R. 525, at p. 557. As applied in Canada, if a legitimate expectation is found to exist, this will affect the content of the duty of fairness owed to the individual or individuals affected by the decision. If the claimant has a legitimate expectation that a certain procedure will be followed, this procedure will be required by the duty

grandes pour ces personnes, plus les protections procédurales requises seront rigoureuses. C'est ce que dit par exemple le juge Dickson (plus tard Juge en chef) dans l'arrêt *Kane c. Conseil d'administration de l'Université de la Colombie-Britannique*, [1980] 1 R.C.S. 1105, à la p. 1113:

Une justice de haute qualité est exigée lorsque le droit d'une personne d'exercer sa profession ou de garder son emploi est en jeu. [. . .] Une suspension de nature disciplinaire peut avoir des conséquences graves et permanentes sur une carrière.

Comme le juge Sedley (maintenant Lord juge Sedley) le dit dans *R. c. Higher Education Funding Council, ex parte Institute of Dental Surgery*, [1994] 1 All E.R. 651 (Q.B.), à la p. 667:

[TRADUCTION] Dans le monde moderne, les décisions rendues par des organismes administratifs peuvent avoir un effet plus immédiat et plus important sur la vie des gens que les décisions des tribunaux et le droit public a depuis l'arrêt *Ridge c. Baldwin* [1963] 2 All E.R. 66, [1964] A.C. 40, reconnu ce fait. Bien que le caractère judiciaire d'une fonction puisse élever les exigences pratiques en matière d'équité au-delà de ce qu'elles seraient autrement, par exemple en exigeant que soit présenté et vérifié oralement un élément de preuve contesté, ce qui le rend «judiciaire» dans ce sens est principalement la nature de la question à trancher, et non le statut formel de l'organisme décisionnel.

L'importance d'une décision pour les personnes visées a donc une incidence significative sur la nature de l'obligation d'équité procédurale.

Quatrièmement, les attentes légitimes de la personne qui conteste la décision peuvent également servir à déterminer quelles procédures l'obligation d'équité exige dans des circonstances données. Notre Cour a dit que, au Canada, l'attente légitime fait partie de la doctrine de l'équité ou de la justice naturelle, et qu'elle ne crée pas de droits matériels: *Vieux St-Boniface*, précité, à la p. 1204; *Renvoi relatif au Régime d'assistance publique du Canada (C.-B.)*, [1991] 2 R.C.S. 525, à la p. 557. Au Canada, la reconnaissance qu'une attente légitime existe aura une incidence sur la nature de l'obligation d'équité envers les personnes visées par la décision. Si le demandeur s'attend légitimement à ce qu'une certaine procédure soit suivie, l'obliga-

of fairness: *Qi v. Canada (Minister of Citizenship and Immigration)* (1995), 33 Imm. L.R. (2d) 57 (F.C.T.D.); *Mercier-Néron v. Canada (Minister of National Health and Welfare)* (1995), 98 F.T.R. 36; *Bendahmane v. Canada (Minister of Employment and Immigration)*, [1989] 3 F.C. 16 (C.A.). Similarly, if a claimant has a legitimate expectation that a certain result will be reached in his or her case, fairness may require more extensive procedural rights than would otherwise be accorded: D. J. Mullan, *Administrative Law* (3rd ed. 1996), at pp. 214-15; D. Shapiro, "Legitimate Expectation and its Application to Canadian Immigration Law" (1992), 8 *J.L. & Social Pol'y* 282, at p. 297; *Canada (Attorney General) v. Human Rights Tribunal Panel (Canada)* (1994), 76 F.T.R. 1. Nevertheless, the doctrine of legitimate expectations cannot lead to substantive rights outside the procedural domain. This doctrine, as applied in Canada, is based on the principle that the "circumstances" affecting procedural fairness take into account the promises or regular practices of administrative decision-makers, and that it will generally be unfair for them to act in contravention of representations as to procedure, or to backtrack on substantive promises without according significant procedural rights.

tion d'équité exigera cette procédure: *Qi c. Canada (Ministre de la Citoyenneté et de l'Immigration)* (1995), 33 Imm. L.R. (2d) 57 (C.F. 1^{re} inst.); *Mercier-Néron c. Canada (Ministre de la Santé nationale et du Bien-être social)* (1995), 98 F.T.R. 36; *Bendahmane c. Canada (Ministre de l'Emploi et de l'Immigration)*, [1989] 3 C.F. 16 (C.A.). De même, si un demandeur s'attend légitimement à un certain résultat, l'équité peut exiger des droits procéduraux plus étendus que ceux qui seraient autrement accordés: D. J. Mullan, *Administrative Law* (3^e éd. 1996), aux pp. 214 et 215; D. Shapiro, «Legitimate Expectation and its Application to Canadian Immigration Law» (1992), 8 *J.L. & Social Pol'y* 282, à la p. 297; *Canada (Procureur général) c. Comité du tribunal des droits de la personne (Canada)* (1994), 76 F.T.R. 1. Néanmoins, la doctrine de l'attente légitime ne peut pas donner naissance à des droits matériels en dehors du domaine de la procédure. Cette doctrine, appliquée au Canada, est fondée sur le principe que les «circonstances» touchant l'équité procédurale comprennent les promesses ou pratiques habituelles des décideurs administratifs, et qu'il serait généralement injuste de leur part d'agir en contravention d'assurances données en matière de procédures, ou de revenir sur des promesses matérielles sans accorder de droits procéduraux importants.

²⁷ Fifth, the analysis of what procedures the duty of fairness requires should also take into account and respect the choices of procedure made by the agency itself, particularly when the statute leaves to the decision-maker the ability to choose its own procedures, or when the agency has an expertise in determining what procedures are appropriate in the circumstances: Brown and Evans, *supra*, at pp. 7-66 to 7-70. While this, of course, is not determinative, important weight must be given to the choice of procedures made by the agency itself and its institutional constraints: *IWA v. Consolidated-Bathurst Packaging Ltd.*, [1990] 1 S.C.R. 282, *per* Gonthier J.

Cinquièmement, l'analyse des procédures requises par l'obligation d'équité devrait également prendre en considération et respecter les choix de procédure que l'organisme fait lui-même, particulièrement quand la loi laisse au décideur la possibilité de choisir ses propres procédures, ou quand l'organisme a une expertise dans le choix des procédures appropriées dans les circonstances: Brown et Evans, *op. cit.*, aux pp. 7-66 à 7-70. Bien que, de toute évidence, cela ne soit pas déterminant, il faut accorder une grande importance au choix de procédures par l'organisme lui-même et à ses contraintes institutionnelles: *IWA c. Consolidated-Bathurst Packaging Ltd.*, [1990] 1 R.C.S. 282, le juge Gonthier.

²⁸ I should note that this list of factors is not exhaustive. These principles all help a court determine whether the procedures that were followed

Je dois mentionner que cette liste de facteurs n'est pas exhaustive. Tous ces principes aident le tribunal à déterminer si les procédures suivies res-

respected the duty of fairness. Other factors may also be important, particularly when considering aspects of the duty of fairness unrelated to participatory rights. The values underlying the duty of procedural fairness relate to the principle that the individual or individuals affected should have the opportunity to present their case fully and fairly, and have decisions affecting their rights, interests, or privileges made using a fair, impartial, and open process, appropriate to the statutory, institutional, and social context of the decision.

(2) Legitimate Expectations

I turn now to an application of these principles to the circumstances of this case to determine whether the procedures followed respected the duty of procedural fairness. I will first determine whether the duty of procedural fairness that would otherwise be applicable is affected, as the appellant argues, by the existence of a legitimate expectation based upon the text of the articles of the Convention and the fact that Canada has ratified it. In my view, however, the articles of the Convention and their wording did not give rise to a legitimate expectation on the part of Ms. Baker that when the decision on her H & C application was made, specific procedural rights above what would normally be required under the duty of fairness would be accorded, a positive finding would be made, or particular criteria would be applied. This Convention is not, in my view, the equivalent of a government representation about how H & C applications will be decided, nor does it suggest that any rights beyond the participatory rights discussed below will be accorded. Therefore, in this case there is no legitimate expectation affecting the content of the duty of fairness, and the fourth factor outlined above therefore does not affect the analysis. It is unnecessary to decide whether an international instrument ratified by Canada could, in other circumstances, give rise to a legitimate expectation.

pectent l'obligation d'équité. D'autres facteurs peuvent également être importants, notamment dans l'examen des aspects de l'obligation d'agir équitablement non reliés aux droits de participation. Les valeurs qui sous-tendent l'obligation d'équité procédurale relèvent du principe selon lequel les personnes visées doivent avoir la possibilité de présenter entièrement et équitablement leur position, et ont droit à ce que les décisions touchant leurs droits, intérêts ou privilèges soient prises à la suite d'un processus équitable, impartial et ouvert, adapté au contexte légal, institutionnel et social de la décision.

(2) L'attente légitime

Je passe maintenant à une application de ces principes aux circonstances de l'espèce pour déterminer si les procédures suivies respectaient l'obligation d'équité procédurale. Je déciderai d'abord si l'existence d'une attente légitime fondée sur le texte des articles de la Convention et le fait que le Canada l'ait ratifiée a une incidence, comme l'appelante le soutient, sur l'obligation d'équité procédurale qui serait autrement applicable. À mon avis, les articles de la Convention et leur libellé n'ont pas créé chez M^{me} Baker l'attente légitime que sa demande fondée sur des raisons d'ordre humanitaire donne lieu à l'application de droits procéduraux particuliers autres que ceux qui seraient normalement exigés en vertu de l'obligation d'équité, à une conclusion positive, ou à l'utilisation de critères particuliers. Cette convention n'est pas, à mon avis, l'équivalent d'une déclaration gouvernementale sur la façon dont les demandes fondées sur des raisons d'ordre humanitaire doivent être tranchées, elle n'indique pas non plus que des droits autres que les droits de participation dont il est question ci-dessous seront accordés. Par conséquent, dans la présente affaire, il n'existe pas d'attente légitime ayant une incidence sur la nature de l'obligation d'équité et le quatrième facteur identifié plus haut n'affecte donc pas l'analyse. Il n'est pas nécessaire de décider si un instrument international ratifié par le Canada pourrait, dans d'autres circonstances, donner lieu à une attente légitime.

(3) Participatory Rights

30

The next issue is whether, taking into account the other factors related to the determination of the content of the duty of fairness, the failure to accord an oral hearing and give notice to Ms. Baker or her children was inconsistent with the participatory rights required by the duty of fairness in these circumstances. At the heart of this analysis is whether, considering all the circumstances, those whose interests were affected had a meaningful opportunity to present their case fully and fairly. The procedure in this case consisted of a written application with supporting documentation, which was summarized by the junior officer (Lorenz), with a recommendation being made by that officer. The summary, recommendation, and material was then considered by the senior officer (Caden), who made the decision.

31

Several of the factors described above enter into the determination of the type of participatory rights the duty of procedural fairness requires in the circumstances. First, an H & C decision is very different from a judicial decision, since it involves the exercise of considerable discretion and requires the consideration of multiple factors. Second, its role is also, within the statutory scheme, as an exception to the general principles of Canadian immigration law. These factors militate in favour of more relaxed requirements under the duty of fairness. On the other hand, there is no appeal procedure, although judicial review may be applied for with leave of the Federal Court — Trial Division. In addition, considering the third factor, this is a decision that in practice has exceptional importance to the lives of those with an interest in its result — the claimant and his or her close family members — and this leads to the content of the duty of fairness being more extensive. Finally, applying the fifth factor described above, the statute accords considerable flexibility to the Minister to decide on the proper procedure, and immigration officers, as a matter of practice, do not conduct interviews in all cases. The institutional practices and choices made by the Minister are significant, though of course not determinative

(3) Les droits de participation

La question suivante est de savoir si, compte tenu des autres facteurs déterminant la nature de l'obligation d'équité, le défaut d'accorder une audience et de donner avis à M^{me} Baker ou à ses enfants était incompatible avec les droits de participation qu'exige l'obligation d'équité dans ces circonstances. Au cœur de cette analyse, il faut se demander si, compte tenu de toutes les circonstances, les personnes dont les intérêts étaient en jeu ont eu une occasion valable de présenter leur position pleinement et équitablement. La procédure en l'espèce se composait d'une demande écrite accompagnée de documents justificatifs, résumée par l'agent subalterne (Lorenz) et transmise avec une recommandation faite par ce dernier. Le résumé, la recommandation et les documents ont alors été examinés par l'agent principal (Caden), qui a pris la décision.

Plusieurs des facteurs susmentionnés servent à déterminer quel type de droits de participation sont requis par l'obligation d'équité procédurale dans les circonstances. En premier lieu, une décision d'ordre humanitaire est très différente d'une décision judiciaire, car elle suppose l'exercice d'un pouvoir discrétionnaire étendu et l'examen de facteurs multiples. Deuxièmement, son rôle est aussi, dans le cadre du régime législatif, une exception aux principes généraux du droit canadien de l'immigration. Ces facteurs militent en faveur d'une application moins stricte de l'obligation d'équité. D'autre part, il n'existe pas de procédure d'appel, bien qu'il puisse y avoir un contrôle judiciaire sur autorisation de la Cour fédérale, Section de première instance. En outre, au vu du troisième facteur, il s'agit là d'une décision qui, en pratique, a une importance exceptionnelle sur la vie des personnes concernées — le demandeur et les membres de sa famille proche, ce qui accroît l'étendue de l'obligation d'équité. Enfin, appliquant le cinquième facteur ci-haut décrit, la loi donne au ministre une grande latitude pour décider de la procédure appropriée, et les agents d'immigration, dans la pratique, ne procèdent pas à des entrevues dans tous les cas. Les pratiques et les choix institutionnels que fait le ministre sont

factors to be considered in the analysis. Thus, it can be seen that although some of the factors suggest stricter requirements under the duty of fairness, others suggest more relaxed requirements further from the judicial model.

Balancing these factors, I disagree with the holding of the Federal Court of Appeal in *Shah*, *supra*, at p. 239, that the duty of fairness owed in these circumstances is simply “minimal”. Rather, the circumstances require a full and fair consideration of the issues, and the claimant and others whose important interests are affected by the decision in a fundamental way must have a meaningful opportunity to present the various types of evidence relevant to their case and have it fully and fairly considered.

However, it also cannot be said that an oral hearing is always necessary to ensure a fair hearing and consideration of the issues involved. The flexible nature of the duty of fairness recognizes that meaningful participation can occur in different ways in different situations. The Federal Court has held that procedural fairness does not require an oral hearing in these circumstances: see, for example, *Said*, *supra*, at p. 30.

I agree that an oral hearing is not a general requirement for H & C decisions. An interview is not essential for the information relevant to an H & C application to be put before an immigration officer, so that the humanitarian and compassionate considerations presented may be considered in their entirety and in a fair manner. In this case, the appellant had the opportunity to put forward, in written form through her lawyer, information about her situation, her children and their emotional dependence on her, and documentation in support of her application from a social worker at the Children's Aid Society and from her psychiatrist. These documents were before the decision-makers, and they contained the information relevant to making this decision. Taking all the factors relevant to determining the content of the duty of fairness into account, the lack of an oral hearing or

importants, bien que ce ne soient évidemment pas des facteurs déterminants dans l'analyse. On peut donc voir que, si certains facteurs indiquent des exigences plus strictes en matière d'obligation d'équité, d'autres indiquent des exigences moins strictes, plus éloignées du modèle judiciaire.

Pondérant ces facteurs, je ne suis pas d'accord avec la conclusion de la Cour d'appel fédérale dans l'arrêt *Shah*, précité, à la p. 239, que l'obligation d'équité dans ces circonstances est simplement «minimale». Au contraire, les circonstances nécessitent un examen complet et équitable des questions litigieuses, et le demandeur et les personnes dont les intérêts sont profondément touchés par la décision doivent avoir une possibilité valable de présenter les divers types de preuves qui se rapportent à leur affaire et de les voir évalués de façon complète et équitable.

Toutefois, on ne peut pas dire non plus qu'une audience est toujours nécessaire pour garantir l'audition et l'examen équitables des questions en jeu. La nature souple de l'obligation d'équité reconnaît qu'une participation valable peut se faire de différentes façons dans des situations différentes. La Cour fédérale a statué que l'équité procédurale n'exige pas la tenue d'une audience dans ces circonstances: voir, par exemple, *Said*, précité, à la p. 30.

Je conviens que la tenue d'une audience n'est pas une exigence générale pour les décisions fondées sur des raisons d'ordre humanitaire. Il n'est pas indispensable qu'il y ait une entrevue pour exposer à un agent d'immigration les renseignements relatifs à une demande fondée sur des raisons d'ordre humanitaire et pour que les raisons d'ordre humanitaire présentées puissent être évaluées de façon complète et équitable. En l'espèce, l'appelante a eu la possibilité d'exposer par écrit, par l'entremise de son avocat, sa situation, celle de ses enfants et leur dépendance émotive vis-à-vis d'elle, et de présenter à l'appui de sa demande des lettres d'un travailleur social de la Société d'aide à l'enfance et de son psychiatre. Ces documents étaient à la disposition des décideurs, et ils contenaient les renseignements nécessaires pour la prise de décision. Compte tenu de tous les facteurs

32

33

34

notice of such a hearing did not, in my opinion, constitute a violation of the requirements of procedural fairness to which Ms. Baker was entitled in the circumstances, particularly given the fact that several of the factors point toward a more relaxed standard. The opportunity, which was accorded, for the appellant or her children to produce full and complete written documentation in relation to all aspects of her application satisfied the requirements of the participatory rights required by the duty of fairness in this case.

(4) The Provision of Reasons

³⁵ The appellant also submits that the duty of fairness, in these circumstances, requires that reasons be given by the decision-maker. She argues either that the notes of Officer Lorenz should be considered the reasons for the decision, or that it should be held that the failure of Officer Caden to give written reasons for his decision or a subsequent affidavit explaining them should be taken to be a breach of the principles of fairness.

³⁶ This issue has been addressed in several cases of judicial review of humanitarian and compassionate applications. The Federal Court of Appeal has held that reasons are unnecessary: *Shah, supra*, at pp. 239-40. It has also been held that the case history notes prepared by a subordinate officer are not to be considered the decision-maker's reasons: see *Tylo v. Minister of Employment and Immigration* (1995), 90 F.T.R. 157, at pp. 159-60. In *Gheorlan v. Canada (Secretary of State)* (1995), 26 Imm. L.R. (2d) 170 (F.C.T.D.), and *Chan v. Canada (Minister of Citizenship and Immigration)* (1994), 87 F.T.R. 62, it was held that the notes of the reviewing officer should not be taken to be the reasons for decision, but may help in determining whether a reviewable error exists. In *Marques v. Canada (Minister of Citizenship and Immigration) (No. 1)* (1995), 116 F.T.R. 241, an H & C decision was set aside because the decision-making officer

pertinents pour évaluer le contenu de l'obligation d'équité, le fait qu'il n'y a pas eu d'audience ni d'avis d'audience ne constituait pas, selon moi, un manquement à l'obligation d'équité procédurale envers M^{me} Baker dans les circonstances, particulièrement en raison du fait que plusieurs des facteurs militaient en faveur d'une norme plus souple. La possibilité qui a été offerte à l'appelante et à ses enfants de produire une documentation écrite complète relativement à tous les aspects de sa demande remplit les exigences en matière de droits de participation que commandait l'obligation d'équité en l'espèce.

(4) L'exposé des motifs

L'appelante soutient également que l'obligation d'équité, dans les circonstances, exige que le décideur motive ses décisions. Elle soutient qu'il faut soit considérer les notes de l'agent Lorenz comme les motifs de la décision, soit conclure que le défaut de l'agent Caden de donner les motifs écrits de sa décision, ou un affidavit subséquent les expliquant, est un manquement aux principes d'équité.

Cette question a été abordée dans plusieurs cas de contrôle judiciaire de demandes fondées sur des raisons d'ordre humanitaire. La Cour d'appel fédérale a statué qu'il n'était pas nécessaire que les décisions soient motivées: *Shah*, précité, aux pp. 239 et 240. Elle a également statué que les notes de l'historique des faits préparées par un agent subalterne ne doivent pas être considérées comme les motifs du décideur: voir *Tylo c. Ministère de l'Emploi et de l'Immigration* (1995), 90 F.T.R. 157, aux pp. 159 et 160. Les décisions *Gheorlan c. Canada (Secrétaire d'État)* (1995), 26 Imm. L.R. (2d) 170 (C.F. 1^{re} inst.), et *Chan c. Canada (Ministre de la Citoyenneté et de l'Immigration)* (1994), 87 F.T.R. 62, concluent qu'il ne faut pas considérer les notes de l'agent de réexamen comme des motifs de décision, mais que ces notes peuvent servir à déterminer s'il existe une erreur susceptible de contrôle judiciaire. Dans *Marques c. Canada (Ministre de la Citoyenneté et de l'Immigration) (n° 1)* (1995), 116 F.T.R. 241, une décision d'ordre humanitaire a été annulée parce que le décideur n'avait pas motivé sa

failed to provide reasons or an affidavit explaining the reasons for his decision.

More generally, the traditional position at common law has been that the duty of fairness does not require, as a general rule, that reasons be provided for administrative decisions: *Northwestern Utilities Ltd. v. City of Edmonton*, [1979] 1 S.C.R. 684; *Supermarchés Jean Labrecque Inc. v. Flamand*, [1987] 2 S.C.R. 219, at p. 233; *Public Service Board of New South Wales v. Osmond* (1986), 159 C.L.R. 656 (H.C.A.), at pp. 665-66.

Courts and commentators have, however, often emphasized the usefulness of reasons in ensuring fair and transparent decision-making. Though *Northwestern Utilities* dealt with a statutory obligation to give reasons, Estey J. held as follows, at p. 706, referring to the desirability of a common law reasons requirement:

This obligation is a salutary one. It reduces to a considerable degree the chances of arbitrary or capricious decisions, reinforces public confidence in the judgment and fairness of administrative tribunals, and affords parties to administrative proceedings an opportunity to assess the question of appeal. . . .

The importance of reasons was recently reemphasized by this Court in *Reference re Remuneration of Judges of the Provincial Court of Prince Edward Island*, [1997] 3 S.C.R. 3, at paras. 180-81.

Reasons, it has been argued, foster better decision making by ensuring that issues and reasoning are well articulated and, therefore, more carefully thought out. The process of writing reasons for decision by itself may be a guarantee of a better decision. Reasons also allow parties to see that the applicable issues have been carefully considered, and are invaluable if a decision is to be appealed, questioned, or considered on judicial review: R. A. Macdonald and D. Lametti, "Reasons for Decision in Administrative Law" (1990), 3 C.J.A.L.P. 123, at p. 146; *Williams v. Canada (Minister of Citizenship and Immigration)*, [1997] 2 F.C. 646 (C.A.), at para. 38. Those affected may

décision, ni fourni d'affidavit expliquant les motifs de sa décision.

Plus généralement, la common law a traditionnellement reconnu que l'obligation d'équité n'exige pas, en règle générale, que les décisions administratives soient motivées: *Northwestern Utilities Ltd. c. Ville d'Edmonton*, [1979] 1 R.C.S. 684; *Supermarchés Jean Labrecque Inc. c. Flamand*, [1987] 2 R.C.S. 219, à la p. 233; *Public Service Board of New South Wales c. Osmond* (1986), 159 C.L.R. 656 (H.C.A.), aux pp. 665 et 666.

Toutefois, les tribunaux et les auteurs ont maintes fois souligné l'utilité des motifs pour assurer la transparence et l'équité de la prise de décision. Quoique l'arrêt *Northwestern Utilities* traite d'une obligation légale de motiver des décisions, le juge Estey fait l'observation suivante, à la p. 706, sur l'utilité d'une règle de common law qui exigerait la production de motifs:

Cette obligation est salutaire: elle réduit considérablement les risques de décisions arbitraires, raffermir la confiance du public dans le jugement et l'équité des tribunaux administratifs et permet aux parties aux procédures d'évaluer la possibilité d'un appel . . .

L'importance des motifs a récemment été réitérée par la Cour dans le *Renvoi relatif à la rémunération des juges de la Cour provinciale de l'Île-du-Prince-Édouard*, [1997] 3 R.C.S. 3, aux par. 180 et 181.

On a soutenu que la rédaction de motifs favorise une meilleure prise de décision en ce qu'elle exige une bonne formulation des questions et du raisonnement et, en conséquence, une analyse plus rigoureuse. Le processus de rédaction des motifs d'une décision peut en lui-même garantir une meilleure décision. Les motifs permettent aussi aux parties de voir que les considérations applicables ont été soigneusement étudiées, et ils sont de valeur inestimable si la décision est portée en appel, contestée ou soumise au contrôle judiciaire: R. A. Macdonald et D. Lametti, «Reasons for Decision in Administrative Law» (1990), 3 C.J.A.L.P. 123, à la p. 146; *Williams c. Canada*

37

38

39

be more likely to feel they were treated fairly and appropriately if reasons are given: de Smith, Woolf, & Jowell, *Judicial Review of Administrative Action* (5th ed. 1995), at pp. 459-60. I agree that these are significant benefits of written reasons.

(*Ministre de la Citoyenneté et de l'Immigration*), [1997] 2 C.F. 646 (C.A.), au par. 38. Il est plus probable que les personnes touchées ont l'impression d'être traitées avec équité et de façon appropriée si des motifs sont fournis: de Smith, Woolf & Jowell, *Judicial Review of Administrative Action* (5^e éd. 1995), aux pp. 459 et 460. Je suis d'accord qu'il s'agit là d'avantages importants de la rédaction de motifs écrits.

40 Others have expressed concerns about the desirability of a written reasons requirement at common law. In *Osmond*, *supra*, Gibbs C.J. articulated, at p. 668, the concern that a reasons requirement may lead to an inappropriate burden being imposed on administrative decision-makers, that it may lead to increased cost and delay, and that it "might in some cases induce a lack of candour on the part of the administrative officers concerned". Macdonald and Lametti, *supra*, though they agree that fairness should require the provision of reasons in certain circumstances, caution against a requirement of "archival" reasons associated with court judgments, and note that the special nature of agency decision-making in different contexts should be considered in evaluating reasons requirements. In my view, however, these concerns can be accommodated by ensuring that any reasons requirement under the duty of fairness leaves sufficient flexibility to decision-makers by accepting various types of written explanations for the decision as sufficient.

D'autres ont émis des réserves quant à l'utilité d'une règle de common law qui exigerait la production de motifs écrits. Dans l'arrêt *Osmond*, précité, le juge en chef Gibbs a dit, à la p. 668, qu'il craignait qu'une obligation de rédiger des motifs puisse finir par imposer un fardeau indu aux décideurs administratifs, entraîner une augmentation des coûts et des délais, et [TRADUCTION] «dans certains cas occasionner un manque de sincérité de la part des fonctionnaires concernés». Même s'ils conviennent que l'équité devrait exiger que des motifs soient donnés dans certaines circonstances, Macdonald et Lametti, *loc. cit.*, font une mise en garde contre une exigence donnant lieu à des motifs [TRADUCTION] «d'archives» s'apparentant aux décisions judiciaires, et notent qu'il faut tenir compte de la nature particulière de l'organisme décisionnel dans différents contextes pour évaluer l'exigence des motifs. À mon avis, cependant, on peut répondre à ces préoccupations en veillant à ce que toute obligation de motiver la décision en raison de l'obligation d'équité laisse aux décideurs assez de latitude, en acceptant comme suffisants divers types d'explications écrites.

41 In England, a common law right to reasons in certain circumstances has developed in the case law: see M. H. Morris, "Administrative Decision-makers and the Duty to Give Reasons: An Emerging Debate" (1997), 11 *C.J.A.L.P.* 155, at pp. 164-68; de Smith, Woolf & Jowell, *supra*, at pp. 462-65. In *R. v. Civil Service Appeal Board, ex parte Cunningham*, [1991] 4 All E.R. 310 (C.A.), reasons were required of a board deciding the appeal of the dismissal of a prison official. The House of Lords, in *R. v. Secretary of State for the Home Department, ex parte Doody*, [1994] 1 A.C. 531, imposed a reasons requirement on the Home

En Angleterre, un droit de common law à la production de motifs dans certaines circonstances est apparu dans la jurisprudence: voir M. H. Morris, «Administrative Decision-makers and the Duty to Give Reasons: An Emerging Debate» (1997), 11 *C.J.A.L.P.* 155, aux pp. 164 à 168; de Smith, Woolf & Jowell, *op. cit.*, aux pp. 462 à 465. L'arrêt *R. c. Civil Service Appeal Board, ex parte Cunningham*, [1991] 4 All E.R. 310 (C.A.), a conclu qu'une commission décidant de l'appel du congédiement d'un agent de prison devait motiver sa décision. La Chambre des lords, dans l'arrêt *R. c. Secretary of State for the Home Department, ex*

Secretary when exercising the statutory discretion to decide on the period of imprisonment that a prisoner who had been imposed a life sentence should serve before being entitled to a review. Lord Mustill, speaking for all the law lords on the case, held that although there was no general duty to give reasons at common law, in those circumstances, a failure to give reasons was unfair. Other English cases have held that reasons are required at common law when there is a statutory right of appeal: see *Norton Tool Co. v. Tewson*, [1973] 1 W.L.R. 45 (N.I.R.C.), at p. 49; *Alexander Machinery (Dudley) Ltd. v. Crabtree*, [1974] I.C.R. 120 (N.I.R.C.).

Some Canadian courts have imposed, in certain circumstances, a common law obligation on administrative decision-makers to provide reasons, while others have been more reluctant. In *Orlowski v. British Columbia (Attorney-General)* (1992), 94 D.L.R. (4th) 541 (B.C.C.A.), at pp. 551-52, it was held that reasons would generally be required for decisions of a review board under Part XX.1 of the *Criminal Code*, based in part on the existence of a statutory right of appeal from that decision, and also on the importance of the interests affected by the decision. In *R.D.R. Construction Ltd. v. Rent Review Commission* (1982), 55 N.S.R. (2d) 71 (C.A.), the court also held that because of the existence of a statutory right of appeal, there was an implied duty to give reasons. Smith D.J., in *Taabea v. Refugee Status Advisory Committee*, [1980] 2 F.C. 316 (T.D.), imposed a reasons requirement on a ministerial decision relating to refugee status, based upon the right to apply to the Immigration Appeal Board for redetermination. Similarly, in the context of evaluating whether a statutory reasons requirement had been adequately fulfilled in *Boyle v. Workplace Health, Safety and Compensation Commission (N.B.)* (1996), 179 N.B.R. (2d) 43 (C.A.), Bastarache J.A. (as he then was) emphasized, at p. 55, the importance of adequate reasons when appealing a decision. However, the Federal Court of Appeal recently rejected the submission that reasons were required in rela-

parte *Doody*, [1994] 1 A.C. 531, a exigé que le Secrétaire de l'Intérieur fournisse des motifs quand il exerce le pouvoir discrétionnaire dont l'investit la loi de décider du temps qu'une personne condamnée à l'emprisonnement à perpétuité devait passer en prison avant d'avoir droit à un réexamen. Lord Mustill, au nom de tous les lords juristes dans l'affaire, conclut que même s'il n'existe pas d'obligation générale de fournir des motifs en common law, dans les circonstances visées, il était inéquitable de ne pas fournir des motifs. D'autres décisions anglaises ont conclu que la common law exige que les décisions soient motivées quand il existe un droit d'appel prévu par la loi: voir *Norton Tool Co. c. Tewson*, [1973] 1 W.L.R. 45 (N.I.R.C.), à la p. 49; *Alexander Machinery (Dudley) Ltd. c. Crabtree*, [1974] I.C.R. 120 (N.I.R.C.).

Certains tribunaux canadiens ont imposé aux décideurs administratifs, dans des circonstances particulières, une obligation de common law de motiver leurs décisions, tandis que d'autres ont été plus hésitants à le faire. L'arrêt *Orlowski c. British Columbia (Attorney-General)* (1992), 94 D.L.R. (4th) 541 (C.A.C.-B.), aux pp. 551 et 552, conclut qu'en général une commission d'examen agissant sous le régime de la partie XX.1 du *Code criminel* devait motiver ses décisions, en raison notamment de l'existence d'un droit d'appel prévu par la loi et de l'importance des droits touchés par ces décisions. Dans l'arrêt *R.D.R. Construction Ltd. c. Rent Review Commission* (1982), 55 N.S.R. (2d) 71 (C.A.), la cour a statué qu'en raison de l'existence d'un droit d'appel prévu par la loi, il existait implicitement une obligation de donner des motifs. Le juge suppléant Smith, dans l'affaire *Taabea c. Comité consultatif sur le statut de réfugié*, [1980] 2 C.F. 316 (1^{re} inst.), a imposé une obligation de motiver une décision ministérielle portant sur le statut de réfugié, en raison du droit d'en demander le réexamen devant la Commission d'appel de l'immigration. De même, alors qu'il examinait si l'exigence prévue par la loi de donner des motifs avait été convenablement remplie, le juge Bastarache (alors juge à la Cour d'appel) a souligné, dans l'arrêt *Boyle c. Commission de la santé, de la sécurité et de l'indemnisation des accidents au travail (N.-B.)* (1996), 179 R.N.-B. (2^e) 43

tion to a decision to declare a permanent resident a danger to the public under s. 70(5) of the *Immigration Act*: *Williams, supra*.

(C.A.), à la p. 55, qu'il était important de disposer de motifs appropriés quand une décision est portée en appel. Toutefois, la Cour d'appel fédérale a récemment conclu qu'il n'était pas nécessaire de motiver une décision dont le but était de déclarer qu'un résident permanent constituait un danger pour le public en vertu du par. 70(5) de la *Loi sur l'immigration*: *Williams, précité*.

43 In my opinion, it is now appropriate to recognize that, in certain circumstances, the duty of procedural fairness will require the provision of a written explanation for a decision. The strong arguments demonstrating the advantages of written reasons suggest that, in cases such as this where the decision has important significance for the individual, when there is a statutory right of appeal, or in other circumstances, some form of reasons should be required. This requirement has been developing in the common law elsewhere. The circumstances of the case at bar, in my opinion, constitute one of the situations where reasons are necessary. The profound importance of an H & C decision to those affected, as with those at issue in *Orlowski*, *Cunningham*, and *Doody*, militates in favour of a requirement that reasons be provided. It would be unfair for a person subject to a decision such as this one which is so critical to their future not to be told why the result was reached.

À mon avis, il est maintenant approprié de reconnaître que, dans certaines circonstances, l'obligation d'équité procédurale requerra une explication écrite de la décision. Les solides arguments démontrant les avantages de motifs écrits indiquent que, dans des cas comme en l'espèce où la décision revêt une grande importance pour l'individu, dans des cas où il existe un droit d'appel prévu par la loi, ou dans d'autres circonstances, une forme quelconque de motifs écrits est requise. Cette exigence est apparue dans la common law ailleurs. Les circonstances de l'espèce, à mon avis, constituent l'une de ces situations où des motifs écrits sont nécessaires. L'importance cruciale d'une décision d'ordre humanitaire pour les personnes visées, comme celles dont il est question dans les arrêts *Orlowski*, *Cunningham* et *Doody*, milite en faveur de l'obligation de donner des motifs. Il serait injuste à l'égard d'une personne visée par une telle décision, si essentielle pour son avenir, de ne pas lui expliquer pourquoi elle a été prise.

44 In my view, however, the reasons requirement was fulfilled in this case since the appellant was provided with the notes of Officer Lorenz. The notes were given to Ms. Baker when her counsel asked for reasons. Because of this, and because there is no other record of the reasons for making the decision, the notes of the subordinate reviewing officer should be taken, by inference, to be the reasons for decision. Accepting documents such as these notes as sufficient reasons is part of the flexibility that is necessary, as emphasized by Macdonald and Lametti, *supra*, when courts evaluate the requirements of the duty of fairness with recognition of the day-to-day realities of administrative agencies and the many ways in which the values underlying the principles of procedural fairness

J'estime, toutefois, que cette obligation a été remplie en l'espèce par la production des notes de l'agent Lorenz à l'appelante. Les notes ont été remises à M^{me} Baker lorsque son avocat a demandé des motifs. Pour cette raison, et parce qu'il n'existe pas d'autres documents indiquant les motifs de la décision, les notes de l'agent subalterne devraient être considérées, par déduction, comme les motifs de la décision. L'admission de documents tels que ces notes comme motifs de la décision fait partie de la souplesse nécessaire, ainsi que l'ont souligné Macdonald et Lametti, *loc. cit.*, quand des tribunaux évaluent les exigences de l'obligation d'équité tout en tenant compte de la réalité quotidienne des organismes administratifs et des nombreuses façons d'assurer le respect des

can be assured. It upholds the principle that individuals are entitled to fair procedures and open decision-making, but recognizes that in the administrative context, this transparency may take place in various ways. I conclude that the notes of Officer Lorenz satisfy the requirement for reasons under the duty of procedural fairness in this case, and they will be taken to be the reasons for decision.

(5) Reasonable Apprehension of Bias

Procedural fairness also requires that decisions be made free from a reasonable apprehension of bias by an impartial decision-maker. The respondent argues that Simpson J. was correct to find that the notes of Officer Lorenz cannot be considered to give rise to a reasonable apprehension of bias because it was Officer Caden who was the actual decision-maker, who was simply reviewing the recommendation prepared by his subordinate. In my opinion, the duty to act fairly and therefore in a manner that does not give rise to a reasonable apprehension of bias applies to all immigration officers who play a significant role in the making of decisions, whether they are subordinate reviewing officers, or those who make the final decision. The subordinate officer plays an important part in the process, and if a person with such a central role does not act impartially, the decision itself cannot be said to have been made in an impartial manner. In addition, as discussed in the previous section, the notes of Officer Lorenz constitute the reasons for the decision, and if they give rise to a reasonable apprehension of bias, this taints the decision itself.

The test for reasonable apprehension of bias was set out by de Grandpré J., writing in dissent, in *Committee for Justice and Liberty v. National Energy Board*, [1978] 1 S.C.R. 369, at p. 394:

... the apprehension of bias must be a reasonable one, held by reasonable and right minded persons, applying themselves to the question and obtaining thereon the required information. . . [T]hat test is "what would an

valeurs qui fondent les principes de l'équité procédurale. Cela confirme le principe selon lequel les individus ont droit à une procédure équitable et à la transparence de la prise de décision, mais reconnaît aussi qu'en matière administrative, cette transparence peut être atteinte de différentes façons. Je conclus qu'en l'espèce les notes de l'agent Lorenz remplissent l'obligation de donner des motifs en vertu de l'obligation d'équité procédurale, et qu'elles seront considérées comme les motifs de la décision.

(5) La crainte raisonnable de partialité

L'équité procédurale exige également que les décisions soient rendues par un décideur impartial, sans crainte raisonnable de partialité. L'intimé soutient que le juge Simpson a eu raison de conclure que les notes de l'agent Lorenz ne peuvent pas donner lieu à une crainte raisonnable de partialité, parce que le vrai décideur était l'agent Caden, qui a simplement fait une revue de la recommandation préparée par son subalterne. L'obligation d'agir équitablement et, en conséquence, d'une façon qui ne donne pas lieu à une crainte raisonnable de partialité, s'applique, à mon avis, à tous les agents d'immigration qui jouent un rôle significatif dans la prise de décision, qu'ils soient des agents de réexamen subalternes, ou ceux qui rendent la décision finale. L'agent subordonné joue un rôle important dans le processus, et si une personne ayant un rôle aussi central n'agit pas de façon impartiale, la décision elle-même ne peut pas être considérée comme ayant été rendue de façon impartiale. En outre, comme je le dis au paragraphe précédent, les notes de l'agent Lorenz constituent les motifs de la décision, et si elles donnent lieu à une crainte raisonnable de partialité, la décision elle-même en est viciée.

Le test de la crainte raisonnable de partialité a été exposé par le juge de Grandpré, dissident, dans l'arrêt *Committee for Justice and Liberty c. Office national de l'énergie*, [1978] 1 R.C.S. 369, à la p. 394:

... la crainte de partialité doit être raisonnable et le fait d'une personne sensée et raisonnable qui se poserait elle-même la question et prendrait les renseignements nécessaires à ce sujet. [...] [C]e critère consiste à se

45

46

informed person, viewing the matter realistically and practically — and having thought the matter through — conclude. Would he think that it is more likely than not that [the decision-maker], whether consciously or unconsciously, would not decide fairly.”

This expression of the test has often been endorsed by this Court, most recently in *R. v. S. (R.D.)*, [1997] 3 S.C.R. 484, at para. 11, *per* Major J.; at para. 31, *per* L'Heureux-Dubé and McLachlin JJ.; and at para. 111, *per* Cory J.

demander «à quelle conclusion en arriverait une personne bien renseignée qui étudierait la question en profondeur, de façon réaliste et pratique. Croirait-elle que, selon toute vraisemblance, [le décideur], consciemment ou non, ne rendra pas une décision juste?»

Notre Cour a souvent souscrit à cette définition du test, plus récemment dans l'arrêt *R. c. S. (R.D.)*, [1997] 3 R.C.S. 484, au par. 11, le juge Major; au par. 31, les juges L'Heureux-Dubé et McLachlin; et au par. 111, le juge Cory.

47

It has been held that the standards for reasonable apprehension of bias may vary, like other aspects of procedural fairness, depending on the context and the type of function performed by the administrative decision-maker involved: *Newfoundland Telephone Co. v. Newfoundland (Board of Commissioners of Public Utilities)*, [1992] 1 S.C.R. 623; *Old St. Boniface*, *supra*, at p. 1192. The context here is one where immigration officers must regularly make decisions that have great importance to the individuals affected by them, but are also often critical to the interests of Canada as a country. They are individualized, rather than decisions of a general nature. They also require special sensitivity. Canada is a nation made up largely of people whose families migrated here in recent centuries. Our history is one that shows the importance of immigration, and our society shows the benefits of having a diversity of people whose origins are in a multitude of places around the world. Because they necessarily relate to people of diverse backgrounds, from different cultures, races, and continents, immigration decisions demand sensitivity and understanding by those making them. They require a recognition of diversity, an understanding of others, and an openness to difference.

Il a été décidé que le test relatif à la crainte raisonnable de partialité pouvait varier, comme d'autres éléments de l'équité procédurale, selon le contexte et le genre de fonction exercée par le décideur administratif concerné: *Newfoundland Telephone Co. c. Terre-Neuve (Board of Commissioners of Public Utilities)*, [1992] 1 R.C.S. 623; *Vieux St-Boniface*, précité, à la p. 1192. Le contexte en l'espèce est que les agents d'immigration doivent régulièrement prendre des décisions qui ont une très grande importance pour les personnes visées, mais qui souvent ont aussi une incidence sur les intérêts du Canada comme pays. Ce sont des décisions de nature individuelle plutôt que générale. Elles exigent également une grande sensibilité. Le Canada est une nation en grande partie composée de gens dont les familles ont émigré dans les siècles derniers. Notre histoire démontre l'importance de l'immigration, et notre société est l'exemple des avantages de la diversité de gens originaires d'une multitude de pays. Parce qu'elles visent nécessairement des personnes de provenances diverses, issues de cultures, de races et de continents différents, les décisions en matière d'immigration exigent de ceux qui les rendent sensibilité et compréhension. Elles exigent qu'on reconnaisse la diversité ainsi qu'une compréhension des autres et une ouverture d'esprit à la différence.

48

In my opinion, the well-informed member of the community would perceive bias when reading Officer Lorenz's comments. His notes, and the manner in which they are written, do not disclose the existence of an open mind or a weighing of the particular circumstances of the case free from stereotypes. Most unfortunate is the fact that they

À mon avis, les membres bien informés de la communauté percevraient la partialité dans les commentaires de l'agent Lorenz. Ses notes, et la façon dont elles sont rédigées, ne témoignent ni d'un esprit ouvert ni d'une absence de stéréotypes dans l'évaluation des circonstances particulières de l'affaire. Plus regrettable encore est le fait qu'elles

seem to make a link between Ms. Baker's mental illness, her training as a domestic worker, the fact that she has several children, and the conclusion that she would therefore be a strain on our social welfare system for the rest of her life. In addition, the conclusion drawn was contrary to the psychiatrist's letter, which stated that, with treatment, Ms. Baker could remain well and return to being a productive member of society. Whether they were intended in this manner or not, these statements give the impression that Officer Lorenz may have been drawing conclusions based not on the evidence before him, but on the fact that Ms. Baker was a single mother with several children, and had been diagnosed with a psychiatric illness. His use of capitals to highlight the number of Ms. Baker's children may also suggest to a reader that this was a reason to deny her status. Reading his comments, I do not believe that a reasonable and well-informed member of the community would conclude that he had approached this case with the impartiality appropriate to a decision made by an immigration officer. It would appear to a reasonable observer that his own frustration with the "system" interfered with his duty to consider impartially whether the appellant's admission should be facilitated owing to humanitarian or compassionate considerations. I conclude that the notes of Officer Lorenz demonstrate a reasonable apprehension of bias.

D. Review of the Exercise of the Minister's Discretion

Although the finding of reasonable apprehension of bias is sufficient to dispose of this appeal, it does not address the issues contained in the "serious question of general importance" which was certified by Simpson J. relating to the approach to be taken to children's interests when reviewing the exercise of the discretion conferred by the Act and the Regulations. Since it is important to address the central questions which led to this appeal, I will also consider whether, as a substantive matter, the H & C decision was improperly made in this case.

semblent établir un lien entre les troubles mentaux de M^{me} Baker, sa formation comme domestique, le fait qu'elle ait plusieurs enfants, et la conclusion qu'elle serait, en conséquence, un fardeau pour notre système d'aide sociale pour le restant de sa vie. En outre, la conclusion tirée était contraire à la lettre du psychiatre, qui disait qu'avec un traitement, l'état de M^{me} Baker pouvait continuer de s'améliorer et qu'elle pouvait redevenir un membre productif de la société. Qu'elles aient été faites dans cette intention ou non, ces déclarations donnent l'impression que l'agent Lorenz peut avoir tiré des conclusions en se fondant non pas sur la preuve dont il disposait, mais sur le fait que M^{me} Baker était une mère célibataire ayant plusieurs enfants, et était atteinte de troubles psychiatriques. L'utilisation de majuscules par l'agent pour souligner le nombre des enfants de M^{me} Baker peut également indiquer au lecteur que c'était là une raison de lui refuser sa demande. À la lecture des commentaires de l'agent, je ne crois pas qu'un membre raisonnable et bien informé de la communauté conclurait que l'agent a traité cette affaire avec l'impartialité requise de la part d'un agent d'immigration rendant ce genre de décision. Un observateur raisonnable noterait que la propre frustration de l'agent face au «système» l'empêchait d'évaluer avec impartialité si l'admission de l'appelante devrait être facilitée pour des raisons d'ordre humanitaire. Je conclus que les notes de l'agent Lorenz donnent lieu à une crainte raisonnable de partialité.

D. Le contrôle de l'exercice du pouvoir discrétionnaire du ministre

Bien que l'existence d'une crainte raisonnable de partialité suffise pour trancher le présent pourvoi, cette conclusion ne règle pas les points litigieux énoncés dans la «question grave de portée générale», certifiée par le juge Simpson, concernant la façon d'aborder l'intérêt des enfants dans le contrôle de l'exercice du pouvoir discrétionnaire conféré par la Loi et le règlement. Comme il est important de traiter des questions centrales qui ont conduit au présent pourvoi, j'examinerai également si, sur le fond, la décision d'ordre humanitaire a été incorrectement rendue dans la présente affaire.

50 The appellant argues that the notes provided to her show that, as a matter of law, the decision should be overturned on judicial review. She submits that the decision should be held to a standard of review of correctness, that principles of administrative law require this discretion to be exercised in accordance with the Convention, and that the Minister should apply the best interests of the child as a primary consideration in H & C decisions. The respondent submits that the Convention has not been implemented in Canadian law, and that to require that s. 114(2) and the Regulations made under it be interpreted in accordance with the Convention would be improper, since it would interfere with the broad discretion granted by Parliament, and with the division of powers between the federal and provincial governments.

(1) The Approach to Review of Discretionary Decision-Making

51 As stated earlier, the legislation and Regulations delegate considerable discretion to the Minister in deciding whether an exemption should be granted based upon humanitarian and compassionate considerations. The Regulations state that “[t]he Minister is . . . authorized to” grant an exemption or otherwise facilitate the admission to Canada of any person “where the Minister is satisfied that” this should be done “owing to the existence of compassionate or humanitarian considerations”. This language signals an intention to leave considerable choice to the Minister on the question of whether to grant an H & C application.

52 The concept of discretion refers to decisions where the law does not dictate a specific outcome, or where the decision-maker is given a choice of options within a statutorily imposed set of boundaries. As K. C. Davis wrote in *Discretionary Justice* (1969), at p. 4:

A public officer has discretion whenever the effective limits on his power leave him free to make a choice among possible courses of action or inaction.

It is necessary in this case to consider the approach to judicial review of administrative discretion,

L’appelante allègue que les notes qu’on lui a remises montrent que, en droit, la décision devrait être annulée par voie de contrôle judiciaire. Elle soutient que la décision devrait respecter la norme de la décision correcte, que les principes de droit administratif exigent que ce pouvoir discrétionnaire soit exercé conformément à la Convention, et que le ministre devrait faire de l’intérêt supérieur de l’enfant une considération primordiale dans les décisions d’ordre humanitaire. L’intimé soutient que la Convention n’a pas été incorporée dans le droit canadien, et qu’il serait inapproprié d’exiger que le par. 114(2) et son règlement d’application soient interprétés conformément à la Convention, parce que cela empiéterait sur le pouvoir discrétionnaire étendu conféré par le Parlement, et sur le partage des pouvoirs entre les gouvernements fédéral et provinciaux.

(1) La démarche relative au contrôle de décisions discrétionnaires

Comme je l’ai dit précédemment, la loi et le règlement délèguent un très large pouvoir discrétionnaire au ministre dans la décision d’accorder une dispense pour des raisons d’ordre humanitaire. Le règlement dit que «[l]e ministre est autorisé à accorder, pour des raisons d’ordre humanitaire, une dispense [. . .] ou à faciliter l’admission au Canada de toute autre manière». Ce langage témoigne de l’intention de laisser au ministre une grande latitude dans sa décision d’accorder ou non une demande fondée sur des raisons d’ordre humanitaire.

La notion de pouvoir discrétionnaire s’applique dans les cas où le droit ne dicte pas une décision précise, ou quand le décideur se trouve devant un choix d’options à l’intérieur de limites imposées par la loi. K. C. Davis écrit ceci dans *Discretionary Justice* (1969), à la p. 4:

[TRADUCTION] Un fonctionnaire possède un pouvoir discrétionnaire quand les limites réelles de son pouvoir lui donnent la liberté de choisir entre divers modes d’action ou d’inaction possibles.

Il faut examiner en l’espèce l’approche du contrôle judiciaire en matière de pouvoir discrétionnaire

taking into account the “pragmatic and functional” approach to judicial review that was first articulated in *U.E.S., Local 298 v. Bibeault*, [1988] 2 S.C.R. 1048, and has been applied in subsequent cases including *Canada (Attorney General) v. Mossop*, [1993] 1 S.C.R. 554, at pp. 601-7, *per* L'Heureux-Dubé J., dissenting, but not on this issue; *Pezim v. British Columbia (Superintendent of Brokers)*, [1994] 2 S.C.R. 557; *Canada (Director of Investigation and Research) v. Southam Inc.*, [1997] 1 S.C.R. 748; and *Pushpanathan*, *supra*.

Administrative law has traditionally approached the review of decisions classified as discretionary separately from those seen as involving the interpretation of rules of law. The rule has been that decisions classified as discretionary may only be reviewed on limited grounds such as the bad faith of decision-makers, the exercise of discretion for an improper purpose, and the use of irrelevant considerations: see, for example, *Maple Lodge Farms Ltd. v. Government of Canada*, [1982] 2 S.C.R. 2, at pp. 7-8; *Shell Canada Products Ltd. v. Vancouver (City)*, [1994] 1 S.C.R. 231. A general doctrine of “unreasonableness” has also sometimes been applied to discretionary decisions: *Associated Provincial Picture Houses, Ltd. v. Wednesbury Corporation*, [1948] 1 K.B. 223 (C.A.). In my opinion, these doctrines incorporate two central ideas — that discretionary decisions, like all other administrative decisions, must be made within the bounds of the jurisdiction conferred by the statute, but that considerable deference will be given to decision-makers by courts in reviewing the exercise of that discretion and determining the scope of the decision-maker's jurisdiction. These doctrines recognize that it is the intention of a legislature, when using statutory language that confers broad choices on administrative agencies, that courts should not lightly interfere with such decisions, and should give considerable respect to decision-makers when reviewing the manner in which discretion was exercised. However, discretion must still be exercised in a manner that is within a reasonable interpretation of the margin of manoeuvre contemplated by the legislature, in accordance with the principles of the rule of law (*Roncarelli v.*

administratif, en tenant compte de l'analyse «pragmatique et fonctionnelle» du contrôle judiciaire qui a été énoncée pour la première fois dans l'arrêt *U.E.S., Local 298 c. Bibeault*, [1988] 2 R.C.S. 1048, et appliquée dans des arrêts postérieurs dont *Canada (Procureur général) c. Mossop*, [1993] 1 R.C.S. 554, aux pp. 601 à 607, le juge L'Heureux-Dubé, dissidente sur d'autres points; *Pezim c. Colombie-Britannique (Superintendent of Brokers)*, [1994] 2 R.C.S. 557; *Canada (Directeur des enquêtes et recherches) c. Southam Inc.*, [1997] 1 R.C.S. 748; et *Pushpanathan*, précité.

