Macfarlane J.A. set out the following propositions of law which he indicated were the starting points for analysing aboriginal rights in land, which he garnered from *Baker Lake*, *Calder*, *Guerin*, *Sparrow*, and *Mabo v. Queensland* (1992), 107 A.L.R. 1 (H.C.). First, such rights arise from historic occupation and possession of the aboriginal peoples' tribal lands. Second, they arise by operation of law and do not depend on a grant from the Crown. Third, they are not absolute, but they are subject to regulation and extinguishment. Fourth, they are *sui generis* communal rights. Fifth, they cannot be alienated other than to the Crown. Finally, they are related to aboriginal activities which formed an integral part of traditional Indian life prior to sovereignty.

(a) *Ownership Rights*

Examining the appellants' ownership claim, Macfarlane J.A. agreed that an exclusive right to occupy land is required to support a claim akin to ownership. He noted that the use of the term "ownership" (which was used in the plaintiffs in their pleadings) was unfortunate, since *Guerin* specifically held that the aboriginal interest does not

(9) L'ordonnance finale

En définitive, le juge en chef McEachern a rejeté l'action contre le Canada, il a rejeté les revendications, par les demandeurs, de la propriété du territoire, de la compétence sur celui-ci ou de droits ancestraux à son égard, il a accordé une déclaration portant que les demandeurs avaient le droit d'utiliser toute terre inoccupée ou vacante, sous réserve du respect des lois d'application générales de la province, il a rejeté la demande de dommages-intérêts et, enfin, il a rejeté la demande reconventionnelle de la province. Il n'a rendu aucune ordonnance concernant les dépens.

B. *Cour d'appel de la Colombie-Britannique*(1) La décision du juge Macfarlane (à laquelle le juge Taggart a souscrit)

Le juge Macfarlane a énoncé les propositions de droit suivantes qui, a-t-il indiqué, étaient les éléments de départ qu'il avait dégagés des arrêts *Baker Lake*, *Calder*, *Guerin*, *Sparrow* et *Mabo c. Queensland* (1992), 107 A.L.R. 1 (H.C.), en vue de l'analyse des droits fonciers ancestraux. Premièrement, ces droits découlent de la possession et de l'occupation historiques par les peuples autochtones de terres tribales. Deuxièmement, ils découlent de l'application de la common law et ne dépendent pas d'une concession de la Couronne. Troisièmement, ils ne sont pas absolus mais sujets à réglementation et à extinction. Quatrièmement, ce sont des droits collectifs *sui generis*. Cinquièmement, ils ne peuvent être aliénés qu'en faveur de la Couronne. Finalement, ils sont liés à des activités autochtones qui faisaient partie intégrante de la vie traditionnelle indienne avant l'affirmation de la souveraineté.

a) *Les droits de propriété*

Examinant la revendication par les appelants de la propriété du territoire, le juge Macfarlane a convenu qu'un droit d'occupation exclusif du territoire est requis pour étayer la revendication d'un droit analogue à la propriété. Il a souligné que l'utilisation du terme «propriété» (que les demandeurs ont utilisé dans leurs actes de procédure) était malheu-

30

31

32

amount to beneficial ownership. In his view, the trial judge properly applied the law to the plaintiffs' claim of ownership. Similarly, he found no merit in the appellants' challenge to the trial judge's findings of fact on a number of points. Although some of the areas of the evidence were cause for concern, he concluded that the issues required an interpretation of the evidence as a whole and that it would be inappropriate for this court to intervene and substitute its opinions for that of the trial judge. Hence, he did not disturb the judge's conclusion with regard to ownership of the territory, nor his conclusion that any interest which the appellants have in the land is not proprietary.

reux, étant donné que l'arrêt *Guerin* avait précisément établi que le droit des autochtones n'équivait pas au droit de propriété à titre bénéficiaire. À son avis, le juge de première instance a bien appliqué le droit en ce qui concerne la revendication par les demandeurs de la propriété du territoire. De même, il n'a trouvé aucun fondement à la contestation par les appelants des conclusions de fait tirées par le juge de première instance sur un certain nombre de points. Même si certains éléments de preuve soulevaient des interrogations, il a conclu que les questions en litige nécessitaient une interprétation globale de la preuve et qu'il ne convenait pas que la cour intervienne et substitue ses opinions à celles du juge de première instance. En conséquence, il n'a pas modifié la conclusion de ce dernier quant à la propriété du territoire, ni sa conclusion que tout intérêt que possèdent les appelants dans le territoire n'est pas un droit de propriété.

(b) *Aboriginal Sustenance Rights*

b) *Le droit des autochtones d'assurer leur subsistance*

33 Macfarlane J.A. canvassed the trial judge's findings regarding aboriginal sustenance rights. He noted that McEachern C.J.'s error in requiring a "time-depth" of a long time prior to contact in order to establish the rights did not affect his view of the territorial limits of the right. He agreed with the trial judge's application of the *Baker Lake* test. In particular, he viewed the significant question to be whether the practices were integral to aboriginal society or had only resulted from European influences. Macfarlane J.A. concluded that it would be inappropriate to intervene and substitute his view for that of the trial judge with respect to the weight of the evidence. Hence, if the appellants succeeded on the appeal with respect to extinguishment, they were entitled to sustenance rights in the area as identified by McEachern C.J. on Map 5.

Le juge Macfarlane a examiné les conclusions du juge de première instance quant au droit des autochtones d'assurer leur subsistance. Il a souligné que l'erreur que le juge en chef McEachern a commise en exigeant la preuve d'une [TRADUCTION] «durée» — savoir une longue période avant le contact avec les Européens — pour établir l'existence des droits n'avait pas d'effet sur son opinion quant aux limites territoriales du droit. Il était d'accord avec la façon dont le juge de première instance avait appliqué le critère énoncé dans *Baker Lake*. En particulier, il était d'avis que la question importante était de savoir si les pratiques faisaient partie intégrante de la vie sociale des autochtones ou si elles étaient seulement le résultat des influences européennes. Le juge Macfarlane a conclu qu'il ne convenait pas qu'il intervienne et substitue son point de vue à celui du juge de première instance quant au poids à accorder à la preuve. Par conséquent, si les appelants obtenaient gain de cause en appel sur la question de l'extinction, ils avaient le droit d'assurer leur subsistance dans le territoire délimité par le juge en chef McEachern sur la carte 5.

(c) *Jurisdiction*

Macfarlane J.A. essentially agreed with the trial judge with respect to his analysis of the jurisdiction, or sovereignty issue. He characterized the claim as the right to control and manage the use of lands and resources in the territory, as well as the right to govern the people within the territory, to the possible exclusion of laws of general application within the province. He stated that the Gitksan and Wet'suwet'en peoples do not need a court declaration to permit internal self-regulation, if they consent to be governed. However, the rights of self-government encompassing a power to make general laws governing the land, resources, and people in the territory are legislative powers which cannot be awarded by the courts. Such jurisdiction is inconsistent with the *Constitution Act, 1867* and its division of powers. When the Crown imposed English law on all the inhabitants of the colony and when British Columbia entered Confederation, the aboriginal people became subject to Canadian (and provincial) legislative authority. For this reason, the claim to jurisdiction failed.

(d) *Extinguishment*

Macfarlane J.A. began by noting that treaty-making is the most desirable way to resolve aboriginal land issues. However, he noted that prior to 1982, the rights of aboriginal people could be extinguished by the unilateral act of the sovereign, without the consent of the aboriginal people. Intention to extinguish must be clear and plain. Although express language is not strictly necessary, the honour of the Crown requires its intentions to be either express or manifested by unavoidable implication. Unavoidable implication should not be easily found — it occurs only where the interpretation of the instrument permits no other result. This, in turn, depends on the nature of the aboriginal interest and of the impugned grant.

c) *La compétence*

Le juge Macfarlane s'est dit essentiellement d'accord avec l'analyse du juge de première instance relativement à la question de la compétence ou souveraineté. Il a dit que l'on revendiquait le droit de contrôler et de gérer l'utilisation des terres et des ressources du territoire, ainsi que le droit de gouverner la population y habitant, d'une manière pouvant aller jusqu'à l'exclusion des lois d'application générale en vigueur dans la province. Il a affirmé que les Gitksan et les Wet'suwet'en n'ont pas besoin d'une déclaration de la cour autorisant l'autoréglementation interne, s'ils consentent à être gouvernés. Cependant, les droits relatifs à l'autonomie gouvernementale, y compris le pouvoir de faire des lois générales régissant les terres, les ressources et la population du territoire, sont des pouvoirs législatifs qui ne peuvent être accordés par les tribunaux. Une telle compétence est incompatible avec la *Loi constitutionnelle de 1867* et le partage des pouvoirs qu'elle établit. Lorsque la Couronne a imposé le droit anglais à tous les habitants de la colonie et lorsque la Colombie-Britannique est entrée dans la Confédération, les autochtones sont devenus assujettis aux pouvoirs législatifs du Canada (et de la province). Pour ce motif, la revendication relative à la compétence a été rejetée.

d) *L'extinction*

Le juge Macfarlane a d'abord indiqué que la conclusion de traités est la façon la plus souhaitable de résoudre les questions relatives aux terres autochtones. Cependant, il a souligné que, avant 1982, les droits des peuples autochtones pouvaient être éteints par acte unilatéral du souverain, sans leur consentement. L'intention d'éteindre un droit doit être claire et expresse. Bien qu'il ne soit pas strictement nécessaire que l'intention soit exprimée en termes exprès, l'honneur de la Couronne exige que ses intentions ressortent de façon expresse ou par implication inéluctable. Une implication inéluctable n'est pas facile à trouver — elle n'existe que lorsque l'interprétation de l'instrument ne permet aucun autre résultat. Ce résultat dépend pour sa part de la nature de l'intérêt autochtone en jeu et de la concession contestée.

34

35

36

Macfarlane J.A. disagreed with the trial judge that the colonial instruments manifested the required clear and plain intention to extinguish all aboriginal interests in land. The purpose of the colonial instruments in question was to facilitate an orderly settlement of the province, and to give the Crown control over grants to third parties. It is not inevitable, upon a reading of the statutory scheme, that the aboriginal interest was to be disregarded. They did not foreclose the possibility of treaties or of co-existence of aboriginal and Crown interests. Similarly, even fee simple grants to third parties do not necessarily exclude aboriginal use. For example, uncultivated vacant land held in fee simple does not necessarily preclude the exercise of hunting rights. Moreover, it is clear that, at common law, two or more interests in land less than fee simple can co-exist. However, since the record was not sufficiently specific to permit the detailed analysis of such issues, Macfarlane J.A. suggested that these issues be dealt with in negotiation. He concluded that extinguishment by a particular grant needed to be determined on a case by case basis.

Le juge Macfarlane n'était pas d'accord avec le juge de première instance que les instruments coloniaux manifestaient l'intention claire et expresse requise pour éteindre tous les droits fonciers des autochtones. Les instruments coloniaux en question visaient à faciliter la colonisation ordonnée de la province et à donner à la Couronne le pouvoir d'octroyer des concessions aux tiers. La lecture des textes législatifs n'amène pas inévitablement à conclure qu'il ne fallait pas tenir compte des droits des autochtones. Ces textes ne faisaient pas obstacle à la possibilité de conclure des traités ou à la coexistence des droits des autochtones et de ceux de la Couronne. De la même façon, même un acte de concession en fief simple à un tiers n'écarter pas nécessairement l'utilisation par les autochtones du territoire visé. Par exemple, le fait qu'une terre non cultivée et inoccupée soit détenue en fief simple n'exclut pas nécessairement l'exercice de droits de chasse. En outre, il est clair que, en common law, deux intérêts ou plus qui sont inférieurs au fief simple peuvent coexister. Cependant, comme le dossier n'était pas suffisamment précis pour permettre l'analyse détaillée de ces questions, le juge Macfarlane a suggéré qu'elles fassent l'objet de négociations. Il a conclu que la question de savoir si une concession donnée entraînait l'extinction de certains droits devait être tranchée au cas par cas.

37

Macfarlane J.A. considered the constitutional power of the province to extinguish aboriginal rights after 1871, and in particular, whether valid provincial legislation could extinguish aboriginal rights in land by incidental effect. After 1871, the exclusive power to legislate in relation to "Indians, and Lands reserved for the Indians" was given to the federal government by virtue of s. 91(24) of the *Constitution Act, 1867*. Valid provincial legislation may apply to Indians, so long as it is a law of general application and not one that affects their Indianness, their status, or their core values (*Four B Manufacturing Ltd. v. United Garment Workers of America*, [1980] 1 S.C.R. 1031; *Natural Parents v. Superintendent of Child Welfare*, [1976] 2 S.C.R. 751; *Dick v. The Queen*, [1985] 2 S.C.R. 309). However, the proposition that provincial laws could extinguish Indian title by incidental effect

Le juge Macfarlane a examiné le pouvoir constitutionnel de la province d'éteindre des droits ancestraux après 1871, et, en particulier, la question de savoir si une loi provinciale valide pouvait éteindre de façon incidente des droits fonciers ancestraux. Après 1871, la compétence exclusive de légiférer sur «les Indiens et les terres réservées aux Indiens» a été attribuée au gouvernement fédéral par le par. 91(24) de la *Loi constitutionnelle de 1867*. Une loi provinciale valide peut s'appliquer aux Indiens s'il s'agit d'une loi d'application générale et non d'une loi touchant leur quiddité indienne ou indianité, leur statut ou leurs valeurs fondamentales (*Four B Manufacturing Ltd. c. Travailleurs unis du vêtement d'Amérique*, [1980] 1 R.C.S. 1031; *Parents naturels c. Superintendent of Child Welfare*, [1976] 2 R.C.S. 751; *Dick c. La Reine*, [1985] 2 R.C.S. 309). Cepen-

must be examined in light of federal authority relating to Indians and of the aboriginal perspective. The traditional homelands of aboriginal people are integral to their traditional way of life and their self-concept. If the effect of provincial legislation were to strip the aboriginal people of the use and occupation of their traditional homelands, it would be an impermissible intrusion into federal jurisdiction, as such a law would “trench on the very core of the subject matter of s. 91(24)” (at p. 169). Hence, he concluded that provincial legislatures do not have the constitutional competence to extinguish common law aboriginal rights. Moreover, extinguishment by adverse dominion could only be accomplished by the federal government. Similarly, s. 88 of the *Indian Act* did not assist the province. Laws of general application which do not affect the “core of Indianness” apply by their own force. However, provincial laws which do affect that core rely on s. 88, which referentially incorporates them into federal law. For s. 88 of the *Indian Act* to give the province authority to extinguish aboriginal rights, it would have to show a clear and plain intention to do so. Since no such intention exists in s. 88 in particular or the *Indian Act* in general, it cannot authorize outright extinguishment. However, it may authorize provincial regulation of and interference with aboriginal rights. Of course, now the operation of such regulations are now subject to s. 35 of the *Constitution Act, 1982*.

(e) *Relief Allowed*

Macfarlane J.A. granted a declaration that the plaintiffs’ aboriginal rights were not all extinguished by the colonial instruments enacted prior to British Columbia’s entry into Confederation in

dant, la proposition suivant laquelle les lois provinciales pourraient éteindre un titre indien de manière incidente doit être examinée à la lumière de la compétence du fédéral sur les questions indiennes et en tenant compte du point de vue des autochtones. Les terres traditionnelles des Indiens font partie intégrante de leur mode de vie traditionnel et de la façon dont ils se définissent. Si une loi provinciale avait pour effet de dépouiller les autochtones du droit d’utiliser et d’occuper leurs terres traditionnelles, il s’agirait d’une intrusion inadmissible dans un champ de compétence fédéral, étant donné qu’une telle loi [TRADUCTION] «empiéterait sur l’essentiel de l’objet du par. 91(24)» (à la p. 169). Par conséquent, le juge Macfarlane a conclu que les législatures provinciales n’ont pas, en vertu de la Constitution, compétence pour éteindre les droits ancestraux reconnus par la common law. En outre, seul le gouvernement fédéral peut éteindre des droits par possession adversative. De même, l’art. 88 de la *Loi sur les Indiens* n’a été d’aucun secours pour la province. Les lois d’application générale qui ne touchent pas le «fondement même de la quiddité indienne» s’appliquent d’elles-mêmes. Au contraire, celles qui touchent à ce fondement s’appuient sur l’art. 88, qui les incorpore par renvoi au droit fédéral. Pour que l’art. 88 de la *Loi sur les Indiens* accorde à la province le pouvoir d’éteindre des droits ancestraux, il faudrait trouver dans son texte une intention claire et expresse à cet égard. Comme on ne trouve une telle intention ni dans l’art. 88 en particulier, ni dans la *Loi sur les Indiens* en général, cet article ne peut autoriser d’extinction pure et simple. Il peut cependant autoriser la réglementation par les provinces des droits ancestraux et des atteintes à ces droits. Évidemment, l’application d’une telle réglementation est maintenant assujettie à l’art. 35 de la *Loi constitutionnelle de 1982*.

e) *La réparation accordée*

Le juge Macfarlane a prononcé une déclaration portant que les droits ancestraux des demandeurs n’avaient pas tous été éteints par les instruments coloniaux édictés avant l’entrée de la Colombie-

1871. He also granted a declaration that the appellants have unextinguished, non-exclusive aboriginal rights, formerly protected at common law, and now protected under s. 35(1) of the *Constitution Act, 1982*. These rights are not ownership or property rights, and are located within the area indicated on Map 5. Their characteristics may vary depending on the particular context in which the rights are said to exist, and are dependent on the specific facts of each case.

Britannique dans la Confédération en 1871. Il a aussi prononcé une déclaration portant que les appelants possèdent des droits ancestraux non éteints et non exclusifs, auparavant protégés par la common law et qui le sont maintenant par le par. 35(1) de la *Loi constitutionnelle de 1982*. Ces droits, qui ne sont ni la propriété ni des droits de propriété, existent à l'intérieur du territoire délimité sur la carte 5. Leurs caractéristiques peuvent varier en fonction du contexte où ils sont invoqués, et ils dépendent des faits propres à chaque affaire.

39

Macfarlane J.A. did not grant a declaration with respect to jurisdiction over land and resources or people within the territory, leaving this to negotiation. He also did not interfere with the decision of the trial judge that the claim for damages must be dismissed. He noted that the parties wished to negotiate the precise location, scope, content and consequences of the aboriginal rights which the trial judge has held may be exercised in that part of the territory, the approximate area of which is illustrated on Map 5. However, no order of the court was required to permit the parties to enter into such negotiations.

Le juge Macfarlane n'a pas prononcé de déclaration relativement à la compétence sur les terres, les ressources ou la population du territoire, laissant ces questions à la négociation. Il n'a pas modifié non plus la décision du juge de première instance rejetant la demande en dommages-intérêts. Il a souligné que les parties désiraient négocier l'emplacement, la portée, les conséquences et le contenu précis des droits ancestraux qui, de conclure le juge de première instance, peuvent être exercés dans cette partie du territoire dont les limites approximatives sont indiquées sur la carte 5. Cependant, aucune ordonnance de la cour n'était nécessaire pour permettre aux parties d'engager de telles négociations.

40

Finally, Macfarlane J.A. stated that he would not give effect to the alternative declarations sought by the province relating to the alleged extinguishment of aboriginal rights by grants of fee simple and of lesser interests in the period from 1871-1982. The province did not have the power after 1871 to extinguish aboriginal rights. However, some provincial land and resource laws affecting aboriginal rights may be given force as federal laws through the operation of s. 88 of the *Indian Act*. The effect of fee simple and lesser grants on the particular aboriginal rights would require a detailed and complete analysis, which neither the record nor the

Finalement, le juge Macfarlane a affirmé qu'il ne donnerait pas effet aux déclarations subsidiaires demandées par la province quant à sa prétention que des droits ancestraux avaient été éteints par suite de la concession, de 1871 à 1982, de fiefs simples et d'intérêts inférieurs au fief simple. La province n'avait plus, après 1871, le pouvoir d'éteindre des droits ancestraux. Cependant, certaines lois provinciales relatives aux terres et aux ressources et affectant les droits ancestraux peuvent produire leurs effets à titre de lois fédérales par application de l'art. 88 de la *Loi sur les Indiens*. L'effet de la concession de fiefs simples ou d'intérêts inférieurs sur les droits ancestraux en cause aurait nécessité une analyse approfondie que ni le dossier, ni les observations présentées ne permettraient d'effectuer. Le juge Macfarlane n'a

submissions permitted. He made no order for costs, adopting the reasons of the trial judge.

(2) Wallace J.A. (concurring)

(a) *Scope of Appellate Review*

Wallace J.A. considered the appropriate principles for appellate review of a trial judge's findings of fact. An appellate court should find error on the part of the trial judge with respect to those aspects of the finding of facts which involve questions of credibility or weight to be given the evidence of a witness only if it is established that the trial judge made some "palpable and overriding error" which affected his assessment of the material facts. Such an error exists in three situations: firstly, when it can be demonstrated there was no evidence to support a material finding of fact of the trial judge; secondly, when the trial judge wrongly overlooked admissible evidence relevant and material to the issue before the court; or thirdly, where the trial judge's finding of fact cannot be supported as reasonable. In reversing the trial judge for "palpable and overriding error" the Court of Appeal must designate the specific error and state why the nature of the error justifies reversing the trial judge's finding of fact. Wallace J.A. held that these principles applied to the trial judge's determination of the nature and territorial scope of the aboriginal activities, the question of jurisdiction and control over the territory, and the weight to be attributed to the evidence of the various witnesses.

(b) *General Principles*

Wallace J.A. stated that aboriginal rights of occupation and use originate in the Indians' historic occupation and use of their tribal lands, and is recognized by the common law. Unlike the trial judge, he recognized that these rights may resem-

rendu aucune ordonnance concernant les dépens, adoptant les motifs du juge de première instance.

(2) Le juge Wallace (opinion concordante)

a) *La portée de l'examen en appel*

Le juge Wallace s'est penché sur les principes à suivre dans le cadre de l'examen, en appel, des conclusions de fait du juge de première instance. Une cour d'appel ne devrait pas conclure que le juge de première instance a fait erreur sur les aspects des conclusions de fait qui se rattachent à la question de la crédibilité ou de la valeur probante d'un témoignage que s'il est établi que le juge de première instance a commis une [TRADUCTION] «erreur manifeste et dominante» ayant influé sur son appréciation des faits substantiels. Une telle erreur existe dans les trois cas suivants: premièrement, lorsqu'il peut être démontré qu'une conclusion de fait importante tirée par le juge de première instance ne s'appuie sur aucune preuve; deuxièmement, lorsque le juge de première instance a omis à tort de tenir compte d'éléments de preuve admissibles qui étaient pertinents et substantiels relativement à la question dont était saisi le tribunal; troisièmement, lorsque la conclusion de fait du juge de première instance ne peut être qualifiée de raisonnable. La cour d'appel qui infirme la décision du juge de première instance en raison d'une «erreur manifeste et dominante» doit indiquer de façon précise l'erreur qui a été commise et dire pourquoi la nature de cette erreur justifie l'infirmer de la conclusion de fait du juge de première instance. Le juge Wallace a statué que ces principes s'appliquaient à la détermination par le juge de première instance de la nature et de la portée territoriale des activités autochtones, à la question du contrôle du territoire et de la compétence sur celui-ci et au poids à accorder aux divers témoignages.

b) *Les principes généraux*

Le juge Wallace a affirmé que les droits ancestraux d'occupation et d'utilisation tirent leur origine de l'occupation et de l'utilisation historiques par les Indiens de leurs terres tribales, et que ces droits sont reconnus par la common law. Contrai-

41

42

ble a proprietary title, not unlike those in western property law systems, or they may be restricted to certain uses of the land. He set out the requirements for establishing aboriginal rights, varying from the *Baker Lake* test used by the trial judge. In Wallace J.A.'s formulation of the test, the practices supporting the rights in question had to be integral to the claimants' distinctive and traditional society or culture. Moreover, he resolved the trial judge's concerns about the requirement of exclusivity as follows: if the plaintiffs claim exclusive occupation and use, the traditional occupation had to be to the exclusion of other organized societies.

(c) *Aboriginal Ownership*

43 Wallace J.A. considered there to be reasonable support for the trial judge's conclusions regarding the nature and scope of the appellants' interest in the territory. The standard of occupation required to support the claim of ownership depended on the nature of the interest. The appellants' claim was to manage the lands and natural resources. This suggests exclusive control and possession of the territory, requiring the appellants to demonstrate exclusive possession. Since they could not do so, he concluded that the trial judge correctly dismissed their claim for ownership.

(d) *Aboriginal Rights of Occupation and Use of Traditional Lands*

44 Even if the appellants' claim were characterized as a claim for aboriginal title, rather than ownership, Wallace J.A. agreed with the criteria applied by the trial judge: the occupation of specific territory, the exclusion of other organized societies, occupation at the time of British sovereignty and long-time aboriginal practices. Applying these principles to the trial judge's findings of fact, Wallace J.A. concluded that the appellants had not

reusement au juge de première instance, il a reconnu que ces droits peuvent ressembler à un titre de propriété, qu'ils ne sont pas sans similitudes avec ceux reconnus dans les systèmes occidentaux de droit des biens et qu'ils peuvent se limiter à certaines utilisations du territoire. Il a énoncé les exigences à satisfaire pour démontrer l'existence de droits ancestraux, s'écarter du critère établi dans *Baker Lake* qu'avait utilisé le juge de première instance. Dans sa formulation du critère, le juge Wallace a indiqué que les pratiques sous-tendant les droits en question devaient faire partie intégrante de la société ou culture traditionnelle distinctive des demandeurs. Il a en outre dissipé de la façon suivante l'incertitude du juge de première instance quant à l'exigence d'exclusivité: si les demandeurs revendiquent une occupation et une utilisation exclusives, l'occupation traditionnelle doit avoir été à l'exclusion d'autres sociétés organisées.

c) *Droit de propriété ancestral*

Le juge Wallace a considéré que les conclusions du juge de première instance au sujet de la nature et de la portée de l'intérêt des appelants dans le territoire étaient raisonnablement étayées. La norme d'occupation exigée pour appuyer la revendication de la propriété dépendait de la nature de l'intérêt en cause. Les appelants revendiquaient la gestion des terres et des ressources naturelles. Cela suppose la possession et le contrôle exclusifs du territoire et exige que les appelants fassent la démonstration d'une possession exclusive. Comme ils n'y sont pas parvenus, il a conclu que le juge de première instance avait eu raison de rejeter leur revendication du droit de propriété.

d) *Droits ancestraux d'occupation et d'utilisation des terres traditionnelles*

Même si la revendication des appelants était qualifiée de revendication du titre aborigène, plutôt que de revendication du droit de propriété, le juge Wallace a souscrit aux critères appliqués par le juge de première instance: l'occupation d'un territoire précis, l'exclusion des autres sociétés organisées, l'occupation au moment de l'affirmation de la souveraineté des Britanniques et l'existence de pratiques autochtones de longue date. Appliquant

established a manifest or palpable error in concluding that the appellants' rights were non-exclusive, and confined to user rights. However, he was of the view that the court was not in a position to express an opinion on the specific territorial scope of these rights.

(e) *Aboriginal Jurisdiction or Self-Government*

Wallace J.A. agreed that the claim for "jurisdiction" was for an undefined form of government over land and people in the territory, which would be paramount as against provincial laws in the case of a conflict. Wallace J.A. held, at p. 225, that this claim was "incompatible with every principle of the parliamentary sovereignty which vested in the Imperial Parliament in 1846". Moreover, British Columbia's entry into Canada in 1871 exhaustively distributed legislative power between the province and the federal government. Section 35 of the *Constitution Act, 1982* could not revive and protect any sovereignty rights which the Gitksan and Wet'suwet'en may have had.

(f) *Extinction*

Wallace J.A. agreed with Macfarlane J.A. on this issue. He set out the test ("clear and plain intention") and decided that the rights of use and occupation discussed above had not been extinguished.

(g) *Miscellaneous*

Wallace J.A. agreed that the appellants' damages claim should be dismissed, without deciding whether damages might be payable for wrongful interference with the Gitksan's and Wet'suwet'en's non-exclusive aboriginal rights in the territory. He also considered the appellants' claim that the appeal be adjourned in part for two years, during

ces principes aux conclusions de fait du juge de première instance, le juge Wallace a statué que les appelants n'avaient pas établi que le juge avait commis une erreur manifeste ou dominante en concluant que les droits des appelants n'étaient pas exclusifs et qu'ils se limitaient à des droits d'utilisation. Toutefois, il était d'avis que la cour n'était pas en mesure d'exprimer une opinion quant à la portée territoriale précise de ces droits.

e) *Droit ancestral à la compétence ou l'autonomie gouvernementale*

Le juge Wallace a convenu que la revendication relative à la «compétence» visait une forme indéterminée de gouvernement sur les terres et la population du territoire, qui aurait prépondérance sur les lois provinciales en cas de conflit. Le juge Wallace a conclu, à la p. 225, que cette revendication était [TRADUCTION] «incompatible avec tous les principes touchant la souveraineté parlementaire dont était investi le parlement impérial en 1846». Qui plus est, à l'entrée de la Colombie-Britannique dans le Canada en 1871, le pouvoir législatif avait été réparti de manière exhaustive entre la province et le gouvernement fédéral. L'article 35 de la *Loi constitutionnelle de 1982* ne pouvait faire renaître et protéger quelque droit à la souveraineté qu'avaient pu avoir les Gitksan et les Wet'suwet'en.

f) *L'extinction*

Le juge Wallace a souscrit à la décision du juge Macfarlane sur cette question. Il a exposé le critère applicable (celui de l'«intention claire et expresse») et a décidé que les droits d'utilisation et d'occupation examinés précédemment n'avaient pas été éteints.

g) *Les autres questions*

Le juge Wallace a convenu que la demande en dommages-intérêts des appelants devait être rejetée, sans toutefois décider si des dommages-intérêts pourraient être payables pour atteinte fautive aux droits ancestraux non exclusifs des Gitksan et des Wet'suwet'en sur le territoire. Il a aussi examiné la demande des appelants que l'appel soit

45

46

47

which time the parties would attempt to negotiate an agreement regarding the geographic parameters of the claimed territory. The court would retain jurisdiction to determine issues or refer them to the trial court if the parties failed to reach an agreement during the two-year period. However, he noted that the role of the Court of Appeal is not to tailor its judgment to facilitate negotiation. The Court of Appeal is restricted to declaring the legal status of rights claimed, on the basis of the trial record.

(3) Lambert J.A. (dissenting)

(a) *General Principles*

48

Lambert J.A. considered at length the leading cases with regard to aboriginal rights in British Columbia. He set out a number of conclusions. He recognized that aboriginal title and aboriginal rights are *sui generis*, and not easily explicable in terms of ordinary western jurisprudential analysis or common law concepts. He noted that aboriginal title is a form of aboriginal rights, and is therefore protected by s. 35. All rights arise from the practices, customs and traditions which form an integral part of the distinctive culture of the aboriginal people, and were part of the social fabric of aboriginal society at the time of the arrival of the first Europeans. This co-existed with the settlers' common law rights from the time of contact until sovereignty. After that time, aboriginal rights that continued as part of the social fabric of the aboriginal society were protected by both their own internal institutions and the common law.

49

Lambert J.A. believed that aboriginal rights were not frozen at the time of contact. Rather, they must be permitted to maintain contemporary relevance in relation to the needs of the holders of the rights as those needs change along with the changes in overall society. The rights may be individual, or they may be collective, depending on

ajourné en partie pendant deux ans, période au cours de laquelle les parties tenteraient de négocier un accord sur les paramètres géographiques du territoire revendiqué. La cour conserverait compétence pour trancher les questions en litige ou les renvoyer au tribunal de première instance si les parties ne parvenaient pas à s'entendre pendant ces deux ans. Toutefois, il a souligné que le rôle de la Cour d'appel n'est pas de façonner sa décision afin de faciliter les négociations. La Cour d'appel n'a d'autre rôle que celui de statuer sur l'existence juridique des droits revendiqués au vu du dossier de première instance.

(3) Le juge Lambert (dissident)

a) *Les principes généraux*

Le juge Lambert a longuement examiné les arrêts clés en matière de droits ancestraux en Colombie-Britannique. Il a énoncé un certain nombre de conclusions. Il a reconnu que le titre aborigène et les droits ancestraux avaient un caractère *sui generis* et que ces notions n'étaient pas faciles à expliquer par l'analyse juridique occidentale ordinaire ou par les concepts de common law. Il a souligné que le titre aborigène est une forme de droit ancestral et qu'il est donc protégé par l'art. 35. Tous ces droits découlent des coutumes, pratiques et traditions qui font partie intégrante de la culture distinctive des autochtones visés et qui faisaient partie du tissu social de la société autochtone au moment de l'arrivée des premiers Européens. À partir du moment du contact avec les Européens jusqu'à l'affirmation de la souveraineté, ces droits ont coexisté avec ceux reconnus aux colons par la common law. Par la suite, les droits ancestraux qui ont continué de faire partie du tissu social de la société autochtone étaient protégés par leurs propres institutions internes et par la common law.

Le juge Lambert a estimé que les droits ancestraux n'ont pas été figés au moment du contact avec les Européens, mais qu'il faut plutôt permettre à ces droits de garder leur pertinence dans le monde actuel eu égard aux besoins de leurs titulaires, besoins qui changent à mesure qu'évolue l'ensemble de la société. Ces droits peuvent être

how they were and are treated by aboriginal people. Moreover, they do not come from aboriginal practice dating from time immemorial. Rather, they come, under the doctrine of continuity, from the practices, customs and traditions of the aboriginal people.

Aboriginal rights are neither abrogated by the fact that similar rights may be held by non-aboriginal people nor because the holders of the rights participate in the wage or cash economy. A right to occupy, possess, use and enjoy land to the exclusion of all others does not mean that it must be confined to the activities carried on in 1846, or that its exercise requires a renunciation of the contemporary world.

(b) *Extinguishment*

Lambert J.A. considered the test for extinguishment from *Calder*, and expressly rejected Judson J.'s views. He derived the authority to do so from the way in which extinguishment was dealt with in *Sparrow*. In considering implicit extinguishment, he stated that it will only be held to occur where no other conclusion is possible from the particular instrument or conduct. It could not take place through adverse dominion. In the case of an inconsistency between a Crown grant of land and aboriginal title, the title should not necessarily give way in the absence of a clear and plain intention to extinguish. In any case, no grants or other interests were granted in the territory prior to 1871, and after that date, the British Columbia legislature had no power to legislate to extinguish, by adverse dominion, or otherwise. Lambert J.A. recognized, at p. 312, that because of s. 91(24) of the *Constitution Act, 1867*, and the doctrine of interjurisdictional immunity, provincial legislation could not affect "Indians in their Indianness". This included aboriginal rights, since they are an integral part of aboriginal culture. This is not affected by s. 88 of the *Indian Act*.

soit individuels soit collectifs, selon la façon dont les autochtones les ont traités et les traitent. En outre, ils ne découlent pas de pratiques autochtones immémoriales. Ils viennent plutôt, selon la doctrine de la continuité, des coutumes, pratiques et traditions des autochtones.

Des droits ancestraux ne sont pas abrogés parce qu'il est possible que des droits similaires soient détenus par des non-autochtones, ni parce que leurs titulaires participent à l'économie salariale ou monétaire. Le droit d'occuper, de posséder, d'utiliser un territoire et d'en jouir à l'exclusion d'autrui ne signifie pas que ce droit doive se limiter aux activités pratiquées en 1846, ou que son exercice requière la renonciation au monde contemporain.

(b) *L'extinction*

Le juge Lambert a examiné le critère établi dans l'arrêt *Calder* à l'égard de l'extinction et il a expressément rejeté l'opinion du juge Judson. Pour ce faire, il s'est appuyé sur la manière dont cette question a été traitée dans *Sparrow*. Relativement à l'extinction implicite, il a affirmé qu'on ne conclura à l'existence d'une telle situation que dans les cas où il est impossible de tirer quelque autre conclusion de l'instrument ou de la conduite en cause. Il ne peut y avoir extinction par possession adversative. En cas d'incompatibilité entre une concession accordée par l'État et un titre aborigène, le titre ne devrait pas nécessairement disparaître en l'absence d'une intention claire et expresse de l'éteindre. De toute façon, ni concession ni quelque autre intérêt visant le territoire en cause n'ont été accordés avant 1871 et, après cette date, la législature de la Colombie-Britannique n'avait pas le pouvoir de légiférer à des fins d'extinction, par possession adversative ou autrement. Le juge Lambert a reconnu à la p. 312 que, en raison du par. 91(24) de la *Loi constitutionnelle de 1867* et de la doctrine de l'exclusivité des compétences, la législation provinciale ne pouvait affecter les [TRADUCTION] «Indiens dans leur indianité», y compris leurs droits ancestraux, étant donné que ces droits font partie intégrante de la culture autochtone. L'article 88 de la *Loi sur les Indiens* ne change rien à cette situation.

50

51

52

Lambert J.A. applied the same principles to a consideration of whether the right to self-government had been extinguished. Neither the assertion of sovereignty nor the colonial enactments mentioned by the trial judge were sufficient to extinguish aboriginal rights in the claimed territory. He saw no incompatibility between statements that the Crown owned the land of the province and the notion that aboriginal title was a burden on the Crown's radical title. Moreover, there was no "inescapable inference" that the colonial enactments were intended to extinguish aboriginal interests. If this were the case, aboriginal peoples would instantly become trespassers on any lands not reserved for them as soon as the Crown took title. Finally, the evidence that the aboriginal peoples of northern British Columbia surrendered their title under Treaty No. 8 also suggested that they had title interests to surrender.

(c) *Findings at Trial*

53

Lambert J.A. considered the factual findings made by the trial judge and made a number of general observations. First, if a finding of fact is necessary to the decision in the case, it should be given more deference than a fact which is merely made in the course of the decision or for some incidental reason. Second, findings of historical fact based on historical or anthropological evidence given by historians and anthropologists should be given only the kind of weight that other historians or anthropologists might have given them. These social scientists do not always agree, circumstances change, and new material is discovered and interpreted. Third, the appellants' oral evidence should be weighed, like all evidence, against the weight of countervailing evidence and not against an absolute standard so long as it is enough to support an air of reality. Fourth, with the election of an NDP government in British Columbia in 1991, the province reconsidered its legal stance in this case. As such, it invited the court to confirm the existence of aboriginal rights of unspecified content over unspecified areas and to permit the parties to negotiate the precise content and the precise areas. In Lambert J.A.'s view, the

Le juge Lambert a appliqué les mêmes principes à la question de savoir si le droit à l'autonomie gouvernementale avait été éteint. Ni l'affirmation de la souveraineté ni les textes de loi coloniaux mentionnés par le juge de première instance n'ont suffi pour éteindre les droits ancestraux dans le territoire revendiqué. Il n'a vu aucune incompatibilité entre les affirmations selon lesquelles l'État est propriétaire des terres de la province et la notion que le titre aborigène constituait une charge grevant le titre absolu de l'État. En outre, il n'y avait aucune [TRADUCTION] «inférence inéluctable» que les textes de lois coloniaux visaient l'extinction des droits ancestraux. Si cela avait été le cas, les autochtones seraient automatiquement devenus des intrus sur toute terre qui ne leur était pas réservée dès que l'État en acquerrait le titre. Finalement, la preuve indiquant que les autochtones du nord de la Colombie-Britannique ont cédé leur titre aux termes du Traité n° 8 suggérerait également qu'ils avaient des droits de cette nature à céder.

c) *Les conclusions de fait en première instance*

Le juge Lambert a examiné les conclusions de fait tirées par le juge de première instance et a fait un certain nombre d'observations générales. Premièrement, si une conclusion de fait est nécessaire pour rendre décision dans une affaire, une plus grande retenue devrait être manifestée à son égard qu'à l'endroit de celles qui sont simplement tirées dans le cours de la décision ou pour quelque raison incidente. Deuxièmement, il ne devrait pas être accordé aux conclusions de fait d'ordre historique fondées sur les témoignages d'historiens et d'anthropologues une valeur probante plus grande que celle qu'ont pu leur accorder d'autres historiens ou anthropologues. Ces spécialistes des sciences sociales ne sont pas toujours d'accord, les circonstances changent et de nouveaux éléments sont découverts et interprétés. Troisièmement, le témoignage des appelants devrait, comme tout témoignage, être apprécié en regard de la valeur probante de la preuve contraire et non en regard d'une norme absolue, dans la mesure où il est suffisamment vraisemblable. Quatrièmement, à la suite de l'élection du gouvernement du parti néo-démocrate en Colombie-Britannique en 1991, la province a révisé sa position juridique dans cette

Crown, by adopting the position that it wished to negotiate the content and territorial scope of aboriginal rights, must be taken to have waived the argument that the findings of the trial judge must stand and that any aboriginal rights held by the Gitksan and Wet'suwet'en peoples must be confined to non-exclusive sustenance rights over the area covered by Map 5. In short, reliance on the findings of fact of the trial judge is entirely inconsistent with negotiation.

Nonetheless, Lambert J.A. was of the view that the findings of fact with respect to boundaries and with respect to the scope and content of aboriginal rights, including both rights in land and rights of self-government, cannot stand even in accordance with the usual principles governing the consideration of findings of fact, because they are flawed by errors of law.

With regard to the ownership claim, Lambert J.A. identified the following errors in the trial judge's reasons. In his view, the trial judge erred: (1) in not treating the ownership claim as a claim to aboriginal title and applied incorrect legal standards as a result; (2) in treating the claim to aboriginal title as a claim to a proprietary interest in land; (3) in applying a test of indefinite or long, long time use and occupation before the assertion of sovereignty; (4) in treating evidence of commercial interaction with the first Europeans as not being evidence of aboriginal practices; (5) in treating the rights to trap as being the exercise of rights other than aboriginal rights; (6) in rejecting evidence about commercial trapping and the evidence of Dr. Ray, a historical geographer who gave evidence at trial; (7) in rejecting possession, occupation, use, and enjoyment in a social sense as sufficient to establish aboriginal title; (8) in treating the test of possession and occupation as being whether

affaire. En conséquence, elle a invité la cour à confirmer l'existence de droits ancestraux de contenu indéterminé et visant des territoires non précisés, et à permettre aux parties de négocier ce contenu et ces territoires. Selon le juge Lambert, il faut considérer que, ayant décidé qu'il désirait négocier le contenu et la portée territoriale des droits ancestraux, l'État est réputé avoir renoncé à l'argument que les conclusions du juge de première instance doivent être maintenues et que tout droit ancestral dont sont titulaires les Gitksan et les Wet'suwet'en se limite à des droits d'exploitation à des fins de subsistance non exclusifs visant le territoire délimité par la carte 5. Bref, le fait de se fonder sur les conclusions de fait du juge de première instance est tout à fait incompatible avec la tenue de négociations.

Néanmoins, le juge Lambert était d'avis que les conclusions de fait relatives aux limites du territoire ainsi qu'à la portée et au contenu des droits ancestraux, y compris les droits fonciers et les droits relatifs à l'autonomie gouvernementale, ne sauraient être maintenues, même en regard des principes ordinaires régissant l'appréciation des conclusions de fait, étant donné qu'elles sont entachées d'erreurs de droit.

En ce qui concerne la revendication de la propriété, le juge Lambert a décelé les erreurs suivantes dans les motifs du juge de première instance. Selon lui, le juge de première instance a fait erreur (1) en ne traitant pas la revendication de la propriété comme la revendication du titre aborigène, et en appliquant, en conséquence, des normes juridiques incorrectes; (2) en traitant la revendication du titre aborigène comme la revendication d'un intérêt de propriété sur le territoire; (3) en appliquant le critère de l'utilisation et de l'occupation pendant une période indéfinie ou très longue avant l'affirmation de la souveraineté; (4) en considérant que la preuve relative aux échanges commerciaux avec les premiers Européens n'était pas une preuve des pratiques autochtones; (5) en considérant les droits de piégeage comme l'exercice de droits autres que des droits ancestraux; (6) en rejetant la preuve relative au piégeage commercial et le témoignage du professeur Ray, spécialiste

there was a law which would have required a trespasser to depart; (9) in considering that aboriginal rights cannot be held jointly by more than one people; (10) in not concluding that aboriginal title could rest on occupation, possession, use, and enjoyment of land even though that occupation may have diminished in the period after contact; (11) in his treatment of blanket extinguishment of aboriginal title; and (12) in concluding that all aboriginal rights had been extinguished by the colonial instruments. These errors of law led to an incorrect conclusion on the part of the trial judge about the existence of aboriginal title. His findings of fact can be reconsidered on appellate review.

de la géographie historique qui a témoigné au procès; (7) en rejetant les notions de possession, d'occupation, d'utilisation et de jouissance prises dans leur sens social comme des éléments suffisants pour établir l'existence d'un titre aborigène; (8) en considérant que le critère de la possession et de l'occupation revenait à se demander s'il existait une règle de droit qui aurait forcé un intrus à quitter les lieux; (9) en considérant que des droits ancestraux ne peuvent être détenus conjointement par différents peuples; (10) en ne concluant pas que le titre aborigène pouvait reposer sur l'occupation, la possession, l'utilisation et la jouissance du territoire, même si cette occupation a pu diminuer dans la période qui a suivi le contact avec les Européens; (11) en examinant comme il l'a fait la question de l'extinction générale du titre aborigène; (12) en concluant que tous les droits ancestraux avaient été éteints par les instruments coloniaux. Ces erreurs de droit ont entraîné une conclusion erronée de la part du juge de première instance quant à l'existence du titre aborigène. Ses conclusions de fait peuvent être réexaminées en appel.

56 With regard to the jurisdiction claim, Lambert J.A. stated that the trial judge erred: (1) in treating the claim to jurisdiction as a claim to govern territory and assert sovereignty over the territory; (2) in trying to define the appellants' claim in terms of the answers given by one witness in cross-examination; (3) in concluding that the claim to jurisdiction must fail because the nature of aboriginal self-government and self-regulation was such that it does not produce a set of binding and enforceable laws; and (4) in considering that the existence of a legislative institution is an essential part of the existence of an aboriginal right to self-government. Because of these errors of law, the trial judge's conclusions were wrong.

En ce qui a trait à la revendication relative à la compétence, le juge Lambert a affirmé que le juge de première instance avait fait erreur (1) en considérant cette revendication comme la revendication par les demandeurs du droit de gouverner le territoire et d'affirmer leur souveraineté sur celui-ci; (2) en essayant de définir la revendication des appelants au moyen des réponses données par un témoin en contre-interrogatoire; (3) en concluant que la revendication relative à la compétence doit être rejetée parce que l'autonomie gouvernementale et l'autoréglementation autochtones étaient de nature telle qu'elles ne constituent pas un ensemble de règles de droit applicables et obligatoires; (4) en considérant que l'existence d'une institution législative est un élément essentiel de l'existence d'un droit ancestral à l'autonomie gouvernementale. En raison de ces erreurs de droit, les conclusions du juge de première instance étaient erronées.

57 With regard to the claim to aboriginal rights, Lambert J.A. was of the view that the trial judge erred: (1) in not treating the evidence of occupa-

Relativement à la revendication de droits ancestraux, le juge Lambert était d'avis que le juge de première instance avait fait erreur (1) en ne consi-

tion, possession, use, and enjoyment of the territory in an organized way by the appellants for their purposes, but particularly for sustenance, as being sufficient to establish aboriginal title to much of the land within the territory; (2) in separating commercial practices of aboriginal people from other practices and saying that commercial practices were not aboriginal practices; (3) in not considering the evidence of trading practices with neighbouring peoples; (4) in his treatment of the question of exclusivity both in relation to aboriginal title and sustenance rights; and (5) in considering participation in the wage or cash economy in relation to the existence (or non-existence) of aboriginal title. Again, given these errors of law, Lambert J.A. asserted that an appellate court had jurisdiction to intervene and set aside the trial judge's findings.

(d) *Substituted Findings*

In light of these errors, Lambert J.A. substituted his own findings of fact for those of the trial judge. In his view, the evidence established that in 1846, the Gitksan and Wet'suwet'en peoples occupied, possessed, used and enjoyed their traditional ancestral lands in accordance with their own practices, customs and traditions which were an integral part of their distinctive culture. Those ancestral lands extend throughout the claimed territory, well beyond the area indicated in Map 5. In areas where there were no conflicting claims to user rights, the appellants' rights should be characterized as aboriginal title. In areas of shared occupancy and use, the appellants' title would be shared-exclusive aboriginal title. In areas where the Gitksan and Wet'suwet'en peoples did not occupy, possess or use the land as an integral part of their culture, they would not have title, but may have aboriginal sustenance rights. These rights were not extinguished through any blanket extinguishment in the colonial period. Precise legislation related to a specific area may have extinguished some rights. However, no such legislation was before the court. The geographic scope of the

dérant pas que la preuve de l'occupation, de la possession, de l'utilisation et de la jouissance du territoire par les appelants, d'une façon organisée et pour leurs propres fins, mais particulièrement à des fins de subsistance, était suffisante pour établir le titre aborigène sur une grande partie des terres du territoire; (2) en séparant les pratiques commerciales des autochtones des autres pratiques, et en disant que les pratiques commerciales n'étaient pas des pratiques autochtones; (3) en ne tenant pas compte de la preuve de pratiques commerciales avec les peuples voisins; (4) en examinant comme il l'a fait la question de l'exclusivité tant en rapport avec le titre aborigène qu'avec les droits d'exploitation à des fins de subsistance; (5) en tenant compte de la participation à l'économie salariale ou monétaire pour statuer sur l'existence (ou l'inexistence) du titre aborigène. À nouveau, compte tenu de ces erreurs de droit, le juge Lambert a affirmé qu'une cour d'appel a compétence pour intervenir et infirmer les conclusions du juge de première instance.

d) *La substitution des conclusions*

À la lumière de ces erreurs, le juge Lambert a substitué ses propres conclusions de fait à celles du juge de première instance. Selon lui, la preuve établissait que, en 1846, les Gitksan et les Wet'suwet'en occupaient, possédaient et utilisaient leurs terres ancestrales traditionnelles et en avaient la jouissance conformément à leurs propres coutumes, pratiques et traditions qui faisaient partie intégrante de leur culture distinctive. Ces terres ancestrales s'étendent sur l'ensemble du territoire revendiqué, bien au-delà du territoire délimité sur la carte 5. Dans les secteurs où il n'y avait pas de revendications conflictuelles de droits d'utilisation, les droits des appelants devraient être qualifiés de titre aborigène. Dans les secteurs où il y a occupation et utilisation partagées, le titre des appelants serait un titre aborigène exclusif-partagé. Dans les secteurs où les Gitksan et les Wet'suwet'en n'ont pas occupé, possédé ou utilisé les terres en tant que partie intégrante de leur culture, ils n'auraient pas de titre, mais ils pourraient y avoir des droits ancestraux d'exploitation à des fins de subsistance. Aucune mesure d'extinction générale n'a éteint ces droits pendant la période coloniale. Il est possible

rights was a matter to be negotiated between the parties, and failing negotiation, needed to be determined by a new trial.

qu'un texte de loi donné, visant un secteur particulier, ait éteint certains droits, mais aucun texte de ce genre n'a été présenté à la cour. La portée géographique des droits était une question devant faire l'objet de négociations entre les parties ou, à défaut de négociations, être tranchée dans le cadre d'un nouveau procès.

59 Lambert J.A. also concluded that in 1846, the appellants' ancestors had rights of self-government and self-regulation, which rested on the practices, customs and traditions of those people which formed an integral part of their distinctive cultures. It is true that the rights may have been diminished by the assertion of British sovereignty, but those rights that continue are protected by s. 35 of the *Constitution Act, 1982*.

Le juge Lambert a aussi conclu que, en 1846, les ancêtres des appelants possédaient des droits à l'autonomie gouvernementale et à l'autoréglementation qui reposaient sur leurs coutumes, pratiques et traditions faisant partie intégrante de leur culture distinctive. Il est vrai que ces droits ont pu être diminués par l'affirmation de la souveraineté des Britanniques, mais ceux qui existent encore sont protégés par l'art. 35 de la *Loi constitutionnelle de 1982*.

60 Turning to aboriginal sustenance rights, Lambert J.A. stated that they are entirely encompassed within aboriginal title in those areas where Gitksan and Wet'suwet'en aboriginal title exists. They also may exist in areas outside of title lands. In areas where such rights were shared by a number of peoples, the appellants' rights may be limited to specific sustenance activities as opposed to exclusive or shared-exclusive use and occupation.

Abordant ensuite la question des droits ancestraux d'exploitation à des fins de subsistance, le juge Lambert a affirmé qu'ils sont entièrement compris dans le titre aborigène visant les terres à l'égard desquelles les Gitksan et les Wet'suwet'en possèdent un tel titre. Ils peuvent également exister à l'égard de secteurs non compris dans des terres visées par un titre. Sur les terres où ces droits étaient partagés par un certain nombre de peuples, il est possible que les droits des appelants se limitent à certaines activités précises de subsistance, par opposition à une utilisation et à une occupation exclusives ou exclusives-partagées.

(e) *Other Issues*

e) *Les autres questions*

61 With regard to the *Royal Proclamation, 1763*, R.S.C., 1985, App. II, No. 1, Lambert J.A. expressed no views on its application or effect in the claimed territory and its inhabitants. With regard to infringement or denial of the appellants' rights in the claimed territory, Lambert J.A. concluded that the evidence in the case did not permit a proper consideration of the issues. Each infringement or denial would have to be examined in relation to the specific circumstances.

En ce qui concerne la *Proclamation royale de 1763*, L.R.C. (1985), app. II, n° 1, le juge Lambert n'a exprimé aucune opinion quant à l'application ou à l'effet de ce texte sur le territoire revendiqué et sur ses habitants. Pour ce qui est de l'atteinte aux droits des appelants ou de la négation de ces droits, le juge Lambert a conclu que, en l'espèce, la preuve ne permettait pas de faire un examen adéquat de ces questions. Chaque atteinte ou négation devrait être examinée en fonction des circonstances particulières à chaque cas.

(f) *Disposition*

Lambert J.A. would have allowed the appeal, and made a number of declarations. First, he would declare that the Gitksan and Wet'suwet'en peoples had, at the time of the assertion of British sovereignty in 1846, aboriginal title to occupy, possess, use and enjoy all or some of the land within the claimed territory. The land covered by aboriginal title at that time extended far beyond village sites and the immediate areas surrounding. Second, he would declare that the Gitksan and Wet'suwet'en peoples may have had aboriginal sustenance rights, including hunting, fishing, gathering, and similar rights over any parts of the land within the claimed territory to which aboriginal title did not extend. He would also declare that the aboriginal title and the aboriginal sustenance rights described may have been exclusive to the Gitksan in certain areas and exclusive to the Wet'suwet'en in others, and in some they may have shared with each other, or other aboriginal peoples, or non-aboriginals.

Lambert J.A. would have also declared that the appellants' ancestors had, at the time of the assertion of British sovereignty in 1846, aboriginal rights of self-government and self-regulation relating to their own organized society, its members, its institutions and its sustenance rights. These rights were recognized by, incorporated into, and protected by the common law after 1846. They have not been extinguished by any form of blanket extinguishment. Hence, they exist in modern form, subject only to specific extinguishment of the specific title or specific sustenance right in a specific area. However, the right of aboriginal self-government did not include any rights that were inconsistent with British sovereignty, any rights that are repugnant to natural justice, equity and good conscience, and have not been modified to overcome that repugnancy, and any rights which are contrary to the part of the common law that applied to the

f) *Le dispositif*

Le juge Lambert aurait accueilli l'appel et prononcé certaines déclarations. Premièrement, il était d'avis de déclarer que les Wet'suwet'en et les Gitksan possédaient, à l'époque de l'affirmation de la souveraineté par les Britanniques en 1846, un titre aborigène fondant leur occupation, possession, utilisation et jouissance de tout ou partie des terres comprises dans le territoire revendiqué. Les terres visées par ce titre aborigène à l'époque s'étendaient bien au-delà du site des villages et de leurs environs. Deuxièmement, le juge Lambert aurait déclaré que les Gitksan et les Wet'suwet'en ont pu avoir des droits ancestraux d'exploitation à des fins de subsistance — y compris des droits de chasse, de pêche et de cueillette, ainsi que d'autres droits analogues — sur certaines parties du territoire revendiqué non visées par le titre aborigène. Il était aussi d'avis de déclarer que le titre aborigène et les droits ancestraux susmentionnés ont pu appartenir exclusivement aux Gitksan à certains endroits et exclusivement aux Wet'suwet'en à d'autres, et qu'à certains endroits les deux groupes ont pu les partager soit ensemble soit avec d'autres peuples autochtones ou avec des non-autochtones.

Le juge Lambert aurait aussi déclaré que les ancêtres des appelants possédaient, à l'époque de l'affirmation de la souveraineté par les Britanniques en 1846, des droits ancestraux à l'autonomie gouvernementale et à l'autoréglementation visant leur propre société organisée, ainsi que ses membres, ses institutions et ses droits d'exploitation à des fins de subsistance de cette société. Après 1846, ces droits ont été intégrés à la common law et protégés par celle-ci. Ils n'ont pas été éteints par quelque mesure d'extinction générale que ce soit. Par conséquent, ils existent sous une forme contemporaine, sous réserve seulement de l'extinction d'un titre particulier ou d'un droit d'exploitation à des fins de subsistance particulier visant un territoire précis. Cependant, le droit des autochtones à l'autonomie gouvernementale ne comportait ni droit inconciliable avec la souveraineté britannique, ni droit incompatible avec la justice naturelle, l'équité et la bonne conscience qui n'aurait pas été modifié pour éliminer cette incom-

62

63

territory, the Gitksan and Wet'suwet'en peoples and their institutions.

patibilité, ni droit contraire à la partie de la common law qui s'appliquait au territoire, ainsi qu'aux Gitksan, aux Wet'suwet'en et à leurs institutions.

64 Lambert J.A. would also declare that these aboriginal title rights, aboriginal rights of self-government and self-regulation, and aboriginal sustenance rights may have been subject, after 1846 to specific extinguishment by the clear and plain extinguishing intention of the Sovereign Power, legislatively expressed by Parliament. Any specific extinguishment of specific rights might have been express or implicit, and, if implicit, it may have been brought about by the legislation itself (implied extinguishment) or by acts authorized by the legislation (extinguishment by adverse dominion), provided the intention to extinguish was contained within the legislative expression and was clear and plain. Instances of such specific extinguishment could not be decided on this appeal.

Le juge Lambert était aussi d'avis de déclarer que ces droits au titre aborigène, ainsi que ces droits ancestraux à l'autonomie gouvernementale, à l'autoréglementation et à l'exploitation à des fins de subsistance ont pu faire l'objet, après 1846, d'une extinction particulière par la manifestation de l'intention claire et expresse à cette fin du pouvoir du Souverain, exprimée législativement par le Parlement. Toute mesure d'extinction particulière de droits donnés aurait été expresse ou implicite et, dans ce dernier cas, aurait pu découler soit du texte de loi lui-même (extinction implicite) soit d'actes autorisés par ce texte (extinction par possession adversative), à la condition que cette intention d'extinction ait été présente dans la mesure législative et qu'elle ait été claire et expresse. Les cas d'extinction de ce genre ne pouvaient pas être tranchés dans le cadre de l'appel.

65 Lambert J.A. would declare that the present aboriginal rights of self-government and self-regulation of the Gitksan and Wet'suwet'en peoples, exercisable in relation to their aboriginal title, would include the specific rights claimed in this appeal by the plaintiffs in relation to aboriginal title. He would also declare that the present aboriginal rights of self-government and self-regulation of the Gitksan and Wet'suwet'en peoples would include rights of self-government and self-regulation exercisable through their own institutions to preserve and enhance their social, political, cultural, linguistic and spiritual identity.

Le juge Lambert aurait déclaré que seraient compris parmi les droits ancestraux actuels des Gitksan et des Wet'suwet'en à l'autonomie gouvernementale et à l'autoréglementation — droits pouvant être exercés relativement à leur titre aborigène — les droits précis revendiqués en appel par les demandeurs relativement à ce titre. Il était également d'avis de déclarer que ces droits à l'autonomie gouvernementale et à l'autoréglementation comprendraient aussi les droits à l'autonomie gouvernementale et à l'autoréglementation pouvant être exercés par l'entremise de leurs propres institutions pour préserver et renforcer leur identité sociale, politique, culturelle, linguistique et spirituelle.

66 Finally, Lambert J.A. would remit a number of questions back to trial. These include the question of the territorial boundaries for both title and sustenance rights; the degree of exclusivity or shared exclusivity which the appellants hold, on both the territories over which they have title and the territories over which they have sustenance rights; the scope and content of the sustenance rights; the scope and content of the rights to self-government and self-regulation; and all questions relating to

Finalement, le juge Lambert aurait renvoyé un certain nombre de questions au tribunal de première instance, dont celle des limites territoriales tant du titre aborigène que des droits d'exploitation à des fins de subsistance; le degré d'exclusivité ou d'exclusivité partagée dont sont titulaires les appelants, à la fois sur les territoires à l'égard desquels ils ont un titre et sur ceux où ils possèdent des droits d'exploitation à des fins de subsistance; la portée et le contenu de ces droits d'exploitation à

the plaintiffs' entitlement to damages and the quantum of damages. He would have also awarded the plaintiffs their costs, both in the Court of Appeal, and at trial.

(4) Hutcheon J.A. (dissenting in part)

(a) *Rights to Land*

Hutcheon J.A. agreed with the trial judge that the *Royal Proclamation, 1763* did not apply to the territory or its inhabitants. Nonetheless, the policy reflected in the *Proclamation* was, generally speaking, acceptance of aboriginal rights to land. Moreover, Hutcheon J.A. concluded on the basis of *Calder* and *Sparrow* that the colonial enactments did not extinguish the aboriginal rights in the claimed territory. He found it unnecessary to decide whether a grant in fee simple extinguishes aboriginal title or whether entitlement to compensation arises in such circumstances.

(b) *Nature of the Rights*

Hutcheon J.A. accepted that aboriginal rights to land existed prior to 1846 over the claimed territory. He found it sufficient to say, at p. 389, that aboriginal rights can "compete on an equal footing" with proprietary interests. Additionally, he noted that these rights are collective, inalienable except to the Crown, and extend to the traditional territory of the particular people.

(c) *Territory*

Hutcheon J.A. disagreed with the trial judge's conclusion that the appellants' ancestors occupied or controlled only the villages in the territory and the immediately surrounding areas. In Hutcheon J.A.'s view, the trial judge misapprehended the legal test for occupation and disregarded the independent evidence which showed that the territory occupied or controlled by the appellants extended far beyond the villages.

des fins de subsistance; la portée et le contenu des droits à l'autonomie gouvernementale et à l'autoréglementation; ainsi que toutes les questions relatives au droit des demandeurs à des dommages-intérêts et au montant de ceux-ci. Il était d'avis aussi d'accorder aux demandeurs leurs dépens, tant devant la Cour d'appel qu'en première instance.

(4) Le juge Hutcheon (dissident en partie)

a) *Les droits fonciers*

Le juge Hutcheon était d'accord avec le juge de première instance que la *Proclamation royale de 1763* ne s'appliquait pas au territoire ou à ses habitants. Néanmoins, la *Proclamation* reflétait, de façon générale, une politique d'acceptation des droits fonciers ancestraux. En outre, le juge Hutcheon a conclu, en se fondant sur les arrêts *Calder* et *Sparrow*, que les lois coloniales n'avaient pas éteint les droits ancestraux sur le territoire revendiqué. Il a jugé qu'il n'était pas nécessaire de décider si une concession en fief simple éteint le titre aborigène ou si le droit à une indemnité naît dans de telles circonstances.

b) *La nature des droits*

Le juge Hutcheon a accepté que des droits fonciers ancestraux existaient avant 1846 à l'égard du territoire revendiqué. Il a estimé suffisant de dire, à la p. 389, que les droits ancestraux peuvent [TRA-DUCTION] «concurrer sur un pied d'égalité» des droits de propriété. De plus, il a souligné que ces droits sont collectifs, qu'ils sont inaliénables sauf en faveur de l'État et qu'ils s'étendent au territoire traditionnel du peuple concerné.

c) *Le territoire*

Le juge Hutcheon a exprimé son désaccord avec la conclusion du juge de première instance que les ancêtres des appelants n'avaient occupé ou contrôlé que les villages se trouvant dans le territoire et leurs environs immédiats. Selon le juge Hutcheon, le juge de première instance a mal saisi le critère juridique relatif à l'occupation et il n'a pas tenu compte de la preuve indépendante qui démontrait que le territoire occupé ou contrôlé par les appelants s'étendait bien au-delà des villages.

67

68

69

(d) *Self-Regulation*

70

The traditions of the Gitksan and Wet'suwet'en peoples existed long before 1846 and continued thereafter. They included the right to names and titles, the use of masks and symbols in rituals, the use of ceremonial robes, and the right to occupy and control places of economic importance. The traditions also included the institution of the clans and the Houses in which membership descended through the mother and the feast system. They regulated marriage and relations with neighbouring societies. The right to practise these traditions was not lost, although the *Indian Act* and provincial laws have affected the appellants' right to self-regulation. Only negotiations will define with greater specificity the areas and terms under which the appellants and the federal and provincial governments will exercise jurisdiction in respect of the appellants, their institutions, and laws.

(e) *Disposition*

71

Hutcheon J.A. would have allowed the appeal and have made a number of declarations. First, he would declare that all of the aboriginal rights of the appellants were not extinguished before 1871. Second, the appellants continue to have existing aboriginal rights to undefined portions of land within the claimed territory. Third, the appellants have rights of self-regulation exercisable through their own institutions to preserve and enhance their social, political, cultural, linguistic and spiritual identity. He would have remitted the outstanding matters to the Supreme Court of British Columbia, and stayed the proceedings for two years from the date of the judgment, or such shorter or longer period, in order for the parties to agree about the lands in respect of which the appellants have aboriginal rights, the scope of such rights on and to such lands, the scope of the right of self-regulation, and the appellants' entitlement to and quantum of

d) *L'autoréglementation*

Les traditions des Gitksan et des Wet'suwet'en existaient bien avant 1846 et elles ont continué d'exister par la suite. Elles comprenaient le droit de porter des noms et des titres, d'utiliser des masques et des symboles dans des rituels, d'utiliser des vêtements cérémoniels et d'occuper et de contrôler les lieux ayant une importance économique. Les traditions comprenaient aussi l'institution de clans et de maisons auxquels l'appartenance était régie par la filiation matrilineaire, et le système des célébrations. Ces traditions régissaient le mariage et les relations entre sociétés voisines. Le droit de pratiquer ces traditions n'a pas été perdu, bien que la *Loi sur les Indiens* et les lois provinciales aient affecté le droit des appelants à l'autoréglementation. Seules des négociations permettront de définir avec plus de précision les territoires où les appelants et les gouvernements fédéral et provinciaux exerceront leurs compétences sur les appelants, sur leurs institutions et sur leurs règles de droit, ainsi que les modalités d'exercices de ces compétences.

e) *Le dispositif*

Le juge Hutcheon était d'avis d'accueillir l'appel et de prononcer un certain nombre de déclarations. Premièrement, il aurait déclaré que tous les droits ancestraux des appelants n'ont pas été éteints avant 1871. Deuxièmement, les appelants continuent d'avoir des droits ancestraux existants sur des parties indéterminées du territoire revendiqué. Troisièmement, les appelants possèdent des droits à l'autoréglementation qu'ils peuvent exercer par l'entremise de leurs propres institutions pour préserver et renforcer leur identité sociale, politique, culturelle, linguistique et spirituelle. Il aurait renvoyé les questions non résolues à la Cour suprême de la Colombie-Britannique et suspendu les procédures pendant deux ans à compter de la date du jugement, ou pour une période plus courte ou plus longue, afin de permettre aux parties de s'entendre sur les terres à l'égard desquelles les appelants possèdent des droits ancestraux, sur la portée de tels droits à ces terres et sur celles-ci, sur la portée du droit à l'autoréglementation et sur le droit des appelants à des dommages-intérêts et sur

damages. Hutcheon J.A. would have awarded the appellants their costs throughout the proceedings.

IV. Issues

The following are the principal issues which must be addressed in this appeal. As will become apparent in my analysis, some of these issues in turn raise a number of sub-issues which I will address as well:

- A. Do the pleadings preclude the Court from entertaining claims for aboriginal title and self-government?
- B. What is the ability of this Court to interfere with the factual findings made by the trial judge?
- C. What is the content of aboriginal title, how is it protected by s. 35(1) of the *Constitution Act, 1982*, and what is required for its proof?
- D. Has a claim to self-government been made out by the appellants?
- E. Did the province have the power to extinguish aboriginal rights after 1871, either under its own jurisdiction or through the operation of s. 88 of the *Indian Act*?

V. Analysis

- A. *Do the pleadings preclude the Court from entertaining claims for aboriginal title and self-government?*

In their pleadings, the appellants, 51 Chiefs representing most of the Houses of the Gitksan and Wet'suwet'en nations, originally advanced 51 individual claims on their own behalf and on behalf of their houses for "ownership" and "jurisdiction" over 133 distinct territories which together comprise 58,000 square kilometres of northwestern British Columbia. On appeal, that original claim was altered in two different ways. First, the claims for ownership and jurisdiction have been replaced with claims for aboriginal title and self-govern-

le montant de ceux-ci. Le juge Hutcheon aurait accordé aux appelants leurs dépens dans toutes les cours.

IV. Les questions en litige

Les principales questions qui doivent être tranchées dans le présent pourvoi sont énoncées ci-dessous. Comme il ressortira de mon analyse, certaines de ces questions soulèvent des sous-questions, que j'examinerai également:

- A. Les actes de procédure empêchent-ils la Cour d'examiner les revendications relatives au titre aborigène et à l'autonomie gouvernementale?
- B. Quel pouvoir notre Cour a-t-elle de modifier les conclusions de fait du juge de première instance?
- C. Quel est le contenu du titre aborigène, comment est-il protégé par le par. 35(1) de la *Loi constitutionnelle de 1982* et comment fait-on la preuve de son existence?
- D. Les appelants ont-ils établi le bien-fondé de leur revendication de l'autonomie gouvernementale?
- E. La province avait-elle, après 1871, le pouvoir d'éteindre des droits ancestraux soit par l'exercice de sa propre compétence soit par l'effet de l'art. 88 de la *Loi sur les Indiens*?

V. L'analyse

- A. *Les actes de procédure empêchent-ils la Cour d'examiner les revendications relatives au titre aborigène et à l'autonomie gouvernementale?*

Dans leurs actes de procédure, les appelants — 51 chefs représentant la plupart des maisons des nations Gitksan et Wet'suwet'en — ont initialement présenté, en leur propre nom et au nom de leurs maisons, 51 revendications individuelles sollicitant la «propriété» de 133 territoires distincts totalisant 58 000 kilomètres carrés dans la partie nord-ouest de la Colombie-Britannique, ainsi que la «compétence» sur ces territoires. En appel, cette revendication initiale a été modifiée de deux façons. Premièrement, les revendications relatives

ment, respectively. Second, the individual claims by each house have been amalgamated into two communal claims, one advanced on behalf of each nation. However, there were no formal amendments to the pleadings to this effect, and the respondents accordingly argue that claims which are central to this appeal are not properly before the Court. Furthermore, the respondents argue that they have suffered prejudice as a result because they might have conducted the defence quite differently had they known the case to meet.

à la propriété des territoires et à la compétence sur ceux-ci ont été remplacées respectivement par la revendication du titre aborigène et la revendication de l'autonomie gouvernementale. Deuxièmement, les revendications individuelles présentées par chaque maison ont été fusionnées en deux revendications collectives, une au nom de chaque nation. Toutefois, aucune modification en ce sens n'a été apportée formellement aux actes de procédure, et les intimés affirment par conséquent que la Cour n'est pas régulièrement saisie de revendications qui sont au centre du présent pourvoi. En outre, les intimés prétendent qu'ils ont en conséquence subi un préjudice, puisqu'ils auraient peut-être présenté leur défense d'une tout autre façon s'ils avaient su ce à quoi ils devaient répondre.

74 I reject the respondents' submission with respect to the substitution of aboriginal title and self-government for the original claims of ownership and jurisdiction. Although it is true that the pleadings were not formally amended, the trial judge, at p. 158, did allow a *de facto* amendment to permit "a claim for aboriginal rights other than ownership and jurisdiction". Had the respondents been concerned about the prejudice arising from this ruling, they could have appealed accordingly. However, they did not, and, as a result, the decision of the trial judge on this point must stand.

Je rejette l'argument des intimés en ce qui a trait à la substitution de la revendication du titre aborigène et de l'autonomie gouvernementale aux revendications initiales relatives à la propriété et à la compétence. Même s'il est vrai que les actes de procédure n'ont pas été formellement modifiés, le juge de première instance, à la p. 158, a bel et bien accepté une modification *de facto* pour permettre [TRADUCTION] «la revendication de droits ancestraux autres que la propriété et la compétence». Si les intimés avaient cru que cette décision pouvait leur porter préjudice, ils auraient pu en appeler. Cependant, ils ne l'ont pas fait et, par conséquent, la décision du juge de première instance sur ce point doit être maintenue.

75 Moreover, in my opinion, that ruling was correct because it was made against the background of considerable legal uncertainty surrounding the nature and content of aboriginal rights, under both the common law and s. 35(1). The content of common law aboriginal title, for example, has not been authoritatively determined by this Court and has been described by some as a form of "ownership". As well, this case was pleaded prior to this Court's decision in *Sparrow*, *supra*, which was the first statement from this Court on the types of rights that come within the scope of s. 35(1). The law has rapidly evolved since then. Accordingly, it was just and appropriate for the trial judge to allow for

En outre, je suis d'avis que cette décision était exacte, parce qu'elle a été prise dans un contexte d'incertitude juridique considérable quant à la nature et au contenu des droits ancestraux, tant en vertu de la common law qu'en vertu du par. 35(1). Par exemple, notre Cour n'a pas encore statué de façon définitive sur le contenu du titre aborigène en common law, que certains ont décrit comme une forme de «propriété». Par ailleurs, la présente affaire a été plaidée avant que notre Cour rende l'arrêt *Sparrow*, précité, où elle se prononçait pour la première fois sur le type de droits qui sont visés au par. 35(1). Le droit a évolué rapidement depuis. Par conséquent, il était juste et convenable que le

an amendment to pleadings which were framed when the jurisprudence was in its infancy.

However, no such amendment was made with respect to the amalgamation of the individual claims brought by the 51 Gitksan and Wet'suwet'en Houses into two collective claims, one by each nation, for aboriginal title and self-government. Given the absence of an amendment to the pleadings, I must reluctantly conclude that the respondents suffered some prejudice. The appellants argue that the respondents did not experience prejudice since the collective and individual claims are related to the extent that the territory claimed by each nation is merely the sum of the individual claims of each House; the external boundaries of the collective claims therefore represent the outer boundaries of the outer territories. Although that argument carries considerable weight, it does not address the basic point that the collective claims were simply not in issue at trial. To frame the case in a different manner on appeal would retroactively deny the respondents the opportunity to know the appellants' case.

This defect in the pleadings prevents the Court from considering the merits of this appeal. However, given the importance of this case and the fact that much of the evidence of individual territorial holdings is extremely relevant to the collective claims now advanced by each of the appellants, the correct remedy for the defect in pleadings is a new trial, where, to quote the trial judge at p. 368, "[i]t will be for the parties to consider whether any amendment is required in order to make the pleadings conform with the evidence". Moreover, as I will now explain, there are other reasons why a new trial should be ordered.

juge de première instance permette la modification d'actes de procédure qui ont été rédigés lorsque la jurisprudence en était encore à ses balbutiements.

Cependant, aucune modification de la sorte n'a été apportée en ce qui a trait à la fusion des revendications individuelles présentées par les 51 maisons Wet'suwet'en et Gitksan en deux revendications collectives, une pour chaque nation, sollicitant un titre aborigène et l'autonomie gouvernementale. Étant donné l'absence de modification des actes de procédure, je dois, avec réticence, conclure que les intimés ont subi un certain préjudice. Les appelants affirment que les intimés n'ont pas subi de préjudice puisque les revendications collectives et individuelles sont liées, dans la mesure où le territoire revendiqué par chaque nation est simplement la somme des revendications individuelles de chaque maison, les limites extrêmes des revendications collectives représentant donc les limites extérieures des territoires externes. Même si cet argument a un poids considérable, il ne répond pas au point fondamental que les revendications collectives n'étaient tout simplement pas en litige en première instance. Redéfinir le litige en appel aurait pour effet de nier rétroactivement aux intimés la possibilité de savoir quelle est la cause des appelants.

Ce vice dans les actes de procédure empêche notre Cour d'examiner le fond du présent pourvoi. Toutefois, vu l'importance de l'affaire et le fait qu'une grande partie de la preuve relative aux divers territoires possédés est extrêmement pertinente à l'égard des revendications collectives que présentent maintenant les appelants, la réparation convenable à l'égard du vice dont sont entachés les actes de procédure est la tenue d'un nouveau procès au cours duquel, comme l'a dit le juge de première instance, à la p. 368, [TRADUCTION] «[i]l reviendra aux parties de se demander si une modification est nécessaire pour rendre les actes de procédure conformes à la preuve». En outre, comme je vais maintenant l'expliquer, il y a d'autres raisons pour lesquelles un nouveau procès doit être ordonné.

B. *What is the ability of this Court to interfere with the factual findings made by the trial judge?*

(1) General Principles

78

I recently reviewed the principles governing the appellate review of findings of fact in *Van der Peet*, *supra*. As a general rule, this Court has been extremely reluctant to interfere with the findings of fact made at trial, especially when those findings of fact are based on an assessment of the testimony and credibility of witnesses. Unless there is a “palpable and overriding error”, appellate courts should not substitute their own findings of fact for those of the trial judge. The leading statement of this principle can be found in *Stein v. The Ship “Kathy K”*, [1976] 2 S.C.R. 802, *per* Ritchie J., at p. 808:

These authorities are not to be taken as meaning that the findings of fact made at trial are immutable, but rather that they are not to be reversed unless it can be established that the learned trial judge made some palpable and overriding error which affected his assessment of the facts. While the Court of Appeal is seized with the duty of re-examining the evidence in order to be satisfied that no such error occurred, it is not, in my view, a part of its function to substitute its assessment of the balance of probability for the findings of the judge who presided at the trial.

The same deference must be accorded to the trial judge’s assessment of the credibility of expert witnesses: see *N.V. Bocimar S.A. v. Century Insurance Co. of Canada*, [1987] 1 S.C.R. 1247.

79

The policy reason underlying this rule is protection of “[t]he autonomy and integrity of the trial process” (*Schwartz v. Canada*, [1996] 1 S.C.R. 254, at p. 278), which recognizes that the trier of fact, who is in direct contact with the mass of the evidence, is in the best position to make findings of fact, particularly those which turn on credibility. Moreover, *Van der Peet* clarified that deference was owed to findings of fact even when the trial judge misapprehended the law which was applied to those facts, a problem which can arise in quickly

B. *Quel pouvoir notre Cour a-t-elle de modifier les conclusions de fait du juge de première instance?*

(1) Les principes généraux

Récemment, dans l’arrêt *Van der Peet*, précité, j’ai examiné les principes régissant la révision, en appel, des conclusions de fait. De façon générale, notre Cour s’est montrée extrêmement réticente à modifier des conclusions de fait tirées en première instance, particulièrement lorsque ces conclusions de fait sont fondées sur l’appréciation des témoignages et de la crédibilité des témoins. Sauf «erreur manifeste et dominante», les cours d’appel ne devraient pas substituer leurs propres conclusions de fait à celles du juge de première instance. L’énoncé jurisprudentiel de ce principe qui fait autorité a été exposé par le juge Ritchie dans *Stein c. Le navire «Kathy K»*, [1976] 2 R.C.S. 802, à la p. 808:

On ne doit pas considérer que ces arrêts signifient que les conclusions sur les faits tirées en première instance sont intangibles, mais plutôt qu’elles ne doivent pas être modifiées à moins qu’il ne soit établi que le juge du procès a commis une erreur manifeste et dominante qui a faussé son appréciation des faits. Bien que la Cour d’appel ait l’obligation de réexaminer la preuve afin de s’assurer qu’aucune erreur de ce genre n’a été commise, j’estime qu’il ne lui appartient pas de substituer son appréciation de la prépondérance des probabilités aux conclusions tirées par le juge qui a présidé le procès.

Il faut faire montre de la même retenue à l’égard de l’appréciation par le juge de première instance de la crédibilité des témoins experts: voir *N.V. Bocimar S.A. c. Century Insurance Co. of Canada*, [1987] 1 R.C.S. 1247.

La raison de principe qui sous-tend cette règle est la protection de «l’autonomie et [de] l’intégrité du procès» (*Schwartz c. Canada*, [1996] 1 R.C.S. 254, à la p. 278), qui reconnaît que le juge des faits — qui est en contact direct avec l’ensemble de la preuve — est le mieux placé pour tirer des conclusions de fait, particulièrement celles concernant la crédibilité. En outre, l’arrêt *Van der Peet* a précisé qu’il faut faire montre de retenue à l’égard des conclusions de fait, même lorsque le juge du procès a mal saisi le droit qu’il a appliqué aux faits en

evolving areas of law such as the jurisprudence surrounding s. 35(1).

I recently held, in *Van der Peet*, that these general principles apply to cases litigated under s. 35(1). On the other hand, while accepting the general principle of non-interference, this Court has also identified specific situations in which an appeal court can interfere with a finding of fact made at trial. For example, appellate intervention is warranted “where the courts below have misapprehended or overlooked material evidence”: see *Chartier v. Attorney General of Quebec*, [1979] 2 S.C.R. 474, at p. 493. In cases involving the determination of aboriginal rights, appellate intervention is also warranted by the failure of a trial court to appreciate the evidentiary difficulties inherent in adjudicating aboriginal claims when, first, applying the rules of evidence and, second, interpreting the evidence before it. As I said in *Van der Peet*, at para. 68:

In determining whether an aboriginal claimant has produced evidence sufficient to demonstrate that her activity is an aspect of a practice, custom or tradition integral to a distinctive aboriginal culture, a court should approach the rules of evidence, and interpret the evidence that exists, with a consciousness of the special nature of aboriginal claims, and of the evidentiary difficulties in proving a right which originates in times where there were no written records of the practices, customs and traditions engaged in. The courts must not undervalue the evidence presented by aboriginal claimants simply because that evidence does not conform precisely with the evidentiary standards that would be applied in, for example, a private law torts case. [Emphasis added.]

The justification for this special approach can be found in the nature of aboriginal rights themselves. I explained in *Van der Peet* that those rights are aimed at the reconciliation of the prior occupation of North America by distinctive aboriginal societies with the assertion of Crown sovereignty over Canadian territory. They attempt to achieve that

question, problème susceptible de survenir dans les domaines du droit qui évoluent rapidement comme celui de la jurisprudence relative au par. 35(1).

J’ai récemment statué, dans *Van der Peet*, que ces principes généraux s’appliquent aux affaires plaidées en vertu du par. 35(1). Par contre, tout en acceptant le principe général de non-intervention, la Cour a aussi indiqué des situations précises où une cour d’appel peut modifier une conclusion de fait tirée en première instance. Ainsi, une cour d’appel est justifiée d’intervenir «dans le cas où les premiers juges se sont mépris sur une preuve importante ou l’ont méconnue»: voir *Chartier c. Procureur général du Québec*, [1979] 2 R.C.S. 474, à la p. 493. Dans les affaires de détermination de droits ancestraux, l’intervention de la cour d’appel est également justifiée dans les cas où le tribunal de première instance n’a pas tenu compte des difficultés de preuve inhérentes à l’examen des revendications de droits ancestraux, premièrement, lorsqu’il a appliqué les règles de preuve et, deuxièmement, lorsqu’il a interprété la preuve qui lui était présentée. Comme je l’ai dit dans *Van der Peet*, au par. 68:

Pour déterminer si un demandeur autochtone a produit une preuve suffisante pour établir que ses activités sont un aspect d’une coutume, pratique ou tradition qui fait partie intégrante d’une culture autochtone distinctive, le tribunal doit appliquer les règles de preuve et interpréter la preuve existante en étant conscient de la nature particulière des revendications des autochtones et des difficultés que soulève la preuve d’un droit qui remonte à une époque où les coutumes, pratiques et traditions n’étaient pas consignées par écrit. Les tribunaux doivent se garder d’accorder un poids insuffisant à la preuve présentée par les demandeurs autochtones simplement parce que cette preuve ne respecte pas de façon précise les normes qui seraient appliquées dans une affaire de responsabilité civile délictuelle par exemple. [Je souligne.]

La justification de cette approche spéciale découle de la nature même des droits ancestraux. Dans *Van der Peet*, j’ai expliqué que ces droits visent à concilier l’occupation antérieure de l’Amérique du Nord par des sociétés autochtones distinctives avec l’affirmation de la souveraineté britannique sur le territoire du Canada. Ils visent à

reconciliation by “their bridging of aboriginal and non-aboriginal cultures” (at para. 42). Accordingly, “a court must take into account the perspective of the aboriginal people claiming the right... while at the same time taking into account the perspective of the common law” such that “[t]rue reconciliation will, equally, place weight on each” (at paras. 49 and 50).

réaliser cette conciliation en établissant un «rapprochement entre les cultures autochtones et non autochtones» (au par. 42). Par conséquent, «le tribunal doit tenir compte du point de vue des autochtones qui revendiquent ce droit [...] [tout en tenant compte] de la common law» de sorte que «[l]a conciliation véritable accordée, également, de l'importance à chacun de ces éléments» (aux par. 49 et 50).

82

In other words, although the doctrine of aboriginal rights is a common law doctrine, aboriginal rights are truly *sui generis*, and demand a unique approach to the treatment of evidence which accords due weight to the perspective of aboriginal peoples. However, that accommodation must be done in a manner which does not strain “the Canadian legal and constitutional structure” (at para. 49). Both the principles laid down in *Van der Peet* — first, that trial courts must approach the rules of evidence in light of the evidentiary difficulties inherent in adjudicating aboriginal claims, and second, that trial courts must interpret that evidence in the same spirit — must be understood against this background.

En d'autres termes, bien que la doctrine des droits ancestraux soit une doctrine de common law, les droits ancestraux sont véritablement des droits *sui generis* qui exigent, quant au traitement de la preuve, une approche unique, accordant le poids qu'il faut au point de vue des peuples autochtones. Toutefois, l'adaptation doit se faire d'une manière qui ne fasse pas entorse à «l'organisation juridique et constitutionnelle du Canada» (au par. 49). Les deux principes exposés dans *Van der Peet* — premièrement, le fait que les tribunaux de première instance doivent aborder les règles de preuve en tenant compte des difficultés de preuve inhérentes à l'examen des revendications de droits ancestraux, et, deuxièmement, le fait que les tribunaux de première instance doivent interpréter cette preuve dans le même esprit — doivent être compris dans ce contexte.

83

A concrete application of the first principle can be found in *Van der Peet* itself, where I addressed the difficulties inherent in demonstrating a continuity between current aboriginal activities and the pre-contact practices, customs and traditions of aboriginal societies. As I reiterate below, the requirement for continuity is one component of the definition of aboriginal rights (although, as I explain below, in the case of title, the issue is continuity from sovereignty, not contact). However, given that many aboriginal societies did not keep written records at the time of contact or sovereignty, it would be exceedingly difficult for them to produce (at para. 62) “conclusive evidence from pre-contact times about the practices, customs and

On peut trouver une application concrète du premier principe dans l'arrêt *Van der Peet* même, où je me suis penché sur les difficultés inhérentes à la démonstration de la continuité entre les activités autochtones actuelles et les coutumes, pratiques et traditions des sociétés autochtones qui existaient avant le contact avec les Européens. Comme je le réitère ci-dessous, l'exigence de continuité est un élément de la définition des droits ancestraux (quoique, comme je l'explique ci-après, dans le cas du titre, il s'agit de la continuité à partir de l'affirmation de la souveraineté, et non du contact avec les Européens). Toutefois, comme bon nombre de sociétés autochtones ne conservaient pas d'écrits à l'époque du contact avec les Européens, il leur serait excessivement difficile de produire (au par. 62), «relativement [à leurs] coutumes, pratiques et traditions [...], une preuve concluante, datant de l'époque antérieure au contact avec les

traditions of their community”. Accordingly, I held that (at para. 62):

The evidence relied upon by the applicant and the courts may relate to aboriginal practices, customs and traditions post-contact; it simply needs to be directed at demonstrating which aspects of the aboriginal community and society have their origins pre-contact. [Emphasis added.]

The same considerations apply when the time from which title is determined is sovereignty.

This appeal requires us to apply not only the first principle in *Van der Peet* but the second principle as well, and adapt the laws of evidence so that the aboriginal perspective on their practices, customs and traditions and on their relationship with the land, are given due weight by the courts. In practical terms, this requires the courts to come to terms with the oral histories of aboriginal societies, which, for many aboriginal nations, are the only record of their past. Given that the aboriginal rights recognized and affirmed by s. 35(1) are defined by reference to pre-contact practices or, as I will develop below, in the case of title, pre-sovereignty occupation, those histories play a crucial role in the litigation of aboriginal rights.

A useful and informative description of aboriginal oral history is provided by the *Report of the Royal Commission on Aboriginal Peoples* (1996), vol. 1 (*Looking Forward, Looking Back*), at p. 33:

The Aboriginal tradition in the recording of history is neither linear nor steeped in the same notions of social progress and evolution [as in the non-Aboriginal tradition]. Nor is it usually human-centred in the same way as the western scientific tradition, for it does not assume that human beings are anything more than one — and not necessarily the most important — element of the

Européens». Par conséquent, j’ai statué ainsi (au par. 62):

La preuve sur laquelle s’appuient le demandeur et les tribunaux peut se rapporter aux coutumes, pratiques et traditions autochtones postérieures au contact avec les Européens. Il suffit que cette preuve tende à démontrer lesquels des aspects de la collectivité et de la société autochtones datent d’avant le contact avec les Européens. [Je souligne.]

Les mêmes facteurs s’appliquent lorsque l’affirmation de la souveraineté est le moment servant à statuer sur l’existence d’un titre.

Le présent pourvoi exige que nous appliquions non seulement le premier principe établi dans *Van der Peet* mais aussi le second, et que nous adaptions les règles du droit de la preuve de manière à ce que les tribunaux accordent le poids qui convient au point de vue des autochtones sur leurs coutumes, pratiques et traditions, de même que sur les rapports qu’ils entretiennent avec le territoire. En pratique, cela exige que les tribunaux acceptent les récits oraux des sociétés autochtones, récits qui, pour bon nombre de nations autochtones, sont les seuls témoignages de leur passé. Étant donné que les droits ancestraux reconnus et confirmés par le par. 35(1) sont définis en regard des pratiques antérieures au contact avec les Européens ou, comme je vais l’expliquer ci-après, dans le cas d’un titre, en regard de l’occupation antérieure à l’affirmation de la souveraineté, ces récits jouent un rôle crucial dans les litiges portant sur les droits ancestraux.

On trouve des explications utiles et instructives quant aux récits oraux autochtones dans le *Rapport de la Commission royale sur les peuples autochtones* (1996), vol. 1 (*Un passé, un avenir*), à la p. 35:

La tradition autochtone, pour ce qui est de l’enregistrement des faits historiques, n’est ni linéaire ni fondée sur les mêmes notions d’évolution et de progrès sociaux [comme dans la tradition non autochtone]. D’habitude, elle n’est pas non plus centrée au même degré sur l’humain et part du principe que celui-ci n’est qu’un élément parmi d’autres — et pas nécessairement le plus impor-

84

85

natural order of the universe. Moreover, the Aboriginal historical tradition is an oral one, involving legends, stories and accounts handed down through the generations in oral form. It is less focused on establishing objective truth and assumes that the teller of the story is so much a part of the event being described that it would be arrogant to presume to classify or categorize the event exactly or for all time.

In the Aboriginal tradition the purpose of repeating oral accounts from the past is broader than the role of written history in western societies. It may be to educate the listener, to communicate aspects of culture, to socialize people into a cultural tradition, or to validate the claims of a particular family to authority and prestige. . . .

Oral accounts of the past include a good deal of subjective experience. They are not simply a detached recounting of factual events but, rather, are “facts enmeshed in the stories of a lifetime”. They are also likely to be rooted in particular locations, making reference to particular families and communities. This contributes to a sense that there are many histories, each characterized in part by how a people see themselves, how they define their identity in relation to their environment, and how they express their uniqueness as a people.

tant — de l’ordre naturel de l’univers. De plus, la tradition historique autochtone est une tradition orale, c’est-à-dire que les légendes, histoires et récits mythiques sont transmis de vive voix aux générations subséquentes. Elle vise moins à déterminer en quoi consiste la vérité objective, et suppose que le conteur de l’histoire est si directement concerné par l’événement en question que ce serait faire preuve d’arrogance que de vouloir classer celui-ci dans une catégorie précise et perpétuelle.

Dans la tradition autochtone, la transmission orale des récits poursuit un objectif qui dépasse le rôle de l’histoire écrite dans les sociétés occidentales. Cet objectif consiste peut-être à renseigner l’auditeur, à communiquer certains aspects de la culture, à socialiser la population en lui donnant une tradition culturelle, ou encore à valider l’autorité et le prestige que revendique telle ou telle famille . . .

Les récits oraux du passé reposent en grande partie sur des expériences subjectives. Ce ne sont pas de simples comptes rendus factuels, mais des «faits auxquels viennent se greffer les histoires de toute une vie». Il est également probable qu’ils soient associés à des lieux précis et qu’ils fassent allusion à des familles et à des collectivités précises. Tout cela donne l’impression d’une multitude d’histoires, dont chacune est influencée en partie par la façon dont un peuple se perçoit, se définit par rapport à l’environnement et exprime son unicité.

86

Many features of oral histories would count against both their admissibility and their weight as evidence of prior events in a court that took a traditional approach to the rules of evidence. The most fundamental of these is their broad social role not only “as a repository of historical knowledge for a culture” but also as an expression of “the values and mores of [that] culture”: Clay McLeod, “The Oral Histories of Canada’s Northern People, Anglo-Canadian Evidence Law, and Canada’s Fiduciary Duty to First Nations: Breaking Down the Barriers of the Past” (1992), 30 *Alta. L. Rev.* 1276, at p. 1279. Dickson J. (as he then was) recognized as much when he stated in *Kruger v. The Queen*, [1978] 1 S.C.R. 104, at p. 109, that “[c]laims to aboriginal title are woven with history, legend, politics and moral obligations.” The difficulty with these features of oral histories is that they are tangential to the ultimate purpose of the fact-finding process at trial — the determina-

Devant un tribunal qui adopterait une approche traditionnelle à l’égard des règles de preuve, un grand nombre des caractéristiques des récits oraux joueraient contre l’admissibilité de ces récits et la valeur probante qui doit leur être accordée en tant que preuve d’événements passés. La plus fondamentale de ces caractéristiques est le rôle social général qu’ils jouent, non seulement [TRADUCTION] «en tant que moyen de conservation du savoir historique d’une culture» mais aussi comme expression «des valeurs et des mœurs de [cette] culture»: Clay McLeod, «The Oral Histories of Canada’s Northern People, Anglo-Canadian Evidence Law, and Canada’s Fiduciary Duty to First Nations: Breaking Down the Barriers of the Past» (1992), 30 *Alta. L. Rev.* 1276, à la p. 1279. Le juge Dickson (plus tard Juge en chef) a reconnu ce fait lorsqu’il a affirmé, dans l’arrêt *Kruger c. La Reine*, [1978] 1 R.C.S. 104, à la p. 109, que «[l]es revendications de titres aborigènes reposent aussi sur

tion of the historical truth. Another feature of oral histories which creates difficulty is that they largely consist of out-of-court statements, passed on through an unbroken chain across the generations of a particular aboriginal nation to the present-day. These out-of-court statements are admitted for their truth and therefore conflict with the general rule against the admissibility of hearsay.

l'histoire, les légendes, la politique et les obligations morales.» La difficulté que posent ces caractéristiques des récits oraux est qu'elles sont tangentielles à la finalité du processus de découverte des faits en première instance — savoir la découverte de la vérité historique. Une autre difficulté créée par les récits oraux est le fait qu'ils sont dans une large mesure constitués de déclarations extrajudiciaires, qui ont été transmises de façon ininterrompue jusqu'à nos jours, au fil des générations d'une nation autochtone. Ces déclarations extrajudiciaires sont admises pour leur véracité, et elles entrent donc en conflit avec la règle générale d'inadmissibilité du ouï-dire.

Notwithstanding the challenges created by the use of oral histories as proof of historical facts, the laws of evidence must be adapted in order that this type of evidence can be accommodated and placed on an equal footing with the types of historical evidence that courts are familiar with, which largely consists of historical documents. This is a long-standing practice in the interpretation of treaties between the Crown and aboriginal peoples: *Sioui*, *supra*, at p. 1068; *R. v. Taylor* (1981), 62 C.C.C. (2d) 227 (Ont. C.A.), at p. 232. To quote Dickson C.J., given that most aboriginal societies “did not keep written records”, the failure to do so would “impose an impossible burden of proof” on aboriginal peoples, and “render nugatory” any rights that they have (*Simon v. The Queen*, [1985] 2 S.C.R. 387, at p. 408). This process must be undertaken on a case-by-case basis. I will take this approach in my analysis of the trial judge's findings of fact.

Malgré les problèmes que crée l'utilisation des récits oraux comme preuve de faits historiques, le droit de la preuve doit être adapté afin que ce type de preuve puisse être placé sur un pied d'égalité avec les différents types d'éléments de preuve historique familiers aux tribunaux, le plus souvent des documents historiques. Il s'agit d'une pratique appliquée de longue date dans l'interprétation des traités entre l'État et les peuples autochtones: *Sioui*, précité, à la p. 1068; *R. c. Taylor* (1981), 62 C.C.C. (2d) 227 (C.A. Ont.), à la p. 232. Ainsi que l'a dit le juge en chef Dickson, comme la plupart des sociétés autochtones «ne tenaient aucun registre», le fait de ne pas suivre cette pratique «[imposerait un] fardeau de preuve impossible» aux peuples autochtones et «enlèverait [...] toute valeur» aux droits qu'ils ont (*Simon c. La Reine*, [1985] 2 R.C.S. 387, à la p. 408). Cette méthode doit être appliquée au cas par cas. Je vais appliquer cette approche dans mon analyse des conclusions de fait du juge de première instance.

On a final note, it is important to understand that even when a trial judge has erred in making a finding of fact, appellate intervention does not proceed automatically. The error must be sufficiently serious that it was “overriding and determinative in the assessment of the balance of probabilities with respect to that factual issue” (*Schwartz*, *supra*, at p. 281).

En terminant, je tiens à souligner qu'il est important de comprendre que, même lorsque le juge de première instance a commis une erreur en tirant une conclusion de fait, il n'y a pas systématiquement intervention de la juridiction d'appel. L'erreur doit être suffisamment grave pour avoir constitué une erreur «dominant[e] et déterminant[e]» dans l'appréciation de la prépondérance des probabilités relativement à cette question de fait» (*Schwartz*, précité, à la p. 281).

(2) Application of General Principles(a) *General Comments*

89

The general principle of appellate non-interference applies with particular force in this appeal. The trial was lengthy and very complex. There were 318 days of testimony. There were a large number of witnesses, lay and expert. The volume of evidence is enormous. To quote the trial judge at pp. 116-17:

A total of 61 witnesses gave evidence at trial, many using translators from their native Gitksan or Wet'suwet'en language; "word spellers" to assist the official reporters were required for many witnesses; a further 15 witnesses gave their evidence on commission; 53 territorial affidavits were filed; 30 deponents were cross-examined out of court; there are 23,503 pages of transcript evidence at trial; 5898 pages of transcript of argument; 3,039 pages of commission evidence and 2,553 pages of cross-examination on affidavits (all evidence and oral arguments are conveniently preserved in hard copy and on diskettes); about 9,200 exhibits were filed at trial comprising, I estimate, well over 50,000 pages; the plaintiffs' draft outline of argument comprises 3,250 pages, the province's 1,975 pages, and Canada's over 1,000 pages; there are 5,977 pages of transcript of argument in hard copy and on diskettes. All parties filed some excerpts from the exhibits they referred to in argument. The province alone submitted 28 huge binders of such documents. At least 15 binders of reply argument were left with me during that stage of the trial.

The result was a judgment of over 400 pages in length.

90

It is not open to the appellants to challenge the trial judge's findings of fact merely because they disagree with them. I fear that a significant number of the appellants' objections fall into this category. Those objections are too numerous to list in their

(2) L'application des principes générauxa) *Observations générales*

Le principe général de la non-intervention des cours d'appel s'applique avec une force particulière dans le présent pourvoi. Le procès en première instance a été long et complexe. Il y a eu 318 jours de témoignages. Un grand nombre de témoins, tant experts que profanes, ont déposé. La quantité d'éléments de preuve est énorme. Comme l'a dit le juge de première instance aux pp. 116 et 117:

[TRADUCTION] Au total, 61 personnes ont témoigné au procès, bon nombre par l'entremise d'interprètes parce qu'ils s'exprimaient dans leur langue autochtone, le Gitksan ou le Wet'suwet'en; les sténographes officiels ont dû avoir recours à des «spécialistes de l'orthographe» pour de nombreux témoins; 15 autres témoins ont déposé dans le cadre d'une commission rogatoire; 53 affidavits territoriaux ont été déposés; 30 déposants ont été contre-interrogés à l'extérieur de la cour; la transcription des témoignages rendus au procès compte 23 503 pages; la transcription de l'argumentation 5 898 pages; les témoignages dans le cadre des commissions rogatoires 3 039 pages et la transcription des contre-interrogatoires sur les affidavits 2 553 pages (tous les témoignages et l'argumentation orale sont commodément conservés sur support papier et sur disquettes); ont été déposées au procès environ 9 200 pièces comptant, selon moi, bien au-delà de 50 000 pages; le document donnant les grandes lignes de l'argumentation des demandeurs comprend 3 250 pages, celui de la province 1 975 pages et celui du Canada plus de 1 000 pages; il y a 5 977 pages de transcription de l'argumentation, sur support papier et sur disquettes. Toutes les parties ont déposé des extraits des pièces auxquelles elles se sont référées au cours de leur argumentation. À elle seule, la province a déposé 28 énormes reliures contenant de tels documents. Au moins 15 reliures de la sorte contenant l'argumentation produite en réponse m'ont été remises au cours du procès.

Il en a résulté un jugement de plus de 400 pages.

Il n'est pas loisible aux appelants de contester les conclusions de fait du juge de première instance simplement parce qu'ils ne sont pas d'accord avec celles-ci. Je crains qu'un bon nombre des objections des appelants ne tombent dans cette

entirety. The bulk of these objections, at best, relate to alleged instances of misapprehension or oversight of material evidence by the trial judge. However, the respondents have established that, in most situations, there was some contradictory evidence that supported the trial judge's conclusion. The question, ultimately, was one of weight, and the appellants have failed to demonstrate that the trial judge erred in this respect.

One objection that I would like to mention specifically, albeit in passing, is the trial judge's refusal to accept the testimony of two anthropologists who were brought in as expert witnesses by the appellants. This aspect of the trial judge's reasons was hotly contested by the appellants in their written submissions. However, I need only reiterate what I have stated above, that findings of credibility, including the credibility of expert witnesses, are for the trial judge to make, and should warrant considerable deference from appellate courts.

On the other hand, the appellants have alleged that the trial judge made a number of serious errors relating to the treatment of the oral histories of the appellants. Those oral histories were expressed in three different forms: (i) the *adaawk* of the Gitksan, and the *kungax* of the Wet'suwet'en; (ii) the personal recollections of members of the appellant nations, and (iii) the territorial affidavits filed by the heads of the individual houses within each nation. The trial judge ruled on both the admissibility of, and the weight to be given to, these various forms of oral history without the benefit of my reasons in *Van der Peet*, as will become evident in the discussion that follows.

(b) *Adaawk and Kungax*

The *adaawk* and *kungax* of the Gitksan and Wet'suwet'en nations, respectively, are oral histories of a special kind. They were described by the

catégorie. Ces objections sont trop nombreuses pour en dresser la liste complète. Le gros de ces objections, au mieux, invoquent des erreurs de compréhension ou des oublis de la part du juge de première instance relativement à des éléments de preuve importants. Cependant, les intimés ont établi que, dans la plupart des cas, il y avait certaines éléments de preuve contradictoires pour appuyer la conclusion du juge de première instance. En dernière analyse, il s'agissait d'une question de valeur probante de la preuve, et les appelants n'ont pas démontré que le juge de première instance avait commis d'erreur sur ce point.

Il y a une objection que j'aimerais mentionner de façon plus particulière, quoiqu'en passant. C'est celle qui a trait au refus du juge de première instance d'accepter le témoignage de deux anthropologues assignés comme témoins experts par les appelants. Cet aspect des motifs du juge de première instance a été vivement contesté par les appelants dans leurs observations écrites. Toutefois, il me suffit de réitérer ce que j'ai dit plus tôt, savoir qu'il appartient au juge de première instance de tirer les conclusions ayant trait à la crédibilité, y compris la crédibilité des témoins experts, et les cours d'appel doivent faire montre d'une retenue considérable à l'égard de ces conclusions.

Par contre, les appelants ont affirmé que le juge de première instance a commis de nombreuses erreurs graves dans le traitement des récits oraux des appelants. Ces récits ont été exprimés sous trois formes différentes: (i) l'*adaawk* des Gitksan et le *kungax* des Wet'suwet'en; (ii) les souvenirs personnels de membres des nations appelantes; (iii) les affidavits territoriaux déposés par les chefs de chacune des maisons de chaque nation. Le juge de première instance a rendu une décision sur leur admissibilité et le poids à leur accorder sans avoir pu bénéficier des motifs que j'ai rédigés dans l'arrêt *Van der Peet*, comme il ressortira de l'analyse qui suit.

b) *L'adaawk et le kungax*

L'*adaawk* de la nation Gitksan et le *kungax* de la nation Wet'suwet'en sont des récits oraux d'un genre spécial. Le juge de première instance les a

91

92

93

trial judge, at p. 164, as a “sacred ‘official’ litany, or history, or recital of the most important laws, history, traditions and traditional territory of a House”. The content of these special oral histories includes its physical representation totem poles, crests and blankets. The importance of the adaawk and kungax is underlined by the fact that they are “repeated, performed and authenticated at important feasts” (at p. 164). At those feasts, dissenters have the opportunity to object if they question any detail and, in this way, help ensure the authenticity of the adaawk and kungax. Although they serve largely the same role, the trial judge found that there are some differences in both the form and content of the adaawk and the kungax. For example, the latter is “in the nature of a song . . . which is intended to represent the special authority and responsibilities of a chief” However, these differences are not legally relevant for the purposes of the issue at hand.

décrits, à la p. 164, comme étant la [TRADUCTION] «litanie, l'énumération ou l'histoire “officielle” et sacrée, selon le cas, des règles de droit, des traditions et des faits historiques les plus importants d'une maison, ainsi que de son territoire traditionnel». Le contenu de ces récits oraux spéciaux est notamment exprimé physiquement dans les mâts totémiques, les emblèmes et les couvertures. L'importance de l'adaawk et du kungax est soulignée par le fait qu'ils sont [TRADUCTION] «répétés, représentés et authentifiés lors de célébrations importantes» (à la p. 164). Lors de ces célébrations, les dissidents ont l'occasion d'opposer leur désaccord à l'égard d'un détail et, de cette façon, d'aider à assurer l'authenticité de l'adaawk et du kungax. Bien que l'adaawk et le kungax jouent dans une large mesure le même rôle, le juge de première instance a constaté certaines différences de forme et de contenu. Par exemple, le kungax est [TRADUCTION] «de la nature d'un chant [. . .] qui vise à décrire l'autorité et les responsabilités spéciales du chef» Cependant, ces différences n'ont aucune pertinence juridique relativement à la question qui nous intéresse.

94 It is apparent that the adaawk and kungax are of integral importance to the distinctive cultures of the appellant nations. At trial, they were relied on for two distinct purposes. First, the adaawk was relied on as a component of and, therefore, as proof of the existence of a system of land tenure law internal to the Gitksan, which covered the whole territory claimed by that appellant. In other words, it was offered as evidence of the Gitksan's historical use and occupation of that territory. For the Wet'suwet'en, the kungax was offered as proof of the central significance of the claimed lands to their distinctive culture. As I shall explain later in these reasons, both use and occupation, and the central significance of the lands occupied, are relevant to proof of aboriginal title.

Il est manifeste que l'adaawk et le kungax ont une importance fondamentale pour les cultures distinctives des nations appelantes. En première instance, ils ont été invoqués pour deux fins distinctes. Premièrement, l'adaawk a été invoqué en tant qu'élément — et, partant, en tant que preuve de l'existence — d'un régime juridique de tenure foncière propre aux Gitksan, qui s'appliquait à l'ensemble du territoire revendiqué par cette nation appelante. En d'autres termes, l'adaawk a été présenté en tant que preuve de l'utilisation et de l'occupation historiques de ce territoire par les Gitksan. En ce qui concerne les Wet'suwet'en, le kungax a été invoqué comme preuve de l'importance fondamentale des terres revendiquées dans leur culture distinctive. Comme je vais l'expliquer plus loin dans les présents motifs, tant l'utilisation et l'occupation des terres visées que l'importance fondamentale de celles-ci sont pertinentes pour la preuve du titre aborigène.

95 The admissibility of the adaawk and kungax was the subject of a general decision of the trial judge

Il a été statué sur l'admissibilité de l'adaawk et du kungax dans le cadre d'une décision générale

handed down during the course of the trial regarding the admissibility of all oral histories (incorrectly indexed as *Uukw v. R.*, [1987] 6 W.W.R. 155 (B.C.S.C.)). Although the trial judge recognized that the evidence at issue was a form of hearsay, he ruled it admissible on the basis of the recognized exception that declarations made by deceased persons could be given in evidence by witnesses as proof of public or general rights: see Michael N. Howard, Peter Crane and Daniel A. Hochberg, *Phipson on Evidence* (14th ed. 1990), at p. 736. He affirmed that earlier ruling in his trial judgment, correctly in my view, by stating, at p. 180, that the *adaawk* and *kungax* were admissible “out of necessity as exceptions to the hearsay rule” because there was no other way to prove the history of the Gitksan and Wet’suwet’en nations.

The trial judge, however, went on to give these oral histories no independent weight at all. He held, at p. 180, that they were only admissible as “direct evidence of facts in issue . . . in a few cases where they could constitute confirmatory proof of early presence in the territory”. His central concern that the *adaawk* and *kungax* could not serve “as evidence of detailed history, or land ownership, use or occupation”. I disagree with some of the reasons he relied on in support of this conclusion.

Although he had earlier recognized, when making his ruling on admissibility, that it was impossible to make an easy distinction between the mythological and “real” aspects of these oral histories, he discounted the *adaawk* and *kungax* because they were not “literally true”, confounded “what is fact and what is belief”, “included some material which might be classified as mythology”, and projected a “romantic view” of the history of the appellants. He also cast doubt on the authenticity of these special oral histories (at p. 181) because, *inter alia*, “the verifying group is so small that they cannot

rendue au cours du procès par le juge de première instance sur l’admissibilité des récits oraux (erronément répertoriée sous l’intitulé *Uukw c. R.*, [1987] 6 W.W.R. 155 (C.S.C.-B.)). Bien que le juge de première instance ait reconnu que la preuve en cause était une forme de ouï-dire, il a statué qu’elle était admissible en se fondant sur l’exception reconnue selon laquelle les déclarations de personnes décédées peuvent être versées en preuve par des témoins comme preuve de droits de nature publique ou générale; voir Michael N. Howard, Peter Crane et Daniel A. Hochberg, *Phipson on Evidence* (14^e éd. 1990), à la p. 736. Dans son jugement au terme du procès, il a, avec raison selon moi, confirmé cette première décision en affirmant, à la p. 180, que l’*adaawk* et le *kungax* étaient admissibles [TRADUCTION] «par nécessité, comme exceptions à la règle du ouï-dire», parce qu’il n’y avait aucune autre façon de faire la preuve de l’histoire des nations Gitksan et Wet’suwet’en.

Cependant, par la suite, le juge de première instance n’a donné à ces récits aucune valeur probante indépendante. Il a statué, à la p. 180, qu’ils étaient admissibles seulement à titre de [TRADUCTION] «preuve directe des faits en litige [. . .] pour les quelques cas où ils pourraient constituer la confirmation d’une présence ancienne dans le territoire». Sa principale réserve était que l’*adaawk* et le *kungax* ne pouvaient pas servir «de preuve du détail de l’histoire ou encore de la propriété, de l’utilisation ou de l’occupation du territoire». Je suis en désaccord avec certains des motifs qu’il a invoqués au soutien de cette conclusion.

Même si, plus tôt, dans sa décision sur l’admissibilité, il avait reconnu qu’il était impossible de séparer facilement les aspects mythologiques des aspects [TRADUCTION] «réels» de ces récits oraux, il a écarté l’*adaawk* et le *kungax* parce qu’ils n’étaient pas «littéralement vrais», qu’ils mélangaient «les faits et les croyances», qu’ils «comportaient des éléments qui pourraient être qualifiés de mythologiques» et qu’ils évoquaient une «vision romanesque» de l’histoire des appelants. Il a aussi dit douter de l’authenticité de ces récits oraux spéciaux (à la p. 181) parce que, entre

96

97

safely be regarded as expressing the reputation of even the Indian community, let alone the larger community whose opportunity to dispute territorial claims would be essential to weight". Finally, he questioned (at p. 181) the utility of the adaawk and kungax to demonstrate use and occupation because they were "seriously lacking in detail about the specific lands to which they are said to relate".

autres, [TRADUCTION] «le groupe témoin est si restreint qu'on ne peut, sans risque, considérer même qu'il exprime la commune renommée au sein de la communauté indienne, encore moins au sein de la communauté plus large, dont la possibilité de contester les revendications territoriales serait essentielle du point de vue de la valeur probante». Finalement, il a mis en doute (à la p. 181) l'utilité de l'adaawk et du kungax pour faire la preuve de l'utilisation et de l'occupation des terres visées, parce qu'ils «manquaient sérieusement de détails au sujet des terres mêmes auxquelles ils sont censés se rapporter».

98

Although he framed his ruling on weight in terms of the specific oral histories before him, in my respectful opinion, the trial judge in reality based his decision on some general concerns with the use of oral histories as evidence in aboriginal rights cases. In summary, the trial judge gave no independent weight to these special oral histories because they did not accurately convey historical truth, because knowledge about those oral histories was confined to the communities whose histories they were and because those oral histories were insufficiently detailed. However, as I mentioned earlier, these are features, to a greater or lesser extent, of all oral histories, not just the adaawk and kungax. The implication of the trial judge's reasoning is that oral histories should never be given any independent weight and are only useful as confirmatory evidence in aboriginal rights litigation. I fear that if this reasoning were followed, the oral histories of aboriginal peoples would be consistently and systematically undervalued by the Canadian legal system, in contradiction of the express instruction to the contrary in *Van der Peet* that trial courts interpret the evidence of aboriginal peoples in light of the difficulties inherent in adjudicating aboriginal claims.

Bien qu'il ait structuré sa décision concernant la valeur probante en fonction des récits oraux particuliers qui lui avaient été présentés, le juge de première instance a, à mon avis, fondé plutôt sa décision sur certaines réserves générales concernant l'utilisation des récits oraux en preuve dans les affaires de droits ancestraux. En résumé, le juge du procès n'a accordé aucune valeur probante indépendante à ces récits oraux particuliers parce qu'ils ne transmettaient pas avec exactitude la vérité historique, parce que la connaissance de ces récits oraux était limitée aux communautés dont ils reconstituaient l'histoire et parce que ces récits oraux n'étaient pas suffisamment détaillés. Cependant, comme je l'ai mentionné précédemment, il s'agit là de caractéristiques qui sont, dans une mesure plus ou moins grande, propres à tous les récits oraux, et non seulement aux adaawk et aux kungax. L'implication du raisonnement du juge de première instance est qu'il ne devrait jamais être accordé de valeur probante indépendante aux récits oraux et que, dans les litiges sur les droits ancestraux, ces récits ne sont utiles qu'à titre d'éléments de preuve tendant à en confirmer d'autres. Je crains que, si ce raisonnement était suivi, la valeur des récits oraux des peuples autochtones serait constamment et systématiquement sous-estimée par le système juridique canadien, en contravention des instructions expresses à l'effet contraire qui ont été données dans l'arrêt *Van der Peet*, précité, et suivant lesquelles les tribunaux doivent interpréter la preuve présentée par les peuples autochtones en tenant compte des difficultés inhérentes à l'examen des revendications autochtones.

(c) *Recollections of Aboriginal Life*

The trial judge also erred when he discounted the “recollections of aboriginal life” offered by various members of the appellant nations. I take that term to be a reference to testimony about personal and family history that is not part of an *adaawk* or a *kungax*. That evidence consisted of the personal knowledge of the witnesses and declarations of witnesses’ ancestors as to land use. This history had been adduced by the appellants in order to establish the requisite degree of use and occupation to make out a claim to ownership and, for the same reason as the *adaawk* and *kungax*, is material to the proof of aboriginal title.

The trial judge limited the uses to which the evidence could be put. He reasoned, at p. 177, that this evidence, at most, established “without question, that the plaintiff’s immediate ancestors, for the past 100 years or so” had used land in the claimed territory for aboriginal purposes. However, the evidence was insufficiently precise to demonstrate that the more distant ancestors of the witnesses had engaged in specific enough land use “far enough back in time to permit the plaintiffs to succeed on issues such as internal boundaries”. In the language of *Van der Peet*, the trial judge effectively held that this evidence did not demonstrate the requisite continuity between present occupation and past occupation in order to ground a claim for aboriginal title.

In my opinion, the trial judge expected too much of the oral history of the appellants, as expressed in the recollections of aboriginal life of members of the appellant nations. He expected that evidence to provide definitive and precise evidence of pre-contact aboriginal activities on the territory in question. However, as I held in *Van der Peet*, this will be almost an impossible burden to meet. Rather, if oral history cannot conclusively estab-

c) *Les souvenirs du mode de vie ancestral*

Le juge de première instance a aussi fait erreur en ne tenant pas compte des [TRADUCTION] «souvenirs du mode de vie ancestral» relatés par divers membres des nations appelantes. J’interprète cette expression comme une référence aux témoignages portant sur les antécédents personnels et familiaux qui ne font pas partie d’un *adaawk* ou d’un *kungax*. Cette preuve était constituée des connaissances personnelles des témoins et des déclarations de leurs ancêtres quant à l’utilisation du territoire. Ces récits ont été présentés en preuve par les appelants afin d’établir le degré d’occupation et d’utilisation requis pour fonder la revendication de propriété, et ils sont, pour le même motif que l’*adaawk* et le *kungax*, pertinents pour la preuve du titre aborigène.

Le juge de première instance a limité les utilisations qui pouvaient être faites de cette preuve. Il a raisonné, à la p. 177, que, au mieux, celle-ci établissait [TRADUCTION] «sans l’ombre d’un doute que, au cours des 100 dernières années environ, les ancêtres immédiats du demandeur» avaient utilisé à des fins autochtones des terres situées dans le territoire revendiqué. Cependant, la preuve n’était pas suffisamment précise pour démontrer que les ancêtres plus lointains des témoins avaient fait une utilisation suffisamment particulière des terres [TRADUCTION] «assez loin dans le temps pour permettre aux demandeurs d’avoir gain de cause sur des questions comme les limites internes». Pour reprendre les termes de l’arrêt *Van der Peet*, le juge de première instance a effectivement conclu que cette preuve ne démontrait pas la continuité requise entre l’occupation actuelle et l’occupation passée pour fonder la revendication d’un titre aborigène.

À mon avis, le juge de première instance attendait beaucoup trop des récits oraux des appelants, exprimés dans les souvenirs du mode de vie ancestral des membres des nations appelantes. Il attendait de ces témoignages qu’ils apportent la preuve définitive et précise d’activités autochtones sur le territoire en question avant le contact avec les Européens. Cependant, comme je l’ai dit dans *Van der Peet*, il s’agit là d’un fardeau de preuve dont il

99

100

101

lish pre-sovereignty (after this decision) occupation of land, it may still be relevant to demonstrate that current occupation has its origins prior to sovereignty. This is exactly what the appellants sought to do.

(d) *Territorial Affidavits*

102 Finally, the trial judge also erred in his treatment of the territorial affidavits filed by the appellant chiefs. Those affidavits were declarations of the territorial holdings of each of the Gitksan and Wet'suwet'en houses and, at trial, were introduced for the purposes of establishing each House's ownership of its specific territory. Before this Court, the appellants tried to amalgamate these individual claims into collective claims on behalf of each nation and the relevance of the affidavits changed accordingly. I have already held that it is not open to the appellants to alter fundamentally the nature of their claim in this way on appeal. Nevertheless, the treatment of the affidavits is important because they will be relevant at a new trial to the existence and nature of the land tenure system within each nation and, therefore, material to the proof of title.

103 The affidavits rely heavily on the declarations of deceased persons of use or ownership of the lands, which are a form of oral history. But those declarations are a kind of hearsay and the appellants therefore argued that the affidavits should be admitted through the reputation exception to the hearsay rule. Although he recognized, at p. 438, that the territorial affidavits were "the best evidence [the appellants] could adduce on this question of internal boundaries", the trial judge held

est presque impossible de s'acquitter. Par contre, même si (après le prononcé du présent arrêt) les récits oraux ne permettent pas d'établir de façon concluante l'occupation du territoire avant l'affirmation de la souveraineté, ils peuvent néanmoins être pertinents pour démontrer que les origines de l'occupation actuelle remontent avant l'affirmation de la souveraineté. C'est exactement ce que les appelants ont tenté de faire.

d) *Les affidavits territoriaux*

Finalement, le juge de première instance a aussi fait erreur dans la façon dont il a traité les affidavits territoriaux déposés par les chefs appelants. Ces affidavits étaient des déclarations concernant les terres de chaque maison Gitksan et Wet'suwet'en et, au procès, ils ont été déposés pour établir le droit de propriété de chaque maison sur son territoire spécifique. Devant notre Cour, les appelants ont tenté de fusionner ces revendications individuelles en revendications collectives présentées au nom de chaque nation, et la pertinence des affidavits a changé en conséquence. J'ai déjà statué qu'il n'est pas loisible aux appelants de modifier fondamentalement la nature de leur revendication comme ils l'ont fait en appel. Néanmoins, le traitement accordé aux affidavits est important parce que, dans le cadre d'un nouveau procès, ils seront pertinents pour statuer sur l'existence et la nature du régime de tenure foncière au sein de chaque nation et, par conséquent, importants pour la preuve du titre.

Les affidavits reposent en très grande partie sur des déclarations faites par des personnes décédées relativement à l'utilisation des terres ou à leurs propriétaires, une forme de récits oraux. Toutefois, ces déclarations constituent une sorte de ouï-dire, et les appelants ont par conséquent plaidé que les affidavits devraient être admis sur le fondement de l'exception à la règle du ouï-dire relative à la réputation ou à la commune renommée. Bien qu'il ait reconnu, à la p. 438, que les affidavits territoriaux étaient [TRADUCTION] «la meilleure preuve [que les appelants] pouvaient produire sur la question des limites internes», le juge de première instance a conclu que cette exception ne s'appliquait pas et il

that this exception did not apply and refused to admit the declarations contained in the affidavits.

I am concerned by the specific reasons the trial judge gave for refusing to apply the reputation exception. He questioned the degree to which the declarations amounted to a reputation because they were largely confined to the appellants' communities. The trial judge asserted that neighbouring aboriginal groups whose territorial claims conflicted with those of the appellants, as well as non-aboriginals who potentially possessed a legal interest in the claimed territory, were unaware of the content of the alleged reputation at all. Furthermore, the trial judge reasoned that since the subject-matter of the affidavits was disputed, its reliability was doubtful. Finally, the trial judge questioned, at p. 441, "the independence and objectivity" of the information contained in the affidavits, because the appellants and their ancestors (at p. 440) "have been actively discussing land claims for many years".

Although he regretted this finding, the trial judge felt bound to apply the rules of evidence because it did not appear to him (at p. 442) "that the Supreme Court of Canada has decided that the ordinary rules of evidence do not apply to this kind of case". The trial judge arrived at this conclusion, however, without the benefit of *Van der Peet*, where I held that the ordinary rules of evidence must be approached and adapted in light of the evidentiary difficulties inherent in adjudicating aboriginal claims.

Many of the reasons relied on by the trial judge for excluding the evidence contained in the territorial affidavits are problematic because they run against this fundamental principle. The requirement that a reputation be known in the general community, for example, ignores the fact that oral

a refusé d'admettre les déclarations contenues dans les affidavits.

Je suis préoccupé par les motifs particuliers invoqués par le juge de première instance pour refuser d'appliquer l'exception fondée sur la commune renommée. Il s'est demandé dans quelle mesure les déclarations exprimaient la commune renommée, étant donné qu'elles se confinaient largement aux communautés des appelants. Le juge de première instance a affirmé que les groupes autochtones voisins dont les revendications territoriales entraient en conflit avec celles des appelants, de même que les non-autochtones susceptibles d'avoir un intérêt juridique dans le territoire revendiqué, n'étaient absolument pas au courant du contenu du fait de commune renommée allégué. En outre, le juge de première instance a raisonné que, comme le contenu des affidavits était contesté, sa fiabilité était douteuse. Finalement, le juge de première instance a mis en doute, à la p. 441, [TRADUCTION] «l'indépendance et l'objectivité» de l'information contenue dans les affidavits, parce que les appelants et leurs ancêtres (à la p. 440) «discutent activement de revendications territoriales depuis de nombreuses années».

Bien qu'il ait dit regretter en arriver à cette conclusion, le juge de première instance s'est senti tenu d'appliquer les règles de preuve parce qu'il ne lui semblait pas (à la p. 442) [TRADUCTION] «que la Cour suprême du Canada ait décidé que les règles de preuve ordinaires ne s'appliquent pas dans ce genre d'affaires». Cependant, le juge de première instance a tiré cette conclusion avant le prononcé de l'arrêt *Van der Peet*, où j'ai statué que les règles de preuve ordinaires doivent être abordées et adaptées en tenant compte des difficultés de preuve inhérentes à l'examen des revendications autochtones.

Bon nombre des motifs invoqués par le juge de première instance pour écarter la preuve contenue dans les affidavits territoriaux sont problématiques parce qu'ils vont à l'encontre de ce principe fondamental. Par exemple, l'exigence qu'un fait de commune renommée soit connu dans la communauté

104

105

106

histories, as noted by the Royal Commission on Aboriginal Peoples, generally relate to particular locations, and refer to particular families and communities and may, as a result, be unknown outside of that community, even to other aboriginal nations. Excluding the territorial affidavits because the claims to which they relate are disputed does not acknowledge that claims to aboriginal rights, and aboriginal title in particular, are almost always disputed and contested. Indeed, if those claims were uncontroversial, there would be no need to bring them to the courts for resolution. Casting doubt on the reliability of the territorial affidavits because land claims had been actively discussed for many years also fails to take account of the special context surrounding aboriginal claims, in two ways. First, those claims have been discussed for so long because of British Columbia's persistent refusal to acknowledge the existence of aboriginal title in that province until relatively recently, largely as a direct result of the decision of this Court in *Calder, supra*. It would be perverse, to say the least, to use the refusal of the province to acknowledge the rights of its aboriginal inhabitants as a reason for excluding evidence which may prove the existence of those rights. Second, this rationale for exclusion places aboriginal claimants whose societies record their past through oral history in a grave dilemma. In order for the oral history of a community to amount to a form of reputation, and to be admissible in court, it must remain alive through the discussions of members of that community; those discussions are the very basis of that reputation. But if those histories are discussed too much, and too close to the date of litigation, they may be discounted as being suspect, and may be held to be inadmissible. The net effect may be that a society with such an oral tradition would never be able to establish a historical claim through the use of oral history in court.

en général ne tient pas compte du fait que, comme l'a souligné la Commission royale sur les peuples autochtones, les récits oraux sont généralement associés à des lieux précis et font allusion à des familles et à des collectivités précises, et peuvent, par conséquent, ne pas être connus à l'extérieur de cette collectivité, même par d'autres nations autochtones. Écarter les affidavits territoriaux parce que les revendications auxquelles ils se rapportent sont contestées ne tient pas compte du fait que les revendications de droits ancestraux, et de titre aborigène en particulier, sont presque toujours contestées. De fait, si ces revendications ne soulevaient aucune controverse, il ne serait pas nécessaire de s'adresser aux tribunaux pour les faire trancher. Jeter le doute sur la fiabilité des affidavits territoriaux parce que les revendications territoriales ont été discutées activement pendant de nombreuses années ne tient pas compte non plus du contexte des revendications autochtones et ce, de deux façons. Premièrement, si ces revendications sont discutées depuis si longtemps, c'est en raison du refus constant de la Colombie-Britannique, jusqu'à une date relativement récente, de reconnaître l'existence du titre aborigène dans la province, refus qui était dans une large mesure une conséquence directe de l'arrêt *Calder*, précité, de notre Cour. Il serait pour le moins abusif d'utiliser le refus de la province de reconnaître les droits de ses habitants autochtones comme motif pour écarter la preuve qui pourrait établir l'existence de ces droits. Deuxièmement, ce motif d'exclusion place les revendicateurs autochtones — qui appartiennent à des sociétés préservant leur passé au moyen de récits oraux — devant un grave dilemme. Pour qu'un récit oral d'une communauté équivaille à une forme de commune renommée et soit admissible en cour, il doit se perpétuer dans les discussions des membres de cette communauté; ces discussions sont le fondement même de cette commune renommée. Toutefois, si ces récits font l'objet de trop de discussions, à une période trop rapprochée d'un litige, ils risquent d'être écartés parce qu'ils sont suspects, et ils peuvent ainsi être jugés inadmissibles. Cela pourrait avoir pour effet qu'une société possédant une telle tradition orale ne pourrait jamais faire la preuve d'une revendication historique en utilisant un récit oral en cour.

(e) *Conclusion*

The trial judge's treatment of the various kinds of oral histories did not satisfy the principles I laid down in *Van der Peet*. These errors are particularly worrisome because oral histories were of critical importance to the appellants' case. They used those histories in an attempt to establish their occupation and use of the disputed territory, an essential requirement for aboriginal title. The trial judge, after refusing to admit, or giving no independent weight to these oral histories, reached the conclusion that the appellants had not demonstrated the requisite degree of occupation for "ownership". Had the trial judge assessed the oral histories correctly, his conclusions on these issues of fact might have been very different.

In the circumstances, the factual findings cannot stand. However, given the enormous complexity of the factual issues at hand, it would be impossible for the Court to do justice to the parties by sifting through the record itself and making new factual findings. A new trial is warranted, at which the evidence may be considered in light of the principles laid down in *Van der Peet* and elaborated upon here. In applying these principles, the new trial judge might well share some or all of the findings of fact of McEachern C.J.

C. *What is the content of aboriginal title, how is it protected by s. 35(1) of the Constitution Act, 1982, and what is required for its proof?*

(1) *Introduction*

The parties disagree over whether the appellants have established aboriginal title to the disputed area. However, since those factual issues require a new trial, we cannot resolve that dispute in this appeal. But factual issues aside, the parties also have a more fundamental disagreement over the content of aboriginal title itself, and its reception

e) *La conclusion*

Le traitement accordé aux divers types de récits oraux par le juge de première instance ne respecte pas les principes que j'ai établis dans *Van der Peet*. Ces erreurs sont particulièrement troublantes, étant donné que les récits oraux étaient d'une importance cruciale pour la cause des appelants. Ils ont invoqué ces récits, pour tenter d'établir leur occupation et leur utilisation du territoire contesté, condition essentielle à l'existence du titre aborigène. Après avoir refusé d'admettre ces récits oraux ou de leur accorder quelque valeur probante indépendante que ce soit, le juge de première instance est arrivé à la conclusion que les appelants n'avaient pas démontré l'existence du degré d'occupation requis du territoire pour fonder la «propriété» de celui-ci. Si le juge du procès avait apprécié correctement les récits oraux, ses conclusions sur ces questions de fait auraient pu être très différentes.

Dans les circonstances, les conclusions de fait ne peuvent pas être confirmées. Cependant, vu la complexité énorme des questions de fait en jeu, il serait impossible à la Cour de rendre justice aux parties en passant le dossier au crible et en tirant de nouvelles conclusions de fait. Un nouveau procès s'impose, au cours duquel on pourra examiner la preuve à la lumière des principes qui ont été exposés dans *Van der Peet* et précisés en l'espèce. Dans l'application de ces principes, le juge qui présidera le nouveau procès pourrait bien partager l'ensemble ou certaines des conclusions de fait du juge en chef McEachern.

C. *Quel est le contenu du titre aborigène, comment est-il protégé par le par. 35(1) de la Loi constitutionnelle de 1982 et comment fait-on la preuve de son existence?*

(1) *Introduction*

Les parties ne s'entendent pas sur la question de savoir si les appelants ont démontré l'existence d'un titre aborigène sur la région contestée. Cependant, comme un nouveau procès est nécessaire pour trancher ces questions de fait, nous ne pouvons pas régler ce différend dans le cadre du présent pourvoi. Outre ce différend d'ordre factuel,

107

108

109

into the Constitution by s. 35(1). In order to give guidance to the judge at the new trial, it is to this issue that I will now turn.

les parties ont un désaccord plus fondamental à propos du contenu du titre aborigène lui-même, et de sa réception dans la Constitution par le par. 35(1). Afin d'éclairer le juge qui instruira le nouveau procès, je vais maintenant examiner cette question.

110 I set out these opposing positions by way of illustration and introduction because I believe that all of the parties have characterized the content of aboriginal title incorrectly. The appellants argue that aboriginal title is tantamount to an inalienable fee simple, which confers on aboriginal peoples the rights to use those lands as they choose and which has been constitutionalized by s. 35(1). The respondents offer two alternative formulations: first, that aboriginal title is no more than a bundle of rights to engage in activities which are themselves aboriginal rights recognized and affirmed by s. 35(1), and that the *Constitution Act, 1982*, merely constitutionalizes those individual rights, not the bundle itself, because the latter has no independent content; and second, that aboriginal title, at most, encompasses the right to exclusive use and occupation of land in order to engage in those activities which are aboriginal rights themselves, and that s. 35(1) constitutionalizes this notion of exclusivity.

Afin d'illustrer le problème, je vais, en guise d'introduction, exposer les thèses opposées des parties, car j'estime que toutes les parties ont décrit incorrectement le contenu du titre aborigène. Les appelants soutiennent que le titre aborigène équivaut à un fief simple inaliénable, qu'il confère aux peuples autochtones le droit d'utiliser les terres visées comme ils l'entendent et qu'il a été constitutionnalisé par le par. 35(1). Les intimés avancent deux définitions: premièrement, le titre aborigène n'est rien de plus qu'un faisceau de droits autorisant l'exercice d'activités qui sont elles-mêmes des droits ancestraux reconnus et confirmés par le par. 35(1), et la *Loi constitutionnelle de 1982* ne fait que constitutionnaliser ces droits individuels et non le faisceau lui-même, parce que celui-ci n'a aucun contenu indépendant; deuxièmement, le titre aborigène comprend, au plus, le droit exclusif d'utiliser et d'occuper des terres pour y exercer des activités qui sont elles-mêmes des droits ancestraux, et le par. 35(1) constitutionnalise cette notion d'exclusivité.

111 The content of aboriginal title, in fact, lies somewhere in between these positions. Aboriginal title is a right in land and, as such, is more than the right to engage in specific activities which may be themselves aboriginal rights. Rather, it confers the right to use land for a variety of activities, not all of which need be aspects of practices, customs and traditions which are integral to the distinctive cultures of aboriginal societies. Those activities do not constitute the right *per se*; rather, they are parasitic on the underlying title. However, that range of uses is subject to the limitation that they must not be irreconcilable with the nature of the attachment to the land which forms the basis of the particular group's aboriginal title. This inherent limit, to be explained more fully below, flows from the definition of aboriginal title as a *sui generis* interest in

En fait, le contenu du titre aborigène se situe quelque part entre ces deux thèses. Le titre aborigène est un droit foncier et, en tant que tel, il est quelque chose de plus que le droit d'exercer certaines activités précises, qui peuvent elles-mêmes être des droits ancestraux. Il confère plutôt le droit d'utiliser des terres pour y exercer différentes activités qui ne doivent pas nécessairement toutes être des aspects de coutumes, pratiques et traditions faisant partie intégrante des cultures distinctives des sociétés autochtones. Ces activités ne constituent pas le droit en soi; elles sont plutôt des parasites du titre sous-jacent. Toutefois, ces différents usages sont subordonnés à la restriction suivante: ils ne doivent pas être incompatibles avec la nature de l'attachement qu'a le groupe concerné pour le territoire visé et qui constitue le fondement de son

land, and is one way in which aboriginal title is distinct from a fee simple.

(2) Aboriginal Title at Common Law

(a) *General Features*

The starting point of the Canadian jurisprudence on aboriginal title is the Privy Council's decision in *St. Catherine's Milling and Lumber Co. v. The Queen* (1888), 14 A.C. 46, which described aboriginal title as a "personal and usufructuary right" (at p. 54). The subsequent jurisprudence has attempted to grapple with this definition, and has in the process demonstrated that the Privy Council's choice of terminology is not particularly helpful to explain the various dimensions of aboriginal title. What the Privy Council sought to capture is that aboriginal title is a *sui generis* interest in land. Aboriginal title has been described as *sui generis* in order to distinguish it from "normal" proprietary interests, such as fee simple. However, as I will now develop, it is also *sui generis* in the sense that its characteristics cannot be completely explained by reference either to the common law rules of real property or to the rules of property found in aboriginal legal systems. As with other aboriginal rights, it must be understood by reference to both common law and aboriginal perspectives.