Le droit administratif a traditionnellement abordé le contrôle judiciaire des décisions discrétionnaires séparément de décisions sur l'interprétation de règles de droit. Le principe est qu'on ne peut exercer un contrôle judiciaire sur les décisions discrétionnaires que pour des motifs limités, comme la mauvaise foi des décideurs, l'exercice du pouvoir discrétionnaire dans un but incorrect, et l'utilisation de considérations non pertinentes: voir, par exemple, *Maple Lodge Farms Ltd. c. Gouvernement du Canada*, [1982] 2 R.C.S. 2, aux pp. 7 et 8; *Produits Shell Canada Ltée c. Vancouver (Ville)*, [1994] 1 R.C.S. 231. Un principe général relatif au «caractère déraisonnable» a parfois été appliqué aussi à des décisions discrétionnaires: *Associated Provincial Picture Houses, Ltd. c. Wednesbury Corporation*, [1948] 1 K.B. 223 (C.A.). À mon avis, ces principes englobent deux idées centrales — qu'une décision discrétionnaire, comme toute autre décision administrative, doit respecter les limites de la compétence conférée par la loi, mais que les tribunaux devront exercer une grande retenue à l'égard des décideurs lorsqu'ils contrôlent ce pouvoir discrétionnaire et déterminent l'étendue de la compétence du décideur. Ces principes reconnaissent que lorsque le législateur confère par voie législative des choix étendus aux organismes administratifs, son intention est d'indiquer que les tribunaux ne devraient pas intervenir à la légère dans de telles décisions, et devraient accorder une marge considérable de respect aux décideurs lorsqu'ils révisent la façon dont les décideurs ont exercé leur discrétion. Toutefois, l'exercice du pouvoir discrétionnaire doit quand même rester dans les limites d'une

Duplessis, [1959] S.C.R. 121), in line with general principles of administrative law governing the exercise of discretion, and consistent with the *Canadian Charter of Rights and Freedoms* (*Slaight Communications Inc. v. Davidson*, [1989] 1 S.C.R. 1038).

interprétation raisonnable de la marge de manœuvre envisagée par le législateur, conformément aux principes de la primauté du droit (*Roncarelli c. Duplessis*, [1959] R.C.S. 121), suivant les principes généraux de droit administratif régissant l'exercice du pouvoir discrétionnaire, et de façon conciliable avec la *Charte canadienne des droits et libertés* (*Slaight Communications Inc. c. Davidson*, [1989] 1 R.C.S. 1038).

54

It is, however, inaccurate to speak of a rigid dichotomy of “discretionary” or “non-discretionary” decisions. Most administrative decisions involve the exercise of implicit discretion in relation to many aspects of decision making. To give just one example, decision-makers may have considerable discretion as to the remedies they order. In addition, there is no easy distinction to be made between interpretation and the exercise of discretion; interpreting legal rules involves considerable discretion to clarify, fill in legislative gaps, and make choices among various options. As stated by Brown and Evans, *supra*, at p. 14-47:

J'estime qu'il est inexact de parler d'une dichotomie stricte entre les décisions «discrétionnaires» et les décisions «non discrétionnaires». La plupart des décisions administratives comporte l'exercice d'un pouvoir discrétionnaire implicite relativement à de nombreux aspects de la prise de décision. Pour ne donner qu'un seul exemple, les décideurs peuvent avoir un pouvoir discrétionnaire très étendu dans les réparations qu'ils accordent. En outre, il n'est pas facile d'établir une distinction entre l'interprétation et l'exercice du pouvoir discrétionnaire; l'interprétation de règles de droit comporte un pouvoir discrétionnaire étendu pour ce qui est de clarifier, de combler les vides juridiques, et de choisir entre différentes options. Comme le disent Brown et Evans, *op. cit.*, à la p. 14-47:

The degree of discretion in a grant of power can range from one where the decision-maker is constrained only by the purposes and objects of the legislation, to one where it is so specific that there is almost no discretion involved. In between, of course, there may be any number of limitations placed on the decision-maker's freedom of choice, sometimes referred to as “structured” discretion.

[TRADUCTION] Le degré de discrétion dans l'attribution d'un pouvoir peut aller d'un pouvoir dans lequel le décideur est contraint seulement par les objectifs de la loi, à un pouvoir si défini que n'intervient pratiquement pas de discrétion. Entre les deux, évidemment, il existe plusieurs limites à la liberté de choix du décideur, parfois appelé une discrétion «structurée».

55

The “pragmatic and functional” approach recognizes that standards of review for errors of law are appropriately seen as a spectrum, with certain decisions being entitled to more deference, and others entitled to less: *Pezim*, *supra*, at pp. 589-90; *Southam*, *supra*, at para. 30; *Pushpanathan*, *supra*, at para. 27. Three standards of review have been defined: patent unreasonableness, reasonableness *simpliciter*, and correctness: *Southam*, at paras. 54-56. In my opinion the standard of review of the substantive aspects of discretionary decisions is best approached within this framework, especially given the difficulty in making rigid classifications

La démarche «pragmatique et fonctionnelle» reconnaît qu'il y a une large gamme de normes de contrôle judiciaire des erreurs de droit, certaines décisions exigeant plus de retenue, et d'autres moins: *Pezim*, précité, aux pp. 589 et 590; *Southam*, précité, au par. 30; *Pushpanathan*, précité, au par. 27. Trois normes de contrôle ont été définies: la décision manifestement déraisonnable, la décision raisonnable *simpliciter* et la décision correcte: *Southam*, précité, aux par. 54 à 56. Je suis d'avis que la norme de contrôle des éléments de fond d'une décision discrétionnaire est mieux envisagée dans ce cadre, compte tenu particulièrement

between discretionary and non-discretionary decisions. The pragmatic and functional approach takes into account considerations such as the expertise of the tribunal, the nature of the decision being made, and the language of the provision and the surrounding legislation. It includes factors such as whether a decision is “polycentric” and the intention revealed by the statutory language. The amount of choice left by Parliament to the administrative decision-maker and the nature of the decision being made are also important considerations in the analysis. The spectrum of standards of review can incorporate the principle that, in certain cases, the legislature has demonstrated its intention to leave greater choices to decision-makers than in others, but that a court must intervene where such a decision is outside the scope of the power accorded by Parliament. Finally, I would note that this Court has already applied this framework to statutory provisions that confer significant choices on administrative bodies, for example, in reviewing the exercise of the remedial powers conferred by the statute at issue in *Southam*, *supra*.

Incorporating judicial review of decisions that involve considerable discretion into the pragmatic and functional analysis for errors of law should not be seen as reducing the level of deference given to decisions of a highly discretionary nature. In fact, deferential standards of review may give substantial leeway to the discretionary decision-maker in determining the “proper purposes” or “relevant considerations” involved in making a given determination. The pragmatic and functional approach can take into account the fact that the more discretion that is left to a decision-maker, the more reluctant courts should be to interfere with the manner in which decision-makers have made choices among various options. However, though discretionary decisions will generally be given considerable respect, that discretion must be exercised in accordance with the boundaries imposed in the statute, the principles of the rule of law, the principles of administrative law, the fundamental values of Canadian society, and the principles of the *Charter*.

de la difficulté de faire des classifications rigides entre les décisions discrétionnaires et les décisions non discrétionnaires. La démarche pragmatique et fonctionnelle tient compte de considérations comme l'expertise du tribunal, la nature de la décision qui est prise, et le libellé de la disposition et des lois qui s'y rapportent. Elle comprend des facteurs comme le caractère «polycentrique» d'une décision et l'intention exprimée par le langage employé par la loi. La latitude que laisse le Parlement au décideur administratif et la nature de la décision qui est prise sont également d'importantes considérations dans l'analyse. La gamme de normes de contrôle peut comprendre le principe que, dans certains cas, la législature a fait part de son intention de laisser des choix plus grands aux décideurs que dans d'autres, mais qu'il faut qu'un tribunal intervienne quand une telle décision dépasse l'étendue du pouvoir conféré par le Parlement. Enfin, je signalerais que notre Cour a déjà appliqué ce cadre à des dispositions législatives qui accordent une latitude importante à des organismes administratifs, par exemple, en contrôlant l'exercice des pouvoirs de réparation conférés par la loi en cause dans l'arrêt *Southam*, précité.

L'intégration du contrôle judiciaire de décisions comportant un large pouvoir discrétionnaire dans l'analyse pragmatique et fonctionnelle en raison d'erreurs de droit ne devrait pas être considérée comme une diminution du niveau de retenue accordé aux décisions de nature hautement discrétionnaire. En fait, des normes de contrôle judiciaire empreintes de retenue peuvent donner au décideur discrétionnaire une grande liberté d'action dans la détermination des «objectifs appropriés» ou des «considérations pertinentes». La démarche pragmatique et fonctionnelle peut tenir compte du fait que plus le pouvoir discrétionnaire accordé à un décideur est grand, plus les tribunaux devraient hésiter à intervenir dans la manière dont les décideurs ont choisi entre diverses options. Toutefois, même si, en général, il sera accordé un grand respect aux décisions discrétionnaires, il faut que le pouvoir discrétionnaire soit exercé conformément aux limites imposées dans la loi, aux principes de la primauté du droit, aux principes du droit administratif, aux valeurs fondamentales de la société canadienne, et aux principes de la *Charte*.

(2) The Standard of Review in This Case(2) La norme de contrôle en l'espèce

57

I turn now to an application of the pragmatic and functional approach to determine the appropriate standard of review for decisions made under s. 114(2) and Regulation 2.1, and the factors affecting the determination of that standard outlined in *Pushpanathan*, *supra*. It was held in that case that the decision, which related to the determination of a question of law by the Immigration and Refugee Board, was subject to a standard of review of correctness. Although that decision was also one made under the *Immigration Act*, the type of decision at issue was very different, as was the decision-maker. The appropriate standard of review must, therefore, be considered separately in the present case.

J'examine maintenant l'application de la démarche pragmatique et fonctionnelle pour déterminer la norme de contrôle appropriée à l'égard de décisions rendues en vertu du par. 114(2) et de l'art. 2.1 du règlement, et les facteurs à considérer mis en évidence dans l'arrêt *Pushpanathan*, précité. Cet arrêt conclut que la décision, qui se rapportait à la détermination d'une question de droit par la Commission de l'immigration et du statut de réfugié, devait respecter la norme de la décision correcte. Bien qu'elle ait également été rendue sous le régime de la *Loi sur l'immigration*, la décision en litige était très différente, tout comme l'était le décideur. Il faut donc évaluer la norme de contrôle appropriée distinctement dans la présente affaire.

58

The first factor to be examined is the presence or absence of a privative clause, and, in appropriate cases, the wording of that clause: *Pushpanathan*, at para. 30. There is no privative clause contained in the *Immigration Act*, although judicial review cannot be commenced without leave of the Federal Court — Trial Division under s. 82.1. As mentioned above, s. 83(1) requires the certification of a “serious question of general importance” by the Federal Court — Trial Division before that decision may be appealed to the Court of Appeal. *Pushpanathan* shows that the existence of this provision means there should be a lower level of deference on issues related to the certified question itself. However, this is only one of the factors involved in determining the standard of review, and the others must also be considered.

Le premier facteur à examiner est la présence ou l'absence d'une clause privative et, le cas échéant, le libellé de cette clause: *Pushpanathan*, au par. 30. La *Loi sur l'immigration* ne contient pas de clause privative, mais le contrôle judiciaire ne peut se faire sans l'autorisation de la Cour fédérale, Section de première instance, selon l'art. 82.1. Comme je l'ai dit précédemment, le par. 83(1) exige la certification d'une «question grave de portée générale» par la Cour fédérale, Section de première instance, pour que cette décision puisse être portée en appel devant la Cour d'appel. L'arrêt *Pushpanathan* montre que l'existence de cette disposition signifie un degré moindre de retenue à l'égard des points litigieux liés à la question certifiée. Toutefois, il ne s'agit que de l'un des facteurs à considérer pour déterminer la norme de contrôle, et il faut également évaluer les autres.

59

The second factor is the expertise of the decision-maker. The decision-maker here is the Minister of Citizenship and Immigration or his or her delegate. The fact that the formal decision-maker is the Minister is a factor militating in favour of deference. The Minister has some expertise relative to courts in immigration matters, particularly with respect to when exemptions should be given from the requirements that normally apply.

Le deuxième facteur est l'expertise du décideur. En l'espèce, le décideur est le ministre de la Citoyenneté et de l'Immigration ou son représentant. Le fait que, officiellement, le décideur soit le ministre est un facteur militant en faveur de la retenue. Le ministre a une certaine expertise par rapport aux tribunaux en matière d'immigration, surtout en ce qui concerne les dispenses d'application des exigences habituelles.

The third factor is the purpose of the provision in particular, and of the Act as a whole. This decision involves considerable choice on the part of the Minister in determining when humanitarian and compassionate considerations warrant an exemption from the requirements of the Act. The decision also involves applying relatively “open-textured” legal principles, a factor militating in favour of greater deference: *Pushpanathan*, *supra*, at para. 36. The purpose of the provision in question is also to exempt applicants, in certain circumstances, from the requirements of the Act or its Regulations. This factor, too, is a signal that greater deference should be given to the Minister. However, it should also be noted, in favour of a stricter standard, that this decision relates directly to the rights and interests of an individual in relation to the government, rather than balancing the interests of various constituencies or mediating between them. Its purpose is to decide whether the admission to Canada of a particular individual, in a given set of circumstances, should be facilitated.

The fourth factor outlined in *Pushpanathan* considers the nature of the problem in question, especially whether it relates to the determination of law or facts. The decision about whether to grant an H & C exemption involves a considerable appreciation of the facts of that person’s case, and is not one which involves the application or interpretation of definitive legal rules. Given the highly discretionary and fact-based nature of this decision, this is a factor militating in favour of deference.

These factors must be balanced to arrive at the appropriate standard of review. I conclude that considerable deference should be accorded to immigration officers exercising the powers conferred by the legislation, given the fact-specific nature of the inquiry, its role within the statutory scheme as an exception, the fact that the decision-maker is the Minister, and the considerable discretion evidenced by the statutory language. Yet the absence of a privative clause, the explicit contemplation of judicial review by the Federal Court — Trial Division and the Federal Court of Appeal in certain circumstances, and the individual rather

Le troisième facteur est l’objet de la disposition en particulier, et de la Loi dans son ensemble. Cette décision implique une grande latitude pour le ministre qui doit décider si des raisons d’ordre humanitaire justifient une dispense des exigences de la Loi. La décision commande aussi l’application de principes juridiques relativement peu «limitatifs», un facteur militant en faveur d’une plus grande retenue: *Pushpanathan*, précité, au par. 36. L’objet de la disposition en question est également de dispenser les demandeurs, dans certaines circonstances, des exigences de la Loi ou de son règlement. Ce facteur joue aussi en faveur d’une plus grande retenue envers la décision du ministre. Toutefois, il faut également signaler, en faveur d’une norme plus stricte, que cette décision vise directement les droits et les intérêts d’un individu par rapport au gouvernement plutôt qu’elle n’évalue ou ne pondère les intérêts de divers groupes. Le but de la décision est de déterminer si l’admission au Canada d’un individu particulier, dans des circonstances données, devrait être facilitée.

Le quatrième facteur mis en relief dans l’arrêt *Pushpanathan* vise la nature du problème en question, particulièrement s’il s’agit de droit ou de faits. La décision d’accorder une dispense fondée sur des raisons d’ordre humanitaire demande principalement l’appréciation de faits relatifs au cas d’une personne, et ne porte pas sur l’application ni sur l’interprétation de règles de droit précises. Le fait que cette décision soit de nature hautement discrétionnaire et factuelle est un facteur qui milite en faveur de la retenue.

Tous ces facteurs doivent être soupesés afin d’en arriver à la norme d’examen appropriée. Je conclus qu’on devrait faire preuve d’une retenue considérable envers les décisions d’agents d’immigration exerçant les pouvoirs conférés par la loi, compte tenu de la nature factuelle de l’analyse, de son rôle d’exception au sein du régime législatif, du fait que le décideur est le ministre, et de la large discrétion accordée par le libellé de la loi. Toutefois, l’absence de clause privative, la possibilité expressément prévue d’un contrôle judiciaire par la Cour fédérale, Section de première instance, et la Cour d’appel fédérale dans certaines circonstances, ainsi

60

61

62

than polycentric nature of the decision, also suggest that the standard should not be as deferential as “patent unreasonableness”. I conclude, weighing all these factors, that the appropriate standard of review is reasonableness *simpliciter*.

(3) Was this Decision Unreasonable?

63 I will next examine whether the decision in this case, and the immigration officer’s interpretation of the scope of the discretion conferred upon him, were unreasonable in the sense contemplated in the judgment of Iacobucci J. in *Southam*, *supra*, at para. 56:

An unreasonable decision is one that, in the main, is not supported by any reasons that can stand up to a somewhat probing examination. Accordingly, a court reviewing a conclusion on the reasonableness standard must look to see whether any reasons support it. The defect, if there is one, could presumably be in the evidentiary foundation itself or in the logical process by which conclusions are sought to be drawn from it.

In particular, the examination of this question should focus on the issues arising from the “serious question of general importance” stated by Simpson J.: the question of the approach to be taken to the interests of children when reviewing an H & C decision.

64 The notes of Officer Lorenz, in relation to the consideration of “H & C factors”, read as follows:

The PC is a paranoid schizophrenic and on welfare. She has no qualifications other than as a domestic. She has FOUR CHILDREN IN JAMAICA AND ANOTHER FOUR BORN HERE. She will, of course, be a tremendous strain on our social welfare systems for (probably) the rest of her life. There are no H&C factors other than her FOUR CANADIAN-BORN CHILDREN. Do we let her stay because of that? I am of the opinion that Canada can no longer afford this type of generosity.

65 In my opinion, the approach taken to the children’s interests shows that this decision was unreasonable in the sense contemplated in *Southam*,

que la nature individuelle plutôt que polycentrique de la décision, tendent aussi à indiquer que la norme applicable ne devrait pas en être une d’aussi grande retenue que celle du caractère «manifestement déraisonnable». Je conclus, après avoir évalué tous ces facteurs, que la norme de contrôle appropriée est celle de la décision raisonnable *simpliciter*.

(3) La décision était-elle déraisonnable?

J’examinerai maintenant si la décision dans la présente affaire, et l’interprétation par l’agent d’immigration de l’étendue du pouvoir discrétionnaire qui lui était conféré, étaient déraisonnables au sens où l’entend le juge Iacobucci dans l’arrêt *Southam*, précité, au par. 56:

Est déraisonnable la décision qui, dans l’ensemble, n’est étayée par aucun motif capable de résister à un examen assez poussé. En conséquence, la cour qui contrôle une conclusion en regard de la norme de la décision raisonnable doit se demander s’il existe quelque motif étayant cette conclusion. Le défaut, s’il en est, pourrait découler de la preuve elle-même ou du raisonnement qui a été appliqué pour tirer les conclusions de cette preuve.

L’examen de cette question devrait être axé sur les points découlant de la «question grave de portée générale» énoncée par le juge Simpson: la façon d’aborder la question de l’intérêt des enfants dans le contrôle d’une décision d’ordre humanitaire.

Les notes de l’agent Lorenz relatives à l’examen des raisons d’ordre humanitaire, disent ceci:

[TRADUCTION] PC est atteinte de schizophrénie paranoïde et reçoit l’assistance sociale. Elle n’a pas d’autres qualifications que de domestique. Elle a QUATRE ENFANTS EN JAMAÏQUE ET QUATRE AUTRES NÉS ICI. Elle sera, bien entendu, un fardeau excessif pour nos systèmes d’aide sociale (probablement) pour le reste de sa vie. Il n’existe pas d’autres facteurs d’ordre humanitaire que ses QUATRE ENFANTS NÉS AU CANADA. Devons-nous lui permettre de rester pour ça? Je suis d’avis que le Canada ne peut plus se permettre cette sorte de générosité.

À mon avis, la façon dont elle traite l’intérêt des enfants montre que cette décision était déraisonnable au sens de l’arrêt *Southam*, précité. L’agent n’a

supra. The officer was completely dismissive of the interests of Ms. Baker's children. As I will outline in detail in the paragraphs that follow, I believe that the failure to give serious weight and consideration to the interests of the children constitutes an unreasonable exercise of the discretion conferred by the section, notwithstanding the important deference that should be given to the decision of the immigration officer. Professor Dyzenhaus has articulated the concept of "deference as respect" as follows:

Deference as respect requires not submission but a respectful attention to the reasons offered or which could be offered in support of a decision. . . .

(D. Dyzenhaus, "The Politics of Deference: Judicial Review and Democracy", in M. Taggart, ed., *The Province of Administrative Law* (1997), 279, at p. 286.)

The reasons of the immigration officer show that his decision was inconsistent with the values underlying the grant of discretion. They therefore cannot stand up to the somewhat probing examination required by the standard of reasonableness.

The wording of s. 114(2) and of Regulation 2.1 requires that a decision-maker exercise the power based upon "compassionate or humanitarian considerations" (emphasis added). These words and their meaning must be central in determining whether an individual H & C decision was a reasonable exercise of the power conferred by Parliament. The legislation and regulations direct the Minister to determine whether the person's admission should be facilitated owing to the existence of such considerations. They show Parliament's intention that those exercising the discretion conferred by the statute act in a humanitarian and compassionate manner. This Court has found that it is necessary for the Minister to consider an H & C request when an application is made: *Jiminez-Perez*, *supra*. Similarly, when considering it, the request must be evaluated in a manner that is respectful of humanitarian and compassionate considerations.

prêté aucune attention à l'intérêt des enfants de M^{me} Baker. Comme je le démontrerai avec plus de détails dans les paragraphes qui suivent, j'estime que le défaut d'accorder de l'importance et de la considération à l'intérêt des enfants constitue un exercice déraisonnable du pouvoir discrétionnaire conféré par l'article, même s'il faut exercer un degré élevé de retenue envers la décision de l'agent d'immigration. Le professeur Dyzenhaus énonce ainsi la notion de la [TRADUCTION] «retenue au sens de respect»:

[TRADUCTION] La retenue au sens de respect ne demande pas la soumission, mais une attention respectueuse aux motifs donnés ou qui pourraient être donnés à l'appui d'une décision . . .

(D. Dyzenhaus, «The Politics of Deference: Judicial Review and Democracy», dans M. Taggart, dir., *The Province of Administrative Law* (1997), 279, à la p. 286.)

Les motifs de l'agent d'immigration démontrent que sa décision n'était pas compatible avec les valeurs sous-jacentes à l'octroi d'un pouvoir discrétionnaire. Ils ne peuvent donc pas résister à l'examen assez poussé qu'exige la norme du caractère raisonnable.

Le libellé du par. 114(2) et de l'art. 2.1 du règlement exige que le décideur exerce le pouvoir en se fondant sur «des raisons d'ordre humanitaire» (je souligne). Ces mots et leur sens doivent se situer au cœur de la réponse à la question de savoir si une décision d'ordre humanitaire particulière constituait un exercice raisonnable du pouvoir conféré par le Parlement. La loi et le règlement demandent au ministre de décider si l'admission d'une personne devrait être facilitée pour des raisons humanitaires. Ils démontrent que l'intention du Parlement est que ceux qui exercent le pouvoir discrétionnaire conféré par la loi agissent de façon humanitaire. Notre Cour a jugé que le ministre est tenu d'examiner les demandes d'ordre humanitaire qui sont présentées: *Jiminez-Perez*, précité. De même, quand il procède à cet examen, le ministre doit évaluer la demande d'une manière qui soit respectueuse des raisons d'ordre humanitaire.

67

Determining whether the approach taken by the immigration officer was within the boundaries set out by the words of the statute and the values of administrative law requires a contextual approach, as is taken to statutory interpretation generally: see *R. v. Gladue*, [1999] 1 S.C.R. 688; *Rizzo & Rizzo Shoes Ltd. (Re)*, [1998] 1 S.C.R. 27, at paras. 20-23. In my opinion, a reasonable exercise of the power conferred by the section requires close attention to the interests and needs of children. Children's rights, and attention to their interests, are central humanitarian and compassionate values in Canadian society. Indications of children's interests as important considerations governing the manner in which H & C powers should be exercised may be found, for example, in the purposes of the Act, in international instruments, and in the guidelines for making H & C decisions published by the Minister herself.

(a) *The Objectives of the Act*

68

The objectives of the Act include, in s. 3(c):

to facilitate the reunion in Canada of Canadian citizens and permanent residents with their close relatives from abroad;

Although this provision speaks of Parliament's objective of reuniting citizens and permanent residents with their close relatives from abroad, it is consistent, in my opinion, with a large and liberal interpretation of the values underlying this legislation and its purposes to presume that Parliament also placed a high value on keeping citizens and permanent residents together with their close relatives who are already in Canada. The obligation to take seriously and place important weight on keeping children in contact with both parents, if possible, and maintaining connections between close family members is suggested by the objective articulated in s. 3(c).

(b) *International Law*

69

Another indicator of the importance of considering the interests of children when making a compassionate and humanitarian decision is the ratifi-

Afin de décider si la démarche de l'agent d'immigration respectait les limites imposées par le libellé de la loi et les valeurs du droit administratif, une analyse contextuelle est requise comme l'exige en général l'interprétation des lois: voir *R. c. Gladue*, [1999] 1 R.C.S. 688; *Rizzo & Rizzo Shoes Ltd. (Re)*, [1998] 1 R.C.S. 27, aux par. 20 à 23. À mon avis, l'exercice raisonnable du pouvoir conféré par l'article exige que soit prêté une attention minutieuse aux intérêts et aux besoins des enfants. Les droits des enfants, et la considération de leurs intérêts, sont des valeurs d'ordre humanitaire centrales dans la société canadienne. Une indication que l'intérêt des enfants est une considération importante dans l'exercice des pouvoirs en matière humanitaire se trouve, par exemple, dans les objectifs de la Loi, dans les instruments internationaux, et dans les lignes directrices régissant les décisions d'ordre humanitaire publiées par le ministre lui-même.

a) *Les objectifs de la Loi*

Un des objectifs de la Loi est notamment, selon l'al. 3c):

de faciliter la réunion au Canada des citoyens canadiens et résidents permanents avec leurs proches parents de l'étranger;

Bien que cette disposition traite de l'objectif du Parlement de réunir des citoyens et des résidents permanents avec leurs proches parents de l'étranger, elle permet, à mon avis, en utilisant une interprétation large et libérale des valeurs sous-jacentes à cette loi et à son objet, de présumer que le Parlement estime important également de garder ensemble des citoyens et des résidents permanents avec leurs proches parents qui sont déjà au Canada. L'objectif à l'al. 3c) énonce l'obligation d'accorder une grande importance au maintien des enfants en contact avec leurs deux parents, si cela est possible, et au maintien du lien entre les membres d'une proche famille.

b) *Le droit international*

Un autre indice de l'importance de tenir compte de l'intérêt des enfants dans une décision d'ordre humanitaire est la ratification par le Canada de la

cation by Canada of the *Convention on the Rights of the Child*, and the recognition of the importance of children's rights and the best interests of children in other international instruments ratified by Canada. International treaties and conventions are not part of Canadian law unless they have been implemented by statute: *Francis v. The Queen*, [1956] S.C.R. 618, at p. 621; *Capital Cities Communications Inc. v. Canadian Radio-Television Commission*, [1978] 2 S.C.R. 141, at pp. 172-73. I agree with the respondent and the Court of Appeal that the Convention has not been implemented by Parliament. Its provisions therefore have no direct application within Canadian law.

Nevertheless, the values reflected in international human rights law may help inform the contextual approach to statutory interpretation and judicial review. As stated in R. Sullivan, *Driedger on the Construction of Statutes* (3rd ed. 1994), at p. 330:

[T]he legislature is presumed to respect the values and principles enshrined in international law, both customary and conventional. These constitute a part of the legal context in which legislation is enacted and read. In so far as possible, therefore, interpretations that reflect these values and principles are preferred. [Emphasis added.]

The important role of international human rights law as an aid in interpreting domestic law has also been emphasized in other common law countries: see, for example, *Tavita v. Minister of Immigration*, [1994] 2 N.Z.L.R. 257 (C.A.), at p. 266; *Vishaka v. Rajasthan*, [1997] 3 L.R.C. 361 (S.C. India), at p. 367. It is also a critical influence on the interpretation of the scope of the rights included in the *Charter*: *Slaight Communications*, *supra*; *R. v. Keegstra*, [1990] 3 S.C.R. 697.

The values and principles of the Convention recognize the importance of being attentive to the rights and best interests of children when decisions are made that relate to and affect their future. In addition, the preamble, recalling the *Universal Declaration of Human Rights*, recognizes that "childhood is entitled to special care and assis-

Convention relative aux droits de l'enfant, et la reconnaissance de l'importance des droits des enfants et de l'intérêt supérieur des enfants dans d'autres instruments internationaux ratifiés par le Canada. Les conventions et les traités internationaux ne font pas partie du droit canadien à moins d'être rendus applicables par la loi: *Francis c. The Queen*, [1956] R.C.S. 618, à la p. 621; *Capital Cities Communications Inc. c. Conseil de la Radio-Télévision canadienne*, [1978] 2 R.C.S. 141, aux pp. 172 et 173. Je suis d'accord avec l'intimé et la Cour d'appel que la Convention n'a pas été mise en vigueur par le Parlement. Ses dispositions n'ont donc aucune application directe au Canada.

Les valeurs exprimées dans le droit international des droits de la personne peuvent, toutefois, être prises en compte dans l'approche contextuelle de l'interprétation des lois et en matière de contrôle judiciaire. Comme le dit R. Sullivan, *Driedger on the Construction of Statutes* (3^e éd. 1994), à la p. 330:

[TRADUCTION] [L]a législature est présumée respecter les valeurs et les principes contenus dans le droit international, coutumier et conventionnel. Ces principes font partie du cadre juridique au sein duquel une loi est adoptée et interprétée. Par conséquent, dans la mesure du possible, il est préférable d'adopter des interprétations qui correspondent à ces valeurs et à ces principes. [Je souligne.]

D'autres pays de common law ont aussi mis en relief le rôle important du droit international des droits de la personne dans l'interprétation du droit interne: voir, par exemple, *Tavita c. Minister of Immigration*, [1994] 2 N.Z.L.R. 257 (C.A.), à la p. 266; *Vishaka c. Rajasthan*, [1997] 3 L.R.C. 361 (C.S. Inde), à la p. 367. Il a également une incidence cruciale sur l'interprétation de l'étendue des droits garantis par la *Charte*: *Slaight Communications*, précité; *R. c. Keegstra*, [1990] 3 R.C.S. 697.

Les valeurs et les principes de la Convention reconnaissent l'importance d'être attentif aux droits des enfants et à leur intérêt supérieur dans les décisions qui ont une incidence sur leur avenir. En outre, le préambule, rappelant la *Déclaration universelle des droits de l'homme*, reconnaît que «l'enfance a droit à une aide et à une assistance

70

71

tance”. A similar emphasis on the importance of placing considerable value on the protection of children and their needs and interests is also contained in other international instruments. The United Nations *Declaration of the Rights of the Child* (1959), in its preamble, states that the child “needs special safeguards and care”. The principles of the Convention and other international instruments place special importance on protections for children and childhood, and on particular consideration of their interests, needs, and rights. They help show the values that are central in determining whether this decision was a reasonable exercise of the H & C power.

(c) *The Ministerial Guidelines*

72

Third, the guidelines issued by the Minister to immigration officers recognize and reflect the values and approach discussed above and articulated in the Convention. As described above, immigration officers are expected to make the decision that a reasonable person would make, with special consideration of humanitarian values such as keeping connections between family members and avoiding hardship by sending people to places where they no longer have connections. The guidelines show what the Minister considers a humanitarian and compassionate decision, and they are of great assistance to the Court in determining whether the reasons of Officer Lorenz are supportable. They emphasize that the decision-maker should be alert to possible humanitarian grounds, should consider the hardship that a negative decision would impose upon the claimant or close family members, and should consider as an important factor the connections between family members. The guidelines are a useful indicator of what constitutes a reasonable interpretation of the power conferred by the section, and the fact that this decision was contrary to their directives is of great help in assessing whether the decision was an unreasonable exercise of the H & C power.

spéciales». D'autres instruments internationaux mettent également l'accent sur la grande valeur à accorder à la protection des enfants, à leurs besoins et à leurs intérêts. La *Déclaration des droits de l'enfant* (1959) de l'Organisation des Nations Unies, dans son préambule, dit que l'enfant «a besoin d'une protection spéciale et de soins spéciaux». Les principes de la Convention et d'autres instruments internationaux accordent une importance spéciale à la protection des enfants et de l'enfance, et à l'attention particulière que méritent leurs intérêts, besoins et droits. Ils aident à démontrer les valeurs qui sont essentielles pour déterminer si la décision en l'espèce constituait un exercice raisonnable du pouvoir en matière humanitaire.

c) *Les lignes directrices ministérielles*

Troisièmement, les directives données par le ministre aux agents d'immigration reconnaissent et révèlent les valeurs et la démarche qui sont décrites ci-dessus et qui sont énoncées dans la Convention. Comme il est dit plus haut, les agents d'immigration sont censés rendre la décision qu'une personne raisonnable rendrait, en portant une attention particulière à des considérations humanitaires comme maintenir des liens entre les membres d'une famille et éviter de renvoyer des gens à des endroits où ils n'ont plus d'attaches. Les directives révèlent ce que le ministre considère comme une décision d'ordre humanitaire, et elles sont très utiles à notre Cour pour décider si les motifs de l'agent Lorenz sont valables. Elles soulignent que le décideur devrait être conscient des considérations humanitaires possibles, devrait tenir compte des difficultés qu'une décision défavorable imposerait au demandeur ou aux membres de sa famille proche, et devrait considérer comme un facteur important les liens entre les membres d'une famille. Les directives sont une indication utile de ce qui constitue une interprétation raisonnable du pouvoir conféré par l'article, et le fait que cette décision était contraire aux directives est d'une grande utilité pour évaluer si la décision constituait un exercice déraisonnable du pouvoir en matière humanitaire.

The above factors indicate that emphasis on the rights, interests, and needs of children and special attention to childhood are important values that should be considered in reasonably interpreting the “humanitarian” and “compassionate” considerations that guide the exercise of the discretion. I conclude that because the reasons for this decision do not indicate that it was made in a manner which was alive, attentive, or sensitive to the interests of Ms. Baker’s children, and did not consider them as an important factor in making the decision, it was an unreasonable exercise of the power conferred by the legislation, and must, therefore, be overturned. In addition, the reasons for decision failed to give sufficient weight or consideration to the hardship that a return to Jamaica might cause Ms. Baker, given the fact that she had been in Canada for 12 years, was ill and might not be able to obtain treatment in Jamaica, and would necessarily be separated from at least some of her children.

It follows that I disagree with the Federal Court of Appeal’s holding in *Shah*, *supra*, at p. 239, that a s. 114(2) decision is “wholly a matter of judgment and discretion” (emphasis added). The wording of s. 114(2) and of the Regulations shows that the discretion granted is confined within certain boundaries. While I agree with the Court of Appeal that the Act gives the applicant no right to a particular outcome or to the application of a particular legal test, and that the doctrine of legitimate expectations does not mandate a result consistent with the wording of any international instruments, the decision must be made following an approach that respects humanitarian and compassionate values. Therefore, attentiveness and sensitivity to the importance of the rights of children, to their best interests, and to the hardship that may be caused to them by a negative decision is essential for an H & C decision to be made in a reasonable manner. While deference should be given to immigration officers on s. 114(2) judicial review applications, decisions cannot stand when the manner in which the decision was made and the approach taken are in conflict with humanitarian and compassionate values. The Minister’s guidelines them-

Les facteurs susmentionnés montrent que les droits, les intérêts, et les besoins des enfants, et l’attention particulière à prêter à l’enfance sont des valeurs importantes à considérer pour interpréter de façon raisonnable les raisons d’ordre humanitaire qui guident l’exercice du pouvoir discrétionnaire. Je conclus qu’étant donné que les motifs de la décision n’indiquent pas qu’elle a été rendue d’une manière réceptive, attentive ou sensible à l’intérêt des enfants de M^{me} Baker, ni que leur intérêt ait été considéré comme un facteur décisionnel important, elle constituait un exercice déraisonnable du pouvoir conféré par la loi et doit donc être infirmée. En outre, les motifs de la décision n’accordent pas suffisamment d’importance ou de poids aux difficultés qu’un retour en Jamaïque pouvait susciter pour M^{me} Baker, alors qu’elle avait passé 12 ans au Canada, qu’elle était malade et n’était pas assurée de pouvoir suivre un traitement en Jamaïque, et qu’elle serait forcément séparée d’au moins certains de ses enfants.

Il en résulte que je ne suis pas d’accord avec la conclusion de la Cour d’appel fédérale dans l’arrêt *Shah*, précité, à la p. 239, qu’une décision en vertu du par. 114(2) «relève entièrement [du] jugement et [du] pouvoir discrétionnaire» (je souligne). Le libellé du par. 114(2) et du règlement montre que le pouvoir discrétionnaire conféré est assorti de limites. Bien que je sois d’accord avec la Cour d’appel que la Loi ne donne au demandeur aucun droit à un résultat précis ou à l’application d’un critère juridique particulier, et que la doctrine de l’attente légitime ne commande pas un résultat conforme au libellé d’instruments internationaux, la décision doit être prise suivant une démarche qui respecte les valeurs humanitaires. Par conséquent, l’attention et la sensibilité à l’importance des droits des enfants, de leur intérêt supérieur, et de l’épreuve qui pourrait leur être infligée par une décision défavorable sont essentielles pour qu’une décision d’ordre humanitaire soit raisonnable. Même s’il faut faire preuve de retenue dans le contrôle judiciaire de décisions rendues par les agents d’immigration en vertu du par. 114(2), ces décisions ne doivent pas être maintenues quand elles résultent d’une démarche ou sont elles-mêmes en

73

74

selves reflect this approach. However, the decision here was inconsistent with it.

conflit avec des valeurs humanitaires. Les directives du ministre elles-mêmes soutiennent cette approche. Toutefois, la décision en l'espèce était incompatible avec cette approche.

75 The certified question asks whether the best interests of children must be a primary consideration when assessing an applicant under s. 114(2) and the Regulations. The principles discussed above indicate that, for the exercise of the discretion to fall within the standard of reasonableness, the decision-maker should consider children's best interests as an important factor, give them substantial weight, and be alert, alive and sensitive to them. That is not to say that children's best interests must always outweigh other considerations, or that there will not be other reasons for denying an H & C claim even when children's interests are given this consideration. However, where the interests of children are minimized, in a manner inconsistent with Canada's humanitarian and compassionate tradition and the Minister's guidelines, the decision will be unreasonable.

La question certifiée demande s'il faut considérer l'intérêt supérieur des enfants comme une considération primordiale dans l'examen du cas d'un demandeur sous le régime du par. 114(2) et du règlement. Les principes susmentionnés montrent que, pour que l'exercice du pouvoir discrétionnaire respecte la norme du caractère raisonnable, le décideur devrait considérer l'intérêt supérieur des enfants comme un facteur important, lui accorder un poids considérable, et être réceptif, attentif et sensible à cet intérêt. Cela ne veut pas dire que l'intérêt supérieur des enfants l'emportera toujours sur d'autres considérations, ni qu'il n'y aura pas d'autres raisons de rejeter une demande d'ordre humanitaire même en tenant compte de l'intérêt des enfants. Toutefois, quand l'intérêt des enfants est minimisé, d'une manière incompatible avec la tradition humanitaire du Canada et les directives du ministre, la décision est déraisonnable.

E. *Conclusions and Disposition*

E. *Conclusions et dispositif*

76 Therefore, both because there was a violation of the principles of procedural fairness owing to a reasonable apprehension of bias, and because the exercise of the H & C discretion was unreasonable, I would allow this appeal.

En conséquence, parce qu'il y a eu manquement aux principes d'équité procédurale en raison d'une crainte raisonnable de partialité, et parce que l'exercice du pouvoir en matière humanitaire était déraisonnable, je suis d'avis d'accueillir le présent pourvoi.

77 The appellant requested that solicitor-client costs be awarded to her if she were successful in her appeal. The majority of this Court held as follows in *Young v. Young*, [1993] 4 S.C.R. 3, at p. 134:

L'appelante a demandé que lui soient adjugés les dépens comme entre procureur et client si elle avait gain de cause dans son pourvoi. Notre Cour a conclu à la majorité dans l'arrêt *Young c. Young*, [1993] 4 R.C.S. 3, à la p. 134:

Solicitor-client costs are generally awarded only where there has been reprehensible, scandalous or outrageous conduct on the part of one of the parties.

Les dépens comme entre procureur et client ne sont généralement accordés que s'il y a eu conduite répréhensible, scandaleuse ou outrageante d'une des parties.

There has been no such conduct on the part of the Minister shown during this litigation, and I do not believe that this is one of the exceptional cases where solicitor-client costs should be awarded. I would allow the appeal, and set aside the decision of Officer Caden of April 18, 1994, with party-

Il n'a pas été démontré que le ministre a eu une telle conduite au cours du présent litige, et je ne crois pas qu'il s'agisse d'un des cas exceptionnels où les dépens devraient être adjugés comme entre procureur et client. Je suis d'avis d'accueillir le pourvoi, et d'annuler la décision de l'agent Caden

and-party costs throughout. The matter will be returned to the Minister for redetermination by a different immigration officer.

The reasons of Cory and Iacobucci JJ. were delivered by

IACOBUCCI J. — I agree with L'Heureux-Dubé J.'s reasons and disposition of this appeal, except to the extent that my colleague addresses the effect of international law on the exercise of ministerial discretion pursuant to s. 114(2) of the *Immigration Act*, R.S.C., 1985, c. I-2. The certified question at issue in this appeal concerns whether federal immigration authorities must treat the best interests of the child as a primary consideration in assessing an application for humanitarian and compassionate consideration under s. 114(2) of the Act, given that the legislation does not implement the provisions contained in the *Convention on the Rights of the Child*, Can. T.S. 1992 No. 3, a multi-lateral convention to which Canada is party. In my opinion, the certified question should be answered in the negative.

It is a matter of well-settled law that an international convention ratified by the executive branch of government is of no force or effect within the Canadian legal system until such time as its provisions have been incorporated into domestic law by way of implementing legislation: *Capital Cities Communications Inc. v. Canadian Radio-Television Commission*, [1978] 2 S.C.R. 141. I do not agree with the approach adopted by my colleague, wherein reference is made to the underlying values of an unimplemented international treaty in the course of the contextual approach to statutory interpretation and administrative law, because such an approach is not in accordance with the Court's jurisprudence concerning the status of international law within the domestic legal system.

In my view, one should proceed with caution in deciding matters of this nature, lest we adversely affect the balance maintained by our Parliamentary tradition, or inadvertently grant the executive the

en date du 18 avril 1994, avec les dépens entre parties dans toutes les cours. L'affaire sera renvoyée au ministre pour qu'un agent d'immigration différent rende une nouvelle décision.

Version française des motifs des juges Cory et Iacobucci rendus par

LE JUGE IACOBUCCI — Je souscris aux motifs du juge L'Heureux-Dubé et au dispositif qu'elle propose dans le présent pourvoi, sauf pour la question de l'effet du droit international sur l'exercice du pouvoir discrétionnaire conféré au ministre par le par. 114(2) de la *Loi sur l'immigration*, L.R.C. (1985), ch. I-2. La question certifiée en l'espèce vise à déterminer si les autorités d'immigration fédérales doivent traiter l'intérêt supérieur de l'enfant comme une considération primordiale dans l'examen d'une demande fondée sur des raisons d'ordre humanitaire en vertu du par. 114(2) de la Loi, alors que cette loi ne donne pas effet aux dispositions de la *Convention relative aux droits de l'enfant*, R.T. Can. 1992 n° 3, une convention multilatérale dont le Canada est signataire. À mon avis, la question certifiée devrait recevoir une réponse négative.

Il est bien établi qu'une convention internationale ratifiée par le pouvoir exécutif n'a aucun effet en droit canadien tant que ses dispositions ne sont pas incorporées dans le droit interne par une loi les rendant applicables: *Capital Cities Communications Inc. c. Conseil de la Radio-Télévision canadienne*, [1978] 2 R.C.S. 141. Je ne suis pas d'accord avec l'analyse de ma collègue lorsqu'elle se réfère aux valeurs sous-jacentes à un traité international non-applicable dans une approche contextuelle de l'interprétation des lois et du droit administratif, parce qu'une telle approche n'est pas conforme à la jurisprudence de la Cour sur la question du statut du droit international dans le système juridique interne.

À mon avis, il faut aborder avec prudence des décisions de ce genre, sous peine de rompre l'équilibre établi par notre tradition parlementaire ou de conférer par inadvertance à l'exécutif le pouvoir de

78

79

80

power to bind citizens without the necessity of involving the legislative branch. I do not share my colleague's confidence that the Court's precedent in *Capital Cities*, *supra*, survives intact following the adoption of a principle of law which permits reference to an unincorporated convention during the process of statutory interpretation. Instead, the result will be that the appellant is able to achieve indirectly what cannot be achieved directly, namely, to give force and effect within the domestic legal system to international obligations undertaken by the executive alone that have yet to be subject to the democratic will of Parliament.

lier les administrés sans la participation du pouvoir législatif. Je ne partage pas la certitude de ma collègue que le précédent établi par notre Cour dans *Capital Cities*, précité, peut survivre intact après l'adoption d'un principe de droit qui autorise le recours, dans le processus d'interprétation des lois, aux dispositions d'une convention qui n'a pas été intégrée dans la législation. Au lieu de cela, le résultat sera que l'appelante pourra parvenir indirectement à ce qu'elle ne peut faire directement, c'est-à-dire donner effet dans le système juridique interne à des obligations internationales assumées par le pouvoir exécutif seul et qui n'ont pas encore été soumises à la volonté démocratique du Parlement.

81

The primacy accorded to the rights of children in the Convention, assuming for the sake of argument that the factual circumstances of this appeal are included within the scope of the relevant provisions, is irrelevant unless and until such provisions are the subject of legislation enacted by Parliament. In answering the certified question in the negative, I am mindful that the result may well have been different had my colleague concluded that the appellant's claim fell within the ambit of rights protected by the *Canadian Charter of Rights and Freedoms*. Had this been the case, the Court would have had an opportunity to consider the application of the interpretive presumption, established by the Court's decision in *Slaight Communications Inc. v. Davidson*, [1989] 1 S.C.R. 1038, and confirmed in subsequent jurisprudence, that administrative discretion involving *Charter* rights be exercised in accordance with similar international human rights norms.

La primauté donnée aux droits des enfants dans la Convention — à supposer pour les fins de la discussion que les faits du pourvoi ressortissent aux dispositions pertinentes — est sans effet tant et aussi longtemps que ces dispositions n'ont pas été incorporées par une loi adoptée par le Parlement. En donnant une réponse négative à la question certifiée, je suis conscient du fait que le résultat aurait pu être différent si ma collègue avait conclu que la demande de l'appelante relevait de l'application des droits garantis par la *Charte canadienne des droits et libertés*. Si cela avait été le cas, la Cour aurait eu la possibilité d'envisager l'application de la présomption interprétative établie par notre Cour dans l'arrêt *Slaight Communications Inc. c. Davidson*, [1989] 1 R.C.S. 1038, et confirmée dans la jurisprudence qui a suivi, selon laquelle le pouvoir administratif discrétionnaire touchant des droits garantis par la *Charte* doit être exercé en conformité avec des normes internationales similaires en matière de droits de la personne.

N° du greffe: 23516.

1995: 13 et 14 juin; 1995: 14 décembre.

Présents: Les juges La Forest, L'Heureux-Dubé, Sopinka, Gonthier, Cory, McLachlin et Major.

EN APPEL DE LA COUR D'APPEL FÉDÉRALE

Indiens — Cession — Réserve — Nature de l'obligation de la Couronne avant la cession — La Couronne a-t-elle une obligation de fiduciare? — Loi des Indiens, S.R.C. 1927, ch. 98.

Indiens — Cession — Validité — Les chefs indiens n'ont pas attesté personnellement, sous serment, la cession — La cession était-elle invalide en raison de l'inobservation de l'art. 51 de la Loi des Indiens? — L'article 51 a-t-il un caractère impératif ou directif? — Loi des Indiens, S.R.C. 1927, ch. 98, art. 51.

Indians — Surrender — Reserve — Indian band surrendering reserve to Crown “to sell or lease” — Indian band claiming that Crown breached its fiduciary duty — Whether Crown should have leased land of former reserve rather than sell it — Whether Crown sold land under value — Whether Crown should have restored reserve to Band after surrender in view of Band’s impoverished situation.

Indians — Surrenders — Mineral rights — Reserve — Indian band surrendering mineral rights on reserve to Crown in 1940 and surrendering reserve in 1945 — Whether mineral rights included in 1945 surrender — Indian Act, R.S.C. 1927, c. 98, ss. 2(e), (j), 51.

Indians — Crown — Fiduciary duty — Mineral rights — Indian band surrendering mineral rights on reserve to Crown “to lease” in 1940 and surrendering reserve “to sell or lease” in 1945 — Department of Indian Affairs transferring land of former reserve to Department of Veteran Affairs in 1948 — Department of Indian Affairs aware in 1949 that mineral rights had been erroneously transferred to Department of Veteran Affairs and of potential value of these rights — Whether Crown breached its fiduciary duty by transferring mineral rights in 1948 — Whether Crown breached its fiduciary duty by failing to correct its error in 1949 when it learned of erroneous transfer — Indian Act, R.S.C. 1927, c. 98, s. 64.

Limitation of actions — Breach of fiduciary duty — Running of time postponed — Indian band surrendering mineral rights on reserve to Crown in 1940 and surrendering reserve in 1945 — Department of Indian Affairs transferring land of former reserve to Department of Veteran Affairs in 1948 — Mineral rights inadvertently acquired by Department of Veteran Affairs in transfer — Land and mineral rights subsequently sold to veterans between 1948 and 1956 — Band learning of mineral rights’ transfer in 1977 and commencing action in 1978 claiming that Crown breached its fiduciary duty — Whether action barred by limitation periods — Limitation Act, R.S.B.C. 1979, c. 236, ss. 3(4), 6(3), 8.

Indiens — Cession — Réserve — La bande indienne a cédé à la Couronne la réserve aux fins «de vendre ou de louer» — La bande indienne prétend que la Couronne a manqué à son obligation de fiduciaire — La Couronne aurait-elle dû louer les terres de l’ancienne réserve plutôt que les vendre? — La Couronne a-t-elle vendu les terres à un prix inférieur à leur valeur? — La Couronne aurait-elle dû remettre la réserve à la bande après la cession, vu l’état d’appauvrissement dans lequel se trouvait la bande?

Indiens — Cessions — Droits miniers — Réserve — La bande indienne a cédé à la Couronne les droits miniers afférents à la réserve en 1940, et elle a cédé la réserve en 1945 — Les droits miniers étaient-ils inclus dans la cession de 1945? — Loi des Indiens, S.R.C. 1927, ch. 98, art. 2h), l), 51.

Indiens — Couronne — Obligation de fiduciaire — Droits miniers — La bande indienne a, en 1940, cédé à la Couronne les droits miniers afférents à la réserve aux fins «de leur location», et, en 1945, elle a cédé la réserve aux fins «de vendre ou de louer» les terres visées — Le ministère des Affaires indiennes a transféré, en 1948, les terres de l’ancienne réserve au ministère des Affaires des anciens combattants — Le ministère des Affaires indiennes savait, en 1949, que les droits miniers avaient été transférés par erreur au ministère des Affaires des anciens combattants, et il était également au courant de la valeur potentielle de ces droits — La Couronne a-t-elle manqué à son obligation de fiduciaire en transférant les droits miniers en 1948? — La Couronne a-t-elle manqué à son obligation de fiduciaire en omettant de corriger son erreur en 1949, lorsqu’elle a pris connaissance du transfert fait par erreur? — Loi des Indiens, S.R.C. 1927, ch. 98, art. 64.

Prescription — Manquement à l’obligation de fiduciaire — Report du moment où le délai de prescription commence à courir — La bande indienne a, en 1940, cédé à la Couronne les droits miniers afférents à la réserve, et, en 1945, elle a cédé la réserve — Le ministère des Affaires indiennes a transféré, en 1948, les terres de l’ancienne réserve au ministère des Affaires des anciens combattants — Le ministère des Affaires des anciens combattants a acquis par inadvertance les droits miniers lors du transfert — Les terres et les droits miniers ont par la suite été vendus à des anciens combattants entre 1948 et 1956 — La bande a appris en 1977 l’existence du transfert des droits miniers et, en 1978, elle a intenté une action, reprochant à la Couronne d’avoir manqué à son obligation de fiduciaire — L’action est-elle prescrite? — Limitation Act, R.S.B.C. 1979, ch. 236, art. 3(4), 6(3), 8.

In 1916 the Beaver Band of Indians entered into a treaty with the Crown. In exchange for surrendering aboriginal title, the Band was given a parcel of land in British Columbia. The Band was nomadic, subsisting through trapping and hunting. The reserve was used as the site of its summer campground; in the winter, the Band trapped further north. In 1940, the Band surrendered the mineral rights on its reserve to the Crown, in trust "to lease" for its benefit. At the end of World War II, the federal government instituted a program under which agricultural land was made available to veterans for settlement. The Band was not using the reserve land for farming and, after considerable discussion, agreed in 1945 to surrender the reserve to the Crown "to sell or lease". The Department of Indian Affairs ("DIA") then transferred the reserve land to the Director of *The Veterans' Land Act* ("DVLA") for \$70,000 in March 1948. Part of that sum was later used by the DIA to purchase other lands for the Band closer to its trap lines. The DVLA also obtained the mineral rights "by inadvertence" because they had not been reserved from the 1948 transfer. In the same year gas was discovered near the former reserve and, in 1949, oil companies expressed interest in exploring the land for oil and gas. Between 1948 and 1956, the land of the former reserve was sold to veterans. In 1976, oil and gas were discovered and the revenue from this discovery went to the veterans or their assigns. In 1977, the Beaver Band was divided into the Blueberry River and the Doig River Indian Bands. That same year, a DIA officer found out how the Beaver Band had lost the mineral rights and informed the appellant Bands. The appellants commenced their action on September 18, 1978, claiming damages against the Crown for allowing it to make an improvident surrender of the reserve, and once surrendered, for disposing of it under value. They also claimed damages for permitting the transfer of the mineral rights to the DVLA and thence to the veterans. In the Federal Court, Trial Division, the trial judge dismissed the claims except for the sale of the surface rights to the DVLA, which he found to be under value. He held, however, that the appellants' action was barred by the 30-year limitation period under the *British Columbia Limitation Act*. The majority of the Federal Court of Appeal dismissed the appellants' appeal and the Crown's cross-appeal on the issue of sale under value.

En 1916, la bande indienne des Castors a conclu un traité avec la Couronne. En échange de la cession de son titre ancestral, la bande a reçu un lopin de terre en Colombie-Britannique. La bande était nomade et vivait du piégeage et de la chasse. Elle utilisait sa réserve comme camp d'été; durant l'hiver, la bande faisait du piégeage plus au nord. En 1940, la bande a cédé à la Couronne, en fiducie, les droits miniers afférents à sa réserve pour que celle-ci les loue au profit de la bande. À la fin de la Seconde Guerre mondiale, le gouvernement fédéral a établi un programme visant à mettre des terres agricoles à la disposition des anciens combattants pour qu'ils s'y établissent. La bande n'utilisait pas les terres de la réserve à des fins agricoles et, après de longues discussions, la bande a accepté de céder sa réserve à la Couronne aux fins «de vendre ou de louer» les terres visées. Le ministère des Affaires indiennes («MAI») a alors transféré, en mars 1948, les terres de la réserve au Directeur de la *Loi sur les terres destinées aux anciens combattants* («DTAC») pour la somme de 70 000 \$. Plus tard, une partie de cette somme a été utilisée par le MAI pour acquérir d'autres terres se trouvant plus près des sentiers de piégeage de la bande. Le DTAC a aussi obtenu les droits miniers «par inadvertance» parce qu'ils n'avaient pas été réservés au moment du transfert en 1948. La même année, on a découvert du gaz près de l'ancienne réserve et, en 1949, des sociétés pétrolières se sont montrées intéressées à faire de l'exploration en vue d'y trouver du pétrole et du gaz. Entre 1948 et 1956, les terres de l'ancienne réserve ont été vendues à des anciens combattants. En 1976, on a découvert du pétrole et du gaz et les revenus sont allés aux anciens combattants ou à leurs ayants droit. En 1977, la bande des Castors s'est scindée en deux: la bande indienne de la rivière Blueberry et la bande indienne de la rivière Doig. La même année, un fonctionnaire du MAI a découvert de quelle manière la bande des Castors avait perdu les droits miniers et il en a informé les bandes appelantes. Les appelants ont, le 18 septembre 1978, intenté une action dans laquelle ils réclamaient des dommages-intérêts contre la Couronne, lui reprochant, d'une part, d'avoir autorisé la bande à faire une cession inconsidérée de la réserve et, une fois la cession réalisée, d'avoir aliéné celle-ci à un prix inférieur à sa valeur, et, d'autre part, d'avoir permis le transfert des droits miniers, d'abord au DTAC puis aux anciens combattants. En Section de première instance de la Cour fédérale, le juge a rejeté les réclamations des bandes, sauf celle concernant la vente des droits de superficie au DTAC, droits qui, a-t-il conclu, avaient été vendus à un prix inférieur à leur valeur réelle. Cependant, il a conclu que l'action des appelants était prescrite par le délai de prescription de 30 ans prévu par la

The appellants appeal to this Court, and the Crown cross-appeals.

Held: The appeal and cross-appeal should be allowed.

The appellants have not established that the Crown wrongly failed to prevent the surrender of the reserve in 1945. The measure of control which the 1927 *Indian Act* permitted a band to exercise over the surrender of its reserve negates a contention that, absent exploitation, the Act imposed a fiduciary obligation on the Crown with respect to the surrender of a reserve. Under the Act, a band had the right to decide whether or not to surrender its reserve, and its decision was to be respected. The Crown's obligation was limited to preventing exploitative bargains. The Crown could thus refuse its consent if the band's decision was foolish or improvident. Here, subject to the matter of mineral rights, the Beaver Band's surrender of its reserve did not amount to exploitation. Further, the circumstances of this case did not give rise to a fiduciary duty on the Crown with respect to the 1945 surrender. While the Band trusted the Crown to provide it with information as to its options and their foreseeable consequences in relation to the surrender of the reserve and the acquisition of new reserve lands, the Band did not abnegate or entrust its power of decision over the surrender of the reserve to the Crown. Finally, the failure to comply with s. 51(3) of the 1927 *Indian Act* does not invalidate the 1945 surrender. The word "shall" in s. 51(3) should not be considered mandatory. The true object of ss. 51(3) and 51(4) was to ensure that the surrender was validly assented to by the Band and the evidence amply established valid assent. The non-compliance with s. 51 was technical.

The 1945 surrender imposed a fiduciary duty on the Crown with respect to the subsequent sale or lease of the land, and the Crown did not breach that duty when it sold the land to the DVLA in 1948. First, the sale of the land was made in the best interests of the Beaver Band. Different options, including leasing, were considered. While in retrospect, with the decline of trapping and the

Limitation Act de la Colombie-Britannique. La Cour d'appel fédérale a, à la majorité, rejeté l'appel formé par les appelants ainsi que l'appel incident de la Couronne sur la question de la vente des droits de superficie à un prix inférieur à leur valeur réelle. Les appelants se pourvoient devant notre Cour, et la Couronne interjette un pourvoi incident.

Arrêt: Le pourvoi et le pourvoi incident sont accueillis.

Les appelants n'ont pas établi que la Couronne a eu tort de ne pas empêcher la cession de la réserve en 1945. L'étendue du contrôle que la *Loi des Indiens* de 1927 permettait à la bande d'exercer sur la cession de la réserve réfute l'argument que, en l'absence d'exploitation, la Loi imposait une obligation de fiduciaire à la Couronne relativement à la cession de la réserve. En vertu de la Loi, une bande avait le droit de décider si elle voulait céder sa réserve, et sa décision devait être respectée. L'obligation de la Couronne se limitait à prévenir les marchés abusifs. La Couronne pouvait donc refuser son consentement si la décision de la bande était imprudente ou inconsidérée. En l'espèce, sous réserve de la question des droits miniers, la cession de sa réserve par la bande des Castors n'équivalait pas à de l'exploitation. Par ailleurs, les circonstances de l'espèce n'ont pas donné naissance à une obligation de fiduciaire de la Couronne à l'égard de la cession de 1945. Même si la bande escomptait que la Couronne la renseignerait sur les diverses solutions qui s'offraient à elle — et sur les conséquences prévisibles de ces solutions — relativement à la cession de la réserve et à l'acquisition de nouvelles terres, la bande n'avait pas renoncé à son pouvoir de décision quant à la cession de la réserve et ne s'en était pas remis à la Couronne à cet égard. Enfin, l'inobservation du par. 51(3) de la *Loi des Indiens* de 1927 n'a pas pour effet d'invalider la cession de 1945. Le mot «shall» (le mot «doit» et l'indicatif présent dans le texte français) utilisé au par. 51(3) ne devrait pas être considéré comme ayant un sens impératif. L'objet véritable des par. 51(3) et (4) était de faire en sorte que le consentement de la bande à la cession soit valide, et les éléments de preuve ont amplement établi l'existence d'un consentement valide. L'inobservation de l'art. 51 constituait un vice de forme.

La cession de 1945 a imposé à la Couronne une obligation de fiduciaire en ce qui concerne la vente ou la location subséquentes des terres visées, et la Couronne n'a pas manqué à cette obligation lorsque, en 1948, elle a vendu les terres au DTAC. Premièrement, la vente des terres a été faite dans l'intérêt de la bande des Castors. Un certain nombre de possibilités, dont la location, ont

discovery of oil and gas, the decision to sell, rather than to lease, may be argued to have been unfortunate, at the time it was defensible as a reasonable decision since that choice had the advantage of meeting the Band's need and wish to purchase lands closer to its trap lines. Second, the Crown did not breach its fiduciary duty by selling the land for \$70,000. The DIA received a higher appraisal but there were also appraisals giving lower value to the land. Since the Crown adduced evidence showing that the sale price lay within a range established by the appraisals, this raised a *prima facie* case that the sale price was reasonable. The onus then shifted to the appellants, who failed to demonstrate that the sale price was unreasonable. Third, the Crown did not breach its fiduciary duty after the surrender of the reserve by failing to restore the land to the Band. Although the Band lived in apparent poverty between 1945 and 1961, one cannot infer that the solution was to cancel the 1945 surrender or refuse to sell the reserve land. The Band's condition appears to have been unrelated to possession of the reserve.

Per La Forest, L'Heureux-Dubé, Sopinka and Gonthier JJ.: Under the 1945 surrender, both the surface and mineral rights in the reserve were surrendered to the Crown in trust "to sell or lease". This conclusion rests on reasoning unrelated to the scope of the 1927 *Indian Act* surrender regime and, in particular, to the issue of whether or not the 1940 surrender of mineral rights was actually governed by the 1927 Act, and therefore holds even if the mineral rights had attained the status of "Indian lands" through the 1940 dealings. The ultimate issue to be determined in this case is the impact of the 1945 surrender of the reserve on the 1940 surrender of the mineral rights in that reserve. The 1927 Act is entirely silent on the subjects of surrender variation, surrender revocation, and resurrender, yet no one would seriously suggest that this silence renders all surrenders, including the 1940 surrender, permanent and irrevocable.

The legal character of the 1945 surrender, and its impact on the 1940 surrender, should be determined by reference to the Band's intention. The principles of common law property are not helpful in the context of

été envisagées. Bien que l'on puisse, avec le recul du temps, compte tenu du déclin du piégeage et de la découverte de pétrole et de gaz, affirmer que la décision de vendre les terres plutôt que de les louer s'est révélée malencontreuse, il s'agissait à l'époque d'un choix défendable, en tant que solution raisonnable, puisqu'il avait l'avantage de répondre au besoin et au désir de la bande d'obtenir d'autres terres situées plus près de ses sentiers de piégeage. Deuxièmement, la Couronne n'a pas manqué à son obligation de fiduciaire en vendant les terres pour la somme de 70 000 \$. Le MAI avait reçu une évaluation plus élevée, mais il existait également des évaluations attribuant une valeur moindre aux terres. Puisque la Couronne a présenté des éléments de preuve indiquant que le prix de vente se situait dans la fourchette établie par les évaluations, cette preuve a établi, *prima facie*, que le prix de vente était raisonnable. Il y a alors eu déplacement du fardeau de la preuve, mais les appellants n'ont pas prouvé que ce prix était déraisonnable. Troisièmement, la Couronne n'a pas, après la cession de la réserve, manqué à son obligation de fiduciaire en ne remettant pas ces terres à la bande. Même si celle-ci vivait dans un état de pauvreté évident entre 1945 et 1961, on ne peut en déduire que la solution était d'annuler la cession de 1945 ou de refuser de vendre les terres de la réserve. Il ne semble pas qu'il y ait eu un rapport entre la situation de la bande et le fait qu'elle n'était pas en possession de la réserve.

Les juges La Forest, L'Heureux-Dubé, Sopinka et Gonthier: En vertu de la cession de 1945, les droits de superficie de la réserve et les droits miniers y afférents ont été cédés à la Couronne, en fiducie, aux fins «de vendre ou de louer» les terres visées. Cette conclusion ne s'appuie d'aucune façon sur la portée du régime établi par la *Loi des Indiens* de 1927 relativement aux cessions ni, en particulier, sur la question de savoir si la cession de 1940 était ou non régie par la Loi de 1927, et elle vaut donc même si les droits miniers avaient pris la qualité de «terres indiennes» par suite des opérations de 1940. En l'espèce, la question revient en définitive à déterminer l'effet de la cession de la réserve en 1945 sur la cession des droits miniers afférents à cette réserve en 1940. Même si la Loi de 1927 ne traite ni de la modification des cessions, ni de leur annulation, ni de la possibilité de refaire cession, on ne saurait prétendre sérieusement que, en raison de ce silence, toutes les cessions, y compris celle de 1940, ont un caractère permanent et irrévocable.

Le caractère juridique de la cession de 1945 et son effet sur celle de 1940 doivent être déterminés au regard de l'intention de la bande. Les principes généraux du droit des biens en common law ne sont pas utiles dans le

this case. When determining the legal effect of dealings between aboriginal peoples and the Crown relating to reserve lands, the *sui generis* nature of aboriginal title requires courts to go beyond the usual restrictions imposed by the common law, in order to give effect to the true purpose of the dealings. Accordingly, unless some statutory bar exists (which is not the case here), the Band members' intention should be given legal effect. Here, the trial judge's findings indicate that the Band members neither expected nor intended to hold rights over the reserve once the 1945 surrender was completed. They understood that by agreeing to the 1945 surrender they would be transferring all their rights in the reserve to the Crown in trust, and that the Crown would either sell or lease those rights for the benefit of the Band. The Band's intention is also evidenced by the terms of the 1945 surrender. It is reasonable to conclude that the term "Reserve", as used in that surrender, was intended to have the same meaning as the term "reserve" in the 1927 *Indian Act*, which is defined in s. 2(j) as an unsundered tract of land including the "minerals . . . thereon or therein". The true nature of the 1945 surrender can best be characterized as a variation of a trust in Indian land. The 1945 surrender subsumed the 1940 surrender, and expanded upon it. Although a trust in Indian land cannot be equated with a common law trust, "trust-like" obligations and principles are relevant to the analysis of a surrender of Indian lands. Both surrenders in this case were framed as trusts, and the parties therefore intended to create a trust-like relationship. In light of the guiding principle that the decisions of aboriginal peoples should be honoured and respected, this surrender variation should be given effect since the Band's understanding of its terms was adequate, and since the Crown's conduct did not taint the dealings in a manner which made it unsafe to rely on the Band's understanding and intention. There was also substantial compliance with the technical surrender requirements embodied in s. 51 of the 1927 *Indian Act*.

By taking on the obligations of a trustee in relation to the reserve, the DIA was under a fiduciary duty to deal with the land in the best interests of the Band members.

contexte du présent pourvoi. Dans l'examen des effets juridiques des opérations conclues par les peuples autochtones et la Couronne relativement à des terres faisant partie de réserves, il ne faut pas oublier que, compte tenu du caractère *sui generis* du titre ancestral, les tribunaux doivent faire abstraction des restrictions habituelles qui sont imposées par la common law afin de donner effet à l'objet véritable de ces opérations. En conséquence, hormis quelque empêchement prescrit par la loi (ce qui n'est pas le cas en l'espèce), il faut laisser l'intention des membres de la bande produire ses effets juridiques. En l'espèce, les conclusions du juge de première instance indiquent que la bande ne s'attendait pas à détenir des droits sur la réserve une fois la cession de 1945 complétée, et que ce n'était pas non plus son intention. La bande comprenait, d'une part, qu'en acceptant la cession de 1945 elle transférerait à la Couronne, en fiducie, tous les droits qu'elle avait dans la réserve et, d'autre part, que la Couronne vendrait ou louerait ces droits au profit de la bande. L'intention de la bande ressort aussi des termes mêmes de l'acte de cession de 1945. Il est raisonnable de conclure que l'on désirait, dans l'acte de cession, utiliser le mot «réserve» suivant le sens que lui donne la *Loi des Indiens*, à l'al. 2h), soit une étendue de terre qui n'a pas été rétrocédée et comprend les «minéraux [. . .] qui se trouvent à la surface ou à l'intérieur du sol». La meilleure façon de décrire la nature véritable des opérations de 1945 est de les qualifier de modification d'une fiducie visant des terres indiennes. La cession de 1945 subsumait celle de 1940, et elle en élargissait la portée. Bien que l'on ne puisse assimiler les fiducies visant des terres indiennes aux fiducies en common law, des obligations et principes «semblable[s] à [ceux d'une fiducie]» sont pertinents dans le cadre de l'analyse d'une cession visant des terres indiennes. En l'espèce, comme les deux cessions visaient des fiducies, les parties avaient en conséquence l'intention de créer des rapports semblables à ceux créés par une fiducie. Compte tenu du principe directeur qui veut que l'on respecte les décisions des peuples autochtones, il y a lieu de donner effet à cette modification de cession, puisque la bande en avait bien saisi les conditions et que la conduite de la Couronne n'a pas vicié les négociations au point qu'il serait hasardeux de tenir pour acquis que la bande avait bien compris la situation et avait eu l'intention de faire ce qu'elle a fait. De plus, les exigences de forme en matière de cession prévues par l'art. 51 de la *Loi des Indiens* de 1927 ont, pour l'essentiel, été respectées.

En assumant les obligations d'un fiduciaire relativement à la réserve, le MAI avait l'obligation de fiduciaire d'agir dans l'intérêt des membres de la bande. Cette

This duty extended to both the surface rights and the mineral rights. Although the 1945 surrender was "to sell or lease", there was no clear authorization from the Band which justified the DIA in departing from its long-standing policy of reserving mineral rights for the benefit of the aboriginal peoples when surface rights were sold. Given these circumstances, the DIA was under a fiduciary duty to continue the leasing arrangement which had been established in the 1940 surrender. It was a violation of this fiduciary duty to sell the mineral rights to the DVLA in 1948.

The evidence showed that by August 9, 1949, the DIA was aware that the mineral rights in the reserve were potentially of considerable value, and that these rights had been sold to the DVLA in 1948. The DIA breached its fiduciary duty to deal with the reserve in the best interests of the Band because, as of August 9, 1949, a reasonable person in the position of the DIA would have realized that a mistake had occurred, and would have exercised its power under s. 64 of the 1927 *Indian Act* to reacquire the mineral rights for the purpose of effecting a leasing arrangement for the benefit of the Band. Therefore, for the reasons given by McLachlin J., the appellants may recover any losses stemming from transfers by the DVLA after August 9, 1949 as such losses fall within the 30-year limitation period imposed by the *British Columbia Limitation Act*, and are not barred by any other provision of that Act.

Per Cory, McLachlin and Major JJ.: The 1945 surrender of the reserve did not include the mineral rights. When the Band surrendered the reserve, it could transfer only those rights in the reserve which it still possessed. Since the Band had already surrendered the mineral rights to the Crown in 1940, the 1945 surrender involved only the surface rights of the reserve. This result is dictated not only by the most basic principles of property transfer, but by the 1927 *Indian Act* itself. The 1940 surrender was a valid surrender of a portion of the reserve which converted that portion into "Indian lands". As "Indian lands" held by the Crown in trust, they could not be surrendered again in 1945. By the definition in s. 2(j) of the Act, a reserve cannot include what has already been surrendered. The Crown therefore continued to hold the mineral rights in trust "to lease" for the welfare of the Band. The suggestion that mineral rights cannot be conveyed except in conjunction with surface rights is inconsistent with the general policy of the law permitting severance of the various property

obligation visait à la fois les droits de superficie et les droits miniers. Bien que la cession de 1945 ait été faite aux fins «de vendre ou de louer» les terres visées, la bande n'a jamais clairement autorisé le MAI à déroger à sa politique de longue date, qui était de réserver les droits miniers au profit des autochtones concernés lorsqu'elle vendait des droits de superficie. Dans ces circonstances, le MAI avait l'obligation de fiduciaire de continuer la location prévue par la cession de 1940. La vente des droits miniers au DTAC en 1948 a constitué une violation de cette obligation de fiduciaire.

La preuve démontre que, le 9 août 1949, le MAI savait qu'il était possible que les droits miniers afférents à la réserve aient une valeur considérable, et qu'il était au courant du fait que les droits miniers avaient été vendus au DTAC en 1948. Le MAI a manqué à l'obligation de fiduciaire qu'il avait d'agir dans l'intérêt de la bande lorsqu'il effectuait des opérations touchant la réserve, parce qu'une personne raisonnable, placée dans la situation du MAI, se serait aperçue, le 9 août 1949, qu'une erreur avait été commise, et elle aurait exercé le pouvoir que lui conférait l'art. 64 de la *Loi sur les Indiens* de 1927 pour acquérir de nouveau les droits miniers afin de conclure une entente de location au profit de la bande. En conséquence, pour les motifs donnés par le juge McLachlin, les appelants peuvent recouvrer les pertes découlant des transferts faits par le DTAC après le 9 août 1949, puisqu'elles se situent à l'intérieur du délai de prescription de 30 ans fixé par la *Limitation Act* de la Colombie-Britannique, et que les réclamations présentées à cet égard ne sont pas écartées par quelque autre disposition de cette loi.

Les juges Cory, McLachlin et Major: La cession de la réserve en 1945 n'incluait pas les droits miniers. Lorsque la bande a cédé la réserve, elle ne pouvait transférer que les droits qu'elle possédait encore. Puisque la bande avait déjà cédé les droits miniers à la Couronne en 1940, elle ne pouvait céder en 1945 que les droits de superficie de la réserve. Cette conclusion s'impose non seulement de par l'effet des principes les plus fondamentaux du transfert des biens immobiliers, mais aussi de par l'effet de la *Loi des Indiens* de 1927 elle-même. La cession de 1940 était une cession valide d'une partie de la réserve, et elle a eu pour effet de faire de la portion ainsi cédée des «terres indiennes». En tant que «terres indiennes» détenues en fiducie par la Couronne, les droits miniers ne pouvaient être cédés de nouveau en 1945. De par la définition figurant à l'al. 2h) de la Loi, une réserve ne peut pas comprendre ce qui a déjà été cédé. La Couronne a donc continué de détenir les droits miniers pour la bande, en fiducie, aux fins de les louer pour le bien-être de celle-ci. La thèse selon laquelle le titre relatif aux

interests in a given parcel of land, the wording of the 1927 *Indian Act* and the regulations governing oil and gas enacted under it.

The general language of the 1945 surrender did not constitute a revocation of the 1940 surrender and a resurrender of the mineral rights. The mineral rights were not discussed in the negotiations leading to the 1945 surrender, nor referred to in the 1945 document of surrender. As well, the appropriate administrative formalities for a resurrender of the mineral rights complying with the provisions of the 1927 *Indian Act* were not followed. An intention by the Band to transfer the mineral rights in 1945 cannot sweep aside the provisions of the Act or of the 1940 surrender and, even if it could, such an intention has not been established in this case. In the absence of evidence of intention, the 1940 surrender should not be overturned and the Band should be entitled to the protection of the 1927 *Indian Act* and the common law which prevent the Crown from unilaterally changing the terms under which it held the property as fiduciary without obtaining the informed consent of the Band.

While there was no breach of the Crown's fiduciary duty with respect to the sale of the surface rights of the reserve, the 1940 surrender also imposed a fiduciary duty on the Crown with respect to the mineral rights, and the DIA breached this duty and the terms of the 1940 surrender by conveying these rights to the DVLA in 1948. The 1940 surrender restricted the DIA to leasing the mineral rights for the benefit of the Band. In any event, even if one were to assume that the 1945 surrender revoked the previous surrender of mineral rights, the 1945 surrender still imposed an obligation on the Crown to lease or sell in the best interests of the Band. A reasonable person does not inadvertently give away a potentially valuable asset which has already demonstrated earning potential. Nor does a reasonable person give away for no consideration what it will cost him nothing to keep and which may one day possess value, however remote the possibility. The Crown managing its own affairs reserved out its minerals. It should have done the same for the Band. The duty on the Crown as

droits miniers ne peut être transféré qu'avec les droits de superficie est contraire à l'orientation générale de la loi — qui permet la séparation des divers droits fonciers sur une parcelle donnée — ainsi qu'au libellé de la *Loi des Indiens* de 1927 et à son règlement d'application touchant les droits pétroliers et gaziers.

Le libellé général de la cession de 1945 ne constituait pas une annulation de la cession de 1940 et une nouvelle cession des droits miniers. La question des droits miniers n'a pas été discutée lors des négociations qui ont abouti à la cession de 1945, et l'acte de cession de 1945 ne fait pas mention de ces droits. De plus, on n'a pas respecté les formalités administratives appropriées applicables en cas de nouvelle cession de droits miniers et conformes aux dispositions de la *Loi des Indiens* de 1927. L'intention de la bande de transférer les droits miniers en 1945 ne peut écarter les dispositions de la Loi ou de l'acte de cession de 1940. D'ailleurs, même si elle le pouvait, l'existence d'une telle intention n'a pas été établie en l'espèce. En l'absence de preuve de l'intention, la cession de 1940 ne devrait pas être invalidée et la bande devrait pouvoir invoquer les mesures de protection prévues par la *Loi des Indiens* de 1927 et la common law et qui ont pour effet d'empêcher la Couronne de modifier unilatéralement les conditions en vertu desquelles elle détenait les biens en qualité de fiduciaire, sans obtenir le consentement éclairé de la bande.

Même si, pour ce qui concerne la vente des droits de superficie de la réserve, aucun manquement à une obligation de fiduciaire de la Couronne n'a été prouvé, la cession des droits miniers en 1940 a toutefois eu aussi pour effet d'imposer une obligation de fiduciaire envers la bande relativement aux droits miniers, et le MAI a manqué à cette obligation et aux conditions de la cession de 1940 en transférant ces droits au DTAC en 1948. En vertu de la cession de 1940, le MAI n'était autorisé qu'à louer les droits en question au profit de la bande. Quoi qu'il en soit, même si on accepte l'argument que la cession de 1945 a eu pour effet d'annuler la cession antérieure des droits miniers, la Couronne avait toujours, aux termes de la cession de 1945, l'obligation de vendre ou de louer les terres visées dans l'intérêt de la bande. Une personne raisonnable ne se départit pas par inadvertance d'un bien qui peut avoir de la valeur et dont la capacité de produire un revenu a déjà été démontrée. Pas plus qu'une personne raisonnable se départit, sans contrepartie, d'un bien qui ne lui coûte rien à conserver et qui pourrait un jour avoir de la valeur, aussi mince que puisse être cette possibilité. Dans la gestion de ses propres affaires, la Couronne réservait ses droits miniers. Elle aurait dû faire de même pour la bande. En tant que fiduciaire, la Couronne avait l'obligation d'agir

fiduciary was that of a man of ordinary prudence in managing his own affairs.

The transfer of the mineral rights to the DVLA was made in March 1948 and the appellants' action filed in September 1978 is thus outside the 30-year limitation period in s. 8 of the *Limitation Act* of British Columbia. However, while the fiduciary duty associated with the administration of the reserve as Indian lands may have terminated with the sale of the lands in 1948, an ongoing fiduciary duty to act to correct error in the best interests of the Indians may be inferred from the exceptional nature of s. 64 of the 1927 *Indian Act*. Under that section, the DIA had the power to revoke the erroneous transfer of the mineral rights to the DVLA up to the time they were sold by the DVLA. The Crown committed a second breach of fiduciary duty by failing to correct its error on August 9, 1949 when it learned of the erroneous transfer and of the potential value of the mineral rights. Since the present action was filed in September 1978, any losses stemming from sales after August 9, 1949 are still permissible under the 30-year general limitation period. Claims for breach of fiduciary duty regarding mineral rights which survive the 30-year limitation period are not barred by the 6-year limitation period provided by s. 3(4) of the *Limitation Act*. Although the action falls well beyond 6 years from the agreements for sale with the veterans, which took place between 1948 and 1956, by virtue of s. 6(3) of the *Limitation Act* the running of time was postponed until 1977 since it is only in that year that the appellants became aware of the true facts, placing their writ well within the applicable limitation period. The appellants are therefore entitled to damages against the Crown for breach of fiduciary duty with respect to such mineral rights as were conveyed by agreement for sale after August 9, 1949.

avec le soin et la diligence qu'un bon père de famille apporte à l'administration de ses propres affaires.

Comme le transfert des droits miniers au DTAC a été fait en mars 1948, l'action intentée par les appelants en septembre 1978 est donc prescrite par suite de l'écoulement du délai de 30 ans prévu à l'art. 8 de la *Limitation Act* de la Colombie-Britannique. Toutefois, même si l'obligation de fiduciaire touchant l'administration des terres des Indiens a pu cesser au moment de la vente des terres en 1948, on peut néanmoins inférer du caractère exceptionnel de l'art. 64 de la *Loi des Indiens* de 1927 le maintien d'une obligation de fiduciaire d'agir dans l'intérêt des Indiens afin de corriger une erreur. Cette disposition conférerait au MAI le pouvoir d'annuler le transfert des droits miniers fait par erreur au DTAC, et ce jusqu'au moment où ils ont été vendus par ce dernier. La Couronne a commis un deuxième manquement à son obligation de fiduciaire en omettant de corriger l'erreur en question le 9 août 1949, lorsqu'elle a pris connaissance de cette erreur et de la valeur potentielle des droits miniers. Puisque la présente action a été déposée en septembre 1978, toutes les pertes découlant des transferts faits après le 9 août 1949 donnent donc ouverture à action compte tenu du délai de prescription général de 30 ans. Les réclamations concernant les droits miniers qui subsistent à l'application du délai de prescription trentenaire ne sont pas prescrites par le délai de prescription de 6 ans prévu au par. 3(4) de la *Limitation Act*. Même si l'action dépasse de beaucoup le délai de 6 ans qui a commencé à courir à compter des conventions de vente conclues avec les anciens combattants entre 1948 et 1956, en raison de l'effet du par. 6(3) de la *Limitation Act*, le délai de prescription n'a commencé à courir qu'en 1977, puisque les appelants n'ont appris les faits véritables qu'en 1977. Leur action a donc été intentée bien à l'intérieur du délai de prescription applicable. Les appelants ont donc droit à des dommages-intérêts de la part de la Couronne par suite du manquement de celle-ci à l'obligation de fiduciaire qui lui incombait relativement aux droits miniers qui ont été cédés par actes de vente après le 9 août 1949.

GONTHIER J. —

I. Introduction

I have had the benefit of reading the reasons of my colleague, McLachlin J. While I agree with her analyses of the surrender of the surface rights in Indian Reserve 172 ("I.R. 172"), and the application of the British Columbia *Limitation Act*, R.S.B.C. 1979, c. 236, and with her ultimate disposition of the case, I find that I cannot agree with her conclusion that the 1945 surrender of I.R. 172 to the Crown did not include the mineral rights in the reserve. In my view, the 1945 agreement constituted a complete surrender to the Crown of the surface and mineral rights in the St. John Indian Reserve, in trust, "to sell or lease". The Beaver Band's intention at the time of the 1945 surrender, and the terms of the surrender instrument, bear this

Version française du jugement des juges La Forest, L'Heureux-Dubé, Sopinka et Gonthier rendu par

LE JUGE GONTHIER —

I. Introduction

J'ai eu l'avantage de lire les motifs de ma collègue le juge McLachlin. Même si je suis d'accord avec son analyse de la cession des droits de superficie de la réserve indienne 172 («R.I. 172») et de l'application de la *Limitation Act* de la Colombie-Britannique, R.S.B.C. 1979, ch. 236, ainsi qu'avec la façon dont elle tranche le pourvoi, je ne peux cependant me rallier à sa conclusion que la cession de la R.I. 172 à la Couronne en 1945 n'incluait pas les droits miniers afférents à la réserve. À mon avis, l'accord de 1945 était une cession complète à la Couronne, en fiducie, des droits de superficie de la réserve indienne de St. John et des droits miniers y afférents, aux fins [TRADUCTION] «de vendre ou de louer» les terres visées. L'intention

out. Moreover, while I agree with my colleague that in dealing with the mineral rights subsequent to the 1945 surrender, the Department of Indian Affairs ("DIA") committed a breach of fiduciary duty, my reasons are somewhat different. I set them out below.

II. The Effect of the 1945 Surrender of I.R. 172 on the 1940 Surrender of the Mineral Rights in I.R. 172

McLachlin J.'s position, in brief, is that since there had already been a surrender of the mineral rights in I.R. 172 for "lease" in 1940, these mineral rights could not have been included in the 1945 surrender. The basis of her position lies in the *Indian Act*, R.S.C. 1927, c. 98, scheme governing the transfer of reserve lands to the Crown. Once such lands are surrendered, they become "Indian lands" under the Act. Section 2(e) of the Act defines "Indian lands" as follows:

"Indian lands" means any reserve or portion of a reserve which has been surrendered to the Crown;

It is therefore clear that "Indian lands" must constitute a "reserve or portion of a reserve". "Reserve" is defined in s. 2(j) of the Act:

"reserve" means any tract or tracts of land set apart by treaty or otherwise for the use or benefit of or granted to a particular band of Indians, of which the legal title is in the Crown, and which remains so set apart and has not been surrendered to the Crown, and includes all the trees, wood, timber, soil, stone, minerals, metals and other valuables thereon or therein;

McLachlin J. argues that when the Band surrendered the mineral rights in I.R. 172 to the Crown in 1940, this severed the mineral rights from the "reserve". The mineral rights thus constituted "Indian lands" under s. 2(e) of the Act, because they were a "portion of a reserve" which had been "surrendered". Therefore, the 1945 agreement could not have included the Band's rights over the

de la bande des Castors au moment de la cession de 1945 de même que les conditions de l'acte de cession appuient mon opinion. Qui plus est, même si je conviens avec ma collègue que le ministère des Affaires indiennes («MAI») a manqué à une obligation de fiduciaire dans le cadre des opérations qu'il a effectuées relativement aux droits miniers après la cession de 1945, ma conclusion repose sur des motifs quelque peu différents, que j'expose ci-après.

II. L'effet de la cession de la R.I. 172 en 1945 sur la cession des droits miniers afférents à la R.I. 172 en 1940

Le juge McLachlin soutient à cet égard que, comme il y avait déjà eu, en 1940, cession des droits miniers afférents à la R.I. 172 à des fins de «location», ces droits ne pouvaient être inclus dans la cession de 1945. Ma collègue appuie sa position sur le régime établi par la *Loi des Indiens*, S.R.C. 1927, ch. 98, en matière de transfert à la Couronne de terres faisant partie de réserves. Une fois cédées, ces terres deviennent des «terres indiennes» au sens de l'al. 2l) de la Loi, qui se lit:

«terres indiennes», «terres des Indiens» signifie toute réserve ou partie de réserve qui a été cédée à la Couronne;

Il est donc clair que les «terres indiennes» doivent être une «réserve ou partie de réserve». L'alinéa 2h) définit ainsi le terme «réserve»:

«réserve» signifie toute étendue de terre mise à part, par traité ou autrement, pour l'usage ou le profit d'une bande particulière d'Indiens ou concédée à cette bande, et dont le titre légal est attribué à la Couronne, et qui fait encore partie de la réserve et n'a pas été rétrocédée à la Couronne, et comprend les arbres, le bois, la terre, la pierre, les minéraux, les métaux et autres choses de valeur qui se trouvent à la surface ou à l'intérieur du sol;

Le juge McLachlin affirme que les droits miniers afférents à la R.I. 172 ont été détachés de la «réserve» lorsque la bande a, en 1940, cédé les droits en question à la Couronne. Les droits miniers sont donc devenus des «terres indiennes» au sens de l'al. 2l) de la Loi, puisqu'ils étaient une «partie de réserve» qui avait été «cédée». Par conséquent, l'accord de 1945 ne pouvait pas inclure

minerals, since the surrendered "reserve", as defined in s. 2(j) of the Act, was composed of only those portions of I.R. 172 which had not yet been surrendered. Furthermore, because the parties did not comply with certain administrative procedures associated with the resurrender of reserve lands (i.e., the execution of a formal revocation document prior to resurrender), McLachlin J. rejects the notion that the 1945 agreement constituted a revocation of the 1940 surrender of mineral rights for "lease", and a resurrender of those same rights "to sell or lease". She concludes that the 1940 surrender was unaffected by the 1945 agreement, and that s. 54 of the Act prevented the DIA from selling the mineral rights since it was required to continue to lease the mineral rights according to the 1940 terms.

les droits de la bande sur les minéraux puisque la «réserve» — au sens de l'al. 2h) de la Loi — qui était cédée n'était formée que des parties de la R.I. 172 qui n'avaient pas encore été cédées. Par ailleurs, du fait que les parties à l'accord n'ont pas respecté certaines formalités applicables en cas de nouvelle cession de terres de la réserve (la conclusion d'un acte formel d'annulation avant cette nouvelle cession), le juge McLachlin rejette la thèse que l'accord de 1945 constituait une annulation de la cession des droits miniers en 1940 à des fins de «location» ainsi qu'une nouvelle cession de ces droits aux fins «de [les] vendre ou de [les] louer». Ma collègue conclut que la cession de 1940 n'a pas été touchée par celle de 1945, et que l'art. 54 de la Loi empêchait le MAI de vendre les droits miniers, étant donné qu'il était tenu de continuer de les louer conformément aux conditions de la cession de 1940.

3 The issue of whether the 1940 surrender of mineral rights was governed by the 1927 *Indian Act* surrender regime has been a source of considerable controversy. In the courts below, both Addy J. and Stone J.A. were of the view that the surrender by a band of the right to exploit indeterminate mineral deposits within reserve lands was outside the scope of the 1927 Act. This conclusion was based on their view that the statutory regime only applied to the surrender of surface rights and mineral rights together, and that mineral rights themselves could not be a "reserve" with the status of "Indian lands". Isaac C.J., and my colleague McLachlin J., have both reached the opposite conclusion, finding that the 1927 Act applied also to a surrender of mineral rights only, since such rights constituted a "portion of a reserve", and therefore, would have the status of "Indian lands" following surrender.

La question de savoir si la cession des droits miniers, en 1940, était assujettie au régime de cession de terres établi par la *Loi des Indiens* de 1927 a suscité une importante controverse. En effet, dans les décisions dont appel, tant le juge Addy que le juge Stone ont conclu que la cession par une bande du droit d'exploitation de gisements minéraux indéterminés à l'intérieur d'une réserve n'était pas visée par la Loi de 1927. Ils fondaient cette conclusion sur le fait que, à leur avis, le régime établi par la loi ne s'appliquait que lorsque les droits de superficie et des droits miniers étaient cédés ensemble, et sur le fait que des droits miniers ne pouvaient pas, à eux seuls, constituer une «réserve» ayant qualité de «terres indiennes». Le juge en chef Isaac et ma collègue le juge McLachlin sont tous deux arrivés à la conclusion contraire, statuant que la Loi de 1927 s'appliquait aussi à une cession isolée de droits miniers, puisque ces droits constituaient une «partie de réserve» et auraient, en conséquence, qualité de «terres indiennes» après la cession.

4 In my view, the debate as to the juridical nature of the 1940 surrender is academic in the circumstances of this case, and the matter need not be determined here. Whether or not the 1940 surrender was actually governed by the 1927 Act, there

À mon avis, le débat concernant la nature juridique de la cession de 1940 est théorique en l'espèce et n'a pas à être tranché. Que la cession de 1940 ait ou non été régie par la Loi de 1927, la légitimité de la cession n'a pas été contestée dans

has been no challenge to its legitimacy in this appeal. Nor should there be, since the Band gave its full and informed consent, the Crown fulfilled its fiduciary duty in relation to the surrender, and the parties complied with the statutory surrender procedures. My conclusion that the mineral rights in I.R. 172 were surrendered as part of the 1945 agreement rests on reasoning unrelated to the scope of the statutory surrender regime, and therefore holds even if the mineral rights had attained the status of "Indian lands" through the 1940 dealings. This is because the ultimate issue to be determined in this case is the impact of the 1945 surrender of I.R. 172 on the earlier 1940 surrender of the mineral rights in I.R. 172, regardless of the latter's effectiveness. The 1927 Act is entirely silent on the subjects of surrender variation, surrender revocation, and resurrender, yet no one would seriously suggest that this silence renders all surrenders, including the 1940 agreement, permanent and irrevocable. In fact, the DIA developed its own administrative procedures for the revocation of a surrender, in order to facilitate resurrender and fill the void left by the statute. It is this statutory void which must be addressed here, and I do not think that the analysis is advanced by a finding one way or the other as to whether "Indian lands" are in dispute.

To explain the impact of the 1945 surrender of I.R. 172 "to sell or lease" on the 1940 surrender of the mineral rights in I.R. 172 for "lease", both the appellants and the Crown have advanced different common law property concepts in support of their competing positions. The Crown's position, which is essentially that of the trial judge, Addy J., is that the mineral rights were transferred in the 1945 surrender through the operation of the legal presumption that a general conveyance of land passes all interests except those specifically reserved in the deed of transfer. The appellants, whose position is adopted by my colleague McLachlin J., prefer the common law principle *nemo dat quod non habet* — a person cannot give what she does not possess. According to the reasons of McLachlin J., the

le cadre du présent pourvoi. D'ailleurs, elle ne saurait l'être, vu que la bande a donné un consentement libre et éclairé, que la Couronne s'est acquittée de son obligation de fiduciaire relativement à la cession et que les parties se sont conformées aux formalités prévues par la loi en matière de cession. Ma conclusion que les droits miniers afférents à la R.I. 172 ont été cédés dans le cadre de l'accord de 1945 ne s'appuie d'aucune façon sur la portée du régime établi par la loi relativement aux cessions et vaut donc même si les droits miniers avaient pris la qualité de «terres indiennes» par suite des opérations de 1940. Il en est ainsi parce que la question revient en définitive à déterminer l'effet de la cession de la R.I. 172 en 1945 sur la cession des droits miniers afférents à la R.I. 172 en 1940, quoi qu'il en soit de la validité de cette dernière. Même si la Loi de 1927 ne traite ni de la modification des cessions, ni de leur annulation, ni de la possibilité de refaire cession, on ne saurait prétendre sérieusement que, en raison de ce silence, toutes les cessions, y compris l'accord de 1940, ont un caractère permanent et irrévocable. De fait, le MAI avait établi sa propre procédure administrative en matière d'annulation de cession afin de faciliter la possibilité de refaire cession et de combler le vide existant dans la Loi à cet égard. C'est ce vide qu'il faut examiner en l'espèce, et je ne crois pas que l'on fait avancer l'analyse en décidant, dans un sens ou dans l'autre, si des «terres indiennes» sont en cause.

Pour expliquer l'effet de la cession, en 1945, de la R.I. 172 aux fins de «vendre ou de louer» les terres visées sur la cession, en 1940, des droits miniers afférents à la R.I. 172 à des fins de «location», les appelants et la Couronne ont, au soutien de leurs thèses opposées, invoqué différents concepts du droit des biens en common law. La thèse de la Couronne, qui est essentiellement celle du juge de première instance, le juge Addy, est qu'il y a eu transfert des droits miniers lors de la cession de 1945 par suite de l'effet de la présomption légale qui veut que, en cas de cession générale de terres, il y a transfert de tous les droits, sauf ceux réservés expressément dans l'acte de cession. Les appelants, dont ma collègue le juge McLachlin a retenu la thèse, préfèrent le principe de common

Band could not surrender the mineral rights in I.R. 172 in 1945, since these rights had already been surrendered in 1940.

law *nemo dat quod non habet* — nul ne peut donner ce qu'il n'a pas. Suivant les motifs du juge McLachlin, la bande ne pouvait céder les droits miniers afférents à la R.I. 172 en 1945, puisque ces droits avaient déjà été cédés en 1940.

6 In my view, principles of common law property are not helpful in the context of this case. Since Indian title in reserves is *sui generis*, it would be most unfortunate if the technical land transfer requirements embodied in the common law were to frustrate the intention of the parties, and in particular the Band, in relation to their dealings with I.R. 172. For this reason, the legal character of the 1945 surrender, and its impact on the 1940 surrender, should be determined by reference to the intention of the Band. Unless some statutory bar exists (which, as noted above, is not the case here), then the Band members' intention should be given legal effect.

À mon avis, les principes généraux du droit des biens en common law ne sont pas utiles dans le contexte du présent pourvoi. Puisque le titre indien sur les réserves a un caractère *sui generis*, il serait fort malencontreux que les exigences de forme de la common law en matière de transfert foncier viennent frustrer l'intention des parties, tout particulièrement celle de la bande, à l'égard de leurs intérêts dans la R.I. 172. Voilà pourquoi le caractère juridique de la cession de 1945 et son effet sur celle de 1940 doivent être déterminés au regard de l'intention de la bande. Hormis quelque empêchement prescrit par la loi (ce qui, comme nous l'avons vu précédemment, n'est pas le cas en l'espèce), il faut laisser l'intention des membres de la bande produire ses effets juridiques.

7 An intention-based approach offers a significant advantage, in my view. As McLachlin J. observes, the law treats aboriginal peoples as autonomous actors with respect to the acquisition and surrender of their lands, and for this reason, their decisions must be respected and honoured. It is therefore preferable to rely on the understanding and intention of the Band members in 1945, as opposed to concluding that regardless of their intention, good fortune in the guise of technical land transfer rules and procedures rendered the 1945 surrender of mineral rights null and void. In a case such as this one, a more technical approach operates to the benefit of the aboriginal peoples. However, one can well imagine situations where that same approach would be detrimental, frustrating the well-considered plans of the aboriginals. In my view, when determining the legal effect of dealings between aboriginal peoples and the Crown relating to reserve lands, the *sui generis* nature of aboriginal title requires courts to go beyond the usual restrictions imposed by the common law, in

Selon moi, l'application d'une analyse fondée sur l'intention des parties offre un avantage important. Ainsi que l'a fait remarquer le juge McLachlin, la loi traite les peuples autochtones comme des acteurs autonomes en ce qui concerne l'acquisition et la cession de leurs terres, il faut donc respecter leurs décisions. En conséquence, il est préférable de s'en remettre à l'intention des membres de la bande et à leur compréhension de la situation en 1945, plutôt que de conclure que, quelle qu'ait été cette intention, c'est par un coup de chance — résultant de règles et autres formalités procédurales applicables aux transferts fonciers — qu'est invalidée la cession des droits miniers en 1945. Dans un cas comme celui-ci, l'application d'une analyse plus formaliste est à l'avantage des peuples autochtones. Cependant, il est facile d'imaginer des cas où cette même analyse serait préjudiciable aux autochtones et ferait obstacle à leurs plans mûrement réfléchis. À mon avis, dans l'examen des effets juridiques des opérations conclues par les peuples autochtones et la Couronne relativement à des terres faisant partie de réserves, il ne faut pas oublier que, compte tenu

order to give effect to the true purpose of the dealings.

While McLachlin J. dedicates a considerable portion of her reasons to an analysis of the Band's intention, the fact remains that under her approach, the Band's intention in 1945 is irrelevant. Even if McLachlin J. were to agree with my conclusion that the Band intended to surrender the mineral rights as part of the 1945 agreement, she would be forced to the conclusion that the mineral rights were not part of the 1945 surrender because of her findings in relation to the 1927 Act, the operation of *nemo dat quod non habet*, and the administrative procedures adopted by the DIA for surrender revocation. Although McLachlin J. and I might disagree on the Band's intention in this case, since I prefer to rely on the factual findings of the trial judge, I think that in principle an intention-based approach is preferable to my colleague's more technical reasoning.

In applying this approach in the circumstances of this case, one must have regard to the factual findings of the trial judge, Addy J. Three are particularly relevant in determining the Band members' intention when they agreed to the surrender of I.R. 172 in 1945:

1. That the plaintiffs had known for some considerable time that an absolute surrender of I.R. 172 was being contemplated;

. . . .

6. That Mr. Grew [the local Indian agent] fully explained to the Indians the consequences of a surrender;

7. That, although they would not have understood and probably would have been incapable of understanding the precise nature of the legal interest they were surrendering, they did in fact understand that by the surrender they were giving up forever all rights to I.R. 172, in return for the money which would be deposited to their

du caractère *sui generis* du titre autochtone, les tribunaux doivent faire abstraction des restrictions habituelles imposées par la common law afin de donner effet à l'objet véritable de ces opérations.

Bien que le juge McLachlin consacre une partie considérable de ses motifs à l'analyse de l'intention de la bande, le fait demeure que, dans le cadre de l'approche qu'elle applique, l'intention de la bande en 1945 n'est pas un facteur pertinent. Même si le juge McLachlin souscrivait à ma conclusion que la bande avait eu l'intention de céder les droits miniers dans l'accord de 1945, elle serait néanmoins forcée de conclure que ces droits n'étaient pas visés par la cession de 1945, vu ses conclusions concernant la Loi de 1927, l'application du principe *nemo dat quod non habet* et la procédure administrative adoptée par le MAI relativement à l'annulation des cessions. Même si le juge McLachlin et moi-même pouvons être en désaccord quant à l'intention de la bande en l'espèce, vu que je préfère m'appuyer sur les conclusions de fait du juge de première instance, j'estime qu'en principe une approche fondée sur l'intention est préférable au raisonnement plus formaliste de ma collègue.

Dans l'application de cette approche aux circonstances de l'espèce, il faut tenir compte des conclusions de fait du juge de première instance, le juge Addy. Trois sont particulièrement pertinentes afin d'établir quelle était l'intention des membres de la bande lorsqu'ils ont convenu de céder la R.I. 172 en 1945:

1. Les demandeurs savaient depuis longtemps qu'une cession absolue de la R.I. 172 était envisagée;

. . . .

6. M. Grew [l'agent des Indiens pour l'endroit] avait expliqué aux Indiens toutes les conséquences d'une cession;

7. Même s'ils n'ont pas saisi exactement la nature du droit, en *common law*, qu'ils cédaient, ils en étaient probablement incapables, ils ont bel et bien compris, dans les faits, que par la cession ils renonçaient pour toujours à tous leurs droits sur la R.I. 172 en échange de l'argent qui serait versé à leur crédit après la vente de la réserve,

credit once the reserve was sold and with their being furnished with alternate sites near their trapping lines to be purchased from the proceeds; [Emphasis added.]

([1988] 3 F.C. 20, at pp. 66-67.)

The Band understood that by agreeing to the 1945 surrender, they would be transferring all their rights in I.R. 172 to the Crown in trust, and that the Crown would either sell or lease those rights for the benefit of the Band. The sale or lease of I.R. 172 by the Crown would provide the funds necessary for the Band to purchase alternate reserve sites better suited to their traditional hunting and gathering activities. The Band neither expected nor intended to hold rights over I.R. 172 once the 1945 surrender was completed. This was entirely appropriate, as my colleague McLachlin J. points out, because I.R. 172 was virtually useless to the Band at the time.

et d'autres terrains situés près de leurs sentiers de piégeage qui seraient achetés avec le produit de la vente; [Je souligne.]

([1988] 3 C.F. 20, aux pp. 66 et 67.)

La bande comprenait, d'une part, qu'en acceptant la cession de 1945 elle transférerait à la Couronne, en fiducie, tous les droits qu'elle avait dans la R.I. 172, et, d'autre part, que la Couronne vendrait ou louerait ces droits au profit de la bande. La vente ou la location de la R.I. 172 par la Couronne rapporterait les fonds nécessaires à l'achat, par la bande, d'autres terres visant à lui servir de réserve et convenant mieux à ses activités traditionnelles de chasse et de cueillette. La bande ne s'attendait pas à détenir des droits sur la R.I. 172 une fois la cession de 1945 complétée, et ce n'était pas non plus son intention. Cette décision était tout à fait justifiée, comme le signale ma collègue le juge McLachlin, puisque la R.I. 172 n'avait pratiquement aucune utilité pour la bande à l'époque.

10

The Band's intention is evidenced by the terms of the 1945 surrender instrument, signed by Chief Succona, Joseph Apsassin and two councillors on behalf of the Band. This instrument states that the Band did "release, remise, surrender, quit claim and yield up unto our Sovereign Lord the King, his Heirs and Successors forever, ALL AND SINGULAR, that certain parcel or tract of land and premises . . . composed of St. John Indian Reserve No. 172". Since this instrument effected the surrender of certain land forming a "reserve", it is reasonable to conclude that the term "Reserve", as used in the surrender instrument, was intended to have the same meaning as the term "reserve" in the *Indian Act*. As I noted above, s. 2(j) of the Act defines "reserve" as an unsurrendered tract of land including the "minerals . . . thereon or therein". Therefore, the 1945 surrender included the tract of land forming I.R. 172, the minerals in that tract of land, and the right to exploit those minerals. On this basis, I must respectfully disagree with McLachlin J.'s assertion that the surrender document was silent concerning the mineral rights.

L'intention de la bande ressort des termes mêmes de l'acte de cession de 1945, que le chef Succona, Joseph Apsassin et deux conseillers ont signé au nom de la bande. Ce document indique que la bande a [TRADUCTION] «cédé au Roi, [son] maître souverain, ainsi qu'à ses héritiers et successeurs, tous les biens-fonds et bâtiments . . . dont la réserve indienne 172 de St. John est composée, et y a renoncé, pour toujours». Comme cet acte portait cession de certaines terres formant une «réserve», il est raisonnable de conclure que l'on désirait, dans l'acte de cession, utiliser le mot «réserve» suivant le sens que lui donne la *Loi des Indiens*. Comme je l'ai fait remarquer précédemment, aux termes de la définition figurant à l'al. 2h) de la Loi, le mot «réserve» s'entend d'une étendue de terre qui n'a pas été rétrocédée et comprend les «minéraux [. . .] qui se trouvent à la surface ou à l'intérieur du sol». En conséquence, la cession de 1945 incluait l'étendue de terre formant la R.I. 172, les minéraux s'y trouvant ainsi que le droit d'exploiter ces minéraux. Pour ce motif, je ne peux, avec égards, souscrire à l'affirmation du juge McLachlin que l'acte de cession était silencieux en ce qui concerne les droits miniers.

Given the Band's intention *vis-à-vis* the 1945 surrender, and the terms of that surrender, Stone J.A., in the court below, concluded:

It would seem to me that the overall effect of the 1945 transaction was essentially the same as might have been achieved by first cancelling the 1940 surrender with consent of the Indians followed by the acceptance of that cancellation by the Governor in Council. According to the Trial Judge's finding the Indians agreed to the release of their rights in I.R. 172; their consent was reflected in the language of the formal surrender instrument and the surrender was afterwards accepted by the Governor in Council.

([1993] 3 F.C. 28, at pp. 122-23.)