The idea that aboriginal title is *sui generis* is the unifying principle underlying the various dimensions of that title. One dimension is its *inalienability*. Lands held pursuant to aboriginal title cannot be transferred, sold or surrendered to anyone other than the Crown and, as a result, is inalienable to third parties. This Court has taken pains to clarify that aboriginal title is only "personal" in this sense, and does not mean that aboriginal title is a non-proprietary interest which amounts to no more than a licence to use and occupy the land and cannot

titre aborigène sur ce territoire. Cette limite intrinsèque, qui sera expliquée plus longuement ci-après, découle du fait que le titre aborigène est défini comme un droit foncier *sui generis*, et elle est un aspect qui différencie le titre aborigène du fief simple.

(2) Le titre aborigène en common law

a) *Caractéristiques générales*

Le point de départ de la jurisprudence canadienne sur le titre aborigène est la décision du Conseil privé dans l'affaire *St. Catherine's Milling and Lumber Co. c. The Queen* (1888), 14 A.C. 46, dans laquelle le titre aborigène a été décrit comme étant un [TRADUCTION] «droit personnel, de la nature d'un usufruit» (à la p. 54). Par la suite, les tribunaux ont tenté de s'accommoder de cette définition, mais il ressort de leurs décisions que les termes choisis par le Conseil privé ne sont pas particulièrement utiles pour expliquer les différentes dimensions du titre aborigène. Le Conseil privé a cherché à rendre l'idée que le titre aborigène est un intérêt foncier *sui generis*. On a qualifié le titre aborigène de droit *sui generis* afin de le différencier des intérêts de propriété «ordinaires» comme le fief simple. Toutefois, comme je vais maintenant l'explicitier, on le qualifie également de droit *sui generis*, dans la mesure où il est impossible d'expliquer entièrement ses caractéristiques en fonction soit des règles du droit des biens en common law soit des règles relatives à la propriété prévues par les régimes juridiques autochtones. Tout comme d'autres droits ancestraux, le titre aborigène doit être défini en tenant compte à la fois de la common law et du point de vue des autochtones.

L'idée que le titre aborigène a un caractère *sui generis* est le principe unificateur qui sous-tend les différentes dimensions de ce titre. L'une de ces dimensions est l'*inaliénabilité* du titre aborigène. Les terres détenues en vertu d'un titre aborigène ne peuvent être transférées, vendues ou cédées à personne d'autre que la Couronne, et elles sont par conséquent inaliénables. Notre Cour s'est efforcée de préciser que c'est uniquement dans ce sens que le titre aborigène est un droit «personnel», et que cela ne veut pas dire qu'il ne s'agit pas d'un intérêt

112

113

compete on an equal footing with other proprietary interests: see *Canadian Pacific Ltd. v. Paul*, [1988] 2 S.C.R. 654, at p. 677.

de propriété, qui ne représente rien de plus qu'une autorisation d'utiliser et d'occuper les terres visées et qui ne peut pas concurrencer sur un pied d'égalité d'autres droits de propriété: *Canadien Pacifique Ltée c. Paul*, [1988] 2 R.C.S. 654, à la p. 677.

114 Another dimension of aboriginal title is its source. It had originally been thought that the source of aboriginal title in Canada was the *Royal Proclamation, 1763*: see *St. Catherine's Milling*. However, it is now clear that although aboriginal title was recognized by the *Proclamation*, it arises from the prior occupation of Canada by aboriginal peoples. That prior occupation, however, is relevant in two different ways, both of which illustrate the *sui generis* nature of aboriginal title. The first is the physical fact of occupation, which derives from the common law principle that occupation is proof of possession in law: see Kent McNeil, *Common Law Aboriginal Title* (1989), at p. 7. Thus, in *Guerin*, *supra*, Dickson J. described aboriginal title, at p. 376, as a "legal right derived from the Indians' historic occupation and possession of their tribal lands". What makes aboriginal title *sui generis* is that it arises from possession before the assertion of British sovereignty, whereas normal estates, like fee simple, arise afterward: see Kent McNeil, "The Meaning of Aboriginal Title", in Michael Asch, ed., *Aboriginal and Treaty Rights in Canada* (1997), 135, at p. 144. This idea has been further developed in *Roberts v. Canada*, [1989] 1 S.C.R. 322, where this Court unanimously held at p. 340 that "aboriginal title pre-dated colonization by the British and survived British claims of sovereignty" (also see *Guerin*, at p. 378). What this suggests is a second source for aboriginal title — the relationship between common law and pre-existing systems of aboriginal law.

Une autre dimension du titre aborigène est son origine. On a d'abord cru que la source du titre aborigène au Canada était la *Proclamation royale de 1763*: voir *St. Catherine's Milling*. Cependant, il ne fait maintenant aucun doute que, même si le titre aborigène a été reconnu par la *Proclamation*, il découle de l'occupation antérieure du Canada par les peuples autochtones. Toutefois, cette occupation antérieure est pertinente à deux points de vue, qui illustrent tous deux le caractère *sui generis* du titre aborigène. Il y a d'abord le fait physique de l'occupation, qui découle du principe de common law selon lequel l'occupation prouve la possession en droit: voir Kent McNeil, *Common Law Aboriginal Title* (1989), à la p. 7. Ainsi, dans *Guerin*, précité, le juge Dickson a qualifié le titre aborigène, à la p. 376, de «droit, en *common law*, découlant de l'occupation et de la possession historiques par les Indiens de leurs terres tribales». Le titre aborigène a un caractère *sui generis* parce qu'il découle d'une possession antérieure à l'affirmation de la souveraineté britannique, tandis que les domaines ordinaires, comme le fief simple, ont pris naissance par la suite: voir Kent McNeil, «The Meaning of Aboriginal Title», dans Michael Asch, dir., *Aboriginal and Treaty Rights in Canada* (1997), 135, à la p. 144. Cette idée a été précisée dans *Roberts c. Canada*, [1989] 1 R.C.S. 322, où notre Cour a unanimement statué, à la p. 340, que le «titre aborigène existait avant la colonisation par les Britanniques et a continué d'exister après les revendications de souveraineté britanniques» (voir aussi *Guerin* à la p. 378). Ces affirmations indiquent que le titre aborigène a une autre origine — soit le rapport entre la common law et les régimes juridiques autochtones préexistants.

115 A further dimension of aboriginal title is the fact that it is held communally. Aboriginal title cannot be held by individual aboriginal persons; it is a collective right to land held by all members of an aboriginal nation. Decisions with respect to that

Une dimension supplémentaire du titre aborigène est le fait qu'il est détenu collectivement. Le titre aborigène ne peut pas être détenu par un autochtone en particulier; il est un droit foncier collectif, détenu par tous les membres d'une nation

land are also made by that community. This is another feature of aboriginal title which is *sui generis* and distinguishes it from normal property interests.

(b) *The Content of Aboriginal Title*

Although cases involving aboriginal title have come before this Court and Privy Council before, there has never been a definitive statement from either court on the content of aboriginal title. In *St. Catherine's Milling*, the Privy Council, as I have mentioned, described the aboriginal title as a "personal and usufructuary right", but declined to explain what that meant because it was not "necessary to express any opinion upon the point" (at p. 55). Similarly, in *Calder, Guerin, and Paul*, the issues were the extinguishment of, the fiduciary duty arising from the surrender of, and statutory easements over land held pursuant to, aboriginal title, respectively; the content of title was not at issue and was not directly addressed.

Although the courts have been less than forthcoming, I have arrived at the conclusion that the content of aboriginal title can be summarized by two propositions: first, that aboriginal title encompasses the right to exclusive use and occupation of the land held pursuant to that title for a variety of purposes, which need not be aspects of those aboriginal practices, customs and traditions which are integral to distinctive aboriginal cultures; and second, that those protected uses must not be irreconcilable with the nature of the group's attachment to that land. For the sake of clarity, I will discuss each of these propositions separately.

Aboriginal title encompasses the right to use the land held pursuant to that title for a variety of purposes, which need not be aspects of those aboriginal practices, cultures and traditions

autochtone. Les décisions relatives aux terres visées sont également prises par cette collectivité. Il s'agit d'une autre caractéristique *sui generis* du titre aborigène, qui le différencie des intérêts de propriété ordinaires.

b) *Le contenu du titre aborigène*

Bien que notre Cour et le Conseil privé aient été saisis par le passé d'affaires relatives au titre aborigène, ni l'un ni l'autre ne se sont jamais prononcés d'une manière définitive sur le contenu du titre aborigène. Comme je l'ai indiqué, le Conseil privé, dans *St. Catherine's Milling*, a qualifié le titre aborigène de [TRADUCTION] «droit personnel, de la nature d'un usufruit», mais il a refusé d'expliquer ce que cela voulait dire, parce qu'il n'était pas «nécessaire d'exprimer une opinion sur ce point» (à la p. 55). De même, dans les arrêts *Calder, Guerin* et *Paul*, les questions litigieuses étaient respectivement l'extinction du titre aborigène, l'obligation de fiduciaire découlant de la cession de terres détenues en vertu d'un titre aborigène et les servitudes d'origine législative sur des terres ainsi détenues; le contenu du titre n'était pas en cause et n'a pas été abordé directement.

Même si les tribunaux n'ont pas été très explicites, je suis arrivé à la conclusion que le contenu du titre aborigène peut être résumé au moyen de deux énoncés: premièrement, le titre aborigène comprend le droit d'utiliser et d'occuper de façon exclusive les terres détenues en vertu de ce titre pour diverses fins qui ne doivent pas nécessairement être des aspects de coutumes, pratiques et traditions autochtones faisant partie intégrante d'une culture autochtone distinctive; deuxièmement, ces utilisations protégées ne doivent pas être incompatibles avec la nature de l'attachement qu'a le groupe concerné pour ces terres. Pour plus de clarté, je vais examiner chacun de ces énoncés séparément.

Le titre aborigène comprend le droit d'utiliser le territoire détenu en vertu de ce titre pour diverses fins qui ne doivent pas nécessairement être des aspects de coutumes, pratiques et traditions

116

117

which are integral to distinctive aboriginal cultures

autochtones faisant partie intégrante d'une culture autochtone distinctive

118 The respondents argue that aboriginal title merely encompasses the right to engage in activities which are aspects of aboriginal practices, customs and traditions which are integral to distinctive aboriginal cultures of the aboriginal group claiming the right and, at most, adds the notion of exclusivity; i.e., the exclusive right to use the land for those purposes. However, the uses to which lands held pursuant to aboriginal title can be put are not restricted in this way. This conclusion emerges from three sources: (i) the Canadian jurisprudence on aboriginal title, (ii) the relationship between reserve lands and lands held pursuant to aboriginal title, and (iii) the *Indian Oil and Gas Act*, R.S.C., 1985, c. I-7. As well, although this is not legally determinative, it is supported by the critical literature. In particular, I have profited greatly from Professor McNeil's article, "The Meaning of Aboriginal Title", *supra*.

(i) Canadian Jurisprudence on Aboriginal Title

119 Despite the fact that the jurisprudence on aboriginal title is somewhat underdeveloped, it is clear that the uses to which lands held pursuant to aboriginal title can be put is not restricted to the practices, customs and traditions of aboriginal peoples integral to distinctive aboriginal cultures. In *Guerin*, for example, Dickson J. described aboriginal title as an "interest in land" which encompassed "a legal right to occupy and possess certain lands" (at p. 382). The "right to occupy and possess" is framed in broad terms and, significantly, is not qualified by reference to traditional and customary uses of those lands. Any doubt that the right to occupancy and possession encompasses a broad variety of uses of land was put to rest in *Paul*, where the Court went even further and stated that aboriginal title was "more than the right to enjoyment and occupancy" (at p. 678). Once again, there is no reference to aboriginal practices, customs and traditions as a qualifier on that right. Moreover, I take the reference to "more" as

Les intimés soutiennent que le titre aborigène comprend simplement le droit d'exercer des activités qui sont des aspects de coutumes, pratiques et traditions autochtones faisant partie intégrante de la culture distinctive du groupe autochtone qui revendique le droit, et que, tout au plus, le titre ajoute l'idée d'exclusivité, c'est-à-dire le droit exclusif d'utiliser à ces fins les terres visées. Cependant, les utilisations qui peuvent être faites des terres détenues en vertu d'un titre aborigène ne sont pas limitées de la sorte. Cette conclusion découle de trois sources: (i) la jurisprudence canadienne sur le titre aborigène; (ii) le rapport entre les terres de réserve et les terres détenues en vertu d'un titre aborigène; (iii) la *Loi sur le pétrole et le gaz des terres indiennes*, L.R.C. (1985), ch. I-7. En outre, même si ce fait n'est pas déterminant sur le plan juridique, cette conclusion est étayée par littérature doctrinale. En particulier, l'article du professeur McNeil intitulé «The Meaning of Aboriginal Title», *op. cit.*, m'a été très utile.

(i) La jurisprudence canadienne sur le titre aborigène

En dépit du fait que la jurisprudence sur le titre aborigène est en quelque sorte en cours d'élaboration, il est clair que les utilisations qui peuvent être faites des terres détenues en vertu d'un titre aborigène ne se limitent pas aux coutumes, pratiques et traditions d'un peuple autochtone et qui font partie intégrante de sa culture distinctive. Dans l'arrêt *Guerin*, précité, par exemple, le juge Dickson a qualifié le titre aborigène de «droit [. . .] sur [d]es terres» comprenant «le droit, en *common law*, d'occuper et de posséder certaines terres» (à la p. 382). Le «droit [. . .] d'occuper et de posséder» est exprimé en termes généraux et, fait important, n'est pas assorti d'une réserve le limitant aux utilisations traditionnelles et habituelles faites de ces terres. Tous les doutes qui pouvaient exister relativement à la question de savoir si le droit d'occuper et d'utiliser des terres vise un large éventail d'utilisations ont été dissipés dans l'arrêt *Paul*, précité, où notre Cour est allée encore plus loin et a déclaré que le titre aborigène était «quelque chose de plus

emphasis of the broad notion of use and possession.

(ii) Reserve Land

Another source of support for the conclusion that the uses to which lands held under aboriginal title can be put are not restricted to those grounded in practices, customs and traditions integral to distinctive aboriginal cultures can be found in *Guerin*, where Dickson J. stated at p. 379 that the same legal principles governed the aboriginal interest in reserve lands and lands held pursuant to aboriginal title:

It does not matter, in my opinion, that the present case is concerned with the interest of an Indian Band in a reserve rather than with unrecognized aboriginal title in traditional tribal lands. The Indian interest in the land is the same in both cases. . . . [Emphasis added.]

The nature of the Indian interest in reserve land is very broad, and can be found in s. 18 of the *Indian Act*, which I reproduce in full:

18. (1) Subject to this Act, reserves are held by Her Majesty for the use and benefit of the respective bands for which they were set apart, and subject to this Act and to the terms of any treaty or surrender, the Governor in Council may determine whether any purpose for which lands in a reserve are used or are to be used is for the use and benefit of the band.

(2) The Minister may authorize the use of lands in a reserve for the purpose of Indian schools, the administration of Indian affairs, Indian burial grounds, Indian health projects or, with the consent of the council of the band, for any other purpose for the general welfare of the band, and may take any lands in a reserve required for those purposes, but where an individual Indian, immediately prior to the taking, was entitled to the possession of those lands, compensation for that use shall be paid to the Indian, in such amount as may be agreed

qu'un droit de jouissance et d'occupation» (à la p. 678). Une fois de plus, il n'est fait aucune mention de coutumes, pratiques et traditions autochtones en tant que limites à ce droit. De plus, je considère que l'emploi de l'expression «quelque chose de plus» fait ressortir le caractère général de la notion d'utilisation et de possession.

(ii) Les terres des réserves

L'arrêt *Guerin* est une autre source étayant la conclusion que les utilisations qui peuvent être faites des terres détenues en vertu d'un titre aborigène ne se limitent pas à celles fondées sur des coutumes, pratiques et traditions faisant partie intégrante de cultures distinctives autochtones. Dans cet arrêt, le juge Dickson a déclaré, à la p. 379, que les droits des autochtones sur les terres des réserves et leurs droits sur les terres détenues en vertu d'un titre aborigène sont régis par les mêmes principes juridiques:

À mon avis, il est sans importance que la présente espèce concerne le droit d'une bande indienne sur une réserve plutôt qu'un titre aborigène non reconnu sur des terres tribales traditionnelles. Le droit des Indiens sur les terres est le même dans les deux cas . . . [Je souligne.]

La nature du droit des Indiens sur les terres des réserves est très générale, et elle peut être dégagée de l'art. 18 de la *Loi sur les Indiens*, que je reproduis au complet:

18. (1) Sous réserve des autres dispositions de la présente loi, Sa Majesté détient des réserves à l'usage et au profit des bandes respectives pour lesquelles elles furent mises de côté; sous réserve des autres dispositions de la présente loi et des stipulations de tout traité ou cession, le gouverneur en conseil peut décider si tout objet, pour lequel des terres dans une réserve sont ou doivent être utilisées, se trouve à l'usage et au profit de la bande.

(2) Le ministre peut autoriser l'utilisation de terres dans une réserve aux fins des écoles indiennes, de l'administration d'affaires indiennes, de cimetières indiens, de projets relatifs à la santé des Indiens, ou, avec le consentement du conseil de la bande, pour tout autre objet concernant le bien-être général de la bande, et il peut prendre toutes terres dans une réserve, nécessaires à ces fins, mais lorsque, immédiatement avant cette prise, un Indien particulier avait droit à la possession de ces terres, il doit être versé à cet Indien, pour un semblable

120

121

between the Indian and the Minister, or, failing agreement, as may be determined in such manner as the Minister may direct. [Emphasis added.]

The principal provision is s. 18(1), which states that reserve lands are held “for the use and benefit” of the bands which occupy them; those uses and benefits, on the face of the *Indian Act*, do not appear to be restricted to practices, customs and traditions integral to distinctive aboriginal cultures. The breadth of those uses is reinforced by s. 18(2), which states that reserve lands may be used “for any other purpose for the general welfare of the band”. The general welfare of the band has not been defined in terms of aboriginal practices, customs and traditions, nor in terms of those activities which have their origin pre-contact; it is a concept, by definition, which incorporates a reference to the present-day needs of aboriginal communities. On the basis of *Guerin*, lands held pursuant to aboriginal title, like reserve lands, are also capable of being used for a broad variety of purposes.

(iii) *Indian Oil and Gas Act*

122

The third source for the proposition that the content of aboriginal title is not restricted to practices, customs and traditions which are integral to distinctive aboriginal cultures is the *Indian Oil and Gas Act*. The overall purpose of the statute is to provide for the exploration of oil and gas on reserve lands through their surrender to the Crown. The statute presumes that the aboriginal interest in reserve land includes mineral rights, a point which this Court unanimously accepted with respect to the *Indian Act* in *Blueberry River Indian Band v. Canada (Department of Indian Affairs and Northern Development)*, [1995] 4 S.C.R. 344. On the basis of *Guerin*, aboriginal title also encompass mineral rights, and lands held pursuant to aboriginal title should be capable of exploitation in the same way, which is certainly not a traditional use

usage, une indemnité d’un montant dont peuvent convenir l’Indien et le ministre, ou, à défaut d’accord, qui peut être fixé de la manière que détermine ce dernier. [Je souligne.]

La disposition principale est le par. 18(1), qui indique que les terres des réserves sont détenues «à l’usage et au profit» des bandes qui les occupent; à la lecture de la *Loi sur les Indiens*, il ne semble pas que les utilisations et les avantages se limitent aux coutumes, pratiques et traditions faisant partie intégrante des cultures autochtones distinctives. Cette pluralité d’utilisations est renforcée par le par. 18(2), qui prévoit que les terres des réserves peuvent être utilisées «pour tout autre objet concernant le bien-être général de la bande». Le bien-être général de la bande n’a pas été défini en fonction des coutumes, pratiques et traditions autochtones, ni en fonction des activités dont l’origine remonte avant le contact avec les Européens; il s’agit d’un concept qui, par définition, fait référence aux besoins actuels des collectivités autochtones. Sur le fondement de l’arrêt *Guerin*, les terres détenues en vertu d’un titre aborigène, tout comme les terres des réserves, peuvent servir à un grand nombre d’utilisations.

(iii) *La Loi sur le pétrole et le gaz des terres indiennes*

La troisième source sur laquelle s’appuie l’énoncé que le contenu du titre aborigène ne se limite pas aux coutumes, pratiques et traditions faisant partie intégrante des cultures autochtones distinctives est la *Loi sur le pétrole et le gaz des terres indiennes*. L’objet général de cette loi est de permettre l’exploitation pétrolière et gazière sur les terres des réserves par la cession de ces terres à la Couronne. Cette loi présume que le droit des autochtones sur les terres des réserves comprend les droits miniers, point que notre Cour a accepté à l’unanimité relativement à la *Loi sur les Indiens*, dans l’arrêt *Bande indienne de la rivière Blueberry c. Canada (Ministère des Affaires indiennes et du Nord canadien)*, [1995] 4 R.C.S. 344. Sur le fondement de l’arrêt *Guerin*, le titre aborigène comprend également les droits miniers, et les terres détenues en vertu d’un titre aborigène devraient pouvoir être exploitées de la même façon, ce qui n’est certaine-

for those lands. This conclusion is reinforced by s. 6(2) of the Act, which provides:

6. . . .

(2) Nothing in this Act shall be deemed to abrogate the rights of Indian people or preclude them from negotiating for oil and gas benefits in those areas in which land claims have not been settled.

The areas referred to in s. 6(2), at the very least, must encompass lands held pursuant to aboriginal title, since those lands by definition have not been surrendered under land claims agreements. The presumption underlying s. 6(2) is that aboriginal title permits the development of oil and gas reserves.

Although this is not determinative, the conclusion that the content of aboriginal title is not restricted to those uses with their origins in the practices, customs and traditions integral to distinctive aboriginal societies has wide support in the critical literature: Jocelyn Gagne, “The Content of Aboriginal Title at Common Law: A Look at the Nishga Claim” (1982-83), 47 *Sask. L. Rev.* 309 at pp. 336-37; Kent McNeil, *Common Law Aboriginal Title*, *supra*, at p. 242; Kent McNeil, “The Meaning of Aboriginal Title”, *supra*, at pp. 143-150; William Pentney, “The Rights of the Aboriginal Peoples of Canada in the *Constitution Act*, 1982 Part II — Section 35: The Substantive Guarantee” (1988), 22 *U.B.C. L. Rev.* 207, at p. 221; *Report of the Royal Commission on Aboriginal Peoples*, vol. 2 (*Restructuring the Relationship*), at p. 561; Brian Slattery, “The Constitutional Guarantee of Aboriginal and Treaty Rights” (1982-83), 8 *Queen’s L.J.* 232, at pp. 268-9; Brian Slattery, *Ancestral Lands, Alien Laws: Judicial Perspectives on Aboriginal Title* (1983), at p. 34; Brian Slattery, “Understanding Aboriginal Rights”, 66 *Can. Bar Rev.* 727, at pp. 746-48.

In conclusion, the content of aboriginal title is not restricted to those uses which are elements of a practice, custom or tradition integral to the distinc-

ment pas une utilisation traditionnelle de ces terres. Cette conclusion est étayée par le par. 6(2) de la Loi, qui dispose:

6. . . .

(2) La présente loi n’a pas pour effet d’abroger les droits du peuple indien ou de l’empêcher de négocier l’obtention d’avantages pour le pétrole et le gaz dans les régions où les revendications de terres n’ont pas été réglées.

Les régions visées au par. 6(2) doivent à tout le moins comprendre les terres détenues en vertu d’un titre aborigène, étant donné que, par définition, ces terres n’ont pas été cédées dans le cadre d’accords sur des revendications territoriales. La présomption qui sous-tend le par. 6(2) est que le titre aborigène permet l’exploitation de réserves pétrolières et gazières.

Même si ce fait n’est pas déterminant, la conclusion que le contenu du titre aborigène ne se limite pas aux utilisations dont les origines remontent aux coutumes, pratiques et traditions faisant partie intégrante de sociétés autochtones distinctives jouit d’un vaste appui dans la doctrine: Jocelyn Gagne, «The Content of Aboriginal Title at Common Law: A Look at the Nishga Claim» (1982-83), 47 *Sask. L. Rev.* 309, aux pp. 336 et 337; Kent McNeil, *Common Law Aboriginal Title*, *op. cit.*, à la p. 242; Kent McNeil, «The Meaning of Aboriginal Title», *op. cit.*, aux pp. 143 à 150; William Pentney, «The Rights of the Aboriginal Peoples of Canada in the *Constitution Act*, 1982 Part II — Section 35: The Substantive Guarantee» (1988), 22 *U.B.C. L. Rev.* 207, à la p. 221; *Rapport de la Commission royale sur les peuples autochtones*, vol. 2 (*Une relation à redéfinir*), à la p. 624; Brian Slattery, «The Constitutional Guarantee of Aboriginal and Treaty Rights» (1982-83), 8 *Queen’s L.J.* 232, aux pp. 268 et 269; Brian Slattery, *Ancestral Lands, Alien Laws: Judicial Perspectives on Aboriginal Title* (1983), à la p. 34; Brian Slattery, «Understanding Aboriginal Rights» (1987), 66 *R. du B. can.* 727, aux pp. 746 à 748.

En conclusion, le contenu du titre aborigène ne se limite pas aux utilisations qui sont des éléments d’une coutume, pratique ou tradition faisant partie

123

124

tive culture of the aboriginal group claiming the right. However, nor does aboriginal title amount to a form of inalienable fee simple, as I will now explain.

- (c) *Inherent Limit: Lands Held Pursuant to Aboriginal Title Cannot Be Used in a Manner that Is Irreconcilable with the Nature of the Attachment to the Land Which Forms the Basis of the Group's Claim to Aboriginal Title*

125 The content of aboriginal title contains an inherent limit that lands held pursuant to title cannot be used in a manner that is irreconcilable with the nature of the claimants' attachment to those lands. This limit on the content of aboriginal title is a manifestation of the principle that underlies the various dimensions of that special interest in land — it is a *sui generis* interest that is distinct from “normal” proprietary interests, most notably fee simple.

126 I arrive at this conclusion by reference to the other dimensions of aboriginal title which are *sui generis* as well. I first consider the source of aboriginal title. As I discussed earlier, aboriginal title arises from the prior occupation of Canada by aboriginal peoples. That prior occupation is relevant in two different ways: first, because of the physical fact of occupation, and second, because aboriginal title originates in part from pre-existing systems of aboriginal law. However, the law of aboriginal title does not only seek to determine the historic rights of aboriginal peoples to land; it also seeks to afford legal protection to prior occupation in the present-day. Implicit in the protection of historic patterns of occupation is a recognition of the importance of the continuity of the relationship of an aboriginal community to its land over time.

intégrante de la culture distinctive du groupe autochtone qui revendique le droit en question. Toutefois, comme je vais maintenant l'expliquer, le titre aborigène n'équivaut pas non plus à une forme de fief simple inaliénable.

- c) *Limite intrinsèque: les terres détenues en vertu d'un titre aborigène ne peuvent pas être utilisées d'une manière incompatible avec la nature de l'attachement qu'a le groupe autochtone concerné pour le territoire et qui est à la base de sa revendication du titre aborigène*

Le contenu du titre aborigène comporte une limite intrinsèque, savoir que les terres détenues en vertu d'un titre aborigène ne peuvent pas être utilisées d'une manière incompatible avec la nature de l'attachement qu'ont les revendicateurs pour ces terres. Cette limite au contenu du titre aborigène est une manifestation du principe qui sous-tend les différentes dimensions de ce droit foncier spécial, il s'agit d'un droit *sui generis* qui est différent des intérêts de propriété «ordinaires», en particulier le fief simple.

J'arrive à cette conclusion en me référant aux autres dimensions du titre aborigène qui ont également un caractère *sui generis*. Je vais examiner d'abord l'origine du titre aborigène. Comme je l'ai indiqué plus haut, le titre aborigène découle du fait que le Canada a d'abord été occupé par les peuples autochtones. Cette occupation antérieure est pertinente à deux égards: premièrement en raison du fait physique de l'occupation, et deuxièmement pour le motif que le titre aborigène tire en partie son origine des régimes juridiques autochtones préexistants. Toutefois, le droit relatif au titre aborigène ne cherche pas seulement à définir les droits historiques des peuples autochtones sur le territoire; il vise aussi à accorder, de nos jours, une protection juridique à cette occupation antérieure. La reconnaissance de l'importance de la continuité du rapport qu'une collectivité autochtone entretient avec ses terres au fil des ans ressort implicitement de la protection des modalités historiques de l'occupation.

I develop this point below with respect to the test for aboriginal title. The relevance of the continuity of the relationship of an aboriginal community with its land here is that it applies not only to the past, but to the future as well. That relationship should not be prevented from continuing into the future. As a result, uses of the lands that would threaten that future relationship are, by their very nature, excluded from the content of aboriginal title.

Accordingly, in my view, lands subject to aboriginal title cannot be put to such uses as may be irreconcilable with the nature of the occupation of that land and the relationship that the particular group has had with the land which together have given rise to aboriginal title in the first place. As discussed below, one of the critical elements in the determination of whether a particular aboriginal group has aboriginal title to certain lands is the matter of the occupancy of those lands. Occupancy is determined by reference to the activities that have taken place on the land and the uses to which the land has been put by the particular group. If lands are so occupied, there will exist a special bond between the group and the land in question such that the land will be part of the definition of the group's distinctive culture. It seems to me that these elements of aboriginal title create an inherent limitation on the uses to which the land, over which such title exists, may be put. For example, if occupation is established with reference to the use of the land as a hunting ground, then the group that successfully claims aboriginal title to that land may not use it in such a fashion as to destroy its value for such a use (e.g., by strip mining it). Similarly, if a group claims a special bond with the land because of its ceremonial or cultural significance, it may not use the land in such a way as to destroy that relationship (e.g., by developing it in such a way that the bond is destroyed, perhaps by turning it into a parking lot).

Je vais expliciter ce point plus loin, dans l'examen du critère applicable pour faire la preuve du titre aborigène. En l'espèce, la pertinence de la continuité du rapport qu'entretient une collectivité autochtone avec ses terres réside dans le fait que ce rapport s'applique non seulement au passé mais aussi à l'avenir. Rien ne devrait empêcher ce rapport de continuer dans le futur. Il s'ensuit que les utilisations des terres qui menaceraient ce rapport futur sont, de par leur nature même, exclues du contenu du titre aborigène.

Par conséquent, les terres visées par un titre aborigène ne peuvent pas, selon moi, être utilisées à des fins incompatibles avec la nature de l'occupation de ces terres et avec le rapport que le groupe concerné entretient avec celles-ci, facteurs qui, ensemble, ont donné naissance au titre aborigène en premier lieu. Comme nous le verrons plus loin, l'un des éléments fondamentaux qui permettent de déterminer si un groupe autochtone donné possède un titre aborigène sur certaines terres est la question de l'occupation de celles-ci. L'occupation est définie en fonction des activités qui ont été exercées sur les terres et des utilisations qui ont été faites de celles-ci par le groupe en question. Si des terres font l'objet d'une telle occupation, il existera entre ce groupe et les terres visées un lien spécial tel que les terres feront partie intégrante de la définition de la culture distinctive du groupe. Il me semble que ces éléments du titre aborigène créent une limite intrinsèque aux utilisations qui peuvent être faites des terres visées par un tel titre. Par exemple, si on fait la preuve de l'occupation par référence à l'utilisation des terres comme territoire de chasse, alors le groupe qui a revendiqué avec succès le titre aborigène sur ces terres ne peut pas les utiliser d'une manière qui anéantisse leur valeur pour cette utilisation (p. ex. en les exploitant en tant que mine à ciel ouvert). De même, si un groupe affirme l'existence d'un lien spécial avec les terres visées en raison de leur importance culturelle ou rituelle, il ne peut pas les utiliser d'une manière qui anéantisse ce rapport (p. ex. en les exploitant d'une façon qui entraîne la destruction du lien, peut-être en les transformant en terrain de stationnement).

127

128

129

It is for this reason also that lands held by virtue of aboriginal title may not be alienated. Alienation would bring to an end the entitlement of the aboriginal people to occupy the land and would terminate their relationship with it. I have suggested above that the inalienability of aboriginal lands is, at least in part, a function of the common law principle that settlers in colonies must derive their title from Crown grant and, therefore, cannot acquire title through purchase from aboriginal inhabitants. It is also, again only in part, a function of a general policy “to ensure that Indians are not dispossessed of their entitlements”: see *Mitchell v. Peguis Indian Band*, [1990] 2 S.C.R. 85, at p. 133. What the inalienability of lands held pursuant to aboriginal title suggests is that those lands are more than just a fungible commodity. The relationship between an aboriginal community and the lands over which it has aboriginal title has an important non-economic component. The land has an inherent and unique value in itself, which is enjoyed by the community with aboriginal title to it. The community cannot put the land to uses which would destroy that value.

C’est également pour cette raison que les terres détenues en vertu d’un titre aborigène sont inaliénables. L’aliénation des terres en question éteindrait le droit des autochtones de les occuper et mettrait fin au rapport qu’ils entretiennent avec celles-ci. J’ai indiqué précédemment que l’inaliénabilité des terres indiennes découle, du moins en partie, du principe de common law selon lequel les personnes qui s’établissent dans une colonie doivent obtenir leur titre par voie de concession de la Couronne et que, par conséquent, elles ne peuvent pas l’acquérir en l’achetant à des autochtones. L’inaliénabilité découle également, une fois de plus en partie seulement, de la politique générale qui consiste à «veiller à ce que ceux-ci [les Indiens] ne soient pas dépouillés de leurs droits»: voir *Mitchell c. Bande indienne Peguis*, [1990] 2 R.C.S. 85, à la p. 133. L’inaliénabilité des terres détenues en vertu d’un titre aborigène indique que ces terres sont quelque chose de plus qu’un simple bien fungible. Le rapport qu’entretient une collectivité autochtone avec les terres sur lesquelles elle possède un titre aborigène comporte un aspect important de nature non économique. Les terres en elles-mêmes ont une valeur intrinsèque et unique dont jouit la collectivité qui possède le titre aborigène sur celles-ci. La collectivité ne peut pas faire de ces terres des utilisations qui détruiraient cette valeur.

130

I am cognizant that the *sui generis* nature of aboriginal title precludes the application of “traditional real property rules” to elucidate the content of that title (*St. Mary’s Indian Band v. Cranbrook (City)*, [1997] 2 S.C.R. 657, at para. 14). Nevertheless, a useful analogy can be drawn between the limit on aboriginal title and the concept of equitable waste at common law. Under that doctrine, persons who hold a life estate in real property cannot commit “wanton or extravagant acts of destruction” (E. H. Burn, *Cheshire and Burn’s Modern Law of Real Property* (14th ed. 1988), at p. 264) or “ruin the property” (Robert E. Megarry and H. W. R. Wade, *The Law of Real Property* (4th ed. 1975), at p. 105). This description of the limits

Je suis conscient du fait que le caractère *sui generis* du titre aborigène ne permet pas d’appliquer les «règles traditionnelles du droit des biens» pour expliquer le contenu de ce titre (*Bande indienne de St. Mary’s c. Cranbrook (Ville)*, [1997] 2 R.C.S. 657, au par. 14). Malgré tout, il est possible de faire une analogie utile entre la limite applicable au titre aborigène et le concept de dégradation en *equity* que l’on retrouve en common law. Selon ce concept, les personnes qui sont titulaires d’un domaine viager ne peuvent pas y commettre d’[TRADUCTION] «actes de destruction injustifiés ou excessifs» (E. H. Burn, *Cheshire and Burn’s Modern Law of Real Property* (14^e éd. 1988), à la p. 264), ni [TRADUCTION] «ruiner le bien-fonds» (Robert E. Megarry et H. W. R. Wade, *The Law of Real Property* (4^e éd. 1975), à la p. 105). Cette description des limites imposées par le concept de

imposed by the doctrine of equitable waste capture the kind of limit I have in mind here.

Finally, what I have just said regarding the importance of the continuity of the relationship between an aboriginal community and its land, and the non-economic or inherent value of that land, should not be taken to detract from the possibility of surrender to the Crown in exchange for valuable consideration. On the contrary, the idea of surrender reinforces the conclusion that aboriginal title is limited in the way I have described. If aboriginal peoples wish to use their lands in a way that aboriginal title does not permit, then they must surrender those lands and convert them into non-title lands to do so.

The foregoing amounts to a general limitation on the use of lands held by virtue of aboriginal title. It arises from the particular physical and cultural relationship that a group may have with the land and is defined by the source of aboriginal title over it. This is not, I must emphasize, a limitation that restricts the use of the land to those activities that have traditionally been carried out on it. That would amount to a legal straitjacket on aboriginal peoples who have a legitimate legal claim to the land. The approach I have outlined above allows for a full range of uses of the land, subject only to an overarching limit, defined by the special nature of the aboriginal title in that land.

(d) *Aboriginal Title under s. 35(1) of the Constitution Act, 1982*

Aboriginal title at common law is protected in its full form by s. 35(1). This conclusion flows from the express language of s. 35(1) itself, which states in full: “[t]he existing aboriginal and treaty rights of the aboriginal peoples of Canada are hereby recognized and affirmed” (emphasis added). On a plain reading of the provision, s. 35(1) did not create aboriginal rights; rather, it accorded constitutional status to those rights which were “existing” in 1982. The provision, at the very least, constitutionalized those rights which aborigi-

dégradation en *equity* illustre bien le genre de limites auxquelles je pense en l’espèce.

Enfin, les remarques que je viens de faire au sujet de l’importance de la continuité du rapport qu’entretient une collectivité autochtone avec ses terres, et la valeur non économique ou intrinsèque de celles-ci ne devraient pas être considérées comme faisant obstacle à la possibilité d’une cession à la Couronne moyennant contrepartie de valeur. Au contraire, l’idée de cession renforce la conclusion que le titre aborigène est limité de la manière que j’ai décrite. Si les autochtones désirent utiliser leurs terres d’une manière que ne permet pas le titre aborigène, ils doivent alors les céder et les convertir en terres non visées par un titre aborigène.

Ce qui précède équivaut à une limitation générale de l’utilisation des terres détenues en vertu d’un titre aborigène. Cette limite découle du rapport physique et culturel particulier qu’un groupe peut entretenir avec les terres, et elle est définie par la source du titre aborigène sur ces terres. Il ne s’agit pas, je dois le souligner, d’une limite qui restreint l’utilisation des terres aux activités qui y ont traditionnellement été exercées. Cela reviendrait, sur le plan juridique, à placer dans un carcan juridique les autochtones qui ont un droit légitime sur les terres. L’approche que je viens d’exposer permet un éventail complet d’utilisations des terres, sous réserve seulement d’une limite dominante, définie par la nature spéciale du titre aborigène sur les terres en question.

d) *Le titre aborigène visé au par. 35(1) de la Loi constitutionnelle de 1982*

Le titre aborigène en common law est protégé, dans sa forme complète, par le par. 35(1). Cette conclusion découle des termes exprès du par. 35(1) lui-même, dont le texte complet est ainsi rédigé: «[l]es droits existants — ancestraux ou issus de traités — des peuples autochtones du Canada sont reconnus et confirmés» (je souligne). Il ressort de la simple lecture du par. 35(1) que cette disposition n’a pas créé de droits ancestraux, mais qu’elle a plutôt constitutionnalisé ceux qui étaient «existants» en 1982. Cette disposition a, à tout le moins,

131

132

133

nal peoples possessed at common law, since those rights existed at the time s. 35(1) came into force. Since aboriginal title was a common law right whose existence was recognized well before 1982 (e.g., *Calder, supra*), s. 35(1) has constitutionalized it in its full form.

constitutionnalisés les droits que les peuples autochtones possédaient en common law, étant donné que ces droits existaient au moment de l'entrée en vigueur du par. 35(1). Comme le titre aborigène était un droit issu de la common law et dont l'existence a été reconnue bien avant 1982 (p. ex. dans *Calder*, précité), le par. 35(1) l'a constitutionnalisé dans sa forme complète.

134 I expressed this understanding of the relationship between common law aboriginal rights, including aboriginal title, and the aboriginal rights protected by s. 35(1) in *Van der Peet*. While explaining the purposes behind s. 35(1), I stated that "it must be remembered that s. 35(1) did not create the legal doctrine of aboriginal rights; aboriginal rights existed and were recognized under the common law" (at para. 28). Through the enactment of s. 35(1), "a pre-existing legal doctrine was elevated to constitutional status" (at para. 29), or in other words, s. 35(1) had achieved "the constitutionalization of those rights" (at para. 29).

J'ai exprimé cette conception du rapport qui existe entre les droits ancestraux reconnus en common law, y compris le titre aborigène, et les droits ancestraux protégés par le par. 35(1) dans l'arrêt *Van der Peet*. Pour expliquer l'objet du par. 35(1), j'ai dit qu'il ne faut pas oublier que le par. 35(1) n'a pas créé la doctrine juridique des droits ancestraux. En effet, ces droits existaient déjà et ils étaient reconnus en common law» (au par. 28). Par suite de l'édiction du par. 35(1), «une doctrine juridique préexistante s'est vue conférer un statut constitutionnel» (au par. 29); en d'autres termes, le par. 35(1) a réalisé «la constitutionnalisation de [ces droits]» (au par. 29).

135 Finally, this view of the effect of s. 35(1) on common law aboriginal title is supported by numerous commentators: Patrick Macklem, "First Nations Self-Government and the Borders of the Canadian Legal Imagination" (1991), 36 *McGill L.J.* 382, at pp. 447-48; Kent McNeil, "The Constitutional Rights of the Aboriginal Peoples of Canada" (1982), 4 *Sup. Ct. L. Rev.* 255, at pp. 256-57; James O'Reilly, "La Loi constitutionnelle de 1982, droit des autochtones" (1984), 25 *C. de D.* 125, at p. 137; William Pentney, "The Rights of the Aboriginal Peoples of Canada in the *Constitution Act, 1982* Part II — Section 35: The Substantive Guarantee", *supra*, at pp. 220-21; Douglas Sanders, "The Rights of the Aboriginal Peoples of Canada" (1983), 61 *Can. Bar Rev.* 314, at p. 329; Douglas Sanders, "Pre-Existing Rights: The Aboriginal Peoples of Canada", in Gerald-A. Beaudoin and Ed Ratushny, eds., *The Canadian Charter of Rights and Freedoms* (2nd ed. 1989), 707, at pp. 731-32; Brian Slattery, "The Constitutional Guarantee of Aboriginal and Treaty Rights", *supra*, at p. 254; Brian Slattery, *Ancestral Lands*,

En dernier lieu, de nombreux commentateurs souscrivent à cette façon de voir l'effet du par. 35(1) sur le titre aborigène reconnu en common law: Patrick Macklem, «First Nations Self-Government and the Borders of the Canadian Legal Imagination» (1991), 36 *R.D. McGill* 382, aux pp. 447 et 448; Kent McNeil, «The Constitutional Rights of the Aboriginal Peoples of Canada» (1982), 4 *Sup. Ct. L. Rev.* 255, aux pp. 256 et 257; James O'Reilly, «La Loi constitutionnelle de 1982, droit des autochtones» (1984), 25 *C. de D.* 125, à la p. 137; William Pentney, «The Rights of the Aboriginal Peoples of Canada in the *Constitution Act, 1982* Part II — Section 35: The Substantive Guarantee», *loc. cit.*, aux pp. 220 et 221; Douglas Sanders, «The Rights of the Aboriginal Peoples of Canada» (1983), 61 *R. du B. can.* 314, à la p. 329; Douglas Sanders, «Les droits préexistants: les peuples autochtones du Canada», dans Gerald-A. Beaudoin et Ed Ratushny, dir., *Charte canadienne des droits et libertés* (2^e éd. 1989), 779, aux pp. 809 à 811; Brian Slattery, «The Constitutional Guarantee of Aboriginal and Treaty Rights», *loc.*

Alien Laws: Judicial Perspectives on Aboriginal Title, *supra*, at p. 45.

I hasten to add that the constitutionalization of common law aboriginal rights by s. 35(1) does not mean that those rights exhaust the content of s. 35(1). As I said in *Côté*, *supra*, at para. 52:

Section 35(1) would fail to achieve its noble purpose of preserving the integral and defining features of distinctive aboriginal societies if it only protected those defining features which were fortunate enough to have received the legal recognition and approval of European colonizers.

I relied on this proposition in *Côté* to defeat the argument that the possible absence of aboriginal rights under French colonial law was a bar to the existence of aboriginal rights under s. 35(1) within the historic boundaries of New France. But it also follows that the existence of a particular aboriginal right at common law is not a *sine qua non* for the proof of an aboriginal right that is recognized and affirmed by s. 35(1). Indeed, none of the decisions of this Court handed down under s. 35(1) in which the existence of an aboriginal right has been demonstrated has relied on the existence of that right at common law. The existence of an aboriginal right at common law is therefore sufficient, but not necessary, for the recognition and affirmation of that right by s. 35(1).

The acknowledgement that s. 35(1) has accorded constitutional status to common law aboriginal title raises a further question — the relationship of aboriginal title to the “aboriginal rights” protected by s. 35(1). I addressed that question in *Adams*, *supra*, where the Court had been presented with two radically different conceptions of this relationship. The first conceived of aboriginal rights as being “inherently based in aboriginal title to the land” (at para. 25), or as fragments of a broader claim to aboriginal title. By implication, aboriginal rights must rest either in a claim to title or the unextinguished remnants of title. Taken to

cit., à la p. 254; Brian Slattery, *Ancestral Lands, Alien Laws: Judicial Perspectives on Aboriginal Title*, *op. cit.*, à la p. 45.

Je m’empresse d’ajouter que la constitutionnalisation par le par. 35(1) des droits ancestraux reconnus en common law ne signifie pas que ces droits épuisent le contenu de cette disposition. Comme je l’ai dit dans *Côté*, précité, au par. 52:

Le noble objet visé par le par. 35(1), savoir la préservation des caractéristiques déterminantes qui font partie intégrante des sociétés autochtones distinctives, ne saurait être réalisé s’il ne protégeait que les caractéristiques déterminantes dont le sort a bien voulu qu’elles soient reconnues légalement par les colonisateurs européens.

Dans *Côté*, je me suis fondé sur cette affirmation pour réfuter l’argument selon lequel l’absence possible de droits ancestraux dans le droit colonial français faisait obstacle à l’existence de droits ancestraux au sens du par. 35(1) à l’intérieur des frontières historiques de la Nouvelle-France. Toutefois, il s’ensuit également que l’existence d’un droit ancestral particulier reconnu en common law n’est pas un préalable essentiel pour prouver l’existence d’un droit ancestral reconnu et confirmé par le par. 35(1). De fait, aucune des décisions qui ont été rendues par notre Cour relativement au par. 35(1) et dans lesquelles l’existence d’un droit ancestral a été démontrée n’a invoqué l’existence de ce droit en common law. L’existence d’un droit ancestral reconnu en common law est donc suffisante, mais pas nécessaire, pour la reconnaissance et la confirmation de ce droit par le par. 35(1).

La reconnaissance du fait que le par. 35(1) a constitutionnalisé le titre aborigène reconnu en common law soulève une autre question, celle du rapport qui existe entre le titre aborigène et les «droits ancestraux» protégés par le par. 35(1). J’ai examiné cette question dans l’arrêt *Adams*, précité, où deux conceptions diamétralement opposées de ce rapport avaient été soumises à notre Cour. La première présentait les droits ancestraux comme des droits qui «se rattachent intrinsèquement au titre aborigène sur le territoire visé» (au par. 25), ou comme des fragments d’une revendication plus large visant le titre aborigène. Par implication, les

136

137

its logical extreme, this suggests that aboriginal title is merely the sum of a set of individual aboriginal rights, and that it therefore has no independent content. However, I rejected this position for another — that aboriginal title is “simply one manifestation of a broader-based conception of aboriginal rights” (at para. 25). Thus, although aboriginal title is a species of aboriginal right recognized and affirmed by s. 35(1), it is distinct from other aboriginal rights because it arises where the connection of a group with a piece of land “was of a central significance to their distinctive culture” (at para. 26).

droits ancestraux doivent reposer soit sur la revendication d’un titre, soit sur les restes non éteints d’un titre. Poussé à son extrême, ce raisonnement suggère que le titre aborigène est simplement la somme d’un ensemble de droits ancestraux individuels, et qu’il n’a donc aucun contenu indépendant. J’ai toutefois rejeté cette conception et retenu l’autre, savoir que le titre aborigène n’est «que la manifestation d’une conception plus large des droits ancestraux» (au par. 25). Par conséquent, bien que le titre aborigène soit un type de droit ancestral reconnu et confirmé par le par. 35(1), il est distinct des autres droits ancestraux parce qu’il naît lorsque le rapport entre un territoire et un groupe «avait, pour sa culture distinctive, une importance fondamentale» (au par. 26).

138

The picture which emerges from *Adams* is that the aboriginal rights which are recognized and affirmed by s. 35(1) fall along a spectrum with respect to their degree of connection with the land. At the one end, there are those aboriginal rights which are practices, customs and traditions that are integral to the distinctive aboriginal culture of the group claiming the right. However, the “occupation and use of the land” where the activity is taking place is not “sufficient to support a claim of title to the land” (at para. 26 (emphasis in original)). Nevertheless, those activities receive constitutional protection. In the middle, there are activities which, out of necessity, take place on land and indeed, might be intimately related to a particular piece of land. Although an aboriginal group may not be able to demonstrate title to the land, it may nevertheless have a site-specific right to engage in a particular activity. I put the point this way in *Adams*, at para. 30:

Even where an aboriginal right exists on a tract of land to which the aboriginal people in question do not have title, that right may well be site specific, with the result that it can be exercised only upon that specific tract of land. For example, if an aboriginal people demonstrates that hunting on a specific tract of land was an integral part of their distinctive culture then, even if the right exists apart from title to that tract of land, the aboriginal right to hunt is nonetheless defined as, and limited to,

Il ressort de l’arrêt *Adams* que les droits ancestraux qui sont reconnus et confirmés par le par. 35(1) s’étalent le long d’un spectre, en fonction de leur degré de rattachement avec le territoire visé. À une extrémité du spectre, il y a les droits ancestraux qui sont des coutumes, pratiques et traditions faisant partie intégrante de la culture autochtone distinctive du groupe qui revendique le droit en question. Toutefois, le fait que le territoire sur lequel l’activité est pratiquée a été «occupé et utilisé» ne suffit pas «pour étayer la revendication du titre sur celui-ci» (au par. 26 (souligné dans l’original)). Néanmoins, ces activités bénéficient de la protection de la Constitution. Au milieu du spectre, on trouve les activités qui, par nécessité, sont pratiquées sur le territoire et, de fait, pourraient même être étroitement rattachées à une parcelle de terrain particulière. Bien qu’un groupe autochtone puisse être incapable de démontrer l’existence d’un titre sur le territoire, il peut quand même avoir le droit — spécifique à un site — de s’adonner à une activité particulière. J’ai présenté la chose de la façon suivante dans l’arrêt *Adams* (au par. 30):

En effet, même si un droit ancestral s’attache à une parcelle de terrain dont le titre n’appartient pas au peuple autochtone concerné, ce droit peut fort bien être spécifique à un site et, en conséquence, ne pouvoir être exercé que sur cette parcelle de terrain spécifique. Par exemple, si un peuple autochtone établit que la chasse sur une parcelle de terrain spécifique faisait partie intégrante de sa culture distinctive à l’époque, le droit de chasse ancestral — même s’il existe indépendamment

the right to hunt on the specific tract of land. [Emphasis added.]

At the other end of the spectrum, there is aboriginal title itself. As *Adams* makes clear, aboriginal title confers more than the right to engage in site-specific activities which are aspects of the practices, customs and traditions of distinctive aboriginal cultures. Site-specific rights can be made out even if title cannot. What aboriginal title confers is the right to the land itself.

Because aboriginal rights can vary with respect to their degree of connection with the land, some aboriginal groups may be unable to make out a claim to title, but will nevertheless possess aboriginal rights that are recognized and affirmed by s. 35(1), including site-specific rights to engage in particular activities. As I explained in *Adams*, this may occur in the case of nomadic peoples who varied “the location of their settlements with the season and changing circumstances” (at para. 27). The fact that aboriginal peoples were non-sedentary, however (at para. 27)

does not alter the fact that nomadic peoples survived through reliance on the land prior to contact with Europeans and, further, that many of the practices, customs and traditions of nomadic peoples that took place on the land were integral to their distinctive cultures.

(e) *Proof of Aboriginal Title*

(i) Introduction

In addition to differing in the degree of connection with the land, aboriginal title differs from other aboriginal rights in another way. To date, the Court has defined aboriginal rights in terms of activities. As I said in *Van der Peet* (at para. 46):

[I]n order to be an aboriginal right an activity must be an element of a practice, custom or tradition integral to

du titre sur cette parcelle de terrain — est néanmoins défini comme étant le droit de chasser sur cette parcelle spécifique, et il se limite à cela. [Je souligne.]

À l’autre extrémité du spectre, il y a le titre aborigène proprement dit. Ainsi qu’il ressort clairement de l’arrêt *Adams*, le titre aborigène confère quelque chose de plus que le droit d’exercer des activités spécifiques à un site qui sont des aspects de coutumes, pratiques et traditions de cultures autochtones distinctives. L’existence de droits spécifiques à un site peut être établie même si l’existence d’un titre ne peut pas l’être. Ce que le titre aborigène confère c’est le droit au territoire lui-même.

Étant donné que les droits ancestraux peuvent varier en fonction de leur degré de rattachement au territoire, il est possible que certains groupes autochtones soient incapables d’établir le bien-fondé de leur revendication d’un titre, mais qu’ils possèdent néanmoins des droits ancestraux reconnus et confirmés par le par. 35(1), notamment des droits — spécifiques à un site — d’exercer des activités particulières. Comme je l’ai expliqué dans *Adams*, cela peut se produire dans le cas de peuples nomades qui changeaient «l’emplacement de leurs établissements [...] en fonction des saisons et des circonstances» (au par. 27). Toutefois, le fait que des peuples autochtones n’étaient pas sédentaires (au par. 27)

ne change rien au fait que les peuples nomades ont survécu en exploitant le territoire avant le contact avec les Européens, et que bon nombre des coutumes, pratiques et traditions observées par ces peuples nomades sur le territoire en question faisaient partie intégrante de leur culture distinctive.

e) *La preuve de l’existence d’un titre aborigène*

(i) Introduction

En plus de différer des autres droits ancestraux quant au degré de rattachement avec le territoire, le titre aborigène se distingue de ceux-ci d’une autre façon. Jusqu’à maintenant, la Cour a défini les droits ancestraux par rapport à des activités. Comme je l’ai dit dans *Van der Peet* (au par. 46):

[P]our constituer un droit ancestral, une activité doit être un élément d’une coutume, pratique ou tradition faisant

the distinctive culture of the aboriginal group claiming the right. [Emphasis added.]

Aboriginal title, however, is a right to the land itself. Subject to the limits I have laid down above, that land may be used for a variety of activities, none of which need be individually protected as aboriginal rights under s. 35(1). Those activities are parasitic on the underlying title.

141 This difference between aboriginal rights to engage in particular activities and aboriginal title requires that the test I laid down in *Van der Peet* be adapted accordingly. I anticipated this possibility in *Van der Peet* itself, where I stated that (at para. 74):

Aboriginal rights arise from the prior occupation of land, but they also arise from the prior social organization and distinctive cultures of aboriginal peoples on that land. In considering whether a claim to an aboriginal right has been made out, courts must look at both the relationship of an aboriginal claimant to the land and at the practices, customs and traditions arising from the claimant's distinctive culture and society. Courts must not focus so entirely on the relationship of aboriginal peoples with the land that they lose sight of the other factors relevant to the identification and definition of aboriginal rights. [Emphasis added; "and" emphasized in original.]

Since the purpose of s. 35(1) is to reconcile the prior presence of aboriginal peoples in North America with the assertion of Crown sovereignty, it is clear from this statement that s. 35(1) must recognize and affirm both aspects of that prior presence — first, the occupation of land, and second, the prior social organization and distinctive cultures of aboriginal peoples on that land. To date the jurisprudence under s. 35(1) has given more emphasis to the second aspect. To a great extent, this has been a function of the types of cases which have come before this Court under s. 35(1) — prosecutions for regulatory offences that, by their very nature, proscribe discrete types of activity.

partie intégrante de la culture distinctive du groupe autochtone qui revendique le droit en question. [Je souligne.]

Or le titre aborigène est le droit au territoire lui-même. Sous réserve des limites que j'ai exposées précédemment, ce territoire peut être utilisé pour diverses activités, dont aucune ne doit nécessairement être protégée individuellement en tant que droit ancestral prévu au par. 35(1). Ces activités sont des parasites du titre sous-jacent.

Cette différence entre les droits ancestraux autorisant l'exercice d'activités particulières et le titre aborigène exige l'adaptation, en conséquence, du critère que j'ai exposé dans *Van der Peet*. J'ai prévu cette possibilité dans cet arrêt, où j'ai déclaré (au par. 74):

Les droits ancestraux découlent non seulement de l'occupation antérieure du territoire, mais aussi de l'organisation sociale antérieure et des cultures distinctives des peuples autochtones habitant ce territoire. Pour déterminer si le bien-fondé de la revendication d'un droit ancestral a été établi, les tribunaux doivent considérer et les rapports qu'entretient le demandeur autochtone avec le territoire et les coutumes, pratiques et traditions de la société à laquelle il appartient et de la culture distinctive de cette société. Ils ne doivent pas se concentrer sur les rapports qu'entretiennent les peuples autochtones avec le territoire au point de négliger les autres facteurs pertinents pour l'identification et la définition des droits ancestraux. [Je souligne; «et» souligné dans l'original.]

Comme l'objet du par. 35(1) est de concilier la présence antérieure des peuples autochtones en Amérique du Nord avec l'affirmation de la souveraineté de la Couronne, il ressort clairement de cet énoncé que le par. 35(1) doit reconnaître et confirmer les deux aspects de cette préexistence, savoir l'occupation du territoire, d'une part, et l'organisation sociale antérieure et les cultures distinctives des peuples autochtones habitant ce territoire, d'autre part. Jusqu'à ce jour, la jurisprudence relative au par. 35(1) a surtout insisté sur le deuxième aspect. Cette situation est dans une large mesure attribuable aux genres d'affaires qui ont été soumises à notre Cour dans le contexte du par. 35(1), savoir des poursuites intentées relativement à des infractions réglementaires qui, de par leur nature même, interdisent divers types d'activités.

The adaptation of the test laid down in *Van der Peet* to suit claims to title must be understood as the recognition of the first aspect of that prior presence. However, as will now become apparent, the tests for the identification of aboriginal rights to engage in particular activities and for the identification of aboriginal title share broad similarities. The major distinctions are first, under the test for aboriginal title, the requirement that the land be integral to the distinctive culture of the claimants is subsumed by the requirement of occupancy, and second, whereas the time for the identification of aboriginal rights is the time of first contact, the time for the identification of aboriginal title is the time at which the Crown asserted sovereignty over the land.

(ii) The Test for the Proof of Aboriginal Title

In order to make out a claim for aboriginal title, the aboriginal group asserting title must satisfy the following criteria: (i) the land must have been occupied prior to sovereignty, (ii) if present occupation is relied on as proof of occupation pre-sovereignty, there must be a continuity between present and pre-sovereignty occupation, and (iii) at sovereignty, that occupation must have been exclusive.

The land must have been occupied prior to sovereignty

In order to establish a claim to aboriginal title, the aboriginal group asserting the claim must establish that it occupied the lands in question at the time at which the Crown asserted sovereignty over the land subject to the title. The relevant time period for the establishment of title is, therefore, different than for the establishment of aboriginal rights to engage in specific activities. In *Van der Peet*, I held, at para. 60 that “[t]he time period that

L’adaptation du critère établi dans l’arrêt *Van der Peet* en vue de son application aux revendications de titre doit également être considérée comme la reconnaissance du premier aspect de cette présence antérieure. Toutefois, comme il deviendra maintenant évident, le critère applicable pour déterminer l’existence de droits ancestraux autorisant l’exercice d’activités particulières et le critère applicable pour déterminer l’existence d’un titre aborigène comportent de grandes similitudes. Par ailleurs, voici quelles sont les principales distinctions: premièrement, dans le cadre du critère relatif au titre aborigène, l’exigence que le territoire fasse partie intégrante de la culture distincte des demandeurs est subsumée sous l’exigence d’occupation; deuxièmement, alors que c’est le moment du premier contact avec les Européens qui est le moment pertinent pour la détermination des droits ancestraux, dans le cas du titre aborigène, c’est le moment de l’affirmation par la Couronne de sa souveraineté sur le territoire.

(ii) Le critère applicable pour prouver l’existence d’un titre aborigène

Pour établir le bien-fondé de la revendication d’un titre aborigène, le groupe autochtone qui revendique ce titre doit satisfaire aux exigences suivantes: (i) il doit avoir occupé le territoire avant l’affirmation de la souveraineté; (ii) si l’occupation actuelle est invoquée comme preuve de l’occupation avant l’affirmation de la souveraineté, il doit exister une continuité entre l’occupation actuelle et l’occupation antérieure à l’affirmation de la souveraineté; (iii) au moment de l’affirmation de la souveraineté, cette occupation doit avoir été exclusive.

Le territoire doit avoir été occupé avant l’affirmation de la souveraineté

Pour établir le bien-fondé de la revendication d’un titre aborigène, le groupe autochtone qui revendique le titre doit démontrer qu’il occupait les terres en question au moment où la Couronne a affirmé sa souveraineté sur ces terres. La période pertinente pour établir l’existence du titre est donc différente de celle qui s’applique pour établir l’existence de droits ancestraux autorisant l’exercice d’activités précises. Dans *Van der Peet*, j’ai

142

143

144

a court should consider in identifying whether the right claimed meets the standard of being integral to the aboriginal community claiming the right is the period prior to contact . . .” This arises from the fact that in defining the central and distinctive attributes of pre-existing aboriginal societies it is necessary to look to a time prior to the arrival of Europeans. Practices, customs or traditions that arose solely as a response to European influences do not meet the standard for recognition as aboriginal rights.

statué, au par. 60, que «[l]a période que doit prendre en considération le tribunal pour décider si le droit revendiqué satisfait au critère de la partie intégrante de la culture distinctive de la collectivité autochtone qui revendique le droit en cause est la période qui a précédé le contact . . .» Cela découle du fait que pour définir les attributs fondamentaux et distinctifs des sociétés autochtones préexistantes, il faut se reporter à une époque antérieure à l’arrivée des Européens. Les pratiques, coutumes et traditions qui ont pris naissance uniquement sous l’effet des influences européennes ne satisfont pas à la norme établie pour la reconnaissance des droits ancestraux.

¹⁴⁵ On the other hand, in the context of aboriginal title, sovereignty is the appropriate time period to consider for several reasons. First, from a theoretical standpoint, aboriginal title arises out of prior occupation of the land by aboriginal peoples and out of the relationship between the common law and pre-existing systems of aboriginal law. Aboriginal title is a burden on the Crown’s underlying title. However, the Crown did not gain this title until it asserted sovereignty over the land in question. Because it does not make sense to speak of a burden on the underlying title before that title existed, aboriginal title crystallized at the time sovereignty was asserted. Second, aboriginal title does not raise the problem of distinguishing between distinctive, integral aboriginal practices, customs and traditions and those influenced or introduced by European contact. Under common law, the act of occupation or possession is sufficient to ground aboriginal title and it is not necessary to prove that the land was a distinctive or integral part of the aboriginal society before the arrival of Europeans. Finally, from a practical standpoint, it appears that the date of sovereignty is more certain than the date of first contact. It is often very difficult to determine the precise moment that each aboriginal group had first contact with European culture. I note that this is the approach has support in the academic literature: Brian Slattery, “Understanding Aboriginal Rights”, *supra*, at p. 742; Kent McNeil, *Common Law Aboriginal Title*, *supra*, at p. 196. For these reasons, I conclude that aboriginals must establish occupation of the land

Par contre, lorsqu’il est question de titre aborigène, la période de l’affirmation de la souveraineté est celle qui doit être prise en considération, et ce pour plusieurs raisons. Premièrement, d’un point de vue théorique, le titre aborigène découle de l’occupation antérieure du territoire par les peuples autochtones et du rapport entre la common law et les régimes juridiques autochtones préexistants. Le titre aborigène grève le titre sous-jacent de la Couronne. Cependant, celle-ci n’a acquis ce titre qu’à compter du moment où elle a affirmé sa souveraineté sur le territoire en question. Étant donné qu’il serait absurde de parler d’une charge grevant le titre sous-jacent avant que celui-ci ait existé, le titre aborigène s’est cristallisé au moment de l’affirmation de la souveraineté. Deuxièmement, le titre aborigène ne soulève pas le problème que pose la distinction entre les coutumes, pratiques et traditions distinctives faisant partie intégrante d’une société autochtone et celles qui ont été introduites par suite du contact avec les Européens ou influencées par celui-ci. En vertu de la common law, le fait de l’occupation ou de la possession suffit pour fonder un titre aborigène, et il n’est pas nécessaire de prouver que le territoire en question faisait partie intégrante de la société autochtone visée avant l’arrivée des Européens ou qu’il était un élément distinctif de celle-ci. Finalement, il semble, d’un point de vue pratique, que la date de l’affirmation de la souveraineté ait un caractère plus certain que celle du premier contact avec les Européens. Il est souvent très difficile de déterminer à quel moment précis chaque groupe autoch-

from the date of the assertion of sovereignty in order to sustain a claim for aboriginal title. McEachern C.J. found, at pp. 233-34, and the parties did not dispute on appeal, that British sovereignty over British Columbia was conclusively established by the Oregon Boundary Treaty of 1846. This is not to say that circumstances subsequent to sovereignty may never be relevant to title or compensation; this might be the case, for example, where native bands have been dispossessed of traditional lands after sovereignty.

There was a consensus among the parties on appeal that proof of historic occupation was required to make out a claim to aboriginal title. However, the parties disagreed on how that occupancy could be proved. The respondents assert that in order to establish aboriginal title, the occupation must be the physical occupation of the land in question. The appellant Gitksan nation argue, by contrast, that aboriginal title may be established, at least in part, by reference to aboriginal law.

This debate over the proof of occupancy reflects two divergent views of the source of aboriginal title. The respondents argue, in essence, that aboriginal title arises from the physical reality at the time of sovereignty, whereas the Gitksan effectively take the position that aboriginal title arises from and should reflect the pattern of land holdings under aboriginal law. However, as I have explained above, the source of aboriginal title appears to be grounded both in the common law

tone est pour la première fois entré en contact avec la culture européenne. Je note que cette approche trouve appui dans la doctrine: Brian Slattery, «Understanding Aboriginal Rights», *loc. cit.*, à la p. 742; Kent McNeil, *Common Law Aboriginal Title*, *op. cit.*, à la p. 196. Pour ces motifs, je conclus que les autochtones doivent prouver l'occupation du territoire à partir de l'affirmation de la souveraineté pour fonder la revendication d'un titre aborigène. Le juge en chef McEachern a conclu, aux pp. 233 et 234, que la date de l'affirmation de la souveraineté britannique sur la Colombie-Britannique avait été établie de façon concluante par le traité Oregon de 1846, conclusion que les parties n'ont pas contestée en appel. Cela ne veut pas dire que des circonstances ultérieures à l'affirmation de la souveraineté ne seront jamais pertinentes pour ce qui est du titre ou de l'indemnité. De telles circonstances pourraient l'être, par exemple dans le cas de bandes autochtones qui auraient été dépossédées de terres traditionnelles après l'affirmation de la souveraineté.

Il y avait un consensus entre les parties au présent pourvoi sur le fait que la preuve de l'occupation historique du territoire visé est requise pour établir le bien-fondé de la revendication d'un titre aborigène sur celui-ci. Toutefois, les parties ne se sont pas entendues sur la façon de prouver cette occupation. Les intimés soutiennent que, en ce qui concerne l'établissement de l'existence d'un titre aborigène, l'occupation s'entend nécessairement de l'occupation physique du territoire en question. À l'opposé, la nation Gitksan appelante prétend qu'il est possible, du moins en partie, d'établir l'existence d'un titre aborigène en se référant aux règles de droit autochtones.

Ce débat sur la preuve de l'occupation témoigne de l'existence de deux conceptions divergentes de l'origine du titre aborigène. Essentiellement, les intimés soutiennent que le titre aborigène découle de la réalité physique qu'ont rencontrée les Européens au moment de l'affirmation de la souveraineté, tandis que la nation Gitksan adopte en fait le point de vue que le titre aborigène découle des modes de possession foncière prévus par les règles de droit autochtones et qu'il devrait refléter ces

146

147

and in the aboriginal perspective on land; the latter includes, but is not limited to, their systems of law. It follows that both should be taken into account in establishing the proof of occupancy. Indeed, there is precedent for doing so. In *Baker Lake*, *supra*, Mahoney J. held that to prove aboriginal title, the claimants needed both to demonstrate their “physical presence on the land they occupied” (at p. 561) and the existence “among [that group of] . . . a recognition of the claimed rights. . . by the regime that prevailed before” (at p. 559).

modes de possession. Toutefois, comme je l’ai expliqué précédemment, l’origine du titre aborigène semble reposer tant sur la common law que sur le point de vue des autochtones à l’égard du territoire, point de vue qui tient compte notamment de leurs régimes juridiques. Il s’ensuit que ces deux éléments devraient être pris en compte dans la démonstration de l’occupation. De fait, il existe un précédent à cet égard. Dans l’affaire *Baker Lake*, précitée, le juge Mahoney a statué que, pour établir l’existence d’un titre aborigène, les requérants devaient prouver leur «présence physique [. . .] sur la terre qu’ils occupaient» (à la p. 561) et l’existence «chez [ce groupe] [d’]une perception des droits réclamés [. . .] [qui] recevai[t] effet au cours du régime qui prévalait antérieurement» (à la p. 559).

148

This approach to the proof of occupancy at common law is also mandated in the context of s. 35(1) by *Van der Peet*. In that decision, as I stated above, I held at para. 50 that the reconciliation of the prior occupation of North America by aboriginal peoples with the assertion of Crown sovereignty required that account be taken of the “aboriginal perspective while at the same time taking into account the perspective of the common law” and that “[t]rue reconciliation will, equally, place weight on each”. I also held that the aboriginal perspective on the occupation of their lands can be gleaned, in part, but not exclusively, from their traditional laws, because those laws were elements of the practices, customs and traditions of aboriginal peoples: at para. 41. As a result, if, at the time of sovereignty, an aboriginal society had laws in relation to land, those laws would be relevant to establishing the occupation of lands which are the subject of a claim for aboriginal title. Relevant laws might include, but are not limited to, a land tenure system or laws governing land use.

L’arrêt *Van der Peet* commande également cette approche relative à la preuve de l’occupation en common law dans le contexte du par. 35(1). Dans cette décision, comme je l’ai dit précédemment, j’ai statué, au par. 50 que, pour concilier l’occupation antérieure de l’Amérique du Nord par les peuples autochtones avec l’affirmation de la souveraineté de la Couronne, il fallait tenir compte à la fois du «point de vue des autochtones et de la common law», et j’ai également conclu que «[l]a conciliation véritable accorde, également, de l’importance à chacun de ces éléments». En outre, j’ai déclaré que le point de vue des autochtones sur l’occupation des terres peut être dégagé en partie, mais pas exclusivement, de leurs règles de droit traditionnelles parce que ces règles étaient des éléments des coutumes, pratiques et traditions des peuples autochtones: au par. 41. Il s’ensuit que si, au moment de l’affirmation de la souveraineté, une société autochtone avait des règles de droit concernant le territoire, ces règles seraient pertinentes pour prouver l’occupation des terres visées par la revendication d’un titre aborigène. Les règles de droit pertinentes pourraient notamment inclure un régime de tenure foncière ou des règles régissant l’utilisation des terres.

149

However, the aboriginal perspective must be taken into account alongside the perspective of the common law. Professor McNeil has convincingly

Toutefois, le point de vue des autochtones doit être pris en considération en même temps que la common law. Le professeur McNeil a soutenu,

argued that at common law, the fact of physical occupation is proof of possession at law, which in turn will ground title to the land: *Common Law Aboriginal Title*, *supra*, at p. 73; also see *Cheshire and Burn's Modern Law of Real Property*, *supra*, at p. 28; and Megarry and Wade, *The Law of Real Property*, *supra*, at p. 1006. Physical occupation may be established in a variety of ways, ranging from the construction of dwellings through cultivation and enclosure of fields to regular use of definite tracts of land for hunting, fishing or otherwise exploiting its resources: see McNeil, *Common Law Aboriginal Title*, at pp. 201-2. In considering whether occupation sufficient to ground title is established, "one must take into account the group's size, manner of life, material resources, and technological abilities, and the character of the lands claimed": Brian Slattery, "Understanding Aboriginal Rights", at p. 758.

In *Van der Peet*, I drew a distinction between those practices, customs and traditions of aboriginal peoples which were "an aspect of, or took place in" the society of the aboriginal group asserting the claim and those which were "a central and significant part of the society's distinctive culture" (at para. 55). The latter stood apart because they "made the culture of the society distinctive . . . it was one of the things that truly made the society what it was" (at para. 55, emphasis in original). The same requirement operates in the determination of the proof of aboriginal title. As I said in *Adams*, a claim to title is made out when a group can demonstrate "that their connection with the piece of land . . . was of a central significance to their distinctive culture" (at para. 26).

Although this remains a crucial part of the test for aboriginal rights, given the occupancy requirement in the test for aboriginal title, I cannot imagine a situation where this requirement would actu-

d'une façon convaincante, qu'en common law l'occupation physique fait preuve de la possession en droit, fait qui à son tour fondera le droit au titre sur les terres visées: *Common Law Aboriginal Title*, *op. cit.*, à la p. 73; voir aussi *Cheshire and Burn's Modern Law of Real Property*, *op. cit.*, à la p. 28; et Megarry et Wade, *The Law of Real Property*, *op. cit.*, à la p. 1006. L'occupation physique peut être prouvée par différents faits, allant de la construction de bâtiments à l'utilisation régulière de secteurs bien définis du territoire pour y pratiquer la chasse, la pêche ou d'autres types d'exploitation de ses ressources, en passant par la délimitation et la culture de champs: voir McNeil, *Common Law Aboriginal Title*, aux pp. 201 et 202. Dans l'examen de la question de savoir si on a fait la preuve d'une occupation suffisante pour fonder un titre aborigène, [TRADUCTION] «il faut tenir compte de la taille, du mode de vie, des ressources matérielles et des habiletés technologiques du groupe concerné, ainsi que de la nature des terres revendiquées»: Brian Slattery, «Understanding Aboriginal Rights», à la p. 758.

Dans *Van der Peet*, j'ai établi une distinction entre les coutumes, pratiques et traditions des peuples autochtones qui étaient «un aspect» de la société autochtone qui revendique le titre ou qui «y étai[ent] exercée[s]», et celles qui étaient «un élément fondamental et important de la culture distinctive de cette société» (au par. 55). Ces dernières coutumes, pratiques et traditions se démarquaient parce qu'elles «rendaient la culture de la société distinctive [. . .] c'était l'une des choses qui véritablement faisait de la société ce qu'elle était» (au par. 55, souligné dans l'original). La même exigence s'applique pour prouver l'existence d'un titre aborigène. Comme je l'ai dit dans *Adams*, le bien-fondé de la revendication d'un titre est établi lorsqu'un groupe peut démontrer «que le rapport qu'il entretient avec le territoire [. . .] avait, pour sa culture distinctive, une importance fondamentale» (au par. 26).

Bien que cela demeure un aspect fondamental du critère de détermination de l'existence des droits ancestraux, compte tenu de l'exigence d'occupation prévue par le critère applicable pour sta-

150

151

ally serve to limit or preclude a title claim. The requirement exists for rights short of title because it is necessary to distinguish between those practices which were central to the culture of claimants and those which were more incidental. However, in the case of title, it would seem clear that any land that was occupied pre-sovereignty, and which the parties have maintained a substantial connection with since then, is sufficiently important to be of central significance to the culture of the claimants. As a result, I do not think it is necessary to include explicitly this element as part of the test for aboriginal title.

tuer sur l'existence d'un titre aborigène, je ne peux imaginer de situation où cette exigence servirait en fait à limiter ou à empêcher la revendication de titre. L'exigence existe à l'égard des droits qui ne constituent pas des titres parce que, dans de tels cas, il est nécessaire de distinguer entre les pratiques qui étaient des éléments fondamentaux de la culture des demandeurs et celles qui étaient d'avantage accessoires. Toutefois, dans le cas d'un titre, il semble clair que tout territoire qui a été occupé antérieurement à l'affirmation de la souveraineté et avec lequel les parties ont depuis maintenu un rapport substantiel est suffisamment important pour avoir une importance fondamentale pour la culture des demandeurs. Par conséquent, je ne crois pas qu'il soit nécessaire d'inclure explicitement cet élément dans le critère relatif au titre aborigène.

If present occupation is relied on as proof of occupation pre-sovereignty, there must be a continuity between present and pre-sovereignty occupation

Si l'occupation actuelle est invoquée comme preuve de l'occupation avant l'affirmation de la souveraineté, il doit y avoir continuité entre l'occupation actuelle et l'occupation antérieure à l'affirmation de la souveraineté

152

In *Van der Peet*, I explained that it is the pre-contact practices, customs and traditions of aboriginal peoples which are recognized and affirmed as aboriginal rights by s. 35(1). But I also acknowledged it would be “next to impossible” (at para. 62) for an aboriginal group to provide conclusive evidence of its pre-contact practices, customs and traditions. What would suffice instead was evidence of post-contact practices, which was “directed at demonstrating which aspects of the aboriginal community and society have their origins pre-contact” (at para. 62). The same concern, and the same solution, arises with respect to the proof of occupation in claims for aboriginal title, although there is a difference in the time for determination of title. Conclusive evidence of pre-sovereignty occupation may be difficult to come by. Instead, an aboriginal community may provide evidence of present occupation as proof of pre-sovereignty occupation in support of a claim to aboriginal title. What is required, in addition, is a continuity between present and pre-sovereignty occupation, because the relevant time for the deter-

Dans *Van der Peet*, j'ai expliqué que ce sont les coutumes, pratiques et traditions des peuples autochtones qui existaient avant le contact avec les Européens qui sont reconnues et confirmées comme des droits ancestraux par le par. 35(1). Cependant, j'ai également reconnu qu'il serait «pratiquement impossible» (au par. 62) pour un groupe autochtone de produire une preuve concluante de ses coutumes, pratiques et traditions datant de l'époque antérieure au contact avec les Européens. Il suffirait plutôt de produire une preuve des pratiques postérieures au contact avec les Européens qui «tende à démontrer lesquels des aspects de la collectivité et de la société autochtones datent d'avant le contact avec les Européens» (au par. 62). La preuve de l'occupation dans le cadre de la revendication d'un titre aborigène pose le même problème et appelle la même solution. Il peut s'avérer difficile d'apporter des éléments de preuve concluants d'une occupation antérieure à l'affirmation de la souveraineté. Au lieu de cela, une collectivité autochtone peut produire, au soutien de la revendication d'un titre abo-

mination of aboriginal title is at the time before sovereignty.

rigène, des éléments de preuve de l'occupation actuelle comme preuve d'une occupation antérieure à l'affirmation de la souveraineté. Il faut en outre qu'il y ait une continuité entre l'occupation antérieure à l'affirmation de la souveraineté et l'occupation actuelle, parce que la période pertinente pour la détermination de l'existence d'un titre aborigène est celle qui a précédé l'affirmation de la souveraineté.

Needless to say, there is no need to establish "an unbroken chain of continuity" (*Van der Peet*, at para. 65) between present and prior occupation. The occupation and use of lands may have been disrupted for a time, perhaps as a result of the unwillingness of European colonizers to recognize aboriginal title. To impose the requirement of continuity too strictly would risk "undermining the very purpose of s. 35(1) by perpetuating the historical injustice suffered by aboriginal peoples at the hands of colonizers who failed to respect" aboriginal rights to land (*Côté, supra*, at para. 53). In *Mabo, supra*, the High Court of Australia set down the requirement that there must be "substantial maintenance of the connection" between the people and the land. In my view, this test should be equally applicable to proof of title in Canada.

Il va sans dire qu'il n'est pas nécessaire de faire la preuve d'une «continuité parfaite» (*Van der Peet*, au par. 65) entre l'occupation actuelle et l'occupation antérieure au contact avec les Européens. Il est possible que l'occupation et l'utilisation des terres aient été interrompues pendant une certaine période, à cause peut-être de la réticence des colonisateurs européens à reconnaître le titre aborigène. Exiger la continuité d'une manière trop stricte pourrait «saper l'objet même du par. 35(1) en perpétuant l'injustice historique dont les peuples autochtones ont été victimes aux mains des colonisateurs, qui n'ont pas respecté» les droits fonciers des autochtones (*Côté, précité*, au par. 53). Dans l'arrêt *Mabo*, précité, la Haute Cour d'Australie a établi l'exigence selon laquelle il doit y avoir «un maintien substantiel du lien» entre le peuple et le territoire. Je suis d'avis que ce critère s'applique également au Canada pour statuer sur l'existence d'un titre.

153

I should also note that there is a strong possibility that the precise nature of occupation will have changed between the time of sovereignty and the present. I would like to make it clear that the fact that the nature of occupation has changed would not ordinarily preclude a claim for aboriginal title, as long as a substantial connection between the people and the land is maintained. The only limitation on this principle might be the internal limits on uses which land that is subject to aboriginal title may be put, i.e., uses which are inconsistent with continued use by future generations of aboriginals.

Il me faut également souligner qu'il est fort possible que la nature précise de l'occupation ait changé entre l'époque de l'affirmation de la souveraineté et aujourd'hui. Je veux qu'il soit clair que le fait que la nature de l'occupation ait changé ne fera généralement pas obstacle à la revendication d'un titre aborigène, dans la mesure où un lien substantiel entre le peuple et le territoire en question a été maintenu. La seule restriction à ce principe pourrait être les limites intrinsèques aux utilisations qui peuvent être faites du territoire visé par un titre aborigène, c.-à-d. des utilisations incompatibles avec son usage continu par les générations autochtones futures.

154

At sovereignty, occupation must have been exclusive

L'occupation doit avoir été exclusive au moment de l'affirmation de la souveraineté

155 Finally, at sovereignty, occupation must have been exclusive. The requirement for exclusivity flows from the definition of aboriginal title itself, because I have defined aboriginal title in terms of the right to exclusive use and occupation of land. Exclusivity, as an aspect of aboriginal title, vests in the aboriginal community which holds the ability to exclude others from the lands held pursuant to that title. The proof of title must, in this respect, mirror the content of the right. Were it possible to prove title without demonstrating exclusive occupation, the result would be absurd, because it would be possible for more than one aboriginal nation to have aboriginal title over the same piece of land, and then for all of them to attempt to assert the right to exclusive use and occupation over it.

Enfin, il faut que l'occupation ait été exclusive au moment de l'affirmation de la souveraineté. Cette exigence d'exclusivité découle de la définition même du titre aborigène, que j'ai défini comme étant le droit d'utiliser et d'occuper de façon exclusive les terres visées. L'exclusivité, en tant qu'aspect du titre aborigène, appartient à la collectivité autochtone qui possède la capacité d'exclure autrui des terres détenues en vertu de ce titre. La preuve du titre doit, à cet égard, refléter le contenu du droit. S'il était possible de prouver l'existence du titre sans démontrer l'existence d'une occupation exclusive, on parviendrait à un résultat absurde, car il serait alors possible à plus d'une nation autochtone de posséder le titre aborigène à l'égard d'un même territoire, et toutes ces nations pourraient alors tenter de faire valoir le droit d'utiliser et d'occuper de façon exclusive ce territoire.

156 As with the proof of occupation, proof of exclusivity must rely on both the perspective of the common law and the aboriginal perspective, placing equal weight on each. At common law, a premium is placed on the factual reality of occupation, as encountered by the Europeans. However, as the common law concept of possession must be sensitive to the realities of aboriginal society, so must the concept of exclusivity. Exclusivity is a common law principle derived from the notion of fee simple ownership and should be imported into the concept of aboriginal title with caution. As such, the test required to establish exclusive occupation must take into account the context of the aboriginal society at the time of sovereignty. For example, it is important to note that exclusive occupation can be demonstrated even if other aboriginal groups were present, or frequented the claimed lands. Under those circumstances, exclusivity would be demonstrated by "the intention and capacity to retain exclusive control" (McNeil, *Common Law Aboriginal Title*, *supra*, at p. 204). Thus, an act of trespass, if isolated, would not undermine a general finding of exclusivity, if aboriginal groups intended to and attempted to

Comme pour la preuve de l'occupation, la preuve de l'exclusivité doit tenir compte tant de la common law que du point de vue des autochtones, et accorder une importance égale aux deux. En common law, l'accent est mis sur la réalité factuelle de l'occupation, telle qu'elle était constatée par les Européens. Cependant, comme le concept de possession en common law doit tenir compte des réalités de la société autochtone, il doit en être de même pour le concept d'exclusivité. L'exclusivité est un principe de common law qui est dérivé de la notion de propriété en fief simple et qui doit être intégré avec précaution au concept de titre aborigène. Par conséquent, le critère requis pour établir l'occupation exclusive doit prendre en compte le contexte de la société autochtone au moment de l'affirmation de la souveraineté. Par exemple, il est important de souligner qu'il est possible de prouver l'exclusivité de l'occupation même si d'autres groupes autochtones étaient présents ou se rendaient souvent sur les terres revendiquées. Dans de tels cas, l'exclusivité serait établie par la preuve de [TRADUCTION] «l'intention et de la capacité de garder le contrôle exclusif [du territoire visé]» (McNeil, *Common Law Aboriginal Title*, *op.*

enforce their exclusive occupation. Moreover, as Professor McNeil suggests, the presence of other aboriginal groups might actually reinforce a finding of exclusivity. For example, “[w]here others were allowed access upon request, the very fact that permission was asked for and given would be further evidence of the group’s exclusive control” (at p. 204).

A consideration of the aboriginal perspective may also lead to the conclusion that trespass by other aboriginal groups does not undermine, and that presence of those groups by permission may reinforce, the exclusive occupation of the aboriginal group asserting title. For example, the aboriginal group asserting the claim to aboriginal title may have trespass laws which are proof of exclusive occupation, such that the presence of trespassers does not count as evidence against exclusivity. As well, aboriginal laws under which permission may be granted to other aboriginal groups to use or reside even temporarily on land would reinforce the finding of exclusive occupation. Indeed, if that permission were the subject of treaties between the aboriginal nations in question, those treaties would also form part of the aboriginal perspective.

In their submissions, the appellants pressed the point that requiring proof of exclusive occupation might preclude a finding of joint title, which is shared between two or more aboriginal nations. The possibility of joint title has been recognized by American courts: *United States v. Santa Fe Pacific Railroad Co.*, 314 U.S. 339 (1941). I would suggest that the requirement of exclusive occupancy and the possibility of joint title could be reconciled by recognizing that joint title could arise from shared exclusivity. The meaning of shared

cit., à la p. 204). Par conséquent, une intrusion isolée ne ferait pas obstacle à une conclusion générale d’exclusivité si le groupe autochtone concerné avait l’intention de faire respecter son occupation exclusive et avait tenté de le faire. Qui plus est, comme l’indique le professeur McNeil, la présence d’autres groupes autochtones pourrait en fait renforcer une conclusion d’exclusivité. Par exemple, [TRADUCTION] «[L]orsque d’autres personnes demandaient l’accès au territoire et étaient autorisées à s’y rendre, le fait même qu’une permission était demandée et accordée constituerait une preuve supplémentaire du contrôle exclusif exercé sur le territoire par le groupe» (à la p. 204).

La prise en considération du point de vue des autochtones peut également amener à conclure qu’une intrusion par d’autres groupes autochtones ne fait pas obstacle à l’occupation exclusive du territoire visé par le groupe autochtone qui en revendique le titre, et que la présence autorisée de ces autres groupes peut renforcer cette occupation exclusive. À titre d’exemple, le groupe autochtone qui revendique le titre aborigène peut avoir, en matière d’intrusion, des règles de droit qui sont des preuves de l’occupation exclusive, de sorte que la présence d’intrus n’est pas considérée comme une preuve à l’encontre de l’exclusivité. De plus, l’existence de règles de droit autochtones en vertu desquelles d’autres groupes autochtones peuvent être autorisés à utiliser les terres ou même à y résider temporairement étayeraient la conclusion d’occupation exclusive. De fait, si cette permission a fait l’objet de traités entre les nations autochtones concernées, ces traités feraient également partie du point de vue des autochtones.

Dans leurs observations, les appelants ont insisté sur le fait que l’obligation de prouver l’occupation exclusive pourrait empêcher de conclure à l’existence d’un titre conjoint partagé par deux ou plusieurs nations autochtones. La possibilité de l’existence d’un titre conjoint a été reconnue par les tribunaux américains: *United States c. Santa Fe Pacific Railroad Co.*, 314 U.S. 339 (1941). Je suis d’avis qu’il est possible de concilier l’exigence d’occupation exclusive et l’existence possible d’un titre conjoint en reconnaissant qu’un titre conjoint

157

158

exclusivity is well-known to the common law. Exclusive possession is the right to exclude others. Shared exclusive possession is the right to exclude others except those with whom possession is shared. There clearly may be cases in which two aboriginal nations lived on a particular piece of land and recognized each other's entitlement to that land but nobody else's. However, since no claim to joint title has been asserted here, I leave it to another day to work out all the complexities and implications of joint title, as well as any limits that another band's title may have on the way in which one band uses its title lands.

peut découler d'une exclusivité partagée. Le sens de la notion d'exclusivité partagée est bien connue en common law. La possession exclusive est le droit d'exclure autrui. La possession exclusive partagée donne le droit d'exclure autrui, à l'exception des personnes avec qui la possession est partagée. Manifestement, il est possible que deux nations autochtones aient vécu sur un territoire particulier, et que chacune ait reconnu les droits de l'autre sur ce territoire, mais pas ceux de personne d'autre. Comme aucun titre conjoint n'a été revendiqué en l'espèce, je laisse à une autre occasion l'examen de toutes les difficultés et implications de la notion de titre conjoint, de même que les limites que le titre d'une autre bande pourrait imposer sur la façon dont une bande donnée utilise les terres sur lesquelles elle a un titre.

159

I should also reiterate that if aboriginals can show that they occupied a particular piece of land, but did not do so exclusively, it will always be possible to establish aboriginal rights short of title. These rights will likely be intimately tied to the land and may permit a number of possible uses. However, unlike title, they are not a right to the land itself. Rather, as I have suggested, they are a right to do certain things in connection with that land. If, for example, it were established that the lands near those subject to a title claim were used for hunting by a number of bands, those shared lands would not be subject to a claim for aboriginal title, as they lack the crucial element of exclusivity. However, they may be subject to site-specific aboriginal rights by all of the bands who used it. This does not entitle anyone to the land itself, but it may entitle all of the bands who hunted on the land to hunting rights. Hence, in addition to shared title, it will be possible to have shared, non-exclusive, site-specific rights. In my opinion, this accords with the general principle that the common law should develop to recognize aboriginal rights (and title, when necessary) as they were recognized by either *de facto* practice or by the aboriginal system of governance. It also allows sufficient

Je dois aussi rappeler que si des autochtones peuvent montrer qu'ils ont occupé un territoire particulier, mais que cette occupation n'était pas exclusive, il sera toujours possible d'établir l'existence de droits ancestraux ne constituant pas un titre. Il est vraisemblable que ces droits seront intimement liés au territoire, et qu'ils pourraient permettre de nombreuses utilisations. Cependant, contrairement au titre, ils ne constituent pas un droit au territoire lui-même, mais plutôt, comme je l'ai suggéré, il s'agit de droits permettant de faire certaines choses liées à ce territoire. Si, par exemple, il était établi que les terres situées à proximité de celles visées par la revendication d'un titre étaient utilisées pour la chasse par certaines bandes, ces terres partagées ne seraient pas l'objet d'un titre aborigène, car l'élément essentiel d'exclusivité serait absent. Cependant, toutes les bandes qui les ont utilisées pourraient avoir sur ces terres des droits ancestraux spécifiques à un site. Ce fait ne confère à personne le droit aux terres elles-mêmes, mais il pourrait avoir pour effet d'accorder des droits de chasse à toutes les bandes qui chassaient sur ces terres. Par conséquent, en plus d'un titre partagé, il sera possible d'avoir des droits partagés non exclusifs et spécifiques à certains sites. À mon avis, cette situation est conforme au principe général voulant que la common law doive évoluer pour reconnaître les droits ancestraux (et au besoin les titres aborigènes) qui étaient reconnus soit par une

flexibility to deal with this highly complex and rapidly evolving area of the law.

(f) *Infringements of Aboriginal Title: the Test of Justification*

(i) Introduction

The aboriginal rights recognized and affirmed by s. 35(1), including aboriginal title, are not absolute. Those rights may be infringed, both by the federal (e.g., *Sparrow*) and provincial (e.g., *Côté*) governments. However, s. 35(1) requires that those infringements satisfy the test of justification. In this section, I will review the Court's nascent jurisprudence on justification and explain how that test will apply in the context of infringements of aboriginal title.

(ii) General Principles

The test of justification has two parts, which I shall consider in turn. First, the infringement of the aboriginal right must be in furtherance of a legislative objective that is compelling and substantial. I explained in *Gladstone* that compelling and substantial objectives were those which were directed at either one of the purposes underlying the recognition and affirmation of aboriginal rights by s. 35(1), which are (at para. 72):

... the recognition of the prior occupation of North America by aboriginal peoples or ... the reconciliation of aboriginal prior occupation with the assertion of the sovereignty of the Crown.

I noted that the latter purpose will often "be most relevant" (at para. 72) at the stage of justification. I think it important to repeat why (at para. 73) that is so:

Because ... distinctive aboriginal societies exist within, and are a part of, a broader social, political and economic community, over which the Crown is sovereign, there are circumstances in which, in order to pursue objectives of compelling and substantial importance to that community as a whole (taking into account the fact

pratique *de facto*, soit par un régime de gestion autochtone. Cette approche accorde également toute la souplesse nécessaire à l'examen de ce domaine très complexe du droit qui évolue rapidement.

f) *Les atteintes au titre aborigène: le critère de justification*

(i) Introduction

Les droits ancestraux reconnus et confirmés par le par. 35(1), y compris le titre aborigène, ne sont pas absolus. Tant le gouvernement fédéral (p. ex. *Sparrow*) que les gouvernements provinciaux (p. ex. *Côté*) peuvent porter atteinte à ces droits. Toutefois, le par. 35(1) exige que ces atteintes satisfassent au critère de justification. Dans la présente section, je vais examiner la jurisprudence naissante de la Cour sur la justification et expliquer comment ce critère s'appliquera dans le contexte des atteintes au titre aborigène.

(ii) Principes généraux

Le critère de justification comporte deux volets que je vais examiner à tour de rôle. Premièrement, l'atteinte au droit ancestral visé doit se rapporter à la poursuite d'un objectif législatif impérieux et réel. Dans *Gladstone*, j'ai expliqué qu'un objectif impérieux et réel était un objectif visant l'un ou l'autre des objets qui sous-tendent la reconnaissance et la confirmation des droits ancestraux par le par. 35(1). Ces objets sont les suivants (au par. 72):

... soit la reconnaissance de l'occupation antérieure de l'Amérique du Nord par les peuples autochtones soit [...] la conciliation de cette occupation avec l'affirmation par Sa Majesté de sa souveraineté sur ce territoire.

J'ai souligné que le deuxième objet sera souvent «plus pertinent» (au par. 72) à l'étape de la justification. J'estime important de répéter pourquoi il en est ainsi (au par. 73):

[C]omme les sociétés autochtones distinctives existent au sein d'une communauté sociale, politique et économique plus large, communauté dont elles font partie et sur laquelle s'exerce la souveraineté de Sa Majesté, il existe des circonstances où, dans la poursuite d'objectifs importants ayant un caractère impérieux et réel pour

160

161

that aboriginal societies are a part of that community), some limitation of those rights will be justifiable. Aboriginal rights are a necessary part of the reconciliation of aboriginal societies with the broader political community of which they are part; limits placed on those rights are, where the objectives furthered by those limits are of sufficient importance to the broader community as a whole, equally a necessary part of that reconciliation. [Emphasis added; “equally” emphasized in original.]

The conservation of fisheries, which was accepted as a compelling and substantial objective in *Sparrow*, furthers both of these purposes, because it simultaneously recognizes that fishing is integral to many aboriginal cultures, and also seeks to reconcile aboriginal societies with the broader community by ensuring that there are fish enough for all. But legitimate government objectives also include “the pursuit of economic and regional fairness” and “the recognition of the historical reliance upon, and participation in, the fishery by non-aboriginal groups” (para. 75). By contrast, measures enacted for relatively unimportant reasons, such as sports fishing without a significant economic component (*Adams, supra*) would fail this aspect of the test of justification.

l'ensemble de la communauté (compte tenu du fait que les sociétés autochtones font partie de celle-ci), certaines restrictions de ces droits sont justifiables. Les droits ancestraux sont un élément nécessaire de la conciliation de l'existence des sociétés autochtones avec la communauté politique plus large à laquelle ces dernières appartiennent. Les limites imposées à ces droits sont également un élément nécessaire de cette conciliation, si les objectifs qu'elles visent sont suffisamment importants pour la communauté dans son ensemble. [Je souligne; «également» souligné dans l'original.]

La conservation des ressources halieutiques, qui a été acceptée comme un objectif impérieux et réel dans *Sparrow*, est un objectif qui vise la poursuite de ces deux objets parce que, d'une part, il reconnaît que la pêche fait partie intégrante de nombreuses cultures autochtones et, d'autre part, parce qu'il tend également à concilier l'existence des sociétés autochtones avec la communauté plus large en veillant à ce qu'il y ait assez de poissons pour tous. Cependant, sont également des objectifs légitimes du gouvernement «la poursuite de l'équité sur les plans économique et régional» et «la reconnaissance du fait que, historiquement, des groupes non autochtones comptent sur ces ressources et participent à leur exploitation» (par. 75). À l'opposé, des mesures édictées pour des raisons relativement peu importantes, telles des activités de pêche sportive ne comportant aucun élément économique important (*Adams, précité*), ne satisferaient pas à ce volet du critère de justification.

162

The second part of the test of justification requires an assessment of whether the infringement is consistent with the special fiduciary relationship between the Crown and aboriginal peoples. What has become clear is that the requirements of the fiduciary duty are a function of the “legal and factual context” of each appeal (*Gladstone, supra*, at para. 56). *Sparrow* and *Gladstone*, for example, interpreted and applied the fiduciary duty in terms of the idea of priority. The theory underlying that principle is that the fiduciary relationship between the Crown and aboriginal peoples demands that aboriginal interests be placed first. However, the fiduciary duty does not demand that aboriginal rights always be given

Le deuxième volet du critère de justification commande une appréciation de la question de savoir si l'atteinte est compatible avec les rapports spéciaux de fiduciaire qui existent entre la Couronne et les peuples autochtones. Il est devenu clair que les exigences de l'obligation de fiduciaire sont fonction du «contexte juridique et factuel» de chaque appel (*Gladstone, précité*, au par. 56). Dans les arrêts *Sparrow* et *Gladstone*, par exemple, la Cour a interprété et appliqué l'obligation de fiduciaire en fonction de l'idée de priorité. Selon la théorie qui sous-tend ce principe, les rapports de fiduciaire qui existent entre la Couronne et les peuples autochtones commandent que les intérêts des autochtones aient préséance. Toutefois, l'obligation de fiduciaire n'exige pas qu'on accorde toujours la priorité aux droits ancestraux. Comme il a

priority. As was said in *Sparrow*, *supra*, at pp. 1114-15:

The nature of the constitutional protection afforded by s. 35(1) in this context demands that there be a link between the question of justification and the allocation of priorities in the fishery. [Emphasis added.]

Other contexts permit, and may even require, that the fiduciary duty be articulated in other ways (at p. 1119):

Within the analysis of justification, there are further questions to be addressed, depending on the circumstances of the inquiry. These include the questions of whether there has been as little infringement as possible in order to effect the desired result; whether, in a situation of expropriation, fair compensation is available; and, whether the aboriginal group in question has been consulted with respect to the conservation measures being implemented.

Sparrow did not explain when the different articulations of the fiduciary duty should be used. Below, I suggest that the choice between them will in large part be a function of the nature of the aboriginal right at issue.

In addition to variation in the form which the fiduciary duty takes, there will also be variation in degree of scrutiny required by the fiduciary duty of the infringing measure or action. The degree of scrutiny is a function of the nature of the aboriginal right at issue. The distinction between *Sparrow* and *Gladstone*, for example, turned on whether the right amounted to the exclusive use of a resource, which in turn was a function of whether the right had an internal limit. In *Sparrow*, the right was internally limited, because it was a right to fish for food, ceremonial and social purposes, and as a result would only amount to an exclusive right to use the fishery in exceptional circumstances. Accordingly, the requirement of priority was applied strictly to mean that (at p. 1116) “any allocation of priorities after valid conservation

été dit dans *Sparrow*, précité, aux pp. 1114 et 1115:

La nature de la protection constitutionnelle qu’offre le par. 35(1) dans ce contexte commande l’existence d’un lien entre la question de la justification et l’établissement de priorités dans le domaine de la pêche. [Je souligne.]

D’autres contextes permettent, et peuvent même exiger, que l’obligation de fiduciaire soit formulée autrement (à la p. 1119):

Il y a, dans l’analyse de la justification, d’autres questions à aborder, selon les circonstances de l’enquête. Il s’agit notamment des questions de savoir si, en tentant d’obtenir le résultat souhaité, on a porté le moins possible atteinte à des droits, si une juste indemnisation est prévue en cas d’expropriation et si le groupe d’autochtones en question a été consulté au sujet des mesures de conservation mises en œuvre.

Dans *Sparrow*, la Cour n’a pas expliqué dans quels cas les différentes formulations de l’obligation de fiduciaire devraient être utilisées. Plus loin, j’indique que le choix de la formulation dépendra en grande partie de la nature du droit ancestral en cause.

Outre la variation de l’obligation de fiduciaire du point de vue de la forme, il y a aussi variation du degré d’examen — requis par cette obligation — de la mesure ou de l’acte qui porte atteinte au droit. Le degré d’examen est fonction de la nature du droit ancestral en cause. La distinction entre les arrêts *Sparrow* et *Gladstone*, par exemple, dépendait de la question de savoir si le droit en cause correspondait à l’utilisation exclusive d’une ressource, question qui dépendait à son tour de la réponse à la question de savoir si le droit était assorti d’une limite intrinsèque. Dans *Sparrow*, le droit en cause était assujéti à une telle limite parce qu’il s’agissait du droit de pêcher à des fins alimentaires, sociales et rituelles, droit qui, de ce fait, ne constituerait un droit exclusif à l’utilisation de la ressource que dans des circonstances exceptionnelles. Par conséquent, l’obligation d’accorder la priorité a été appliquée strictement, de sorte que (à la p. 1116), «dans l’établissement des priorités suite à la mise en œuvre de mesures de conserva-

measures have been implemented must give top priority to Indian food fishing”.

tion valides, il faut accorder la priorité absolue à la pêche par les Indiens à des fins de subsistance».

164

In *Gladstone*, by contrast, the right to sell fish commercially was only limited by supply and demand. Had the test for justification been applied in a strict form in *Gladstone*, the aboriginal right would have amounted to an exclusive right to exploit the fishery on a commercial basis. This was not the intention of *Sparrow*, and I accordingly modified the test for justification, by altering the idea of priority in the following way (at para. 62):

Dans *Gladstone*, par contre, le droit de vendre commercialement du poisson était uniquement limité par l’offre et la demande. Si le critère de justification avait été appliqué strictement dans cet arrêt, le droit ancestral aurait correspondu au droit exclusif d’exploiter la ressource sur une base commerciale. L’arrêt *Sparrow* ne visait pas ce résultat, et j’ai modifié le critère de justification en conséquence, en modifiant l’idée de priorité de la manière suivante (au par. 62):

... the doctrine of priority requires that the government demonstrate that, in allocating the resource, it has taken account of the existence of aboriginal rights and allocated the resource in a manner respectful of the fact that those rights have priority over the exploitation of the fishery by other users. This right is at once both procedural and substantive; at the stage of justification the government must demonstrate both that the process by which it allocated the resource and the actual allocation of the resource which results from that process reflect the prior interest of aboriginal rights holders in the fishery.

... cette doctrine [relative à l’ordre de priorité] commande que l’État démontre que, dans la répartition de la ressource, il a tenu compte de l’existence des droits ancestraux et réparti la ressource d’une manière qui respecte le fait que les titulaires de ces droits ont, en matière d’exploitation de la pêche, priorité sur les autres usagers. Il s’agit d’un droit à la fois substantiel et procédural. À l’étape de la justification, l’État doit démontrer que les modalités de répartition de la ressource ainsi que la répartition elle-même reflètent l’intérêt prioritaire des titulaires des droits ancestraux à l’égard de cette pêche.

After *Gladstone*, in the context of commercial activity, the priority of aboriginal rights is constitutionally satisfied if the government had taken those rights into account and has allocated a resource “in a manner respectful” (at para. 62) of that priority. A court must be satisfied that “the government has taken into account the existence and importance of [aboriginal] rights” (at para. 63) which it determines by asking the following questions (at para. 64):

Depuis *Gladstone*, en matière d’activités commerciales, la priorité des droits ancestraux est respectée sur le plan constitutionnel si le gouvernement a tenu compte de l’existence de ces droits et a réparti la ressource «d’une manière qui respecte» (au par. 62) cette priorité. Le tribunal doit être convaincu que «l’État a tenu compte de l’existence et de l’importance [des droits ancestraux]» (au par. 63), fait qu’il détermine en se posant les questions suivantes (au par. 64):

Questions relevant to the determination of whether the government has granted priority to aboriginal rights holders are ... questions such as whether the government has accommodated the exercise of the aboriginal right to participate in the fishery (through reduced licence fees, for example), whether the government’s objectives in enacting a particular regulatory scheme reflect the need to take into account the priority of aboriginal rights holders, the extent of the participation in the fishery of aboriginal rights holders relative to their percentage of the population, how the government has accommodated different aboriginal rights in a particular fishery (food versus commercial rights, for example), how important the fishery is to the economic and

Les questions pertinentes pour déterminer si l’État a donné la priorité aux titulaires de droits ancestraux sont [des] questions [...] telles que celle de savoir si l’État a facilité l’exercice du droit ancestral de participer à la pêche (en réduisant les droits payables pour les permis, par exemple), si les objectifs que poursuit l’État en établissant un régime de réglementation donné reflètent la nécessité de tenir compte du droit de priorité des titulaires de droits ancestraux, la mesure dans laquelle la participation à la pêche par les titulaires de droits ancestraux correspond au pourcentage que représente leur population par rapport à la population totale, la manière dont l’État a concilié les différents droits ancestraux visant une pêche donnée (par exemple le droit de pêcher

material well-being of the band in question, and the criteria taken into account by the government in, for example, allocating commercial licences amongst different users.

(iii) Justification and Aboriginal Title

The general principles governing justification laid down in *Sparrow*, and embellished by *Gladstone*, operate with respect to infringements of aboriginal title. In the wake of *Gladstone*, the range of legislative objectives that can justify the infringement of aboriginal title is fairly broad. Most of these objectives can be traced to the reconciliation of the prior occupation of North America by aboriginal peoples with the assertion of Crown sovereignty, which entails the recognition that “distinctive aboriginal societies exist within, and are a part of, a broader social, political and economic community” (at para. 73). In my opinion, the development of agriculture, forestry, mining, and hydroelectric power, the general economic development of the interior of British Columbia, protection of the environment or endangered species, the building of infrastructure and the settlement of foreign populations to support those aims, are the kinds of objectives that are consistent with this purpose and, in principle, can justify the infringement of aboriginal title. Whether a particular measure or government act can be explained by reference to one of those objectives, however, is ultimately a question of fact that will have to be examined on a case-by-case basis.

The manner in which the fiduciary duty operates with respect to the second stage of the justification test — both with respect to the standard of scrutiny and the particular form that the fiduciary duty will take — will be a function of the nature of aboriginal title. Three aspects of aboriginal title are relevant here. First, aboriginal title encompasses the right to exclusive use and occupation of land; second, aboriginal title encompasses the right to choose to what uses land can be put, subject to the

à des fins alimentaires par opposition à celui de pêcher à des fins commerciales), l'importance de la pêche pour le bien-être économique et matériel de la bande en question, ainsi que les critères appliqués par l'État, par exemple, dans la répartition des permis de pêche commerciale entre les divers usagers.

(iii) Justification et titre aborigène

Les principes généraux régissant la justification, qui ont été exposés dans *Sparrow* et précisés dans *Gladstone*, s'appliquent à l'égard des atteintes au titre aborigène. Depuis *Gladstone*, l'éventail d'objectifs législatifs qui peuvent justifier une atteinte au titre aborigène est assez large. La plupart de ces objectifs peuvent être rattachés à la conciliation de l'occupation antérieure de l'Amérique du Nord par les peuples autochtones avec l'affirmation de la souveraineté de la Couronne, ce qui nécessite la reconnaissance du fait que les «sociétés autochtones distinctives existent au sein d'une communauté sociale, politique et économique plus large, communauté dont elles font partie» (au par. 73). À mon avis, l'extension de l'agriculture, de la foresterie, de l'exploitation minière et de l'énergie hydroélectrique, le développement économique général de l'intérieur de la Colombie-Britannique, la protection de l'environnement et des espèces menacées d'extinction, ainsi que la construction des infrastructures et l'implantation des populations requises par ces fins, sont des types d'objectifs compatibles avec cet objet et qui, en principe, peuvent justifier une atteinte à un titre aborigène. Toutefois, la question de savoir si une mesure ou un acte donné du gouvernement peut être expliqué par référence à l'un de ces objectifs est, en dernière analyse, une question de fait qui devra être examinée au cas par cas.

La façon dont l'obligation de fiduciaire s'applique relativement à la deuxième étape du critère de justification — du point de vue tant de la norme d'examen que de la forme particulière que prendra l'obligation de fiduciaire — est fonction de la nature du titre aborigène. Trois aspects du titre aborigène sont pertinents en l'espèce. Premièrement, le titre aborigène comprend le droit d'utiliser et d'occuper de façon exclusive les terres visées; deuxièmement, le titre aborigène comprend le droit

165

166

ultimate limit that those uses cannot destroy the ability of the land to sustain future generations of aboriginal peoples; and third, that lands held pursuant to aboriginal title have an inescapable economic component.

de choisir les utilisations qui peuvent être faites de ces terres, sous réserve de la restriction ultime que ces usages ne sauraient détruire la capacité de ces terres d'assurer la subsistance des générations futures de peuples autochtones; troisièmement, les terres détenues en vertu d'un titre aborigène ont une composante économique inéluctable.

167

The exclusive nature of aboriginal title is relevant to the degree of scrutiny of the infringing measure or action. For example, if the Crown's fiduciary duty requires that aboriginal title be given priority, then it is the altered approach to priority that I laid down in *Gladstone* which should apply. What is required is that the government demonstrate (at para. 62) "both that the process by which it allocated the resource and the actual allocation of the resource which results from that process reflect the prior interest" of the holders of aboriginal title in the land. By analogy with *Gladstone*, this might entail, for example, that governments accommodate the participation of aboriginal peoples in the development of the resources of British Columbia, that the conferral of fee simples for agriculture, and of leases and licences for forestry and mining reflect the prior occupation of aboriginal title lands, that economic barriers to aboriginal uses of their lands (e.g., licensing fees) be somewhat reduced. This list is illustrative and not exhaustive. This is an issue that may involve an assessment of the various interests at stake in the resources in question. No doubt, there will be difficulties in determining the precise value of the aboriginal interest in the land and any grants, leases or licences given for its exploitation. These difficult economic considerations obviously cannot be solved here.

La nature exclusive du titre aborigène est pertinente pour ce qui est du degré d'examen auquel est soumis la mesure ou l'acte qui porte atteinte au titre. Par exemple, si l'obligation de fiduciaire de la Couronne exige de donner préséance au titre aborigène, alors c'est l'approche modifiée concernant l'ordre de priorité que j'ai exposée dans *Gladstone* qui devrait être appliquée. Il faut que le gouvernement démontre «que les modalités de répartition de la ressource ainsi que la répartition elle-même reflètent l'intérêt prioritaire» (au par. 62) des détenteurs du titre aborigène sur les terres visées. Par analogie avec l'arrêt *Gladstone*, cela pourrait vouloir dire, par exemple, que les gouvernements prennent en compte la participation des peuples autochtones à la mise en valeur des ressources de la Colombie-Britannique, que la concession de fiefs simples pour l'agriculture ainsi que de baux et permis à des fins d'exploitation forestière ou minière tiennent compte de l'occupation antérieure des terres visées par un titre aborigène, que les obstacles économiques à l'utilisation par les autochtones de leurs terres (p. ex. le paiement de droits pour l'obtention de permis) soient sensiblement réduits. Cette liste n'est pas complète et n'est donnée qu'à titre indicatif. Il s'agit d'une question qui pourrait obliger à soupeser les divers intérêts concernés par les ressources en cause. Il ne fait aucun doute qu'il sera difficile de déterminer la valeur exacte de l'intérêt des autochtones dans le territoire et des concessions, baux ou permis accordés en vue de l'exploitation de celui-ci. Il va de soi que ces difficiles questions d'ordre économique ne peuvent être tranchées en l'espèce.

168

Moreover, the other aspects of aboriginal title suggest that the fiduciary duty may be articulated in a manner different than the idea of priority. This point becomes clear from a comparison between aboriginal title and the aboriginal right to fish for

En outre, les autres aspects du titre aborigène tendent à indiquer que l'obligation de fiduciaire peut se manifester autrement que par l'idée de priorité. Ce point devient clair quand on compare le titre aborigène et le droit ancestral de pêcher à

food in *Sparrow*. First, aboriginal title encompasses within it a right to choose to what ends a piece of land can be put. The aboriginal right to fish for food, by contrast, does not contain within it the same discretionary component. This aspect of aboriginal title suggests that the fiduciary relationship between the Crown and aboriginal peoples may be satisfied by the involvement of aboriginal peoples in decisions taken with respect to their lands. There is always a duty of consultation. Whether the aboriginal group has been consulted is relevant to determining whether the infringement of aboriginal title is justified, in the same way that the Crown's failure to consult an aboriginal group with respect to the terms by which reserve land is leased may breach its fiduciary duty at common law: *Guerin*. The nature and scope of the duty of consultation will vary with the circumstances. In occasional cases, when the breach is less serious or relatively minor, it will be no more than a duty to discuss important decisions that will be taken with respect to lands held pursuant to aboriginal title. Of course, even in these rare cases when the minimum acceptable standard is consultation, this consultation must be in good faith, and with the intention of substantially addressing the concerns of the aboriginal peoples whose lands are at issue. In most cases, it will be significantly deeper than mere consultation. Some cases may even require the full consent of an aboriginal nation, particularly when provinces enact hunting and fishing regulations in relation to aboriginal lands.

Second, aboriginal title, unlike the aboriginal right to fish for food, has an inescapably economic aspect, particularly when one takes into account the modern uses to which lands held pursuant to aboriginal title can be put. The economic aspect of aboriginal title suggests that compensation is relevant to the question of justification as well, a possibility suggested in *Sparrow* and which I repeated in *Gladstone*. Indeed, compensation for breaches

des fins alimentaires qui était visé dans *Sparrow*. Premièrement, le titre aborigène comprend le droit de choisir les utilisations qui peuvent être faites d'une parcelle de territoire. À l'opposé, le droit ancestral de pêcher à des fins alimentaires ne comporte pas le même élément discrétionnaire. Cet aspect du titre aborigène indique qu'il est possible de respecter les rapports de fiduciaire entre la Couronne et les peuples autochtones en faisant participer les peuples autochtones à la prise des décisions concernant leurs terres. Il y a toujours obligation de consultation. La question de savoir si un groupe autochtone a été consulté est pertinente pour décider si l'atteinte au titre aborigène est justifiée, au même titre que le fait pour la Couronne de ne pas consulter un groupe autochtone au sujet des conditions auxquelles des terres d'une réserve sont cédées à bail peut constituer un manquement à l'obligation de fiduciaire de celle-ci en common law: *Guerin*. La nature et l'étendue de l'obligation de consultation dépendront des circonstances. Occasionnellement, lorsque le manquement est moins grave ou relativement mineur, il ne s'agira de rien de plus que la simple obligation de discuter des décisions importantes qui seront prises au sujet des terres détenues en vertu d'un titre aborigène. Évidemment, même dans les rares cas où la norme minimale acceptable est la consultation, celle-ci doit être menée de bonne foi, dans l'intention de tenir compte réellement des préoccupations des peuples autochtones dont les terres sont en jeu. Dans la plupart des cas, l'obligation exigera beaucoup plus qu'une simple consultation. Certaines situations pourraient même exiger l'obtention du consentement d'une nation autochtone, particulièrement lorsque des provinces prennent des règlements de chasse et de pêche visant des territoires autochtones.

Deuxièmement, contrairement au droit ancestral de pêcher à des fins alimentaires, le titre aborigène a inévitablement une dimension économique, particulièrement quand on tient compte des utilisations qui peuvent être faites aujourd'hui des terres détenues en vertu d'un titre aborigène. La dimension économique du titre aborigène montre que l'indemnisation est également un facteur pertinent à l'égard de la question de la justification, possibilité

of fiduciary duty are a well-established part of the landscape of aboriginal rights: *Guerin*. In keeping with the duty of honour and good faith on the Crown, fair compensation will ordinarily be required when aboriginal title is infringed. The amount of compensation payable will vary with the nature of the particular aboriginal title affected and with the nature and severity of the infringement and the extent to which aboriginal interests were accommodated. Since the issue of damages was severed from the principal action, we received no submissions on the appropriate legal principles that would be relevant to determining the appropriate level of compensation of infringements of aboriginal title. In the circumstances, it is best that we leave those difficult questions to another day.

D. *Has a claim to self-government been made out by the appellants?*

170

In the courts below, considerable attention was given to the question of whether s. 35(1) can protect a right to self-government, and if so, what the contours of that right are. The errors of fact made by the trial judge, and the resultant need for a new trial, make it impossible for this Court to determine whether the claim to self-government has been made out. Moreover, this is not the right case for the Court to lay down the legal principles to guide future litigation. The parties seem to have acknowledged this point, perhaps implicitly, by giving the arguments on self-government much less weight on appeal. One source of the decreased emphasis on the right to self-government on appeal is this Court's judgment *Pamajewon*. There, I held that rights to self-government, if they existed, cannot be framed in excessively general terms. The appellants did not have the benefit of my judgment at trial. Unsurprisingly, as counsel for the Wet'suwet'en specifically concedes, the appellants advanced the right to self-government in very

évoquée dans l'arrêt *Sparrow* et que j'ai répétée dans *Gladstone*. De fait, l'indemnisation des manquements à l'obligation de fiduciaire est un aspect bien établi du domaine des droits ancestraux: *Guerin*. Conformément à l'obligation de la Couronne d'agir de bonne foi et honorablement, il sera généralement nécessaire de verser une juste indemnité en cas d'atteinte à un titre aborigène. Le montant de l'indemnité payable variera en fonction de la nature du titre aborigène touché, de la nature et de la gravité de l'atteinte et de la mesure dans laquelle les intérêts des autochtones ont été pris en compte. Comme la question des dommages-intérêts a été dissociée de l'action principale, aucune observation ne nous a été présentée relativement aux principes juridiques appropriés qui seraient pertinents pour déterminer l'indemnité qui devrait être versée pour les atteintes au titre aborigène. Dans les circonstances, il est préférable que nous attendions une autre occasion pour examiner ces questions complexes.

D. *Les appelants ont-ils établi le bien-fondé de leur revendication de l'autonomie gouvernementale?*

Devant les juridictions inférieures, on s'est longuement attardé à la question de savoir si le par. 35(1) peut protéger le droit à l'autonomie gouvernementale et, dans l'affirmative, quels sont les contours de ce droit. En raison des erreurs de fait commises par le juge de première instance, et de la nécessité de tenir un nouveau procès qui en a découlé, il est impossible pour notre Cour de décider si le bien-fondé de la revendication de l'autonomie gouvernementale a été établi. De plus, il ne s'agit pas d'un cas qui se prête à la formulation par la Cour des principes juridiques devant guider l'instruction d'autres affaires. Les parties semblent avoir reconnu ce point, peut-être implicitement, en accordant beaucoup moins d'importance en appel aux arguments relatifs à l'autonomie gouvernementale. L'arrêt *Pamajewon* de notre Cour est une raison pour laquelle une moins grande importance a été attachée au droit à l'autonomie gouvernementale en appel. Dans cet arrêt, j'ai conclu que les droits relatifs à l'autonomie gouvernementale, s'ils existent, ne peuvent pas être exprimés en termes excessivement généraux. Au moment du procès,

broad terms, and therefore in a manner not cognizable under s. 35(1).

The broad nature of the claim at trial also led to a failure by the parties to address many of the difficult conceptual issues which surround the recognition of aboriginal self-government. The degree of complexity involved can be gleaned from the *Report of the Royal Commission on Aboriginal Peoples*, which devotes 277 pages to the issue. That report describes different models of self-government, each differing with respect to their conception of territory, citizenship, jurisdiction, internal government organization, etc. We received little in the way of submissions that would help us to grapple with these difficult and central issues. Without assistance from the parties, it would be imprudent for the Court to step into the breach. In these circumstances, the issue of self-government will fall to be determined at trial.

E. *Did the province have the power to extinguish aboriginal rights after 1871, either under its own jurisdiction or through the operation of s. 88 of the Indian Act?*

(1) Introduction

For aboriginal rights to be recognized and affirmed by s. 35(1), they must have existed in 1982. Rights which were extinguished by the sovereign before that time are not revived by the provision. In a federal system such as Canada's, the need to determine whether aboriginal rights have been extinguished raises the question of which level of government has jurisdiction to do so. In the context of this appeal, that general question becomes three specific ones. First, there is the question whether the province of British Columbia, from the time it joined Confederation in 1871, until the entrenchment of s. 35(1) in 1982, had the

les appelants n'avaient évidemment pas pris connaissance de mon jugement dans cet arrêt rendu ultérieurement. Il n'est donc pas étonnant, comme l'admet explicitement l'avocat des Wet'suwet'en, que les appelants aient plaidé le droit à l'autonomie gouvernementale en termes très généraux et, par conséquent, d'une manière incompatible avec le par. 35(1).

Le caractère général de la revendication présentée au procès a également fait en sorte que les parties n'ont pas abordé bon nombre des difficiles questions conceptuelles que soulève la reconnaissance de l'autonomie gouvernementale des autochtones. Le *Rapport de la Commission royale sur les peuples autochtones*, qui consacre 304 pages à cette question, donne une bonne idée de sa complexité. Ce rapport présente divers modèles d'autonomie gouvernementale, tous différents les uns des autres, notamment en ce qui concerne le territoire, la citoyenneté, la compétence et l'organisation gouvernementale interne. On nous a présenté peu d'observations propres à nous aider à résoudre ces questions fondamentales et difficiles. Sans l'aide des parties, il serait imprudent pour la Cour de s'avancer sur ce terrain. Dans ces circonstances, la question de l'autonomie gouvernementale sera tranchée au procès.

E. *La province avait-elle, après 1871, le pouvoir d'éteindre des droits ancestraux soit par l'exercice de sa propre compétence soit par l'effet de l'art. 88 de la Loi sur les Indiens?*

(1) Introduction

Pour qu'un droit ancestral soit reconnu et confirmé par le par. 35(1), il devait exister en 1982. Cette disposition ne fait pas revivre des droits qui avaient été éteints par le souverain avant cette date. Dans un régime fédéral comme celui qui existe au Canada, la nécessité de déterminer si des droits ancestraux ont été éteints oblige à se demander lequel des niveaux de gouvernement a compétence pour le faire. Dans le contexte du présent pourvoi, cette question générale se subdivise en trois questions particulières. Premièrement, il y a la question de savoir si la province de la Colombie-Britannique, depuis son entrée dans la fédération

171

172

jurisdiction to extinguish the rights of aboriginal peoples, including aboriginal title, in that province. Second, if the province was without such jurisdiction, another question arises — whether provincial laws which were not in pith and substance aimed at the extinguishment of aboriginal rights could have done so nevertheless if they were laws of general application. The third and final question is whether a provincial law, which could otherwise not extinguish aboriginal rights, be given that effect through referential incorporation by s. 88 of the *Indian Act*.

(2) Primary Jurisdiction

¹⁷³ Since 1871, the exclusive power to legislate in relation to “Indians, and Lands reserved for the Indians” has been vested with the federal government by virtue of s. 91(24) of the *Constitution Act, 1867*. That head of jurisdiction, in my opinion, encompasses within it the exclusive power to extinguish aboriginal rights, including aboriginal title.

“Lands reserved for the Indians”

¹⁷⁴ I consider the second part of this provision first, which confers jurisdiction to the federal government over “Lands reserved for the Indians”. The debate between the parties centred on whether that part of s. 91(24) confers jurisdiction to legislate with respect to aboriginal title. The province’s principal submission is that “Lands reserved for the Indians” are lands which have been specifically set aside or designated for Indian occupation, such as reserves. However, I must reject that submission, because it flies in the face of the judgment of the Privy Council in *St. Catherine’s Milling*. One of the issues in that appeal was the federal jurisdiction to accept the surrender of lands held pursuant to aboriginal title. It was argued that the federal government, at most, had jurisdiction over “Indian Reserves”. Lord Watson, speaking for the Privy Council, rejected this argument, stating that had the intention been to restrict s. 91(24) in this way,

en 1871 jusqu’à la constitutionnalisation du par. 35(1) en 1982, avait compétence pour éteindre, dans la province, les droits des peuples autochtones, y compris le titre aborigène. Deuxièmement, si elle n’avait pas compétence pour le faire, il faut alors se demander si les lois provinciales qui ne visaient pas, de par leur essence même, à éteindre des droits ancestraux ont quand même pu le faire si elles étaient des lois d’application générale. La troisième et dernière question consiste à décider si une loi provinciale qui ne pourrait par ailleurs pas éteindre des droits ancestraux pourrait se voir reconnaître cet effet par incorporation par renvoi en application de l’art. 88 de la *Loi sur les Indiens*.

(2) Compétence principale

Depuis 1871, le pouvoir exclusif de légiférer sur «les Indiens et les terres réservées aux Indiens» appartient au gouvernement fédéral en vertu du par. 91(24) de la *Loi constitutionnelle de 1867*. Ce chef de compétence comprend, selon moi, le pouvoir exclusif d’éteindre les droits ancestraux, y compris le titre aborigène.

«Les terres réservées aux Indiens»

Je vais d’abord examiner la deuxième partie de cette disposition, c’est-à-dire celle qui attribue au gouvernement fédéral compétence sur les «terres réservées aux Indiens». Le débat entre les parties a porté sur la question de savoir si cette partie du par. 91(24) confère le pouvoir de légiférer relativement au titre aborigène. Le principal argument invoqué par la province est que les «terres réservées aux Indiens» sont des terres qui ont été expressément mises de côté ou désignées pour être occupées par les Indiens, par exemple les réserves. Je dois toutefois rejeter cet argument parce qu’il va à l’encontre du jugement rendu par le Conseil privé dans l’affaire *St. Catherine’s Milling*. L’une des questions en litige dans ce pourvoi concernait le pouvoir du gouvernement fédéral d’accepter la cession de terres détenues en vertu d’un titre aborigène. On prétendait que le gouvernement fédéral avait tout au plus compétence sur les «réserves

specific language to this effect would have been used. He accordingly held that (at p. 59):

... the words actually used are, according to their natural meaning, sufficient to include all lands reserved, upon any terms or conditions, for Indian occupation.

Lord Watson's reference to "all lands" encompasses not only reserve lands, but lands held pursuant to aboriginal title as well. Section 91(24), in other words, carries with it the jurisdiction to legislate in relation to aboriginal title. It follows, by implication, that it also confers the jurisdiction to extinguish that title.

The province responds by pointing to the fact that underlying title to lands held pursuant to aboriginal title vested with the provincial Crown pursuant to s. 109 of the *Constitution Act, 1867*. In its submission, this right of ownership carried with it the right to grant fee simples which, by implication, extinguish aboriginal title, and so by negative implication excludes aboriginal title from the scope of s. 91(24). The difficulty with the province's submission is that it fails to take account of the language of s. 109, which states in part that:

109. All Lands, Mines, Minerals, and Royalties belonging to the several Provinces of Canada . . . at the Union . . . shall belong to the several Provinces . . . subject to any Trusts existing in respect thereof, and to any Interest other than that of the Province in the same.

Although that provision vests underlying title in provincial Crowns, it qualifies provincial ownership by making it subject to the "any Interest other than that of the Province in the same". In *St. Catherine's Milling*, the Privy Council held that aboriginal title was such an interest, and rejected the argument that provincial ownership operated as a limit on federal jurisdiction. The net effect of that decision, therefore, was to separate the ownership of lands held pursuant to aboriginal title from jurisdiction over those lands. Thus, although on surrender of aboriginal title the province would

indiennes». S'exprimant au nom du Conseil privé, Lord Watson a rejeté cet argument, déclarant que si le législateur avait voulu limiter le par. 91(24) de cette façon, il l'aurait dit en termes exprès. Lord Watson a donc statué ainsi (à la p. 59):

[TRADUCTION] . . . les mots employés dans les faits sont, d'après leur sens naturel, suffisants pour englober toutes les terres qui sont réservées, à quelque condition que ce soit, pour être occupées par les Indiens.

L'expression «toutes les terres» utilisée par lord Watson englobe non seulement les terres des réserves, mais aussi celles détenues en vertu d'un titre aborigène. En d'autres termes, le par. 91(24) accorde le pouvoir de légiférer relativement au titre aborigène. Il s'ensuit, par implication, qu'il accorde également le pouvoir d'éteindre ce titre.

La province a répondu en faisant remarquer que le titre sous-jacent sur les terres détenues en vertu d'un titre aborigène a été attribué à la Couronne provinciale par l'art. 109 de la *Loi constitutionnelle de 1867*. Selon la province, ce droit de propriété emportait le droit d'accorder des fiefs simples éteignant par implication le titre aborigène, et il a donc pour conséquence d'exclure le titre aborigène de la portée du par. 91(24). Le problème que pose cet argument de la province est qu'il ne tient pas compte du texte de l'art. 109, qui dit en partie ce qui suit:

109. Les terres, mines, minéraux et redevances appartenant aux différentes provinces du Canada [. . .] lors de l'Union [. . .] appartiendront aux différentes provinces [. . .] sous réserve des fiducies existantes et de tout intérêt autre que celui de la province à cet égard.

Même si cette disposition accorde aux couronnes provinciales le titre sous-jacent, elle limite ce droit de propriété provincial en le subordonnant à «tout intérêt autre que celui de la province à cet égard». Dans l'arrêt *St. Catherine's Milling*, le Conseil privé a statué que le titre aborigène constituait un tel intérêt et a rejeté l'argument selon lequel le droit de propriété des provinces avait pour effet de limiter la compétence du gouvernement fédéral. Concrètement, cet arrêt a donc eu pour effet de dissocier le droit de propriété relatif aux terres détenues en vertu d'un titre aborigène de la compé-

take absolute title, jurisdiction to accept surrenders lies with the federal government. The same can be said of extinguishment — although on extinguishment of aboriginal title, the province would take complete title to the land, the jurisdiction to extinguish lies with the federal government.

tence exercée à l'égard de ces terres. Par conséquent, même si la province obtient un titre absolu en cas de cession d'un titre aborigène, le pouvoir d'accepter les cessions appartient au gouvernement fédéral. La même affirmation peut être faite au sujet de l'extinction: même si la province obtient un titre absolu sur les terres visées au moment de l'extinction d'un titre aborigène, le pouvoir d'éteindre ce titre appartient au gouvernement fédéral.

176

I conclude with two remarks. First, even if the point were not settled, I would have come to the same conclusion. The judges in the court below noted that separating federal jurisdiction over Indians from jurisdiction over their lands would have a most unfortunate result — the government vested with primary constitutional responsibility for securing the welfare of Canada's aboriginal peoples would find itself unable to safeguard one of the most central of native interests — their interest in their lands. Second, although the submissions of the parties and my analysis have focussed on the question of jurisdiction over aboriginal title, in my opinion, the same reasoning applies to jurisdiction over any aboriginal right which relates to land. As I explained earlier, *Adams* clearly establishes that aboriginal rights may be tied to land but nevertheless fall short of title. Those relationships with the land, however, may be equally fundamental to aboriginal peoples and, for the same reason that jurisdiction over aboriginal title must vest with the federal government, so too must the power to legislate in relation to other aboriginal rights in relation to land.

Je termine par deux remarques. Premièrement, même si ce point n'avait pas été tranché, je serais parvenu à la même conclusion. Les juges de la juridiction inférieure ont souligné que le fait de dissocier la compétence du gouvernement fédéral à l'égard des Indiens et sa compétence à l'égard des terres indiennes produirait un résultat très regrettable: en effet, comme le gouvernement fédéral est investi par la Constitution de la responsabilité principale de garantir le bien-être des peuples autochtones du Canada, il se verrait dans l'impossibilité de protéger l'un des droits les plus fondamentaux des autochtones — savoir leur droit à leurs terres. Deuxièmement, même si les observations des parties et mon analyse étaient axés sur la question de la compétence à l'égard du titre aborigène, je suis d'avis que le même raisonnement s'applique à la compétence à l'égard de tout droit ancestral se rapportant à des terres. Comme je l'ai expliqué précédemment, l'arrêt *Adams* a clairement établi que des droits ancestraux peuvent être rattachés à un territoire sans constituer un titre. Cependant, ces divers rapports avec un territoire peuvent être tout aussi fondamentaux pour les peuples autochtones et, pour la même raison il doit être investi de la compétence à l'égard du titre aborigène, le gouvernement fédéral doit être investi du pouvoir de légiférer sur les autres droits ancestraux se rapportant au territoire.

“Indians”

«Les Indiens»

177

The extent of federal jurisdiction over Indians has not been definitively addressed by this Court. We have not needed to do so because the *vires* of federal legislation with respect to Indians, under the division of powers, has never been at issue. The cases which have come before the Court under

Notre Cour ne s'est pas prononcée définitivement sur l'étendue de la compétence du gouvernement fédéral à l'égard des Indiens. Elle n'a pas eu besoin de le faire parce que la validité des dispositions fédérales concernant les Indiens, dans le contexte du partage des pouvoirs, n'a jamais été en

s. 91(24) have implicated the question of jurisdiction over Indians from the other direction — whether provincial laws which on their face apply to Indians intrude on federal jurisdiction and are inapplicable to Indians to the extent of that intrusion. As I explain below, the Court has held that s. 91(24) protects a “core” of Indianness from provincial intrusion, through the doctrine of interjurisdictional immunity.

It follows, at the very least, that this core falls within the scope of federal jurisdiction over Indians. That core, for reasons I will develop, encompasses aboriginal rights, including the rights that are recognized and affirmed by s. 35(1). Laws which purport to extinguish those rights therefore touch the core of Indianness which lies at the heart of s. 91(24), and are beyond the legislative competence of the provinces to enact. The core of Indianness encompasses the whole range of aboriginal rights that are protected by s. 35(1). Those rights include rights in relation to land; that part of the core derives from s. 91(24)’s reference to “Lands reserved for the Indians”. But those rights also encompass practices, customs and traditions which are not tied to land as well; that part of the core can be traced to federal jurisdiction over “Indians”. Provincial governments are prevented from legislating in relation to both types of aboriginal rights.

(3) Provincial Laws of General Application

The vesting of exclusive jurisdiction with the federal government over Indians and Indian lands under s. 91(24), operates to preclude provincial laws in relation to those matters. Thus, provincial laws which single out Indians for special treatment are *ultra vires*, because they are in relation to Indians and therefore invade federal jurisdiction: see *R. v. Sutherland*, [1980] 2 S.C.R. 451. However, it

cause. Les affaires qui ont été soumises à la Cour relativement au par. 91(24) ont plutôt soulevé la question de la compétence à l’égard des Indiens du point de vue opposé: c’est-à-dire en posant la question de savoir si des lois provinciales qui, à première vue, s’appliquent aux Indiens, empiètent sur la compétence du gouvernement fédéral, et si ces lois sont inapplicables aux Indiens dans la mesure de cet empiètement. Comme je l’explique plus loin, la Cour a statué que, par le principe de l’exclusivité des compétences, le par. 91(24) protège l’«essentiel» de la quiddité indienne, ou indianité, contre les empiètements provinciaux.

Il s’ensuit, à tout le moins, que l’essentiel de l’indianité relève de la compétence du fédéral sur les Indiens. Pour des raisons que je vais exposer, l’essentiel de l’indianité englobe les droits ancestraux, y compris les droits reconnus et confirmés par le par. 35(1). Les lois censées éteindre ces droits portent donc atteinte à l’essentiel de l’indianité qui est au cœur du par. 91(24), et elles outrepassent la compétence législative des provinces. L’essentiel de l’indianité englobe toute la gamme des droits ancestraux protégés par le par. 35(1). Ces droits comprennent les droits se rapportant à un territoire; cette partie de l’essentiel de l’indianité découle de la référence aux «terres réservées aux Indiens» au par. 91(24). Cependant, ces droits comprennent également les coutumes, pratiques et traditions qui ne se rattachent pas à un territoire; cette partie de l’essentiel de l’indianité découle de la compétence du fédéral à l’égard des «Indiens». Il est interdit aux gouvernements provinciaux de faire des lois portant sur ces deux types de droits ancestraux.