He therefore construed the 1945 surrender as a revocation of the 1940 agreement, and a transfer of I.R. 172, including the mineral rights, to the Crown "to sell or lease".

Although the "revocation-resurrender" description offered by Stone J.A. is one plausible construction of the 1945 agreement, I think that the true nature of the 1945 dealings can best be characterized as a variation of a trust in Indian land. In 1940, the Band transferred the mineral rights in I.R. 172 to the Crown in trust, requiring the Crown to lease those rights for the benefit of the Band. The 1945 agreement was also framed as a trust, in which the Band surrendered all of its rights over I.R. 172 to the Crown "to sell or lease". The 1945 agreement subsumed the 1940 agreement, and expanded upon it in two ways: first, while the 1940 surrender concerned mineral rights only, the 1945 surrender covered all rights in I.R. 172, including both mineral rights and surface rights; and second, while the 1940 surrender constituted a trust for "lease", the 1945 surrender gave the Crown, as trustee, the discretion "to sell or lease". This two-pronged variation of the 1940 trust agreement afforded the Crown considerably greater power to act as a fiduciary on behalf of the Band. Of course, under the terms of the trust, and because of the Crown's fiduciary role in the deal-

Vu l'intention de la bande dans le cadre de la cession de 1945 et les conditions de cette cession, le juge Stone de la Cour d'appel fédérale a conclu ainsi:

Il me semble que l'effet général de la cession de 1945 était essentiellement le même que celui auquel on aurait pu en arriver en annulant d'abord la cession de 1940 avec le consentement des Indiens, le gouverneur en conseil acceptant ensuite cette annulation. Selon la conclusion tirée par le juge de première instance, les Indiens ont consenti à la cession des droits qu'ils possédaient sur la R.I. 172; leur consentement se manifestait dans le libellé de l'acte officiel de cession et la cession a par la suite été acceptée par le gouverneur en conseil.

([1993] 3 C.F. 28, aux pp. 122 et 123.)

Il a en conséquence considéré la cession de 1945 comme une annulation de celle de 1940 et un transfert à la Couronne de la R.I. 172, y compris les droits miniers y afférents, aux fins «de vendre ou de louer» les terres visées.

Même si la thèse de l'«annulation suivie d'une nouvelle cession» proposée par le juge Stone est une interprétation plausible de l'accord de 1945, je crois que la meilleure façon de décrire la nature véritable des opérations de 1945 est de les qualifier de modification d'une fiducie visant des terres indiennes. En effet, en 1940, la bande a transféré à la Couronne, en fiducie, les droits miniers afférents à la R.I. 172, exigeant de cette dernière qu'elle les loue au profit de la bande. L'accord de 1945 visait également une fiducie, dans laquelle la bande cédait à la Couronne tous les droits qu'elle détenait sur la R.I. 172 à des fins de vente ou de location. L'accord de 1945 subsumait celui de 1940, et il en élargissait la portée à deux points de vue: premièrement, alors que la cession de 1940 ne visait que les droits miniers, celle de 1945 englobait tous les droits afférents à la R.I. 172, y compris les droits miniers et les droits de superficie; deuxièmement, tandis que la cession de 1940 constituait une fiducie [TRADUCTION] «aux fins de [...] location», celle de 1945 conférait à la Couronne, en qualité de fiduciaire, le pouvoir discrétionnaire «de vendre ou de louer» les terres visées. Cette double modification de l'acte de fiducie de 1940 conférait à la Couronne un pouvoir beaucoup plus grand d'agir à titre de fiduciaire pour le compte de la bande.

ings, the DIA was required to exercise its enlarged powers in the best interests of the Band.

13

I should add that my reasons should not be interpreted to equate a trust in Indian land with a common law trust. I am well aware that this issue was not resolved in *Guerin v. The Queen*, [1984] 2 S.C.R. 335, and I do not wish to pronounce upon it in this case. However, this Court did recognize in *Guerin* that “trust-like” obligations and principles would be relevant to the analysis of a surrender of Indian lands. In this case, both the 1940 and 1945 surrenders were framed as trusts, and the parties therefore intended to create a trust-like relationship. Thus, for lack of a better label, I think that it is appropriate to refer to these surrenders as trusts in Indian land.

14

I should also add that I would be reluctant to give effect to this surrender variation if I thought that the Band’s understanding of its terms had been inadequate, or if the conduct of the Crown had somehow tainted the dealings in a manner which made it unsafe to rely on the Band’s understanding and intention. However, neither of these situations arises here. As the trial judge found, the consequences of the 1945 surrender were fully explained to the Indians by the local agent of the DIA during the negotiations. There was also substantial compliance with the technical surrender requirements embodied in s. 51 of the 1927 *Indian Act*, and as McLachlin J. concludes, the evidence amply demonstrates the valid assent of the Band members to the 1945 agreement. Moreover, by the terms of the surrender instrument, the DIA was required to act in the best interests of the Band in dealing with the mineral rights. In fact, the DIA was under a fiduciary duty to put the Band’s interests first. I therefore see nothing during the negotiations prior to the 1945 surrender, or in the terms of the surrender instrument, which would make it

Certes, compte tenu des conditions de la fiducie et du rôle de fiduciaire qu’assumait la Couronne lorsqu’elle effectuait des opérations, le MAI était tenu d’exercer ses pouvoirs élargis dans l’intérêt de la bande.

Je tiens à ajouter qu’il ne faut pas interpréter mes motifs comme ayant pour effet d’assimiler les fiducies visant des terres indiennes aux fiducies en common law. Je suis bien conscient que cette question n’a pas été tranchée dans *Guerin c. La Reine*, [1984] 2 R.C.S. 335, et je ne désire pas le faire en l’espèce. Cependant, notre Cour a, dans cet arrêt, reconnu que des obligations et principes «semblable[s] à [ceux d’une fiducie] étaient pertinents dans le cadre de l’analyse d’une cession visant des terres indiennes. Dans le présent cas, tant la cession de 1940 que celle de 1945 étaient conçues comme des fiducies, et les parties avaient en conséquence l’intention de créer des rapports semblables à ceux créés par une fiducie. En conséquence, à défaut d’un meilleur qualificatif, j’estime approprié d’appeler ces cessions des fiducies visant des terres indiennes.

Je tiens à ajouter que j’hésiterais à donner effet à cette modification de cession si je croyais que la bande n’en avait pas bien saisi les conditions, ou si la conduite de la Couronne avait, d’une manière ou d’une autre, vicié les négociations au point qu’il serait hasardeux de tenir pour acquis que la bande avait bien compris la situation et avait eu l’intention de faire ce qu’elle a fait. Cependant, ni l’une ni l’autre de ces situations ne se sont produites en l’espèce. Comme l’a conclu le juge de première instance, l’agent local du MAI a pleinement expliqué les conséquences de la cession de 1945 aux Indiens pendant les négociations. De plus, les exigences de forme en matière de cession prévues par l’art. 51 de la *Loi des Indiens* de 1927 ont, pour l’essentiel, été respectées, et, comme l’a conclu le juge McLachlin, la preuve démontre amplement que les membres de la bande ont ratifié de façon valide l’accord de 1945. Par ailleurs, de par les termes de l’acte de cession, le MAI était tenu d’agir dans l’intérêt de la bande dans le cadre des opérations touchant les droits miniers. De fait, le MAI avait l’obligation de fiduciaire de donner pré-

inappropriate to give effect to the Band's intention to surrender all their rights in I.R. 172 to the Crown in trust "to sell or lease". In fact, the guiding principle that the decisions of aboriginal peoples should be honoured and respected leads me to the opposite conclusion.

I therefore conclude that under the 1945 agreement, both the surface rights and the mineral rights in I.R. 172 were surrendered to the Crown in trust "to sell or lease".

III. Breach of Fiduciary Duty by the DIA Subsequent to the 1945 Surrender

The terms of the 1945 surrender transferred I.R. 172 to the Crown "in trust to sell or lease the same to such person or persons, and upon such terms as the Government of the Dominion of Canada may deem most conducive to our Welfare and that of our people". By taking on the obligations of a trustee in relation to I.R. 172, the DIA was under a fiduciary duty to deal with the land in the best interests of the members of the Beaver Band. This duty extended to both the surface rights and the mineral rights.

In my view, it is critical to the outcome of this case that the 1945 agreement was a surrender in trust, to sell or lease. The terms of the trust agreement provided the DIA with the discretion to sell or lease, and since the DIA was under a fiduciary duty *vis-à-vis* the Band, it was required to exercise this discretion in the Band's best interests. Of equal importance is the fact that the 1945 surrender gave the DIA a virtual *carte blanche* to determine the terms upon which I.R. 172 would be sold or leased. The only limitation was that these terms had to be "conducive" to the "welfare" of the Band. Because of the scope of the discretion granted to the DIA, it would have been open to the

séance aux intérêts de la bande. En conséquence, rien dans les négociations qui ont précédé la cession de 1945 ou dans les conditions de l'acte de cession lui-même ne m'amène à conclure qu'il serait inapproprié de donner effet à l'intention de la bande, savoir de céder en fiducie à la Couronne tous ses droits dans la R.I. 172 pour que cette dernière «vend[e] ou . . . lou[e]» les terres visées. De fait, le principe directeur qui veut que l'on respecte les décisions des peuples autochtones m'amène à la conclusion contraire.

En conséquence, je conclus que, en vertu de l'accord de 1945, tant les droits de superficie de la R.I. 172 et les droits miniers y afférents ont été cédés à la Couronne, en fiducie, pour qu'elle «vend[e] ou . . . lou[e]» les terres visées.

III. Manquement du MAI à son obligation de fiduciaire après la cession de 1945

Aux termes de la cession de 1945, la bande transférait la R.I. 172 à la Couronne [TRADUCTION] «en fiducie aux fins [. . .] de vendre ou de louer [. . .] les dites terres à une ou plusieurs personnes et selon les conditions que le gouvernement du Canada peut juger les plus appropriées pour assurer notre bien-être et celui de notre peuple». En assumant les obligations d'un fiduciaire relativement à la R.I. 172, le MAI avait l'obligation de fiduciaire d'agir dans le meilleur intérêt des membres de la bande des Castors dans les opérations concernant les terres. Cette obligation visait à la fois les droits de superficie et les droits miniers.

À mon avis, le fait que l'accord de 1945 était une cession en fiducie conclue aux fins de vendre ou de louer les terres visées est décisif en l'espèce. Aux termes de l'acte de fiducie, le MAI avait le pouvoir discrétionnaire de vendre ou de louer les terres visées et, comme il était tenu à une obligation de fiduciaire envers la bande, il devait exercer ce pouvoir discrétionnaire dans l'intérêt de cette dernière. Autre fait tout aussi important, la cession de 1945 donnait virtuellement carte blanche au MAI pour décider à quelles conditions la R.I. 172 serait vendue ou louée. La seule restriction était que ces conditions devaient être «appropriées pour assurer [le] bien-être» de la bande. Compte tenu de

DIA to sell the surface rights in I.R. 172 to the Director, *The Veterans' Land Act* ("DVLA"), while continuing to lease the mineral rights for the benefit of the Band, as per the 1940 surrender agreement.

l'étendue du pouvoir discrétionnaire qui était accordé au MAI, il lui aurait été possible de vendre les droits de superficie de la R.I. 172 au Directeur de la *Loi sur les terres destinées aux anciens combattants* («DTAC»), tout en continuant de louer les droits miniers au profit de la bande, conformément à l'acte de cession de 1940.

18

Why this option was not chosen is a mystery. As my colleague McLachlin J. observes, the DIA had a long-standing policy, pre-dating the 1945 surrender, to reserve out mineral rights for the benefit of the aboriginal peoples when surrendered Indian lands were sold off. This policy was adopted precisely because reserving mineral rights was thought to be "conducive to the welfare" of aboriginal peoples in all cases. The existence and rationale of this policy (the wisdom of which, though obvious, is evidenced by the facts of this case) justifies the conclusion that the DIA was under a fiduciary duty to reserve, for the benefit of the Beaver Band, the mineral rights in I.R. 172 when it sold the surface rights to the DVLA in March 1948. In other words, the DIA should have continued to lease the mineral rights for the benefit of the Band as it had been doing since 1940. Its failure to do so can only be explained as "inadvertence".

La raison pour laquelle cette solution n'a pas été retenue est un mystère. Comme le fait remarquer ma collègue le juge McLachlin, suivant une politique de longue date, antérieure à la cession de 1945, lorsqu'il vendait des terres indiennes cédées, le MAI réservait les droits miniers au profit des autochtones concernés. Cette politique avait justement été adoptée parce qu'on estimait que, dans tous les cas, le fait de réserver les droits miniers était une mesure [TRADUCTION] «appropri[ée] pour assurer [le] bien-être» des autochtones visés. L'existence et la raison d'être de cette politique (dont le bien-fondé, bien qu'évident, ressort des faits de la présente affaire) justifient la conclusion que le MAI avait l'obligation de fiduciaire de réserver, au profit de la bande des Castors, les droits miniers afférents à la R.I. 172, lorsqu'il a vendu les droits de superficie au DTAC en mars 1948. Autrement dit, le MAI aurait dû continuer de louer les droits miniers comme il l'avait fait depuis 1940. Son omission de le faire ne peut s'expliquer que par une «inadvertance».

19

The DIA's failure to continue the leasing arrangement could be excused if the Department had received a clear mandate from the Band to sell the mineral rights. As I stated above, the Band's intention leads me to the conclusion that both the surface and mineral rights in I.R. 172 were included in the 1945 surrender. However, the 1945 surrender was "to sell or lease". At no time during the negotiations leading to the 1945 agreement was the sale of the mineral rights discussed specifically. The authorization given encompassed leasing as well as selling. There was therefore no clear authorization from the Band which justified the DIA in departing from its long-standing policy of reserving mineral rights for the benefit of the aboriginals when surface rights were sold. This underscores the critical distinction between the

L'omission du MAI de continuer la location pourrait être excusée si le ministère avait reçu de la bande le mandat clair de vendre les droits miniers. Comme je l'ai affirmé plus tôt, l'intention de la bande m'amène à la conclusion que la cession de 1945 visait à la fois les droits de superficie de la R.I. 172 et les droits miniers y afférents. Cependant, la cession de 1945 était faite aux fins «de vendre ou de louer» les terres visées. À aucun moment au cours des négociations ayant abouti à l'accord de 1945, la question de la vente des droits miniers n'a été discutée de manière explicite. L'autorisation donnée accordait autant le pouvoir de louer les terres visées que celui de les vendre. En conséquence, la bande n'a jamais clairement autorisé le MAI à déroger à sa politique de longue date, qui était de réserver les droits miniers au pro-

Band's intention to include the mineral rights in the 1945 surrender, and an intention of the Band that the mineral rights must be sold and not leased by the Crown. Given these circumstances, the DIA was under a fiduciary duty to continue the leasing arrangement which had been established in the 1940 surrender. It was a violation of the fiduciary duty to sell the mineral rights to the DVLA in 1948.

IV. Limitation of Actions

I agree with McLachlin J. that the breach of fiduciary duty committed by the DIA is not limited to the date when the mineral rights in I.R. 172 were sold to the DVLA. The DIA was under a duty to act in the best interests of the Beaver Band in all of its dealings with the mineral rights in I.R. 172, and as I noted above, this gave rise to a specific duty to lease those mineral rights for the benefit of the Band according to the terms of the 1945 agreement. So long as the DIA had the power, whether under the terms of the surrender instrument, or under the *Indian Act*, to reserve the mineral rights through a leasing arrangement, the DIA was under a fiduciary duty to exercise this power. Thus, like McLachlin J., I think that s. 64 of the Act is very significant, since it gave the DIA the power to revoke an erroneous sale or lease of Indian lands. Because the mineral rights in I.R. 172 were sold inadvertently, s. 64 provided the DIA with the power to reacquire the reserve lands, and thus afforded the DIA a "second chance" to effect a lease of the mineral rights.

In her reasons, McLachlin J. amply demonstrates that between July 15, 1949 and August 9, 1949, the DIA became aware of two facts: (1) the mineral rights in I.R. 172 were potentially of considerable value; and (2) the mineral rights had been sold to the DVLA in 1948. It should also be recalled that the DIA had a long-standing policy of reserving mineral rights for the benefit of aborigi-

fit des autochtones concernés lorsqu'il vendait des droits de superficie. Cette situation fait bien ressortir l'importance de la distinction entre l'intention de la bande d'inclure les droits miniers dans la cession de 1945 et une quelconque intention de la bande de demander à la Couronne de vendre ces droits plutôt que de les louer. Dans ces circonstances, le MAI avait l'obligation de fiduciaire de continuer la location prévue par la cession de 1940. La vente des droits miniers au DTAC en 1948 a constitué une violation de cette obligation de fiduciaire.

IV. Prescription

Je suis d'accord avec le juge McLachlin que le manquement par le MAI à son obligation de fiduciaire n'est pas limité à la date à laquelle les droits miniers afférents à la R.I. 172 ont été vendus au DTAC. Le MAI avait l'obligation d'agir dans l'intérêt de la bande des Castors dans toutes ses opérations concernant les droits miniers afférents à la R.I. 172, ce qui, comme je l'ai déjà mentionné, a donné naissance à l'obligation spécifique de louer ces droits au profit de la bande, conformément aux conditions de l'accord de 1945. Dans la mesure où le MAI détenait, soit en vertu de l'acte de cession soit en vertu de la *Loi des Indiens*, le pouvoir de réserver les droits miniers dans le cadre d'une entente de location, il avait l'obligation de fiduciaire d'exercer ce pouvoir. En conséquence, à l'instar du juge McLachlin, je suis d'avis que l'art. 64 de la Loi est très important, car il conférait au MAI le pouvoir d'annuler les ventes ou affermages de terres indiennes faits par erreur. Étant donné que les droits miniers afférents à la R.I. 172 ont été vendus par inadvertance, l'art. 64 donnait au MAI le pouvoir de se porter de nouveau acquéreur des terres de la réserve, lui accordant ainsi une «deuxième chance» de louer les droits miniers.

Dans ses motifs, le juge McLachlin démontre amplement que, entre le 15 juillet 1949 et le 9 août 1949, le MAI avait appris deux faits: (1) la possibilité que les droits miniers afférents à la R.I. 172 aient une valeur considérable; (2) les droits miniers avaient été vendus au DTAC en 1948. Il faut également se rappeler que le MAI appliquait une politique de longue date, qui consistait à réserver les

nal peoples when selling Indian lands. Given these circumstances, it is rather astonishing that no action was taken by the DIA to determine how the mineral rights could have been sold to the DVLA. Little effort would have been required to detect the error which had occurred.

22

As a fiduciary, the DIA was required to act with reasonable diligence. In my view, a reasonable person in the DIA's position would have realized by August 9, 1949 that an error had occurred, and would have exercised the s. 64 power to correct the error, reacquire the mineral rights, and effect a leasing arrangement for the benefit of the Band. That this was not done was a clear breach of the DIA's fiduciary duty to deal with I.R. 172 according to the best interests of the Band.

23

Thus, I conclude that the appellants may recover any losses stemming from transfers by the DVLA after August 9, 1949 as such losses fall within the 30-year limitation period imposed by the British Columbia *Limitation Act*, and are not barred by any other provision of that Act as explained in the reasons of McLachlin J.

V. Conclusion

24

For the reasons given above, I would allow the appeal in the manner stated by McLachlin J. and remit the action to the Federal Court, Trial Division, for assessment of damages accordingly. I would also allow the cross-appeal for the reasons given by her. In the circumstances, I would award costs to the appellants throughout, and would make no order as to costs on the cross-appeal.

droits miniers au profit des autochtones visés lorsqu'il vendait des terres indiennes. Vu ces circonstances, il est plutôt étonnant que le MAI n'ait pris aucune mesure pour déterminer comment les droits miniers avaient pu être vendus au DTAC. Il aurait suffi de peu pour découvrir l'erreur qui s'était produite.

En tant que fiduciaire, le MAI était tenu d'agir avec diligence raisonnable. À mon avis, une personne raisonnable, placée dans la situation du MAI, se serait aperçue, le 9 août 1949, qu'une erreur avait été commise, et elle aurait exercé le pouvoir que lui conférait l'art. 64 pour la corriger, pour acquérir de nouveau les droits miniers et pour conclure une entente de location au profit de la bande. Cette omission constitue un manquement évident à l'obligation de fiduciaire qu'avait le MAI d'agir dans l'intérêt de la bande lorsqu'il effectuait des opérations touchant la R.I. 172.

En conséquence, je conclus que les appelants peuvent recouvrer les pertes découlant des transferts faits par le DTAC après le 9 août 1949, puisqu'elles se situent à l'intérieur du délai de prescription de 30 ans fixé par la *Limitation Act* de la Colombie-Britannique et que les réclamations présentées à cet égard ne sont pas écartées par quelque autre disposition de cette loi comme l'a expliqué le juge McLachlin dans ses motifs.

V. Conclusion

Pour les motifs qui précèdent, je suis d'avis d'accueillir le pourvoi de la manière indiquée par le juge McLachlin et de renvoyer l'action à la Section de première instance de la Cour fédérale pour qu'elle établisse, en conséquence, les dommages-intérêts. Je suis également d'avis, pour les motifs formulés par le juge McLachlin, d'accueillir le pourvoi incident. Compte tenu des circonstances, j'accorde aux appelants leurs dépens devant toutes les cours, mais je ne rends pas d'ordonnance à cet égard pour ce qui est du pourvoi incident.

The reasons of Cory, McLachlin and Major JJ. were delivered by

MCLACHLIN J. —

I. Introduction

In 1916 the Beaver Indian Band (the “Band”) entered into a treaty with the Crown. In exchange for surrendering aboriginal title, the Band was given a parcel of land near Fort St. John, in North-eastern British Columbia (also referred to as “I.R. 172”). The Band was nomadic, subsisting through trapping and hunting. Its Fort St. John reserve was used as the site of its summer campground. In the winter, the Band trapped further north.

In 1940, the Band surrendered the mineral rights on its Fort St. John reserve to the Crown, in trust to lease for its benefit. In the same year, the Crown issued permits to prospect on the land for the sum of \$1,800 and divided the money among the Band members.

At the end of World War II, the federal government instituted a program under which agricultural land was made available to veterans for settlement. The possibility of making the Fort St. John reserve available under this scheme came under discussion. The reserve contained good agricultural land, and the Indians, who made their living by trapping and hunting rather than agriculture, were not using it for farming. After considerable discussion, the Band agreed to surrender its reserve to the Crown, pursuant to the provisions of the *Indian Act*, R.S.C. 1927, c. 98, so that it could ultimately be distributed under *The Veterans' Land Act*, 1942, S.C. 1942, c. 33. After negotiations between the Department of Indian Affairs (“DIA”), and the Director, *The Veterans' Land Act* (“DVLA”), a price of \$70,000 was agreed upon and paid to the DIA by the DVLA. The DIA used some of this money in 1950 to purchase other lands further north and

Version française des motifs des juges Cory, McLachlin et Major rendus par

LE JUGE MCLACHLIN —

I. Introduction

En 1916, la bande indienne des Castors (la «bande») a conclu un traité avec la Couronne. En échange de la cession de son titre ancestral, la bande a reçu un lopin de terre près de Fort St. John (également appelé «R.I. 172»), dans le nord-est de la Colombie-Britannique. La bande était nomade et vivait du piégeage et de la chasse. Elle utilisait sa réserve de Fort St. John comme camp d'été. Durant l'hiver, la bande faisait du piégeage plus au nord.

En 1940, la bande a cédé à la Couronne, en fiducie, les droits miniers afférents à sa réserve de Fort St. John pour que celle-ci les loue au profit de la bande. La même année, la Couronne a délivré des permis de prospection visant ces terres pour la somme de 1 800 \$, qu'elle a répartie entre les membres de la bande.

À la fin de la Seconde Guerre mondiale, le gouvernement fédéral a établi un programme visant à mettre des terres agricoles à la disposition des anciens combattants pour qu'ils s'y établissent. La possibilité d'appliquer ce régime à la réserve de Fort St. John a été discutée, car cette dernière contenait de bonnes terres agricoles et les Indiens, qui vivaient du piégeage et de la chasse plutôt que de l'agriculture, ne les utilisaient pas à des fins agricoles. Après de longues discussions, la bande a accepté de céder sa réserve à la Couronne, conformément aux dispositions de la *Loi des Indiens*, S.R.C. 1927, ch. 98, pour que les terres en question puissent par la suite être attribuées en vertu de la *Loi de 1942 sur les terres destinées aux anciens combattants*, S.C. 1942, ch. 33. Au terme de négociations, le ministère des Affaires indiennes («MAI») et le Directeur de la *Loi sur les terres destinées aux anciens combattants* («DTAC») ont convenu du prix de 70 000 \$, et cette somme a été versée au MAI par le DTAC. En 1950, le MAI a utilisé une partie de cette somme pour acquérir d'autres terres se trouvant plus au nord, plus près

nearer to the Band's trap lines, which became the Band's new reserves.

des sentiers de piégeage de la bande, et qui sont devenues la nouvelle réserve de la bande.

28

Between 1948 and 1956, the land which had formerly been the Band's Fort St. John reserve was sold to veterans by way of agreements for sale. In 1948 gas was discovered about 40 miles southeast of the reserve. In 1949 oil companies expressed interest in exploring the land for oil and gas. The question arose of who held the mineral rights to the property, the Band or the veterans? Correspondence ensued between the DIA and the DVLA on the subject. It was concluded that the DVLA held the mineral rights, having obtained them because they had not been reserved from the transfer of the reserve to the DVLA in 1948. In the 1960s it was concluded that the failure to reserve the mineral rights was by "inadvertence". In 1952 the veterans entered into a pooling arrangement with respect to the mineral rights. In 1976, oil and gas were discovered. The revenue from this discovery (an amount not determined in the current proceedings, but estimated by the trial judge to be roughly \$300 million) went to the veterans or their assigns.

Entre 1948 et 1956, les terres qui constituaient anciennement la réserve de la bande à Fort St. John ont été cédées à des anciens combattants par actes de vente. En 1948, on a découvert du gaz à environ 40 milles au sud-est de la réserve. En 1949, des sociétés pétrolières se sont montrées intéressées à faire de l'exploration en vue d'y trouver du pétrole et du gaz. S'est alors posée la question de savoir qui était titulaire des droits miniers afférents au bien-fonds. Était-ce la bande ou les anciens combattants? Il y a eu échange de correspondance entre le MAI et le DTAC à cet égard. Il a été décidé que le DTAC était titulaire des droits miniers, et qu'il les avait obtenus parce qu'ils n'avaient pas été réservés au moment du transfert de la réserve au DTAC en 1948. Au cours des années 1960, on a conclu que c'est par suite d'une «inadvertance» que les droits miniers n'avaient pas été réservés. En 1952, les anciens combattants ont conclu une convention de mise en commun relativement aux droits miniers. En 1976, on a découvert du pétrole et du gaz. Le revenu tiré de cette découverte (montant indéterminé en l'espèce, mais que le juge de première instance a évalué à environ 300 millions de dollars) est allé aux anciens combattants ou à leurs ayants droit.

29

In 1977, the Band was divided into the Blueberry River Band and the Doig River Band (the "Bands"). In the same year, a concerned officer of the DIA was moved to inquire into how the Band had lost the mineral rights. He brought the matter to the attention of the Bands and took them to see a lawyer. On September 18, 1978 the writ commencing these proceedings was filed. The Bands claimed damages against the Crown for allowing the Band to make an improvident surrender of the reserve, and once surrendered, for disposing of it under value. They also claimed damages for permitting the transfer of the mineral rights to the DVLA and thence to the veterans.

En 1977, la bande s'est scindée en deux: la bande indienne de la rivière Blueberry et la bande indienne de la rivière Doig (les «bandes»). La même année, un fonctionnaire du MAI qui s'intéressait à la question a décidé d'enquêter sur la façon dont la bande avait perdu les droits miniers. Il a porté la question à l'attention des bandes et les a emmenées consulter un avocat. Le bref introduisant la présente instance a été déposé le 18 septembre 1978. Les bandes y réclamaient des dommages-intérêts contre la Couronne, lui reprochant d'une part d'avoir autorisé la bande à faire une cession inconsidérée de la réserve et, une fois la cession réalisée, d'avoir aliéné celle-ci à un prix inférieur à sa valeur, et d'autre part d'avoir permis le transfert des droits miniers, d'abord au DTAC puis aux anciens combattants.

Addy J. at trial dismissed all the Bands' claims except for the sale of the surface rights to the DVLA, which he found to be under value: [1988] 3 F.C. 20 (abridged version), 14 F.T.R. 161, [1988] 1 C.N.L.R. 73. The majority of the Federal Court of Appeal, Isaac C.J. dissenting, dismissed the appeal and the Crown's cross-appeal: [1993] 3 F.C. 28, 100 D.L.R. (4th) 504, 151 N.R. 241, [1993] 2 C.N.L.R. 20. The Bands appeal to this Court, and the Crown cross-appeals on the issue of sale under value.

The appeal raises many issues relating to the duties on the Crown, the alleged breaches of those duties and whether the claims are statute-barred. I propose to consider them under the following headings: (1) Pre-surrender duties and breaches; (2) Post-surrender duties and breaches regarding surface rights; (3) Post-surrender duties and breaches regarding mineral rights; and (4) Limitations issues.

II. Analysis

(1) *Pre-surrender Duties and Breaches*

The Bands argue that the Crown was under a fiduciary obligation prior to the 1945 surrender of the land to ensure that the Band did not enter into the surrender improvidently. This raises the issue of the nature of the duty owed by the Crown when a band wishes to surrender its reserve. The Bands admit that in 1945 they wished to surrender the Fort St. John reserve in order to obtain other lands closer to its trap lines, and the remaining cash lump sum. They contend that the Crown should not have allowed them to make this surrender since, viewed in the long term, surrender was not in their best interest.

Au procès, le juge Addy a rejeté toutes les réclamations des bandes sauf celle concernant la vente des droits de superficie au DTAC, droits qui, a-t-il conclu, avaient été vendus à un prix inférieur à leur valeur réelle: [1988] 3 C.F. 20 (version abrégée), 14 F.T.R. 161, [1988] 1 C.N.L.R. 73. La Cour d'appel fédérale a, à la majorité, le juge en chef Isaac étant dissident, rejeté l'appel ainsi que l'appel incident de la Couronne: [1993] 3 C.F. 28, 100 D.L.R. (4th) 504, 151 N.R. 241, [1993] 2 C.N.L.R. 20. Les bandes se pourvoient auprès de notre Cour, et la Couronne interjette un pourvoi incident sur la question de la vente des droits de superficie à un prix inférieur à leur valeur réelle.

Le pourvoi soulève de nombreuses questions en ce qui a trait aux obligations de la Couronne, aux prétendus manquements à ces obligations et au fait de savoir si les réclamations sont prescrites. Je me propose d'examiner ces questions sous les rubriques suivantes: (1) les obligations antérieures à la cession et les manquements à ces obligations; (2) les obligations relatives aux droits de superficie et postérieures à la cession, et les manquements à ces obligations; (3) les obligations relatives aux droits miniers et postérieures à la cession, et les manquements à ces obligations; (4) les questions relatives à la prescription des réclamations.

II. Analyse

(1) *Les obligations antérieures à la cession et les manquements à ces obligations*

Les bandes prétendent que, avant la cession des terres en 1945, la Couronne avait l'obligation de fiduciaire de s'assurer que la bande ne conclue pas de cession inconsidérée. Cet argument soulève la question de la nature de l'obligation qui incombe à la Couronne lorsqu'une bande désire céder sa réserve. Les bandes admettent que, en 1945, elles désiraient céder la réserve de Fort St. John afin d'obtenir d'autres terres situées plus près de leurs sentiers de piégeage ainsi qu'une somme forfaitaire pour le solde du prix de vente. Elles affirment toutefois que la Couronne n'aurait pas dû leur permettre de faire cette cession puisque, à long terme, celle-ci n'était pas dans leur intérêt.

30

1995 CanLII 50 (SCC)

31

32

(a) Whether the *Indian Act* Imposed a Duty on the Crown to Prevent the Surrender of the Reserve

33

The first issue is whether the *Indian Act* imposed a duty on the Crown to refuse the Band's surrender of its reserve. The answer to this question is found in *Guerin v. The Queen*, [1984] 2 S.C.R. 335, where the majority of this Court, *per* Dickson J. (as he then was), held that the duty on the Crown with respect to surrender of Indian lands was founded on preventing exploitative bargains.

34

The Bands contend that the *Indian Act* imposed a duty on the Crown to refuse to allow the Band to surrender its lands in light of its interest in the land and the paternalistic scheme of the *Indian Act*. When a reserve is granted to a band, as was done here in 1916, title does not pass to the band. Rather the Crown holds the fee simple title. The Crown thus possesses power with respect to those lands and must, it is argued, exercise that power as a fiduciary on behalf of the band. This is reinforced by the paternalistic tone of the *Indian Act*, which it is argued imposes a duty upon the Crown to protect the Indians from themselves and prevent them from making foolish decisions with respect to their land. This is why, it is submitted, title remains in the Crown. The Crown, on the other hand, paints the Band as an independent agent with respect to the surrender of its lands.

35

My view is that the *Indian Act*'s provisions for surrender of band reserves strikes a balance between the two extremes of autonomy and protection. The band's consent was required to surrender its reserve. Without that consent the reserve could not be sold. But the Crown, through the Governor in Council, was also required to consent to the surrender. The purpose of the requirement of Crown consent was not to substitute the Crown's decision

a) La *Loi des Indiens* imposait-elle à la Couronne l'obligation d'empêcher la cession de la réserve?

Il s'agit d'abord de déterminer si la *Loi des Indiens* imposait à la Couronne l'obligation de refuser que la bande cède sa réserve. La réponse à cette question se trouve dans l'arrêt *Guerin c. La Reine*, [1984] 2 R.C.S. 335, où le juge Dickson (plus tard Juge en chef du Canada) a statué, au nom des juges de la majorité de la Cour, que le fondement de l'obligation de la Couronne relativement à la cession des terres des Indiens était la prévention des marchés abusifs.

Les bandes prétendent que la *Loi des Indiens* imposait à la Couronne l'obligation de refuser à la bande l'autorisation de céder ses terres, vu la nature de l'intérêt de la bande sur les terres et le caractère paternaliste du régime établi par la *Loi des Indiens*. Lorsqu'une réserve est accordée à une bande, comme ce fut le cas en l'espèce en 1916, le titre n'est pas transmis à la bande visée, mais c'est plutôt la Couronne qui détient le titre en fief simple. La Couronne est donc investie de certains pouvoirs à l'égard de ces terres et elle doit, fait-on valoir, les exercer en qualité de fiduciaire, pour le compte de la bande concernée. Ce fait est renforcé par le ton paternaliste de la *Loi des Indiens*, qui, allègue-t-on, impose à la Couronne l'obligation de protéger les Indiens contre eux-mêmes et de les empêcher de prendre des décisions imprudentes relativement à leurs terres. Voilà pourquoi, prétend-on, la Couronne conserve le titre de propriété. Cette dernière, quant à elle, décrit la bande comme un acteur indépendant pour ce qui est de la cession de ses terres.

À mon avis, les dispositions de la *Loi des Indiens* relatives à la cession des réserves des bandes établissent un équilibre entre les deux pôles extrêmes que constituent l'autonomie et la protection. Il fallait que la bande visée consente à la cession de sa réserve, à défaut de quoi celle-ci ne pouvait pas être vendue. Par ailleurs, il fallait également que la Couronne, par l'intermédiaire du gouverneur en conseil, consente à la cession. L'exigence que la Couronne consente à la cession n'avait pas pour objet de substituer la décision de

for that of the band, but to prevent exploitation. As Dickson J. characterized it in *Guerin* (at p. 383):

The purpose of this surrender requirement is clearly to interpose the Crown between the Indians and prospective purchasers or lessees of their land, so as to prevent the Indians from being exploited.

It follows that under the *Indian Act*, the Band had the right to decide whether to surrender the reserve, and its decision was to be respected. At the same time, if the Band's decision was foolish or improvident — a decision that constituted exploitation — the Crown could refuse to consent. In short, the Crown's obligation was limited to preventing exploitative bargains.

Subject to the issue of the value of the reserve and the matter of mineral rights, which I deal with later, the evidence does not support the view that the surrender of the Fort St. John reserve was foolish, improvident or amounted to exploitation. In fact, viewed from the perspective of the Band at the time, it made good sense. The measure of control which the Act permitted the Band to exercise over the surrender of the reserve negates the contention that absent exploitation, the Act imposed a fiduciary obligation on the Crown with respect to the surrender of the reserve.

(b) Whether the Circumstances of the Case Gave Rise to a Fiduciary Duty on the Crown with Respect to the Surrender

If the *Indian Act* did not impose a duty on the Crown to block the surrender of the reserve, the further question arises of whether on the particular facts of this case a fiduciary relationship was superimposed on the regime for alienation of Indian lands contemplated by the *Indian Act*.

Generally speaking, a fiduciary obligation arises where one person possesses unilateral power or discretion on a matter affecting a second "peculiarly vulnerable" person: see *Frame v. Smith*, [1987] 2 S.C.R. 99; *Norberg v. Wynrib*, [1992] 2

cette dernière à celle des bandes, mais plutôt d'empêcher que celles-ci se fassent exploiter. Le juge Dickson a décrit ainsi cette exigence dans *Guerin* (à la p. 383):

Cette exigence d'une cession vise manifestement à interposer Sa Majesté entre les Indiens et tout acheteur ou locataire éventuel de leurs terres, de manière à empêcher que les Indiens se fassent exploiter.

Il s'ensuit que, en vertu de la *Loi des Indiens*, les bandes avaient le droit de décider si elles voulaient céder leur réserve, et que leur décision devait être respectée. Par ailleurs, si la décision de la bande concernée était imprudente ou inconsidérée — et équivalait à de l'exploitation — la Couronne pouvait refuser son consentement. Bref, l'obligation de la Couronne se limitait à prévenir les marchés abusifs.

Sous réserve de la question de la valeur de la réserve et de la question des droits miniers, que j'examine plus loin, la preuve n'étaye pas l'argument que la cession de la réserve de Fort St. John était imprudente ou inconsidérée, ou qu'elle équivalait à de l'exploitation. De fait, du point de vue de la bande, à l'époque, cette décision se défendait. L'étendue du contrôle que la Loi permettait à la bande d'exercer sur la cession de la réserve réfute l'argument que, en l'absence d'exploitation, la Loi imposait une obligation de fiduciaire à la Couronne relativement à la cession de la réserve.

(b) Les circonstances de l'espèce ont-elles donné naissance à une obligation de fiduciaire de la Couronne à l'égard de la cession?

Si la *Loi des Indiens* n'imposait pas à la Couronne l'obligation de bloquer la cession de la réserve, se pose alors la question de savoir si, compte tenu des faits particuliers de l'espèce, des rapports de fiduciaire ne venaient pas s'ajouter au régime d'aliénation des terres indiennes établi par la *Loi des Indiens*.

En règle générale, une obligation de fiduciaire prend naissance lorsqu'une personne possède un pouvoir unilatéral ou discrétionnaire à l'égard d'une question touchant une autre personne «particulièrement vulnérable»: voir *Frame c. Smith*,

S.C.R. 226; and *Hodgkinson v. Simms*, [1994] 3 S.C.R. 377. The vulnerable party is in the power of the party possessing the power or discretion, who is in turn obligated to exercise that power or discretion solely for the benefit of the vulnerable party. A person cedes (or more often finds himself in the situation where someone else has ceded for him) his power over a matter to another person. The person who has ceded power trusts the person to whom power is ceded to exercise the power with loyalty and care. This is the notion at the heart of the fiduciary obligation.

[1987] 2 R.C.S. 99; *Norberg c. Wynrib*, [1992] 2 R.C.S. 226, et *Hodgkinson c. Simms*, [1994] 3 R.C.S. 377. La partie vulnérable est tributaire de la partie qui possède le pouvoir unilatéral ou discrétionnaire, qui, à son tour, est obligée d'exercer ce pouvoir uniquement au profit de la partie vulnérable. La personne qui cède (ou, plus souvent, qui se trouve dans la situation où quelqu'un d'autre a cédé pour elle) son pouvoir sur quelque chose à une autre personne escompte que la personne à qui le pouvoir en question est cédé l'exercera avec loyauté et diligence. Cette notion est la pierre d'assise de l'obligation de fiduciaire.

The evidence supports the view that the Band trusted the Crown to provide it with information as to its options and their foreseeable consequences, in relation to the surrender of the Fort St. John reserve and the acquisition of new reserves which would better suit its life of trapping and hunting. It does not support the contention that the Band abnegated or entrusted its power of decision over the surrender of the reserve to the Crown, as attested by the following findings of Addy J. (at pp. 66-67 F.C.):

Il ressort de la preuve que la bande escomptait que la Couronne la renseignerait sur les diverses solutions qui s'offraient à elle — et sur les conséquences prévisibles de ces solutions — relativement à la cession de la réserve de Fort St. John et à l'acquisition de nouvelles terres qui conviendraient mieux à son mode de vie fondé sur le piégeage et la chasse. Comme l'attestent les conclusions suivantes du juge Addy (aux pp. 66 et 67 C.F.), la preuve n'étaye pas la prétention que la bande avait renoncé à son pouvoir de décision quant à la cession de la réserve ou qu'elle s'en était remis à la Couronne à cet égard:

1. That the plaintiffs had known for some considerable time that an absolute surrender of I.R. 172 was being contemplated;
2. That they had discussed the matter previously on at least three formal meetings where representatives of the Department were present;
3. That, contrary to what has been claimed by the plaintiffs, it would be nothing short of ludicrous to conclude that the Indians would not also have discussed it between themselves on many occasions in an informal manner, in their various family and hunting groups;
4. That, at the surrender meeting itself, the matter was fully discussed both between the Indians and with the departmental representatives previous to the signing of the actual surrender;
5. That [Crown representatives had not] attempted to influence the plaintiffs either previously or during the surrender meeting but that, on the contrary, the matter appears to have been dealt with most conscientiously by the departmental representatives concerned;

1. Les demandeurs savaient depuis longtemps qu'une cession absolue de la R.I. 172 était envisagée;
2. Ils en avaient discuté auparavant au moins à trois reprises à l'occasion d'assemblées officielles tenues en présence de représentants du Ministère;
3. Contrairement à ce que prétendent les demandeurs, il serait absurde de conclure que les Indiens n'auraient pas débattu la question entre eux à de nombreuses occasions et de façon informelle au sein des groupes familiaux et des groupes de chasse;
4. À l'assemblée de la cession elle-même, la question avait fait l'objet d'un débat complet. Les Indiens en avaient discuté entre eux et avec les représentants du Ministère avant la signature de l'acte de cession;
5. [Les représentants de la Couronne n'avaient pas] essayé d'influencer les demandeurs soit avant, soit pendant l'assemblée de la cession. Au contraire, la question semble avoir été résolue de façon très consciencieuse par les représentants du Ministère concernés;

6. That Mr. Grew [the local Indian agent] fully explained to the Indians the consequences of a surrender;

7. That, although they would not have understood and probably would have been incapable of understanding the precise nature of the legal interest they were surrendering, they did in fact understand that by the surrender they were giving up forever all rights to I.R. 172, in return for the money which would be deposited to their credit once the reserve was sold and with their being furnished with alternate sites near their trapping lines to be purchased from the proceeds;

8. That the said alternate sites had already been chosen by them, after mature consideration.

I conclude that the evidence does not support the existence of a fiduciary duty on the Crown prior to the surrender of the reserve by the Band.

(c) Whether the Surrender Was Invalid for Failure to Comply with Section 51 of the *Indian Act*

Section 51(1) of the 1927 *Indian Act* indicates that no surrender shall be valid unless the surrender is assented to by the majority of male members of the band at a meeting summoned for the purpose. Subsections (3) and (4) then provide:

3. The fact that such release or surrender has been assented to by the band at such council or meeting shall be certified on oath by the Superintendent General, or by the officer authorized by him to attend such council or meeting, and by some of the chiefs or principal men present thereat and entitled to vote, before any person having authority to take affidavits and having jurisdiction within the place where the oath is administered.

4. When such assent has been so certified, as aforesaid, such release or surrender shall be submitted to the Governor in Council for acceptance or refusal.

These subsections were not complied with in obtaining the 1945 surrender from the Band. The non-compliance was technical. The chiefs should have personally certified the surrender on oath. Instead, they told the commissioner that they

6. M. Grew [l'agent des Indiens pour l'endroit] avait expliqué aux Indiens toutes les conséquences d'une cession;

7. Même s'ils n'ont pas saisi exactement la nature du droit, en *common law*, qu'ils cédaient, ils en étaient probablement incapables, ils ont bel et bien compris, dans les faits, que par la cession ils renonçaient pour toujours à tous leurs droits sur la R.I. 172 en échange de l'argent qui serait versé à leur crédit après la vente de la réserve, et d'autres terrains situés près de leurs sentiers de piégeage qui seraient achetés avec le produit de la vente;

8. Lesdits terrains avaient déjà été choisis par les Indiens, après mûre réflexion.

Je conclus que la preuve n'appuie pas l'existence d'une obligation de fiduciaire qui aurait incombé à la Couronne avant la cession de la réserve par la bande.

c) La cession était-elle invalide en raison de l'inobservation de l'art. 51 de la *Loi des Indiens*?

Aux termes du par. 51(1) de la *Loi des Indiens* de 1927, une cession n'est valide que si elle a été ratifiée par la majorité des hommes de la bande à une assemblée convoquée pour en délibérer. Les paragraphes (3) et (4) sont ainsi rédigés:

3. Le fait que la cession ou rétrocession a été consentie par la bande, à ce conseil ou à cette assemblée, doit être attesté sous serment par le surintendant général ou par le fonctionnaire qu'il a autorisé à assister à ce conseil ou à cette assemblée, et par l'un des chefs ou des anciens qui y a assisté et y a droit de vote, devant toute personne autorisée à faire prêter serment et ayant juridiction dans l'endroit où le serment est prêté.

4. Après que ce consentement a été ainsi attesté, comme susdit, la cession ou rétrocession est soumise au gouverneur en son conseil, pour qu'il l'accepte ou la refuse.

On ne s'est pas conformé à ces paragraphes pour obtenir de la bande la cession de 1945. Il ne s'est agi là, toutefois, que d'un simple vice de forme. En effet, les chefs auraient dû attester personnellement, sous serment, qu'ils consentaient à la ces-

wished to surrender, which the commissioner certified on oath.

sion. Au lieu de cela, ils ont plutôt dit au commissaire qu'ils désiraient céder la réserve, et c'est ce dernier qui a attesté ce fait sous serment.

42 This raises the question of whether the ss. 51(3) and 51(4) are mandatory or merely directory. Addy J. and Stone J.A. below held that despite the use of the word "shall", the provisions were directory rather than mandatory, relying on *Montreal Street Railway Co. v. Normandin*, [1917] A.C. 170 (P.C.), which summarized the factors relevant to determining whether a statutory direction is mandatory or directory as follows (at p. 175):

Cela soulève la question de savoir si les par. 51(3) et (4) ont un caractère soit impératif, soit simplement supplétif ou directif. Le juge Addy de la Section de première instance de la Cour fédérale et le juge Stone de la Cour d'appel fédérale ont statué que malgré l'utilisation du mot *shall* («doit» ou l'indicatif présent, selon le cas, dans le texte français) les dispositions avaient un caractère supplétif et non pas impératif, appuyant leur conclusion sur l'arrêt *Montreal Street Railway Co. c. Normandin*, [1917] A.C. 170 (C.P.), dans lequel on a résumé ainsi (à la p. 175) les facteurs servant à déterminer si une directive contenue dans une disposition législative a un caractère soit impératif, soit supplétif ou directif:

When the provisions of a statute relate to the performance of a public duty and the case is such that to hold null and void acts done in neglect of this duty would work serious general inconvenience, or injustice to persons who have no control over those entrusted with the duty, and at the same time would not promote the main object of the Legislature, it has been the practice to hold such provisions to be directory only

[TRADUCTION] Lorsque les dispositions d'une loi se rapportent à l'exécution d'un devoir public et que, dans un cas donné, déclarer nuls et non avenue des actes accomplis par manquement à ce devoir entraînerait, pour des personnes qui n'ont aucun contrôle sur ceux chargés de ce devoir, une injustice ou des inconvénients généraux graves, et en même temps n'aiderait pas à atteindre l'objet principal visé par le législateur, on conclut habituellement que ces dispositions ne sont que directives

Addy J. concluded that to read the provisions in a mandatory way would not promote the main object of the legislation, which is to ensure that the sale of the reserve is made pursuant to the wishes of the Band. Stone J.A. agreed. This Court has since held that the object of the statute, and the effect of ruling one way or the other, are the most important considerations in determining whether a directive is mandatory or directory: *British Columbia (Attorney General) v. Canada (Attorney General)*, [1994] 2 S.C.R. 41.

Le juge Addy a conclu que le fait de reconnaître à ces dispositions un caractère impératif ne favoriserait pas la réalisation de l'objet principal de la loi, qui est de faire en sorte que la vente de la réserve se fasse selon les désirs de la bande. Le juge Stone a souscrit à cette conclusion. Depuis, notre Cour a jugé que l'objet de la loi ainsi que la conséquence d'une décision dans un sens ou dans l'autre sont les considérations les plus importantes pour déterminer si une directive a un caractère impératif ou directif: *Colombie-Britannique (Procureur général) c. Canada (Procureur général)*, [1994] 2 R.C.S. 41.

43 The true object of ss. 51(3) and 51(4) of the *Indian Act* was to ensure that the surrender was validly assented to by the Band. The evidence, including the voter's list, in the possession of the DIA amply established valid assent. Moreover, to read the provisions as mandatory would work seri-

L'objet véritable des par. 51(3) et (4) de la *Loi des Indiens* était de faire en sorte que le consentement de la bande à la cession soit valide. Les éléments de preuve en la possession du MAI, notamment la liste des personnes ayant participé au vote, établissaient amplement l'existence d'un consente-

ous inconvenience, not only where the surrender is later challenged, but in any case where the provision was not fulfilled, as the Band would have to go through the process again of holding a meeting, assenting to the surrender, and then certifying the assent. I therefore agree with the conclusion of the courts below that the “shall” in the provisions should not be considered mandatory. Failure to comply with s. 51 of the *Indian Act* therefore does not defeat the surrender.

(d) Conclusions on Pre-surrender Duty and Breach

I conclude that the Bands have not established that the Crown wrongly failed to prevent the surrender of the Fort St. John reserve in 1945.

(2) *Post-surrender Duties and Breaches Regarding Surface Rights*

The 1945 surrender conveyed the Band’s lands to the Crown “in trust to sell or lease the same to such person or persons, and upon such terms as the Government of the Dominion of Canada may deem most conducive to our Welfare and that of our people” (emphasis added). The Crown concedes that this surrender imposed a fiduciary duty on the Crown with respect to the subsequent sale or lease of the lands: *Guerin, supra*. The only issue is whether the Crown breached that duty when in 1948 it sold the lands to the DVLA for \$70,000.

The duty imposed upon the Crown by the terms of surrender (converted to a statutory duty by s. 54 of the Act) was broad. It extended not only to the monetary aspects of the transaction, but to whether the arrangement would be conducive to the welfare of the Indians in the broader sense. The Bands

ment valide. De plus, interpréter ces dispositions comme étant impératives entraînerait de graves inconvénients, non seulement dans le cas où la cession est contestée plus tard, mais également dans tous ceux où on ne s’est pas conformé à la disposition, car il faudrait alors que la bande tienne une nouvelle assemblée, consente à la cession et atteste ce consentement. Je suis donc d’accord avec la conclusion des tribunaux inférieurs que le mot «shall» («doit» ou l’indicatif présent, selon le cas, dans le texte français) utilisé dans les dispositions en cause ne devrait pas être considéré comme ayant un sens impératif. L’inobservation de l’art. 51 de la *Loi des Indiens* n’invalide donc pas la cession.

d) Les conclusions relatives à l’existence d’une obligation avant la cession et au manquement à cette obligation

Je conclus que les bandes n’ont pas établi que la Couronne a eu tort de ne pas empêcher la cession de la réserve de Fort St. John en 1945.

(2) *Les obligations relatives aux droits de superficie et postérieures à la cession, et les manquements à ces obligations*

La cession de 1945 a eu pour effet de transférer les terres de la bande à la Couronne [TRADUCTION] «en fiducie aux fins de vendre ou de louer lesdites terres à une ou plusieurs personnes et selon les conditions que le gouvernement du Canada peut juger les plus appropriées pour assurer notre bien-être et celui de notre peuple» (je souligne). La Couronne admet que cette cession lui a imposé une obligation de fiduciaire en ce qui concerne la vente ou la location subséquentes des terres visées: *Guerin*, précité. La seule question qui se pose est de déterminer si la Couronne a manqué à cette obligation lorsque, en 1948, elle a vendu les terres au DTAC pour la somme de 70 000 \$.

L’obligation imposée à la Couronne par les conditions de la cession (obligation qui est devenue une obligation légale par l’effet de l’art. 54 de la Loi) était considérable. Elle visait non seulement les aspects financiers de l’opération, mais également la question de savoir si l’entente assurerait,

argue that the Crown breached this duty by: (a) failing to consider leasing rather than selling the land; (b) selling the land under value; and (c) not restoring the reserve to the Band after surrender in view of its impoverished situation. I will consider each allegation in turn.

(a) Failure to Consider Leasing Rather than Sale of the Surface Rights

The trial judge held that the Crown considered the best interests of the Band in disposing of the land and that, viewed from the perspective of the time, the sale of the land to the Department of Veterans Affairs was in fact in the best interests of the Band. He held that the Band was interested in obtaining reserves nearer to its hunting and trapping grounds. If the surface rights had been leased rather than sold, the Band might not have had enough money up front to purchase replacement lands.

Against this, the Bands point to policy statements of the DIA in the early 1940's which suggest that the DIA would have preferred to lease unused Indian interests rather than sell them, so that the land would be available for use by the Indians and their descendants in the future. The Bands claim that the DIA failed to follow its own policy. The Bands also rely on the fact that the Director of Indian Affairs, Dr. McGill, wrote to the Deputy Minister in August 1944, strongly advising against the sale of the lands and suggesting that the annoyance of seeing good agricultural land unused could be assuaged by leasing it to suitable tenants, if available.

The evidence is clear that the government's general policy was against selling Indian lands. The evidence is also clear that a debate took place over whether the Fort St. John reserve, which the Crown now held upon trust for the Indians, should be sold. In the end, the initial inclination of the

au sens large du terme, le bien-être des Indiens. Les bandes prétendent que la Couronne a manqué à cette obligation: a) en n'envisageant pas de louer les terres plutôt que de les vendre; b) en vendant les terres à un prix inférieur à leur valeur; c) en ne remettant pas la réserve à la bande, après la cession, vu l'état d'appauvrissement dans lequel se trouvait la bande. Je vais examiner chacune de ces allégations à tour de rôle.

a) L'omission d'envisager la location des droits de superficie plutôt que leur vente

Le juge de première instance a conclu que la Couronne a tenu compte de l'intérêt de la bande en aliénant les terres et que, avec le recul du temps, la vente des terres au ministère des Affaires des anciens combattants était effectivement dans l'intérêt de la bande. Il a jugé que cette dernière était intéressée à obtenir des terres situées plus près de ses territoires de chasse et de piégeage. Si les droits de superficie avaient été loués plutôt que vendus, la bande n'aurait peut-être pas eu, sur le coup, suffisamment d'argent pour acheter des terres de remplacement.

À l'encontre de ce point, les bandes renvoient aux énoncés de politique du MAI du début des années 1940, énoncés qui tendent à indiquer que le MAI préférerait louer les intérêts fonciers non utilisés des Indiens plutôt que de les vendre, de sorte que les Indiens et leurs descendants disposent, dans le futur, de terres qu'ils pourraient utiliser. Les bandes prétendent que le MAI n'a pas suivi sa propre politique. Elles invoquent également le fait que le directeur des Affaires indiennes, M. McGill, a écrit au sous-ministre, en août 1944, et lui a fortement déconseillé de vendre les terres, tout en lui indiquant qu'il était possible d'apaiser le mécontentement que causait le fait que de bonnes terres agricoles n'étaient pas utilisées en louant ces terres à des occupants convenables, s'il s'en trouvait.

Il ressort clairement de la preuve que la politique générale du gouvernement était de ne pas vendre les terres des Indiens. La preuve indique aussi de façon claire que des discussions ont eu lieu afin de décider si la réserve de Fort St. John, que la Couronne détenait alors en fiducie pour les

1999 CanLII 50 (2CC)

DIA not to sell the reserve was outweighed by two factors: the desire of the Band to get money for the purchase of substitute lands nearer their trap lines; coupled with political pressure for release of the lands for agricultural purposes. Dr. McGill pointed out that although the Band did not use the reserve for agriculture, it might be compelled to use it in the future due to dwindling fur supplies. The Deputy Minister responded that he agreed that any suggestion to dispose of Indian lands "should be most carefully considered before any final decision is reached", and wrote to the Canadian Legion (interested in acquiring the land for veterans) suggesting an alternative plan in which only a portion of the reserve would be sold. A non-surrender lease, pursuant to s. 93(3) of the 1927 *Indian Act*, was also considered by the Superintendent of Reserves and Trusts in 1945. Throughout this time, the DIA took the view that it should bring no pressure to bear on the Band to promote the sale.

Armed with these instructions, the local agent, Grew, visited the Band. He reported back that the Band was willing to surrender the land for sale or lease provided that they would be supplied with other lands, nearer their trap lines. He also suggested that it was unlikely that the Band would ever make use of the reserve for farming, as they were trappers. The Director of Indian affairs (then a Mr. Hoey) wrote back that in addition to political pressure to open the lands for "ordinary settlement", the cash received as a result of the sale would be "for many years of more practical value to the Indians" than the land of the reserve. Once Dr. McGill left office, the general policy of maintaining the Fort St. John reserve for the Band appears to have succumbed to political demands for farm land. This, coupled with the apparent desire of the Band to exchange their more southern

Indiens, devait être vendue. En fin de compte, deux facteurs ont amené le MAI à changer son idée première, qui était de ne pas vendre la réserve: le désir de la bande d'obtenir de l'argent pour acheter des terres de remplacement situées plus près de ses sentiers de piégeage, et les pressions politiques qui étaient exercées en vue de la cession des terres à des fins agricoles. Monsieur McGill a signalé que, même si la bande n'utilisait pas la réserve à de telles fins, elle pourrait être contrainte de le faire dans le futur en raison de la diminution des populations d'animaux à fourrure. Le sous-ministre a répondu qu'il était d'accord que toute proposition de vente de terres indiennes [TRADUCTION] «devrait être étudiée très attentivement avant qu'une décision définitive soit prise», et il a écrit à la Légion canadienne (qui était intéressée à acquérir les terres pour les anciens combattants) et proposé une solution de rechange, soit la vente d'une partie seulement de la réserve. Le surintendant des réserves et des fidéicommissaires a également envisagé, en 1945, la possibilité d'affermier les terres, sans qu'il y ait eu rétrocession, en vertu du par. 93(3) de la *Loi des Indiens* de 1927. Pendant toute cette période, le MAI a jugé bon de ne pas exercer de pressions sur la bande en vue de l'inciter à vendre les terres.

Muni de ces instructions, Grew, l'agent des Indiens pour l'endroit, a rendu visite à la bande. Dans son rapport, il a relaté que celle-ci désirait céder les terres afin qu'elles soient vendues ou louées, pourvu qu'on lui en fournisse d'autres situées plus près de ses sentiers de piégeage. Il a également affirmé qu'il était peu probable que la bande se serve jamais de la réserve à des fins agricoles, car ses membres étaient des trappeurs. Le directeur des Affaires indiennes (à l'époque un certain M. Hoey) a répondu que, outre le fait que des pressions politiques étaient exercées pour que l'on ouvre ces terres à la [TRADUCTION] «colonisation ordinaire», le produit de la vente serait «pendant bon nombre d'années plus utile aux Indiens» que les terres de la réserve. Après que M. McGill eut quitté son poste, la politique générale, qui était de conserver la réserve de Fort St. John pour la bande, semble avoir cédé le pas aux demandes insistantes qui étaient formulées, sur le plan poli-

reserve for other lands nearer their trap lines, resulted in the sale of the land to the DVLA.

tique, en vue d'obtenir des terres agricoles. Ce fait, conjugué au désir manifeste de la bande d'échanger sa réserve qui se trouvait plus au sud pour d'autres terres situées plus près de ses sentiers de piégeage, a entraîné la vente des terres visées au DTAC.

51

In the face of this evidence, it cannot be said that Addy J. erred in concluding that the sale of the land to the DVLA was not in breach of the Crown's fiduciary duty. A number of options — lease, partial sale and outright sale — were considered. The interests and wishes of the Band were given utmost consideration throughout. The choice that was made — to sell the land — possessed the advantage of allowing the Band to get other lands nearer its trap lines. At the time, that was a defensible choice. Indeed, it can be argued that the sale of the surface rights was the only alternative that met the Band's apparent need to obtain land nearer its trap lines. In retrospect, with the decline of trapping and the discovery of oil and gas, the decision may be argued to have been unfortunate. But at the time, it may be defended as a reasonable solution to the problems the Band faced.

À la lumière de ces éléments de preuve, il est impossible d'affirmer que le juge Addy a fait erreur en concluant que la vente des terres au DTAC ne constituait pas un manquement par la Couronne à son obligation de fiduciaire. Un certain nombre de possibilités — location, vente partielle et vente en bloc — ont été envisagées. On a accordé la plus grande attention aux intérêts et aux désirs des Indiens avant de décider. La solution retenue — en l'occurrence la vente des terres — avait l'avantage de permettre à la bande d'obtenir d'autres terres situées plus près de ses sentiers de piégeage. À l'époque, il s'agissait d'un choix défendable. De fait, on peut prétendre que la vente des droits de superficie était la seule solution qui répondait au besoin manifeste de la bande d'obtenir des terres plus près de ses sentiers de piégeage. Avec le recul du temps, compte tenu du déclin du piégeage et de la découverte de pétrole et de gaz, il est possible d'affirmer que la vente des terres s'est révélée une décision malencontreuse. Toutefois, à l'époque, elle pouvait se défendre en tant que solution raisonnable aux problèmes auxquels la bande faisait alors face.

(b) Sale at Undervalue

b) La vente des terres à un prix inférieur à leur valeur

52

The DIA received an appraisal of the land which placed its value at approximately \$93,160. The DVLA's appraisals suggested a lower value. Ultimately, the DIA sold the land to the DVLA *en bloc* for \$70,000. The trial judge accepted the Bands' contention that the Crown breached its fiduciary duty by selling the land under value, since it sold at less than value suggested by its appraisers. He stated (at p. 76 F.C.):

Le MAI avait reçu une évaluation fixant la valeur des terres à approximativement 93 160 \$, alors que les évaluations du DTAC suggéraient une valeur moindre. En fin de compte, le MAI a vendu les terres en bloc au DTAC pour 70 000 \$. Le juge de première instance a retenu l'argument des bandes que la Couronne a manqué à son obligation de fiduciaire en vendant les terres à un prix inférieur à leur valeur, puisqu'elle les a vendues à un prix inférieur à la valeur suggérée par ses évaluateurs. Il a déclaré ceci (à la p. 76 C.F.):

The defendant had a duty to convince the Court that it could not reasonably have been expected to obtain a bet-

Il incombait à la défenderesse de convaincre la Cour qu'elle ne pouvait raisonnablement s'attendre à obtenir

ter price. There was no evidence as to what other offers were sought and what efforts were made to obtain a better price elsewhere. Since the onus of establishing that a full and fair price was in fact obtained in March 1948 has not been discharged by the defendant, I find that the latter was guilty of a breach of its fiduciary duty towards the plaintiffs in that regard.

The Crown appeals this finding, arguing first that the onus was on the Bands to show that the sale was under value, and second, that the price of \$70,000 was unreasonable.

The trial judge was correct in finding that a fiduciary involved in self-dealing, i.e. in a conflict of interest, bears the onus of demonstrating that its personal interest did not benefit from its fiduciary powers: J. C. Shepherd, *The Law of Fiduciaries* (1981), at pp. 157-59; and A. H. Oosterhoff: *Text, Commentary and Cases on Trusts* (4th ed. 1992). The Crown, facing conflicting political pressures in favour of preserving the land for the Band on the one hand, and making it available for distribution to veterans on the other, may be argued to have been in a position of conflict of interest.

More problematic is the trial judge's conclusion that the Crown failed to discharge the onus of showing the price of \$70,000 to be reasonable. While the DIA received a higher appraisal, there were also appraisals giving lower value to the land. In fact, there appears to have been no alternate market for the land at the time, which might be expected to make accurate appraisal difficult. The evidence reveals the price was arrived at after a course of negotiations conducted at arm's length between the DIA and the DVLA.

This evidence does not appear to support the trial judge's conclusion that the Crown was in breach of its fiduciary obligation to sell the land at a fair value. In finding a breach despite this evi-

un meilleur prix. Aucune preuve n'a été présentée pour établir que d'autres offres avaient été recherchées ni pour montrer que des efforts avaient été faits pour obtenir un meilleur prix ailleurs. Comme la défenderesse ne s'est pas acquittée du fardeau d'établir qu'un prix équitable avait en réalité été obtenu en mars 1948, je conclus qu'elle a manqué sur ce point à ses obligations de fiduciaire à l'égard des demandeurs.

La Couronne se pourvoit contre cette conclusion et prétend, dans un premier temps, qu'il incombait aux bandes de prouver que les terres avaient été vendues à un prix inférieur à leur valeur, et, dans un deuxième temps, que le prix de 70 000 \$ était déraisonnable.

Le juge de première instance a eu raison de conclure que le fiduciaire qui participe à une opération intéressée, c'est-à-dire qui est en conflit d'intérêts, a le fardeau de prouver qu'il n'a pas tiré d'avantages personnels de ses pouvoirs de fiduciaire: J. C. Shepherd, *The Law of Fiduciaries* (1981), aux pp. 157 à 159, et A. H. Oosterhoff: *Text, Commentary and Cases on Trusts* (4th ed. 1992). Il est possible de prétendre que la Couronne était en conflit d'intérêts, car elle faisait l'objet de pressions politiques divergentes l'incitant, d'une part, à conserver les terres en cause pour la bande et, d'autre part, à prendre des mesures pour qu'elles puissent être distribuées aux anciens combattants.

La conclusion du juge de première instance que la Couronne ne s'est pas acquittée du fardeau de prouver que le prix de 70 000 \$ était raisonnable soulève cependant plus de problèmes. En effet, même si le MAI avait reçu une évaluation plus élevée, il existait également des évaluations attribuant une valeur moindre aux terres. De fait, il semble qu'il n'y avait pas d'autre marché pour ces terres à l'époque, ce qui, comme on peut s'y attendre, rendait difficile l'établissement d'une évaluation précise. Il ressort de la preuve que le prix a été fixé au terme de négociations entre le MAI et le DTAC qui se sont déroulées dans des conditions de pleine concurrence.

Cette preuve ne semble pas étayer la conclusion du juge de première instance que la Couronne a manqué à l'obligation de fiduciaire qu'elle avait de vendre les terres à leur juste valeur. En concluant à

dence, the trial judge misconstrued the effect of the onus on the Crown. The Crown adduced evidence showing that the sale price lay within a range established by the appraisals. This raised a *prima facie* case that the sale price was reasonable. The onus then shifted to the Bands to show it was unreasonable. The Bands did not adduce such evidence. On this state of the record, a presumption of breach of the Crown's fiduciary duty to exact a fair price cannot be based on a failure to discharge the onus upon it. I note that the trial judge made no finding as to the true value of the property, nor any finding that it was significantly greater than \$70,000, deferring this to the stage of assessment of damages.

l'existence d'un manquement en dépit de cette preuve, le juge de première instance a mal interprété les effets du fardeau de la preuve qui incombait à la Couronne. Cette dernière a présenté des éléments de preuve indiquant que le prix de vente se situait dans la fourchette établie par les évaluations. Cette preuve a établi, *prima facie*, que le prix de vente était raisonnable. Il y a alors eu déplacement du fardeau de la preuve, et c'est aux bandes qu'il appartenait de prouver que ce prix était déraisonnable. Les bandes n'ont pas apporté cette preuve. Compte tenu de la preuve au dossier sur ce point, une présomption de manquement par la Couronne à son obligation de fiduciaire, qui consistait à obtenir un juste prix, ne peut donc découler d'une omission de la Couronne de s'acquitter du fardeau de la preuve qui lui incombait. Je remarque que le juge de première instance ne s'est pas prononcé sur la valeur réelle du bien-fonds et qu'il n'a pas statué que cette valeur dépassait largement les 70 000 \$, mais qu'il a plutôt reporté l'examen de cette question à l'étape de la détermination des dommages-intérêts.

56 I conclude that the trial judge erred in concluding that the Crown breached its fiduciary duty to the Band by selling the land for \$70,000.

Je conclus que le juge de première instance a commis une erreur en statuant que la Couronne a manqué à son obligation de fiduciaire envers la bande en vendant les terres pour la somme de 70 000 \$.

(c) Failure to Restore the Surface Rights to the Band after the 1945 Surrender

c) L'omission de remettre les droits de superficie à la bande après la cession de 1945

57 The Bands argue that they should have been given their reserve back because of their apparent impoverishment between 1945 and 1961. The Crown, in the Bands' submission, should have realized that the surrender had been a mistake. Instead of confirming the mistake by selling the land to the DVLA, it should have cancelled the surrender and transferred the land back to the Band.

Les bandes font valoir qu'on aurait dû leur remettre leur réserve en raison de l'état d'appauvrissement évident dans lequel elles se trouvaient entre 1945 et 1961. La Couronne, au dire des bandes, aurait dû se rendre compte que la cession avait été une erreur. Au lieu d'exacerber cette erreur en vendant les terres au DTAC, elle aurait dû annuler la cession et remettre les terres à la bande.

58 There can be no doubt that the Band lived in abject poverty and ill-health between 1945 and 1961. The problem the Bands' argument faces is that their condition appears to have been unrelated to possession of the Fort St. John reserve. In fact, the Band did not make significant use of the

Il ne fait aucun doute que, entre 1945 et 1961, la bande vivait dans la misère et que l'état de santé de ses membres était déplorable. Le problème que pose cet argument des bandes est qu'il semble ne pas y avoir de rapport entre leur situation durant cette période et le fait qu'elles ne possédaient pas

reserve from 1916 to 1945, one of the primary reasons behind the move to surrender it and purchase more suitable property. Nor did the Band make much use of the land from 1945 to 1950 when alternative lands were purchased, despite the fact that it was entitled to use the land during this period. Finally, the purchase of new lands in 1950 did not, by the Bands' own admission, alleviate the situation.

Accepting that the Band was living in poverty, one cannot infer that the solution was to cancel the 1945 surrender or refuse to sell the Fort St. John reserve land. The Crown cannot be said to have breached the fiduciary duty it owed the Band after surrender of the Fort St. John reserve by failing to restore the land to the Indians.

(d) Conclusions on Post-surrender Duty and Breach with Respect to Surface Rights

I conclude that the Bands have not established breach of fiduciary duty with respect to the sale of the surface rights.

(3) *Post-surrender Duties and Breaches Regarding Mineral Rights*

The Band surrendered "Petroleum and Natural Gas and the mining rights in connection therewith" in the Fort St. John reserve to the Crown in 1940, "in trust to lease the same to such person or persons, and upon such terms as the Government of Canada may deem most conducive to our welfare and that of our people". Section 54 of the 1927 *Indian Act* required the Crown to hold these lands for the purpose specified in the surrender — for lease for the benefit of the Band. The right to explore for minerals was leased in 1940 for \$1,800. In 1948, by means which to this day remain the subject of debate, the mineral rights were transferred to the DVLA and hence to the veterans who took up the Fort St. John land. When

la réserve de Fort St. John. De fait, la bande n'a pas beaucoup utilisé cette réserve de 1916 à 1945, et ce fait constituait d'ailleurs une des principales raisons de sa décision de la vendre et d'acquérir des terres convenant davantage à ses besoins. La bande ne s'est pas non plus beaucoup servi des terres de la réserve de 1945 à 1950, année au cours de laquelle des terres de remplacement ont été achetées, et ce même si elle avait le droit de les utiliser durant cette période. Enfin, l'achat de nouvelles terres en 1950 n'a pas, de l'aveu même des bandes, amélioré leur sort.

Même en admettant que la bande vivait dans la pauvreté, on ne peut en déduire que la solution était d'annuler la cession de 1945 ou de refuser de vendre les terres de la réserve de Fort St. John. Il est impossible d'affirmer que, après la cession de la réserve de Fort St. John, la Couronne a manqué à son obligation de fiduciaire envers la bande en ne remettant pas ces terres aux Indiens.

d) Les conclusions sur l'obligation relative aux droits de superficie et postérieure à la cession, et le manquement à cette obligation

Je conclus que les bandes n'ont pas prouvé qu'il y a eu manquement à l'obligation de fiduciaire en ce qui concerne la vente des droits de superficie.

(3) *Les obligations relatives aux droits miniers et postérieures à la cession, et les manquements à ces obligations*

La bande a, en 1940, cédé à la Couronne [TRANSDUCTION] «les droits au pétrole et au gaz naturel ainsi que les droits connexes» dans la réserve de Fort St. John [TRANSDUCTION] «en fiducie aux fins de leur location à une ou plusieurs personnes et selon les conditions que le gouvernement du Canada peut juger les plus appropriées pour assurer notre bien-être et celui de notre peuple». Aux termes de l'art. 54 de la *Loi des Indiens* de 1927, la Couronne devait détenir ces terres pour les fins mentionnées dans la cession — c'est-à-dire aux fins de leur location au profit de la bande. Le droit de faire de l'exploration sur ces terres en vue d'y trouver des minéraux a été loué, en 1940, pour la somme de 1 800 \$. En 1948, par une mesure qui, à ce jour,

oil and gas were discovered on the lands in 1976, it was not the Indians, but the veterans and their assigns, who obtained the revenues that flowed from the mineral rights.

demeure litigieuse, les droits miniers ont été transférés au DTAC et ensuite aux anciens combattants qui se sont établis sur les terres de Fort St. John. Lorsqu'on a découvert du pétrole et du gaz sur ces terres en 1976, ce ne sont pas les Indiens mais les anciens combattants et leurs ayants droit qui ont touché les revenus découlant des droits miniers.

To this résumé must be added two additional uncontested facts. First, at the time the mineral rights passed to the DVLA, and hence to the veterans, the Indians were unsophisticated and may not have fully understood the concept of different interests in land and how they might be lost. Second, they were never advised of the transfer of the mineral rights to the DVLA. They discovered it only in 1977, when an employee of the DIA brought to their attention that oil and gas had been discovered on their former lands and queried how the mineral rights had come to be transferred from the Band to the veterans.

Il faut ajouter à ce résumé deux autres faits incontestés. Premièrement, à l'époque où les droits miniers ont été transférés, d'abord au DTAC puis aux anciens combattants, les Indiens n'étaient pas des gens avertis, et il est possible qu'ils n'aient pas bien compris les principes concernant l'existence de droits fonciers distincts et la façon dont de tels droits pouvaient être perdus. Deuxièmement, ils n'ont jamais été informés du transfert des droits miniers au DTAC. Ils ne l'ont découvert qu'en 1977, lorsqu'un employé du MAI les a informés de la découverte de pétrole et de gaz sur leurs anciennes terres et a cherché à savoir comment les droits miniers étaient passés de la bande aux anciens combattants.

The trial judge held that the mineral rights were not severable from the surface rights and consequently passed to the DVLA with the general surrender of the reserve in 1945. He failed to consider whether the earlier surrender of the mineral rights raised special considerations and imposed special obligations on the Crown. He further held that the Crown acted properly with respect to the mineral rights because they were not considered valuable at the time. In my view, he erred on both counts.

Le juge de première instance a conclu que les droits miniers n'étaient pas séparables des droits de superficie et qu'ils avaient par conséquent été transférés au DTAC au moment de la cession générale de la réserve en 1945. Il a toutefois omis de se demander si la cession des droits miniers, survenue précédemment, ne soulevait pas de questions particulières et n'avait pas pour effet d'imposer des obligations spéciales à la Couronne. Le juge a également conclu que la Couronne avait agi correctement pour ce qui est des droits miniers, étant donné que ces droits n'étaient pas considérés comme ayant une grande valeur à l'époque. À mon avis, il a fait erreur dans les deux cas.

(a) The Effect of the 1940 Surrender of Mineral Rights

a) L'effet de la cession des droits miniers en 1940

The duties of the Crown with respect to the surrender of the mineral rights after the 1940 surrender are clear. The mineral rights were conveyed to the Crown in trust to lease for the welfare of the Band. The Crown owed the Band a fiduciary duty with respect to the minerals after the 1940 surrender as a matter of general law: *Guerin, supra*.

Les obligations de la Couronne en ce qui concerne la cession des droits miniers après la cession de 1940 sont claires. Ces droits ont été transportés à la Couronne en fiducie aux fins de leur location pour le bien-être de la bande. La Couronne avait envers la bande, en vertu des règles générales du droit, une obligation de fiduciaire relativement aux

Quite apart from this, the terms of the surrender and the Act, s. 54, make it clear that the Crown took the mineral rights as a fiduciary for the Band on terms which limited the Crown to leasing them for the Band's benefit.

(b) The Effect of the 1945 Surrender on the Mineral Rights

The trial judge found that the mineral rights were surrendered to the DIA by virtue of the general surrender of land in 1945, due to the failure to exclude mineral rights. The matter of the subsequent transfer of the mineral rights to the DVLA appears never to have been considered in any of the discussions between the DIA and the DVLA, and the Band was never advised that its mineral rights would be transferred. The mineral rights were transferred, on the trial judge's view, not because anyone intended them to be transferred, but by reason of the presumption of law that a general conveyance of land passes all interest except those specifically reserved in the deed of transfer.

In my view, this analysis is in error. Prior to 1940, the Band held a right in both the surface rights and the mineral rights of the reserve. The Band surrendered the mineral rights in the reserve to the Crown in 1940. The effect of this was to remove the mineral rights from the reserve. When the Band surrendered its interest in the Fort St. John reserve to the Crown in 1945, it could transfer only those rights in the reserve which it still possessed: *nemo dat quod non habet* — a person cannot give what he does not possess. The 1945 surrender could not therefore have included surrender of the Band's reserve rights over the minerals. Rather, it involved only the surrender of those rights which still belonged to the Band to surrender, namely the surface rights. The minerals remained in the Crown and the Crown remained bound by the terms of the 1940 surrender, even after the 1945 surrender of the Indian's remaining interest in the lands.

minéraux après la cession de 1940: *Guerin*, précité. Cela mis à part, toutefois, il ressort clairement de l'art. 54 de la Loi et des conditions de la cession que les droits miniers ont été transférés à la Couronne, en qualité de fiduciaire de la bande, et que la Couronne n'était habilitée qu'à les louer au profit de la bande.

(b) L'effet de la cession de 1945 sur les droits miniers

Le juge de première instance a conclu que les droits miniers ont été cédés au MAI en vertu de la cession générale des terres en 1945, en raison de l'omission d'en exclure les droits miniers. Il semble que la question du transfert subséquent des droits miniers au DTAC n'a jamais fait l'objet de discussions entre le MAI et le DTAC, et la bande n'a jamais été informée du fait que ses droits miniers seraient transférés. De l'avis du juge de première instance, ces droits ont été transférés, non pas parce que quelqu'un entendait qu'ils le soient mais plutôt par suite de l'effet de la présomption légale qui veut que, en cas de cession générale de terres, il y a transfert de tous les droits sauf ceux réservés expressément dans l'acte de cession.

Selon moi, cette analyse est erronée. Avant 1940, la bande était titulaire tant des droits de superficie de la réserve que des droits miniers y afférents. La bande a, en 1940, cédé à la Couronne les droits miniers dans la réserve. Cela a eu pour effet de retrancher ces droits de la réserve. Lorsque la bande a cédé ses droits sur la réserve de Fort St. John à la Couronne en 1945, elle ne pouvait transférer que les droits qu'elle possédait encore: *nemo dat quod non habet* — nul ne peut donner ce qu'il n'a pas. La cession de 1945 ne pouvait donc pas comprendre les droits de la bande sur les minéraux de la réserve. Au contraire, elle ne visait que les droits qui appartenaient encore à la bande et que cette dernière pouvait céder, savoir les droits de superficie. Les minéraux sont restés en la possession de la Couronne, qui continuait d'être liée par les conditions de la cession de 1940, même après la cession, en 1945, des droits qu'avaient encore les Indiens sur les terres en cause.

67

This result is dictated not only by the most basic principles of property transfer, but by the *Indian Act* itself. Section 2 of the 1927 Act differentiates between a “reserve” and “Indian lands”:

- (e) “Indian lands” means any reserve or portion of a reserve which has been surrendered to the Crown;

- (j) “reserve” means any tract or tracts of land set apart by treaty or otherwise for the use or benefit of or granted to a particular band of Indians, of which the legal title is in the Crown, and which remains so set apart and has not been surrendered to the Crown, and includes all the trees, wood, timber, soil, stone, minerals, metals and other valuables thereon or therein; [Emphasis added.]

Only a “reserve” or “a portion of a reserve” can be surrendered: ss. 50, 51, 53 and 54. Once a reserve or a “portion of a reserve” is surrendered, it becomes “Indian lands”: s. 2(e); and *St. Ann's Island Shooting and Fishing Club Ltd. v. The King*, [1950] S.C.R. 211. This was the status of the mineral rights after the 1940 surrender. As “Indian lands” held by the Crown in trust, they could not be surrendered again in 1945.

68

A number of arguments are raised against the proposition that the mineral rights, having already been surrendered in 1940, were not affected by the 1945 surrender. I will consider each in turn. The first argument is that offered by the trial judge. The trial judge took the view that mineral rights cannot be surrendered except in conjunction with a surrender of surface rights. The trial judge based this conclusion on the definition of reserve in the 1927 *Indian Act*:

Cette conclusion s'impose non seulement de par l'effet des principes les plus fondamentaux du transfert des biens immobiliers, mais aussi de par l'effet de la *Loi des Indiens* elle-même. À l'article 2 de la Loi de 1927, on fait la distinction suivante entre «réserve» et «terres indiennes»:

- h) «réserve» signifie toute étendue de terre mise à part, par traité ou autrement, pour l'usage ou le profit d'une bande particulière d'Indiens ou concédée à cette bande, et dont le titre légal est attribué à la Couronne, et qui fait encore partie de la réserve et n'a pas été rétrocédée à la Couronne, et comprend les arbres, le bois, la terre, la pierre, les minéraux, les métaux et autres choses de valeur qui se trouvent à la surface ou à l'intérieur du sol [Je souligne.]

- l) «terres indiennes», «terres des Indiens» signifie toute réserve ou partie de réserve qui a été cédée à la Couronne;

Seule une «réserve» ou «une partie de réserve» peut être cédée: art. 50, 51, 53 et 54. Une fois cédée, la réserve ou «partie de réserve» devient des «terres indiennes»: al. 2l) et *St. Ann's Island Shooting and Fishing Club Ltd. c. The King*, [1950] R.C.S. 211. Voilà quel était le statut des droits miniers après la cession de 1940. En tant que «terres indiennes» détenues en fiducie par la Couronne, ces droits ne pouvaient être cédés de nouveau en 1945.

On soulève un certain nombre d'arguments contre la proposition que les droits miniers n'ont pas été touchés par la cession de 1945 puisqu'ils avaient déjà été cédés en 1940. J'examinerai séparément chacun de ces arguments. Le premier est celui du juge de première instance, qui a dit être d'avis que les droits miniers ne peuvent être cédés qu'en même temps que les droits de superficie. Il a fondé cette conclusion sur la définition du terme «réserve» dans la *Loi des Indiens* de 1927:

“reserve” means any tract or tracts of land . . . and includes all the trees, wood, timber, soil, stone, minerals, metals and other valuables thereon or therein;

The trial judge concluded that since a reserve means a tract of land including, *inter alia*, minerals, a portion of a reserve must mean a portion of a tract of land including minerals. If this interpretation is adopted, mineral rights can never be surrendered under the 1927 *Indian Act* without the surface rights and conversely, the surface rights can never be surrendered without the mineral rights. With the greatest of respect, this interpretation is unwarranted on the wording of the definition. While a reserve is defined as a tract of land it is also defined as including, *inter alia*, minerals. Therefore, the reserve as a whole includes the minerals. In plain English, a portion is part of the whole: *Chambers English Dictionary* (7th ed. 1988), and *Concise Oxford Dictionary* (8th ed. 1990). The minerals and the rights pertaining thereto are included as part of the whole reserve and therefore constitute a portion of the reserve.

The trial judge concluded that the 1940 surrender was not a surrender of a “portion” of the reserve, but only of an indivisible right “in a part of the whole reserve”. In this way, the words of the Act prohibiting resurrender of a portion of a reserve previously surrendered were avoided. The trial judge distinguished *St. Ann’s Island, supra*, by pointing out that in that case, it was an island which was considered a portion of the reserve.

This reasoning raises a number of problems. The *Indian Act* makes no mention of a right in a “part” of a whole reserve, nor any provision for its surrender. The trial judge’s reasoning leaves us with this question: how could the surrender of 1940 have been effected under the *Indian Act* if the mineral rights were not a “portion” of a reserve? Moreover, the narrow and technical interpretation

«réserve» signifie toute étendue de terre [. . .] et comprend les arbres, le bois, la terre, la pierre, les minéraux, les métaux et autres choses de valeur qui se trouvent à la surface ou à l’intérieur du sol;

Le juge de première instance a conclu que, comme une réserve est une étendue de terre comprenant notamment les minéraux qui s’y trouvent, une partie de réserve doit aussi signifier une partie d’étendue de terre et les minéraux s’y trouvant. Si l’on retenait cette interprétation, les droits miniers ne pourraient jamais, en vertu de la *Loi des Indiens* de 1927, être cédés sans les droits de superficie, et, inversement, les droits de superficie ne pourraient jamais l’être sans les droits miniers. En toute déférence, le texte de la définition en question ne justifie pas cette interprétation. Bien que le texte dise qu’une réserve est une étendue de terre, il précise également que la réserve comprend notamment les minéraux qui s’y trouvent. En conséquence, l’ensemble de la réserve comprend les minéraux. Dans son sens courant, le terme «partie» désigne un élément d’un tout: *Le nouveau Petit Robert* (1994) et *Le Petit Larousse illustré 1994*. Les minéraux et les droits y afférents sont un élément de l’ensemble de la réserve et constituent, de ce fait, une partie de la réserve.

Le juge de première instance a conclu que la cession de 1940 ne visait pas une «partie» de réserve, mais seulement un droit indivisible «sur une partie de l’ensemble de la réserve». En exprimant ainsi sa conclusion, le juge a évité les termes de la Loi qui interdisent de céder à nouveau une partie d’une réserve qui a déjà été cédée. Le juge de première instance a distingué le cas dont il était saisi de l’arrêt *St. Ann’s Island*, précité, en signalant que, dans cet arrêt, il était question d’une île qui avait été considérée comme une partie de réserve.

Ce raisonnement soulève un certain nombre de problèmes. Le premier est que la *Loi des Indiens* ne fait aucune mention d’un droit sur une «partie» de l’ensemble d’une réserve, ni ne pourvoit à la cession d’un tel droit. Le raisonnement du juge de première instance nous laisse devant la question suivante: Comment la cession de 1940 aurait-elle pu être réalisée en vertu de la *Loi des Indiens* si les

of the phrase "portion of a reserve" adopted by the trial judge violates the wording of the *Indian Act*, and is not supported by the incorporeal nature of Indian title. It runs contrary to the general policy of the law, which permits severance of the various property interests in a given parcel of land, and to the provisions and the legislative intention of the *Indian Act* and regulations dealing with severance of interests in general, and of oil and gas in particular. From a practical perspective, it deprives the Indian people of the ability to deal with mineral interests in their reserves separate from the surface rights while retaining the significant protections of the *Indian Act*.

droits miniers n'étaient pas une «partie» d'une réserve? Par ailleurs, l'interprétation restrictive et formaliste de l'expression «partie de réserve» adoptée par le juge de première instance va à l'encontre du texte de la *Loi des Indiens*, et ne trouve pas appui dans le caractère incorporel du titre des Indiens. Elle est contraire à l'orientation générale de la loi — qui permet la séparation des divers droits fonciers sur une parcelle donnée — ainsi qu'aux dispositions et à l'objet de la *Loi des Indiens* et de son règlement d'application touchant la séparation des droits en général, tout particulièrement des droits pétroliers et gaziers. D'un point de vue pratique, une telle interprétation prive les Indiens de la possibilité de faire des opérations touchant les droits miniers afférents à leur réserve sans porter atteinte aux droits de superficie de celle-ci, tout en continuant de bénéficier des importantes mesures de protection qu'offre la *Loi des Indiens*.

71

Dealing first with the general policy of the law, the proposition that mineral rights cannot be severed from surface rights on reserve lands is novel. No authority is cited for it. The general rule is that mineral title can be severed from the realty and form the basis for a separate chain of title: *Berkheiser v. Berkheiser*, [1957] S.C.R. 387, at p. 395, *per* Kellock J.

Tout d'abord, en ce qui concerne l'orientation générale de la loi, l'argument que, dans le cas des terres constituant les réserves, les droits miniers ne peuvent pas être séparés des droits de superficie est une proposition nouvelle. Aucune jurisprudence n'est citée à l'appui de cette proposition. Selon la règle générale, le titre relatif aux minéraux peut être séparé du bien-fonds et constituer la base d'une chaîne de titres distincte: *Berkheiser c. Berkheiser*, [1957] R.C.S. 387, à la p. 395, les motifs du juge Kellock.

72

This might not be determinative if the nature of the Band's interests in land required a departure from the usual rule. But that is not the case. The trial judge's apparent assumption that the mineral interest in the reserve cannot be severed from the corporeal interest loses its force when it is realized that the only and entire interest of a band in a reserve is incorporeal. Even the right of the Band in the surface area of the reserve was not a corporeal property interest but rather a personal right guaranteed in perpetuity; for this reason it could not form the *res* of a trust according to the majority in *Guerin*. Indian title in reserves is *sui generis* in that it does not include the fee simple title but consists rather in a right of perpetual usufruct. This

Cette règle pourrait ne pas être déterminante si la nature des droits fonciers de la bande exigeait qu'on y déroge. Cependant, tel n'est pas le cas en l'espèce. L'hypothèse qu'a visiblement faite le juge de première instance et selon laquelle les droits miniers afférents à la réserve ne peuvent pas être séparés du droit corporel perd de sa valeur lorsqu'on se rend compte que le seul et unique droit que possède une bande à l'égard d'une réserve est incorporel. Même le droit de la bande à l'égard de la superficie de la réserve n'était pas un droit de propriété de nature corporelle mais plutôt un droit personnel garanti à perpétuité; pour cette raison, il ne pouvait constituer l'objet (*res*) d'une fiducie suivant les motifs des juges de la majorité

renders suspect the trial judge's conclusion that a "portion of a reserve" must include a physical piece of the realty.

The wording of the *Indian Act* and the regulations governing oil and gas which have been enacted under it, confirm that mineral rights in Indian reserves have consistently been viewed as capable of being transferred without transferring surface rights. Pursuant to the Act, Parliament early on introduced a separate regime governing mineral interests in Indian lands. In 1910 it passed the first regulations: *Regulations for the Disposal of Petroleum and Gas on the Indian Reserves in the Provinces of Alberta and Saskatchewan and the Northwest Territories*, May 17, 1910, Order in Council P.C. 987. This was followed in 1938 by a comprehensive scheme to regulate the leasing of Indian oil and gas interests pursuant to an amendment to the *Indian Act* authorizing the Governor in Council to make regulations in this respect, see: *An Act to amend the Indian Act*, S.C. 1938, c. 31, s. 1; and *Regulations for the Disposal of Petroleum and Natural Gas Rights on Indian Reserves*, (1938) 72 Can. Gaz. 725.

More specifically, s. 50 of the Act and the regulations in place in 1938 confirm that in 1940, when the surrender of mineral rights at issue was made, it was possible to surrender mineral rights without surrendering surface title. Section 50 of the Act provides that no reserve "or portion of a reserve" can be sold or leased unless first surrendered to the Crown. Section 1(a) of the 1938 regulations confirms that oil and natural gas rights were viewed as "portion of a reserve" which might be surrendered, with or without surface rights. Section 1(a) requires that a statutory surrender be made before the regulations can be applied to Indian oil and gas

dans *Guerin*. Le titre des Indiens sur les réserves a un caractère *sui generis*, en ce sens qu'il ne comprend pas le titre en fief simple mais constitue plutôt un droit d'usufruit perpétuel. Cela jette des doutes sur la conclusion du juge de première instance qu'une «partie de réserve» doit comprendre une partie concrète du bien immeuble visé.

Le texte de la *Loi des Indiens* et son règlement d'application concernant le pétrole et le gaz confirment que l'on a toujours considéré que les droits miniers afférents aux réserves indiennes pouvaient être transférés indépendamment des droits de superficie. Comme l'y autorisait la Loi, le Parlement n'a pas mis de temps à établir un régime distinct visant à régir les droits miniers afférents aux terres indiennes. En 1910, il a pris le premier règlement à cet égard: *Regulations for the Disposal of Petroleum and Gas on the Indian Reserves in the Provinces of Alberta and Saskatchewan and the Northwest Territories*, 17 mai 1910, décret C.P. 987. Cette mesure a été suivie, en 1938, par l'établissement, conformément à une modification qui avait été apportée à la *Loi des Indiens* afin d'autoriser le gouverneur en conseil à prendre des règlements à ce sujet, d'un régime exhaustif visant à réglementer la location des droits pétroliers et gaziers des Indiens; voir: *Loi modifiant la Loi des Indiens*, S.C. 1938, ch. 31, art. 1; *Regulations for the Disposal of Petroleum and Natural Gas Rights on Indian Reserves*, (1938) 72 Can. Gaz. 725.

Plus particulièrement, l'art. 50 de la Loi ainsi que le règlement en vigueur en 1938 confirment qu'il était possible, en 1940, lors de la cession en cause des droits miniers, de céder des droits miniers sans céder le titre relatif aux droits de superficie. L'article 50 de la Loi indique qu'aucune réserve «ou portion de réserve» ne peut être vendue ou affermée à moins d'avoir été d'abord cédée à la Couronne. L'alinéa 1a) du règlement de 1938 confirme que les droits pétroliers et gaziers étaient considérés comme une [TRADUCTION] «partie de réserve» susceptible d'être cédée, avec ou sans les droits de superficie. De plus, l'al. 1a) exige qu'il y ait eu cession en vertu de la Loi pour que le règlement s'applique aux

interests and before oil and gas interests can be leased by the Crown:

1. (a) The petroleum and natural gas rights on any Indian Reserve in Canada may be leased to applicants at a rental of fifty cents an acre for the first year, and for each subsequent year a rental at the rate of one dollar an acre, payable yearly in advance, provided that such petroleum and natural gas rights have been released or surrendered to His Majesty in trust, in accordance with the provisions of Subsection One of Section 50 of the Indian Act . . . [Emphasis added.]

75

It is undisputed that the Band's 1940 surrender of its mineral rights precisely met the formal requirements of the surrender provisions of the 1927 *Indian Act*. The surrender was assented to by a majority as required by s. 51(1). This was certified on oath as required by s. 51(3), and the surrender was accepted by the Governor in Council as required by s. 51(4). The Order in Council P.C. 8939, November 19, 1941, which accepts the 1940 surrender of the mineral rights specifically references the statutory nature of the surrender and directs that the mineral rights be leased in accordance with the regulations:

His Excellency the Governor General in Council, on the recommendation of the Minister of Mines and Resources, is pleased to accept the attached surrender, dated July 9, 1940, of the petroleum and natural gas and the mining rights in connection therewith on all that parcel or tract of land and premises situate, lying and being in the St. Johns Indian Reserve No. 172 in the Province of British Columbia . . . which has been duly executed in accordance with the provisions of the Indian Act and Regulations, by the members of the St. Johns Band of Indians in the said Province, in order that the said petroleum and natural gas and the mining rights in connection therewith may be leased for their benefit, and it is hereby accepted as provided in Section 51(4) of the Indian Act, Chapter 98, Revised Statutes of Canada 1927.

His Excellency in Council, on the same recommendation, and pursuant to the provisions of Section 54 of the said Indian Act is further pleased, hereby, to direct that the said petroleum and natural gas and the mining rights in connection therewith be leased as agreed upon, subject to the terms and conditions of the Regulations for the disposal of Petroleum and Natural Gas rights on Indian Reserves and subject further to the conditions of

droits pétroliers et gaziers des Indiens et que ces droits puissent être loués par la Couronne:

[TRADUCTION] a) Les droits au pétrole et au gaz naturel afférents à une réserve indienne au Canada peuvent être loués moyennant un loyer annuel de cinquante cents l'acre pour la première année et d'un dollar pour les années subséquentes, payable à l'avance, pourvu que les droits en question aient d'abord été cédés ou rétrocédés en fiducie à Sa Majesté conformément à l'article 50 de la Loi des Indiens . . . [Je souligne.]

Il n'est pas contesté que la cession par la bande, en 1940, de ses droits miniers respectait pleinement les exigences de forme prévues par les dispositions relatives aux cessions de la *Loi des Indiens* de 1927. Cette cession a été ratifiée par la majorité prévue au par. 51(1). Ce fait a été attesté sous serment conformément au par. 51(3), et la cession a été acceptée par le gouverneur en son conseil comme le prévoit le par. 51(4). Le décret C.P. 8939, daté du 19 novembre 1941, par lequel on a accepté la cession de 1940 des droits miniers, indique expressément qu'il s'agit d'une cession faite en vertu de la Loi et ordonne que les droits miniers soient loués conformément au règlement:

[TRADUCTION] Sur avis conforme du ministre des Mines et des Ressources, il plaît à Son Excellence le gouverneur général en conseil d'accepter l'acte de cession ci-annexé, daté du 9 juillet 1940, visant le pétrole, le gaz naturel et les droits miniers connexes, afférents à l'ensemble de cette parcelle ou étendue de terre se trouvant dans la réserve indienne n° 172 de St. Johns dans la province de la Colombie-Britannique [. . .] qui a été dûment passé conformément aux dispositions de la Loi des Indiens et de son règlement d'application, par les membres de la bande des Indiens de St. Johns dans ladite province, pour que le pétrole, le gaz et les droits miniers connexes puissent être affermé au profit de la bande, et il est accepté conformément au par. 51(4) de la Loi des Indiens, chapitre 98, Statuts révisés du Canada, 1927.

Conformément au même avis et à l'article 54 de la Loi des Indiens, il plaît aussi à Son Excellence en conseil d'ordonner que le pétrole, le gaz naturel et les droits miniers connexes soient affermé comme convenu, sous réserve des conditions prévues par le Regulations for the Disposal of Petroleum and Natural Gas rights on Indian

the said surrender and the provisions of Part One of the said Indian Act. [Emphasis added.]

The scheme of the Act and regulations, in 1938 as now, is clear. Indians may surrender mineral rights which in turn must be dealt with by the Crown according to the terms of the surrender. The statute and the regulations protect the Indians by requiring that the formalities of surrender be complied with before the mineral rights can be leased or otherwise dealt with. The result is beneficial to Indians, who are able to retain the surface rights so important to their sense of place and belonging, while profiting from the lease and sale of their mineral rights. Today, as in 1940, the vast majority of the oil and gas interests managed by the Crown on behalf of the Indians underlie reserves whose surface rights have not been surrendered to Crown. The suggestion that mineral title cannot be conveyed except in conjunction with surface rights undermines this statutory regime.

The second argument brought against the conclusion that the 1945 surrender did not include the Band's mineral rights is that the right to "resurrender" the mineral rights previously surrendered for a new purpose must be presumed. Otherwise, the 1940 surrender would preclude the Band from ever changing the terms of the trust, for example, to permit sale of the mineral rights instead of lease. My colleague Gonthier J. relies on this argument. He states that the 1927 Act is entirely silent on the subject of resurrender. With respect, this is incorrect. The Act does not permit resurrender. The Act only permits surrender of a "reserve" or "portion of a reserve" which has not been surrendered to the Crown. It does not allow for resurrender of "Indian lands" which has already been surrendered.

This does not mean, however, that an Indian band is forever bound by the terms of the initial

Reserves et ladite cession, et des dispositions de la partie I de la Loi des Indiens. [Je souligne.]

L'économie de la Loi et de son règlement d'application, tant en 1938 que de nos jours, est claire. Les Indiens peuvent céder des droits miniers, auquel cas la Couronne doit ensuite agir à l'égard de ces droits conformément aux conditions de la cession. La Loi et le règlement protègent les Indiens en exigeant le respect des formalités régissant les cessions avant que les droits miniers puissent être loués ou faire l'objet d'autres opérations. Cette situation est à l'avantage des Indiens, car ils peuvent ainsi conserver les droits de superficie, droits si importants pour leur sentiment d'enracinement et d'appartenance, et continuer de profiter des avantages découlant de la location ou de la vente de leurs droits miniers. De nos jours, comme en 1940, la vaste majorité des intérêts pétroliers et gaziers gérés par la Couronne pour le compte des Indiens se trouvent dans le sous-sol de réserves dont les droits de superficie n'ont pas été cédés à la Couronne. La thèse selon laquelle le titre relatif aux droits miniers ne peut être transféré qu'avec les droits de superficie sape le régime établi par la loi.

Suivant le deuxième argument formulé à l'encontre de la conclusion que la cession de 1945 n'incluait pas les droits miniers, il faut présumer l'existence d'un droit de «céder à nouveau», à une autre fin, les droits miniers déjà cédés. En l'absence d'un tel droit, la cession de 1940 aurait pour effet d'empêcher pour toujours la bande de modifier les conditions de la fiducie, par exemple pour permettre la vente des droits miniers plutôt que leur location. Mon collègue le juge Gonthier s'appuie sur cet argument. Il affirme que la Loi de 1927 ne traite pas de la possibilité de refaire cession. Avec égards, cette affirmation est inexacte. La Loi ne permet pas qu'il y ait une nouvelle cession. Elle ne permet que la cession d'une «réserve» ou d'une «partie de réserve» qui n'a pas été cédée à la Couronne. Elle ne permet pas de céder à nouveau des «terres indiennes» qui ont déjà été cédées.

Toutefois, cela ne veut pas dire que la bande indienne concernée est liée pour toujours par les

surrender and is incapable of varying the terms of a surrender. Joe Leask, a Crown witness and Director of Reserves and Trusts for Indian affairs, testified that the settled practice under the Act was that once land was surrendered, it could not be resurrendered unless the initial surrender was first revoked. When a change was sought in the terms of a surrender, the process used in the DIA required the Crown to revoke the original surrender and restore the previously surrendered "Indian lands" to the band, by way of an order in council. At this point the "Indian lands" once again became a "reserve" or "portion of a reserve", which could be surrendered on new terms pursuant to the Act. This administrative procedure allowed surrenders to be varied while retaining the provisions and protections of the *Indian Act*.

conditions de la cession initiale et qu'elle est incapable de les faire modifier. Joe Leask, témoin de la Couronne et directeur des réserves et des fidéicommis pour les Affaires indiennes, a déposé que, suivant la pratique établie en vertu de la Loi, une fois que des terres avaient été cédées, elles ne pouvaient pas être cédées à nouveau à moins d'annulation de la cession initiale. Lorsqu'on voulait modifier une cession, il fallait, conformément à la méthode appliquée par le MAI, que la Couronne annule la cession originale et remette à la bande, par décret, les «terres indiennes» cédées antérieurement. À ce moment-là, les «terres indiennes» redeviennent une «réserve» ou «partie de réserve», qui pouvait alors être cédée à de nouvelles conditions conformément à la Loi. Cette procédure administrative permettait de modifier les conditions des cessions, tout en maintenant l'application des dispositions de la *Loi des Indiens* et des mécanismes de protection prévus par celle-ci.

79

A third argument against the view that the 1940 surrender of mineral rights precluded their resurrender in 1945 asserts that the general language of the 1945 surrender constituted a revocation of the 1940 surrender and a resurrender of the mineral rights. Again, the argument is tenuous. To achieve a revocation of the 1940 surrender, according to the Crown witness Leask, a formal revocation document would have had to be executed by the Crown and approved by the Governor in Council, followed by a resurrender complying with the provisions of the Act. And even if these formalities could somehow be dispensed with, the Crown is faced by the fact that the mineral rights were not discussed in 1945, nor referred to in the 1945 document of surrender. To accept the Crown's argument would be to infer revocation of the 1940 surrender not from the words of the 1945 document, but from the absence of exclusionary words.

Dans un troisième argument présenté contre la thèse que la cession des droits miniers, en 1940, avait eu pour effet d'empêcher qu'ils soient cédés à nouveau en 1945, on faisait valoir que le libellé général de la cession de 1945 constituait une annulation de la cession de 1940 et une nouvelle cession des droits miniers. Encore une fois, il s'agit d'un argument plutôt faible. D'après Leask, le témoin de la Couronne, il aurait fallu, pour qu'il y ait annulation de la cession de 1940, qu'un acte formel d'annulation ait été passé par la Couronne et approuvé par le gouverneur en conseil, et qu'il y ait eu ensuite une nouvelle cession conforme aux dispositions de la Loi. D'ailleurs, même s'il avait été possible, d'une manière ou d'une autre, d'éviter ces formalités, la Couronne doit reconnaître que la question des droits miniers n'a pas été discutée en 1945 et que l'acte de cession de 1945 ne fait pas mention de ces droits. Accepter l'argument de la Couronne reviendrait à inférer l'annulation de la cession de 1940 non pas des termes mêmes du document de 1945, mais plutôt de l'absence de termes portant exclusion des droits miniers.

80

Before leaving my conclusion that the 1940 surrender of mineral rights precluded the resurrender of the mineral rights in 1945, I must deal with the

Avant de clore l'examen de ma conclusion que la cession des droits miniers en 1940 empêchait qu'ils soient cédés à nouveau en 1945, il me faut

comments of Gonthier J. with respect to it. Gonthier J. suggests that this argument is academic. In his view, the result in this case should not depend on "technical" interpretations of the *Indian Act* and rules of property transfer, but only on the intention of the Band in 1945. If the Band intended to transfer the mineral rights in 1945, then the mineral rights should be deemed to be transferred, in his view.

With respect, I cannot agree. My reasons are two. First, neither the 1940 transfer and the obligations the Crown incurred under it, nor the provisions of the *Indian Act* can be swept aside by some vague intention five years later. Second, the alleged intention, in my view, is not established.

If intention were all that mattered, there would be no purpose to the detailed provisions of the *Indian Act* and regulations under it regarding surrender, nor any substance to the fiduciary duty which the Crown assumed with respect to the Band's mineral rights when it accepted their surrender in 1940. It is not disputed that the property of Indians, like the property of any other person, must be dealt with according to law. The stark facts are that the Band conveyed the mineral rights in I.R. 172 to the Crown in 1940, on the trust that the Crown would lease those mineral rights for their benefit. With respect, I find it neither academic nor technical to suggest, that the 1940 surrender removed the mineral rights from I.R. 172, with the result that they could not pass when what remained of the Band's rights in I.R. 172 was surrendered in 1945.