(3) Lois provinciales d’application générale

Le fait que le gouvernement fédéral soit investi, en vertu du par. 91(24), de la compétence exclusive à l’égard des Indiens et des terres réservées aux Indiens a pour effet d’empêcher l’édiction de lois provinciales sur ces questions. Par conséquent, les lois provinciales qui visent à imposer un traitement spécial aux Indiens sont inconstitutionnelles parce qu’elles se rapportent aux Indiens et empiètent donc sur la compétence du fédéral: voir *R. c. Sutherland*, [1980] 2 R.C.S. 451. Toutefois, il

178

179

is a well-established principle that (*Four B Manufacturing Ltd.*, *supra*, at p. 1048):

The conferring upon Parliament of exclusive legislative competence to make laws relating to certain classes of persons does not mean that the totality of these persons' rights and duties comes under primary federal competence to the exclusion of provincial laws of general application.

In other words, notwithstanding s. 91(24), provincial laws of general application apply *proprio vigore* to Indians and Indian lands. Thus, this Court has held that provincial labour relations legislation (*Four B*) and motor vehicle laws (*R. v. Francis*, [1988] 1 S.C.R. 1025), which purport to apply to all persons in the province, also apply to Indians living on reserves.

existe un principe bien établi selon lequel (*Four B Manufacturing Ltd.*, précité, à la p. 1048):

L'attribution au Parlement de la compétence législative exclusive de faire des lois relatives à certaines catégories de personnes ne signifie pas que la totalité des droits et obligations de ces personnes relève de la compétence fédérale principale à l'exclusion des lois provinciales d'application générale.

En d'autres termes, malgré le par. 91(24), les lois provinciales d'application générale s'appliquent *proprio vigore* (d'elles-mêmes) aux Indiens et aux terres indiennes. Ainsi, notre Cour a statué que les lois provinciales sur les relations de travail (*Four B*) et les lois sur les véhicules à moteur (*R. c. Francis*, [1988] 1 R.C.S. 1025), qui sont censées s'appliquer à toutes les personnes dans la province, s'appliquent également aux Indiens qui vivent dans des réserves.

180

What must be answered, however, is whether the same principle allows provincial laws of general application to extinguish aboriginal rights. I have come to the conclusion that a provincial law of general application could not have this effect, for two reasons. First, a law of general application cannot, by definition, meet the standard which has been set by this Court for the extinguishment of aboriginal rights without being *ultra vires* the province. That standard was laid down in *Sparrow*, *supra*, at p. 1099, as one of "clear and plain" intent. In that decision, the Court drew a distinction between laws which extinguished aboriginal rights, and those which merely regulated them. Although the latter types of laws may have been "necessarily inconsistent" with the continued exercise of aboriginal rights, they could not extinguish those rights. While the requirement of clear and plain intent does not, perhaps, require that the Crown "use language which refers expressly to its extinguishment of aboriginal rights" (*Gladstone*, *supra*, at para. 34), the standard is still quite high. My concern is that the only laws with the sufficiently clear and plain intention to extinguish aboriginal rights would be laws in relation to Indians and Indian lands. As a result, a provincial law could never, *proprio vigore*, extinguish aboriginal

Il faut toutefois répondre à la question de savoir si ce même principe autorise l'extinction de droits ancestraux par des lois provinciales d'application générale. Je suis arrivé à la conclusion qu'une loi provinciale d'application générale ne peut pas avoir cet effet, et ce pour deux raisons. Première-ment, par définition, une loi provinciale d'application générale ne peut pas, sans être *ultra vires*, respecter la norme qui a été établie par notre Cour à l'égard de l'extinction des droits ancestraux. Cette norme, qui a été énoncée dans *Sparrow*, précité, à la p. 1099, est celle de l'intention «claire et expresse». Dans cet arrêt, la Cour a établi une distinction entre les règles de droit qui éteignent des droits ancestraux et celles qui se bornent à les réglementer. Quoique des règles de droit appartenant à cette deuxième catégorie aient pu être «nécessairement incompatibles» avec l'exercice continu de droits ancestraux, elles ne pouvaient pas éteindre ces droits. Même si l'obligation de manifester une intention claire et expresse n'exige peut-être pas que le gouvernement «utilise des mots faisant explicitement état de l'extinction de droits ancestraux» (*Gladstone*, précité, au par. 34), la norme est néanmoins très élevée. Le problème que je vois est que les seules règles de droit capables d'exprimer une intention suffisamment claire et expresse d'éteindre des droits ancestraux seraient des règles de droit ayant trait aux Indiens et aux

rights, because the intention to do so would take the law outside provincial jurisdiction.

Second, as I mentioned earlier, s. 91(24) protects a core of federal jurisdiction even from provincial laws of general application, through the operation of the doctrine of interjurisdictional immunity. That core has been described as matters touching on “Indianness” or the “core of Indian-ness” (*Dick*, *supra*, at pp. 326 and 315; also see *Four B*, *supra*, at p. 1047 and *Francis*, *supra*, at pp. 1028-29). The core of Indianness at the heart of s. 91(24) has been defined in both negative and positive terms. Negatively, it has been held to not include labour relations (*Four B*) and the driving of motor vehicles (*Francis*). The only positive formulation of Indianness was offered in *Dick*. Speaking for the Court, Beetz J. assumed, but did not decide, that a provincial hunting law did not apply *proprio vigore* to the members of an Indian band to hunt and because those activities were “at the centre of what they do and what they are” (at p. 320). But in *Van der Peet*, I described and defined the aboriginal rights that are recognized and affirmed by s. 35(1) in a similar fashion, as protecting the occupation of land and the activities which are integral to the distinctive aboriginal culture of the group claiming the right. It follows that aboriginal rights are part of the core of Indianness at the heart of s. 91(24). Prior to 1982, as a result, they could not be extinguished by provincial laws of general application.

(4) Section 88 of the Indian Act

Provincial laws which would otherwise not apply to Indians *proprio vigore*, however, are allowed to do so by s. 88 of the *Indian Act*, which incorporates by reference provincial laws of gen-

terres indiennes. En conséquence, une règle de droit provinciale ne pourrait jamais éteindre d'elle-même des droits ancestraux, puisque l'existence de cette intention aurait pour effet d'exclure cette règle de la compétence de la province.

Deuxièmement, comme je l'ai mentionné plus tôt, le par. 91(24) protège l'essentiel de la compétence du fédéral, même contre les lois provinciales d'application générale, par l'application du principe de l'exclusivité des compétences. Il a été dit que ces éléments essentiels se rapportent à des questions touchant à la «quiddité indienne» ou au «fondement même de la quiddité indienne» (*Dick*, précité, aux pp. 326 et 315; voir aussi *Four B*, précité, à la p. 1047 et *Francis*, précité, aux pp. 1028 et 1029). On a défini l'essentiel de l'indianité qui est au cœur du par. 91(24) en disant ce qu'il est et en disant ce qu'il n'est pas. Dans des exemples de cette dernière situation, on a statué que l'essentiel de l'indianité ne comprenait pas les relations de travail (*Four B*) ni la conduite de véhicules à moteur (*Francis*). Le seul exemple concret d'indianité a été donné dans l'arrêt *Dick*. S'exprimant au nom de la Cour, le juge Beetz a tenu pour acquis, sans toutefois se prononcer sur la question, qu'une loi provinciale en matière de chasse ne s'appliquait pas d'elle-même aux membres d'une bande indienne lorsqu'ils chassent parce que ces activités étaient «au cœur même de leur existence et de leur être» (à la p. 320). Dans *Van der Peet*, toutefois, j'ai décrit et défini les droits ancestraux reconnus et confirmés par le par. 35(1) d'une manière analogue, c'est-à-dire comme des droits protégeant l'occupation des terres et les activités qui font partie intégrante de la culture distinctive autochtone du groupe qui revendique le droit. Il s'ensuit que les droits ancestraux font partie de l'essentiel de l'indianité qui est au cœur du par. 91(24). Par conséquent, avant 1982, ces droits ne pouvaient pas être éteints par des lois provinciales d'application générale.

(4) L'article 88 de la Loi sur les Indiens

Cependant, des règles de droit provinciales qui autrement ne s'appliqueraient pas d'elles-mêmes aux Indiens peuvent le faire par l'effet de l'art. 88 de la *Loi sur les Indiens*, qui incorpore par renvoi

eral application: *Dick, supra*, at pp. 326-27; *Derrickson v. Derrickson*, [1986] 1 S.C.R. 285, at p. 297; *Francis, supra*, at pp. 1030-31. However, it is important to note, in Professor Hogg's words, that s. 88 does not "invigorate" provincial laws which are invalid because they are in relation to Indians and Indian lands (*Constitutional Law of Canada* (3rd ed. 1992), at p. 676; also see *Dick, supra*, at p. 322). What this means is that s. 88 extends the effect of provincial laws of general application which cannot apply to Indians and Indian lands because they touch on the Indianness at the core of s. 91(24). For example, a provincial law which regulated hunting may very well touch on this core. Although such a law would not apply to aboriginal people *proprio vigore*, it would still apply through s. 88 of the *Indian Act*, being a law of general application. Such laws are enacted to conserve game and for the safety of all.

les lois provinciales d'application générale: *Dick*, précité, aux pp. 326 et 327; *Derrickson c. Derrickson*, [1986] 1 R.C.S. 285, à la p. 297; *Francis*, précité, aux pp. 1030 et 1031. Toutefois, il est important de souligner, dans les mots du professeur Hogg, que l'art. 88 ne [TRADUCTION] «revigore» pas des règles de droit provinciales qui sont invalides parce qu'elles se rapportent aux Indiens et aux terres indiennes (*Constitutional Law of Canada* (3^e éd. 1992), à la p. 676; voir aussi *Dick*, précité, à la p. 322). Ce que cela veut dire, c'est que l'art. 88 étend l'effet des lois provinciales d'application générale qui ne sauraient autrement s'appliquer aux Indiens et aux terres indiennes parce qu'elles touchent à la quiddité indienne qui est au cœur du par. 91(24). Par exemple, une règle de droit provinciale réglementant la chasse peut très bien affecter ce fondement. Même si une telle loi ne s'appliquait pas d'elle-même aux peuples autochtones, elle le ferait néanmoins sous l'effet de l'art. 88 de la *Loi sur les Indiens*, en tant que loi d'application générale. De telles lois sont adoptées pour la conservation du gibier et pour assurer la sécurité de tous.

183

The respondent B.C. Crown argues that since such laws are *intra vires* the province, and applicable to aboriginal persons, s. 88 could allow provincial laws to extinguish aboriginal rights. I reject this submission, for the simple reason that s. 88 does not evince the requisite clear and plain intent to extinguish aboriginal rights. The provision states in full:

88. Subject to the terms of any treaty and any other Act of Parliament, all laws of general application from time to time in force in any province are applicable to and in respect of Indians in the province, except to the extent that those laws are inconsistent with this Act or any order, rule, regulation or by-law made thereunder, and except to the extent that those laws make provision for any matter for which provision is made by or under this Act.

I see nothing in the language of the provision which even suggests the intention to extinguish aboriginal rights. Indeed, the explicit reference to treaty rights in s. 88 suggests that the provision

La province intimée prétend que, comme les provinces ont le pouvoir d'adopter de telles lois et que celles-ci sont applicables aux autochtones, l'art. 88 pourrait autoriser l'extinction de droits ancestraux par des règles de droit provinciales. Je rejette cet argument pour la simple raison que l'intention claire et expresse requise pour l'extinction de droits ancestraux ne ressort pas de l'art. 88. Cette disposition est rédigée ainsi:

88. Sous réserve des dispositions de quelque traité et de quelque autre loi fédérale, toutes les lois d'application générale et en vigueur dans une province sont applicables aux Indiens qui s'y trouvent et à leur égard, sauf dans la mesure où ces lois sont incompatibles avec la présente loi ou quelque arrêté, ordonnance, règle, règlement ou règlement administratif pris sous son régime, et sauf dans la mesure où ces lois contiennent des dispositions sur toute question prévue par la présente loi ou sous son régime.

Selon moi, il n'y a rien dans le texte de cette disposition qui suggère même l'intention d'éteindre des droits ancestraux. De fait, l'allusion explicite aux droits issus de traités à l'art. 88 indique que cette

was clearly not intended to undermine aboriginal rights.

VI. Conclusion and Disposition

For the reasons I have given above, I would allow the appeal in part, and dismiss the cross-appeal. Reluctantly, I would also order a new trial.

I conclude with two observations. The first is that many aboriginal nations with territorial claims that overlap with those of the appellants did not intervene in this appeal, and do not appear to have done so at trial. This is unfortunate, because determinations of aboriginal title for the Gitksan and Wet'suwet'en will undoubtedly affect their claims as well. This is particularly so because aboriginal title encompasses an exclusive right to the use and occupation of land, i.e., to the exclusion of both non-aboriginals and members of other aboriginal nations. It may, therefore, be advisable if those aboriginal nations intervened in any new litigation.

Finally, this litigation has been both long and expensive, not only in economic but in human terms as well. By ordering a new trial, I do not necessarily encourage the parties to proceed to litigation and to settle their dispute through the courts. As was said in *Sparrow*, at p. 1105, s. 35(1) "provides a solid constitutional base upon which subsequent negotiations can take place". Those negotiations should also include other aboriginal nations which have a stake in the territory claimed. Moreover, the Crown is under a moral, if not a legal, duty to enter into and conduct those negotiations in good faith. Ultimately, it is through negotiated settlements, with good faith and give and take on all sides, reinforced by the judgments of this Court, that we will achieve what I stated in *Van der Peet*, *supra*, at para. 31, to be a basic purpose of s. 35(1) — "the reconciliation of the pre-existence

disposition n'est manifestement pas censée porter atteinte aux droits ancestraux.

VI. Conclusion et dispositif

Pour les motifs que je viens d'exposer, je suis d'avis d'accueillir le pourvoi en partie et de rejeter le pourvoi incident. À regret, j'ordonnerais également la tenue d'un nouveau procès.

Je vais conclure par deux observations. En premier lieu, de nombreuses nations autochtones dont les revendications territoriales chevauchent celles des appelants ne sont pas intervenues dans le présent pourvoi et ne paraissent pas l'avoir fait en première instance. Cette situation est malheureuse parce que les décisions relatives au titre aborigène des Gitksan et des Wet'suwet'en auront indubitablement un effet sur les revendications de ces autres nations autochtones, particulièrement en raison du fait que le titre aborigène comprend le droit exclusif d'utiliser et d'occuper des terres, c'est-à-dire de le faire à l'exclusion des non-autochtones et des membres d'autres nations autochtones. Par conséquent, peut-être serait-il souhaitable que ces autres nations autochtones interviennent dans une nouvelle instance.

En second lieu, la présente affaire a été longue et coûteuse, non seulement sur le plan financier mais aussi sur le plan humain. En ordonnant la tenue d'un nouveau procès, je n'encourage pas nécessairement les parties à introduire une instance et à régler leur différend devant les tribunaux. Comme il a été dit dans *Sparrow*, à la p. 1105, le par. 35(1) «procure [...] un fondement constitutionnel solide à partir duquel des négociations ultérieures peuvent être entreprises». Devraient également participer à ces négociations les autres nations autochtones qui ont un intérêt dans le territoire revendiqué. En outre, la Couronne a l'obligation morale, sinon légale, d'entamer et de mener ces négociations de bonne foi. En fin de compte, c'est au moyen de règlements négociés — toutes les parties négociant de bonne foi et faisant les compromis qui s'imposent — processus renforcé par les arrêts de notre Cour, que nous pourrions réaliser ce que, dans *Van der Peet*, précité, au par. 31, j'ai déclaré être l'objet fondamental du par. 35(1),

184

185

186

of aboriginal societies with the sovereignty of the Crown”. Let us face it, we are all here to stay.

The reasons of *La Forest* and *L’Heureux-Dubé JJ.* were delivered by

187 LA FOREST J. — I have read the reasons of the Chief Justice, and while I agree with his conclusion, I disagree with various aspects of his reasons and in particular, with the methodology he uses to prove that aboriginal peoples have a general right of occupation of certain lands (often referred to as “aboriginal title”).

188 I begin by considering why a new trial is necessary in this case. It is true, as the Chief Justice points out, that the amalgamation of the appellants’ individual claims represents a defect in the pleadings and, technically speaking, this prevents us from considering the merits of the case. However, in my view, there is a more substantive problem with the pleadings in this case. Before this Court, the appellants sought a declaration of “aboriginal title” but attempted, in essence, to prove that they had complete control over the territory in question. The appellants effectively argued on appeal, as they did at trial, that by virtue of their social and land tenure systems — consisting of Chief authority, Houses, feasts, crests, and totem poles — they acquired an absolute interest in the claimed territory, including ownership of and jurisdiction over the land. The problem with this approach is that it requires proof of governance and control as opposed to proof of general occupation of the affected land. Only the latter is the *sine qua non* of “aboriginal title”. It follows that what the appellants sought by way of declaration from this Court and what they set out to prove by way of the evidence were two different matters. In light of this substantive defect in the pleadings, a new trial

c’est-à-dire «concilier la préexistence des sociétés autochtones et la souveraineté de Sa Majesté». Il faut se rendre à l’évidence, nous sommes tous ici pour y rester.

Version française des motifs des juges *La Forest* et *L’Heureux-Dubé* rendus par

LE JUGE LA FOREST — J’ai lu les motifs du Juge en chef et, bien que je souscrive à sa conclusion, je suis en désaccord avec divers aspects de ses motifs et en particulier avec la méthode dont il se sert pour établir que les peuples autochtones ont un droit général d’occupation de certaines terres (souvent appelé «titre aborigène»).

Je vais d’abord examiner les raisons pour lesquelles la tenue d’un nouveau procès est nécessaire en l’espèce. Il est vrai, comme le souligne le Juge en chef, que la fusion des revendications individuelles des appelants constitue un vice affectant les actes de procédure et que, sur le plan de la forme, cela nous empêche d’examiner le fond de l’affaire. Cependant, à mon avis, les actes de procédure en l’espèce posent un problème encore plus substantiel. En effet, même si, devant notre Cour, les appelants ont sollicité un jugement déclarant l’existence d’un «titre aborigène», ils ont essentiellement tenté d’établir qu’ils exerçaient un contrôle complet sur le territoire en question. En appel, les appelants ont effectivement prétendu, comme ils l’avaient fait en première instance, qu’en vertu de leur régime de tenure foncière et de leur organisation sociale — constituée de l’autorité des chefs, de maisons, de célébrations, d’armoiries et de mâts totémiques — ils ont acquis un intérêt absolu sur le territoire revendiqué, y compris la propriété des terres visées et la compétence sur celles-ci. Le problème que pose cette approche est qu’elle exige qu’on prouve la gestion et le contrôle des terres visées, plutôt que l’occupation générale de celles-ci. Or, seule la preuve du deuxième fait est la condition *sine qua non* de l’existence du «titre aborigène». Il s’ensuit que ce que les appelants ont demandé à notre Cour de leur reconnaître, par voie de jugement déclaratoire, et ce qu’ils se sont efforcés d’établir par la preuve, étaient deux choses différentes. Étant donné ce vice substantiel entachant les actes de procédure, la tenue d’un

should be ordered to permit a reassessment of the matter on the basis of these reasons.

In my view, the foundation of “aboriginal title” was succinctly described by Judson J. in *Calder v. Attorney-General of British Columbia*, [1973] S.C.R. 313, where, at p. 328, he stated: “the fact is that when the settlers came, the Indians were there, organized in societies and occupying the land as their forefathers had done for centuries. This is what Indian title means” Relying in part on Judson J.’s remarks, Dickson J. (as he then was) wrote in *Guerin v. The Queen*, [1984] 2 S.C.R. 335, at p. 382, that aboriginal peoples have a “legal right to occupy and possess certain lands, the ultimate title to which is in the Crown”. As well, in *Canadian Pacific Ltd. v. Paul*, [1988] 2 S.C.R. 654, this Court stated, at p. 678: “The inescapable conclusion from the Court’s analysis of Indian title up to this point is that the Indian interest in land is truly *sui generis*. It is more than the right to enjoyment and occupancy although . . . it is difficult to describe what more in traditional property law terminology”. More recently, Judson J.’s views were reiterated in *R. v. Van der Peet*, [1996] 2 S.C.R. 507. There Lamer C.J. wrote for the majority, at para. 30, that the doctrine of aboriginal rights (one aspect of which is “aboriginal title”) arises from “one simple fact: when Europeans arrived in North America, aboriginal peoples were already here, living in communities on the land, and participating in distinctive cultures, as they had done for centuries” (emphasis in original).

It follows from these cases that the aboriginal right of possession is derived from the historic occupation and use of ancestral lands by aboriginal peoples. Put another way, “aboriginal title” is based on the continued occupation and use of the

nouveau procès doit être ordonnée pour permettre le réexamen de la question, sur le fondement des présents motifs.

À mon avis, le fondement du «titre aborigène» a été décrit de façon succincte par le juge Judson, dans *Calder c. Procureur général de la Colombie-Britannique*, [1973] R.C.S. 313, où il a dit, à la p. 328: «mais il reste que lorsque les colons sont arrivés, les Indiens étaient déjà là, ils étaient organisés en sociétés et occupaient les terres comme leurs ancêtres l’avaient fait depuis des siècles. C’est ce que signifie le titre indien» S’appuyant en partie sur les commentaires du juge Judson, le juge Dickson (plus tard juge en chef) a écrit, dans *Guerin c. La Reine*, [1984] 2 R.C.S. 335, à la p. 382, que les peuples autochtones ont le «droit, en *common law*, d’occuper et de posséder certaines terres dont le titre de propriété est finalement détenu par Sa Majesté». En outre, dans *Canadien Pacifique Ltée c. Paul*, [1988] 2 R.C.S. 654, notre Cour a dit ceci, à la p. 678: «La conclusion inéluctable qui se dégage jusqu’à maintenant de l’analyse que la Cour a faite du titre indien est que les Indiens ont un véritable droit *sui generis* sur leurs terres. Il s’agit de quelque chose de plus qu’un droit de jouissance et d’occupation bien [. . .] [qu’]il soit difficile de décrire ce en quoi consiste ce quelque chose de plus au moyen de la terminologie traditionnelle du droit des biens». Plus récemment, les vues du juge Judson ont été réitérées dans *R. c. Van der Peet*, [1996] 2 R.C.S. 507. Dans cet arrêt, le juge en chef Lamer a écrit, au nom des juges majoritaires, au par. 30, que la doctrine des droits ancestraux (dont un aspect est le «titre aborigène») découle d’«un fait bien simple: quand les Européens sont arrivés en Amérique du Nord, les peuples autochtones s’y trouvaient déjà, ils vivaient en collectivités sur ce territoire et participaient à des cultures distinctives, comme ils l’avaient fait pendant des siècles» (souligné dans l’original).

Il ressort de ces arrêts que le droit de possession ancestral d’un peuple autochtone découle de l’occupation et de l’utilisation historiques par celui-ci de ses terres ancestrales. Autrement dit, le «titre aborigène» se fonde sur l’occupation et l’utilisa-

land as part of the aboriginal peoples' traditional way of life. This *sui generis* interest is not equated with fee simple ownership; nor can it be described with reference to traditional property law concepts. The best description of "aboriginal title", as set out above, is a broad and general one derived from Judson J.'s pronouncements in *Calder*, *supra*. Adopting the same approach, Dickson J. wrote in *Guerin*, *supra*, that the aboriginal right of occupancy is further characterized by two principal features. First, this *sui generis* interest in the land is personal in that it is generally inalienable except to the Crown. Second, in dealing with this interest, the Crown is subject to a fiduciary obligation to treat aboriginal peoples fairly. Dickson J. went on to conclude, at p. 382, that "[a]ny description of Indian title which goes beyond these two features is both unnecessary and potentially misleading". I share his views and am therefore reluctant to define more precisely the "right [of aboriginal peoples] to continue to live on their lands as their forefathers had lived"; see *Calder*, at p. 328.

tion ininterrompues des terres visées par le peuple autochtone dans le cadre de son mode de vie traditionnel. Ce droit *sui generis* n'équivaut pas à la propriété en fief simple et il ne peut pas non plus être décrit au moyen des concepts traditionnels du droit des biens. Comme il a été expliqué plus tôt, la meilleure façon de décrire le «titre aborigène» consiste à le décrire en termes larges et généraux, à partir des déclarations du juge Judson dans *Calder*, précité. Adoptant la même approche, le juge Dickson a écrit, dans *Guerin*, précité, que le droit d'occupation ancestral comportait en outre deux caractéristiques principales. Premièrement, ce droit *sui generis* est personnel en ce sens qu'il est généralement inaliénable, sauf en faveur de la Couronne. Deuxièmement, dans ses opérations concernant ce droit, la Couronne est assujettie à une obligation de fiduciaire, savoir celle de traiter équitablement les peuples autochtones. Le juge Dickson poursuit en concluant, à la p. 382, que «[t]oute description du titre indien qui va plus loin que ces deux éléments est superflue et risque d'induire en erreur». Je partage les vues exprimées par le juge Dickson et je suis en conséquence réticent à définir avec plus de précision le «droit [des peuples autochtones] de continuer à vivre sur leurs terres comme l'avaient fait leurs ancêtres»; *Calder*, à la p. 328.

191 The approach I adopt, in defining the aboriginal right of occupancy, is also a highly contextual one. More specifically, I find it necessary to make a distinction between: (1) the recognition of a general right to occupy and possess ancestral lands; and (2) the recognition of a discrete right to engage in an aboriginal activity in a particular area. I defined the latter in *R. v. Côté*, [1996] 3 S.C.R. 139, at para. 97, as "the traditional use, by a tribe of Indians, that has continued from pre-contact times of a particular area for a particular purpose". The issue in *Côté*, as in *Van der Peet*, was whether the use of a particular fishing spot was really an aspect of the aboriginal peoples' way of life in pre-contact times; see also in the *Van der Peet* trilogy *R. v. Gladstone*, [1996] 2 S.C.R. 723, and *R. v. N.T.C. Smokehouse Ltd.*, [1996] 2 S.C.R. 672. In all those cases, the fishing rights asserted by the aboriginal claimants were not associated with a

Le point de vue que j'adopte pour définir le droit d'occupation ancestral est, de plus, éminemment contextuel. Plus précisément, j'estime qu'il est nécessaire de faire la distinction entre les deux aspects suivants: (1) la reconnaissance d'un droit général d'occuper et de posséder des terres ancestrales; (2) la reconnaissance d'un droit distinct d'exercer une activité autochtone dans une région particulière. J'ai défini ce dernier aspect dans *R. c. Côté*, [1996] 3 R.C.S. 139, au par. 97, comme étant «l'utilisation traditionnelle — remontant avant l'arrivée des Européens — que fait une tribu indienne d'un territoire donné, à une fin particulière». La question qui était en litige dans *Côté*, tout comme dans *Van der Peet*, était de savoir si l'utilisation d'un site de pêche particulier constituait véritablement un aspect du mode de vie des peuples autochtones avant le contact avec les Européens; voir également les autres arrêts de la

more general occupancy of the affected land. By contrast, the present case deals with a general claim to occupy and possess vast tracts of territory (58,000 square kilometres). This type of generalized land claim is not merely a bundle of discrete aboriginal rights to engage in specific activities. Rather, it is, as the Chief Justice states, at para. 111, the “right to use land for a variety of activities, not all of which need be aspects of practices, customs and traditions which are integral to the distinctive cultures of aboriginal societies”. These land-based activities are, of course, related to the aboriginal society’s habits and mode of life.

trilogie *Van der Peet*, soit *R. c. Gladstone*, [1996] 2 R.C.S. 723, et *R. c. N.T.C. Smokehouse Ltd.*, [1996] 2 R.C.S. 672. Dans toutes ces affaires, les droits de pêche revendiqués par les autochtones n’étaient pas liés à une occupation plus générale des terres visées. À l’opposé, le présent cas concerne une revendication générale visant le droit d’occuper et de posséder de vastes étendues de territoire (58 000 kilomètres carrés). Ce type de revendication territoriale générale n’est pas qu’un simple faisceau de droits ancestraux distincts autorisant l’exercice d’activités particulières. Il s’agit plutôt, comme le dit le Juge en chef, au par. 111, du «droit d’utiliser des terres pour y exercer différentes activités qui ne doivent pas nécessairement toutes être des aspects de coutumes, pratiques et traditions faisant partie intégrante des cultures distinctives des sociétés autochtones». Il va de soi que ces activités — qui se rattachent au territoire — sont liées aux habitudes et au mode de vie de la société autochtone.

I note, as well, that in defining the nature of “aboriginal title”, one should generally not be concerned with statutory provisions and regulations dealing with reserve lands. In *Guerin*, *supra*, this Court held that the interest of an Indian band in a reserve is derived from, and is of the same nature as, the interest of an aboriginal society in its traditional tribal lands. Accordingly, the Court treated the aboriginal interest in reserve lands as one of occupation and possession while recognizing that the underlying title to those lands was in the Crown. It was not decided in *Guerin*, *supra*, and it by no means follows, that specific statutory provisions governing reserve lands should automatically apply to traditional tribal lands. For this reason, I am unable to assume that specific “reserve” provisions of the *Indian Act*, R.S.C., 1985, c. I-5, and the *Indian Oil and Gas Act*, R.S.C., 1985, c. I-7, apply to huge tracts of land which are subject to an aboriginal right of occupancy.

En outre, je souligne qu’en définissant la nature du «titre aborigène» il faut généralement faire abstraction des dispositions législatives et réglementaires concernant les terres des réserves. Dans *Guerin*, précité, notre Cour a statué que le droit que possède une bande indienne sur une réserve découle du droit de la société autochtone sur ses terres tribales traditionnelles, et qu’il est de la même nature que celui-ci. Par conséquent, notre Cour a considéré que le droit des autochtones sur les terres des réserves était un droit d’occupation et de possession, tout en reconnaissant que le titre de propriété sous-jacent de ces terres appartenait à la Couronne. Il n’a pas été décidé, dans *Guerin*, précité, et il ne s’ensuit pas que les dispositions législatives particulières régissant les terres des réserves s’appliquent automatiquement aux terres tribales traditionnelles. Pour cette raison, je ne peux pas présumer que les dispositions particulières concernant les «réserves» prévues par la *Loi sur les Indiens*, L.R.C. (1985), ch. I-5, et par la *Loi sur le pétrole et le gaz des terres indiennes*, L.R.C. (1985), ch. I-7, s’appliquent à d’énormes étendues de territoire faisant l’objet d’un droit d’occupation ancestral.

193 I turn next to this Court's decision in *Van der Peet*, *supra*, where the Chief Justice identified a number of factors essential to the recognition of aboriginal rights under s. 35(1) of the *Constitution Act, 1982*. As I have already indicated, the *Van der Peet* trilogy dealt with activity-based discrete rights and, more specifically, with fishing activities that were carried out in the face of statutory prohibitions. By contrast, the present case deals with a generalized claim over vast tracts of territory, a claim which is itself the foundation for particular rights and activities. Moreover, I agree with the appellants that this generalized claim should not be defined as merely a compendium of aboriginal rights, each of which must meet the test set out in *Van der Peet*. Nonetheless, I am of the view that the "key" factors identified in *Van der Peet*, namely precision, specificity, continuity, and centrality are still met by my approach in the present case.

Je vais maintenant examiner l'arrêt de notre Cour *Van der Peet*, précité, dans lequel le Juge en chef a fait état d'un certain nombre de facteurs essentiels à la reconnaissance des droits ancestraux visés au par. 35(1) de la *Loi constitutionnelle de 1982*. Comme je l'ai déjà indiqué, la trilogie *Van der Peet* concernait des droits distincts liés à certaines activités et, plus précisément, des activités de pêche exercées en dépit d'interdictions prévues par la loi. À l'opposé, le présent cas porte sur une revendication générale visant de vastes étendues de territoire, revendication qui constitue elle-même le fondement de droits et d'activités de nature particulière. En outre, je suis d'accord avec les appelants que cette revendication générale ne doit pas être définie comme un simple ensemble de droits ancestraux, dont chacun doit satisfaire au critère énoncé dans *Van der Peet*. Néanmoins, je suis d'avis que l'approche que je retiens en l'espèce satisfait quand même aux facteurs «clés» mentionnés dans *Van der Peet*, savoir la précision, la spécificité, la continuité et le caractère fondamental.

194 First, it is clear that the nature of an aboriginal claim must be identified precisely with regard to particular practices, customs and traditions. As already mentioned, when dealing with a claim of "aboriginal title", the court will focus on the occupation and use of the land as part of the aboriginal society's traditional way of life. In pragmatic terms, this means looking at the manner in which the society used the land to live, namely to establish villages, to work, to get to work, to hunt, to travel to hunting grounds, to fish, to get to fishing pools, to conduct religious rites, etc. These uses, although limited to the aboriginal society's traditional way of life, may be exercised in a contemporary manner; see *R. v. Sparrow*, [1990] 1 S.C.R. 1075, at p. 1099.

Premièrement, il est clair que la nature d'une revendication autochtone doit être rattachée précisément à des coutumes, pratiques et traditions particulières. Comme il a été mentionné plus tôt, le tribunal qui examine la revendication d'un «titre aborigène» se demande principalement si l'occupation et l'utilisation des terres visées faisaient partie du mode de vie traditionnel de la société autochtone concernée. En pratique, cela veut dire qu'il doit se demander de quelle manière les membres de la société utilisaient les terres visées pour vivre, c'est-à-dire pour y établir des villages, pour y travailler, pour se rendre à leur travail, pour y chasser, pour se rendre à leurs territoires de chasse, pour y pêcher, pour se rendre à leurs sites de pêche, pour y accomplir des cérémonies religieuses et pour d'autres fins. Ces utilisations, quoiqu'elles se limitent au mode de vie traditionnel de la société autochtone, peuvent être exercées de manière contemporaine; voir *R. c. Sparrow*, [1990] 1 R.C.S. 1075, à la p. 1099.

195 Second, it is self-evident that an aboriginal society asserting the right to live on its ancestral lands

Deuxièmement, il est évident que la société autochtone qui revendique le droit de vivre sur ses

must specify the area which has been continuously used and occupied. That is, the general boundaries of the occupied territory should be identified. I recognize, however, that when dealing with vast tracts of territory it may be impossible to identify geographical limits with scientific precision. Nonetheless, this should not preclude the recognition of a general right of occupation of the affected land. Rather, the drawing of exact territorial limits can be settled by subsequent negotiations between the aboriginal claimants and the government.

Some would also argue that specificity requires exclusive occupation and use of the land by the aboriginal group in question. The way I see it, exclusivity means that an aboriginal group must show that a claimed territory is indeed its ancestral territory and not the territory of an unconnected aboriginal society. On the other hand, I recognize the possibility that two or more aboriginal groups may have occupied the same territory and used the land communally as part of their traditional way of life. In cases where two or more groups have accommodated each other in this way, I would not preclude a finding of joint occupancy. The result may be different, however, in cases where one dominant aboriginal group has merely permitted other groups to use the territory or where definite boundaries were established and maintained between two aboriginal groups in the same territory.

Third, as indicated above, the aboriginal right of possession is based on the continued occupation and use of traditional tribal lands. The Chief Justice concludes that the relevant time period for the establishment of “aboriginal title” is the time at which the Crown asserted sovereignty over the affected land. I agree that in the context of generalized land claims, it is more appropriate, from a practical and theoretical standpoint, to consider the time of sovereignty as opposed to the time of first contact between an aboriginal society and Europeans. However, I am also of the view that the date

terres ancestrales doit spécifier le territoire qui a été utilisé et occupé de façon ininterrompue. En d’autres mots, les limites générales du territoire occupé doivent être indiquées. Cependant, je conviens que, lorsqu’il est question de vastes étendues de territoire, il peut se révéler impossible de déterminer les limites géographiques avec une précision scientifique. Néanmoins, cela ne doit pas faire obstacle à la reconnaissance d’un droit général d’occupation des terres visées. En effet, le tracé de limites territoriales précises peut être établi dans le cadre de négociations subséquentes entre les revendicateurs autochtones et le gouvernement.

Certains pourraient également prétendre que la notion de spécificité exige l’occupation et l’utilisation exclusives des terres visées par le groupe autochtone concerné. À mon avis, l’exclusivité signifie que le groupe autochtone doit établir que le territoire qu’il revendique est, en fait, son territoire ancestral et non celui d’une autre société autochtone avec laquelle il n’a aucun lien. Par ailleurs, je reconnais que deux groupes autochtones ou plus peuvent avoir occupé le même territoire et l’avoir utilisé en commun dans le cadre de leur mode de vie traditionnel. Dans les cas où deux groupes ou plus auraient convenu de tels arrangements, je n’écarterais pas la possibilité de conclure à l’existence d’une occupation conjointe. Toutefois, il est possible que le résultat soit différent dans les cas où un groupe autochtone dominant aurait simplement permis à d’autres groupes d’utiliser le territoire en cause ou lorsque deux groupes autochtones ont établi et maintenu entre eux des limites précises au sein du même territoire.

Troisièmement, comme il a été indiqué précédemment, le droit de possession ancestral se fonde sur l’occupation et l’utilisation ininterrompues de terres tribales traditionnelles. Le Juge en chef conclut que le moment pertinent pour établir l’existence du «titre aborigène» est celui de l’affirmation par la Couronne de sa souveraineté sur le territoire visé. Je suis d’accord avec le fait que, dans le contexte de revendications territoriales générales, il convient d’avantage, aussi bien d’un point de vue pratique que théorique, de tenir compte du moment de l’affirmation de la souveraineté plutôt que du

196

197

of sovereignty may not be the only relevant moment to consider. For instance, there may have been aboriginal settlements in one area of the province but, after the assertion of sovereignty, the aboriginal peoples may have all moved to another area where they remained from the date of sovereignty until the present. This relocation may have been due to natural causes, such as the flooding of villages, or to clashes with European settlers. In these circumstances, I would not deny the existence of “aboriginal title” in that area merely because the relocation occurred post-sovereignty. In other words, continuity may still exist where the present occupation of one area is connected to the pre-sovereignty occupation of another area.

moment du premier contact entre la société autochtone et des Européens. Cependant, je suis également d’avis qu’il est possible que la date de l’affirmation de la souveraineté ne soit pas le seul moment pertinent dont il faille tenir compte. Par exemple, il est possible que des peuples autochtones se soient établis dans une partie de la province, mais que, après l’affirmation de la souveraineté, ils aient tous migré vers une autre région, où ils se trouvent toujours depuis cette date. Il se peut que cette migration ait été provoquée par des causes naturelles telle l’inondation des villages ou par des affrontements avec des colons européens. Dans de telles circonstances, je n’écarterais pas l’existence d’un «titre aborigène» sur cette région pour la seule raison que la migration s’est produite après l’affirmation de la souveraineté. Autrement dit, il peut encore y avoir continuité lorsque l’occupation actuelle d’une région est liée à l’occupation d’une autre région avant l’affirmation de la souveraineté.

198

Also, on the view I take of continuity, I agree with the Chief Justice that it is not necessary for courts to have conclusive evidence of pre-sovereignty occupation. Rather, aboriginal peoples claiming a right of possession may provide evidence of present occupation as proof of prior occupation. Further, I agree that there is no need to establish an unbroken chain of continuity and that interruptions in occupancy or use do not necessarily preclude a finding of “title”. I would go further, however, and suggest that the presence of two or more aboriginal groups in a territory may also have an impact on continuity of use. For instance, one aboriginal group may have ceded its possession to subsequent occupants or merged its territory with that of another aboriginal society. As well, the occupancy of one aboriginal society may be connected to the occupancy of another society by conquest or exchange. In these circumstances, continuity of use and occupation, extending back to the relevant time, may very well be established;

En outre, compte tenu du point de vue que j’adopte à l’égard de la continuité, je suis d’accord avec le Juge en chef qu’il n’est pas nécessaire que les tribunaux disposent d’éléments de preuve concluants d’une occupation antérieure à l’affirmation de la souveraineté. En effet, les peuples autochtones qui revendiquent un droit de possession peuvent présenter des éléments de preuve de l’occupation actuelle du territoire visé pour établir son occupation antérieure. De plus, je conviens qu’il n’est pas nécessaire de faire la preuve d’une continuité parfaite et que le fait que l’occupation ou l’utilisation ait été marquée par des interruptions n’empêche pas de conclure à l’existence d’un «titre». Cependant, j’irais encore plus loin et suggérerais que la présence de deux groupes autochtones ou plus dans un territoire donné peut aussi avoir une incidence sur la continuité de l’utilisation. Par exemple, il est possible qu’un groupe autochtone ait cédé la possession de territoire à des occupants ultérieurs ou encore qu’il ait fusionné ce territoire avec celui d’une autre société autochtone. De même, l’occupation du territoire par une société autochtone peut être liée à l’occupation d’une autre société par voie de conquête ou d’échange. Dans de telles circonstances, la continuité de l’utilisation et de l’occupation du territoire

see Brian Slattey, “Understanding Aboriginal Rights” (1987), 66 *Can. Bar Rev.* 727, at p. 759.

Fourth, if aboriginal peoples continue to occupy and use the land as part of their traditional way of life, it necessarily follows that the land is of central significance to them. As already suggested, aboriginal occupancy refers not only to the presence of aboriginal peoples in villages or permanently settled areas. Rather, the use of adjacent lands and even remote territories to pursue a traditional mode of life is also related to the notion of occupancy. Viewed in this light, occupancy is part of aboriginal culture in a broad sense and is, therefore, absorbed in the notion of distinctiveness. To use the language of *Van der Peet*, proof of occupancy is proof of centrality.

I would also add that my approach regarding the nature of aboriginal occupancy is supported by the terms of the *Royal Proclamation, 1763*, R.S.C., 1985, App. II, No. 1. Although the *Proclamation* is not the sole source of “aboriginal title” in this country, it bears witness to the British policy towards aboriginal peoples which was based on respect for their right to occupy their ancestral lands; see *Sparrow*, *supra*, at p. 1103. Specifically, the *Proclamation* provides:

And We do further declare it to be Our Royal Will and Pleasure, for the present as aforesaid, to reserve under our Sovereignty, Protection, and Dominion, for the use of the said Indians, all the Lands and Territories not included within the Limits of Our said Three new Governments, or within the Limits of the Territory granted to the Hudson’s Bay Company, as also all the Lands and Territories lying to the Westward of the Sources of the Rivers which fall into the Sea from the West and North West as aforesaid.

In clear terms vast tracts of territory (including large portions of the area now comprising Ontario,

visé depuis la période pertinente peut très bien être établie; voir Brian Slattey, «Understanding Aboriginal Rights» (1987), 66 *R. du B. can.* 727, à la p. 759.

Quatrièmement, si des peuples autochtones continuent d’occuper et d’utiliser le territoire visé dans le cadre de leur mode de vie traditionnel, il s’ensuit nécessairement que ce territoire a une importance fondamentale pour eux. Comme il a été suggéré plus tôt, la notion d’occupation d’un territoire par des autochtones ne s’entend pas seulement de la présence de peuples autochtones dans des villages ou des établissements permanents. Est également visée par cette notion l’utilisation de terres adjacentes et même de territoires éloignés dans le cadre d’un mode de vie traditionnel. Vue sous cet angle, l’occupation constitue un aspect de la culture autochtone prise dans un sens large et s’intègre, par conséquent, à la notion de caractère distinctif. Pour reprendre le vocabulaire employé dans *Van der Peet*, la preuve de l’occupation est la preuve du caractère fondamental.

J’ajouterais également que l’approche que j’adopte relativement à la nature de l’occupation du territoire par des autochtones est étayée par le libellé de la *Proclamation royale de 1763*, L.R.C. (1985), app. II, n° 1. Bien que la *Proclamation* ne soit pas l’unique source du «titre aborigène» au pays, elle témoigne de la politique britannique envers les peuples autochtones, laquelle était fondée sur le respect de leur droit d’occuper leurs terres ancestrales; voir *Sparrow*, précité, à la p. 1103. Plus précisément, la *Proclamation* prévoit ce qui suit:

Nous déclarons de plus que c’est Notre plaisir royal ainsi que Notre volonté de réserver pour le présent, sous Notre souveraineté, Notre protection et Notre autorité, pour l’usage desdits sauvages, toutes les terres et tous les territoires non compris dans les limites de Nos trois gouvernements ni dans les limites du territoire concédé à la Compagnie de la baie d’Hudson, ainsi que toutes les terres et tous les territoires situés à l’ouest des sources des rivières qui de l’ouest et du nord-ouest vont se jeter dans la mer.

En termes clairs, de vastes étendues de territoire (y compris de larges portions du territoire qui

199

200

Quebec, and the prairie provinces) were reserved for aboriginal peoples. These huge tracts of land were by no means limited to villages or permanent settlements but were reserved more generally as “Hunting Grounds” and “for the use of the said Indians”. Aboriginal peoples had the right to possess the lands reserved for them and “not be molested or disturbed in the Possession” of such territory. In essence, the rights set out in the *Proclamation* — which were applied in principle to aboriginal peoples across the country — underlie the view I have taken of aboriginal occupancy; see *R. v. Wesley*, [1932] 4 D.L.R. 774 (Alta. S.C., App. Div.), at p. 787, and *R. v. Sikyea* (1964), 43 D.L.R. (2d) 150 (N.W.T.C.A.), *aff’d Sikyea v. The Queen*, [1964] S.C.R. 642.

comprend aujourd’hui l’Ontario, le Québec et les provinces des Prairies) ont été réservées pour l’usage des peuples autochtones. Ces vastes étendues de territoire n’étaient aucunement limitées aux villages ou aux établissements permanents, mais elles étaient plutôt réservées, de façon plus générale, comme «territoires de chasse» «pour l’usage desdits sauvages». Les peuples autochtones avaient le droit à la «possession entière et paisible» de ces territoires. Essentiellement, les droits énoncés dans la *Proclamation* — qui ont été appliqués en principe aux peuples autochtones dans l’ensemble du pays — sous-tendent le point de vue que j’ai adopté en ce qui concerne l’occupation du territoire par des autochtones; voir *R. c. Wesley*, [1932] 4 D.L.R. 774 (C.S. Alb., Div. app.), à la p. 787, et *R. c. Sikyea* (1964), 43 D.L.R. (2d) 150 (C.A.T.N.-O.), *conf. par Sikyea c. The Queen*, [1964] R.C.S. 642.

201

The analysis thus far has focussed on the nature of the aboriginal right to occupy and possess certain lands — a right recognized and affirmed under s. 35(1) of the *Constitution Act, 1982*. Nonetheless, as Dickson C.J. and I wrote in *Sparrow*, *supra*, at p. 1109: “Rights that are recognized and affirmed are not absolute”. Thus, government regulation can infringe upon aboriginal rights if it meets the test of justification under s. 35(1). It is important to emphasize as well that the approach adopted under s. 35(1) is a highly contextual one. This is also clear from the reasons I wrote jointly with Dickson C.J. in *Sparrow*, at p. 1111:

We wish to emphasize the importance of context and a case-by-case approach to s. 35(1). Given the generality of the text of the constitutional provision, and especially in light of the complexities of aboriginal history, society and rights, the contours of a justificatory standard must be defined in the specific factual context of each case.

Jusqu’à présent, l’analyse a porté principalement sur la nature du droit ancestral d’occuper et de posséder certaines terres — droit reconnu et confirmé au par. 35(1) de la *Loi constitutionnelle de 1982*. Néanmoins, comme le juge en chef Dickson et moi-même l’avons écrit dans *Sparrow*, précité, à la p. 1109: «Les droits qui sont reconnus et confirmés ne sont pas absolus». Par conséquent, des mesures de réglementation prises par le gouvernement peuvent porter atteinte aux droits ancestraux s’ils satisfont au critère de justification des atteintes aux droits visés au par. 35(1). Il est également important de souligner que la méthode adoptée à l’égard du par. 35(1) est éminemment contextuelle. Cela ressort d’ailleurs clairement des motifs que j’ai écrits conjointement avec le juge en chef Dickson dans l’arrêt *Sparrow*, à la p. 1111:

Nous tenons à souligner relativement au par. 35(1) l’importance du contexte et d’un examen cas par cas. Étant donné la généralité du texte de la disposition constitutionnelle en cause et compte tenu surtout des complexités que présentent l’histoire, la société et les droits des autochtones, les limites d’une norme justificative doivent être fixées dans le contexte factuel particulier de chaque cas.

202

In the context of the present case, I agree with the Chief Justice that the general economic development of the interior of British Columbia,

Dans le contexte de la présente affaire, je suis d’accord avec le Juge en chef que le développement économique général de l’intérieur de la

through agriculture, mining, forestry, and hydroelectric power, as well as the related building of infrastructure and settlement of foreign populations are valid legislative objectives that, in principle, satisfy the first part of the justification analysis.

Under the second part of the justification test, these legislative objectives are subject to accommodation of the aboriginal peoples' interests. This accommodation must always be in accordance with the honour and good faith of the Crown. Moreover, when dealing with a generalized claim over vast tracts of land, accommodation is not a simple matter of asking whether licences have been fairly allocated in one industry, or whether conservation measures have been properly implemented for a specific resource. Rather, the question of accommodation of "aboriginal title" is much broader than this. Certainly, one aspect of accommodation in this context entails notifying and consulting aboriginal peoples with respect to the development of the affected territory. Another aspect of accommodation is fair compensation. More specifically, in a situation of expropriation, one asks whether fair compensation is available to the aboriginal peoples; see *Sparrow, supra*, at p. 1119. Indeed, the treatment of "aboriginal title" as a compensable right can be traced back to the *Royal Proclamation, 1763*. The relevant portions of the *Proclamation* are as follows:

... such Parts of Our Dominions and Territories as, not having been ceded to or purchased by Us, are reserved to them [aboriginal peoples] or any of them, as their Hunting Grounds. . . .

We do, with the Advice of our Privy Council strictly enjoin and require, that no private Person do presume to make any purchase from the said Indians of any Lands reserved to the said Indians . . . but that, if at any Time any of the Said Indians should be inclined to dispose of the said Lands, the same shall be Purchased only for Us, in our Name. . . . [Emphasis added.]

Clearly, the *Proclamation* contemplated that aboriginal peoples would be compensated for the

Colombie-Britannique par l'agriculture, l'exploitation minière, la foresterie et l'énergie hydroélectrique, ainsi que la construction des infrastructures et l'implantation des populations requises par ce développement, sont des objectifs législatifs réguliers qui, en principe, satisfont au premier volet du critère de justification.

Dans le cadre du second volet de ce critère, ces objectifs législatifs doivent tenir compte des intérêts des peuples autochtones. Cette prise en compte doit toujours être faite conformément à l'obligation de la Couronne d'agir honorablement et de bonne foi. En outre, dans l'examen d'une revendication générale visant de vastes étendues de territoire, cette prise en compte ne consiste pas simplement à s'enquérir si des permis ont été délivrés de manière équitable dans un secteur d'activité donné ou si des mesures de conservation ont été régulièrement mises en œuvre à l'égard d'une ressource particulière. En effet, la question de la prise en compte du «titre aborigène» a une portée beaucoup plus large. L'un des aspects de cette prise en compte, dans un tel contexte, consiste certainement à informer et à consulter les peuples autochtones relativement au développement du territoire visé. Un autre aspect de la prise en compte est la question de la juste indemnisation. Plus précisément, en cas d'expropriation, il faut se demander si une juste indemnité est prévue pour les peuples autochtones; voir *Sparrow*, précité, à la p. 1119. De fait, l'idée que le «titre aborigène» est un droit donnant ouverture à indemnisation remonte à la *Proclamation royale de 1763*. Voici les passages pertinents de la *Proclamation*:

... des parties de Nos possessions et territoires qui ont été ni concédées ni achetées et ont été réservées pour ces tribus [les peuples autochtones] ou quelques-unes d'entre elles comme territoires de chasse . . .

Nous déclarons de l'avis de Notre Conseil privé, qu'il est strictement défendu à qui que ce soit d'acheter aux sauvages des terres qui leur sont réservées [. . .] cependant si quelques-uns des sauvages, un jour ou l'autre, devenaient enclins à se départir desdites terres, elles ne pourront être achetées que pour Nous, en Notre nom . . . [Je souligne.]

De toute évidence, la *Proclamation* prévoyait que les peuples autochtones seraient indemnisés pour

surrender of their lands; see also Slattery, "Understanding Aboriginal Rights", *supra*, at pp. 751-52. It must be emphasized, nonetheless, that fair compensation in the present context is not equated with the price of a fee simple. Rather, compensation must be viewed in terms of the right and in keeping with the honour of the Crown. Thus, generally speaking, compensation may be greater where the expropriation relates to a village area as opposed to a remotely visited area. I add that account must be taken of the interdependence of traditional uses to which the land was put.

la cession de leurs terres; voir également l'ouvrage de Slattery, «Understanding Aboriginal Rights», *loc. cit.*, aux pp. 751 et 752. Néanmoins, il convient de souligner que, dans le présent contexte, la juste indemnité ne peut être assimilée à la valeur d'un fief simple. L'indemnité doit plutôt être considérée en fonction du droit en cause et être propre à sauvegarder l'honneur de la Couronne. Ainsi, de façon générale, l'indemnité peut être plus importante lorsque l'expropriation touche un village et ses environs par opposition à une région peu fréquentée. J'ajoute qu'il faut tenir compte de l'interdépendance des utilisations traditionnelles faites du territoire visé.

204 In summary, in developing vast tracts of land, the government is expected to consider the economic well being of all Canadians. But the aboriginal peoples must not be forgotten in this equation. Their legal right to occupy and possess certain lands, as confirmed by s. 35(1) of the *Constitution Act, 1982*, mandates basic fairness commensurate with the honour and good faith of the Crown.

En résumé, on s'attend à ce que le gouvernement, dans le cadre du développement de vastes étendues de territoire, prenne en compte le bien-être économique de tous les Canadiens. Les peuples autochtones ne doivent cependant pas être oubliés dans cette prise en compte. Le droit que leur reconnaît la loi d'occuper et de posséder certaines terres, droit qui est confirmé par le par. 35(1) de la *Loi constitutionnelle de 1982*, commande que l'on fasse montre envers eux d'équité fondamentale, d'une manière qui soit compatible avec l'obligation de la Couronne d'agir honorablement et de bonne foi.

205 With regard to the issue of self-government, I conclude, as does the Chief Justice, that there was insufficient evidence before this Court to make any determination regarding this aspect of the appellants' claim.

En ce qui concerne la question de l'autonomie gouvernementale, je conclus, à l'instar du Juge en chef, que notre Cour ne dispose pas de suffisamment d'éléments de preuve pour statuer sur cet aspect de la demande des appelants.

206 As for the issue raised on the cross-appeal, I agree with the Chief Justice's conclusion. The respondent province had no authority to extinguish aboriginal rights either under the *Constitution Act, 1867* or by virtue of s. 88 of the *Indian Act*.

Quant à la question soulevée dans le pourvoi incident, je souscris à la conclusion du Juge en chef à cet égard. La province intimée n'avait pas le pouvoir d'éteindre des droits ancestraux en vertu de la *Loi constitutionnelle de 1867* ni par l'effet de l'art. 88 de la *Loi sur les Indiens*.

207 On a final note, I wish to emphasize that the best approach in these types of cases is a process of negotiation and reconciliation that properly considers the complex and competing interests at stake. This point was made by Lambert J.A. in the Court of Appeal, [1993] 5 W.W.R. 97, at pp. 379-80:

Enfin, je tiens à souligner que la meilleure approche dans ce genre d'affaires est un processus de négociation et de réconciliation qui prenne dûment en compte les intérêts complexes et opposés en jeu. Cette observation a été faite par le juge Lambert de la Cour d'appel, [1993] 5 W.W.R. 97, aux pp. 379 et 380:

So, in the end, the legal rights of the Indian people will have to be accommodated within our total society by political compromises and accommodations based in the first instance on negotiation and agreement and ultimately in accordance with the sovereign will of the community as a whole. The legal rights of the Gitksan and Wet'suwet'en peoples, to which this law suit is confined, and which allow no room for any approach other than the application of the law itself, and the legal rights of all aboriginal peoples throughout British Columbia, form only one factor in the ultimate determination of what kind of community we are going to have in British Columbia and throughout Canada in the years ahead. [Emphasis added.]

(See also *Report of the Royal Commission on Aboriginal Peoples* (1996), vol. 2 (*Restructuring the Relationship*), Part 2, at pp. 561-62.)

Accordingly, I would allow the appeal in part and order a new trial on the basis of the principles set out in these reasons. I would also dismiss the cross-appeal.

The following are the reasons delivered by

MCLACHLIN J. — I concur with the Chief Justice. I add that I am also in substantial agreement with the comments of Justice La Forest.

* * *

SCHEDULE 1

Appellants

DELGAMUUKW, also known as Earl Muldoe, suing on his own behalf and on behalf of all the members of the Houses of Delgamuukw and Haaxw

GISDAY WA, also known as Alfred Joseph, suing on his own behalf and on behalf of all the members of the House of Gisday Wa

NII KYAP, also known as Gerald Gunanoot, suing on his own behalf and on behalf of all the members of the House of Nii Kyap

[TRADUCTION] En fin de compte, il faudra donc tenir compte des droits reconnus par la loi aux Indiens au sein de l'ensemble de la société, au moyen de compromis politiques et de mesures d'adaptation qui seront fondés, au départ, sur la négociation d'accords, et qui devront, en dernière analyse, être conformes à la volonté souveraine de la collectivité toute entière. Les droits reconnus par la loi aux Gitksan et aux Wet'suwet'en, sur lesquels la présente action porte exclusivement et qui ne laissent de place à aucune autre approche que l'application de la loi elle-même, de même que les droits reconnus par la loi à tous les peuples autochtones de la Colombie-Britannique, ne constituent qu'un seul des facteurs qui détermineront, en définitive, quelle genre de collectivité nous aurons dans les années à venir, non seulement en Colombie-Britannique, mais partout au Canada. [Je souligne.]

(Voir également le *Rapport de la Commission royale sur les peuples autochtones* (1996), vol. 2 (*Une relation à redéfinir*), partie 2, aux pp. 561 et 562.)

En conséquence, je suis d'avis d'accueillir le pourvoi en partie et d'ordonner la tenue d'un nouveau procès sur le fondement des principes énoncés dans les présents motifs. Je suis également d'avis de rejeter le pourvoi incident.

Version française des motifs rendus par

LE JUGE MCLACHLIN — Je souscris aux motifs du Juge en chef. J'ajoute que je suis en outre largement en accord avec les commentaires du juge La Forest.

ON APPEAL FROM THE COURT OF APPEAL FOR
BRITISH COLUMBIA

*Crown — Honour of Crown — Duty to consult and
accommodate Aboriginal peoples — Whether Crown
has duty to consult and accommodate Aboriginal peo-
ples prior to making decisions that might adversely
affect their as yet unproven Aboriginal rights and title
claims — Whether duty extends to third party.*

For more than 100 years, the Haida people have claimed title to all the lands of Haida Gwaii and the waters surrounding it, but that title has not yet been legally recognized. The Province of British Columbia issued a “Tree Farm License” (T.F.L. 39) to a large forestry firm in 1961, permitting it to harvest trees in an area of Haida Gwaii designated as Block 6. In 1981, 1995 and 2000, the Minister replaced T.F.L. 39, and in 1999, the Minister approved a transfer of T.F.L. 39 to Weyerhaeuser Co. The Haida challenged in court these replacements and the transfer, which were made without their consent and, since at least 1994, over their objections. They asked that the replacements and transfer be set aside. The chambers judge dismissed the petition, but found that the government had a moral, not a legal, duty to negotiate with the Haida. The Court of Appeal reversed the decision, declaring that both the government and Weyerhaeuser Co. have a duty to consult with and accommodate the Haida with respect to harvesting timber from Block 6.

Held: The Crown's appeal should be dismissed. Weyerhaeuser Co.'s appeal should be allowed.

While it is open to the Haida to seek an interlocutory injunction, they are not confined to that remedy, which

EN APPEL DE LA COUR D'APPEL DE LA
COLOMBIE-BRITANNIQUE

*Couronne — Honneur de la Couronne — Obligation
de consulter les peuples autochtones et de trouver des
accommodements à leurs préoccupations — La Cou-
ronne a-t-elle envers les peuples autochtones une
obligation de consultation et d'accommodement avant
de prendre une décision susceptible d'avoir un effet
préjudiciable sur des revendications de droits et titres
ancestraux non encore prouvées? — L'obligation vise-t-
elle aussi les tiers?*

Depuis plus de 100 ans, les Haïda revendiquent un titre sur les terres des îles Haïda Gwaii et les eaux les entourant; ce titre n'a pas encore été juridiquement reconnu. En 1961, la province de la Colombie-Britannique a délivré à une grosse compagnie forestière une « concession de ferme forestière » (CFF 39) l'autorisant à récolter des arbres dans la région des îles Haïda Gwaii connue sous le nom de Bloc 6. En 1981, en 1995 et en l'an 2000, le ministre a remplacé la CFF 39 et en 1999 il a autorisé la cession de la CFF 39 à Weyerhaeuser Co. Les Haïda ont contesté devant les tribunaux ces remplacements et cette cession, qui ont été effectués sans leur consentement et, depuis 1994 au moins, en dépit de leurs objections. Ils demandent leur annulation. Le juge en son cabinet a rejeté la demande, mais a conclu que le gouvernement a l'obligation morale, mais non légale, de négocier avec les Haïda. La Cour d'appel a infirmé cette décision, déclarant que le gouvernement et Weyerhaeuser Co. ont tous deux l'obligation de consulter les Haïda et de trouver des accommodements à leurs préoccupations.

Arrêt : Le pourvoi de la Couronne est rejeté. Le pourvoi de Weyerhaeuser Co. est accueilli.

Il est loisible aux Haïda de demander une injonction interlocutoire, mais ce n'est pas leur seul recours. Par

may fail to adequately take account of their interests prior to final determination thereof. If they can prove a special obligation giving rise to a duty to consult or accommodate, they are free to pursue other available remedies.

The government's duty to consult with Aboriginal peoples and accommodate their interests is grounded in the principle of the honour of the Crown, which must be understood generously. While the asserted but unproven Aboriginal rights and title are insufficiently specific for the honour of the Crown to mandate that the Crown act as a fiduciary, the Crown, acting honourably, cannot cavalierly run roughshod over Aboriginal interests where claims affecting these interests are being seriously pursued in the process of treaty negotiation and proof. The duty to consult and accommodate is part of a process of fair dealing and reconciliation that begins with the assertion of sovereignty and continues beyond formal claims resolution. The foundation of the duty in the Crown's honour and the goal of reconciliation suggest that the duty arises when the Crown has knowledge, real or constructive, of the potential existence of the Aboriginal right or title and contemplates conduct that might adversely affect it. Consultation and accommodation before final claims resolution preserve the Aboriginal interest and are an essential corollary to the honourable process of reconciliation that s. 35 of the *Constitution Act, 1982*, demands.

The scope of the duty is proportionate to a preliminary assessment of the strength of the case supporting the existence of the right or title, and to the seriousness of the potentially adverse effect upon the right or title claimed. The Crown is not under a duty to reach an agreement; rather, the commitment is to a meaningful process of consultation in good faith. The content of the duty varies with the circumstances and each case must be approached individually and flexibly. The controlling question in all situations is what is required to maintain the honour of the Crown and to effect reconciliation between the Crown and the Aboriginal people with respect to the interests at stake. The effect of good faith consultation may be to reveal a duty to accommodate. Where accommodation is required in making decisions that may adversely affect as yet unproven Aboriginal rights and title claims, the Crown must balance Aboriginal concerns reasonably

ailleurs, il est possible que l'injonction interlocutoire ne tienne pas suffisamment compte de leurs intérêts avant qu'une décision définitive soit rendue au sujet de ceux-ci. S'ils sont en mesure d'établir l'existence d'une obligation particulière donnant naissance à l'obligation de consulter ou d'accommoder, ils sont libres de demander l'application de ces mesures.

L'obligation du gouvernement de consulter les peuples autochtones et de trouver des accommodements à leurs intérêts découle du principe de l'honneur de la Couronne, auquel il faut donner une interprétation généreuse. Bien que les droits et titre ancestraux revendiqués, mais non encore définis ou prouvés, ne soient pas suffisamment précis pour que l'honneur de la Couronne oblige celle-ci à agir comme fiduciaire, cette dernière, si elle entend agir honorablement, ne peut traiter cavalièrement les intérêts autochtones qui font l'objet de revendications sérieuses dans le cadre du processus de négociation et d'établissement d'un traité. L'obligation de consulter et d'accommoder fait partie intégrante du processus de négociation honorable et de conciliation qui débute au moment de l'affirmation de la souveraineté et se poursuit au-delà de la reconnaissance formelle des revendications. L'objectif de conciliation ainsi que l'obligation de consultation, laquelle repose sur l'honneur de la Couronne, tendent à indiquer que cette obligation prend naissance lorsque la Couronne a connaissance, concrètement ou par imputation, de l'existence potentielle du droit ou titre ancestral et envisage des mesures susceptibles d'avoir un effet préjudiciable sur celui-ci. La prise de mesures de consultation et d'accommodement avant le règlement définitif d'une revendication permet de protéger les intérêts autochtones et constitue même un aspect essentiel du processus honorable de conciliation imposé par l'art. 35 de la *Loi constitutionnelle de 1982*.

L'étendue de l'obligation dépend de l'évaluation préliminaire de la solidité de la preuve étayant l'existence du droit ou du titre revendiqué, et de la gravité des effets préjudiciables potentiels sur le droit ou le titre. La Couronne n'a pas l'obligation de parvenir à une entente mais plutôt de mener de bonne foi de véritables consultations. Le contenu de l'obligation varie selon les circonstances et il faut procéder au cas par cas. La question décisive dans toutes les situations consiste à déterminer ce qui est nécessaire pour préserver l'honneur de la Couronne et pour concilier les intérêts de la Couronne et ceux des Autochtones. Des consultations menées de bonne foi peuvent faire naître l'obligation d'accommodement. Lorsque des mesures d'accommodement sont nécessaires lors de la prise d'une décision susceptible d'avoir un effet préjudiciable sur des revendications de droits et de titre ancestraux non encore prouvées, la Couronne doit établir un équilibre

with the potential impact of the decision on the asserted right or title and with other societal interests.

Third parties cannot be held liable for failing to discharge the Crown's duty to consult and accommodate. The honour of the Crown cannot be delegated, and the legal responsibility for consultation and accommodation rests with the Crown. This does not mean, however, that third parties can never be liable to Aboriginal peoples.

Finally, the duty to consult and accommodate applies to the provincial government. At the time of the Union, the Provinces took their interest in land subject to any interest other than that of the Province in the same. Since the duty to consult and accommodate here at issue is grounded in the assertion of Crown sovereignty which pre-dated the Union, the Province took the lands subject to this duty.

The Crown's obligation to consult the Haida on the replacement of T.F.L. 39 was engaged in this case. The Haida's claims to title and Aboriginal right to harvest red cedar were supported by a good *prima facie* case, and the Province knew that the potential Aboriginal rights and title applied to Block 6, and could be affected by the decision to replace T.F.L. 39. T.F.L. decisions reflect strategic planning for utilization of the resource and may have potentially serious impacts on Aboriginal rights and titles. If consultation is to be meaningful, it must take place at the stage of granting or renewing T.F.L.'s. Furthermore, the strength of the case for both the Haida's title and their right to harvest red cedar, coupled with the serious impact of incremental strategic decisions on those interests, suggest that the honour of the Crown may also require significant accommodation to preserve the Haida's interest pending resolution of their claims.

Sparrow*, [1990] 1 S.C.R. 1075; *R. v. Nikal*, [1996] 1 S.C.R. 1013; *R. v. Gladstone*, [1996]

raisonnable entre les préoccupations des Autochtones, d'une part, et l'incidence potentielle de la décision sur le droit ou titre revendiqué et les autres intérêts sociétaux, d'autre part.

Les tiers ne peuvent être jugés responsables de ne pas avoir rempli l'obligation de consultation et d'accommodement qui incombe à la Couronne. Le respect du principe de l'honneur de la Couronne ne peut être délégué, et la responsabilité juridique en ce qui a trait à la consultation et à l'accommodement incombe à la Couronne. Toutefois, cela ne signifie pas que des tiers ne peuvent jamais être tenus responsables envers des peuples autochtones.

Enfin, l'obligation de consultation et d'accommodement s'applique au gouvernement provincial. Les intérêts acquis par la province sur les terres lors de l'Union sont subordonnés à tous intérêts autres que ceux que peut y avoir la province. Comme l'obligation de consulter et d'accommoder qui est en litige dans la présente affaire est fondée sur l'affirmation par la province, avant l'Union, de sa souveraineté sur le territoire visé, la province a acquis les terres sous réserve de cette obligation.

En l'espèce, la Couronne avait l'obligation de consulter les Haïda au sujet du remplacement de la CFF 39. Les revendications par les Haïda du titre et du droit ancestral de récolter du cèdre rouge étaient étayées par une preuve à première vue valable, et la province savait que les droits et titre ancestraux potentiels visaient le Bloc 6 et qu'ils pouvaient être touchés par la décision de remplacer la CFF 39. Les décisions rendues à l'égard des CFF reflètent la planification stratégique touchant l'utilisation de la ressource en cause et risquent d'avoir des conséquences graves sur les droits ou titres ancestraux. Pour que les consultations soient utiles, elles doivent avoir lieu à l'étape de l'octroi ou du renouvellement de la CFF. De plus, la solidité de la preuve étayant l'existence d'un titre haïda et d'un droit haïda autorisant la récolte du cèdre rouge, conjuguée aux répercussions sérieuses sur ces intérêts des décisions stratégiques successives, indique que l'honneur de la Couronne pourrait bien commander des mesures d'accommodement substantielles pour protéger les intérêts des Haïda en attendant que leurs revendications soient réglées.

THE CHIEF JUSTICE —

I. Introduction

To the west of the mainland of British Columbia lie the Queen Charlotte Islands, the traditional homeland of the Haida people. Haida Gwaii, as the inhabitants call it, consists of two large islands and a number of smaller islands. For more than 100 years, the Haida people have claimed title to all the lands of the Haida Gwaii and the waters surrounding it. That title is still in the claims process and has not yet been legally recognized.

The islands of Haida Gwaii are heavily forested. Spruce, hemlock and cedar abound. The most important of these is the cedar which, since time immemorial, has played a central role in the economy and culture of the Haida people. It is from cedar that they made their ocean-going canoes, their clothing, their utensils and the totem poles that guarded their

Version française du jugement de la Cour rendu par

LA JUGE EN CHEF —

I. Introduction

À l'ouest de la partie continentale de la Colombie-Britannique s'étendent les îles de la Reine-Charlotte, patrie traditionnelle des Haïda. Les îles Haïda Gwaii, comme leurs habitants les appellent, se composent de deux grandes îles et de plusieurs petites îles. Depuis plus de 100 ans, les Haïda revendiquent un titre sur les terres des îles Haïda Gwaii et les eaux les entourant. Ce titre en est toujours à l'étape de la revendication et n'a pas encore été juridiquement reconnu.

Les îles Haïda Gwaii sont densément boisées. L'épinette, la pruche et le cèdre y foisonnent. Le plus important de ces arbres est le cèdre, qui, depuis des temps immémoriaux, joue un rôle central dans l'économie et la culture des Haïda. C'est à partir du cèdre qu'ils fabriquaient leurs canots maritimes, leurs vêtements, leurs ustensiles et les totems qui

lodges. The cedar forest remains central to their life and their conception of themselves.

protégeaient leurs habitations. La forêt de cèdres demeure essentielle à leur vie et à la conception qu'ils se font d'eux-mêmes.

3 The forests of Haida Gwaii have been logged since before the First World War. Portions of the island have been logged off. Other portions bear second-growth forest. In some areas, old-growth forests can still be found.

Les forêts des îles Haïda Gwaii étaient déjà exploitées avant la Première Guerre mondiale. Certaines parties du territoire ont été coupées à blanc. D'autres sont occupées par une forêt secondaire. Dans certaines régions, on peut encore trouver de vieilles forêts.

4 The Province of British Columbia continues to issue licences to cut trees on Haida Gwaii to forestry companies. The modern name for these licenses are Tree Farm Licences, or T.F.L.'s. Such a licence is at the heart of this litigation. A large forestry firm, MacMillan Bloedel Limited acquired T.F.L. 39 in 1961, permitting it to harvest trees in an area designated as Block 6. In 1981, 1995 and 2000, the Minister replaced T.F.L. 39 pursuant to procedures set out in the *Forest Act*, R.S.B.C. 1996, c. 157. In 1999, the Minister approved a transfer of T.F.L. 39 to Weyerhaeuser Company Limited ("Weyerhaeuser"). The Haida people challenged these replacements and the transfer, which were made without their consent and, since at least 1994, over their objections. Nevertheless, T.F.L. 39 continued.

La province de la Colombie-Britannique continue de délivrer à des compagnies forestières des permis de coupe autorisant l'abattage d'arbres sur les îles Haïda Gwaii. Ce sont ces permis, maintenant appelés [TRADUCTION] « concessions de ferme forestière » (« CFF »), qui sont au cœur du présent litige. En 1961, MacMillan Bloedel Limited, une grosse compagnie forestière, a obtenu la CFF 39, qui lui permettait de récolter des arbres dans la région connue sous le nom de « Bloc 6 ». En 1981, en 1995 et en l'an 2000, le ministre a remplacé la CFF 39 conformément à la procédure prévue par la *Forest Act*, R.S.B.C. 1996, ch. 157. En 1999, il a autorisé la cession de la CFF 39 à Weyerhaeuser Company Limited (« Weyerhaeuser »). Les Haïda ont contesté ces remplacements et cette cession, qui ont été effectués sans leur consentement et, depuis 1994 au moins, en dépit de leurs objections. La CFF 39 est cependant restée en vigueur.

5 In January of 2000, the Haida people launched a lawsuit objecting to the three replacement decisions and the transfer of T.F.L. 39 to Weyerhaeuser and asking that they be set aside. They argued legal encumbrance, equitable encumbrance and breach of fiduciary duty, all grounded in their assertion of Aboriginal title.

En janvier 2000, les Haïda ont engagé une procédure par laquelle ils s'opposent aux trois remplacements et à la cession de la CFF 39 à Weyerhaeuser, et demandent leur annulation. Invoquant l'existence d'un titre ancestral, ils ont plaidé grèvement en common law, grèvement en equity et manquement à l'obligation de fiduciaire.

6 This brings us to the issue before this Court. The government holds legal title to the land. Exercising that legal title, it has granted Weyerhaeuser the right to harvest the forests in Block 6 of the land. But the Haida people also claim title to the land — title which they are in the process of trying to prove — and object to the harvesting of the forests on Block 6 as proposed in T.F.L. 39. In this situation, what duty if any does the government owe the

Cela nous amène à la question dont la Cour est saisie. Le gouvernement détient le titre en common law sur les terres en question. Dans l'exercice des pouvoirs que lui confère ce titre, il a accordé à Weyerhaeuser le droit d'exploiter les forêts du Bloc 6. Mais les Haïda prétendent également détenir un titre sur ces terres — titre dont ils tentent actuellement d'établir l'existence — et s'opposent à l'exploitation des forêts du Bloc 6 prévue par la

Haida people? More concretely, is the government required to consult with them about decisions to harvest the forests and to accommodate their concerns about what if any forest in Block 6 should be harvested before they have proven their title to land and their Aboriginal rights?

The stakes are huge. The Haida argue that absent consultation and accommodation, they will win their title but find themselves deprived of forests that are vital to their economy and their culture. Forests take generations to mature, they point out, and old-growth forests can never be replaced. The Haida's claim to title to Haida Gwaii is strong, as found by the chambers judge. But it is also complex and will take many years to prove. In the meantime, the Haida argue, their heritage will be irretrievably despoiled.

The government, in turn, argues that it has the right and responsibility to manage the forest resource for the good of all British Columbians, and that until the Haida people formally prove their claim, they have no legal right to be consulted or have their needs and interests accommodated.

The chambers judge found that the government has a moral, but not a legal, duty to negotiate with the Haida people: [2001] 2 C.N.L.R. 83, 2000 BCSC 1280. The British Columbia Court of Appeal reversed this decision, holding that both the government and Weyerhaeuser have a duty to consult with and accommodate the Haida people with respect to harvesting timber from Block 6: (2002), 99 B.C.L.R. (3d) 209, 2002 BCCA 147, with supplementary reasons (2002), 5 B.C.L.R. (4th) 33, 2002 BCCA 462.

CFF 39. Dans ces circonstances, le gouvernement est-il tenu à une obligation envers les Haïda et, si oui, laquelle? De façon plus concrète, a-t-il l'obligation de consulter les Haïda avant de prendre des décisions concernant l'exploitation des forêts et de trouver des accommodements à leurs préoccupations quant à la question de savoir si les forêts du Bloc 6 peuvent être exploitées — et, dans l'affirmative, lesquelles — avant qu'ils aient pu établir l'existence de leur titre sur les terres et leurs droits ancestraux?

Les enjeux sont énormes. Les Haïda font valoir que, si on ne procède pas à ces consultation et accommodement, ils obtiendront leur titre mais se retrouveront privés de forêts qui sont vitales à leur économie et à leur culture. Il faut des générations aux forêts pour parvenir à maturité, soulignent-ils, et les vieilles forêts sont irremplaçables. Comme a conclu le juge en son cabinet, leur revendication du titre sur les îles Haïda Gwaii s'appuie sur des arguments solides. Mais elle est également complexe, et il faudra de nombreuses années pour l'établir. Les Haïda affirment qu'entre-temps ils auront été irrémédiablement dépouillés de leur héritage.

Le gouvernement, pour sa part, soutient qu'il a le droit et le devoir d'aménager les ressources forestières dans l'intérêt de tous les habitants de la Colombie-Britannique et que, tant que les Haïda n'auront pas formellement établi le bien-fondé de leur revendication, ils n'ont aucun droit à des consultations ou à des accommodements à leurs besoins et intérêts.

Le juge en son cabinet a décidé que le gouvernement a l'obligation morale, mais non légale, de négocier avec les Haïda : [2001] 2 C.N.L.R. 83, 2000 BCSC 1280. La Cour d'appel de la Colombie-Britannique a infirmé cette décision, déclarant que le gouvernement et Weyerhaeuser ont tous deux l'obligation de consulter les Haïda et de trouver des accommodements à leurs préoccupations en ce qui concerne la récolte de bois sur le bloc 6 : (2002), 99 B.C.L.R. (3d) 209, 2002 BCCA 147, avec motifs supplémentaires (2002), 5 B.C.L.R. (4th) 33, 2002 BCCA 462.

10

I conclude that the government has a legal duty to consult with the Haida people about the harvest of timber from Block 6, including decisions to transfer or replace Tree Farm Licences. Good faith consultation may in turn lead to an obligation to accommodate Haida concerns in the harvesting of timber, although what accommodation if any may be required cannot at this time be ascertained. Consultation must be meaningful. There is no duty to reach agreement. The duty to consult and, if appropriate, accommodate cannot be discharged by delegation to Weyerhaeuser. Nor does Weyerhaeuser owe any independent duty to consult with or accommodate the Haida people's concerns, although the possibility remains that it could become liable for assumed obligations. It follows that I would dismiss the Crown's appeal and allow the appeal of Weyerhaeuser.

Je conclus que le gouvernement est légalement tenu de consulter les Haïda au sujet de la récolte de bois sur le bloc 6, y compris en ce qui concerne la cession ou le remplacement des CFF. Une consultation menée de bonne foi pourrait à son tour entraîner l'obligation de trouver des accommodements aux préoccupations des Haïda à propos de la récolte de bois, mais il est impossible pour le moment de préciser le genre d'accommodement qui s'impose, à supposer qu'une telle mesure soit requise. Il faut une véritable consultation. Les intéressés n'ont aucune obligation de parvenir à une entente. Le gouvernement ne peut se décharger des obligations de consultation et d'accommodement en les déléguant à Weyerhaeuser. De son côté, cette dernière n'a pas d'obligation indépendante de consulter les Haïda ou de trouver des accommodements à leurs préoccupations, bien qu'il demeure possible qu'elle soit tenue responsable à l'égard d'obligations qu'elle aurait assumées. Je suis donc d'avis de rejeter l'appel de la Couronne et d'accueillir l'appel de Weyerhaeuser.

11

This case is the first of its kind to reach this Court. Our task is the modest one of establishing a general framework for the duty to consult and accommodate, where indicated, before Aboriginal title or rights claims have been decided. As this framework is applied, courts, in the age-old tradition of the common law, will be called on to fill in the details of the duty to consult and accommodate.

Il s'agit de la première affaire du genre à être soumise à la Cour. Notre tâche se limite modestement à établir le cadre général d'application, dans les cas indiqués, de l'obligation de consultation et d'accommodement avant que les revendications de titre et droits ancestraux soient tranchées. Au fur et à mesure de l'application de ce cadre, les tribunaux seront appelés, conformément à la méthode traditionnelle de la common law, à préciser l'obligation de consultation et d'accommodement.

II. Analysis

A. *Does the Law of Injunctions Govern This Situation?*

II. Analyse

A. *Le droit en matière d'injonction s'applique-t-il en l'espèce?*

12

It is argued that the Haida's proper remedy is to apply for an interlocutory injunction against the government and Weyerhaeuser, and that therefore it is unnecessary to consider a duty to consult or accommodate. In *RJR — MacDonald Inc. v. Canada (Attorney General)*, [1994] 1 S.C.R. 311, the requirements for obtaining an interlocutory injunction were reviewed. The plaintiff must establish: (1) a serious issue to be tried; (2) that irreparable harm will be

On fait valoir que le recours approprié pour les Haïda consiste à demander une injonction interlocutoire contre le gouvernement et contre Weyerhaeuser et qu'il est en conséquence inutile d'examiner la question de l'existence de l'obligation de consulter ou d'accommoder. Dans *RJR — MacDonald Inc. c. Canada (Procureur général)*, [1994] 1 R.C.S. 311, les critères à respecter pour obtenir une injonction interlocutoire ont été examinés. Le demandeur

suffered if the injunction is not granted; and (3) that the balance of convenience favours the injunction.

It is open to plaintiffs like the Haida to seek an interlocutory injunction. However, it does not follow that they are confined to that remedy. If plaintiffs can prove a special obligation giving rise to a duty to consult or accommodate, they are free to pursue these remedies. Here the Haida rely on the obligation flowing from the honour of the Crown toward Aboriginal peoples.

Interlocutory injunctions may offer only partial imperfect relief. First, as mentioned, they may not capture the full obligation on the government alleged by the Haida. Second, they typically represent an all-or-nothing solution. Either the project goes ahead or it halts. By contrast, the alleged duty to consult and accommodate by its very nature entails balancing of Aboriginal and other interests and thus lies closer to the aim of reconciliation at the heart of Crown-Aboriginal relations, as set out in *R. v. Van der Peet*, [1996] 2 S.C.R. 507, at para. 31, and *Delgamuukw v. British Columbia*, [1997] 3 S.C.R. 1010, at para. 186. Third, the balance of convenience test tips the scales in favour of protecting jobs and government revenues, with the result that Aboriginal interests tend to “lose” outright pending a final determination of the issue, instead of being balanced appropriately against conflicting concerns: J. J. L. Hunter, “Advancing Aboriginal Title Claims after *Delgamuukw*: The Role of the Injunction” (June 2000). Fourth, interlocutory injunctions are designed as a stop-gap remedy pending litigation of the underlying issue. Aboriginal claims litigation can be very complex and require years and even decades to resolve in the courts. An interlocutory injunction over such a long period of time might work unnecessary prejudice and may diminish incentives on the part of the successful party to compromise. While Aboriginal claims can be and are pursued through litigation, negotiation is a preferable way of reconciling state

doit établir les éléments suivants : (1) il existe une question sérieuse à juger; (2) le refus de l’injonction causera un préjudice irréparable; (3) la prépondérance des inconvénients favorise l’octroi de l’injonction.

Il est loisible à des demandeurs comme les Haïda de demander une injonction interlocutoire. Cependant, cela ne signifie pas qu’il s’agit là de leur seul recours. Si des demandeurs sont en mesure d’établir l’existence d’une obligation particulière donnant naissance à l’obligation de consulter ou d’accommoder, ils sont libres de demander l’application de ces mesures. Ici, les Haïda invoquent l’obligation découlant du principe que la Couronne doit agir honorablement envers les peuples autochtones.

L’injonction interlocutoire n’offre parfois qu’une réparation partielle et imparfaite. Premièrement, comme nous l’avons déjà mentionné, elle peut ne pas faire apparaître toute l’obligation du gouvernement, qui, selon les Haïda, incombe au gouvernement. Deuxièmement, elle représente généralement la solution du tout ou rien. Ou le projet se poursuit, ou il s’arrête. Par contre, l’obligation de consulter et d’accommoder invoquée en l’espèce nécessite, de par sa nature même, une mise en balance des intérêts autochtones et des intérêts non autochtones et se rapproche donc de l’objectif de conciliation qui est au cœur des rapports entre la Couronne et les Autochtones et qui a été énoncé dans les arrêts *R. c. Van der Peet*, [1996] 2 R.C.S. 507, par. 31, et *Delgamuukw c. Colombie-Britannique*, [1997] 3 R.C.S. 1010, par. 186. Troisièmement, le critère de la balance des inconvénients fait pencher la balance du côté de la protection des emplois et des recettes de l’État, de sorte que les intérêts autochtones tendent à « être écartés » totalement jusqu’à ce que la question en litige ait été tranchée de façon définitive, au lieu d’être convenablement mis en balance avec les préoccupations opposées : J. J. L. Hunter, « Advancing Aboriginal Title Claims after *Delgamuukw* : The Role of the Injunction » (juin 2000). Quatrièmement, l’injonction interlocutoire est considérée comme une mesure corrective provisoire jusqu’à ce que le tribunal ait statué sur la question litigieuse fondamentale. Les affaires portant sur des revendications autochtones peuvent

13

2004 SCC 73 (CanLII)

14

and Aboriginal interests. For all these reasons, interlocutory injunctions may fail to adequately take account of Aboriginal interests prior to their final determination.

être extrêmement complexes et prendre des années, voire des décennies, avant d'être tranchées par les tribunaux. L'application d'une injonction interlocutoire pendant une si longue période pourrait causer des préjudices inutiles et pourrait inciter la partie en bénéficiant à faire moins de compromis. Même si les revendications autochtones sont et peuvent être réglées dans le cadre de litiges, il est préférable de recourir à la négociation pour concilier les intérêts de la Couronne et ceux des Autochtones. Pour toutes ces raisons, il est possible qu'une injonction interlocutoire ne tienne pas suffisamment compte des intérêts autochtones avant qu'une décision définitive soit rendue au sujet de ceux-ci.

15 I conclude that the remedy of interlocutory injunction does not preclude the Haida's claim. We must go further and see whether the special relationship with the Crown upon which the Haida rely gives rise to a duty to consult and, if appropriate, accommodate. In what follows, I discuss the source of the duty, when the duty arises, the scope and content of the duty, whether the duty extends to third parties, and whether it applies to the provincial government and not exclusively the federal government. I then apply the conclusions flowing from this discussion to the facts of this case.

B. *The Source of a Duty to Consult and Accommodate*

16 The government's duty to consult with Aboriginal peoples and accommodate their interests is grounded in the honour of the Crown. The honour of the Crown is always at stake in its dealings with Aboriginal peoples: see for example *R. v. Badger*, [1996] 1 S.C.R. 771, at para. 41; *R. v. Marshall*, [1999] 3 S.C.R. 456. It is not a mere incantation, but rather a core precept that finds its application in concrete practices.

17 The historical roots of the principle of the honour of the Crown suggest that it must be understood generously in order to reflect the underlying realities from which it stems. In all its dealings with Aboriginal peoples, from the assertion of sovereignty to the resolution of claims and the implementation of treaties, the Crown must act

J'estime que le recours en injonction interlocutoire ne fait pas obstacle à la revendication des Haïda. Nous devons aller plus loin et décider si les rapports particuliers avec la Couronne qu'invoquent les Haïda font naître une obligation de consulter et, s'il y a lieu, d'accommoder. Je vais maintenant analyser la source de l'obligation, le moment où elle prend naissance, sa portée et son contenu, la question de savoir si elle vise aussi les tiers et si elle s'applique au gouvernement provincial, et non exclusivement au gouvernement fédéral. J'appliquerai ensuite les conclusions de cette analyse aux faits de l'espèce.

B. *La source de l'obligation de consulter et d'accommoder*

L'obligation du gouvernement de consulter les peuples autochtones et de prendre en compte leurs intérêts découle du principe de l'honneur de la Couronne. L'honneur de la Couronne est toujours en jeu lorsque cette dernière transige avec les peuples autochtones : voir par exemple *R. c. Badger*, [1996] 1 R.C.S. 771, par. 41; *R. c. Marshall*, [1999] 3 R.C.S. 456. Il ne s'agit pas simplement d'une belle formule, mais d'un précepte fondamental qui peut s'appliquer dans des situations concrètes.

Les origines historiques du principe de l'honneur de la Couronne tendent à indiquer que ce dernier doit recevoir une interprétation généreuse afin de refléter les réalités sous-jacentes dont il découle. Dans tous ses rapports avec les peuples autochtones, qu'il s'agisse de l'affirmation de sa souveraineté, du règlement de revendications ou de la mise en œuvre

honourably. Nothing less is required if we are to achieve “the reconciliation of the pre-existence of aboriginal societies with the sovereignty of the Crown”: *Delgamuukw*, *supra*, at para. 186, quoting *Van der Peet*, *supra*, at para. 31.

The honour of the Crown gives rise to different duties in different circumstances. Where the Crown has assumed discretionary control over specific Aboriginal interests, the honour of the Crown gives rise to a fiduciary duty: *Wewaykum Indian Band v. Canada*, [2002] 4 S.C.R. 245, 2002 SCC 79, at para. 79. The content of the fiduciary duty may vary to take into account the Crown’s other, broader obligations. However, the duty’s fulfilment requires that the Crown act with reference to the Aboriginal group’s best interest in exercising discretionary control over the specific Aboriginal interest at stake. As explained in *Wewaykum*, at para. 81, the term “fiduciary duty” does not connote a universal trust relationship encompassing all aspects of the relationship between the Crown and Aboriginal peoples:

... “fiduciary duty” as a source of plenary Crown liability covering all aspects of the Crown-Indian band relationship ... overshoots the mark. The fiduciary duty imposed on the Crown does not exist at large but in relation to specific Indian interests.

Here, Aboriginal rights and title have been asserted but have not been defined or proven. The Aboriginal interest in question is insufficiently specific for the honour of the Crown to mandate that the Crown act in the Aboriginal group’s best interest, as a fiduciary, in exercising discretionary control over the subject of the right or title.

The honour of the Crown also infuses the processes of treaty making and treaty interpretation. In making and applying treaties, the Crown must act with honour and integrity, avoiding even the appearance of “sharp dealing” (*Badger*, at para. 41). Thus in *Marshall*, *supra*, at para. 4, the majority of this Court supported its interpretation of a treaty by

de traités, la Couronne doit agir honorablement. Il s’agit là du minimum requis pour parvenir à « concilier la préexistence des sociétés autochtones et la souveraineté de Sa Majesté » : *Delgamuukw*, précité, par. 186, citant *Van der Peet*, précité, par. 31.

L’honneur de la Couronne fait naître différentes obligations selon les circonstances. Lorsque la Couronne assume des pouvoirs discrétionnaires à l’égard d’intérêts autochtones particuliers, le principe de l’honneur de la Couronne donne naissance à une obligation de fiduciaire : *Bande indienne Wewaykum c. Canada*, [2002] 4 R.C.S. 245, 2002 CSC 79, par. 79. Le contenu de l’obligation de fiduciaire peut varier en fonction des autres obligations, plus larges, de la Couronne. Cependant, pour s’acquitter de son obligation de fiduciaire, la Couronne doit agir dans le meilleur intérêt du groupe autochtone lorsqu’elle exerce des pouvoirs discrétionnaires à l’égard des intérêts autochtones en jeu. Comme il est expliqué dans *Wewaykum*, par. 81, l’expression « obligation de fiduciaire » ne dénote pas un rapport fiduciaire universel englobant tous les aspects des rapports entre la Couronne et les peuples autochtones :

... [considérer l’] « obligation de fiduciaire » [...] comme si elle imposait à la Couronne une responsabilité totale à l’égard de tous les aspects des rapports entre la Couronne et les bandes indiennes[, c’est] aller trop loin. L’obligation de fiduciaire incombant à la Couronne n’a pas un caractère général, mais existe plutôt à l’égard de droits particuliers des Indiens.

En l’espèce, des droits et un titre ancestraux ont été revendiqués, mais n’ont pas été définis ou prouvés. L’intérêt autochtone en question n’est pas suffisamment précis pour que l’honneur de la Couronne oblige celle-ci à agir, comme fiduciaire, dans le meilleur intérêt du groupe autochtone lorsqu’elle exerce des pouvoirs discrétionnaires à l’égard de l’objet du droit ou du titre.

L’honneur de la Couronne imprègne également les processus de négociation et d’interprétation des traités. Lorsqu’elle conclut et applique un traité, la Couronne doit agir avec honneur et intégrité, et éviter la moindre apparence de « manœuvres malhonnêtes » (*Badger*, par. 41). Ainsi, dans *Marshall*, précité, par. 4, les juges majoritaires de la Cour ont

stating that “nothing less would uphold the honour and integrity of the Crown in its dealings with the Mi’kmaq people to secure their peace and friendship . . .”.

justifié leur interprétation du traité en déclarant que « rien de moins ne saurait protéger l’honneur et l’intégrité de la Couronne dans ses rapports avec les Mi’kmaq en vue d’établir la paix avec eux et de s’assurer leur amitié . . . ».

20 Where treaties remain to be concluded, the honour of the Crown requires negotiations leading to a just settlement of Aboriginal claims: *R. v. Sparrow*, [1990] 1 S.C.R. 1075, at pp. 1105-6. Treaties serve to reconcile pre-existing Aboriginal sovereignty with assumed Crown sovereignty, and to define Aboriginal rights guaranteed by s. 35 of the *Constitution Act, 1982*. Section 35 represents a promise of rights recognition, and “[i]t is always assumed that the Crown intends to fulfil its promises” (*Badger, supra*, at para. 41). This promise is realized and sovereignty claims reconciled through the process of honourable negotiation. It is a corollary of s. 35 that the Crown act honourably in defining the rights it guarantees and in reconciling them with other rights and interests. This, in turn, implies a duty to consult and, if appropriate, accommodate.

Tant qu’un traité n’a pas été conclu, l’honneur de la Couronne exige la tenue de négociations menant à un règlement équitable des revendications autochtones : *R. c. Sparrow*, [1990] 1 R.C.S. 1075, p. 1105-1106. Les traités permettent de concilier la souveraineté autochtone préexistante et la souveraineté proclamée de la Couronne, et ils servent à définir les droits ancestraux garantis par l’art. 35 de la *Loi constitutionnelle de 1982*. L’article 35 promet la reconnaissance de droits, et « [i]l faut toujours présumer que [la Couronne] entend respecter ses promesses » (*Badger*, précité, par. 41). Un processus de négociation honnête permet de concrétiser cette promesse et de concilier les revendications de souveraineté respectives. L’article 35 a pour corollaire que la Couronne doit agir honorablement lorsqu’il s’agit de définir les droits garantis par celui-ci et de les concilier avec d’autres droits et intérêts. Cette obligation emporte à son tour celle de consulter et, s’il y a lieu, d’accommoder.

21 This duty to consult is recognized and discussed in the jurisprudence. In *Sparrow, supra*, at p. 1119, this Court affirmed a duty to consult with west-coast Salish asserting an unresolved right to fish. Dickson C.J. and La Forest J. wrote that one of the factors in determining whether limits on the right were justified is “whether the aboriginal group in question has been consulted with respect to the conservation measures being implemented”.

Cette obligation de consulter a été reconnue et analysée dans la jurisprudence. Dans *Sparrow*, précité, p. 1119, la Cour a confirmé l’existence de l’obligation de consulter les Salish de la côte ouest qui revendiquaient un droit de pêche non encore reconnu. Le juge en chef Dickson et le juge La Forest ont écrit que, pour déterminer si les restrictions imposées au droit sont justifiées, il faut notamment se demander « si le groupe d’autochtones en question a été consulté au sujet des mesures de conservation mises en œuvre ».

22 The Court affirmed the duty to consult regarding resources to which Aboriginal peoples make claim a few years later in *R. v. Nikal*, [1996] 1 S.C.R. 1013, where Cory J. wrote: “So long as every reasonable effort is made to inform and to consult, such efforts would suffice to meet the justification requirement” (para. 110).

Quelques années plus tard, la Cour a confirmé l’existence de l’obligation de consultation à l’égard des ressources visées par une revendication autochtone dans *R. c. Nikal*, [1996] 1 R.C.S. 1013, où le juge Cory a écrit que « [d]ans la mesure où tous les efforts raisonnables ont été déployés pour informer et consulter, on a alors satisfait à l’obligation de justifier » (par. 110).

In the companion case of *R. v. Gladstone*, [1996] 2 S.C.R. 723, Lamer C.J. referred to the need for “consultation and compensation”, and to consider “how the government has accommodated different aboriginal rights in a particular fishery . . . , how important the fishery is to the economic and material well-being of the band in question, and the criteria taken into account by the government in, for example, allocating commercial licences amongst different users” (para. 64).

The Court’s seminal decision in *Delgamuukw*, *supra*, at para. 168, in the context of a claim for title to land and resources, confirmed and expanded on the duty to consult, suggesting the content of the duty varied with the circumstances: from a minimum “duty to discuss important decisions” where the “breach is less serious or relatively minor”; through the “significantly deeper than mere consultation” that is required in “most cases”; to “full consent of [the] aboriginal nation” on very serious issues. These words apply as much to unresolved claims as to intrusions on settled claims.

Put simply, Canada’s Aboriginal peoples were here when Europeans came, and were never conquered. Many bands reconciled their claims with the sovereignty of the Crown through negotiated treaties. Others, notably in British Columbia, have yet to do so. The potential rights embedded in these claims are protected by s. 35 of the *Constitution Act, 1982*. The honour of the Crown requires that these rights be determined, recognized and respected. This, in turn, requires the Crown, acting honourably, to participate in processes of negotiation. While this process continues, the honour of the Crown may require it to consult and, where indicated, accommodate Aboriginal interests.

Dans l’arrêt connexe *R. c. Gladstone*, [1996] 2 R.C.S. 723, le juge en chef Lamer a fait état de la nécessité « [des] consultations et [de] l’indemnisation », et de la nécessité d’examiner « la manière dont l’État a concilié les différents droits ancestraux visant une pêche donnée [. . .], l’importance de la pêche pour le bien-être économique et matériel de la bande en question, ainsi que les critères appliqués par l’État, par exemple, dans la répartition des permis de pêche commerciale entre les divers usagers » (par. 64).

Au paragraphe 168 de l’arrêt de principe *Delgamuukw*, précité, prononcé dans le contexte d’une revendication de titre sur des terres et des ressources, la Cour a confirmé l’existence de l’obligation de consulter et a précisé cette obligation, affirmant que son contenu variait selon les circonstances : de la simple « obligation de discuter des décisions importantes » « lorsque le manquement est moins grave ou relativement mineur », en passant par l’obligation nécessitant « beaucoup plus qu’une simple consultation » qui s’impose « [d]ans la plupart des cas », jusqu’à la nécessité d’obtenir le « consentement [de la] nation autochtone » sur les questions très importantes. Ces remarques s’appliquent autant aux revendications non réglées qu’aux revendications déjà réglées et auxquelles il est porté atteinte.

En bref, les Autochtones du Canada étaient déjà ici à l’arrivée des Européens; ils n’ont jamais été conquis. De nombreuses bandes ont concilié leurs revendications avec la souveraineté de la Couronne en négociant des traités. D’autres, notamment en Colombie-Britannique, ne l’ont pas encore fait. Les droits potentiels visés par ces revendications sont protégés par l’art. 35 de la *Loi constitutionnelle de 1982*. L’honneur de la Couronne commande que ces droits soient déterminés, reconnus et respectés. Pour ce faire, la Couronne doit agir honorablement et négocier. Au cours des négociations, l’honneur de la Couronne peut obliger celle-ci à consulter les Autochtones et, s’il y a lieu, à trouver des accommodements à leurs intérêts.

23

24

25

C. *When the Duty to Consult and Accommodate Arises*

26

Honourable negotiation implies a duty to consult with Aboriginal claimants and conclude an honourable agreement reflecting the claimants' inherent rights. But proving rights may take time, sometimes a very long time. In the meantime, how are the interests under discussion to be treated? Underlying this question is the need to reconcile prior Aboriginal occupation of the land with the reality of Crown sovereignty. Is the Crown, under the aegis of its asserted sovereignty, entitled to use the resources at issue as it chooses, pending proof and resolution of the Aboriginal claim? Or must it adjust its conduct to reflect the as yet unresolved rights claimed by the Aboriginal claimants?

27

The answer, once again, lies in the honour of the Crown. The Crown, acting honourably, cannot cavalierly run roughshod over Aboriginal interests where claims affecting these interests are being seriously pursued in the process of treaty negotiation and proof. It must respect these potential, but yet unproven, interests. The Crown is not rendered impotent. It may continue to manage the resource in question pending claims resolution. But, depending on the circumstances, discussed more fully below, the honour of the Crown may require it to consult with and reasonably accommodate Aboriginal interests pending resolution of the claim. To unilaterally exploit a claimed resource during the process of proving and resolving the Aboriginal claim to that resource, may be to deprive the Aboriginal claimants of some or all of the benefit of the resource. That is not honourable.

28

The government argues that it is under no duty to consult and accommodate prior to final determination of the scope and content of the right. Prior to proof of the right, it is argued, there exists only

C. *Le moment où l'obligation de consulter et d'accommoder prend naissance*

L'obligation de négocier honorablement emporte celle de consulter les demandeurs autochtones et de parvenir à une entente honorable, qui tienne compte de leurs droits inhérents. Mais prouver l'existence de droits peut prendre du temps, parfois même beaucoup de temps. Comment faut-il traiter les intérêts en jeu dans l'intervalle? Pour répondre à cette question, il faut tenir compte de la nécessité de concilier l'occupation antérieure des terres par les peuples autochtones et la réalité de la souveraineté de la Couronne. Celle-ci peut-elle, en vertu de la souveraineté qu'elle a proclamée, exploiter les ressources en question comme bon lui semble en attendant que la revendication autochtone soit établie et réglée? Ou doit-elle plutôt adapter son comportement de manière à tenir compte des droits, non encore reconnus, visés par cette revendication?

La réponse à cette question découle, encore une fois, de l'honneur de la Couronne. Si cette dernière entend agir honorablement, elle ne peut traiter cavalièrement les intérêts autochtones qui font l'objet de revendications sérieuses dans le cadre du processus de négociation et d'établissement d'un traité. Elle doit respecter ces intérêts potentiels mais non encore reconnus. La Couronne n'est pas paralysée pour autant. Elle peut continuer à gérer les ressources en question en attendant le règlement des revendications. Toutefois, selon les circonstances, question examinée de façon plus approfondie plus loin, le principe de l'honneur de la Couronne peut obliger celle-ci à consulter les Autochtones et à prendre raisonnablement en compte leurs intérêts jusqu'au règlement de la revendication. Le fait d'exploiter unilatéralement une ressource faisant l'objet d'une revendication au cours du processus visant à établir et à régler cette revendication peut revenir à dépouiller les demandeurs autochtones d'une partie ou de l'ensemble des avantages liés à cette ressource. Agir ainsi n'est pas une attitude honorable.

Le gouvernement prétend qu'il n'a aucune obligation de consulter et d'accommoder tant qu'une décision définitive n'a pas été rendue quant à la portée et au contenu du droit. Avant que le droit ne soit

a broad, common law “duty of fairness”, based on the general rule that an administrative decision that affects the “rights, privileges or interests of an individual” triggers application of the duty of fairness: *Cardinal v. Director of Kent Institution*, [1985] 2 S.C.R. 643, at p. 653; *Baker v. Canada (Minister of Citizenship and Immigration)*, [1999] 2 S.C.R. 817, at para. 20. The government asserts that, beyond general administrative law obligations, a duty to consult and accommodate arises only where the government has taken on the obligation of protecting a specific Aboriginal interest or is seeking to limit an established Aboriginal interest. In the result, the government submits that there is no legal duty to consult and accommodate Haida interests at this stage, although it concedes there may be “sound practical and policy reasons” to do so.

The government cites both authority and policy in support of its position. It relies on *Sparrow*, *supra*, at pp. 1110-13 and 1119, where the scope and content of the right were determined and infringement established, prior to consideration of whether infringement was justified. The government argues that its position also finds support in the perspective of the Ontario Court of Appeal in *TransCanada Pipelines Ltd. v. Beardmore (Township)* (2000), 186 D.L.R. (4th) 403, which held that “what triggers a consideration of the Crown’s duty to consult is a showing by the First Nation of a violation of an existing Aboriginal or treaty right recognized and affirmed by s. 35(1)” (para. 120).

As for policy, the government points to practical difficulties in the enforcement of a duty to consult or accommodate unproven claims. If the duty to consult varies with the circumstances from a “mere” duty to notify and listen at one end of the spectrum to a requirement of Aboriginal consent at the other end, how, the government asks, are the parties to agree which level is appropriate in the face of contested claims and rights? And if they cannot agree, how are courts or tribunals to determine this? The

établi, affirme-t-on, il n’existe qu’une « obligation d’équité » générale en common law, fondée sur la règle générale selon laquelle une décision administrative qui touche « les droits, privilèges ou biens d’une personne » entraîne l’application de cette obligation d’équité : *Cardinal c. Directeur de l’établissement Kent*, [1985] 2 R.C.S. 643, p. 653; *Baker c. Canada (Ministre de la Citoyenneté et de l’Immigration)*, [1999] 2 R.C.S. 817, par. 20. Le gouvernement affirme que, en dehors des obligations générales découlant du droit administratif, l’obligation de consulter et d’accommoder n’existe que dans le cas où le gouvernement s’est engagé à protéger un intérêt autochtone particulier ou cherche à restreindre un intérêt autochtone reconnu. Le gouvernement soutient donc qu’il n’existe, à ce stade-ci, aucune obligation légale de consulter les Haïda et de prendre en compte leurs intérêts, bien qu’il admette qu’il puisse exister de [TRADUCTION] « bonnes raisons sur le plan pratique et politique » de le faire.

Le gouvernement invoque des précédents et des considérations d’intérêt général à l’appui de sa thèse. Il cite *Sparrow*, précité, p. 1110-1113 et 1119, où l’étendue et le contenu du droit avaient été déterminés et l’atteinte avait été établie, avant que soit examinée la question de savoir si l’atteinte était justifiée. Le gouvernement prétend que sa position est également étayée par le point de vue exprimé dans *TransCanada Pipelines Ltd. c. Beardmore (Township)* (2000), 186 D.L.R. (4th) 403, où la Cour d’appel de l’Ontario a jugé que [TRADUCTION] « ce qui déclenche l’examen de l’obligation de la Couronne de consulter, c’est la démonstration par la Première nation qu’il y a eu violation d’un droit existant, ancestral ou issu de traité, reconnu et confirmé par le par. 35(1) » (par. 120).

Du point de vue des considérations d’intérêt général, le gouvernement invoque les difficultés que pose sur le plan pratique l’application de l’obligation de consulter ou d’accommoder dans les cas de revendications non établies. Si, selon les circonstances, l’obligation de consulter peut aller de la « simple » obligation d’informer et d’écouter, à une extrémité de la gamme, à l’obligation d’obtenir le consentement des Autochtones, à l’autre extrémité, comment, demande le gouvernement, les parties peuvent-elles

government also suggests that it is impractical and unfair to require consultation before final claims determination because this amounts to giving a remedy before issues of infringement and justification are decided.

s'entendre sur le degré de consultation lorsque des revendications et des droits sont contestés? Et si elles n'arrivent pas à s'entendre, comment les tribunaux judiciaires ou administratifs sont-ils censés trancher la question? Le gouvernement affirme également qu'il est irréaliste et injuste d'imposer une consultation avant que les revendications soient réglées de façon définitive, car cela revient à accorder réparation avant que la question de l'atteinte et celle de la justification aient été tranchées.

31 The government's arguments do not withstand scrutiny. Neither the authorities nor practical considerations support the view that a duty to consult and, if appropriate, accommodate arises only upon final determination of the scope and content of the right.

Les arguments du gouvernement ne résistent pas à un examen minutieux. Ni les précédents ni les considérations d'ordre pratique n'appuient la thèse selon laquelle l'obligation de consulter et, s'il y a lieu, d'accommoder ne prend naissance que lorsqu'une décision définitive a été rendue quant à la portée et au contenu du droit.

32 The jurisprudence of this Court supports the view that the duty to consult and accommodate is part of a process of fair dealing and reconciliation that begins with the assertion of sovereignty and continues beyond formal claims resolution. Reconciliation is not a final legal remedy in the usual sense. Rather, it is a process flowing from rights guaranteed by s. 35(1) of the *Constitution Act, 1982*. This process of reconciliation flows from the Crown's duty of honourable dealing toward Aboriginal peoples, which arises in turn from the Crown's assertion of sovereignty over an Aboriginal people and *de facto* control of land and resources that were formerly in the control of that people. As stated in *Mitchell v. M.N.R.*, [2001] 1 S.C.R. 911, 2001 SCC 33, at para. 9, “[w]ith this assertion [sovereignty] arose an obligation to treat aboriginal peoples fairly and honourably, and to protect them from exploitation” (emphasis added).

La jurisprudence de la Cour étaye le point de vue selon lequel l'obligation de consulter et d'accommoder fait partie intégrante du processus de négociation honorable et de conciliation qui débute au moment de l'affirmation de la souveraineté et se poursuit au-delà du règlement formel des revendications. La conciliation ne constitue pas une réparation juridique définitive au sens usuel du terme. Il s'agit plutôt d'un processus découlant des droits garantis par le par. 35(1) de la *Loi constitutionnelle de 1982*. Ce processus de conciliation découle de l'obligation de la Couronne de se conduire honorablement envers les peuples autochtones, obligation qui, à son tour, tire son origine de l'affirmation par la Couronne de sa souveraineté sur un peuple autochtone et par l'exercice de fait de son autorité sur des terres et ressources qui étaient jusque-là sous l'autorité de ce peuple. Comme il est mentionné dans *Mitchell c. M.R.N.*, [2001] 1 R.C.S. 911, 2001 CSC 33, par. 9, « [c]ette affirmation de souveraineté a fait naître l'obligation de traiter les peuples autochtones de façon équitable et honorable, et de les protéger contre l'exploitation » (je souligne).

33 To limit reconciliation to the post-proof sphere risks treating reconciliation as a distant legalistic goal, devoid of the “meaningful content” mandated by the “solemn commitment” made by the Crown in recognizing and affirming Aboriginal rights and

Limiter l'application du processus de conciliation aux revendications prouvées comporte le risque que la conciliation soit considérée comme un objectif formaliste éloigné et se voie dénuée du « sens utile » qu'elle doit avoir par suite de l'engagement

title: *Sparrow*, *supra*, at p. 1108. It also risks unfortunate consequences. When the distant goal of proof is finally reached, the Aboriginal peoples may find their land and resources changed and denuded. This is not reconciliation. Nor is it honourable.

The existence of a legal duty to consult prior to proof of claims is necessary to understand the language of cases like *Sparrow*, *Nikal*, and *Gladstone*, *supra*, where confirmation of the right and justification of an alleged infringement were litigated at the same time. For example, the reference in *Sparrow* to Crown behaviour in determining if any infringements were justified, is to behaviour before determination of the right. This negates the contention that a proven right is the trigger for a legal duty to consult and if appropriate accommodate even in the context of justification.

But, when precisely does a duty to consult arise? The foundation of the duty in the Crown's honour and the goal of reconciliation suggest that the duty arises when the Crown has knowledge, real or constructive, of the potential existence of the Aboriginal right or title and contemplates conduct that might adversely affect it: see *Halfway River First Nation v. British Columbia (Ministry of Forests)*, [1997] 4 C.N.L.R. 45 (B.C.S.C.), at p. 71, *per* Dorgan J.

This leaves the practical argument. It is said that before claims are resolved, the Crown cannot know that the rights exist, and hence can have no duty to consult or accommodate. This difficulty should not be denied or minimized. As I stated (dissenting) in *Marshall*, *supra*, at para. 112, one cannot "meaningfully discuss accommodation or justification of a right unless one has some idea of the core of that right and its modern scope". However, it will

solennel » pris par la Couronne lorsqu'elle a reconnu et confirmé les droits et titres ancestraux : *Sparrow*, précité, p. 1108. Une telle attitude risque également d'avoir des conséquences fâcheuses. En effet, il est possible que, lorsque les Autochtones parviennent finalement à établir le bien-fondé de leur revendication, ils trouvent leurs terres changées et leurs ressources épuisées. Ce n'est pas de la conciliation, ni un comportement honorable.

L'existence d'une obligation légale de consulter le groupe intéressé avant qu'il ait apporté la preuve de sa revendication est nécessaire pour comprendre le langage employé dans des affaires comme *Sparrow*, *Nikal* et *Gladstone*, précitées, où la confirmation du droit et la justification de l'atteinte reprochée ont été débattues en même temps. Dans *Sparrow*, par exemple, la référence au comportement de la Couronne au cours de l'examen de la justification des atteintes s'entend du comportement avant l'établissement du droit, ce qui réfute l'argument que ce soit la preuve de l'existence du droit revendiqué qui déclenche l'obligation légale de consulter et, s'il y a lieu, d'accommoder, même dans le contexte de la justification.

Mais à quel moment, précisément, l'obligation de consulter prend-elle naissance? L'objectif de conciliation ainsi que l'obligation de consultation, laquelle repose sur l'honneur de la Couronne, tendent à indiquer que cette obligation prend naissance lorsque la Couronne a connaissance, concrètement ou par imputation, de l'existence potentielle du droit ou titre ancestral revendiqué et envisage des mesures susceptibles d'avoir un effet préjudiciable sur celui-ci : voir *Halfway River First Nation c. British Columbia (Ministry of Forests)*, [1997] 4 C.N.L.R. 45 (C.S.C.-B.), p. 71, le juge Dorgan.

Il reste l'argument d'ordre pratique. On affirme que, tant qu'une revendication n'est pas réglée, la Couronne ne peut pas savoir si les droits revendiqués existent ou non et que, de ce fait, elle ne peut être tenue à une obligation de consulter ou d'accommoder. Cette difficulté ne saurait être niée ou minimisée. Comme je l'ai déclaré (dans mes motifs dissidents) dans *Marshall*, précité, par. 112, on ne peut « analyser utilement la question de la prise en

34

35

36

frequently be possible to reach an idea of the asserted rights and of their strength sufficient to trigger an obligation to consult and accommodate, short of final judicial determination or settlement. To facilitate this determination, claimants should outline their claims with clarity, focussing on the scope and nature of the Aboriginal rights they assert and on the alleged infringements. This is what happened here, where the chambers judge made a preliminary evidence-based assessment of the strength of the Haida claims to the lands and resources of Haida Gwaii, particularly Block 6.

compte d'un droit ou de la justification de ses limites sans avoir une idée de l'essence de ce droit et de sa portée actuelle ». Cependant, il est souvent possible de se faire, à l'égard des droits revendiqués et de leur solidité, une idée suffisamment précise pour que l'obligation de consulter et d'accommoder s'applique, même si ces droits n'ont pas fait l'objet d'un règlement définitif ou d'une décision judiciaire finale. Pour faciliter cette détermination, les demandeurs devraient exposer clairement leurs revendications, en insistant sur la portée et la nature des droits ancestraux qu'ils revendiquent ainsi que sur les violations qu'ils allèguent. C'est ce qui s'est produit en l'espèce, lorsque le juge en son cabinet a procédé à une évaluation préliminaire, fondée sur la preuve, de la solidité des revendications des Haïda à l'égard des terres et des ressources des îles Haïda Gwaii, en particulier du Bloc 6.

37 There is a distinction between knowledge sufficient to trigger a duty to consult and, if appropriate, accommodate, and the content or scope of the duty in a particular case. Knowledge of a credible but unproven claim suffices to trigger a duty to consult and accommodate. The content of the duty, however, varies with the circumstances, as discussed more fully below. A dubious or peripheral claim may attract a mere duty of notice, while a stronger claim may attract more stringent duties. The law is capable of differentiating between tenuous claims, claims possessing a strong *prima facie* case, and established claims. Parties can assess these matters, and if they cannot agree, tribunals and courts can assist. Difficulties associated with the absence of proof and definition of claims are addressed by assigning appropriate content to the duty, not by denying the existence of a duty.

Il y a une différence entre une connaissance suffisante pour entraîner l'application de l'obligation de consulter et, s'il y a lieu, d'accommoder, et le contenu ou l'étendue de cette obligation dans une affaire donnée. La connaissance d'une revendication crédible mais non encore établie suffit à faire naître l'obligation de consulter et d'accommoder. Toutefois, le contenu de l'obligation varie selon les circonstances, comme nous le verrons de façon plus approfondie plus loin. Une revendication douteuse ou marginale peut ne requérir qu'une simple obligation d'informer, alors qu'une revendication plus solide peut faire naître des obligations plus contraignantes. Il est possible en droit de différencier les revendications reposant sur une preuve ténue des revendications reposant sur une preuve à première vue solide et de celles déjà établies. Les parties peuvent examiner la question et, si elles ne réussissent pas à s'entendre, les tribunaux administratifs et judiciaires peuvent leur venir en aide. Il faut régler les problèmes liés à l'absence de preuve et de définition des revendications en délimitant l'obligation de façon appropriée et non en niant son existence.

38 I conclude that consultation and accommodation before final claims resolution, while challenging, is not impossible, and indeed is an essential corollary to the honourable process of reconciliation that s. 35 demands. It preserves the Aboriginal interest

J'estime que, bien que le respect des obligations de consultation et d'accommodement avant le règlement définitif d'une revendication ne soit pas sans poser de problèmes, de telles mesures ne sont toutefois pas impossibles et constituent même un aspect

pending claims resolution and fosters a relationship between the parties that makes possible negotiations, the preferred process for achieving ultimate reconciliation: see S. Lawrence and P. Macklem, “From Consultation to Reconciliation: Aboriginal Rights and the Crown’s Duty to Consult” (2000), 79 *Can. Bar Rev.* 252, at p. 262. Precisely what is required of the government may vary with the strength of the claim and the circumstances. But at a minimum, it must be consistent with the honour of the Crown.

D. *The Scope and Content of the Duty to Consult and Accommodate*

The content of the duty to consult and accommodate varies with the circumstances. Precisely what duties arise in different situations will be defined as the case law in this emerging area develops. In general terms, however, it may be asserted that the scope of the duty is proportionate to a preliminary assessment of the strength of the case supporting the existence of the right or title, and to the seriousness of the potentially adverse effect upon the right or title claimed.

In *Delgamuukw*, *supra*, at para. 168, the Court considered the duty to consult and accommodate in the context of established claims. Lamer C.J. wrote:

The nature and scope of the duty of consultation will vary with the circumstances. In occasional cases, when the breach is less serious or relatively minor, it will be no more than a duty to discuss important decisions that will be taken with respect to lands held pursuant to aboriginal title. Of course, even in these rare cases when the minimum acceptable standard is consultation, this consultation must be in good faith, and with the intention of substantially addressing the concerns of the aboriginal peoples whose lands are at issue. In most cases, it will be significantly deeper than mere consultation. Some cases may even require the full consent of an aboriginal nation, particularly when provinces enact hunting and fishing regulations in relation to aboriginal lands.

essentiel du processus honorable de conciliation imposé par l’art. 35. Elles protègent les intérêts autochtones jusqu’au règlement des revendications et favorisent le développement entre les parties d’une relation propice à la négociation, processus à privilégier pour parvenir finalement à la conciliation : voir S. Lawrence et P. Macklem, « From Consultation to Reconciliation : Aboriginal Rights and the Crown’s Duty to Consult » (2000), 79 *R. du B. can.* 252, p. 262. Les mesures précises que doit prendre le gouvernement peuvent varier selon la solidité de la revendication et les circonstances, mais elles doivent à tout le moins être compatibles avec l’honneur de la Couronne.

D. *L’étendue et le contenu de l’obligation de consulter et d’accommoder*

Le contenu de l’obligation de consulter et d’accommoder varie selon les circonstances. La nature précise des obligations qui naissent dans différentes situations sera définie à mesure que les tribunaux se prononceront sur cette nouvelle question. En termes généraux, il est néanmoins possible d’affirmer que l’étendue de l’obligation dépend de l’évaluation préliminaire de la solidité de la preuve étayant l’existence du droit ou du titre revendiqué, et de la gravité des effets préjudiciables potentiels sur le droit ou le titre.

Dans *Delgamuukw*, précité, par. 168, la Cour a examiné l’obligation de consulter et d’accommoder dans le contexte de revendications dont le bien-fondé a été établi. Le juge en chef Lamer a écrit :

La nature et l’étendue de l’obligation de consultation dépendront des circonstances. Occasionnellement, lorsque le manquement est moins grave ou relativement mineur, il ne s’agira de rien de plus que la simple obligation de discuter des décisions importantes qui seront prises au sujet des terres détenues en vertu d’un titre aborigène. Évidemment, même dans les rares cas où la norme minimale acceptable est la consultation, celle-ci doit être menée de bonne foi, dans l’intention de tenir compte réellement des préoccupations des peuples autochtones dont les terres sont en jeu. Dans la plupart des cas, l’obligation exigera beaucoup plus qu’une simple consultation. Certaines situations pourraient même exiger l’obtention du consentement d’une nation autochtone, particulièrement lorsque des provinces prennent des règlements de chasse et de pêche visant des territoires autochtones.

41 Transposing this passage to pre-proof claims, one may venture the following. While it is not useful to classify situations into watertight compartments, different situations requiring different responses can be identified. In all cases, the honour of the Crown requires that the Crown act with good faith to provide meaningful consultation appropriate to the circumstances. In discharging this duty, regard may be had to the procedural safeguards of natural justice mandated by administrative law.

42 At all stages, good faith on both sides is required. The common thread on the Crown's part must be "the intention of substantially addressing [Aboriginal] concerns" as they are raised (*Delgamuukw*, *supra*, at para. 168), through a meaningful process of consultation. Sharp dealing is not permitted. However, there is no duty to agree; rather, the commitment is to a meaningful process of consultation. As for Aboriginal claimants, they must not frustrate the Crown's reasonable good faith attempts, nor should they take unreasonable positions to thwart government from making decisions or acting in cases where, despite meaningful consultation, agreement is not reached: see *Halfway River First Nation v. British Columbia (Ministry of Forests)*, [1999] 4 C.N.L.R. 1 (B.C.C.A.), at p. 44; *Heiltsuk Tribal Council v. British Columbia (Minister of Sustainable Resource Management)* (2003), 19 B.C.L.R. (4th) 107 (B.C.S.C.). Mere hard bargaining, however, will not offend an Aboriginal people's right to be consulted.

43 Against this background, I turn to the kind of duties that may arise in different situations. In this respect, the concept of a spectrum may be helpful, not to suggest watertight legal compartments but rather to indicate what the honour of the Crown may require in particular circumstances. At one end of the spectrum lie cases where the claim to title is weak, the Aboriginal right limited, or the potential for infringement minor. In such cases, the only duty

La transposition de ce passage dans le contexte des revendications non encore établies permet d'avancer ce qui suit. Bien qu'il ne soit pas utile de classer les situations dans des compartiments étanches, il est possible d'identifier différentes situations appelant des solutions différentes. Dans tous les cas, le principe de l'honneur de la Couronne commande que celle-ci agisse de bonne foi et tienne une véritable consultation, qui soit appropriée eu égard aux circonstances. Lorsque vient le temps de s'acquitter de cette obligation, les garanties procédurales de justice naturelle exigées par le droit administratif peuvent servir de guide.

À toutes les étapes, les deux parties sont tenues de faire montre de bonne foi. Le fil conducteur du côté de la Couronne doit être « l'intention de tenir compte réellement des préoccupations [des Autochtones] » à mesure qu'elles sont exprimées (*Delgamuukw*, précité, par. 168), dans le cadre d'un véritable processus de consultation. Les manœuvres malhonnêtes sont interdites. Cependant, il n'y a pas obligation de parvenir à une entente mais plutôt de procéder à de véritables consultations. Quant aux demandeurs autochtones, ils ne doivent pas contrecarrer les efforts déployés de bonne foi par la Couronne et ne devraient pas non plus défendre des positions déraisonnables pour empêcher le gouvernement de prendre des décisions ou d'agir dans les cas où, malgré une véritable consultation, on ne parvient pas à s'entendre : voir *Halfway River First Nation c. British Columbia (Ministry of Forests)*, [1999] 4 C.N.L.R. 1 (C.A.C.-B.), p. 44; *Heiltsuk Tribal Council c. British Columbia (Minister of Sustainable Resource Management)* (2003), 19 B.C.L.R. (4th) 107 (C.S.C.-B.). Toutefois, le seul fait de négocier de façon serrée ne porte pas atteinte au droit des Autochtones d'être consultés.

Sur cette toile de fond, je vais maintenant examiner le type d'obligations qui peuvent découler de différentes situations. À cet égard, l'utilisation de la notion de continuum peut se révéler utile, non pas pour créer des compartiments juridiques étanches, mais plutôt pour préciser ce que le principe de l'honneur de la Couronne est susceptible d'exiger dans des circonstances particulières. À une extrémité du continuum se trouvent les cas où la revendication

on the Crown may be to give notice, disclose information, and discuss any issues raised in response to the notice. “[C]onsultation’ in its least technical definition is talking together for mutual understanding”: T. Isaac and A. Knox, “The Crown’s Duty to Consult Aboriginal People” (2003), 41 *Alta. L. Rev.* 49, at p. 61.

At the other end of the spectrum lie cases where a strong *prima facie* case for the claim is established, the right and potential infringement is of high significance to the Aboriginal peoples, and the risk of non-compensable damage is high. In such cases deep consultation, aimed at finding a satisfactory interim solution, may be required. While precise requirements will vary with the circumstances, the consultation required at this stage may entail the opportunity to make submissions for consideration, formal participation in the decision-making process, and provision of written reasons to show that Aboriginal concerns were considered and to reveal the impact they had on the decision. This list is neither exhaustive, nor mandatory for every case. The government may wish to adopt dispute resolution procedures like mediation or administrative regimes with impartial decision-makers in complex or difficult cases.

Between these two extremes of the spectrum just described, will lie other situations. Every case must be approached individually. Each must also be approached flexibly, since the level of consultation required may change as the process goes on and new information comes to light. The controlling question in all situations is what is required to maintain the honour of the Crown and to effect reconciliation between the Crown and the Aboriginal peoples with respect to the interests at stake. Pending settlement, the Crown is bound by its honour to balance societal and Aboriginal interests in making decisions that may affect Aboriginal claims. The Crown

de titre est peu solide, le droit ancestral limité ou le risque d’atteinte faible. Dans ces cas, les seules obligations qui pourraient incomber à la Couronne seraient d’aviser les intéressés, de leur communiquer des renseignements et de discuter avec eux des questions soulevées par suite de l’avis. La [TRADUCTION] « “consultation”, dans son sens le moins technique, s’entend de l’action de se parler dans le but de se comprendre les uns les autres » : T. Isaac et A. Knox, « The Crown’s Duty to Consult Aboriginal People » (2003), 41 *Alta. L. Rev.* 49, p. 61.

À l’autre extrémité du continuum on trouve les cas où la revendication repose sur une preuve à première vue solide, où le droit et l’atteinte potentielle sont d’une haute importance pour les Autochtones et où le risque de préjudice non indemnisable est élevé. Dans de tels cas, il peut s’avérer nécessaire de tenir une consultation approfondie en vue de trouver une solution provisoire acceptable. Quoique les exigences précises puissent varier selon les circonstances, la consultation requise à cette étape pourrait comporter la possibilité de présenter des observations, la participation officielle à la prise de décisions et la présentation de motifs montrant que les préoccupations des Autochtones ont été prises en compte et précisant quelle a été l’incidence de ces préoccupations sur la décision. Cette liste n’est pas exhaustive et ne doit pas nécessairement être suivie dans chaque cas. Dans les affaires complexes ou difficiles, le gouvernement peut décider de recourir à un mécanisme de règlement des différends comme la médiation ou un régime administratif mettant en scène des décideurs impartiaux.

Entre les deux extrémités du continuum décrit précédemment, on rencontrera d’autres situations. Il faut procéder au cas par cas. Il faut également faire preuve de souplesse, car le degré de consultation nécessaire peut varier à mesure que se déroule le processus et que de nouveaux renseignements sont mis au jour. La question décisive dans toutes les situations consiste à déterminer ce qui est nécessaire pour préserver l’honneur de la Couronne et pour concilier les intérêts de la Couronne et ceux des Autochtones. Tant que la question n’est pas réglée, le principe de l’honneur de la Couronne commande que celle-ci mette en balance les

may be required to make decisions in the face of disagreement as to the adequacy of its response to Aboriginal concerns. Balance and compromise will then be necessary.

intérêts de la société et ceux des peuples autochtones lorsqu'elle prend des décisions susceptibles d'entraîner des répercussions sur les revendications autochtones. Elle peut être appelée à prendre des décisions en cas de désaccord quant au caractère suffisant des mesures qu'elle adopte en réponse aux préoccupations exprimées par les Autochtones. Une attitude de pondération et de compromis s'impose alors.

46 Meaningful consultation may oblige the Crown to make changes to its proposed action based on information obtained through consultations. The New Zealand Ministry of Justice's *Guide for Consultation with Māori* (1997) provides insight (at pp. 21 and 31):

À la suite de consultations véritables, la Couronne pourrait être amenée à modifier la mesure envisagée en fonction des renseignements obtenus lors des consultations. Le *Guide for Consultation with Māori* (1997) du ministère de la Justice de la Nouvelle-Zélande fournit des indications sur la question (aux p. 21 et 31):

Consultation is not just a process of exchanging information. It also entails testing and being prepared to amend policy proposals in the light of information received, and providing feedback. Consultation therefore becomes a process which should ensure both parties are better informed

[TRADUCTION] La consultation n'est pas seulement un simple mécanisme d'échange de renseignements. Elle comporte également des mises à l'épreuve et la modification éventuelle des énoncés de politique compte tenu des renseignements obtenus ainsi que la rétroaction. Elle devient donc un processus grâce auquel les deux parties sont mieux informées . . .

. . . .

. . . .

... genuine consultation means a process that involves . . . :

... de véritables consultations s'entendent d'un processus qui consiste . . . :

- gathering information to test policy proposals
- putting forward proposals that are not yet finalised
- seeking Māori opinion on those proposals
- informing Māori of all relevant information upon which those proposals are based
- not promoting but listening with an open mind to what Māori have to say
- being prepared to alter the original proposal
- providing feedback both during the consultation process and after the decision-process.

- à recueillir des renseignements pour mettre à l'épreuve les énoncés de politique;
- à proposer des énoncés qui ne sont pas encore arrêtés définitivement;
- à chercher à obtenir l'opinion des Māoris sur ces énoncés;
- à informer les Māoris de tous les renseignements pertinents sur lesquels reposent ces énoncés;
- à écouter avec un esprit ouvert ce que les Māoris ont à dire sans avoir à en faire la promotion;
- à être prêt à modifier l'énoncé original;
- à fournir une rétroaction tant au cours de la consultation qu'après la prise de décision.

47 When the consultation process suggests amendment of Crown policy, we arrive at the stage of accommodation. Thus the effect of good faith consultation may be to reveal a duty to accommodate. Where a strong *prima facie* case exists for the claim,

S'il ressort des consultations que des modifications à la politique de la Couronne s'imposent, il faut alors passer à l'étape de l'accommodement. Des consultations menées de bonne foi peuvent donc faire naître l'obligation d'accommoder. Lorsque la

and the consequences of the government's proposed decision may adversely affect it in a significant way, addressing the Aboriginal concerns may require taking steps to avoid irreparable harm or to minimize the effects of infringement, pending final resolution of the underlying claim. Accommodation is achieved through consultation, as this Court recognized in *R. v. Marshall*, [1999] 3 S.C.R. 533, at para. 22: "... the process of accommodation of the treaty right may best be resolved by consultation and negotiation".

This process does not give Aboriginal groups a veto over what can be done with land pending final proof of the claim. The Aboriginal "consent" spoken of in *Delgamuukw* is appropriate only in cases of established rights, and then by no means in every case. Rather, what is required is a process of balancing interests, of give and take.

This flows from the meaning of "accommodate". The terms "accommodate" and "accommodation" have been defined as to "adapt, harmonize, reconcile" ... "an adjustment or adaptation to suit a special or different purpose ... a convenient arrangement; a settlement or compromise": *Concise Oxford Dictionary of Current English* (9th ed. 1995), at p. 9. The accommodation that may result from pre-proof consultation is just this — seeking compromise in an attempt to harmonize conflicting interests and move further down the path of reconciliation. A commitment to the process does not require a duty to agree. But it does require good faith efforts to understand each other's concerns and move to address them.

The Court's decisions confirm this vision of accommodation. The Court in *Sparrow* raised

revendication repose sur une preuve à première vue solide et que la décision que le gouvernement entend prendre risque de porter atteinte de manière appréciable aux droits visés par la revendication, l'obligation d'accommodement pourrait exiger l'adoption de mesures pour éviter un préjudice irréparable ou pour réduire au minimum les conséquences de l'atteinte jusqu'au règlement définitif de la revendication sous-jacente. L'accommodement est le fruit des consultations, comme la Cour l'a reconnu dans *R. c. Marshall*, [1999] 3 R.C.S. 533, par. 22 : « ... il est préférable de réaliser la prise en compte du droit issu du traité par des consultations et par la négociation ».

Ce processus ne donne pas aux groupes autochtones un droit de veto sur les mesures susceptibles d'être prises à l'égard des terres en cause en attendant que la revendication soit établie de façon définitive. Le « consentement » dont il est question dans *Delgamuukw* n'est nécessaire que lorsque les droits invoqués ont été établis, et même là pas dans tous les cas. Ce qu'il faut au contraire, c'est plutôt un processus de mise en balance des intérêts, de concessions mutuelles.

Cette conclusion découle du sens des termes « accommoder » et « accommodement », définis respectivement ainsi : « **Accommoder qqc. à.** L'adapter à, la mettre en correspondance avec quelque chose ... » et « Action, résultat de l'action d'accommoder (ou de s'accommoder); moyen employé en vue de cette action. [...] Action de (se) mettre ou fait d'être en accord avec quelqu'un; règlement à l'amiable, transaction » (*Trésor de la langue française*, t. 1, 1971, p. 391 et 388). L'accommodement susceptible de résulter de consultations menées avant l'établissement du bien-fondé de la revendication correspond exactement à cela : la recherche d'un compromis dans le but d'harmoniser des intérêts opposés et de continuer dans la voie de la réconciliation. L'engagement à suivre le processus n'emporte pas l'obligation de se mettre d'accord, mais exige de chaque partie qu'elle s'efforce de bonne foi à comprendre les préoccupations de l'autre et à y répondre.

La jurisprudence de la Cour confirme cette conception d'accommodement. Dans *Sparrow*, la Cour

the concept of accommodation, stressing the need to balance competing societal interests with Aboriginal and treaty rights. In *R. v. Sioui*, [1990] 1 S.C.R. 1025, at p. 1072, the Court stated that the Crown bears the burden of proving that its occupancy of lands “cannot be accommodated to reasonable exercise of the Hurons’ rights”. And in *R. v. Côté*, [1996] 3 S.C.R. 139, at para. 81, the Court spoke of whether restrictions on Aboriginal rights “can be accommodated with the Crown’s special fiduciary relationship with First Nations”. Balance and compromise are inherent in the notion of reconciliation. Where accommodation is required in making decisions that may adversely affect as yet unproven Aboriginal rights and title claims, the Crown must balance Aboriginal concerns reasonably with the potential impact of the decision on the asserted right or title and with other societal interests.

a évoqué cette notion, insistant sur la nécessité d’établir un équilibre entre des intérêts sociétaux opposés et les droits ancestraux et issus de traités des Autochtones. Dans *R. c. Sioui*, [1990] 1 R.C.S. 1025, p. 1072, la Cour a affirmé qu’il incombe à la Couronne de prouver que son occupation des terres « ne peut s’accommoder de l’exercice raisonnable des droits des Hurons ». Et, dans *R. c. Côté*, [1996] 3 R.C.S. 139, par. 81, la Cour s’est demandé si les restrictions imposées aux droits ancestraux « [étaient] conciliable[s] avec les rapports spéciaux de fiduciaire de l’État à l’égard des premières nations ». La mise en équilibre et le compromis font partie intégrante de la notion de conciliation. Lorsque l’accommodement est nécessaire à l’occasion d’une décision susceptible d’avoir un effet préjudiciable sur des revendications de droits et de titre ancestraux non encore prouvées, la Couronne doit établir un équilibre raisonnable entre les préoccupations des Autochtones, d’une part, et l’incidence potentielle de la décision sur le droit ou titre revendiqué et les autres intérêts sociétaux, d’autre part.

51

It is open to governments to set up regulatory schemes to address the procedural requirements appropriate to different problems at different stages, thereby strengthening the reconciliation process and reducing recourse to the courts. As noted in *R. v. Adams*, [1996] 3 S.C.R. 101, at para. 54, the government “may not simply adopt an unstructured discretionary administrative regime which risks infringing aboriginal rights in a substantial number of applications in the absence of some explicit guidance”. It should be observed that, since October 2002, British Columbia has had a Provincial Policy for Consultation with First Nations to direct the terms of provincial ministries’ and agencies’ operational guidelines. Such a policy, while falling short of a regulatory scheme, may guard against unstructured discretion and provide a guide for decision-makers.

Il est loisible aux gouvernements de mettre en place des régimes de réglementation fixant les exigences procédurales applicables aux différents problèmes survenant à différentes étapes, et ainsi de renforcer le processus de conciliation et réduire le recours aux tribunaux. Comme il a été mentionné dans *R. c. Adams*, [1996] 3 R.C.S. 101, par. 54, le gouvernement « ne peut pas se contenter d’établir un régime administratif fondé sur l’exercice d’un pouvoir discrétionnaire non structuré et qui, en l’absence d’indications explicites, risque de porter atteinte aux droits ancestraux dans un nombre considérable de cas ». Il convient de souligner que, depuis octobre 2002, la Colombie-Britannique dispose d’une politique provinciale de consultation des Premières nations établissant les modalités d’application des lignes directrices opérationnelles des ministères et organismes provinciaux. Même si elle ne constitue pas un régime de réglementation, une telle politique peut néanmoins prévenir l’exercice d’un pouvoir discrétionnaire non structuré et servir de guide aux décideurs.

E. *Do Third Parties Owe a Duty to Consult and Accommodate?*

The Court of Appeal found that Weyerhaeuser, the forestry contractor holding T.F.L. 39, owed the Haida people a duty to consult and accommodate. With respect, I cannot agree.

It is suggested (*per* Lambert J.A.) that a third party's obligation to consult Aboriginal peoples may arise from the ability of the third party to rely on justification as a defence against infringement. However, the duty to consult and accommodate, as discussed above, flows from the Crown's assumption of sovereignty over lands and resources formerly held by the Aboriginal group. This theory provides no support for an obligation on third parties to consult or accommodate. The Crown alone remains legally responsible for the consequences of its actions and interactions with third parties, that affect Aboriginal interests. The Crown may delegate procedural aspects of consultation to industry proponents seeking a particular development; this is not infrequently done in environmental assessments. Similarly, the terms of T.F.L. 39 mandated Weyerhaeuser to specify measures that it would take to identify and consult with "aboriginal people claiming an aboriginal interest in or to the area" (Tree Farm Licence No. 39, Haida Tree Farm Licence, para. 2.09(g)(ii)). However, the ultimate legal responsibility for consultation and accommodation rests with the Crown. The honour of the Crown cannot be delegated.

It is also suggested (*per* Lambert J.A.) that third parties might have a duty to consult and accommodate on the basis of the trust law doctrine of "knowing receipt". However, as discussed above, while the Crown's fiduciary obligations and its duty to consult and accommodate share roots in the principle that the Crown's honour is engaged in its relationship with Aboriginal peoples, the duty to consult is distinct from the fiduciary duty that is owed in relation to particular cognizable Aboriginal interests.

E. *Les tiers ont-ils l'obligation de consulter et d'accommoder?*

La Cour d'appel a conclu que Weyerhaeuser, l'entreprise forestière détenant la CFF 39, avait l'obligation de consulter les Haïda et de trouver des accommodements à leurs préoccupations. En toute déférence, je ne puis souscrire à cette conclusion.

Il a été dit (le juge Lambert de la Cour d'appel) qu'un tiers peut être tenu de consulter les Autochtones concernés du fait qu'il a la faculté, en cas de violation des droits de ces derniers, de plaider en défense que l'atteinte est justifiée. Comme nous l'avons vu, cependant, l'obligation de consulter et d'accommoder découle de la proclamation de la souveraineté de la Couronne sur des terres et ressources autrefois détenues par le groupe autochtone concerné. Cette théorie ne permet pas de conclure que les tiers ont l'obligation de consulter ou d'accommoder. La Couronne demeure seule légalement responsable des conséquences de ses actes et de ses rapports avec des tiers qui ont une incidence sur des intérêts autochtones. Elle peut déléguer certains aspects procéduraux de la consultation à des acteurs industriels qui proposent des activités d'exploitation; cela n'est pas rare en matière d'évaluations environnementales. Ainsi, la CFF 39 obligeait Weyerhaeuser à préciser les mesures qu'elle entendait prendre pour identifier et consulter les [TRADUCTION] « Autochtones qui revendiquaient un intérêt ancestral dans la région » (CFF 39, CFF haïda, paragraphe 2.09g)(ii)). Cependant, la responsabilité juridique en ce qui a trait à la consultation et à l'accommodement incombe en dernier ressort à la Couronne. Le respect du principe de l'honneur de la Couronne ne peut être délégué.

Il a également été avancé (le juge Lambert de la Cour d'appel) que les tiers pourraient être assujettis à l'obligation de consulter et d'accommoder par l'effet de la doctrine du droit des fiducies appelée « réception en connaissance de cause ». Cependant, comme nous l'avons vu, même si les obligations de fiduciaire de la Couronne et son obligation de consulter et d'accommoder découlent toutes du principe que l'honneur de la Couronne est en jeu dans ses rapports avec les peuples autochtones, l'obligation de

52

53

54

As noted earlier, the Court cautioned in *Wewaykum* against assuming that a general trust or fiduciary obligation governs all aspects of relations between the Crown and Aboriginal peoples. Furthermore, this Court in *Guerin v. The Queen*, [1984] 2 S.C.R. 335, made it clear that the “trust-like” relationship between the Crown and Aboriginal peoples is not a true “trust”, noting that “[t]he law of trusts is a highly developed, specialized branch of the law” (p. 386). There is no reason to graft the doctrine of knowing receipt onto the special relationship between the Crown and Aboriginal peoples. It is also questionable whether businesses acting on licence from the Crown can be analogized to persons who knowingly turn trust funds to their own ends.

consulter est différente de l’obligation de fiduciaire qui existe à l’égard de certains intérêts autochtones reconnus. Comme il a été indiqué plus tôt, la Cour a souligné, dans *Wewaykum*, qu’il fallait se garder de supposer l’existence d’une obligation générale de fiduciaire régissant tous les aspects des rapports entre la Couronne et les peuples autochtones. En outre, dans *Guerin c. La Reine*, [1984] 2 R.C.S. 335, la Cour a clairement dit que la relation « semblable à une fiducie » qui existe entre la Couronne et les peuples autochtones n’est pas une vraie « fiducie », faisant observer que « [l]e droit des fiducies constitue un domaine juridique très perfectionné et spécialisé » (p. 386). Il n’y a aucune raison d’introduire la doctrine de la réception en connaissance de cause dans la relation spéciale qui existe entre la Couronne et les peuples autochtones. Il n’est pas certain non plus qu’une entreprise en vertu d’une concession de la Couronne puisse être assimilée à une personne qui, en toute connaissance de cause, divertit à son profit des fonds en fiducie.

55

Finally, it is suggested (*per* Finch C.J.B.C.) that third parties should be held to the duty in order to provide an effective remedy. The first difficulty with this suggestion is that remedies do not dictate liability. Once liability is found, the question of remedy arises. But the remedy tail cannot wag the liability dog. We cannot sue a rich person, simply because the person has deep pockets or can provide a desired result. The second problem is that it is not clear that the government lacks sufficient remedies to achieve meaningful consultation and accommodation. In this case, Part 10 of T.F.L. 39 provided that the Ministry of Forests could vary any permit granted to Weyerhaeuser to be consistent with a court’s determination of Aboriginal rights or title. The government may also require Weyerhaeuser to amend its management plan if the Chief Forester considers that interference with an Aboriginal right has rendered the management plan inadequate (para. 2.38(d)). Finally, the government can control by legislation, as it did when it introduced the *Forestry Revitalization Act*, S.B.C. 2003, c. 17, which claws back 20 percent of all licensees’ harvesting rights, in part to make land available for Aboriginal peoples. The government’s legislative authority over provincial natural resources gives it

Enfin, il a été affirmé (le juge Finch, juge en chef de la C.-B.) que, pour qu’il soit possible d’accorder une réparation efficace, il faudrait considérer que les tiers sont tenus à l’obligation. La première difficulté que comporte cette affirmation réside dans le fait que la réparation ne détermine pas la responsabilité. Ce n’est qu’une fois la question de la responsabilité tranchée que se soulève la question de la réparation. Il ne faut pas mettre la charrue (la réparation) devant les bœufs (la responsabilité). Nous ne pouvons poursuivre une personne riche simplement parce qu’elle a de l’argent plein les poches ou que cela permet d’obtenir le résultat souhaité. La seconde difficulté est qu’il n’est pas certain que le gouvernement ne dispose pas de mécanismes suffisants pour procéder à des mesures de consultation et d’accommodement utiles. En l’espèce, la partie 10 de la CFF 39 prévoit que le ministre des Forêts peut modifier toute concession accordée à Weyerhaeuser pour la rendre conforme aux décisions des tribunaux relativement aux droits ou titres ancestraux. Le gouvernement peut également exiger de Weyerhaeuser qu’elle modifie son plan d’aménagement si le chef des services forestiers le considère inadéquat du fait qu’il porte atteinte à un droit ancestral (paragraphe 2.38d)). Enfin, le

a powerful tool with which to respond to its legal obligations. This, with respect, renders questionable the statement by Finch C.J.B.C. that the government “has no capacity to allocate any part of that timber to the Haida without Weyerhaeuser’s consent or co-operation” ((2002), 5 B.C.L.R. (4th) 33, at para. 119). Failure to hold Weyerhaeuser to a duty to consult and accommodate does not make the remedy “hollow or illusory”.

The fact that third parties are under no duty to consult or accommodate Aboriginal concerns does not mean that they can never be liable to Aboriginal peoples. If they act negligently in circumstances where they owe Aboriginal peoples a duty of care, or if they breach contracts with Aboriginal peoples or deal with them dishonestly, they may be held legally liable. But they cannot be held liable for failing to discharge the Crown’s duty to consult and accommodate.

F. *The Province’s Duty*

The Province of British Columbia argues that any duty to consult or accommodate rests solely with the federal government. I cannot accept this argument.

The Province’s argument rests on s. 109 of the *Constitution Act, 1867*, which provides that “[a]ll Lands, Mines, Minerals, and Royalties belonging to the several Provinces of Canada . . . at the Union . . . shall belong to the several Provinces.” The Province argues that this gives it exclusive right to the land at issue. This right, it argues, cannot be limited by the protection for Aboriginal rights found in s. 35 of the *Constitution Act, 1982*. To do

gouvernement peut exercer son autorité sur la question par voie législative, comme il l’a fait en édictant la *Forestry Revitalization Act*, S.B.C. 2003, ch. 17, qui permet de récupérer 20 pour 100 du droit de coupe des titulaires de concession, en partie pour mettre des terres à la disposition des peuples autochtones. De par son pouvoir de légiférer sur les ressources naturelles de la province, le gouvernement provincial dispose d’un outil puissant pour s’acquitter de ses obligations légales, situation qui met en doute l’affirmation du juge en chef Finch de la C.-B. qu’il [TRADUCTION] « ne peut allouer une partie de ce bois d’œuvre aux Haïda sans le consentement ou la collaboration de Weyerhaeuser » ((2002), 5 B.C.L.R. (4th) 33, par. 119). Le fait de ne pas imposer à Weyerhaeuser l’obligation de consulter et d’accommoder ne rend pas la réparation [TRADUCTION] « futile ou illusoire ».

Le fait que les tiers n’aient aucune obligation de consulter les peuples autochtones ou de trouver des accommodements à leurs préoccupations ne signifie pas qu’ils ne peuvent jamais être tenus responsables envers ceux-ci. S’ils font preuve de négligence dans des circonstances où ils ont une obligation de diligence envers les peuples autochtones, ou s’ils ne respectent pas les contrats conclus avec les Autochtones ou traitent avec eux d’une manière malhonnête, ils peuvent être tenus légalement responsables. Cependant, les tiers ne peuvent être jugés responsables de ne pas avoir rempli l’obligation de consulter et d’accommoder qui incombe à la Couronne.

F. *L’obligation de la province*

La province de la Colombie-Britannique soutient que l’obligation de consulter ou d’accommoder, si elle existe, incombe uniquement au gouvernement fédéral. Je ne peux accepter cet argument.

L’argument de la province repose sur l’art. 109 de la *Loi constitutionnelle de 1867*, qui dispose que « [t]outes les terres, mines, minéraux et réserves royales appartenant aux différentes provinces du Canada [. . .] lors de l’union [. . .] appartiendront aux différentes provinces. » Selon la province, cette disposition lui confère des droits exclusifs sur les terres en question. Ce droit, affirme-t-elle, ne peut être limité par la protection accordée aux

so, it argues, would “undermine the balance of federalism” (Crown’s factum, at para. 96).

droits ancestraux par l’art. 35 de la *Loi constitutionnelle de 1982*. La province affirme qu’agir ainsi reviendrait à [TRADUCTION] « rompre l’équilibre du fédéralisme » (mémoire de la Couronne, par. 96).

59

The answer to this argument is that the Provinces took their interest in land subject to “any Interest other than that of the Province in the same” (s. 109). The duty to consult and accommodate here at issue is grounded in the assertion of Crown sovereignty which pre-dated the Union. It follows that the Province took the lands subject to this duty. It cannot therefore claim that s. 35 deprives it of powers it would otherwise have enjoyed. As stated in *St. Catherine’s Milling and Lumber Co. v. The Queen* (1888), 14 App. Cas. 46 (P.C.), lands in the Province are “available to [the Province] as a source of revenue whenever the estate of the Crown is disencumbered of the Indian title” (p. 59). The Crown’s argument on this point has been canvassed by this Court in *Delgamuukw*, *supra*, at para. 175, where Lamer C.J. reiterated the conclusions in *St. Catherine’s Milling*, *supra*. There is therefore no foundation to the Province’s argument on this point.

La réponse à cet argument est que les intérêts que détenait la province sur les terres sont subordonnés à « tous intérêts autres que ceux que peut y avoir la province » (art. 109). L’obligation de consulter et d’accommoder en litige dans la présente affaire est fondée sur l’affirmation de la souveraineté de la Couronne qui a précédé l’Union. Il s’ensuit que la province a acquis les terres sous réserve de cette obligation. Elle ne peut donc pas prétendre que l’art. 35 la prive de pouvoirs dont elle aurait joui autrement. Comme il est précisé dans *St. Catherine’s Milling and Lumber Co. c. The Queen* (1888), 14 App. Cas. 46 (C.P.), les terres situées dans la province [TRADUCTION] « peuvent constituer une source de revenus [pour la province] dans tous les cas où les biens de la Couronne ne sont plus grevés du titre indien » (p. 59). L’argument de la Couronne sur ce point a été examiné de façon approfondie par la Cour dans *Delgamuukw*, précité, par. 175, où le juge en chef Lamer a réitéré les conclusions tirées dans *St. Catherine’s Milling*, précité. Cet argument n’est en conséquence pas fondé.

G. Administrative Review

G. L’examen administratif

60

Where the government’s conduct is challenged on the basis of allegations that it failed to discharge its duty to consult and accommodate pending claims resolution, the matter may go to the courts for review. To date, the Province has established no process for this purpose. The question of what standard of review the court should apply in judging the adequacy of the government’s efforts cannot be answered in the absence of such a process. General principles of administrative law, however, suggest the following.

Lorsque la conduite du gouvernement est contestée au motif qu’il ne se serait pas acquitté de son obligation de consulter et d’accommoder en attendant le règlement des revendications, la question peut être soumise aux tribunaux pour examen. La province n’a pas encore établi de mécanisme à cette fin. En l’absence d’un tel mécanisme, il est impossible de déterminer quelle norme de contrôle devrait appliquer le tribunal appelé à statuer sur le caractère suffisant des efforts déployés par le gouvernement. Les principes généraux du droit administratif permettent toutefois de dégager les notions suivantes.

61

On questions of law, a decision-maker must generally be correct: for example, *Paul v. British Columbia (Forest Appeals Commission)*, [2003] 2 S.C.R. 585, 2003 SCC 55. On questions of fact or

Quant aux questions de droit, le décideur doit, en règle générale, rendre une décision correcte : voir, par exemple, *Paul c. Colombie-Britannique (Forest Appeals Commission)*, [2003] 2 R.C.S.

mixed fact and law, on the other hand, a reviewing body may owe a degree of deference to the decision-maker. The existence or extent of the duty to consult or accommodate is a legal question in the sense that it defines a legal duty. However, it is typically premised on an assessment of the facts. It follows that a degree of deference to the findings of fact of the initial adjudicator may be appropriate. The need for deference and its degree will depend on the nature of the question the tribunal was addressing and the extent to which the facts were within the expertise of the tribunal: *Law Society of New Brunswick v. Ryan*, [2003] 1 S.C.R. 247, 2003 SCC 20; *Paul*, *supra*. Absent error on legal issues, the tribunal may be in a better position to evaluate the issue than the reviewing court, and some degree of deference may be required. In such a case, the standard of review is likely to be reasonableness. To the extent that the issue is one of pure law, and can be isolated from the issues of fact, the standard is correctness. However, where the two are inextricably entwined, the standard will likely be reasonableness: *Canada (Director of Investigation and Research) v. Southam Inc.*, [1997] 1 S.C.R. 748.

The process itself would likely fall to be examined on a standard of reasonableness. Perfect satisfaction is not required; the question is whether the regulatory scheme or government action “viewed as a whole, accommodates the collective aboriginal right in question”: *Gladstone*, *supra*, at para. 170. What is required is not perfection, but reasonableness. As stated in *Nikal*, *supra*, at para. 110, “in . . . information and consultation the concept of reasonableness must come into play. . . . So long as every reasonable effort is made to inform and to consult, such efforts would suffice.” The government is required to make reasonable efforts

585, 2003 CSC 55. Par contre, en ce qui a trait aux questions de fait et aux questions mixtes de fait et de droit, l’organisme de révision peut devoir faire preuve de déférence à l’égard du décideur. L’existence et l’étendue de l’obligation de consulter ou d’accommoder sont des questions de droit en ce sens qu’elles définissent une obligation légale. Cependant, la réponse à ces questions repose habituellement sur l’appréciation des faits. Il se peut donc qu’il convienne de faire preuve de déférence à l’égard des conclusions de fait du premier décideur. La question de savoir s’il y a lieu de faire montre de déférence et, si oui, le degré de déférence requis dépendent de la nature de la question dont était saisi le tribunal administratif et de la mesure dans laquelle les faits relevaient de son expertise : *Barreau du Nouveau-Brunswick c. Ryan*, [2003] 1 R.C.S. 247, 2003 CSC 20; *Paul*, précité. En l’absence d’erreur sur des questions de droit, il est possible que le tribunal administratif soit mieux placé que le tribunal de révision pour étudier la question, auquel cas une certaine déférence peut s’imposer. Dans ce cas, la norme de contrôle applicable est vraisemblablement la norme de la décision raisonnable. Dans la mesure où la question est une question de droit pur et peut être isolée des questions de fait, la norme applicable est celle de la décision correcte. Toutefois, lorsque les deux types de questions sont inextricablement liées entre elles, la norme de contrôle applicable est vraisemblablement celle de la décision raisonnable : *Canada (Directeur des enquêtes et recherches) c. Southam Inc.*, [1997] 1 R.C.S. 748.

Le processus lui-même devrait vraisemblablement être examiné selon la norme de la décision raisonnable. La perfection n’est pas requise; il s’agit de se demander si, « considéré dans son ensemble, le régime de réglementation [ou la mesure gouvernementale] respecte le droit ancestral collectif en question » : *Gladstone*, précité, par. 170. Ce qui est requis, ce n’est pas une mesure parfaite mais une mesure raisonnable. Comme il est précisé dans *Nikal*, précité, par. 110, « [l]e concept du caractère raisonnable doit [. . .] entrer en jeu pour ce qui [. . .] concern[e] l’information et la consultation. [. . .] Dans la mesure où tous les efforts raisonnables ont

to inform and consult. This suffices to discharge the duty.

été déployés pour informer et consulter, on a alors satisfait à l'obligation de justifier. » Le gouvernement doit déployer des efforts raisonnables pour informer et consulter. Cela suffit pour satisfaire à l'obligation.

63 Should the government misconceive the seriousness of the claim or impact of the infringement, this question of law would likely be judged by correctness. Where the government is correct on these matters and acts on the appropriate standard, the decision will be set aside only if the government's process is unreasonable. The focus, as discussed above, is not on the outcome, but on the process of consultation and accommodation.

Si le gouvernement n'a pas bien saisi l'importance de la revendication ou la gravité de l'atteinte, il s'agit d'une question de droit qui devra vraisemblablement être jugée selon la norme de la décision correcte. Si le gouvernement a raison sur ces points et agit conformément à la norme applicable, la décision ne sera annulée que si le processus qu'il a suivi était déraisonnable. Comme il a été expliqué précédemment, l'élément central n'est pas le résultat, mais le processus de consultation et d'accommodement.

H. *Application to the Facts*

H. *L'application aux faits*

(1) Existence of the Duty

(1) L'existence de l'obligation

64 The question is whether the Province had knowledge, real or constructive, of the potential existence of Aboriginal right or title and contemplated conduct that might adversely affect them. On the evidence before the Court in this matter, the answer must unequivocally be "yes".

Il s'agit de savoir si la province connaissait, concrètement ou par imputation, l'existence potentielle d'un droit ou titre ancestral et envisageait des mesures susceptibles d'avoir un effet préjudiciable sur ce droit ou titre. Compte tenu de la preuve présentée à la Cour en l'espèce, il ne fait aucun doute qu'il faut répondre « oui » à cette question.

65 The Haida have claimed title to all of Haida Gwaii for at least 100 years. The chambers judge found that they had expressed objections to the Province for a number of years regarding the rate of logging of old-growth forests, methods of logging, and the environmental effects of logging. Further, the Province was aware since at least 1994 that the Haida objected to replacement of T.F.L. 39 without their consent and without accommodation with respect to their title claims. As found by the chambers judge, the Province has had available evidence of the Haida's exclusive use and occupation of some areas of Block 6 "[s]ince 1994, and probably much earlier". The Province has had available to it evidence of the importance of red cedar to the Haida culture since before 1846 (the assertion of British sovereignty).

Les Haïda revendiquent depuis au moins 100 ans le titre sur l'ensemble des îles Haida Gwaii. Le juge de première instance a conclu que les Haïda se plaignaient depuis plusieurs années auprès de la province du rythme d'exploitation des vieilles forêts, des méthodes d'exploitation et des répercussions de l'exploitation forestière sur l'environnement. De plus, la province savait, depuis au moins 1994, que les Haïda s'opposaient à ce qu'on remplace la CFF 39 sans leur consentement et sans que leurs revendications aient fait l'objet de mesures d'accommodement. Comme l'a constaté le juge en son cabinet, la province disposait, [TRADUCTION] « [d]epuis 1994, et peut-être bien avant », d'éléments de preuve établissant que les Haïda utilisaient et occupaient à titre exclusif certaines régions du Bloc 6. Depuis au moins 1846 (affirmation de la souveraineté britannique), elle possède des preuves témoignant de l'importance du cèdre rouge dans la culture haïda.

The Province raises concerns over the breadth of the Haida's claims, observing that "[i]n a separate action the Haida claim aboriginal title to all of the Queen Charlotte Islands, the surrounding waters, and the air space. . . . The Haida claim includes the right to the exclusive use, occupation and benefit of the land, inland waters, seabed, archipelagic waters and air space" (Crown's factum, at para. 35). However, consideration of the duty to consult and accommodate prior to proof of a right does not amount to a prior determination of the case on its merits. Indeed, it should be noted that, prior to the chambers judge's decision in this case, the Province had successfully moved to sever the question of the existence and infringement of Haida title and rights from issues involving the duty to consult and accommodate. The issues were clearly separate in the proceedings, at the Province's instigation.

The chambers judge ascertained that the Province knew that the potential Aboriginal right and title applied to Block 6, and could be affected by the decision to replace T.F.L. 39. On this basis, the honour of the Crown mandated consultation prior to making a decision that might adversely affect the claimed Aboriginal title and rights.

(2) Scope of the Duty

As discussed above, the scope of the consultation required will be proportionate to a preliminary assessment of the strength of the case supporting the existence of the right or title, and to the seriousness of the potentially adverse effect upon the right or title claimed.

(i) *Strength of the Case*

On the basis of evidence described as "voluminous", the chambers judge found, at para. 25, a number of conclusions to be "inescapable" regarding the Haida's claims. He found that the Haida had inhabited Haida Gwaii continuously since at least 1774, that they had never been conquered, never surrendered their rights by treaty, and that their

La province se dit inquiète de l'ampleur des revendications des Haïda, faisant observer que, [TRADUCTION] « [d]ans une action distincte, les Haïda revendiquent un titre ancestral sur l'ensemble des îles de la Reine-Charlotte, sur les eaux les entourant et sur l'espace aérien. [. . .] La revendication des Haïda vise le droit à l'utilisation, à l'occupation et au bénéfice exclusifs des terres, des eaux intérieures, du fond marin, des eaux pélagiques et de l'espace aérien » (mémoire de la Couronne, par. 35). Cependant, se demander si l'obligation de consulter et d'accommoder s'applique avant que la preuve de l'existence d'un droit n'ait été apportée n'équivaut pas à préjuger de l'affaire sur le fond. D'ailleurs, il convient de souligner que, avant que le juge en son cabinet ait rendu sa décision en l'espèce, la province avait obtenu que la question de l'existence du titre et des droits des Haïda et de l'atteinte portée à ceux-ci soit examinée séparément des questions se rapportant à l'obligation de consulter et d'accommoder. Les questions ont été clairement séparées dans l'instance, à l'instigation de la province.

Le juge en son cabinet a estimé que la province savait que les droits et titre ancestraux potentiels en question visaient le Bloc 6 et qu'ils pouvaient être touchés par la décision de remplacer la CFF 39. Pour ce motif, l'honneur de la Couronne commandait que celle-ci procède à une consultation avant de prendre une décision susceptible d'avoir un effet préjudiciable sur les droits et titre ancestraux revendiqués.

(2) L'étendue de l'obligation

Comme il a été expliqué plus tôt, l'ampleur de la consultation requise dépend de l'évaluation préliminaire de la solidité de la preuve étayant l'existence du droit ou du titre, ainsi que de la gravité de l'effet préjudiciable potentiel sur le droit ou titre revendiqué.

(i) *Solidité de la preuve*

Après avoir examiné une preuve qu'il a qualifiée d'[TRADUCTION] « abondante », le juge en son cabinet a, au par. 25 de sa décision, tiré un certain nombre de conclusions [TRADUCTION] « incontournables » relativement aux revendications des Haïda. Il a conclu que les Haïda habitaient les îles Haïda Gwaii depuis au moins 1774, qu'ils n'avaient jamais

rights had not been extinguished by federal legislation. Their culture has utilized red cedar from old-growth forests on both coastal and inland areas of what is now Block 6 of T.F.L. 39 since at least 1846.

70

The chambers judge's thorough assessment of the evidence distinguishes between the various Haida claims relevant to Block 6. On the basis of a thorough survey of the evidence, he found, at para. 47:

(1) a "reasonable probability" that the Haida may establish title to "at least some parts" of the coastal and inland areas of Haida Gwaii, including coastal areas of Block 6. There appears to be a "reasonable possibility" that these areas will include inland areas of Block 6;

(2) a "substantial probability" that the Haida will be able to establish an aboriginal right to harvest old-growth red cedar trees from both coastal and inland areas of Block 6.

The chambers judge acknowledged that a final resolution would require a great deal of further evidence, but said he thought it "fair to say that the Haida claim goes far beyond the mere 'assertion' of Aboriginal title" (para. 50).

71

The chambers judge's findings grounded the Court of Appeal's conclusion that the Haida claims to title and Aboriginal rights were "supported by a good *prima facie* case" (para. 49). The strength of the case goes to the extent of the duty that the Province was required to fulfill. In this case the evidence clearly supports a conclusion that, pending a final resolution, there was a *prima facie* case in support of Aboriginal title, and a strong *prima facie* case for the Aboriginal right to harvest red cedar.

été conquis, qu'ils n'avaient jamais cédé leurs droits dans un traité et qu'aucune loi fédérale n'avait éteint leurs droits. Depuis au moins 1846, l'utilisation du cèdre rouge provenant des vieilles forêts des régions côtières et intérieures de la zone maintenant connue comme étant le Bloc 6 de la CFF 39 fait partie de leur culture.

Le juge en son cabinet a rigoureusement évalué la preuve et établi une distinction entre les différentes revendications des Haïda visant le Bloc 6. Au terme d'un examen approfondi de la preuve, il a tiré les conclusions suivantes au par. 47 :

(1) il existe une [TRADUCTION] « probabilité raisonnable » que les Haïda réussissent à établir l'existence d'un titre sur [TRADUCTION] « au moins quelques parties » des régions côtières et intérieures des îles Haïda Gwaii, notamment les régions côtières du Bloc 6; il semble exister une [TRADUCTION] « possibilité raisonnable » que ces régions comprennent les régions intérieures du Bloc 6;

(2) il existe une [TRADUCTION] « forte probabilité » que les Haïda réussissent à établir l'existence d'un droit ancestral de récolter le cèdre rouge provenant des vieilles forêts des régions côtières et intérieures du Bloc 6.

Le juge en son cabinet a reconnu qu'un règlement définitif nécessiterait beaucoup plus d'éléments de preuve, mais, selon lui, [TRADUCTION] « il est juste de dire que la revendication des Haïda est beaucoup plus qu'une simple "affirmation" de titre ancestral » (par. 50).

La Cour d'appel s'est fondée sur les constatations du juge en son cabinet pour conclure que les revendications par les Haïda du titre et de droits ancestraux étaient [TRADUCTION] « étayées par une preuve à première vue valable » (par. 49). La solidité de la preuve influe sur l'étendue de l'obligation que doit satisfaire la province. En l'espèce, le dossier permet clairement de conclure, en attendant le règlement définitif, qu'il existe une preuve *prima facie* de l'existence d'un titre ancestral et une solide preuve *prima facie* de l'existence d'un droit ancestral de récolter le cèdre rouge.

(ii) *Seriousness of the Potential Impact*

The evidence before the chambers judge indicated that red cedar has long been integral to Haida culture. The chambers judge considered that there was a “reasonable probability” that the Haida would be able to establish infringement of an Aboriginal right to harvest red cedar “by proof that old-growth cedar has been and will continue to be logged on Block 6, and that it is of limited supply” (para. 48). The prospect of continued logging of a resource in limited supply points to the potential impact on an Aboriginal right of the decision to replace T.F.L. 39.

Tree Farm Licences are exclusive, long-term licences. T.F.L. 39 grants exclusive rights to Weyerhaeuser to harvest timber within an area constituting almost one quarter of the total land of Haida Gwaii. The chambers judge observed that “it [is] apparent that large areas of Block 6 have been logged off” (para. 59). This points to the potential impact on Aboriginal rights of the decision to replace T.F.L. 39.

To the Province’s credit, the terms of T.F.L. 39 impose requirements on Weyerhaeuser with respect to Aboriginal peoples. However, more was required. Where the government has knowledge of an asserted Aboriginal right or title, it must consult the Aboriginal peoples on how exploitation of the land should proceed.

The next question is when does the duty to consult arise? Does it arise at the stage of granting a Tree Farm Licence, or only at the stage of granting cutting permits? The T.F.L. replacement does not itself authorize timber harvesting, which occurs only pursuant to cutting permits. T.F.L. replacements occur periodically, and a particular T.F.L. replacement decision may not result in the substance of the asserted right being destroyed. The Province argues that, although it did not consult the Haida prior to replacing the T.F.L., it “has consulted, and continues to consult with the Haida

(ii) *Gravité des conséquences potentielles*

La preuve présentée au juge en son cabinet indiquait que l’utilisation du cèdre rouge fait depuis longtemps partie intégrante de la culture haïda. Le juge a considéré qu’il existait une [TRADUCTION] « probabilité raisonnable » que les Haïda réussissent à démontrer une atteinte à un droit ancestral de récolter le cèdre rouge [TRADUCTION] « en prouvant que le cèdre des vieilles forêts a été et continuera d’être exploité dans le Bloc 6, et que cette ressource est limitée » (par. 48). La perspective de l’exploitation continue d’une ressource par ailleurs limitée laisse entrevoir les répercussions que la décision de remplacer la CFF 39 pourrait avoir sur un droit ancestral.

Les CFF ont un caractère exclusif et sont accordées pour de longues périodes. La CFF 39 confère à Weyerhaeuser le droit exclusif de récolter le bois dans une région qui représente près du quart de la superficie totale des îles Haïda Gwaii. Le juge en son cabinet a fait observer qu’[TRADUCTION] « il [est] manifeste que de vastes étendues du Bloc 6 ont été coupées à blanc » (par. 59). Ce fait illustre les conséquences potentielles que la décision de remplacer la CFF 39 a sur les droits ancestraux.

Il faut reconnaître à la province d’avoir imposé à Weyerhaeuser, dans la CFF 39, des conditions à l’égard des peuples autochtones. Mais la province devait faire davantage. Lorsque le gouvernement sait qu’un droit ou un titre ancestral est revendiqué, il doit consulter les Autochtones sur la façon dont les terres visées devraient être exploitées.

Il faut maintenant se demander à quel moment prend naissance l’obligation de consulter. Est-ce à l’étape de l’octroi d’une CFF, ou seulement à l’étape de la délivrance des permis de coupe? Le remplacement d’une CFF n’autorise pas en soi la récolte de bois, qui ne peut se faire qu’en vertu des permis de coupe. Les CFF sont périodiquement remplacées, et la décision de remplacer une CFF en particulier n’a pas nécessairement pour effet de détruire l’essence même du droit revendiqué. La province fait valoir que, bien qu’elle ne les ait pas consultés avant de remplacer la CFF, elle [TRADUCTION]

72

73

74

75

prior to authorizing any cutting permits or other operational plans” (Crown’s factum, at para. 64).

« a consulté et continue de consulter les Haïda avant d’autoriser les permis de coupe ou autres plans d’aménagement » (mémoire de la Couronne, par. 64).

76

I conclude that the Province has a duty to consult and perhaps accommodate on T.F.L. decisions. The T.F.L. decision reflects the strategic planning for utilization of the resource. Decisions made during strategic planning may have potentially serious impacts on Aboriginal right and title. The holder of T.F.L. 39 must submit a management plan to the Chief Forester every five years, to include inventories of the licence area’s resources, a timber supply analysis, and a “20-Year Plan” setting out a hypothetical sequence of cutblocks. The inventories and the timber supply analysis form the basis of the determination of the allowable annual cut (“A.A.C.”) for the licence. The licensee thus develops the technical information based upon which the A.A.C. is calculated. Consultation at the operational level thus has little effect on the quantity of the annual allowable cut, which in turn determines cutting permit terms. If consultation is to be meaningful, it must take place at the stage of granting or renewing Tree Farm Licences.

J’estime que, lorsqu’elle prend des décisions concernant les CFF, la province est tenue à une obligation de consultation, et peut-être à une obligation d’accommodement. La décision rendue à l’égard d’une CFF reflète la planification stratégique touchant l’utilisation de la ressource en cause. Les décisions prises durant la planification stratégique risquent d’avoir des conséquences graves sur un droit ou titre ancestral. Tous les cinq ans, le titulaire de la CFF 39 doit présenter au chef des services forestiers un plan d’aménagement comprenant l’inventaire des ressources du secteur visé par la concession, une analyse des approvisionnements en bois d’œuvre et un « plan de 20 ans » présentant une séquence hypothétique de blocs de coupe. C’est à partir de l’inventaire et de l’analyse des approvisionnements en bois d’œuvre qu’est fixée la possibilité annuelle de coupe (« PAC ») pour la concession. Ainsi, le titulaire de la concession établit les renseignements techniques servant à calculer la PAC. La tenue de consultations au niveau de l’exploitation a donc peu d’incidence sur le volume fixé dans la PAC, qui, à son tour, détermine les modalités du permis de coupe. Pour que les consultations soient utiles, elles doivent avoir lieu à l’étape de l’octroi ou du renouvellement de la CFF.

77

The last issue is whether the Crown’s duty went beyond consultation on T.F.L. decisions, to accommodation. We cannot know, on the facts here, whether consultation would have led to a need for accommodation. However, the strength of the case for both the Haida title and the Haida right to harvest red cedar, coupled with the serious impact of incremental strategic decisions on those interests, suggest that the honour of the Crown may well require significant accommodation to preserve the Haida interest pending resolution of their claims.

Il s’agit enfin de décider si la Couronne avait l’obligation non seulement de consulter les Haïda au sujet des décisions relatives aux CFF mais aussi de trouver des accommodements à leurs préoccupations. Les faits de l’espèce ne permettent pas de dire si la consultation aurait entraîné la nécessité de telles mesures. Cependant, la solidité de la preuve étayant l’existence et d’un titre haïda et d’un droit haïda autorisant la récolte du cèdre rouge, conjuguée aux répercussions sérieuses sur ces intérêts des décisions stratégiques successives, indique que l’honneur de la Couronne pourrait bien commander des mesures d’accommodement substantielles pour protéger les intérêts des Haïda en attendant que leurs revendications soient réglées.

(3) Did the Crown Fulfill its Duty?

The Province did not consult with the Haida on the replacement of T.F.L. 39. The chambers judge found, at para. 42:

[O]n the evidence presented, it is apparent that the Minister refused to consult with the Haida about replacing T.F.L. 39 in 1995 and 2000, on the grounds that he was not required by law to consult, and that such consultation could not affect his statutory duty to replace T.F.L. 39.

In both this Court and the courts below, the Province points to various measures and policies taken to address Aboriginal interests. At this Court, the Province argued that “[t]he Haida were and are consulted with respect to forest development plans and cutting permits. . . . Through past consultations with the Haida, the Province has taken various steps to mitigate the effects of harvesting . . .” (Crown’s factum, at para. 75). However, these measures and policies do not amount to and cannot substitute for consultation with respect to the decision to replace T.F.L. 39 and the setting of the licence’s terms and conditions.

It follows, therefore, that the Province failed to meet its duty to engage in something significantly deeper than mere consultation. It failed to engage in any meaningful consultation at all.

III. Conclusion

The Crown’s appeal is dismissed and Weyerhaeuser’s appeal is allowed. The British Columbia Court of Appeal’s order is varied so that the Crown’s obligation to consult does not extend to Weyerhaeuser. The Crown has agreed to pay the costs of the respondents regarding the application for leave to appeal and the appeal. Weyerhaeuser shall be relieved of any obligation to pay the costs of the Haida in the courts below. It is not necessary to answer the constitutional question stated in this appeal.

(3) La Couronne s’est-elle acquittée de son obligation?

La province n’a pas consulté les Haïda au sujet du remplacement de la CFF 39. Le juge en son cabinet a tiré la conclusion suivante (par. 42) :

[TRADUCTION] [S]elon la preuve présentée, il est manifeste que le ministre a refusé de consulter les Haïda au sujet du remplacement de la CFF 39 en 1995 et en l’an 2000, au motif que la loi ne l’obligeait pas à le faire et qu’une telle consultation ne pouvait avoir d’incidence sur son obligation, prévue par la loi, de remplacer la CFF 39.

La province a attiré l’attention de la Cour et des tribunaux d’instance inférieure sur les nombreuses mesures et politiques qu’elle a adoptées pour tenir compte des intérêts autochtones. Devant la Cour, elle a affirmé que [TRADUCTION] « [l]es Haïda ont été et sont consultés au sujet des plans d’aménagement forestier et des permis de coupe. [. . .] À la suite de consultations antérieures auprès des Haïda, la province a pris plusieurs mesures pour atténuer les effets de l’exploitation forestière [. . .] » (mémoire de la Couronne, par. 75). Cependant, ces mesures et politiques n’équivalent pas à une consultation au sujet de la décision de remplacer la CFF 39 et de l’établissement de ses modalités, et ne peuvent la remplacer.

Par conséquent, la province ne s’est pas acquittée de son obligation de procéder à davantage qu’une simple consultation. Elle n’a procédé à absolument aucune consultation utile.

III. Conclusion

Le pourvoi de la Couronne est rejeté et celui de Weyerhaeuser est accueilli. L’ordonnance de la Cour d’appel de la Colombie-Britannique est modifiée de manière que l’obligation de consultation de la Couronne ne s’étende pas à Weyerhaeuser. La Couronne a accepté de payer les dépens des intimés pour la demande d’autorisation de pourvoi et pour le pourvoi. Weyerhaeuser est dispensée de toute obligation de payer les dépens des Haïda devant les instances inférieures. Il n’est pas nécessaire de répondre à la question constitutionnelle dans le présent pourvoi.

Federal Court

Cour fédérale

Date: 20150828

Docket: T-2292-14

Citation: 2015 FC 1030

Ottawa, Ontario, August 28, 2015

PRESENT: The Honourable Mr. Justice Manson

BETWEEN:

**PROPHET RIVER FIRST NATION, WEST
MOBERLY FIRST NATIONS**

Applicants

and

**ATTORNEY GENERAL OF CANADA,
MINISTER OF THE ENVIRONMENT,
MINISTER OF FISHERIES AND OCEANS,
MINISTER OF TRANSPORT, AND BRITISH
COLUMBIA HYDRO AND POWER
AUTHORITY**

Respondents

JUDGMENT AND REASONS

[1] This application for judicial review is based upon the decision of the Governor in Council [GIC] that the significant adverse environmental effects the Joint Review Panel of the British Columbia and Federal Governments [the JRP or Panel] and the Minister of the Environment [the Minister] determined would likely result from the construction of the Site C Clean Energy

Project [the Project] on the Peace River in British Columbia were “justified in the circumstances.” The GIC is charged under section 52(4) of the *Canadian Environmental Assessment Act* [CEAA 2012], to make such a determination after the Minister decides that a project will likely cause significant adverse environmental effects under section 52(1) of the CEAA 2012.

[2] This application was heard consecutively with Federal Court Action T-2300-14, *Peace Valley Landowner Association v Attorney General of Canada et al*, for which a separate decision will be issued.

I. Background

[3] The Project is a proposed dam and 1,100-megawatt hydroelectric generating station on the Peace River, near Fort St. John, British Columbia, which if constructed would flood the Peace River Valley. The Project would be the third in a series of dams constructed on the Peace River in British Columbia. The Project components would consist of an earthfill dam 1,050 metres long and 60 metres high, a 1,100-megawatt generating station and associated structures, a 83-kilometre long reservoir, realignment of four sections of Highway 29, and two 77-kilometre transmission lines along an existing transmission line right-of-way connecting the Project to the Peace Canyon Dam, one of the existing dams on the Peace River. The Project is expected to generate an average of 5,100 gigawatts hours of electricity per year for more than 100 years.

[4] The Project had an estimated cost of 7.9 billion dollars at the time of its environmental assessment and an estimated eight year construction period. In oral argument, this estimated cost was increased to about 9 billion dollars in the interim and could continue to increase.

II. The parties

[5] The Applicants are British Columbia Treaty 8 First Nations (the Treaty 8 First Nations) whose members exercise their constitutionally protected treaty rights within the Project and surrounding area.

[6] The Respondent Attorney General of Canada is named as a Respondent in place of the Governor in Council, the decision-maker of the Justification Decision.

[7] The Respondent Minister of Environment is the Minister required to make the Significant Adverse Environmental Effects Decisions, pursuant to subsections 5(1) and 5(2) of CEAA 2012 and is the Minister who issued the Decision Statement containing the Justification Decision.

[8] The Respondent Minister of Fisheries and Oceans is the Responsible Authority that may issue authorizations under subsection 35(2)(b) of the *Fisheries Act*, RSC 1985, c F-14, in relation to the Project.

[9] The Respondent Minister of Transport is the Responsible Authority that may approve the Project and ancillary works under subsection 6(1) of the *Navigation Protection Act*, RSC 1985, c N-22, and may permit ancillary works under subsection 9(1) of that same act.

[10] The Respondent BC Hydro [BC Hydro] is a provincial Crown corporation and the Project proponent (collectively “the Respondents”).

III. The Process

[11] On May 18, 2011, BC Hydro submitted a Project Description Report for the Project to the British Columbia Environmental Assessment Office [EAO] and the Canadian Environmental Assessment Agency [the Agency], initiating the environmental assessment processes of both entities.

[12] On September 30, 2011, the above authorities announced they would conduct a cooperative environmental assessment [EA], which would include the JRP. As well, a draft agreement for the process and draft Terms of Reference were released that same day. The Terms of Reference listed thirteen factors the Panel must consider in its assessment. Of particular note are paragraphs 2.2 and 3.14; the first provides the list of factors and the second provides the Panel’s mandate with respect to information related to the justifiability of any significant adverse effects the project may cause.

[13] Prior to constituting the JRP, the Agency and EAO oversaw the production of the environmental impact statement guidelines [EIS Guidelines], which set out the scope of the factors listed in the Terms of Reference and information to be submitted by BC Hydro in the form of an environmental impact statement [EIS].

[14] The first draft of the EIS Guidelines was produced by BC Hydro and was subject to review by a Working Group who oversaw amendments. On September 7, 2012, the Minister and the Executive Director of the EAO determined the EIS Guidelines were adequate and issued them to BC Hydro. They were then incorporated into the Terms of Reference pursuant to paragraph 2.8.

[15] On January 25, 2013, BC Hydro submitted the EIS to the Agency and the EAO. It was then subject to review by the Working Group, government agencies and the public. Each comment received was responded to and 29 technical memos were written to address common themes within those comments.

[16] In June and July of 2013, the Agency and EAO directed BC Hydro to amend the EIS on the basis of the comments and responses received, and on August 1, 2013, they determined it was satisfactory and ready for review by the Panel.

[17] Between September and November of 2013, the JRP requested information from BC Hydro three times, along with follow-up requests. On November 7, 2013, the Panel decided that the amended EIS, along with the additional information received, was sufficient to proceed to public hearing.

[18] Public hearings were held over 26 days in December of 2013 and January of 2014. During this period, sessions on December 9 and 10, 2013, as well as on January 23, 2014, addressed the topics “Need, Purpose and Alternatives.”

[19] After the public hearings had completed, on May 1, 2014, the JRP produced the Panel Report to the Minister and Executive Director of the EAO.

[20] The JRP made a number of findings in the JRP Report, including:

- a) The Project would likely cause a significant adverse effect on fishing opportunities and practices for the First Nations represented by the Treaty 8 Tribal Association (“T8TA”) (Doig River First Nation, Halfway River First Nation, Prophet River First Nation and West Moberly First Nations), Saulteau First Nations and Blueberry River First Nations, the effects of which could not be mitigated;
- b) The Project would likely cause a significant adverse effect on hunting and non-tenured trapping for the First Nations represented by T8TA and Saulteau First Nations, and that these effects could not be mitigated;
- c) The Project would likely cause a significant adverse effect on other traditional uses of the land for the First Nations represented by T8TA, Saulteau First Nations and Blueberry River First Nations, and that some of these effects could not be mitigated;
- d) The Project would likely cause significant adverse cumulative effects on the current use of lands and resources for traditional purposes;
- e) There would be significant cumulative adverse effects on cultural heritage resources for both Aboriginal and non-Aboriginal people;
- f) The Project would result in significant adverse cumulative effects on fish and fish habitat, vegetation and ecological communities, birds and migratory birds, large mammals and visual resources;
- g) The JRP questioned the maximization of the hydraulic potential of the Peace River, which limited the consideration of alternatives.

[21] The JRP also made findings on the unique qualities of the Peace River Valley that support the exercise of Treaty 8 rights such as fishing and concluded that an alternative comparable natural setting could not be found nearby. The Panel found on the evidence that First Nations, including some of the Applicant First Nations, have a strong cultural attachment to the Peace River environment and that the area was highly valued for the sustenance of their Aboriginal lifestyle.

[22] On May 9, 2014, the JRP was made aware by BC Hydro of an error in Chapter 15, Tables 16 and 18: the JRP had failed to include low liquid natural gas [LNG] load in the load forecast (which was their stated intention), which affects the Energy Load Resource Balance of the Project. In response, the JRP issued an errata on June 10, 2014, to rectify the issue and stated that they would modify the tables to include the omitted information, but that the stated “conclusions remain as noted” without further explanation.

[23] In August of 2014, the Applicants were invited to make a two page written submission to the Minister outlining their concerns with the project. They stated they believed their treaty rights would be infringed by the Project and that such an infringement required justification under the *Sparrow* test. The Minister did not respond to these submissions (*R v Sparrow*, [1990] 1 SCR 1075).

[24] On September 8, 2014, a memo was sent to the Minister, which, once signed and dated by her, constituted the Minister’s decision under section 52 of the CEAA 2012. She signed the memo and concurred with the statement that significant adverse environmental effects were likely to occur if the project proceeded.

[25] The GIC released Order-in-Council 2014-1105 on October 14, 2014, which set out its decision that the potential significant adverse environmental effects likely to ensue should the Project be built were “justified in the circumstances.”

[26] Also on October 14, 2014, the Minister issued a decision statement under the CEAA 2012 (re-issued with minor corrections on November 25, 2014), allowing the project to proceed.

[27] The Order in Council which forms the impugned decision reads as follows:

Whereas BC Hydro has proposed the development of the Site C Clean Energy Project (the “Project”), near Fort St. John, British Columbia;

Whereas, after having considered the Report of the Joint Review Panel – Site C Clean Energy Project and taking into account the implementation of mitigation measures that the Minister of the Environment considered appropriate, the Minister has decided that the Project is likely to cause significant adverse environmental effects;

Whereas, after having made this decision, the Minister has, in accordance with subsection 52(2) of the Canadian Environmental Assessment Act, 2012 (the “Act”), referred to the Governor in Council for its consideration and decision the matter of whether those effects are justified in the circumstances;

Whereas the Government of Canada has undertaken a reasonable and responsive consultation process with Aboriginal groups potentially affected by the project;

Whereas the consultation process has provided the opportunity for dialogue and for the exchange of information to ensure that the concerns and interests of the Aboriginal groups have been considered in the decision-making process;

Whereas the consultation process has included opportunities for the Aboriginal groups to review and comment on conditions for inclusion in a decision statement to be issued by the Minister under the Act that could mitigate environmental effects and potential impacts on the Aboriginal groups;

Whereas the Minister will consider the views and information provided by the Aboriginal groups when the Minister determines the conditions to be imposed on the proponent in the decision statement;

Whereas the consultation process undertaken is consistent with the honour of the Crown;

And whereas the concerns and interests of Aboriginal groups have been reasonably balanced with other societal interests including social, economic, policy and the broader public interest;

Therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of the Environment, pursuant to subsection 52(4) of the Canadian Environmental Assessment Act, 2012, decides that the significant adverse environmental effects that Site C Clean Energy project proposed by BC Hydro in British Columbia is likely to cause are justified in the circumstances.

IV. Issues

[28] The issues are:

- A. Did the GIC have the jurisdiction under section 52(4) of the CEAA 2012 to decide whether the project would constitute an infringement of the Applicants' treaty rights, and should the GIC have considered this issue in determining that the Project was justified?
- B. Did the Applicants have a legitimate expectation that the issue of infringement would be addressed by the GIC, based on representations that had been made to them by the Agency?
- C. Has the duty to consult and accommodate the Respondent First Nations been met in this case?
- D. Was the GIC's decision and Order in Council under section 52(4) of the CEAA 2012, that the significant adverse environmental effects the Project is likely to cause are justified, within the range of reasonable outcomes?

V. Standard of Review

[29] The Applicants submit that the appropriate standard of review to be applied is correctness. They base their submissions on the idea that the GIC violated procedural fairness in not taking into account all relevant information or considerations. They further base their submissions on the engagement of constitutional issues, the application of an incorrect legal test, as well as the failure of the CEAA 2012 to explicitly shield the GIC from review on a correctness standard, in its interpretation of the CEAA 2012 (*Georgia Strait Alliance v Canada (Minister of*

Fisheries and Oceans), 2012 FCA 40 at paras 101, 102 [*Georgia Strait*]; *Paul v British Columbia (Forest Appeals Commission)*, 2003 SCC 55 at para 47).

[30] The Applicants also submit that pursuant to the decision in *Council of the Innu of Ekuanitshit v Canada (Attorney General) et al*, 2013 FC 418 at para 76, aff'd 2014 FCA 189 at paras 40-42, 44 [*Innu*], the GIC's decision is only owed deference in situations that fall outside of the three exceptions, outlined at paragraph 76 of the trial decision, namely "(1) whether the CEAA statutory process was not properly followed before the decision was made; (2) the Governor in Council decision was taken without regard for the purpose of the CEAA; or (3) the Governor in Council decision had no reasonable basis in fact." They argue that since at least the second of these exceptions was engaged, the GIC is not owed deference in their decision.

[31] Moreover, the existence and extent of the duty to consult are legal questions, reviewable on the standard of correctness. The adequacy of the Minister's, as well as the GIC's, consultation is reviewable on the reasonableness standard (*Yellowknives Dene First Nation v Canada (Minister of Aboriginal Affairs and Northern Development)*, 2015 FCA 148 at para 46 [*Yellowknives Dene*]; *Haida Nation v British Columbia (Minister of Forests)*, 2004 SCC 73 at paras 61, 62 [*Haida*]; *Adam v Canada (Minister of the Environment)*, 2014 FC 1185 at para 65).

[32] The Respondents submit that the appropriate standard of review to be applied to the GIC's statutory interpretation of its role under the CEAA 2012 is reasonableness, given its central legislated role in the EA process and determining whether significant adverse environmental effects can be justified in the circumstances. The CEAA 2012 is clearly a statute

with which the GIC is particularly familiar (*Dunsmuir v New Brunswick*, 2008 SCC 9 at paras 53-54).

[33] The Respondents further submit that the GIC's determination was highly discretionary, policy based and fact driven, to which a standard of considerable deference should apply (*Innu*, above, at para 40; *Canada (National Revenue) v JP Morgan Asset Management (Canada) Inc*, 2013 FCA 250 at para 74).

[34] In addition, the Respondents argue that the Applicants' reliance on the *Georgia Straight* case, above, to advocate for a correctness standard is misplaced, as more recent authority confirms that reasonableness applies when the decision under review intertwines discretion and policy with questions of fact and an interpretation of the decision maker's own statute, or those closely connected to its function with which it would have particular familiarity (*Agraira v Canada (Public Safety and Emergency Preparedness) et al*, 2013 SCC 36 at para 50; *Celgene Corp v Canada (Attorney general)*, 2011 SCC 1 at paras 33-34).

[35] The polycentric decision of the GIC, itself an elected body, assigned under legislation with which it is familiar, further supports the application of a reasonableness standard.

[36] The issues of procedural fairness and the existence of the duty to consult and the extent of that duty (which are legal questions) attract a standard of review of correctness (*Mission Institution v Khela*, 2014 SCC 24 at para 79; *Canada (Citizenship and Immigration) v Khosa*, 2009 SCC 12 at para 43; *Yellowknives Dene*, above, at para 46). Reasonableness is the

appropriate standard for all other issues, as the consultation process and adequacy of consultation is a question of mixed fact and law (*Haida*, above, at paras 61-62; *Rio Tinto Alcan Inc v Carrier Sekani Tribal Council*, 2010 SCC 43 at para 64 [*Rio*]).

VI. Analysis

[37] The relevant statutory provisions are attached as Annex A hereto.

A. *Preliminary Evidentiary Objections*

[38] Given that the Applicants have withdrawn Exhibits 10, 11 and paragraphs 21 and 22 of the Raphael affidavit which were objected to, the Respondents have agreed that there is no need for Exhibits D to M of the Savident affidavit, effectively negating the parties' evidentiary objections.

B. *Did the GIC have jurisdiction under section 52(4) of the CEAA 2012 to decide whether the project would constitute an infringement of the Applicants' treaty rights, and should the GIC have considered this issue in determining that the Project was justified?*

[39] The Applicants argue that an action would not be an appropriate forum to pursue a determination on infringement. Counsel stated in oral argument that an action could only provide the after-the-fact remedy of damages and would take so long that the immitigable environmental effects the Project will cause would have already been suffered. As such, it is an inappropriate and ineffective course of action for the Applicants.

[40] Moreover, as the Applicants' rights are established in a treaty and are not asserted rights, the Applicants argue that the Crown's obligations to them are more clearly delineated and established than in a situation where a First Nation has yet to have their rights affirmed and recognized.

[41] The Applicants' position is that the taking up clause in Treaty No. 8 allows the Government to take up lands from time to time and it should be interpreted in line with *R v Badger*, [1996] 1 SCR 771. *Badger* speaks to the need to interpret the treaty by applying the "visible and incompatible use" test to taking up land, and that there was a belief among the parties to the treaty that most of the land covered by it would remain unoccupied, despite the provision for taking up.

[42] The Applicants also argue that their treaty rights will be infringed by the construction of the Project and that such an infringement must be justified under the *Sparrow* test. The Government's taking up of the land exceeds what was contemplated by Treaty No. 8, in that they are taking up too much, too often. While the infringement might well be justified under *Sparrow*, there was no determination of infringement made and the JRP specifically acknowledged infringement of treaty rights was not part of their mandate. Even if the GIC had the benefit of the JRP, the GIC was required to act in accordance with the Constitution, and failing to deal with infringement in making the impugned decision was an error (*R v Sparrow*, [1990] 1 SCR 1075). This failure to deal with infringement of treaty rights is the kernel of the Applicant's position that the GIC's decision is both incorrect and unreasonable.

[43] Accordingly, the Applicants insist that the GIC's failure to determine infringement of their treaty rights makes this a decision that cannot stand, despite the fact that the intent of this application is not to attempt to pursue a particular outcome. It is the failure to deal with the infringement issue at all, not the outcome itself, which the Applicants say is both wrong and unreasonable.

[44] Finally, the Applicants argue they had a legitimate expectation that the issue of infringement would be dealt with by the GIC. They base this argument largely on the distribution of a "schematic" at different points throughout the consultation process, which showed that the Federal Government would be dealing with infringement.

[45] The Applicants rely on the decisions in *West Moberly* and *Beckman* for the assertion that a judicial review application in the Federal Court is capable of dealing with the issue of infringement of treaty rights (*West Moberly First Nations v British Columbia (Chief Inspector of Mines)*, 2011 BCCA 247 at paras 92-97; *Beckman v Little Salmon/Carmacks First Nations*, 2010 SCC 53 at para 47).

[46] However, the GIC is not a tribunal, nor is it a Minister. It exercises its discretion to decide on a different platform, based on polycentric considerations and a balancing of individual and public interests, including Aboriginal interests and concerns. It is properly afforded considerable deference under review.

[47] Parliament was clear in its intention to put the decision as to whether significant adverse environmental effects are justified in the hands of the GIC, knowing the considerable deference owed to their determinations and their entitlement to privilege.

[48] The case law shows that decisions of the GIC are owed such considerable deference, as they are inherently polycentric and take into account not only scientific facts and figures, but political and social considerations as well. The GIC is made up of elected officials, each of which is accountable to the Canadian public as represented by their constituencies and in this case included the Ministers named as Respondents (*Greenpeace Canada v Canada (Attorney General)*, 2014 FC 463 at paras 232-236, 280-281).

[49] I agree with the Respondents that judicial review is not the appropriate course of action to determine whether Treaty No. 8 rights have been infringed. In oral argument, Applicants' Counsel stated that she believed that an action would not be able to award the Applicants what they request and could only result in a monetary award of damages and costs should they be successful. Further, she argued that the length of time it would take for the action to be heard would give ample time for the Respondents to pursue the Project and render the Applicants' requests meaningless.

[50] However, pursuit of an action may provide a variety of remedies for the Applicants, including a summary trial, an interlocutory injunction, or an expedited trial on the merits of the infringement question, which if applied for, may properly and definitively, on a full evidentiary record, deal with this issue.

[51] Furthermore, as pointed out by the Respondents, taking up of land under Treaty 8 is exclusively within the power of British Columbia and not every taking up of lands under a treaty will constitute an infringement of treaty rights, provided the taking up of that land does so in a manner that respects the requirements set out in *Mikisew (Mikisew Cree First Nation v Canada (Minister of Canadian Heritage))*, 2005 SCC 69 at paras 54-59, 64-66 [*Mikisew*]; *Grassy Narrows First Nation v Ontario (Natural Resources)*, 2014 SCC 48 at paras 30, 52-53.

[52] In my view, the evidentiary record developed for an action is the appropriate basis for a Court to make a determination on the issue of infringement of the Applicants' treaty rights. While in *Beckman v Little Salmon/Carmacks First Nations*, above, at para 47, the Supreme Court made it clear that the judicial review process is a flexible one, capable of dealing with an array of issues presented in that context, it cannot reasonably be construed as saying that it is flexible enough to deal with all issues, in all contexts and, as here, not for a determination of infringement of Treaty No. 8 rights.

[53] Where consultation is required at the deep end of the spectrum and a specific determination on infringement on established treaty rights is at issue, the Court is ill-equipped to make a determination with an incomplete record or an informal evidentiary process before it on judicial review. The infringement of those important and fundamental treaty rights require a complete evidentiary record, that has reached the standard of admissibility at trial, to be reasonably and fairly determined. Nevertheless, it is without question that consideration of the issue of infringement of those treaty rights, short of making an ultimate decision or determination, needs to be part of the consultation process, as discussed below.

C. *Legitimate Expectations*

[54] The Applicants have failed to establish that they had a legitimate expectation that the issue of treaty infringement would be dealt with by the GIC. The doctrine is meant to deal only with the clearest of cases and this is not one of them. The inclusion of a flowchart in a handful of communications and one that was later altered during the process and redistributed to the Applicants, without specifically referring to infringement of treaty rights, is not sufficient to reach the high threshold required for the Court to invoke the doctrine of legitimate expectation that this issue would be determined, and not merely considered, as part of the consultation and accommodation process.

D. *Has the duty to consult and accommodate the Respondent First Nations been met in this case and was the GIC justification decision reasonable?*

[55] The Supreme Court of Canada summarized the framework governing the duty to consult in *Rio*, above, at para 51:

51 As we have seen, the duty to consult arises when: (1) the Crown has knowledge, actual or constructive, of potential aboriginal claims or rights; (2) the Crown proposes conduct or a decision; and (3) that conduct or decision may have an adverse impact on the Aboriginal claims or rights. This requires demonstration of a causal connection between the proposed Crown conduct and a potential adverse impact on an Aboriginal claim or right.

[56] As stated in *Ktunaxa Nation v British Columbia (Minister of Forests Lands and Natural Resource Operations)*, 2015 BCCA 352 at paras 77-79:

77 The scope of the duty to consult is proportionate to a preliminary assessment of the strength of the case supporting the

existence of the asserted rights, and to the seriousness of the potentially adverse effect upon the right claimed (*Haida*, at para 39). Fundamentally, the Crown is not under a duty to reach an agreement; the commitment is to a meaningful process of consultation in good faith (*Haida*, at para 41). Good faith is central, as the Court explains in *Haida* at para 42:

42 At all stages, good faith on both sides is required. The common thread on the Crown's part must be "the intention of substantially addressing [Aboriginal] concerns" as they are raised (*Delgamuukw*, supra, at para. 168), through a meaningful process of consultation. Sharp dealing is not permitted. However, there is no duty to agree; rather, the commitment is to a meaningful process of consultation. As for Aboriginal claimants, they must not frustrate the Crown's reasonable good faith attempts, nor should they take unreasonable positions to thwart government from making decisions or acting in cases where, despite meaningful consultation, agreement is not reached: see *Halfway River First Nation v. British Columbia (Ministry of Forests)*, [1999] 4 C.N.L.R. 1 (B.C.C.A.), at p. 44; *Heiltsuk Tribal Council v. British Columbia (Minister of Sustainable Resource Management)* (2003), 19 B.C.L.R. (4th) 107 (B.C.S.C.). Mere hard bargaining, however, will not offend an Aboriginal people's right to be consulted.

78 The duty to accommodate requires a balancing of interests. The Court in *Taku River Tlingit First Nation v British Columbia (Project Assessment Director)*, 2004 SCC 74, explained at para 2:

...Where consultation is meaningful, there is no ultimate duty to reach agreement. Rather, accommodation requires that Aboriginal concerns be balanced reasonably with the potential impact of the particular decision on those concerns and with competing societal concerns. Compromise is inherent to the reconciliation process.

79 The applicable standard of review was set out at para 62 of *Haida* as reasonableness. The focus is not on the outcome, but on the process of consultation and accommodation (*Haida*, at para 63). The Court explained as follows at para 62:

...Perfect satisfaction is not required; the question is whether the regulatory scheme or government action "viewed as a whole, accommodates the collective aboriginal right in question": *Gladstone, supra*, at para. 170. What is required is not perfection, but reasonableness. As stated in *Nikal, supra*, at para. 110, "in ... information and consultation the concept of reasonableness must come into play[...]. So long as every reasonable effort is made to inform and to consult, such efforts would suffice." The government is required to make reasonable efforts to inform and consult...

[57] The parties agree that the consultation required was at the deep end of the spectrum (*Haida*, above, at paras 47-50).

[58] However, while there is no dispute that consideration of possible infringement of treaty rights should form part of the Crown's duty of consultation and accommodation, the Respondents argue that consideration does not extend to a determination of infringement of those rights. While the Applicants' Treaty No. 8 rights have been established and it is clear that significant adverse environmental effects will result from the Project, the parties do not agree as to whether the consultation and accommodations that took place were adequate (*Haida*, above).

[59] As stated above, it is the Applicants' position that the consultation process never did reach the deep consultation threshold, as it failed to consider infringement of their Treaty No. 8 rights. It is not the quantity but the quality of consultation that determines the substance of the depth of consultation (*Kwikwetlem First Nation v British Columbia (Utilities Commission)*, 2009 BCCA 68 at paras 66-70).

[60] However, the JRP's Panel Report, considered by the Minister and implicitly by the GIC, entailed information gathering and reporting, which necessarily does not encompass the wide array of viewpoints and factors additionally considered by the Minister and the GIC.

[61] Based on the record before me, and contrary to the assertions made by the Applicants, the Crown did not need to determine infringement of the Applicant's treaty rights; they did consider those rights, did not ignore the impact of the Project on those treaty rights or find that the negative impact could be mitigated, and did assess the cumulative effects of the prior existing two dams on the historical rights of the Applicants (EIS Guidelines, clauses 8.5.3 and 9-1).

[62] Consultation by BC Hydro with the Applicants began in November 2007. It is summarized in the EIS, at Volume 5, Appendix A06 Parts 2 and 2(a) and outlined in Affidavit #1 of Seanna McConnell. In my view, BC Hydro's consultation has been extensive and conducted in good faith. The Applicants, however, expressed their strong opposition to the Project, signing a declaration "vow[ing] to use all lawful means to stop the Site C Dam from proceeding" (EIS Volume 5, Appendix A06 Part 5, pp. 16-30 (Applicants' Record, Tab 7C); Willson Affidavit, Exhibit 14 (Applicants' Record, Tab 3); McConnell Affidavit #1, para 123 (BC Hydro's Record, Tab11)).

[63] In the seven year period from November 2007 to December 2014, BC Hydro met with the interested Treaty 8 First Nations 177 times and provided them with \$5,879,039.78 in capacity funding to, *inter alia*, conduct their own traditional land use and community baseline studies; retain consultants; participate in the environmental assessment process including the Panel

hearings; attend meetings with BC Hydro; review material; and prepare reports and comments from BC Hydro, the Agency, EAO, and the Panel. This amount is in addition to funding provided by the provincial and federal governments.

[64] This funding was provided pursuant to several agreements with the Treaty 8 First Nations:

- *Stage 2 Consultation Agreement* (December 1, 2008 to March 31, 2010), for consultation prior to the environmental assessment;
- *Agreement to Negotiate a Traditional Land Use Study Agreement* (December 18, 2009), established a process for negotiating a Traditional Land Use Study Agreement;
- *Traditional Land Use Study Agreement* (December 16, 2010), to conduct a traditional land use study related to the Project on October 4, 2011, at the request of several First Nations, the agreement was amended to drastically reduce the size of the study area;
- *Environmental Assessment Participating Agreement* (April 21, 2011 to October 14, 2014), established a process for consultation during the environmental assessment;
- Letter of Understanding (March 6, 2012), established terms of reference for the collection and reporting of socio-economic baseline information by the First Nations;
- Various Letters of Understanding drafted pursuant to the *Environmental Assessment Participation Agreement* for specific consultation activities, including, e.g., with respect to alternative dam sites;
- *Discussion Framework* (October 2, 2014), established a framework for post-Panel consultation on the need for and alternatives to the Project.

[65] Pursuant to these agreements, BC Hydro consulted with the Treaty 8 First Nations prior to preparing the first draft of the EIS Guidelines, prior to designing and implementing its field studies, finalizing the design of the Project, and preparing the EIS, including the technical reports and proposed mitigation measures contained therein, and prior to the Province's decision as to whether to proceed with the Project.

[66] In March 2012, BC Hydro offered to enter negotiations toward concluding impact benefit agreements with the Applicants. In April 2014, Doig River advised BC Hydro they were

interested in pursuing impact benefit agreement negotiations. In their comments on the EIS, the Treaty 8 First Nations stated that they would consider negotiation of a benefit sharing agreement in relation to alternatives to the proposed Project, with the proviso that the Proponent first abandon plans to develop the proposed Project.

[67] As well, alternatives to the Project as a source of energy were also considered (EIS, clause 4.1.2, pages 291, 294, 304 and page 431 of the JRP).

[68] From the beginning of the environmental assessment process in May 2011, until its conclusion in October 2014, a number of steps were built into the process so that the Minister and Cabinet were provided with the information they reasonably required in order to make their decisions. This information included a review of the BC/Canada Agreement and the Terms of Reference, and a multi-staged review of the EIS Guidelines and the EIS, after which the Agency and EAO determined the EIS was satisfactory. The Minister and Cabinet reached their decisions after extensive input from the public, government agencies and Aboriginal groups, including the Applicants. At the Panel Stage, the Panel reviewed the EIS and requested additional information from BC Hydro until it was satisfied the EIS was sufficient. The Panel then held public hearings, received further submissions and at the end of the process, produced a lengthy report in which it noted that it conducted its assessment in accordance with the Terms of Reference.

[69] The depth of consultation is also evident from the three consultation plans initiated during the JRP process and the post-panel stage consultation meetings. As set out in the affidavit of Seanna McConnell, BC Hydro's consultation with the Applicants was a lengthy process, was

in good faith and was extensive both qualitatively and quantitatively. It is also apparent from the Record that while the Crown engaged with the Applicants to address mitigation and measures to be taken after issuance of the JRP, the Applicants refused to engage in such a dialogue once it was decided by the Applicants that the Project not proceeding was the only viable solution for the Applicants, as the end result of the process.

[70] A commitment to the process does not require a duty to agree – what is required is good faith efforts to understand the concerns of the Applicants and the Respondents made such efforts, which the Minister and GIC reasonably considered.

VII. Submissions of the Intervener

[71] While I appreciate the submissions of Amnesty International, the crux of this judicial review involves whether or not the Applicants should pursue a determination on infringement of their treaty rights in the form of an action and whether judicial review is the proper approach. Amnesty International presented interesting information regarding the value of international law, in the form of both ratified and non-ratified treaties, in interpreting the requirements of a body like the GIC in making determinations on justification. It was informative; however I give their submissions little weight, as they are not relevant to the central issues of this application.

[72] For the reasons above, I would dismiss the application for judicial review.

[73] Given the public interest concerns, including particularly the Treaty 8 First Nations' concerns with the unmitigable significant adverse environmental effects of the Project, which are legitimate, I would have each of the parties bear their own costs.

JUDGMENT

THIS COURT'S JUDGMENT is that:

1. The application for judicial review is dismissed;
2. Given the significant, legitimate public interest concerns and unmitigable significant adverse environment effects of the Project as raised by the Applicants, I would have the parties bear their own costs.

"Michael D. Manson"

Judge

ANNEX A

Canadian Environmental Assessment Act, 2012 (S.C. 2012, c. 19, s. 52)

Environmental effects

5. (1) For the purposes of this Act, the environmental effects that are to be taken into account in relation to an act or thing, a physical activity, a designated project or a project are

- (a) a change that may be caused to the following components of the environment that are within the legislative authority of Parliament:
 - (i) fish and fish habitat as defined in subsection 2(1) of the Fisheries Act,
 - (ii) aquatic species as defined in subsection 2(1) of the Species at Risk Act,
 - (iii) migratory birds as defined in subsection 2(1) of the Migratory Birds Convention Act, 1994, and
 - (iv) any other component of the environment that is set out in Schedule 2;
- (b) a change that may be caused to the environment that would occur
 - (i) on federal lands,
 - (ii) in a province other than the one in which the act or thing is done or where the physical activity, the designated project or the project is being carried out, or
 - (iii) outside Canada; and
- (c) with respect to aboriginal peoples, an effect occurring in Canada of any change that may be caused to the environment on
 - (i) health and socio-economic conditions,
 - (ii) physical and cultural heritage,
 - (iii) the current use of lands and resources for traditional purposes, or
 - (iv) any structure, site or thing that is of historical, archaeological, paleontological or architectural significance.

Exercise of power or performance of duty or function by federal authority

(2) However, if the carrying out of the physical

Effets environnementaux

5. (1) Pour l'application de la présente loi, les effets environnementaux qui sont en cause à l'égard d'une mesure, d'une activité concrète, d'un projet désigné ou d'un projet sont les suivants :

- a) les changements qui risquent d'être causés aux composantes ci-après de l'environnement qui relèvent de la compétence législative du Parlement :
 - (i) les poissons et leur habitat, au sens du paragraphe 2(1) de la Loi sur les pêches,
 - (ii) les espèces aquatiques au sens du paragraphe 2(1) de la Loi sur les espèces en péril,
 - (iii) les oiseaux migrateurs au sens du paragraphe 2(1) de la Loi de 1994 sur la convention concernant les oiseaux migrateurs,
 - (iv) toute autre composante de l'environnement mentionnée à l'annexe 2;
- b) les changements qui risquent d'être causés à l'environnement, selon le cas :
 - (i) sur le territoire domaniale,
 - (ii) dans une province autre que celle dans laquelle la mesure est prise, l'activité est exercée ou le projet désigné ou le projet est réalisé,
 - (iii) à l'étranger;
- c) s'agissant des peuples autochtones, les répercussions au Canada des changements qui risquent d'être causés à l'environnement, selon le cas :
 - (i) en matière sanitaire et socio-économique,
 - (ii) sur le patrimoine naturel et le patrimoine culturel,
 - (iii) sur l'usage courant de terres et de ressources à des fins traditionnelles,
 - (iv) sur une construction, un emplacement ou une chose d'importance sur le plan historique, archéologique, paléontologique ou architectural.

Exercice d'attributions par une autorité fédérale

(2) Toutefois, si l'exercice de l'activité ou la réalisation du projet désigné ou du projet exige

activity, the designated project or the project requires a federal authority to exercise a power or perform a duty or function conferred on it under any Act of Parliament other than this Act, the following environmental effects are also to be taken into account:

(a) a change, other than those referred to in paragraphs (1)(a) and (b), that may be caused to the environment and that is directly linked or necessarily incidental to a federal authority's exercise of a power or performance of a duty or function that would permit the carrying out, in whole or in part, of the physical activity, the designated project or the project; and

(b) an effect, other than those referred to in paragraph (1)(c), of any change referred to in paragraph (a) on

- (i) health and socio-economic conditions,
- (ii) physical and cultural heritage, or
- (iii) any structure, site or thing that is of historical, archaeological, paleontological or architectural significance.

Decisions of decision maker

52. (1) For the purposes of sections 27, 36, 47 and 51, the decision maker referred to in those sections must decide if, taking into account the implementation of any mitigation measures that the decision maker considers appropriate, the designated project

(a) is likely to cause significant adverse environmental effects referred to in subsection 5(1); and

(b) is likely to cause significant adverse environmental effects referred to in subsection 5(2).

Referral if significant adverse environmental effects

(2) If the decision maker decides that the designated project is likely to cause significant adverse environmental effects referred to in subsection 5(1) or (2), the decision maker must

l'exercice, par une autorité fédérale, d'attributions qui lui sont conférées sous le régime d'une loi fédérale autre que la présente loi, les effets environnementaux comprennent en outre :

a) les changements — autres que ceux visés aux alinéas (1)a) et b) — qui risquent d'être causés à l'environnement et qui sont directement liés ou nécessairement accessoires aux attributions que l'autorité fédérale doit exercer pour permettre l'exercice en tout ou en partie de l'activité ou la réalisation en tout ou en partie du projet désigné ou du projet;

b) les répercussions — autres que celles visées à l'alinéa (1)c) — des changements visés à l'alinéa a), selon le cas :

- (i) sur les plans sanitaire et socio-économique,
- (ii) sur le patrimoine naturel et le patrimoine culturel,
- (iii) sur une construction, un emplacement ou une chose d'importance sur le plan historique, archéologique, paléontologique ou architectural.

Décisions du décideur

52. (1) Pour l'application des articles 27, 36, 47 et 51, le décideur visé à ces articles décide si, compte tenu de l'application des mesures d'atténuation qu'il estime indiquées, la réalisation du projet désigné est susceptible:

a) d'une part, d'entraîner des effets environnementaux visés au paragraphe 5(1) qui sont négatifs et importants;

b) d'autre part, d'entraîner des effets environnementaux visés au paragraphe 5(2) qui sont négatifs et importants.

Renvoi en cas d'effets environnementaux négatifs importants

(2) S'il décide que la réalisation du projet est susceptible d'entraîner des effets environnementaux visés aux paragraphes 5(1) ou (2) qui sont négatifs et importants, le décideur renvoie au gouverneur en conseil la question de savoir si ces effets sont

refer to the Governor in Council the matter of whether those effects are justified in the circumstances.

Referral through Minister

(3) If the decision maker is a responsible authority referred to in any of paragraphs 15(a) to (c), the referral to the Governor in Council is made through the Minister responsible before Parliament for the responsible authority.

Governor in Council's decision

(4) When a matter has been referred to the Governor in Council, the Governor in Council may decide

- (a) that the significant adverse environmental effects that the designated project is likely to cause are justified in the circumstances; or
- (b) that the significant adverse environmental effects that the designated project is likely to cause are not justified in the circumstances.

justifiables dans les circonstances.

Renvoi par l'entremise du ministre

(3) Si le décideur est une autorité responsable visée à l'un des alinéas 15a) à c), le renvoi se fait par l'entremise du ministre responsable de l'autorité devant le Parlement.

Décision du gouverneur en conseil

(4) Saisi d'une question au titre du paragraphe (2), le gouverneur en conseil peut décider :

- a) soit que les effets environnementaux négatifs importants sont justifiables dans les circonstances;
- b) soit que ceux-ci ne sont pas justifiables dans les circonstances.

Fisheries Act (R.S.C., 1985, c. F-14)

Serious harm to fish

35. (1) No person shall carry on any work, undertaking or activity that results in serious harm to fish that are part of a commercial, recreational or Aboriginal fishery, or to fish that support such a fishery.

Exception

(2) A person may carry on a work, undertaking or activity without contravening subsection (1) if

(b) the carrying on of the work, undertaking or activity is authorized by the Minister and the work, undertaking or activity is carried on in accordance with the conditions established by the Minister;

Dommages sérieux aux poissons

35. (1) Il est interdit d'exploiter un ouvrage ou une entreprise ou d'exercer une activité entraînant des dommages sérieux à tout poisson visé par une pêche commerciale, récréative ou autochtone, ou à tout poisson dont dépend une telle pêche.

Exception

(2) Il est permis d'exploiter un ouvrage ou une entreprise ou d'exercer une activité sans contrevenir au paragraphe (1) dans les cas suivants :

b) l'exploitation de l'ouvrage ou de l'entreprise ou l'exercice de l'activité est autorisé par le ministre et est conforme aux conditions que celui-ci établit;

Navigation Protection Act (R.S.C., 1985, c. N-22)

Approval

6. (1) An owner may construct, place, alter, repair, rebuild, remove or decommission a work in, on, over, under, through or across any navigable water that is listed in the schedule that the Minister has determined under section 5 is likely to substantially interfere with navigation only if the Minister has issued an approval for the work, which may be issued only if an application for the approval is submitted and the application is accompanied by the applicable fee.

Permitted works

9. (1) An owner may construct, place, alter, repair, rebuild, remove or decommission a work in, on, over, under, through or across any navigable water that is listed in the schedule that the Minister has determined under section 5 is not likely to substantially interfere with navigation only if the construction, placement, alteration, repair, rebuilding, removal or decommissioning is in accordance with the requirements under this Act.

Approbation

6. (1) Le propriétaire peut, avec l'approbation du ministre seulement, construire, mettre en place, modifier, réparer, reconstruire, enlever ou déclasser, dans des eaux navigables mentionnées à l'annexe ou sur, sous, au-dessus ou à travers celles-ci, un ouvrage qui, selon la décision du ministre prise au titre de l'article 5, risque de gêner sérieusement la navigation; l'approbation ne peut toutefois être délivrée que si la demande est accompagnée des droits applicables.

Ouvrages permis

9. (1) Le propriétaire peut construire, mettre en place, modifier, réparer, reconstruire, enlever ou déclasser, dans des eaux navigables mentionnées à l'annexe ou sur, sous, au-dessus ou à travers celles-ci, un ouvrage qui, selon la décision du ministre prise au titre de l'article 5, ne risque pas de gêner sérieusement la navigation, s'il le fait conformément aux exigences prévues sous le régime de la présente loi.

RÉPERTORIÉ: R. c. GLADSTONE

N° du greffe: 23801.

1995: 27, 28, 29 novembre; 1996: 21 août.

Présents: Le juge en chef Lamer et les juges La Forest, L'Heureux-Dubé, Sopinka, Gonthier, Cory, McLachlin, Iacobucci et Major.

EN APPEL DE LA COUR D'APPEL DE LA COLOMBIE-BRITANNIQUE

Droit constitutionnel — Droits ancestraux — Autochtones ayant offert à un acheteur un échantillon de produit du poisson pour savoir s'il était «intéressé» à s'en procurer — Règlement exigeant un permis particulier pour la récolte et la vente du produit du poisson — Autochtones n'ayant pas le permis requis pour vendre le produit du poisson — Éléments de preuve indiquant que des échanges du produit du poisson avaient lieu sur une grande échelle avant le contact avec les Européens — Existe-t-il un droit ancestral de récolter et de vendre le produit du poisson? — Le droit ancestral est-il éteint? — Le règlement porte-t-il atteinte à un droit ancestral? — Une telle atteinte serait-elle justifiée? — Loi constitutionnelle de 1982, art. 35(1), 52 — Loi sur les pêcheries, S.R.C. 1970, ch. F-14, art. 61(1) — Règlement de pêche du hareng du Pacifique, DORS/84-324, art. (3).

Commercial law — Attempt to sell — Natives approaching buyer with sample of fish product to determine if “interested” in buying — Whether conduct amounting to attempt to sell.

The accused were charged under s. 61(1) of the *Fisheries Act* with attempting to sell herring spawn on kelp caught without the proper licence contrary to s. 20(3) of the *Pacific Herring Fishery Regulations*. They had shipped a large quantity to the Vancouver area and approached a fish dealer with a sample to see if he was “interested”. One of the accused, on arrest, produced an Indian food fish licence permitting him to harvest 500 pounds. The Supreme Court of British Columbia and the Court of Appeal upheld the convictions. The constitutional question before this Court questioned whether s. 20(3) of the *Pacific Herring Fishery Regulations* was of no force or effect in the circumstances, in virtue of s. 52 of the *Constitution Act, 1982*, by reason of the aboriginal rights within the meaning of s. 35(1) of the *Constitution Act, 1982*. Also raised was the sufficiency of their actions to constitute an attempt to sell in law.

Held (La Forest J. dissenting): The appeal should be allowed.

Whether an Attempt to Sell

Per Lamer C.J. and La Forest, L’Heureux-Dubé, Sopinka, Gonthier, Cory, McLachlin, Iacobucci and Major JJ.: The accused attempted to sell herring spawn on kelp. Shipping it to the Vancouver area, taking a sample to the fish merchant and specifically asking him if he was “interested” had sufficient proximity to the acts necessary to complete the offence of selling herring spawn on kelp to move those actions beyond mere preparation to an actual attempt.

The Aboriginal Right

Per Lamer C.J. and Sopinka, Gonthier, Cory, Iacobucci and Major JJ.: To be recognized as an aboriginal right an activity must be an element of a practice, custom or tradition integral to the distinctive culture of the aboriginal group claiming that right. The first step is the determination of the precise nature of the claim

Droit commercial — Tentative de vente — Autochtones ayant offert à un acheteur un échantillon de produit du poisson pour savoir s’il était «intéressé» à s’en procurer — Ce comportement équivaut-il à une tentative de vente?

Les appelants ont été accusés, aux termes du par. 61(1) de la *Loi sur les pêcheries*, d’avoir tenté de vendre de la rogue de hareng sur varech qui avait été récoltée sans le permis approprié, contrairement au par. 20(3) du *Règlement de pêche du hareng du Pacifique*. Ils en avaient expédié une grande quantité dans la région de Vancouver et en avaient offert un échantillon à un marchand de poisson pour voir s’il était «intéressé» à s’en procurer. Au moment de son arrestation, l’un des accusés a exhibé un permis de pêche de subsistance des Indiens l’autorisant à récolter 500 livres de rogue de hareng sur varech. La Cour suprême de la Colombie-Britannique et la Cour d’appel de cette province ont maintenu les déclarations de culpabilité. La question constitutionnelle dont notre Cour a été saisie était de savoir si le par. 20(3) du *Règlement de pêche du hareng du Pacifique* était inopérant dans les circonstances, en vertu de l’art. 52 de la *Loi constitutionnelle de 1982*, en raison de l’existence de droits ancestraux au sens du par. 35(1) de la *Loi constitutionnelle de 1982*. Ils ont en outre soutenu que leurs actes étaient insuffisants pour constituer, en droit, une tentative de vente.

Arrêt (le juge La Forest est dissident): Le pourvoi est accueilli.

Y a-t-il eu tentative de vente?

Le juge en chef Lamer et les juges La Forest, L’Heureux-Dubé, Sopinka, Gonthier, Cory, McLachlin, Iacobucci et Major: Les accusés ont tenté de vendre de la rogue de hareng sur varech. Le fait d’avoir expédié le produit dans la région de Vancouver, le fait d’en avoir apporté un échantillon au marchand de poisson et le fait de lui avoir expressément demandé s’il était «intéressé» à s’en procurer étaient des faits suffisamment proches des actes requis pour qu’il y ait perpétration de l’infraction de vente de rogue de hareng sur varech, de sorte qu’ils dépassaient la simple préparation et constituaient une tentative véritable.

Le droit ancestral

Le juge en chef Lamer et les juges Sopinka, Gonthier, Cory, Iacobucci et Major: Pour être reconnue comme un droit ancestral, une activité doit être un élément d’une coutume, pratique ou tradition faisant partie intégrante de la culture distinctive du groupe autochtone qui revendique le droit en question. La première étape consiste à

being made, taking into account such factors as the nature of the action allegedly taken pursuant to an aboriginal right, the government regulation allegedly infringing the right, and the practice, custom or tradition allegedly establishing the right.

The regulations under which the accused were charged prohibited all sale or trade in herring spawn on kelp without a particular licence. The exchange of herring spawn on kelp for money or other goods was to an extent a central, significant and defining feature of the culture of the Heiltsuk prior to contact and best characterized as commercial. This exchange and trade was an integral part of the distinctive culture of the Heiltsuk prior to contact.

To merit constitutional protection, a practice, custom or tradition which is integral to the aboriginal community must be shown to have continuity with the practices, customs or traditions which existed prior to contact. The evidence satisfied this requirement. The commercial trade in herring spawn on kelp was an integral part of the distinctive culture of the Heiltsuk prior to contact and was not incidental to social or ceremonial activities. An aboriginal right to trade herring spawn on kelp on a commercial basis was established.

Per L'Heureux-Dubé J.: Section 35(1) must be given a generous, large and liberal interpretation and uncertainties, ambiguities or doubts should be resolved in favour of the natives. Further, aboriginal rights must be construed in light of the special trust relationship and the responsibility of the Crown *vis-à-vis* aboriginal people. Finally, but most significantly, aboriginal rights protected under s. 35(1) have to be viewed in the context of the specific history and culture of the native society and with regard to native perspective on the meaning of the rights asserted.

The "frozen right" approach focusing on aboriginal practices should not be adopted. Instead, the definition of aboriginal rights should refer to the notion of "integral part of distinctive aboriginal culture" and should "permit the evolution of aboriginal rights over time". Case law on treaty and aboriginal rights relating to trade

déterminer la nature précise de la revendication des appelants, compte tenu de facteurs tels que la nature de l'acte qui aurait été accompli en vertu d'un droit ancestral, le règlement gouvernemental qui violerait ce droit, et la coutume, pratique ou tradition invoquée pour établir l'existence du droit revendiqué.

Le règlement en vertu duquel les accusés ont été poursuivis interdit complètement la vente ou l'échange de rogue de hareng sur varech sans un permis particulier. L'échange de la rogue de hareng sur varech contre de l'argent ou d'autres biens était, dans une certaine mesure, une caractéristique fondamentale, importante et déterminante de la culture distinctive des Heiltsuk avant le contact avec les Européens, et qu'il convient de qualifier de commerciale. Ces échanges faisaient partie intégrante de la culture distinctive des Heiltsuk avant le contact avec les Européens.

Pour qu'elle soit protégée sur le plan constitutionnel, il faut démontrer qu'une coutume, pratique ou tradition faisant partie intégrante de la culture distinctive de la collectivité autochtone marque une continuité avec des coutumes, pratiques ou traditions qui existaient avant le contact avec les Européens. La preuve satisfait à cette exigence. Les échanges commerciaux de rogue de hareng sur varech faisaient partie intégrante de la culture distinctive des Heiltsuk avant le contact avec les Européens et n'étaient pas une activité accessoire des activités sociales et rituelles de la collectivité. L'existence d'un droit ancestral d'échanger de la rogue de hareng sur varech sur une échelle commerciale a été établie.

Le juge L'Heureux-Dubé: Le paragraphe 35(1) doit recevoir une interprétation généreuse, large et libérale, et les ambiguïtés, doutes ou incertitudes doivent être résolus en faveur des autochtones. En outre, les droits ancestraux doivent être interprétés à la lumière des rapports spéciaux de fiduciaire et de la responsabilité de Sa Majesté vis-à-vis des peuples autochtones. Finalement, le dernier principe — mais aussi le plus important — est que les droits ancestraux protégés par le par. 35(1) doivent être interprétés dans le contexte de l'histoire et de la culture particulières de la société autochtone concernée, et en tenant compte du point de vue des autochtones eux-mêmes quant à la signification des droits revendiqués.

Il n'y avait pas lieu d'adopter la méthode fondée sur les «droits figés», qui s'attache aux pratiques autochtones. Au contraire, la définition des droits ancestraux devrait être axée sur la notion de «partie intégrante d'une culture autochtone distinctive» et devrait «permettre à ces droits d'évoluer avec le temps». La juris-

supports the making of a distinction between the sale, trade and barter of fish for, on the one hand, livelihood, support and sustenance purposes and for, on the other, purely commercial purposes. The delineation of aboriginal rights must be viewed on a continuum.

The aboriginal right at issue falls on the part of the spectrum relating to the sale, trade and barter of fish for commercial purposes, not on the part dealing with livelihood, support and sustenance purposes. The legislative provision under constitutional challenge was aimed at both commercial and non-commercial sale, trade and barter of herring spawn on kelp. The sale, trade and barter of fish for commercial purposes was sufficiently significant and fundamental to the culture and social organization of the Heiltsuk for a substantial continuous period of time to have formed an integral part of their culture. Consequently, the criteria regarding the characterization of aboriginal rights protected under s. 35(1) of the *Constitution Act, 1982* are met in this case.

Per McLachlin J.: Evidence of an established trading network was clear in this case. The Heiltsuk derived their sustenance from trade derived from herring spawn on kelp; they relied on trade to supply them with the necessities of life, principally other food products. An aboriginal right therefore existed.

Per La Forest J. (dissenting): The trial judge's findings of fact are to the effect that the Heiltsuk had been engaged in the bartering and trading of herring spawn on kelp prior to contact and that these activities, at times, involved very large quantities of fish. These activities had special significance to the Heiltsuk in that the Heiltsuk engaged in such trading activities on the basis that they valued sharing resources with other bands who did not have access to that resource. That special significance made bartering and trading in herring spawn on kelp a part of their distinctive culture. Therefore, the Heiltsuk did have an aboriginal right to barter and trade herring spawn on kelp to a certain degree. Without that special significance to the Heiltsuk, it cannot be said, based on the trial judge's findings of fact, that such activity constitutes an integral part of their distinctive culture and thus any trading and bartering not done in that context cannot in any way be said to form an integral part of the distinctive culture of the Heiltsuk society. The appellants' activities, which, the trial judge found, were done in a completely different

prudence sur les droits ancestraux ou issus de traités concernant les échanges appuie l'établissement d'une distinction entre, d'une part, la vente et l'échange de poisson à des fins de subsistance, et, d'autre part, la vente et l'échange de poisson à des fins purement commerciales. Les droits ancestraux doivent être considérés comme formant les divers éléments d'un spectre.

Le droit ancestral en cause correspond à la partie du spectre qui concerne la vente et l'échange de poisson à des fins commerciales, plutôt qu'à celle touchant les activités exercées à des fins de subsistance. La disposition législative faisant l'objet de la présente contestation constitutionnelle visait la vente et l'échange de rogue de hareng sur varech à des fins commerciales et non commerciales. Les activités de vente et d'échange de poisson à des fins commerciales ont été suffisamment importantes et fondamentales pour l'organisation sociale et la culture des Heiltsuk pendant une période considérable et ininterrompue pour avoir fait partie intégrante de leur culture. En conséquence, le critère applicable afin de caractériser les droits ancestraux protégés par le par. 35(1) de la *Loi constitutionnelle de 1982* est satisfait en l'espèce.

Le juge McLachlin: En l'espèce, la preuve a démontré clairement l'existence d'un réseau d'échanges établi. Les Heiltsuk tiraient leur subsistance d'échanges fondés sur l'exploitation de la rogue de hareng sur varech. Ils comptaient sur ces échanges pour se procurer les biens nécessaires à la vie, principalement d'autres produits alimentaires. Il existait donc un droit ancestral.

Le juge La Forest (dissident): Les conclusions de fait du juge du procès indiquent que les Heiltsuk échangeaient de la rogue de hareng sur varech déjà avant le contact avec les Européens et que ces activités portaient parfois sur de très importantes quantités de poisson. Ces activités avaient une importance spéciale pour les Heiltsuk en ce sens qu'ils pratiquaient ce genre d'activités d'échange parce qu'il était important pour eux de partager des ressources avec d'autres bandes n'ayant pas accès à celles-ci. Cette importance spéciale faisait des échanges de rogue de hareng sur varech une partie de la culture distinctive de la bande. Par conséquent, les Heiltsuk possédaient, dans une certaine mesure, un droit ancestral d'échanger de la rogue de hareng sur varech. En dehors de ce contexte, on ne peut pas dire, en se fondant sur les conclusions de fait du juge du procès, que ces activités font partie intégrante de la culture distinctive des Heiltsuk et, en conséquence, il est impossible d'affirmer que les échanges qui ne sont pas effectués dans ce contexte font partie intégrante de la culture distinctive de la société heiltsuk. Les activités des appe-

context, accordingly did not form an integral part of the distinctive culture of the Heiltsuk and the aboriginal rights of the Heiltsuk were therefore not infringed.

Extinguishment

Per Lamer C.J. and Sopinka, Gonthier, Cory, Iacobucci and Major J.J.: The intention to extinguish an aboriginal right must be clear and plain. The varying regulatory schemes affecting the herring spawn on kelp harvest did not express a clear and plain intention to eliminate the aboriginal right. The regulations may have failed to recognize the aboriginal right and to give it special protection but they never prohibited aboriginal people from obtaining licences to fish commercially. More importantly, the government has, at various times, given preferences to aboriginal commercial fishing. Finally, the Regulation relied upon in arguing for extinguishment was of an entirely different nature than the document relied on for a finding of extinguishment in *R. v. Horseman*.

Per L'Heureux-Dubé J.: As regards the issues of extinguishment and *prima facie* infringement, the reasons and conclusions of Lamer C.J. were agreed with for the most part. The Heiltsuk's aboriginal right to sale, trade and barter herring spawn on kelp for commercial purposes has not been extinguished by a "clear and plain intention" of the Sovereign. The approach where the aboriginal right is considered extinguished when it and the activities contemplated by the legislation cannot co-exist is irreconcilable with the "clear and plain intention" test favoured in Canada. The legislation was not sufficient to extinguish the aboriginal right to sell, trade and barter fish for commercial purposes. It merely regulates aboriginal activities and does not amount to extinguishment.

Per McLachlin J.: Order in Council P.C. 2539 did not extinguish the aboriginal right of the Heiltsuk people to use herring spawn on kelp as a source of sustenance. It did not manifest the necessary "clear and plain" intention. Their most likely purpose was to conserve. A measure aimed at conservation of a resource is not inconsistent with a recognition of an aboriginal right to make use of that resource. Indeed, there was no evidence that

lants, qui, selon le juge du procès, ont été accomplies dans un contexte complètement différent, ne faisaient pas partie intégrante, par conséquent, de la culture distinctive des Heiltsuk et il n'y a donc pas eu atteinte aux droits ancestraux des Heiltsuk.

Extinction

Le juge en chef Lamer et les juges Sopinka, Gonthier, Cory, Iacobucci et Major: L'intention d'éteindre un droit ancestral doit être claire et expresse. Les régimes de réglementation changeants qui régissaient la récolte de la rogue de hareng sur varech n'exprimaient pas une intention claire et expresse d'abolir les droits ancestraux. Le règlement n'a peut-être pas reconnu à ce droit la qualité de droit ancestral et ne lui a peut-être pas accordé une protection spéciale, mais il n'a jamais interdit aux peuples autochtones d'obtenir des permis de pêche commerciale. Fait encore plus important, le gouvernement a, à divers moments, pris des mesures préférentielles en faveur de la pêche commerciale autochtone. Enfin, la nature du règlement invoqué à l'appui de l'extinction du droit est tout à fait différente de celle du document invoqué pour conclure à l'extinction dans les arrêts *R. c. Horseman*.

Le juge L'Heureux-Dubé: En ce qui concerne les questions de l'extinction et de l'atteinte *prima facie*, les motifs et les conclusions du juge en chef Lamer sont acceptés pour l'essentiel. Le droit ancestral des Heiltsuk de vendre et d'échanger de la rogue de hareng sur varech à des fins commerciales n'a pas été éteint par suite de la manifestation d'une «intention claire et expresse» du Souverain. La position selon laquelle le droit ancestral est considéré comme éteint dans les cas où il ne peut pas coexister avec les activités visées par les mesures législatives est inconciliable avec le test de «l'intention claire et expresse» privilégié au Canada. Les mesures législatives étaient insuffisantes pour éteindre le droit ancestral de vendre et d'échanger du poisson à des fins commerciales. Elles ne font que réglementer les activités autochtones et n'entraînent pas l'extinction du droit de les exercer.

Le juge McLachlin: Le décret C.P. 2539 n'a pas éteint le droit ancestral des Heiltsuk d'utiliser la rogue de hareng sur varech comme moyen de subsistance. Il n'exprimait pas l'intention «claire et expresse» requise. L'objet le plus vraisemblable de ces mesures de réglementation était d'assurer la conservation du fretin de ce poisson. Une mesure ayant pour but la conservation d'une ressource n'est pas incompatible avec la recon-

the measure was intended to relate to the aboriginal right at all.

Per La Forest J. (dissenting): The *Sparrow* decision only stands for the proposition that the Crown had not expressed a clear and plain intention to extinguish aboriginal rights regarding fishing for food, including social and ceremonial purposes. Order-in-Council P.C. 2539, which put in place restrictions on the native exploitation of this fishery, evinced a clear and plain intention on the part of the Crown to extinguish aboriginal rights relating to commercial fisheries in British Columbia — should they ever have existed. The Crown specifically chose to translate aboriginal practices into statutory rights and expressly decided to limit the scope of these rights. Aboriginal rights relating to practices that were specifically excluded were thereby extinguished.

Prima Facie Infringement

Per Lamer C.J. and Sopinka, Gonthier, Cory, Iacobucci and Major JJ.: The *Sparrow* test for determining whether the government has infringed aboriginal rights involves (1) asking whether the legislation has the effect of interfering with an existing aboriginal right and (2) determining whether the limitation (i) was unreasonable, (ii) imposed undue hardship, (iii) denied the right holders their preferred means of exercising that right. The test is partly determined by the factual context; in this case, the test must be applied not simply to s. 20(3) of the *Pacific Herring Fishery Regulations* but also to the other aspects of the regulatory scheme. Simply because one of those questions is answered in the negative will not prohibit a finding by a court that a *prima facie* infringement has taken place; it will just be one factor for a court to consider in its determination of whether there has been a *prima facie* infringement.

The government's scheme for regulating the herring spawn on kelp fishery can be divided into four constituent parts: (1) the government determines the amount of the herring stock that will be harvested in a given year; (2) the government allots the herring stock to the different herring fisheries (herring roe, herring spawn on kelp and other herring fisheries); (3) the government allots the herring spawn on kelp fishery to various user groups (commercial users and the Indian food fishery); and (4) the government allots the commercial herring spawn on

naissance d'un droit ancestral d'utiliser cette ressource. De fait, il n'y a eu aucune preuve que ces mesures visaient d'aucune façon le droit ancestral.

Le juge La Forest (dissident): L'arrêt *Sparrow* permet seulement d'affirmer que l'État n'avait pas exprimé l'intention claire et expresse d'éteindre les droits ancestraux en ce qui concerne la pêche pratiquée à des fins alimentaires, y compris à des fins sociales et rituelles. Le décret C.P. 2539, qui a mis en place des restrictions à l'exploitation de cette pêche par les autochtones, indiquait une intention claire et expresse de la part de l'État d'éteindre les droits ancestraux relatifs à la pêche commerciale en Colombie-Britannique — si ces droits ont jamais existé. L'État a spécifiquement choisi de convertir des pratiques autochtones en droits prévus par la loi et a expressément décidé de limiter la portée de ces droits. Les droits ancestraux touchant des pratiques qui ont été spécifiquement exclues ont, de ce fait, été éteints.

Atteinte prima facie

Le juge en chef Lamer et les juges Sopinka, Gonthier, Cory, Iacobucci et Major: Le critère énoncé dans l'arrêt *Sparrow* et permettant de déterminer si l'État a porté atteinte aux droits ancestraux comporte (1) la question de savoir si la loi en question a pour effet de porter atteinte à un droit ancestral existant et (2) celle de déterminer (i) si la restriction était déraisonnable, (ii) si le règlement était indûment rigoureux et (iii) s'il refusait aux titulaires du droit le recours à leur moyen préféré de l'exercer. Le critère est, dans une certaine mesure, fonction du contexte factuel dans lequel il a été formulé; en l'espèce, le critère doit être appliqué non seulement au par. 20(3) du *Règlement de pêche du hareng du Pacifique* mais également aux autres aspects du régime de réglementation. Le simple fait qu'on réponde par la négative à l'une de ces questions n'empêche pas le tribunal de conclure à l'existence d'une atteinte à première vue. Cette réponse négative n'est qu'un des facteurs que le tribunal doit prendre en considération pour déterminer s'il y a eu atteinte à première vue.

Le régime gouvernemental de réglementation de la récolte de la roque de hareng sur varech peut être divisé en quatre éléments constitutifs: (1) l'État détermine la proportion des stocks de hareng qui sera récoltée au cours d'une année donnée; (2) il répartit les stocks de hareng entre les divers secteurs de la pêche de ce poisson (hareng prêt à frayer, roque de hareng sur varech et autres types de pêche); (3) il répartit la part attribuée à la récolte de la roque de hareng sur varech entre les divers groupes d'utilisateurs (utilisateurs commerciaux et Indiens pra-

kelp licences. The appellants demonstrated a *prima facie* interference with their aboriginal rights. Prior to contact, the Heiltsuk could harvest herring spawn on kelp to the extent they themselves desired. Under the regulatory scheme they can harvest for commercial purposes only to the limited extent allowed by the government.

Per L'Heureux-Dubé J.: Section 20(3) of the *Pacific Herring Fishery Regulations* directly conflicts, both by its object and by its effects, with native sale, trade and barter of herring spawn on kelp on a commercial basis and so violates the aboriginal right. This right has never been extinguished by a clear and plain intention of the Sovereign. Although in agreement with Lamer C.J. on the issue, the relatively low burden on the claimant of the right to demonstrate infringement on the face of the legislation was emphasized. Here, the appellants overwhelmingly discharged their burden in that regard.

Per McLachlin J.: An aboriginal person must establish a *prima facie* right to engage in the prohibited conduct at issue. The Crown may rebut the inference of infringement if it can demonstrate that the regulatory scheme, viewed as a whole, accommodates the collective aboriginal right in question. The Heiltsuk have a right to harvest and sell herring spawn on kelp for the purpose of sustenance and this right was evidently denied by the regulation under which the appellants stand charged. Thus, the first requirement of the test is met.

The evidence did not disclose whether the licence issued to the Heiltsuk was sufficient to satisfy their aboriginal right to sell herring spawn on kelp for sustenance. The case should be referred for a new trial so that this case can be resolved.

Justification

Per Lamer C.J. and Sopinka, Gonthier, Cory, Iacobucci and Major JJ.: Justification of infringements of aboriginal rights involves a two-part test. The government must demonstrate that: (1) it was acting pursuant to a valid legislative objective; and (2) its actions were consistent with its fiduciary duty towards aboriginal peoples.

tiquant la pêche de subsistance); (4) il répartit les permis de pêche commerciale de la rogue de hareng sur varech. Les appelants ont démontré une atteinte à première vue à leurs droits ancestraux. Avant l'arrivée des Européens en Amérique du Nord, les Heiltsuk pouvaient récolter autant de rogue de hareng sur varech qu'ils le désiraient. Par suite de l'établissement du régime de réglementation, ils ne peuvent récolter que la quantité limitée de rogue de hareng sur varech à des fins commerciales autorisée par l'État.

Le juge L'Heureux-Dubé: Le paragraphe 20(3) du *Règlement de pêche du hareng du Pacifique* entre directement en conflit, tant de par son objet que de par ses effets, avec la vente et l'échange de rogue de hareng sur varech par les autochtones sur une base commerciale et viole un tel droit ancestral. Ce droit n'a jamais été éteint par suite de la manifestation d'une intention claire et expresse du Souverain. Bien que l'analyse du juge en chef Lamer sur cette question soit acceptée, il y est souligné le caractère assez peu exigeant du fardeau qu'a la personne qui revendique un tel droit d'établir qu'une mesure législative porte atteinte à un droit ancestral existant. Dans le présent pourvoi, les appelants se sont nettement acquittés du fardeau qui leur incombait à cet égard.

Le juge McLachlin: Un autochtone doit établir l'existence à première vue d'un droit d'accomplir l'acte prohibé en cause. Le ministère public peut repousser l'inférence qu'il y a atteinte en démontrant que, considéré dans son ensemble, le régime de réglementation respecte le droit ancestral collectif en question. Les Heiltsuk ont le droit de récolter et de vendre la rogue de hareng sur varech à des fins de subsistance, droit dont ils ont apparemment été privés par la disposition réglementaire en vertu de laquelle les appelants ont été accusés. Par conséquent, la première condition du critère est remplie.

La preuve n'a pas indiqué si le permis délivré aux Heiltsuk respectait suffisamment leur droit ancestral de vendre de la rogue de hareng sur varech à des fins de subsistance. Il faudrait renvoyer l'affaire en vue de la tenue d'un nouveau procès afin de trancher cette question.

Justification

Le juge en chef Lamer et les juges Sopinka, Gonthier, Cory, Iacobucci et Major: La justification des atteintes aux droits ancestraux emporte l'application d'un critère à deux volets. L'État doit démontrer (1) qu'il a agi en vertu d'un objectif législatif régulier; et (2) que ses actions sont compatibles avec son obligation de fiduciaire envers les peuples autochtones.

Where the aboriginal right is internally limited, so that it is clear when that right has been satisfied and other users can be allowed to participate in the fishery, the notion of priority, as articulated in *Sparrow*, makes sense. *Sparrow* did not contemplate situations other than that where the aboriginal right was internally limited. Where the aboriginal right has no internal limitation, however, the notion of priority, as articulated in *Sparrow*, would mean that an aboriginal right would become an exclusive one. Where the aboriginal right has no internal limitation, the doctrine of priority requires that the government demonstrate that it has taken the existence of aboriginal rights into account in allocating the resource and allocated the resource in a manner respectful of the fact that those rights have priority over the exploitation of the fishery by other users. This right is at once both procedural and substantive; at the stage of justification the government must demonstrate both that the process by which it allocated the resource, and the actual allocation of the resource which results from that process, reflect the prior interest of aboriginal rights holders in the fishery. The content of this priority — something less than exclusivity but which nonetheless gives priority to the aboriginal right — must remain somewhat vague pending consideration of the government's actions in specific cases.

Unlike *Sparrow*, which considered only the justifiability of conservation objectives, this case raises the question of whether other government objectives will justify limitations on aboriginal rights. The regulatory scheme at issue in this case — the allocation of herring spawn on kelp — does not involve conservation concerns: it makes no difference in terms of conservation who is allowed to catch the fish.

The purposes underlying aboriginal rights must inform not only the definition of the rights but also the identification of those limits on the rights which are justifiable. Because distinctive aboriginal societies exist within, and are a part of, a broader social, political and economic community, over which the Crown is sovereign, there are circumstances in which, in order to pursue objectives of compelling and substantial importance to that community as a whole (taking into account the fact that aboriginal societies are a part of that community), some limitation of those rights will be justifiable. Aboriginal rights are a necessary part of the reconciliation of aboriginal societies with the broader political community of which they are part; limits placed on those rights are, where the objectives furthered by those

Dans une situation où le droit ancestral est intrinsèquement limité, et où il est, de ce fait, facile de déterminer s'il a été respecté et si les autres usagers peuvent être autorisés à pêcher, l'application de la notion de priorité formulée dans *Sparrow* est logique. L'arrêt *Sparrow* n'envisage pas de situations autres que celles où le droit ancestral est intrinsèquement limité. Toutefois, quand le droit ancestral ne comporte pas de limite intrinsèque, l'application de la notion de priorité formulée dans *Sparrow* signifierait qu'un droit ancestral deviendrait exclusif. Lorsque le droit ancestral en cause n'est pas assorti de limite intrinsèque, la doctrine relative à l'ordre de priorité commande que l'État démontre que, dans la répartition de la ressource, il a tenu compte de l'existence des droits ancestraux et réparti la ressource d'une manière qui respecte le fait que les titulaires de ces droits ont, en matière d'exploitation de la pêche, priorité sur les autres usagers. Il s'agit d'un droit à la fois substantiel et procédural. À l'étape de la justification, l'État doit démontrer que les modalités de répartition de la ressource ainsi que la répartition elle-même reflètent l'intérêt prioritaire des titulaires des droits ancestraux à l'égard de cette pêche. Le contenu de ce droit de priorité — qui, sans aller jusqu'à l'exclusivité, donne néanmoins préséance au droit ancestral — doit rester assez vague tant que les actions de l'État n'ont pas été examinées dans des cas précis.

Contrairement à l'arrêt *Sparrow*, où l'on a examiné le caractère justifiable des objectifs de conservation, le présent pourvoi soulève la question de savoir si d'autres objectifs gouvernementaux justifieront l'existence de restrictions aux droits ancestraux. Le régime de réglementation en cause — la répartition de la récolte de la roque de hareng sur varech — ne concerne pas des questions de conservation: le fait que ce soit un groupe ou un autre qui soit autorisé à prendre le poisson ne change rien du point de vue de la conservation.

Les objets qui sous-tendent les droits ancestraux doivent non seulement servir à la définition de ces droits, mais également à la détermination des limites apportées à ceux-ci et qui sont justifiables. Comme les sociétés autochtones distinctives existent au sein d'une communauté sociale, politique et économique plus large, communauté dont elles font partie et sur laquelle s'exerce la souveraineté de Sa Majesté, il existe des circonstances où, dans la poursuite d'objectifs importants ayant un caractère impérieux et réel pour l'ensemble de la communauté (compte tenu du fait que les sociétés autochtones font partie de celle-ci), certaines restrictions de ces droits sont justifiables. Les droits ancestraux sont un élément nécessaire de la conciliation de l'existence des sociétés autochtones avec la communauté politique plus

limits are of sufficient importance to the broader community as a whole, equally a necessary part of that reconciliation. With regards to the distribution of the fisheries resource after conservation goals have been met, objectives such as the pursuit of economic and regional fairness, and the recognition of the historical reliance upon, and participation in, the fishery by non-aboriginal groups, are the type of objectives which can (at least in the right circumstances) satisfy this standard. In the right circumstances, such objectives are in the interest of all Canadians and, more importantly, the reconciliation of aboriginal societies with the rest of Canadian society may well depend on their successful attainment.

The evidence and testimony presented in this case was insufficient for the Court to determine whether the government's regulatory scheme was justified.

Per L'Heureux-Dubé J.: There was insufficient evidence to rule on the question of justification. Lamer C.J.'s comments on this issue, and particularly as regards the doctrine of priority and the decision in *Jack v. The Queen* were agreed with.

Per McLachlin J.: It was not necessary to reach the issue of justification. The question of whether such an infringement were justified should be decided at a new trial.

large à laquelle ces dernières appartiennent. Les limites imposées à ces droits sont également un élément nécessaire de cette conciliation, si les objectifs qu'elles visent sont suffisamment importants pour la communauté dans son ensemble. En ce qui concerne la répartition de ressources halieutiques données, une fois que les objectifs de conservation ont été respectés, des objectifs tels que la poursuite de l'équité sur les plans économique et régional ainsi que la reconnaissance du fait que, historiquement, des groupes non autochtones comptent sur ces ressources et participent à leur exploitation, sont le genre d'objectifs susceptibles (du moins dans les circonstances appropriées) de satisfaire à cette norme. Dans les circonstances appropriées, de tels objectifs sont dans l'intérêt de tous les Canadiens et, facteur plus important encore, la conciliation de l'existence des sociétés autochtones avec le reste de la société canadienne pourrait bien dépendre de leur réalisation.

La preuve documentaire et testimoniale produite dans la présente affaire était insuffisante pour permettre à notre Cour de déterminer si ce régime est justifié.

Le juge L'Heureux-Dubé: La preuve était insuffisante pour permettre de trancher la question de la justification. Il est souscrit aux observations du juge en chef Lamer sur cette question, particulièrement en ce qui concerne la doctrine relative à l'ordre de priorité ainsi qu'à la décision de notre Cour dans *Jack c. La Reine*.

Le juge McLachlin: Il n'était pas nécessaire d'examiner la question de la justification. La question de savoir si une telle atteinte était justifiée devrait être tranchée lors d'un nouveau procès.

THE CHIEF JUSTICE —

I. Facts

Donald and William Gladstone, the appellants, are members of the Heiltsuk Band. The appellants were charged under s. 61(1) of the *Fisheries Act*, R.S.C. 1970, c. F-14, with the offences of offering to sell herring spawn on kelp caught under the authority of an Indian food fish licence, contrary to s. 27(5) of the *British Columbia Fishery (General) Regulations*, SOR/84-248 and of attempting to sell herring spawn on kelp not caught under the authority of a Category J herring spawn on kelp licence, contrary to s. 20(3) of the *Pacific Herring Fishery Regulations*, SOR/84-324. Only the charges arising under s. 20(3) of the *Pacific Herring Fishery Regulations* are still at issue in this appeal.

The charges arose out of events taking place in April of 1988. On approximately April 27, 1988 the appellants shipped 4,200 pounds of herring spawn on kelp from Bella Bella to Richmond, a suburb of Vancouver. On April 28, 1988 the appellants took a pail containing approximately 35 pounds of herring spawn on kelp to Seaborn Enter-

Christopher Harvey, c.r., et Robert Lonergan, pour les intervenantes la British Columbia Fisheries Survival Coalition et la British Columbia Wildlife Federation.

Harry A. Slade, Arthur C. Pape et Robert C. Freedman, pour l'intervenant le First Nations Summit.

Stuart Rush, c.r., et Michael Jackson, pour les intervenants Delgamuukw et autres.

Arthur C. Pape et Clayton C. Ruby, pour les intervenants Howard Pamajewon, Roger Jones, Arnold Gardner, Jack Pitchenese et Allan Gardner.

Version française du jugement du juge en chef Lamer et des juges Sopinka, Gonthier, Cory, Iacobucci et Major rendu par

LE JUGE EN CHEF —

I. Les faits

Les appelants, Donald et William Gladstone, sont membres de la bande des Heiltsuk. Ils ont été accusés, aux termes du par. 61(1) de la *Loi sur les pêcheries*, S.R.C. 1970, ch. F-14, d'avoir offert de vendre de la rogue de hareng sur varech récoltée en vertu d'un permis de pêche de subsistance des Indiens, infraction prévue au par. 27(5) du *Règlement de pêche général de la Colombie-Britannique*, DORS/84-248, et d'avoir tenté de vendre de la rogue de hareng sur varech qui n'avait pas été récoltée en vertu d'un permis de catégorie J, infraction prévue au par. 20(3) du *Règlement de pêche du hareng du Pacifique*, DORS/84-324. Seules les accusations fondées sur le par. 20(3) du *Règlement de pêche du hareng du Pacifique* sont encore en litige dans le présent pourvoi.

Les faits ayant donné lieu aux accusations remontent au mois d'avril 1988. Vers le 27 avril 1988, les appelants ont expédié de Bella Bella jusqu'à Richmond, banlieue de Vancouver, 4 200 livres de rogue de hareng sur varech. Le 28 avril 1988, ils ont apporté un seau contenant 35 livres de ce produit à la poissonnerie Seaborn Enterprises

prises Ltd., a fish store in Vancouver. At Seaborn Enterprises Ltd. the appellants had a conversation with Mr. Katsu Hirose, the owner of the store, in which they asked Mr. Hirose if he was "interested" in herring spawn on kelp. Mr. Hirose informed the appellants that he did not purchase herring spawn on kelp from Native Indians. Upon leaving Seaborn Enterprises Ltd. the appellants, who had been under surveillance by fisheries officers throughout these events, were arrested and the entire 4,200 pounds of herring spawn on kelp was seized. Upon arrest the appellant William Gladstone produced an Indian food fish licence permitting him to harvest 500 pounds of herring spawn on kelp.

At the time at which the appellants were charged s. 20(3) of the *Pacific Herring Fishery Regulations* read:

20. . . .

(3) No person shall buy, sell, barter or attempt to buy, sell, or barter herring spawn on kelp other than herring spawn on kelp taken or collected under the authority of a Category J licence.

The appellants have not disputed the essential facts of the case. The essence of the appellants' defence is that, in these circumstances, the regulations violated the appellants' aboriginal rights as recognized and affirmed by s. 35(1) of the *Constitution Act, 1982* with the result that, by operation of s. 52 of the *Constitution Act, 1982*, the regulations are of no force or effect with respect to the appellants. The appellants also take the position that the facts related to the shipment of the herring spawn on kelp, and the conversation with Mr. Hirose, are insufficient to constitute an "attempt to sell" in law.

Section 35(1) of the *Constitution Act, 1982* reads:

35. (1) The existing aboriginal and treaty rights of the aboriginal peoples of Canada are hereby recognized and affirmed.

Ltd. à Vancouver. Au cours d'une conversation avec M. Katsu Hirose, propriétaire de Seaborn Enterprises Ltd., ils lui ont demandé s'il était «intéressé» à se procurer de la rogue de hareng sur varech. Ce dernier leur a répondu qu'il n'achetait pas ce produit à des autochtones. À leur sortie de l'établissement, les appelants, qui avaient été surveillés par des agents des pêches tout au long de l'opération, ont été arrêtés, et les 4 200 livres de rogue de hareng sur varech ont été saisies. Au moment de son arrestation, l'appelant William Gladstone a exhibé un permis de pêche de subsistance des Indiens l'autorisant à récolter 500 livres de rogue de hareng sur varech.

À la date où les appelants ont été inculpés, le par. 20(3) du *Règlement de pêche du hareng du Pacifique* était ainsi rédigé:

20. . . .

(3) Il est interdit à quiconque d'acheter, de vendre, d'échanger ou de tenter d'acheter, de vendre ou d'échanger de la rogue de hareng sur varech, à moins que celle-ci n'ait été prise ou recueillie en vertu d'un permis de catégorie J.

Les appelants n'ont pas contesté les faits essentiels de l'affaire. Essentiellement, les appelants font valoir pour leur défense que, dans les circonstances de la présente affaire, les règlements violent leurs droits ancestraux reconnus et confirmés par le par. 35(1) de la *Loi constitutionnelle de 1982*, de sorte qu'en vertu de l'art. 52 de cette loi ces règlements sont inopérants à leur égard. Ils soutiennent en outre que les faits concernant le transport de la rogue de hareng sur varech et la conversation avec M. Hirose sont insuffisants pour constituer, en droit, une «tentative de vente».

Voici le texte du par. 35(1) de la *Loi constitutionnelle de 1982*:

35. (1) Les droits existants — ancestraux ou issus de traités — des peuples autochtones du Canada sont reconnus et confirmés.

II. Judgments Below

Provincial Court, Lemiski Prov. Ct. J.

6 At trial the appellants made a series of technical arguments related to the Crown's proof of the essential elements of the offences with which they were charged. The appellants also argued that the conditions placed on fishing licences constituted improper delegation and that the regulations were *ultra vires* the federal government. None of these arguments was successful at trial and they have all, with one exception, been abandoned on the appeal to this Court. As noted, the appellants have maintained their position that the facts do not support the Crown's contention that the appellants engaged in an "attempt to sell" herring spawn on kelp. The trial judge rejected this argument, holding that "the evidence of an 'attempt to sell' is overwhelming".

7 The appellants also argued at trial that, if they did attempt to sell herring spawn on kelp, they did so pursuant to an aboriginal right recognized and affirmed by s. 35(1) of the *Constitution Act, 1982*. The trial judge accepted this argument, finding as a matter of fact that the Heiltsuk people "continuously traded spawn on kelp over the years to the present time". The trial judge held, further, that this right had not been extinguished. Although regulations passed since 1927 had curtailed the herring spawn on kelp fishery, the trial judge cited *R. v. Sparrow*, [1990] 1 S.C.R. 1075, at p. 1099, for the proposition that these regulations were "simply a manner of controlling the fisheries, not defining underlying rights"; given that this was the case, the trial judge held that the Crown had not demonstrated a clear and plain intention to extinguish the aboriginal right of the appellants to trade in herring spawn on kelp.

8 The trial judge held that the aboriginal rights of the appellants were infringed by the regulations. He held that it was unreasonable to limit the appel-

II. Décisions des juridictions inférieures

Cour provinciale, le juge Lemiski

Au procès, les appelants ont présenté une série d'arguments de forme concernant la preuve produite par le ministère public pour établir les éléments essentiels des infractions reprochées. Ils ont aussi prétendu que les conditions dont les permis de pêche étaient assortis constituaient une délégation irrégulière et que les règlements outrepassaient les pouvoirs du gouvernement fédéral. Aucun de ces arguments n'a été retenu au procès et tous, sauf un, ont été abandonnés dans le cadre du présent pourvoi. Comme il a déjà été souligné, les appelants continuent d'affirmer que les faits n'étaient pas la prétention du ministère public qu'ils ont «tenté de vendre» de la rogue de hareng sur varech. Le juge du procès a rejeté cet argument, statuant que [TRADUCTION] «la preuve de la «tentative de vente» est accablante».

Au procès, les appelants ont également plaidé que si, effectivement, ils ont tenté de vendre de la rogue de hareng sur varech, ils l'ont fait conformément à un droit ancestral reconnu et confirmé par le par. 35(1) de la *Loi constitutionnelle de 1982*. Le juge du procès a accepté cet argument, statuant, en tant que conclusion de fait, que les Heiltsuk [TRADUCTION] «avaient continuellement échangé de la rogue de hareng sur varech au fil des ans, et ce jusqu'à nos jours». Il a en outre conclu que ce droit n'avait pas été éteint. Même si des règlements pris depuis 1927 ont eu pour effet de restreindre la récolte de la rogue de hareng sur varech, le juge du procès s'est appuyé sur l'arrêt *R. c. Sparrow*, [1990] 1 R.C.S. 1075, à la p. 1099, pour déclarer que les règlements en cause étaient «simplement une façon de contrôler les pêcheries et non de définir des droits sous-jacents»; étant donné ce fait, le juge du procès a statué que le ministère public n'avait pas établi l'existence d'une intention claire et expresse d'éteindre le droit ancestral des appelants de faire le commerce de la rogue de hareng sur varech.

Le juge du procès a décidé que les droits ancestraux des appelants avaient été violés par les règlements. Il a conclu qu'il était déraisonnable de res-

lants' rights, that the regulations had the potential to cause hardship to the appellants and that the regulations interfered with the appellants' preferred means of exercising their aboriginal rights, with the result that the *Sparrow* test for infringement had been met.

The trial judge held, however, that the infringement of the appellants' aboriginal rights was justified. He held that the Crown had demonstrated a valid legislative objective in so far as there was a potential conservation concern with the herring spawn on kelp fishery. Further, he held that while the infringement of the appellants' rights was excessive in relation to the legislative objective, there had been consultation with the Native Brotherhood of B.C. In sum, he held that given the difference between the appellants' actions and the aboriginal right they claimed to be acting pursuant to, the interference with their actions by the regulations was a justifiable interference with their rights. In the result, the trial judge convicted the appellants on both counts.

British Columbia Supreme Court, Anderson J. (1991), 13 W.C.B. (2d) 601

The appellants were partially successful on appeal to the British Columbia Supreme Court. Anderson J. held that the facts as found by the trial judge, while supporting the appellants' conviction for attempting to sell herring spawn on kelp in violation of s. 20(3) of the *Pacific Herring Fishery Regulations*, did not support the appellants' conviction for offering to sell herring spawn on kelp in violation of s. 27(5) of the *British Columbia Fishery (General) Regulations*. What the appellants said to Mr. Hirose was only an invitation to treat, not an offer to sell.

Anderson J. agreed with the trial judge that the effect of the regulations on the appellants' s. 35(1) rights was insufficient to invalidate the application of those regulations to the appellants. While he agreed with the trial judge that there was a tradi-

treindre les droits des appelants, que les règlements étaient susceptibles d'être indûment rigoureux et qu'ils privaient les appelants de leur moyen préféré d'exercer leurs droits ancestraux, de sorte que le critère énoncé dans *Sparrow* pour déterminer l'existence d'une atteinte avait été respecté.

Le juge du procès a toutefois conclu que l'atteinte aux droits ancestraux des appelants était justifiée. Il a statué que le ministère public avait démontré l'existence d'un objectif législatif régulier, dans la mesure où il existait un problème potentiel de conservation en ce qui concerne la rogue de hareng sur varech. De plus, il a jugé que, même si l'atteinte aux droits des appelants était excessive par rapport à l'objectif législatif, la Native Brotherhood of B.C. avait néanmoins été consultée. En somme, il a conclu que, vu la différence entre les activités des appelants et le droit ancestral en vertu duquel ils prétendaient avoir agi, la restriction apportée à leurs activités par les règlements était une atteinte justifiable à leurs droits. En conséquence, le juge du procès a déclaré les appelants coupables des deux chefs.

Cour suprême de la Colombie-Britannique, le juge Anderson (1991), 13 W.C.B. (2d) 601

Les appelants ont eu partiellement gain de cause en appel devant la Cour suprême de la Colombie-Britannique. Le juge Anderson a statué que même si les faits constatés par le juge du procès étaient la déclaration de culpabilité des appelants coupables à l'égard de la tentative de vente de rogue de hareng sur varech, infraction prévue au par. 20(3) du *Règlement de pêche du hareng du Pacifique*, ils n'appuyaient pas leur déclaration de culpabilité à l'accusation d'avoir offert ce produit, contrairement au par. 27(5) du *Règlement de pêche général de la Colombie-Britannique*. Les propos des appelants à M. Hirose étaient seulement une invitation à traiter ensemble, non une offre de vente.

Le juge Anderson a dit être d'accord avec le juge du procès que l'effet des règlements sur les droits des appelants était insuffisant pour invalider leur application à ces derniers. Même si, à l'instar du juge du procès, il a conclu à l'existence d'un

tional right to trade herring spawn on kelp, and that that right had not been extinguished, he held, in disagreement with the trial judge, that the fisheries regulations did not infringe the appellants' aboriginal rights. He held that the right of the appellants was not an "absolute and unfettered right to harvest herring spawn in any quantity and to sell the spawn so harvested commercially". The extent of the transaction to be engaged in by the appellants was inconsistent with the aboriginal rights on which they relied. The aboriginal right to trade in herring spawn on kelp is preserved by the operation of the Indian food fishing licences and by the Category J licence issued to the Heiltsuk Band; the limitation of the herring spawn on kelp fishery beyond what is permitted by the regulations cannot be said to be an infringement of the appellants' aboriginal rights.

droit traditionnel d'échanger de la rogue de hareng sur varech et à la non-extinction de ce droit, il a statué, au contraire du juge du procès, que les règlements de pêche ne portaient pas atteinte aux droits ancestraux des appelants. Il a conclu que le droit des appelants n'était pas un [TRADUCTION] «droit absolu et illimité de récolter n'importe quelle quantité de rogue de hareng et de vendre cette récolte commercialement». L'ampleur de l'opération que les appelants entendaient réaliser était incompatible avec les droits ancestraux qu'ils ont invoqués. Le droit ancestral d'échanger de la rogue de hareng sur varech est préservé par l'effet des permis de pêche de subsistance des Indiens et par les permis de catégorie J délivrés à la bande des Heiltsuk. L'interdiction de récolter plus de rogue de hareng sur varech que la quantité permise par règlement ne peut être considérée comme une atteinte aux droits ancestraux des appelants.

12 Anderson J. thus allowed the appeal in respect of the appellants' conviction for violating s. 27(5) of the *British Columbia Fishery (General) Regulations* but dismissed the appeal of the appellants' conviction for violating s. 20(3) of the *Pacific Herring Fishery Regulations*. The Crown has not appealed Anderson J.'s decision allowing the appeal of the appellants on the s. 27(5) issue.

Le juge Anderson a donc fait droit à l'appel formé par les appelants contre la déclaration de culpabilité fondée sur le par. 27(5) du *Règlement de pêche général de la Colombie-Britannique*, mais il a rejeté leur appel quant à celle fondée sur le par. 20(3) du *Règlement de pêche du hareng du Pacifique*. Le ministère public n'a pas fait appel de la décision du juge Anderson accueillant l'appel formé par les appelants sur la question touchant le par. 27(5).

British Columbia Court of Appeal (1993), 80 B.C.L.R. (2d) 133

Cour d'appel de la Colombie-Britannique (1993), 80 B.C.L.R. (2d) 133

13 Hutcheon J.A., writing for a majority of the Court on this issue, rejected the appellants' argument that the Crown had failed to prove the essential elements of the offence of an attempt to sell herring spawn on kelp. Hutcheon J.A. held at para. 13, that the distinction between mere preparation and an attempt to sell is a "matter of 'common sense'" and that, in this case, the evidence was sufficient to demonstrate that the appellants had been guilty of an attempt to sell. Hutcheon J.A. also rejected the appellants' argument that the regulations, in these circumstances, constituted an unconstitutional violation of their s. 35(1) rights. Hutcheon J.A. agreed with the trial judge that the appellants had demonstrated an aboriginal right to

S'exprimant sur ce point au nom des juges de la majorité, le juge Hutcheon a rejeté l'argument des appelants que le ministère public n'avait pas prouvé les éléments essentiels de l'infraction de tentative de vente de rogue de hareng sur varech. Il a statué, au par. 13, que la distinction entre la simple préparation en vue de la vente et la tentative de vendre est [TRADUCTION] «affaire de «bon sens»», et que, en l'espèce, la preuve était suffisante pour établir que les appelants étaient coupables de tentative de vente. Le juge Hutcheon a également rejeté l'argument des appelants que, dans ces circonstances, les règlements constituaient une violation inconstitutionnelle des droits qui leur sont garantis par le par. 35(1). Il a été d'avis, tout comme le juge

trade herring spawn on kelp and that the actions of the appellants were, given the historical evidence demonstrating extensive trade by the Heiltsuk prior to contact, consistent with the aboriginal right asserted. He also agreed with the trial judge that the regulations constituted a *prima facie* interference with the aboriginal right to trade herring spawn on kelp but that that interference with the appellants' rights was justified.

Hutcheon J.A.'s reasons for upholding the interference with the appellants' rights as justified were different than those of the trial judge. Hutcheon J.A. held that the trial judge was in error in so far as he relied on the appellants' actions rather than on the impact of the regulations on the appellants. Considering the regulatory scheme itself, Hutcheon J.A. held that the consultation with the Native Indian Brotherhood of B.C., and the allocation of herring spawn on kelp to the Heiltsuk Band, demonstrated that the Crown had fulfilled its responsibility to the Heiltsuk and had not, as such, engaged in an unjustified interference with the appellants' aboriginal rights.

Macfarlane J.A., writing for himself and two others, agreed with Hutcheon J.A.'s disposition of the appellants' argument that the Crown had failed to demonstrate the essential elements of the offence. He disagreed, however, with Hutcheon J.A.'s analysis of the appellants' s. 35(1) arguments. In Macfarlane J.A.'s view, the appellants failed to demonstrate that the Heiltsuk Band had an aboriginal right to sell herring spawn on kelp commercially. Macfarlane J.A. held that the facts as found by the trial judge did not demonstrate that the trade of herring spawn on kelp was an integral part of the distinctive culture of the Heiltsuk. In Macfarlane J.A.'s view, at para. 50, "the quality and character of the activity in aboriginal times was quite different from that disclosed by the evidence in this case". Macfarlane J.A. also held, however, that if he were incorrect, and an aboriginal right to trade in herring spawn on kelp existed,

du procès, que les appelants avaient établi l'existence d'un droit ancestral d'échanger de la rogue de hareng sur varech et que, compte tenu de la preuve historique démontrant qu'il y avait des échanges importants de ce produit par les Heiltsuk avant le contact avec les Européens, leurs activités étaient compatibles avec le droit ancestral revendiqué. Il a aussi partagé l'avis de ce dernier que les règlements constituaient une atteinte à première vue au droit ancestral des appelants d'échanger de la rogue de hareng sur varech, mais que cette atteinte était justifiée.

Le juge Hutcheon a conclu que l'atteinte aux droits des appelants était justifiée, mais pour des motifs différents de ceux du juge du procès. Il a jugé que ce dernier avait commis une erreur en s'appuyant sur les actions des appelants plutôt que sur l'effet des règlements sur ceux-ci. Prenant en considération le régime de réglementation lui-même, le juge Hutcheon a statué que les consultations menées auprès de la Native Indian Brotherhood of B.C. et l'attribution de rogue de hareng sur varech à la bande des Heiltsuk établissaient que l'État s'était acquitté de sa responsabilité envers les Heiltsuk et n'avait pas, par le fait même, porté une atteinte injustifiée aux droits ancestraux des appelants.

Le juge Macfarlane, au nom de deux autres juges, a souscrit à la conclusion du juge Hutcheon sur l'argument des appelants que le ministère public n'avait pas prouvé les éléments essentiels de l'infraction. Il a cependant dit être en désaccord avec l'analyse faite par le juge Hutcheon des arguments des appelants fondés sur le par. 35(1). De l'avis du juge Macfarlane, les appelants n'ont pas démontré que la bande des Heiltsuk avait un droit ancestral de vendre commercialement de la rogue de hareng sur varech. Il a conclu que les faits constatés par le juge du procès n'établissaient pas que l'échange de rogue de hareng sur varech faisait partie intégrante de la culture distinctive des Heiltsuk. À son avis, au par. 50, [TRADUCTION] «les activités exercées aux temps des aborigènes étaient très différentes, de par leur qualité et leur nature, de celles révélées par la preuve en l'espèce». Toutefois, le juge Macfarlane a également

he would agree with Hutcheon J.A. that the Crown had met the burden of proof on the question of justification.

statué que, s'il avait tort et qu'il existait un droit ancestral d'échanger de la rogue de hareng sur varech, il serait d'accord avec le juge Hutcheon que le ministère public s'était acquitté de la charge de la preuve sur la question de la justification.

16

Lambert J.A. dissented. In his view, at para. 79, the appellants had an aboriginal right to trade herring spawn "in quantities measured in tons" which, he held, had been infringed by the fisheries regulations. Lambert J.A. held that this infringement was not justified. First, the herring spawn on kelp fishery, because not involving the death of the female fish as occurs in the herring roe fishery, does not create any conservation concerns beyond those dealt with in the regulation of the herring roe fishery. Second, the band was not compensated for what is, in effect, a confiscation of the herring spawn on kelp fishery. Finally, the only consultation that took place was with the Native Indian Brotherhood of B.C., not with the Heiltsuk Band itself; such consultation was inadequate to support the government's claim that the regulations were justified.