The basic purpose of the surrender provisions of the *Indian Act* is to ensure that the intention of Indian bands with respect to their interest in their reserves be honoured. One must wonder why, if the Band intended to alter the terms of the 1940 conditional surrender to make an absolute surrender, it did not avail itself of the provisions of the *Indian Act* for the proper legal expression of that intention? One may also ask why, if it was the

répondre aux commentaires du juge Gonthier à ce sujet. Mon collègue affirme qu'il s'agit d'un argument théorique. À son avis, la solution du présent litige ne devrait pas dépendre d'interprétations «formalistes» de la *Loi des Indiens* et des règles régissant le transfert des biens fonciers, mais seulement de l'intention de la bande en 1945. De l'avis du juge Gonthier, si la bande entendait transférer les droits miniers en 1945, ces droits devraient alors être considérés comme ayant été transférés.

Avec égards, je ne puis accepter cette position, et ce pour deux motifs. Premièrement, ni le transfert de 1940 et les obligations en découlant pour la Couronne, ni les dispositions de la *Loi des Indiens* ne peuvent être écartés par quelque vague intention de la bande cinq ans plus tard. Deuxièmement, on n'a pas, à mon avis, établi l'intention alléguée.

Si l'intention était le seul facteur à prendre en considération, les dispositions détaillées de la *Loi des Indiens* et de son règlement d'application en ce qui concerne les cessions n'auraient aucun objet, et l'obligation de fiduciaire qu'a assumée la Couronne relativement aux droits miniers de la bande, lorsqu'elle a accepté la cession en 1940, serait dépourvue de tout fondement. Il n'est pas contesté que les biens des Indiens doivent, à l'instar de ceux appartenant à toute autre personne, être traités conformément à la loi. La réalité est que la bande a, en 1940, cédé en fiducie à la Couronne les droits miniers afférents à la R.I. 172 pour qu'elle les loue au profit de la bande. Avec égards, je suis d'avis qu'il n'est ni théorique ni formaliste d'affirmer que la cession de 1940 a eu pour effet de retrancher les droits miniers de la R.I. 172, et qu'en conséquence ces droits n'ont pu être transférés au moment de la cession, en 1945, des droits que détenait encore la bande sur la R.I. 172.

L'objet fondamental des dispositions de la *Loi des Indiens* relatives aux cessions est de faire en sorte que l'on respecte l'intention des bandes indiennes relativement à leurs droits sur les réserves. Si la bande entendait modifier les modalités de la cession conditionnelle de 1940 pour faire une cession absolue, il convient alors de se demander pourquoi elle n'a pas eu recours aux dispositions de la *Loi des Indiens* afin de réaliser con-

intention of the Band to surrender the mineral rights for purposes of sale in 1945, mineral rights were never discussed in the negotiations leading to the 1945 surrender?

venablement cette intention sur le plan juridique. De même, si la bande avait l'intention, en 1945, de céder les droits miniers pour qu'ils soient vendus, il est également permis de se demander pourquoi on n'a jamais discuté de ces droits au cours des négociations qui ont abouti à la cession de 1945.

84

Even assuming that an intention to transfer the mineral rights in 1945 could somehow sweep aside these problems, finding such an intention in 1945 is difficult. My colleague Gonthier J. asserts that the trial judge found as a fact that the Band intended to give up all rights in I.R. 172 forever in 1945. With respect, the trial judge's findings fall short of this.

Même en supposant que l'intention de transférer les droits miniers en 1945 pourrait, de quelque manière, écarter ces problèmes, il est difficile de déceler l'existence d'une telle intention en 1945. Mon collègue le juge Gonthier affirme que le juge de première instance est arrivé à la conclusion de fait que la bande avait l'intention, en 1945, de renoncer pour toujours à ses droits afférents à la R.I. 172. Avec égards, les conclusions du juge de première instance ne vont pas jusque-là.

85

The trial judge did not make an explicit finding of fact as to whether the Band gave full, free and informed consent to the surrender of the mineral rights in 1945. He began his discussion of this issue at p. 54 F.C. as follows:

Le juge de première instance n'est pas spécifiquement arrivé à la conclusion de fait que la bande avait librement consenti, en toute connaissance de cause, à la cession des droits miniers en 1945. Voici comment il a commencé son analyse de la question à la p. 54 C.F.:

Assuming for the moment that full, free and informed consent was given by the plaintiffs to the 1945 surrender, one would normally conclude on the mere reading of those two documents and failing evidence to the contrary, that it was intended by both parties on executing the 1945 surrender, that all of the property rights of the plaintiffs, including any property or other rights in minerals which they might possibly have were being surrendered for the purposes mentioned in that document, that is, for sale or lease by the Crown for the benefit of the Indians. [Emphasis added.]

Si on présume pour l'instant que les demandeurs ont librement consenti, en toute connaissance de cause, à la cession effectuée en 1945, on pourrait normalement conclure à la simple lecture des deux documents, et en l'absence de preuve contraire, que les deux parties voulaient, en signant la cession de 1945, que tous les droits de propriété des demandeurs, y compris les droits de propriété ou autres droits qu'ils pouvaient posséder sur les minéraux de la réserve, soient cédés aux fins mentionnées dans cet acte, c'est-à-dire leur vente ou leur location par la Couronne pour le profit des Indiens. [Je souligne.]

The trial judge then continued to discuss the wording of the 1945 document and concluded that the wording of that document (by its failure to exclude the mineral rights) evidenced an intention of the Band to resurrender those rights on different terms. He somehow reached this conclusion in spite of his recognition at p. 64 F.C. that "[t]he legal effect could only be to grant or surrender whatever rights the plaintiffs had in I.R. 172." Clearly if the effect of the 1940 surrender was to sever mineral rights from the reserve then the legal effect of the 1945 surrender could not include those rights. He never

Le juge de première instance a ensuite poursuivi l'examen du document de 1945 et il a conclu que ce document, de par son libellé (le fait qu'il n'excluait pas les droits miniers), attestait l'intention de la bande de céder à nouveau les droits en question, mais à des conditions différentes. Il est arrivé à cette conclusion même s'il avait reconnu, à la p. 64 C.F., que «[s]euls les droits que les demandeurs détenaient sur la R.I. 172 pouvaient être légalement cédés.» De toute évidence, si la cession de 1940 avait eu pour effet de retrancher les droits miniers de la réserve, celle de 1945 ne pouvait

returned to consider the validity of his initial assumption that full, free and informed consent was given by the Band.

It follows that the finding of the trial judge that the Band intended to give up all rights in I.R. 172 forever is a legal finding based on his reading of the wording of the 1945 surrender rather than a finding of fact based on the evidence presented at trial. In fact the only witness whose oral testimony with respect to the 1945 surrender was accepted by the trial judge testified: "No mention of mineral rights were made at the meeting" (p. 201 F.T.R.). Likewise, the notes of the Indian agent in Fort St. John, Galibois, indicate that no mention was made of mineral rights. At page 184 F.T.R., the trial judge states that "from and including the surrender in 1945 . . . mineral rights were never mentioned or considered either one way or the other". What the evidence does establish is that the Band was promised replacement reserves at the 1945 surrender meeting. It also establishes that the replacement reserves purchased for the Band did not include mineral rights.

While the reasons of my colleague Gonthier J. claim to reflect the intention of the Band, the only evidence on the record of an intention to vary the terms under which the Crown held the mineral rights is that they were not mentioned either at the meeting at which assent was given to the 1945 surrender nor in the 1945 surrender document. With respect, this constitutes a weak evidentiary basis on which to establish an intention which would have the effect of revoking or varying an explicit surrender on different terms to which full and informed consent was given. In fact, later in his reasons, my colleague accepts that in 1945 the Crown did not receive a clear mandate from the Band to sell the mineral rights.

In my opinion, we should not overturn a deliberately executed and statutorily authorized surrender

donc, sur le plan juridique, les inclure. Le juge de première instance n'a cependant jamais réexaminé la validité de son hypothèse initiale, savoir que la bande avait donné librement son consentement, en toute connaissance de cause.

Il s'ensuit que la conclusion du juge de première instance que la bande entendait renoncer pour toujours à tous ses droits afférents à la R.I. 172 est une conclusion de droit, fondée sur son interprétation du texte de l'acte de cession de 1945, plutôt qu'une conclusion de fait fondée sur la preuve présentée au procès. En fait, la seule personne dont le témoignage a été retenu par le juge de première instance a dit: [TRADUCTION] «Aucune allusion à des droits miniers n'a été faite à l'assemblée» (p. 201 F.T.R.). De même, les notes de l'agent des Indiens, Galibois, indiquent qu'il n'a pas été question des droits miniers. À la page 184 F.T.R., le juge de première instance affirme «qu'à compter de la cession en 1945 [. . .] on n'a jamais fait allusion d'une manière ou d'une autre aux droits miniers ou on n'a jamais examiné cette question». Ce qu'établit la preuve, toutefois, c'est que, à l'occasion de l'assemblée concernant la cession en 1945, on avait promis à la bande des terres pour remplacer sa réserve. La preuve établit également que les terres de remplacement achetées pour la bande n'incluaient pas les droits miniers.

Même si, dans ses motifs, mon collègue le juge Gonthier dit tenir compte de l'intention de la bande, la seule preuve au dossier de l'intention de modifier les conditions auxquelles la Couronne détenait les droits miniers est qu'il n'en a été question ni à l'assemblée au cours de laquelle on a consenti à la cession de 1945, ni dans l'acte constatant cette cession. Avec égards, cette preuve constitue un fondement plutôt faible pour étayer l'existence d'une intention qui aurait eu pour effet d'annuler ou de modifier une cession explicite, à des conditions différentes, auxquelles on aurait consenti librement et de manière éclairée. De fait, plus loin dans ses motifs, mon collègue reconnaît que la Couronne n'avait pas, en 1945, reçu de la bande le mandat clair de vendre les droits miniers.

À mon avis, nous ne devrions pas, en l'absence de preuve, invalider un acte de cession dûment

on the basis of no evidence. In determining something as nebulous as intention over 40 years later one must look to all available sources. Here the written source is silent where one would have expected clear wording to revoke the previous surrender and the oral testimony establishes that the issue was never even discussed. This cannot be evidence of intention and the Band should be entitled to the protection of the *Indian Act* and the common law which prevent the Crown from unilaterally changing the terms under which it held the property as fiduciary without obtaining the informed consent of the Band. In the words of Gonthier J., the DIA never received a clear mandate from the Band to sell the mineral rights. How then, one may ask, can one conclude that the Band intended that the mineral rights be surrendered for purposes of sale?

passé et autorisé par la loi. Lorsqu'il s'agit de déterminer quelque chose d'aussi nébuleux que l'intention, et ce plus de 40 ans après le fait, il faut examiner toutes les sources disponibles. En l'espèce, la preuve écrite est muette sur cette question, alors qu'on se serait attendu à ce que l'annulation de la cession précédente y soit constatée en termes clairs. De plus, les témoignages oraux établissent que cette question n'a même jamais été discutée. Cela ne peut constituer la preuve de l'intention, et la bande devrait pouvoir invoquer les mesures de protection prévues par la *Loi des Indiens* et la common law et qui ont pour effet d'empêcher la Couronne de modifier unilatéralement les conditions en vertu desquelles elle détenait les biens en qualité de fiduciaire, sans obtenir le consentement éclairé de la bande. Suivant les mots mêmes du juge Gonthier, le MAI n'a jamais reçu de la bande le mandat clair de vendre les droits miniers. Cela étant, comment peut-on conclure que la bande a eu l'intention de céder les droits miniers pour qu'ils soient vendus?

89

My colleague, Gonthier J. asserts that the 1945 surrender specifically included the mineral rights. He reaches this conclusion by importing the definition of "reserve" from the 1927 *Indian Act* into the 1945 surrender agreement. He notes that the statutory definition in s. 2(j) includes "minerals" and therefore that minerals were included in the 1945 surrender. With respect, this assertion conveniently overlooks the requirement in s. 2(j) that a reserve includes only that which "has not been surrendered to the Crown". Given the legitimacy of the 1940 surrender with respect to the mineral rights, which my colleague accepts, it would be more accurate to say that applying the statutory definition of "reserve" to the 1945 surrender would specifically exclude minerals from that surrender.

Mon collègue le juge Gonthier affirme que la cession de 1945 visait spécifiquement les droits miniers. Il arrive à cette conclusion en important dans l'acte de cession de 1945 la définition de «réserve» de la *Loi des Indiens* de 1927. Il signale que, comme la définition figurant à l'al. 2h) de la Loi vise les «minéraux», ceux-ci étaient visés par la cession de 1945. Avec égards, cette affirmation fait opportunément abstraction de l'exigence énoncée dans ce même alinéa et selon laquelle une réserve inclut uniquement ce qui «n'a pas été rétrocéd[é] à la Couronne». Compte tenu du caractère légitime de la cession des droits miniers en 1940, ce qu'admet mon collègue, il serait plus exact d'affirmer que l'application à la cession de 1945 de la définition de «réserve» figurant dans la Loi a plutôt pour effet d'en exclure spécifiquement les minéraux.

90

It should be remembered that this is not a case where an Indian band is arguing that the Crown's failure to follow the proper administrative procedures has thwarted its true intentions. Rather, this is a case where the Crown, as fiduciary, has acted in a manner not authorized by the original surren-

Il faut se rappeler qu'il ne s'agit pas d'une affaire où une bande indienne prétend que ses véritables intentions ont été contrecarrées par suite de l'omission de la Couronne de suivre la procédure administrative applicable. Au contraire, nous sommes plutôt en présence d'un cas où la Cou-

der under which it became the fiduciary of the property. If the Crown wished to gain a broader discretion with respect to the property that it held in a "trust-like" manner there were certain steps it was required to follow. These steps included informing the Band specifically of the Crown's intention to alter the terms on which it held the mineral rights and following its own administrative procedures by revoking the 1940 surrender by order in council to allow for a new surrender in accordance with the *Indian Act*. Neither of these steps were taken here.

Gonthier J. suggests that the 1945 dealings may best be "characterized as a variation of a trust in Indian land" (para. 12), a concept of trust which we are told is not to be equated with a common law trust. Whatever the legal characteristics of the proposed "trust in Indian land", it is difficult to see how it advances the case. The difficulties of applying trust principles directly to the *sui generis* Indian interest in their reserves point to the fact that it is better to stay within the protective confines of the *Indian Act*. The 1927 *Indian Act* contains provisions which regulate in some detail the manner in which Indians may surrender their reserves or interests in their reserves to the Crown. The formal surrender requirements contained in the *Indian Act* serve to protect the Indians' interest by requiring that free and informed consent is given by a band to the precise manner in which the Crown handles property which it holds on behalf of the Band. The Act also recognizes the Indians as autonomous actors capable of making decisions concerning their interest in reserve property and ensures that the true intent of an Indian Band is respected by the Crown. No matter how appealing it may appear, this Court should be wary of discarding carefully drafted protections created under validly enacted legislation in favour of an *ad hoc*

ronne, en tant que fiduciaire, a agi d'une manière qui n'était pas autorisée par la cession originale en vertu de laquelle elle était devenue fiduciaire des biens visés. Si la Couronne souhaitait obtenir un pouvoir discrétionnaire plus grand à l'égard des biens qu'elle détenait selon une formule «semblable à une fiducie», certaines étapes devaient être suivies. Parmi ces étapes, mentionnons l'obligation de la Couronne d'informer expressément la bande de son intention de modifier les conditions auxquelles la Couronne détenait les droits miniers, ainsi que l'obligation de cette dernière de suivre sa propre procédure administrative et d'annuler, par décret, la cession de 1940, afin de permettre l'accomplissement d'une nouvelle cession conforme à la *Loi des Indiens*. Ni l'une ni l'autre de ces étapes n'ont été suivies en l'espèce.

1995 CanLII 50 (SCC)

Le juge Gonthier affirme que la meilleure façon de décrire les opérations de 1945 est de les «qualifier de modification d'une fiducie visant des terres indiennes» (par. 12), forme de fiducie qui, de poursuivre le juge, ne doit pas être assimilée à une fiducie en common law. Quelles que soient les caractéristiques juridiques de la notion de «fiducie visant des terres indiennes» que l'on propose, il est difficile de voir en quoi cela aide à trancher le pourvoi. Les difficultés que soulève le fait d'appliquer directement les principes du droit des fiducies au droit *sui generis* des Indiens sur leurs réserves indiquent qu'il vaut mieux s'en tenir aux mécanismes de protection prévus par la *Loi des Indiens*. La *Loi des Indiens* de 1927 renferme des dispositions qui réglementent de manière assez détaillée la façon dont les Indiens peuvent céder à la Couronne leurs réserves ou leurs droits sur celles-ci. Les formalités touchant les cessions qui sont établies par la Loi visent à protéger les droits des Indiens en exigeant que la bande concernée consente, de manière libre et éclairée, à la façon précise dont la Couronne prend charge du bien qu'elle détient pour le compte de la bande. La Loi reconnaît également que les Indiens sont des acteurs autonomes, capables de prendre des décisions relativement aux droits qu'ils détiennent sur leur réserve, et elle fait en sorte que la Couronne respecte l'intention véritable des bandes indiennes. Aussi attirante que puisse paraître une telle solution, notre Cour doit

approach based on novel analogies to other areas of the law.

prendre garde de ne pas écarter des mécanismes de protection soigneusement créés en vertu de lois valablement édictées, pour leur substituer une méthode *ad hoc* fondée sur des analogies nouvelles, établies avec d'autres domaines du droit.

92

I conclude that the 1940 surrender of the mineral rights was a valid surrender of a portion of the reserve which converted that portion into "Indian lands". By the definition of the Act, a reserve cannot include what has already been surrendered. It follows that the 1945 surrender of the reserve could not include the mineral rights as a matter of law and according to the wording and the statutory scheme of the *Indian Act*. I conclude that the 1945 surrender had no effect on the mineral rights. The Crown continued to hold them in trust for the Band on terms that they be leased for the welfare of the Band.

Je conclus que la cession des droits miniers en 1940 était une cession valide d'une partie de la réserve, et qu'elle a eu pour effet de faire de la portion ainsi cédée des «terres indiennes». De par la définition de la Loi, une réserve ne peut pas comprendre ce qui a déjà été cédé. Il s'ensuit que, tant en droit que d'après le texte et l'économie de la *Loi des Indiens*, la cession de la réserve en 1945 ne pouvait pas inclure les droits miniers. Je conclus que la cession de 1945 n'a eu aucun effet sur les droits miniers. La Couronne a continué de les détenir en fiducie pour la bande, aux fins de les louer pour le bien-être de celle-ci.

(c) Did the Transfer of the Mineral Rights in 1948 Constitute a Breach of Fiduciary Duty?

c) Le transfert des droits miniers en 1948 a-t-il constitué un manquement à l'obligation de fiduciaire?

93

Until 1948 the DIA held the surface rights and the mineral rights in trust for the Indians, pursuant to the surrenders of 1945 and 1940 respectively. In 1948, after concluding negotiations for the reserve, it assigned the land to the DVLA. The assignment did not reserve out mineral rights despite the fact that the Crown had no right to sell them under the terms of the 1940 surrender and s. 54 of the Act, and despite the fact that they had not been mentioned in the negotiations leading to the sale and appear to have played no role in determining the price paid. Since the transfer to the DVLA did not reserve out the mineral rights, and since the DIA had always held legal title to both the mineral rights and the surface rights, the transfer must be taken to have legally passed the mineral rights as well as the surface rights: *Attorney-General of British Columbia v. Attorney-General of Canada* (1889), 14 A.C. 295 (P.C.). So the DVLA, without ever having sought them, found itself in possession of the mineral rights. The DVLA in turn passed the mineral rights on to the veterans as they met the terms of their agreements for sale, in the form of original Crown grants, pursuant to s. 5(2) of *The*

Jusqu'en 1948, le MAI a détenu en fiducie pour les Indiens les droits de superficie et les droits miniers, conformément aux cessions de 1945 et de 1940 respectivement. En 1948, au terme de négociations visant la réserve, le MAI a cédé les terres au DTAC. L'acte de transfert ne réservait pas les droits miniers, malgré le fait, d'une part, que la Couronne n'avait pas, en vertu des conditions de la cession de 1940 et des dispositions de l'art. 54 de la Loi, le droit de les vendre, et, d'autre part, que ces droits n'avaient pas été mentionnés durant les négociations ayant abouti à la vente et qu'ils ne semblent pas avoir eu quelque influence dans la détermination du prix payé. Comme l'acte de transfert au DTAC ne réservait pas les droits miniers et que le MAI n'avait jamais cessé de détenir le titre légal à la fois aux droits miniers et aux droits de superficie, le transfert doit être considéré comme ayant eu pour effet de transporter légalement les droits miniers ainsi que les droits de superficie: *Attorney-General of British Columbia c. Attorney-General of Canada* (1889), 14 A.C. 295 (C.P.). Ainsi, le DTAC s'est retrouvé en possession des droits miniers sans les avoir jamais

Veterans' Land Act, 1942 (later R.S.C. 1952, c. 280; s. 5(3)).

Years later, wonderment persisted as to why the mineral rights had been passed to the DVLA. The wonderment was understandable given the well-known policy of the DIA to reserve out mineral rights and the fact that the only interest of the DVLA was to obtain land for agricultural purposes, not to enrich veterans through procuring mineral rights for them. The best explanation of how the mineral rights came to be transferred to the DVLA appears to lie in simple inadvertence. Thus, in 1961 District Solicitor A. F. McWilliams wrote to the Director of Veteran's Affairs as follows:

It has been known here The Director, The Veterans' Land Act is the owner of the mineral rights underlying the Fort St. John Indian Reserve. It has always been a mystery to the writer how he acquired these mineral rights, and our file on the Fort St. John Indian Reserve does not disclose how this came about. We would be interested to know, therefore, under what arrangement did The Director, The Veterans' Land Act acquire the mineral rights under the Fort St. John Indian Reserve. [Emphasis added.]

The reply from H. R. Holmes, the Superintendent of the Securities and Property Division of the Department of Veterans' Affairs reads as follows:

1. I think the simple answer to your query of June 14th is that the reason we acquired the mineral rights when we acquired the surface rights is because the Letters Patent which issued did not reserve the mines and minerals.

2. The chief and principal men of the St. John Beaver Band of Indians executed a Surrender dated the 22nd of September, 1945, and the Governor in Council by Order in Council P.C. 6506 dated the 16th day of October, 1945, accepted the Surrender and authorized the Minis-

demandés. À son tour, il les a transportés aux anciens combattants, dès que ceux-ci avaient satisfait aux conditions de leur acte de vente respectif qui prenait la forme de concession primitive accordée par la Couronne, conformément au par. 5(2) de la *Loi de 1942 sur les terres destinées aux anciens combattants* (plus tard S.R.C. 1952, ch. 280, par. 5(3)).

Bien des années plus tard, on se demandait encore pourquoi les droits miniers avaient été transférés au DTAC. Cet étonnement était compréhensible compte tenu de la politique notoire du MAI qui était de réserver les droits miniers en cas de cession et du fait que le DTAC désirait seulement obtenir des terres à des fins agricoles et non enrichir les anciens combattants en leur procurant des droits miniers. Il semble que la meilleure façon d'expliquer le transfert des droits miniers au DTAC est de considérer qu'il s'est agi d'une simple inadvertance. D'ailleurs, en 1961, le procureur de district, A. F. McWilliams, a écrit ce qui suit au Directeur des Affaires des anciens combattants:

[TRADUCTION] Nous savons que le Directeur de la Loi sur les terres destinées aux anciens combattants est propriétaire des droits miniers afférents au sous-sol de la réserve indienne de Fort St. John. Je me suis toujours demandé comment il avait acquis ces droits miniers, et notre dossier sur la réserve indienne de Fort St. John ne révèle pas comment cela s'est produit. Nous serions par conséquent intéressés de savoir de quelle façon le Directeur de la Loi sur les terres destinées aux anciens combattants a acquis ces droits miniers. [Je souligne.]

Voici la réponse qu'a donnée H. R. Holmes, surintendant de la Division des propriétés et valeurs du ministère des Affaires des anciens combattants:

[TRADUCTION]

1. Je pense que la réponse à votre demande de renseignements du 14 juin est tout simplement que nous avons acquis les droits miniers en même temps que les droits de superficie, en raison du fait que les lettres patentes délivrées à cette fin ne réservaient pas les mines et les minéraux.

2. Le chef et les principaux membres masculins de la bande indienne des Castors de St. John ont signé un acte de cession daté du 22 septembre 1945, et le gouverneur en conseil a, par le décret C.P. 6506 daté du 16 octobre 1945, accepté la cession et autorisé le ministre des

ter of Mines and Resources [under which Ministry the DIA existed at the time] to sell or lease the said lands subject to the conditions of the Surrender and the provisions of the Indian Act. During purchase negotiations with Indian Affairs, there was no reference, to the best of my knowledge and belief, to the question of mineral rights. As I have already said, the mines and minerals, either deliberately or inadvertently, were not reserved with the result that we acquired them. I think possibly the failure to reserve the sub-surface rights was inadvertent. [Emphasis added.]

Mines et Ressources [ministère dont relevait le MAI à l'époque] à vendre ou à louer lesdites terres sous réserve des conditions de la cession et des dispositions de la Loi des Indiens. Durant les négociations avec les Affaires indiennes relativement à l'achat, il n'a pas été question, autant que je sache, des droits miniers. Comme je l'ai dit plus tôt, qu'il se soit agi d'une décision délibérée ou d'une inadvertance, les mines et les minéraux n'ont pas été réservés, de sorte que nous les avons acquis. Il est possible, selon moi, que l'omission de réserver les droits relatifs au sous-sol de la réserve résulte d'une inadvertance. [Je souligne.]

95 There exist two grounds for arguing that transfer of the minerals to the DVLA in 1948 constituted a breach of fiduciary duty by the Crown. The first argument is that the transfer breached the 1940 surrender of the minerals, which restricted the DIA to leasing them for the benefit of the Band. A fiduciary is at very least bound to adhere to the terms of the instrument which bestows his powers and creates the trust.

Deux arguments permettent de prétendre que le transfert des minéraux au DTAC en 1948 a constitué un manquement aux obligations de fiduciaire de la Couronne. Le premier argument est que ce transfert a violé les conditions de la cession des droits miniers réalisée en 1940, cession en vertu de laquelle le MAI n'était autorisé qu'à louer les droits en question au profit de la bande. Un fiduciaire est à tout le moins tenu de respecter les dispositions de l'acte qui lui confère ses pouvoirs et crée la fiducie.

96 In any event, even if one were to accept for the sake of the argument that the 1945 surrender revoked the 1940 surrender of mineral rights, the 1945 surrender still imposed an obligation on the Crown to lease or sell in the best interests of the Band. This would leave for consideration the argument that the Crown breached its fiduciary obligations by transferring the mineral rights to the DVLA in 1948, because transfer rather than reservation for future leasing was contrary to the best interests of the Indians.

Quoi qu'il en soit, même si on accepte, pour les fins de la discussion, l'argument que la cession de 1945 a eu pour effet d'annuler celle des droits miniers en 1940, la Couronne avait toujours, aux termes de la cession de 1945, l'obligation de vendre ou de louer les terres visées dans l'intérêt de la bande. Il reste alors à examiner l'argument voulant que, en transférant les droits miniers au DTAC en 1948, la Couronne a manqué à son obligation de fiduciaire, parce que la décision de transférer ces droits plutôt que de les réserver en vue de leur location dans le futur n'était pas dans l'intérêt des Indiens.

97 The trial judge rejected this argument on the ground that it was not foreseeable in 1948 that the mineral rights could have any value (at p. 49 F.C.):

Le juge de première instance a rejeté cet argument pour le motif qu'il était impossible, en 1948, de prévoir que les droits miniers pourraient prendre quelque valeur (à la p. 49 C.F.):

I find that, taking into account the fiduciary relationship then existing between Her Majesty the Queen and the plaintiffs, none of her officers, servants or agents, exercising due care, consideration and attention in the discharge of those fiduciary duties, could reasonably be expected to have anticipated at any time during 1948 or previously that there would be any real value attached to

J'estime que, si on tient compte du rapport fiduciaire liant alors Sa Majesté la Reine aux demandeurs, on ne pouvait raisonnablement s'attendre à ce qu'aucun des fonctionnaires, préposés ou mandataires de cette dernière, exerçant toute la prudence et l'attention voulues dans l'exécution de ses obligations fiduciaires, ait pu prévoir à quelque moment que ce soit, en 1948 ou avant,

potential mineral rights under I.R. 172 or that there would be any reasonably foreseeable advantage in retaining them.

The finding of the trial judge that the Crown could not have known in 1948 that the mineral rights might possess value flies in the face of the evidence on record. Accordingly, this is one of those rare cases where departure from a trial judge's finding may be warranted.

The Crown's own prior experience sufficed to establish that the mineral rights had actual and potential value. After taking the surrender in 1940, it issued a permit for prospecting for oil and gas on the property. The 1940 permit alone was worth \$1,800, a not insignificant sum given that the annual interest of 5 percent on the \$70,000 purchase price for the surface rights yielded about \$3,500.

Moreover, the Crown had much earlier realized the potential value of mineral rights and routinely excluded them from its grants. As early as 1919, in *The Soldier Settlement Act, 1919*, S.C. 1919, c. 71, the federal Crown had reserved out mines and minerals from land grants to returning veterans. The *Dominion Lands Act*, R.S.C. 1927, c. 113, covering all federal land on the Prairies and in the Peace River District did the same. Provinces adopted the same policy. For example, the B.C. *Land Act*, R.S.B.C. 1924, c. 131, ss. 119 and 120, reserved mineral rights to the B.C. Crown on all grants of provincial lands. As a result, the new reserves obtained for the Band in 1950 did not include mineral rights.

If more were required, events close in time to 1948 reveal that these particular mineral rights might have considerable value, if only from the

que les droits miniers éventuels afférents à la R.I. 172 auraient une valeur réelle ou qu'il y aurait un avantage raisonnablement prévisible à conserver ces droits.

La constatation du juge de première instance que la Couronne ne pouvait pas savoir, en 1948, que les droits miniers pourraient avoir de la valeur est incompatible avec la preuve figurant au dossier. Par conséquent, nous sommes en présence d'un des rares cas où il est justifié d'écarter une constatation du juge de première instance.

Les expériences antérieures de la Couronne à cet égard permettaient à elles seules de savoir que les droits miniers avaient une valeur à la fois concrète et potentielle. Après avoir conclu la cession en 1940, la Couronne a délivré un permis de prospection pétrolière et gazière sur le bien-fonds. Le permis de 1940 valait à lui seul 1 800 \$, somme non négligeable puisque l'intérêt annuel de 5 pour 100 obtenu sur la somme de 70 000 \$, qui constituait le prix d'achat des droits de superficie, rapportait environ 3 500 \$.

En outre, la Couronne avait déjà pris conscience, bien longtemps auparavant, de la valeur qu'étaient susceptibles de prendre les droits miniers, et, en conséquence, elle les excluait habituellement des concessions qu'elle accordait. Dès 1919, dans la *Loi d'établissement des soldats, 1919*, S.C. 1919, ch. 71, la Couronne fédérale se réservait les mines et les minéraux dans les concessions de terres accordées aux anciens combattants démobilisés. La *Loi des terres fédérales*, S.R.C. 1927, ch. 113, faisait de même à l'égard de toutes les terres fédérales dans les Prairies et dans le district de la rivière de la Paix. Les provinces appliquaient la même politique. Par exemple, la *Land Act* de la Colombie-Britannique, R.S.B.C. 1924, ch. 131, art. 119 et 120, réservait les droits miniers à la Couronne de la Colombie-Britannique dans toutes les concessions de terres provinciales. Par conséquent, les nouvelles terres acquises pour la bande en 1950 n'incluaient pas les droits miniers.

Si tant est que cela était nécessaire, des événements survenus aux environs de 1948 indiquaient que les droits miniers en cause pouvaient avoir une

point of view of revenues from exploration rights. In 1949 interest in further exploration on the land for oil and gas gave rise to negotiations which resulted in a pooling agreement by the veterans in 1952. The Department of Mines and Minerals noted in its 1949 recommendation that gas had been discovered (in 1948) 40 miles south of the reserve and that detailed geological exploration of the reserve was in order. In view of the fact that the 1952 lease was in the same terms as the 1940 lease, the trial judge's suggestion that the 1952 lease constituted the first evidence that the mineral rights could be potentially valuable is difficult to understand. Equally inexplicable is the trial judge's emphasis on the fact that oil was not discovered on the land until 1976 and then only by chance. Those observations do not negate the clear evidence that the potential value of the mineral rights was apparent at a much earlier date. In so far as he confused potential with actual value, the trial judge erred.

valeur considérable, ne serait-ce que du point de vue des revenus émanant des droits d'exploration. En 1949, l'intérêt manifesté en vue de la poursuite de l'exploration des terres visées pour y chercher du pétrole et du gaz donna lieu à des négociations qui aboutirent à la conclusion par les anciens combattants, en 1952, d'un accord de mise en commun. Le ministère des Mines et des Minéraux a noté, dans sa recommandation de 1949, que du gaz avait été découvert (en 1948) à 40 milles au sud de la réserve et qu'il convenait de procéder à une exploration géologique minutieuse de la réserve. Comme les conditions du bail de 1952 étaient les mêmes que celles du bail de 1940, il est difficile de comprendre comment le juge de première instance peut dire que le bail de 1952 constituait le premier élément de preuve indiquant que les droits miniers pouvaient avoir une certaine valeur. Tout aussi inexplicable est l'insistance du juge de première instance sur le fait que ce n'est qu'en 1976 que du pétrole a été découvert sur les terres visées, et encore là, par hasard seulement. Ces observations n'ont pas pour effet de réfuter la preuve manifeste que la valeur potentielle des droits miniers était évidente bien avant cette date. Dans la mesure où il a confondu valeur potentielle et valeur réelle, le juge de première instance a commis une erreur.

102

Secondly, the trial judge's inference from low value of the absence of a duty to reserve the mineral from the 1948 transfer is suspect. If indeed the mineral rights had minimal sale value in 1948, it does not follow that a prudent person would give them away. It is more logical to argue that since nothing could be obtained for them at the time, and since it would cost nothing to keep them, they should be kept against the chance, however remote, that they might acquire some value in the future. The wisdom of the latter course is demonstrated by the Crown's policy with respect to its own mineral rights; it reserved them to itself, regardless of actual value. It lies ill in the mouth of the Crown to argue that it should have done less

Deuxièmement, l'inférence du juge de première instance que, en raison de la faible valeur des droits miniers, il n'y avait aucune obligation de les réserver à l'occasion du transfert de 1948, est douteuse. Si, de fait, les droits miniers n'avaient qu'une valeur de vente minimale en 1948, il ne s'ensuit pas qu'une personne prudente en aurait fait cadeau pour autant. Il est plus logique de prétendre que, comme on ne pouvait rien en tirer à l'époque et qu'il n'en coûtait rien pour les conserver, il fallait les garder au cas où par l'effet de quelque chance, si mince soit-elle, ils prendraient une certaine valeur par la suite. La sagesse de cette dernière solution ressort de la politique de la Couronne à l'égard de ses propres droits miniers. En effet, celle-ci réservait ses droits, indépendamment de leur valeur réelle au moment pertinent. La Couronne est malvenue d'affirmer qu'elle était tenue à

with the property entrusted to it as fiduciary to lease for the welfare of the Band.

The trial judge's emphasis on the apparent low value of the mineral rights suggests an underlying concern with the injustice of conferring an unexpected windfall on the Indians at the Crown's expense. This concern is misplaced. It amounts to bringing foreseeability into the fiduciary analysis through the back door. This constitutes an error of law. The beneficiary of a fiduciary duty is entitled to have his or her property restored or value in its place, even if the value of the property turns out to be much greater than could have been foreseen at the time of the breach: *Hodgkinson v. Simms*, *supra*, at p. 440, *per* La Forest J.

The matter comes down to this. The duty on the Crown as fiduciary was "that of a man of ordinary prudence in managing his own affairs": *Fales v. Canada Permanent Trust Co.*, [1977] 2 S.C.R. 302, at p. 315. A reasonable person does not inadvertently give away a potentially valuable asset which has already demonstrated earning potential. Nor does a reasonable person give away for no consideration what it will cost him nothing to keep and which may one day possess value, however remote the possibility. The Crown managing its own affairs reserved out its minerals. It should have done the same for the Band.

(d) Conclusions on Post-surrender Duty and Breach with Respect to Mineral Rights

I conclude that the 1940 surrender of the mineral rights imposed a fiduciary duty to the Band with respect to the mineral rights under the terms of the 1940 surrender, and that the DIA breached this duty by conveying the mineral rights to the DVLA.

moins en ce qui concerne le bien qui, en sa qualité de fiduciaire, lui avait été confié pour qu'elle le loue pour le bien-être de la bande.

L'insistance du juge de première instance sur la valeur apparemment peu élevée des droits miniers tend à indiquer qu'il craint qu'il y ait injustice à accorder, aux frais de la Couronne, des profits inattendus aux Indiens. Cette crainte est déplacée, car elle revient à introduire subrepticement le critère de la prévisibilité dans l'analyse concernant l'obligation de fiduciaire. Ceci constitue une erreur de droit. Le bénéficiaire d'une obligation de fiduciaire a droit à ce qu'on lui rende son bien ou la valeur de ce bien, et ce même si cette valeur se révèle beaucoup plus élevée que ce qu'il était possible de prévoir au moment du manquement à l'obligation: *Hodgkinson c. Simms*, précité, à la p. 440, le juge La Forest.

Voilà à quoi se résume la question. En tant que fiduciaire, la Couronne avait l'obligation d'agir avec le soin et la diligence «qu'un bon père de famille apporte à l'administration de ses propres affaires»: *Fales c. Canada Permanent Trust Co.*, [1977] 2 R.C.S. 302, à la p. 315. Une personne raisonnable ne se départit pas par inadvertance d'un bien qui peut avoir de la valeur et dont la capacité de produire un revenu a déjà été démontrée. Une personne raisonnable ne se départit pas non plus, sans contrepartie, d'un bien qui ne lui coûte rien à conserver et qui, aussi mince que cette possibilité puisse être, pourrait un jour avoir de la valeur. Dans la gestion de ses propres affaires, la Couronne réservait ses droits miniers. Elle aurait dû faire de même pour la bande.

d) Les conclusions sur l'obligation relative aux droits miniers et postérieure à la cession et sur le manquement à cette obligation

Je conclus que la cession des droits miniers en 1940 a eu pour effet d'imposer, conformément aux conditions de l'acte de cession, une obligation de fiduciaire envers la bande relativement aux droits miniers, et que le MAI a manqué à cette obligation en transférant les droits miniers au DTAC.

105

(4) *Limitations Issues*(4) *Les questions relatives à la prescription des réclamations*

106 The Crown argues that if it breached its fiduciary duty to the Band, by conveying the reserve to the DVLA, the action on the breach is statute-barred. The Bands dispute this contention.

La Couronne prétend que si elle a manqué à son obligation de fiduciaire envers la bande en cédant la réserve au DTAC, l'action relative à ce manquement est prescrite. La bande conteste cette prétention.

107 Section 38(1) of the *Federal Court Act*, R.S.C. 1970 (2nd Supp.), c. 10, which applies to this litigation (now R.S.C., 1985, c. F-7, s. 39(1)), adopts the limitations legislation in place in the province where the cause of action arose. The relevant legislation in British Columbia is the *Limitation Act*, R.S.B.C. 1979, c. 236 (previously S.B.C. 1975, c. 37). Section 8 of that Act places a general ultimate 30-year limitation on any action: no action may be brought after the expiration of 30 years from the date on which the right to do so arose. In addition, s. 3(2) fixes a 10-year limitation on actions for breach of trust, and s. 3(4) places a 6-year limitation on actions which are not listed in the Act. There is no specific limitation in the Act on claims for breach of fiduciary duty. The 6- and 10-year limitations, but not the general 30-year ultimate limitation, may be postponed in certain circumstances. It is important to determine whether these limitations will affect recovery by the plaintiffs.

Le paragraphe 38(1) de la *Loi sur la Cour fédérale*, S.R.C. 1970 (2^e suppl.), ch. 10 (maintenant L.R.C. (1985), ch. F-7, par. 39(1)), qui s'applique au présent litige, précise que ce sont les règles de droit relatives à la prescription en vigueur dans la province où la cause d'action a pris naissance qui s'appliquent. En Colombie-Britannique le texte de loi pertinent est la *Limitation Act*, R.S.B.C. 1979, ch. 236 (auparavant S.B.C. 1975, ch. 37). L'article 8 de cette loi fixe un délai général et final de prescription de 30 ans applicable à toute action: aucune action ne peut être intentée après l'expiration d'un délai de 30 ans qui commence à courir à compter de la date où le droit de le faire a pris naissance. De plus, le par. 3(2) fixe un délai de prescription de 10 ans à l'égard des actions pour abus de confiance («*breach of trust*»), et le par. 3(4) un délai de prescription de 6 ans à l'égard des actions qui ne sont pas énumérées dans la Loi. Aucun délai de prescription particulier n'est fixé à l'égard des réclamations pour manquement à une obligation de fiduciaire. Il est possible, dans certaines circonstances, de reporter le moment où commencent à courir les délais de prescription de 6 et 10 ans, mais non le délai général et final de 30 ans. Il est important de déterminer si ces délais de prescription influenceront sur le droit des demandeurs d'obtenir réparation.

(a) The Sale of Surface Rightsa) La vente des droits de superficie

108 I earlier concluded that no breach of duty with respect to the sale of the surface rights has been proven. If it had been, it would be statute-barred, because the sale to the DVLA took place in March 1948, 30 years and 6 months prior to the filing of this claim in September 1978.

J'ai conclu précédemment que, en ce qui concerne la vente des droits de superficie, aucun manquement à une obligation n'avait été prouvé. D'ailleurs, même si une telle preuve avait été faite, la demande à ce titre aurait été prescrite étant donné que la vente au DTAC a eu lieu en mars 1948, soit 30 ans et 6 mois avant le dépôt de la présente action en septembre 1978.

(b) The Mineral Rights Claims

I earlier concluded that the Crown breached its fiduciary duty to the Band by inadvertently transferring the mineral rights to the DVLA, which in turn transferred them to the veterans who ultimately took up the reserve land. The Crown argues that since the inadvertent transfer was made in March 1948, the action for this breach is barred by the 30-year limitation period.

Against this, the Bands argue that the 1948 transfer to the DVLA was not a transfer at all, but merely an administrative allocation within the bosom of the unified Crown. Thus, the Crown's fiduciary duty continued, although it was transferred for administrative purposes to the DVLA after 1948. Consequently, the cause of action did not arise until the land was alienated from the DVLA to the veterans.

I cannot accept this argument. Although the transfer was from one Crown entity to another, it remained a transfer and an alienation of title. First, the transfer converted the Band's interest from a property interest into a sum of money, suggesting alienation. Second, the continuing fiduciary duty proposed for the DVLA is problematic from a practical point of view. Any duty would have applied, at least in theory, both to the mineral rights and the surface rights. Each sale to a veteran would have required the DVLA to consider not only those matters he was entitled to consider under his Act, but sometimes conflicting matters under the *Indian Act*. This would have made the sale in 1948 pointless from the DVLA's point of view and have rendered it impossible to administer. Moreover, it is not clear that the DVLA had any knowledge of the fiduciary obligations which bound the DIA. In fact, the DVLA and the DIA acted at arms length throughout, as was appropriate given the different interests they represented and the different mandates of their statutes. In summary, the crystallization of the property interest into a monetary sum and the practical consider-

b) Les réclamations visant les droits miniers

J'ai conclu, plus tôt, que la Couronne a manqué à son obligation de fiduciaire envers la bande en transférant par inadvertance les droits miniers au DTAC qui, à son tour, les a transférés aux anciens combattants qui se sont finalement établis sur les terres de la réserve. La Couronne fait valoir que, comme le transfert effectué par inadvertance est survenu en mars 1948, l'action relative à ce manquement est prescrite en raison de l'écoulement du délai de prescription trentenaire.

À l'encontre de cet argument, les bandes allèguent que le transfert de 1948 au DTAC ne constituait aucunement un transfert, mais simplement une affectation de nature administrative au sein de la Couronne unifiée, et donc que l'obligation de fiduciaire de la Couronne a continué d'exister, quoiqu'elle ait été transférée au DTAC, à des fins administratives, après 1948. Par conséquent, la cause d'action n'aurait pris naissance qu'au moment de l'aliénation des terres aux anciens combattants par le DTAC.

Je ne puis accepter cet argument. Même s'il s'agissait d'un transfert entre entités de la Couronne, il y avait néanmoins transfert et aliénation de titre. Premièrement, le transfert a eu pour effet de convertir le droit foncier de la bande en argent, fait qui tend à indiquer qu'il y a eu aliénation. Deuxièmement, l'argument voulant que l'obligation de fiduciaire ait continué d'exister et que le DTAC en ait été débiteur soulève un problème d'ordre pratique. Une telle obligation se serait appliquée, du moins en théorie, tant aux droits miniers qu'aux droits de superficie. À l'occasion de chaque vente à un ancien combattant, le DTAC aurait dû prendre en considération non seulement les facteurs dont il pouvait tenir compte en vertu de sa Loi habilitante, mais également, dans certains cas, d'autres facteurs incompatibles avec les premiers et prévus par la *Loi des Indiens*. Cette situation aurait rendu la vente de 1948 futile du point de vue du DTAC, en plus de rendre impossible l'administration des terres visées. Qui plus est, il n'est pas évident que le DTAC était au courant des obligations de fiduciaire qui liaient le MAI. De fait, le DTAC et le MAI ont agi tout au long des

109

110

111

1995 CanLII 50 (SCC)

ations negating a duty in the DVLA toward the Band negate the suggestion that the 1948 transfer changed nothing and that the real alienation came later.

négociations dans des conditions de pleine concurrence, attitude appropriée vu les intérêts opposés qu'ils représentaient et les mandats différents qui leur étaient confiés par leur loi habilitante respective. En résumé, la transformation du droit foncier en somme d'argent ainsi que les considérations d'ordre pratique faisant obstacle à l'existence d'une obligation du DTAC envers la bande réfutent l'argument que le transfert de 1948 n'avait rien changé et que la véritable aliénation n'est survenue que plus tard.

112 An alternative argument, not considered below, is that the Crown had a statutory ability under s. 64 of the 1927 *Indian Act* to revoke any sale or lease issued in error or mistake, and that it was under a duty to exercise this power to correct the erroneous transfer of the mineral rights to the DVLA. Section 64 empowered the DIA to revoke erroneous sales or leases from the DIA to third parties:

64. If the Superintendent General is satisfied that any purchaser or lessee of any Indian lands, or any person claiming under or through him, has been guilty of any fraud or imposition, or has violated any of the conditions of the sale or lease, or if any such sale or lease has been made or issued in error or mistake, he may cancel such sale or lease and resume the land therein mentioned, or dispose of it as if no sale or lease thereof had ever been made. [Emphasis added.]

Un autre argument, qui n'a pas été examiné devant les juridictions inférieures, est que la Couronne avait, en vertu de l'art. 64 de la *Loi des Indiens* de 1927, le pouvoir d'annuler les ventes ou affermagés conclus par méprise ou par erreur, et qu'elle avait l'obligation d'exercer ce pouvoir pour corriger le transfert des droits miniers accordé par erreur au DTAC. L'article 64 habilitait le MAI à annuler les ventes ou affermagés conclus par erreur avec des tiers par le MAI:

64. Si le surintendant général s'est assuré qu'un acquéreur ou affermataire de terres indiennes, ou qu'un individu revendiquant du chef de ce dernier ou par son fait, s'est rendu coupable de fraude ou de supercherie, ou a enfreint quelque une des conditions de la vente ou de l'affermage, ou si quelque vente a été faite ou si quelque affermage a été accordé par méprise ou par erreur, il peut annuler cette vente ou cet affermage et reprendre possession de la terre y mentionnée, ou en disposer comme si cette vente ou cet affermage n'eût jamais eu lieu. [Je souligne.]

113 The Crown argues that s. 64 does not apply because the mineral rights were not transferred in error. The evidence does not support this contention. As discussed earlier, the transfer has never been described as intentional and has generally been attributed to inadvertence. This constitutes "error or mistake" within s. 64.

La Couronne affirme que l'art. 64 ne s'applique pas parce que les droits miniers n'ont pas été transférés par erreur. La preuve n'appuie pas cette affirmation. Comme il a été indiqué précédemment, le transfert n'a jamais été qualifié d'intentionnel, mais il a généralement été imputé à une inadvertance. Cela constitue une «méprise ou [une] erreur» au sens de l'art. 64.

114 It follows that the DIA had the power to revoke the inadvertent, erroneous grant of the mineral rights to the DVLA up to the time they were transferred to veterans. The remaining questions are whether the DIA was under a duty to use this

Il s'ensuit que le MAI avait le pouvoir d'annuler le transfert des droits miniers qui avait été fait par erreur, en l'occurrence par inadvertance, au DTAC, et ce jusqu'au transfert de ces droits aux anciens combattants. Il reste à déterminer, d'une part, si le

power to revoke the transfer, and how this affects the timing of a breach of fiduciary duty.

In my view, the DIA was under a duty to use this power to rectify errors prejudicing the interests of the Indians as part of its ongoing fiduciary duty to the Indians. The fiduciary duty associated with the administration of Indian lands may have terminated with the sale of the lands in 1948. However, an ongoing fiduciary duty to act to correct error in the best interests of the Indians may be inferred from the exceptional nature of s. 64. That section gave the DIA the power to revoke erroneous grants of land, even as against *bona fide* purchasers. It is not unreasonable to infer that the enactors of the legislation intended the DIA to use that power in the best interests of the Indians. If s. 64 above is not enough to establish a fiduciary obligation to correct the error, it would certainly appear to do so, when read in the context of jurisprudence on fiduciary obligations. Where a party is granted power over another's interests, and where the other party is correspondingly deprived of power over them, or is "vulnerable", then the party possessing the power is under a fiduciary obligation to exercise it in the best interests of the other: *Frame v. Smith*, *supra*, per Wilson J.; and *Hodgkinson v. Simms*, *supra*. Section 64 gave to DIA power to correct the error that had wrongly conveyed the Band's minerals to the DVLA. The Band itself had no such power; it was vulnerable. In these circumstances, a fiduciary duty to correct the error lies.

The DIA's duty was the usual duty of a fiduciary to act with reasonable diligence with respect to the Indians' interest. Reasonable diligence required that the DIA move to correct the erroneous transfer when it came into possession of facts suggesting

MAI avait l'obligation d'exercer ce pouvoir afin d'annuler le transfert, et, d'autre part, de quelle manière cela influe sur le moment où serait survenu un manquement à l'obligation de fiduciaire.

À mon avis, le MAI était tenu d'exercer ce pouvoir pour corriger les erreurs qui portaient préjudice aux intérêts des Indiens vu l'obligation de fiduciaire continue qu'il avait envers ces derniers. Même si l'obligation de fiduciaire touchant l'administration des terres des Indiens a pu cesser au moment de la vente des terres en 1948, on peut néanmoins inférer du caractère exceptionnel de l'art. 64 le maintien d'une obligation de fiduciaire d'agir dans l'intérêt des Indiens afin de corriger une erreur. Cette disposition conférait au MAI le pouvoir d'annuler le transfert de terres en cas d'erreur, même à l'égard d'acheteurs de bonne foi. Il n'est pas déraisonnable d'inférer que le législateur voulait que le MAI exerce ce pouvoir dans l'intérêt des Indiens. Si le texte précité de l'art. 64 ne suffit pas à établir l'existence d'une obligation de fiduciaire de corriger l'erreur, il paraît certainement avoir cet effet lorsqu'on l'interprète en corrélation avec la jurisprudence sur les obligations de fiduciaire. Lorsqu'une partie se voit conférer certains pouvoirs touchant les droits d'une autre partie et que cette dernière se voit privée des pouvoirs en question ou est «vulnérable», la première partie, celle qui détient les pouvoirs, a l'obligation de fiduciaire de les exercer dans l'intérêt de l'autre: *Frame c. Smith*, précité, le juge Wilson; et *Hodgkinson c. Simms*, précité. L'article 64 conférait au MAI le pouvoir de corriger l'erreur qui avait eu pour conséquence de transférer à tort au DTAC les droits miniers de la bande. La bande elle-même ne possédait pas ce pouvoir; elle était vulnérable. Dans de telles circonstances, il existe une obligation de fiduciaire de corriger l'erreur.

L'obligation du MAI était celle qui incombe habituellement à un fiduciaire, c'est-à-dire l'obligation de faire montre de diligence raisonnable à l'égard du droit en cause des Indiens. Pour s'acquitter de cette obligation de diligence raisonnable, le MAI devait prendre les mesures requises pour corriger le transfert fait par erreur, lorsqu'il a pris connaissance de faits tendant à indiquer qu'il y

115

1995 CanLII 50 (SCC)

116

error and the potential value of the minerals that it had erroneously transferred.

avait eu une erreur et que les droits miniers transférés à tort avaient une certaine valeur potentielle.

117 As of July 15, 1949, the DIA was incontrovertibly in possession of information that I.R. 172 had mineral value potential as determined by the Crown's own officials. On July 12, 1949, acting on the assumption that the DIA still owned the mineral rights, Mr. Allan, the Superintendent of Reserves and Trusts, who had been approached by an oil company, requested advice from the Department of Mines and Resources as to whether exploration on I.R. 172 was appropriate. The answer sent on July 15, 1949 is worth quoting:

Natural gas has recently been discovered about 40 miles to the southeast of the St. John Indian Reserve.

In view of this fact and as there has been no detailed geological exploration of this area and more geological information is desirable it is recommended that the Reserve be made available for permit under the Regulations.

According to the letter from Allan to Galibois on August 3, 1949 the exploration revenues would be \$1,800. That letter requests Galibois to get the necessary surrender from the Band (still assuming mineral rights held by the Band). On August 9, 1949 Galibois informed Allan by letter that I.R. 172 had been sold (with the minerals) to the DVLA. In the months that followed, the DIA responded to the DVLA's concerns as to the validity of its title to the mineral rights by confirming that the mineral rights had indeed been passed to the DVLA in 1948. The DIA took no action to have the transfers set aside, as it could have under s. 64 of the *Indian Act*.