Le juge Lambert a exprimé sa dissidence. Au par. 79, il a dit être d'avis que les appelants possédaient un droit ancestral d'échanger de la rogue de hareng sur varech [TRADUCTION] «en quantités mesurables en tonnes», droit qui, a-t-il conclu, avait été violé par les règlements de pêche. Il a jugé que cette atteinte n'était pas justifiée. Premièrement, comme la récolte de la rogue de hareng sur varech n'entraîne pas la mort de la femelle, contrairement à la pêche du hareng prêt à frayer, la première activité ne crée pas d'autres problèmes de conservation que ceux visés par la réglementation de la pêche du hareng prêt à frayer. Deuxièmement, la bande n'a pas été indemnisée pour ce qui est, en fait, une confiscation de la récolte de la rogue de hareng sur varech. Troisièmement, seule la Native Indian Brotherhood of B.C. a été consultée et non la bande des Heiltsuk. Ces consultations sont insuffisantes pour étayer la prétention du ministère public que les règlements étaient justifiés.

III. Grounds of Appeal

III. Moyens d'appel

17

Leave to appeal to this Court was granted on March 10, 1994. The following constitutional question was stated:

L'autorisation de pourvoi devant notre Cour a été accordée le 10 mars 1994. La question constitutionnelle suivante a été formulée:

Is s. 20(3) of the *Pacific Herring Fishery Regulations*, SOR/84-324, as it read on April 28, 1988, of no force or effect with respect to the appellants in the circumstances of these proceedings, in virtue of s. 52 of the *Constitution Act, 1982*, by reason of the aboriginal rights within the meaning of s. 35 of the *Constitution Act, 1982*, invoked by the appellants?

Le paragraphe 20(3) du *Règlement de pêche du hareng du Pacifique*, DORS/84-324, tel qu'il se lisait le 28 avril 1988, est-il, dans les circonstances de la présente affaire, inopérant à l'égard des appelants en vertu de l'art. 52 de la *Loi constitutionnelle de 1982*, en raison des droits ancestraux au sens de l'art. 35 de la *Loi constitutionnelle de 1982*, qu'ils invoquent?

The appellants appealed on the basis that the courts below were in error in holding that the actions of the appellants were sufficient to constitute an attempt to sell in law. The appellants also appealed on the basis that, given that the evidence presented at trial demonstrated the extent and significance of Heiltsuk trading activities, the Court of Appeal erred in holding that the appellants do not have an

Les appelants se pourvoient pour le motif que les juridictions inférieures ont fait erreur en statuant que leurs actions étaient suffisantes pour constituer en droit une tentative de vente. Ils ont aussi fait valoir que, comme la preuve présentée au procès établissait l'ampleur et l'importance des activités d'échange des Heiltsuk, la Cour d'appel avait commis une erreur en décidant que les appelants ne

aboriginal right to trade and sell herring spawn on kelp. The appellants argued further that because the regulations constituted a total ban on the sale of any herring spawn on kelp, the Court of Appeal erred in not finding a *prima facie* infringement of the appellants' aboriginal rights. Finally, the appellants argued that the Crown did not adduce sufficient evidence to support its assertion that the regulations fulfilled a conservation objective and that the Crown had failed to fulfil its fiduciary obligation to the Heiltsuk Band, with the result that the Court of Appeal erred in finding that any infringement which did exist was justified.

IV. Analysis

Attempt to Sell

Before turning to the heart of the appellants' case — the argument that their convictions constitute an unjustifiable infringement of the aboriginal rights recognized and affirmed by s. 35(1) — it is necessary to dispose of their argument that the facts do not demonstrate an "attempt to sell" as required by s. 20(3) of the *Pacific Herring Fishery Regulations*. The basis of the appellants' position is that because the Crown only provided evidence to show that the appellants asked Mr. Hirose if he was "interested" in herring spawn on kelp, without providing any evidence that the appellants had discussed the quantity, quality, price or delivery date of the herring spawn on kelp with Mr. Hirose, the Crown only demonstrated that the appellants had engaged in preparation for an attempt to sell; the Crown did not demonstrate that the appellants had actually attempted to sell herring spawn on kelp to Mr. Hirose.

This argument is without merit. In *R. v. Deutsch*, [1986] 2 S.C.R. 2, Le Dain J., writing for a unanimous Court on this issue, discussed the distinction between an attempt and mere preparation at pp. 22-23:

It has been frequently observed that no satisfactory general criterion has been, or can be, formulated for drawing the line between preparation and attempt, and that

possédaient pas le droit ancestral de vendre et d'échanger de la rogue de hareng sur varech. Les appelants ont aussi soutenu que, parce que le règlement interdit totalement la vente de ce produit, la Cour d'appel a commis une erreur en ne concluant pas à une atteinte à première vue à leurs droits ancestraux. Enfin, ils ont plaidé que le ministère public n'a pas présenté une preuve suffisante pour étayer son assertion que le règlement répondait à un objectif de conservation et que Sa Majesté ne s'était pas acquittée de son obligation de fiduciaire envers la bande des Heiltsuk, de sorte que la Cour d'appel a commis une erreur en concluant que toute atteinte effectivement portée était justifiée.

IV. Analyse

Tentative de vente

Avant d'arriver au cœur de la thèse des appelants — l'argument que leurs déclarations de culpabilité constituent une atteinte injustifiable à leurs droits ancestraux reconnus et confirmés par le par. 35(1) — il est nécessaire de statuer sur leur argument que les faits n'établissent pas qu'il y a eu «tentative de vente» au sens du par. 20(3) du *Règlement de pêche du hareng du Pacifique*. Cet argument repose sur ce qui suit: comme le ministère public a uniquement présenté des éléments de preuve visant à établir que les appelants avaient demandé à M. Hirose s'il était «intéressé» à se procurer de la rogue de hareng sur varech, sans apporter la preuve qu'ils avaient discuté avec ce dernier de la quantité, de la qualité, du prix ou de la date de livraison du produit, le ministère public a simplement démontré que les appelants avaient fait des préparatifs en vue d'une tentative de vente, et non que ceux-ci avaient effectivement tenté de vendre de la rogue de hareng sur varech à M. Hirose.

Cet argument n'est pas fondé. Dans l'arrêt *R. c. Deutsch*, [1986] 2 R.C.S. 2, le juge Le Dain, exprimant la décision unanime de la Cour sur ce point, a examiné la distinction entre la tentative et la simple préparation, aux pp. 22 et 23:

On a souvent fait remarquer qu'aucun critère général satisfaisant n'a été ou ne peut être formulé pour tracer la ligne de démarcation entre la préparation et la tentative

the application of this distinction to the facts of a particular case must be left to common sense judgment. . . . Despite academic appeals for greater clarity and certainty in this area of the law I find myself in essential agreement with this conclusion.

In my opinion the distinction between preparation and attempt is essentially a qualitative one, involving the relationship between the nature and quality of the act in question and the nature of the complete offence, although consideration must necessarily be given, in making that qualitative distinction, to the relative proximity of the act in question to what would have been the completed offence, in terms of time, location and acts under the control of the accused remaining to be accomplished.

In this case the facts as found by the trial judge clearly demonstrate that the appellants attempted to sell herring spawn on kelp to Mr. Hirose. The appellants arranged for the shipment of the herring spawn on kelp to Vancouver, they took a sample of the herring spawn on kelp to Mr. Hirose's store and they specifically asked Mr. Hirose if he was "interested" in herring spawn on kelp. The appellants' actions have sufficient proximity to the acts necessary to complete the offence of selling herring spawn on kelp to move those actions beyond mere preparation to an actual attempt. I would note here that the appellants have not disputed the facts as found by the trial judge and that the courts below were unanimous in finding that the actions of the appellant were sufficient to amount to an attempt to sell.

Section 35(1) of the Constitution Act, 1982

In *Sparrow*, *supra*, Dickson C.J. and La Forest J., writing for a unanimous court, held that an analysis of a claim under s. 35(1) has four steps: first, the court must determine whether an applicant has demonstrated that he or she was acting pursuant to an aboriginal right; second, a court must determine whether that right was extinguished prior to the enactment of s. 35(1) of the *Constitution Act, 1982*; third, a court must determine whether that right has been infringed; finally, a court must determine whether that infringement was justified.

et que l'application de cette distinction aux faits d'une affaire en particulier devait être une question de jugement fondé sur le bon sens. [. . .] Malgré les demandes des auteurs de doctrine pour plus de clarté et plus de certitude dans ce domaine du droit, je suis essentiellement d'accord avec cette conclusion.

À mon avis, la distinction entre la préparation et la tentative est essentiellement qualitative et met en jeu le lien entre la nature et la qualité de l'acte en question et la nature de l'infraction complète, bien qu'il faille nécessairement examiner, en faisant cette distinction qualitative, la proximité relative de l'acte en question avec ce qui aurait constitué une infraction complète, sous l'angle du temps, du lieu et des actes sous le contrôle de l'accusé qui restent à être accomplis.

En l'espèce, les faits constatés par le juge du procès établissent clairement que les appelants ont tenté de vendre de la rogue de hareng sur varech à M. Hirose. Ils ont fait transporter de la rogue de hareng sur varech à Vancouver, ils en ont apporté un échantillon au magasin de M. Hirose et ils lui ont expressément demandé s'il était «intéressé» à s'en procurer. Les actions des appelants sont suffisamment proches de celles requises pour qu'il y ait perpétration de l'infraction de vente de rogue de hareng sur varech, de sorte qu'elles dépassent la simple préparation et constituent une tentative véritable. Je souligne ici que les appelants n'ont pas contesté les faits constatés par le juge du procès, et que les juridictions inférieures ont toutes conclu que les actions des appelants étaient suffisantes pour constituer une tentative de vente.

Le paragraphe 35(1) de la Loi constitutionnelle de 1982

Dans *Sparrow*, précité, le juge en chef Dickson et le juge La Forest ont rédigé la décision unanime de la Cour et statué que l'analyse des demandes fondées sur le par. 35(1) comporte quatre volets: premièrement, le tribunal doit déterminer si le requérant a prouvé qu'il exerçait un droit ancestral; deuxièmement, il doit déterminer s'il y a eu extinction de ce droit avant l'édiction du par. 35(1) de la *Loi constitutionnelle de 1982*; troisièmement, il doit déterminer s'il y a eu atteinte à ce droit; enfin, il doit déterminer si l'atteinte était justifiée.

This judgment will undertake the analysis required for the four steps of the *Sparrow* framework, taking into account the elaboration of that framework in the cases of *R. v. Van der Peet*, [1996] 2 S.C.R. 507, *R. v. N.T.C. Smokehouse Ltd.*, [1996] 2 S.C.R. 672, and *R. v. Nikal*, [1996] 1 S.C.R. 1013, all of which were heard contemporaneously with this appeal. I will also undertake to clarify the *Sparrow* framework as is required in order to apply that framework to the different circumstances of this appeal.

Definition

This appeal, like those heard contemporaneously in *N.T.C. Smokehouse* and *Van der Peet*, requires the Court to consider the scope of the aboriginal rights recognized and affirmed by s. 35(1) of the *Constitution Act, 1982*. In this case it must be determined whether the appellants Donald and William Gladstone can, on the basis of the test laid out in *Van der Peet*, claim to have been acting pursuant to an aboriginal right when they attempted to sell herring spawn on kelp to Seaborn Enterprises Ltd. In *Van der Peet* the Court held, at para. 46, that to be recognized as an aboriginal right an activity must be “an element of a practice, custom or tradition integral to the distinctive culture of the aboriginal group claiming the right”. Thus, the appellants in this case must demonstrate that their attempt to sell herring spawn on kelp was an element of a practice, custom, or tradition integral to the distinctive culture of the Heiltsuk Band.

The first step in applying the *Van der Peet* test is the determination of the precise nature of the claim being made, taking into account such factors as the nature of the action said to have been taken pursuant to an aboriginal right, the government regulation argued to infringe the right, and the practice, custom or tradition relied upon to establish the right. At this stage of the analysis the Court is, in essence, determining what the appellants will have to demonstrate to be an aboriginal right in order for the activities they were engaged in to be encompassed by s. 35(1). There is no point in the

Dans le présent jugement, je vais appliquer le cadre d'analyse en quatre volets exposé dans *Sparrow* et explicité dans les pourvois *R. c. Van der Peet*, [1996] 2 R.C.S. 507, *R. c. N.T.C. Smokehouse Ltd.*, [1996] 2 R.C.S. 672, et *R. c. Nikal*, [1996] 1 R.C.S. 1013, qui ont tous été entendus en même temps que le présent appel. Je vais également clarifier ce cadre d'analyse, dans la mesure nécessaire pour l'appliquer aux circonstances différentes de la présente espèce.

Définition

Dans le cadre du présent pourvoi, tout comme dans ceux entendus en même temps, *Van der Peet* et *N.T.C. Smokehouse*, notre Cour est tenue d'examiner la portée des droits ancestraux reconnus et confirmés par le par. 35(1) de la *Loi constitutionnelle de 1982*. En l'espèce, il faut déterminer si les appelants Donald et William Gladstone peuvent, sur le fondement du critère énoncé dans *Van der Peet*, affirmer qu'ils exerçaient un droit ancestral quand ils ont tenté de vendre de la rogue de hareng sur varech à Seaborn Enterprises Ltd. Dans *Van der Peet*, notre Cour a statué, au par. 46, que, pour être reconnue comme un droit ancestral, une activité doit être «un élément d'une coutume, pratique ou tradition faisant partie intégrante de la culture distinctive du groupe autochtone qui revendique le droit en question». Par conséquent, en l'espèce, les appelants doivent démontrer que leur tentative de vendre de la rogue de hareng sur varech était un élément d'une coutume, pratique ou tradition faisant partie intégrante de la culture distinctive de la bande des Heiltsuk.

La première étape dans l'application du critère énoncé dans *Van der Peet* consiste à déterminer la nature précise de la revendication des appelants, compte tenu de facteurs tels que la nature de l'acte qui aurait, affirme-t-on, été accompli en vertu d'un droit ancestral, le règlement gouvernemental qui, prétend-on, violerait ce droit, et la coutume, pratique ou tradition invoquée pour établir l'existence du droit revendiqué. À cette étape de l'analyse, notre Cour détermine essentiellement en quoi consiste le droit ancestral dont les appelants doivent établir l'existence pour que leurs activités soient

appellants' being shown to have an aboriginal right unless that aboriginal right includes the actual activity they were engaged in; this stage of the *Van der Peet* analysis ensures that the Court's inquiry is tailored to the actual activity of the appellants.

visées par le par. 35(1). Il ne sert à rien d'établir que les appelants possèdent un droit ancestral si ce droit n'englobe pas l'activité concrète à laquelle ils s'adonnaient. Cette étape de l'analyse établie dans *Van der Peet* fait en sorte que l'examen de notre Cour est adapté à l'activité concrète exercée par les appelants.

24

This case, like *N.T.C. Smokehouse*, potentially creates problems at the characterization stage. The actions of the appellants, like the actions of the members of the Sheshaht and Opetchesaht bands in *N.T.C. Smokehouse*, appear to be best characterized as the commercial exploitation of herring spawn on kelp. By contrast, the regulations under which the appellants were charged, like the regulations at issue in *N.T.C. Smokehouse*, prohibit all sale or trade in herring spawn on kelp without a Category J licence, appear, therefore, to be best characterized as aimed at the exchange of herring spawn on kelp for money or other goods, regardless of whether the extent or scale of that sale or trade could reasonably be characterized as commercial in nature. The means to resolve this difficulty in characterization, as was the case in *N.T.C. Smokehouse*, is by addressing both possible characterizations of the appellants' claim. This judgment will thus consider first, whether the appellants can demonstrate that the Heiltsuk Band has an aboriginal right to exchange herring spawn on kelp for money or other goods and will then go on to consider, second, whether the appellants have demonstrated the further aboriginal right of the Heiltsuk Band to sell herring spawn on kelp to the commercial market.

Dans la présente affaire, tout comme dans *N.T.C. Smokehouse*, des problèmes risquent de se poser à l'étape de la caractérisation. Il semble que, comme dans le cas des actes des membres de la bande des Sheshaht et de celle des Opetchesaht dans *N.T.C. Smokehouse*, la meilleure façon de caractériser les actes des appelants est de considérer qu'il s'agit de l'exploitation commerciale de la rogue de hareng sur varech. Par contraste, comme il interdit complètement la vente ou l'échange de rogue de hareng sur varech qui n'a pas été récoltée en vertu d'un permis de catégorie J, il convient de caractériser le règlement en vertu duquel les appelants ont été inculpés, à l'instar de celui en cause dans *N.T.C. Smokehouse*, de règlement visant l'échange de la rogue de hareng sur varech contre de l'argent ou d'autres biens, peu importe que l'ampleur ou l'étendue des activités de vente et d'échange puissent raisonnablement être caractérisées comme étant de nature commerciale. Comme dans *N.T.C. Smokehouse*, le moyen de résoudre ce problème de caractérisation réside dans l'examen des deux façons possibles de caractériser la revendication des appelants. Aussi, dans le présent jugement, se demandera-t-on, dans un premier temps, si les appelants sont en mesure de démontrer que la bande des Heiltsuk possède le droit ancestral d'échanger de la rogue de hareng sur varech contre de l'argent ou d'autres biens, et, dans un deuxième temps, si les appelants ont fait la preuve que la bande des Heiltsuk a aussi le droit ancestral de vendre ce produit sur le marché commercial.

25

The second step in the *Van der Peet* test requires the Court to determine whether the practice, custom or tradition claimed to be an aboriginal right was, prior to contact with Europeans, an integral part of the distinctive aboriginal society of the particular aboriginal people in question. The Court must thus, as has just been noted, determine in this

Conformément à la deuxième étape de l'analyse établie dans *Van der Peet*, notre Cour doit déterminer si la coutume, pratique ou tradition qui, prétend-on, est un droit ancestral faisait, avant le contact avec les Européens, partie intégrante de la société autochtone distinctive du groupe particulier d'autochtones en cause. En l'espèce, notre Cour

case whether the exchange of herring spawn on kelp for money or other goods, and/or the sale or trade of herring spawn on kelp in the commercial marketplace, were, prior to contact, defining features of the distinctive culture of the Heiltsuk.

The facts as found by the trial judge, and the evidence on which he relied, support the appellants' claim that exchange of herring spawn on kelp for money or other goods was a central, significant and defining feature of the culture of the Heiltsuk prior to contact. Moreover, those facts support the appellants' further claim that the exchange of herring spawn on kelp on a scale best characterized as commercial was an integral part of the distinctive culture of the Heiltsuk. In his reasons Lemiski Prov. Ct. J. summarized his findings of fact as follows:

It cannot be disputed that hundreds of years ago, the Heiltsuk Indians regularly harvested herring spawn on kelp as a food source. The historical/anthropological records readily bear this out.

I am also satisfied that this Band engaged in inter-tribal trading and barter of herring spawn on kelp. The exhibited Journal of Alexander McKenzie [*sic*] dated 1793 refers to this trade and the defence lead [*sic*] evidence of several other references to such trade.

The Crown conceded that there may have been some incidental local trade but questions its extent and importance. The very fact that early explorers and visitors to the Bella Bella region noted this trading has to enhance its significance. All the various descriptions of this trading activity are in accord with common sense expectations. Obviously one would not expect to see balance sheets and statistics in so primitive a time and setting. [Emphasis added.]

There was extensive evidence presented at trial to support Lemiski Prov. Ct. J.'s findings. In the journal of Alexander Mackenzie, referred to by the trial judge, is the following entry from 1793:

doit donc décider, comme je viens de l'indiquer, si l'échange de rogue de hareng sur varech contre de l'argent ou d'autres biens, ou encore si la vente ou l'échange de ce produit sur le marché commercial étaient, avant le contact avec les Européens, des caractéristiques déterminantes de la culture distinctive des Heiltsuk.

Les faits constatés par le juge du procès, ainsi que la preuve sur laquelle il s'est appuyé étaient la prétention des appelants que l'échange de la rogue de hareng sur varech contre de l'argent ou d'autres biens était une caractéristique fondamentale, importante et déterminante de la culture distinctive des Heiltsuk avant le contact avec les Européens. De plus, ces faits appuient aussi la thèse des appelants que l'échange de la rogue de hareng sur varech, sur une échelle qu'il convient de qualifier de commerciale, faisait partie intégrante de la culture distinctive des Heiltsuk. Dans ses motifs, le juge Lemiski de la Cour provinciale a résumé ainsi ses conclusions de fait:

[TRADUCTION] Il est incontestable qu'il y a des siècles, les Indiens Heiltsuk récoltaient régulièrement la rogue de hareng sur varech comme source de nourriture. C'est un fait dont la réalité est attestée par les documents historiques et anthropologiques.

Je suis également convaincu que la bande échangeait cette denrée avec d'autres tribus. Le journal d'Alexander McKenzie [*sic*] datant de 1793, qui a été versé en preuve, fait mention de ces échanges et la défense a présenté des éléments de preuve faisant état de nombreuses autres mentions de ces échanges.

Le ministère public a concédé qu'il a pu y avoir certains échanges accessoires, mais il a mis en doute leur ampleur et leur importance. Le fait même que les premiers explorateurs et visiteurs de la région de Bella Bella aient noté ces échanges en accentue l'importance. Les diverses descriptions faites de ces activités d'échange concordent avec ce à quoi on peut logiquement s'attendre. Il va de soi que personne ne s'attend à trouver des bilans et des statistiques à une époque et en des lieux aussi primitifs. [Je souligne.]

Les conclusions du juge Lemiski sont fondées sur l'abondante preuve produite au procès. Dans le journal d'Alexander Mackenzie, dont a fait état le juge du procès, on lit le passage suivant datant de 1793:

The Indians who had caused us so much alarm, we now discovered to be inhabitants of the islands, and traders in various articles, such as cedar-bark, prepared to be wove [*sic*] into mats, fish-spawn, copper, iron, and beads, the latter of which they get on their own coast. For these they receive in exchange roasted salmon, hemlock-bark cakes, and the other kind made of salmon roes, sorrel, and bitter berries. [Emphasis added.]

Similarly, the journal of Dr. William Tolmie, a fur trader, includes the following entry for April 16, 1834:

From 15 to 20 large canoes of Wacash's people passed on their way to the Caughquill country — the canoes were laden with boxes, hampers &c filled with dried herring spawn, which they are to barter for Oolaghens — the covers of their boxes are fitted similarly to that of a bandbox — hampers small & twisted of cedar bark. [Emphasis added.]

The defence expert, Dr. Barbara Lane, whose testimony was accepted by the trial judge, said in her report on the culture of the Heiltsuk people:

Pacific herring spawn only in certain locations. Consequently, some native groups had access to quantities of spawn beyond their needs and others had access to little or no spawn. This partly explains the extensive trade in spawn among native groups along the coast. Tons of spawn were transported by canoe from districts with good spawning areas to places not so favored.

After the spawn was processed, flotillas of freight canoes carrying tons of spawn product travelled between districts carrying boxes and hampers. These canoes travelled for trading purposes from one tribe to another and were under the direction of their respective chiefs. [Emphasis added.]

All of this evidence supports the position of the appellants that, prior to contact, exchange and trade in herring spawn on kelp was an integral part of the distinctive culture of the Heiltsuk.

[TRADUCTION] Nous avons découvert que les Indiens qui nous avaient causé tant d'inquiétude habitaient les îles et échangeaient divers articles tels que l'écorce de thuya, préparée en vue du tressage de nattes, les œufs de poisson, le cuivre, le fer et les billes décoratives, celles-ci étant recueillies sur leur propre côte. En retour, ils reçoivent du saumon grillé, des gâteaux d'écorce de pruche, ainsi que l'autre sorte faite d'œufs de saumon, d'oseille et de shépherdie du Canada. [Je souligne.]

De même, le journal de William Tolmie, qui faisait la traite des fourrures, renferme l'inscription suivante datée du 16 avril 1834:

[TRADUCTION] Nous avons croisé de 15 à 20 grands canots transportant des Wacash en route vers le pays des Caughquill — les canots étaient chargés de boîtes, de paniers, etc., remplis d'œufs de hareng séchés, destinés à être échangés aux Oolaghens — les couvercles des boîtes sont fixés à la façon des couvercles des cartons à chapeau — les paniers sont petits et faits d'écorce de thuya tressée. [Je souligne.]

L'expert cité par la défense, Barbara Lane, dont le témoignage a été accepté par le juge du procès, a déclaré ceci dans son rapport sur la culture des Heiltsuk:

[TRADUCTION] Le hareng du Pacifique fraie seulement dans certains endroits. Par conséquent, alors que certains groupes autochtones avaient accès à des sources d'œufs qui dépassaient leurs besoins, d'autres groupes n'avaient que peu ou pas accès à cette ressource. Cela explique en partie les échanges importants d'œufs que pratiquaient entre eux les groupes autochtones le long de la côte. Des tonnes d'œufs étaient transportés par canot des districts riches en œufs aux lieux moins favorisés.

Après que les œufs avaient été traités, des flottilles de canots à marchandises transportant des tonnes d'œufs voyageaient d'un district à l'autre, chargés de boîtes et de paniers. Ces canots se déplaçaient, à des fins d'échanges, d'une tribu à l'autre, suivant les ordres des différents chefs. [Je souligne.]

Tous ces éléments de preuve étayaient la thèse des appelants que, avant le contact avec les Européens, l'échange de roque de hareng sur varech faisait partie intégrante de la culture distinctive des Heiltsuk.

In *Van der Peet*, at para. 62, this Court held that a claimant to an aboriginal right need not provide direct evidence of pre-contact activities to support his or her claim, but need only provide evidence which is “directed at demonstrating which aspects of the aboriginal community and society have their origins pre-contact. It is those practices, customs and traditions that can be rooted in the pre-contact societies of the aboriginal community in question that will constitute aboriginal rights”. In *Van der Peet* this was described as the requirement of “continuity” — the requirement that a practice, custom or tradition which is integral to the aboriginal community now be shown to have continuity with the practices, customs or traditions which existed prior to contact. The evidence presented in this case, accepted by the trial judge and summarized above, is precisely the type of evidence which satisfies this requirement. The appellants have provided clear evidence from which it can be inferred that, prior to contact, Heiltsuk society was, in significant part, based on such trade. The Heiltsuk were, both before and after contact, traders of herring spawn on kelp. Moreover, while to describe this activity as “commercial” prior to contact would be inaccurate given the link between the notion of commerce and the introduction of European culture, the extent and scope of the trading activities of the Heiltsuk support the claim that, for the purposes of s. 35(1) analysis, the Heiltsuk have demonstrated an aboriginal right to sell herring spawn on kelp to an extent best described as commercial. The evidence of Dr. Lane, and the diary of Dr. Tolmie, point to trade of herring spawn on kelp in “tons”. While this evidence relates to trade post-contact, the diary of Alexander Mackenzie provides the link with pre-contact times; in essence, the sum of the evidence supports the claim of the appellants that commercial trade in herring spawn on kelp was an integral part of the distinctive culture of the Heiltsuk prior to contact.

Dans *Van der Peet*, au par. 62, notre Cour a décidé que la personne qui revendique un droit ancestral n’a pas à produire de preuve directe d’activités antérieures au contact avec les Européens pour appuyer sa revendication, mais seulement une preuve qui «tende à démontrer lesquels des aspects de la collectivité et de la société autochtones datent d’avant le contact avec les Européens. Constitueront des droits ancestraux les coutumes, pratiques et traditions dont l’origine peut être attribuée aux ancêtres de la collectivité autochtone en cause, qui vivaient avant le contact avec les Européens». Dans *Van der Peet*, la notion de «continuité» a été utilisée pour définir cette exigence — savoir l’obligation de démontrer qu’une coutume, pratique ou tradition faisant partie intégrante aujourd’hui de la culture distinctive de la collectivité autochtone marque une continuité avec des coutumes, pratiques ou traditions qui existaient avant le contact avec les Européens. La preuve présentée en l’espèce, acceptée par le juge du procès et résumée précédemment est précisément le type de preuve qui satisfait à cette exigence. Les appelants ont fourni une preuve claire, qui permet d’inférer que, avant le contact avec les Européens, la société heiltsuk comptait, dans une large mesure, sur ce type d’échanges. Les Heiltsuk, tant avant qu’après le contact avec les Européens, échangeaient la roque de hareng sur varech. De plus, bien qu’il ne serait pas exact de qualifier cette activité de «commerciale», étant donné le lien entre la notion de commerce et l’introduction de la culture européenne, l’ampleur et la portée des activités d’échange des Heiltsuk étayaient la prétention que, aux fins de l’analyse fondée sur le par. 35(1), les Heiltsuk ont démontré l’existence d’un droit ancestral de vendre de la roque de hareng sur varech sur une échelle qu’il convient de qualifier de commerciale. Le témoignage de M^{me} Lane et le journal de M. Tolmie font état d’échanges de roque de hareng sur varech mesurables en «tonnes». Quoique cette preuve concerne les échanges postérieurs au contact avec les Européens, le journal d’Alexander Mackenzie établit le lien avec l’époque qui a précédé. Essentiellement, l’ensemble de la preuve étaye la prétention des appelants que l’échange de roque de hareng sur varech faisait partie intégrante de la culture distinctive des Heiltsuk avant le contact avec les Européens.

29

I would note that the significant difference between the situation of the appellants in this case, and the appellants in *Van der Peet* and *N.T.C. Smokehouse*, lies in the fact that for the Heiltsuk Band trading in herring spawn on kelp was not an activity taking place as an incident to the social and ceremonial activities of the community; rather, trading in herring spawn on kelp was, in itself, a central and significant feature of Heiltsuk society. In *Van der Peet* and *N.T.C. Smokehouse* the findings of fact at trial suggested that whatever trade in fish had taken place prior to contact was purely incidental to the social and ceremonial activities of the aboriginal societies making the claim; here the evidence suggests that trade in herring spawn on kelp was not an incidental activity for the Heiltsuk but was rather a central and defining feature of Heiltsuk society.

Extinguishment, Infringement and Justification

30

The appellants have demonstrated that they were acting pursuant to an aboriginal right to trade herring spawn on kelp on a commercial basis. I will therefore turn to the other three stages of the *Sparrow* analysis, that is, to the questions of whether the right under which the appellants were acting has been extinguished, whether that right was infringed by the actions of the government and, finally, whether that infringement was justified.

Extinguishment

31

The test for determining when an aboriginal right has been extinguished was laid out by this Court in *Sparrow*. Relying on the judgment of Hall J. in *Calder v. Attorney-General of British Columbia*, [1973] S.C.R. 313, the Court in *Sparrow* held at p. 1099 that "[t]he test of extinguishment to be adopted, in our opinion, is that the Sovereign's intention must be clear and plain if it is to extinguish an aboriginal right". Further, the Court held that the mere fact that a right had, in the past, been regulated by the government, and its exercise subject to various terms and conditions, was not suffi-

Je tiens à souligner que la différence importante qui existe entre la situation des appelants en l'espèce et celle des appelants dans les arrêts *Van der Peet* et *N.T.C. Smokehouse* est le fait que, dans le cas des Heiltsuk, l'échange de rogue de hareng sur varech n'était pas une activité accessoire des activités sociales et rituelles de la collectivité. Ces échanges étaient, en soi, une caractéristique fondamentale et importante de la société heiltsuk. Dans les arrêts *Van der Peet* et *N.T.C. Smokehouse*, les conclusions de fait tirées au procès tendaient à indiquer que, quelle que soit la nature des échanges de poisson ayant été pratiqués avant le contact avec les Européens, ceux-ci étaient purement accessoires aux activités sociales et rituelles des sociétés autochtones qui revendiquaient le droit, alors qu'en l'espèce la preuve semble indiquer que les échanges de la rogue de hareng sur varech n'étaient pas une activité accessoire de la bande des Heiltsuk, mais plutôt une caractéristique fondamentale et importante de la société heiltsuk.

Extinction, violation et justification

Les appelants ont démontré qu'ils avaient agi en vertu d'un droit ancestral d'échanger de la rogue de hareng sur varech sur une échelle commerciale. J'en arrive donc aux trois autres volets de l'analyse établie dans *Sparrow*, c'est-à-dire l'examen des questions de savoir si le droit invoqué par les appelants a été éteint, s'il y a été porté atteinte par les actions de l'État et, dans l'affirmative, si cette atteinte était justifiée.

Extinction

Le critère permettant de déterminer si un droit ancestral a été éteint a été formulé par notre Cour dans l'arrêt *Sparrow*, s'appuyant sur les motifs du juge Hall dans *Calder c. Procureur général de la Colombie-Britannique*, [1973] R.C.S. 313, elle a dit ceci dans *Sparrow*, à la p. 1099: «[I]e critère de l'extinction qui doit être adopté, à notre avis, est que l'intention du Souverain d'éteindre un droit ancestral doit être claire et expresse». En outre, la Cour a conclu que le seul fait que, dans le passé, un droit a été réglementé par l'État et que son exercice a été assujéti à diverses conditions, n'était pas

cient to extinguish the right. The argument that it did so (*Sparrow*, at p. 1097)

confuses regulation with extinguishment. That the right is controlled in great detail by the regulations does not mean that the right is thereby extinguished.

The regulations relied on by the Crown in that case were, the Court held at p. 1099, "simply a manner of controlling the fisheries, not defining underlying rights".

The reasoning used to reject the Crown's argument in *Sparrow* applies equally to the Crown's argument in this case. To understand why this is so it will be necessary to review the legislation relied upon by the Crown in its argument that the Heiltsuk's right to harvest herring spawn on kelp on a commercial basis was extinguished prior to 1982.

There are two types of legislative action relied upon by the Crown: the provisions of the *Fisheries Act* which, prior to 1955, prohibited the destruction of the "fry of food fishes", and the provisions of the Fisheries regulations relating directly to the herring spawn fishery. The former are exemplified by s. 39 of the *Fisheries Act* of 1927 which stated that "The fry of food fishes shall not be at any time destroyed"; identical provisions existed in the 1932 and 1952 *Fisheries Acts*. The latter first appeared in 1955. In 1955 the 1954 *British Columbia Fishery Regulations* were amended by SOR/55-260, s. 3, by the addition of a new s. 21A:

21A. No person shall take or collect by any means herring, eggs from herring spawning areas, and no person shall buy, sell, barter, process or traffic in herring eggs so taken; but an Indian may at any time take or collect herring eggs from spawning areas for use as food by Indians and their families but for no other purpose.

suffisant pour éteindre ce droit. L'argument voulant que le droit ait été éteint (*Sparrow*, à la p. 1097)

confond [...] la réglementation et l'extinction. Que l'exercice du droit fasse l'objet d'une réglementation très minutieuse, cela ne signifie pas que ce droit est par le fait même éteint.

Le règlement invoqué par le ministère public dans cette affaire constituait, de conclure la Cour, à la p. 1099, «simplement une façon de contrôler les pêcheries et non de définir des droits sous-jacents».

Le raisonnement qui a mené au rejet de l'argument du ministère public dans l'arrêt *Sparrow* s'applique également à son argument dans le présent pourvoi. Afin de comprendre pourquoi il en va ainsi, il sera nécessaire d'étudier la législation invoquée par le ministère public au soutien de son argument que le droit de récolter de la rogue de hareng sur varech sur une échelle commerciale a été éteint avant 1982.

Le ministère public invoque deux types de mesures législatives: les dispositions de la *Loi sur les pêcheries* qui, avant 1955, interdisaient la destruction du «frai du poisson comestible» et celles des règlements de pêche qui touchent directement la récolte des œufs de hareng. Un exemple du premier type de dispositions est l'art. 39 de la *Loi sur les pêcheries* de 1927 qui prévoyait ceci: «Le frai du poisson comestible ne doit jamais être détruit»; dans ses versions de 1932 et de 1952, cette loi comportait des dispositions identiques. Les premières mesures du deuxième type remontent à 1955, année au cours de laquelle le *Règlement de pêche de la Colombie-Britannique* de 1954 a été modifié par DORS/55-260, art. 3, par insertion d'une nouvelle disposition, l'art. 21A:

21A. Il est interdit de prendre ou de recueillir par un moyen quelconque des œufs de hareng dans les zones de fraye, et il est interdit d'acheter, de vendre, de troquer, de traiter les œufs de hareng ainsi pris ou d'en faire le commerce. Toutefois, un Indien peut en tout temps prendre ou recueillir des œufs de hareng dans les zones de fraye comme nourriture pour les Indiens et leur famille, mais pour aucune autre fin.

Similar prohibitions on the harvest and sale of herring spawn continued until 1974 (SOR/74-50, s. 9). At that time the section was amended so that the provision read

21A (1) Subject to subsection (2), no person shall, except by written permission of the Regional Director, by any means take or collect herring eggs from herring spawning areas, or buy, sell, barter, process or traffic in herring eggs so taken.

(2) An Indian may at any time take or collect herring eggs from herring spawning areas for use as food for himself and his family (SOR/72-417, s. 7).

This regulatory scheme remained in place until 1980 when the provision (which had been transferred to s. 17 of the *Pacific Herring Fishery Regulations*, C.R.C., c. 825) was amended by SOR/80-876, s. 8 to read

17. No person shall

(a) take or collect herring roe except under authority of a licence issued pursuant to the *Pacific Fishery Registration and Licensing Regulations*; or

(b) possess herring roe unless it was so taken or collected.

According to the submissions of the Crown, no further modifications to this regulatory scheme took place prior to the enactment of the *Constitution Act, 1982*.

None of these regulations, when viewed individually or as a whole, can be said to express a clear and plain intention to extinguish the aboriginal rights of the Heiltsuk Band. While to extinguish an aboriginal right the Crown does not, perhaps, have to use language which refers expressly to its extinguishment of aboriginal rights, it must demonstrate more than that, in the past, the exercise of an aboriginal right has been subject to a regulatory scheme. In this instance, the regulations and legislation regulating the herring spawn on kelp fishery prior to 1982 do not demonstrate any consistent intention on the part of the Crown. At various times prior to 1982 aboriginal peoples have been entirely prohibited from harvesting herring spawn

Des interdictions analogues visant la récolte et la vente d'œufs de hareng sont restées en vigueur jusqu'en 1974 (DORS/74-50, art. 9), date à laquelle cet article a été modifié ainsi:

21A. (1) Sous réserve des dispositions du paragraphe (2), il est interdit, si ce n'est avec la permission écrite du directeur régional, de prendre ou de recueillir par un moyen quelconque des œufs de hareng dans les zones de fraye ou d'acheter, de vendre, de troquer, de traiter les œufs de hareng ainsi pris ou d'en faire le commerce.

(2) Un Indien peut en tout temps prendre ou recueillir des œufs de hareng dans les zones de frai du hareng, comme nourriture pour lui-même et sa famille (DORS/72-417, art. 7).

Ce régime de réglementation est resté en place jusqu'en 1980, où le texte (devenu entre-temps l'art. 17 du *Règlement de pêche du hareng du Pacifique*, C.R.C., ch. 825) a été modifié ainsi par DORS/80-876, art. 8:

17. Il est interdit à quiconque

a) de prendre ou de recueillir de quelque façon que ce soit de la roque de hareng, à moins que ce produit soit pris en vertu d'un permis délivré selon le *Règlement sur l'immatriculation et la délivrance de permis pour la pêche dans le Pacifique*; ou

b) d'avoir en sa possession de la roque de hareng à moins de l'avoir prise ou recueillie selon ledit permis.

D'après les observations du ministère public, ce régime de réglementation est resté inchangé jusqu'à l'édiction de la *Loi constitutionnelle de 1982*.

Il est impossible d'affirmer que, individuellement ou collectivement, ces diverses dispositions réglementaires expriment une intention claire et expresse d'éteindre les droits ancestraux de la bande des Heiltsuk. Même si, pour éteindre un droit ancestral, il n'est peut-être pas nécessaire que le gouvernement utilise des mots faisant explicitement état de l'extinction de droits ancestraux, le ministère public ne doit pas se borner à démontrer que, dans le passé, l'exercice d'un droit ancestral a été réglementé. Dans le présent cas, les dispositions réglementaires et législatives qui régissaient la récolte de la roque de hareng sur varech avant 1982 ne témoignent pas d'une intention constante de l'État. Avant 1982, les peuples autochtones se

on kelp, allowed to harvest herring spawn on kelp for food only, allowed to harvest herring spawn on kelp for sale with the written permission of the regional director and allowed to take herring roe pursuant to a licence granted under the *Pacific Fishery Registration and Licensing Regulations*. Such a varying regulatory scheme cannot be said to express a clear and plain intention to eliminate the aboriginal rights of the appellants and of the Heiltsuk Band. As in *Sparrow*, the Crown has only demonstrated that it controlled the fisheries, not that it has acted so as to delineate the extent of aboriginal rights.

The Crown also argued, however, that even if the regulations do not extinguish the appellants' aboriginal rights, their rights were extinguished by the enactment of Order in Council, P.C. 2539, of September 11, 1917. Regulation 2539 reads as follows:

Whereas it is represented that since time immemorial, it has been the practice of the Indians of British Columbia to catch salmon by means of spears and otherwise after they have reached the upper non-tidal portions of the rivers;

And whereas while after commercial fishing began it became eminently desirable that all salmon that succeeded in reaching the upper waters should be allowed to go on to their spawning beds unmolested, in view of the great importance the Indians attached to their practice of catching salmon they have been permitted to do so for their own food purposes only, and to this end subsection 2 of section 8 of the Special Fishery Regulations for British Columbia provides as follows: —

“2. Indians may, at any time, with the permission of the Chief Inspector of Fisheries, catch fish to be used as food for themselves and their families, but for no other purpose; but no Indian shall spear, trap or pen fish on their spawning grounds, or in any place leased or set apart for the natural or artificial propagation of fish, or in any other place otherwise specially reserved.”

sont vu successivement interdire complètement de récolter de la rogue de hareng sur varech, permettre de le faire mais à des fins alimentaires seulement, autoriser à le faire avec la permission écrite du directeur régional et, enfin, autoriser à le faire en vertu d'un permis délivré sous le régime du *Règlement sur l'immatriculation et la délivrance de permis pour la pêche dans le Pacifique*. Il n'est pas possible d'affirmer qu'un régime de réglementation aussi changeant exprime une intention claire et exprime d'abolir les droits ancestraux des appelants et de la bande des Heiltsuk. Comme dans *Sparrow*, le ministère public a tout au plus démontré que l'État avait pris des mesures visant à contrôler la pêche et non à délimiter l'étendue des droits ancestraux.

Cependant, le ministère public a également prétendu que, même si les règlements n'ont pas eu pour effet d'éteindre les droits ancestraux des appelants, ces droits ont été éteints par suite de la prise du décret C.P. 2539 du 11 septembre 1917, dont voici le texte:

[TRADUCTION] Attendu qu'on fait valoir que, depuis des temps immémoriaux, les Indiens de la Colombie-Britannique ont pour pratique de capturer le saumon au harpon ou par d'autres moyens après que le poisson a atteint les parties supérieures des eaux sans marée des cours d'eau;

Et attendu que, depuis le début de la pêche commerciale, il est devenu éminemment souhaitable que tous les saumons qui réussissent à remonter dans ces eaux puissent atteindre indemnes les frayères, vu la grande importance que les Indiens attachent à cette pratique, il leur a été permis de le faire pour se nourrir seulement; et, à cette fin, le paragraphe 2 de l'article 8 des Règlements de pêche particuliers à la Colombie-Britannique prévoit ce qui suit: —

«2. Les Indiens, avec la permission de l'inspecteur en chef des pêcheries, peuvent en tout temps capturer du poisson destiné à leur alimentation et à celle de leur famille, mais il leur est défendu de faire servir à d'autres fins, le poisson ainsi capturé; toutefois, nul Indien ne doit faire usage de harpons ou de pièges, ni ne peut enfermer des poissons dans les frayères ni dans aucun autre endroit affecté à la reproduction naturelle ou artificielle du poisson, ni en tout autre lieu réservé.»

And whereas notwithstanding this concession, great difficulty is being experienced in preventing the Indians from catching salmon in such waters for commercial purposes and recently, an Indian was convicted before a local magistrate for a violation of the above quoted regulation, the evidence being that he had been found fishing and subsequently selling fish. The case was appealed and the decision of the magistrate reversed, it being held that there was no proof that the fish caught by the Indian were those sold by him;

And whereas it is further represented that it is practically impossible for the Fishery Officers to keep fish that may be caught by the Indians in non-tidal waters, ostensibly for their own food purposes, under observation from the time they are caught until they are finally disposed of in one way or another;

And whereas the Department of the Naval Service is informed that the Indians have concluded that this regulation is ineffective, and this season arrangements are being made by them to carry on fishing for commercial purposes in an extensive way;

And whereas it is considered to be in the public interest that this should be prevented and the Minister of the Naval Service, after consultation with the Department of Justice on the subject, recommends that action as follows be taken;

Therefore His Excellency the Governor General in Council, under the authority of section 45 of the Fisheries Act, 4-5 George V, Chapter 8, is pleased to order and it is hereby ordered as follows: —

Subsection 2 of section 8 of the Special Fishery Regulations for the Province of British Columbia, adopted by Order in Council of the 9th February, 1915, is hereby rescinded, and the following is hereby enacted and substituted in lieu thereof: —

“2. An Indian may, at any time, with the permission of the Chief Inspector of Fisheries, catch fish to be used as food for himself and his family, but for no other purpose. The Chief Inspector of Fisheries shall have the power in any such permit (a) to limit or fix the area of the waters in which such fish may be caught; (b) to limit or fix the means by which, or the manner in which such fish may be caught, and (c) to limit or fix the time in which such permission shall be operative. An Indian shall not fish for or catch fish pursuant to the said permit except in the waters by the means or in the manner and within the time limit expressed in the said permit, and any fish caught pursuant to any such permit shall not be sold or other-

Et attendu que, en dépit de cette concession, il est très difficile d'empêcher les Indiens de pêcher le saumon à des fins commerciales dans ces eaux et que, récemment, un Indien a été déclaré coupable par un magistrat local d'une infraction au règlement précité, la preuve ayant établi qu'il avait pêché et ensuite vendu le poisson capturé. L'affaire a été portée en appel et la décision du magistrat infirmée, le tribunal statuant qu'il n'y avait aucune preuve que les poissons pris par l'Indien étaient ceux qu'il avait vendus;

Et attendu qu'on fait aussi valoir qu'il est pratiquement impossible pour les surveillants des pêches d'observer constamment le poisson qui a pu être pris par les Indiens dans les eaux sans marée, apparemment pour leur propre alimentation, depuis le moment où il est pris jusqu'à celui où il en est disposé définitivement, d'une manière ou d'une autre;

Et attendu que le ministère du Service naval a été informé que les Indiens ont conclu que ce règlement est inefficace, et que, cette saison, ils font des préparatifs en vue de pêcher à des fins commerciales sur une grande échelle;

Et attendu qu'il est jugé être dans l'intérêt public d'empêcher ces activités, et que le ministère du Service naval, après avoir consulté le ministère de la Justice à cet égard, recommande que soient prises les mesures suivantes;

À ces causes, il plaît à Son Excellence le Gouverneur général en conseil, sous l'empire de l'article 45 de la Loi sur les pêcheries, 4-5 George V, chapitre 8, de décréter ce qui suit: —

Le paragraphe 2 de l'article 8 des Règlements de pêche particuliers à la Colombie-Britannique, pris par décret daté du 9 février 1915, est par les présentes abrogé et remplacé par ce qui suit:

«2. Les Indiens avec la permission de l'inspecteur en chef des pêcheries, peuvent en tout temps capturer du poisson destiné à leur alimentation et à celle de leur famille, mais il leur est défendu de faire servir à d'autres fins, le poisson ainsi capturé. L'inspecteur des pêcheries a le pouvoir dans le permis délivré à cet effet; a) de délimiter ou de fixer l'étendue des pêcheries où il est permis de pêcher; b) d'indiquer ou de prescrire les procédés de pêche; enfin c) de déterminer l'époque où ce permis devient effectif. Les Indiens n'ont pas le droit de capturer les espèces de poisson spécifiées, si ce n'est dans les eaux, d'après le procédé, et à l'époque prescrite dans ce permis, et ils ne peuvent ni les vendre ni en disposer autrement;

wise disposed of and a violation of the provisions of the said permit shall be deemed to be a violation of these regulations. . . .” [Emphasis added.]

The language of the Regulation suggests that the government had two purposes in enacting the amendment to the existing scheme: first, the government wished to ensure that conservation goals were met so that salmon reached their “spawning grounds”; second, the government wished to pursue those goals in a manner which would ensure that the special protection granted to the Indian food fishery would continue. The government attempted to meet these goals by making it clear that no special protection was being granted to the Indian commercial fishery and that, instead, the Indian commercial fishery would be subject to the general regulatory system governing commercial fishing in the province.

Under the *Sparrow* test for extinguishment, this Regulation cannot be said to have extinguished the aboriginal right to fish commercially held by the appellants in this case. The government’s purpose was to ensure that conservation goals were met, and that the Indian food fishery’s special protection would continue; its purpose was not to eliminate aboriginal rights to fish commercially. It is true that through the enactment of this regulation the government placed aboriginal rights to fish commercially under the general regulatory scheme applicable to commercial fishing, and therefore did not grant the aboriginal commercial fishery special protection of the kind given to aboriginal food fishing; however, the failure to recognize an aboriginal right, and the failure to grant special protection to it, do not constitute the clear and plain intention necessary to extinguish the right.

That the government did not in fact have this intention becomes clear when one looks at the general regulatory scheme of which this Regulation is one part. First, aboriginal people were not prohibited, and have never been prohibited since the scheme was introduced in 1908, from obtaining

toutes violations des dispositions du permis constituent une infraction à ces règlements . . . » [Je souligne.]

Le texte du règlement tend à indiquer que le gouvernement visait deux objectifs en modifiant le régime existant: premièrement, il désirait assurer la réalisation d’objectifs de conservation, de sorte que les saumons puissent atteindre leurs «frayères»; deuxièmement, il désirait poursuivre ces objectifs de manière à assurer le maintien de la protection spéciale accordée à la pêche pratiquée par les Indiens à des fins alimentaires. Le gouvernement a tenté d’atteindre ces objectifs en établissant clairement qu’aucune protection spéciale n’était accordée aux activités de pêche commerciale des Indiens, mais qu’au contraire ces activités seraient assujetties au régime général de réglementation de la pêche commerciale dans la province.

Selon le critère formulé dans *Sparrow*, relativement à l’extinction, il est impossible d’affirmer que le règlement a éteint le droit ancestral de pêche commerciale détenu par les appelants en l’espèce. L’objectif du gouvernement était d’assurer la réalisation d’objectifs de conservation et de maintenir la protection spéciale dont bénéficiait la pêche pratiquée par les Indiens à des fins alimentaires. L’objectif du gouvernement n’était pas d’éliminer les droits ancestraux de pêche commerciale. Il est vrai que, par la prise de ce règlement, le gouvernement a assujéti les droits ancestraux de pêche commerciale au régime général de réglementation applicable à la pêche commerciale, et qu’il n’a en conséquence pas accordé à la pêche commerciale des autochtones une protection spéciale du genre de celle accordée aux activités de pêche pratiquées par ceux-ci à des fins alimentaires. Cependant, le fait de ne pas reconnaître à un droit la qualité de droit ancestral et de ne pas lui accorder une protection spéciale ne constituent pas l’intention claire et expresse requise pour éteindre le droit en question.

Il ressort clairement de l’examen du régime général de réglementation dans lequel s’inscrit ce règlement que telle n’était pas l’intention du gouvernement. Premièrement, il n’était pas interdit aux autochtones, et il ne leur a d’ailleurs jamais été interdit depuis l’établissement du régime en 1908,

licences to fish commercially under the regulatory scheme applicable to commercial fishing. Second, and more importantly, the government has, at various times, given preferences to aboriginal commercial fishing. For example, the government has provided for greatly reduced licensing fees for aboriginal fishers and has attempted to encourage aboriginal participation in the commercial fishery. I would note the statistics cited by the interveners the British Columbia Fisheries Survival Coalition and British Columbia Wildlife Federation to the effect that, in 1929, of the 13,860 commercial salmon licences issued 3,632 were held by aboriginal people and that, during and after World War II, there was a "substantial fleet of Indian-owned and operated seine boats, as well as gill-netters and trollers". The interveners assert that, today, aboriginal participation in the commercial fishery is at a considerably higher percentage than the percentage of aboriginal people in the population as a whole. Such substantial encouragement of the aboriginal commercial fishery is not, in my view, consistent with the assertion that through enacting a Regulation aimed at ensuring conservation of the fishery in a manner which continues the special protection given to the aboriginal food fishery, the government had the clear and plain intention to extinguish the aboriginal rights to fish commercially held by some aboriginal peoples in the province.

d'obtenir des permis de pêche commerciale en vertu du régime de réglementation applicable à ce type de pêche. Deuxièmement, fait encore plus important, le gouvernement a, à divers moments, pris des mesures préférentielles en faveur de la pêche commerciale autochtone. Par exemple, le gouvernement a réduit considérablement le montant des droits payables par les pêcheurs autochtones pour obtenir un permis et il a tenté d'encourager leur participation à la pêche commerciale. Je tiens à mentionner les statistiques citées par les intervenantes British Columbia Fisheries Survival Coalition et British Columbia Wildlife Federation : en 1929, les autochtones détenaient 3 632 des 13 860 permis de pêche commerciale du saumon délivrés; pendant et après la Seconde Guerre mondiale, il existait [TRADUCTION] «une importante flotte de senneurs, de bateaux pour la pêche au filet à maille et de bateaux pour la pêche à la traîne appartenant à des Indiens et exploités par eux». Ces intervenantes soutiennent que, de nos jours, la participation autochtone à la pêche commerciale représente un pourcentage considérablement plus élevé que celui des autochtones au sein de l'ensemble de la population. À mon avis, cet encouragement important en faveur de la pêche commerciale autochtone ne concorde pas avec l'affirmation que, en prenant un règlement de pêche visant des objectifs de conservation, de manière à maintenir la protection spéciale accordée à la pêche pratiquée par les autochtones à des fins alimentaires, le gouvernement avait l'intention claire et expresse d'éteindre les droits ancestraux de pêche commerciale détenus par certains peuples autochtones dans la province.

38

Finally, I would note that the Regulation is of an entirely different nature than the document relied on for a finding of extinguishment in *R. v. Horseman*, [1990] 1 S.C.R. 901, at p. 933, (*per* Cory J.) and *R. v. Badger*, [1996] 1 S.C.R. 771, at para. 46 (*per* Cory J.). Section 12 of the *Natural Resources Transfer Agreement* (NRTA), the provision at issue in those cases, is a provision in a constitutional document, the enactment of which provides for a permanent settlement of the legal rights of the aboriginal groups to whom it applies. The Regulation, by contrast, was merely a statutory document

Enfin, je tiens à préciser que la nature de ce règlement est tout à fait différente de celle du document sur lequel notre Cour s'est fondée pour conclure à l'extinction dans les arrêts *R. c. Horseman*, [1990] 1 R.C.S. 901, à la p. 933 (le juge Cory), et *R. c. Badger*, [1996] 1 R.C.S. 771, au par. 46 (le juge Cory). L'article 12 de la *Convention sur le transfert des ressources naturelles* (Convention) — disposition contestée dans ces affaires — est une disposition faisant partie d'un document constitutionnel qui pourvoit au règlement permanent des droits juridiques des groupes autochtones

dealing with an immediate conservation concern and was subject to amendment through nothing more elaborate than the normal legislative process. The NRTA was aimed at achieving a permanent clarification of the province's legislative jurisdiction and of the legal rights of aboriginal peoples within the province; the Regulation was aimed at dealing with the immediate problems caused by the fact that an insufficient number of salmon were reaching their spawning grounds. The intention of the government in enacting the Regulation must, as a consequence, be viewed quite differently from its intention in enacting the NRTA, with the result that while the NRTA can be seen as evincing the necessary clear and plain intention to extinguish aboriginal rights to hunt commercially in the province to which it applies, the Regulation cannot be seen as evincing the necessary clear and plain intention to extinguish aboriginal rights to fish commercially in British Columbia.

Infringement

Sparrow also lays out the test for determining whether or not the government has infringed the aboriginal rights of the appellants (at pp. 1111-12):

The first question to be asked is whether the legislation in question has the effect of interfering with an existing aboriginal right. If it does have such an effect, it represents a *prima facie* infringement of s. 35(1). Parliament is not expected to act in a manner contrary to the rights and interests of aboriginals, and, indeed, may be barred from doing so by the second stage of s. 35(1) analysis.

To determine whether the fishing rights have been interfered with such as to constitute a *prima facie* infringement of s. 35(1) certain questions must be asked. First, is the limitation unreasonable? Second, does the regulation impose undue hardship? Third, does the regulation deny to the holders of the right their preferred means of exercising that right? The onus of proving a *prima facie* infringement lies on the individual or group challenging the legislation.

auxquels il s'applique. À l'opposé, le règlement était uniquement un texte législatif portant sur des préoccupations immédiates en matière de conservation, qui pouvait être modifié tout simplement par recours au processus législatif. La Convention visait à clarifier de façon permanente la compétence législative de la province ainsi que les droits juridiques des peuples autochtones au sein de la province. Le règlement visait plutôt à régler les problèmes immédiats causés par le fait qu'il n'y avait pas suffisamment de saumons qui atteignaient les frayères. Il faut en conséquence considérer que, en prenant le règlement, le gouvernement avait une intention tout à fait différente de celle qu'il avait en édictant la Convention. Il s'ensuit donc que bien qu'il soit possible de considérer que la Convention atteste l'intention claire et expresse requise pour éteindre les droits ancestraux de chasse commerciale dans la province où elle s'applique, le règlement ne fait pas de même à l'égard des ancestraux de pêche commerciale en Colombie-Britannique.

Atteinte

Dans l'arrêt *Sparrow*, la Cour a aussi énoncé le critère permettant de déterminer si l'État a porté atteinte aux droits ancestraux des appelants (aux pp. 1111 et 1112):

La première question à poser est de savoir si la loi en question a pour effet de porter atteinte à un droit ancestral existant. Dans l'affirmative, elle constitue une violation à première vue du par. 35(1). Le Parlement n'est pas censé agir d'une manière contraire aux droits et aux intérêts des autochtones et, en réalité, il peut être empêché de le faire par la seconde étape de l'analyse fondée sur le par. 35(1).

Pour déterminer si les droits de pêche ont subi une atteinte constituant une violation à première vue du par. 35(1), on doit poser certaines questions. Premièrement, la restriction est-elle déraisonnable? Deuxièmement, le règlement est-il indûment rigoureux? Troisièmement, le règlement refuse-t-il aux titulaires du droit le recours à leur moyen préféré de l'exercer? C'est au particulier ou au groupe qui conteste la mesure législative qu'il incombe de prouver qu'il y a eu violation à première vue.

The test as laid out in *Sparrow* is determined to a certain extent by the factual context in which it was articulated; the Court must take into account variations in the factual context of the appeal which affect the application of the test.

Comme le critère énoncé dans cet arrêt est, dans une certaine mesure, fonction du contexte factuel dans lequel il a été formulé, notre Cour doit, selon les pourvois, tenir compte des différences factuelles qui influent sur l'application du critère.

40 At the infringement stage, the primary distinction between the factual context of *Sparrow*, and the context of this appeal, is that the regulation impugned in *Sparrow* — a net length restriction — was challenged independently of the broader fisheries management scheme of which it was a part. In this case, while the appellants' constitutional challenge is focused on a single regulation — s. 20(3) of the *Pacific Herring Fishery Regulations* — the scope of the challenge is much broader than the terms of s. 20(3). The appellants' arguments on the points of infringement and justification effectively impugn the entire approach taken by the Crown to the management of the herring spawn on kelp fishery.

Quant au volet relatif à l'atteinte, la distinction principale entre le contexte factuel de l'affaire *Sparrow* et celui de la présente espèce est que le règlement attaqué dans la première — la limitation de la longueur des filets — l'a été indépendamment du régime global de gestion de la pêche dont il faisait partie. En l'espèce, même si la contestation constitutionnelle des appelants vise une seule mesure réglementaire — le par. 20(3) du *Règlement de pêche du hareng du Pacifique* — la portée de cette contestation dépasse largement le texte de ce paragraphe. Les arguments des appelants en ce qui concerne l'atteinte et la justification mettent effectivement en cause l'ensemble de la politique de l'État en matière de gestion de la récolte de la rogue de hareng sur varech.

41 The fact that the appellants' challenge to the legislation is broader than that of the appellant in *Sparrow* arises from the difference in the nature of the regulation being challenged. Restrictions on net length have an impact on an individual's ability to exercise his or her aboriginal rights, and raise conservation issues, which can be subject to constitutional scrutiny independent of the broader regulatory scheme of which they are a part. The Category J licence requirement, on the other hand, cannot be scrutinized for the purposes of either infringement or justification without considering the entire regulatory scheme of which it is a part. The requirement that those engaged in the commercial fishery have licences is, as will be discussed in more detail below, simply a constituent part of a larger regulatory scheme setting the amount of herring that can be caught, the amount of herring allotted to the herring spawn on kelp fishery and the allocation of herring spawn on kelp amongst different users of the resource. All the aspects of this regulatory scheme potentially infringe the rights of the appellants in this case; to consider s. 20(3) apart from this broader regulatory

Le fait que la contestation de la législation présentée par les appelants ait une portée plus large que celle présentée par l'appelant dans *Sparrow* découle de la différence de nature entre les règlements attaqués. Les restrictions imposées à la longueur des filets ont un effet sur la capacité d'une personne d'exercer ses droits ancestraux et soulèvent des questions de conservation qui peuvent faire l'objet d'un examen constitutionnel, indépendamment du régime global de réglementation dont elles font partie. En revanche, l'obligation d'obtenir un permis de catégorie J ne peut pas être examinée, à l'étape de l'atteinte ou de la justification, sans prise en considération de l'ensemble du régime de réglementation dans lequel elle s'inscrit. L'obligation pour ceux qui pratiquent la pêche commerciale de détenir un permis est, comme nous le verrons de manière plus approfondie plus loin, simplement un élément constitutif d'un régime global de réglementation qui fixe la quantité de hareng pouvant être prise, la quantité de hareng attribuée à la récolte de rogue de hareng sur varech et la répartition de cette récolte entre les divers usagers de la ressource. Comme tous les

scheme for the herring fishery would distort the Court's inquiry.

The significance of this difference for the *Sparrow* test is that the questions asked by this Court in *Sparrow* must, in this case, be applied not simply to s. 20(3) but also to the other aspects of the regulatory scheme of which s. 20(3) is one part. In order to do this it will be necessary to consider, in some detail, the regulatory scheme being challenged by the appellants in this case. Before doing so, however, I have one further comment with regards to the test for infringement laid out by this Court in *Sparrow*.

The *Sparrow* test for infringement might seem, at first glance, to be internally contradictory. On the one hand, the test states that the appellants need simply show that there has been a *prima facie* interference with their rights in order to demonstrate that those rights have been infringed, suggesting thereby that any meaningful diminution of the appellants' rights will constitute an infringement for the purpose of this analysis. On the other hand, the questions the test directs courts to answer in determining whether an infringement has taken place incorporate ideas such as unreasonableness and "undue" hardship, ideas which suggest that something more than meaningful diminution is required to demonstrate infringement. This internal contradiction is, however, more apparent than real. The questions asked by the Court in *Sparrow* do not define the concept of *prima facie* infringement; they only point to factors which will indicate that such an infringement has taken place. Simply because one of those questions is answered in the negative will not prohibit a finding by a court that a *prima facie* infringement has taken place; it will just be one factor for a court to consider in its determination of whether there has been a *prima facie* infringement.

aspects de ce régime de réglementation sont susceptibles de porter atteinte aux droits des appelants dans la présente espèce, étudier le par. 20(3) isolément de ce régime global de réglementation de la pêche au hareng fausserait l'examen de notre Cour.

L'importance de cette différence pour ce qui concerne l'application du critère établi dans *Sparrow* est que les questions formulées par notre Cour dans cet arrêt doivent en l'espèce être posées à l'égard non seulement du par. 20(3), mais également des autres aspects du régime de réglementation dont ce paragraphe fait partie. À cette fin, il est nécessaire d'examiner assez en détail le régime de réglementation contesté par les appelants dans le présent pourvoi. Toutefois, avant de commencer cet examen, je tiens à faire une autre remarque sur le critère relatif à l'atteinte établi par notre Cour dans l'arrêt *Sparrow*.

Il est possible que le critère relatif à l'atteinte formulé dans *Sparrow* semble, de prime abord, intrinsèquement contradictoire. D'une part, suivant ce critère, les appelants ont simplement à établir l'existence d'une atteinte à première vue à leurs droits pour démontrer la violation de ces droits, ce qui tend à indiquer que toute diminution appréciable des droits des appelants constitue une violation pour l'application de cette analyse. D'autre part, les questions auxquelles les tribunaux doivent répondre, en vertu de ce critère, pour déterminer s'il y a eu atteinte font entrer en jeu des notions comme le caractère déraisonnable ou «indûment» rigoureux de la mesure en cause, notions qui tendent à indiquer qu'il faut établir davantage qu'une diminution appréciable pour prouver l'atteinte. Cette contradiction intrinsèque est cependant plus apparente que réelle. Les questions posées par notre Cour dans *Sparrow* ne définissent pas le concept de l'atteinte à première vue, mais mettent uniquement en exergue certains facteurs qui indiquent qu'une telle atteinte a été commise. Le simple fait qu'on réponde par la négative à l'une de ces questions n'empêche pas le tribunal de conclure à l'existence d'une atteinte à première vue. Cette réponse négative n'est qu'un des facteurs que le tribunal doit prendre en considération pour déterminer s'il y a eu atteinte à première vue.

44

I now turn to the regulatory scheme challenged by the appellants in this case. I will consider this scheme both as it exists now and in terms of its historical development. The reason for this is that some aspects of the scheme challenged by the appellants go back to the introduction of the commercial herring spawn on kelp fishery in the early 1970s; as such, in order to scrutinize those aspects it is necessary to consider the regulation of the herring fishery from its inception.

45

The commercial herring spawn on kelp and herring roe fisheries, in the form in which they exist today, developed in British Columbia in the early 1970s. Prior to that time herring was exploited primarily for the purpose of reducing the fish to oil. The shift in the use of the herring fishery resulted from a confluence of factors; in particular, extensive overfishing had radically depleted the herring stock (in 1965 the reduction fishery was shut down indefinitely) in response to which the Department of Fisheries and Oceans shifted from a policy of taking the maximum sustainable yield of the herring stock each year to a policy of exploiting the herring fishery so as to maximize the economic and social benefits derived from that fishery for the people of Canada. As part of this policy shift the Department of Fisheries and Oceans encouraged the growth of a commercial herring spawn on kelp fishery. Because herring spawn on kelp is eaten as part of the traditional celebration of the new year in Japan, an export market for this product existed; the herring industry and the Department of Fisheries and Oceans believed that this market could be exploited lucratively.

46

From the time of the Department of Fisheries and Oceans' policy shift in the early 1970s, until 1982, the Department regulated the herring stock through the measurement of spawn escapement (the calculation of the number of eggs spawned in a given year). In 1982, this means for measuring and controlling the herring stock was modified; at that time the Department adopted a policy of estimating the size of the herring stock in each year and of setting the allowable catch at 20 per cent of

J'aborde maintenant l'examen du régime de réglementation contesté par les appelants en l'espèce. Je vais l'étudier tant en regard de sa forme actuelle que de son évolution historique, car certains aspects de ce régime remontent à l'implantation de la pêche commerciale de la rogue de hareng sur varech au début des années 1970. Par conséquent, pour examiner ces divers aspects, il est nécessaire d'étudier la réglementation de la pêche au hareng depuis ses débuts.

La pêche commerciale de la rogue de hareng sur varech et celle du hareng prêt à frayer, telles qu'elles existent aujourd'hui, ont commencé en Colombie-Britannique au début des années 1970. Auparavant, le hareng était exploité principalement pour la production d'huile. Le changement dans l'utilisation du hareng a résulté de la convergence de différents facteurs. De façon plus particulière, une surpêche généralisée avait eu pour effet d'épuiser radicalement les stocks de hareng (en 1965, la pêche pour la production d'huile a été fermée indéfiniment), amenant le ministère des Pêches et Océans à remplacer la politique du rendement équilibré annuel maximal des stocks de hareng par une politique d'exploitation du hareng propre à optimiser les retombées socio-économiques de cette pêche pour le Canada. Dans le cadre de cette réorientation de la politique, le ministère des Pêches et Océans a encouragé la croissance de la pêche commerciale de la rogue de hareng sur varech. Comme cette denrée est consommée dans le cadre des festivités du nouvel an au Japon, il existait un marché d'exportation pour ce produit. L'industrie du hareng et le ministère des Pêches et Océans ont cru que ce marché pourrait être lucratif.

À compter du jour où le ministère des Pêches et Océans a changé de politique au début des années 1970 jusqu'en 1982, il a régulé les stocks de hareng en mesurant l'échappée (le calcul du nombre d'œufs au cours d'une année donnée). En 1982, cette méthode de mesure et de contrôle des stocks de hareng a été modifiée. Le ministère a décidé d'appliquer une politique d'estimation annuelle des stocks de hareng et de fixer les prises permises à 20 pour 100 de ces stocks. La politique

that stock. The 1982 stock measurement and allotment policy has been subject to only one amendment since its adoption: in 1988 the Department of Fisheries and Oceans qualified the constant harvest rate of 20 per cent so as to allow for minimum spawn escapement.

It should be noted that the measurement of the herring stock is a problem of considerable difficulty. As the defence expert, Dr. Gary Vigers, noted

... in the real situation, fisheries management is full of uncertainty — from the inability to identify primary governing forces at each stage of recruitment, to subjective (but unintentional) sampling bias of fisheries officers observations ..., to extrapolation of assessments to entire populations. Each level of measurement has intrinsic errors which may be amplified at the next level of evaluation.

In my opinion, two major uncertainty factors that may defy quantification and are totally unaccounted for in the current methods of stock assessment are the predicted recruitment of eggs to larval populations, and the predicted recruitment of larval populations to juvenile populations. Examples abound to illustrate that hatching success of eggs is highly variable and affected by almost every physical factor conceivable in the nearshore environment. ...

The 20 per cent allotted herring catch is distributed by the Department to the various herring fisheries, with the herring roe fishery (where the eggs are extracted from the female fish prior to spawning) bearing the brunt of variations in the herring stock. The Department sets the herring spawn on kelp fishery at a constant level of 2,275 tons; other non-roë herring fisheries are, similarly, set at constant levels. The herring roe fishery, on the other hand, varies depending on the levels of the herring stock. The rationale for this allotment policy is that the herring roe fishery is agreed to be more destructive to the herring stock than the herring spawn on kelp and other herring fisheries; it is felt by the Department that, as such, the herring roe

d'évaluation et de répartition de 1982 n'a été modifiée qu'une fois depuis son adoption. En 1988, le ministère des Pêches et Océans a assorti le taux d'exploitation constant de 20 pour 100 d'une réserve conçue pour assurer une échappée minimale.

Il convient de noter que la mesure des stocks de hareng est une tâche ardue. Comme l'a fait observer Gary Vigers, l'expert cité par la défense:

[TRADUCTION] ... dans la pratique, la gestion de la pêche est remplie d'incertitudes — incapacité de cerner les influences dominantes à chaque stade du renouvellement des populations, biais du processus d'échantillonnage (quoique involontaire) dans les observations des agents des pêches [...], application d'estimations à des populations entières. À chaque étape de l'évaluation, il se produit des erreurs inhérentes qui peuvent être amplifiées à l'étape suivante.

À mon avis, deux facteurs d'incertitude importants, qui défient peut-être toute quantification et dont les méthodes actuelles d'évaluation des stocks ne tiennent aucunement compte, sont le taux de renouvellement prévu des populations de larves par les œufs et le taux de renouvellement prévu des populations de juvéniles par les larves. On peut citer nombre d'exemples pour montrer que le succès de l'éclosion des œufs est très variable et est influencé par pratiquement toutes les conditions naturelles imaginables du milieu à proximité du rivage ...

Les prises de hareng permises — fixées à 20 pour 100 — sont réparties par le ministère entre les divers secteurs de la pêche au hareng, la pêche au hareng prêt à frayer (où les œufs sont extraits de la femelle avant le frai) supportant le gros des fluctuations des stocks de hareng. Le ministère limite la récolte de la rogue de hareng sur varech à un niveau constant de 2 275 tonnes; les autres secteurs sont aussi limités à des niveaux constants. En revanche, dans le cas de la pêche au hareng prêt à frayer, les niveaux sont fixés en fonction des stocks de hareng. La raison d'être de cette politique est que, de l'aveu général, cette pêche réduit davantage les stocks de hareng que la récolte de la rogue de hareng sur varech et les autres types de

fishery should be the fishery most responsive to fluctuations in the herring stock. The only year in which there was a significant drop in the herring stock was 1986. The decrease in the stock in that year resulted in the closure of the herring roe fishery; the amount of herring allotted to the herring spawn on kelp fishery was also reduced.

49

Commercial herring spawn on kelp licences were first issued in 1975. At that time, applicants "were told that priority would be given to applicants who have previous experience in catching and live holding herring and to residents of remote coastal communities" (Department of Fisheries report, "1975 Herring Spawn on Kelp Fishery"). In a 1985 briefing note prepared by the Department of Fisheries and Oceans, the Department stated that the initial issuance of licences in 1975 evaluated applicants "considering the individual's previous experience and knowledge of herring, area of residence and citizenship status and/or membership in Native Indian Band. Thirteen permits were issued, each allowing 6 tons of production".

50

In 1988, the year relevant to this appeal, the herring stock was estimated at 350,000 tons, of which 160,000 tons were "fishable". The total allocation for the herring fishery was 40,000 tons, of which 2,275 tons was allotted to the herring spawn on kelp fishery. Of that 2,275 tons, 224 tons was allotted to Category J licence holders. There were 28 such licences issued in 1988, each with an 8-ton quota. Of those 28 licences 16 were held by Native Indian bands. One was held by the Heiltsuk Band.

51

To summarize, the government's scheme for regulating the herring spawn on kelp fishery can be divided into four constituent parts: (1) the government determines the amount of the herring

pêches de ce poisson. Pour cette raison, le ministère estime que la pêche au hareng prêt à frayer est celle qui doit subir le plus les contrecoups des fluctuations des stocks de hareng. L'année 1986 a été la seule où l'on a observé une baisse importante des stocks de ce poisson. La diminution des stocks cette année-là a entraîné la fermeture de la pêche au hareng prêt à frayer. La part réservée à la récolte de rogue de hareng sur varech a elle aussi été réduite.

Les premiers permis de pêche commerciale de la rogue de hareng sur varech ont été délivrés en 1975. À ce moment-là, les demandeurs de permis [TRADUCTION] «se sont fait dire que la priorité serait donnée à ceux ayant de l'expérience dans la prise du hareng et la conservation de ce poisson en vivier, ainsi qu'aux résidents des collectivités riveraines éloignées» (rapport du ministère des Pêches, «1975 Herring Spawn on Kelp Fishery»). Dans une note d'information datée de 1985 et préparée par le ministère des Pêches et Océans, celui-ci a dit que, pour la délivrance initiale des permis en 1975, les demandeurs avaient été évalués [TRADUCTION] «en fonction de leur connaissance du hareng, de leur expérience de cette pêche, de leur lieu de résidence et de leur qualité de citoyen ou de membre d'une bande indienne. Treize permis ont été délivrés, chacun attribuant un contingent de production de 6 tonnes».

En 1988, année pertinente pour le présent pourvoi, les stocks de hareng ont été estimés à 350 000 tonnes, dont 160 000 tonnes dites «exploitables». Le contingent total de la pêche au hareng a été fixé à 40 000 tonnes, dont 2 275 tonnes ont été attribuées à la récolte de rogue de hareng sur varech. De ces 2 275 tonnes, 224 tonnes ont été réparties entre des titulaires de permis de catégorie J. Vingt-huit permis de ce type ont été délivrés en 1988, chacun se voyant accorder un contingent de huit tonnes. De ces 28 permis, 16 étaient détenus par des bandes indiennes, dont un par la bande des Heiltsuk.

En résumé, le régime gouvernemental de réglementation de la récolte de la rogue de hareng sur varech peut être divisé en quatre éléments constitutifs: (1) l'État détermine la proportion des stocks

stock that will be harvested in a given year; (2) the government allots the herring stock to the different herring fisheries (herring roe, herring spawn on kelp and other herring fisheries); (3) the government allots the herring spawn on kelp fishery to various user groups (commercial users and the Indian food fishery); and, (4) the government allots the commercial herring spawn on kelp licences.

Because each of these constituent parts has a different objective, and each involves a different pattern of government action, at the stage of justification it will be necessary to consider them separately; however, at the infringement stage the government scheme can be considered as a whole. The reason for this is that at the infringement stage it is the cumulative effect on the appellants' rights from the operation of the regulatory scheme that the court is concerned with. The cumulative effect of the regulatory scheme on the appellants' rights is, simply, that the total amount of herring spawn on kelp that can be harvested by the Heiltsuk Band for commercial purposes is limited. Thus, in order to demonstrate that there has been a *prima facie* infringement of their rights, the appellants must simply demonstrate that limiting the amount of herring spawn on kelp that they can harvest for commercial purposes constitutes, on the basis of the test laid out in *Sparrow*, a *prima facie* interference with their aboriginal rights.

In light of the questions posed by this Court in *Sparrow*, it seems clear that the appellants have discharged their burden of demonstrating a *prima facie* interference with their aboriginal rights. Prior to the arrival of Europeans in North America, the Heiltsuk could harvest herring spawn on kelp to the extent they themselves desired, subject only to such limitations as were imposed by any difficulties in transportation, preservation and resource availability, as well as those limitations that they thought advisable to impose for the purposes of conservation; subsequent to the enactment of the regulatory scheme described above the Heiltsuk can harvest herring spawn on kelp for commercial purposes only to the limited extent allowed by the

de hareng qui sera récoltée au cours d'une année donnée; (2) il répartit les stocks de hareng entre les divers secteurs de la pêche de ce poisson (hareng prêt à frayer, roque de hareng sur varech et autres types de pêche); (3) il répartit la part attribuée à la récolte de la roque de hareng sur varech entre les divers groupes d'utilisateurs (utilisateurs commerciaux et Indiens pratiquant la pêche de subsistance); (4) il répartit les permis de pêche commerciale de la roque de hareng sur varech.

Parce que chacun de ces éléments constitutifs vise un objectif différent et entraîne des mesures gouvernementales distinctes, il sera nécessaire, à l'étape de la justification, de les examiner séparément. Toutefois, à l'étape de l'atteinte, le régime gouvernemental de réglementation peut être étudié globalement car, à cette étape, c'est l'effet cumulatif de l'application du régime de réglementation sur les droits des appelants qui intéresse le tribunal. L'effet cumulatif du régime sur les droits des appelants est tout simplement que la quantité totale de roque de hareng sur varech qui peut être récoltée par la bande des Heiltsuk à des fins commerciales est limitée. Par conséquent, pour établir qu'il y a atteinte à première vue de leurs droits, les appelants doivent simplement démontrer que la limitation de la quantité de roque de hareng sur varech qui peut être récoltée à des fins commerciales constitue, selon le critère énoncé dans *Sparrow*, une atteinte à première vue à leurs droits ancestraux.

Compte tenu des questions formulées par notre Cour dans *Sparrow*, il semble clair que les appelants se sont acquittés de la charge de démontrer une atteinte à première vue à leurs droits ancestraux. Avant l'arrivée des Européens en Amérique du Nord, les Heiltsuk pouvaient récolter autant de roque de hareng sur varech qu'ils le désiraient, sous réserve uniquement des limitations découlant des problèmes de transport, de préservation et de disponibilité de la ressource, ainsi que des limitations qu'ils estimaient souhaitables de respecter à des fins de conservation. Par suite de l'établissement du régime de réglementation décrit précédemment, les Heiltsuk ne peuvent récolter que la quantité limitée de roque de hareng sur varech à

government. To use the language of Cory J. in *R. v. Nikal*, *supra*, at para. 104, the government's regulatory scheme "clearly impinge[s]" upon the rights of the appellant and, as such, must be held to constitute a *prima facie* infringement of those rights.

Justification

In *Sparrow*, Dickson C.J. and La Forest J. articulated a two-part test for determining whether government actions infringing aboriginal rights can be justified. First, the government must demonstrate that it was acting pursuant to a valid legislative objective (at p. 1113):

Here the court would inquire into whether the objective of Parliament in authorizing the department to enact regulations regarding fisheries is valid. The objective of the department in setting out the particular regulations would also be scrutinized. An objective aimed at preserving s. 35(1) rights by conserving and managing a natural resource, for example, would be valid. Also valid would be objectives purporting to prevent the exercise of s. 35(1) rights that would cause harm to the general populace or to aboriginal peoples themselves, or other objectives found to be compelling and substantial.

Second, the government must demonstrate that its actions are consistent with the fiduciary duty of the government towards aboriginal peoples. This means, Dickson C.J. and La Forest J. held, that the government must demonstrate that it has given the aboriginal fishery priority in a manner consistent with this Court's decision in *Jack v. The Queen*, [1980] 1 S.C.R. 294, at p. 313, where Dickson J. (as he then was) held that the correct order of priority in the fisheries is "(i) conservation; (ii) Indian fishing; (iii) non-Indian commercial fishing; or (iv) non-Indian sports fishing". Dickson C.J. and La Forest J. elaborated this priority requirement as follows, at p. 1116:

While the detailed allocation of maritime resources is a task that must be left to those having expertise in the

des fins commerciales autorisée par l'État. Pour reprendre les propos du juge Cory dans l'arrêt *R. c. Nikal*, précité, au par. 104, le régime gouvernemental de réglementation «empiète[e] clairement» sur les droits des appelants et, de ce fait, doit être considéré comme portant atteinte à première vue à ces droits.

Justification

Dans *Sparrow*, le juge en chef Dickson et le juge La Forest ont formulé un critère à deux volets permettant de déterminer si les actions de l'État qui portent atteinte aux droits ancestraux peuvent être justifiées. Premièrement, l'État doit démontrer qu'il a agi en vertu d'un objectif législatif régulier (à la p. 1113):

À ce stade, la cour se demanderait si l'objectif visé par le Parlement en autorisant le ministère à adopter des règlements en matière de pêche est régulier. Serait également examiné l'objectif poursuivi par le ministère en adoptant le règlement en cause. L'objectif de préserver, par la conservation et la gestion d'une ressource naturelle par exemple, des droits visés au par. 35(1) serait régulier. Seraient également réguliers des objectifs visant apparemment à empêcher l'exercice de droits visés au par. 35(1) lorsque cet exercice nuirait à l'ensemble de la population ou aux peuples autochtones eux-mêmes, ou d'autres objectifs jugés impérieux et réels.

Deuxièmement, l'État doit établir que ses actions sont compatibles avec son obligation de fiduciaire envers les peuples autochtones. Cela signifie, de conclure le juge en chef Dickson et le juge La Forest, que l'État doit prouver qu'il a accordé la priorité à la pêche autochtone, d'une manière conforme à l'arrêt de notre Cour *Jack c. La Reine*, [1980] 1 R.C.S. 294, à la p. 313, où le juge Dickson (plus tard Juge en chef) a statué que l'ordre de priorité à respecter en matière de pêche était le suivant: «(i) la protection de la ressource; (ii) la pêche par les Indiens; (iii) la pêche commerciale par les non-Indiens; ou (iv) la pêche sportive par les non-Indiens». Le juge en chef Dickson et le juge La Forest ont explicité ainsi cette exigence quant à la priorité, à la p. 1116:

Bien que la répartition détaillée de ressources maritimes soit une tâche devant être confiée aux experts dans le

area, the Indians' food requirements must be met first when that allocation is established. The significance of giving the aboriginal right to fish for food top priority can be described as follows. If, in a given year, conservation needs required a reduction in the number of fish to be caught such that the number equalled the number required for food by the Indians, then all the fish available after conservation would go to the Indians according to the constitutional nature of their fishing right. If, more realistically, there were still fish after the Indian food requirements were met, then the brunt of conservation measures would be borne by the practices of sport fishing and commercial fishing.

Dickson C.J. and La Forest J. also held at p. 1119 that the Crown's fiduciary duty to aboriginal peoples would require the Court to ask, at the justification stage, such further questions as:

... whether there has been as little infringement as possible in order to effect the desired result; whether, in a situation of expropriation, fair compensation is available; and, whether the aboriginal group in question has been consulted with respect to the conservation measures being implemented. ...

We would not wish to set out an exhaustive list of the factors to be considered in the assessment of justification. Suffice it to say that recognition and affirmation requires sensitivity to and respect for the rights of aboriginal peoples on behalf of the government, courts and indeed all Canadians.

As was noted with regards to the question of infringement, the framework for analysing aboriginal rights laid out in *Sparrow* depends to a considerable extent on the legal and factual context of that appeal. In this case, where, particularly at the stage of justification, the context varies significantly from that in *Sparrow*, it will be necessary to revisit the *Sparrow* test and to adapt the justification test it lays out in order to apply that test to the circumstances of this appeal.

domaine, on doit satisfaire d'abord aux besoins alimentaires des Indiens en procédant à cette répartition. L'importance d'accorder la priorité absolue au droit ancestral de pêcher pour se nourrir peut s'expliquer ainsi. Si, au cours d'une année donnée, il s'avérait nécessaire pour les besoins de la conservation de réduire le nombre de prises de poisson et que ce nombre soit égal à celui requis par les Indiens pour leur alimentation, alors il résulterait de la nature constitutionnelle de leur droit de pêche que c'est aux Indiens que reviendrait la totalité des poissons pouvant être pris suite aux mesures de conservation. Si, d'une manière plus réaliste, il restait encore du poisson après que les besoins alimentaires des Indiens eurent été satisfaits, ce seraient alors les pêcheurs sportifs et les pêcheurs commerciaux qui feraient les frais de ces mesures de conservation.

Le juge en chef Dickson et le juge La Forest ont en outre conclu, à la p. 1119, que compte tenu de l'obligation de fiduciaire de l'État envers les peuples autochtones notre Cour devrait, à l'étape de la justification, examiner d'autres questions, notamment celles de:

... savoir si, en tentant d'obtenir le résultat souhaité, on a porté le moins possible atteinte à des droits, si une juste indemnisation est prévue en cas d'expropriation et si le groupe d'autochtones en question a été consulté au sujet des mesures de conservation mises en œuvre. ...

Nous ne nous proposons pas de présenter une énumération exhaustive des facteurs à considérer dans l'appréciation de la justification. Qu'il suffise de souligner que la reconnaissance et la confirmation exigent que le gouvernement, les tribunaux et même l'ensemble des Canadiens soient conscients des droits des peuples autochtones et qu'ils les respectent.

Comme il a été noté à l'égard de la question de l'atteinte, l'application du cadre d'analyse des droits ancestraux établi dans *Sparrow*, est dans une large mesure fonction du contexte juridique et factuel de cet arrêt. Dans le présent pourvoi, particulièrement à l'étape de la justification, comme le contexte diffère considérablement de celui de l'affaire *Sparrow*, il sera nécessaire de réexaminer le critère établi dans cet arrêt et d'adapter le critère de la justification qui y est énoncé, afin de l'appliquer aux circonstances de l'espèce.

57

Two points of variation are of particular significance. First, the right recognized and affirmed in this case — to sell herring spawn on kelp commercially — differs significantly from the right recognized and affirmed in *Sparrow* — the right to fish for food, social and ceremonial purposes. That difference lies in the fact that the right at issue in *Sparrow* has an inherent limitation which the right recognized and affirmed in this appeal lacks. The food, social and ceremonial needs for fish of any given band of aboriginal people are internally limited — at a certain point the band will have sufficient fish to meet these needs. The commercial sale of the herring spawn on kelp, on the other hand, has no such internal limitation; the only limits on the Heiltsuk's need for herring spawn on kelp for commercial sale are the external constraints of the demand of the market and the availability of the resource. This is particularly so in this case where the evidence supports a right to exchange fish on a genuinely commercial basis; the evidence in this case does not justify limiting the right to harvest herring spawn on kelp on a commercial basis to, for example, the sale of herring spawn on kelp for the purposes of obtaining a "moderate livelihood". Even Lambert J.A., who used the moderate livelihood standard in dissent in the *R. v. Van der Peet* (1993), 80 B.C.L.R. (2d) 75, and *R. v. N.T.C. Smokehouse Ltd.* (1993), 80 B.C.L.R. (2d) 158, did not so confine the rights of the appellants in this case, defining their right at para. 79 as the right to "harvest herring spawn deposited on kelp . . . for the purposes of trade in quantities measured in tons, subject only to the need for conservation of the resource". I do not necessarily endorse this characterization; however, it supports the basic point that the aboriginal right in this case is, unlike the right at issue in *Sparrow*, without internal limitation.

Deux points sur lesquels les contextes divergents présentent une importance particulière. Premièrement, le droit reconnu et confirmé dans la présente espèce — celui de vendre de la rogue de hareng sur varech commercialement — diffère considérablement du droit reconnu et confirmé dans *Sparrow* — celui de pêcher à des fins alimentaires, sociales et rituelles. Cette différence réside dans le fait que le droit en cause dans *Sparrow* comporte une limite intrinsèque qui est absente dans le cas du droit reconnu et confirmé visé dans le présent pourvoi. Les besoins en poisson d'une bande autochtone donnée, à des fins alimentaires, sociales et rituelles, comportent une limite intrinsèque — en effet, à un certain point, la bande aura assez de poisson pour satisfaire ces besoins. En revanche, la vente commerciale de rogue de hareng sur varech ne comporte pas de telles limites intrinsèques. Les seules limites aux besoins des Heiltsuk en matière de rogue de hareng sur varech destinée à la vente commerciale sont les restrictions extrinsèques dictées par la demande du marché et la disponibilité de la ressource. C'est particulièrement le cas en l'espèce, car la preuve étaye l'existence d'un droit d'échanger le poisson sur une échelle véritablement commerciale. Dans le présent pourvoi, la preuve ne justifie pas de limiter le droit de récolter de la rogue de hareng sur varech sur une échelle commerciale, par exemple, à la vente de ce produit en vue d'assurer «une subsistance convenable». Même le juge Lambert, qui a appliqué la norme de la subsistance convenable dans sa dissidence dans les arrêts *R. c. Van der Peet* (1993), 80 B.C.L.R. (2d) 75, et *R. c. N.T.C. Smokehouse Ltd.* (1993), 80 B.C.L.R. (2d) 158, n'a pas restreint ainsi le droit des appelants en l'espèce, qu'il a défini, au par. 79, comme étant celui de [TRADUCTION] «récolter de la rogue de hareng sur varech [. . .] pour en faire le commerce en quantités mesurables en tonnes, sous réserve seulement du besoin d'assurer la conservation de la ressource». Je ne souscris pas nécessairement à cette caractérisation. Cependant, elle étaye l'argument fondamental que le droit ancestral visé en l'espèce n'est pas, contrairement à celui en cause dans *Sparrow*, assorti de limites intrinsèques.

The significance of this difference for the *Sparrow* test relates to the position taken in that case that, subject to the limits of conservation, aboriginal rights holders must be given priority in the fishery. In a situation where the aboriginal right is internally limited, so that it is clear when that right has been satisfied and other users can be allowed to participate in the fishery, the notion of priority, as articulated in *Sparrow*, makes sense. In that situation it is understandable that in an exceptional year, when conservation concerns are severe, it will be possible for aboriginal rights holders to be alone allowed to participate in the fishery, while in more ordinary years other users will be allowed to participate in the fishery after the aboriginal rights to fish for food, social and ceremonial purposes have been met.

Where the aboriginal right has no internal limitation, however, what is described in *Sparrow* as an exceptional situation becomes the ordinary: in the circumstance where the aboriginal right has no internal limitation, the notion of priority, as articulated in *Sparrow*, would mean that where an aboriginal right is recognized and affirmed that right would become an exclusive one. Because the right to sell herring spawn on kelp to the commercial market can never be said to be satisfied while the resource is still available and the market is not sated, to give priority to that right in the manner suggested in *Sparrow* would be to give the right-holder exclusivity over any person not having an aboriginal right to participate in the herring spawn on kelp fishery.

In my view, such a result was not the intention of *Sparrow*. The only circumstance contemplated by *Sparrow* was where the aboriginal right was internally limited; the judgment simply does not consider how the priority standard should be applied in circumstances where the right has no such internal limitation. That this is the case can be seen by a consideration of the judgment of *Jack*, *supra*, which was relied upon by Dickson C.J. and

L'importance de cette différence pour l'application du critère établi dans *Sparrow* tient à la position qui a été arrêtée dans cet arrêt et selon laquelle, sous réserve des limites découlant des besoins de conservation, la priorité en matière de pêche doit être accordée aux titulaires de droits ancestraux. Dans une situation où le droit ancestral est intrinsèquement limité, et où il est, de ce fait, facile de déterminer s'il a été respecté et si les autres usagers peuvent être autorisés à pêcher, l'application de la notion de priorité formulée dans *Sparrow* est logique. Dans un tel cas, il est compréhensible que, au cours d'une année exceptionnelle, où les problèmes en matière de conservation sont sérieux, il sera possible d'autoriser seulement les titulaires de droits ancestraux à pêcher, tandis que, au cours des années plus normales, les autres usagers seront autorisés à pêcher, après que les droits des autochtones de pêcher à des fins alimentaires, sociales et rituelles auront été respectés.

Toutefois, quand le droit ancestral ne comporte pas de limite intrinsèque, la situation décrite dans *Sparrow* comme étant exceptionnelle devient alors la norme: dans les cas où le droit ancestral est dépourvu de limite intrinsèque, l'application de la notion de priorité formulée dans *Sparrow* signifierait que si un droit ancestral est reconnu et confirmé, ce droit deviendrait exclusif. Parce que le droit de vendre de la rogue de hareng sur varech sur le marché commercial ne peut jamais être considéré comme ayant été respecté complètement tant que la ressource est encore disponible et que le marché n'est pas saturé, donner priorité à ce droit de la manière proposée dans *Sparrow* équivaldrait à conférer à son titulaire l'exclusivité vis-à-vis de quiconque ne jouit pas du droit ancestral de participer à la récolte de la rogue de hareng sur varech.

À mon avis, l'arrêt *Sparrow* ne vise pas un tel résultat. La seule circonstance prévue par notre Cour était celle où le droit ancestral était intrinsèquement limité. Ce jugement ne traite tout simplement pas de la manière dont la norme d'établissement de l'ordre de priorité doit être appliquée dans les cas où le droit n'est pas assorti de limite intrinsèque. Cette conclusion ressort de l'examen de l'arrêt *Jack*, précité, sur lequel se sont appuyés le

La Forest J. in their articulation of the notion of priority. While *Jack* undoubtedly stands for the proposition for which it was cited, it is interesting to note that in that case, Dickson J. specifically distinguished at p. 313 between food and commercial fishing:

[The appellants'] position, as I understand it, is one which would give effect to an order of priorities of this nature: (i) conservation; (ii) Indian fishing; (iii) non-Indian commercial fishing; or (iv) non-Indian sports fishing; the burden of conservation measures should not fall primarily upon the Indian fishery.

I agree with the general tenor of this argument. Article 13 calls for distinct protection of the Indian fishery, in that pre-Confederation policy gave the Indians a priority in the fishery. That priority is at its strongest when we speak of Indian fishing for food purposes, but somewhat weaker when we come to local commercial purposes. [Emphasis added.]

In *Sparrow* it was obviously not necessary for Dickson C.J. and La Forest J. to address the distinction suggested by Dickson J. (as he then was) in *Jack*; that such a distinction exists suggests, however, that *Sparrow* should not be seen as the final word on the question of priority, at least where the aboriginal right in question does not have the internal limitation which the right actually at issue in *Sparrow* did.

The basic insight of *Sparrow* — that aboriginal rights holders have priority in the fishery — is a valid and important one; however, the articulation in that case of what priority means, and its suggestion that it can mean exclusivity under certain limited circumstances, must be refined to take into account the varying circumstances which arise when the aboriginal right in question has no internal limitations.

Where the aboriginal right is one that has no internal limitation then the doctrine of priority does not require that, after conservation goals have

juge en chef Dickson et le juge La Forest pour formuler la notion de priorité. Alors que l'arrêt *Jack* étaye manifestement la proposition au soutien de laquelle il a été cité, il est intéressant de signaler que, dans cette affaire, le juge Dickson a explicitement fait une distinction entre la pêche à des fins alimentaires et la pêche à des fins commerciales, à la p. 313:

[Les appelants] préconisent plutôt, me semble-t-il, l'ordre de priorité suivant: (i) la protection de la ressource; (ii) la pêche par les Indiens; (iii) la pêche commerciale par les non-Indiens; ou (iv) la pêche sportive par les non-Indiens; les Indiens ne devraient pas subir en premier lieu le fardeau des mesures de protection.

J'accepte cet argument dans ses grandes lignes. L'article 13 exige qu'une protection distincte soit accordée à la pêche par les Indiens parce que la ligne de conduite suivie avant la Confédération accordait priorité aux Indiens en ce domaine. Cette priorité se comprend pleinement lorsque les Indiens pêchent pour se nourrir mais s'explique moins bien lorsqu'il s'agit de pêche à des fins de commerce local. [Je souligne.]

Dans *Sparrow* le juge en chef Dickson et le juge La Forest n'avaient de toute évidence pas besoin de se pencher sur la distinction dont parle le juge Dickson (plus tard Juge en chef) dans *Jack*. L'existence d'une telle distinction semble cependant indiquer que *Sparrow* ne doit pas être considéré comme ayant tranché définitivement la question de la priorité, du moins dans les cas où le droit ancestral en cause n'est pas assorti de la limite intrinsèque que comportait le droit visé dans *Sparrow*.

L'idée fondamentale exprimée dans *Sparrow* — savoir que les titulaires de droits ancestraux ont priorité en matière de pêche — est valable et importante. Toutefois, la formulation dans cette affaire du sens de la notion de priorité et l'assertion selon laquelle elle peut vouloir dire exclusivité dans certaines circonstances limitées doivent être précisées pour tenir compte des diverses circonstances susceptibles de se présenter dans les cas où le droit ancestral en cause n'est pas assorti de limite intrinsèque.

Lorsque le droit ancestral en cause n'est pas assorti de limite intrinsèque, la doctrine relative à l'ordre de priorité n'exige pas que, une fois les

been met, the government allocate the fishery so that those holding an aboriginal right to exploit that fishery on a commercial basis are given an exclusive right to do so. Instead, the doctrine of priority requires that the government demonstrate that, in allocating the resource, it has taken account of the existence of aboriginal rights and allocated the resource in a manner respectful of the fact that those rights have priority over the exploitation of the fishery by other users. This right is at once both procedural and substantive; at the stage of justification the government must demonstrate both that the process by which it allocated the resource and the actual allocation of the resource which results from that process reflect the prior interest of aboriginal rights holders in the fishery.

The content of this priority — something less than exclusivity but which nonetheless gives priority to the aboriginal right — must remain somewhat vague pending consideration of the government's actions in specific cases. Just as the doctrine of minimal impairment under s. 1 of the *Canadian Charter of Rights and Freedoms* has not been read as meaning that the courts will impose a standard "least drastic means" requirement on the government in all cases, but has rather been interpreted as requiring the courts to scrutinize government action for reasonableness on a case-by-case basis (see, for example, *Irwin Toy Ltd. v. Quebec (Attorney General)*, [1989] 1 S.C.R. 927, at pp. 993-94; *Stoffman v. Vancouver General Hospital*, [1990] 3 S.C.R. 483, at pp. 526-27; *McKinney v. University of Guelph*, [1990] 3 S.C.R. 229, at pp. 285-86; *R. v. Butler*, [1992] 1 S.C.R. 452, at pp. 504-5), priority under *Sparrow's* justification test cannot be assessed against a precise standard but must rather be assessed in each case to determine whether the government has acted in a fashion which reflects that it has truly taken into account the existence of aboriginal rights. Under the minimal impairment branch of the *Oakes* test (*R. v. Oakes*, [1986] 1 S.C.R. 103), where the government is balancing the interests of competing groups, the court does not scrutinize the government's actions so as to determine whether the government took the least rights-impairing action pos-

objectifs de conservation respectés, l'État répartisse la ressource de façon à ce que ceux qui détiennent un droit ancestral d'exploiter commercialement la ressource se voient accorder le droit exclusif de le faire. Au contraire, cette doctrine commande que l'État démontre que, dans la répartition de la ressource, il a tenu compte de l'existence des droits ancestraux et réparti la ressource d'une manière qui respecte le fait que les titulaires de ces droits ont, en matière d'exploitation de la pêche, priorité sur les autres usagers. Il s'agit d'un droit à la fois substantiel et procédural. À l'étape de la justification, l'État doit démontrer que les modalités de répartition de la ressource ainsi que la répartition elle-même reflètent l'intérêt prioritaire des titulaires des droits ancestraux à l'égard de cette pêche.

Le contenu de ce droit de priorité — qui sans aller jusqu'à l'exclusivité, donne néanmoins préférence au droit ancestral — doit rester assez vague tant que les actions de l'État n'ont pas été examinées dans des cas précis. Tout comme le principe de l'atteinte minimale fondé sur l'article premier de la *Charte canadienne des droits et libertés* n'a pas été interprété comme voulant dire que les tribunaux imposeront à l'État, dans tous les cas, une norme fondée sur l'obligation d'appliquer le «moyen le moins draconien», mais plutôt comme ayant pour effet d'exiger d'eux qu'ils examinent le caractère raisonnable des actions de l'État au cas par cas: (voir, par exemple, les arrêts *Irwin Toy Ltd. c. Québec (Procureur général)*, [1989] 1 R.C.S. 927, aux pp. 993 et 994; *Stoffman c. Vancouver General Hospital*, [1990] 3 R.C.S. 483, aux pp. 526 et 527; *McKinney c. Université de Guelph*, [1990] 3 R.C.S. 229, aux pp. 285 et 286; *R. c. Butler*, [1992] 1 R.C.S. 452, aux pp. 504 et 505), l'application de la doctrine relative à l'ordre de priorité en vertu du critère de justification établi dans *Sparrow* ne peut pas être évaluée selon une norme précise, mais doit plutôt être appréciée en fonction de chaque cas, pour déterminer si l'État a agi d'une manière indiquant qu'il a véritablement tenu compte de l'existence de droits ancestraux. Dans l'application du volet de l'atteinte minimale du critère de l'arrêt (*R. c. Oakes*, [1986] 1 R.C.S. 103), dans les cas où l'État soupèse les intérêts de

sible; instead the court considers the reasonableness of the government's actions, taking into account the need to assess "conflicting scientific evidence and differing justified demands on scarce resources" (*Irwin Toy, supra*, at p. 993). Similarly, under *Sparrow's* priority doctrine, where the aboriginal right to be given priority is one without internal limitation, courts should assess the government's actions not to see whether the government has given exclusivity to that right (the least drastic means) but rather to determine whether the government has taken into account the existence and importance of such rights.

groupes opposés, le tribunal n'examine pas les actions de l'État pour déterminer s'il a pris les mesures qui portent le moins possible atteinte aux droits, il s'interroge plutôt sur le caractère raisonnable de ces actions, en tenant compte de la nécessité d'évaluer des «preuves scientifiques contradictoires et de[s] demandes légitimes mais contraires quant à la répartition de ressources limitées» (*Irwin Toy*, précité, à la p. 993). De même, en vertu de la doctrine relative à l'ordre de priorité énoncée dans *Sparrow* lorsque le droit ancestral auquel la priorité doit être donnée n'est pas assorti de limite intrinsèque, les tribunaux doivent évaluer les actions de l'État non pas pour voir si celui-ci a conféré ce droit en exclusivité (le moyen le moins draconien), mais plutôt pour déterminer si l'État a tenu compte de l'existence et de l'importance du droit en question.

1996 CanLII 100 (SCC)

64

That no blanket requirement is imposed under the priority doctrine should not suggest, however, that no guidance is possible in this area, or that the government's actions will not be subject to scrutiny. Questions relevant to the determination of whether the government has granted priority to aboriginal rights holders are those enumerated in *Sparrow* relating to consultation and compensation, as well as questions such as whether the government has accommodated the exercise of the aboriginal right to participate in the fishery (through reduced licence fees, for example), whether the government's objectives in enacting a particular regulatory scheme reflect the need to take into account the priority of aboriginal rights holders, the extent of the participation in the fishery of aboriginal rights holders relative to their percentage of the population, how the government has accommodated different aboriginal rights in a particular fishery (food *versus* commercial rights, for example), how important the fishery is to the economic and material well-being of the band in question, and the criteria taken into account by the government in, for example, allocating commercial licences amongst different users. These questions, like those in *Sparrow*, do not represent an exhaustive list of the factors that may be taken into account in determining whether the government can be said to have given priority to aboriginal

Cependant, le fait que la doctrine relative à l'ordre de priorité n'impose pas d'obligation générale ne devrait pas donner à penser qu'aucune indication ne peut être formulée à cet égard ou que les actions de l'État ne feront pas l'objet d'un examen. Les questions pertinentes pour déterminer si l'État a donné la priorité aux titulaires de droits ancestraux sont celles qui ont été énumérées dans *Sparrow* relativement aux consultations et à l'indemnisation, ainsi que d'autres questions telles que celle de savoir si l'État a facilité l'exercice du droit ancestral de participer à la pêche (en réduisant les droits payables pour les permis, par exemple), si les objectifs que poursuit l'État en établissant un régime de réglementation donné reflètent la nécessité de tenir compte du droit de priorité des titulaires de droits ancestraux, la mesure dans laquelle la participation à la pêche par les titulaires de droits ancestraux correspond au pourcentage que représente leur population par rapport à la population totale, la manière dont l'État a concilié les différents droits ancestraux visant une pêche donnée (par exemple le droit de pêcher à des fins alimentaires par opposition à celui de pêcher à des fins commerciales), l'importance de la pêche pour le bien-être économique et matériel de la bande en question, ainsi que les critères appliqués par l'État, par exemple, dans la répartition des permis de pêche commerciale entre les divers usagers. Ces

rights holders; they give some indication, however, of what such an inquiry should look like.

Before turning to the second relevant difference between this case and *Sparrow*, I would note one or two points in favour of the interpretation of priority just adopted. As was emphasized in this Court's decision in *Van der Peet*, aboriginal rights are highly fact specific — the existence of an aboriginal right is determined through consideration of the particular distinctive culture, and hence of the specific practices, customs and traditions, of the aboriginal group claiming the right. The rights recognized and affirmed by s. 35(1) are not rights held uniformly by all aboriginal peoples in Canada; the nature and existence of aboriginal rights vary in accordance with the variety of aboriginal cultures and traditions which exist in this country. As a result, governments must not only make decisions about how to allocate fish between aboriginal rights holders and those who do not enjoy such rights, but must also make decisions as to how to allocate fish both between different groups of aboriginal rights holders and between different aboriginal rights. The government must, for example, make decisions as to how to allocate fish between those aboriginal peoples with the aboriginal right to fish for food, social and ceremonial purposes, and those aboriginal peoples who have aboriginal rights to sell fish commercially; it must also decide, where more than one aboriginal group has a right to sell fish commercially, how much fish each group will have access to.

The existence of such difficult questions of resource allocation supports the position that, where a right has no adequate internal limitations, the notion of exclusivity of priority must be rejected. Certainly the holders of such aboriginal rights must be given priority, along with all others

questions, tout comme celles posées dans *Sparrow* ne constituent pas une liste exhaustive des facteurs qui doivent être pris en considération pour déterminer s'il est possible d'affirmer que l'État a accordé la priorité aux titulaires de droits ancestraux. Toutefois, ils donnent une certaine idée de ce à quoi l'examen devrait ressembler.

Avant d'examiner la seconde différence pertinente entre la présente affaire et l'arrêt *Sparrow*, je tiens à mentionner un ou deux points qui appuient l'interprétation qui vient d'être adoptée en ce qui concerne le droit de priorité. Comme notre Cour l'a souligné dans *Van der Peet*, l'existence de droits ancestraux dépend largement des faits propres à chaque cas — pour statuer sur l'existence d'un tel droit, il faut examiner la culture distinctive particulière du groupe autochtone particulier qui revendique le droit, donc ses coutumes, pratiques et traditions spécifiques. Les droits reconnus et confirmés par le par. 35(1) ne sont pas des droits qui sont détenus uniformément par tous les peuples autochtones au Canada. En effet, l'existence des droits ancestraux et leur nature sont fonction des diverses cultures et traditions autochtones qui existent au pays. En conséquence, l'État est non seulement appelé à répartir les ressources halieutiques entre les titulaires de droits ancestraux et ceux qui ne possèdent pas de tels droits, mais également à répartir la ressource entre différents groupes de titulaires de droits ancestraux, ainsi qu'entre divers types de droits ancestraux. Par exemple, l'État doit répartir de telles ressources entre des peuples autochtones qui ont le droit ancestral de pêcher à des fins alimentaires, sociales et rituelles, et d'autres peuples autochtones qui ont le droit ancestral de vendre du poisson commercialement. Il doit aussi fixer, lorsque plus d'un groupe autochtone a le droit de vendre du poisson commercialement, la quantité de poisson qui sera attribuée à chaque groupe.

L'existence de ces difficiles questions de répartition de la ressource étaye la position voulant que, dans les cas où un droit n'est pas assorti de limites intrinsèques adéquates, la notion de priorité exclusive doit être écartée. Certes, il faut donner aux titulaires de tels droits ancestraux, ainsi qu'à tous

holding aboriginal rights to the use of a particular resource; however, the potential existence of other aboriginal rights holders with an equal claim to priority in the exploitation of the resource, suggests that there must be some external limitation placed on the exercise of those aboriginal rights which lack internal limitation. Unless the possibility of such a limitation is recognized, it is difficult to see how the government will be able to make decisions of resource allocation amongst the various parties holding prioritized rights to participate in the fishery. And while this does not lead automatically to the conclusion that, as between aboriginal rights holders and those who do not hold such rights, the notion of exclusivity must be rejected, it does point to some of the difficulties inherent in the recognition of such a concept in the context of this and similar cases.

67

It should also be noted that the aboriginal rights recognized and affirmed by s. 35(1) exist within a legal context in which, since the time of the Magna Carta, there has been a common law right to fish in tidal waters that can only be abrogated by the enactment of competent legislation:

... the subjects of the Crown are entitled as of right not only to navigate but to fish in the high seas and tidal waters alike.

[I]t has been unquestioned law that since Magna Charta [*sic*] no new exclusive fishery could be created by Royal grant in tidal waters, and that no public right of fishing in such waters, then existing, can be taken away without competent legislation.

[*Attorney-General of British Columbia v. Attorney General of Canada*, [1914] A.C. 153 (J.C.P.C.), at pp. 169-70, *per* Viscount Haldane.]

While the elevation of common law aboriginal rights to constitutional status obviously has an impact on the public's common law rights to fish in tidal waters, it was surely not intended that, by the enactment of s. 35(1), those common law rights

les autres titulaires de droits ancestraux, la priorité quant à l'utilisation d'une ressource particulière. Toutefois, la possibilité qu'il y ait d'autres titulaires de droits ancestraux ayant un droit de priorité égal en vue de l'exploitation de la ressource tend à indiquer que l'exercice des droits ancestraux dépourvus de limites intrinsèques doit être assujéti à certaines limites extrinsèques. À moins de reconnaître la possibilité de telles limites, il est en effet difficile de voir comment l'État sera en mesure de répartir la ressource entre les diverses parties possédant des droits de pêche prioritaires. De plus, bien que ce fait ne m'amène pas automatiquement à conclure que, entre les titulaires de droits ancestraux et ceux qui ne possèdent pas de tels droits, la notion d'exclusivité doit être écartée, il fait cependant ressortir certaines des difficultés inhérentes à la reconnaissance d'un tel concept dans le contexte du présent pourvoi et d'autres espèces analogues.

En outre, il convient de signaler que les droits ancestraux reconnus et confirmés par le par. 35(1) existent dans un contexte juridique où, depuis l'époque de la Grande Charte, on reconnaît en common law un droit de pêcher dans les eaux à marée qui ne peut être aboli que par l'édiction de textes législatifs constitutionnels:

[TRADUCTION] ... les sujets de Sa Majesté ont le droit non seulement de naviguer mais encore de pêcher en haute mer et dans les eaux à marée.

[I]l est établi sans conteste en droit depuis la Grande Charte qu'aucune nouvelle pêcherie exclusive ne peut être créée par concession royale dans les eaux à marée et qu'aucun droit du public de pêcher dans de telles eaux, existant alors, ne peut être retiré sans texte législatif constitutionnel.

[*Arrêt Attorney-General of British Columbia c. Attorney-General of Canada*, [1914] A.C. 153 (J.C.P.C.), aux pp. 169 et 170 (le vicomte Haldane).]

Même si le fait d'élever des droits ancestraux fondés sur la common law au rang de garanties constitutionnelles a manifestement une incidence sur les droits qu'a le public, en vertu de la common law, de pêcher dans les eaux à marée, on n'enten-

would be extinguished in cases where an aboriginal right to harvest fish commercially existed. As was contemplated by *Sparrow*, in the occasional years where conservation concerns drastically limit the availability of fish, satisfying aboriginal rights to fish for food, social and ceremonial purposes may involve, in that year, abrogating the common law right of public access to the fishery; however, it was not contemplated by *Sparrow* that the recognition and affirmation of aboriginal rights should result in the common law right of public access in the fishery ceasing to exist with respect to all those fisheries in respect of which exist an aboriginal right to sell fish commercially. As a common law, not constitutional, right, the right of public access to the fishery must clearly be second in priority to aboriginal rights; however, the recognition of aboriginal rights should not be interpreted as extinguishing the right of public access to the fishery.

That this should not be the case becomes particularly clear when it is remembered that, as was noted above, the existence of aboriginal rights varies amongst different aboriginal peoples, with the result that the notion of priority applies not only between aboriginals and other Canadians, but also between those aboriginal peoples who have an aboriginal right to use the fishery and those who do not. For aboriginal peoples like the Sheshaht, Opetchesaht and the Sto:lo, the fact that they were unable to demonstrate that their aboriginal rights include the right to sell fish on a commercial basis should not mean, if another aboriginal group is able to establish such a right, that the rights they hold in common with other Canadians — to participate in the commercial fishery — are eliminated. This could not have been intended by the enactment of s. 35(1).

I now turn to the second significant difference between this case and *Sparrow*. In *Sparrow*, while

dait sûrement pas, par l'édiction du par. 35(1), que ces droits reconnus au public par la common law soient éteints dans les cas où il existe un droit ancestral de pêcher commercialement. Comme il a été envisagé dans *Sparrow* au cours des années où, pour des besoins de conservation, il faut limiter de façon draconienne les prises de poisson, il est possible que pour respecter les droits ancestraux de pêche à des fins alimentaires sociales et rituelles il faille, au cours des années en question, suspendre le droit d'accès à cette pêche qui est reconnu au public par la common law. Toutefois, il n'a pas été envisagé dans cet arrêt que la reconnaissance et la confirmation de droits ancestraux auraient pour effet de mettre fin à ce droit d'accès du public, dans tous les cas où il existe, à l'égard d'une pêcherie, un droit ancestral de vendre le poisson commercialement. En tant que droit reconnu par la common law mais non par la Constitution, le droit d'accès du public à une pêcherie doit clairement céder la priorité aux droits ancestraux. Cependant, la reconnaissance de droits ancestraux ne doit pas être interprétée comme ayant pour effet d'éteindre le droit d'accès du public.

La conclusion qu'il ne doit pas en être ainsi ressort de façon particulièrement claire de l'observation, faite précédemment, que l'existence de droits ancestraux varie en fonction des peuples autochtones concernés, de sorte que la notion de priorité s'applique non seulement entre les autochtones et les autres Canadiens, mais également entre les peuples autochtones qui ont le droit ancestral d'exploiter la pêche visée et ceux qui ne l'ont pas. Dans le cas de peuples autochtones comme les Sheshaht, les Opetchesaht et les Sto:lo, le fait qu'ils n'aient pas été en mesure de démontrer que leurs droits ancestraux incluent le droit de vendre du poisson à des fins commerciales ne signifie pas, à supposer qu'un autre groupe autochtone parviendrait à établir l'existence d'un tel droit, que le droit qu'ils possèdent avec tous les autres Canadiens — savoir celui de participer à la pêche commerciale — est éliminé. Il n'est pas possible qu'on ait voulu ce résultat en édictant le par. 35(1).

J'aborde maintenant la seconde différence importante entre la présente affaire et l'arrêt *Spar-*

the Court recognized at p. 1113 that, beyond conservation, there could be other “compelling and substantial” objectives pursuant to which the government could act in accordance with the first branch of the justification test, the Court was not required to delineate what those objectives might be. Further, in delineating the priority requirement, and the relationship between aboriginal rights-holders and other users of the fishery, the only objective considered by the Court was conservation. This limited focus made sense in *Sparrow* because the net-length restriction at issue in that case was argued by the Crown to have been necessary as a conservation measure (whether it was necessary as such was not actually decided in that case); in this case, however, while some aspects of the government’s regulatory scheme arguably relate to conservation — setting the total allowable catch at 20 per cent of the estimated herring stock, requiring the herring roe fishery to bear the brunt of variations in the herring stock because it is more environmentally destructive — other aspects of the government’s regulatory scheme bear little or no relation to issues of conservation. Once the overall level of the herring catch has been established, and allocated to the different herring fisheries, it makes no difference in terms of conservation who is allowed to catch the fish. Conservation of the fishery is simply not affected once, after the herring spawn on kelp fishery is set at 2,275 tons, 224 tons or 2,275 tons is allocated to the commercial fishery or to some other use. This is not to suggest that these decisions are unimportant or made pursuant to unimportant objectives, but simply that, whatever objectives the government is pursuing in making such decisions, conservation is not (or is only marginally) one of them. As such, it is necessary in this case to consider what, if any, objectives the government may pursue, other than con-

row. Dans cet arrêt, bien que notre Cour ait reconnu, à la p. 1113, que, pour les fins du premier volet du critère de la justification, il peut exister, outre la conservation, d’autres objectifs «impérieux et réels» en vertu desquels l’État pourrait agir, elle n’a toutefois pas eu à préciser quels pourraient être ces objectifs. De plus, pour définir les exigences applicables pour établir l’ordre de priorité ainsi que les rapports entre les titulaires de droits ancestraux et les autres usagers de la pêche, la conservation est le seul objectif que notre Cour a pris en considération. Cet examen restreint était logique dans *Sparrow*, car le ministère public avait soutenu que la limitation de la longueur des filets en cause dans cette affaire était une mesure de conservation nécessaire (de fait, la question de la nécessité de cette mesure n’a pas été tranchée dans cet arrêt). Toutefois, dans la présente affaire, même s’il est possible d’affirmer que certains aspects du régime gouvernemental de réglementation visent la conservation — par exemple le fait de fixer à 20 pour 100 des stocks estimatifs de hareng le total des prises admissibles ou celui d’exiger que les pêcheurs de hareng prêt à frayer fassent les frais des fluctuations des stocks de hareng, étant donné que cette pêche est moins écologique — d’autres aspects de ce régime ne concernent que peu ou pas des questions de conservation. Une fois que le niveau global des prises de hareng a été fixé et que celles-ci ont été réparties entre les divers secteurs de la pêche de ce poisson, le fait que ce soit un groupe ou un autre qui soit autorisé à prendre le poisson ne change rien du point de vue de la conservation. Une fois la récolte de la rogue de hareng sur varech fixée à 2 275 tonnes, le fait d’attribuer 224 tonnes ou encore 2 275 tonnes au secteur commercial ou à quelque autre groupe d’usagers n’influe tout simplement pas sur la conservation de cette ressource. Cela ne veut pas dire que ces décisions ne sont pas importantes ou qu’elles sont prises dans la poursuite d’objectifs sans importance, mais tout simplement que quels que soient les objectifs visés par ces décisions la conservation ne figure pas parmi ces objectifs (ou, dans l’affirmative, seulement de façon marginale). Il est donc nécessaire, dans le présent pourvoi, de se demander quels sont, s’il en est, les objectifs que l’État peut poursuivre, outre la conservation, et qui per-

servation, which will be sufficient to satisfy the first branch of the *Sparrow* justification standard.

Considering this question is made more difficult in this case because, as will be discussed below, almost no evidence has been provided to this Court about the objectives the government was pursuing in allocating the herring resource as it did. Absent some concrete objectives to assess, it is difficult to identify the objectives other than conservation that will meet the “compelling and substantial” standard laid out in *Sparrow*. That being said, however, it is possible to make some general observations about the nature of the objectives that the government can pursue under the first branch of the *Sparrow* justification test.

In *Oakes*, *supra*, Dickson C.J. observed at p. 136 that it is not only the case that the rights and freedoms protected by the *Charter* must be understood through the purposes underlying the protection of those rights, but that the limitations on rights allowed under s. 1 of the *Charter* must, similarly, be understood through the purposes underlying the *Charter*:

A second contextual element of interpretation of s. 1 is provided by the words “free and democratic society”. Inclusion of these words as the final standard of justification for limits on rights and freedoms refers the Court to the very purpose for which the *Charter* was originally entrenched in the Constitution. . . . The underlying values and principles of a free and democratic society are the genesis of the rights and freedoms guaranteed by the *Charter* and the ultimate standard against which a limit on a right or freedom must be shown, despite its effect, to be reasonable and demonstrably justified.

Although the aboriginal rights recognized by s. 35(1) are, as was noted in *Van der Peet*, fundamentally different from the rights in the *Charter*, the same basic principle — that the purposes underlying the rights must inform not only the definition of the rights but also the identification of those

mettront de satisfaire au premier volet de la norme de justification énoncée dans *Sparrow*.

Dans le présent cas, l'examen de cette question se complique, comme nous le verrons plus loin, du fait qu'il n'a été présenté à notre Cour pratiquement aucun élément de preuve concernant les objectifs que poursuivait l'État en répartissant la ressource comme il l'a fait. En l'absence d'objectifs concrets à examiner, il est difficile de déterminer les objectifs autres que la conservation qui sont des objectifs «impérieux et réels» au sens de la norme formulée dans *Sparrow*. Cela dit, cependant, il est possible de faire quelques observations générales sur la nature des objectifs que l'État peut poursuivre tout en satisfaisant au premier volet du critère de justification établi dans *Sparrow*.

Dans *Oakes*, précité, le juge en chef Dickson a fait remarquer, à la p. 136, que, s'il est vrai que les droits et libertés protégés par la *Charte* doivent être interprétés en fonction des objets qui sous-tendent la protection de ces droits, les limites apportées aux droits en conformité avec l'article premier de la *Charte* doivent, de la même façon, être interprétées en fonction des objets qui sous-tendent la *Charte*:

Un second élément contextuel d'interprétation de l'article premier est fourni par l'expression «société libre et démocratique». L'inclusion de ces mots à titre de norme finale de justification de la restriction des droits et libertés rappelle aux tribunaux l'objet même de l'enchâssement de la *Charte* dans la Constitution [. . .] Les valeurs et les principes sous-jacents d'une société libre et démocratique sont à l'origine des droits et libertés garantis par la *Charte* et constituent la norme fondamentale en fonction de laquelle on doit établir qu'une restriction d'un droit ou d'une liberté constitue, malgré son effet, une limite raisonnable dont la justification peut se démontrer.

Même si, comme il a été dit dans *Van der Peet*, les droits ancestraux reconnus par le par. 35(1) sont fondamentalement différents des droits garantis par la *Charte*, le même principe de base s'applique à l'analyse de la justification en vertu du par. 35(1) — savoir que les objets qui sous-tendent les droits en question doivent non seulement servir à la définition de ces droits, mais également à la détermi-

limits on the rights which are justifiable — applies equally to the justification analysis under s. 35(1).

nation des limites apportées à ceux-ci et qui sont justifiables.

72

In *Van der Peet* the purposes underlying s. 35(1)'s recognition and affirmation of aboriginal rights were identified, at para. 43, as

Dans *Van der Peet*, les objets qui sous-tendent la reconnaissance et la confirmation des droits ancestraux par le par. 35(1) ont été interprétés, au par. 43, comme étant

first, the means by which the Constitution recognizes the fact that prior to the arrival of Europeans in North America the land was already occupied by distinctive aboriginal societies, and as, second, the means by which that prior occupation is reconciled with the assertion of Crown sovereignty over Canadian territory.

premièrement, le moyen par lequel la Constitution reconnaît le fait qu'avant l'arrivée des Européens en Amérique du Nord le territoire était déjà occupé par des sociétés autochtones distinctives, et, deuxièmement, le moyen de concilier cette occupation antérieure avec l'affirmation par Sa Majesté de sa souveraineté sur le territoire canadien.

In the context of the objectives which can be said to be compelling and substantial under the first branch of the *Sparrow* justification test, the import of these purposes is that the objectives which can be said to be compelling and substantial will be those directed at either the recognition of the prior occupation of North America by aboriginal peoples or — and at the level of justification it is this purpose which may well be most relevant — at the reconciliation of aboriginal prior occupation with the assertion of the sovereignty of the Crown.

Dans le cadre de l'application du premier volet du critère de justification établi dans *Sparrow*, sont considérés comme des objectifs impérieux et réels les objectifs visant soit la reconnaissance de l'occupation antérieure de l'Amérique du Nord par les peuples autochtones soit — et, à l'étape de la justification, ce genre d'objectifs pourrait bien être le plus pertinent — la conciliation de cette occupation avec l'affirmation par Sa Majesté de sa souveraineté sur ce territoire.

73

Aboriginal rights are recognized and affirmed by s. 35(1) in order to reconcile the existence of distinctive aboriginal societies prior to the arrival of Europeans in North America with the assertion of Crown sovereignty over that territory; they are the means by which the critical and integral aspects of those societies are maintained. Because, however, distinctive aboriginal societies exist within, and are a part of, a broader social, political and economic community, over which the Crown is sovereign, there are circumstances in which, in order to pursue objectives of compelling and substantial importance to that community as a whole (taking into account the fact that aboriginal societies are a part of that community), some limitation of those rights will be justifiable. Aboriginal rights are a necessary part of the reconciliation of aboriginal societies with the broader political community of which they are part; limits placed on those rights are, where the objectives furthered by those limits are of sufficient importance to the broader

Les droits ancestraux sont reconnus et confirmés par le par. 35(1) afin de concilier l'existence, en Amérique du Nord, de sociétés autochtones distinctives avant l'arrivée des Européens avec l'affirmation par Sa Majesté de sa souveraineté sur ce territoire. Ils constituent le moyen de préserver les éléments fondamentaux qui font partie intégrante de ces sociétés. Cependant, comme les sociétés autochtones distinctives existent au sein d'une communauté sociale, politique et économique plus large, communauté dont elles font partie et sur laquelle s'exerce la souveraineté de Sa Majesté, il existe des circonstances où, dans la poursuite d'objectifs importants ayant un caractère impérieux et réel pour l'ensemble de la communauté (compte tenu du fait que les sociétés autochtones font partie de celle-ci), certaines restrictions de ces droits sont justifiables. Les droits ancestraux sont un élément nécessaire de la conciliation de l'existence des sociétés autochtones avec la communauté politique plus large à laquelle ces dernières appartiennent.

community as a whole, equally a necessary part of that reconciliation.

The recognition of conservation as a compelling and substantial goal demonstrates this point. Given the integral role the fishery has played in the distinctive cultures of many aboriginal peoples, conservation can be said to be something the pursuit of which can be linked to the recognition of the existence of such distinctive cultures. Moreover, because conservation is of such overwhelming importance to Canadian society as a whole, including aboriginal members of that society, it is a goal the pursuit of which is consistent with the reconciliation of aboriginal societies with the larger Canadian society of which they are a part. In this way, conservation can be said to be a compelling and substantial objective which, provided the rest of the *Sparrow* justification standard is met, will justify governmental infringement of aboriginal rights.

Although by no means making a definitive statement on this issue, I would suggest that with regards to the distribution of the fisheries resource after conservation goals have been met, objectives such as the pursuit of economic and regional fairness, and the recognition of the historical reliance upon, and participation in, the fishery by non-aboriginal groups, are the type of objectives which can (at least in the right circumstances) satisfy this standard. In the right circumstances, such objectives are in the interest of all Canadians and, more importantly, the reconciliation of aboriginal societies with the rest of Canadian society may well depend on their successful attainment.

I now turn to the application of the *Sparrow* justification test to the government regulatory scheme challenged in this case. As has already been noted, the government's regulatory scheme has four con-

Les limites imposées à ces droits sont également un élément nécessaire de cette conciliation, si les objectifs qu'elles visent sont suffisamment importants pour la communauté dans son ensemble.

La reconnaissance de la conservation en tant qu'objectif impérieux et réel démontre cette affirmation. Vu le rôle fondamental qu'a joué la pêche dans la culture distinctive de nombreux peuples autochtones, il est possible d'affirmer que la conservation est un objectif dont la poursuite peut être liée à la reconnaissance de l'existence de telles cultures distinctives. De plus, comme la conservation revêt une importance primordiale pour la société canadienne dans son ensemble, y compris pour les membres autochtones de cette société, elle est un objectif dont la poursuite est compatible avec la conciliation de l'existence des sociétés autochtones avec la société canadienne plus large dont ces dernières font partie. Dans cette optique, il est possible d'affirmer que la conservation est un objectif impérieux et réel qui justifie la violation par l'État de droits ancestraux, à la condition qu'il soit satisfait aux autres éléments de la norme de justification établie dans *Sparrow*.

Bien que je n'entende aucunement me prononcer de façon définitive sur cette question, je dirais qu'en ce qui concerne la répartition de ressources halieutiques données, une fois que les objectifs de conservation ont été respectés, des objectifs tels que la poursuite de l'équité sur les plans économique et régional ainsi que la reconnaissance du fait que, historiquement, des groupes non autochtones comptent sur ces ressources et participent à leur exploitation, sont le genre d'objectifs susceptibles (du moins dans les circonstances appropriées) de satisfaire à cette norme. Dans les circonstances appropriées de tels objectifs sont dans l'intérêt de tous les Canadiens et, facteur plus important encore, la conciliation de l'existence des sociétés autochtones avec le reste de la société canadienne pourrait bien dépendre de leur réalisation.

Je vais maintenant appliquer le critère de justification établi dans *Sparrow* au régime gouvernemental de réglementation contesté dans le présent pourvoi. Comme il a été dit plus tôt, ce régime de

stituent parts, which, for ease of reference, I will reiterate here: (1) the government determines the amount of the herring stock that will be harvested in a given year; (2) the government allots the herring stock to the different herring fisheries (herring roe, herring spawn on kelp and other herring fisheries); (3) the government allots the herring spawn on kelp fishery to various user groups (commercial users and the Indian food fishery); and, (4) the government allots the commercial herring spawn on kelp licences.

réglementation comprend quatre éléments constitutifs, que je vais répéter par souci de commodité: (1) l'État détermine la proportion des stocks de hareng qui sera récoltée au cours d'une année donnée; (2) il répartit les stocks de hareng entre les divers secteurs de la pêche de ce poisson (hareng prêt à frayer, roque de hareng sur varech et autres types de pêche); (3) il répartit la part attribuée à la récolte de la roque de hareng sur varech entre les divers groupes d'usagers (usagers commerciaux et Indiens pratiquant la pêche de subsistance); (4) il répartit les permis de pêche commerciale de la roque de hareng sur varech.

Other than with regards to the first aspect of the government's regulatory scheme, the evidence and testimony presented in this case is insufficient for this Court to make a determination as to whether the government's regulatory scheme is justified. The trial in this case concluded on May 7, 1990, several weeks prior to the release of this Court's judgment in *Sparrow*. Perhaps as a result of this fact, the testimony, evidence and argument presented at the trial simply do not contain the information that is necessary for this Court to assess whether, in allocating the 40,000 tons of herring allotted to the herring fishery, the government has either acted pursuant to a compelling and substantial objective or has acted in a manner consistent with the fiduciary obligation it owes to aboriginal peoples. It is not that the Crown has failed to discharge its burden of demonstrating that the scheme for allocating the 20 per cent of the herring stock was justified; it is simply that the question of whether or not that scheme of allocation was justified was not addressed at trial, at least in the sense necessary for this Court to decide the question of whether, under the *Sparrow* test, it was justified.

Sauf en ce qui concerne le premier aspect du régime gouvernemental de réglementation, la preuve documentaire et testimoniale produite dans la présente affaire est insuffisante pour permettre à notre Cour de déterminer si ce régime est justifié. En l'espèce, le procès dans la présente affaire s'est terminé le 7 mai 1990, plusieurs semaines avant que soit rendu l'arrêt *Sparrow* par notre Cour. Peut-être est-ce à cause de ce fait que la preuve documentaire et testimoniale ainsi que les arguments présentés au procès ne renferment tout simplement pas les renseignements nécessaires pour permettre à notre Cour d'apprécier si, en répartissant le contingent de 40 000 tonnes fixé pour la pêche au hareng, l'État a agi en vue de réaliser un objectif impérieux et réel ou s'il a agi d'une manière compatible avec son obligation de fiduciaire envers les peuples autochtones. Ce n'est pas que le ministère public ne s'est pas acquitté du fardeau de démontrer que les modalités de répartition du contingent des prises admissibles fixé à 20 pour 100 des stocks de hareng étaient justifiées, mais simplement que cette question n'a pas été examinée au procès, du moins pas d'une manière suffisante pour permettre à notre Cour de trancher la question de savoir si, suivant le critère établi dans *Sparrow*, ces modalités étaient justifiées.

The lack of evidence is problematic with regards to both aspects of the *Sparrow* analysis. First, in so far as an evaluation of the government's objective is concerned, no witnesses testified, and no documents were submitted as evidence, with regards to the objectives pursued by the government in allo-

Le manque d'éléments de preuve pose des problèmes en ce qui a trait aux deux aspects de l'analyse exigée par l'arrêt *Sparrow*. Premièrement, pour ce qui est de l'évaluation de l'objectif visé par l'État, aucun témoin n'est venu déposer et aucun document n'a été présenté en preuve relati-

cating the herring, and the herring spawn on kelp, amongst different user groups. As was noted above, there was evidence presented about the selection criteria used by the Department of Fisheries and Oceans in allocating herring spawn on kelp licences in 1975; however, no evidence was presented as to how or why those selection criteria were chosen or applied. Also, the evidence does not indicate whether those selection criteria changed over time (not all licences were allocated in 1975) or whether the emphasis placed on the different criteria varied. Clear evidence was presented at trial demonstrating that setting the total herring catch at 20 per cent was directed at conservation, but no evidence was presented regarding the objectives sought to be attained in allocating that 20 per cent amongst different user groups.

Second, with regards to priority, there is no evidence as to how much (if any) aboriginal participation there is in the herring roe fishery or as to whether there are any existing aboriginal rights to participate in the herring roe fishery, whether for food or commercial purposes. Whether the allocation of herring between the herring roe and herring spawn on kelp fishery meets the *Sparrow* test for priority will depend in part on the existence (or non-existence) of such rights. There is, similarly, no evidence as to whether other aboriginal rights in the herring spawn on kelp fishery exist — whether for food or commercial purposes — and as to the number of such rights holders there might be.

Other evidentiary problems exist with regards to the priority analysis. There is no evidence as to how, between the different aboriginal bands holding Category J licences, allocation decisions are made. There is no evidence as to how, or to whom, the remaining 2,051 tons of herring spawn on kelp

vement aux objectifs poursuivis par l'État dans la répartition du hareng et de la roque de hareng sur varech entre les divers groupes d'utilisateurs. Comme il a été indiqué précédemment, des éléments de preuve ont été présentés quant aux critères de sélection appliqués par le ministère des Pêches et Océans dans la délivrance des permis de récolte de la roque de hareng sur varech en 1975. Toutefois, aucun élément de preuve n'a été produit afin d'expliquer comment ou pourquoi ces critères de sélection étaient choisis ou appliqués. En outre, la preuve n'indique pas si ces critères de sélection ont changé au fil des ans (les permis n'ont pas tous été délivrés en 1975) ou si l'importance accordée aux divers critères a varié. Au procès, il a été présenté des éléments de preuve démontrant clairement que la décision de fixer le total des prises admissibles à 20 pour 100 des stocks avait pour objet la conservation de la ressource, mais aucune preuve n'a été présentée quant aux objectifs visés dans le cadre de la répartition de ces 20 pour 100 entre les divers groupes d'utilisateurs.

Deuxièmement, pour ce qui est de l'ordre de priorité, il n'y a aucun élément de preuve concernant l'ampleur (le cas échéant) de la participation des autochtones à la pêche au hareng prêt à frayer, ni sur la question de savoir s'il y a des droits ancestraux existants de participer à cette pêche, que ce soit à des fins alimentaires ou commerciales. La réponse à la question de savoir si la répartition de la ressource entre la pêche au hareng prêt à frayer et la récolte de la roque de hareng sur varech satisfait au critère établi dans *Sparrow* relativement à l'ordre de priorité dépendra en partie de l'existence (ou de l'inexistence) de tels droits. De même, aucune preuve n'a été produite quant à savoir s'il existe d'autres droits ancestraux visant la récolte de la roque de hareng sur varech — que ce soit à des fins alimentaires ou commerciales — et quant au nombre de titulaires de tels droits.

Il existe d'autres problèmes de preuve en ce qui concerne l'analyse de la question de l'ordre de priorité. Aucun élément de preuve n'a été produit sur la manière dont sont prises les décisions concernant la répartition de la ressource entre les diverses bandes autochtones titulaires de permis de

is allocated after the 224 tons of herring spawn on kelp is allocated to Category J licences. There is also no evidence as to how many aboriginal groups live in the region of the herring spawn on kelp fishery, what percentage aboriginal peoples are of the population in that region, and the size of the Heiltsuk Band relative to other aboriginal groups and the general population in the region.

catégorie J. Aucune preuve n'indique à qui et suivant quels critères sont attribuées les 2 051 tonnes de roque de hareng sur varech qui restent après que les 224 tonnes réservées aux titulaires de permis de catégorie J ont été réparties entre ces derniers. Il n'y a pas non plus de preuve concernant le nombre de groupes d'autochtones qui vivent dans la région où est récoltée cette ressource, le pourcentage que représentent les autochtones par rapport à l'ensemble de la population de cette région et la taille de la bande des Heiltsuk par rapport aux autres groupes autochtones et à la population générale de la région.