Le 15 juillet 1949, le MAI était indiscutablement en possession de renseignements indiquant que la R.I. 172 avait un potentiel minier, ainsi que l'avaient déterminé les propres employés de la Couronne. Le 12 juillet 1949, présumant que le MAI était toujours propriétaire des droits miniers, M. Allan, surintendant des réserves et des fidéi-commis, auprès de qui une société pétrolière avait fait des démarches, a demandé au ministère des Mines et des Ressources s'il ne convenait pas d'explorer la R.I. 172. La réponse, expédiée le 15 juillet 1949, vaut d'être citée:

[TRADUCTION] On a récemment découvert du gaz naturel à environ 40 milles au sud-est de la réserve indienne de St. John.

Compte tenu de ce fait et du fait qu'il n'y a pas eu d'exploration géologique détaillée de cette région et qu'il est souhaitable de recueillir davantage de données géologiques, il est recommandé de délivrer, en vertu de la réglementation applicable, des permis d'exploration visant la réserve.

D'après la lettre datée du 3 août 1949 expédiée par Allan à Galibois, les revenus d'exploration s'élèveraient à 1 800 \$. Dans cette lettre, on demandait à Galibois d'obtenir de la bande la cession nécessaire (toujours à partir de l'hypothèse que les droits miniers étaient détenus par la bande). Le 9 août 1949, Galibois a informé Allan, par lettre, que la R.I. 172 avait été vendue (avec les minéraux) au DTAC. Dans les mois qui ont suivi, le MAI a répondu aux préoccupations exprimées par le DTAC quant à la validité de son titre sur les droits miniers et lui a confirmé que ces droits avaient bel et bien été transférés au DTAC en 1948. Le MAI n'a pris aucune mesure pour faire annuler les transferts, comme il aurait pu le faire en vertu de l'art. 64 de la *Loi des Indiens*.

118 I conclude that the Crown, having first breached its fiduciary duty to the Indians by transferring the minerals to the DVLA, committed a second breach by failing to correct the error on August 9, 1949 when it learned of the error's existence and the potential value of the mineral rights.

Je conclus que la Couronne, qui avait initialement manqué à son obligation de fiduciaire envers les Indiens en transférant les minéraux au DTAC, a commis un deuxième manquement en omettant de corriger l'erreur en question le 9 août 1949, lorsqu'elle a appris l'existence de cette erreur et de la valeur potentielle des droits miniers.

This action was filed on September 18, 1978. Any losses stemming from transfers after August 9, 1949, are therefore still permissible under the s. 8 general limitation. As of this date, 6.75 sections of the 31 transferred to the DVLA remained in the hands of the DVLA. Had the DIA discharged its duty to the Indians, the mineral title would have been returned to them. Instead, mineral title was passed on to the veterans, and in the case of 2.5 sections, directly conveyed to oil companies to the credit of the Consolidated Revenue Fund.

The remaining issue is whether those claims regarding mineral rights which survive the 30-year limitation period are barred by other limitation periods. The parties treated this action as falling under s. 3(4) of the B.C. *Limitation Act* which prescribes a 6-year limitation for "[a]ny other action not specifically provided for". I am content to do the same.

Clearly the action, commenced in 1978, falls well beyond 6 years from the agreements for sale with the veterans, which took place between 1948 and 1956. However, that is not the end of the matter. Section 6(3) of the *Limitation Act* provides:

6. . . .

(3) The running of time with respect to the limitation periods fixed by this Act for an action

(e) in which material facts relating to the cause of action have been wilfully concealed;

is postponed and time does not commence to run against a plaintiff until . . . those facts within his means of knowledge are such that a reasonable man, knowing those facts and having taken the appropriate advice a reasonable man would seek on those facts, would regard those facts as showing that

La présente action a été déposée le 18 septembre 1978. Toutes les pertes découlant des transferts faits après le 9 août 1949 donnent donc ouverture à action compte tenu du délai de prescription général prévu par l'art. 8. À cette date, 6,75 des 31 lots transférés au DTAC étaient encore entre les mains de ce dernier. Si le MAI s'était acquitté de son obligation envers les Indiens, le titre relatif aux droits miniers leur aurait été remis. Au contraire, ce titre a plutôt été transféré aux anciens combattants et, dans le cas de 2,5 lots, il a été cédé directement à des sociétés pétrolières, et le produit de la cession a été porté au crédit du Trésor.

Il reste à se demander si les réclamations concernant les droits miniers qui subsistent à l'application du délai de prescription trentenaire ne sont pas prescrites par d'autres délais. Les parties ont considéré que la présente action est visée par le par. 3(4) de la *Limitation Act* de la Colombie-Britannique, qui fixe un délai de prescription de 6 ans à l'égard de [TRADUCTION]«[t]oute autre action non expressément prévue». Je me borne à faire de même.

Il est évident que l'action qui a été intentée en 1978, dépasse de beaucoup le délai de 6 ans qui a commencé à courir à compter des conventions de vente conclues avec les anciens combattants entre 1948 et 1956. Toutefois, cela ne met pas fin pour autant à la question. En effet, le par. 6(3) de la *Limitation Act* précise ce qui suit:

[TRADUCTION] 6. . . .

(3) Le délai de prescription fixé par la présente loi à l'égard d'une action concernant

e) des faits importants se rapportant à la cause d'action qui ont délibérément été dissimulés;

ne commence à courir qu'au moment où [. . .] les faits, qu'il [le demandeur] est en mesure de connaître, sont tels qu'une personne raisonnable, connaissant ces faits et ayant reçu les conseils appropriés qu'une personne raisonnable aurait demandés à leur égard, estimerait qu'ils montrent:

- (i) an action on the cause of action would, apart from the effect of the expiration of a limitation period, have a reasonable prospect of success; and
- (j) the person whose means of knowledge is in question ought, in his own interests and taking his circumstances into account, to be able to bring an action.

This section and its equivalents elsewhere embrace a broad definition of discoverability: see *M. (K.) v. M. (H.)*, [1992] 3 S.C.R. 6. The facts in the case at bar fall within it. Until approached by a member of the DIA in 1977, the Bands were ignorant of critical facts in the exclusive possession of the Crown: the fact that the mineral rights were transferred to the DVLA for no consideration; the fact that the DVLA had no right to that transfer; and the fact that the Crown had in its possession knowledge of its error and the potential value of the mineral rights while it was still within its power to rectify the error. The Bands became aware of the true facts only in 1977, placing their writ well within the applicable limitation period of 6 years.

- i) qu'une action fondée sur la cause d'action aurait, si ce n'était de l'expiration du délai de prescription, des chances de succès raisonnables,
- j) que la personne qui est en mesure de connaître les faits devrait, dans son propre intérêt et compte tenu des circonstances, être capable d'intenter une action.

Ce paragraphe et les dispositions équivalentes applicables ailleurs sont fondées sur une définition libérale de la notion de découverte du préjudice, voir l'arrêt *M. (K.) c. M. (H.)*, [1992] 3 R.C.S. 6. Les faits de la présente espèce entrent dans le champ d'application de cette définition. Jusqu'à ce qu'un fonctionnaire du MAI communique avec elles en 1977, les bandes n'étaient pas au courant de faits essentiels que la Couronne était la seule à connaître: savoir que les droits miniers avaient été transférés au DTAC sans contrepartie, que le DTAC n'avait pas droit à ce transfert et que la Couronne était au courant de son erreur et de la valeur potentielle des droits miniers, alors qu'elle avait encore le pouvoir de corriger cette erreur. Comme les bandes n'ont appris les faits véritables qu'en 1977, leur action a été intentée bien à l'intérieur du délai de prescription de 6 ans applicable.

122 Other arguments, neither presented nor considered below, were presented by the Bands and interveners in support of relaxing or not applying the limitation periods prescribed by the *Limitation Act* of British Columbia. I find them unpersuasive in the context of this case and consider them no further.

III. Conclusion

123 I would allow the appeal and set aside the judgments below. The Bands are entitled to damages against the Crown for breach of fiduciary duty with respect to such mineral rights as were conveyed by agreement for sale after August 9, 1949. I would also allow the cross-appeal, for the reasons given above. I would award costs to the appellants on the appeal. Since the cross-appeal was as to rea-

Les bandes et les intervenants ont avancé d'autres arguments, qui n'ont pas été présentés et examinés devant les juridictions inférieures et qui visent à obtenir l'assouplissement ou la non-application des délais de prescription prévus par la *Limitation Act* de la Colombie-Britannique. Comme je ne considère pas les arguments convaincants dans le contexte du présent pourvoi, je ne m'y attarderai pas davantage.

III. Conclusion

Je suis d'avis d'accueillir le pourvoi et d'annuler les décisions des juridictions inférieures. Les bandes ont droit à des dommages-intérêts de la part de la Couronne par suite du manquement de celle-ci à l'obligation de fiduciaire qui lui incombait relativement aux droits miniers qui ont été cédés par actes de vente après le 9 août 1949. Je suis également d'avis, pour les motifs qui précèdent, d'accueillir le pourvoi incident. J'accorderais aux appelants leurs dépens dans le cadre du pourvoi. Comme le pourvoi incident ne portait que sur les

sons only and did not affect the result, I would make no order of costs on the cross-appeal.

Appeal allowed with costs and cross-appeal allowed.

EN APPEL DE LA COUR D'APPEL DE LA COLOMBIE-BRITANNIQUE

Droit constitutionnel — Droits ancestraux — Titre aborigène sur des terres — Revendication d'un vaste territoire — Contenu du titre aborigène — Comment l'art. 35(1) de la Loi constitutionnelle de 1982 protège-

*Le juge Sopinka n'a pas pris part au jugement.

prove aboriginal title — Whether claim to self-government made out — Whether province could extinguish aboriginal rights after 1871, either under own jurisdiction or through the operation of s. 88 of the Indian Act (incorporating provincial laws of general application by reference) — Constitution Act, 1982, s. 35(1) — Indian Act, R.S.C., 1985, c. I-5, s. 88.

Constitutional law — Aboriginal rights — Aboriginal land title — Evidence — Oral history and native law and tradition — Weight to be given evidence — Ability of Court to interfere with trial judge's factual findings.

Courts — Procedure — Land claims — Aboriginal title and self-government — Claim altered but no formal amendments to pleadings made — Whether pleadings precluded the Court from entertaining claims.

The appellants, all Gitksan or Wet'suwet'en hereditary chiefs, both individually and on behalf of their "Houses", claimed separate portions of 58,000 square kilometres in British Columbia. For the purpose of the claim, this area was divided into 133 individual territories, claimed by the 71 Houses. This represents all of the Wet'suwet'en people, and all but 12 of the Gitksan Houses. Their claim was originally for "ownership" of the territory and "jurisdiction" over it. (At this Court, this was transformed into, primarily, a claim for aboriginal title over the land in question.) British Columbia counterclaimed for a declaration that the appellants have no right or interest in and to the territory or alternatively, that the appellants' cause of action ought to be for compensation from the Government of Canada.

At trial, the appellants' claim was based on their historical use and "ownership" of one or more of the territories. In addition, the Gitksan Houses have an "adaawk" which is a collection of sacred oral tradition about their ancestors, histories and territories. The Wet'suwet'en each have a "kungax" which is a spiritual song or dance or performance which ties them to their land. Both of these were entered as evidence on behalf of the appellants. The most significant evidence of spiritual connection between the Houses and their territory

t-il le titre aborigène? — Quels sont les éléments de preuve requis pour établir le titre aborigène? — Le bien-fondé de la revendication de l'autonomie gouvernementale a-t-il été établi? — La province pouvait-elle, après 1871, éteindre des droits ancestraux soit par l'exercice de sa propre compétence soit par l'effet de l'art. 88 de la Loi sur les Indiens (qui incorpore par renvoi les lois provinciales d'application générale)? — Loi constitutionnelle de 1982, art. 35(1) — Loi sur les Indiens, L.R.C. (1985), ch. I-5, art. 88.

Droit constitutionnel — Droits ancestraux — Titre aborigène sur des terres — Preuve — Récits oraux et règles de droit et traditions autochtones — Poids à donner aux éléments de preuve — Pouvoir d'intervention de la Cour quant aux conclusions de fait du juge de première instance.

Tribunaux — Procédure — Revendications territoriales — Titre aborigène et autonomie gouvernementale — Revendication modifiée mais sans modification formelle des actes de procédure — Les actes de procédure empêchent-ils la Cour d'entendre les revendications?

Les appelants, tous des chefs héréditaires Wet'suwet'en ou Gitksan, revendiquent tant en leur propre nom qu'au nom de leurs «maisons» des parties distinctes d'un territoire de 58 000 kilomètres carrés situé en Colombie-Britannique. Aux fins de la revendication, ce grand territoire a été divisé en 133 territoires distincts, revendiqués par les 71 maisons. Y sont représentés tous les Wet'suwet'en et toutes les maisons Gitksan, à l'exception de 12. Initialement, les appelants revendiquaient la «propriété» du territoire et la «compétence» sur celui-ci. (Devant la Cour, cette revendication a changé et est devenue principalement la revendication d'un titre aborigène sur le territoire en question.) La Colombie-Britannique a présenté une demande reconventionnelle dans laquelle elle sollicite une déclaration portant que les appelants n'ont aucun droit ou intérêt dans le territoire, ou, subsidiairement, que la cause d'action des appelants devrait être l'obtention d'une indemnité de la part du gouvernement du Canada.

Au procès, les appelants ont fondé leur revendication sur la «propriété» et l'utilisation historiques d'un ou de plusieurs des territoires. En outre, les maisons Gitksan ont un «adaawk», c'est-à-dire un ensemble de traditions orales sacrées au sujet de leurs ancêtres, de leur histoire et de leurs territoires. Chaque maison Wet'suwet'en possède un «kungax», c'est-à-dire un chant, une danse ou une représentation spirituelle qui les rattache à leur territoire. Ces deux éléments ont été déposés en preuve au nom des appelants. Le signe le plus important du lien

was a feast hall where the Gitksan and Wet'suwet'en peoples tell and retell their stories and identify their territories to remind themselves of the sacred connection that they have with their lands. The feast has a ceremonial purpose but is also used for making important decisions.

The trial judge did not accept the appellants' evidence of oral history of attachment to the land. He dismissed the action against Canada, dismissed the plaintiffs' claims for ownership and jurisdiction and for aboriginal rights in the territory, granted a declaration that the plaintiffs were entitled to use unoccupied or vacant land subject to the general law of the province, dismissed the claim for damages and dismissed the province's counterclaim. No order for costs was made. On appeal, the original claim was altered in two different ways. First, the claims for ownership and jurisdiction were replaced with claims for aboriginal title and self-government, respectively. Second, the individual claims by each House were amalgamated into two communal claims, one advanced on behalf of each nation. There were no formal amendments to the pleadings to this effect. The appeal was dismissed by a majority of the Court of Appeal.

The principal issues on the appeal, some of which raised a number of sub-issues, were as follows: (1) whether the pleadings precluded the Court from entertaining claims for aboriginal title and self-government; (2) what was the ability of this Court to interfere with the factual findings made by the trial judge; (3) what is the content of aboriginal title, how is it protected by s. 35(1) of the *Constitution Act, 1982*, and what is required for its proof; (4) whether the appellants made out a claim to self-government; and, (5) whether the province had the power to extinguish aboriginal rights after 1871, either under its own jurisdiction or through the operation of s. 88 of the *Indian Act*.

Held: The appeal should be allowed in part and the cross-appeal should be dismissed.

spirituel entre les différentes maisons et leur territoire est la salle des célébrations. C'est là que les Wet'suwet'en et les Gitksan disent et redisent leurs récits et identifient leurs territoires afin de se rappeler le lien sacré qu'ils entretiennent avec leurs terres. Ces célébrations ont une fin rituelle, mais elles sont aussi l'occasion de prise de décisions importantes.

Le juge de première instance n'a pas accepté les récits oraux que les appelants présentaient comme éléments de preuve de leur attachement au territoire. Il a rejeté l'action contre le Canada, il a rejeté les revendications, par les demandeurs, de la propriété du territoire, de la compétence sur celui-ci ou de droits ancestraux à son égard, il a accordé une déclaration portant que les demandeurs avaient le droit d'utiliser toute terre inoccupée ou vacante, sous réserve du respect des lois d'application générale de la province, il a rejeté la demande de dommages-intérêts et il a rejeté la demande reconventionnelle de la province. Il n'a rendu aucune ordonnance concernant les dépens. En appel, la revendication initiale a été modifiée de deux façons. Premièrement, les revendications relatives à la propriété des territoires et à la compétence sur ceux-ci ont été remplacées respectivement par la revendication du titre aborigène et la revendication de l'autonomie gouvernementale. Deuxièmement, les revendications individuelles présentées par chaque maison ont été fusionnées en deux revendications collectives, une au nom de chaque nation. Aucune modification en ce sens n'a été apportée formellement aux actes de procédure. L'appel a été rejeté par la Cour d'appel à la majorité.

Les principales questions dans le pourvoi sont les suivantes: (1) Les actes de procédure empêchent-ils la Cour d'examiner les revendications relatives au titre aborigène et à l'autonomie gouvernementale? (2) Quel pouvoir notre Cour a-t-elle de modifier les conclusions de fait du juge de première instance? (3) Quel est le contenu du titre aborigène, comment est-il protégé par le par. 35(1) de la *Loi constitutionnelle de 1982* et comment fait-on la preuve de son existence? (4) Les appelants ont-ils établi le bien-fondé de leur revendication de l'autonomie gouvernementale? (5) La province avait-elle, après 1871, le pouvoir d'éteindre des droits ancestraux soit par l'exercice de sa propre compétence soit par l'effet de l'art. 88 de la *Loi sur les Indiens*?

Arrêt: Le pourvoi est accueilli en partie et le pourvoi incident est rejeté.

Whether the Claims Were Properly Before the Court

Per Lamer C.J. and Cory, McLachlin, and Major J.J.: The claims were properly before the Court. Although the pleadings were not formally amended, the trial judge did allow a *de facto* amendment to permit a claim for aboriginal rights other than ownership and jurisdiction. The respondents did not appeal this *de facto* amendment and the trial judge's decision on this point must accordingly stand.

No amendment was made with respect to the amalgamation of the individual claims brought by the individual Gitksan and Wet'suwet'en Houses into two collective claims, one by each nation, for aboriginal title and self-government. The collective claims were simply not in issue at trial and to frame the case on appeal in a different manner would retroactively deny the respondents the opportunity to know the appellants' case.

A new trial is necessary. First, the defect in the pleadings prevented the Court from considering the merits of this appeal. The parties at a new trial would decide whether any amendment was necessary to make the pleadings conform with the other evidence. Then, too, appellate courts, absent a palpable and overriding error, should not substitute their own findings of fact even when the trial judge misapprehended the law which was applied to those facts. Appellate intervention is warranted, however, when the trial court fails to appreciate the evidentiary difficulties inherent in adjudicating aboriginal claims when applying the rules of evidence and interpreting the evidence before it.

Per La Forest and L'Heureux-Dubé J.J.: The amalgamation of the appellants' individual claims technically prevents a consideration of the merits. However, there is a more substantive problem with the pleadings. The appellants sought a declaration of "aboriginal title" but attempted, in essence, to prove that they had complete control over the territory. It follows that what the appellants sought by way of declaration and what they set out

La Cour était-elle régulièrement saisie des revendications?

Le juge en chef Lamer et les juges Cory, McLachlin et Major: La Cour était régulièrement saisie des revendications. Même si les actes de procédure n'ont pas été formellement modifiés, le juge de première instance a bel et bien accepté une modification *de facto* pour permettre la revendication de droits ancestraux autres que la propriété et la compétence. Les intimés n'ont pas interjeté appel contre cette modification *de facto* et la décision du juge de première instance sur ce point doit être maintenue.

Aucune modification n'a été apportée en ce qui a trait à la fusion des revendications individuelles présentées par les maisons Wet'suwet'en et Gitksan en deux revendications collectives, une pour chaque nation, sollicitant un titre aborigène et l'autonomie gouvernementale. Les revendications collectives n'étaient tout simplement pas en litige en première instance, et redéfinir le litige en appel aurait pour effet de nier rétroactivement aux intimés la possibilité de savoir quelle est la cause des appelants.

Il est nécessaire de tenir un nouveau procès. Premièrement, le vice dans les actes de procédure a empêché la Cour d'examiner le fond du pourvoi. Il reviendra aux parties à un nouveau procès de se demander si une modification est nécessaire pour rendre les actes de procédure conformes à la preuve. En outre, sauf erreur manifeste et dominante, les cours d'appel ne devraient pas substituer leurs propres conclusions de fait à celles du juge de première instance, même lorsque ce dernier a mal saisi le droit qu'il a appliqué aux faits en question. Par contre, une cour d'appel est justifiée d'intervenir dans le cas où le juge de première instance n'a pas tenu compte des difficultés de preuve inhérentes à l'examen des revendications de droits ancestraux, lorsqu'il a appliqué les règles de preuve et a interprété la preuve qui lui était présentée.

Les juges La Forest et L'Heureux-Dubé: La fusion des revendications individuelles des appelants a empêché, sur le plan de la forme, la Cour d'examiner le fond de l'affaire. Cependant, les actes de procédure posent un problème encore plus substantiel. Même si les appelants ont sollicité un jugement déclarant l'existence d'un «titre aborigène», ils ont essentiellement tenté d'établir qu'ils exerçaient un contrôle complet sur le territoire en question. Il s'ensuit que ce que les appelants ont demandé à la Cour de leur reconnaître, par voie de jugement déclaratoire, et ce qu'ils se sont efforcés d'établir

to prove by way of the evidence were two different matters. A new trial should be ordered.

McLachlin J. was in substantial agreement.

The Ability of the Court to Interfere with the Trial Judge's Factual Findings

Per Lamer C.J. and Cory, McLachlin and Major J.J.: The factual findings made at trial could not stand because the trial judge's treatment of the various kinds of oral histories did not satisfy the principles laid down in *R. v. Van der Peet*. The oral histories were used in an attempt to establish occupation and use of the disputed territory which is an essential requirement for aboriginal title. The trial judge refused to admit or gave no independent weight to these oral histories and then concluded that the appellants had not demonstrated the requisite degree of occupation for "ownership". Had the oral histories been correctly assessed, the conclusions on these issues of fact might have been very different.

The Content of Aboriginal Title, How It Is Protected by s. 35(1) of the Constitution Act, 1982, and the Requirements Necessary to Prove It

Per Lamer C.J. and Cory, McLachlin and Major J.J.: Aboriginal title encompasses the right to exclusive use and occupation of the land held pursuant to that title for a variety of purposes, which need not be aspects of those aboriginal practices, customs and traditions which are integral to distinctive aboriginal cultures. The protected uses must not be irreconcilable with the nature of the group's attachment to that land.

Aboriginal title is *sui generis*, and so distinguished from other proprietary interests, and characterized by several dimensions. It is inalienable and cannot be transferred, sold or surrendered to anyone other than the Crown. Another dimension of aboriginal title is its sources: its recognition by the *Royal Proclamation, 1763* and the relationship between the common law which recognizes occupation as proof of possession and systems of aboriginal law pre-existing assertion of British sovereignty. Finally, aboriginal title is held communally.

par la preuve, étaient deux choses différentes. La tenue d'un nouveau procès doit être ordonnée.

Le juge McLachlin est largement en accord avec ces motifs.

Le pouvoir de la Cour de modifier les conclusions de fait du juge de première instance

Le juge en chef Lamer et les juges Cory, McLachlin et Major: Les conclusions de fait tirées en première instance ne pouvaient être maintenues en raison du fait que le traitement accordé aux divers types de récits oraux par le juge de première instance ne respecte pas les principes établis dans *R. c. Van der Peet*. Ces récits ont été invoqués pour tenter d'établir l'occupation et l'utilisation du territoire contesté, condition essentielle à l'existence du titre aborigène. Après avoir refusé d'admettre ces récits oraux ou de leur accorder quelque valeur probante indépendante que ce soit, le juge de première instance est arrivé à la conclusion que les appelants n'avaient pas démontré l'existence du degré d'occupation requis du territoire pour fonder la «propriété» de celui-ci. Si le juge du procès avait apprécié correctement les récits oraux, ses conclusions sur ces questions de fait auraient pu être très différentes.

Le contenu du titre aborigène, la façon dont il est protégé par le par. 35(1) de la Loi constitutionnelle de 1982 et les exigences en matière de preuve de son existence

Le juge en chef Lamer et les juges Cory, McLachlin et Major: Le titre aborigène comprend le droit d'utiliser et d'occuper de façon exclusive les terres détenues en vertu de ce titre pour différentes fins qui ne doivent pas nécessairement être des aspects de coutumes, pratiques et traditions autochtones faisant partie intégrante d'une culture autochtone distinctive. Ces utilisations protégées ne doivent pas être incompatibles avec la nature de l'attachement qu'a le groupe concerné pour ces terres.

Le titre aborigène est un droit *sui generis*; il se distingue de ce fait des autres intérêts de propriété et est caractérisé par différentes dimensions. Le titre aborigène est inaliénable et ne peut être transféré, cédé ou vendu à personne d'autre que la Couronne. Les origines du titre aborigène constituent une autre dimension de celui-ci: sa reconnaissance par la *Proclamation royale de 1763* et le rapport entre la common law, qui reconnaît l'occupation comme preuve de la possession en droit, et les systèmes juridiques autochtones qui existaient avant l'affirmation de la souveraineté britannique. Finalement, le titre aborigène est détenu collectivement.

The exclusive right to use the land is not restricted to the right to engage in activities which are aspects of aboriginal practices, customs and traditions integral to the claimant group's distinctive aboriginal culture. Canadian jurisprudence on aboriginal title frames the "right to occupy and possess" in broad terms and, significantly, is not qualified by the restriction that use be tied to practice, custom or tradition. The nature of the Indian interest in reserve land which has been found to be the same as the interest in tribal lands is very broad and incorporates present-day needs. Finally, aboriginal title encompasses mineral rights and lands held pursuant to aboriginal title should be capable of exploitation. Such a use is certainly not a traditional one.

The content of aboriginal title contains an inherent limit in that lands so held cannot be used in a manner that is irreconcilable with the nature of the claimants' attachment to those lands. This inherent limit arises because the relationship of an aboriginal community with its land should not be prevented from continuing into the future. Occupancy is determined by reference to the activities that have taken place on the land and the uses to which the land has been put by the particular group. If lands are so occupied, there will exist a special bond between the group and the land in question such that the land will be part of the definition of the group's distinctive culture. Land held by virtue of aboriginal title may not be alienated because the land has an inherent and unique value in itself, which is enjoyed by the community with aboriginal title to it. The community cannot put the land to uses which would destroy that value. Finally, the importance of the continuity of the relationship between an aboriginal community and its land, and the non-economic or inherent value of that land, should not be taken to detract from the possibility of surrender to the Crown in exchange for valuable consideration. On the contrary, the idea of surrender reinforces the conclusion that aboriginal title is limited. If aboriginal peoples wish to use their lands in a way that aboriginal title does not permit, then they must surrender those lands and convert them into non-title lands to do so.

Aboriginal title at common law was recognized well before 1982 and is accordingly protected in its full form by s. 35(1). The constitutionalization of common law aboriginal rights, however, does not mean that those rights exhaust the content of s. 35(1). The existence of an aboriginal right at common law is sufficient, but not

Le droit exclusif d'utiliser les terres ne comprend pas simplement le droit d'exercer des activités qui sont des aspects de coutumes, pratiques et traditions autochtones faisant partie intégrante de la culture distinctive du groupe autochtone qui revendique le droit. La jurisprudence canadienne relative au titre aborigène définit le «droit d'occuper et de posséder» en termes généraux et, fait important, ne l'assortit pas d'une réserve le limitant aux utilisations liées à des coutumes, pratiques ou traditions. La nature du droit des Indiens sur les terres des réserves, qui a été déclaré être le même que leur droit sur les terres tribales, est très générale et intègre les besoins actuels des collectivités autochtones. Finalement, le titre aborigène comprend les droits miniers, et les terres détenues en vertu d'un titre aborigène devraient pouvoir être exploitées pour ces ressources, ce qui ne constitue certes pas une utilisation traditionnelle.

Le contenu du titre aborigène comporte une limite intrinsèque, savoir que les terres détenues en vertu d'un titre aborigène ne peuvent pas être utilisées d'une manière incompatible avec la nature de l'attachement qu'ont les revendicateurs pour ces terres. Cette limite intrinsèque découle du fait que rien ne devrait empêcher ce rapport de continuer dans le futur. L'occupation est définie en fonction des activités qui ont été exercées sur les terres et des utilisations qui ont été faites de celles-ci par le groupe en question. Si des terres font l'objet d'une telle occupation, il existera entre ce groupe et les terres visées un lien spécial tel que les terres feront partie intégrante de la définition de la culture distinctive du groupe. Les terres détenues en vertu d'un titre aborigène sont inaliénables parce qu'elles ont en elles-mêmes une valeur intrinsèque et unique dont jouit la collectivité qui possède le titre aborigène sur celles-ci. La collectivité ne peut pas faire de ces terres des utilisations qui détruiraient cette valeur. Enfin, l'importance de la continuité du rapport qu'entretient une collectivité autochtone avec ses terres et la valeur non économique ou intrinsèque de celles-ci ne devraient pas être considérées comme faisant obstacle à la possibilité d'une cession à la Couronne moyennant contrepartie de valeur. Au contraire, l'idée de cession renforce la conclusion que le titre aborigène est limité. Si les autochtones désirent utiliser leurs terres d'une manière que ne permet pas le titre, ils doivent alors les céder et les convertir en terres non visées par un titre aborigène.

Le titre aborigène a été reconnu en common law bien avant 1982 et est par conséquent protégé dans sa forme complète par le par. 35(1). Toutefois, la constitutionnalisation par le par. 35(1) des droits ancestraux reconnus en common law ne signifie pas que ces droits épuisent le contenu du par. 35(1). L'existence d'un droit ancestral

necessary, for the recognition and affirmation of that right by s. 35(1).

Constitutionally recognized aboriginal rights fall along a spectrum with respect to their degree of connection with the land. At the one end are those aboriginal rights which are practices, customs and traditions integral to the distinctive aboriginal culture of the group claiming the right but where the use and occupation of the land where the activity is taking place is not sufficient to support a claim of title to the land. In the middle are activities which, out of necessity, take place on land and indeed, might be intimately related to a particular piece of land. Although an aboriginal group may not be able to demonstrate title to the land, it may nevertheless have a site-specific right to engage in a particular activity. At the other end of the spectrum is aboriginal title itself which confers more than the right to engage in site-specific activities which are aspects of the practices, customs and traditions of distinctive aboriginal cultures. Site-specific rights can be made out even if title cannot. Because aboriginal rights can vary with respect to their degree of connection with the land, some aboriginal groups may be unable to make out a claim to title, but will nevertheless possess aboriginal rights that are recognized and affirmed by s. 35(1), including site-specific rights to engage in particular activities.

Aboriginal title is a right to the land itself. That land may be used, subject to the inherent limitations of aboriginal title, for a variety of activities, none of which need be individually protected as aboriginal rights under s. 35(1). Those activities are parasitic on the underlying title. Section 35(1), since its purpose is to reconcile the prior presence of aboriginal peoples with the assertion of Crown sovereignty, must recognize and affirm both aspects of that prior presence — first, the occupation of land, and second, the prior social organization and distinctive cultures of aboriginal peoples on that land.

The test for the identification of aboriginal rights to engage in particular activities and the test for the identification of aboriginal title, although broadly similar, are

reconnu en common law est donc suffisante, mais pas nécessaire, pour la reconnaissance et la confirmation de ce droit par le par. 35(1).

Les droits ancestraux reconnus et confirmés par le par. 35(1) s'étalent le long d'un spectre, en fonction de leur degré de rattachement avec le territoire visé. À une extrémité du spectre, il y a le cas des droits ancestraux qui sont des coutumes, pratiques et traditions faisant partie intégrante de la culture autochtone distinctive du groupe qui revendique le droit en question mais où l'occupation et l'utilisation du territoire sur lequel l'activité est pratiquée sont insuffisantes pour étayer la revendication du titre sur celui-ci. Au milieu du spectre, on trouve les activités qui, par nécessité, sont pratiquées sur le territoire et, de fait, pourraient même être étroitement rattachées à une parcelle de terrain particulière. Bien qu'un groupe autochtone puisse être incapable de démontrer l'existence d'un titre sur le territoire, il peut quand même avoir le droit — spécifique à un site — de s'adonner à une activité particulière. À l'autre extrémité du spectre, il y a le titre aborigène proprement dit, qui confère quelque chose de plus que le droit d'exercer des activités spécifiques à un site qui sont des aspects de coutumes, pratiques et traditions de cultures autochtones distinctives. L'existence de droits spécifiques à un site peut être établie même si l'existence d'un titre ne peut pas l'être. Étant donné que les droits ancestraux peuvent varier en fonction de leur degré de rattachement au territoire, il est possible que certains groupes autochtones soient incapables d'établir le bien-fondé de leur revendication d'un titre, mais qu'ils possèdent néanmoins des droits ancestraux reconnus et confirmés par le par. 35(1), notamment des droits spécifiques à un site d'exercer des activités particulières.

Le titre aborigène est le droit au territoire lui-même. Sous réserve des limites inhérentes au titre aborigène, ce territoire peut être utilisé pour diverses activités, dont aucune ne doit nécessairement être protégée individuellement en tant que droit ancestral prévu au par. 35(1). Ces activités sont des parasites du titre sous-jacent. Comme l'objet du par. 35(1) est de concilier la présence antérieure des peuples autochtones en Amérique du Nord avec l'affirmation de la souveraineté de la Couronne, cette disposition doit reconnaître et confirmer les deux aspects de cette préexistence, savoir l'occupation du territoire, d'une part, et l'organisation sociale antérieure et les cultures distinctives des peuples autochtones habitant ce territoire, d'autre part.

Bien que le critère applicable pour déterminer l'existence de droits ancestraux autorisant l'exercice d'activités particulières et le critère applicable pour détermi-

distinct in two ways. First, under the test for aboriginal title, the requirement that the land be integral to the distinctive culture of the claimants is subsumed by the requirement of occupancy. Second, whereas the time for the identification of aboriginal rights is the time of first contact, the time for the identification of aboriginal title is the time at which the Crown asserted sovereignty over the land.

In order to establish a claim to aboriginal title, the aboriginal group asserting the claim must establish that it occupied the lands in question at the time at which the Crown asserted sovereignty over the land subject to the title. In the context of aboriginal title, sovereignty is the appropriate time period to consider for several reasons. First, from a theoretical standpoint, aboriginal title arises out of prior occupation of the land by aboriginal peoples and out of the relationship between the common law and pre-existing systems of aboriginal law. Aboriginal title is a burden on the Crown's underlying title. The Crown, however, did not gain this title until it asserted sovereignty and it makes no sense to speak of a burden on the underlying title before that title existed. Aboriginal title crystallized at the time sovereignty was asserted. Second, aboriginal title does not raise the problem of distinguishing between distinctive, integral aboriginal practices, customs and traditions and those influenced or introduced by European contact. Under common law, the act of occupation or possession is sufficient to ground aboriginal title and it is not necessary to prove that the land was a distinctive or integral part of the aboriginal society before the arrival of Europeans. Finally, the date of sovereignty is more certain than the date of first contact.

Both the common law and the aboriginal perspective on land should be taken into account in establishing the proof of occupancy. At common law, the fact of physical occupation is proof of possession at law, which in turn will ground title to the land. Physical occupation may be established in a variety of ways, ranging from the construction of dwellings through cultivation and enclosure of fields to regular use of definite tracts of land for hunting, fishing or otherwise exploiting its resources. In considering whether occupation sufficient

ner l'existence d'un titre aborigène comportent de grandes similitudes, ils se distinguent l'un de l'autre de deux façons: premièrement, dans le cadre du critère relatif au titre aborigène, l'exigence que le territoire fasse partie intégrante de la culture distincte des demandeurs est subsumée sous l'exigence d'occupation; deuxièmement, alors que c'est le moment du premier contact avec les Européens qui est le moment pertinent pour la détermination des droits ancestraux, dans le cas du titre aborigène, c'est le moment de l'affirmation par la Couronne de sa souveraineté sur le territoire.

Pour établir le bien-fondé de la revendication d'un titre aborigène, le groupe autochtone qui revendique le titre doit démontrer qu'il occupait les terres en question au moment où la Couronne a affirmé sa souveraineté sur ces terres. Lorsqu'il est question de titre aborigène, la période de l'affirmation de la souveraineté est celle qui doit être prise en considération, et ce pour plusieurs raisons. Premièrement, d'un point de vue théorique, le titre aborigène découle de l'occupation antérieure du territoire par les peuples autochtones et du rapport entre la common law et les régimes juridiques autochtones préexistants. Le titre aborigène grève le titre sous-jacent de la Couronne. Cependant, celle-ci n'a acquis ce titre qu'à compter du moment où elle a affirmé sa souveraineté sur le territoire en question et il serait absurde de parler d'une charge grevant le titre sous-jacent avant que celui-ci ait existé. Le titre aborigène s'est cristallisé au moment de l'affirmation de la souveraineté. Deuxièmement, le titre aborigène ne soulève pas le problème que pose la distinction entre les coutumes, pratiques et traditions distinctives faisant partie intégrante d'une société autochtone et celles qui ont été introduites par suite du contact avec les Européens ou influencées par celui-ci. En vertu de la common law, le fait de l'occupation ou de la possession suffit pour fonder un titre aborigène, et il n'est pas nécessaire de prouver que le territoire en question faisait partie intégrante de la société autochtone visée avant l'arrivée des Européens ou qu'il était un élément distinctif de celle-ci. Finalement, la date de l'affirmation de la souveraineté a un caractère plus certain que celle du premier contact avec les Européens.

Tant la common law que le point de vue des autochtones à l'égard du territoire devraient être pris en compte dans la démonstration de l'occupation. En common law, l'occupation physique fait preuve de la possession en droit, fait qui à son tour fondera le droit au titre sur les terres. L'occupation physique peut être prouvée par différents faits, allant de la construction de bâtiments à l'utilisation régulière de secteurs bien définis du territoire pour y pratiquer la chasse, la pêche ou d'autres types d'exploitation de ses ressources, en pas-

to ground title is established, the group's size, manner of life, material resources, and technological abilities, and the character of the lands claimed must be taken into account. Given the occupancy requirement, it was not necessary to include as part of the test for aboriginal title whether a group demonstrated a connection with the piece of land as being of central significance to its distinctive culture. Ultimately, the question of physical occupation is one of fact to be determined at trial.

If present occupation is relied on as proof of occupation pre-sovereignty, there must be a continuity between present and pre-sovereignty occupation. Since conclusive evidence of pre-sovereignty occupation may be difficult, an aboriginal community may provide evidence of present occupation as proof of pre-sovereignty occupation in support of a claim to aboriginal title. An unbroken chain of continuity need not be established between present and prior occupation. The fact that the nature of occupation has changed would not ordinarily preclude a claim for aboriginal title, as long as a substantial connection between the people and the land is maintained. The only limitation on this principle might be that the land not be used in ways which are inconsistent with continued use by future generations of aboriginals.

At sovereignty, occupation must have been exclusive. This requirement flows from the definition of aboriginal title itself, which is defined in terms of the right to exclusive use and occupation of land. The test must take into account the context of the aboriginal society at the time of sovereignty. The requirement of exclusive occupancy and the possibility of joint title can be reconciled by recognizing that joint title can arise from shared exclusivity. As well, shared, non-exclusive aboriginal rights short of aboriginal title but tied to the land and permitting a number of uses can be established if exclusivity cannot be proved. The common law should develop to recognize aboriginal rights as they were rec-

sant par la délimitation et la culture de champs. Dans l'examen de la question de savoir si on a fait la preuve d'une occupation suffisante pour fonder un titre aborigène, il faut tenir compte de la taille, du mode de vie, des ressources matérielles et des habiletés technologiques du groupe concerné, ainsi que de la nature des terres revendiquées. Compte tenu de l'exigence d'occupation, il n'est pas nécessaire d'inclure dans le critère relatif au titre aborigène la question de savoir si le groupe concerné a démontré que le lien qui le rattache au territoire visé est d'une importance fondamentale pour sa culture distinctive. En définitive, la preuve de l'occupation physique est une question de fait à trancher au procès.

Si l'occupation actuelle est invoquée comme preuve de l'occupation antérieure à l'affirmation de la souveraineté, il faut qu'il y ait une continuité entre l'occupation antérieure à l'affirmation de la souveraineté et l'occupation actuelle. Étant donné qu'il peut s'avérer difficile d'apporter des éléments de preuve concluants d'une occupation antérieure à l'affirmation de la souveraineté, une collectivité autochtone peut produire, au soutien de la revendication d'un titre aborigène, des éléments de preuve de l'occupation actuelle comme preuve de l'occupation antérieure à l'affirmation de la souveraineté. Il n'est pas nécessaire de faire la preuve d'une continuité parfaite entre l'occupation actuelle et l'occupation antérieure. Le fait que la nature de l'occupation ait changé ne fera généralement pas obstacle à la revendication d'un titre aborigène, dans la mesure où un lien substantiel entre le peuple et le territoire en question a été maintenu. La seule restriction à ce principe pourrait être qu'il ne soit pas fait du territoire des utilisations incompatibles avec son usage continu par les générations autochtones futures.

L'occupation doit avoir été exclusive au moment de l'affirmation de la souveraineté. Cette exigence d'exclusivité découle de la définition même du titre aborigène, défini comme étant le droit d'utiliser et d'occuper de façon exclusive les terres visées. Le critère doit prendre en compte le contexte de la société autochtone au moment de l'affirmation de la souveraineté. Il est possible de concilier l'exigence d'occupation exclusive et l'existence possible d'un titre conjoint en reconnaissant qu'un titre conjoint peut découler d'une exclusivité partagée. De même, l'existence de droits ancestraux non exclusifs partagés ne constituant pas un titre, mais par ailleurs liés au territoire et permettant certaines utilisations, peut être établie, même si l'exclusivité ne peut être prouvée. La common law doit évoluer pour reconnaître les droits ancestraux qui étaient reconnus soit par

ognized by either *de facto* practice or by aboriginal systems of governance.

Per La Forest and L'Heureux-Dubé JJ.: “Aboriginal title” is based on the continued occupation and use of the land as part of the aboriginal peoples’ traditional way of life. This *sui generis* interest is not equated with fee simple ownership; nor can it be described with reference to traditional property law concepts. It is personal in that it is generally inalienable except to the Crown and, in dealing with this interest, the Crown is subject to a fiduciary obligation to treat the aboriginal peoples fairly. There is reluctance to define more precisely the right of aboriginal peoples to live on their lands as their forefathers had lived.

The approach to defining the aboriginal right of occupancy is highly contextual. A distinction must be made between (1) the recognition of a general right to occupy and possess ancestral lands and (2) the recognition of a discrete right to engage in an aboriginal activity in a particular area. The latter has been defined as the traditional use, by a tribe of Indians, that has continued from pre-contact times of a particular area for a particular purpose. By contrast, a general claim to occupy and possess vast tracts of territory is the right to use the land for a variety of activities related to the aboriginal society’s habits and mode of life. As well, in defining the nature of “aboriginal title”, reference need not be made to statutory provisions and regulations dealing with reserve lands.

In defining the nature of “aboriginal title”, reference need not be made to statutory provisions and regulations dealing specifically with reserve lands. Though the interest of an Indian band in a reserve has been found to be derived from, and to be of the same nature as, the interest of an aboriginal society in its traditional tribal lands, it does not follow that specific statutory provisions governing reserve lands should automatically apply to traditional tribal lands.

The “key” factors for recognizing aboriginal rights under s. 35(1) are met in the present case. First, the nature of an aboriginal claim must be identified precisely with regard to particular practices, customs and traditions. When dealing with a claim of “aboriginal

une pratique *de facto*, soit par un régime de gestion autochtone.

Les juges La Forest et L'Heureux-Dubé: Le «titre aborigène» se fonde sur l’occupation et l’utilisation ininterrompues des terres visées par le peuple autochtone dans le cadre de son mode de vie traditionnel. Ce droit *sui generis* n’équivaut pas à la propriété en fief simple et il ne peut pas non plus être décrit au moyen des concepts traditionnels du droit des biens. Il est personnel en ce sens qu’il est généralement inaliénable, sauf en faveur de la Couronne qui, dans ses opérations concernant un tel droit, est assujettie à une obligation de fiduciaire, savoir celle de traiter équitablement les peuples autochtones. On hésite à définir avec plus de précision le droit des peuples autochtones de continuer à vivre sur leurs terres comme l’avaient fait leurs ancêtres.

Le point de vue adopté pour définir le droit d’occupation ancestral est éminemment contextuel. Il est nécessaire de faire la distinction entre les deux aspects suivants: (1) la reconnaissance d’un droit général d’occuper et de posséder des terres ancestrales; (2) la reconnaissance d’un droit distinct d’exercer une activité autochtone dans une région particulière. Ce dernier aspect a été défini comme étant l’utilisation traditionnelle — remontant avant l’arrivée des Européens — que fait une tribu indienne d’un territoire donné, à une fin particulière. À l’opposé, une revendication générale visant le droit d’occuper et de posséder de vastes étendues de territoire concerne le droit d’utiliser ces terres pour y exercer différentes activités liées aux habitudes et au mode de vie de la société autochtone concernée. En outre, en définissant la nature du «titre aborigène», il n’est pas nécessaire de se référer aux dispositions législatives et réglementaires concernant les terres des réserves.

En définissant la nature du «titre aborigène», il n’est pas nécessaire de se référer aux dispositions législatives et réglementaires visant spécifiquement les terres des réserves. Même s’il a été jugé que le droit que possède une bande indienne sur une réserve découle du droit de la société autochtone sur ses terres tribales traditionnelles, il ne s’ensuit aucunement que les dispositions législatives particulières régissant les terres des réserves s’appliquent automatiquement aux terres tribales traditionnelles.

Il est satisfait, dans le présent pourvoi, aux facteurs «clés» permettant de reconnaître des droits ancestraux en vertu du par. 35(1). Premièrement, la nature d’une revendication autochtone doit être rattachée précisément à des coutumes, pratiques et traditions particulières. Le

title”, the court will focus on the occupation and use of the land as part of the aboriginal society’s traditional way of life.

Second, an aboriginal society must specify the area that has been continuously used and occupied by identifying general boundaries. Exclusivity means that an aboriginal group must show that a claimed territory is indeed its ancestral territory and not the territory of an unconnected aboriginal society. It is possible that two or more aboriginal groups may have occupied the same territory and therefore a finding of joint occupancy would not be precluded.

Third, the aboriginal right of possession is based on the continued occupation and use of traditional tribal lands since the assertion of Crown sovereignty. However, the date of sovereignty may not be the only relevant time to consider. Continuity may still exist where the present occupation of one area is connected to the pre-sovereignty occupation of another area. Also, aboriginal peoples claiming a right of possession may provide evidence of present occupation as proof of prior occupation. Further, it is not necessary to establish an unbroken chain of continuity.

Fourth, if aboriginal peoples continue to occupy and use the land as part of their traditional way of life, the land is of central significance to them. Aboriginal occupancy refers not only to the presence of aboriginal peoples in villages or permanently settled areas but also to the use of adjacent lands and even remote territories used to pursue a traditional mode of life. Occupancy is part of aboriginal culture in a broad sense and is, therefore, absorbed in the notion of distinctiveness. The *Royal Proclamation, 1763* supports this approach to occupancy.

McLachlin J. was in substantial agreement.

Infringements of Aboriginal Title: The Test of Justification

Per Lamer C.J. and Cory, McLachlin and Major JJ.: Constitutionally recognized aboriginal rights are not absolute and may be infringed by the federal and pro-

tribunal qui examine la revendication d’un «titre aborigène» se demande principalement si l’occupation et l’utilisation des terres visées faisaient partie du mode de vie traditionnel de la société autochtone concernée.

Deuxièmement, la société autochtone doit spécifier le territoire qui a été utilisé et occupé de façon ininterrompue en en indiquant les limites générales. L’exclusivité signifie que le groupe autochtone doit établir que le territoire qu’il revendique est, en fait, son territoire ancestral et non celui d’une autre société autochtone avec laquelle il n’a aucun lien. Comme il est possible que deux groupes autochtones ou plus aient occupé le même territoire, il est donc possible de conclure à l’existence d’une occupation conjointe.

Troisièmement, le droit de possession ancestral se fonde sur l’occupation et l’utilisation ininterrompues de terres tribales traditionnelles depuis l’affirmation par la Couronne de sa souveraineté. Cependant, il est possible que la date de l’affirmation de la souveraineté ne soit pas le seul moment pertinent dont il faille tenir compte. Il peut encore y avoir continuité lorsque l’occupation actuelle d’une région est liée à l’occupation d’une autre région avant l’affirmation de la souveraineté. En outre, les peuples autochtones qui revendiquent un droit de possession peuvent présenter des éléments de preuve de l’occupation actuelle du territoire visé pour établir son occupation antérieure. De plus, il n’est pas nécessaire de faire la preuve d’une continuité parfaite.

Quatrièmement, si des peuples autochtones continuent d’occuper et d’utiliser le territoire visé dans le cadre de leur mode de vie traditionnel, ce territoire a une importance fondamentale pour eux. La notion d’occupation d’un territoire par des autochtones ne s’entend pas seulement de la présence de peuples autochtones dans des villages ou des établissements permanents, mais également de l’utilisation de terres adjacentes et même de territoires éloignés dans le cadre d’un mode de vie traditionnel. L’occupation constitue un aspect de la culture autochtone prise dans un sens large et s’intègre, par conséquent, à la notion de caractère distinctif. Cette approche relative à la nature de l’occupation est étayée par la *Proclamation royale de 1763*.

Le juge McLachlin est largement en accord avec ces motifs.

Les atteintes au titre aborigène: le critère de justification

Le juge en chef Lamer et les juges Cory, McLachlin et Major: Les droits ancestraux reconnus et confirmés par la Constitution ne sont pas absolus, et tant le gouver-

vincial governments if the infringement (1) furthers a compelling and substantial legislative objective and (2) is consistent with the special fiduciary relationship between the Crown and the aboriginal peoples. The development of agriculture, forestry, mining and hydroelectric power, the general economic development of the interior of British Columbia, protection of the environment or endangered species, and the building of infrastructure and the settlement of foreign populations to support those aims, are objectives consistent with this purpose. Three aspects of aboriginal title are relevant to the second part of the test. First, the right to exclusive use and occupation of land is relevant to the degree of scrutiny of the infringing measure or action. Second, the right to choose to what uses land can be put, subject to the ultimate limit that those uses cannot destroy the ability of the land to sustain future generations of aboriginal peoples, suggests that the fiduciary relationship between the Crown and aboriginal peoples may be satisfied by the involvement of aboriginal peoples in decisions taken with respect to their lands. There is always a duty of consultation and, in most cases, the duty will be significantly deeper than mere consultation. And third, lands held pursuant to aboriginal title have an inescapable economic component which suggests that compensation is relevant to the question of justification as well. Fair compensation will ordinarily be required when aboriginal title is infringed.

Per La Forest and L'Heureux-Dubé JJ.: Rights that are recognized and affirmed are not absolute. Government regulation can therefore infringe upon aboriginal rights if it meets the test of justification under s. 35(1). The approach is highly contextual.

The general economic development of the interior of British Columbia, through agriculture, mining, forestry and hydroelectric power, as well as the related building of infrastructure and settlement of foreign populations, are valid legislative objectives that, in principle, satisfy the first part of the justification analysis. Under the second part, these legislative objectives are subject to accommodation of the aboriginal peoples' interests. This accommodation must always be in accordance with

nement fédéral que les gouvernements provinciaux peuvent y porter atteinte si (1) l'atteinte au droit ancestral visé se rapporte à la poursuite d'un objectif législatif impérieux et réel; (2) l'atteinte est compatible avec les rapports spéciaux de fiduciaire qui existent entre la Couronne et les peuples autochtones. L'extension de l'agriculture, de la foresterie, de l'exploitation minière et de l'énergie hydroélectrique, le développement économique général de l'intérieur de la Colombie-Britannique, la protection de l'environnement et des espèces menacées d'extinction, ainsi que la construction des infrastructures et l'implantation des populations requises par ces fins, sont des types d'objectifs compatibles avec cet objet. Trois aspects du titre aborigène sont pertinents quant à la deuxième étape du critère. Premièrement, le droit d'utiliser et d'occuper de façon exclusive les terres visées est pertinent pour ce qui est du degré d'examen auquel est soumis la mesure ou l'acte qui porte atteinte au titre. Deuxièmement, le droit de choisir les utilisations qui peuvent être faites de ces terres, sous réserve de la restriction ultime que ces usages ne sauraient détruire la capacité de ces terres d'assurer la subsistance des générations futures de peuples autochtones, indique qu'il est possible de respecter les rapports de fiduciaire entre la Couronne et les peuples autochtones en faisant participer les peuples autochtones à la prise des décisions concernant leurs terres. Il y a toujours obligation de consultation et, dans la plupart des cas, l'obligation exigera beaucoup plus qu'une simple consultation. Troisièmement, les terres détenues en vertu d'un titre aborigène ont une composante économique inéluctable qui montre que l'indemnisation est également un facteur pertinent à l'égard de la question de la justification. Il sera généralement nécessaire de verser une juste indemnité en cas d'atteinte à un titre aborigène.

Les juges La Forest et L'Heureux-Dubé: Les droits qui sont reconnus et confirmés ne sont pas absolus. Des mesures de réglementation prises par le gouvernement peuvent porter atteinte aux droits ancestraux si elles satisfont au critère de justification des atteintes aux droits visés au par. 35(1). La méthode adoptée est éminemment contextuelle.

Le développement économique général de l'intérieur de la Colombie-Britannique par l'agriculture, l'exploitation minière, la foresterie et l'énergie hydroélectrique, ainsi que la construction des infrastructures et l'implantation des populations requises par ce développement sont des objectifs législatifs réguliers qui, en principe, satisfont au premier volet du critère de justification. Dans le cadre du second volet de ce critère, ces objectifs législatifs doivent tenir compte des intérêts des peuples

the honour and good faith of the Crown. One aspect of accommodation of “aboriginal title” entails notifying and consulting aboriginal peoples with respect to the development of the affected territory. Another aspect is fair compensation.

McLachlin J. was in substantial agreement.

Self-Government

Per The Court: The errors of fact made by the trial judge, and the resultant need for a new trial, made it impossible for this Court to determine whether the claim to self-government had been made out.

Extinction

Per Lamer C.J. and Cory, McLachlin and Major J.J.: Section 91(24) of the *Constitution Act, 1867* (the federal power to legislate in respect of Indians) carries with it the jurisdiction to legislate in relation to aboriginal title, and by implication, the jurisdiction to extinguish it. The ownership by the provincial Crown (under s. 109) of lands held pursuant to aboriginal title is separate from jurisdiction over those lands. Notwithstanding s. 91(24), provincial laws of general application apply *proprio vigore* to Indians and Indian lands.

A provincial law of general application cannot extinguish aboriginal rights. First, a law of general application cannot, by definition, meet the standard “of clear and plain intention” needed to extinguish aboriginal rights without being *ultra vires* the province. Second, s. 91(24) protects a core of federal jurisdiction even from provincial laws of general application through the operation of the doctrine of interjurisdictional immunity. That core has been described as matters touching on “Indianness” or the “core of Indianness”.

Provincial laws which would otherwise not apply to Indians *proprio vigore* are allowed to do so by s. 88 of the *Indian Act* which incorporates by reference provincial laws of general application. This provision, however, does not “invigorate” provincial laws which are invalid because they are in relation to Indians and Indian lands.

autochtones. Cette prise en compte doit toujours être faite conformément à l’obligation de la Couronne d’agir honorablement et de bonne foi. L’un des aspects de cette prise en compte, dans un tel contexte, consiste à informer et à consulter les peuples autochtones relativement au développement du territoire visé. Un autre aspect de la prise en compte est la question de la juste indemnisation.

Le juge McLachlin est largement en accord avec ces motifs.

L’autonomie gouvernementale

La Cour: En raison des erreurs de fait commises par le juge de première instance et de la nécessité de tenir un nouveau procès qui en a découlé, il est impossible pour la Cour de décider si le bien-fondé de la revendication de l’autonomie gouvernementale a été établi.

L’extinction

Le juge en chef Lamer et les juges Cory, McLachlin et Major: Le paragraphe 91(24) de la *Loi constitutionnelle de 1867* (le pouvoir du fédéral de légiférer sur les Indiens) emporte le pouvoir de légiférer relativement au titre aborigène et par implication, celui d’éteindre ce titre. Le droit de propriété de la province sur les terres détenues en vertu d’un titre aborigène (en vertu de l’art. 109) est distinct de la compétence exercée à l’égard de ces terres. Malgré le par. 91(24), les lois provinciales d’application générale s’appliquent *proprio vigore* (d’elles-mêmes) aux Indiens et aux terres indiennes.

Une loi provinciale d’application générale ne peut pas éteindre des droits ancestraux. Premièrement, par définition, une loi provinciale d’application générale ne peut pas, sans être *ultra vires*, respecter la norme de l’«intention claire et expresse» établie à l’égard de l’extinction des droits ancestraux. Deuxièmement, le par. 91(24) protège le fondement de la compétence du fédéral, même contre les lois provinciales d’application générale, par l’application du principe de l’exclusivité des compétences. Il a été dit que ce fondement se rapporte à des questions touchant à la «quiddité indienne», ou indianité, ou à l’«essentiel de l’indianité».

Des règles de droit provinciales qui autrement ne s’appliqueraient pas d’elles-mêmes aux Indiens peuvent le faire par l’effet de l’art. 88 de la *Loi sur les Indiens*, qui incorpore par renvoi les lois provinciales d’application générale. Cependant, cette disposition ne «revigore» pas des règles de droit provinciales qui sont invalides parce qu’elles se rapportent aux Indiens et aux terres indiennes.

Per La Forest and L'Heureux-Dubé JJ.: The province had no authority to extinguish aboriginal rights either under the *Constitution Act, 1867* or by virtue of s. 88 of the *Indian Act*.

McLachlin J. was in substantial agreement.

J. Edward Gouge, c.r., et Jill M. Marks, pour l'intervenante Alcan Aluminium Ltée.

Version française du jugement du juge en chef Lamer et des juges Cory et Major rendu par

LE JUGE EN CHEF —

I. Introduction

Le présent pourvoi est le plus récent d'une série d'affaires où notre Cour a été appelée à interpréter et à appliquer la garantie relative aux droits ancestraux existants prévue au par. 35(1) de la *Loi constitutionnelle de 1982*. Bien que cette série de décisions — qui a commencé par l'arrêt *R. c. Sparrow*, [1990] 1 R.C.S. 1075, s'est poursuivie par la trilogie *Van der Peet* (*R. c. Van der Peet*, [1996] 2 R.C.S. 507, *R. c. N.T.C. Smokehouse Ltd.*, [1996] 2 R.C.S. 672, et *R. c. Gladstone*, [1996] 2 R.C.S. 723), et s'est terminée par les arrêts *R. c. Pamajewon*, [1996] 2 R.C.S. 821, *R. c. Adams*, [1996] 3 R.C.S. 101, et *R. c. Côté*, [1996] 3 R.C.S. 139 — ait établi le cadre jurisprudentiel d'analyse du

interrelated and novel questions which revolve around a single issue — the nature and scope of the constitutional protection afforded by s. 35(1) to common law aboriginal title.

In *Adams*, and in the companion decision in *Côté*, I considered and rejected the proposition that claims to aboriginal rights must also be grounded in an underlying claim to aboriginal title. But I held, nevertheless, that aboriginal title was a distinct species of aboriginal right that was recognized and affirmed by s. 35(1). Since aboriginal title was not being claimed in those earlier appeals, it was unnecessary to say more. This appeal demands, however, that the Court now explore and elucidate the implications of the constitutionalization of aboriginal title. The first is the specific content of aboriginal title, a question which this Court has not yet definitively addressed, either at common law or under s. 35(1). The second is the related question of the test for the proof of title, which, whatever its content, is a right in land, and its relationship to the definition of the aboriginal rights recognized and affirmed by s. 35(1) in *Van der Peet* in terms of activities. The third is whether aboriginal title, as a right in land, mandates a modified approach to the test of justification first laid down in *Sparrow* and elaborated upon in *Gladstone*.

In addition to the relationship between aboriginal title and s. 35(1), this appeal also raises an important practical problem relevant to the proof of aboriginal title which is endemic to aboriginal rights litigation generally — the treatment of the oral histories of Canada's aboriginal peoples by the courts. In *Van der Peet*, I held that the common law rules of evidence should be adapted to take into account the *sui generis* nature of aboriginal

par. 35(1), le présent pourvoi soulève un ensemble de nouvelles questions interreliées, qui concernent une seule et même question — la nature et la portée de la protection constitutionnelle accordée par le par. 35(1) au titre aborigène reconnu en common law.

Dans *Adams*, ainsi que dans l'arrêt connexe *Côté*, j'ai examiné et rejeté l'argument voulant qu'une revendication visant des droits ancestraux doive aussi s'appuyer sur une revendication sous-jacente visant un titre aborigène. J'ai néanmoins conclu que le titre aborigène était une espèce distincte de droit ancestral reconnu et confirmé par le par. 35(1). Comme aucun titre aborigène n'était revendiqué dans ces pourvois antérieurs, il n'était pas nécessaire d'en dire davantage. Cependant, dans le cadre du présent pourvoi, la Cour doit examiner et élucider les conséquences de la constitutionnalisation du titre aborigène. La première conséquence a trait au contenu précis du titre aborigène, question à laquelle notre Cour n'a pas encore répondu de manière définitive, tant au regard de la common law que du par. 35(1). La deuxième est la question connexe du critère applicable pour faire la preuve du titre qui, quel que soit son contenu, est un droit foncier, et de sa relation avec la définition des droits ancestraux reconnus et confirmés par le par. 35(1) qui a été donnée dans *Van der Peet* en fonction de la notion d'activités. La troisième est la question de savoir si le titre aborigène, en tant que droit foncier, commande une approche modifiée à l'égard du critère de justification qui d'abord a été énoncé dans *Sparrow* puis précisé dans *Gladstone*.

En plus du rapport entre le titre aborigène et le par. 35(1), le présent pourvoi soulève aussi un problème pratique important en matière de preuve du titre aborigène, problème généralement commun à tout litige portant sur des droits ancestraux, soit le traitement réservé par les tribunaux aux récits oraux des peuples autochtones du Canada. Dans *Van der Peet*, j'ai conclu que les règles de la common law en matière de preuve devaient être adaptées pour tenir compte du caractère *sui generis* des droits ancestraux. Dans le présent pourvoi, notre

2

3

rights. In this appeal, the Court must address what specific form those modifications must take.

Cour doit se demander quelle forme précise doivent prendre ces modifications.

4 Finally, given the existence of aboriginal title in British Columbia, this Court must address, on cross-appeal, the question of whether the province of British Columbia, from the time it joined Confederation in 1871, until the entrenchment of s. 35(1) in 1982, had jurisdiction to extinguish the rights of aboriginal peoples, including aboriginal title, in that province. Moreover, if the province was without this jurisdiction, a further question arises — whether provincial laws of general application that would otherwise be inapplicable to Indians and Indian lands could nevertheless extinguish aboriginal rights through the operation of s. 88 of the *Indian Act*, R.S.C., 1985, c. I-5.

Finalement, vu l'existence du titre aborigène en Colombie-Britannique, notre Cour doit examiner, dans un pourvoi incident, la question de savoir si, à compter de son entrée dans la Confédération en 1871 jusqu'à l'inscription du par. 35(1) dans la Constitution en 1982, la province de la Colombie-Britannique a eu le pouvoir d'éteindre, sur son territoire, les droits des peuples autochtones, y compris le titre aborigène. En outre, si la province n'avait pas ce pouvoir, se pose alors une autre question: est-ce que les lois provinciales d'application générale, qui seraient normalement inapplicables aux Indiens et à leurs terres, pourraient néanmoins éteindre les droits ancestraux sous l'effet de l'art. 88 de la *Loi sur les Indiens*, L.R.C. (1985), ch. I-5.

II. Facts

II. Les faits

5 At the British Columbia Supreme Court, McEachern C.J. heard 374 days of evidence and argument. Some of that evidence was not in a form which is familiar to common law courts, including oral histories and legends. Another significant part was the evidence of experts in genealogy, linguistics, archeology, anthropology, and geography.

En Cour suprême de la Colombie-Britannique, le juge en chef McEachern a présidé à 374 jours de déposition et d'argumentation. Une partie de la preuve n'était pas dans une forme familière aux tribunaux de common law et comportait notamment des récits oraux et des légendes. Un autre bloc considérable d'éléments de preuve était constitué de témoignages d'experts en généalogie, en linguistique, en archéologie, en anthropologie et en géographie.

6 The trial judge's decision (reported at [1991] 3 W.W.R. 97) is nearly 400 pages long, with another 100 pages of schedules. Although I am of the view that there must be a new trial, I nevertheless find it useful to summarize some of the relevant facts, so as to put the remainder of the judgment into context.

La décision du juge de première instance (publié à [1991] 3 W.W.R. 97) compte près de 400 pages, auxquelles s'ajoute une autre centaine de pages d'annexes. Même si je suis d'avis qu'il faut un nouveau procès, je crois néanmoins utile de résumer certains des faits pertinents, de manière à mettre en contexte le reste du jugement.

A. *The Claim at Trial*

A. *La revendication au procès*

7 This action was commenced by the appellants, who are all Gitksan or Wet'suwet'en hereditary chiefs, who, both individually and on behalf of their "Houses" claimed separate portions of 58,000 square kilometres in British Columbia. For the purpose of the claim, this area was divided into

La présente action a été engagée par les appelants, tous des chefs héréditaires Wet'suwet'en ou Gitksan, qui, tant en leur propre nom qu'au nom de leurs «maisons», revendiquent des parties distinctes d'un territoire de 58 000 kilomètres carrés situé en Colombie-Britannique. Aux fins de la revendication,

133 individual territories, claimed by the 71 Houses. This represents all of the Wet'suwet'en people, and all but 12 of the Gitksan Houses. Their claim was originally for "ownership" of the territory and "jurisdiction" over it. (At this Court, this was transformed into, primarily, a claim for aboriginal title over the land in question.) The province of British Columbia counterclaimed for a declaration that the appellants have no right or interest in and to the territory or alternatively, that the appellants' cause of action ought to be for compensation from the Government of Canada.

B. *The Gitksan and Wet'suwet'en Peoples*

(1) Demography

The Gitksan consist of approximately 4,000 to 5,000 persons, most of whom now live in the territory claimed, which is generally the watersheds of the north and central Skeena, Nass and Babine Rivers and their tributaries. The Wet'suwet'en consist of approximately 1,500 to 2,000 persons, who also predominantly live in the territory claimed. This territory is mainly in the watersheds of the Bulkley and parts of the Fraser-Nechako River systems and their tributaries. It lies immediately east and south of the Gitksan.

Of course, the Gitksan and Wet'suwet'en are not the only people living in the claimed territory. As noted by both McEachern C.J. at trial (at p. 440) and Lambert J.A. on appeal (at p. 243), there are other aboriginals who live in the claimed territory, notably the Carrier-Sekani and Nishga peoples. Some of these people have unsettled land claims overlapping with the territory at issue here. Moreover, there are also numerous non-aboriginals living there. McEachern C.J. found that, at the time of the trial, the non-aboriginal population in the territory was over 30,000.

cation, ce grand territoire a été divisé en 133 territoires distincts, revendiqués par les 71 maisons. Y sont représentés tous les Wet'suwet'en et toutes les maisons Gitksan, à l'exception de 12. Initialement, les appelants revendiquaient la «propriété» du territoire et la «compétence» sur celui-ci. (Devant notre Cour, cette revendication a changé et est devenue principalement la revendication d'un titre aborigène sur le territoire en question.) La province de la Colombie-Britannique a présenté une demande reconventionnelle dans laquelle elle sollicite une déclaration portant que les appelants n'ont aucun droit ou intérêt dans le territoire, ou, subsidiairement, que la cause d'action des appelants devrait être l'obtention d'une indemnité de la part du gouvernement du Canada.

B. *Les Gitksan et les Wet'suwet'en*

(1) La démographie

Les Gitksan sont un groupe d'environ 4 000 à 5 000 personnes, dont la plupart vivent maintenant dans le territoire revendiqué, c'est-à-dire de façon générale le bassin centre-nord des rivières Skeena, Nass et Babine et de leurs affluents. Les Wet'suwet'en, qui sont environ 1 500 à 2 000, habitent eux aussi de façon prédominante le territoire revendiqué. Leur territoire est situé principalement dans le bassin de la rivière Bulkley et, en partie, dans le système hydrographique formé par les rivières Fraser et Nechako et leurs affluents. Ce territoire se trouve immédiatement à l'est et au sud de celui des Gitksan.

Les Gitksan et les Wet'suwet'en ne sont évidemment pas les seules personnes vivant dans le territoire revendiqué. Comme l'ont souligné tant le juge en chef McEachern en première instance (à la p. 440) que le juge Lambert en appel (à la p. 243), d'autres autochtones vivent sur ce territoire, notamment les Carrier-Sekani et les Nishga. Certains d'entre eux ont des revendications territoriales pendantes qui chevauchent en partie le territoire en cause dans la présente affaire. En outre, de nombreux non-autochtones y vivent. Le juge en chef McEachern a conclu que, au moment du procès, la population non autochtone du territoire dépassait 30 000 personnes.

(2) History

10

There were numerous theories of the history of the Gitksan and Wet'suwet'en peoples before the trial judge. His conclusion from the evidence was that their ancestors migrated from Asia, probably through Alaska, and spread south and west into the areas which they found to be liveable. There was archeological evidence, which he accepted, that there was some form of human habitation in the territory and its surrounding areas from 3,500 to 6,000 years ago, and intense occupation of the Hagwilget Canyon site (near Hazelton), prior to about 4,000 to 3,500 years ago. This occupation was mainly in or near villages on the Skeena River, the Babine River or the Bulkley River, where salmon, the staple of their diet, was easily obtainable. The other parts of the territory surrounding and between their villages and rivers were used for hunting and gathering for both food and ceremonial purposes. The scope of this hunting and gathering area depended largely on the availability of the required materials in the areas around the villages. Prior to the commencement of the fur trade, there was no reason to travel far from the villages for anything other than their subsistence requirements.

(3) North American Exploration

11

There was little European influence in western Canada until the arrival of Capt. Cook at Nootka on Vancouver Island in 1778, which led to the sea otter hunt in the north Pacific. This influence grew with the establishment of the first Hudson's Bay trading post west of the Rockies (although east of the territories claimed) by Simon Fraser in 1805-1806. Trapping for the commercial fur trade was not an aboriginal practice, but rather one influenced by European contact. The trial judge held that the time of direct contact between the Aboriginal Peoples in the claimed territory was approximately 1820, after the trader William Brown

(2) L'histoire

De nombreuses thèses ont été présentées au juge de première instance sur l'histoire des Gitksan et des Wet'suwet'en. De la preuve présentée, il a conclu que leurs ancêtres ont émigré d'Asie, probablement en passant par l'Alaska, et qu'ils se sont dispersés au sud et à l'ouest dans les régions qu'ils jugèrent habitables. Il a accepté des éléments de preuve archéologique indiquant que le territoire et ses alentours ont connu une certaine forme d'occupation humaine il y a de 3 500 à 6 000 ans et qu'il y a eu une occupation intense du site du canyon Hagwilget (près de Hazelton) il y a plus de 4 000 à 3 500 ans. Cette occupation s'est faite principalement dans des villages ou près de villages situés sur les rivières Skeena, Babine ou Bulkley, où le saumon, l'élément principal de leur régime alimentaire, était abondant. Les autres parties du territoire, autour des villages et des rivières ou entre ceux-ci, étaient utilisées pour la chasse et la cueillette tant à des fins alimentaires que rituelles. L'étendue de ce territoire de chasse et de cueillette était largement tributaire de la disponibilité des denrées requises autour des villages. Avant le début du commerce des fourrures, les personnes qui habitaient les villages n'avaient aucune raison de s'en éloigner si ce n'était pour assurer leur subsistance.

(3) L'exploration de l'Amérique du Nord

L'influence européenne ne s'est vraiment fait sentir dans l'Ouest du Canada qu'à l'arrivée du capitaine Cook à Nootka, sur l'île de Vancouver, en 1778, événement qui a entraîné la chasse à la loutre de mer dans le Pacifique Nord. Cette influence a crû par suite de l'établissement du premier poste de traite de la Baie d'Hudson à l'ouest des Rocheuses (quoiqu'à l'est des territoires revendiqués) par Simon Fraser en 1805 et 1806. Le trapage des fourrures à des fins commerciales n'était pas une pratique autochtone, mais plutôt une pratique qui a été induite par le contact avec les Européens. Le juge de première instance a statué que la date approximative du contact direct entre les peuples autochtones habitant le territoire revendiqué et les Européens était 1820, après l'arrivée

arrived and Hudson's Bay had merged with the North West Company.

(4) Present Social Organization

McEachern C.J. set out a description of the present social organization of the appellants. In his opinion, this was necessary because "one of the ingredients of aboriginal land claims is that they arise from long-term communal rather than personal use or possession of land" (at p. 147). The fundamental premise of both the Gitksan and the Wet'suwet'en peoples is that they are divided into clans and Houses. Every person born of a Gitksan or Wet'suwet'en woman is automatically a member of his or her mother's House and clan. There are four Gitksan and four Wet'suwet'en clans, which are subdivided into Houses. Each House has one or more Hereditary Chief as its titular head, selected by the elders of their House, as well as possibly the Head Chief of the other Houses of the clan. There is no head chief for the clans, but there is a ranking order of precedence within communities or villages, where one House or clan may be more prominent than others.

At trial, the appellants' claim was based on their historical use and "ownership" of one or more of the territories. The trial judge held that these are marked, in some cases, by physical and tangible indicators of their association with the territories. He cited as examples totem poles with the Houses' crests carved, or distinctive regalia. In addition, the Gitksan Houses have an "adaawk" which is a collection of sacred oral tradition about their ancestors, histories and territories. The Wet'suwet'en each have a "kungax" which is a spiritual song or dance or performance which ties them to their land. Both of these were entered as evidence on behalf of the appellants (see my discussion of the trial judge's view of this evidence, *infra*).

The most significant evidence of spiritual connection between the Houses and their territory is a

du commerçant William Brown et la fusion de la Baie d'Hudson et de la Compagnie du Nord-Ouest.

(4) L'organisation sociale actuelle

Le juge en chef McEachern a décrit l'organisation sociale actuelle des appelants. À son avis, il était nécessaire de le faire parce que [TRADUCTION] «l'un des éléments des revendications territoriales des autochtones est qu'elles reposent sur une longue utilisation ou possession collective — plutôt qu'individuelle — du territoire» (à la p. 147). La caractéristique fondamentale de l'organisation sociale des Gitksan et des Wet'suwet'en est qu'ils sont divisés en clans et en maisons. Toute personne dont la mère est Gitksan ou Wet'suwet'en est d'office membre de la maison et du clan de sa mère. Il y a quatre clans Gitksan et quatre clans Wet'suwet'en, clans qui sont subdivisés en maisons. Chaque maison compte un ou plusieurs chefs héréditaires qui agissent à titre de chef titulaire et sont choisis par les aînés de leur maison, et aussi, parfois, par le grand chef des autres maisons du clan. Le clan n'a pas de grand chef, mais il y a un ordre de préséance au sein des collectivités ou des villages où une maison ou un clan prédomine.

Au procès, les appelants ont fondé leur revendication sur la «propriété» et l'utilisation historiques d'un ou de plusieurs des territoires. Le juge de première instance a conclu que, dans certains cas, ces faits sont marqués par des indices physiques et tangibles de l'association des individus avec les territoires visés. Il a donné comme exemples les mâts totémiques sculptés aux emblèmes ou insignes distinctifs des maisons. En outre, les maisons Gitksan ont un «adaawk», c'est-à-dire un ensemble de traditions orales sacrées au sujet de leurs ancêtres, de leur histoire et de leurs territoires. Chaque maison Wet'suwet'en possède un «kungax», c'est-à-dire un chant, une danse ou une représentation spirituelle qui les rattache à leur territoire. Ces deux éléments ont été déposés en preuve au nom des appelants (voir, plus loin, mon analyse de l'opinion du juge de première instance sur ces éléments de preuve).

Le signe le plus important du lien spirituel entre les différentes maisons et leur territoire est la salle

12

13

14

feast hall. This is where the Gitksan and Wet'suwet'en peoples tell and retell their stories and identify their territories to remind themselves of the sacred connection that they have with their lands. The feast has a ceremonial purpose, but is also used for making important decisions. The trial judge also noted the *Criminal Code* prohibition on aboriginal feast ceremonies, which existed until 1951.

des célébrations. C'est là que les Wet'suwet'en et les Gitksan disent et redisent leurs récits et identifient leurs territoires afin de se rappeler le lien sacré qu'ils entretiennent avec leurs terres. Ces célébrations ont une fin rituelle, mais elles sont aussi l'occasion de prise de décisions importantes. Le juge de première instance a également souligné que, jusqu'en 1951, le *Code criminel* interdisait les cérémonies rituelles autochtones.

III. Judgments Below

A. *Supreme Court of British Columbia*

(1) General Principles

15 The trial judge began his analysis by considering the significant cases in this area: *St. Catharines Milling and Lumber Co. v. The Queen* (1887), 13 S.C.R. 577, *Calder v. Attorney-General of British Columbia*, [1973] S.C.R. 313, *Baker Lake v. Minister of Indian Affairs and Northern Development*, [1980] 1 F.C. 518 (T.D.), *Guerin v. The Queen*, [1984] 2 S.C.R. 335, *R. v. Sioui*, [1990] 1 S.C.R. 1025, and *Sparrow*, *supra*. On the basis of this jurisprudence, he set out four propositions of law. First, aboriginal interests arise out of occupation or use of specific land for aboriginal purposes for an indefinite or long, long time before the assertion of sovereignty. Second, aboriginal interests are communal, consisting of subsistence activities and are not proprietary. Third, at common law, aboriginal rights exist at the pleasure of the Crown and may be extinguished when the intention of the Crown is clear and plain. This power reposed with the Imperial Crown during the colonial period. Upon Confederation the province obtained title to all Crown land in the province subject to the "interests" of the Indians. Finally, unextinguished aboriginal rights are not absolute. Crown action and aboriginal rights may, in proper circumstances, be reconciled. Generally speaking, aboriginal rights may be regulated by the Crown only when such regulation operates to interfere with aboriginal rights pursuant to legitimate Crown objectives which can honourably be justified, without undue interference with such rights. Moreover, when regulating, government must be mindful of the appropriate level

III. Les juridictions inférieures

A. *Cour suprême de la Colombie-Britannique*

(1) Principes généraux

Le juge de première instance a commencé son analyse par l'examen des décisions importantes dans le domaine: *St. Catharines Milling and Lumber Co. c. The Queen* (1887), 13 R.C.S. 577, *Calder c. Procureur général de la Colombie-Britannique*, [1973] R.C.S. 313, *Baker Lake c. Ministre des Affaires indiennes et du Nord canadien*, [1980] 1 C.F. 518 (1^{re} inst.), *Guerin c. La Reine*, [1984] 2 R.C.S. 335, *R. c. Sioui*, [1990] 1 R.C.S. 1025, et *Sparrow*, précité. Se fondant sur cette jurisprudence, il a énoncé quatre propositions de droit. Premièrement, les droits ancestraux découlent de l'occupation ou de l'utilisation, à des fins autochtones, d'un territoire précis pendant une période indéfinie ou très longue avant l'affirmation de la souveraineté. Deuxièmement, les droits ancestraux sont des droits collectifs, qui consistent en des activités de subsistance et non en des droits de propriété. Troisièmement, en common law, les droits ancestraux existent selon le bon plaisir de la Couronne et ils peuvent être éteints lorsque l'intention de la Couronne de le faire est claire et expresse. C'est la Couronne impériale qui détenait ce pouvoir au cours de la période coloniale. À la Confédération, la province a obtenu le titre relatif à toutes les terres publiques situées dans la province sous réserve de tout «intérêt» des Indiens. Finalement, les droits ancestraux non éteints ne sont pas absolus. Dans les circonstances appropriées, il est possible de concilier les actes de la Couronne et les droits ancestraux. De façon générale, les droits ancestraux peuvent être réglementés par l'État,

of priority which aboriginal rights have over competing, inconsistent activities.

With respect to the appellants' claims, McEachern C.J. divided his analysis into three parts: (1) jurisdiction over the territory; (2) ownership of the territory; and (in the alternative) (3) particular aboriginal rights over the territory. In the ownership claim, the appellants asserted they were "absolutely entitled to occupy and possess the individual territories" claimed (at p. 126). The claim to jurisdiction was understood by the trial judge as comprising jurisdiction over land and people in the territory, and amounted to aboriginal sovereignty, a right to "govern the territory free of provincial control in all matters where their aboriginal laws conflict with the general law" (at p. 128). Although the claim advanced at trial was advanced by individual chiefs on behalf of themselves or their House members, the trial judge held that since aboriginal rights are communal in nature, any judgment must be for the benefit of the Gitksan and Wet'suwet'en peoples generally.

(2) Aboriginal Ownership

McEachern C.J. started from the proposition, for which he cited *St. Catharines Milling*, that aboriginal rights are not proprietary in nature, but rather "personal and usufructuary", and dependent upon the good will of the Sovereign. He was satisfied that at the date of British sovereignty, the appellants' ancestors were living in their villages on the great rivers, in a form of communal society. He was satisfied that they were occupying or possessing fishing sites and the adjacent lands, as their ancestors had done for the purpose of hunting and

mais seulement si cette réglementation ne porte pas atteinte de manière excessive à ces droits et qu'elle vise la poursuite par l'État d'objectifs légitimes qui peuvent être honorablement justifiés. En outre, lorsqu'il réglemente des activités, le gouvernement doit tenir compte du degré de priorité approprié qui doit être accordé à l'exercice de droits ancestraux sur l'exercice d'autres activités concurrentes et incompatibles.

Le juge en chef McEachern a divisé son analyse des revendications des appelants en trois parties: (1) la compétence sur le territoire; (2) la propriété du territoire; (3) (subsidiairement) les droits ancestraux particuliers visant le territoire. Dans leur revendication de la propriété, les appelants ont affirmé qu'ils avaient [TRADUCTION] «le droit absolu à la possession et à l'occupation des différents territoires» revendiqués (à la p. 126). Le juge de première instance a considéré que la revendication relative à la compétence visait la compétence sur le territoire et sur les personnes l'habitant, et qu'elle équivalait à la souveraineté autochtone, c'est-à-dire au droit de [TRADUCTION] «gouverner le territoire, libre de tout contrôle provincial sur les diverses questions où leurs règles de droit entrent en conflit avec le droit d'application générale» (à la p. 128). Bien que, en première instance, la revendication ait été présentée par chacun des chefs, en son propre nom et au nom des membres de sa maison, le juge de première instance a conclu que, vu la nature collective des droits ancestraux, tout jugement doit être prononcé au bénéfice des Gitksan et des Wet'suwet'en en général.

(2) La propriété autochtone

Le juge en chef McEachern est parti de la proposition — au soutien de laquelle il a cité l'arrêt *St. Catharines Milling* — que les droits ancestraux ne sont pas, par nature, des droits de propriété, mais plutôt des droits «personnels et usufructuaires», tributaires du bon vouloir du souverain. Il était convaincu que, au moment de l'affirmation de la souveraineté par les Britanniques, les ancêtres des appelants vivaient dans leurs villages en bordure des grandes rivières, dans une forme de société communautaire. Il était convaincu qu'ils

16

17

gathering that which they required for sustenance. However, he was not satisfied that they owned the territory in its entirety in any sense that would be recognized by the law.

occupaient et possédaient des sites de pêche et les terres adjacentes, comme leurs ancêtres l'avaient fait pour y chasser et y cueillir ce dont ils avaient besoin pour assurer leur subsistance. Cependant, il n'était pas convaincu qu'ils étaient propriétaires de l'ensemble du territoire, dans quelque sens qui serait reconnu par le droit.

18

There were several specific claims of the plaintiffs as to their uses of the land before the assertion of sovereignty. He concluded that the appellants' ancestors lived within the territory, but predominantly at the village sites. He accepted, at p. 372, that they harvested the resources of the lands, but that there was only evidence of "commonsense subsistence practices . . . entirely compatible with bare occupation for the purposes of subsistence". He was not persuaded that there was any system of governance or uniform custom relating to land outside the villages. He refused to accept that the spiritual beliefs exercised within the territory were necessarily common to all the people or that they were universal practices. He was not persuaded that the present institutions of the plaintiffs' society were recognized by their ancestors. Rather, he found, at p. 373, that "they more likely acted as they did because of survival instincts". He stated that the maintenance and protection of the boundaries were unproven because of the numerous intrusions into the territory by other peoples. The oral histories, totem poles and crests were not sufficiently reliable or site specific to discharge the plaintiff's burden of proof. Although McEachern C.J. recognized the social importance of the feast system and the fact that it evolved from earlier practices, he did not accept its role in the management and allocation of lands, particularly after the fur trade. McEachern C.J. concluded, at p. 383, that "I cannot infer from the evidence that the Indians possessed or controlled any part of the territory, other than for village sites and for aboriginal

Les demandeurs ont fait valoir plusieurs revendications particulières visant des utilisations qu'ils faisaient du territoire avant l'affirmation de la souveraineté. Le juge de première instance a conclu que les ancêtres des appelants vivaient à l'intérieur du territoire, mais principalement dans le site des villages. Il a accepté, à la p. 372, qu'ils récoltaient les ressources du territoire, mais que la preuve étayait seulement l'existence de [TRADUCTION] «pratiques rationnelles de subsistance [. . .] tout à fait compatibles avec une simple occupation à des fins de subsistance». Il n'était pas convaincu qu'il existait quelque système de gestion ou de coutume uniforme visant les terres situées à l'extérieur des villages. Il a refusé de reconnaître que les croyances spirituelles respectées au sein du territoire étaient nécessairement communes à tous les autochtones et qu'elles constituaient des pratiques universelles. Il n'était pas convaincu que les institutions actuelles de la société des demandeurs étaient celles de leurs ancêtres. Il a plutôt conclu, à la p. 373, qu'[TRADUCTION] «il est plus vraisemblable qu'ils agissaient ainsi par instinct de survie». Il a affirmé que, compte tenu des nombreuses intrusions d'autres peuples dans le territoire, on n'avait pas fait la preuve du maintien et de la protection de frontières. Les récits oraux, les mâts totémiques et les emblèmes n'étaient pas des éléments suffisamment fiables ou spécifiques à un site pour permettre aux demandeurs de s'acquitter de la charge de la preuve qui leur incombait. Même si le juge en chef McEachern a reconnu l'importance sociale de la pratique des célébrations et son évolution depuis ses premières manifestations, il n'a pas accepté le rôle qu'on lui attribuait dans la gestion et l'attribution des terres, particulièrement après le début du commerce des fourrures. Le juge en chef McEachern a conclu ainsi, à la p. 383: [TRADUCTION] «je ne peux inférer de la preuve que les Indiens possédaient ou contrôlaient

use in a way that would justify a declaration equivalent to ownership”.

Although he was of the opinion that the status of the villages and their immediate surrounding area may be different from the territory as a whole, they were already predominantly reserve lands. Hence, the question of the Gitksan and Wet’suwet’en peoples’ rights to these particular lands did not need to be dealt with. Moreover, to the extent that there were hunting grounds not included on those lands, McEachern C.J. believed he had no jurisdiction to extend their boundaries.

(3) Aboriginal Sovereignty

McEachern C.J. interpreted the appellants’ claim for “jurisdiction” as a claim to govern the territories in question. This would include the right to enforce existing aboriginal law, as well as make and enforce new laws, as required for the governance of the people and their land. Most notably, this would also include a right to supersede the laws of British Columbia if the two were in conflict. McEachern C.J. rejected the appellants’ claim for a right of self-government, relying on both the sovereignty of the Crown at common law, and what he considered to be the relative paucity of evidence regarding an established governance structure. First, he stated, at p. 386, that when British Columbia was united with Canada, “all legislative jurisdiction was divided between Canada and the province, and there was no room for aboriginal jurisdiction or sovereignty which would be recognized by the law or the courts”. Second, he characterized the Gitksan and Wet’suwet’en legal system, at p. 379, as a “most uncertain and highly flexible set of customs which are frequently not followed by the Indians themselves”. He continued, at pp. 379-80, stating:

une partie quelconque du territoire, à l’exception du site des villages, et qu’ils l’utilisaient d’une manière qui justifierait une déclaration équivalente au droit de propriété».

Même s’il était d’avis que les villages et leurs environs immédiats avait pu avoir un statut différent de celui du territoire pris dans son ensemble, ils étaient déjà constitués principalement de terres de réserve. Par conséquent, il n’était pas nécessaire d’examiner la question des droits des Gitksan et des Wet’suwet’en sur ces terres. De plus, s’il y avait des territoires de chasse qui n’étaient pas compris dans les limites de ces terres, le juge en chef McEachern était d’avis qu’il n’avait pas compétence pour élargir leurs limites.

(3) La souveraineté autochtone

Le juge en chef McEachern a considéré la revendication des appelants relative à la «compétence» comme étant la revendication du pouvoir de gouverner les territoires en question, notamment le droit d’appliquer les règles de droit autochtones existantes ainsi que le droit d’en adopter de nouvelles et de les faire respecter, selon ce qui est requis pour la gouverne des individus et leur territoire. De façon plus particulière, cela emporterait le droit d’écarter l’application des lois de la Colombie-Britannique en cas de conflit. Le juge en chef a rejeté la revendication par les appelants du droit à l’autonomie gouvernementale, fondant sa décision à la fois sur la souveraineté de la Couronne en common law et sur la rareté relative, selon lui, de preuves de l’existence d’une structure gouvernementale établie. Il a d’abord affirmé, à la p. 386, que, lorsque la Colombie-Britannique a été unie au Canada, [TRADUCTION] «toutes les compétences législatives ont été réparties entre le Canada et la province, et il n’y avait aucune place pour quelque compétence ou souveraineté autochtone qui serait reconnue par le droit ou les tribunaux». Deuxièmement, il a qualifié le système juridique des Gitksan et des Wet’suwet’en, à la p. 379, d’[TRADUCTION] «ensemble de coutumes des plus incertaines et extrêmement souples qui, fréquemment, ne sont pas suivies par les Indiens eux-mêmes». Il a ajouté ceci, aux pp. 379 et 380:

19

20

I heard many instances of prominent Chiefs conducting themselves other than in accordance with these rules, such as logging or trapping on another chief's territory, although there always seemed to be an aboriginal exception which made almost any departure from aboriginal rules permissible. In my judgment, these rules are so flexible and uncertain that they cannot be classified as laws.

As a result of the flexibility and uncertainty of the customs and rules, McEachern C.J. rejected the appellants' claim to jurisdiction or sovereignty over the territories.

(4) Aboriginal Rights

21 After rejecting the appellants' claim for ownership of and jurisdiction over the disputed territories, McEachern C.J. turned to the possibility that the appellants nevertheless have aboriginal rights exercisable therein. He set out, at p. 388, the four part test from *Baker Lake* for an aboriginal right:

1. That they (the plaintiffs) and their ancestors were members of an organized society.
2. That the organized society occupied the specific territory over which they assert the aboriginal title.
3. That the occupation was to the exclusion of other organized societies.
4. That the occupation was an established fact at the time sovereignty was asserted by England.

McEachern C.J. noted that the requirement for an organized society had been satisfied, even though he did not believe the appellants' ancestors had institutions and governed themselves. However, he held that no specific level of sophistication ought to be required in satisfying this requirement. He then stated that there was evidence that the ancestors of the plaintiffs occupied specific locations in the territory (the villages) and they used surrounding lands. Although there was evidence that the Gitksan and Wet'suwet'en would not have been able to keep invaders or traders out of their terri-

[TRADUCTION] On m'a fait état de nombreux cas où des chefs en vue ne se sont pas conformés à ces règles, par exemple en faisant du piégeage ou en coupant du bois sur le territoire d'un autre chef, quoiqu'il semblait toujours y avoir une exception autochtone qui rendait licite presque toute dérogation aux règles autochtones. Selon moi, ces règles sont si souples et incertaines qu'elles ne peuvent être qualifiées de règles de droit.

En raison de la souplesse et de l'incertitude des coutumes et des règles, le juge en chef McEachern a rejeté la revendication de compétence ou de souveraineté sur les territoires visés qu'ont présentée les appelants.

(4) Les droits ancestraux

Après avoir rejeté la revendication des appelants relative à la propriété des territoires en cause et à la compétence sur ceux-ci, le juge en chef McEachern a ensuite examiné la possibilité que les appelants possèdent néanmoins des droits ancestraux pouvant y être exercés. Il a énoncé, à la p. 388, les quatre parties du critère établi dans *Baker Lake*, précité, pour la reconnaissance d'un droit ancestral:

- [TRADUCTION] 1. Il faut que (les demandeurs) et leurs ancêtres aient été membres d'une société organisée;
2. que cette société organisée ait occupé le territoire particulier à l'égard duquel ses membres revendiquent un titre aborigène;
 3. que cette occupation ait été à l'exclusion d'autres sociétés organisées;
 4. que l'occupation ait été un fait établi au moment de l'affirmation de la souveraineté par l'Angleterre.

Le juge en chef McEachern a souligné qu'on avait satisfait à l'exigence concernant l'existence d'une société organisée, même s'il ne croyait pas que les ancêtres des appelants avaient des institutions et se gouvernaient eux-mêmes. Cependant, il a statué qu'aucun degré particulier de raffinement ne devrait être requis pour satisfaire à cette exigence. Il a ensuite affirmé qu'il y avait des éléments de preuve indiquant que les ancêtres des demandeurs avaient occupé des lieux précis dans le territoire (les villages) et qu'ils avaient utilisé les terres environnantes. Même si la preuve indiquait que les

tory, no other organized societies had established themselves in the core areas on any permanent basis. Moreover, he noted at the outset of his reasons on this point that he was uncertain about the requirement for exclusivity.

The activities that were to be protected were only those carried on at the time of contact or European influence and that were still carried on at the time of sovereignty. This included “all those sustenance practices and the gathering of all those products of the land and waters of the territory I shall define which they practised and used before exposure to European civilization (or sovereignty) for subsistence or survival” (at p. 391). This did not include trapping for the fur trade, or other land-based commercial enterprise. McEachern C.J. ultimately concluded, at p. 395 that “the plaintiffs have established, as of the date of British sovereignty, the requirements for continued residence in their villages, and for non-exclusive aboriginal sustenance rights within [certain] portions of the territory”.

(5) Extinguishment and Fiduciary Duties

McEachern C.J. started with the proposition, at pp. 396-97, that the law “never recognized that the settlement of new lands depended upon the consent of the Indians”. All aboriginal rights existed at the pleasure of the Crown, and could be extinguished by unilateral act. He accepted the “clear and plain” intention test for extinguishment, but took the view that it need not be express or even mention aboriginal rights, if the intention can be identified by necessary implication. An example of such implied extinguishment might be a fee simple

Gitksan et les Wet’suwet’en n’auraient pas été capables d’interdire leur territoire aux envahisseurs ou aux commerçants, aucune autre société organisée ne s’était établie avec quelque permanence que ce soit dans les principaux emplacements. De plus, au début de la partie de ses motifs sur ce point, le juge a souligné qu’il était incertain en ce qui concerne cette exigence d’exclusivité.

Les activités qui devaient être protégées se limitaient à celles qui étaient exercées au moment du contact avec les Européens ou au moment où l’influence de ceux-ci s’est fait sentir et qui étaient encore exercées au moment de l’affirmation de la souveraineté. Ces activités comprenaient effectivement: [TRADUCTION] «toutes les pratiques de subsistance ainsi que les activités de récolte des produits des terres et des eaux du territoire que je vais définir, qu’ils suivaient et exerçaient — avant d’être exposés à la civilisation européenne (ou avant l’affirmation de la souveraineté) — à des fins de subsistance ou de survie» (à la p. 391). Ceci ne comprenait pas le trappage en vue du commerce des fourrures ou d’autres entreprises commerciales fondées sur l’exploitation du territoire. Le juge en chef McEachern a finalement conclu, à la p. 395, que [TRADUCTION] «les demandeurs ont établi qu’il était satisfait, à la date de l’affirmation de la souveraineté britannique, aux exigences relatives à la résidence continue dans leurs villages et à l’existence de droits ancestraux d’exploitation à des fins de subsistance non exclusifs sur [certaines] parties du territoire».

(5) L’extinction des droits et les obligations de fiduciaire

Le juge en chef McEachern a commencé en énonçant, aux pp. 396 et 397, la proposition suivante laquelle le droit [TRADUCTION] «n’a jamais reconnu que la colonisation de nouvelles terres était subordonnée au consentement des Indiens». L’existence de tous les droits ancestraux dépendait du bon plaisir de la Couronne et ces droits pouvaient être éteints par un acte unilatéral de cette dernière. Il a accepté l’application du critère de l’intention «claire et expresse» pour statuer sur la question de l’extinction, mais il s’est dit d’avis

22

23

grant to a third party, or a grant of a lease, licence, permit or other tenure inconsistent with continuing aboriginal interest.

qu'il n'est pas nécessaire que l'intention ait été expresse ni même qu'on mentionne les droits ancestraux, si cette intention peut être dégagée par implication nécessaire. Un exemple d'une telle extinction implicite serait un acte de concession en fief simple au bénéfice d'un tiers ou l'octroi d'un bail, d'une licence, d'un permis ou de quelque autre forme de tenure incompatible avec le maintien d'un droit ancestral.

24 McEachern C.J. held that any aboriginal rights to the land had been extinguished. The extinguishment arose out of certain colonial enactments which demonstrated an intention to manage Crown lands in a way that was inconsistent with continuing aboriginal rights. He stated, at p. 411, that "the Crown with full knowledge of the local situation fully intended to settle the colony and to grant titles and tenures unburdened by any aboriginal interests". Crown grantees who received land in colonial times were clearly intended to receive the land free from any aboriginal encumbrances. Moreover, this intention to extinguish did not only apply to lands that had actually been granted to third parties, but rather all Crown land in British Columbia. However, it should be noted that he was careful to distinguish between land and fishing rights. Since McEachern C.J. was of the view that all aboriginal title to the territories in question had been extinguished during colonial times, it was not necessary to consider whether the province had the power to extinguish aboriginal rights after Confederation.

Le juge en chef McEachern a conclu que tout droit ancestral au territoire avait été éteint. Cette extinction était le résultat de certains textes de loi coloniaux qui démontraient l'intention de gérer les terres publiques d'une façon incompatible avec le maintien des droits ancestraux. Il a déclaré, à la p. 411, que [TRADUCTION] «la Couronne, pleinement consciente de la situation locale, avait pleinement eu l'intention d'établir une colonie et d'accorder des titres et tenures qui ne soient grevés d'aucun droit ancestral». On entendait clairement que ceux qui se voyaient accorder des concessions par l'État à l'époque coloniale les reçoivent libres de toute charge dont seraient titulaires les autochtones. En outre, cette intention d'extinction s'appliquait non seulement aux terres qui, de fait, avaient été cédées à des tiers, mais également à toutes les terres publiques en Colombie-Britannique. Cependant, il convient de souligner que le juge a pris soin de distinguer entre les droits fonciers et les droits de pêche. Étant donné que le juge en chef McEachern était d'avis que tout titre aborigène sur les territoires en question avait été éteint pendant l'époque coloniale, il ne lui était pas nécessaire de se demander si la province avait le pouvoir d'éteindre des droits ancestraux après la Confédération.

25 Notwithstanding the complete extinguishment of all aboriginal rights in land, McEachern C.J. held, at p. 417, that the Crown was under a fiduciary obligation to continue to allow native persons to use vacant crown lands for lawful purposes until the land "is dedicated to another purpose". This is not an aboriginal "right", to which s. 35 can be applied, since any such "rights" over the land had been extinguished. However, he held that where the Crown extinguishes an aboriginal right, and

Nonobstant l'extinction complète de tous les droits ancestraux sur le territoire, le juge en chef McEachern a conclu, à la p. 417, que la Couronne avait l'obligation de fiduciaire de continuer de permettre aux autochtones d'utiliser, à des fins licites, les terres publiques inoccupées jusqu'à ce que le territoire en question [TRADUCTION] «soit affecté à une autre fin». Il ne s'agit pas d'un «droit» ancestral auquel l'art. 35 peut être appliqué, puisque tous ces «droits» au territoire ont été éteints. Tou-

makes a promise regarding use of Crown land at the same time, this creates the same fiduciary obligation as if the aboriginal people had surrendered the land to the Crown. In articulating guidelines for the application of the Crown's fiduciary obligation, McEachern C.J. made it clear that the Crown must be free to direct resource management in the province in the best interests of both the aboriginal and non-aboriginal persons in the province. However, Crown authorities should always keep the "aboriginal interests of the plaintiffs very much in mind" (at p. 423) in developing policies for the territory, and should ensure that aboriginal activities on the land are not unduly impaired.

(6) Damages

Since the plaintiffs failed to establish that existing ownership, jurisdiction, or aboriginal rights had been breached, the claim for damages for wrongful appropriation of their territory was dismissed by McEachern C.J.

(7) Lands Subject to Aboriginal Rights at Sovereignty

McEachern C.J. felt it necessary to delineate the boundaries of the lands that were subject to aboriginal rights at the time of sovereignty in case he was wrong that these rights had been extinguished. He considered the evidence regarding the external boundary of the territory, and the internal boundaries therein. He found numerous inconsistencies, and generally did not find it to be reliable. He rejected the boundaries as put forth by the appellants.

Nevertheless, since he had held that the Gitksan and Wet'suwet'en had aboriginal sustenance rights over part of the land, he had to delineate their

tefois, le juge en chef a statué que, dans les cas où la Couronne éteint un droit ancestral, et fait en même temps une promesse au sujet de l'utilisation de terres publiques, cela a pour effet de créer une obligation de fiduciaire au même titre que si les autochtones concernés avaient cédé le territoire à la Couronne. Dans la formulation de lignes directrices concernant l'application de l'obligation de fiduciaire de la Couronne, le juge en chef McEachern a clairement indiqué que celle-ci doit être libre de gérer les ressources de la province au mieux des intérêts tant des autochtones que des non-autochtones de la province. Cependant, les autorités étatiques devraient toujours avoir [TRA-DUCTION] «bien à l'esprit les droits ancestraux des demandeurs» (à la p. 423) lorsqu'elles élaborent des politiques relatives au territoire, en plus de veiller à ce que les activités exercées par les autochtones sur le territoire ne soient pas trop perturbées.

(6) Les dommages-intérêts

Comme les demandeurs n'ont pas réussi à établir la violation de droits existants — propriété, compétence ou droits ancestraux — le juge en chef McEachern a rejeté leur demande en dommages-intérêts fondée sur l'appropriation illicite de leur territoire.

(7) Les terres visées par des droits ancestraux au moment de l'affirmation de la souveraineté

Le juge en chef McEachern a estimé nécessaire de tracer les limites des terres qui étaient visées par des droits ancestraux au moment de l'affirmation de la souveraineté, au cas où il aurait tort de conclure à l'extinction de ces droits. Il a examiné la preuve déposée au sujet des limites externes et internes du territoire. Il y a constaté de nombreuses incohérences et, de façon générale, ne l'a pas jugée fiable. Il a rejeté les limites tracées par les appelants.

Néanmoins comme il avait statué que les Gitksan et les Wet'suwet'en possédaient des droits ancestraux les autorisant à exploiter à des fins de

26

27

28

boundaries. He put forth three alternatives, and ultimately chose "Map 5" (at p. 400). This area recognized that the plaintiffs' ancestors likely used more distant areas in the territory. However, McEachern C.J. was not persuaded of such use in either the northernmost or southernmost portions of the territory. The northern boundary was drawn through the centre of the Skeena River, with 20 miles on the north side of the river being added. The southern boundary was drawn following some of the internal boundaries, but excluding several of the southern Wet'suwet'en individual territories. He selected this alternative because it worked less injustice for the Wet'suwet'en who lived more spread out and less concentrated near the rivers. However, he cut off the north and south portions of the claimed territory because he did not have confidence in the presence of the Gitksan or Wet'suwet'en in the areas north or south of the boundaries he drew.

(8) Other Matters

29

McEachern C.J. concluded his reasons by rejecting the province's argument that the plaintiffs' aboriginal rights to some of the lands had been abandoned. He did not think courts should be quick to treat aboriginal lands as abandoned. He could not say with confidence which lands should be abandoned, and which should not, even though there was clearly declining aboriginal use of some of the lands. He also stressed that the onus of demonstrating abandonment rested with the province and that they had not discharged that onus. He also rejected the argument that the plaintiffs had waived their rights by accepting and using reserves and by conforming to the general law of the province. The honour of the Crown precluded the province from relying on this defence.

subsistance certaines parties du territoire, il se devait d'en tracer les limites. Après avoir exposé trois possibilités, il a finalement retenu la [TRADUCTION] «carte 5» (à la p. 400). Ce tracé reconnaissait que les ancêtres des demandeurs utilisaient vraisemblablement des régions plus éloignées dans le territoire. Toutefois, le juge en chef McEachern n'était pas convaincu qu'une telle utilisation avait été faite dans les parties situées à l'extrême nord et à l'extrême sud du territoire. Le tracé de la limite nord passait par le centre de la rivière Skeena, et ajoutait une aire de 20 milles du côté nord de la rivière. Le tracé de la limite sud suivait certaines limites internes, mais excluait plusieurs territoires Wet'suwet'en au sud. Le juge en chef McEachern a retenu cette solution parce qu'il en résultait une moins grande injustice pour les Wet'suwet'en, qui vivaient de façon plus dispersée et en moins grande concentration près des rivières. Il a cependant éliminé les parties nord et sud du territoire revendiqué parce qu'il n'était pas certain de la présence des Gitksan ou des Wet'suwet'en dans les parties situées au nord ou au sud des limites qu'il avait tracées.

(8) Les autres questions

Le juge en chef McEachern a conclu ses motifs en rejetant l'argument avancé par la province que les droits ancestraux des demandeurs à l'égard de certaines terres avaient été abandonnés. Il était d'avis que les tribunaux ne devaient pas s'empres- ser de conclure à l'abandon de terres par les autochtones. Il ne pouvait pas dire avec certitude quelles terres devraient être considérées comme abandonnées, et lesquelles ne devraient pas l'être, même s'il y avait clairement un déclin dans l'utili- sation de certaines terres par les autochtones. Il a aussi souligné qu'il incombait à la province de prouver l'abandon et qu'elle ne s'était pas acquit- tée de cette charge. Il a aussi rejeté l'argument que les demandeurs avaient renoncé à leurs droits en acceptant et en utilisant les réserves, et en se con- formant aux lois générales de la province. L'obli- gation de la Couronne d'agir honorablement inter- disait à la province de s'appuyer sur ce moyen de défense.

(9) Final Order

In result, therefore, McEachern C.J. dismissed the action against Canada, dismissed the plaintiffs' claims for ownership and jurisdiction and for aboriginal rights in the territory, granted a declaration that the plaintiffs were entitled to use unoccupied or vacant land subject to the general law of the province, dismissed the claim for damages and dismissed the province's counterclaim. No order for costs was made.