81 In the courts below, the judges considering the justification issue avoided the difficulties created by the inadequacy of the evidentiary record in two ways: they either held that the nature of the appellants' actions rendered the government's actions justifiable (the approach of the trial judge) or they held that the allocation of 60 per cent of Category J licences to aboriginal groups demonstrated that the government's regulatory scheme was justifiable. The problem with the first of these approaches is that the nature of the appellants' actions is not relevant to the inquiry into the constitutionality of the regulation under which they were charged. The problem with the second approach is that the fact that 60 per cent of the Category J licences were held by aboriginal people does not demonstrate, in itself, that the licences were allocated in a manner which took into account the existence of aboriginal rights. It is, perhaps, consistent with that having taken place, but absent some further evidence as to how or why this result was reached, about the percentage of aboriginal people in relation to the population of the British Columbia coast as a whole, and about the other allocation issues in the herring roe and herring spawn on kelp fisheries, the fact that 60 per cent of the Category J licences are held by aboriginal peoples does not, on its own, serve to justify the government's actions.

Les juges des cours inférieures qui ont étudié la question de la justification ont évité de deux façons les difficultés créées par l'insuffisance de la preuve: soit en statuant que la nature des actions des appelants avait pour effet de rendre les actions de l'État justifiables (approche appliquée par le juge du procès), soit en concluant que l'attribution de 60 pour 100 des permis de catégorie J aux groupes autochtones démontrait que le régime de réglementation public était justifiable. Le problème que pose la première approche est que la nature des actions des appelants n'est pas pertinente pour l'examen de la constitutionnalité de la disposition réglementaire en vertu de laquelle ils ont été accusés. Le problème que pose la seconde approche est que le fait que 60 pour 100 des permis de catégorie J étaient détenus par des autochtones ne démontre pas, en soi, que les permis ont été répartis d'une manière qui tenait compte de l'existence de droits ancestraux. Peut-être ce fait est-il compatible avec une telle conclusion, mais le fait que 60 pour 100 des permis de catégorie J sont détenus par des autochtones ne saurait, en soi, justifier les actions de l'État en l'absence d'éléments de preuve supplémentaires indiquant comment ou pourquoi on est arrivé à ce résultat, donnant le pourcentage que représentent les autochtones par rapport à l'ensemble de la population de la côte de la Colombie-Britannique et concernant les autres questions de répartition que soulèvent la pêche au hareng prêt à frayer et la récolte de la roque de hareng sur varech.

Obviously a new trial will not necessarily provide complete and definitive answers to all of these questions; however, given that the parties simply did not address the justifiability of the government scheme, other than the setting of the herring catch at 20 per cent of the total herring stock, a new trial will almost certainly provide the court with better information than currently exists. Prior to *Sparrow* it was not clear what the government, or parties challenging government action, had to demonstrate in order to succeed in s. 35(1) cases; this lack of clarity undoubtedly contributed to the deficiency of the evidentiary record in this case. A new trial on the question of justification will remedy this deficiency.

A new trial is not, however, necessary with regards to the first aspect of the government's scheme; the evidentiary record clearly demonstrates that this aspect of the government's scheme was justified. Witnesses testified as to the conservation objectives of setting the stock at 20 per cent and as to the difficulties encountered by the herring fishery when the catch was set at much higher levels, as was the case in the 1960s. Moreover, the defence witness Dr. Gary Vigers testified that "fisheries management is full of uncertainty"; in the context of such uncertainty this Court must grant a certain level of deference to the government's approach to fisheries management.

Although the evidence regarding consultation is somewhat scanty, and more will hopefully be presented at a new trial on the justification issue, there is some evidence to suggest that the government was cognizant of the views of aboriginal groups with regards to the herring fishery. The correspondence between the Native Brotherhood and the Department is indicative of the existence of such consultation. Finally, the setting of the herring catch at 20 per cent of the fishable herring

Il va de soi qu'un nouveau procès n'apportera pas nécessairement des réponses complètes et définitives à toutes ces questions. Cependant, comme les parties n'ont tout simplement pas abordé la question du caractère justifiable du régime gouvernemental de réglementation, sauf pour la fixation des prises admissibles à 20 pour 100 de l'ensemble des stocks de hareng, un nouveau procès fournira certainement au tribunal des renseignements plus complets que ceux disponibles actuellement. Avant l'arrêt *Sparrow*, ce que l'État ou les parties qui contestaient les mesures prises par ce dernier devaient prouver pour avoir gain de cause dans les affaires fondées sur le par. 35(1) n'était pas clair. Cette incertitude a sans aucun doute contribué aux lacunes dont souffre la preuve au dossier dans la présente affaire. La tenue d'un nouveau procès sur la question de la justification permettra d'y remédier.

Un nouveau procès n'est toutefois pas nécessaire à l'égard du premier aspect du régime gouvernemental de réglementation. La preuve au dossier démontre clairement que cet aspect du régime était justifié. Des témoins ont déposé à l'égard des objectifs de conservation visés par la décision de fixer les prises admissibles à 20 pour 100 des stocks, et des difficultés éprouvées par la pêche au hareng lorsque ces prises étaient établies à des niveaux beaucoup plus élevés, comme c'était le cas dans les années 1960. De plus, Gary Vigers, témoin expert de la défense, a déclaré que «la gestion de la pêche est remplie d'incertitudes». Compte tenu de ces incertitudes, notre Cour doit, dans une certaine mesure, s'en remettre à l'approche appliquée par l'État dans la gestion des pêches.

Même si la preuve touchant les consultations est un peu sommaire et qu'il est à souhaiter qu'elle sera étoffée à l'occasion d'un nouveau procès sur la question de la justification, il existe néanmoins certains éléments qui tendent à indiquer que l'État connaissait les vues des groupes autochtones sur la pêche au hareng. La correspondance échangée par la Native Brotherhood et le ministère témoigne de l'existence de ces consultations. Enfin, comme elle vise des objets de conservation et qu'elle ne porte

stock, because aimed at conservation, and not affecting the priority of aboriginal versus non-aboriginal users of the fishery, is consistent with the priority scheme as laid out in *Sparrow* and as elaborated in this judgment.

V. Disposition

In the result, the appeal is allowed and a new trial directed on the issue of guilt or innocence and, with regards to the constitutionality of s. 20(3), on the issue of the justifiability of the government's allocation of herring.

For the reasons given above, the constitutional question must be answered as follows:

Question: Is s. 20(3) of the *Pacific Herring Fishery Regulations*, SOR/84-324, as it read on April 28, 1988, of no force or effect with respect to the appellants in the circumstances of these proceedings, in virtue of s. 52 of the *Constitution Act, 1982*, by reason of the aboriginal rights within the meaning of s. 35 of the *Constitution Act, 1982*, invoked by the appellants?

Answer: This question will have to be sent back to trial to be answered in accordance with the analysis set out in these reasons.

The following are the reasons delivered by

LA FOREST J. (dissenting) — This appeal raises the issue of whether s. 20(3) of the *Pacific Herring Fishery Regulations*, SOR/84-324 is, in the circumstances of this case, of no force or effect as infringing on s. 35(1) of the *Constitution Act, 1982*, by which the aboriginal rights of Canada's aboriginal people are recognized and affirmed. Section 20(3) prohibits buying, selling or bartering, or attempting to buy, sell or barter herring spawn on kelp not taken under the authority of a Category J. licence. The issue raised involves a consideration of whether the Heiltsuk people of British Columbia had at one time an aboriginal right to trade and sell herring spawn on kelp and its nature; whether, assuming there was such a right, it

pas atteinte au droit de priorité des usagers autochtones vis-à-vis des autres usagers de la ressource, la décision de fixer les prises admissibles à 20 pour 100 des stocks de hareng exploitables est compatible avec l'ordre de priorité établi dans *Sparrow*, et explicité dans le présent jugement.

V. Dispositif

En conséquence, je suis d'avis de faire droit au pourvoi et d'ordonner un nouveau procès sur la question de la culpabilité ou de l'innocence, et, en ce qui concerne la constitutionnalité du par. 20(3), sur la question du caractère justifiable de la répartition du hareng par l'État.

Pour les motifs qui précèdent, la question constitutionnelle doit recevoir la réponse suivante:

Question: Le paragraphe 20(3) du *Règlement de pêche du hareng du Pacifique*, DORS/84-324, tel qu'il se lisait le 28 avril 1988, est-il, dans les circonstances de la présente affaire, inopérant à l'égard des appelants en vertu de l'art. 52 de la *Loi constitutionnelle de 1982*, en raison des droits ancestraux au sens de l'art. 35 de la *Loi constitutionnelle de 1982*, qu'ils invoquent?

Réponse: Cette question doit être renvoyée à la juridiction de première instance afin qu'on y réponde conformément à l'analyse exposée dans les présents motifs.

Version française des motifs rendus par

LE JUGE LA FOREST (dissident) — Le présent pourvoi soulève la question de savoir si le par. 20(3) du *Règlement de pêche du hareng du Pacifique*, DORS/84-324, est, dans les circonstances de la présente affaire, inopérant parce qu'il porte atteinte au par. 35(1) de la *Loi constitutionnelle de 1982* qui reconnaît et confirme les droits ancestraux des peuples autochtones du Canada. Le paragraphe 20(3) interdit d'acheter, de vendre, d'échanger ou de tenter d'acheter, de vendre ou d'échanger de la roque de hareng sur varech, à moins que celle-ci n'ait été récoltée en vertu d'un permis de catégorie J. Pour trancher la question soulevée, il nous faut d'abord décider si les Heiltsuk de la Colombie-Britannique ont déjà eu le

has been extinguished; and whether if such right continues to exist its infringement may be justified.

Background

The Chief Justice has set forth the facts and judicial history in some detail and I need only set them forth in brief terms here.

The appellants are members of the Heiltsuk people of British Columbia and were charged with having offered to sell and with having attempted to sell herring spawn on kelp contrary to s. 61(1) of the *Fisheries Act*, R.S.C. 1970, c. F-14, which provides that contravention of the Act or the regulations adopted thereunder is an offence punishable on summary conviction. The regulations, adopted by the Governor in Council in accordance with s. 34 of the Act, form a federal regulatory scheme relating to herring fishing in Canadian fisheries waters on the Pacific Coast. Section 20(3) of the regulations reads:

20. . . .

(3) No person shall buy, sell, barter, or attempt to buy, sell, or barter herring spawn on kelp other than herring spawn on kelp taken or collected under the authority of a Category J licence.

During the course of the proceedings, the appellants raised a number of issues relating to the evidence presented by the Crown and the elements of the offences with which they were charged. The appellants have abandoned most of these arguments, but nonetheless submitted before this Court that the Crown had failed to correctly prove an attempt to sell. On this issue, it is sufficient to say that I agree with the Chief Justice, and I shall therefore confine myself to the constitutional issues.

The appellants were initially convicted of both charges against them. Although the trial judge recognized that the Act and the regulations infringed

droit ancestral de vendre et d'échanger de la rogue de hareng sur varech, et quelle était la nature de ce droit. À supposer qu'un tel droit ait existé, il faut ensuite se demander s'il a été éteint. Enfin, dans l'hypothèse où ce droit continuerait d'exister, il faut déterminer si sa violation peut être justifiée

Contexte

Comme le Juge en chef a exposé en détail les faits et l'historique des procédures judiciaires, il me suffira de les rappeler brièvement.

Les appelants, des Heiltsuk de la Colombie-Britannique, ont été accusés d'avoir offert de vendre et d'avoir tenté de vendre de la rogue de hareng sur varech contrairement au par. 61(1) de la *Loi sur les pêcheries*, S.R.C. 1970, ch. F-14, qui dispose que toute contravention à la Loi ou à ses règlements d'application est punissable sur déclaration de culpabilité par procédure sommaire. Le règlement en cause, pris par le gouverneur en conseil en vertu de l'art. 34 de la Loi, établit un régime fédéral de réglementation applicable à la pêche au hareng dans les pêcheries canadiennes de la côte du Pacifique. Le paragraphe 20(3) du règlement est ainsi rédigé:

20. . . .

(3) Il est interdit à quiconque d'acheter, de vendre, d'échanger ou de tenter d'acheter, de vendre ou d'échanger de la rogue de hareng sur varech, à moins que celle-ci n'ait été prise ou recueillie en vertu d'un permis de catégorie J.

Au cours des procédures, les appelants ont soulevé un certain nombre de questions concernant la preuve produite par le ministère public et les éléments constitutifs des infractions dont ils ont été accusés. Ils ont abandonné la plupart de ces arguments, mais ont néanmoins soutenu devant notre Cour que le ministère public n'avait pas prouvé correctement la tentative de vente. Sur ce point, qu'il suffise de dire que je suis d'accord avec le Juge en chef et que je m'en tiendrai donc aux questions d'ordre constitutionnel.

Les appelants ont d'abord été déclarés coupables des deux accusations portées contre eux. Bien que le juge du procès ait reconnu que la Loi et le

the appellants' constitutional right to barter and sell herring spawn on kelp, he was of the opinion that such infringement was justified and, therefore, constitutionally valid. On appeal to the Supreme Court of British Columbia, Anderson J. upheld the conviction on the second count (attempt to sell), concluding that the appellants' constitutional right to trade herring spawn on kelp was not infringed by the Act or its regulations. A majority of a five-judge panel of the Court of Appeal for British Columbia (1993), 80 B.C.L.R. (2d) 133, dismissed the appellants' appeal with respect to the second count, finding that they were not at the time the offences were allegedly committed exercising an aboriginal right. The appellants applied for and were granted leave to appeal to this Court. Subsequently, the Chief Justice stated the following constitutional question:

Is s. 20(3) of the *Pacific Herring Fishery Regulations*, SOR/84-324, as it read on April 28, 1988, of no force or effect with respect to the appellants in the circumstances of these proceedings, in virtue of s. 52 of the *Constitution Act, 1982*, by reason of the aboriginal rights within the meaning of s. 35 of the *Constitution Act, 1982*, invoked by the appellants?

Analysis

It will, I think, be useful to set forth my conclusions at the outset. I have had the advantage of reading the reasons of the Chief Justice and those of my colleagues Justices L'Heureux-Dubé and McLachlin in the instant appeals and in the companion cases of *R. v. Van der Peet*, [1996] 2 S.C.R. 507, and *R. v. N.T.C. Smokehouse Ltd.*, [1996] 2 S.C.R. 672. Although I am in general agreement with the framework articulated by the Chief Justice in *Van der Peet* pertaining to the definition of the nature and scope of aboriginal rights recognized and affirmed in s. 35(1) of the *Constitution Act, 1982*, I cannot share his views regarding its application to the present case. As I see it, the appellants have failed to establish that when they took part in the activities giving rise to this litigation, they were exercising an aboriginal right.

Règlement portaient atteinte au droit constitutionnel des appelants de vendre et d'échanger de la rogue de hareng sur varech, il a dit être d'avis que cette atteinte était justifiée et donc constitutionnellement valide. En appel devant la Cour suprême de la Colombie-Britannique, le juge Anderson a confirmé la déclaration de culpabilité à l'égard du deuxième chef (tentative de vente), concluant que le droit constitutionnel des appelants d'échanger de la rogue de hareng sur varech n'était pas violé par la Loi ou son règlement d'application. Une formation de cinq juges de la Cour d'appel de la Colombie-Britannique (1993), 80 B.C.L.R. (2d) 133, a, à la majorité, rejeté l'appel formé par les appelants contre le deuxième chef d'accusation, statuant que ces derniers n'exerçaient pas un droit ancestral au moment où ils auraient perpétré les infractions. Les appelants ont demandé et obtenu l'autorisation de se pourvoir devant notre Cour. Par la suite, le Juge en chef a formulé la question constitutionnelle suivante:

Le paragraphe 20(3) du *Règlement de pêche du hareng du Pacifique*, DORS/84-324, tel qu'il se lisait le 28 avril 1988, est-il, dans les circonstances de la présente affaire, inopérant à l'égard des appelants en vertu de l'art. 52 de la *Loi constitutionnelle de 1982*, en raison des droits ancestraux au sens de l'art. 35 de la *Loi constitutionnelle de 1982*, qu'ils invoquent?

Analyse

Il sera utile, je crois, de formuler mes conclusions dès le départ. J'ai eu l'avantage de lire les motifs du Juge en chef et ceux de mes collègues les juges L'Heureux-Dubé et McLachlin dans les présents pourvois et les pourvois connexes *R. c. Van der Peet*, [1996] 2 R.C.S. 507, et *R. c. N.T.C. Smokehouse Ltd.*, [1996] 2 R.C.S. 672. Quoique je sois d'accord de façon générale avec le cadre d'analyse établi par le Juge en chef dans *Van der Peet* relativement à la définition de la nature et de la portée des droits ancestraux reconnus et confirmés par le par. 35(1) de la *Loi constitutionnelle de 1982*, je ne peux partager son avis quant à l'application de ce cadre d'analyse à la présente espèce. À mon sens, les appelants n'ont pas établi qu'ils exerçaient un droit ancestral lorsqu'ils ont participé aux activités ayant donné naissance au

Moreover, even if the appellants had demonstrated that the Heiltsuk of British Columbia did at some time benefit from the aboriginal right claimed, I am of the view that any such right would now be extinguished. I would therefore dismiss the appeals and answer the constitutional question in the negative, and I need not enter into the issue of justification.

1. *The Aboriginal Right Issue*

In the *Van der Peet* case, the Chief Justice proceeded to a purposive analysis of s. 35(1) of the *Constitution Act, 1982* in defining the content of aboriginal rights as they are recognized and affirmed in our Constitution. This provision reads:

35. (1) The existing aboriginal and treaty rights of the aboriginal peoples of Canada are hereby recognized and affirmed.

The basis of aboriginal rights, he explained, lies in aboriginal occupation of the territory that is now Canada before the arrival of Europeans. As Judson J. had earlier put it in *Calder v. Attorney-General of British Columbia*, [1973] S.C.R. 313, at p. 328, "the fact is that when the settlers came, the Indians were there, organized in societies and occupying the land as their forefathers had done for centuries". This, as he added, is the foundation of Indian title and, I would add, of aboriginal rights generally. It follows that these rights, though (as *R. v. Sparrow*, [1990] 1 S.C.R. 1075, confirms) exercisable by modern instrumentalities, must in essence be integrally related to traditional Indian habits and mode of life. To use the Chief Justice's expression, an aboriginal right is the right to engage in a practice or activity that is integral to their distinctive culture as it existed when the Europeans arrived. To gain constitutional status, such a right must not have been extinguished by the Crown before the coming into force of s. 35(1) in 1982.

présent litige. De plus, même s'ils avaient démontré que les Heiltsuk de la Colombie-Britannique ont, à une certaine époque, effectivement joui du droit ancestral revendiqué, je suis d'avis qu'un tel droit est maintenant éteint. Je rejeterais donc les pourvois et répondrais par la négative à la question constitutionnelle. Je n'ai pas à examiner la question de la justification.

1. *La question du droit ancestral*

Dans *Van der Peet*, le Juge en chef a d'abord analysé les objets qui sous-tendent le par. 35(1) de la *Loi constitutionnelle de 1982*, afin de définir la portée des droits ancestraux reconnus et confirmés dans notre Constitution. Cette disposition est ainsi libellée:

35. (1) Les droits existants — ancestraux ou issus de traités — des peuples autochtones du Canada sont reconnus et confirmés.

Le fondement des droits ancestraux, a-t-il expliqué, réside dans l'occupation par les autochtones, avant l'arrivée des Européens, du territoire qui forme maintenant le Canada. Comme l'avait déjà dit le juge Judson dans l'arrêt *Calder c. Procureur général de la Colombie-Britannique*, [1973] R.C.S. 313, à la p. 328, «il reste que lorsque les colons sont arrivés, les Indiens étaient déjà là, ils étaient organisés en sociétés et occupaient les terres comme leurs ancêtres l'avaient fait depuis des siècles». Voilà, a précisé le juge Judson, le fondement du titre indien, et, ajouterais-je, celui des droits ancestraux en général. Il s'ensuit que, même s'ils peuvent être exercés par des moyens modernes (comme le confirme l'arrêt *R. c. Sparrow*, [1990] 1 R.C.S. 1075), ces droits doivent par essence faire partie intégrante des coutumes et du mode de vie traditionnels des Indiens. Pour reprendre la formule du Juge en chef, un droit ancestral est le droit qu'ont des autochtones de s'adonner à une pratique ou à une activité qui faisait partie intégrante de leur culture distinctive, telle qu'elle existait lorsque les Européens sont arrivés. Pour se voir reconnaître un statut constitutionnel, un tel droit ne doit pas avoir été éteint par l'État avant l'entrée en vigueur du par. 35(1) en 1982.

93

The trial judge, Lemiski Prov. Ct. J., came to the conclusion that the Heiltsuk people of British Columbia did have an aboriginal right, within the meaning of s. 35(1), to barter and trade herring spawn on kelp, but that the activities the appellants engaged in at the time the offences were allegedly committed were very different from the traditional activities that had given rise to that aboriginal right. In coming to this conclusion, Lemiski Prov. Ct. J. had the benefit of this Court's decision in *Sparrow, supra*, and it is apparent that he, too, shared the view that an aboriginal right pertained to what formed an integral part of the distinctive culture of a given aboriginal society. His conclusions of facts explaining his position are stated in the following passage of his reasons:

This is not a situation where a small quantity of spawn was openly sold, traded or bartered in the Bella Bella region.

The Accused were attempting to sell a relatively large quantity of spawn in a surreptitious manner to a foreign buyer in a location far removed from the Heiltsuk Band's region. In the total context of the historical manner and extent of the herring spawn on kelp trade by the Heiltsuk Band and the present manner and extent of commercial trade Fisheries Officers were justified in interfering with this transaction.

The overall justification lies within the broad definition of proper management and conservation of the resource. The special trust relationship cannot be applied to offset that because of the unique circumstances.

I am satisfied that this transaction was totally out of character and context with respect to either any existing exercise of aboriginal rights to sell fish or any licensed sale. In *Sparrow* the Supreme Court of Canada said:

"Fishing rights are not traditional property rights. They are rights held by a collective and are in keeping with the culture and existence of that group".

There is no evidence before me that the Accused were conducting a transaction "in keeping with the culture and existence" of the Heiltsuk Band. [Emphasis added.]

Le juge Lemiski de la Cour provinciale, juge du procès, a conclu que les Heiltsuk de la Colombie-Britannique avaient un droit ancestral, au sens du par. 35(1), d'échanger de la rogue de hareng sur varech, mais que les activités auxquelles s'adonnaient les appelants au moment des infractions reprochées étaient très différentes des activités traditionnelles qui avaient donné naissance à ce droit ancestral. Lorsqu'il a tiré cette conclusion, le juge Lemiski avait eu l'avantage de prendre connaissance de l'arrêt *Sparrow* de notre Cour, précité, et il est évident qu'il était lui aussi d'avis qu'un droit ancestral se rapporte à ce qui faisait partie intégrante de la culture distinctive d'une société autochtone donnée. Ses conclusions de fait expliquant sa position sont énoncées dans le passage qui suit de ses motifs:

[TRADUCTION] Il ne s'agit pas d'une situation où une petite quantité de rogue a été vendue ou échangée ouvertement dans la région de Bella Bella.

Les accusés ont tenté de vendre subrepticement une quantité relativement importante de rogue à un acheteur étranger, dans un lieu très éloigné de la région où vit la bande des Heiltsuk. Vu le contexte global des modalités et de l'ampleur des échanges de rogue de hareng sur varech faits historiquement par la bande de Heiltsuk, ainsi que les modalités et l'ampleur de la présente opération commerciale, les agents des pêches étaient justifiés d'empêcher cette opération.

La justification générale réside dans la définition large de la gestion et de la conservation judicieuses de la ressource. Les rapports spéciaux de fiduciaire ne peuvent, vu les circonstances exceptionnelles, être invoqués pour faire échec à cette justification.

Je suis convaincu que, de par sa nature et de par le contexte, cette opération ne constitue aucunement l'exercice de droits ancestraux de vendre du poisson ou une vente autorisée. Dans *Sparrow*, la Cour suprême du Canada a dit ceci:

«Les droits de pêche ne sont pas des droits de propriété au sens traditionnel. Il s'agit de droits qui appartiennent à un groupe et qui sont en harmonie avec la culture et le mode de vie de ce groupe».

Il ne m'a été présenté aucune preuve indiquant que les accusés effectuaient une opération «en harmonie avec la culture et le mode de vie» de la bande des Heiltsuk. [Je souligne.]

On this basis, I would conclude that the appellants have not established that they were exercising an aboriginal right at the time the alleged offences were committed. I am prepared to agree that the Heiltsuk had an aboriginal right to barter and trade herring spawn on kelp to a certain degree. The evidence demonstrated that the Heiltsuk had been engaged in such activities for some time before contact with the Europeans and those activities, at times, involved very large quantities of fish. As the evidence demonstrated, such activities had special significance to the Heiltsuk. After the resource had satisfied their own needs, they engaged in such trading activities only because they valued sharing resources with other bands who did not have access to such a resource. As the majority of the Court of Appeal put it, at para. 50: "[t]he aboriginal activity was rooted in a culture which gave significance to sharing a resource, to which one nation had ready access, while other Indian peoples did not." In that sense, the bartering and trading of herring spawn on kelp was an integral part of the distinctive culture of the Heiltsuk Band because of the distinctive significance such activities had for them. That special significance is what made bartering and trading in herring spawn on kelp a part of their distinctive culture.

It is important to underline that the trial judge's findings of fact are to the effect that the activity of bartering and trading historically engaged in by the Heiltsuk people was not in itself of a kind that can be characterized as forming an integral part of their distinctive culture. Bartering and trading was integral to the distinctive culture of the Heiltsuk Band because of the context in which it occurred. Without it, such activity does not constitute an integral part of their distinctive culture and thus any trading and bartering that is not done in that context cannot in any way be said to form an integral part of the distinctive culture of the Heiltsuk society.

Sur ce fondement, je concluais que les appelants n'ont pas établi qu'ils exerçaient un droit ancestral au moment des infractions reprochées. Je suis disposé à convenir que les Heiltsuk possédaient, dans une certaine mesure, un droit ancestral d'échanger de la rogue de hareng sur varech. La preuve a montré que les Heiltsuk exerçaient de telles activités depuis un certain temps déjà avant le contact avec les Européens, et que ces activités portaient parfois sur de très importantes quantités de poisson. Comme la preuve l'a démontré, ces activités avaient une importance spéciale pour les Heiltsuk. Une fois que la ressource leur avait permis de satisfaire leurs propres besoins, ils ne pratiquaient ce genre d'activités d'échange que parce qu'il était important pour eux de partager des ressources avec d'autres bandes n'ayant pas accès à celles-ci. Comme l'ont exprimé les juges de la majorité de la Cour d'appel, au par. 50: [TRADUCTION] «[l]es activités des autochtones étaient enracinées dans une culture qui accordait de l'importance au partage d'une ressource à laquelle une nation indienne avait, contrairement à d'autres, aisément accès.» En ce sens, les échanges de rogue de hareng sur varech faisaient partie intégrante de la culture distinctive de la bande des Heiltsuk à cause de l'importance distinctive que celle-ci attachait à ces activités. Cette importance spéciale est ce qui faisait des échanges de rogue de hareng sur varech une partie de la culture distinctive de la bande.

Il importe de souligner que les conclusions de fait du juge du procès indiquent que les échanges pratiqués historiquement par les Heiltsuk n'étaient pas en soi un type d'activités pouvant être qualifiées de partie intégrante de la culture distinctive de ceux-ci. Ces activités d'échange faisaient partie intégrante de la culture distinctive de la bande des Heiltsuk en raison du contexte dans lequel elles se déroulaient. En dehors de ce contexte, ces activités ne font pas partie intégrante de la culture distinctive des Heiltsuk et, en conséquence, il est impossible d'affirmer que les échanges qui ne sont pas effectués dans ce contexte font partie intégrante de la culture distinctive de la société heiltsuk.

96

Accordingly, I agree with the trial judge and the majority of the Court of Appeal that the activities the appellants were engaged in when the offences were allegedly committed did not form an integral part of the distinctive culture of the Heiltsuk people. It is elementary that when the Heiltsuk trade herring spawn on kelp in large quantities to Japanese clients, they do so for the unique — although quite legitimate — purpose of satisfying their own financial interests and clearly not in pursuance of the values rooted in their cultural distinctiveness to which I have referred. Consequently, I do not think that the aboriginal rights of the Heiltsuk people are infringed because they cannot by virtue of such rights sell herring spawn on kelp as they wish to Japanese interests.

97

My conviction is strengthened by the fact that the evidence established that it was not before the 1970s that the Heiltsuk engaged in commercial activities involving herring spawn on kelp and that they did so in response to a strong demand for the product from Asian markets. The Heiltsuk herring spawn on kelp industry therefore developed in order to take advantage of an economic opportunity created by that strong demand (see also *Heiltsuk Indian Band v. Canada* (1993), 59 F.T.R. 308). We are light years away from the ancient practice of sharing resources with fellow bands in furtherance of spiritual ideals.

98

In view of the different conclusion arrived at by the Chief Justice, however, it becomes important to examine in more detail the factual and evidentiary foundation that lies at the root of our disagreement. Briefly, the Chief Justice's conclusion is that the appellants had successfully established that when they offered to sell herring spawn on kelp — the events that led to the charges — they were exercising an aboriginal right. In his view, the facts as found by the trial judge, as well as the evidence he relied upon, supported the appellants' claim that the "exchange of herring spawn on kelp for money or other goods was a central, significant and defining feature of the culture of the Heiltsuk

Par conséquent, je suis d'accord avec le juge du procès et la majorité de la Cour d'appel que les activités exercées par les appelants au moment des infractions reprochées ne faisaient pas partie intégrante de la culture distinctive des Heiltsuk. Il va de soi que lorsque les Heiltsuk vendent de la rogue de hareng sur varech en grandes quantités à des clients japonais, ils le font dans le but unique — quoique tout à fait légitime — de veiller à leurs propres intérêts financiers, et manifestement pas conformément aux valeurs enracinées dans la culture distinctive dont je viens de parler. En conséquence, je ne pense pas que les droits ancestraux des Heiltsuk ont été violés parce que ceux-ci ne peuvent pas, en vertu de ces droits, vendre à leur guise de la rogue de hareng sur varech à des clients japonais.

Ma conviction est renforcée par le fait que la preuve a établi que ce n'est qu'à compter des années 1970 que les Heiltsuk ont commencé à pratiquer des activités commerciales visant la rogue de hareng sur varech, et qu'ils l'ont fait pour répondre à la forte demande pour ce produit sur les marchés asiatiques. L'industrie de la rogue de hareng sur varech s'est donc développée chez les Heiltsuk en raison des possibilités économiques créées par cette forte demande (voir aussi la décision *Bande indienne des Heiltsuk c. Canada* (1993), 59 F.T.R. 308). Nous sommes à des années-lumière de l'ancienne pratique de partage des ressources avec des bandes amies dans la poursuite d'idéaux spirituels.

Toutefois, étant donné la conclusion différente tirée par le Juge en chef, il importe d'examiner plus en détail les faits et les éléments de preuve qui sont à la base de notre désaccord. En bref, le Juge en chef conclut que les appelants ont réussi à établir que, lorsqu'ils ont offert de vendre de la rogue de hareng sur varech — faits générateurs des accusations — ils exerçaient un droit ancestral. À son avis, les faits constatés par le juge du procès, ainsi que la preuve sur laquelle ce dernier s'est appuyé, étayaient la prétention des appelants que «l'échange de la rogue de hareng sur varech contre de l'argent ou d'autres biens était une caractéristique fondamentale, importante et déterminante de la culture

prior to contact" (at para. 26). He also added that the facts supported the appellants' further claim that "the exchange of herring spawn on kelp on a scale best characterized as commercial was an integral part of the distinctive culture of the Heiltsuk" (at para. 26). He referred to the trial judge's comments, found under sub-heading 2 "Ancestral Activity ('Existing Rights') of Part IV of his reasons, which I will for convenience repeat:

It cannot be disputed that hundreds of years ago, the Heiltsuk Indians regularly harvested herring spawn on kelp as a food source. The historical/anthropological records readily bear this out.

I am also satisfied that this Band engaged in inter-tribal trading and barter of herring spawn on kelp. The exhibited Journal of Alexander McKenzie [*sic*] dated 1793 refers to this trade and the defence lead [*sic*] evidence of several other references to such trade.

The Crown conceded that there may have been some incidental local trade but questions its extent and importance. The very fact that early explorers and visitors to the Bella Bella region noted this trading has to enhance its significance. All the various descriptions of this trading activity are in accord with common sense expectations. Obviously one would not expect to see balance sheets and statistics in so primitive a time and setting.

With respect, I cannot agree with the Chief Justice's conclusion. On the contrary, as I indicated earlier, my understanding of the trial judge's reasons is that he found the appellants had failed to establish that they were exercising an aboriginal right when they attempted to sell the herring spawn on kelp. The findings of fact of the trial judge were so understood and accepted by both the British Columbia Supreme Court and the Court of Appeal. The appellants have not convinced me that these should be disturbed. As I see it, the confusion arises from the fact that the trial judge made some of his findings — in the first of the passages from his reasons cited earlier (para. 7) — in the course of addressing the issue of justification. These find-

distinctive des Heiltsuk avant le contact avec les Européens» (au par. 26). Il a ajouté que les faits appuyaient aussi la thèse des appelants que «l'échange de la rogue de hareng sur varech, sur une échelle qu'il convient de qualifier de commerciale, faisait partie intégrante de la culture distinctive des Heiltsuk» (au par. 26). Il a fait état des observations formulées par le juge du procès, à la rubrique 2 [TRADUCTION] «Activité ancestrale («Droits existants»)», à la partie IV de ses motifs, observations que je vais répéter par souci de commodité:

[TRADUCTION] Il est incontestable qu'il y a des siècles, les Indiens Heiltsuk récoltaient régulièrement la rogue de hareng sur varech comme source de nourriture. C'est un fait dont la réalité est attestée par les documents historiques et anthropologiques.

Je suis également convaincu que la bande échangeait cette denrée avec d'autres tribus. Le journal d'Alexander McKenzie [*sic*] datant de 1793, qui a été versé en preuve, fait mention de ces échanges et la défense a présenté des éléments de preuve faisant état de nombreuses autres mentions de ces échanges.

Le ministère public a concédé qu'il a pu y avoir certains échanges accessoires, mais il a mis en doute leur ampleur et leur importance. Le fait même que les premiers explorateurs et visiteurs de la région de Bella Bella aient noté ces échanges en accentue l'importance. Les diverses descriptions faites de ces activités d'échange concordent avec ce à quoi on peut logiquement s'attendre. Il va de soi que personne ne s'attend à trouver des bilans et des statistiques à une époque et en des lieux aussi primitifs.

En toute déférence, je ne peux souscrire à la conclusion du Juge en chef. Au contraire, comme je l'ai dit plus tôt, il appert selon moi des motifs du juge du procès que ce dernier a conclu que les appelants n'ont pas établi qu'ils exerçaient un droit ancestral lorsqu'ils ont tenté de vendre de la rogue de hareng sur varech. Voilà comment et la Cour suprême et la Cour d'appel de la Colombie-Britannique ont interprété et accepté les conclusions de fait du juge du procès. Les appelants ne m'ont pas persuadé qu'il y avait lieu de modifier ces conclusions. Selon moi, la confusion résulte du fait que le juge du procès a formulé certaines de ses conclusions — qui figurent dans le premier des extraits cités précédemment (au par. 7) — dans le

ings were relevant to the definition of the scope of the aboriginal right at issue rather than to the issue of justification and he should have concluded from these that the appellants had failed to establish that they were exercising an aboriginal right when they attempted to sell the herring spawn on kelp.

cours de son analyse de la question de la justification. Ces constatations étaient pertinentes pour la définition de la portée du droit ancestral en cause plutôt qu'à l'égard de la question de la justification, et le juge du procès aurait dû en conclure que les appelants n'avaient pas établi qu'ils exerçaient un droit ancestral lorsqu'ils ont tenté de vendre de la rogue de hareng sur varech.

100 To fully understand the trial judge's reasoning, it is important to carefully review the passage from his reasons to which I have just referred. On the one hand, the trial judge found that the appellants established that the Heiltsuk people had had in a particular context an aboriginal right to barter and trade herring spawn on kelp to a certain extent, based on the findings of facts he made, and to which the Chief Justice referred. But he clearly was of the opinion that this is not what the appellants were doing here. The nature, the extent and the context in which the impugned transactions took place were such that they had absolutely no relationship to the traditional activities of trading and bartering herring spawn on kelp that had given rise to an aboriginal right.

Pour bien comprendre le raisonnement du juge du procès, il est important d'étudier attentivement le passage de ses motifs dont je viens de parler. Le juge du procès a bien statué, sur la foi des conclusions de fait qu'il a tirées et dont le Juge en chef a fait état, que les appelants avaient établi que les Heiltsuk avaient possédé, dans un contexte particulier, un droit ancestral d'échanger de la rogue de hareng sur varech dans une certaine mesure. Toutefois, il était clairement d'avis que ce n'était pas ce que les appelants avaient fait en l'espèce. La nature, l'ampleur et le contexte des opérations reprochées étaient absolument sans rapport avec les activités traditionnelles d'échange de rogue de hareng sur varech qui avaient donné naissance à un droit ancestral.

101 Anderson J. of the British Columbia Supreme Court also made comments relevant to the definition of the scope of the right at issue in the part of his reasons regarding justification. He first agreed with the trial judge that "the Heiltsuk Band historically had taken herring spawn on kelp for food and domestic purposes and also had engaged in inter-tribal trading and bartering of herring spawn and accordingly, that they had an aboriginal right to do so". But he added — in the course of dealing with justification — that he had not been able to "translate that right into an absolute and unfettered right to harvest herring spawn in any quantity and to sell the spawn so harvested commercially". The majority of the Court of Appeal correctly interpreted the scope of the trial judge's analysis that, at the end of the day, indicated that the appellants had failed to establish that they were exercising an aboriginal right when they offered to sell the herring spawn

Le juge Anderson de la Cour suprême de la Colombie-Britannique a lui aussi fait des observations pertinentes quant à la définition de la portée du droit en cause dans la partie de ses motifs traitant de la justification. Il a d'abord souscrit aux propos du juge du procès selon lesquels [TRADUCTION] «la bande des Heiltsuk avait historiquement récolté de la rogue de hareng sur varech pour se nourrir et pour des fins domestiques, en plus d'échanger cette ressource à d'autres tribus, de sorte qu'elle avait un droit ancestral de le faire». Cependant, il a ajouté — dans son examen de la question de la justification — qu'il avait été incapable de [TRADUCTION] «considérer ce droit comme étant un droit absolu et illimité de récolter n'importe quelle quantité de rogue de hareng et de vendre cette récolte commercialement». La Cour d'appel à la majorité a correctement interprété la portée de l'analyse du juge du procès qui l'a, en bout de ligne, amené à conclure que les appelants n'avaient pas établi qu'ils exerçaient un droit ancestral lorsqu'ils ont offert de vendre de la rogue

on kelp. Macfarlane J.A. had this to say, at paras. 49-52:

It is clear that the trial judge and the summary appeal judge did not view the activity in question as being an integral part of the distinctive culture of the Heiltsuk people. I agree that the activity is different in nature and quality than the aboriginal right identified by the evidence.

The case is not one that turns on quantity, although both judges below took account of the quantity involved. There was evidence of considerable quantities being transported to other Indians in aboriginal times. But the quality and character of the activity in aboriginal times was quite different from that disclosed by the evidence in this case. The aboriginal activity was rooted in a culture which gave significance to sharing a resource, to which one nation had ready access, while other Indian peoples did not.

Both judges below said that the activity in question in this case was not of the same character as the activity which attracts protection as an aboriginal right.

In my view, the appellants have not established that they were exercising an aboriginal right when they attempted to sell the product in Vancouver. [Emphasis added.]

As the Chief Justice explained in his reasons in *Van der Peet*, *supra*, taking into account the perspective of the aboriginal people is necessary because one of the purposes of s. 35(1) is the reconciliation of the pre-existence of distinctive aboriginal societies with the assertion of Crown sovereignty. But it is also necessary to do so in order to properly delineate the scope of aboriginal rights. The perspective a given aboriginal people had regarding a given practice indicates its place within its society and, ultimately, whether it was integral to its distinctive culture and to what extent. This, I think, is clear from the reasons of the Chief Justice in *Van der Peet* (see para. 58) as I understand them, but, with respect, I do not think it was properly taken into account in his analysis

de hareng sur varech. Le juge Macfarlane a dit ceci, aux par. 49 à 52:

[TRADUCTION] De toute évidence, le juge du procès et le juge d'appel des poursuites sommaires n'ont pas considéré que les activités en question faisaient partie intégrante de la culture distinctive des Heiltsuk. Je suis d'accord que ces activités diffèrent, de par leur nature et leur qualité, du droit ancestral révélé par la preuve.

Les quantités ne sont pas l'élément déterminant du présent litige, bien que les deux juges des juridictions inférieures aient tenu compte de la quantité en cause. Il y avait des éléments de preuve indiquant que des quantités considérables étaient transportées chez d'autres Indiens aux temps des aborigènes. Toutefois, les activités exercées aux temps des aborigènes étaient très différentes, de par leur qualité et leur nature, de celles révélées par la preuve en l'espèce. Les activités des autochtones étaient enracinées dans une culture qui accordait de l'importance au partage d'une ressource à laquelle une nation indienne avait, contrairement à d'autres, aisément accès.

Les deux juges des juridictions inférieures ont dit que les activités en question n'étaient pas de la même nature que celles justifiant d'être protégées à titre de droit ancestral.

À mon avis, les appelants n'ont pas établi qu'ils exerçaient un droit ancestral lorsqu'ils ont tenté de vendre le produit à Vancouver. [Je souligne.]

Comme le Juge en chef l'a expliqué dans ses motifs dans l'arrêt *Van der Peet*, précité, il faut tenir compte du point de vue des autochtones parce que l'un des objets du par. 35(1) est la conciliation de la préexistence de sociétés autochtones distinctives avec l'affirmation de la souveraineté de Sa Majesté. Cependant, il est également nécessaire de le faire pour bien délimiter la portée des droits ancestraux. Le point de vue qu'avait un peuple autochtone donné à l'égard d'une certaine pratique indique la place de cette pratique dans cette société et, en définitive, si cette pratique faisait partie intégrante de la culture distinctive de ce peuple et, si oui, dans quelle mesure. À mon avis, cela ressort clairement des motifs du Juge en chef dans *Van der Peet* (voir le par. 58), mais, en toute déférence, je ne crois qu'il en ait été tenu adéquatement compte dans l'analyse du Juge en chef dans le présent

here given the findings of fact made by the trial judge.

The conclusion arrived at by the Chief Justice to the effect that the facts supported the appellants' further claim that "the exchange of herring spawn on kelp on a scale best characterized as commercial was an integral part of the distinctive culture of the Heiltsuk" people, therefore, seems to me wholly inconsistent with the findings of fact made by the trial judge and confirmed by both appellate courts to the effect that the impugned transactions lacked that fundamental element upon which it was found that historical trading and bartering practices was an aboriginal right. That is why I cannot agree with the Chief Justice's analysis and conclusion.

I would add that in *Van der Peet, supra*, the Chief Justice held, at para. 59, that a "practical way" to assess whether a given activity was integral to the distinctive culture of a given aboriginal society is to ask "whether, without this practice, custom or tradition, the culture in question would be fundamentally altered or other than what it is". I do not think it is possible in the present case to answer this question in the affirmative when the evidence and the findings of fact made by the trial judge upon it, and followed by both appellate courts, are properly taken into account. The impugned transactions occurred outside the particular context that constitutes the specific reason why ancient trading and bartering practices were considered integral to the distinctive culture of the Heiltsuk.

I, therefore, conclude that the appellants have failed to establish that, in engaging in the activities that have given rise to this litigation, they were exercising an aboriginal right.

2. The Issue of Extinction

Section 35(1) of the *Constitution Act, 1982* guarantees existing treaty and aboriginal rights. As this Court noted in *Sparrow, supra*, this implies that rights falling within the purview of s. 35(1) are those which had not been extinguished by the

pourvoi, eu égard aux conclusions de fait du juge du procès.

La conclusion du Juge en chef, selon laquelle les faits appuyaient aussi la thèse des appelants que [TRADUCTION] «l'échange de la roque de hareng sur varech, sur une échelle qu'il convient de qualifier de commerciale, faisait partie intégrante de la culture distinctive des Heiltsuk», me semble donc tout à fait incompatible avec les conclusions de fait du juge du procès — confirmées par les deux juridictions d'appel — portant que les opérations reprochées étaient dépourvues de l'élément fondamental qui avait permis de conclure que les pratiques historiques d'échange constituaient un droit ancestral. Voilà pourquoi je ne peux souscrire à l'analyse et à la conclusion du Juge en chef.

J'ajouterais que, dans *Van der Peet*, précité, le Juge en chef a statué, au par. 59, qu'une «façon pratique» de déterminer si une activité donnée faisait partie intégrante de la culture distinctive d'une société autochtone donnée est de se demander «si, sans cette coutume, pratique ou tradition, la culture en cause serait fondamentalement modifiée ou différente». Je ne pense pas qu'il soit possible de répondre par l'affirmative à cette question dans la présente espèce si l'on prend correctement en considération la preuve ainsi que les conclusions de fait qui ont été tirées par le juge du procès à partir de celle-ci et suivies par les deux juridictions d'appel. Les opérations reprochées sont survenues hors du contexte particulier qui constitue la raison précise pour laquelle les anciennes pratiques d'échange ont été considérées comme faisant partie intégrante de la culture distinctive des Heiltsuk.

En conséquence, je conclus que les appelants n'ont pas établi qu'ils exerçaient un droit ancestral lorsqu'ils ont accompli les activités ayant donné naissance au présent litige.

2. La question de l'extinction

Le paragraphe 35(1) de la *Loi constitutionnelle de 1982* garantit les droits existants — ancestraux ou issus de traités. Comme notre Cour l'a signalé dans l'arrêt *Sparrow*, précité, cela signifie que les droits visés au par. 35(1) sont ceux qui n'avaient

Crown pursuant to its power to do so when this provision came into force on April 17, 1982. The Court also made clear in *Sparrow* that the party invoking extinguishment has the onus of demonstrating that the Crown had expressed a clear and plain intention of extinguishing the aboriginal right at issue.

It is important at the outset to emphasize that, contrary to the views of Lambert J.A., the *Sparrow* decision only stands for the proposition that the Crown had not expressed a clear and plain intention to extinguish aboriginal rights regarding fishing for food, including social and ceremonial purposes, in British Columbia. This Court was very careful to confine its reasons to the specific circumstances of that case and it would be incorrect to hold that *Sparrow* stands for the proposition that the Crown has never expressed any intention to extinguish aboriginal rights — assuming they exist — relating to fishing for commercial or livelihood purposes. The Court stated, at p. 1101:

In the courts below, the case at bar was not presented on the footing of an aboriginal right to fish for commercial or livelihood purposes. Rather, the focus was and continues to be on the validity of a net length restriction affecting the appellant's food fishing licence. We therefore adopt the Court of Appeal's characterization of the right for the purpose of this appeal, and confine our reasons to the meaning of the constitutional recognition and affirmation of the existing aboriginal right to fish for food and social and ceremonial purposes. [Emphasis in original.]

Before this Court, the Crown's argument was twofold. Its first submission was that Order in Council P.C. 2539 dated September 11, 1917, reveals a clear and plain intention on the part of the Crown to extinguish any aboriginal rights relating to commercial fisheries in British Columbia. Alternatively, it submitted that the fisheries regulations applicable in British Columbia regarding commercial harvesting of herring spawn on kelp before the coming into force of s. 35(1) of the *Constitution Act, 1982* intended to limit aboriginal

pas été éteints par l'État en vertu du pouvoir qu'il avait de le faire quand ce paragraphe est entré en vigueur le 17 avril 1982. Notre Cour a également clairement indiqué qu'il incombe à la partie qui invoque l'extinction du droit ancestral en cause de démontrer que l'État a exprimé l'intention claire et expresse d'éteindre ce droit.

Il importe au départ de souligner que, contrairement à l'opinion du juge Lambert de la Cour d'appel, l'arrêt *Sparrow* permet seulement d'affirmer que l'État n'avait pas exprimé l'intention claire et expresse d'éteindre les droits ancestraux en ce qui concerne la pêche pratiquée à des fins alimentaires, y compris à des fins sociales et rituelles, en Colombie-Britannique. Notre Cour a pris grand soin de s'en tenir, dans ses motifs, aux circonstances spécifiques de l'espèce, et il serait inexact de conclure que l'arrêt *Sparrow* permet d'affirmer que l'État n'a jamais exprimé l'intention d'éteindre — à supposer qu'ils existent — des droits ancestraux de pêcher à des fins commerciales ou de subsistance. À la page 1101, notre Cour a dit ceci:

Devant les tribunaux d'instance inférieure, la présente affaire n'a pas été débattue en fonction de l'existence d'un droit ancestral de pêcher à des fins commerciales ou de subsistance. Les débats ont plutôt porté, et portent encore, sur la validité d'une restriction quant à la longueur des filets qui touche le permis de pêche de subsistance de l'appelant. Nous adoptons donc, pour les fins du présent pourvoi, la caractérisation de ce droit donnée par la Cour d'appel et limitons nos motifs au sens de la reconnaissance et de la confirmation constitutionnelles du droit ancestral existant de pêcher à des fins de subsistance et à des fins sociales et rituelles. [Souligné dans l'original.]

Devant notre Cour, le ministère public a présenté un argument à deux volets. D'une part, il a soutenu que le décret C.P. 2539 daté du 11 septembre 1917 révèle l'intention claire et expresse de l'État d'éteindre tout droit ancestral relatif à la pêche commerciale en Colombie-Britannique. D'autre part, il a affirmé que le règlement de pêche concernant la récolte commerciale de la rogue de hareng sur varech qui s'appliquait en Colombie-Britannique avant l'entrée en vigueur du par. 35(1) de la *Loi constitutionnelle de 1982* visait à limiter

activity in a way that indicates the required clear and plain intention to extinguish the aboriginal right at issue.

les activités des autochtones, d'une manière indiquant l'existence de l'intention claire et expresse requise pour entraîner l'extinction du droit ancestral en cause.

109 The Crown urges this Court to consider Order in Council P.C. 2539 carefully. The point, I think, is important, for in my view the Order in Council reveals a plain, clear and unequivocal intention on the part of the Crown to extinguish any aboriginal rights relating to commercial fisheries in British Columbia, and I shall first turn to that issue.

Le ministère public invite notre Cour à examiner attentivement le décret C.P. 2539. Ce point est, je crois, important car à mon avis le décret révèle l'intention claire, expresse et non équivoque de l'État d'éteindre tout droit ancestral relatif à la pêche commerciale en Colombie-Britannique. Je vais donc l'examiner en premier lieu.

110 Order in Council P.C. 2539 amended s. 8(2) of the *Special Fishery Regulations for the Province of British Columbia* dated February 9, 1915 in order to give the fishing authorities more effective means to enforce the prohibition regarding commercial fisheries found at that time in the regulations relating to the Indian food fishing rights, while also vesting in the Chief Inspector of Fisheries the power to require permits for Indian fishing for food. As this Court held in *Sparrow, supra*, at p. 1096, "[t]he 1917 regulations were intended to make still stronger the provisions against commercial fishing in the exercise of the Indian right to fish for food" (emphasis added). The prohibition found in s. 8(2) had been introduced in the *1894 Regulations* (as s. 1), one of the very first enactments dealing with Indian Fisheries in British Columbia. Although I have found it useful to underline some key passages, it is necessary to consider Order in Council 2539 in its entirety in order to fully understand its meaning. It reads:

Le décret C.P. 2539 a modifié le par. 8(2) des *Règlements de pêche particuliers à la Colombie-Britannique*, datés du 9 février 1915, afin de donner aux responsables de la pêche des moyens plus efficaces de faire respecter l'interdiction concernant la pêche commerciale qui figurait alors dans le règlement régissant les droits des Indiens de pêcher à des fins alimentaires, et de conférer à l'inspecteur en chef des pêcheries le pouvoir d'exiger que les Indiens se procurent des permis les autorisant à pêcher pour se nourrir. Comme a conclu notre Cour dans *Sparrow*, précité, à la p. 1096, «[l]e règlement de 1917 avait pour but de rendre encore plus sévères les dispositions interdisant la pêche commerciale dans l'exercice du droit des Indiens de pêcher à des fins alimentaires» (je souligne). L'interdiction énoncée au par. 8(2) avait été introduite par le *Règlement de 1894* (à l'art. 1), l'un des tout premiers textes de loi portant sur la pêche indienne en Colombie-Britannique. Même si j'ai jugé utile de souligner certains passages clefs du décret C.P. 2539, il est nécessaire d'examiner celui-ci dans son ensemble afin de bien en saisir le sens. Voici le texte du décret:

Whereas it is represented that since time immemorial, it has been the practice of the Indians of British Columbia to catch salmon by means of spears and otherwise after they have reached the upper non-tidal portions of the rivers;

[TRADUCTION] Attendu qu'on fait valoir que, depuis des temps immémoriaux, les Indiens de la Colombie-Britannique ont pour pratique de capturer le saumon au harpon ou par d'autres moyens après que le poisson a atteint les parties supérieures des eaux sans marée des cours d'eau;

And whereas while after commercial fishing began it became eminently desirable that all salmon that succeeded in reaching the upper waters should be allowed to go on to their spawning beds unmolested, in view of the great importance the Indians attached to their prac-

Et attendu que, depuis le début de la pêche commerciale, il est devenu éminemment souhaitable que tous les saumons qui réussissent à remonter dans ces eaux puissent atteindre indemnes les frayères, vu la grande importance que les Indiens attachent à cette pratique, il

tice of catching salmon they have permitted to do so for their own food purposes only, and to this end subsection 2 of section 8 of the Special Fishery Regulations for British Columbia provides as follows: —

“2. Indians may, at any time, with the permission of the Chief Inspector of Fisheries, catch fish to be used as food for themselves and their families, but for no other purpose; but no Indian shall spear, trap or pen fish on their spawning grounds, or in any place leased or set apart for the natural or artificial propagation of fish, or in any other place otherwise specially reserved.”

And whereas notwithstanding this concession, great difficulty is being experienced in preventing the Indians from catching salmon in such waters for commercial purposes and recently, an Indian was convicted before a local magistrate for a violation of the above quoted regulation, the evidence being that he had been found fishing and subsequently selling fish. The case was appealed and the decision of the magistrate reversed, it being held that there was no proof that the fish caught by the Indian were those sold by him;

And whereas it is further represented that it is practically impossible for the Fishery Officers to keep fish that may be caught by the Indians in non-tidal waters, ostensibly for their own food purposes, under observation from the time they are caught until they are finally disposed of in one way or another;

And whereas the Department of the Naval Service is informed that the Indians have concluded that this regulation is ineffective, and this season arrangements are being made by them to carry on fishing for commercial purposes in an extensive way;

And whereas it is considered to be in the public interest that this should be prevented and the Minister of the Naval Service, after consultation with the Department of Justice on the subject, recommends that action as follows be taken;

Therefore His Excellency the Governor General in Council, under the authority of section 45 of the Fisheries Act, 4-5 George V, Chapter 8, is pleased to order and it is hereby ordered as follows: —

Subsection 2 of section 8 of the Special Fishery Regulations for the Province of British Columbia, adopted

leur a été permis de le faire pour se nourrir seulement; et, à cette fin, le paragraphe 2 de l'article 8 des Règlements de pêche particuliers à la Colombie-Britannique prévoit ce qui suit: —

«2. Les Indiens, avec la permission de l'inspecteur en chef des pêcheries, peuvent en tout temps capturer du poisson destiné à leur alimentation et à celle de leur famille, mais il leur est défendu de faire servir à d'autres fins, le poisson ainsi capturé; toutefois, nul Indien ne doit faire usage de harpons ou de pièges, ni ne peut enfermer des poissons dans les frayères ni dans aucun autre endroit affecté à la reproduction naturelle ou artificielle du poisson, ni en tout autre lieu réservé.»

Et attendu que, en dépit de cette concession, il est très difficile d'empêcher les Indiens de pêcher le saumon à des fins commerciales dans ces eaux et que, récemment, un Indien a été déclaré coupable par un magistrat local d'une infraction au règlement précité, la preuve ayant établi qu'il avait pêché et ensuite vendu le poisson capturé. L'affaire a été portée en appel et la décision du magistrat infirmée, le tribunal statuant qu'il n'y avait aucune preuve que les poissons pris par l'Indien étaient ceux qu'il avait vendus;

Et attendu qu'on fait, aussi valoir qu'il est pratiquement impossible pour les surveillants des pêches d'observer constamment le poisson qui a pu être pris par les Indiens dans les eaux sans marée, apparemment pour leur propre alimentation, depuis le moment où il est pris jusqu'à celui où il en est disposé définitivement, d'une manière ou d'une autre;

Et attendu que le ministère du Service naval a été informé que les Indiens ont conclu que ce règlement est inefficace, et que, cette saison, ils font des préparatifs en vue de pêcher à des fins commerciales sur une grande échelle;

Et attendu qu'il est jugé être dans l'intérêt public d'empêcher ces activités, et que le ministère du Service naval, après avoir consulté le ministère de la Justice à cet égard, recommande que soient prises les mesures suivantes;

À ces causes, il plaît à Son Excellence le Gouverneur général en conseil, sous l'empire de l'article 45 de la *Loi sur les pêcheries*, 4-5 George V, chapitre 8, de décréter ce qui suit: —

Le paragraphe 2 de l'article 8 des Règlements de pêche particuliers à la Colombie-Britannique, pris par

by Order in Council of the 9th February, 1915, is hereby rescinded, and the following is hereby enacted and substituted in lieu thereof: —

“2. An Indian may, at any time, with the permission of the Chief Inspector of Fisheries, catch fish to be used as food for himself and his family, but for no other purpose. . . . An Indian shall not fish for or catch fish pursuant to the said permit except in the waters by the means or in the manner and within the time limit expressed in the said permit, and any fish caught pursuant to any such permit shall not be sold or otherwise disposed of and a violation of the provisions of the said permit shall be deemed to be a violation of these regulations.

(a) Proof of a sale or of a disposition by any other means by an Indian of any fish shall be prima facie evidence that such fish was caught by the said Indian, and that it was caught for a purpose other than to be used as food for himself or his family, and shall throw on the Indian the onus of proving that such fish was not caught under or pursuant to the provisions of any such permit.

(b) No Indian shall spear, trap or pen fish on their spawning grounds, or in any place leased or set apart for the natural or artificial propagation of fish, or in any other place otherwise specially reserved.

(c) Any person buying any fish or portion of any fish caught under such permit shall be guilty of an offence against these regulations.” [Emphasis added.]

décret daté du 9 février 1915, est par les présentes abrogé et remplacé par ce qui suit: —

«2. Les Indiens avec la permission de l'inspecteur en chef des pêcheries, peuvent en tout temps capturer du poisson destiné à leur alimentation et à celle de leur famille, mais il leur est défendu de faire servir à d'autres fins, le poisson ainsi capturé. [. . .] Les Indiens n'ont pas le droit de capturer les espèces de poisson spécifiées, si ce n'est dans les eaux, d'après le procédé, et à l'époque prescrite dans ce permis, et ils ne peuvent ni les vendre ni en disposer autrement, toutes violations des dispositions du permis constituent une infraction à ces règlements.

a) Le fait pour un indien de vendre du poisson ou d'en disposer de toute autre façon constitue une preuve suffisante pour faire soupçonner que le poisson a été capturé par cet indien, et qu'il l'a été dans un but étranger à celui de son alimentation ou celle de sa famille; il lui devient conséquemment nécessaire de prouver que ce poisson n'a pas été pêché en vertu des dispositions du permis.

b) Nul indien ne peut faire usage de harpons ou de pièges, ni ne peut enfermer des poissons dans les frayères ni dans aucun autre endroit affecté à la reproduction naturelle ou artificielle du poisson, ni en tout autre lieu réservé.

c) Toute personne achetant du poisson ou un morceau de poisson capturé en vertu d'un tel permis se rend passible d'un délit contre ces règlements.» [Je souligne.]

111 The key to a proper understanding of the Order in Council lies in its preamble, in which the purpose and rationale of the prohibition is clearly stated. In the first two paragraphs of the preamble, there is an explicit reference to (a) the fact that the aboriginal peoples of British Columbia had been catching salmon by means of spears and otherwise “since time immemorial” and to (b) the fact that, in view of the great importance the aboriginal people of British Columbia attached to that practice, they have been permitted to do so for their own food purposes as provided for in s. 8(2) of the 1915 regulations. To me, this constitutes explicit recognition on the part of the Crown of the importance of allowing the aboriginal people of British Columbia to catch fish as they had been doing since time immemorial. Therefore, the permission provided for in s. 8(2) constitutes a positive legislative rec-

La clef pour bien interpréter le décret réside dans son préambule, où sont clairement énoncés l'objet et la raison d'être de l'interdiction. Dans les deux premiers paragraphes du préambule, on fait explicitement mention: a) du fait que les peuples autochtones de la Colombie-Britannique ont pris du saumon à l'aide de harpons ou par d'autres moyens «depuis des temps immémoriaux»; b) du fait que, vu la grande importance qu'accordaient à cette pratique les peuples autochtones de la Colombie-Britannique, ils étaient autorisés à la poursuivre pour satisfaire leurs propres besoins alimentaires, conformément au par. 8(2) du règlement de 1915. À mon sens, cela constitue la reconnaissance explicite par l'État du fait qu'il était important de permettre aux autochtones de la Colombie-Britannique de prendre le poisson comme ils l'avaient fait depuis des temps immé-

ognition of the aboriginal people's right to engage in fishing practices they had engaged in since time immemorial and which had great importance to them. In other words, in light of this preamble, s. 8(2) constitutes the translation of an acknowledged aboriginal practice into a statutory right.

However, it is expressly noted in the preamble, as it is in s. 8(2), that this "concession" on the part of the Crown in favour of aboriginal peoples of British Columbia regarding traditional fishing practices was not to have any commercial dimension. In other words, the Crown refused to recognize that traditional aboriginal fishing practices could in any way translate into statutory rights relating to commercial fisheries while expressly providing that engaging in commercial practices in the exercise of the Indian statutory right to food fishing was prohibited and constituted a regulatory offence.

I cannot come to any other conclusion than that Order in Council P.C. 2539 evinces a clear and plain intention on the part of the Crown to extinguish aboriginal rights relating to commercial fisheries — should they ever have existed. When the Crown has specifically chosen to address the issue of the translation of aboriginal practices into statutory rights and has expressly decided to limit the scope of these rights, as was done in British Columbia in relation to Indian fishing practices, then it follows, in my view, that aboriginal rights relating to practices that were specifically excluded were thereby extinguished.

I also note that, as the respondent explained, s. 8(2) has always been a central feature of the regulatory scheme regarding the Indian food fishery in British Columbia since 1894 (*Fishery Regulations for the Province of British Columbia*, P.C. 650); see, for example, s. 13(2) of the 1922 Regulations (*Special Fishery Regulations for the Province of British Columbia*, P.C. 1918), s. 15 of the 1925 Regulations (*Special Fishery Regulations for the*

moriaux. Par conséquent, la permission accordée au par. 8(2) constitue une reconnaissance concrète dans la loi du droit des autochtones de poursuivre les pratiques qu'ils suivaient depuis des temps immémoriaux et qui avaient pour eux une grande importance. Autrement dit, vu sous l'éclairage de ce préambule, le par. 8(2) fait d'une pratique autochtone reconnue un droit prévu par la loi.

Toutefois, il est expressément souligné dans le préambule, tout comme au par. 8(2), que cette «concession» de l'État en faveur des peuples autochtones de la Colombie-Britannique en ce qui concerne les pratiques traditionnelles de pêche n'aurait pas de dimension commerciale. En d'autres mots, l'État refusait de reconnaître que les pratiques traditionnelles de pêche des autochtones pouvaient, de quelque manière que ce soit, être converties en droits de pêche commerciale, et indiquait expressément qu'il était interdit de s'adonner à des pratiques commerciales dans l'exercice du droit qu'avaient les Indiens en vertu de la loi de pêcher pour se nourrir, et que de telles pratiques constituaient des infractions au règlement.

Je ne peux que conclure qu'il ressort du décret C.P. 2539 une intention claire et expresse de la part de l'État d'éteindre les droits ancestraux relatifs à la pêche commerciale — si ces droits ont jamais existé. Lorsque l'État a spécifiquement choisi de prendre des mesures concernant la question de la conversion de pratiques autochtones en droits prévus par la loi, et qu'elle a expressément décidé de limiter la portée de ces droits, comme ce fut le cas en Colombie-Britannique relativement aux pratiques des Indiens en matière de pêche, il s'ensuit, à mon avis, que les droits ancestraux touchant des pratiques qui ont été spécifiquement exclues ont, de ce fait, été éteints.

Je souligne également que, comme l'a expliqué l'intimée, le par. 8(2) a toujours été un aspect central du régime de réglementation touchant la pêche pratiquée à des fins alimentaires par les Indiens en Colombie-Britannique depuis 1894 (*Règlement de pêche de la Colombie-Britannique*, C.P. 650); voir, par exemple, le par. 13(2) du Règlement de 1922 (*Règlements de pêche particuliers à la Colombie-Britannique*, C.P. 1918), l'art. 15 du Règlement de

Province of British Columbia, P.C. 483), s. 11(2) of the 1930 Regulations (*Special Fishery Regulations for the Province of British Columbia*, P.C. 512), s. 10(2) of the 1938 Regulations (*Special Fishery Regulations for the Province of British Columbia*, P.C. 899), s. 32 of the 1954 Regulations (*British Columbia Fishery Regulations*, SOR/54-659), s. 29 of the 1977 Regulations (*British Columbia Fishery (General) Regulations*, SOR/77-716), s. 27 of the 1984 Regulations (*British Columbia Fishery (General) Regulations*, SOR/84-248). Thus, in light of the provision's rationale as stated explicitly in Order in Council 2539, it seems to me that it has always been a central feature of the regulatory scheme regarding the Indian food fishery in British Columbia that the Crown did not perceive the Indians' fishing rights rooted in practices integral to their distinctive culture for centuries as extending to commercial fisheries.

1925 (*Règlements de pêche particuliers à la Colombie-Britannique*, C.P. 483), le par. 11(2) du Règlement de 1930 (*Règlements de pêche particuliers à la Colombie-Britannique*, C.P. 512), le par. 10(2) du Règlement de 1938 (*Règlements de pêche particuliers à la Colombie-Britannique*, C.P. 899), l'art. 32 du Règlement de 1954 (*Règlement de pêche de la Colombie-Britannique*, DORS/54-659), l'art. 29 du Règlement de 1977 (*Règlement de pêche général de la Colombie-Britannique*, DORS/77-716) et l'art. 27 du Règlement de 1984 (*Règlement de pêche général de la Colombie-Britannique*, DORS/84-248). Par conséquent, à la lumière de la raison d'être de la disposition, qui est explicitement énoncée dans le décret C.P. 2539, il me semble que le point de vue de l'État — selon lequel les droits de pêche des Indiens enracinés dans des pratiques faisant partie intégrante de leur culture distinctive depuis des siècles ne s'étendaient pas à la pêche commerciale — a toujours été une caractéristique centrale du régime de réglementation visant la pêche pratiquée à des fins alimentaires par les Indiens en Colombie-Britannique.

115 My colleague Justice McLachlin, in her reasons, expresses the opinion in *Van der Peet*, *supra*, that Order in Council P.C. 2539 did not extinguish aboriginal rights to fish commercially for two reasons. The first is that a clear and plain intention on the part of the Crown to extinguish an aboriginal right can only be found if three elements are present: acknowledgment of an aboriginal right, conflict of the right proposed with policy and resolution of the two. Order in Council P.C. 2539 fails to meet that test, she states, because "[t]here is no recognition in the words of the regulation of any aboriginal right to fish"; see para. 289. Her second reason is that aboriginal peoples of British Columbia have never been totally prohibited from engaging in commercial fisheries since it has always been available to them to do so according to the regulatory scheme relating to commercial fisheries.

Dans ses motifs dans l'arrêt *Van der Peet*, précité, ma collègue le juge McLachlin exprime l'avis que le décret C.P. 2539 n'a pas éteint les droits ancestraux de pêche commerciale, et ce pour deux raisons. La première est qu'il n'est possible de conclure à l'intention claire et expresse de l'État d'éteindre un droit ancestral que si trois éléments sont réunis: la reconnaissance de l'existence d'un droit ancestral; un conflit entre le droit revendiqué et la politique proposée; la résolution du conflit. Or, affirme-t-elle, le décret C.P. 2539 ne satisfait pas à ce critère, parce que «[l]e texte du règlement ne reconnaît d'aucune façon l'existence de quelque droit de pêche ancestral»; voir le par. 289. La seconde raison est qu'il n'a jamais été totalement interdit aux peuples autochtones de la Colombie-Britannique de participer à la pêche commerciale, puisqu'il leur a toujours été loisible de le faire conformément au régime de réglementation visant cette pêche.

116 I do not agree with my colleague that finding a clear and plain intention should require an

Je ne souscris pas à l'avis de ma collègue que, pour conclure à l'existence d'une intention claire

acknowledgment of the existence of an aboriginal right on the part of the Crown. Although the fiduciary nature of the relationship between the Crown and aboriginal peoples must be taken into account in assessing whether or not a clear and plain intention to extinguish an aboriginal right exists in a given scheme, one must be careful not to set standards that could realistically never be met by the Crown since this would, as a practical matter, render virtually meaningless the Crown's power to extinguish aboriginal rights. Historically, the Crown has always been very reluctant to recognize any legal effect to concepts such as "aboriginal rights" and "aboriginal title", as this Court discussed at length in *Sparrow*, *supra*, at pp. 1103 *et seq.* This historical reality cannot be ignored in assessing whether a plain and clear intention to extinguish an aboriginal right exists in a given context. To require specific acknowledgment of the existence of an aboriginal right by the Crown in the manner proposed by my colleague McLachlin J. would for that reason not, in my view, be realistic. Indeed such an approach has been implicitly rejected by this Court; see, for example, *Canadian Pacific Ltd. v. Paul*, [1988] 2 S.C.R. 654.

I also disagree with my colleague's reasoning that Order in Council P.C. 2539 does not constitute a clear and plain intention to extinguish an aboriginal right because aboriginal peoples had always been permitted to participate in commercial fisheries in accordance with the distinct regulatory scheme relating to commercial fisheries. As I mentioned, I think the Order in Council speaks for itself. It seems to me that when, in regulations dealing specifically with the rights of the Indians to fish, it prohibited them from engaging in commercial fisheries, it must have intended to limit their rights *qua* Indians. I do not see that it is necessary for the Crown to prohibit them from fishing under regulations directed not only to Indians but also to all members of the public.

et expresse, il faut qu'il y ait reconnaissance par l'État de l'existence d'un droit ancestral. Même si la nature fiduciaire des rapports entre l'État et les peuples autochtones doit être prise en considération dans l'examen de la question de savoir s'il se dégage d'un régime donné une intention claire et expresse d'éteindre un droit ancestral, il faut avoir soin de ne pas fixer de normes auxquelles l'État ne pourrait réalistement jamais satisfaire, car, dans la pratique, cela rendrait virtuellement sans effet le pouvoir de l'État d'éteindre des droits ancestraux. Historiquement, l'État a toujours été très réticent à reconnaître quelque effet juridique à des concepts tels que les «droits ancestraux» et le «titre aborigène», comme il ressort de l'examen approfondi fait par notre Cour dans *Sparrow*, précité, aux pp. 1103 et suiv. Il ne faut pas faire abstraction de cette réalité historique dans l'examen de la question de savoir s'il existe, dans un contexte donné, une intention claire et expresse d'éteindre un droit ancestral. Voilà pourquoi il serait irréaliste, à mon sens, d'exiger la reconnaissance spécifique par l'État de l'existence d'un droit ancestral, comme le propose ma collègue le juge McLachlin. De fait, notre Cour a implicitement rejeté une telle approche; voir, par exemple, l'arrêt *Canadien Pacifique Ltée c. Paul*, [1988] 2 R.C.S. 654.

Je ne suis pas d'accord non plus avec le raisonnement de ma collègue lorsqu'elle dit que le décret C.P. 2539 n'indique pas une intention claire et expresse d'éteindre un droit ancestral parce que les autochtones ont toujours été autorisés à participer à la pêche commerciale conformément au régime de réglementation distinct applicable à cette pêche. Comme je l'ai dit plus tôt, j'estime que le texte du décret est éloquent. Il me semble que lorsque, dans un règlement portant précisément sur les droits de pêche des Indiens, l'État interdisait à ceux-ci de pratiquer la pêche commerciale, il devait avoir l'intention de limiter les droits dont ils jouissaient en qualité d'Indiens. Je ne crois pas qu'il soit nécessaire que l'État interdise aux Indiens de pêcher dans un règlement qui s'appliquerait non seulement à eux, mais aussi à tous les membres du public.

118 It is also important to note that although commercial fishing was, generally speaking, not totally prohibited, commercial harvesting of herring spawn on kelp was the subject of a total prohibition until 1974. For that reason, the considerations to be taken into account at this stage of the analysis are different from those in *Van der Peet, supra*, because in that case a general aboriginal right to commercial fisheries was claimed, as opposed to the more specific right to commercial harvesting of herring spawn on kelp claimed in the instant case. This leads me to discuss briefly the Crown's second submission.

119 The Crown argued that a clear and plain intention on the part of the Crown to extinguish the aboriginal right claimed by the appellants could be found in the regulatory scheme relating to commercial harvesting of herring spawn on kelp. That scheme has for many years prohibited commercial harvesting of herring spawn on kelp, as indicated by the Chief Justice and McLachlin J., although since 1974 the activity has been permitted to those to whom a licence has been issued for that purpose. The Crown urges this Court to distinguish the regulations at issue in *Sparrow, supra*, on the basis that those regulations were concerned with protecting the food fishery for aboriginal people and were, therefore, found to constitute an affirmation of that right.

120 The Chief Justice dismissed the argument on the basis that the regulatory scheme relating to commercial harvesting of herring spawn on kelp was analogous to that discussed in *Sparrow, supra*. There, this Court addressed the question of extinguishment in the context of the aboriginal right of the Musqueam Indians of British Columbia to fish for food and ceremonial purposes. This Court's analysis demonstrated that, over the years, Indian fishing for food and ceremonial purposes had been progressively regulated; see pp. 1095 *et seq.* as well as the reasons of Dickson J. (as he then was) in *Jack v. The Queen*, [1980] 1 S.C.R. 294, at pp. 308 *et seq.* But, however regulated the activity became, this Court refused to find that the aborigi-

Il importe en outre de souligner que, même si la pêche commerciale n'était pas, de façon générale, totalement interdite, la récolte commerciale de la rogue de hareng sur varech a fait l'objet d'une interdiction totale jusqu'en 1974. Pour cette raison, les facteurs dont il faut tenir compte à cette étape de l'analyse ne sont pas les mêmes que dans *Van der Peet*, précité, étant donné que, dans cette affaire, l'on revendiquait un droit ancestral général de pratiquer la pêche commerciale, par opposition au droit plus spécifique réclamé en l'espèce, soit celui de récolter commercialement de la rogue de hareng sur varech. Cela m'amène à examiner brièvement le second argument du ministère public.

Le ministère public a soutenu qu'il était possible de dégager du régime de réglementation visant la récolte commerciale de la rogue de hareng sur varech une intention claire et expresse de la part de l'État d'éteindre le droit ancestral revendiqué par les appelants. Ce régime a, pendant de nombreuses années, interdit la récolte commerciale de cette ressource, comme l'ont indiqué le Juge en chef et le juge McLachlin, quoique, depuis 1974, les titulaires de permis délivrés à cette fin peuvent exercer cette activité. Le ministère public invite notre Cour à établir une distinction entre le règlement visé en l'espèce et celui en cause dans *Sparrow*, précité, parce que le second visait à protéger le droit des autochtones de pêcher pour se nourrir, et qu'il a, en conséquence, été jugé qu'il constituait une confirmation de ce droit.

Le Juge en chef a rejeté cet argument pour le motif que le régime de réglementation de la récolte commerciale de la rogue de hareng sur varech était analogue au régime examiné dans *Sparrow*, précité. Dans cet arrêt, notre Cour a examiné la question de l'extinction dans le contexte du droit ancestral des Indiens Musqueams de la Colombie-Britannique de pêcher à des fins alimentaires et rituelles. L'analyse de notre Cour a démontré que, au fil des ans, la pêche pratiquée par les Indiens à des fins alimentaires et rituelles avait été progressivement réglementée: voir les pp. 1095 *et suiv.*, ainsi que les motifs du juge Dickson (plus tard Juge en chef) dans *Jack c. La Reine*, [1980] 1 R.C.S. 294, aux pp. 308 *et suiv.* Toutefois, peu

nal right of fishing for food and social and ceremonial purposes had been extinguished. The Court had this to say, at pp. 1097 and 1099:

At bottom, the respondent's argument confuses regulation with extinguishment. That the right is controlled in great detail by the regulations does not mean that the right is thereby extinguished.

There is nothing in the *Fisheries Act* or its detailed regulations that demonstrates a clear and plain intention to extinguish the Indian aboriginal right to fish. The fact that express provision permitting the Indians to fish for food may have applied to all Indians and that for an extended period permits were discretionary and issued on an individual rather than a communal basis in no way shows a clear intention to extinguish. These permits were simply a manner of controlling the fisheries, not defining underlying rights.

If this were all, I would be inclined to agree with the Chief Justice's position on this point. But I think there is an important distinction to be drawn between the regulations at issue here and those discussed in *Sparrow*. While commercial harvesting of herring spawn on kelp had been totally prohibited in British Columbia until 1974, Indian fishing for food including social and ceremonial purposes had never been prohibited when s. 35(1) of the *Constitution Act, 1982* came into force. For this reason, I would refrain from holding that the reasoning adopted by this Court in *Sparrow*, which was to the effect that mere regulation of a right does not amount to a clear and plain intention to extinguish an aboriginal right, would be determinative of the Crown's second argument in the present case.

However, I prefer not to discuss this issue in further detail and will not, therefore, discuss whether the prohibition relating to commercial harvesting of herring spawn on kelp in force until 1974 in itself indicates a plain and clear intention on the part of the Crown to extinguish the aboriginal right

importe le degré de réglementation auquel l'activité est devenue assujettie, notre Cour a refusé de conclure que le droit ancestral de pêcher à des fins alimentaires, sociales et rituelles avait été éteint. Elle a dit ceci, aux pp. 1097 et 1099:

En réalité, l'intimé confond dans son argumentation la réglementation et l'extinction. Que l'exercice du droit fasse l'objet d'une réglementation très minutieuse, cela ne signifie pas que ce droit est par le fait même éteint.

La *Loi sur les pêcheries* ou ses règlements d'application détaillés ne font état d'aucune intention claire et expresse de mettre fin au droit ancestral des Indiens de pêcher. Le fait qu'une disposition autorisant explicitement les Indiens à pêcher à des fins de subsistance ait pu s'appliquer à tous les Indiens et que la délivrance des permis ait pendant longtemps été discrétionnaire et effectuée sur une base individuelle plutôt que collective n'indique aucunement une intention claire d'éteindre le droit. Ces permis constituaient simplement une façon de contrôler les pêcheries et non de définir des droits sous-jacents.

Si c'était tout, je serais porté à souscrire à la position du Juge en chef sur ce point. Cependant, je crois qu'il faut faire une distinction importante entre le règlement visé en l'espèce et celui en cause dans *Sparrow*. Alors que la récolte commerciale de la rogue de hareng sur varech a été totalement interdite en Colombie-Britannique jusqu'en 1974, la pêche pratiquée par les Indiens à des fins alimentaires, y compris à des fins sociales et rituelles, ne l'avait jamais été lorsque le par. 35(1) de la *Loi constitutionnelle de 1982* est entré en vigueur. Pour cette raison, je m'abstiendrais de conclure que le raisonnement suivi par notre Cour dans *Sparrow*, savoir que la simple réglementation d'un droit ancestral ne constitue pas une intention claire et expresse d'éteindre ce droit, est déterminant à l'égard du second argument du ministère public dans la présente espèce.

Toutefois, je préfère ne pas examiner ce point plus en détail, et je ne vais donc pas trancher la question de savoir si l'interdiction de récolter commercialement de la rogue de hareng sur varech qui a été en vigueur jusqu'en 1974 indique en soi une intention claire et expresse de l'État d'éteindre le

claimed by the appellants. It is not necessary for me to do so since I have already concluded that the Crown has expressed a clear and plain intention in Order in Council P.C. 2539 to extinguish any aboriginal rights relating to commercial fisheries in British Columbia — assuming they ever existed. The question whether extinguishment of aboriginal rights can occur by necessary implication and if so, in what circumstances, is therefore left to another day.

droit ancestral revendiqué par les appelants. Il n'est pas nécessaire que je le fasse, puisque j'ai déjà conclu que l'État avait manifesté, dans le décret C.P. 2539, l'intention claire et expresse d'éteindre tous les droits ancestraux relatifs à la pêche commerciale en Colombie-Britannique — à supposer qu'ils aient jamais existé. La question de savoir si des droits ancestraux peuvent être éteints par implication nécessaire, et, si oui, dans quelles circonstances, devra donc être tranchée à une autre occasion.

123

On a final note, I wish to emphasize that our Court has recently held on two different occasions that s. 12 of the *Natural Resources Transfer Agreement* (confirmed by the *Constitution Act, 1930*, R.S.C., 1985, App. II, No. 26, Schedule 2) constituted a clear and plain intention on the part of the Crown to extinguish treaty rights to commercial hunting; see *R. v. Horseman*, [1990] 1 S.C.R. 901, at p. 933 (*per* Cory J.), and *R. v. Badger*, [1996] 1 S.C.R. 771, at para. 46 (*per* Cory J.). This provision reads:

En terminant, je tiens à souligner que notre Cour a récemment statué, à deux occasions différentes, que l'art. 12 de la *Convention sur le transfert des ressources naturelles* (confirmée par la *Loi constitutionnelle de 1930*, L.R.C. (1985), app. II, n° 26, annexe 2) exprimait l'intention claire et expresse de l'État d'éteindre les droits issus de traités en matière de chasse commerciale: voir *R. c. Horseman*, [1990] 1 R.C.S. 901, à la p. 933 (le juge Cory), et *R. c. Badger*, [1996] 1 R.C.S. 771, au par. 46 (le juge Cory). Cette disposition est ainsi rédigée:

12. In order to secure to the Indians of the Province the continuance of the supply of game and fish for their support and subsistence, Canada agrees that the laws respecting game in force in the Province from time to time shall apply to the Indians within the boundaries thereof, provided, however, that the said Indians shall have the right, which the Province hereby assures to them, of hunting, trapping and fishing game and fish for food at all seasons of the year on all unoccupied Crown lands and on any other lands to which the said Indians may have a right of access.

12. Pour assurer aux Indiens de la province la continuation de l'approvisionnement de gibier et de poisson destinés à leurs support et subsistance, le Canada consent à ce que les lois relatives au gibier et qui sont en vigueur de temps à autre dans la province, s'appliquent aux Indiens dans les limites de la province; toutefois, lesdits Indiens auront le droit que la province leur assure par les présentes de chasser et de prendre le gibier au piège et de pêcher le poisson, pour se nourrir en toute saison de l'année sur toutes les terres inoccupées de la Couronne et sur toutes les autres terres auxquelles lesdits Indiens peuvent avoir un droit d'accès.

This provision is similar in many respects to Order in Council P.C. 2539. They both are provisions in which the Crown specifically effected a translation of traditional aboriginal practices into legal rights. In both cases, the rights were limited to sustenance purposes. However, in the Order in Council, fishing for commercial purposes was expressly excluded. This was not the case in s. 12 of the *Natural Resources Transfer Agreement* in which no mention is made of commercial practices. Nonetheless, our Court held that it sufficiently demonstrated a clear and plain intention on the part of the

Cette disposition est, à bien des égards, analogue au décret C.P. 2539. Dans les dispositions des deux textes, l'État a spécifiquement fait de pratiques autochtones des droits prévus par la loi. Dans les deux cas, l'exercice des droits visés a été limité à des fins alimentaires. Cependant, dans le décret, la pêche à des fins commerciales a été expressément exclue, alors que ce n'a pas été le cas à l'art. 12 de la *Convention sur le transfert des ressources naturelles*, dans lequel il n'est fait aucune mention des pratiques commerciales. Néanmoins, notre Cour a conclu que cette disposi-

Crown to extinguish commercial rights to hunt for commercial purposes that had been recognized in a treaty. If s. 12 reveals a clear and plain intention to extinguish treaty rights relating to commercial hunting, it is difficult to see how this Court could conclude that Order in Council P.C. 2539 — which is more explicit regarding the exclusion of any commercial component of fishing rights — does not reveal a clear and plain intention on the part of the Crown to extinguish commercial fishing rights in British Columbia.

I am, therefore, of the view that the Crown has established that, assuming appellants were exercising an aboriginal right when they offered to sell herring spawn on kelp, such a right has been extinguished.

Conclusion

I would dismiss the appeals and answer the constitutional question in the negative.

The following are the reasons delivered by

L'HEUREUX-DUBÉ J. — This appeal, as well as the appeals in *R. v. Van der Peet*, [1996] 2 S.C.R. 507, and *R. v. N.T.C. Smokehouse Ltd.*, [1996] 2 S.C.R. 672, in which reasons are being released concurrently, concern aboriginal rights as constitutionally protected under s. 35(1) of the *Constitution Act, 1982*.

This broad issue was dealt with in *Van der Peet*, released concurrently. Both cases involve mainly the definition of the nature and extent of aboriginal rights. In this case, the particular question is whether the Heiltsuk Band, of which the appellants are members, possesses an existing aboriginal right to fish which includes the right to sell, trade and barter fish for commercial purposes. If this right exists, the Court must then determine whether the *Pacific Herring Fishery Regulations*, SOR/84-324, enacted pursuant to the *Fisheries Act*, R.S.C. 1970, c. F-14, constitute a *prima facie*

intention démontrant suffisamment l'existence d'une intention claire et expresse de la part de l'État d'éteindre les droits de chasser à des fins commerciales qui avaient été reconnus par traité. Si l'art. 12 révèle une intention claire et expresse d'éteindre les droits issus de traité en matière de chasse commerciale, il est difficile d'imaginer comment notre Cour pourrait conclure que le décret C.P. 2539 — qui est plus explicite en ce qui concerne l'exclusion de toute dimension commerciale des droits de pêche — n'indique pas une intention claire et expresse de la part de l'État d'éteindre les droits de pêche commerciale en Colombie-Britannique.

Je suis donc d'avis que le ministère public a établi que, à supposer que les appelants exerçaient un droit ancestral quand ils ont offert de vendre de la rogue de hareng sur varech, ce droit a été éteint.

Conclusion

Je suis d'avis de rejeter les pourvois et de répondre à la question constitutionnelle par la négative.

Les motifs suivants ont été rendus par

LE JUGE L'HEUREUX-DUBÉ — Le présent pourvoi ainsi que les pourvois *R. c. Van der Peet*, [1996] 2 R.C.S. 507, et *R. c. N.T.C. Smokehouse Ltd.*, [1996] 2 R.C.S. 672, dont les motifs sont rendus en même temps, portent sur les droits ancestraux qui bénéficient de la protection de la Constitution en vertu du par. 35(1) de la *Loi constitutionnelle de 1982*.

Cette question générale a été étudiée dans l'arrêt *Van der Peet*, rendu à la même date. Ces pourvois portent respectivement principalement sur la définition de la nature et de la portée des droits ancestraux. En l'espèce, la question particulière est de savoir si la bande des Heiltsuk, à laquelle appartiennent les appelants, possède un droit de pêche ancestral existant qui inclut le droit de vendre et d'échanger du poisson à des fins commerciales. Si ce droit existe, notre Cour doit alors décider si le *Règlement de pêche du hareng du Pacifique*, DORS/84-324, adopté en application de la *Loi sur*

infringement of such right and, if so, whether the infringement is justified.

les pêcheries, S.R.C. 1970, ch. F-14, constitue une atteinte *prima facie* à ce droit et, dans l'affirmative, si cette atteinte est justifiée.

128 The Chief Justice has set out the facts and judgments and there is no need to restate them here. I will refer only to the constitutional question that he formulated after leave to appeal was granted by this Court:

Is s. 20(3) of the *Pacific Herring Fishery Regulations*, SOR/84-324, as it read on April 28, 1988, of no force or effect with respect to the appellants in the circumstances of these proceedings, in virtue of s. 52 of the *Constitution Act, 1982*, by reason of the aboriginal rights within the meaning of s. 35 of the *Constitution Act, 1982* invoked by the appellants?

Le Juge en chef a exposé les faits et les jugements, et il n'est pas nécessaire de les reprendre. Je ne citerai que la question constitutionnelle qu'il a formulée après que l'autorisation de pourvoi a été accordée par notre Cour:

Le paragraphe 20(3) du *Règlement de pêche du hareng du Pacifique*, DORS/84-324, tel qu'il se lisait le 28 avril 1988, est-il, dans les circonstances de la présente affaire, inopérant à l'égard des appelants en vertu de l'art. 52 de la *Loi constitutionnelle de 1982*, en raison des droits ancestraux au sens de l'art. 35 de la *Loi constitutionnelle de 1982*, qu'ils invoquent?

129 The Chief Justice is of the view that the Heiltsuk people do possess an aboriginal right to fish which includes the right to sell fish for commercial purposes. As well, referring to the *Sparrow* test, he holds that the aboriginal right to sell fish was not extinguished by a clear and plain intention and that s. 20(3) of the *Pacific Herring Fishery Regulations* constitutes a *prima facie* infringement of such right. He concludes, however, that the case should be remanded to trial on the question of justification because there is insufficient evidence to enable this Court to decide it. Lamer C.J. also opines that the elements of the infraction are all proven. I agree with the result reached by the Chief Justice and, generally, with the reasons he adopts subject, however, to the following remarks regarding mainly the definition of the nature and extent of aboriginal rights, and the delineation of the aboriginal right claimed in this case.

Le Juge en chef est d'avis que les Heiltsuk possèdent effectivement un droit de pêche ancestral qui inclut le droit de vendre du poisson à des fins commerciales. En outre, se reportant au test établi dans *Sparrow*, il estime que le droit ancestral de vendre du poisson n'a pas été éteint par suite de la manifestation d'une intention claire et expresse, et que le par. 20(3) du *Règlement de pêche du hareng du Pacifique* constitue une atteinte *prima facie* à ce droit. Il conclut toutefois qu'il y a lieu de renvoyer l'affaire pour la tenue d'un nouveau procès sur la question de la justification, étant donné que la preuve est insuffisante pour permettre à notre Cour de trancher celle-ci. Le juge en chef Lamer est aussi d'avis que les éléments de l'infraction ont tous été prouvés. Je suis d'accord avec le résultat auquel il arrive et, de façon générale, avec les motifs qu'il donne, sous réserve cependant des remarques suivantes, qui concernent surtout la définition de la nature et de la portée des droits ancestraux, ainsi que la délimitation du droit ancestral revendiqué en l'espèce.

130 I pause here to note that this case is confined to the recognition of an aboriginal right and to the protection afforded to it under s. 35(1) of the *Constitution Act, 1982*. The appellants did not invoke by-laws applicable on reserve lands, nor did they rely on any aboriginal title or treaty rights. The appellants simply argue that the Heiltsuk possess an aboriginal right to fish — arising out of the historic occupation and use of their ancestral lands —

Je fais une parenthèse pour dire que la présente affaire ne porte que sur la reconnaissance d'un droit ancestral et sur la protection accordée à ce droit en vertu du par. 35(1) de la *Loi constitutionnelle de 1982*. Les appelants n'ont pas invoqué de règlement administratif applicable aux terres des réserves ni de titre aborigène ou de droits issus de traités. Ils prétendent simplement que les Heiltsuk ont — en raison de l'occupation et de l'utilisation

which includes the right to sell, trade and barter fish for commercial purposes, and that this right benefits from the s. 35(1) constitutional protection.

It is also noteworthy that the questions at issue must be considered in light of the analytical framework for constitutional claims of aboriginal right set out in *R. v. Sparrow*, [1990] 1 S.C.R. 1075. In a nutshell, the *Sparrow* test includes three steps, namely: (1) the assessment and definition of an existing aboriginal right (including extinguishment); (2) the establishment of a *prima facie* infringement of such right; and (3) the justification of the infringement. The case at bar involves all but the last step.

This being said, in the following discussion, I will briefly examine the approach to the interpretation of the nature and extent of aboriginal rights as well as the delineation of the aboriginal right claimed, and how they lead me to the same result as the Chief Justice on the question of the definition of the aboriginal right.

I. Interpretation of Aboriginal Rights

At the outset, I want to emphasize that when defining the nature and extent of constitutionally protected aboriginal rights, it is important to keep in mind the traditional and fundamental interpretative canons relating to aboriginal law and to s. 35(1) of the *Constitution Act, 1982*, which can be summarized as follows. Section 35(1) must be given a generous, large and liberal interpretation and uncertainties, ambiguities or doubts should be resolved in favour of the natives. Further, aboriginal rights must be construed in light of the special trust relationship and the responsibility of the Crown *vis-à-vis* aboriginal people. Finally, but most significantly, aboriginal rights protected under s. 35(1) have to be viewed in the context of the specific history and culture of the native society and with regard to native perspective on the meaning of the rights asserted. I wish to point out, in passing, that although the Chief Justice claims

historiques de leurs terres ancestrales — un droit ancestral de pêche qui inclut le droit de vendre et d'échanger du poisson à des fins commerciales, et que ce droit bénéficie de la protection constitutionnelle du par. 35(1).

Il convient également de noter que les questions en litige doivent être examinées à la lumière du cadre d'analyse des revendications de droits ancestraux en vertu de la Constitution qui a été exposé dans *R. c. Sparrow*, [1990] 1 R.C.S. 1075. Bref, le test formulé dans *Sparrow* comporte trois étapes: (1) l'évaluation et la définition d'un droit ancestral existant (y compris son extinction), (2) l'établissement d'une atteinte *prima facie* à ce droit, et (3) la justification de cette atteinte. Il faut, dans le cadre du présent pourvoi, passer par toutes ces étapes sauf la dernière.

Cela dit, je vais, dans les paragraphes qui suivent, examiner brièvement les méthodes qu'il convient d'appliquer pour interpréter la nature et la portée des droits ancestraux et définir le droit ancestral revendiqué, et expliquer ensuite pourquoi elles m'amènent au même résultat que le Juge en chef sur la question de la définition du droit ancestral.

I. Interprétation des droits ancestraux

Tout d'abord, je tiens à souligner que, pour définir la nature et la portée des droits ancestraux bénéficiant de la protection constitutionnelle, il importe de tenir compte des principes traditionnels et fondamentaux d'interprétation relatifs au droit touchant les autochtones et au par. 35(1) de la *Loi constitutionnelle de 1982*, qui peuvent être résumés de la façon suivante. Le paragraphe 35(1) doit recevoir une interprétation généreuse, large et libérale, et les ambiguïtés, doutes ou incertitudes doivent être résolus en faveur des autochtones. En outre, les droits ancestraux doivent être interprétés à la lumière des rapports spéciaux de fiduciaire et de la responsabilité de Sa Majesté à l'égard des peuples autochtones. Finalement, le dernier principe — mais aussi le plus important — est que les droits ancestraux protégés par le par. 35(1) doivent être interprétés dans le contexte de l'histoire et de la culture particulières de la société autochtone

131

1996 CanLII 160 (SCC)

132

133

to use these principles of interpretation, his approach to the definition of aboriginal rights appears to be somewhat restrictive.

concernée, et en tenant compte du point de vue des autochtones eux-mêmes quant à la signification des droits revendiqués. Je tiens à faire remarquer, en passant, que même si le Juge en chef affirme suivre ces principes d'interprétation, la méthode qu'il applique pour définir les droits ancestraux semble un peu restrictive.

134 The approach proposed by the Chief Justice centres on individualized practices of an aboriginal group of people which existed prior to contact with the Europeans. With respect, as I explained in detail in *Van der Peet*, *supra* — which reasons should be read as if herein recited at length — this position poses serious problems relating to both the characteristics and the time aspects of the definition of aboriginal rights.

La méthode proposée par le Juge en chef est axée sur les pratiques propres à un groupe d'autochtones et qui existaient avant le contact avec les Européens. En toute déférence, toutefois, comme je l'ai expliqué en détail dans *Van der Peet*, précité, — dont les motifs que j'y ai exposés doivent être tenus pour reproduits intégralement en l'espèce — cette position pose de sérieux problèmes tant en ce qui concerne les caractéristiques que la période dont il faut tenir compte pour définir les droits ancestraux.

135 In *Van der Peet*, after a detailed review of the possible approaches to the interpretation of aboriginal rights under s. 35(1), I concluded that the "frozen right" approach focusing on aboriginal practices should not be adopted. Instead, the definition of aboriginal rights should refer to the notion of "integral part of their distinctive culture" and should "permit their [aboriginal rights'] evolution over time" (see *Sparrow*, *supra*, at pp. 1099 and 1093). I gave the following guidelines on this approach (at para. 180):

Dans *Van der Peet*, après avoir examiné en détail les différentes méthodes d'interprétation possibles des droits ancestraux protégés par le par. 35(1), j'ai conclu qu'il n'y avait pas lieu d'adopter la méthode fondée sur les «droits figés», qui s'attache aux pratiques autochtones. Au contraire, la définition des droits ancestraux devrait être axée sur la notion de «partie intégrante de la culture distinctive» et devrait «permettre à ces droits d'évoluer avec le temps» (voir *Sparrow*, précité, aux pp. 1099 et 1093). J'ai formulé les lignes directrices qui suivent au sujet de cette méthode (au par. 180):

In the end, the proposed general guidelines for the interpretation of the nature and extent of aboriginal rights constitutionally protected under s. 35(1) can be summarized as follows. The characterization of aboriginal rights should refer to the rationale of the doctrine of aboriginal rights, i.e., the historic occupation and use of ancestral lands by the natives. Accordingly, aboriginal practices, traditions and customs would be recognized and affirmed under s. 35(1) of the Constitution Act, 1982 if they are sufficiently significant and fundamental to the culture and social organization of a particular group of aboriginal people. Furthermore, the period of time relevant to the assessment of aboriginal activities should not involve a specific date, such as British sovereignty, which would crystallize aboriginal's distinctive culture in time. Rather, as aboriginal practices, traditions and customs change and evolve, they will be pro-

En définitive, les lignes directrices générales proposées pour l'interprétation de la nature et de l'étendue des droits protégés constitutionnellement par le par. 35(1) peuvent être résumées ainsi. La caractérisation des droits ancestraux devrait se faire en fonction du fondement de la doctrine des droits ancestraux, c.-à-d. l'occupation et l'utilisation historiques par les autochtones de leurs terres ancestrales. En conséquence, les coutumes, pratiques et traditions autochtones seront reconnues et confirmées en vertu du par. 35(1) de la Loi constitutionnelle de 1982 si elles sont suffisamment importantes et fondamentales pour l'organisation sociale et la culture d'un groupe particulier d'autochtones. De plus, la période pertinente pour l'appréciation des activités autochtones ne devrait pas être fonction d'une date spécifique, par exemple l'affirmation de la souveraineté britannique, car cela aurait pour effet de cristalliser dans le

tected in s. 35(1) provided that they have formed an integral part of the distinctive aboriginal culture for a substantial continuous period of time. [Emphasis added.]

Before reviewing the evidence presented at trial to determine whether the distinctive aboriginal culture of the Heiltsuk supports the recognition of an aboriginal right, we have to delineate the aboriginal right claimed in this case. That I now propose to do.

II. The Delineation of the Aboriginal Right Claimed

At the British Columbia Court of Appeal (1993), 80 B.C.L.R. (2d) 133, as in *Van der Peet, supra*, the majority framed the issue as being whether the Heiltsuk possess an aboriginal right to fish which includes the right to make commercial use of the fish. As I discussed in *Van der Peet*, case law on treaty and aboriginal rights relating to trade supports the making of a distinction between, on the one hand, the sale, trade and barter of fish for livelihood, support and sustenance purposes and, on the other, the sale, trade and barter of fish for purely commercial purposes: see *Sparrow, supra*; *R. v. Horseman*, [1990] 1 S.C.R. 901; and *R. v. Jones* (1993), 14 O.R. (3d) 421. In this regard, I agree with the Chief Justice that the delineation of aboriginal rights must be viewed on a continuum.

In this case, because of the type of transactions which led to the convictions, it appears that the aboriginal right at issue falls on the part of the spectrum relating to the sale, trade and barter of fish for commercial purposes, not on the part dealing with livelihood, support and sustenance purposes (see *Van der Peet, supra*, at para. 192).

The appellants were charged with violating s. 20(3) of the *Pacific Herring Fishery Regulations*, thereby committing an offence contrary to s. 61(1) of the *Fisheries Act*. These charges arose out of a

temps la culture autochtone distinctive. Au contraire, comme les coutumes, pratiques et traditions autochtones changent et évoluent, elles seront protégées par le par. 35(1) si elles ont fait partie intégrante de la culture autochtone distinctive pendant une période considérable et ininterrompue. [Je souligne.]

Avant d'étudier la preuve présentée au procès et de déterminer si la culture autochtone distinctive des Heiltsuk appuie la reconnaissance d'un droit ancestral, nous devons délimiter le droit ancestral revendiqué dans le présent pourvoi. C'est ce que je me propose de faire maintenant.

II. La délimitation du droit ancestral revendiqué

La Cour d'appel de la Colombie-Britannique (1993), 80 B.C.L.R. (2d) 133, à la majorité a considéré, tout comme dans *Van der Peet*, précité, que la question en litige était de savoir si les Heiltsuk possèdent un droit de pêche ancestral incluant le droit de faire une utilisation commerciale du poisson. Comme je l'ai dit dans *Van der Peet*, la jurisprudence sur les droits ancestraux ou issus de traités concernant les échanges appuie l'établissement d'une distinction entre, d'une part, la vente et l'échange de poisson à des fins de subsistance, et, d'autre part, la vente et l'échange de poisson à des fins purement commerciales: voir les arrêts *Sparrow*, précité, *R. c. Horseman*, [1990] 1 R.C.S. 901, et *R. c. Jones* (1993), 14 O.R. (3d) 421. À cet égard, je conviens avec le Juge en chef que les droits ancestraux doivent être considérés comme formant les divers éléments d'un spectre.

En l'espèce, en raison du type d'opération qui a entraîné les déclarations de culpabilité, il semble que le droit ancestral en cause corresponde à la partie du spectre qui concerne la vente et l'échange de poisson à des finis commerciales, plutôt qu'à celle touchant les activités exercées à des fins de subsistance (voir *Van der Peet*, précité, au par. 192).

Les appelants ont été accusés d'avoir enfreint le par. 20(3) du *Règlement de pêche du hareng du Pacifique*, commettant ainsi une infraction prévue au par. 61(1) de la *Loi sur les pêcheries*. Ces accu-

136

1996 CanLII 160 (SCC)

137

138

139

series of events in April 1988 aimed at an attempt to sell herring spawn on kelp that was not harvested or sold under the authority of a Category J Licence. The appellants covertly transported 4,200 pounds of herring spawn on kelp from Bella Bella and then attempted to sell it to Mr. Hirose, the owner of Seaborn Enterprises Ltd. The appellants were arrested by Fisheries Officers after they returned from Mr. Hirose's store.

sations découlaient d'une série d'événements survenus en avril 1988 et au cours desquels les appelants avaient tenté de vendre de la rogue de hareng sur varech qui n'avait pas été récoltée ou vendue en vertu d'un permis de catégorie J. Ils ont transporté subrepticement 4 200 livres de rogue de hareng sur varech de Bella Bella, qu'ils ont ensuite tenté de vendre à M. Hirose, propriétaire de Seaborn Enterprises Ltd. Les appelants ont été arrêtés à la sortie de l'établissement de M. Hirose par des agents des pêches.

140 There is no evidence as to the purposes for which the appellants sold the herring spawn on kelp or as to the use that they were going to make of the money. However, from the overall evidence on the record, especially that of the quantity of herring spawn on kelp that the two appellants wanted to sell, it is reasonable to find that the attempted transaction between the appellants and Mr. Hirose was directed at providing an economic profit. Besides, the appellants themselves argued both before the courts below and before this Court that the Heiltsuk possess an aboriginal right to fish for what amounts to be commercial purposes.

Il n'y a pas d'élément de preuve concernant les fins pour lesquelles les appelants ont vendu la rogue de hareng sur varech ou l'utilisation qu'ils comptaient faire du produit de cette vente. Toutefois, il ressort de l'ensemble de la preuve au dossier, surtout celle touchant la quantité de rogue de hareng sur varech que les deux appelants voulaient vendre, qu'il est raisonnable de conclure que l'opération qu'ils ont tentée d'effectuer avec M. Hirose visait à réaliser des profits. Du reste, ils ont eux-mêmes soutenu, tant devant les tribunaux inférieurs que devant notre Cour, que les Heiltsuk possèdent un droit ancestral de pêcher à des fins équivalant à des fins commerciales.

141 The legislative provision under constitutional challenge in this case is aimed at both commercial and non-commercial sale, trade and barter of herring spawn on kelp. Section 20(3) of the *Pacific Herring Fishery Regulations* reads as follows:

La disposition législative faisant l'objet de la présente contestation constitutionnelle vise la vente et l'échange de rogue de hareng sur varech à des fins commerciales et non commerciales. Le paragraphe 20(3) du *Règlement de pêche du hareng du Pacifique* est ainsi rédigé:

20. . . .

20. . . .

(3) No person shall buy, sell, barter or attempt to buy, sell, or barter herring spawn on kelp other than herring spawn on kelp taken or collected under the authority of a Category J licence.

(3) Il est interdit à quiconque d'acheter, de vendre, d'échanger ou de tenter d'acheter, de vendre ou d'échanger de la rogue de hareng sur varech, à moins que celle-ci n'ait été prise ou recueillie en vertu d'un permis de catégorie J.

This provision prohibits any sale, trade or barter of herring spawn on kelp — whether for livelihood, support and sustenance purposes or for purely commercial purposes — except for that harvested under the authority of a Category J licence. If the facts giving rise to the offence indicated that the sale, trade and barter were for livelihood, support and maintenance, the question of the validity of s.

Cette disposition interdit la vente et l'échange de la rogue de hareng sur varech — que ce soit à des fins de subsistance ou à des fins purement commerciales —, sauf si la rogue a été récoltée en vertu d'un permis de catégorie J. Si les faits à l'origine des accusations indiquaient que la vente et l'échange ont été effectués à des fins de subsistance, la question de la validité du par. 20(3) du

20(3) of the Regulations would raise a different issue, one which does not arise here. In the instant case, the aboriginal right claimed is the right to sell, trade and barter fish for commercial purposes and we must decide whether, in that respect, the provision under scrutiny complies with the constitutional protection afforded to aboriginal rights under s. 35(1) of the *Constitution Act, 1982*.

It is now necessary to look at the historical evidence to see whether the particular group of aboriginal people, the Heiltsuk Band, of which the appellants are members, have sold, traded and bartered fish for commercial purposes, in a manner sufficiently significant and fundamental to their culture and social organization, for a substantial continuous period of time.

III. Definition of Aboriginal Rights

As I have already noted elsewhere, the approach I favour to interpret the nature and extent of aboriginal rights differs significantly from the one adopted by the Chief Justice. In my view, the question is whether the evidence reveals that the sale, trade and barter of herring spawn on kelp for commercial purposes have formed an integral part of the Heiltsuk people's distinctive aboriginal culture — i.e., to have been sufficiently significant and fundamental to their culture and social organization — for a substantial continuous period of time. Although the Chief Justice refers to the notion of “integral part of the distinctive aboriginal culture” in his interpretation of the aboriginal right at hand, he focuses on pre-contact individualized aboriginal practices, an approach from which I must distance myself.

The findings of fact by the trial judge as well as the substantial review of the evidence by the Chief Justice show that the trade of herring spawn on kelp for commercial purposes among the Heiltsuk and with other native people was extensive and organized in a market-type economy. More impor-

Règlement soulèverait une question différente, qui ne se pose toutefois pas en l'espèce. Dans le présent cas, le droit ancestral revendiqué est celui de vendre et d'échanger du poisson à des fins commerciales, et il nous faut déterminer si, à cet égard, la disposition en cause est compatible avec la protection constitutionnelle accordée aux droits ancestraux par le par. 35(1) de la *Loi constitutionnelle de 1982*.

Il est maintenant nécessaire d'examiner la preuve historique pour voir si le groupe particulier d'autochtones en cause, la bande des Heiltsuk, dont font partie les appelants, a vendu et échangé du poisson à des fins commerciales d'une façon suffisamment importante et fondamentale pour son organisation sociale et sa culture pendant une période considérable et ininterrompue.

III. Définition des droits ancestraux

Comme je l'ai déjà indiqué, la méthode que je favorise pour définir la nature et l'étendue des droits ancestraux diffère considérablement de celle adoptée par le Juge en chef. À mon avis, la question qu'il faut se poser est celle de savoir si la preuve révèle que la vente et l'échange de rogue de hareng sur varech à des fins commerciales ont fait partie intégrante de la culture autochtone distinctive des Heiltsuk — c'est-à-dire si ces activités ont été suffisamment importantes et fondamentales pour leur organisation sociale et leur culture — pendant une période considérable et ininterrompue. Même si le Juge en chef se réfère à la notion de «partie intégrante de la culture autochtone distinctive» dans son interprétation du droit ancestral en cause, il s'attache aux pratiques autochtones propres qui existaient avant le contact avec les Européens, approche à laquelle je ne peux me rallier.

Il ressort des conclusions de fait du juge du procès et de l'examen approfondi de la preuve fait par le Juge en chef que les échanges de rogue de hareng sur varech à des fins commerciales entre les Heiltsuk et entre ceux-ci et d'autres autochtones étaient considérables et organisés dans une sorte

tantly, it appears, especially from a native perspective, that such activities formed part of, and was indeed integral to, the distinctive aboriginal culture of the Heiltsuk. Put another way, to use the terminology of the test proposed in *Van der Peet, supra*, the sale, trade and barter of fish for commercial purposes was sufficiently significant and fundamental to the culture and social organization of the Heiltsuk people. Consequently, the criterion regarding the characterization of aboriginal rights protected under s. 35(1) of the *Constitution Act, 1982* is met in this case.

d'économie de marché. Fait plus important, il semble, en particulier du point de vue des autochtones, que ces activités faisaient partie — de fait faisaient partie intégrante — de la culture autochtone distinctive des Heiltsuk. Autrement dit, pour reprendre la terminologie utilisée dans le test proposé dans *Van der Peet*, précité, les activités de vente et d'échange de poisson à des fins commerciales étaient suffisamment importantes et fondamentales pour l'organisation sociale et la culture des Heiltsuk. En conséquence, le critère applicable afin de caractériser les droits ancestraux protégés par le par. 35(1) de la *Loi constitutionnelle de 1982* est satisfait en l'espèce.

145 Also, the evidence reveals that the Heiltsuk have sold, traded and bartered fish for commercial purposes for a substantial continuous period of time. In that respect, we must consider the type of aboriginal practices, traditions and customs, the particular aboriginal culture and society, and the reference period of 20 to 50 years (see *Van der Peet, supra*, at para. 178). Here, there is ample evidence showing that the Heiltsuk have traded herring spawn on kelp, in large enough amounts to be for commercial purposes, for centuries before the coming of the Europeans. Further, as the trial judge found after considering the historical record and expert evidence, such commercial activities have continued, though in modernized forms, until the present day. Therefore, the time requirement for the recognition of an aboriginal right is also met.

De plus, la preuve révèle que les Heiltsuk ont vendu et échangé du poisson à des fins commerciales pendant une période considérable et ininterrompue. Sur ce point, il nous faut tenir compte du type de coutumes, pratiques et traditions autochtones en cause, de la culture et de la société autochtones visées et, enfin, de la période de référence de 20 à 50 ans (voir *Van der Peet*, précité, au par. 178). En l'espèce, il existe une preuve abondante établissant que les Heiltsuk ont, pendant des siècles avant l'arrivée des Européens, échangé de la rogue de hareng sur varech en quantités suffisamment grandes pour que ces échanges puissent être considérés comme des activités faites à des fins commerciales. En outre, comme l'a constaté le juge du procès après avoir étudié la preuve historique et les témoignages d'experts, ces activités commerciales continuent d'être pratiquées de nos jours, quoique sous des formes modernes. Par conséquent, l'exigence de durée applicable pour la reconnaissance d'un droit ancestral est également satisfaite.

146 As a result, I agree with the Chief Justice that the Heiltsuk people, of which the appellants are members, possess an aboriginal right to sell, trade and barter fish for commercial purposes, which is protected under s. 35(1) of the *Constitution Act, 1982*. It remains to be determined, under the *Sparrow* test, whether such right is extinguished and whether the *Pacific Herring Fishery Regulations* infringe upon this right.

En définitive, tout comme le Juge en chef, je suis d'avis que les Heiltsuk, dont font partie les appelants, possèdent un droit ancestral de vendre et d'échanger du poisson à des fins commerciales, qui est protégé en vertu du par. 35(1) de la *Loi constitutionnelle de 1982*. Il reste à déterminer, conformément au test établi dans *Sparrow*, si ce droit a été éteint et si le *Règlement de pêche du hareng du Pacifique* porte atteinte à ce droit.

IV. Extinguishment and Infringement

As regards the issues of extinguishment and *prima facie* infringement, I agree for the most part with the reasons of the Chief Justice and the conclusions he reaches.

The Heiltsuk's aboriginal right to sale, trade and barter herring spawn on kelp for commercial purposes has not been extinguished by a "clear and plain" intention of the Sovereign (see *Sparrow*, *supra*, at p. 1099). In *N.T.C. Smokehouse*, *supra*, I emphasized that the hurdle to extinguish aboriginal rights is high indeed (at para. 78):

I am prepared to accept that the extinguishment of aboriginal rights can be accomplished through a series of legislative acts. However, *Sparrow* specifically stands for the proposition that the intention to extinguish must nonetheless be clear and plain. This is diametrically opposed to the position that extinguishment may be achieved by merely regulating an activity or that legislation necessarily inconsistent with the continued enjoyment of an aboriginal right can be deemed to extinguish it. Clear and plain means that the Government must address the aboriginal activities in question and explicitly extinguish them by making them no longer permissible. [Emphasis in original.]

In the case at bar, the respondent argues that the test is met when the aboriginal right and the activities contemplated by the legislation cannot co-exist. Such an approach, based on the view adopted by the United States Supreme Court in *United States v. Santa Fe Pacific Railroad Co.*, 314 U.S. 339 (1941), is irreconcilable with the "clear and plain intention" test favoured in Canada. As a result, the legislation relied upon by the respondent is insufficient to extinguish the aboriginal right to sell, trade and barter fish for commercial purposes. In fact, as in *Sparrow*, *supra*, such legislation merely regulates aboriginal activities and does not amount to extinguishment.

Furthermore, as regards the question of *prima facie* infringement, s. 20(3) of the *Pacific Herring Fishery Regulations* no doubt violates such aborig-

IV. Extinction et atteinte

En ce qui concerne les questions de l'extinction et de l'atteinte *prima facie*, je souscris pour l'essentiel aux motifs du Juge en chef et à ses conclusions.

Le droit ancestral des Heiltsuk de vendre et d'échanger de la rogue de hareng sur varech à des fins commerciales n'a pas été éteint par suite de la manifestation d'une intention «claire et expresse» du Souverain (voir *Sparrow*, précité, à la p. 1099). Dans *N.T.C. Smokehouse*, précité, j'ai souligné que le test à respecter en matière d'extinction des droits ancestraux est très exigeant (au par. 78):

Je suis disposée à admettre que l'extinction des droits ancestraux peut résulter d'une série de mesures législatives. Néanmoins, *Sparrow* prévoit spécifiquement que l'intention d'éteindre des droits doit être claire et expresse, ce qui va diamétralement à l'encontre de la thèse que l'extinction peut découler du seul fait de la réglementation d'une activité ou du fait de l'existence d'une mesure législative nécessairement incompatible avec la jouissance continue d'un droit ancestral. L'expression claire et expresse veut dire que le gouvernement doit viser les activités autochtones en question et les éteindre explicitement en interdisant désormais l'exercice. [Souligné dans l'original.]

En l'espèce, l'intimée soutient que le test est satisfait dans les cas où le droit ancestral et les activités visées par les mesures législatives ne peuvent pas coexister. Une telle position, fondée sur le point de vue adopté par la Cour suprême des États-Unis dans l'arrêt *United States c. Santa Fe Pacific Railroad Co.*, 314 U.S. 339 (1941), est inconciliable avec le test de «l'intention claire et expresse» privilégié au Canada. En conséquence, les mesures législatives invoquées par l'intimée sont insuffisantes pour éteindre le droit ancestral de vendre et d'échanger du poisson à des fins commerciales. De fait, tout comme dans *Sparrow*, précité, ces mesures législatives ne font que réglementer les activités autochtones et n'entraînent pas l'extinction du droit de les exercer.

Qui plus est, en ce qui concerne la question de l'atteinte *prima facie*, il ne fait aucun doute que le par. 20(3) du *Règlement de pêche du hareng du*

147

148

1996 CanLII 160 (SCC)

149

150

inal right since it directly conflicts, both by its object and by its effects, with native sale, trade and barter of herring spawn on kelp. In *Sparrow*, Dickson C.J. and La Forest J. provided the following guidelines regarding infringement (at p. 1112):

To determine whether the fishing rights have been interfered with such as to constitute a *prima facie* infringement of s. 35(1), certain questions must be asked. First, is the limitation unreasonable? Second, does the regulation impose undue hardship? Third, does the regulation deny to the holders of the right their preferred means of exercising that right? The onus of proving a *prima facie* infringement lies on the individual or group challenging the legislation. In relation to the facts of this appeal, the regulation would be found to be a *prima facie* interference if it were found to be an adverse restriction on the Musqueam exercise of their right to fish for food. We wish to note here that the issue does not merely require looking at whether the fish catch has been reduced below that needed for the reasonable food and ceremonial needs of the Musqueam Indians. Rather the test involves asking whether either the purpose or the effect of the restriction on net length unnecessarily infringes the interests protected by the fishing right.

Pacifique viole un tel droit ancestral puisqu'il entre directement en conflit, tant de par son objet que de par ses effets, avec la vente et l'échange de roque de hareng sur varech par les autochtones. Dans *Sparrow*, le juge en chef Dickson et le juge La Forest ont formulé les lignes directrices suivantes relativement à l'atteinte (à la p. 1112):

Pour déterminer si les droits de pêche ont subi une atteinte constituant une violation à première vue du par. 35(1), on doit poser certaines questions. Premièrement, la restriction est-elle déraisonnable? Deuxièmement, le règlement est-il indûment rigoureux? Troisièmement, le règlement refuse-t-il aux titulaires du droit le recours à leur moyen préféré de l'exercer? C'est au particulier ou au groupe qui conteste la mesure législative qu'il incombe de prouver qu'il y a eu violation à première vue. En ce qui concerne les faits du présent pourvoi, le règlement serait jugé constituer une atteinte à première vue si on concluait qu'il impose une restriction néfaste à l'exercice par les Musqueams de leur droit de pêcher à des fins de subsistance. Nous tenons à souligner ici que la question en litige n'exige pas simplement qu'on examine si la prise autorisée de poissons a été réduite au-dessous de ce qui est requis pour subvenir aux besoins alimentaires et rituels raisonnables des Musqueams. Le critère nécessite plutôt qu'on se demande si, de par son objet ou son effet, la restriction imposée quant à la longueur des filets porte atteinte inutilement aux intérêts protégés par le droit de pêche.

151 Although I agree with the analysis of the Chief Justice on this issue, I want to emphasize that the burden to demonstrate that legislation infringes upon an existing aboriginal right, which is borne by the claimant, is fairly low. *Sparrow* speaks of "*prima facie*" infringement, which is defined in the *Black's Law Dictionary* (6th ed. 1990) as follows (at p. 1189): "Lat. At first sight; on the first appearance; on the face of it; so far as can be judged from the first disclosure; presumably". Therefore, the aboriginal right claimant does not even have to prove on the balance of probability that the impugned legislation constitutes an infringement, and surely not that it "clearly impinges" upon the right, as the Chief Justice seems to suggest. The only thing that the claimant must show is that, on its face, the legislation comes into conflict with a recognized aboriginal right, either because of its object or its effects. In the

Bien que je souscrive à l'analyse du Juge en chef sur cette question, je tiens à souligner que le fardeau d'établir qu'une mesure législative porte atteinte à un droit ancestral existant, qui incombe à la personne qui revendique un tel droit, est assez peu exigeant. Dans *Sparrow*, on parle d'atteinte «*prima facie*», expression définie ainsi dans le *Black's Law Dictionary* (6^e éd. 1990) (à la p. 1189): [TRADUCTION] «Lat. À première vue; de prime abord; d'après les apparences; autant qu'on puisse en juger d'après la première impression; vraisemblablement». Par conséquent, la personne qui revendique un droit ancestral n'a même pas à prouver, selon la prépondérance des probabilités, que la mesure législative contestée constitue une atteinte, et sûrement pas qu'elle «empiète clairement» sur le droit en question, comme le Juge en chef semble suggérer. Tout ce que cette personne doit prouver, c'est que, de prime abord, la mesure

instant case, the appellants overwhelmingly discharged their burden in that regard.

Consequently, I conclude that the Heiltsuk Band's aboriginal right to sell, trade and barter fish for commercial purposes is "existing", as it has not been extinguished by a clear and plain intention of the Sovereign, and that s. 20(3) of the *Pacific Herring Fishery Regulations* constitutes a "prima facie infringement" of this aboriginal right, as *per* the *Sparrow* test.

As to the question of justification, I agree with the Chief Justice that there is insufficient evidence to rule on it and I agree as well with his comments on this issue, particularly as regards the doctrine of priority and our decision in *Jack v. The Queen*, [1980] 1 S.C.R. 294.

V. Disposition

In the result, I would dispose of the appeal in the manner stated by the Chief Justice and answer the constitutional question as he suggests.

The following are the reasons delivered by

MCLACHLIN J. — This appeal concerns the right of the Heiltsuk of Bella Bella to sell herring spawn on kelp that is harvested from that region. The appellants, William and Donald Gladstone, harvested herring spawn on kelp near Bella Bella, transported it to Vancouver, and attempted to sell it there. The sale of herring spawn on kelp without a licence is prohibited. The appellants made a number of arguments in their defence before the lower courts. The only issue left to be decided by this Court is whether the Regulations prohibiting the sale of herring spawn on kelp are invalid because they infringe the appellants' aboriginal right, as *per* s. 35 of the *Constitution Act, 1982*. If the Regulations violate the appellants' aboriginal right,

législative entre en conflit avec un droit ancestral reconnu, soit de par son objet soit de par ses effets. Dans le présent pourvoi, les appelants se sont nettement acquittés du fardeau qui leur incombait à cet égard.

En conséquence, je conclus que le droit ancestral de la bande des Heiltsuk de vendre et d'échanger du poisson à des fins commerciales est un droit «existant», puisqu'il n'a pas été éteint par suite de la manifestation d'une intention claire et expresse du Souverain, et que le par. 20(3) du *Règlement de pêche du hareng du Pacifique* constitue une «atteinte *prima facie*» à ce droit ancestral, selon le test établi dans *Sparrow*.

Pour ce qui est de la question de la justification, je suis d'avis, tout comme le Juge en chef, que la preuve est insuffisante pour permettre de la trancher, et je souscris également à ses observations sur cette question, particulièrement en ce qui concerne la doctrine relative à l'ordre de priorité et la décision de notre Cour dans *Jack c. La Reine*, [1980] 1 R.C.S. 294.

V. Dispositif

En définitive, je suis d'avis de trancher le pourvoi de la manière indiquée par le Juge en chef et de répondre comme il le suggère à la question constitutionnelle.

Version française des motifs rendus par

LE JUGE MCLACHLIN — Le présent pourvoi porte sur le droit des Heiltsuk de Bella Bella de vendre de la rogue de hareng sur varech récoltée dans cette région. Les appelants, William et Donald Gladstone, ont récolté de la rogue de hareng sur varech près de Bella Bella, puis ils l'ont transportée à Vancouver où ils ont tenté de la vendre. Il est interdit de vendre de la rogue de hareng sur varech sans permis. En défense, les appelants ont présenté de nombreux arguments devant les juridictions inférieures. La seule question que notre Cour a à trancher est de savoir si les dispositions réglementaires interdisant de vendre la rogue de hareng sur varech sont inopérantes parce qu'elles portent atteinte au droit ancestral reconnu

152

1996 CanLII 160 (SCC)

153

154

155

they will be invalidated to the extent of the conflict by s. 52 of the *Constitution Act, 1982*.

aux appelants par l'art. 35 de la *Loi constitutionnelle de 1982*. Si oui, elles seront, dans la mesure de l'incompatibilité, déclarées inopérantes en vertu de l'art. 52 de la *Loi constitutionnelle de 1982*

This case was heard with *R. v. Van der Peet*, [1996] 2 S.C.R. 507, and *R. v. N.T.C. Smokehouse Ltd.*, [1996] 2 S.C.R. 672, released contemporaneously. In *Van der Peet*, I detail the approach I would adopt to the interpretation of aboriginal rights to use a fisheries resource. This decision applies the principles set out in *Van der Peet*.

Le présent pourvoi a été entendu avec les pourvois *R. c. Van der Peet*, [1996] 2 R.C.S. 507, et *R. c. N.T.C. Smokehouse Ltd.*, [1996] 2 R.C.S. 672, qui sont rendus à la même date. Dans *Van der Peet*, précité, j'énonce de façon détaillée la méthode à suivre pour interpréter les droits ancestraux visant l'utilisation des ressources d'une pêcherie. Les présents motifs appliquent les principes énoncés dans *Van der Peet*.

The questions posed by this appeal are as follows:

Les questions qui se posent dans le présent pourvoi sont les suivantes:

1. Do the Heiltsuk possess an aboriginal right under s. 35(1) of the *Constitution Act, 1982* which entitles them to sell herring spawn on kelp?
 - (a) Has a *prima facie* right been established?
 - (b) If so, has it been extinguished?
2. If the right is established, do the government Regulations prohibiting the sale of herring spawn on kelp infringe that right?
3. If the Regulations infringe the right, are they justified?

1. Les Heiltsuk possèdent-ils, en vertu du par. 35(1) de la *Loi constitutionnelle de 1982*, le droit ancestral de vendre de la rogue de hareng sur varech?
 - a) A-t-on établi, à première vue, l'existence d'un tel droit?
 - b) Si oui, ce droit a-t-il été éteint?
2. Si l'existence du droit a été établie, les dispositions réglementaires prises par l'État pour interdire la vente de rogue de hareng sur varech portent-elles atteinte à ce droit?
3. Si oui, ces dispositions réglementaires sont-elles justifiées?

My conclusions in this appeal may be summarized as follows. Following the reasons I set out in *Van der Peet, supra*, the appellants, as members of the Heiltsuk Band, have established that they have an aboriginal right to harvest and sell herring spawn on kelp for sustenance purposes. That right was not extinguished by any regulatory legislation prior to 1982, and is therefore confirmed by the *Constitution Act, 1982*. The right is limited by the Heiltsuk's traditional reliance on the resource, which was to secure sustenance. It is also limited by the power of the Crown to limit or prohibit exploitation of the resource that is incompatible with its continued use. There is insufficient evidence to determine whether the current regulatory framework satisfies the sustenance needs of the

Mes conclusions dans le présent pourvoi peuvent être résumées ainsi. Conformément aux motifs que j'ai énoncés dans *Van der Peet*, précité, les appelants, en tant que membres de la bande des Heiltsuk, ont établi qu'ils possèdent le droit ancestral de récolter et de vendre de la rogue de hareng sur varech à des fins de subsistance. Ce droit n'a pas été éteint par aucune mesure législative portant réglementation de la ressource avant 1982, et il est donc confirmé par la *Loi constitutionnelle de 1982*. Il est restreint par les limites de l'exploitation traditionnelle de cette ressource faite par les Heiltsuk, qui visait à assurer leur subsistance. Il est aussi restreint par le pouvoir qu'a l'État de limiter ou d'interdire l'exploitation de cette ressource qui serait incompatible avec son utilisation continue. La

Heiltsuk people. Therefore, the questions of whether the Heiltsuk's right to sell herring spawn on kelp for sustenance was infringed and, if so, whether any such infringement is justified by the Crown, must be decided at a new trial.

1. Has the Right of the Heiltsuk to Trade Herring Spawn on Kelp Been Established?

The test for determining whether an aboriginal people possesses an aboriginal right to trade fish is discussed in the companion case of *Van der Peet*. I there concluded, at paras. 278-79, that there is an aboriginal right

to obtain from the river or the sea . . . that which the particular aboriginal people have traditionally obtained from the portion of the river or sea. If the aboriginal people show that they traditionally sustained themselves from the river or sea, then they have a *prima facie* right to continue to do so, absent a treaty exchanging that right for other consideration.

The right stands as a continuation of the aboriginal people's historical reliance on the resource. There is therefore no justification for extending it beyond what is required to provide the people with reasonable substitutes for what it traditionally obtained from the resource. In most cases, one would expect the aboriginal right to trade to be confined to what is necessary to provide basic housing, transportation, clothing and amenities — the modern equivalent of what the aboriginal people in question formerly took from the land or the fishery, over and above what was required for food and ceremonial purposes.

The historical evidence in this case is somewhat different from the companion cases of *Van der Peet*, *supra*, and *N.T.C. Smokehouse*, *supra*. In those cases, the Sto:lo, Sheshaht and Opetchesaht peoples claimed the right to continue to sell fish from salmon fisheries off which they traditionally lived. The evidence in both cases indicated that there had been trade in fish with other aboriginal

preuve est insuffisante pour permettre de déterminer si le régime de réglementation actuel respecte les besoins des Heiltsuk en matière de subsistance. Par conséquent, les questions de savoir s'il a été porté atteinte au droit des Heiltsuk de vendre de la rogue de hareng sur varech à des fins de subsistance, et, dans l'affirmative, si cette atteinte peut être justifiée par l'État, doivent être tranchées dans le cadre d'un nouveau procès.

1. Le droit des Heiltsuk d'échanger de la rogue de hareng sur varech a-t-il été établi?

Le critère permettant de déterminer si un peuple autochtone possède le droit ancestral d'échanger du poisson a été analysé dans le pourvoi connexe *Van der Peet*, où j'ai conclu, aux par. 278 et 279, à l'existence d'un droit ancestral

. . . [de] tirer du fleuve, de la rivière ou de la mer en question ce que les autochtones concernés ont traditionnellement tiré du secteur exploité. Si les autochtones démontrent qu'ils ont traditionnellement tiré leur subsistance du fleuve, de la rivière ou de la mer, ils ont alors à première vue le droit de continuer à le faire, s'ils n'ont pas, par traité, échangé ce droit contre autre chose.

Ce droit est la poursuite de l'exploitation historique de la ressource par les autochtones visés. Il n'y a donc rien qui justifie d'élargir le droit au-delà de ce qui est nécessaire pour permettre aux autochtones de se procurer des biens de remplacement raisonnables à la place de ceux qu'ils ont traditionnellement obtenus pour la ressource. Dans la plupart des cas, il est permis de penser que le droit ancestral de commercer se limite à ce qui est nécessaire pour pourvoir aux besoins de base en matière de logement, de transport, d'habillement et de commodités de la vie — l'équivalent moderne de ce que les autochtones en question tiraient dans le passé du territoire ou de la pêche, en sus de leurs besoins alimentaires et rituels.

La preuve de nature historique en l'espèce est quelque peu différente de celle disponible dans les pourvois connexes *Van der Peet* et *N.T.C. Smokehouse*, précités. Dans ces pourvois, les Sto:lo, les Sheshaht et les Opetchesaht ont affirmé avoir le droit de continuer de vendre le saumon pris dans les pêcheries dont ils ont traditionnellement tiré leur subsistance. Dans ces deux affaires, la preuve

bands and with European settlers when they arrived. The trade that had occurred historically was on a small scale. Much of the trade was in the form of barter for other necessities such as other kinds of food and clothing, and other goods when trade expanded to European settlers. Some of the trade occurred at traditional potlatches, where social relations were formed and agreements made for peaceful cohabitation among different tribes. In these cases, the evidence was that the peoples in question relied heavily on the salmon resource for their food needs, as well as for barter.

a montré qu'il y avait des échanges de poisson à d'autres bandes autochtones, ainsi qu'aux colons blancs après leur arrivée. Historiquement, ce commerce s'est fait sur une petite échelle, et il prenait en grande partie la forme de troc visant à se procurer d'autres biens de première nécessité tels que des denrées alimentaires, des vêtements ainsi que d'autres types de biens, lorsque le commerce s'est élargi aux colons européens. Certains échanges avaient lieu à l'occasion des potlachs traditionnels, qui étaient l'occasion pour les différentes tribus d'établir des rapports sociaux et de conclure des accords de cohabitation pacifique. Dans les pourvois susmentionnés, la preuve a indiqué que les peuples en question comptaient beaucoup sur le saumon pour satisfaire leurs besoins alimentaires et comme monnaie d'échange.

1996 CanLII 100 (SCC)

161

In this case, the Heiltsuk claim an aboriginal right to continue to trade in herring spawn on kelp from the Bella Bella region, where they have lived for at least two centuries. The appellants claim that the Heiltsuk relied on the herring spawn on kelp both as a food source and for trade. There is extensive evidence of historical trading of herring spawn on kelp between the Heiltsuk and the neighbouring aboriginal peoples. The trade that took place was on a large scale, involving quantities of herring spawn on kelp of at least 15 tonnes. As the trial judge put it:

It cannot be disputed that hundreds of years ago, the Heiltsuk Indians regularly harvested herring spawn on kelp as a food source. The historical/anthropological records readily bear this out.

I am also satisfied that this Band engaged in inter-tribal trading and barter of herring spawn on kelp. The exhibited Journal of Alexander McKenzie dated 1793 refers to this trade and the defence lead [*sic*] evidence of several other references to such trade.

The developed trading patterns of the Heiltsuk trade in herring spawn on kelp was undisputed. An expert witness for the defence put it this way:

En l'espèce, les Heiltsuk revendiquent le droit ancestral de continuer à faire le commerce de la rogue de hareng sur varech récoltée dans la région de Bella Bella, où ils vivent depuis au moins deux siècles. Les appelants affirment que les Heiltsuk ont utilisé la rogue de hareng sur varech tant comme source alimentaire que comme monnaie d'échange. Il y a une abondante preuve indiquant que, historiquement, les Heiltsuk ont échangé de la rogue de hareng sur varech aux peuples autochtones voisins. Il s'agissait d'échanges faits sur une grande échelle et mettant en jeu des quantités de rogue de hareng sur varech d'au moins 15 tonnes. Comme l'a dit le juge du procès:

[TRADUCTION] Il est incontestable qu'il y a des siècles, les Indiens Heiltsuk récoltaient régulièrement la rogue de hareng sur varech comme source de nourriture. C'est un fait dont la réalité est attestée par les documents historiques et anthropologiques.

Je suis également convaincu que la bande échangeait cette denrée avec d'autres tribus. Le journal d'Alexander McKenzie [*sic*] datant de 1793, qui a été versé en preuve, fait mention de ces échanges et la défense a présenté des éléments de preuve faisant état de nombreuses autres mentions de ces échanges.

Le caractère structuré des échanges de rogue de hareng sur varech faits par les Heiltsuk n'a pas été contesté. Voici comment ces structures ont été décrites par un témoin expert de la défense:

For at least two centuries the Heiltsuk have been the hub of a trade network, exporting herring spawn to almost all of the surrounding native people.

[TRADUCTION] Pendant au moins deux siècles, les Heiltsuk ont été au centre d'un réseau d'échanges dans le cadre duquel ils exportaient de la roque de hareng à presque tous les peuples autochtones voisins.

Herring spawn harvested, processed, and packaged by the Heiltsuk was traded to their Tsimshian, Kitimat, and Bella Coola neighbors on the mainland and to Kwakiutl on Vancouver Island. Some of these trade relations were noted in accounts written by the first white men to visit the central coast. Those of Alexander Mackenzie (1793), William Tolmie (1835) and James Douglas (1840) documenting Heiltsuk trade of herring spawn to Bella Coola, Kwakiutl, and Tsimshian, respectively, are corroborated by other accounts describing the same patterns of trade at much later dates.

La roque de hareng récoltée, transformée et empaquetée par les Heiltsuk était échangée à leurs voisins les Tsimshian, les Kitimat et les Bella Coola sur le continent, ainsi qu'aux Kwakiutl sur l'île de Vancouver. Les premiers Blancs qui ont visité la région du centre de la côte ont fait état de certaines de ces relations commerciales dans leurs comptes rendus de ces visites. Les comptes rendus d'Alexander Mackenzie (1793), de William Tolmie (1835) et de James Douglas (1840), qui documentent les échanges de roque de hareng faits par les Heiltsuk aux Bella Coola, aux Kwakiutl et aux Tsimshian respectivement, sont corroborés par d'autres comptes rendus qui ont décrit, beaucoup plus tard, ces mêmes échanges.

These early accounts describe a trade which was already established. This attests not only to the aboriginal nature of the trade, but also the existence of regularized relations between the groups engaged in these trading patterns.

Ces premiers comptes rendus décrivent un commerce qui était déjà bien établi. Ce fait atteste non seulement la nature autochtone du commerce, mais aussi l'existence de relations systématisées entre les groupes participant à ces échanges commerciaux.

The appellants' factum also cited expert evidence of the large quantities of trade in herring spawn on kelp:

Dans leur mémoire, les appelants ont également cité des témoignages d'expert faisant état des grandes quantités de roque de hareng sur varech échangées:

Pacific herring spawn only in certain locations. Consequently, some native groups had access to quantities of spawn beyond their needs and others had access to little or no spawn. This partly explains the extensive trade in spawn among native groups along the coast. Tons of spawn were transported by canoe from districts with good spawning areas to places not so favoured.

[TRADUCTION] Le hareng du Pacifique fraie seulement dans certains endroits. Par conséquent, alors que certains groupes autochtones avaient accès à des sources d'œufs qui dépassaient leurs besoins, d'autres groupes n'avaient que peu ou pas accès à cette ressource. Cela explique en partie les échanges importants d'œufs que pratiquaient entre eux les groupes autochtones le long de la côte. Des tonnes d'œufs étaient transportés par canot des districts riches en œufs aux lieux moins favorisés.

After the spawn were processed, flotillas of freight canoes carrying tons of spawn product travelled between districts carrying boxes and hampers.

Après que les œufs avaient été traités, des flottilles de canots à marchandises transportant des tonnes d'œufs voyageaient d'un district à l'autre, chargés de boîtes et de paniers.

The Court of Appeal, reviewed evidence of the diary of Alexander Mackenzie which indicated that, in exchange for the herring spawn on kelp, the Heiltsuk received "roasted salmon, hemlock-bark cakes, and the other kind made of salmon roes, sorrel, and bitter berries". Lambert J.A. noted

La Cour d'appel a, examiné la preuve tirée du journal d'Alexander Mackenzie qui indiquait que, en échange de la roque de hareng sur varech, les Heiltsuk recevaient [TRADUCTION] «du saumon grillé, des gâteaux d'écorce de pruche, ainsi que l'autre sorte faite d'œufs de saumon, d'oseille et de

that food products were the principal commodity obtained by the Heiltsuk in exchange for the herring spawn on kelp. Other goods received in exchange for herring spawn on kelp included elk skins for clothing, blankets, and seaweed.

163 Thus, evidence of an established trading network is clear in this case. The Heiltsuk derived their sustenance from trade derived from the herring spawn on kelp resource; they relied on trade to supply them with the necessities of life, principally other food products.

164 The next question is whether the Heiltsuk's use of the resource of herring spawn on kelp was confined to sustenance or whether the trade in question allowed the band to accumulate wealth beyond that required for a basic standard of living. The evidence indicates that large quantities of herring spawn on kelp were traded — amounts that would yield great wealth today because of large demand for herring spawn on kelp by foreign markets. However, the right to derive from a resource what was traditionally derived from that resource is not necessarily a right to harvest the same quantity of fish from that resource as was traditionally harvested. The right is rather to take from the fishery enough to secure "the modern equivalent of what the aboriginal people in question formerly took from the land or the fishery".

165 Despite the large quantities of herring spawn on kelp traditionally traded, the evidence does not indicate that the trade of herring spawn on kelp provided for the Heiltsuk anything more than basic sustenance. There is no evidence in this case that the Heiltsuk accumulated wealth which would exceed a sustenance lifestyle from the herring spawn on kelp fishery. It follows that the aboriginal right to trade in herring spawn on kelp from the Bella Bella region is limited to such trade as secures the modern equivalent of sustenance:

shépherdie du Canada». Le juge Lambert a fait remarquer que les principaux biens obtenus par les Heiltsuk en échange de la roque de hareng sur varech étaient des denrées alimentaires. Parmi les autres biens qu'ils recevaient en échange, mentionnons des peaux d'élan pour se vêtir, ainsi que des couvertures et des algues.

Par conséquent, la preuve démontre clairement en l'espèce l'existence d'un réseau d'échanges établi. Les Heiltsuk tiraient leur subsistance d'échanges fondés sur l'exploitation de la roque de hareng sur varech. Ils comptaient sur ces échanges pour se procurer les biens nécessaires à la vie, principalement d'autres produits alimentaires.

La question suivante est de savoir si l'utilisation de la roque de hareng sur varech par les Heiltsuk se limitait à des fins de subsistance, ou si les échanges en question permettaient à la bande d'accumuler de la richesse au-delà du strict nécessaire. La preuve indique que de grandes quantités de roque de hareng sur varech étaient échangées, quantités qui aujourd'hui rapporteraient des sommes considérables, compte tenu de la grande demande pour ce produit sur les marchés étrangers. Cependant, le droit de tirer d'une ressource ce qui en était tiré traditionnellement n'équivaut pas nécessairement au droit d'en récolter la même quantité. Ce droit consiste plutôt à pêcher en quantité suffisante «l'équivalent moderne de ce que les autochtones en question tiraient dans le passé du territoire ou de la pêche».

En dépit des grandes quantités de roque de hareng sur varech échangées traditionnellement, il ne ressort pas de la preuve que ces échanges rapportaient aux Heiltsuk plus que ce qui est nécessaire pour satisfaire les besoins essentiels. Il n'y a en l'espèce aucun élément de preuve indiquant que les Heiltsuk auraient tiré de la récolte de la roque de hareng sur varech des richesses incompatibles avec une économie de subsistance. Il s'ensuit que le droit ancestral de faire le commerce de la roque de hareng sur varech récoltée dans la région de Bella Bella se limite aux échanges assurant l'équivalent moderne de cette économie de subsistance: les choses essentielles, c'est-à-dire la nourriture, le

the basics of food, clothing and housing, supplemented by a few amenities.

2. Has the Heiltsuk Right to Sell Herring Spawn on Kelp Been Extinguished?

The Crown argued that if the Heiltsuk did have an aboriginal right to sell herring spawn on kelp, it was extinguished prior to 1982. The Crown refers to the regulatory scheme put in place in 1908, and Order in Council P.C. 2539 of 1917. This is the same regulatory scheme that the Crown put forth in *Van der Peet*, *supra*, to make the argument that any aboriginal right to fish commercially was extinguished prior to 1982. As discussed there, it does not support extinguishment.

The Crown also referred to provisions of the *Fisheries Act* of 1867-68 pertaining to the "young" of fish (S.C. 1868, c. 60, s. 13(9)): "No person shall fish for, catch, kill, buy, sell or possess the young of any of the fish named in this Act, or in any Regulation or Regulations under it". Because herring was a fish named under the Act, the prohibition extended to herring spawn on kelp. An exception provided for the harvesting of fish spawn by Indians for food purposes. This prohibition on the harvesting fish spawn continued until 1974, when the harvesting of fish spawn for sale was allowed with a permit. The Crown argues that these regulations extinguished any aboriginal right to sell herring spawn on kelp.

I cannot conclude that these regulations extinguished the aboriginal right of the Heiltsuk people to use herring spawn on kelp as a source of sustenance. The regulations do not manifest the "clear and plain" intention required to extinguish an aboriginal right. The most likely purpose of these regulatory measures was to conserve the young of the resource in order to foster the growth of the fisheries. A measure aimed at conservation of a resource is not inconsistent with a recognition of

vêtement et le logement, complétées par quelques commodités de la vie.

2. Le droit des Heiltsuk de vendre de la rogue de hareng sur varech a-t-il été éteint?

Le ministère public a plaidé que si les Heiltsuk ont effectivement eu le droit ancestral de vendre de la rogue de hareng sur varech, ce droit a été éteint avant 1982. Le ministère public se réfère au régime de réglementation mis en place en 1908 et au décret du conseil C.P. 2539 de 1917. Il s'agit du même régime de réglementation que le ministère public a invoqué, dans *Van der Peet*, précité, au soutien de son argument que tout droit ancestral de pêcher commercialement a été éteint avant 1982. Ainsi qu'il a été dit dans ce pourvoi, ce régime n'étaye pas la thèse de l'extinction.

Le ministère public s'est aussi référé à la disposition de l'*Acte des pêcheries* de 1867-1868 concernant le «fretin» des poissons (S.C. 1868, ch. 60, par. 13(9)): «Personne ne pêchera, ne prendra ou ne tuera, n'achètera, vendra ni n'aura en sa possession le fretin des poissons nommés dans le présent acte, ou dans aucun règlement ou règlements établis sous son autorité». Étant donné que le hareng était un poisson désigné en vertu de l'Acte, l'interdiction s'appliquait à la rogue de hareng sur varech. Une exception était prévue à l'égard de la récolte d'œufs de poisson par les Indiens pour se nourrir. Cette interdiction de récolter des œufs de poisson est restée en vigueur jusqu'en 1974, date à laquelle la récolte de cette ressource à des fins de vente a été autorisée, moyennant obtention d'un permis. Le ministère public prétend que la réglementation en question a éteint tout droit ancestral de vendre de la rogue de hareng sur varech.

Je ne peux conclure que cette réglementation a éteint le droit ancestral des Heiltsuk d'utiliser la rogue de hareng sur varech comme moyen de subsistance. La réglementation n'exprime pas l'intention «claire et expresse» requise pour entraîner l'extinction d'un droit ancestral. L'objet le plus vraisemblable des ces mesures de réglementation était d'assurer la conservation du fretin de ce poisson dans le but de favoriser la croissance de cette pêche. Une mesure ayant pour but la conservation

166

1996 CanLII 160 (SCC)

167

168

an aboriginal right to make use of that resource. Indeed, there is no evidence that these regulations were intended to relate to the aboriginal right at all.

3. Does the Current Regulatory Scheme Infringe the Aboriginal Right to Fish commercially for Sustenance?

169 In *Van der Peet*, *supra*, at para. 298, I framed the question to be asked in order to determine whether the government has infringed the aboriginal right to fish for sustenance as follows: does the current regulatory scheme have the effect of “interfering with an existing aboriginal right”? The right is that of the Heiltsuk to sell herring spawn on kelp for sustenance purposes.

170 To demonstrate that an aboriginal right has been interfered with, an aboriginal person must establish a *prima facie* right to engage in the prohibited conduct at issue. However, the Crown may rebut the inference of infringement if it can demonstrate that the regulatory scheme, viewed as a whole, accommodates the collective aboriginal right in question.

171 As discussed above, the appellants, as members of the Heiltsuk, have a right to harvest and sell herring spawn on kelp for the purpose of sustenance, a right apparently denied by the regulation under which the appellants stand charged. Thus, the first requirement of the test is met.

172 However, the Crown denies infringement of the aboriginal right on the ground that the sale in question took place within a regulatory scheme which sufficiently accommodates the right of the Heiltsuk to sell herring spawn on kelp. The Heiltsuk possessed a “Category J” licence to harvest and sell herring spawn on kelp at the time that the attempted sale at issue in this case took place. That licence was one of 28 licences issued to harvest and sell herring spawn on kelp during the 1988 season. It entitled the Heiltsuk to harvest 16,000

d’une ressource n’est pas incompatible avec la reconnaissance d’un droit ancestral d’utiliser cette ressource. De fait, il n’y a aucune preuve que cette réglementation visait d’aucune façon le droit ancestral.

3. Le régime de réglementation actuel porte-t-il atteinte au droit ancestral de pêcher commercialement à des fins de subsistance?

Dans *Van der Peet*, précité, au par. 298, j’ai formulé de la façon suivante la question qu’il faut se poser afin de déterminer si le gouvernement a porté atteinte au droit ancestral de pêcher à des fins de subsistance: le régime de réglementation actuel a-t-il pour effet de «porter atteinte à un droit ancestral existant»? Le droit en cause est celui des Heiltsuk de vendre de la roque de hareng sur varech à des fins de subsistance.

Pour démontrer qu’il a été porté atteinte à un droit ancestral, un autochtone doit établir l’existence à première vue d’un droit d’accomplir l’acte prohibé en cause. Toutefois, le ministère public peut repousser l’inférence qu’il y a atteinte en démontrant que, considéré dans son ensemble, le régime de réglementation respecte le droit ancestral collectif en question.

Comme il a été dit ci-dessus, les appelants ont, en tant que membres de la bande des Heiltsuk, le droit de récolter et de vendre la roque de hareng sur varech à des fins de subsistance, droit dont ils sont apparemment privés par la disposition réglementaire en vertu de laquelle ils ont été accusés. Par conséquent, la première condition du critère est remplie.

Cependant, le ministère public nie qu’il y a atteinte au droit ancestral, affirmant que la vente en question a eu lieu dans le cadre d’un régime de réglementation qui respecte suffisamment le droit des Heiltsuk de vendre de la roque de hareng sur varech. Au moment où la tentative de vente en question a eu lieu, les Heiltsuk étaient titulaires d’un permis de catégorie J qui les autorisait à récolter et à vendre de la roque de hareng sur varech. Ce permis était l’un des 28 permis de ce genre qui avaient été délivrés au cours de la saison

pounds of herring spawn on kelp, and the price per pound that year was between \$25 and \$28. The licence was issued in the name of one designated member of the Heiltsuk Band, but it was for use of the band as a whole. In short, in this case, unlike *Van der Peet* and *N.T.C. Smokehouse*, *supra*, the Crown argues that it has put in place a regulatory scheme that satisfies the aboriginal right.

The evidence does not disclose whether the "Category J" licence issued to the Heiltsuk was sufficient to satisfy the Heiltsuk's aboriginal right to sell herring spawn on kelp for sustenance. In order to determine whether the quantity of herring spawn on kelp allocated by the licence issued to the band was sufficient to satisfy the sustenance needs of the Heiltsuk, information as to their sustenance needs is required. I would refer the case for a new trial for determination of whether the projected revenue from the herring spawn on kelp sold pursuant to the "Category J" licence suffices to meet the Heiltsuk's sustenance needs.

4. Is the Limitation Placed on the Heiltsuk Right to Sell Herring Spawn on Kelp Justified?

Because of my position on the infringement issue, I do not reach this question. If infringement were established at a new trial, the question of whether such an infringement was justified should be decided at that point, according to the principles set out in *Van der Peet*, *supra*.

5. Conclusion

I would allow the appeal to the extent of confirming the existence of an aboriginal right of the Heiltsuk to sell herring spawn on kelp for sustenance purposes. I would order a new trial in order to decide whether that right has been infringed, and if so, whether such an infringement has been justified.

1988. En vertu de ce permis, les Heiltsuk pouvaient récolter 16 000 livres de rogue de hareng sur varech, dont le prix de vente au cours de l'année en question a oscillé entre 25 \$ et 28 \$ la livre. Le permis qui avait été délivré au nom d'un membre désigné de la bande des Heiltsuk était valable pour l'ensemble de la bande. Bref, en l'espèce, contrairement aux affaires *Van der Peet* et *N.T.C. Smokehouse*, précitées, le ministère public prétend qu'il a mis en place un régime de réglementation qui respecte le droit ancestral.

La preuve n'indique pas si le permis de catégorie J délivré aux Heiltsuk respectait suffisamment le droit ancestral des Heiltsuk de vendre de la rogue de hareng sur varech à des fins de subsistance. Afin de déterminer si la quantité de rogue de hareng sur varech attribuée au moyen du permis délivré à la bande était suffisante pour combler les besoins des Heiltsuk en matière de subsistance, il faut disposer d'information sur ces besoins. Je suis d'avis de renvoyer l'affaire en vue de la tenue d'un nouveau procès afin d'y déterminer si les revenus escomptés de la vente de rogue de hareng sur varech conformément au permis de catégorie J sont suffisants pour satisfaire les besoins des Heiltsuk en matière de subsistance.

4. Les limites imposées au droit des Heiltsuk de vendre de la rogue de hareng sur varech sont-elles justifiées?

Vu ma position sur la question de l'atteinte, je n'ai pas à examiner la question susmentionnée. Si, dans le cadre d'un nouveau procès, on établit l'existence d'une atteinte, la question de savoir si elle était justifiée doit alors être tranchée conformément aux principes énoncés dans *Van der Peet*, précité.

5. Conclusion

Je suis d'avis d'accueillir le pourvoi et de confirmer l'existence du droit ancestral des Heiltsuk de vendre de la rogue de hareng sur varech à des fins de subsistance. J'ordonnerais la tenue d'un nouveau procès afin de déterminer s'il y a eu atteinte à ce droit et, dans l'affirmative, si cette atteinte est justifiée.

Appeal allowed, LA FOREST J. dissenting.

EN APPEL DE LA COUR D'APPEL DE LA
COLOMBIE-BRITANNIQUE

Droit des Autochtones — Droits issus de traités — Droit de chasse — Deux membres de la bande indienne des Tsartlip accusés en vertu d'une loi provinciale sur la faune d'avoir chassé avec une arme à feu pendant les heures d'interdiction et d'avoir chassé à l'aide d'une source lumineuse — Le droit de chasse issu d'un traité comprend-il le droit de chasser la nuit à l'aide d'une source lumineuse? — Les mesures législatives provinciales d'application générale portent-elles atteinte au droit de chasse conféré par traité à la bande? — Les mesures législatives provinciales sont-elles applicables à la bande par l'effet de l'art. 88 de la Loi sur les Indiens? — Wildlife Act, S.B.C. 1982, ch. 57, art. 27(1)(d), (e), 29 — Loi sur les Indiens, L.R.C. 1985, ch. I-5, art. 88.

This is Exhibit UU referred to in the Affidavit of Tanny Nguyen sworn before me at Vancouver, BC this 6th day of July, 2019.

A Commissioner for taking affidavits for British Columbia

Constitutional law — Indians — Provincial wildlife legislation — Two members of Tsartlip Indian Band charged under provincial wildlife legislation of hunting with firearm during prohibited hours and hunting with illuminating device — Whether valid provincial legislation of general application inapplicable to band because it interferes with band's treaty right to hunt — Whether provincial legislation nonetheless applicable by virtue of s. 88 of Indian Act — Constitution Act, 1867, ss. 91(24), 92(13) — Indian Act, R.S.C. 1985, c. I-5, s. 88 — Wildlife Act, S.B.C. 1982, c. 57, s. 27(1)(d), (e).

The accused, both members of the Tsartlip Indian Band of the Saanich Nation, were hunting at night when they shot at a decoy deer set up by provincial conservation officers to trap illegal hunters. They were arrested and charged with several offences under British Columbia's *Wildlife Act*, including: (1) hunting wildlife with a firearm during prohibited hours (s. 27(1)(d)); (2) hunting by the use or with the aid of a light or illuminating device (s. 27(1)(e)); and (3) hunting without reasonable consideration for the lives, safety or property of other persons (s. 29). At trial, as a defence to the charges under s. 27(1), the accused raised their right "to hunt over the unoccupied lands . . . as formerly" under the North Saanich Treaty of 1852. They also introduced evidence that the particular night hunt for which they were charged was not dangerous. The trial judge found that "night hunting with illumination was one of the various methods employed by the Tsartlip [people] from time immemorial". However, despite the evidence that night hunting by Tsartlip hunters had yet to result in an accident, he nonetheless concluded that the accused did not have a treaty right to hunt at night because hunting at night with an illuminating device was "inherently unsafe". The trial judge entered convictions on count 1, conditionally stayed count 2 because of the rule against multiple convictions arising from the same delict, and entered acquittals on count 3. Both the summary conviction appeal judge and the majority of the Court of Appeal upheld the convictions based on the prohibition of night hunting (s. 27(1)(d)).

Droit constitutionnel — Indiens — Loi provinciale sur la faune — Deux membres de la bande indienne des Tsartlip accusés en vertu d'une loi provinciale sur la faune d'avoir chassé avec une arme à feu pendant les heures d'interdiction et d'avoir chassé à l'aide d'une source lumineuse — Les mesures législatives provinciales d'application générale qui sont valides sont-elles inapplicables à la bande du fait qu'elles portent atteinte au droit de chasse conféré par traité à la bande? — Les mesures législatives provinciales sont-elles néanmoins applicables par l'effet de l'art. 88 de la Loi sur les Indiens? — Loi constitutionnelle de 1867, art. 91(24), 92(13) — Loi sur les Indiens, L.R.C. 1985, ch. I-5, art. 88 — Wildlife Act, S.B.C. 1982, ch. 57, art. 27(1)(d), (e).

Les accusés, tous deux membres de la bande indienne des Tsartlip de la Nation saanich, étaient en train de chasser de nuit lorsqu'ils ont tiré sur un leurre en forme de cerf que des agents de conservation provinciaux avaient installé pour piéger les braconniers. Ils ont été arrêtés et accusés de plusieurs infractions prévues par la *Wildlife Act* de la Colombie-Britannique, dont les suivantes : (1) avoir chassé un animal sauvage avec une arme à feu pendant les heures d'interdiction (al. 27(1)d)); (2) avoir chassé à l'aide d'une lampe ou autre source lumineuse (al. 27(1)e)); (3) avoir chassé sans égard raisonnable pour la vie, la sécurité ou les biens d'autrui (art. 29). Au procès, pour leur défense contre les accusations fondées sur le par. 27(1), les accusés ont fait valoir leur droit de « chasser sur les terres inoccupées [. . .] comme autrefois » que leur confère le Traité de Saanich nord de 1852. Ils ont aussi produit des éléments de preuve établissant que la chasse nocturne particulière faisant l'objet de leur inculpation n'était pas dangereuse. Selon le juge du procès, « la chasse nocturne à l'aide d'une source lumineuse est l'une des diverses méthodes employées par les Tsartlip depuis des temps immémoriaux ». Toutefois, malgré la preuve que la chasse nocturne pratiquée par les Tsartlip n'avait encore causé aucun accident, il a statué que les accusés ne disposaient d'aucun droit conféré par traité qui leur permet de chasser la nuit, car la chasse nocturne à l'aide d'une source lumineuse est « intrinsèquement dangereuse ». Il a inscrit des déclarations de culpabilité relativement au premier chef d'accusation, a ordonné la suspension conditionnelle des procédures concernant le deuxième chef en raison de la règle interdisant les déclarations de culpabilité multiples pour le même délit et a inscrit des acquittements relativement au troisième chef. Le juge d'appel des poursuites sommaires et les juges majoritaires de la Cour d'appel ont confirmé les déclarations de culpabilité fondées sur l'interdiction de la chasse nocturne (al. 27(1)d)).

Held (McLachlin C.J. and Bastarache and Fish JJ. dissenting): The appeal should be allowed. The convictions are set aside and acquittals entered.

Per Binnie, Deschamps, Abella and Charron JJ.: The Tsartlip's right to hunt at night with the aid of illuminating devices is protected by the North Saanich Treaty. The historical context indicates that the parties intended the treaty to include the full panoply of hunting practices in which the Tsartlip people had engaged before they agreed to relinquish control over their lands. One of those practices was night hunting and, as the trial judge acknowledged, night hunting by the Tsartlip includes, and always has included, night hunting with the aid of illuminating devices. Even on a literal construction, the language of the treaty supports the view that the right to hunt "as formerly" means the right to hunt according to the methods used by the Tsartlip at the time of and before the treaty. The right of the Tsartlip to hunt at night with illuminating devices has of necessity evolved from its pre-treaty tools to its current implements, and the use of guns, spotlights, and motor vehicles reflects the current state of the evolution of the Tsartlip's historic hunting practices. However, it is acknowledged that it could not have been within the common intention of the parties that the Tsartlip would be granted a right to hunt dangerously, since no treaty confers on its beneficiaries a right to put human lives in danger. This is confirmed by the language of the treaty itself, which restricts hunting to "unoccupied lands", away from any town or settlement. Since British Columbia is a very large province, it cannot plausibly be said that a night hunt with illumination is unsafe everywhere and in all circumstances, even within the treaty area at issue in this case. Accordingly, while s. 29 of the *Wildlife Act*, which prohibits hunting or trapping "without reasonable consideration for the lives, safety or property of other persons", is a limit that does not impair the treaty rights of aboriginal hunters and trappers, paras. (d) and (e) of s. 27(1), which apply without exception to the whole province, are overbroad and infringe the treaty right to hunt. Something less than an absolute prohibition on night hunting can address the concern for safety. [14] [25-35] [40] [59]

The relevant provisions of the *Wildlife Act* are valid provincial legislation under s. 92(13) of the *Constitution Act, 1867*. Since treaty rights to hunt lie squarely within federal jurisdiction, provincial laws of general

Arrêt (la juge en chef McLachlin et les juges Bastarache et Fish sont dissidents) : Le pourvoi est accueilli. Les déclarations de culpabilité sont annulées et des acquittements sont inscrits.

Les juges Binnie, Deschamps, Abella et Charron : Le droit des Tsartlip de chasser la nuit à l'aide d'une source lumineuse est protégé par le Traité de Saanich nord. Il ressort du contexte historique que l'intention des parties était d'englober dans le traité toute la panoplie des pratiques de chasse auxquelles s'adonnaient les Tsartlip avant d'accepter de renoncer au contrôle de leurs terres. L'une de ces pratiques est la chasse nocturne et, comme l'a admis le juge du procès, la chasse nocturne pratiquée par les Tsartlip comprend, aujourd'hui comme toujours, la chasse nocturne à l'aide d'une source lumineuse. Même interprété littéralement, le texte du traité permet de confirmer que le droit de chasser « comme autrefois » signifie le droit de chasser selon les méthodes utilisées par les Tsartlip au moment du traité et dans la période qui l'a précédé. Le droit des Tsartlip de chasser la nuit à l'aide d'une source lumineuse a nécessairement évolué depuis les outils employés avant le traité jusqu'aux instruments actuels, et l'emploi de fusils, de projecteurs et de véhicules à moteur reflète l'état actuel de l'évolution des modes de chasse traditionnels des Tsartlip. Cependant, il est reconnu que l'intention commune des parties ne pouvait pas être d'accorder aux Tsartlip le droit de chasser dangereusement puisque aucun traité ne confère à ses bénéficiaires le droit de mettre en danger des vies humaines. Cela est confirmé par le texte du traité lui-même, qui restreint la chasse aux « terres inoccupées », loin des villes ou des peuplements. Étant donné que la Colombie-Britannique est une province très vaste, on ne peut affirmer de façon plausible que la chasse nocturne à l'aide d'une source lumineuse est dangereuse partout et dans toutes les circonstances, même dans la région qui est visée par le traité et qui est en cause en l'espèce. Par conséquent, alors que l'art. 29 de la *Wildlife Act*, lequel interdit de chasser ou de piéger « sans égard raisonnable pour la vie, la sécurité ou les biens d'autrui », constitue une limite qui ne porte pas atteinte aux droits conférés par traité aux chasseurs et piégeurs autochtones, les al. 27(1)d) et e), qui s'appliquent sans exception à l'ensemble de la province, ont une portée trop générale et portent atteinte au droit de chasse conféré par traité. Sans aller jusqu'à l'interdiction absolue de la chasse nocturne, il est possible de répondre aux préoccupations en matière de sécurité. [14] [25-35] [40] [59]

Les dispositions pertinentes de la *Wildlife Act* sont des mesures législatives provinciales valides selon le par. 92(13) de la *Loi constitutionnelle de 1867*. Étant donné que les droits de chasse issus de traités relèvent

application that are inapplicable because they impair “Indianness” may nonetheless be found to be applicable by incorporation under s. 88 of the *Indian Act*. While, on its face, s. 88 cannot be used to incorporate into federal law provincial laws that conflict with the terms of any treaty, the provinces may regulate treaty rights under certain circumstances. Provincial legislation of general application that interferes in an insignificant way with the exercise of that right do not infringe the right; but where, as in the case of s. 27(1)(d) and (e), such legislation is found to conflict with a treaty in a way that constitutes a *prima facie* infringement, the protection of treaty rights prevails and the provincial law cannot be incorporated under s. 88 of the *Indian Act*. [42-46] [50] [54]

Per McLachlin C.J. and Bastarache and Fish JJ. (dissenting): The impugned ban on night hunting with a firearm (s. 27(1)(d)) is valid provincial legislation that applies to the accused. [82]

The *Wildlife Act* falls in pith and substance within the province’s powers. It is not directed at a federal head, like Indians, but more generally at safety, a matter within provincial power. The ban on night hunting is an integrated part of a broader provincial scheme applicable to all British Columbians and aimed at assuring the safety of the province’s hunters and residents. Since this provision does not conflict with federal legislation, the doctrine of paramountcy has no application. Finally, where a provincial law of general application does not affect a treaty right, and does not otherwise touch upon core Indianness, that law applies *ex proprio vigore*, without recourse to s. 88 of the *Indian Act*. Provincial legislation that falls outside the internal limits on the treaty right that the parties to the treaty would have understood and intended does not encroach on the treaty right. [82] [87] [92]

A treaty must be interpreted in a manner that best reconciles the interests of the parties to it. The right to hunt protected by the treaty is subject to an internal limit: it does not include the right to hunt in an inherently hazardous manner. Rather, the right to hunt must be exercised reasonably. Although, at the time the treaty was signed, the practice of hunting at night did not pose the same dangers as it does today, the parties to the treaty must have understood that the right to

clairement de la compétence fédérale, les lois provinciales d’application générale qui sont inapplicables parce qu’elles touchent à l’« indianité » peuvent néanmoins être jugées applicables si elles sont incorporées au droit fédéral par l’effet de l’art. 88 de la *Loi sur les Indiens*. Même si on ne peut, de prime abord, recourir à l’art. 88 pour incorporer au droit fédéral des lois provinciales incompatibles avec des traités, les provinces peuvent dans certaines circonstances réglementer les droits issus de traités. Les lois provinciales d’application générale qui entravent de façon négligeable l’exercice d’un droit issu d’un traité ne portent pas atteinte à ce droit. Toutefois, si on conclut qu’une disposition législative provinciale entre en conflit avec un traité d’une manière qui constitue une atteinte à première vue, comme c’est le cas des al. 27(1)d) et e), la protection des droits issus de traités prévaut et la règle de droit provinciale ne peut être incorporée au droit fédéral par l’effet de l’art. 88 de la *Loi sur les Indiens*. [42-46] [50] [54]

La juge en chef McLachlin et les juges Bastarache et Fish (dissidents) : L’interdiction contestée de chasser la nuit avec une arme à feu (al. 27(1)d)) est une mesure législative provinciale valide qui s’applique aux accusés. [82]

La *Wildlife Act* relève, de par son caractère véritable, des pouvoirs de la province. Elle ne vise pas un chef de compétence fédéral, comme les Indiens, mais porte plus généralement sur la sécurité, matière de compétence provinciale. L’interdiction de la chasse nocturne fait partie intégrante d’un régime provincial plus vaste applicable à tous les Britanno-Colombiens et visant à assurer la sécurité des chasseurs et des résidents de la province. Étant donné que cette mesure législative n’est pas incompatible avec la législation fédérale, la règle de la prépondérance n’est pas applicable. Enfin, la loi provinciale d’application générale qui ne touche ni à un droit issu d’un traité ni autrement à l’essentiel de l’indianité s’applique d’elle-même, sans qu’il soit nécessaire de recourir à l’art. 88 de la *Loi sur les Indiens*. N’empièteraient pas sur le droit issu d’un traité les mesures législatives provinciales qui outrepassent ses limites intrinsèques que les parties au traité auraient comprises et envisagées. [82] [87] [92]

Les traités doivent être interprétés de la manière qui concilie le mieux les intérêts des parties. Le droit de chasse protégé par le traité comporte une limite intrinsèque : il n’inclut pas le droit de chasser de façon dangereuse en soi. Il doit plutôt être exercé de façon raisonnable. Même si, à l’époque de la signature du traité, la chasse nocturne ne présentait pas les mêmes dangers qu’aujourd’hui, les parties au traité devaient comprendre que le droit de chasser n’englobe pas le droit de

hunt did not carry with it a right to hunt dangerously. Furthermore, just as the methods and means of exercising the right should not be frozen in time, neither should the government's legitimate safety concerns. Adapting the exercise of treaty rights to modern weaponry without adapting the corollary legitimate safety concerns would lead to unacceptable results. [82] [108] [110] [115]

Here, s. 27(1)(d) of the *Wildlife Act* regulates the internal safety limit on the treaty right of the accused. A ban on night hunting with a firearm is a reasonable exercise of the Province's regulatory power in defining this internal limit. Since the regulation of dangerous hunting falls outside the scope of the treaty right to hunt, no treaty right is engaged. Accordingly, as no aboriginal right is asserted, and as the provincial law does not otherwise go to Indianness, the law applies *ex proprio vigore*. [82] [129] [132]

chasser dangereusement. Par ailleurs, tout comme les méthodes et moyens employés pour l'exercice des droits ne sont pas figés dans le temps, les préoccupations légitimes du gouvernement en matière de sécurité ne doivent pas l'être non plus. Adapter l'exercice des droits issus de traités au contexte des armes modernes sans adapter son corollaire — les préoccupations légitimes en matière de sécurité — entraînerait des résultats inacceptables. [82] [108] [110] [115]

En l'espèce, l'al. 27(1)(d) de la *Wildlife Act* réglemente la limite intrinsèque — en matière de sécurité — du droit conféré par traité aux accusés. L'interdiction de la chasse nocturne avec une arme à feu est l'exercice raisonnable du pouvoir de réglementation de la province pour définir cette limite intrinsèque. Étant donné que la réglementation des pratiques de chasse dangereuses ne relève pas du champ d'application du droit de chasse issu d'un traité, aucun droit issu d'un traité n'est en jeu. Par conséquent, comme aucun droit ancestral n'est invoqué et que les règles de droit provinciales ne touchent pas autrement à l'indianité, elles s'appliquent d'elles-mêmes. [82] [129] [132]

The judgment of Binnie, Deschamps, Abella and Charron JJ. was delivered by

Version française du jugement des juges Binnie, Deschamps, Abella et Charron rendu par

1 DESCHAMPS AND ABELLA JJ. — This case raises the question whether a provincial government acting within its constitutionally mandated powers can interfere with treaty rights and, if so, to what extent.

LES JUGES DESCHAMPS ET ABELLA — Il s'agit en l'espèce de déterminer si un gouvernement provincial agissant dans les limites des pouvoirs que lui confère la Constitution peut porter atteinte aux droits issus de traités et, dans l'affirmative, dans quelle mesure.

2 In 1852, James Douglas, Governor of the Colony of Vancouver Island, representing the British Crown, enshrined in a treaty the recognition that the Saanich Nation would be “at liberty to hunt over the unoccupied lands; and to carry on our fisheries as formerly”. Ivan Morris and Carl Olsen, both members of the Tsartlip Band of the Saanich Nation, were charged, among other charges, under s. 27(1)(d) and (e) of British Columbia's *Wildlife Act*, S.B.C. 1982, c. 57, for doing what the Tsartlip have done, as the trial judge noted, “from time immemorial”: hunting for food at night with the aid of illuminating devices.

En 1852, James Douglas, gouverneur de la colonie de l'île de Vancouver, représentant la Couronne britannique, a garanti par traité à la Nation saanich qu'elle aurait [TRADUCTION] « toute liberté pour chasser sur les terres inoccupées et pêcher comme autrefois ». Ivan Morris et Carl Olsen, tous deux membres de la bande indienne des Tsartlip de la Nation saanich, ont été accusés, entre autres, en vertu des al. 27(1)d) et e) de la *Wildlife Act* de la Colombie-Britannique, S.B.C. 1982, ch. 57, d'avoir pratiqué une activité que, comme l'a souligné le juge du procès, les Tsartlip pratiquent [TRADUCTION] « depuis des temps immémoriaux » : la chasse nocturne de subsistance à l'aide d'une source lumineuse.

3 As a defence to the charges under s. 27, Morris and Olsen raised their right to hunt under the North Saanich Treaty of 1852 (“Treaty”). The Crown concedes that Morris and Olsen have a right to hunt but asserts a ban on hunting at night. Morris and Olsen counter that they were observing safe hunting practices and that provincial regulations cannot affect their treaty right.

MM. Morris et Olsen ont fait valoir pour leur défense contre les accusations fondées sur l'art. 27 le droit de chasse que leur confère le Traité de Saanich nord de 1852 (« Traité »). La Couronne leur reconnaît le droit de chasse, mais affirme la validité de l'interdiction de la chasse nocturne. MM. Morris et Olsen répliquent qu'ils observaient des pratiques de chasse sécuritaires et que la réglementation provinciale ne peut toucher à leur droit issu d'un traité.

4 In this case, we conclude that the Tsartlip's right to hunt at night with the aid of illuminating devices is protected by treaty. Although the prohibition against dangerous hunting contained in s. 29 of the *Wildlife Act* is a limit that does not infringe the treaty right, the complete prohibition on hunting at night with an illuminating device set out in

Nous concluons en l'espèce que le droit des Tsartlip de chasser la nuit à l'aide d'une source lumineuse est protégé par traité. Alors que l'interdiction de chasser dangereusement prévue à l'art. 29 de la *Wildlife Act* constitue une limite qui ne porte pas atteinte au droit issu d'un traité, l'interdiction absolue de chasser la nuit à l'aide d'une source

s. 27 is overbroad because it prohibits both safe and unsafe hunting, and, in the case of aboriginal hunters, infringes their treaty right.

The evidence at trial was that the Tsartlip's historic aboriginal practice of hunting at night with illumination has yet to result in a single known accident caused by those engaging in it. In our view, paras. (d) and (e) of s. 27(1) of the *Wildlife Act*, despite being part of a valid provincial law of general application, prohibit the exercise of a protected treaty right and are inapplicable in this case. We would therefore allow the appeal, set aside the convictions and enter acquittals.

1. Background

Morris and Olsen were arrested on November 28, 1996 on Vancouver Island for breaches of prohibitions contained in the *Wildlife Act*: hunting of wildlife with a firearm during prohibited hours (s. 27(1)(d)); hunting by the use or with the aid of a light or illuminating device (s. 27(1)(e)); hunting without reasonable consideration for the lives, safety or property of other persons (s. 29); and, in the case of Olsen only, discharging a firearm at wildlife from a motor vehicle (s. 28(1)).

The backdrop to the prosecution of Morris and Olsen was a change of administrative policy on the part of the provincial Crown, acting through conservation officers. The evidence is that the Tsartlip had hunted at night for generations until the charges were laid in this case. They had received confirmation from the Minister of Forests, David Zirnheld, that there would be no prosecutions in connection with the exercise of hunting and fishing rights pursuant to the Treaty. On the basis of this assurance, the Tsartlip entered into an arrangement with Doug Turner, Chief Enforcement Officer of the Conservation Officer Service for Vancouver Island, whereby any treaty beneficiary charged in relation to night hunting was instructed to phone Mr. Turner. Once Mr. Turner received confirmation

lumineuse prévue à l'art. 27 a une portée trop générale, car elle vise à la fois la chasse dangereuse et la chasse sécuritaire et, dans le cas des chasseurs autochtones, elle porte atteinte à leur droit issu d'un traité.

Selon la preuve présentée au procès, la traditionnelle chasse nocturne autochtone à l'aide d'une source lumineuse que pratiquent les Tsartlip n'a encore, à ce que l'on sache, causé aucun accident de la part des chasseurs. À notre avis, les al. 27(1)d) et e) de la *Wildlife Act*, même s'ils font partie d'une loi provinciale d'application générale qui est valide, interdisent l'exercice d'un droit protégé par traité et sont inapplicables en l'espèce. Nous sommes donc d'avis d'accueillir le pourvoi, d'annuler les déclarations de culpabilité et d'inscrire des acquittements.

1. Contexte

MM. Morris et Olsen ont été arrêtés le 28 novembre 1996 sur l'île de Vancouver pour avoir enfreint des interdictions énoncées dans la *Wildlife Act* : avoir chassé un animal sauvage avec une arme à feu pendant les heures d'interdiction (al. 27(1)d)); avoir chassé à l'aide d'une lampe ou autre source lumineuse (al. 27(1)e)); avoir chassé sans égard raisonnable pour la vie, la sécurité ou les biens d'autrui (art. 29); et — dans le cas de M. Olsen seulement — avoir déchargé une arme à feu sur un animal sauvage à partir d'un véhicule à moteur (par. 28(1)).

La poursuite contre MM. Morris et Olsen a été intentée dans le contexte d'une nouvelle politique administrative de la Couronne provinciale, qui agit par l'intermédiaire des agents de conservation. Selon la preuve, les Tsartlip pratiquaient la chasse nocturne depuis des générations jusqu'à ce que les accusations soient portées en l'espèce. Ils avaient reçu du ministre des Forêts, David Zirnheld, la confirmation qu'aucune poursuite ne serait engagée relativement à l'exercice des droits de chasse et de pêche garantis par le Traité. Se fondant sur ces assurances, les Tsartlip ont convenu avec Doug Turner, agent principal chargé de l'exécution de la loi, service des agents de conservation de l'île de Vancouver, qu'en cas d'inculpation d'un bénéficiaire du Traité relativement à la chasse nocturne,

that the hunter in question was a member of the Saanich Nation, the hunter would be released. This arrangement, it appears, ended with Mr. Turner's retirement in 1996.

celui-ci téléphonerait à M. Turner. Le chasseur en question serait remis en liberté dès que son appartenance à la Nation saanich aurait été confirmée à M. Turner. Cette entente aurait, semble-t-il, pris fin avec le départ à la retraite de M. Turner en 1996.

8 In November of that year, not long after Mr. Turner's retirement, a conservation officer was invited to speak at a "rod and gun" club meeting where members expressed dissatisfaction about Indians engaged in night hunting. A decoy operation was promptly organized to trap night hunters, as a result of which Morris and Olsen were arrested and charged. The Tsartlip were not forewarned of the operation and no discussion took place after the charges were laid.

En novembre de la même année, peu après le départ de M. Turner, un agent de conservation a été invité comme conférencier à une réunion d'un club de chasse et pêche, où des membres se sont dits mécontents du fait que des Indiens chassaient la nuit. On a rapidement monté une opération leurre pour piéger les chasseurs nocturnes. C'est ainsi que MM. Morris et Olsen ont été arrêtés et inculpés. Les Tsartlip n'ont pas été prévenus de la tenue de l'opération, et il n'y a eu aucune discussion après les mises en accusation.

9 The trial in Provincial Court lasted five days. Morris and Olsen raised their rights under the Treaty as a general defence to the charges. The conservation officer acknowledged that safety concerns are inversely proportionate to the remoteness and density of the population.

Le procès à la Cour provinciale a duré cinq jours. MM. Morris et Olsen ont invoqué, comme moyen de défense général contre les accusations, les droits que leur confère le Traité. L'agent de conservation a reconnu que les préoccupations relatives à la sécurité sont inversement proportionnelles à l'éloignement et à la densité de la population.

10 Morris and Olsen led evidence to the effect that night hunting is part of the Tsartlip tradition and has been carried on in safety for generations. They also introduced evidence that the particular night hunt for which they were charged was not dangerous. Morris and Olsen were caught by provincial conservation officers using a mechanical black-tailed deer decoy. The decoy was set up on unoccupied lands 20 metres off a gravel road. It was, one of the conservation officers testified, a spot chosen for its safety. Officer Gerald Brunham explained the choice of site as follows:

MM. Morris et Olsen ont présenté la preuve que la chasse nocturne fait partie de la tradition des Tsartlip et qu'elle est pratiquée de façon sécuritaire depuis des générations. Ils ont aussi produit des éléments de preuve établissant que la chasse nocturne particulière faisant l'objet de leur inculpation n'était pas dangereuse. Ils se sont fait prendre par des agents de conservation provinciaux, qui se sont servis d'un leurre mécanique en forme de cerf à queue noire. Le leurre était installé sur des terres inoccupées, à 20 m d'une route en gravier. Selon le témoignage d'un des agents de conservation, l'endroit était choisi pour ses caractéristiques sécuritaires. L'agent Gerald Brunham a expliqué ainsi le choix de l'emplacement :

[TRADUCTION]

Q Were there any residences in that vicinity?

Q Y avait-il des résidences dans ce voisinage?

A Not within two kilometres.

R Aucune dans un rayon de deux kilomètres.

. . .

. . .

Q And you chose that particular [hunting] site because of safety aspects?

A Yes.

Q So would it be accurate to say that there were no private property, no campers, no dwellings within the range that a bullet would travel?

A Yes.

Q And you chose that specific hillside so that if a bullet did go through your decoy it would go into a hill and into the trees?

A That's right.

The trial judge found that “night hunting with illumination was one of the various methods employed by the Tsartlip [people] from time immemorial” ([1999] B.C.J. No. 3199 (QL), at para. 19). However, despite the evidence that night hunting by Tsartlip hunters had yet to result in an accident, he nonetheless concluded that Morris and Olsen did not have a treaty right to hunt at night because hunting at night with an illuminating device was “inherently unsafe” (para. 25).

They were both convicted of hunting during prohibited hours contrary to s. 27(1)(d), and Olsen was convicted of discharging a firearm at wildlife from a motor vehicle contrary to s. 28(1). However, despite his conclusion that night hunting was inherently unsafe, the trial judge acquitted the appellants on the count of hunting without reasonable consideration for the lives, safety or property of other persons (s. 29). As well, the trial judge conditionally stayed the charges of hunting with the use or aid of a light or illuminating device contrary to s. 27(1)(e), based on the rule in *Kienapple v. The Queen*, [1975] 1 S.C.R. 729.

The convictions based on the prohibition of night hunting (s. 27(1)(d)) were upheld by a summary conviction appeal judge ([2002] 4 C.N.L.R. 222, 2002 BCSC 780) and by the majority in

Q Et vous avez choisi cet endroit précis pour ses caractéristiques sécuritaires?

R Oui.

Q N'est-il pas exact qu'à cet endroit il n'y avait pas de propriété privée, pas de campement, pas d'habitation dans le rayon de la trajectoire d'une balle?

R Oui.

Q Et vous avez choisi ce versant précisément pour que la balle qui traverserait le leurre aboutisse dans une colline et dans les arbres?

R C'est exact.

Selon le juge du procès, [TRADUCTION] « la chasse nocturne à l'aide d'une source lumineuse est l'une des diverses méthodes employées par les Tsartlip depuis des temps immémoriaux » ([1999] B.C.J. No. 3199 (QL), par. 19). Toutefois, malgré la preuve que la chasse nocturne pratiquée par les Tsartlip n'avait encore causé aucun accident, le juge a statué que MM. Morris et Olsen ne disposaient d'aucun droit conféré par traité qui leur permet de chasser la nuit, car la chasse nocturne à l'aide d'une source lumineuse est [TRADUCTION] « intrinsèquement dangereuse » (par. 25).

Ils ont tous deux été reconnus coupables d'avoir, en contravention de l'al. 27(1)d), chassé pendant les heures interdites, et M. Olsen a été reconnu coupable d'avoir, en violation du par. 28(1), déchargé une arme à feu sur un animal sauvage à partir d'un véhicule à moteur. Cependant, malgré sa conclusion que la chasse nocturne était intrinsèquement dangereuse, le juge du procès a acquitté les appelants relativement à l'accusation d'avoir chassé sans égard raisonnable pour la vie, la sécurité ou les biens d'autrui (art. 29). Il a aussi ordonné la suspension conditionnelle des procédures concernant l'accusation d'avoir chassé à l'aide d'une lampe ou autre source lumineuse en violation de l'al. 27(1)e), selon la règle énoncée dans *Kienapple c. La Reine*, [1975] 1 R.C.S. 729.

Les déclarations de culpabilité fondées sur l'interdiction de chasser la nuit (al. 27(1)d)) ont été confirmées par un juge d'appel des poursuites sommaires ([2002] 4 C.N.L.R. 222, 2002 BCSC 780) et

11

12

13

the Court of Appeal for British Columbia, with Lambert J.A. dissenting ((2004), 25 B.C.L.R. (4th) 45, 2004 BCCA 121). The only provisions at issue in the appeal before us are s. 27(1)(d) and (e).

2. Analysis

14 The analytical framework in which to consider this case can be divided into two parts. The first step is to determine whether the impugned provisions of the *Wildlife Act* impair a treaty right. This entails characterizing the scope of the treaty right claimed by Morris and Olsen and delineating any limits on that right. We acknowledge at the outset that there is no treaty right to hunt dangerously. Thus s. 29 of the *Wildlife Act*, which prohibits hunting or trapping “without reasonable consideration for the lives, safety or property of other persons”, is a limit that does not impair the treaty rights of aboriginal hunters and trappers. At issue are the limits imposed by s. 27(1)(d) and (e). In our view these prohibitions, presented as safety measures in relation to the Tsartlip, are overbroad and infringe the treaty right to hunt.

15 The second step is to analyse whether the impugned provisions of the *Wildlife Act* are valid and applicable under the constitutional division of powers in ss. 91 and 92 of the *Constitution Act, 1867* and under s. 88 of the *Indian Act*, R.S.C. 1985, c. I-5. In our view, because paras. (d) and (e) of s. 27(1) are inconsistent with the Treaty, they do not apply to Morris and Olsen either directly, of their own force, as provincial law, or as incorporated federal law under s. 88 of the *Indian Act*.

2.1 *Evolution of the Treaty Right*

16 Between 1850 and 1854, 14 treaties were concluded with bands living on Vancouver Island. These came to be known as the Douglas Treaties, named after James Douglas, Governor of the Colony of Vancouver Island at the time. The Treaty

par les juges majoritaires de la Cour d’appel de la Colombie-Britannique, le juge Lambert étant dissident ((2004), 25 B.C.L.R. (4th) 45, 2004 BCCA 121). Les seules dispositions en litige en l’espèce sont les al. 27(1)(d) et e).

2. Analyse

Le cadre d’analyse de la présente espèce peut être scindé en deux parties. La première étape consiste à décider si les dispositions contestées de la *Wildlife Act* portent atteinte à un droit issu d’un traité. Pour ce faire, il faut définir la portée du droit issu d’un traité invoqué par MM. Morris et Olsen et ainsi que les limites de ce droit. Nous reconnaissons d’emblée qu’aucun traité ne confère le droit de chasser dangereusement. Ainsi, l’art. 29 de cette loi, lequel interdit de chasser ou de piéger [TRADUCTION] « sans égard raisonnable pour la vie, la sécurité ou les biens d’autrui », constitue une limite qui ne porte pas atteinte aux droits conférés par traité aux chasseurs et piégeurs autochtones. La question en litige est celle des limites imposées par les al. 27(1)(d) et e). À notre avis, ces interdictions, présentées comme des mesures de sécurité pour les Tsartlip, ont une portée trop générale et portent atteinte au droit de chasse issu d’un traité.

La seconde étape consiste à déterminer la validité et l’applicabilité des dispositions contestées de la *Wildlife Act*, selon le partage constitutionnel des compétences prévu aux art. 91 et 92 de la *Loi constitutionnelle de 1867* et selon l’art. 88 de la *Loi sur les Indiens*, L.R.C. 1985, ch. I-5. À notre avis, étant donné que les al. 27(1)(d) et e) sont incompatibles avec le Traité, ils ne s’appliquent pas à MM. Morris et Olsen, que ce soit directement d’eux-mêmes comme règles de droit provinciales, ou encore comme règles de droit fédérales incorporées par l’effet de l’art. 88 de la *Loi sur les Indiens*.

2.1 *Évolution du droit issu d’un traité*

Entre 1850 et 1854, 14 traités ont été conclus avec des bandes vivant sur l’île de Vancouver. On a fini par les appeler Traités de Douglas, en l’honneur de James Douglas, gouverneur de la colonie de l’île de Vancouver à l’époque. Le Traité, à lui

alone covers approximately 22,000 hectares situated on lands that are partly uninhabited and partly inhabited.

In exchange for the surrender by the Saanich of their lands on Vancouver Island, the Crown made a number of commitments to them, including the following guarantee:

[I]t is . . . understood that we [the Saanich Tribe] are at liberty to hunt over the unoccupied lands, and to carry on our fisheries as formerly. [Emphasis added.]

Each of the 14 treaties contained this commitment in the same formulation.

The language of the Treaty stating “we are at liberty to hunt over the unoccupied lands” exemplifies the lean and often vague vocabulary of historic treaty promises. McLachlin J., dissenting on other grounds, stated in *R. v. Marshall*, [1999] 3 S.C.R. 456 (“*Marshall No. 1*”), at para. 78, that “[t]he goal of treaty interpretation is to choose from among the various possible interpretations of common intention the one which best reconciles the interests of both parties at the time the treaty was signed”. This means that the promises in the treaty must be placed in their historical, political, and cultural contexts to clarify the common intentions of the parties and the interests they intended to reconcile at the time.

The Douglas Treaties were the reflections of oral agreements reduced to writing by agents of the Crown. The historical background to these treaties has been ably documented by the B.C. Court of Appeal in three decisions: see *R. v. White* (1964), 50 D.L.R. (2d) 613; *R. v. Bartleman* (1984), 55 B.C.L.R. 78; and *Saanichton Marina Ltd. v. Claxton* (1989), 36 B.C.L.R. (2d) 79. This historical context reveals an overriding intention that the methods by which the Saanich traditionally hunted be brought within the Treaty’s protection.

First, it was in the interest of all parties to preserve traditional hunting and fishing practices among the Tsartlip and other Douglas Treaty

seul, couvre une superficie d’environ 22 000 hectares s’étendant sur des terres qui sont en partie inhabitées et en partie habitées.

En contrepartie des terres cédées par les Saanich sur l’île de Vancouver, la Couronne a pris certains engagements envers eux, notamment le respect de la garantie suivante :

[TRADUCTION] [I]l est [. . .] entendu que nous [les Saanich] avons toute liberté pour chasser sur les terres inoccupées et pêcher comme autrefois. [Nous soulignons.]

Cet engagement figurait selon le même libellé dans chacun des 14 traités.

La formulation « nous avons toute liberté pour chasser sur les terres inoccupées » qui figure dans le Traité donne un exemple de la pauvreté et du caractère souvent vague des expressions utilisées dans le cadre d’un traité historique. Dans *R. c. Marshall*, [1999] 3 R.C.S. 456 (« *Marshall n° 1* »), par. 78, la juge McLachlin, dissidente pour d’autres motifs, a affirmé que « [l]’interprétation des traités a pour objet de choisir, parmi les interprétations possibles de l’intention commune, celle qui concilie le mieux les intérêts des deux parties à l’époque de la signature ». Cela veut dire qu’il faut placer dans leurs contextes historique, politique et culturel les promesses figurant dans le traité afin de dégager l’intention commune des parties et les intérêts qu’elles voulaient concilier à l’époque.

Les Traités de Douglas sont le fruit d’ententes verbales que les représentants de la Couronne ont couchées par écrit. La Cour d’appel de la Colombie-Britannique a bien documenté le contexte historique de ces traités dans trois arrêts : voir *R. c. White* (1964), 50 D.L.R. (2d) 613; *R. c. Bartleman* (1984), 55 B.C.L.R. 78; et *Saanichton Marina Ltd. c. Claxton* (1989), 36 B.C.L.R. (2d) 79. Ce contexte historique atteste l’intention prépondérante de protéger par le Traité les modes de chasse traditionnels des Saanich.

Premièrement, il était dans l’intérêt de toutes les parties de préserver les modes de chasse et de pêche traditionnels chez les Tsartlip et d’autres

17

18

19

20

bands. As Lambert J.A. stated in *Bartleman*, at p. 90:

[A]t the time of the treaties, it was a concern of the colonial government not to disturb the Indian people in their traditional food-gathering activities. It was in the interest of the government of the colony of Vancouver Island and of the Indians that the Indians should be able to support themselves in their traditional ways.

21

The interests of the colonial government in preserving the traditional Tsartlip way of life were a reflection of the economic and demographic realities of the region, including concerns for the safety and security of the small number of settlers. Norris J.A. summarized these imperatives as follows in *White*, at p. 657:

[I]t was at the time of Douglas particularly important for the maintenance of law and order that Indian rights be respected and interpreted broadly in favour of the Indians, not merely for the due administration of law, but also for the safety of the settlers who constituted a minority of, at the most, 1,000 persons, there being 30,000 Indians on Vancouver Island alone, apart from the warlike tribes to the north, who always constituted a raiding threat and against whom the maintenance of friendship with the local Indians afforded a measure of security.

22

Second, the historical record discloses that Governor Douglas represented to the Indian peoples with whom he entered into treaties that the treaties would secure for them the right to continue their pre-treaty hunting practices. In a letter to the Colonial Secretary dated May 16, 1850, Douglas stated the following:

I informed the natives that they would not be disturbed in the possession of their Village sites and enclosed fields, which are of small extent, and that they were at liberty to hunt over the unoccupied lands, and to carry on their fisheries with the same freedom as when they were the sole occupants of the country. [Emphasis added.]

(See *White*, at p. 651.)

23

Douglas wrote a similar confirmation to the Speaker and members of the House of Assembly of British Columbia, advising them that:

bandes visées par les Traités de Douglas. Le juge Lambert a affirmé dans *Bartleman*, p. 90 :

[TRADUCTION] [À] l'époque des traités, le gouvernement colonial veillait à ne pas perturber les Indiens dans leurs activités de subsistance traditionnelles. C'était dans l'intérêt du gouvernement de la colonie de l'île de Vancouver et des Indiens que ceux-ci puissent subvenir à leurs besoins selon leur mode de vie traditionnel.

L'intérêt du gouvernement colonial à préserver le mode de vie traditionnel des Tsartlip reflétait les réalités économiques et démographiques de la région, y compris les préoccupations concernant la sécurité des colons, qui étaient en faible nombre. Le juge Norris a résumé ces impératifs dans *White*, p. 657 :

[TRADUCTION] [À] l'époque de Douglas, il était particulièrement important pour le maintien de l'ordre public que les droits des Indiens soient respectés et interprétés libéralement en leur faveur, non seulement pour l'application régulière de la loi, mais aussi pour la sécurité des colons, qui n'étaient qu'une petite minorité d'au plus 1 000 personnes, alors qu'il y avait 30 000 Indiens dans l'île de Vancouver uniquement, sans compter les tribus guerrières du Nord de l'île, qui représentaient une menace d'incursion constante et contre lesquels les liens d'amitié avec les Indiens de la région assuraient une certaine sécurité.

Deuxièmement, le dossier historique révèle que le gouverneur Douglas a fait comprendre aux peuples indiens avec qui il concluait des traités que ceux-ci leur garantiraient le droit de continuer à chasser comme auparavant. Dans la lettre qu'il a adressée au secrétaire aux Affaires coloniales le 16 mai 1850, M. Douglas a écrit :

[TRADUCTION] J'ai informé les indigènes qu'ils ne seraient pas inquiétés dans la possession de leurs villages et de leurs prés enclos, qui sont de faible étendue, et qu'ils avaient toute liberté pour chasser sur les terres inoccupées et pêcher en jouissant de la même liberté que lorsqu'ils étaient les seuls occupants du pays. [Nous soulignons.]

(Voir *White*, p. 651.)

M. Douglas a écrit une confirmation similaire au président et aux députés de l'Assemblée législative de la Colombie-Britannique :

[The Indians] were to be protected in their original right of fishing on the Coasts and in the Bays of the Colony, and of hunting over all unoccupied Crown Lands: and they were also to be secured in the enjoyment of their village sites and cultivated fields.

(*Bartleman*, at p. 89)

These external acknowledgments by Douglas are significant where, as here, the treaty was concluded orally and subsequently reduced to writing. The oral promises made when the treaty was agreed to are as much a part of the treaty as the written words: see *Marshall No. 1*, at para. 12.

The promises made by Douglas confirm that the parties intended the Treaty to include the full panoply of hunting practices in which the Tsartlip people had engaged before they agreed to relinquish control over their lands on Vancouver Island.

One of those practices was night hunting. The trial judge acknowledged the “considerable body of evidence supporting the fact that night hunting has been an accepted practice of the Tsartlip people from pre-treaty days to the present” (para. 18). His most significant finding about night hunting was that it includes, and always has included, hunting with the aid of illuminating devices:

[N]ight hunting with illumination was one of the various methods employed by the Tsartlip people from time immemorial. [para. 19]

This finding reflected the evidence of Tom Sampson, a member of the Tsartlip Indian Band who had hunted for 56 of his 65 years. He described the various ways illumination was historically used in night hunting, including:

... a carbide light, it was what the coal miners used to use, and prior to that we used — in fishing, we used the hollowed out part of our canoe and we used pitch from a tree, the stumps we would cut out and shape and put in front of the canoe as a light for hunting and fishing.

The relevant provision of this Treaty, as previously noted, states that the Tsartlip “are at liberty

[TRADUCTION] Il fallait assurer [aux Indiens] la protection de leur droit originaire de pêcher sur les côtes et dans les baies de la Colonie, et de chasser sur toutes les terres inoccupées de la Couronne; il fallait aussi leur garantir la jouissance de leurs villages et champs cultivés.

(*Bartleman*, p. 89)

Ces confirmations de M. Douglas à des tiers sont d'importance dans les cas où, comme en l'espèce, le traité a été conclu oralement et subséquemment couché par écrit. Les promesses verbales lors de la conclusion du traité font autant partie du traité que le texte écrit : voir *Marshall n° 1*, par. 12.

Les promesses de M. Douglas confirment l'intention des parties d'englober dans le Traité toute la panoplie des pratiques de chasse auxquelles s'adonnaient les Tsartlip avant d'accepter de renoncer au contrôle de leurs terres sur l'île de Vancouver.

L'une de ces pratiques est la chasse nocturne. Le juge du procès a admis [TRADUCTION] « l'existence de nombreux éléments de preuve confirmant que la chasse nocturne est reconnue aux Tsartlip aussi bien avant qu'après le Traité » (par. 18). Sa conclusion la plus importante au sujet de la chasse nocturne est qu'elle se pratique, aujourd'hui comme toujours, à l'aide d'une source lumineuse :

[TRADUCTION] La chasse nocturne à l'aide d'une source lumineuse est l'une des diverses méthodes employées par les Tsartlip depuis des temps immémoriaux. [par. 19]

Cette conclusion reflète le témoignage de Tom Sampson, un membre de la bande indienne des Tsartlip qui a passé 56 années des 65 années de sa vie à chasser. Il a décrit les diverses façons dont la source lumineuse était traditionnellement employée pour la chasse nocturne, notamment :

[TRADUCTION] ... une lampe à carbure, comme celles qu'utilisaient les mineurs, et avant cela, nous utilisions — pour la pêche, nous utilisions la partie concave de notre canot ainsi que de la résine d'arbres et des bâtons que nous coupions, façonnions et mettions devant le canot pour servir de lumière pour la chasse et la pêche.

Comme nous l'avons déjà mentionné, selon la disposition pertinente du Traité, les Tsartlip ont

24

25

26

27

28

to hunt over the unoccupied lands; and to carry on [their] fisheries as formerly”. There is no dispute, at least for the purposes of this case, that the words “as formerly” apply to both the hunting and fishing clauses.

29 As McLachlin J. stated in *Marshall No. 1*, at para. 78, these words “must be given the sense which they would naturally have held for the parties at the time”. She also said that “[t]reaties should be liberally construed and ambiguities or doubtful expressions should be resolved in favour of the aboriginal signatories”. Even on a literal construction, the language of the Treaty supports the view that the right to hunt “as formerly” means the right to hunt according to the methods used by the Tsartlip at the time of and before the Treaty. This would obviously include those methods the Tsartlip have used in hunting “from time immemorial”.

30 From 1852 to the present, the tools used by the Tsartlip in hunting at night have evolved. From sticks with pitch to spotlights and from canoes to trucks, the tools and methods employed in night hunting have changed over time. These changes do not diminish the rights conferred by the Treaty. The right of the Tsartlip to hunt at night with illuminating devices has of necessity evolved from its pre-treaty tools to its current implements. As McLachlin C.J. observed in *R. v. Marshall*, [2005] 2 S.C.R. 220, 2005 SCC 43, at para. 25:

... treaty rights are not frozen in time. Modern peoples do traditional things in modern ways. The question is whether the modern trading activity in question represents a logical evolution from the traditional trading activity at the time the treaty was made Logical evolution means the same sort of activity, carried on in the modern economy by modern means. This prevents aboriginal rights from being unfairly confined simply by changes in the economy and technology.

31 This approach has led the Court in other cases to acknowledge, for example, that hunting with a rifle and ammunition is the current form of an evolving right whose origins were hunting with a bow and

[TRANSLATION] « toute liberté pour chasser sur les terres inoccupées et pêcher comme autrefois ». Nul ne conteste, du moins pour les besoins du présent pourvoi, que le terme « comme autrefois » s’applique tant au membre de phrase concernant la pêche qu’à celui concernant la chasse.

Comme la juge McLachlin l’a affirmé dans *Marshall n° 1*, par. 78, « [i]l faut donner au texte du traité le sens que lui auraient naturellement donné les parties à l’époque » et « [l]es traités doivent recevoir une interprétation libérale, et toute ambiguïté doit profiter aux signataires autochtones ». Même interprété littéralement, le texte du Traité permet de confirmer que le droit de chasser « comme autrefois » signifie le droit de chasser selon les méthodes utilisées par les Tsartlip au moment du Traité et dans la période qui l’a précédé. Il est évident que les méthodes de chasse employées par les Tsartlip « depuis des temps immémoriaux » en font partie.

Depuis 1852, les outils utilisés par les Tsartlip pour la chasse nocturne ont évolué. Des bâtons enduits de résine aux projecteurs et des canots aux camions, les outils et méthodes employés pour la chasse nocturne ont changé avec le temps. Toutefois, ces changements n’enlèvent rien aux droits conférés par le Traité. Le droit des Tsartlip de chasser la nuit à l’aide d’une source lumineuse a nécessairement évolué depuis les outils employés avant le Traité jusqu’aux instruments actuels. Comme l’a fait observer la juge en chef McLachlin dans *R. c. Marshall*, [2005] 2 R.C.S. 220, 2005 CSC 43, par. 25 :

... les droits issus de traités ne sont pas figés dans le temps. Les activités traditionnelles sont maintenant pratiquées de façon moderne. Il s’agit d’établir si l’activité commerciale actuelle en cause procède de l’évolution logique du commerce traditionnel pratiqué au moment du traité [. . .] L’évolution logique suppose le même type d’activité, exercée dans l’économie moderne par des moyens modernes. On évite ainsi de restreindre indûment les droits ancestraux simplement du fait des changements économiques ou technologiques.

Ce point de vue a fait en sorte que, dans d’autres affaires, la Cour a reconnu, par exemple, que la chasse à la carabine représente la forme actuelle d’un droit dont les origines remontent à la chasse

arrow (*Simon v. The Queen*, [1985] 2 S.C.R. 387), and that a treaty right to erect a log cabin for hunting purposes flows from the former use of mossy lean-to shelters (*R. v. Sundown*, [1999] 1 S.C.R. 393).

The evidence in this case makes clear that the use of guns, spotlights, and motor vehicles reflects the current state of the evolution of the Tsartlip's historic hunting practices. Morris testified at trial that the Tsartlip used to hunt at night with

what they called torch lamps, and I heard this story told to me by our older hunters, that they used sticks with pitch on the end of them to do the same kind of hunt [but that the Tsartlip had] moved into these new tools of the spotlight and of the gun, where it's made it easier for us to hunt. And then we use our vehicles instead of walking or paddling a canoe.

This evidence reveals that the weapons, means of transportation and illuminating devices used in hunting have become more modern. But changes in method do not change the essential character of the practice, namely, night hunting with illumination. What was preserved by the Treaty and brought within its protection was hunting at night with illuminating devices, not hunting at night with a particular *kind* of weapon and source of illumination. This conclusion is dictated by the common intentions of the parties to the Treaty, as distilled from the context in which the Treaty was entered into. The purpose of the hunting clause was to preserve the traditional Tsartlip way of life, including methods of gathering food. It was, in addition, designed to benefit the settlers, whose interests at the time lay in friendship with the Indian majority on Vancouver Island.

Each of these interests could best be met by simultaneously ensuring both the protection of the settlers and the continuation of the hunting methods traditionally used by the Tsartlip. The common intention which best reconciles the interests of the parties is one that brings a right to

à l'arc (*Simon c. La Reine*, [1985] 2 R.C.S. 387) et que le droit issu d'un traité de construire une cabane en rondins pour la chasse découle de l'utilisation antérieure d'abris en appentis recouverts de mousse (*R. c. Sundown*, [1999] 1 R.C.S. 393).

La preuve en l'espèce établit clairement que l'emploi de fusils, de projecteurs et de véhicules à moteur reflète l'état actuel de l'évolution des modes de chasse traditionnels des Tsartlip. M. Morris a dit dans son témoignage que les Tsartlip chassaient la nuit à l'aide de

[TRADUCTION] ce qu'ils appelaient des torches, et ce sont nos aînés qui chassaient qui m'ont raconté cette histoire — qu'ils pratiquaient le même type de chasse à l'aide de bâtons dont l'extrémité était trempée dans la résine, [mais que les Tsartlip ont] par la suite utilisé de nouveaux outils comme le projecteur et le fusil, grâce auxquels il est maintenant plus facile pour nous de chasser. Et maintenant nous nous déplaçons à l'aide de nos véhicules au lieu de le faire à pied ou en canot.

Cette preuve révèle que les armes ainsi que les moyens de transport et d'éclairage employés pour la chasse sont devenus plus modernes. Toutefois, l'évolution des méthodes ne change pas le caractère essentiel de la pratique, à savoir la chasse nocturne à l'aide d'une source lumineuse. C'est la chasse pratiquée la nuit à l'aide d'une source lumineuse qui est préservée et protégée par le Traité, et non la chasse pratiquée la nuit avec un *type* particulier d'arme et de source lumineuse. Cette conclusion est dictée par l'intention commune des parties au Traité, telle qu'elle se dégage du contexte dans lequel celui-ci a été conclu. La disposition relative à la chasse avait pour but de préserver le mode de vie traditionnel des Tsartlip, y compris leurs moyens de subsistance. Elle visait également à rendre service aux colons, qui à l'époque avaient intérêt à être amis avec les Indiens, groupe majoritaire sur l'île de Vancouver.

La meilleure façon de servir chacun de ces intérêts était de veiller simultanément à la protection des colons et au maintien des méthodes de chasse traditionnellement employées par les Tsartlip. L'intention commune qui concilie le mieux les intérêts des parties est celle qui fait entrer dans le

32

33

34

hunt as they always had within the ambit of the Treaty. This includes the right to hunt at night with illumination.

35 We agree, as stated earlier, that it could not have been within the common intention of the parties that the Tsartlip would be granted a right to hunt dangerously, since no treaty confers on its beneficiaries a right to put human lives in danger. This limitation on the treaty right flows from the interest of all British Columbians in personal safety. It is also confirmed by the language of the Treaty itself, which restricts hunting to “unoccupied lands”, away from any town or settlement. British Columbia is a very large province, and it cannot plausibly be said that a night hunt with illumination is unsafe everywhere and in all circumstances, even within the treaty area at issue in this case.

36 This Court stated in *R. v. Marshall*, [1999] 3 S.C.R. 533 (“*Marshall No. 2*”), at para. 37, that “regulations that do no more than reasonably define the . . . treaty right in terms that can be administered by the regulator and understood by the . . . community that holds the treaty rights do not impair the exercise of the treaty right” (emphasis deleted). As well, as noted in *R. v. Badger*, [1996] 1 S.C.R. 771, at para. 89, “reasonable regulations aimed at ensuring safety do not infringe aboriginal or treaty rights to hunt for food”.

37 The question, therefore, is how to identify and define internal limits on a treaty right. The consensual nature of treaty rights and their specific origin and structure dictate that a respectful approach be adopted. Individual statutory provisions have to be evaluated to determine whether, based on the available historical evidence, they are consistent with the common intention of the parties to the treaty.

champ d’application du Traité le droit de chasse que les Tsartlip ont toujours eu. Ce droit comprend le droit de chasser la nuit à l’aide d’une source lumineuse.

Comme nous l’avons mentionné plus haut, nous reconnaissons que l’intention commune des parties ne pouvait pas être d’accorder aux Tsartlip le droit de chasser dangereusement puisque aucun traité ne confère à ses bénéficiaires le droit de mettre en danger des vies humaines. Cette limitation du droit issu du traité découle de l’intérêt des Britanno-Colombiens à ce que leur sécurité personnelle ne soit pas menacée. Elle est aussi confirmée par le texte du Traité lui-même, qui restreint la chasse aux [TRADUCTION] « terres inoccupées », loin des villes ou des peuplements. La Colombie-Britannique est une province très vaste, et on ne peut affirmer de façon plausible que la chasse nocturne à l’aide d’une source lumineuse est dangereuse partout et dans toutes les circonstances, même dans la région qui est visée par le Traité et qui est en cause en l’espèce.

Dans *R. c. Marshall*, [1999] 3 R.C.S. 533 (« *Marshall n° 2* »), par. 37, la Cour a énoncé, qu’« un règlement qui se contente de définir raisonnablement le droit issu de traité [. . .] d’une manière qui puisse à la fois être administrée par l’organe chargé de sa réglementation et être comprise par la communauté [. . .] titulaire du droit en question ne porte pas atteinte à l’exercice de ce droit » (soulignement omis). De même, comme il est indiqué dans *R. c. Badger*, [1996] 1 R.C.S. 771, par. 89, « un règlement raisonnable, destiné à assurer la sécurité des individus, ne porte pas atteinte aux droits — ancestraux ou issus de traités — de chasser pour se nourrir ».

Il s’agit donc de savoir comment reconnaître et définir les limites intrinsèques d’un droit issu d’un traité. La nature consensuelle des droits issus de traités ainsi que leur origine et leur structure particulières commandent une attitude respectueuse. Il faut évaluer chaque disposition législative pour déterminer si, compte tenu de la preuve historique, elle est conforme à l’intention commune des parties au traité.

In our view, the best reconciliation of the parties' intentions is one that preserves as much as possible the ancient practices the Tsartlip would have understood as forming part of their "liberty to hunt" under the Treaty, subject only to the limit that they do not have a right to put lives or property at risk. Thus, at the very least, the safety limitation in the Treaty should not be drawn so broadly as to exclude *all* night hunting. It could not have been within the common intention of the parties to completely ban night hunting, which was a long-accepted method of hunting for food.

Nor can it be said that such a blanket exclusion should now be implied as a matter of law. If a night hunt is dangerous in particular circumstances, it can (and should) be prosecuted under s. 29. Here, the appellants were acquitted of dangerous hunting. The implicit limitation found by our colleagues the Chief Justice and Fish J. has a scope that interferes with the time-honoured right instead of allowing for the right to be exercised subject only to principled limitations. Protected methods of hunting cannot, without more, be wholly prohibited simply because in some circumstances they could be dangerous. All hunting, regardless of the time of day, has the potential to be dangerous.

The blanket prohibition of s. 27(1)(d) and (e) applies, of course, throughout British Columbia, including the vast regions of the interior. Much of the north of the province is uninhabited except by aboriginal people, and there are areas where even they are seen only occasionally. To conclude that night hunting with illumination is dangerous everywhere in the province does not accord with reality and is not, with respect, a sound basis for limiting the treaty right.

2.2 *Constitutional Division of Powers*

Having found that the Tsartlip's treaty rights include the right to hunt at night and with

La meilleure façon de concilier les intentions des parties est celle qui permet de préserver le plus possible les pratiques de chasse anciennes que les Tsartlip considéraient comme faisant partie du droit de chasser en « toute liberté » garanti par le Traité, sous réserve seulement de ne pas mettre en danger la vie ou la propriété d'autrui. Par conséquent, il faut au moins éviter d'interpréter de façon trop large la limitation en matière de sécurité prévue dans le Traité, au point d'exclure *totale*ment la chasse nocturne. L'intention commune des parties ne pouvait pas être d'interdire complètement la chasse nocturne, méthode de chasse de subsistance reconnue depuis longtemps.

On ne peut pas non plus affirmer qu'une interdiction générale devrait maintenant être implicite en droit. Si la chasse nocturne est dangereuse dans certaines circonstances, elle peut (et devrait) faire l'objet de poursuites en vertu de l'art. 29. En l'espèce, les appelants ont été acquittés relativement à la chasse dangereuse. La limite implicite dont l'existence est admise par nos collègues la Juge en chef et le juge Fish entrave, par sa portée, l'exercice du droit consacré depuis longtemps au lieu de permettre qu'il soit exercé sous réserve seulement de limites rationnelles. On ne peut se contenter d'interdire complètement l'utilisation de méthodes de chasse protégées par traité du simple fait que dans certains cas elles pourraient être dangereuses. Toute forme de chasse, quel que soit le moment de la journée, est potentiellement dangereuse.

L'interdiction générale prévue aux al. 27(1)d) et e) s'applique, naturellement, dans toute la Colombie-Britannique, y compris les vastes régions de l'intérieur. La partie nord de la province est principalement inhabitée, sauf par des Autochtones, et il y a des régions où, même eux, on ne les voit qu'à l'occasion. Conclure que la chasse nocturne à l'aide d'une source lumineuse est dangereuse partout dans la province ne cadre pas avec la réalité et, soit dit en tout respect, n'est pas une raison valable pour limiter le droit issu d'un traité.

2.2 *Partage constitutionnel des compétences*

Ayant conclu que les droits conférés par traité aux Tsartlip comprennent le droit de chasser la nuit

38

39

40

41

illumination, we must now determine whether the impugned provisions of the *Wildlife Act* are nevertheless applicable from the perspective of the constitutional division of powers in ss. 91 and 92 of the *Constitution Act, 1867*. By virtue of s. 91(24), Parliament has exclusive power to make laws in relation to “Indians, and Lands reserved for the Indians”. Provincial laws whose “pith and substance” relates to this head of power are *ultra vires* and invalid (*Kitkatla Band v. British Columbia (Minister of Small Business, Tourism and Culture)*, [2002] 2 S.C.R. 146, 2002 SCC 31, at para. 67). However, provincial laws of general application that affect Indians only incidentally and are enacted under a provincial head of power will be found to be *intra vires* and valid.

et à l’aide d’une source lumineuse, nous devons maintenant examiner la question de savoir si les dispositions contestées de la *Wildlife Act* peuvent quand même s’appliquer dans l’optique du partage constitutionnel des compétences prévu aux art. 91 et 92 de la *Loi constitutionnelle de 1867*. En vertu du par. 91(24), le Parlement a le pouvoir exclusif de légiférer sur les questions concernant « [l]es Indiens et les terres réservées pour les Indiens ». Les lois provinciales qui, de par leur caractère véritable, relèvent de ce chef de compétence constituent un excès de pouvoir et sont donc invalides (*Bande Kitkatla c. Colombie-Britannique (Ministre des Petites et moyennes entreprises, du Tourisme et de la Culture)*, [2002] 2 R.C.S. 146, 2002 CSC 31, par. 67). Toutefois, les lois provinciales d’application générale qui sont adoptées selon un chef de compétence provincial et dont les effets à l’égard des Indiens ne sont qu’accessoires sont dans la limite des pouvoirs et sont donc valides.

42 In this case, there is no question that the relevant provisions of the *Wildlife Act* are valid provincial legislation under s. 92(13) of the *Constitution Act, 1867*, which refers to Property and Civil Rights in the Province. However, where a valid provincial law impairs “an integral part of primary federal jurisdiction over Indians and Lands reserved for the Indians” (*Four B Manufacturing Ltd. v. United Garment Workers of America*, [1980] 1 S.C.R. 1031, at p. 1047), it will be inapplicable to the extent of the impairment. Thus, provincial laws of general application are precluded from impairing “Indianness”. (See, for example, *Dick v. The Queen*, [1985] 2 S.C.R. 309, at p. 326.)

En l’espèce, il ne fait aucun doute que les dispositions pertinentes de la *Wildlife Act* sont des mesures législatives provinciales valides qui relèvent de la catégorie propriété et droits civils dans la province prévue au par. 92(13) de la *Loi constitutionnelle de 1867*. Cependant, les lois provinciales valides ne s’appliqueront pas si elles portent atteinte à une « partie intégrante de la compétence fédérale principale sur les Indiens et les terres réservées aux Indiens » (*Four B Manufacturing Ltd. c. Travailleurs unis du vêtement d’Amérique*, [1980] 1 R.C.S. 1031, p. 1047). Ainsi, les lois provinciales d’application générale ne peuvent pas porter atteinte à l’« indianité ». (Voir, par exemple, *Dick c. La Reine*, [1985] 2 R.C.S. 309, p. 326.)

43 Treaty rights to hunt lie squarely within federal jurisdiction over “Indians, and Lands reserved for the Indians”. As noted by Dickson C.J. in *Simon*, at p. 411:

Les droits de chasse issus de traités relèvent clairement de la compétence fédérale sur « [l]es Indiens et les terres réservées pour les Indiens ». Comme l’a fait remarquer le juge Dickson dans *Simon*, p. 411 :

It has been held to be within the exclusive power of Parliament under s. 91(24) of the *Constitution Act, 1867*, to derogate from rights recognized in a treaty agreement made with the Indians.

On a jugé que le Parlement a le pouvoir exclusif, en vertu du par. 91(24) de la *Loi constitutionnelle de 1867*, de déroger à certains droits reconnus dans un traité conclu avec les Indiens.

This Court has previously found that provincial laws of general application that interfere with treaty rights to hunt are inapplicable to particular Aboriginal peoples. (See, for example, *Simon*, at pp. 410-11; *Sundown*, at para. 47.) Where such laws are inapplicable because they impair “Indianness”, however, they may nonetheless be found to be applicable by incorporation under s. 88 of the *Indian Act*.

2.3 Section 88 of the Indian Act

Section 88 reflects Parliament’s intention to avoid the effects of the immunity imposed by s. 91(24) by incorporating certain provincial laws of general application into federal law. Section 88 reads as follows:

88. Subject to the terms of any treaty and any other Act of Parliament, all laws of general application from time to time in force in any province are applicable to and in respect of Indians in the province, except to the extent that those laws are inconsistent with this Act or any order, rule, regulation or by-law made thereunder, and except to the extent that those laws make provision for any matter for which provision is made by or under this Act.

But as the opening words of this provision demonstrate, Parliament has expressly declined to use s. 88 to incorporate provincial laws where the effect would be to infringe treaty rights. And this Court held in *R. v. Côté*, [1996] 3 S.C.R. 139, at para. 86, that one of the purposes of s. 88 is to accord “federal statutory protection to aboriginal treaty rights”. Thus, on its face, s. 88 cannot be used to incorporate into federal law provincial laws that conflict with the terms of any treaty.

The clear language of this treaty exception in s. 88 is qualified by statements in this Court’s jurisprudence that the provinces may regulate treaty rights under certain circumstances. In *Marshall No. 2*, at para. 24, for example, this Court held that

La Cour a déjà jugé inapplicables à certains peuples autochtones des lois provinciales d’application générale qui portent atteinte aux droits de chasse issus de traités. (Voir, par exemple, *Simon*, p. 410-411, et *Sundown*, par. 47.) Par ailleurs, les lois provinciales d’application générale qui sont inapplicables parce qu’elles touchent à l’« indianité » peuvent néanmoins être jugées applicables si elles sont incorporées au droit fédéral par l’effet de l’art. 88 de la *Loi sur les Indiens*.

2.3 Article 88 de la Loi sur les Indiens

L’article 88 reflète l’intention du législateur d’éviter les effets de l’exclusivité que commande le par. 91(24), en incorporant au droit fédéral certaines lois provinciales d’application générale. L’article 88 dispose :

88. Sous réserve des dispositions de quelque traité et de quelque autre loi fédérale, toutes les lois d’application générale et en vigueur dans une province sont applicables aux Indiens qui s’y trouvent et à leur égard, sauf dans la mesure où ces lois sont incompatibles avec la présente loi ou quelque arrêté, ordonnance, règle, règlement ou règlement administratif pris sous son régime, et sauf dans la mesure où ces lois contiennent des dispositions sur toute question prévue par la présente loi ou sous son régime.

Mais, comme l’indique le membre de phrase au début de cette disposition, le législateur a expressément refusé de recourir à l’art. 88 pour incorporer au droit fédéral des lois provinciales dans les cas où il en résulterait une atteinte à des droits issus de traités. Et dans *R. c. Côté*, [1996] 3 R.C.S. 139, par. 86, la Cour a statué que l’un des objets de l’art. 88 est d’accorder « une protection de nature législative fédérale aux droits issus de traités des autochtones ». Ainsi, on ne peut, de prime abord, recourir à l’art. 88 pour incorporer au droit fédéral des lois provinciales incompatibles avec des traités.

Les termes clairs de l’exception relative aux traités prévue à l’art. 88 sont nuancés par des énoncés figurant dans la jurisprudence de la Cour, selon lesquels les provinces peuvent dans certaines circonstances réglementer les droits issus de traités. Dans *Marshall n° 2*, par. 24, par exemple, la Cour a affirmé :

44

45

46

the federal and provincial governments [have the authority] within their respective legislative fields to regulate the exercise of the treaty right subject to the constitutional requirement that restraints on the exercise of the treaty right have to be justified on the basis of conservation or other compelling and substantial public objectives [Emphasis added.]

That statement must of course be read in the context of the particular right under consideration in *Marshall No. 1*, namely a commercial right of access to resources harvested (and traded) from the outset by aboriginals in common with non-aboriginal inhabitants. After Confederation, some of the resources came to be regulated federally (e.g. the fishery), while others were regulated provincially (e.g. those harvested by trapping). In the case of the provincially regulated resources, the Court was not prepared to read the treaty right as requiring that access to them for purposes of *commercial* exploitation be subject to parallel and potentially conflicting federal and provincial oversight. That is not this case, which requires us to consider the more general question of what degree of provincial legislative interference with a non-commercial treaty right will trigger the s. 88 protection of treaty rights. Further consideration of the Court's position with respect to treaty rights of a commercial nature should be left for a case where it is directly in issue.

[Les] gouvernements fédéral et provinciaux [ont le pouvoir] de réglementer, dans les limites de leurs champs respectifs de compétences législatives, l'exercice du droit issu du traité, sous réserve du fait que la Constitution exige que les restrictions imposées à l'exercice de ce droit soient justifiées pour des raisons de conservation ou pour d'autres objectifs d'intérêt public réels et impérieux . . . [Nous soulignons.]

Il faut bien sûr interpréter cet énoncé dans le contexte du droit particulier dont il est question dans *Marshall n° 1*, à savoir le droit d'accéder à des fins commerciales aux ressources qui, dès le contact, étaient exploitées (récoltées et échangées) en commun par des Autochtones et des non-Autochtones. Après la Confédération, certaines des ressources ont fini par être réglementées par le fédéral (p. ex. la pêche) et d'autres par la province (p. ex. le piégeage). Dans le cas des ressources réglementées par la province, la Cour n'était pas disposée à interpréter le droit issu d'un traité comme s'il exigeait que l'accès à ces ressources à des fins *commerciales* soit soumis parallèlement à deux contrôles susceptibles d'entrer en conflit : celui du fédéral et celui de la province. La situation est différente en l'espèce. Ici, nous devons nous demander, de façon plus générale, quel degré d'ingérence législative provinciale dans l'exercice d'un droit issu d'un traité à des fins non commerciales déclenche la protection conférée aux droits issus de traités par l'art. 88. Il est préférable de trancher la question des droits de nature commerciale issus de traités lorsqu'elle se posera directement dans une autre affaire.

47 Where, as in this case, non-commercial rights are in issue, a distinction must be drawn between insignificant interference with the exercise of the treaty right and *prima facie* infringement of the right.

48 Regarding insignificant interference, this Court considered in *Côté* whether a provincial regulation requiring the payment of a small access fee for entry into a controlled harvest zone infringed a treaty right to fish. The fee was not revenue generating, but was intended to pay for the ongoing maintenance of roads and facilities within the controlled zone. Lamer C.J. held that this provincial

Lorsque sont en jeux des droits de nature non commerciale, comme c'est le cas en l'espèce, il faut faire une distinction entre l'ingérence négligeable dans l'exercice du droit issu d'un traité et l'atteinte à première vue à ce droit.

En ce qui concerne l'ingérence négligeable, dans *Côté*, la Cour s'est demandé si un règlement provincial exigeant le paiement d'un minime droit d'entrée dans une zone d'exploitation contrôlée portait atteinte à un droit de pêche issu d'un traité. Le droit d'entrée ne générait pas de revenus, mais était destiné à l'entretien régulier des routes et des installations dans la zone contrôlée. Le juge en

regulation “impose[d] a modest financial burden on the exercise of th[e] alleged treaty right” (para. 88), thereby representing an insignificant interference with a treaty right, and consequently did not infringe that right.

In contrast in *Badger* this Court considered that a licensing scheme that imposed conditions as to the “hunting method, the kind and numbers of game, the season and the permissible hunting area” (para. 92) infringed the appellants’ treaty right to hunt. Cory J., writing for the majority, held that this licensing scheme constituted a *prima facie* infringement of the appellants’ treaty right to hunt, since it “denie[d] to holders of treaty rights . . . the very means of exercising those rights” and was found to be “in direct conflict with the treaty right” (para. 94).

Insignificant interference with a treaty right will not engage the protection afforded by s. 88 of the *Indian Act*. This approach is supported both by *Côté* and by *R. v. Nikal*, [1996] 1 S.C.R. 1013, where Cory J. rejected the idea that “anything which affects or interferes with the exercise of those rights, no matter how insignificant, constitutes a *prima facie* infringement” (para. 91 (emphasis added)). Therefore, provincial laws or regulations that place a modest burden on a person exercising a treaty right or that interfere in an insignificant way with the exercise of that right do not infringe the right.

A *prima facie* infringement, however, will trigger the s. 88 treaty right protection. In determining what constitutes a *prima facie* infringement of a treaty right, it is helpful to consider the Court’s jurisprudence on this point. In *R. v. Sparrow*, [1990] 1 S.C.R. 1075, at p. 1112, Dickson C.J. and La Forest J. listed three questions that may assist in this determination:

First, is the limitation unreasonable? Second, does the regulation impose undue hardship? Third, does the

chef Lamer a statué que ce règlement provincial « assujetti[ssait] l’exercice d[u] droit issu de traité à une modeste obligation financière » (par. 88) et qu’il s’agissait donc d’une ingérence négligeable dans l’exercice d’un droit issu d’un traité et qu’il n’y avait pas atteinte à ce droit.

Par contre, dans *Badger*, la Cour a considéré qu’un régime de délivrance de permis imposant des conditions relatives aux « méthodes de chasse, au type de gibier, au nombre de prises ainsi qu’aux périodes de chasse et aux zones où celle-ci est autorisée » (par. 92) portait atteinte au droit de chasse garanti par traité aux appelants. Le juge Cory, au nom de la majorité, a statué que ce régime de délivrance de permis constituait à première vue une atteinte à leur droit puisqu’il « priv[ait] les personnes qui sont titulaires de droits issus de traité [. . .] des moyens mêmes d’exercer ces droits » et était « en contradiction directe avec le droit prévu au Traité » (par. 94).

L’ingérence négligeable dans l’exercice d’un droit issu d’un traité ne déclenchera pas la protection prévue par l’art. 88 de la *Loi sur les Indiens*. Cette affirmation trouve appui à la fois dans *Côté* et dans *R. c. Nikal*, [1996] 1 R.C.S. 1013, où le juge Cory a rejeté l’idée que « tout ce qui [. . .] entrave ou [. . .] gêne l’exercice [de ces droits], ne serait-ce que de façon négligeable, constitue à première vue une atteinte » (par. 91 (nous soulignons)). Par conséquent, les lois ou règlements provinciaux qui imposent une obligation modeste à quiconque exerce un droit issu d’un traité ou qui entravent de façon négligeable l’exercice d’un droit issu d’un traité ne portent pas atteinte à ce droit.

Une atteinte à première vue fera toutefois intervenir la protection que l’art. 88 confère aux traités. Pour déterminer ce qui constitue une atteinte à première vue à un droit issu d’un traité, il est utile d’examiner la jurisprudence de la Cour sur ce point. Dans *R. c. Sparrow*, [1990] 1 R.C.S. 1075, p. 1112, le juge en chef Dickson et le juge La Forest ont énuméré trois questions qui peuvent aider dans cette tâche :

Premièrement, la restriction est-elle déraisonnable? Deuxièmement, le règlement est-il indûment rigoureux?

49

50

51

regulation deny to the holders of the right their preferred means of exercising that right?

52

As Lamer C.J. pointed out in *R. v. Gladstone*, [1996] 2 S.C.R. 723, care should be taken, in considering these questions, not to import an element of justification when attempting to identify an infringement. He stated the following, at para. 43:

The *Sparrow* test for infringement might seem, at first glance, to be internally contradictory. On the one hand, the test states that the appellants need simply show that there has been a *prima facie* interference with their rights in order to demonstrate that those rights have been infringed, suggesting thereby that any meaningful diminution of the appellants' rights will constitute an infringement for the purpose of this analysis. On the other hand, the questions the test directs courts to answer in determining whether an infringement has taken place incorporate ideas such as unreasonableness and "undue" hardship, ideas which suggest that something more than meaningful diminution is required to demonstrate infringement. This internal contradiction is, however, more apparent than real. The questions asked by the Court in *Sparrow* do not define the concept of *prima facie* infringement; they only point to factors which will indicate that such an infringement has taken place. Simply because one of those questions is answered in the negative will not prohibit a finding by a court that a *prima facie* infringement has taken place; it will just be one factor for a court to consider in its determination of whether there has been a *prima facie* infringement.

53

Essentially, therefore, a *prima facie* infringement requires a "meaningful diminution" of a treaty right. This includes anything but an insignificant interference with that right. If provincial laws or regulations interfere insignificantly with the exercise of treaty rights, they will not be found to infringe them and can apply *ex proprio vigore* or by incorporation under s. 88.

54

The protection of treaty rights in s. 88 of the *Indian Act* applies where a conflict between a provincial law of general application and a treaty is such that it amounts to a *prima facie* infringement. Where a provincial law of general application is

Troisièmement, le règlement refuse-t-il aux titulaires du droit le recours à leur moyen préféré de l'exercer?

Comme l'a signalé le juge en chef Lamer dans *R. c. Gladstone*, [1996] 2 R.C.S. 723, dans l'examen de ces questions, il faut veiller à ne pas importer des éléments de justification dans la détermination de la violation. Il a fait remarquer au par. 43 :

Il est possible que le critère relatif à l'atteinte formulé dans *Sparrow* semble, de prime abord, intrinsèquement contradictoire. D'une part, suivant ce critère, les appelants ont simplement à établir l'existence d'une atteinte à première vue à leurs droits pour démontrer la violation de ces droits, ce qui tend à indiquer que toute diminution appréciable des droits des appelants constitue une violation pour l'application de cette analyse. D'autre part, les questions auxquelles les tribunaux doivent répondre, en vertu de ce critère, pour déterminer s'il y a eu atteinte font entrer en jeu des notions comme le caractère déraisonnable ou « indûment » rigoureux de la mesure en cause, notions qui tendent à indiquer qu'il faut établir davantage qu'une diminution appréciable pour prouver l'atteinte. Cette contradiction intrinsèque est cependant plus apparente que réelle. Les questions posées par notre Cour dans *Sparrow* ne définissent pas le concept de l'atteinte à première vue, mais mettent uniquement en exergue certains facteurs qui indiquent qu'une telle atteinte a été commise. Le simple fait qu'on réponde par la négative à l'une de ces questions n'empêche pas le tribunal de conclure à l'existence d'une atteinte à première vue. Cette réponse négative n'est qu'un des facteurs que le tribunal doit prendre en considération pour déterminer s'il y a eu atteinte à première vue.

Essentiellement, une atteinte à première vue implique donc une « diminution appréciable » d'un droit issu d'un traité. Elle n'a rien à voir avec une ingérence négligeable dans l'exercice de ce droit. Les lois ou règlements provinciaux qui entravent de façon négligeable l'exercice de droits issus de traités ne seront pas considérés comme portant atteinte à ces droits et peuvent s'appliquer d'eux-mêmes ou par voie d'incorporation au droit fédéral par l'effet de l'art. 88.

La protection des droits issus de traités prévue par l'art. 88 de la *Loi sur les Indiens* s'applique lorsque le conflit entre une loi provinciale d'application générale et un traité est tel qu'il équivaut à une atteinte à première vue. Si l'on conclut

found to conflict with a treaty in a way that constitutes a *prima facie* infringement, the protection of treaty rights prevails and the provincial law cannot be incorporated under s. 88.

Where a *prima facie* infringement of a treaty right is found, a province cannot rely on s. 88 by using the justification test from *Sparrow* and *Badger* in the context of s. 35(1) of the *Constitution Act, 1982*, as alluded to by Lamer C.J. in *Côté*, at para. 87. The purpose of the *Sparrow/Badger* analysis is to determine whether an infringement by a government acting within its constitutionally mandated powers can be justified. This justification analysis does not alter the division of powers, which is dealt with in s. 88. Therefore, while the *Sparrow/Badger* test for infringement may be useful, the framework set out in those cases for determining whether an infringement is justified does not offer any guidance for the question at issue here.

3. Application to This Case

There is no treaty right to hunt dangerously. Thus, the prohibition against hunting “without reasonable consideration for the lives, safety or property of other persons” set out in s. 29 of the *Wildlife Act* is a limit that does not infringe the Tsartlip’s treaty right to hunt. As stated earlier, the requirement to hunt safely was clearly within the common intention of the parties to the Treaty, as reflected by the language of the Treaty itself, which restricts hunting to “unoccupied lands”. Where a treaty beneficiary is proven to have hunted dangerously, the Treaty does not provide a defence to charges brought under s. 29.

However, based on an understanding of the common intention of the parties to the Treaty, the Tsartlip’s treaty right includes the right to hunt at night with illumination, with the modern incarnation of their ancestral method, namely the use of firearms.

qu’une loi provinciale d’application générale entre en conflit avec un traité d’une manière qui constitue une atteinte à première vue, la protection des droits issus de traités prévaut et la loi provinciale ne peut être incorporée au droit fédéral par l’effet de l’art. 88.

Les provinces à qui on reproche une atteinte à première vue à un droit issu d’un traité ne peuvent invoquer l’art. 88 en ayant recours au critère de justification applicable dans le contexte du par. 35(1) de la *Loi constitutionnelle de 1982*, énoncé dans *Sparrow* et *Badger*, comme l’a laissé entendre le juge en chef Lamer dans *Côté*, par. 87. L’analyse élaborée dans ces deux arrêts vise à déterminer si la violation par un gouvernement, agissant dans les limites des pouvoirs que lui confère la Constitution, peut se justifier. L’analyse de la justification ne change pas le partage de ces pouvoirs, qui est l’objet de l’art. 88. C’est pourquoi, malgré l’utilité que peut revêtir le critère énoncé dans *Sparrow* et *Badger* en matière de violation, le cadre d’analyse établi dans ces arrêts ne saurait nous guider ici.

3. Application aux faits de l’espèce

Aucun traité ne confère le droit de chasser dangereusement. Ainsi, l’interdiction de chasser [TRADUCTION] « sans égard raisonnable pour la vie, la sécurité ou les biens d’autrui » prévue à l’art. 29 de la *Wildlife Act* constitue une limite qui ne porte pas atteinte au droit de chasse conféré par traité aux Tsartlip. Comme nous l’avons mentionné plus haut, il ne fait pas de doute que, d’après le texte du Traité lui-même, qui restreint la chasse aux « terres inoccupées », l’intention commune des parties était d’exiger que la chasse se pratique de façon sécuritaire. Lorsqu’il est prouvé qu’un bénéficiaire du Traité a pratiqué la chasse de façon dangereuse, le Traité ne lui fournit aucune défense contre des accusations portées en vertu de l’art. 29.

Cependant, selon notre interprétation de l’intention commune des parties au Traité, le droit que celui-ci confère aux Tsartlip comprend le droit de chasser la nuit à l’aide d’une source lumineuse en utilisant ce qui constitue l’incarnation moderne de leurs armes de chasse ancestrales, à savoir les armes à feu.

55

56

57

58

The legislative prohibition set out in s. 27(1)(d) and (e) of the *Wildlife Act* is absolute, and it applies without exception to the whole province, including the most northern regions where hours of daylight are limited in the winter months and populated areas are few and far between. The Legislature has made no attempt to prohibit only those specific aspects or geographic areas of night hunting that are unsafe by, for example, banning hunting within a specified distance from a highway or from residences. The impugned provisions are overbroad, inconsistent with the common intention of the parties to the treaties, and completely eliminate a chosen method of exercising their treaty right.

59

We respectfully disagree with our colleagues the Chief Justice and Fish J. that nothing short of a total ban on night hunting can address safety concerns. We believe that it would be possible to identify uninhabited areas where hunting at night would not jeopardize safety. This finding is supported by the evidence in this case that the Tsartlip's practice of night hunting with illuminating devices has never been known to have resulted in an accident, and that the conservation officers, in setting up the location for their mechanical decoy, were easily able to locate an area where night hunting could be practised safely. These facts amply demonstrate how something less than an absolute prohibition on night hunting can address the concern for safety.

60

We have no difficulty concluding, therefore, that the categorical ban on night hunting and hunting with illumination constitutes a *prima facie* infringement of a treaty right. A categorical prohibition clearly constitutes more than an insignificant interference with a treaty right. Although provincial laws of general application that are inapplicable to aboriginal people can be incorporated into federal law under s. 88 of the *Indian Act*, this cannot happen where the effect would be to infringe treaty rights. Because paras. (d) and (e) of s. 27(1) of the *Wildlife Act* constitute a *prima*

L'interdiction prévue aux al. 27(1)d) et e) de la *Wildlife Act* est absolue et s'applique sans exception à l'ensemble de la province, y compris les régions les plus au nord où les heures de clarté sont limitées en hiver et où les secteurs très peuplés sont rares. Le législateur n'a pas tenté d'interdire uniquement les aspects de la chasse nocturne qui sont dangereux ou d'interdire ce mode de chasse dans les zones où il serait dangereux, par exemple, en interdisant la chasse à une certaine distance des routes ou des habitations. Les dispositions contestées ont une portée trop générale, elles sont incompatibles avec l'intention commune des parties aux traités, et elles écartent complètement le moyen choisi pour exercer le droit issu du Traité.

Soit dit en tout respect, nous ne saurions souscrire à l'opinion de nos collègues la Juge en chef et le juge Fish que seule une interdiction absolue de chasser la nuit permet de répondre aux préoccupations en matière de sécurité. Nous estimons qu'il serait possible de recenser les secteurs inhabités où la chasse nocturne ne compromettrait pas la sécurité. Cette conclusion s'appuie sur la preuve fournie en l'espèce, selon laquelle la chasse nocturne à l'aide d'une source lumineuse que pratiquent les Tsartlip n'a, autant que l'on sache, provoqué aucun accident, et les agents de conservation, pour l'installation des leurres mécaniques, ont pu facilement trouver un endroit où la chasse nocturne pouvait se pratiquer sans danger. Tous ces éléments montrent bien que, sans aller jusqu'à l'interdiction absolue, il est possible de répondre aux préoccupations en matière de sécurité.

Par conséquent, nous n'avons aucune difficulté à conclure que l'interdiction absolue de chasser la nuit et celle de chasser à l'aide d'une source lumineuse constituent des atteintes à première vue à un droit issu d'un traité. Une interdiction absolue est manifestement davantage qu'une ingérence négligeable dans l'exercice d'un droit issu d'un traité. Certes, les lois provinciales d'application générale qui ne s'appliquent pas aux Autochtones peuvent être incorporées au droit fédéral par l'effet de l'art. 88 de la *Loi sur les Indiens*, mais ce n'est pas le cas s'il s'ensuit une atteinte à des droits issus de traités.

facie infringement, they cannot be incorporated under s. 88 of the *Indian Act*.

For these reasons, we would allow the appeal, set aside the convictions and enter acquittals.

The reasons of McLachlin C.J. and Bastarache and Fish JJ. were delivered by

THE CHIEF JUSTICE AND FISH J. (dissenting) —

I

Ivan Morris and Carl Olsen were caught in a trap set by conservation officers to catch hunters who violate the law.

There is no dispute that Mr. Morris and Mr. Olsen violated a provincial ban on hunting at night with a firearm. The appellants argue that the ban does not apply to them in virtue of an aboriginal treaty signed in 1852. The Crown, however, argues that the treaty conveys no right to hunt dangerously, and asserts that this justifies a total ban on night hunting.

We conclude that the treaty right to hunt is subject to an internal limitation which excludes dangerous hunting. We further conclude that hunting at night with a firearm, as trial courts across the country have held, is hazardous and validly prohibited on that ground by provincial legislation of general application. In the result, we find that a provincial ban on night hunting with a firearm does not affect the appellants' treaty right to hunt.

With respect to those who are of a different view, we would therefore dismiss the appeal and affirm the convictions of both appellants.

Étant donné que les al. 27(1)d) et e) de la *Wildlife Act* constituent des atteintes à première vue, ils ne peuvent être incorporés au droit fédéral par l'effet de l'art. 88 de la *Loi sur les Indiens*.

Pour ces motifs, nous sommes d'avis d'accueillir le pourvoi, d'annuler les déclarations de culpabilité et d'inscrire des acquittements.

Version française des motifs de la juge en chef McLachlin et des juges Bastarache et Fish rendus par

LA JUGE EN CHEF ET LE JUGE FISH (dissidents) —

I

Ivan Morris et Carl Olsen sont tombés dans le piège tendu par des agents de conservation aux chasseurs qui contreviennent à la loi.

Nul ne conteste que MM. Morris et Olsen ont enfreint l'interdiction provinciale de chasser la nuit avec une arme à feu. Les appelants font valoir que l'interdiction ne s'applique pas à eux en raison d'un traité ancestral signé en 1852. Le ministère public soutient cependant que le traité ne confère aucun droit de chasser dangereusement et affirme qu'il est donc justifié d'interdire complètement la chasse nocturne.

Nous concluons que le droit de chasse issu d'un traité comporte une limite intrinsèque qui exclut la chasse dangereuse. Nous concluons également, comme des tribunaux d'instance inférieure partout au pays, que la chasse nocturne avec une arme à feu est dangereuse et que c'est donc à juste titre que les lois provinciales d'application générale l'interdisent. Par conséquent, nous estimons que l'interdiction provinciale de chasser la nuit avec une arme à feu ne porte pas atteinte au droit de chasse conféré par traité aux appelants.

Par conséquent, malgré tout le respect que nous avons pour ceux qui pensent le contraire, nous sommes d'avis de rejeter le pourvoi et de confirmer les déclarations de culpabilité des appelants.

61

II

66 On the evening of November 28, 1996, the appellants were driving in the woods when they spotted what they took for a deer. Morris, the driver, stopped the vehicle to allow Olsen to shoot at the deer from the passenger seat. The rifle was then passed by Olsen to Morris across two children who were also in the front seat. Morris himself then fired two shots from outside the vehicle.

67 The appellants had in fact been shooting a decoy with reflecting eyes set up by conservation officers to trap illegal hunters. They were charged with the following offences under the *British Columbia Wildlife Act*, S.B.C. 1982, c. 57: (1) hunting wildlife with a firearm during prohibited hours (s. 27(1)(d)); (2) hunting wildlife by the use or with the aid of a light or illuminating device (s. 27(1)(e)); (3) hunting without reasonable consideration for the lives, safety or property of other persons (s. 29); and (4) discharging a firearm at wildlife from a motor vehicle (Olsen only) (s. 28(1)).

68 They argued that they enjoy a right to hunt under the terms of the North Saanich Treaty. That treaty was entered into by the ancestors of the Tsartlip Indian Band and James Douglas, Chief Factor of the Hudson's Bay Company and Governor of the Colony of Vancouver Island at the time, and is generally referred to for that reason as the "Douglas Treaty".

69 There is no dispute that the appellants are covered by the Douglas Treaty. It was admitted at trial that they are both Indians within the meaning of the *Indian Act*, R.S.C. 1985, c. I-5, and that they have ancestral ties to the Tsartlip Indian Band, a member of the Saanich First Nation. It was admitted as well that the ancestors of the Tsartlip Indian Band were signatories to the Douglas Treaty and that the Douglas Treaty is a treaty within the meaning of s. 88 of the *Indian Act* and s. 35(1) of the *Constitution Act*, 1982.

II

Dans la soirée du 28 novembre 1996, les appelants circulaient en voiture dans le bois lorsqu'ils ont cru apercevoir un cerf. M. Morris, qui était au volant, a arrêté le véhicule pour permettre à M. Olsen, assis du côté du passager, de tirer sur le cerf. M. Olsen a ensuite passé la carabine à M. Morris, par-dessus deux enfants également assis sur la banquette avant. Puis, M. Morris a lui-même tiré deux coups de feu de l'extérieur du véhicule.

Les appelants ont en fait tiré sur un leurre — aux yeux réfléchissant la lumière — que des agents de conservation avaient installé pour piéger les braconniers. Ils ont été inculpés des infractions suivantes prévues par la loi de la Colombie-Britannique *Wildlife Act*, S.B.C. 1982, ch. 57 : (1) avoir chassé un animal sauvage avec une arme à feu pendant les heures d'interdiction (al. 27(1)d)); (2) avoir chassé un animal sauvage à l'aide d'une lampe ou autre source lumineuse (al. 27(1)e)); (3) avoir chassé sans égard raisonnable pour la vie, la sécurité ou les biens d'autrui (art. 29); et (4) avoir déchargé une arme à feu sur un animal sauvage à partir d'un véhicule à moteur (uniquement M. Olsen) (par. 28(1)).

Ils soutiennent qu'ils bénéficient d'un droit de chasse en vertu du Traité de Saanich nord. Celui-ci a été conclu par les ancêtres de la bande indienne des Tsartlip et James Douglas, commandant de la Compagnie de la Baie d'Hudson et gouverneur de la colonie de l'île de Vancouver à l'époque, et c'est pour cette raison qu'on l'appelle généralement « Traité de Douglas ».

Nul ne conteste que le Traité de Douglas s'applique aux appelants. Au procès, il a été admis qu'ils étaient tous deux des Indiens au sens de la *Loi sur les Indiens*, L.R.C. 1985, ch. I-5, et qu'ils avaient des liens ancestraux avec la bande indienne des Tsartlip, membre de la Première Nation saanich. Il a également été admis que les ancêtres de la bande des Tsartlip avaient signé le Traité de Douglas et que celui-ci est un traité au sens de l'art. 88 de la *Loi sur les Indiens* et du par. 35(1) de la *Loi constitutionnelle de 1982*.

The outcome of this appeal therefore turns entirely on the nature and extent of the right to hunt that may be set up in virtue of the Douglas Treaty against the application of provincial hunting laws of general application, such as the law that concerns us here.

III

At trial, Higinbotham Prov. Ct. J. concluded that all of the elements of the offences of hunting with a firearm during prohibited hours and hunting by the use or with the aid of a light or illuminating device contrary to s. 27(1)(d) and (e) of the *Wildlife Act* had been proven beyond a reasonable doubt: [1999] B.C.J. No. 3199 (QL), at para. 24. In his view the appellants had failed to establish that the Douglas Treaty protected them from prosecution under those provisions. He reached this conclusion by applying *R. v. Sparrow*, [1990] 1 S.C.R. 1075, where the Court set out an infringement/justification framework for determining whether an impugned statute passes constitutional muster.

With the Crown's consent, Higinbotham Prov. Ct. J. conditionally stayed the proceedings with respect to hunting wildlife by the use or with the aid of a light or illuminating device because of the rule against multiple convictions arising from the same delict (*Kienapple v. The Queen*, [1975] 1 S.C.R. 729) and we have not been asked to revisit this matter.

Higinbotham Prov. Ct. J. declined to convict the appellants on the charge of hunting without reasonable consideration for the lives, safety or property of other persons for two reasons: First, because he was not satisfied that the Crown's specific allegations in respect of this count had been made out; and second, because he could not "rely solely on the evidence that night hunting is inherently unsafe to record a conviction on this count" (para. 25), since this evidence had already founded the appellants' convictions under s. 27(1)(d).

L'issue du présent pourvoi dépend donc entièrement de la nature et de l'étendue du droit de chasse qui, en vertu du Traité de Douglas, est susceptible d'être soustrait à l'application des lois provinciales d'application générale en matière de chasse, comme la loi dont il est question en l'espèce.

III

Au procès, le juge Higinbotham, de la Cour provinciale, a conclu que tous les éléments des infractions de chasse avec une arme à feu pendant les heures d'interdiction et de chasse à l'aide d'une lampe ou autre source lumineuse en violation des al. 27(1)(d) et e) de la *Wildlife Act* avaient été établis hors de tout doute raisonnable ([1999] B.C.J. No. 3199 (QL), par. 24). À son avis, les appelants n'avaient pas réussi à démontrer que le Traité de Douglas les protégeait contre toute poursuite intentée en vertu de ces dispositions. Il a tiré cette conclusion en appliquant l'arrêt *R. c. Sparrow*, [1990] 1 R.C.S. 1075, où la Cour a établi un cadre relatif à l'atteinte et à la justification permettant de déterminer si la loi contestée est constitutionnelle.

Avec le consentement du ministère public, le juge Higinbotham a ordonné la suspension conditionnelle des procédures concernant l'accusation d'avoir chassé un animal sauvage à l'aide d'une lampe ou autre source lumineuse, en raison de la règle interdisant les déclarations de culpabilité multiples relativement au même délit (*Kienapple c. La Reine*, [1975] 1 R.C.S. 729), et on n'a pas demandé à la Cour de réexaminer cette question.

Le juge Higinbotham n'a pas, pour deux raisons, déclaré les appelants coupables d'avoir chassé sans égard raisonnable pour la vie, la sécurité ou les biens d'autrui. Premièrement, il n'était pas convaincu que le ministère public ait établi le bien-fondé de ses allégations à cet égard; deuxièmement, il ne pouvait pas [TRADUCTION] « se fonder uniquement sur la preuve que la chasse nocturne est intrinsèquement dangereuse pour prononcer une déclaration de culpabilité relativement à ce chef d'accusation » (par. 25), étant donné que cette preuve avait déjà servi de fondement à la condamnation des appelants en vertu de l'al. 27(1)(d).

70

71

72

73

74 Higinbotham Prov. Ct. J. did, however, convict Mr. Olsen of discharging a firearm at wildlife from a motor vehicle contrary to s. 28(1) of the *Wildlife Act*.

75 Mr. Olsen and Mr. Morris appealed to the Supreme Court of British Columbia, where Singh J. held that to exercise a treaty or aboriginal right without due regard or consideration for public safety is not a reasonable exercise of that right: [2002] 4 C.N.L.R. 222, 2002 BCSC 780. He therefore concluded, without recourse to the *Sparrow* test, that the *Wildlife Act* did not conflict with or impact on the treaty right. As a result, he found that the appellants were in fact subject to the *Wildlife Act*, which he accepted as valid provincial legislation of general application aimed at ensuring safety.

76 The appellants further appealed to the Court of Appeal of British Columbia, where each of the three justices who heard the appeal wrote separate reasons: (2004), 25 B.C.L.R. (4th) 45, 2004 BCCA 121.

77 Thackray J.A. held that because s. 27(1) of the *Wildlife Act* prohibits only hunting at night and not the right to hunt itself, it was a law of general application that applied to Indians of its own force and effect (or, as is sometimes said, “*ex proprio vigore*”).

78 Huddart J.A. concluded that the appellants did not establish that night hunting was an element of the aboriginal right to hunt “integral to the distinctive culture” of the Tsartlip (para. 213). In her view, the *Wildlife Act* prohibition on night hunting therefore did not violate the core hunting right protected by the treaty.

79 Lambert J.A. dissented. He held that the *Wildlife Act* affected Indian laws, customs, traditions and practices in relation to hunting for food and ceremonial purposes and therefore “str[uck] at the core of Indianness” (para. 18). In his view, the core of Indianness encompasses within it the

Le juge Higinbotham a cependant déclaré M. Olsen coupable d’avoir fait feu sur un animal sauvage à partir d’un véhicule à moteur en violation du par. 28(1) de la *Wildlife Act*.

MM. Olsen et Morris ont interjeté appel devant la Cour suprême de la Colombie-Britannique, où le juge Singh a statué que l’exercice d’un droit ancestral ou issu d’un traité sans égard pour la sécurité publique ne constitue pas un exercice raisonnable de ce droit ([2002] 4 C.N.L.R. 222, 2002 BCSC 780). Il a donc conclu, sans recourir au critère établi dans *Sparrow*, que la *Wildlife Act* n’entraîne pas en conflit avec le droit issu d’un traité et n’avait par ailleurs aucune incidence sur lui. De ce fait, il a déclaré les appelants assujettis à la *Wildlife Act*, reconnaissant qu’il s’agissait d’une loi provinciale d’application générale qui est valide et destinée à assurer la sécurité.

Les appelants ont ensuite interjeté appel devant la Cour d’appel de la Colombie-Britannique, où les trois juges saisis de l’appel ont rédigé des motifs distincts ((2004), 25 B.C.L.R. (4th) 45, 2004 BCCA 121).

Selon le juge Thackray, comme le par. 27(1) de la *Wildlife Act* n’interdit que la chasse nocturne et non la chasse en tant que tel, il s’agit d’une loi d’application générale qui s’applique d’elle-même (*ex proprio vigore*) aux Indiens.

Selon la juge Huddart, les appelants n’ont pas établi que la chasse nocturne était une composante du droit ancestral de chasser qui fait [TRADUCTION] « partie intégrante de la culture distinctive » des Tsartlip (para. 213). À son avis, l’interdiction de chasser la nuit qui est prévue par la *Wildlife Act* ne porte donc pas atteinte au droit de chasse fondamental garanti par le traité.

Dans ses motifs dissidents, le juge Lambert a conclu que la *Wildlife Act* a une incidence sur les lois, coutumes, traditions et pratiques indiennes pour ce qui est de la chasse à des fins alimentaires et rituelles et qu’en conséquence elle [TRADUCTION] « touche à l’essentiel de l’indianité » (par. 18). À

right to hunt for food by the Indians' own preferred means.

Accordingly, Lambert J.A. found that the *Wildlife Act* prohibitions do not apply of their own force to members of the Tsartlip Indian Band because only federal legislation can strike at the core of Indianness, except where provincial legislation is incorporated into federal law ("invigorated") by s. 88 of the *Indian Act*.

With respect to s. 88 of the *Indian Act*, Lambert J.A. found that the initial words "[s]ubject to the terms of any treaty" meant "that the treaty, properly interpreted, cannot be impinged on or affected [in its exercise] by the statutory provision" (para. 31). He went on to find that the *Wildlife Act* prohibitions were in direct conflict with the treaty right and therefore s. 88 could not be used to incorporate the impugned provisions of the *Wildlife Act*.

IV

For the reasons that follow, we conclude that the impugned ban on night hunting with a firearm is valid provincial legislation that applies to the appellants. The relevant provisions of the *Wildlife Act* prohibit unsafe hunting practices, which is in pith and substance a matter within the legislative jurisdiction of the provinces. They do not conflict with federal legislation and the doctrine of paramountcy therefore has no application. Finally, the right to hunt protected by the Douglas Treaty is subject to an internal limit: It does not include the right to hunt in an inherently hazardous manner. Or, put differently, the right to hunt under the treaty must be exercised reasonably and hunting practices that are inherently hazardous are antithetical to the reasonable exercise of the right to hunt. The impugned provision of the *Wildlife Act* regulates this internal limit. Since the regulation of dangerous hunting falls outside the scope of the treaty right to hunt, no treaty right is engaged. As there is no aboriginal right asserted, and as the law does not otherwise go

son avis, l'essentiel de l'indianité comporte le droit des Indiens de chasser pour se nourrir en recourant à leur moyen préféré.

Le juge Lambert a donc conclu que les interdictions prévues par la *Wildlife Act* ne s'appliquent pas d'elles-mêmes aux membres de la bande indienne des Tsartlip parce que seules les lois fédérales peuvent toucher à l'essentiel de l'indianité, sauf si la loi provinciale est incorporée au droit fédéral (« revigorée ») par l'art. 88 de la *Loi sur les Indiens*.

Pour ce qui est de l'art. 88 de la *Loi sur les Indiens*, selon le juge Lambert, le membre de phrase « [s]ous réserve des dispositions de quelque traité » au début de la disposition signifie que [TRADUCTION] « la juste interprétation du traité commande que la disposition législative n'ait aucune incidence sur lui ni ne lui porte atteinte » (par. 31). Il a ensuite conclu que les interdictions prévues par la *Wildlife Act* entrent directement en conflit avec le droit issu d'un traité et que l'art. 88 ne peut donc servir à incorporer au droit fédéral les dispositions contestées de la *Wildlife Act*.

IV

Pour les motifs qui suivent, nous concluons que l'interdiction contestée de chasser la nuit avec une arme à feu constitue une mesure législative provinciale valide applicable aux appelants. Les dispositions pertinentes de la *Wildlife Act* interdisent les pratiques de chasse dangereuses, laquelle interdiction, de par son caractère véritable, relève de la compétence législative des provinces. Elles ne sont pas incompatibles avec la législation fédérale, et la règle de la prépondérance n'est donc pas applicable. Enfin, le droit de chasse protégé par le Traité de Douglas comporte une limite intrinsèque : il n'inclut pas le droit de chasser de façon dangereuse en soi. En d'autres termes, le droit de chasse conféré par traité doit être exercé de façon raisonnable, et les pratiques de chasse intrinsèquement dangereuses sont l'antithèse de l'exercice raisonnable du droit de chasse. La disposition contestée de la *Wildlife Act* régit cette limite intrinsèque. Étant donné que la réglementation des pratiques de chasse dangereuses ne relève pas du champ

80

81

82

to Indianness, the law applies *ex proprio vigore* and does not need to be incorporated by s. 88 in order to apply to Indians.

d'application du droit de chasse issu d'un traité, aucun droit issu d'un traité n'est en jeu. Comme aucun droit ancestral n'est invoqué et que la mesure législative ne touche pas autrement à l'indianité, elle s'applique d'elle-même et n'a pas besoin d'être incorporée au droit fédéral par l'art. 88 pour s'appliquer aux Indiens.

V

V

83 Section 91(24) of the *Constitution Act, 1867* gives Parliament exclusive legislative authority over “Indians, and Lands reserved for the Indians”. Aboriginal and treaty rights fall squarely within Parliament’s jurisdiction under s. 91(24).

Le paragraphe 91(24) de la *Loi constitutionnelle de 1867* confère au Parlement l'autorité législative exclusive en ce qui concerne « [l]es Indiens et les terres réservées pour les Indiens ». Les questions concernant les droits ancestraux et les droits issus de traités relèvent clairement de la compétence du Parlement prévue au par. 91(24).

84 Although s. 91(24) attributes exclusive jurisdiction over “Indians” and “Lands reserved for the Indians” to Parliament, valid provincial legislation normally applies to aboriginal persons. It is well established that “First Nations are not enclaves of federal power in a sea of provincial jurisdiction” (*Kitkatla Band v. British Columbia (Minister of Small Business, Tourism and Culture)*, [2002] 2 S.C.R. 146, 2002 SCC 31, at para. 66).

Bien que le par. 91(24) confère au Parlement la compétence exclusive à l'égard des « Indiens » et des « terres réservées pour les Indiens », les lois provinciales valides s'appliquent normalement aux Autochtones. Il est bien établi que « les Premières nations ne sont pas des enclaves du pouvoir fédéral dans une mer de compétences provinciales » (*Bande Kitkatla c. Colombie-Britannique (Ministre des Petites et moyennes entreprises, du Tourisme et de la Culture)*, [2002] 2 R.C.S. 146, 2002 CSC 31, par. 66).

85 The validity of a provincial enactment is a condition precedent to its application to aboriginal Canadians. A provincial law that does not fall within a provincial head of power is invalid and of no force or effect. Provincial legislation that, in pith and substance, relates to “Indians” or “Lands reserved for the Indians” — or any other matter within exclusive federal jurisdiction — is *ultra vires*. However, provincial legislation that merely has an incidental effect on a federal head of power is *intra vires*: *Paul v. British Columbia (Forest Appeals Commission)*, [2003] 2 S.C.R. 585, 2003 SCC 55, at para. 14. Such incidental effects are without relevance for constitutional purposes (*ibid.*). For instance, in the aboriginal context, provincial traffic legislation applies on reserves (see *R. v. Francis*, [1988] 1 S.C.R. 1025).

La validité d'un texte législatif provincial est une condition préalable à son application aux Canadiens autochtones. Une loi provinciale qui ne relève pas d'un chef de compétence provincial est invalide et inopérante. Une loi provinciale qui, de par son caractère véritable, porte sur les « Indiens » et les « terres réservées pour les Indiens » — ou sur toute autre question relevant de la compétence fédérale exclusive — constitue un excès de pouvoir. Par contre, une loi provinciale qui n'a qu'un effet accessoire sur un chef de compétence fédéral est dans la limite des pouvoirs : *Paul c. Colombie-Britannique (Forest Appeals Commission)*, [2003] 2 R.C.S. 585, 2003 CSC 55, par. 14. De tels effets accessoires n'ont pas d'importance sur le plan constitutionnel (*ibid.*). Par exemple, dans le contexte autochtone, les textes législatifs provinciaux régissant la

Valid provincial laws of this type apply *ex proprio vigore* to aboriginal Canadians.

Determination of the pith and substance of an enactment requires an examination of its purpose as well as its legal and practical effects: *Kitkatla*, at paras. 53 and 54. Drawing on Chief Justice Dickson's reasons in *General Motors of Canada Ltd. v. City National Leasing*, [1989] 1 S.C.R. 641, LeBel J. set out in *Kitkatla*, at para. 58, the proper approach for determining the pith and substance of provincial legislation:

1. Do the impugned provisions intrude into a federal head of power, and to what extent?
2. If the impugned provisions intrude into a federal head of power, are they nevertheless part of a valid provincial legislative scheme?
3. If the impugned provisions are part of a valid provincial legislative scheme, are they sufficiently integrated with the scheme?

The *Wildlife Act* falls in pith and substance within the province's powers. It is not directed at a federal head, like Indians, but more generally at safety, a matter within provincial power. The impugned ban on night hunting is an integrated part of a broader provincial scheme applicable to all British Columbians and aimed at assuring the safety of the province's hunters and residents.

It follows that the impugned provision applies to the appellants, unless it is excluded by one of the exceptions to the general rule that valid provincial laws of general application apply to aboriginal Canadians. Provincial laws will not apply to Indians if they conflict with federal legislation or engage the doctrine of interjurisdictional immunity.

Under the paramouncy doctrine, valid provincial legislation will be rendered inoperative if it enters into an operational conflict with valid federal legislation. Such conflict will exist if

circulation sont applicables dans les réserves (voir *R. c. Francis*, [1988] 1 R.C.S. 1025). Les règles de droit provinciales valides de ce type s'appliquent d'elles-mêmes aux Canadiens autochtones.

Pour déterminer le caractère véritable d'un texte législatif, il faut examiner son objet ainsi que ses effets sur les plans juridique et pratique : *Kitkatla*, par. 53-54. S'inspirant des motifs du juge en chef Dickson dans *General Motors of Canada Ltd. c. City National Leasing*, [1989] 1 R.C.S. 641, le juge LeBel a énoncé, dans *Kitkatla*, par. 58, la démarche à suivre pour déterminer le caractère véritable d'une loi provinciale :

1. Les dispositions contestées empiètent-elles sur une compétence fédérale et dans quelle mesure?
2. Si les dispositions contestées empiètent sur une compétence fédérale, font-elles néanmoins partie d'un régime législatif provincial valide?
3. Si les dispositions contestées font partie d'un régime législatif provincial valide, y sont-elles suffisamment intégrées?

La *Wildlife Act* relève, de par son caractère véritable, des pouvoirs de la province. Elle ne vise pas un chef de compétence fédéral, comme les Indiens, mais porte plus généralement sur la sécurité, matière de compétence provinciale. L'interdiction contestée concernant la chasse nocturne fait partie intégrante d'un régime provincial plus vaste applicable à tous les Britanno-Colombiens et visant à assurer la sécurité des chasseurs et des résidents de la province.

Il s'ensuit que la disposition contestée s'applique aux appelants, à moins d'être exclue par l'une des exceptions à la règle générale selon laquelle les lois provinciales d'application générale valides s'appliquent aux Canadiens autochtones. Les lois provinciales ne s'appliquent pas aux Indiens si elles sont incompatibles avec des lois fédérales ou font intervenir la règle de l'exclusivité des compétences.

Selon la règle de la prépondérance, une loi provinciale valide devient inopérante en cas de conflit d'application avec une loi fédérale valide. Il existe un tel conflit lorsqu'il est impossible de

86

87

88

89

simultaneous compliance with both provincial and federal legislation is impossible or if the provincial legislation displaces or frustrates the federal legislative purpose (*Rothmans, Benson & Hedges Inc. v. Saskatchewan*, [2005] 1 S.C.R. 188, 2005 SCC 13). There is some debate as to the order in which the doctrine of paramountcy and the doctrine of interjurisdictional immunity should be considered by a court, particularly where s. 88 of the *Indian Act* is at issue: see K. Wilkins, “Of Provinces and Section 35 Rights” (1999), 22 *Dal. L.J.* 185. We do not find it necessary to resolve that debate in this case, since there is no conflicting federal legislation on hunting; accordingly, the paramountcy doctrine does not apply.

respecter simultanément les textes législatifs provincial et fédéral ou lorsque la loi provinciale supprime la loi fédérale ou entrave la réalisation de son objet (*Rothmans, Benson & Hedges Inc. c. Saskatchewan*, [2005] 1 R.C.S. 188, 2005 CSC 13). La question de l’ordre dans lequel le tribunal doit examiner la règle de la prépondérance et celle de l’exclusivité des compétences a donné lieu à un certain débat, surtout lorsque l’art. 88 de la *Loi sur les Indiens* est en jeu : voir K. Wilkins, « Of Provinces and Section 35 Rights » (1999), 22 *Dal. L.J.* 185. Nous ne jugeons pas nécessaire de régler ce débat en l’espèce, car il n’existe pas de loi fédérale sur la chasse qui soit incompatible et la règle de la prépondérance ne s’applique donc pas.

90 Under the doctrine of interjurisdictional immunity, valid provincial legislation is constitutionally inapplicable to the extent that it intrudes or touches upon core federal legislative competence over a particular matter. Thus, exclusive federal jurisdiction under s. 91(24) protects “core Indianness” from provincial intrusion: *Delgamuukw v. British Columbia*, [1997] 3 S.C.R. 1010, at para. 177. Valid provincial legislation which does not touch on “core Indianness” applies *ex proprio vigore*. If a law does go to “core Indianness” the impugned provincial legislation will not apply unless it is incorporated into federal law by s. 88 of the *Indian Act*.

Selon la règle de l’exclusivité des compétences, les lois provinciales valides sont constitutionnellement inapplicables dans la mesure où elles empiètent ou ont une incidence sur la compétence législative fédérale fondamentale à l’égard d’une matière en particulier. Ainsi, la compétence fédérale exclusive prévue au par. 91(24) protège l’« essentiel de l’indianité » contre les empiètements provinciaux : *Delgamuukw c. Colombie-Britannique*, [1997] 3 R.C.S. 1010, par. 177. Les lois provinciales valides qui ne touchent pas à l’« essentiel de l’indianité » s’appliquent d’elles-mêmes. La loi provinciale contestée qui porte sur l’essentiel de l’indianité est inapplicable à moins d’être incorporée au droit fédéral par l’art. 88 de la *Loi sur les Indiens*.

91 Indian treaty rights and aboriginal rights have been held to fall within the protected core of federal jurisdiction: *Simon v. The Queen*, [1985] 2 S.C.R. 387, at p. 411; *Delgamuukw*, at para. 178. It follows that provincial laws of general application do not apply *ex proprio vigore* to the hunting activities of Indians that are protected by a treaty.

Il a été décidé que les droits — ancestraux ou issus de traités — des Indiens font partie des éléments fondamentaux relevant de la compétence fédérale : *Simon c. La Reine*, [1985] 2 R.C.S. 387, p. 411; *Delgamuukw*, par. 178. Par conséquent, les lois provinciales d’application générale ne s’appliquent pas d’elles-mêmes aux activités de chasse des Indiens protégées par traité.

92 If, however, a provincial law of general application does not affect a treaty right, and does not otherwise touch upon core Indianness, that law applies *ex proprio vigore*, without recourse to s. 88. Legislation that falls outside the internal limits on the treaty right that the parties to the treaty would

Toutefois, la loi provinciale d’application générale qui ne touche ni à un droit issu d’un traité ni autrement à l’essentiel de l’indianité s’applique d’elle-même, sans qu’il soit nécessaire de recourir à l’art. 88. N’empièteraient pas sur le droit issu d’un traité les mesures législatives qui outrepassent

have understood and intended would not encroach on the treaty right.

Many aboriginal and treaty rights are subject to internal limits. In *R. v. Marshall*, [1999] 3 S.C.R. 456 (“*Marshall No. 1*”), and *R. v. Marshall*, [1999] 3 S.C.R. 533 (“*Marshall No. 2*”), the Court held that the treaty right to trade for necessities was subject to an internal limit to a catch that would produce a moderate livelihood. In similar fashion, safety may operate as an implicit or definitional limit on aboriginal or treaty rights. In *R. v. Badger*, [1996] 1 S.C.R. 771, Cory J. wrote, at para. 89, that:

... reasonable regulations aimed at ensuring safety do not infringe aboriginal or treaty rights to hunt for food. Similarly these regulations do not infringe the hunting rights guaranteed by Treaty No. 8 as modified by the *NRTA*.

In *R. v. Sundown*, [1999] 1 S.C.R. 393, the Court held that “there [is] no inconsistency in principle between a treaty right to hunt and the statutory requirement that the right be exercised in a manner that ensured the safety of the hunter and of others” (Cory J., for the Court, at para. 41, citing *Myran v. The Queen*, [1976] 2 S.C.R. 137, at pp. 141-42; see also *R. v. Sutherland*, [1980] 2 S.C.R. 451, at p. 460; *Moosehunter v. The Queen*, [1981] 1 S.C.R. 282, at p. 289; and *Simon*, at p. 403).

Provincial legislation may apply to matters included within “core Indianness” if it is incorporated by s. 88 of the *Indian Act*, which provides:

88. Subject to the terms of any treaty and any other Act of Parliament, all laws of general application from time to time in force in any province are applicable to and in respect of Indians in the province, except to the extent that those laws are inconsistent with this Act or any order, rule, regulation or by-law made thereunder, and except to the extent that those laws make provision for any matter for which provision is made by or under this Act.

ses limites intrinsèques que les parties au traité auraient comprises et envisagées.

De nombreux droits — ancestraux ou issus de traités — comportent des limites intrinsèques. Dans *R. c. Marshall*, [1999] 3 R.C.S. 456 (« *Marshall n° 1* »), et *R. c. Marshall*, [1999] 3 R.C.S. 533 (« *Marshall n° 2* »), la Cour a décidé que le droit — issu d’un traité — de commercer pour se procurer le nécessaire était intrinsèquement limité par la quantité de prises permettant de s’assurer une subsistance convenable. De même, la sécurité peut constituer une limite implicite — ou fondée sur la définition — des droits ancestraux ou issus de traités. Dans *R. c. Badger*, [1996] 1 R.C.S. 771, par. 89, le juge Cory a écrit :

... qu’un règlement raisonnable, destiné à assurer la sécurité des individus, ne porte atteinte aux droits — ancestraux ou issus de traités — de chasser pour se nourrir. Il ne porte pas non plus atteinte aux droits de chasse garantis par le Traité n° 8 et modifiés par la *Convention*.

Dans *R. c. Sundown*, [1999] 1 R.C.S. 393, la Cour a affirmé qu’« il n’y [a], en principe, aucune incompatibilité entre un droit de chasse issu de traité et l’obligation que fai[t] la loi que ce droit soit exercé d’une manière qui ne compromette pas la sécurité du chasseur lui-même et celle d’autrui » (le juge Cory, au nom de la Cour, par. 41, citant *Myran c. La Reine*, [1976] 2 R.C.S. 137, p. 141-142; voir aussi *R. c. Sutherland*, [1980] 2 R.C.S. 451, p. 460; *Moosehunter c. La Reine*, [1981] 1 R.C.S. 282, p. 289; et *Simon*, p. 403).

Les lois provinciales peuvent s’appliquer à des matières faisant partie de l’« essentiel de l’indianité » si elles sont incorporées au droit fédéral par l’art. 88 de la *Loi sur les Indiens*, qui prévoit :

88. Sous réserve des dispositions de quelque traité et de quelque autre loi fédérale, toutes les lois d’application générale et en vigueur dans une province sont applicables aux Indiens qui s’y trouvent et à leur égard, sauf dans la mesure où ces lois sont incompatibles avec la présente loi ou quelque arrêté, ordonnance, règle, règlement ou règlement administratif pris sous son régime, et sauf dans la mesure où ces lois contiennent des dispositions sur toute question prévue par la présente loi ou sous son régime.

93

94

95

96 The Court clarified the effect of s. 88 of the *Indian Act* in *Dick v. The Queen*, [1985] 2 S.C.R. 309. The Court noted that for the purposes of s. 88 there are two categories of provincial laws: (1) laws which can be applied to Indians without touching their Indianness; and (2) laws which cannot apply to Indians without regulating them *qua* Indians (pp. 326-27). The first category of provincial laws applies to Indians without any constitutional difficulty. The second category cannot apply to Indians by reason of the doctrine of interjurisdictional immunity. It is to this second category of provincial legislation that s. 88 of the *Indian Act* is directed. Thus, s. 88 incorporates provincial laws of general application that are otherwise constitutionally inapplicable to Indians — laws that are precluded from applying to Indians by the doctrine of interjurisdictional immunity because they affect core Indianness, a matter under federal jurisdiction.

97 However, as may be readily observed from its text, s. 88 does not incorporate all provincial laws that are otherwise inapplicable by reason of the doctrine of interjurisdictional immunity. Section 88 operates, *inter alia*, “[s]ubject to the terms of any treaty”. In other words, s. 88 cannot incorporate a provincial law that conflicts with a treaty right.

98 What type or degree of conflict is required between a provincial law of general application and a treaty to engage the treaty exception’s protection? On the authorities, an insignificant burden on a treaty right is not enough: see, for example, *R. v. Côté*, [1996] 3 S.C.R. 139, at para. 88. At the other end of the spectrum, a more searching “unjustified infringement” test would be inappropriate: Section 88 was adopted in 1951 (S.C. 1951, c. 29), more than 30 years before the emergence of the concepts of justification associated with s. 35 of the *Constitution Act*, 1982 were introduced.

99 In our view, a *prima facie* infringement test best characterizes the degree of conflict required to engage the protection of the treaty exception.

La Cour a clarifié l’effet de l’art. 88 de la *Loi sur les Indiens* dans *Dick c. La Reine*, [1985] 2 R.C.S. 309, où elle a classé les lois provinciales en deux catégories pour l’application de l’art. 88 : (1) celles qui peuvent être appliquées aux Indiens sans qu’il soit porté atteinte à leur indianité; (2) celles qui ne peuvent pas s’appliquer à eux sans les toucher en tant qu’Indiens (p. 326-327). La première catégorie s’applique aux Indiens sans difficulté d’ordre constitutionnel. La seconde ne peut s’appliquer à eux en raison de la règle de l’exclusivité des compétences. C’est cette seconde catégorie de lois que vise l’art. 88 de la *Loi sur les Indiens*. Ainsi, il incorpore au droit fédéral les lois provinciales d’application générale qui autrement seraient constitutionnellement inapplicables aux Indiens — des lois qui, en raison de la règle de l’exclusivité des compétences, ne peuvent s’appliquer aux Indiens parce qu’elles touchent à l’essentiel de l’indianité, matière de compétence fédérale.

Cependant, comme il ressort clairement de son libellé, l’art. 88 n’incorpore pas au droit fédéral toutes les lois provinciales qui seraient autrement inapplicables en raison de la règle de l’exclusivité des compétences. Il est notamment applicable « [s]ous réserve des dispositions de quelque traité ». Autrement dit, il ne peut incorporer une loi provinciale qui entre en conflit avec un droit issu d’un traité.

Quel type ou degré d’incompatibilité doit-il y avoir entre une loi provinciale d’application générale et un traité pour que s’applique la protection assurée par l’exception relative aux traités? Selon la jurisprudence, une restriction négligeable d’un droit issu d’un traité n’est pas suffisante : voir, par exemple, *R. c. Côté*, [1996] 3 R.C.S. 139, par. 88. À l’autre extrémité du spectre, le critère plus strict de l’« atteinte injustifiée » serait inapproprié : l’art. 88 a été adopté en 1951 (S.C. 1951, ch. 29), soit plus de 30 ans avant l’apparition des concepts de justification associés à l’art. 35 de la *Loi constitutionnelle de 1982*.

À notre avis, le critère de l’atteinte à première vue décrit le mieux le degré de conflit requis pour que s’applique la protection assurée par

Legislation that places no real burden on the treaty right does not constitute a *prima facie* infringement and would not trigger the treaty exception. Legislation which engages the internal limits of a treaty right does not affect the treaty right at all, and therefore, *a fortiori*, does not constitute a *prima facie* infringement.

On this basis, provincial regulatory authority over Indian treaty rights may be summarized as follows:

1. Provincial laws directed at the regulation of treaty rights are *ultra vires*;
2. Valid provincial laws of general application that do not affect or infringe treaty rights apply to Indians either:

(a) *ex proprio vigore*; or

(b) through incorporation under s. 88, if they nevertheless touch upon core Indianness in some other manner;

Valid provincial laws that fall outside of the scope of the treaty right, by virtue of an internal limit on the treaty right, do not go to “core Indianness”, and thus apply *ex proprio vigore*. They do not need to be incorporated by s. 88; and

3. Valid provincial laws of general application that constitute a *prima facie* infringement of treaty rights trigger the treaty exception in s. 88 and are constitutionally inapplicable. Provincial laws that impose only an insignificant burden on a treaty right (see *Côté*) do not trigger that exception and are therefore incorporated by s. 88.

l’exception relative aux traités. La loi qui n’impose pas de restrictions réelles à un droit issu d’un traité ne constitue pas une violation à première vue et ne déclenche pas l’application de cette exception. La loi qui met en jeu les limites intrinsèques d’un droit issu d’un traité ne touche nullement à ce droit et ne constitue donc pas, à plus forte raison, une violation à première vue.

Compte tenu de ce qui précède, on peut résumer comme suit le pouvoir réglementaire provincial à l’égard des droits conférés par traité aux Indiens :

1. Les lois provinciales visant à réglementer des droits issus de traités constituent un excès de pouvoir.
2. Les lois provinciales d’application générale valides qui ne touchent pas ou ne portent pas atteinte aux droits issus de traités s’appliquent aux Indiens :

a) soit d’elles-mêmes;

b) soit par voie d’incorporation au droit fédéral par l’art. 88, si elles touchent néanmoins de quelque autre manière à l’essentiel de l’indianité.

Les lois provinciales valides qui ne relèvent pas du champ d’application d’un droit issu d’un traité, en raison d’une limite intrinsèque de ce droit, ne touchent pas à l’« essentiel de l’indianité » et s’appliquent donc d’elles-mêmes. Elles n’ont pas besoin d’être incorporées au droit fédéral par l’art. 88.

3. Les lois provinciales d’application générale valides qui portent atteinte à première vue à des droits issus de traités déclenchent l’application de l’exception relative aux traités prévue par l’art. 88 et sont constitutionnellement inapplicables. Les lois provinciales qui n’imposent que des restrictions négligeables à un droit issu d’un traité (voir *Côté*) ne déclenchent pas l’application de cette exception et l’art. 88 ne peut donc les incorporer au droit fédéral.

VI

101 Having already concluded that the impugned legislation falls under a valid provincial head of power and does not conflict with any federal legislation, we must now determine whether it goes to “core Indianness”. If it does, it applies as a result of incorporation under s. 88; if not, the law applies *ex proprio vigore*. The appellants’ claim that night hunting does go to Indianness is based on their right to hunt under the Douglas Treaty. In order to determine, then, whether the ban applies to them *ex proprio vigore*, we must ascertain the scope and extent of the right to hunt enshrined in that treaty.

102 The treaty right is set out in para. 2 of the Douglas Treaty, which reads:

It is understood, however, that the land itself, with these small exceptions, becomes the entire property of the white people for ever; it is also understood that we are at liberty to hunt over the unoccupied lands, and to carry on our fisheries as formerly.

103 This case proceeded on the Crown’s concession that the words “as formerly” modified the “liberty to hunt over the unoccupied lands” as well as the “liberty . . . to carry on our fisheries”. In our view, this branch of the matter merits little discussion: The scope of the right to hunt under the Douglas Treaty is not at all dependant on the Crown’s concession.

104 For ease of reference, we recall here the findings below.

105 In the Court of Appeal, Lambert J.A. defined the appellants’ treaty right as the right to hunt for food and ceremonial purposes according to the Indians’ preferred means in accordance with their own laws, customs, traditions and practices, and the safety practices which regulate the manner of hunting (para. 49). Huddart J.A. found that the treaty protected only those rights that are “integral to the distinctive culture” of the Tsartlip (para. 208) and that night hunting, while a traditional practice of

VI

Comme nous avons déjà conclu que la mesure législative contestée relève d’un chef de compétence provincial valide et qu’elle n’entre en conflit avec aucune loi fédérale, nous devons maintenant déterminer si elle touche à l’« essentiel de l’indianité ». Si c’est le cas, elle s’applique par voie d’incorporation par l’art. 88; sinon elle s’applique d’elle-même. La prétention des appelants que la chasse nocturne touche effectivement à l’indianité repose sur le droit de chasse que leur confère le Traité de Douglas. Alors, pour déterminer si l’interdiction s’applique à eux d’elle-même, nous devons délimiter la portée et l’étendue du droit de chasse issu d’un traité qui est consacré dans ce traité.

Le droit en cause issu du Traité de Douglas est énoncé au par. 2 :

[TRADUCTION] Toutefois, il est bien entendu que la terre elle-même, ces exceptions minimales étant faites, devient la propriété pleine et entière des Blancs à perpétuité. Il est également entendu que nous avons toute liberté pour chasser sur les terres inoccupées et pêcher comme autrefois.

Le débat en l’espèce partait du principe que le ministère public avait concédé que le terme « comme autrefois » modifie à la fois « chasser sur les terres inoccupées » et « pêcher ». Nous estimons qu’il ne vaut pas la peine de s’attarder sur ce volet : la portée du droit de chasse prévu par le Traité de Douglas ne dépend aucunement de la concession faite par le ministère public.

Par souci de commodité, nous reproduisons ici les conclusions des instances inférieures.

À la Cour d’appel, le juge Lambert a défini le droit que le traité confère aux appelants comme étant le droit de chasser à des fins alimentaires et rituelles avec le moyen préféré des Indiens, en conformité avec leurs propres lois, coutumes, traditions et pratiques, et selon les pratiques sécuritaires qui régissent les méthodes de chasse (par. 49). Selon la juge Huddart, le traité ne protège que les droits qui font [TRADUCTION] « partie intégrante de la culture distinctive des Tsartlip » (par. 208),

convenience, is not part of the core right to hunt protected by the treaty. Singh J. of the British Columbia Supreme Court held that the Douglas Treaty protected a right to hunt as well as the methods and means of hunting. He held nonetheless that the treaty right does not contemplate or, still less, confer a right to hunt dangerously, there being an implicit limitation to the treaty right that prevents unsafe hunting.

We prefer the interpretation of Singh J. In our respectful view, Huddart J.A.'s approach tends to blur the distinction between an aboriginal right and a treaty right and Lambert J.A.'s interpretation disregards the internal safety limitations to which that right is necessarily subject.

The scope of a treaty right and its internal limits is essentially a matter of treaty interpretation, which in turn refers us back to the intention of the parties to the treaty. "The goal of treaty interpretation is to choose from among the various possible interpretations of common intention the one which best reconciles the interests of both parties at the time the treaty was signed" (*Marshall No. 1*, at para. 78, *per* McLachlin J. (as she then was), dissenting on other grounds).

When the Douglas Treaty was signed, hunting at night was not uncommon. Nor was it particularly dangerous. It would not have been surprising had both the Crown and the North Saanich aboriginals contemplated that the aboriginals would continue to hunt at night. At the time, this practice did not pose the same dangers as it does today (which dangers will be explained in detail below). And the parties may not have even had reason to anticipate that the dangers would grow. But they could not have believed that the right to hunt included a right to hunt dangerously. To impute that belief to them would do injustice to both parties and, would in addition, defy common sense.

et la chasse nocturne, quoique pratiquée traditionnellement pour des raisons de commodité, ne fait pas partie du droit fondamental de chasser garanti par le traité. Le juge Singh, de la Cour suprême de la Colombie-Britannique, a jugé que le Traité de Douglas protégeait autant le droit de chasser que les méthodes et moyens utilisés pour la chasse. Il a néanmoins conclu que le droit issu du traité ne suppose pas et, encore moins, ne confère pas le droit de chasser dangereusement, car il est implicitement restreint dans le but d'empêcher la chasse dangereuse.

Nous privilégions l'interprétation du juge Singh. Soit dit en tout respect, nous estimons que l'approche adoptée par la juge Huddart tend à estomper la distinction entre un droit ancestral et un droit issu d'un traité, et que l'interprétation du juge Lambert ne tient pas compte des limites intrinsèques — en matière de sécurité — que comporte nécessairement ce droit.

La détermination de la portée d'un droit issu d'un traité et de ses limites intrinsèques est essentiellement une question d'interprétation du traité, qui, à son tour, nous renvoie à l'intention des parties au traité. « L'interprétation des traités a pour objet de choisir, parmi les interprétations possibles de l'intention commune, celle qui concilie le mieux les intérêts des deux parties à l'époque de la signature » (*Marshall n^o 1*, par. 78, la juge McLachlin (maintenant Juge en chef), dissidente pour d'autres motifs).

Au moment de la signature du Traité de Douglas, la chasse nocturne n'était pas inhabituelle, ni particulièrement dangereuse. Personne n'aurait été étonné si la Couronne et les Autochtones de Saanich nord avaient envisagé de permettre aux Autochtones de continuer à chasser la nuit. À l'époque, cette pratique ne présentait pas les mêmes dangers qu'aujourd'hui (lesquels seront précisés plus loin). Et les parties n'avaient peut-être même aucune raison de prévoir que les dangers s'accroîtraient. Mais elles ne pouvaient pas croire que le droit de chasser comprenait le droit de chasser dangereusement. Ce serait une injustice à leur égard de leur prêter cette croyance et ce serait, en plus, contraire au bon sens.

106

107

108

- 109 We use the phrase “hunting dangerously” or “hunting in an unsafe manner” or like expressions in this decision to signify hunting in a manner or under conditions that involve an inherent and especially elevated risk to the lives and safety of others.
- Nous employons l’expression « chasser dangereusement » ou d’autres expressions similaires dans les présents motifs pour parler de la chasse se faisant d’une manière ou dans des conditions qui comportent un risque particulièrement élevé pour la vie et la sécurité d’autrui.
- 110 In our view, the parties to the Douglas Treaty must have understood that the right to hunt did not carry with it a right to hunt in an unsafe manner. They must have understood as well that the Crown did not abdicate its interests or its responsibilities in this regard. The Crown was preoccupied by the need to secure the safety of the settlers. Hunting in an unsafe manner could not have been thought to serve the interests of the aboriginals any more than the interests of the Crown. To find that the Douglas Treaty enshrined a right to hunt in an unsafe manner is plainly irreconcilable with the third *Marshall* principle: Treaties must be interpreted in a manner that best reconciles the interests of the parties to it.
- À notre avis, les parties au Traité de Douglas devaient comprendre que le droit de chasser n’englobe pas le droit de chasser dangereusement. Elles devaient également comprendre que la Couronne ne renonçait pas à ses intérêts ni à ses responsabilités à cet égard. Celle-ci était préoccupée par la nécessité d’assurer la sécurité des colons. Personne n’aurait pu penser que la chasse dangereuse sert les intérêts des Autochtones ou ceux de la Couronne. Conclure que le Traité de Douglas consacre le droit de chasser dangereusement est tout simplement incompatible avec le troisième principe énoncé dans *Marshall* : les traités doivent être interprétés de la manière qui concilie le mieux les intérêts des parties.
- 111 On this point, we find the reasoning of the New Brunswick Court of Appeal in *R. v. Paul* (1993), 142 N.B.R. (2d) 55, in relation to an aboriginal treaty right to hunt next to private dwellings, particularly compelling:
- Sur ce point, nous trouvons particulièrement convaincant le raisonnement adopté par la Cour d’appel du Nouveau-Brunswick dans *R. c. Paul* (1993), 142 R.N.-B. (2^e) 55, relativement au droit de chasse issu d’un traité qui est exercé près des habitations :
- In my view, Mr. Paul’s treaty rights must be considered in the context of their exercise. Lamer J., as he then was, said in *Sioui* at p. 1072 that he “could not believe that the Hurons ever believed that the *Treaty* [of 1760] ever gave them the right to cut down trees in a garden as part of their right to carry on their customs”. Similarly, and unlike the trial judge, who said that “status Indians” may exercise their treaty rights even in a manner that “is inherently dangerous”, I cannot believe that the Indians of the St. John ever believed that they could exercise the rights given them in the *Treaty of Boston* of 1725 in an unsafe manner. . . . [para. 18]
- [TRADUCTION] À mon avis, les droits issus de traités dont jouit M. Paul doivent être examinés à la lumière de leur exercice. À la page 1072 de l’arrêt *Sioui*, le juge Lamer (tel était alors son titre) a dit qu’il ne pouvait « pas croire que les Hurons aient jamais cru que le *Traité* [de 1760] leur accordait le droit de couper des arbres dans le jardin d’une maison en vertu de leur droit d’exercer leurs coutumes ». De la même façon, et à la différence du juge du procès qui a dit que les « Indiens inscrits » peuvent exercer leurs droits issus de traités même d’une manière qui est « dangereu[se] en soi », je ne peux pas croire que les Indiens de la rivière Saint John aient jamais cru qu’ils pouvaient exercer les droits qui leur sont accordés par le *Traité de Boston* de 1725 de façon dangereuse. . . . [par. 18]
- 112 The ninth principle of treaty interpretation laid down in *Marshall No. 1* further supports this conclusion: “Treaty rights of aboriginal peoples must not be interpreted in a static or rigid way. They are
- Le neuvième principe d’interprétation des traités énoncé dans *Marshall n° 1* étaye, lui aussi, cette conclusion : « Les droits issus de traités des peuples autochtones ne doivent pas être interprétés de façon

not frozen at the date of signature. The interpreting court must update treaty rights to provide for their modern exercise.” (para. 78)

The appellants argue that using the ninth principle to restrict rather than expand the scope of a treaty right would “turn this [principle] on its head”.

As will be more fully explained below, since 1852, the dangers of night hunting have been amplified with the development of modern weaponry. In our view, treaty rights are not impervious to changes of this sort. They do not evolve in a social, environmental or technological vacuum. A right to hunt is not transformed into a right to hunt in an unsafe manner by disregarding unforeseen dangers or new risks.

Quite the contrary, the ninth principle simply acknowledges that treaties must be interpreted in a manner that contemplates their exercise in modern society. Just as the methods and means of exercising the right should not be frozen in time, neither should the government’s legitimate safety concerns. Adapting the exercise of treaty rights to modern weaponry without adapting the corollary legitimate safety concerns would lead to unacceptable results. One cannot reasonably focus on the former and turn a blind eye to the latter.

In *R. v. Marshall*, [2005] 2 S.C.R. 220, 2005 SCC 43, this Court held that only the logical evolution of a pre-treaty practice will attract treaty protection. In that case, the evidence showed only a pre-treaty practice of some limited trade in wood products. This evidence was insufficient to establish a treaty right to engage in commercial logging. McLachlin C.J., for the majority, described the standard in these terms:

statique ou rigide. Ils ne sont pas figés à la date de la signature. Les tribunaux doivent les interpréter de manière à permettre leur exercice dans le monde moderne. » (par. 78)

Les appelants prétendent que le recours au neuvième principe pour restreindre la portée d’un droit issu d’un traité, au lieu de l’élargir, reviendrait à inverser ce principe.

Comme il sera expliqué plus en détail plus loin, depuis 1852 les dangers de la chasse nocturne s’amplifient avec le développement des armes modernes. À notre avis, les droits issus de traités ne sont pas imperméables aux changements de cette nature. Ils n’évoluent pas dans un vide social, environnemental ou technologique. Le droit de chasser ne se transforme pas en droit de chasser de façon dangereuse, sans qu’il soit tenu compte de dangers imprévus ou de nouveaux risques.

Bien au contraire, le neuvième principe reconnaît simplement que l’interprétation des traités doit tenir compte de l’exercice des droits en question dans la société moderne. Tout comme les méthodes et moyens employés pour l’exercice des droits ne sont pas figés dans le temps, les préoccupations légitimes du gouvernement en matière de sécurité ne doivent pas l’être non plus. Adapter l’exercice des droits issus de traités au contexte des armes modernes sans adapter son corollaire — les préoccupations légitimes en matière de sécurité — entraînerait des résultats inacceptables. On ne pourrait raisonnablement insister sur le premier élément et fermer les yeux sur le second.

Dans *R. c. Marshall*, [2005] 2 R.C.S. 220, 2005 CSC 43, la Cour a statué que seule l’évolution logique d’une pratique préalable au traité peut bénéficier de la protection du traité. Dans cette affaire, la preuve révèle seulement la pratique d’un commerce de produits du bois relativement restreint avant la conclusion du traité. Cette preuve n’est pas suffisante pour permettre d’établir l’existence d’un droit issu d’un traité qui permet l’exploitation forestière à l’échelle commerciale. Au nom de la Cour, la juge en chef McLachlin a décrit la norme applicable en ces termes :

113

114

115

116

Of course, treaty rights are not frozen in time. Modern peoples do traditional things in modern ways. The question is whether the modern trading activity in question represents a logical evolution from the traditional trading activity at the time the treaty was made; *Marshall 2*, at para. 20. Logical evolution means the same sort of activity, carried on in the modern economy by modern means. This prevents aboriginal rights from being unfairly confined simply by changes in the economy and technology. But the activity must be essentially the same. “While treaty rights are capable of evolution within limits, . . . their subject matter . . . cannot be wholly transformed” (*Marshall 2*, at para. 19). [para. 25]

117 In our view, when the same sort of activity carried on in the modern economy by modern means is inherently dangerous, that dangerous activity will not be a logical evolution of the treaty right.

118 It is true, as the appellants assert, that the treaty protects from encroachment the means and methods of its exercise, such as: timing of the hunt (*R. v. White* (1965), 52 D.L.R. (2d) 481 (S.C.C.), aff’g (1964), 50 D.L.R. (2d) 613 (B.C.C.A.); “season, method [and] limit” of the hunt (*Sutherland*, at p. 460); “method, timing and extent” of the hunt (*Badger*, at para. 90)).

119 However, the fact that the treaty protects the means and methods of hunting does not negate the internal limit on the right: the treaty hunting right does not include the right to hunt in a manner that endangers the safety of the hunter or others. Because dangerous hunting falls outside the scope of the protected treaty right, the province is free to regulate in this area. The issue of safety was not addressed in *Prince v. The Queen*, [1964] S.C.R. 81, and that case’s reference to night hunting should not be understood without reference to the subsequent jurisprudence of this Court with respect to safety, including *Myran*, which dealt specifically with the proper interpretation of *Prince*.

Certes, les droits issus de traités ne sont pas figés dans le temps. Les activités traditionnelles sont maintenant pratiquées de façon moderne. Il s’agit d’établir si l’activité commerciale actuelle en cause procède de l’évolution logique du commerce traditionnel pratiqué au moment du traité : *Marshall 2*, par. 20. L’évolution logique suppose le même type d’activité, exercée dans l’économie moderne par des moyens modernes. On évite ainsi de restreindre indûment les droits ancestraux simplement du fait des changements économiques ou technologiques. Il faut cependant que l’activité demeure fondamentalement la même. « Bien que les droits issus de traités soient dans certaines limites capables d’évolution [. . .] leur objet ne peut [. . .] être transformé du tout au tout » (*Marshall 2*, par. 19). [par. 25]

À notre avis, lorsqu’une activité du même type, exercée dans l’économie moderne avec des moyens modernes, est intrinsèquement dangereuse, cette activité dangereuse ne pourra être considérée comme étant l’évolution logique du droit issu d’un traité.

Certes, comme l’affirment les appelants, le traité protège contre l’empiétement les moyens et méthodes utilisés pour l’exercice d’un droit issu d’un traité, par exemple pour tout ce qui touche à la période de chasse (*R. c. White* (1965), 52 D.L.R. (2d) 481 (C.S.C.), conf. (1964), 50 D.L.R. (2d) 613 (C.A.C.-B.), « aux saisons, aux méthodes [et] à la limite de prise » (*Sutherland*, p. 460) ainsi qu’aux modes et périodes de chasse, et à l’ampleur de la chasse (*Badger*, par. 90)).

Cependant, le fait que le traité protège les moyens et méthodes de chasse n’écarte pas la limite intrinsèque du droit : le droit de chasse issu d’un traité ne comporte pas le droit de chasser d’une manière qui mette en danger la sécurité du chasseur ou d’autrui. Étant donné que la chasse dangereuse ne relève pas d’un droit protégé par traité, la province est libre de réglementer ce domaine. Dans *Prince c. The Queen*, [1964] R.C.S. 81, la question de la sécurité n’a pas été abordée et il ne faut pas interpréter l’affaire, lorsqu’il est fait mention de la chasse nocturne, sans tenir compte de la jurisprudence subséquente de la Cour relativement à la question de sécurité, notamment *Myran*, où la Cour traitait précisément de la juste interprétation de *Prince*.

In *Myran*, Dickson J. (as he then was), speaking for the Court, explained the interplay between “means and methods” jurisprudence and safety this way:

I think it is clear from *Prince* . . . that an Indian of the Province is free to hunt or trap game in such numbers, at such times of the year, by such means or methods and with such contrivances, as he may wish, provided he is doing so in order to obtain food for his own use and on unoccupied Crown lands or other lands to which he may have a right of access. But that is not to say that he has the right to hunt dangerously and without regard for the safety of other persons in the vicinity. *Prince* . . . deals with “method”. Neither that case nor those which preceded it dealt with the protection of human life. I agree with what was said in the present case by Mr. Justice Hall in the Court of Appeal for Manitoba:

In the present case the governing statute is *The Wildlife Act*, *supra*, and in particular Sec. 41(1) thereof. Section 10(1) under which the accused were charged does not restrict the type of game, nor the time or method of hunting, but simply imposes a duty on every person of hunting with due regard for the safety of others. Does that duty reduce, detract or deprive Indians of the right to hunt for food on land to which they have a right of access? If one regards that right in absolute terms the answer is clearly in the affirmative; but is that the case? Surely the right to hunt for food as conferred or bestowed by the agreement and affirmed by the statute cannot be so regarded. Inherent in the right is the quality of restraint, that is to say that the right will be exercised reasonably. Section 10(1) is only a statutory expression of that concept, namely that the right will be exercised with due regard for the safety of others, including Indians. [pp. 141-42]

The overarching principle, now firmly entrenched in our jurisprudence, is that public safety enjoys preeminent status in matters of this kind. Or to use the words of *Myran*, the right must be exercised reasonably.

VII

We have concluded that the treaty right to hunt upon which the appellants rely in this case is subject to the internal limit that it cannot be exercised in a manner that is dangerous to the safety of the hunter or others. This is a general description of the limitation. We must still determine how this internal limit may be validly expressed in the

Dans *Myran*, le juge Dickson (plus tard Juge en chef), au nom de la Cour, a expliqué l'interaction entre la jurisprudence traitant des « moyens et méthodes » et la question de sécurité en ces termes :

L'arrêt *Prince* [. . .] montre bien qu'un Indien est libre de chasser ou de piéger le gibier autant qu'il le désire, quand il le désire et par les moyens qu'il choisit à condition que ce soit pour se nourrir personnellement et sur des terres inoccupées de la Couronne ou auxquelles il a un droit d'accès. Toutefois, il n'a pas le droit de chasser dangereusement au mépris de la sécurité des gens du voisinage. L'arrêt *Prince* [. . .] traite des moyens permis. Ni cet arrêt ni ceux qui l'ont précédé n'ont traité de la protection de la vie humaine. Je suis d'accord avec ce qu'a dit le juge Hall à la Cour d'appel du Manitoba dans la présente cause :

[TRADUCTION] La loi applicable est [la] *Wildlife Act*, *supra*, notamment l'art. 41(1). L'art. 10(1), en vertu duquel les accusés ont été inculpés ne restreint pas le type de gibier, le temps ou la méthode de chasse, il impose seulement l'obligation de chasser en ayant égard à la sécurité d'autrui. Cette prescription est-elle une restriction ou une atteinte au droit des Indiens de chasser pour leur nourriture sur les terres auxquelles ils ont un droit d'accès? Si l'on prend ce droit en termes absolus, la réponse est clairement affirmative; mais est-ce le cas? Non, le droit de chasser pour se nourrir, conféré ou attribué par l'accord et ratifié par la loi, ne peut pas être vu de cette façon. Il y a une restriction inhérente au droit, il faut l'exercer raisonnablement. L'article 10(1) n'est que l'énoncé législatif de ce concept, à savoir que le droit sera exercé en ayant égard à la sécurité d'autrui, y compris celle des Indiens. [p. 141-142]

Selon ce principe prépondérant, solidement ancré dans notre jurisprudence, la sécurité publique prévaut dans ce genre d'affaire. Ou bien, pour reprendre les termes employés dans *Myran*, il faut exercer ce droit raisonnablement.

VII

Nous avons conclu que le droit de chasse issu d'un traité invoqué par les appelants en l'espèce comporte la limite intrinsèque qu'il ne peut être exercé d'une manière dangereuse pour le chasseur ou autrui. C'est là une description générale de la limitation. Il reste maintenant à déterminer comment cette limite intrinsèque peut être valablement

120

121

122

regulatory context. Are the courts limited to case-by-case after the fact inquiries into whether a particular hunter on a particular occasion exercised the treaty right to hunt unsafely? Or can the province pass legislation or adopt regulations that define the limits of the right in a way that can be administered and understood by the aboriginal community?

123 The answer to this question is found in this Court's jurisprudence, which affirms the right of the province to determine and direct in advance the limits of a treaty right in a particular regulatory context, provided it does so reasonably. As Cory J., writing for the majority in *R. v. Nikal*, [1996] 1 S.C.R. 1013, stated:

It has frequently been said that rights do not exist in a vacuum, and that the rights of one individual or group are necessarily limited by the rights of another. . . . The government must ultimately be able to determine and direct the way in which these rights should interact. Absolute freedom in the exercise of even a *Charter* or constitutionally guaranteed aboriginal right has never been accepted, nor was it intended. . . . Absolute freedom without any restriction necessarily infers a freedom to live without any laws. Such a concept is not acceptable in our society. [Emphasis added; para. 92.]

124 Similarly, in *Marshall No. 1*, the Court, after concluding that the treaty right to fish was inherently limited to quantities reasonably expected to produce a moderate livelihood, stated:

Catch limits that could reasonably be expected to produce a moderate livelihood for individual Mi'kmaq families at present-day standards can be established by regulation and enforced without violating the treaty right. In that case, the regulations would accommodate the treaty right. Such regulations would *not* constitute an infringement that would have to be justified under the *Badger* standard. [Emphasis in original; para. 61.]

The Court reaffirmed the province's right to define the reasonable limits of treaty rights through regulation in *Marshall No. 2*, stating:

exprimée dans le contexte de la réglementation. Les tribunaux sont-ils réduits à procéder au cas par cas pour décider, après examen des faits, si un chasseur en particulier a, à une occasion donnée, exercé de façon dangereuse le droit de chasse issu d'un traité? Ou les provinces peuvent-elles, par des lois ou des règlements, définir les limites du droit d'une manière qui puisse être administrée et comprise par la collectivité autochtone?

La réponse à cette question réside dans la jurisprudence de la Cour, laquelle confirme le droit des provinces d'établir et de régir au préalable les limites d'un droit issu d'un traité dans un contexte de réglementation particulier, pourvu qu'elles le fassent de façon raisonnable. Comme l'a dit le juge Cory, au nom de la majorité dans *R. c. Nikal*, [1996] 1 R.C.S. 1013 :

Il a fréquemment été déclaré que les droits n'existent pas dans l'abstrait et que les droits d'un individu ou d'un groupe sont nécessairement limités par les droits d'autrui. [. . .] Le gouvernement doit, en dernier ressort, être capable d'établir ou de régir la façon dont ces droits devraient interagir. La liberté absolue d'exercer un droit, même un droit ancestral protégé par la *Charte* ou garanti par la Constitution, n'a jamais été reconnue ni voulue. [. . .] La liberté absolue, sans restriction aucune, implique nécessairement la liberté de vivre en marge des lois. Un tel concept est inacceptable dans notre société. [Nous soulignons; par. 92.]

Dans la même veine, après avoir conclu que le droit de pêche issu d'un traité était intrinsèquement limité par le nombre de prises dont il est raisonnable de s'attendre à ce qu'il permette de s'assurer une subsistance convenable, la Cour a affirmé dans *Marshall n° 1* :

Des limites de prises, dont il serait raisonnable de s'attendre à ce qu'elles permettent aux familles mi'kmaq de s'assurer une subsistance convenable selon les normes d'aujourd'hui, peuvent être établies par règlement et appliquées sans porter atteinte au droit issu du traité. Un tel règlement respecterait ce droit et *ne* constituerait pas une atteinte qui devrait être justifiée suivant la norme établie dans l'arrêt *Badger*. [En italique dans l'original; par. 61.]

La Cour a réaffirmé dans *Marshall n° 2* le droit de la province de définir par règlement les limites raisonnables des droits issus de traités :

... regulations that do no more than reasonably *define* the Mi'kmaq treaty right in terms that can be administered by the regulator and understood by the Mi'kmaq community that holds the treaty rights do not impair the exercise of the treaty right ... [Underlining added; para. 37.]

These holdings are consistent with this Court's assertion in *Myran* that the treaty right must be exercised in a reasonable manner. Reasonable regulatory restrictions, including blanket prohibitions, which address legitimate safety concerns, will not infringe the treaty right.

The question before us is thus whether the province's ban on night hunting constitutes a reasonable exercise of the province's power to regulate the internal safety limit on the appellants' treaty right. Or, put differently, is this ban a reasonable way, in the regulatory context of the Province of British Columbia, to articulate the internal safety limitation on the treaty right to hunt?

The trial judge found that it was. He stated:

[I]t is undeniably true that the Province of British Columbia has taken a firm and consistent attitude against night hunting, based upon the advice from conservation officers, that the practice is inherently unsafe. Certainly the evidence in this case supports such a finding. It is night hunting that brings added and unacceptable danger, according to the evidence. The evidence establishes that it is dangerous to permit the use of high-powered rifles in the dark, and to leave it to individual hunters to use their common sense to minimize those risks in the face of a sudden opportunity to kill game.

. . .

[I]t is apparent that the use of lights at night brings a new set of problems, even as it eliminates others. Most important, it brings the problem of tunnel vision, where the hunter becomes so focussed on the illuminated target, he tends to fail to be sufficiently aware of the periphery of his view, or even the background. This leads to a significant risk of accidental injury to persons or property. I do not question that proper training and

... un règlement qui se contente de *définir* raisonnablement le droit issu de traité des Mi'kmaq d'une manière qui puisse à la fois être administrée par l'organe chargé de sa réglementation et être comprise par la communauté mi'kmaq titulaire du droit en question ne porte pas atteinte à l'exercice de ce droit ... [Nous soulignons; par. 37.]

Ces conclusions sont compatibles avec l'affirmation de la Cour dans *Myran* selon laquelle le droit issu d'un traité doit être exercé de manière raisonnable. Les restrictions réglementaires raisonnables, y compris les interdictions générales, qui ont trait à des préoccupations légitimes en matière de sécurité ne porteront pas atteinte au droit issu d'un traité.

La Cour doit donc déterminer si l'interdiction de la province concernant la chasse nocturne constitue un exercice raisonnable de son pouvoir de réglementer la limite intrinsèque — en matière de sécurité — du droit conféré par traité aux appelants. Autrement dit, est-ce que, dans le contexte de la réglementation en Colombie-Britannique, cette interdiction constitue une façon raisonnable d'exprimer la limite intrinsèque — en matière de sécurité — du droit de chasse issu d'un traité?

Voici ce qu'a dit le juge du procès :

[TRADUCTION] [O]n ne saurait nier que l'opposition de la Colombie-Britannique à la chasse nocturne a été ferme et constante, suivant les conseils des agents de conservation selon lesquels cette pratique est intrinsèquement dangereuse. La preuve en l'espèce étaye certainement cette conclusion. Selon la preuve, c'est la chasse nocturne qui accroît le danger et le rend inacceptable. Il ressort de la preuve qu'il est dangereux d'autoriser l'usage de carabines de haute puissance dans l'obscurité et de se fier au bon sens des chasseurs pour minimiser ces risques devant la chance qu'ils ont soudainement de tuer un gibier.

. . .

[L]e recours à des lampes la nuit engendre manifestement de nouveaux problèmes, même s'il en élimine d'autres. Le problème le plus grave est celui du rétrécissement concentrique du champ visuel : l'attention du chasseur est tellement centrée sur la cible éclairée par la source lumineuse que sa vision périphérique tend à lui échapper, tout comme l'arrière-plan. Ce problème entraîne un grand risque de blessures accidentelles à

125

126

127

other measures can be taken to reduce the risk, but we do not live in a perfect world. The statutory provision is directed at the issue of safety, and is reasonable on its face as a measure to help ensure that needless risk is avoided. [paras. 11 and 13]

128

These findings, shared by trial and appellate courts across the country, are manifestly reasonable. See *R. v. Seward* (1999), 171 D.L.R. (4th) 524 (B.C.C.A.); *R. v. Bernard* (2002), 200 N.S.R. (2d) 352, 2002 NSCA 5, leave to appeal refused, [2002] 3 S.C.R. vi; *R. v. Pariseau*, [2003] 2 C.N.L.R. 260 (Que. C.A.); *R. v. Southwind*, [1991] O.J. No. 3612 (QL) (Prov. Div.); *R. v. King*, [1996] O.J. No. 5458 (QL) (Prov. Div.); *R. v. Harris*, [1998] B.C.J. No. 1016 (QL) (Prov. Ct.); *R. v. Ice*, [2000] O.J. No. 5857 (QL) (C.J.); *R. v. Stump*, [2000] 4 C.N.L.R. 260 (B.C. Prov. Ct.); *R. v. Barlow* (2000), 228 N.B.R. (2d) 289 (Q.B.), leave to appeal refused, [2001] N.B.J. No. 145 (QL), 2001 NBCA 44; *Turner v. Manitoba* (2001), 160 Man. R. (2d) 256, 2001 MBCA 207; *R. v. Augustine* (2001), 232 N.B.R. (2d) 313 (Q.B.), leave to appeal refused, [2001] N.B.J. No. 190 (QL), 2001 NBCA 57; *R. v. Maurice*, [2002] 2 C.N.L.R. 273, 2002 SKQB 68; *R. v. Pitawanakwat*, [2004] O.J. No. 2075 (QL), 2004 ONCJ 50; *R. v. Yapput*, [2004] O.J. No. 5055 (QL), 2004 ONCJ 318. For the opposing view see: *R. v. Maple*, [1982] 2 C.N.L.R. 181 (Sask. Prov. Ct.); *R. v. Machimity*, [1996] O.J. No. 4365 (QL) (Prov. Div.); and *R. v. Polches* (2005), 289 N.B.R. (2d) 72, 2005 NBQB 137.

129

The conclusion that a ban on night hunting is a reasonable exercise of the Province's regulatory power in defining the internal limit on the treaty right flows naturally and logically from the defining feature of nighttime — that is, darkness. The evidence at trial was more than sufficient to establish that one's ability to identify objects, estimate distances and observe background and surrounding items is greatly diminished in the dark, posing a real danger to other members of the public.

autrui ou de dommages accidentels à des biens. Je ne doute pas qu'une formation pertinente et d'autres mesures permettent de réduire le risque, mais la perfection n'est pas de ce monde. La disposition législative vise la sécurité et, à première vue, elle constitue une mesure raisonnable pour éviter que des risques inutiles se produisent. [par. 11 et 13]

Ces conclusions, auxquelles se rallient des tribunaux de première instance et d'appel partout au pays, sont manifestement raisonnables. Voir *R. c. Seward* (1999), 171 D.L.R. (4th) 524 (C.A.C.-B.); *R. c. Bernard* (2002), 200 N.S.R. (2d) 352, 2002 NSCA 5, demande d'autorisation de pourvoi refusée, [2002] 3 R.C.S. vi; *R. c. Pariseau*, [2003] 2 C.N.L.R. 260 (C.A. Qué.); *R. c. Southwind*, [1991] O.J. No. 3612 (QL) (Div. prov.); *R. c. King*, [1996] O.J. No. 5458 (QL) (Div. prov.); *R. c. Harris*, [1998] B.C.J. No. 1016 (QL) (C. prov.); *R. c. Ice*, [2000] O.J. No. 5857 (QL) (C.J.); *R. c. Stump*, [2000] 4 C.N.L.R. 260 (C. prov. C.-B.); *R. c. Barlow* (2000), 228 R.N.-B. (2^e) 289 (B.R.), demande d'autorisation de pourvoi refusée, [2001] A.N.-B. n^o 145 (QL), 2001 NBCA 44; *Turner c. Manitoba* (2001), 160 Man. R. (2d) 256, 2001 MBCA 207; *R. c. Augustine* (2001), 232 R.N.-B. (2^e) 313 (B.R.), demande d'autorisation de pourvoi refusée, [2001] A.N.-B. n^o 190 (QL), 2001 NBCA 57; *R. c. Maurice*, [2002] 2 C.N.L.R. 273, 2002 SKQB 68; *R. c. Pitawanakwat*, [2004] O.J. No. 2075 (QL), 2004 ONCJ 50; *R. c. Yapput*, [2004] O.J. No. 5055 (QL), 2004 ONCJ 318. Pour l'opinion contraire, voir : *R. c. Maple*, [1982] 2 C.N.L.R. 181 (C. prov. Sask.); *R. c. Machimity*, [1996] O.J. No. 4365 (QL) (Div. prov.); et *R. c. Polches* (2005), 289 R.N.-B. (2^e) 72, 2005 NBQB 137.

La conclusion que l'interdiction de la chasse nocturne est l'exercice raisonnable du pouvoir de réglementation de la province pour définir la limite intrinsèque du droit issu d'un traité découle naturellement et logiquement de la caractéristique déterminante de la nuit : l'obscurité. Par ailleurs, la preuve produite au procès suffit amplement pour établir que la capacité de reconnaître des objets, d'évaluer les distances et d'observer les éléments situés à l'arrière-plan et en périphérie est grandement réduite dans l'obscurité, ce qui présente un danger réel pour les autres membres du public.

This added danger to hunting causes the risks associated with hunting at nighttime with a firearm to be unacceptably high. The *Wildlife Act* prohibition is a reasonable response to a real danger.

In *Seward*, the British Columbia Court of Appeal put it succinctly:

The introduction of rifles has significantly heightened the danger of hunting. Not just the hunters, but anyone within a mile radius of a hunter is at risk. This is especially so at night when the fact of darkness transforms a dangerous endeavour into a hazardous one. It does not matter that an individual might be able to hunt at night without injuring anyone, the fact is that the possibility of death or injury is increased when visibility is decreased and one or more hunters are in the woods. [para. 47]

The impugned legislation thus regulates an area which lies entirely outside the treaty right to hunt. It therefore does not conflict at all with the treaty right. No aboriginal right is asserted, and absent a conflicting treaty or aboriginal right, reasonable provincial safety regulation of dangerous hunting practices cannot be said to intrude upon “core Indianness”. It follows that the *Wildlife Act* prohibition on night hunting with a firearm is a valid provincial law applicable to the appellants *ex proprio vigore* and without recourse to s. 88.

We are not persuaded by the appellants’ submission that the provincial power to legislate with respect to safety is restricted to the ability to prohibit unsafe hunting in a *general* manner. If provinces can prohibit “unsafe hunting”, there is no reason why they should be precluded from identifying particular practices that are unsafe. This falls within the power of the provinces to reasonably regulate the internal limits on treaty rights, affirmed in *Marshall No. 1* and *No. 2* and *Sundown*.

Ce danger qui s’ajoute à ceux de la chasse fait que les risques associés à la chasse nocturne avec une arme à feu atteignent un niveau trop élevé pour être acceptables. L’interdiction prévue par la *Wildlife Act* représente une solution raisonnable pour éviter un danger réel.

Dans *Seward*, la Cour d’appel de la Colombie-Britannique a déclaré succinctement :

[TRADUCTION] L’introduction de carabines a fortement accru les dangers de la chasse. Ce ne sont pas seulement les chasseurs qui sont exposés aux risques; c’est aussi toute personne qui se trouve dans un rayon d’un mille autour du chasseur. Cela est d’autant plus vrai la nuit, où l’obscurité ajoute un élément de hasard. Peu importe qu’une personne soit capable de chasser la nuit sans blesser qui que ce soit, il demeure que le risque de décès ou de blessures s’accroît lorsque la visibilité est réduite et qu’il y a plusieurs chasseurs dans le bois. [par. 47]

La mesure législative contestée régit donc un champ complètement différent de celui visé par le droit de chasse issu d’un traité. Elle n’entre donc pas du tout en conflit avec le droit issu d’un traité. Aucun droit ancestral n’est invoqué et, en l’absence d’un droit ancestral ou issu d’un traité incompatible, on ne peut affirmer qu’une réglementation provinciale raisonnable en matière de sécurité qui vise les pratiques de chasse dangereuses empiète sur l’« essentiel de l’indianité ». Il s’ensuit que l’interdiction prévue par la *Wildlife Act* de chasser la nuit avec une arme à feu constitue une mesure législative provinciale valide qui s’applique d’elle-même aux appelants, sans qu’il ne soit nécessaire de recourir à l’art. 88.

Nous ne sommes pas convaincus par l’argument des appelants que le pouvoir d’une province de légiférer en matière de sécurité se limite à sa capacité d’interdire, de façon *générale*, la chasse dangereuse. Si les provinces peuvent interdire la « chasse dangereuse », il n’y a pas de raison qu’elles ne puissent pas désigner certaines pratiques comme étant dangereuses. Cette fonction relève du pouvoir des provinces de réglementer de façon raisonnable les limites intrinsèques des droits issus de traités, confirmé dans *Marshall n° 1* et *n° 2* et *Sundown*.

130

131

132

133

134 Finally, we offer two brief observations concerning the joint reasons of Justices Deschamps and Abella.

135 First, in their view, the question on this appeal is the extent to which, if at all, provinces may validly interfere with treaty rights. With respect, we only reach that question if the impugned provincial legislation is first found to affect a treaty right. In this case, we are agreed that the Douglas Treaty does not confer a right to hunt dangerously. This renders hypothetical the question posed by our colleagues.

136 Second, Justices Deschamps and Abella find that a ban on hunting with a modern firearm at night is overly broad. They believe that the Douglas Treaty countenances only more limited prohibitions. In our respectful view, this constraint undermines the objective of legislation relating to a hunting practice which courts have consistently found inherently involves an unacceptable and elevated risk to the public.

137 The constitutional questions in the present appeal were stated as follows:

1. Do ss. 27(1)(d) and (e) of the *Wildlife Act*, S.B.C. 1982, c. 57, constitutionally apply of their own force to the appellants in view of Parliament's exclusive legislative authority under s. 91(24) of the *Constitution Act, 1867*?
2. If not, do ss. 27(1)(d) and (e) of the *Wildlife Act*, S.B.C. 1982, c. 57, nonetheless apply to the appellants by virtue of s. 88 of the *Indian Act*, R.S.C. 1985, c. I-5?

138 Since the proceedings relating to s. 27(1)(e) were conditionally stayed and no objection was made on appeal, it is not necessary for purposes of this appeal to assess the constitutionality of s. 27(1)(e).

139 With respect to s. 27(1)(d), the first question should be answered in the affirmative. Having

Enfin, deux brèves observations concernant les motifs conjoints des juges Deschamps et Abella.

Premièrement, à leur avis, il s'agit de savoir en l'espèce dans quelle mesure, le cas échéant, les provinces peuvent valablement intervenir dans les questions des droits issus de traités. Soit dit en tout respect, nous estimons que, pour répondre à cette question, il faut d'abord établir que la mesure législative provinciale contestée porte atteinte à un droit issu d'un traité. En l'espèce, nous sommes d'accord pour dire que le Traité de Douglas ne confère pas le droit de chasser dangereusement. Cela rend hypothétique la question posée par nos collègues.

Deuxièmement, les juges Deschamps et Abella estiment que l'interdiction de chasser la nuit avec une arme à feu moderne est d'une portée trop large. À leur avis, le Traité de Douglas tolère seulement des interdictions plus limitées. À notre humble avis, cette restriction compromet la réalisation de l'objectif de tout texte législatif concernant une pratique de chasse dont les tribunaux ont, de façon constante, considéré qu'elle comporte un risque inacceptable et élevé pour le public.

Les questions constitutionnelles posées en l'espèce sont ainsi formulées :

1. Les alinéas 27(1)d) et e) de la *Wildlife Act*, S.B.C. 1982, ch. 57, sont-ils constitutionnellement applicables d'eux-mêmes aux appelants, compte tenu de la compétence législative exclusive que le par. 91(24) de la *Loi constitutionnelle de 1867* confère au Parlement?
2. Dans la négative, les al. 27(1)d) et e) de la *Wildlife Act*, S.C.B. 1982, ch. 57, s'appliquent-ils néanmoins aux appelants par l'effet de l'art. 88 de la *Loi sur les Indiens*, L.R.C. 1985, ch. I-5?

Étant donné la suspension conditionnelle des procédures fondées sur l'al. 27(1)e) et l'absence d'objection en appel, il n'est pas nécessaire, dans le cadre du présent pourvoi, d'évaluer la constitutionnalité de l'al. 27(1)e).

En ce qui concerne l'al. 27(1)d), il faut répondre par l'affirmative à la première question. Vu la

concluded that s. 27(1)(d) of the *Wildlife Act* is a reasonable law of general application directed at safety that does not engage the appellants' treaty rights, and which applies *ex proprio vigore*, it is not necessary to answer the second question.

For these reasons, we would dismiss the appeal.

Appeal allowed, McLACHLIN C.J. and BASTARACHE and FISH JJ. dissenting.

ON APPEAL FROM THE COURT OF APPEAL FOR BRITISH COLUMBIA

Indians — Aboriginal rights — Fishing rights — Appellant charged with fishing without a licence — Whether licensing scheme infringing appellant's aboriginal rights and therefore not applying to him — Constitution Act, 1982, ss. 35(1), 52 — British Columbia Fishery (General) Regulations, SOR/84-248, s. 4(1).

Appellant is a native charged with fishing without a licence contrary to s. 4(1) of the *British Columbia Fishery (General) Regulations*. Native persons, although required to have a licence, were entitled to a free permit to fish for salmon in the manner they preferred. Appellant had been gaffing salmon in the Bulkley River where it flows through his reserve. He took the position that the licensing scheme infringed his aboriginal rights as provided in s. 35(1) of the *Constitution Act, 1982* and was therefore inapplicable. He further contended that the river is, at this point, part of his reserve so that only

EN APPEL DE LA COUR D'APPEL DE LA COLOMBIE-BRITANNIQUE

Indiens — Droits ancestraux — Droits de pêche — Appellant accusé d'avoir pêché sans permis — Le régime de délivrance de permis viole-t-il les droits ancestraux de l'appellant et est-il par conséquent inapplicable à ce dernier? — Loi constitutionnelle de 1982, art. 35(1), 52 — Règlement de pêche général de la Colombie-britannique, DORS/84-248, art. 4(1).

L'appellant, un autochtone, a été accusé d'avoir pêché sans permis, contrairement au par. 4(1) du *Règlement de pêche général de la Colombie-Britannique*. Même s'ils étaient tenus de détenir un permis, les autochtones avaient le droit d'obtenir, sans frais, un permis les autorisant à pêcher le saumon de la manière qu'ils préféraient. L'appellant avait pris du saumon à la gaffe dans la rivière Bulkley, là où elle traverse sa réserve. L'appellant a fait valoir que le régime de délivrance de permis porte atteinte aux droits ancestraux qui lui sont garantis par le par. 35(1) de la *Loi constitutionnelle de 1982* et qu'il est donc inapplicable. Il a également affirmé que, à cet endroit, la rivière fait partie de sa réserve et que, en conséquence, seul s'appliquait le règlement administratif de

the band by-law, which allowed band members unrestricted fishing in the river, applied.

Appellant was acquitted at trial and the acquittals were upheld by the Summary Conviction Appeal Judge. The acquittals were set aside by the Court of Appeal. The constitutional question before this Court queried whether s. 4(1) of the Regulations and licences issued under it were of no force or effect with respect to the appellant in the circumstances by reason of the aboriginal rights protected by s. 35 of the *Constitution Act, 1982*. In essence, two issues are raised: (1) whether the band's fishing by-law applies to the Bulkley River where it flows through the band's reserve, and (2) whether the licence requirement under s. 4(1) of the Regulations infringes the appellant's aboriginal rights contrary to s. 35.

Held (L'Heureux-Dubé and McLachlin JJ. dissenting): The appeal should be allowed.

Per Lamer C.J. and La Forest, Sopinka, Gonthier, Cory, Iacobucci and Major JJ.: Historical documents available to the public were relied on. All parties had an opportunity to review and make submissions pertaining to them.

The Crown did not intend to grant an exclusive fishery to the band when it created the reserve. Reserve commissioners were not given authority to bind the Crown and were instructed not to assign fishing rights irrevocably and absolutely. The Crown's policy against the granting of exclusive fisheries to the Indians was often and forcefully stated. No evidence supported the position that the Department of Indian Affairs had intended to grant the bands exclusive fisheries but the Department of Marine and Fisheries overrode this intention in an inter-departmental jurisdiction dispute. Notwithstanding the band's claim that it was misled as to the grant of an exclusive fishery, the facts surrounding this particular grant considered in light of the expressed general policy indicate an intention to allot only the land of the reserve and not the river.

The portion of the river flowing through the reserve (with the reserve on both sides) does not form part of the reserve through operation of the doctrine of *ad medium filum aquae* to non-navigable water. This doctrine, assuming without deciding that it should apply in Canada, does not apply for three reasons. First, it only applies to non-navigable rivers and the Bulkley River, taking into account its entire length, should be consid-

la bande, qui accorde aux membres de la bande un droit de pêche illimité dans la rivière.

L'appellant a été acquitté au procès. La cour d'appel des poursuites sommaires a confirmé les acquittements, qui ont par la suite été infirmés par la Cour d'appel. La question constitutionnelle soumise à notre Cour est de savoir si le par. 4(1) du Règlement et les permis délivrés sous son régime sont, dans les circonstances, inopérants à l'égard de l'appellant en raison des droits ancestraux protégés par l'art. 35 de la *Loi constitutionnelle de 1982*. Essentiellement, deux questions sont soulevées: (1) Le règlement administratif de pêche de la bande s'applique-t-il à la rivière Bulkley, là où elle traverse la réserve de la bande? (2) L'obligation de détenir un permis prévue au par. 4(1) du Règlement porte-t-elle atteinte aux droits ancestraux de l'appellant, contrevenant ainsi à l'art. 35?

Arrêt (les juges L'Heureux-Dubé et McLachlin sont dissidentes): Le pourvoi est accueilli.

Le juge en chef Lamer et les juges La Forest, Sopinka, Gonthier, Cory, Iacobucci et Major: Des documents historiques auxquels le public a accès ont été invoqués. Toutes les parties ont eu la possibilité de les examiner et de faire des observations à leur égard.

La Couronne n'avait pas l'intention d'accorder de pêche exclusive à la bande lorsqu'elle a créé la réserve. Les commissaires des réserves n'étaient pas habilités à lier la Couronne et avaient reçu instruction de ne pas céder de droits de pêche de manière irrévocable et absolue. La politique de la Couronne interdisant l'attribution de pêcheries exclusives aux Indiens a été affirmée de façon catégorique à maintes reprises. Aucun élément de preuve n'étayait la thèse que le ministère des Affaires indiennes entendait accorder des pêcheries exclusives aux Indiens mais que le ministère de la Marine et des Pêcheries avait fait obstacle à cette volonté, dans le cadre d'un conflit de compétences entre ministères. Même si la bande a fait valoir qu'elle avait été amenée à croire qu'on lui accordait une pêche exclusive, examinés à la lumière de la politique générale déclarée, les faits de cette attribution indiquent que l'intention était d'accorder uniquement les terres de la réserve et non la rivière.

La partie de la rivière qui traverse la réserve (et qui est ainsi bordée des deux côtés par la réserve) ne fait pas partie de la réserve par l'application de la doctrine *ad medium filum aquae* aux eaux non navigables. À supposer, sans toutefois se prononcer sur la question, qu'elle s'applique au Canada, cette doctrine ne s'applique pas en l'espèce pour trois raisons. Premièrement, elle ne s'applique qu'aux rivières non navigables, et la rivière

ered to be navigable. Secondly, when the reserve was created at common law the fishery was a right severable from the title to the river bed. Ownership of the river bed had no effect on the fishery as the Crown specifically refused to grant an exclusive fishery to the band. Thirdly, even if the presumption could be said to apply, it was rebutted in light of the evidence that the Crown never allotted nor intended to allot the river bed to the band.

The onus of establishing a *prima facie* infringement of an aboriginal right rests on the person claiming that right. The existence and the extent of the aboriginal right must first be established. The right established was to fish for food and ceremonial purposes and to provide members of the band with fish necessary for personal food and ceremonial needs but no position was taken as to whether the right extends beyond that. The appellant had no right not to comply with the directions of the Department of Fisheries and Oceans.

A *prima facie* infringement of an aboriginal right does not necessarily occur if something should affect that right. Rights do not exist in a vacuum and the ability to exercise personal or group rights is necessarily limited by the rights of others. The government must ultimately be able to determine and direct the way in which these rights should interact. Absolute freedom without any restriction is not an acceptable concept in our society.

The aboriginal right to fish must be balanced against the need to conserve the fishery stock. This right cannot automatically deny the ability of the government to set up a licensing scheme or program as part of a conservation program since the right's exercise depends on the continued existence of the resource.

Only aboriginal peoples can exercise aboriginal rights. The nature and scope of these rights will frequently be dependant upon membership in particular bands who have established particular rights in specific localities. In this context, a licence may be the least intrusive way of establishing the existence of an individual's aboriginal right as well as preventing non-aboriginals from exercising aboriginal rights.

Conditions of the licence can infringe the rights guaranteed by s. 35 of the *Constitution Act, 1982*. The test

Bulkley, si on la considère dans son ensemble, devrait être considérée comme une rivière navigable. Deuxièmement, lorsque la réserve a été créée, en vertu de la common law, la pêche était séparable du titre relatif au lit de la rivière. Le titre sur le lit de la rivière n'a produit aucun effet à l'égard de la pêche, étant donné que la Couronne a expressément refusé d'accorder à la bande une pêche exclusive. Troisièmement, même s'il était possible d'affirmer que la présomption s'applique, elle a été réfutée compte tenu de la preuve que la Couronne n'a jamais accordé le lit de la rivière à la bande ni eu l'intention de le faire.

Il incombe à la personne revendiquant un droit ancestral d'établir qu'il a été porté atteinte à première vue à ce droit. L'existence et la portée du droit ancestral doivent d'abord être établies. Le droit qui a été établi était celui de pêcher à des fins alimentaires et rituelles et de fournir à d'autres membres de la bande le poisson nécessaire pour satisfaire leurs besoins alimentaires et rituels, mais aucune opinion n'a été exprimée quant à savoir si ce droit a une portée plus large. L'appelant n'avait pas le droit de ne pas se conformer aux ordres du ministère des Pêches et des Océans.

Il n'y a pas nécessairement atteinte à première vue à un droit ancestral si quelque chose entrave l'exercice de ce droit. Les droits n'existent pas dans l'abstrait et les droits d'un individu ou d'un groupe sont nécessairement limités par les droits d'autrui. Le gouvernement doit, en dernier ressort, être capable d'établir ou de régir la façon dont ces droits devraient interagir. La liberté absolue, sans restriction aucune, est un concept inacceptable dans notre société.

Il faut mettre en équilibre le droit ancestral de pêcher et la nécessité de conserver les ressources halieutiques. Ce droit ne peut automatiquement priver le gouvernement de la capacité de mettre sur pied un régime ou programme de délivrance de permis faisant partie d'un programme de conservation, car l'exercice du droit en question dépend de la survie de ces ressources.

Seuls les peuples autochtones peuvent exercer des droits ancestraux. La nature et la portée de ces droits dépendent fréquemment de l'appartenance à une bande particulière ayant établi l'existence de certains droits dans une localité donnée. Dans ce contexte, un permis peut constituer le moyen le moins attentatoire d'établir l'existence du droit ancestral d'un individu et d'empêcher les non-autochtones d'exercer des droits ancestraux.

Les conditions prévues par le permis peuvent constituer une atteinte aux droits garantis par l'art. 35 de la

established in *Sparrow* requires: (1) an assessment of whether the legislation in question has the effect of interfering with an existing aboriginal right, and if so, whether that effect represents a *prima facie* infringement of s. 35(1); and, (2) a determination of whether the limitation is unreasonable, imposes an undue hardship or denies holders of the right the preferred means of exercising the right. The onus of proving a *prima facie* infringement lies on the individual or group challenging the legislation.

The licence, as distinct from its conditions, does not constitute an infringement of s. 35(1). The simple requirement of a licence is not in itself unreasonable; rather, it is necessary for the exercise of the right itself. A licence which is freely and readily available cannot be considered an undue hardship for that term implies more than mere inconvenience. The licence by itself, without its conditions, cannot affect the preferred means of exercising the right since it is nothing more than a form of identification.

The government must justify those conditions of a licence which on their face infringe the s. 35 right to fish. The infringing conditions of the 1986 licence are: (i) the restriction to fishing for food only; (ii) the notations providing that fishing time was subject to change by public notice and that Indian food fishing outside set dates must be licensed by the Provincial Fish and Wildlife Conservation Officer; (iii) the restriction to fishing for the fisher and his or her family only; and (iv) the restriction to fishing for salmon only. These conditions are *prima facie* infringements of the appellant's aboriginal rights: (i) to determine band members who will receive the fish for ultimate consumption; (ii) to select the use (food, ceremonial or religious) of the fish; (iii) to fish for steelhead; and, (iv) to choose the period of time to fish in the river. Other terms of the licence could be infringements if they contradicted the appellant's aboriginal rights. These terms provide for: (i) the prescribed waters in which fishing can take place; (ii) the type of gear which can be used; and, (iii) the fishing times and days. Non-enforcement does not result in these conditions being valid. The holder of a constitutional right need not rely upon the exercise of prosecutorial discretion and restraint for the protection of the right.

Loi constitutionnelle de 1982. Le critère énoncé dans l'arrêt *Sparrow* exige: (1) qu'on détermine si la loi en question a pour effet de porter atteinte à un droit ancestral existant et, dans l'affirmative, si elle constitue une violation à première vue du par. 35(1); (2) qu'on détermine si la restriction est déraisonnable, indûment rigoureuse ou prive les titulaires du droit de recourir à leur moyen préféré de l'exercer. C'est à l'individu ou au groupe qui conteste la mesure législative qu'il incombe de prouver qu'il y a eu atteinte à première vue.

Le permis lui-même, par opposition aux conditions dont il est assorti, ne constitue pas une atteinte au par. 35(1). La simple obligation d'être titulaire d'un permis n'est pas en soi déraisonnable, mais au contraire nécessaire à l'exercice du droit lui-même. Un permis gratuit et facile à obtenir ne peut être considéré comme étant une mesure indûment rigoureuse, car ces mots impliquent plus qu'un simple inconvénient. Le permis lui-même, indépendamment de ses conditions, ne peut gêner l'exercice du droit par les moyens préférés puisqu'il n'est rien d'autre qu'un moyen d'identification.

Le gouvernement est tenu de justifier les conditions prévues par un permis qui, à la simple lecture de leur texte, portent atteinte au droit de pêche garanti par l'art. 35. Les conditions attentatoires du permis de 1986 sont les suivantes: (i) la pêche ne peut être pratiquée qu'à des fins alimentaires; (ii) les remarques indiquant que la période de pêche peut être modifiée par avis public et que les Indiens qui pratiquent la pêche à des fins alimentaires en dehors de périodes déterminées doivent détenir un permis délivré par l'agent provincial de conservation de la faune et du poisson; (iii) le pêcheur ne peut pratiquer la pêche que pour lui-même et sa famille; (iv) seule la pêche au saumon peut être pratiquée. Ces conditions constituent à première vue des atteintes aux droits ancestraux de l'appelant: (i) de désigner les membres de la bande qui recevront le poisson pour le consommer en bout de ligne; (ii) de décider à quelles fins (alimentaires, rituelles ou religieuses) sera utilisé le poisson; (iii) de pêcher la truite arc-en-ciel; (iv) de décider à quel moment pêcher dans la rivière. Le permis est assorti d'autres conditions qui pourraient être attentatoires si elles entraient en conflit avec les droits ancestraux de l'appelant. Ces conditions concernent: (i) la désignation des eaux où la pêche peut être pratiquée; (ii) le type d'engins de pêche pouvant être utilisés; (iii) les jours et les heures de pêche. Le fait qu'elles ne soient pas appliquées n'a pas pour effet de rendre ces conditions valides. Le titulaire d'un droit constitutionnel n'a pas, pour jouir de la protection de ce droit, à compter que le ministère public fera montre de retenue dans l'exercice de son pouvoir discrétionnaire de poursuivre.

Sparrow set out questions to be addressed in determining if an infringement of aboriginal or treaty rights could be justified: (1) whether there was a valid legislative objective; and if so (2) whether the honour of the Crown and the special trust relationship and the responsibility of the government vis-à-vis aboriginals was at stake. Further questions might arise depending on the circumstances of the inquiry: whether there had been as little infringement as possible in order to effect the desired result; whether, in a situation of expropriation, fair compensation was available, and whether the aboriginal group in question had been consulted with respect to the conservation measures being implemented. The concept of reasonableness forms an integral part of the *Sparrow* test for justification.

Reasonableness must come into play in aspects of information and consultation. Regulations pertaining to conservation may have to be enacted expeditiously, however, if a crisis is to be avoided. The nature of the situation will have to be taken into account.

The government adduced no evidence to justify the conditions of the licence and accordingly did not meet its onus to do so. The licence and its integral conditions are an indivisible whole. The conditions, even if they could be considered separately, were not severable.

Per L'Heureux-Dubé and McLachlin JJ. (dissenting): The requirement of a licence did not constitute a *prima facie* infringement of the appellant's constitutionally protected right to fish for food.

The issue before the Court was whether the act of licensing *per se* was unconstitutional and not whether the conditions attached to the licence were unconstitutional. The charge of failing to obtain a validly required licence must be distinguished from breach of one of the conditions of the licence. The invalidity of licence conditions does not excuse a person from obtaining the licence required by law even if the conditions are "integral" to the licence.

Cases Cited

By Cory J.

Applied: *R. v. Sparrow*, [1990] 1 S.C.R. 1075; *Keewatin Power Co. v. Kenora (Town)* (1906), 13 O.L.R.

Ont été énoncées, dans *Sparrow*, les questions qu'il faut examiner pour déterminer s'il est possible de justifier une atteinte à des droits ancestraux ou issus de traités. (1) Existe-t-il un objectif législatif régulier? Si oui, (2) l'honneur de Sa Majesté ainsi que les rapports spéciaux de fiduciaire et la responsabilité du gouvernement envers les autochtones sont-ils en jeu? D'autres questions peuvent également se soulever, selon les circonstances de l'enquête. En tentant d'obtenir le résultat souhaité, a-t-on porté le moins possible atteinte à des droits? Une juste indemnisation est-elle prévue en cas d'expropriation? Le groupe d'autochtones en question a-t-il été consulté au sujet des mesures de conservation mises en œuvre? Le concept du caractère raisonnable fait partie intégrante du critère de justification établi dans l'arrêt *Sparrow*.

Le caractère raisonnable doit entrer en jeu pour ce qui est des aspects qui concernent l'information et la consultation. Cependant, il est possible que des règlements en matière de conservation doivent être pris rapidement afin d'éviter une crise. Il faudra tenir compte de la nature de la situation.

Le gouvernement n'a présenté aucune preuve susceptible de justifier les conditions fixées par le permis, et il ne s'est donc pas acquitté du fardeau qui lui incombe. Le permis et les conditions qui en font partie intégrante forment un tout indivisible. Même si elles pouvaient être considérées séparément, les conditions ne seraient pas dissociables.

Les juges L'Heureux-Dubé et McLachlin (dissidentes): L'obligation d'obtenir un permis de pêche ne constitue pas à première vue une atteinte au droit de pêcher pour se nourrir qui est garanti à l'appelant par la Constitution.

La Cour était saisie de la question de savoir si le fait de délivrer des permis est en soi inconstitutionnel et non si les conditions dont est assorti le permis sont inconstitutionnelles. Il faut établir une distinction entre l'accusation de ne pas détenir le permis valablement requis et celle d'enfreindre une des conditions du permis. L'invalidité des conditions prévues par un permis ne dispense pas une personne de l'obligation d'obtenir le permis requis par la loi, même si ces conditions font «partie intégrante» du permis.

Version française du jugement du juge en chef Lamer et des juges La Forest, Sopinka, Gonthier, Cory, Iacobucci et Major rendu par

CORY J. — The appellant is a Wet'suwet'en Indian of the Moricetown Band. He lives in the village of Moricetown which is within the boundaries of Moricetown Reserve No. 1. The reserve comprises lands on both sides of the Bulkley River. On July 20 and 23, 1986, officers of the Department of Fisheries and Oceans watched the appellant gaff salmon in the Bulkley River at Moricetown. When he was asked for his licence he stated that he did not have one. He was then charged with fishing without a licence contrary to s. 4(1) of the *British Columbia Fishery (General) Regulations*, SOR/84-248. The Regulations provided that Indian people were entitled to a free permit to fish for salmon in the manner they preferred.

LE JUGE CORY — L'appelant, Indien Wet'suwet'en de la bande de Moricetown, vit dans le village de Moricetown, qui se trouve à l'intérieur des limites de la réserve n° 1 de Moricetown. La réserve se compose de terres situées des deux côtés de la rivière Bulkley. Les 20 et 23 juillet 1986, des agents du ministère des Pêches et des Océans ont observé l'appelant en train de prendre du saumon à la gaffe dans la rivière Bulkley à Moricetown. Lorsqu'ils lui ont demandé d'exhiber son permis, il leur a répondu qu'il n'en avait pas. Il a alors été accusé d'avoir pêché sans permis, contrairement au par. 4(1) du *Règlement de pêche général de la Colombie-Britannique*, DORS/84-248. Ce règlement indiquait que les Indiens avaient le droit d'obtenir, sans frais, un permis les autorisant à pêcher le saumon de la manière qu'ils préféraient.

The appellant took the position that the *Fisheries Act*, R.S.C., 1985, c. F-14 (formerly R.S.C. 1970, c. F-14), and Regulations did not apply to him as the licensing scheme infringed his aboriginal rights as provided in s. 35(1) of the *Constitution Act, 1982*. The section is found in Part II of that Act, entitled "Rights of the Aboriginal Peoples of Canada", and reads:

L'appelant a fait valoir que la *Loi sur les pêches*, L.R.C. (1985), ch. F-14 (auparavant la *Loi sur les pêcheries*, S.R.C. 1970, ch. F-14), et son règlement d'application, ne s'appliquaient pas à lui puisque le régime de délivrance de permis portait atteinte aux droits ancestraux qui lui sont garantis par le par. 35(1) de la *Loi constitutionnelle de 1982*. Cette disposition, qui se trouve dans la partie II, intitulée «Droits des peuples autochtones du Canada», est ainsi rédigée:

35. (1) The existing aboriginal and treaty rights of the aboriginal peoples of Canada are hereby recognized and affirmed.

35. (1) Les droits existants — ancestraux ou issus de traités — des peuples autochtones du Canada sont reconnus et confirmés.

The appellant further contended that the Bulkley River is, at this point, part of the Moricetown Reserve and that as a result he was bound solely by the band by-law as it pertains to fishing in the river.

L'appelant a également affirmé que, à cet endroit, la rivière Bulkley fait partie de la réserve de Moricetown et que, en conséquence, il était assujéti uniquement au règlement administratif de la bande, pour ce qui concerne la pêche dans la rivière.

At trial on May 29, 1989, Smyth Prov. Ct. J. acquitted the appellant of the charges. On appeal, the Summary Conviction Appeal Justice Millward J. upheld the acquittals, but on different grounds. On further appeal to the British Columbia Court of Appeal, a majority of the court (Lambert and Hutcheon J.J.A. dissenting) set aside the acquittals and entered convictions on the charges.

Au procès, le 29 mai 1989, le juge Smyth de la Cour provinciale a acquitté l'appelant des accusations portées contre lui. En appel, le juge d'appel Millward des poursuites sommaires a confirmé les acquittements, mais pour des motifs différents. Par la suite, la Cour d'appel de la Colombie-Britannique, à la majorité (les juges Lambert et Hutcheon étant dissidents), a annulé les acquittements et inscrit des déclarations de culpabilité à l'égard des accusations.

Issues

By order of the Chief Justice the following constitutional question was stated:

Is s. 4(1) of the *British Columbia Fishery (General) Regulations*, SOR/84-248, as it read in July of 1986, and licences issued thereunder, of no force or effect with respect to the appellant in the circumstances of these proceedings, by virtue of s. 52 of the *Constitution Act, 1982*, by reason of the aboriginal rights within the meaning of s. 35 of the *Constitution Act, 1982* invoked by the appellant?

The appellant and respondent have agreed that two issues are raised in this appeal. The first is whether the fishing by-law of the Moricetown Band applies to the Bulkley River at Moricetown. The second is whether the licence requirement under s. 4(1) of the *British Columbia Fishery (General) Regulations* infringes the appellant's aboriginal rights, contrary to s. 35.

The Band By-Law

Section 81(1)(o) of the *Indian Act*, R.S.C., 1985, c. I-5 (formerly R.S.C. 1970, c. I-6), provides:

81.(1) The council of a band may make by-laws... for any or all of the following purposes, namely,

(o) the preservation, protection and management of fur-bearing animals, fish and other game on the reserve.

Pursuant to that provision, the Moricetown Band Council passed a by-law which provided in part as follows:

Gitksan-Wet'suwet'en Indian Fishing By-Law, SOR/86-612

2. The following definitions apply in this By-Law:

Questions en litige

Sur ordonnance du Juge en chef, la question constitutionnelle suivante a été formulée:

Le paragraphe 4(1) du *Règlement de pêche général de la Colombie-Britannique*, DORS/84-248, tel qu'il se lisait en juillet 1986, et les permis délivrés en vertu de ce paragraphe sont-ils, dans les circonstances de la présente affaire, inopérants à l'égard de l'appelant en vertu de l'art. 52 de la *Loi constitutionnelle de 1982*, en raison des droits ancestraux au sens de l'art. 35 de la *Loi constitutionnelle de 1982*, qu'il invoque?

L'appelant et l'intimée ont convenu qu'il y a deux questions en litige dans le présent pourvoi. Premièrement, le règlement administratif de pêche de la bande de Moricetown s'applique-t-il à la rivière Bulkley, à la hauteur de Moricetown? Deuxièmement, l'obligation de détenir un permis prévue au par. 4(1) du *Règlement de pêche général de la Colombie-Britannique* porte-t-elle atteinte aux droits ancestraux de l'appelant, contrevenant ainsi à l'art. 35?

Le règlement administratif de la bande

L'alinéa 81(1)o) de la *Loi sur les Indiens*, L.R.C. (1985), ch. I-5 (auparavant S.R.C. 1970, ch. I-6), est ainsi rédigé:

81. (1) Le conseil d'une bande peut prendre des règlements administratifs [...] pour l'une ou l'ensemble des fins suivantes:

o) la conservation, la protection et la régie des animaux à fourrure, du poisson et du gibier de toute sorte dans la réserve [«on the reserve»].

Conformément à cette disposition, le conseil de bande de Moricetown a pris un règlement administratif prévoyant en partie ce qui suit:

Gitksan-Wet'suwet'en Indian Fishing By-Law, DORS/86-612

[TRADUCTION] 2. Les définitions qui suivent s'appliquent au présent règlement administratif.

r) "Waters of the Bands" means all water, waterways, rivers or streams which are located upon, or within boundaries of the reserves set aside for the use and benefit of the Moricetown Band.

3. This By-Law applies in respect and over all waters of the Band.

4. a) Gitksan-Wet'suwet'en persons are permitted to engage in fishing in waters of the Bands at any time and by any means. . . .

Whether or not the by-law could be applied to the Bulkley River will depend on whether that river forms part of the reserve.

Reasons of the Courts Below

Trial, [1989] 4 C.N.L.R. 143

8 Smyth Prov. Ct. J. began by considering the band's by-law. He noted that the Crown had conceded that if the by-law applied to the Bulkley River, it would take priority over the *Fisheries Act* and the Regulations. Section 81(1)(o) of the *Indian Act* authorized the band to make by-laws for the "preservation, protection and management of . . . fish . . . on the reserve". The key issue was therefore the interpretation of the expression "on the reserve". He held, at p. 146, that this expression authorized the band to make by-laws not only in relation to fisheries which were a geographical part of the reserve, but also in relation to "waters that are merely touching, against or at the reserve". Since the Bulkley River touched the Moricetown Reserve, the band's by-law would apply to the river and the appellant could rely on the by-law as a defence to the charges against him. On this ground, Smyth Prov. Ct. J. acquitted the appellant.

Supreme Court of British Columbia (1990), 51 B.C.L.R. (2d) 247

9 Millward J. found that Smyth Prov. Ct. J. erred in his interpretation of the expression "on the reserve". He held that the expression could not be

r) «eaux des bandes» Toute l'eau, y compris les voies d'eau, rivières ou ruisseaux se trouvant dans les réserves mises de côté au profit et à l'usage de la bande de Moricetown ou à l'intérieur des limites de ces réserves [«upon, or within boundaries of the reserves»].

3. Le présent règlement administratif s'applique à toutes les eaux de la bande.

4. a) Les Gitksan-Wet'suwet'en sont autorisés à pêcher dans les eaux des bandes en tout temps et par tous moyens. . . .

Le règlement administratif ne sera applicable à la rivière Bulkley que si celle-ci fait partie de la réserve.

Motifs des juridictions inférieures

Première instance, [1989] 4 C.N.L.R. 143

Le juge Smyth de la Cour provinciale a d'abord examiné le règlement administratif de la bande. Le ministère public, a-t-il signalé, a concédé que, s'il s'appliquait à la rivière Bulkley, ce règlement aurait priorité sur la *Loi sur les pêches* et le règlement. L'alinéa 81(1)o) de la *Loi sur les Indiens* autorise la bande à prendre des règlements administratifs pour la «conservation, la protection et la régie . . . du poisson . . . dans la réserve [«on the reserve»]». La question clé était par conséquent l'interprétation de l'expression «on the reserve». Le juge a statué, à la p. 146, que cette expression autorisait la bande à prendre des règlements administratifs à l'égard non seulement des pêcheries faisant géographiquement partie de la réserve, mais également des [TRADUCTION] «eaux qui ne font que toucher à la réserve». Comme la rivière Bulkley touchait à la réserve de Moricetown, le règlement administratif de la bande s'appliquait à la rivière et l'appellant pouvait l'invoquer comme moyen de défense à l'égard des accusations portées contre lui. Pour ce motif, le juge Smyth a acquitté l'appellant.

La Cour suprême de la Colombie-Britannique (1990), 51 B.C.L.R. (2d) 247

Le juge Millward a conclu que le juge Smyth avait mal interprété l'expression «on the reserve». Il a jugé que cette expression ne pouvait être inter-

read so as to include land outside the boundaries of the reserve. Since the bed of the Bulkley River is not a geographic part of the Moricetown Reserve he found that the by-law did not apply to it, and thus the appellant could not rely upon it.

Millward J. then examined the food fishing licensing regime as a whole and concluded that it constituted a *prima facie* infringement of the appellant's aboriginal right. He then turned to the question of whether this infringement could be justified. He noted that the licensing regime was enacted pursuant to the valid legislative objectives of conservation and management. He observed that because salmon are particularly vulnerable to overfishing, the management of the salmon fishery must be directed by an objective, central organization. He found that the conservation and management concerns justified the imposition of a licensing scheme on all fishers including aboriginals.

Turning to the specific licensing scheme in question, Millward J. considered whether it was rationally connected to the goals of conservation and management. He noted that licences are free, do not restrict the amount of fish which may be caught and impose only minimal conditions on the manner of catching the fish. However, he found that in 1986 the salmon stocks near Moricetown were healthy and there was no need for any conservation steps to be taken in that year.

The Department of Fisheries and Oceans argued that the licensing system was important because it allowed it to exert some control over the fishery if conservation measures were required in the future. Millward J. found the licensing scheme to be lacking in several aspects. First he pointed out that since aboriginal peoples must be given priority in the allocation of salmon, conservation measures should be directed first at other users, such as sport fishers. Second, using licences only to keep track of those who can fish achieves little, and simply provides the Department with the number of people that are fishing with a licence. Third, the licensing scheme does not aid in determining the

prétée comme visant des terres situées à l'extérieur des limites de la réserve. Puisque le lit de la rivière Bulkley ne fait pas géographiquement partie du territoire de la réserve de Moricetown, le règlement administratif ne s'y appliquait pas et ne pouvait donc être invoqué par l'appellant.

Le juge Millward a ensuite examiné l'ensemble du régime de délivrance de permis de pêche de subsistance et conclu que celui-ci constituait à première vue une atteinte au droit ancestral de l'appellant. Puis il s'est demandé si cette atteinte pouvait être justifiée. Il a souligné que ce régime avait été établi en conformité avec les objectifs législatifs réguliers de conservation et de gestion. Il a également fait remarquer que, comme le saumon est particulièrement vulnérable à la surpêche, la gestion de cette pêche doit relever d'une organisation centrale et objective. Il a conclu que les considérations de conservation et de gestion justifiaient l'imposition d'un régime de délivrance de permis à tous les pêcheurs, y compris aux autochtones.

Passant à l'examen du régime de délivrance de permis en cause, le juge Millward s'est demandé si celui-ci avait un lien rationnel avec les objectifs de conservation et de gestion. Il a signalé que les permis sont gratuits, qu'ils ne limitent pas le nombre de prises autorisées et qu'ils n'imposent que des conditions minimales quant aux méthodes de pêche. Cependant, il a conclu que, en 1986, les stocks de saumon près de Moricetown étaient abondants, de sorte qu'aucune mesure de conservation ne s'imposait cette année-là.

Le ministère des Pêches et des Océans a prétendu que le régime de délivrance de permis est important car il lui permet d'exercer une certaine surveillance sur les pêcheries, au cas où des mesures de conservation seraient nécessaires dans le futur. Le juge Millward a conclu que ce régime comportait des lacunes à plusieurs égards. Premièrement, a-t-il noté, puisque les peuples autochtones doivent se voir accorder la priorité dans la répartition du saumon, les mesures de conservation devraient d'abord viser d'autres utilisateurs, tels les pêcheurs sportifs. Deuxièmement, le fait d'utiliser uniquement les permis pour savoir qui peut pêcher ne donne pas grand-chose et ne renseigne le

harvest rates of the fishery since it does not specify how many fish may be caught. Moreover, several alternatives to licensing are available to ensure that fishers receive information about the fishery (i.e., newspaper announcements). In short, the licensing scheme could not be justified either on the basis that it was necessary for information gathering or on the basis that it was necessary for information dissemination.

British Columbia Court of Appeal (1993), 80 B.C.L.R. (2d) 245

Macfarlane J.A. (Taggart J.A. concurring)

Macfarlane J.A. began by observing that the appellant was not simply asserting an aboriginal right to fish for food. Rather, he was asserting an aboriginal right of self-regulation in relation to the salmon fishery. In his view, the existence of the right of self-regulation would be inconsistent with the judgment in *R. v. Sparrow*, [1990] 1 S.C.R. 1075, where it was recognized that the Crown could regulate aboriginal rights. Moreover, in *Sparrow* it was decided that not all regulations of an aboriginal right constituted *prima facie* infringement of that right. A regulation must constitute an unreasonable limitation or impose undue hardship in order for it to infringe an aboriginal right. Macfarlane J.A. concluded at p. 257:

... the requirement that an Indian hold a licence does not constitute a *prima facie* infringement of an aboriginal right. Licensing is a natural part of a centralized scheme to manage fisheries in order to ensure conservation and to achieve a proper allocation of the resource. It is a simple means of determining where and by whom fishing is done and it may provide data necessary to properly manage the resource. Licensing is reasonable and does not cause undue hardship. The licence is free, and available to all band members. It does not deny a

ministère que sur le nombre de personnes qui pêchent munies d'un permis. Troisièmement, le régime de délivrance de permis ne permet pas de déterminer l'ampleur de la récolte dans la pêche, puisqu'il ne précise pas le nombre de poissons pouvant être pris. En outre, plusieurs autres moyens que la délivrance de permis pourraient être utilisés pour assurer la diffusion aux pêcheurs de renseignements sur la pêche (p. ex. des annonces dans les journaux). Bref, le régime de délivrance de permis n'a pu être justifié par le fait qu'il était nécessaire soit pour recueillir de l'information, soit pour en communiquer.

La Cour d'appel de la Colombie-Britannique (1993), 80 B.C.L.R. (2d) 245

Le juge Macfarlane (aux motifs duquel le juge Taggart a souscrit)

Le juge Macfarlane de la Cour d'appel a d'abord signalé que l'appelant ne revendiquait pas simplement un droit ancestral de pêcher à des fins de subsistance, mais plutôt un droit ancestral d'autoréglementation en ce qui concerne la pêche au saumon. De l'avis du juge, l'existence de ce droit d'autoréglementation serait incompatible avec l'arrêt *R. c. Sparrow*, [1990] 1 R.C.S. 1075, où il a été reconnu que la Couronne pouvait réglementer des droits ancestraux. En outre, dans *Sparrow*, il a été décidé que les mesures de réglementation d'un droit ancestral ne constituent pas toutes à première vue une atteinte à ce droit. La réglementation doit imposer une restriction déraisonnable ou être indûment rigoureuse pour porter atteinte à un tel droit. Voici ce qu'a conclu le juge Macfarlane à cet égard, à la p. 257:

[TRADUCTION] ... l'obligation faite aux Indiens de détenir un permis ne constitue pas à première vue une atteinte à un droit ancestral. La délivrance de permis est un élément naturel d'un régime centralisé de gestion des pêcheries visant à assurer la conservation de la ressource et à la répartir adéquatement. Il s'agit d'un moyen simple de déterminer où la pêche est pratiquée et par qui, et d'un moyen susceptible de fournir des données nécessaires à la gestion judicieuse de la ressource. La délivrance de permis est une mesure raisonnable, qui n'est pas indûment rigoureuse. Le permis est gratuit et tous les membres de la bande peuvent en obtenir un.

right to fish; it is a small part of the regulation of fishing.

Macfarlane J.A. then considered whether the actual terms of the licence constituted a *prima facie* infringement of the aboriginal right. Although the licence limited fishing activities, Macfarlane J.A. could not characterize these limitations as unreasonable or unduly harsh. Had the appellant obtained a licence, he could have done exactly what he was doing when charged. In the circumstances, there was no *prima facie* infringement.

Macfarlane J.A. then rejected the appellant's argument that the band's by-law afforded him a defence. He found that the by-law had no application outside of the reserve and that the river was outside of the reserve. The appellant could not rely on the principle of *ad medium filum aquae* since in Macfarlane J.A.'s view, the Crown never intended to include the bed of the Bulkley River in the reserve allotted to the Moricetown Band. He found this was demonstrated by the acreage of the allotment and by the firm and consistent rejection by the province and Canada of native claims to foreshore rights.

Finally, the creation of the Moricetown Reserve did not involve a conveyance of land, nor did it result in title's being vested in the band. Therefore, a common law property concept which depends on ownership, such as *ad medium filum aquae*, has no relevance with respect to reserves.

Wallace J.A. (concurring in the result)

In Wallace J.A.'s view, the imposition of a licensing requirement is not, *per se*, an infringement of aboriginal fishing rights. The federal government has the constitutional power to regulate fisheries, and the elders of the Moricetown Band do not have an aboriginal right to excuse band members from complying with federal laws and

La délivrance de permis ne nie pas le droit de pêcher; elle n'est qu'une petite partie de la réglementation de la pêche.

Le juge Macfarlane s'est ensuite demandé si les conditions mêmes du permis constituaient à première vue une atteinte au droit ancestral. Même si le permis limitait les activités de pêche, le juge Macfarlane n'a pu qualifier ces restrictions de déraisonnables ou d'indûment rigoureuses. Si l'appelant s'était procuré un permis, il aurait pu faire exactement ce qu'il faisait au moment de l'infraction. Dans ces circonstances, il n'y avait à première vue aucune atteinte.

Le juge Macfarlane a ensuite écarté l'argument de l'appelant que le règlement administratif de la bande offrait à ce dernier un moyen de défense. Il a conclu que le règlement administratif ne s'appliquait pas à l'extérieur de la réserve et que la rivière se trouvait à l'extérieur de celle-ci. L'appelant ne pouvait invoquer le principe *ad medium filum aquae* (jusqu'au milieu du cours d'eau) puisque, de l'avis du juge Macfarlane, la Couronne n'avait jamais eu l'intention d'inclure le lit de la rivière Bulkley dans la réserve attribuée à la bande de Moricetown. Il a conclu que ce fait était établi par la superficie accordée et par le refus constant et catégorique opposé par la province et le Canada aux revendications des autochtones relativement aux droits sur l'estran.

Enfin, la création de la réserve de Moricetown n'a donné lieu ni à une cession de terres, ni à la dévolution d'un titre à la bande. Par conséquent, un concept du droit des biens en common law tel le principe *ad medium filum aquae*, qui dépend du droit de propriété, n'a aucune pertinence en ce qui concerne les réserves.

Le juge Wallace (qui a souscrit au résultat)

De l'avis du juge Wallace, l'imposition de l'obligation de détenir un permis n'est pas en soi une atteinte aux droits de pêche ancestraux. La Constitution autorise le gouvernement fédéral à réglementer les pêcheries, et les anciens de la bande de Moricetown ne possèdent pas de droit ancestral leur permettant de dispenser les membres

17

regulations respecting fisheries. Wallace J.A. stated that he found himself in agreement with Macfarlane J.A.'s conclusion that licensing *per se* did not constitute a *prima facie* infringement of the right to fish for food, nor did the conditions of this particular licence.

de la bande de se conformer aux lois et règlements du gouvernement fédéral concernant les pêches. Le juge Wallace a déclaré qu'il était d'accord avec la conclusion du juge Macfarlane que la délivrance de permis ne constituait pas en soi une atteinte à première vue au droit de pêcher à des fins de subsistance, pas plus que ne l'étaient les conditions dont était assorti le permis en cause.

18 Wallace J.A. then went on to reject the application of the *ad medium filum aquae* principle on the basis that the Bulkley River is navigable and that the principle has no application to navigable rivers. He found that the proper test for the navigability of a river requires a consideration of the river in its entirety.

Le juge Wallace a ensuite écarté l'application du principe *ad medium filum aquae* pour le motif que la rivière Bulkley est une rivière navigable et que ce principe ne s'applique pas à de telles rivières. Il a conclu que, en vertu du critère applicable pour déterminer la navigabilité d'une rivière, il faut considérer celle-ci dans son ensemble.

Lambert J.A. (dissenting)

Le juge Lambert (dissident)

19 Lambert J.A. began his reasons by dealing with the band's by-law. He found that the Bulkley River was not within the geographic boundaries of the Moricetown Reserve, was therefore not "on the reserve", and *ad medium filum aquae* could not be used to extend the reserve boundaries to include the river. As a result, a defence based on the application of the band's by-law could not succeed.

Dans ses motifs, le juge Lambert a d'abord analysé le règlement administratif de la bande. Il a conclu que la rivière Bulkley ne se trouvait pas dans les limites géographiques de la réserve de Moricetown, qu'elle ne se trouvait donc pas «on the reserve» et qu'on ne pouvait invoquer le principe *ad medium filum aquae* pour élargir les limites de la réserve de façon à inclure la rivière dans celle-ci. En conséquence, le moyen de défense fondé sur l'application du règlement administratif de la bande ne pouvait être accueilli.

20 He did, however, state that while the river was not within the reserve, the Moricetown Band nevertheless has an aboriginal title to the exclusive possession, use and enjoyment of the reserve land and to the Bulkley River fishery. Lambert J.A., relying on his reasons in *Delgamuukw v. British Columbia*, [1993] 5 W.W.R. 97 (B.C.C.A.), found that the band had the right of self-government and self-regulation in relation to this fishery, but that this was an internal right and did not extend beyond the bounds of the reserve.

Il a toutefois déclaré que, même si la rivière ne se trouvait pas à l'intérieur de la réserve, la bande de Moricetown avait néanmoins un titre ancestral lui conférant la possession, l'utilisation et la jouissance exclusives des terres de la réserve et de la pêcherie dans la rivière Bulkley. S'appuyant sur les motifs qu'il avait prononcés dans *Delgamuukw c. British Columbia*, [1993] 5 W.W.R. 97 (C.A.C.-B), le juge Lambert a conclu que, à l'égard de cette pêcherie, la bande avait un droit fondé sur l'autonomie gouvernementale et l'auto-réglementation, mais qu'il s'agissait d'un droit interne, qui ne s'étendait pas au-delà des limites de la réserve.

21 Lambert J.A. then considered whether the food fishing licensing requirement infringed the appellant's aboriginal right, and if so, whether it could

Le juge Lambert s'est ensuite demandé si l'obligation d'obtenir un permis de pêche de subsistance portait atteinte au droit ancestral de l'accusé, et,

be justified pursuant to the *Sparrow* test. He observed that the appellant was asserting an aboriginal right to fish which was not dependent on holding a licence. He found that licensing was an external imposition on the right. In his view, it was a *prima facie* interference with the appellant's fishing rights to require as a precondition to the exercise of these rights that he fill out forms, answer questions, and wait until a licence was granted.

On the question of justification, Lambert J.A. recognized the importance of having a single, central organization to coordinate the conservation and management of fish resources. The scheme administered by such an organization might well require licensing to ensure reporting and to enforce catch limitations. However, in 1986 the federal government did not recognize aboriginal fishing rights other than that related to food. There was no recognition of the right to sell salmon nor of the rights of self-regulation and self-government. In that context, the licensing system as it operated in 1986 was not consistent with the true rights of the Moricetown Band. Regardless of the objectives of the scheme, the manner of putting it into effect and carrying it out without the cooperation of the Moricetown Band was contrary to the principles set out in *Sparrow*, *supra*. Lambert J.A. added that the requirement of holding a licence is not justified by conservation goals.

Hutcheon J.A. (dissenting)

Hutcheon J.A. observed that the conditions of the food fishing licences are not at issue in this case. The real issue is whether the requirement of a licence infringed the appellant's aboriginal right to fish. In Hutcheon J.A.'s view, it was implicit in *Sparrow* that a licensing requirement is not, *per se*, a violation of aboriginal fishing rights. *Sparrow* is, therefore, authority for the proposition that a licensing regime is within the legislative power of

dans l'affirmative, si cette atteinte pouvait être justifiée conformément au critère formulé dans l'arrêt *Sparrow*. Il a rappelé que l'appellant revendiquait un droit de pêche ancestral qui ne dépendait pas de l'obtention d'un permis. L'obtention d'un permis, a-t-il conclu, était une obligation imposée de l'extérieur en vue de l'exercice de ce droit. À son avis, le fait d'exiger de l'appellant, comme préalable à l'exercice de ses droits de pêche, qu'il remplisse des formulaires, réponde à des questions et attende qu'on lui délivre un permis constituait à première vue une atteinte à ces droits.

Relativement à la question de la justification, le juge Lambert a reconnu qu'il est important que les activités de conservation et de gestion des ressources halieutiques soient coordonnées par une organisation centrale unique. Le régime administré par une telle organisation pourrait fort bien exiger l'obtention de permis afin d'assurer la déclaration des prises et le respect des limites applicables à cet égard. Cependant, en 1986, le gouvernement fédéral n'a pas reconnu d'autres droits de pêche ancestraux que ceux liés à la pêche de subsistance. Il n'a reconnu ni le droit de vendre du saumon, ni les droits d'autoréglementation et d'autonomie gouvernementale. Dans ce contexte, le régime de délivrance de permis appliqué en 1986 n'était pas compatible avec les droits véritables de la bande de Moricetown. Indépendamment des objectifs du régime, la manière dont il était mis en œuvre et appliqué, sans la coopération de la bande de Moricetown, était contraire aux principes énoncés dans l'arrêt *Sparrow*, précité. Le juge Lambert a ajouté que l'obligation de détenir un permis n'était pas justifiée par des objectifs de conservation.

Le juge Hutcheon (dissident)

Le juge Hutcheon a rappelé que les conditions prévues par les permis de pêche de subsistance ne sont pas en litige en l'espèce. La véritable question est de savoir si l'obligation de détenir un permis portait atteinte au droit de pêche ancestral de l'appellant. De l'avis du juge Hutcheon, il découlait implicitement de l'arrêt *Sparrow* que cette obligation ne viole pas en soi les droits de pêche ancestraux. L'arrêt *Sparrow* étaye donc la thèse que

the federal government and is not itself an infringement of the aboriginal right to fish.

l'établissement d'un régime de permis relève du pouvoir de légiférer du gouvernement fédéral et ne constitue pas en soi une atteinte au droit de pêche ancestral.

24

On the issue of the band's fishing by-law, Hutcheon J.A. agreed with Millward J. that the *Indian Act* only authorizes fishing by-laws related to waterways within the geographic boundaries of a reserve. Thus, the question is whether the Bulkley River is within the Moricetown reserve. He held that in this case, the principle of *ad medium filum aquae* created a presumption that the Bulkley River was within the reserve because it is non-tidal and non-navigable. This presumption was not rebutted, and the appellant could rely on the by-law as a defence.

Quant au règlement administratif de pêche de la bande, le juge Hutcheon a dit être d'accord avec le juge Millward que la *Loi sur les Indiens* autorise seulement la prise de règlements administratifs de pêche visant les eaux qui se trouvent à l'intérieur des limites géographiques des réserves. Ainsi, la question est de savoir si la rivière Bulkley se trouve à l'intérieur de la réserve de Moricetown. Il a conclu que, en l'espèce, le principe *ad medium filum aquae* faisait naître la présomption que la rivière Bulkley se trouve à l'intérieur de la réserve, puisqu'elle est un cours d'eau sans marée et non navigable. Cette présomption n'ayant pas été réfutée, l'appelant pouvait invoquer le règlement administratif comme moyen de défense.

Analysis

Analyse

25

In order to determine whether the band by-law applies to the Bulkley River, it will be necessary to consider and resolve a number of questions. At the outset it must be emphasized that a consideration of the by-law raises the question of whether an exclusive right to fish in the Bulkley River at Moricetown was granted to the band. This is very different and distinct from the aboriginal right to fish for food and ceremonial purposes which is given constitutional recognition and protection by s. 35 of the *Constitution Act, 1982*. Obviously if an exclusive right to fish was granted to the band, the by-law would be valid and applicable to the Bulkley River in its passage through the reserve.

Pour déterminer si le règlement administratif de la bande s'applique à la rivière Bulkley, il sera nécessaire d'examiner et de trancher un certain nombre de questions. D'entrée de jeu, il convient de souligner que l'examen du règlement administratif soulève la question de savoir si un droit exclusif de pêcher dans la rivière Bulkley, à la hauteur de Moricetown, a été accordé à la bande. Il s'agit d'un droit très différent du droit ancestral de pêcher à des fins alimentaires et rituelles, qui est constitutionnellement reconnu et protégé par l'art. 35 de la *Loi constitutionnelle de 1982*. Il va de soi que si un droit de pêche exclusif avait été accordé à la bande, le règlement administratif serait valide et s'appliquerait à la rivière Bulkley, à l'endroit où elle traverse la réserve.

26

At the outset I would confirm that I have read and relied upon some of the historical documents filed by the intervener Canadian National Railway Company. The appellant objected to any use being made of these documents. I cannot accept that position. First, all parties have had an opportunity to review the documents and make submissions pertaining to them. Further these are all documents of a historical nature that can be found in the public archives. They are available for use by all mem-

Avant tout, je tiens à confirmer que j'ai lu certains des documents historiques déposés par l'intervenante, la Compagnie des chemins de fer nationaux du Canada, et que je me suis fondé sur eux. L'appelant s'est opposé à toute utilisation de ces documents. Je ne peux accepter cette position. D'une part, toutes les parties ont eu l'occasion d'examiner ces documents et de présenter des observations à leur égard. D'autre part, comme ce sont tous des documents de nature historique figu-

bers of the public. Lamer J. (as he then was) spoke of such documents in clear and convincing tones in *R. v. Sioui*, [1990] 1 S.C.R. 1025. He wrote at p. 1050:

I am of the view that all the documents to which I will refer, whether my attention was drawn to them by the intervenor or as a result of my personal research, are documents of a historical nature which I am entitled to rely on pursuant to the concept of judicial knowledge.

Did the Crown Intend to Include the Fishery in the Allotment of Moricetown Indian Reserve No.1 to the Wet'suwet'en Band?

The General Policy of the Crown

In this case much has been said as to the general practice of the Crown in allocating reserves to native peoples. Evidence as to a general practice may be particularly helpful in determining the scope or extent of native rights. The relevant evidence is sometimes lost and that which remains must be carefully placed in context so that its true significance is neither distorted nor lost.

The historical evidence as to the standard practice of the Crown can be conveniently divided into pre- and post-Confederation periods. This evidence, taken from documents in the public archives, demonstrates that in both periods there was a clear and specific Crown policy of refusing to grant, in perpetuity, exclusive rights to fishing grounds. The Crown would, however, grant exclusive licences or leases over particular areas for a fixed period of time. Obviously this practice was far from an absolute assignment of a fishery right.

Pre-Confederation

There are numerous examples of statements by the Crown, both in British Columbia and in the

rant dans les archives publiques, toute personne peut les consulter. Dans *R. c. Sioui*, [1990] 1 R.C.S. 1025, le juge Lamer (maintenant juge en chef) s'est exprimé en termes clairs et convaincants au sujet des documents de cette nature. À la page 1050, il a écrit ceci:

Je considère que tous les documents auxquels je ferai référence, que mon attention y ait été attirée par l'intervenante ou à la suite de mes recherches personnelles, sont des documents de nature historique sur lesquels je suis autorisé à me fonder en vertu de la notion de connaissance judiciaire.

La Couronne avait-elle l'intention d'inclure la pêcherie dans la réserve indienne n° 1 de Moricetown lorsqu'elle a attribué celle-ci à la bande Wet'suwet'en?

La politique générale de la Couronne

Dans la présente affaire, la pratique générale de la Couronne en ce qui concerne l'attribution des réserves aux peuples autochtones a été discutée en long et en large. La preuve concernant cette pratique peut s'avérer particulièrement utile pour apprécier la portée ou l'étendue des droits des autochtones. La preuve directement pertinente est parfois perdue, auquel cas celle qui reste doit être prudemment mise en contexte afin que son sens véritable ne soit ni dénaturé, ni perdu.

Il est commode de scinder la preuve historique relative à la pratique ordinaire de la Couronne en deux périodes: la période préconfédérative et la période postconfédérative. Cette preuve, tirée de documents figurant dans les archives publiques, démontre qu'au cours de ces deux périodes la Couronne a toujours eu pour politique claire et précise de refuser d'accorder à perpétuité des droits exclusifs sur des secteurs de pêche. Cependant, elle accordait, à l'égard de secteurs donnés, des licences ou des baux exclusifs pour des périodes déterminées. Il va de soi que cette pratique était loin de constituer une cession à titre absolu d'un droit sur une pêcherie.

Période préconfédérative

Il existe de nombreux cas où, tant en Colombie-Britannique que dans la province du Canada, la

Province of Canada, that the firm policy of the Crown was to treat Indians in the same manner as non-Indians with respect to the allocation of fishing grounds for commercial use. There are also clear statements that this policy involved a rejection of claims to exclusive use or control of any public waters for the purposes of fishing. An example is the statement of Governor Douglas, made in 1860 during a major address concerning the Indians on the mainland of British Columbia. He stated:

I also explained to them that the magistrates had instructions to stake out, and reserve for their use and benefit, all their occupied village sites and cultivated fields and as much land in the vicinity of each as they could till, or was required for their support; and that they might freely exercise and enjoy the rights of fishing the lakes and rivers, and of hunting over all unoccupied Crown lands in the colony; and that on their becoming registered free miners they might dig and search for gold, and hold mining claims on the same terms precisely as other miners: in short, I strove to make them conscious that they were recognized members of the commonwealth. . . . [Emphasis by underlining added.]

(Dispatch of Governor Douglas to the Secretary of State for the Colonies, cited in *Delgamuukw v. British Columbia*, [1991] 3 W.W.R. 97, at p. 255. (Italics added by McEachern C.J.))

An even earlier example of the same concept is expressed in a letter dated April 16, 1845 from W. H. Draper, Attorney General, Province of Canada to J. M. Higginson, Superintendent General of Indian Affairs, Province of Canada. The Attorney General wrote:

Sir

In reply to your reference of the 10th February last calling for my opinion whether a fishery in the waters of Lake Huron around and adjacent to certain islands which are within the British territory, but have not been formally ceded to the Crown by the Indians, is to be considered the property of the Crown or of these

Couronne a déclaré qu'elle avait pour politique bien arrêtée de traiter de la même manière les Indiens et les non-Indiens en ce qui concerne l'attribution de secteurs de pêche à des fins commerciales. On trouve également des déclarations indiquant clairement que cette politique impliquait le rejet des revendications visant l'exclusivité de l'utilisation ou du contrôle de toute étendue d'eaux publiques à des fins de pêche. Les propos suivants, tenus par le gouverneur Douglas, en 1860, au cours d'une importante allocution concernant les Indiens de la partie continentale de la Colombie Britannique, sont un exemple d'une telle déclaration:

[TRADUCTION] *Je leur ai aussi expliqué que les magis-
trats avaient reçu comme instructions de jalonner et de
réserver à l'usage et au profit des Indiens tous les vil-
lages qu'ils habitaient et les champs qu'ils cultivaient,
ainsi que toutes les terres qu'ils étaient en mesure de
cultiver ou qui étaient nécessaires pour assurer leur
subsistance; je les ai aussi informés qu'ils pouvaient
exercer librement leur droit de pêcher dans les lacs et
les rivières, et celui de chasser dans toutes les terres
inoccupées de la Couronne dans la colonie; et qu'ils
pouvaient, une fois devenus mineurs autorisés inscrits,
prospecter pour chercher de l'or et détenir des claims
miniers exactement aux mêmes conditions que les autres
mineurs. Bref, je me suis efforcé de leur faire prendre
conscience du fait qu'ils étaient reconnus comme des
membres du commonwealth. . . .* [Je souligne.]

(Dépêche du gouverneur Douglas au Secrétaire d'État aux colonies, citée dans *Delgamuukw c. British Columbia*, [1991] 3 W.W.R. 97, à la p. 255. (Italiques ajoutées par le juge en chef McEachern.))

On trouve une expression encore plus ancienne du même concept dans une lettre datée du 16 avril 1845, que W. H. Draper, procureur général de la province du Canada, a transmise à J. M. Higginson, surintendant général des Affaires indiennes, province du Canada. Le procureur général a écrit ceci:

[TRADUCTION] Monsieur,

En réponse à votre envoi du 10 février dernier, dans lequel vous me demandiez si une pêcherie se trouvant dans les eaux du lac Huron et adjacente à certaines îles faisant partie du territoire britannique, mais qui n'ont pas été officiellement cédées à la Couronne par les Indiens, doit être considérée comme appartenant à la

1996 CanLII 2439 (SCC)

Indians, I have the honor to report my opinion, that the right to fish in public navigable waters in Her Majesty's dominions is a common public right — not a regal franchise — and I do not understand any claim the Indians can have to its exclusive enjoyment. [Emphasis added.]

(National Archives of Canada, Record Group 10, Volume 612, p. 215.)

These two passages indicate that the intention and policy of the Crown was to guarantee full public access to the fisheries, and to reject any exclusive claims to fishing grounds. The policy permitted the Indians to exercise their right to fish but did not accord them any special status.

In England, it has been accepted that since the *Magna Carta*, the Crown has no power apart from statute to grant a several or exclusive fishery to anyone. See Gérard V. La Forest, *Water Law in Canada — The Atlantic Provinces* (1973), at p. 196. Thus in refusing to grant an exclusive fishery to the Indians, the federal government was following historical precedent.

An examination of the early Fisheries Acts of the Province of Canada and the first *Fisheries Act* of the new Dominion, the *Fisheries Act*, S.C. 1868, c. 60, confirms this same policy of exercising only limited powers. The Act gave the government the right to grant exclusive leases and licences to fishing grounds, but there was no provision in the Act for the permanent alienation of fishing rights to private parties.

This pre-Confederation policy is also set out in the 1866 opinion of James Cockburn, Solicitor General of the Province of Canada. He stated:

With reference . . . to the claim of the Indians to exclusive fishing rights, my opinion is that they have no other or larger rights over the public waters of this Province than those which belong at Common Law to Her Majesty's subjects in general.

Couronne ou aux Indiens. J'ai le plaisir de vous informer que, à mon avis, le droit de pêche dans les eaux publiques navigables dans les dominions de Sa Majesté est un droit public général et non une franchise royale, et je ne vois pas comment les Indiens peuvent en revendiquer la jouissance exclusive. [Je souligne.]

(Archives nationales du Canada, Fonds d'archives fédérales 10, volume 612, p. 215.)

Ces deux passages indiquent que l'intention et la politique de la Couronne étaient d'assurer à la population le libre accès aux pêcheries et de rejeter toute revendication de l'exclusivité des secteurs de pêche. Cette politique permettait aux Indiens d'exercer leur droit de pêche, mais elle ne leur accordait aucun statut particulier.

En Angleterre, il est admis que, depuis la *Magna Carta*, la Couronne n'a pas le pouvoir, sauf celui prévu par un texte de loi, d'accorder à quiconque une pêcherie individuelle ou exclusive. Voir Gérard V. La Forest, *Water Law in Canada — The Atlantic Provinces* (1973), à la p. 196. Par conséquent, en refusant d'accorder aux Indiens une pêcherie exclusive, le gouvernement fédéral suivait un précédent historique.

La lecture des premières lois sur les pêcheries de la province du Canada et de la première loi en la matière du nouveau dominion, l'*Acte des Pêcheries*, S.C. 1868, ch. 60, confirme cette politique qui consistait à n'exercer que des pouvoirs limités. L'Acte habilitait le gouvernement à accorder des licences et des baux exclusifs visant des secteurs de pêche, mais aucune de ses dispositions ne pourvoyait à l'aliénation permanente de droits de pêche à des intérêts privés.

Cette politique préconfédérative est également exposée dans l'avis donné en 1866 par James Cockburn, solliciteur général de la province du Canada:

[TRADUCTION] En ce qui concerne . . . la revendication par les Indiens de droits de pêche exclusifs, je suis d'avis qu'ils n'ont, sur les eaux publiques de la province, ni droits supplémentaires ni droits plus étendus que ceux qui appartiennent en common law aux sujets de Sa Majesté en général.

... I should say that without an Act of Parliament ratifying such reservation, no exclusive right could thereby be gained by the Indians, as the Crown could not by any Treaty or act of its own (previous to the recent Statute) grant an exclusive privilege in favour of Individuals over public rights, such as this, in respect of which the Crown only holds as trustee for the general public.

(Memorandum *in re* 23 January, 1866 memorandum of W. F. Whitcher (Head of Fisheries Branch, Department of Crown Lands, Province of Canada), 8 March, 1866 in File No. 4/1866, Department of Justice, Ottawa, Ontario.)

Post-Confederation

The policy of refusing to grant exclusive fisheries was maintained in the post-Confederation period. It is clear that the same understanding of the policy which existed in the Provinces of Canada and British Columbia before Confederation continued subsequently. For example, on December 17, 1875, W. F. Whitcher, Dominion Commissioner of Fisheries, sent a Department of Marine and Fisheries Circular to Fishery Overseers which stated, in part that:

Certain circumstances ... render it desirable to direct your attention to the exact legal status of Indians in respect of the Fishery Laws.

Fisheries in all the public navigable waters of Canada belong *prima facie* to the public, and are administered by the Crown under Act of Parliament. ... Indians enjoy no special liberty as regards either the places, times, or methods of fishing. They are entitled only to the same freedom as whitemen, and are subject to precisely the same laws and regulations.

There seems to be an impression in some quarters, that exclusive control of fishings in connection with Indian properties belongs to the resident Indians, and that they are at liberty to remove the fishing gear of

... je tiens à préciser que, sans une loi fédérale ratifiant une telle réservation de droits, aucun droit exclusif ne pouvait être acquis ainsi par les Indiens, car la Couronne ne pouvait, que ce soit par traité ou de son propre chef (avant l'adoption de la récente loi) accorder à des individus un privilège exclusif sur des droits publics, comme celui dont il est question en l'espèce, qu'elle ne détient qu'à titre de fiduciaire pour le grand public.

(Note de service concernant celle datée du 23 janvier 1866 émanant de W. F. Whitcher (chef de la direction des pêcheries, ministère des Terres de la Couronne, province du Canada), 8 mars 1866, dossier n° 4/1866, ministère de la Justice, Ottawa (Ontario).)

Période postconfédérative

La politique de refus d'accorder des pêcheries exclusives a continué d'être appliquée au cours de la période postconfédérative. Il est manifeste que la conception que l'on avait de la politique en vigueur dans la province du Canada et celle de la Colombie-Britannique avant la Confédération est demeurée la même par la suite. Ainsi, le 17 décembre 1875, W. F. Whitcher, commissaire fédéral des pêcheries, a fait parvenir aux superviseurs des pêcheries une circulaire du ministère de la Marine et des Pêcheries, dans laquelle on pouvait lire notamment ce qui suit:

[TRADUCTION] En raison de certaines circonstances [...] il est souhaitable d'attirer votre attention sur le statut juridique exact des Indiens à l'égard des lois sur les pêcheries.

Les pêcheries dans toutes les eaux publiques navigables au Canada appartiennent, jusqu'à preuve du contraire, au public, et elles sont administrées par la Couronne en vertu d'une loi fédérale [...] Les Indiens ne bénéficient d'aucune liberté spéciale quant aux lieux où ils peuvent pêcher, aux périodes au cours desquelles ils peuvent le faire et aux méthodes qu'ils peuvent utiliser. Ils jouissent uniquement des mêmes libertés que les Blancs et ils sont assujettis exactement aux mêmes lois et règlements.

Dans certains milieux, on semble avoir l'impression que, pour ce qui concerne les biens-fonds des Indiens, le contrôle des pêcheries appartient exclusivement aux Indiens qui habitent ces biens-fonds, et que ces derniers

Whitemen who resort to these fisheries under leases or licences granted by the Crown.

This impression is alike erroneous, mischievous and unfortunate. No such exceptional power exists. . . .

(National Archives of Canada, Record Group 10, Volume 1972, File No. 5530.)

It should be noted that this circular properly refers to the "administration", that is to say, the regulation by the Government of Canada of fisheries in navigable waters. The Bulkley River is a navigable waterway both above and below the Moricetown Reserve and, for the reasons which appear later, is therefore to be considered navigable at the Reserve.

The letter of W. F. Whitcher, Dominion Commissioner of Fisheries to E. A. Meredith, Deputy Minister of the Interior, of January 20, 1876, indicates that the situation in British Columbia was very much a concern of Federal officials. He wrote:

Having submitted to the Minister the text of the correspondence which has taken place on the subject of fishing rights claimed by Indians. . . I am desired by him to acknowledge the prompt attention bestowed on this matter by the Department of the Interior, and the satisfactory settlement effected. This difficulty, thus fortunately concluded, was such as might at any moment have become extremely troublesome. It was more necessary therefore to deal with it decisively at its present stage, rather than to delay until its existence should produce further misapprehensions affecting these public properties, particularly in the younger provinces of the Dominion, inhabited largely by Indians and half-breeds, where the Government may be soon called upon to apply the fishery laws.

. . . it is believed that the cordial co-operation of the Departments in respect of the fishing privileges which exist in the vicinity of Indian Reserves, and the occupation of fishing stations connected therewith, under a uniform system of licence, will ensure to the Indians free and exclusive use of fishery grounds ample for their necessities. . . . [Emphasis added.]

sont libres d'enlever les engins de pêche des Blancs qui utilisent ces pêcheries en vertu de baux ou licences accordés par la Couronne.

Cette impression est à la fois erronée, malveillante et malheureuse. Un tel pouvoir extraordinaire n'existe pas. . . .

(Archives nationales du Canada, Fonds d'archives fédérales 10, volume 1972, n° de dossier 5530.)

Il y a lieu de signaler que cette circulaire parle à juste titre de l'«administration» des pêcheries, en d'autres termes de la réglementation par le gouvernement canadien des pêcheries dans les eaux navigables. La rivière Bulkley est une voie navigable en amont et en aval de la réserve de Moricetown et, pour les motifs prononcés plus loin, elle doit donc être considérée comme étant navigable à la hauteur de la réserve.

La lettre adressée par W. F. Whitcher, commissaire fédéral des pêcheries, à E. A. Meredith, sous-ministre de l'Intérieur, le 20 janvier 1876, indique que la situation en Colombie-Britannique préoccupait grandement les représentants fédéraux. Il a écrit ceci:

[TRADUCTION] Le ministre a pris connaissance de la correspondance concernant les droits de pêche revendiqués par les Indiens [. . .] et me prie de vous faire part de la diligence accordée à cette question par le ministère de l'Intérieur, ainsi que du règlement satisfaisant qui a été conclu. Ce problème, heureusement réglé, aurait pu devenir extrêmement embarrassant. Il était plus que nécessaire de le régler d'une façon décisive dès maintenant, plutôt que d'attendre qu'il engendre d'autres malentendus au sujet de ces biens publics, notamment dans les nouvelles provinces du Dominion, qui sont habitées surtout par des Indiens et des Métis et où le gouvernement pourrait bien devoir appliquer sous peu les lois régissant les pêcheries.

. . . on estime qu'une coopération cordiale entre les ministères relativement aux privileges de pêche à proximité des réserves indiennes, ainsi que l'occupation des postes de pêche reliés à l'exercice de ces privilèges, le tout dans le cadre d'un régime uniforme de délivrance de licences, assureront aux Indiens l'usage libre et exclusif des pêcheries, et permettront de répondre amplement à leurs besoins . . . [Je souligne.]

(National Archives of Canada, Record Group 10, Volume 1972, File No. 5530.)

(Archives nationales du Canada, Fonds d'archives fédérales 10, volume 1972, n° de dossier 5530.)

37

The younger provinces of the Dominion referred to were obviously the provinces of British Columbia, Manitoba, and Prince Edward Island, to which the *Fisheries Act* would be extended only a few months later: *An Act respecting the extension and application of "The Fisheries Act," to and in the Provinces of British Columbia, Prince Edward Island and Manitoba*, S.C. 1874, c. 28. Accordingly, when Reserve Commissioners were appointed a few months later with the mandate to allocate reserves in British Columbia, they were certainly not either specifically authorized or by inference empowered to grant exclusive rights in the fishery.

Les nouvelles provinces du Dominion dont il est question sont de toute évidence la Colombie-Britannique, le Manitoba et l'Île-du-Prince-Édouard, auxquelles serait élargie l'application de l'Acte des Pêcheries quelques mois plus tard à peine: *Acte concernant l'extension et l'application de «l'Acte des Pêcheries» aux provinces de la Colombie-Britannique, de l'Île-du-Prince-Édouard et de Manitoba*, S.C. 1874, ch. 28. Par conséquent, lorsque des commissaires des réserves ont, quelques mois plus tard, été nommés et chargés d'attribuer des réserves en Colombie-Britannique, ils n'étaient certainement pas autorisés, ni explicitement ni implicitement, à accorder des droits exclusifs sur les pêcheries.

The Mandate of the Reserve Commissioners

Le mandat des commissaires des réserves

38

The appellant contended that the Reserve Commissioners, as representatives of the Crown, were given the authority to bind the Crown, and to assign fishing rights irrevocably and absolutely. This position is contrary to both the general policy statements made by the Crown and the specific instructions provided to Commissioners. In a letter from D. C. Scott, Deputy Superintendent General of Indian Affairs, to D. H. MacDowall, Commissioner, Royal Commission on Indian Affairs for the Province of British Columbia, dated May 2, 1916, it was stated:

L'appelant a fait valoir que, en tant que représentants de la Couronne, les commissaires des réserves étaient habilités à lier celle-ci et à céder des droits de pêche de manière irrévocable et absolue. Cette thèse est contraire tant aux énoncés de politique générale de la Couronne qu'aux instructions précises données aux commissaires. Dans une lettre datée du 2 mai 1916 et transmise à D. H. MacDowall, commissaire, Commission royale sur les Affaires indiennes pour la province de la Colombie-Britannique, D. C. Scott, surintendant général adjoint des Affaires indiennes, a écrit ceci:

... I do not think that former Commissioners could grant special fishing privileges as distinct from fishing stations and reserves. The Department has no record of confirmation of such by the Department of Marine and Fisheries.

[TRADUCTION] ... je ne crois pas que les anciens commissaires pouvaient accorder des privilèges de pêche particuliers outre ceux relatifs aux postes de pêche et aux réserves. Le ministère n'a dans ses dossiers aucune confirmation de l'attribution de tels privilèges par le ministère de la Marine et des Pêcheries.

... I cannot find that Mr. O'Reilly had power to grant any fishing privileges whatever.

... il est impossible de conclure que M. O'Reilly avait le pouvoir d'accorder quelque privilège de pêche que ce soit.

(National Archives of Canada, Record Group 10, Volume 3822, File No. 59335-1.)

(Archives nationales du Canada, Fonds d'archives fédérales 10, volume 3822, n° de dossier 59335-1.)

Earlier statements confirm this view. For example, in 1890, Robert Sedgewick, Deputy Minister of Justice stated:

I have examined all the papers in connection with the matter. The Indian Reserve Commissioner appears to have power to mark out reserves, but it does not appear that the Governor in Council, or any other authority ever gave or purported to give him authority to deal with the right of fishery.

I have therefore to state that the Indian Reserve Commissioner has not the power to set apart for the exclusive use of the Indians any of the waters of British Columbia.

(R. Sedgewick, Deputy Minister of Justice, to John Tilton, Deputy Minister of Fisheries, August 15, 1890 in National Archives of Canada, Record Group 10, Volume 3828, File No. 60926.)

And in 1897, J. D. McLean, Secretary, Department of Indian Affairs, stated:

As to fishing rights in British Columbia it should be stated that under the arrangement come to with the Government of that Province in 1876, by which reserves were to be set aside for the Indians, no special mention was made of fishing privileges; but the Reserve Commissioner has from time to time allotted Indians certain fisheries, and the Department of Marine & Fisheries has been advised of these, and asked to confirm them; but, so far as the correspondence shows, that Department has not confirmed them, and has objected to exclusive fishing privileges being granted to Indians as against white people.

(Memorandum, November 26, 1897, in National Archives of Canada, Record Group 10, Volume 3909, File No. 107297-3.)

It was argued by the appellant that these statements only represent the view of the Department of Marine and Fisheries. It was the appellant's position that the Department of Indian Affairs intended to grant exclusive fisheries to the Indians, but that this was overridden by the Department of Marine and Fisheries in what amounted to an inter-

Des déclarations antérieures confirment cette opinion. Par exemple, en 1890, Robert Sedgewick, sous-ministre de la Justice, avait affirmé ceci:

[TRADUCTION] J'ai examiné tous les documents se rapportant à cette question. Le commissaire des réserves indiennes paraît avoir le pouvoir de jalonner des réserves, mais il ne semble pas que le gouverneur en conseil ou quelque autre autorité ait, à quelque moment que ce soit, investi ou voulu investir le commissaire du pouvoir de traiter du droit aux pêcheries.

Je dois donc affirmer que le commissaire des réserves indiennes n'a pas le pouvoir de mettre de côté, pour l'usage exclusif des Indiens, quelque étendue d'eau de la Colombie-Britannique.

(R. Sedgewick, sous-ministre de la Justice, à John Tilton, sous-ministre des Pêcheries, 15 août 1890, Archives nationales du Canada, Fonds d'archives fédérales 10, volume 3828, n° de dossier 60926.)

En outre, en 1897, J. D. McLean, Secrétaire, ministère des Affaires indiennes, a dit ceci:

[TRADUCTION] Quant aux droits de pêche en Colombie-Britannique, il y a lieu de souligner que, dans l'entente conclue avec le gouvernement de cette province en 1876 et en vertu de laquelle des réserves devaient être mises de côté pour les Indiens, il n'est fait aucune mention particulière des privilèges de pêche. Cependant, le commissaire des réserves a, à l'occasion, attribué certaines pêcheries aux Indiens; le ministère de la Marine et des Pêcheries a été informé de ces attributions et prié de les confirmer. Or, d'après ce qui ressort de la correspondance, il ne les a pas confirmées et s'est opposé à ce que des privilèges exclusifs de pêche soient accordés aux Indiens et non aux Blancs.

(Note de service datée du 26 novembre 1897, Archives nationales du Canada, Fonds d'archives fédérales 10, volume 3909, n° de dossier 107297-3.)

L'appelant a soutenu que ces déclarations représentaient uniquement le point de vue du ministère de la Marine et des Pêcheries. Il a plaidé que le ministère des Affaires indiennes entendait accorder des pêcheries exclusives aux Indiens, mais que le ministère de la Marine et des Pêcheries avait fait obstacle à cette volonté, dans le cadre de ce qui

departmental dispute as to jurisdiction. This position, however, is not supported by the evidence.

constituait un conflit de compétences entre ministères. La preuve n'étaye toutefois pas cette thèse.

The evidence does indicate that efforts were made by the Department of Indian Affairs to protect traditional Indian fishing grounds from being leased exclusively to non-native fishers. This is far different from assigning exclusive title to those fishing grounds to the Indians. The difference between these positions was consistently acknowledged by the Department of Indian Affairs.

Cependant, la preuve indique que le ministère des Affaires indiennes a effectivement déployé des efforts pour protéger les secteurs de pêche traditionnels des Indiens, afin qu'ils ne soient pas loués exclusivement à des pêcheurs non autochtones. Cela est bien différent de la cession aux Indiens du titre exclusif sur ces secteurs de pêche. La différence entre ces positions a constamment été admise par le ministère des Affaires indiennes.

This policy is reflected in a letter from Frank Pedley, Deputy Superintendent General of Indian Affairs, to the Indian Commissioner for Manitoba and the North West Territories, dated February 8, 1906:

Cette politique ressort d'une lettre datée du 8 février 1906, transmise par le surintendant général adjoint des Affaires indiennes, Frank Pedley, au commissaire des Affaires indiennes pour le Manitoba et les Territoires du Nord-Ouest:

The Department has come to the conclusion that generally speaking, and unless under very exceptional circumstances the proper policy to pursue will be to let the Indians stand on the same footing as the settlers in so far as concerns the use of the waters, and to confine its efforts to endeavouring, where considered necessary, to secure stations on land to afford access to the waters, a system which it may be remarked appears to work well in the Province of British Columbia, and to resist efforts should any be made to compel the Indians to pay fees for licences to fish for domestic as distinguished from commercial purposes. [Emphasis added.]

[TRADUCTION] Le ministère est arrivé à la conclusion que, de façon générale, sauf circonstances très exceptionnelles, la politique qu'il convient de suivre est de traiter les Indiens de la même façon que les colons en ce qui concerne l'utilisation des eaux, et que le ministère devrait uniquement s'efforcer, lorsque la chose est jugée nécessaire, d'établir des postes visant à permettre l'accès à ces eaux, système qui, peut-on le signaler, paraît bien fonctionner en Colombie-Britannique, en plus de résister à toute démarche qui pourrait être tentée en vue de contraindre les Indiens à payer des droits pour obtenir des permis de pêche à des fins familiales par opposition à commerciales. [Je souligne.]

(National Archives of Canada, Record Group 10, Volume 6972, File No. 774/20-2 Part 1.)

(Archives nationales du Canada, Fonds d'archives fédérales 10, volume 6972, n° de dossier 774/20-2, partie 1.)

The claim of the Indians to exclusive fishing grounds had been made on numerous occasions but had been consistently rejected. This was expressed in the letter of opinion of the Solicitor General of the Province of Canada in 1866, referred to earlier. In a letter dated April 5, 1898 from E. E. Prince, Dominion Commissioner of Fisheries, to the Minister of Marine and Fisheries, the Commissioner referred to this opinion as settling the issue of native legal claims to exclusive fisheries throughout the country. He specifically stated:

Les Indiens avaient, à de nombreuses occasions, revendiqué des secteurs de pêche exclusifs, mais leurs revendications avaient constamment été rejetées. Ce point de vue avait été exprimé dans la lettre faisant état de l'avis donné en 1866 par le solliciteur général de la province du Canada et qui a été mentionnée précédemment. Dans une lettre datée du 5 avril 1898 et adressée au ministre de la Marine et des Pêcheries, le commissaire fédéral des pêcheries, E. E. Prince, a renvoyé à cet avis, affirmant qu'il tranchait la question des revendications, en droit, par les autochtones, de pêcheries exclusives partout au pays. Il a explicitement déclaré:

With respect to the alleged differences between this Department and the Department of Indian Affairs respecting the claims urged by the Indians to fishery privileges it is necessary to recall the circumstances that 15 or 16 years ago a number of communications passed between the two Departments, resulting in certain definite conclusions which appeared to finally decide and render unnecessary in the future any new inquiry. This Department has consistently adhered to the conclusions referred to, in its policy regarding Indian fishing.

In order to make the matter clear, I quote from a report dated July 11th 1876 by the late Mr. Whitcher, Commissioner of Fisheries: -

After much inconvenience and many conflicting actions the disputed points were referred to the notice of the Law Officers of the Crown. Their decision, dated 8th March 1866 was adverse to the pretensions made on behalf of the Indians. A certified copy of said opinion was lodged with the Indian Bureau.

The position laid down by the Law Officers of the Crown has been consistently adhered to by this Department, and in a communication addressed to the Minister of the Interior on January 30th 1882, the Minister of Marine and Fisheries (Hon. A. W. McLelan) once more set forth clearly and definitely the matter, stating that this Department acts on the legal advice of the Law Officers of the Crown as recorded in the Department "which is in effect that fishing rights in public waters cannot be made exclusive except under the express sanction of Parliament, and that Indians are entitled to use the public fisheries only on the same conditions as whitemen, subject to the Fisheries Act and Fishery Regulations. . . ." [Emphasis added.]

(National Archives of Canada, Record Group 10, Volume 3909, File No. 107297-3.)

The Specific Allotment of the Moricetown Reserve

The Crown policy against the granting of exclusive fisheries to the Indians had been forcefully stated and often repeated. The band argued alternatively that it was misled into believing that it was, in fact, being given an exclusive fishery. However,

[TRADUCTION] En ce qui concerne les divergences de vue qui existeraient entre notre ministère et celui des Affaires indiennes relativement aux revendications par les Indiens de privilèges relatifs aux pêcheries, il faut rappeler qu'il y a 15 ou 16 ans de cela il y a eu entre les deux ministères échange de communications, ayant abouti à certaines conclusions bien précises qui ont paru régler la question une fois pour toute et rendre inutile toute autre enquête. Dans sa politique relative à la pêche par les Indiens, notre ministère a invariablement adhéré aux conclusions dont il est question.

Afin d'éclaircir la question, je cite un rapport daté du 11 juillet 1876 et émanant du regretté M. Whitcher, commissaire des pêcheries:

Après maints inconvénients et de nombreuses mesures contradictoires, les points en litige ont été soumis aux conseillers juridiques de la Couronne. Leur décision, datée du 8 mars 1866, est défavorable aux prétentions avancées pour le compte des Indiens. Une copie certifiée conforme de l'avis en question a été déposée auprès du Bureau des Indiens.

Notre ministère a constamment souscrit à la position formulée par les conseillers juridiques de la Couronne; dans une lettre adressée au ministre de l'Intérieur le 30 janvier 1882, le ministre de la Marine et des Pêcheries (l'honorable A. W. McLelan) a une fois de plus énoncé de façon claire et nette la question, déclarant que notre ministère se conforme à l'avis formulé par les conseillers juridiques de la Couronne qui a été déposé au ministère et «suivant lequel les droits de pêche dans les eaux publiques ne peuvent être rendus exclusifs qu'avec l'aval exprès du Parlement et que les Indiens n'ont le droit d'utiliser les pêcheries publiques qu'aux mêmes conditions que les Blancs et sous réserve de l'Acte des pêcheries et de son règlement d'application. . . » [Je souligne.]

(Archives nationales du Canada, Fonds d'archives fédérales 10, volume 3909, n° de dossier 107297-3.)

L'attribution spécifique de la réserve de Moricetown

La politique de la Couronne interdisant l'attribution de pêcheries exclusives aux Indiens avait été affirmée de façon catégorique à maintes reprises. Subsidièrement, la bande a fait valoir qu'elle avait été amenée à croire qu'on lui accordait, dans les

when the facts surrounding this particular grant are considered in light of the expressed general policy, they clearly indicate an intention to allot only the land of the reserve and not the river.

The Directions to Commissioner O'Reilly

45 In terms of the instructions Commissioner O'Reilly received, his duties were expressed as:

...ascertaining accurately the requirements of the Indian Bands in that Province [British Columbia], to whom lands have not been assigned by the late Commission, and allotting suitable lands to them for tillage and grazing purposes. [Emphasis added.]

(Federal Order in Council of July 19, 1880. Canada. Privy Council. Order in Council No. 1334/1880 in National Archives of Canada, Record Group 2, Series 1.)

46 These instructions were later modified, but the principle that the ultimate decision as to the allocation of fishing grounds remained with the Department of Marine and Fisheries never changed. Thus, on December 20, 1881 the Superintendent General of Indian Affairs wrote to A. W. McLelan, Acting Minister of Marine and Fisheries and stated:

I have the honor to inform you that Judge O'Reilly having been last year appointed Commr. for allotting lands as Reserves in British Columbia for occupation by the Indian Bands and Tribes of that Province I considered it expedient and proper to instruct him, while engaged in assigning these lands, to mark off the fishing grounds which should be kept for the exclusive use of the Indians and he is following those instructions.

It is desirable that the fisheries recommended for allotment to the Indians be not otherwise disposed of without the consent of this Department being first obtained.

(National Archives of Canada, Record Group 10, Volume 3766, File No. 32876.)

faits, une pêcherie exclusive. Toutefois, examinés à la lumière de la politique générale déclarée, les faits de cette attribution indiquent clairement que l'intention était d'accorder uniquement les terres de la réserve et non la rivière.

Les instructions données au commissaire O'Reilly

Suivant les instructions qu'a reçues le commissaire O'Reilly, voici quelles étaient ses fonctions:

[TRADUCTION] ...déterminer avec précision les besoins des bandes indiennes de la province [Colombie-Britannique] auxquelles l'ancien commissaire n'a pas attribué de terres, et [...] leur attribuer des terres propres à la culture et au pâturage. [Je souligne.]

(Décret fédéral du 19 juillet 1880. Canada. Conseil privé. Décret n° 1334/1880, aux Archives nationales du Canada, Fonds d'archives fédérales 2, série 1.)

Ces instructions ont par la suite été modifiées, mais le principe que la décision finale concernant l'attribution de secteurs de pêche appartenait au ministère de la Marine et des Pêcheries est demeuré inchangé. Ainsi, le 20 décembre 1881, le surintendant général des Affaires indiennes a écrit ce qui suit à A. W. McLelan, ministre suppléant de la Marine et des Pêcheries:

[TRADUCTION] J'ai l'honneur de vous informer que le juge O'Reilly, qui, l'an dernier, a été nommé commissaire chargé d'attribuer les terres qui serviront à l'établissement de réserves en Colombie-Britannique et seront occupées par les bandes et les tribus indiennes de cette province, j'ai jugé utile et approprié de lui donner instruction de déterminer, dans le cours de l'attribution des terres en question, les secteurs de pêche qui devraient être réservés à l'usage exclusif des Indiens, et il suit ces instructions.

Il est souhaitable que les pêcheries dont l'attribution aux Indiens est recommandée ne soient pas aliénées de quelque autre manière sans le consentement préalable de notre ministère.

(Archives nationales du Canada, Fonds d'archives fédérales 10, volume 3766, n° de dossier 32876.)

1996 CanLII 245 (SCC)

The instructions referred to were also given to Indian Commissioners in Manitoba, Keewatin and the Northwest Territories, and they state that the Commissioners are to ascertain what fishing grounds should be reserved in order that application might be made to the Department of Marine and Fisheries to have those areas secured for the use of the Indians. These instructions reveal that Commissioner O'Reilly was not given the authority to allot an exclusive fishery, and that the most he could do was make recommendations.

In response to being informed that Indian Commissioners were receiving such instructions, and making such recommendations, the Acting Minister of Marine and Fisheries made it clear that his department would not act on any such recommendation. He reiterated the position of his department and informed the Department of Indian Affairs that:

... fishing rights in public waters cannot be made exclusive excepting under the express sanction of Parliament, and that Indians are entitled to use the public fisheries only on the same conditions as white men, subject to the *Fisheries Act* and Fishery Regulations. The mere assignment of these fishery privileges by Indian Agents, or the abstention of this Department from otherwise disposing of them — which there was no intention to do pending careful consideration of all the circumstances of each case — could not legally exclude the public from fishing therein.

(A. W. McLelan, Acting Minister of Marine and Fisheries, to Sir John A. Macdonald, Superintendent General of Indian Affairs, January 30, 1882, in National Archives of Canada, Record Group 10, Volume 3766, File No. 32876.)

Accordingly, when assessing what Commissioner O'Reilly did, it is important to understand the existing limitations on what he could do. The powers of Commissioner O'Reilly and his instructions are perhaps best summarized in the following extract from a letter written by Lawrence Vankoughnet, Deputy Superintendent General of

Les instructions dont il est fait mention, qui ont également été données aux commissaires des Indiens pour le Manitoba, le Keewatin et les Territoires du Nord-Ouest, indiquent que les commissaires devaient déterminer les secteurs de pêche qui devaient être réservés en vue de la présentation de demandes au ministère de la Marine et des Pêcheries visant à garantir aux Indiens l'usage des secteurs en question. Ces instructions révèlent que le commissaire O'Reilly n'était pas habilité à accorder des pêcheries exclusives et qu'il pouvait tout au plus faire des recommandations.

Après avoir été informé que les commissaires des Indiens recevaient de telles instructions et formulaient des recommandations de cette nature, le ministre suppléant de la Marine et des Pêcheries a clairement indiqué que son ministère ne donnerait pas suite à de telles recommandations. Il a réitéré la position de son ministère et informé celui des Affaires indiennes de ce qui suit:

[TRADUCTION]... les droits de pêche dans les eaux publiques ne peuvent être rendus exclusifs qu'avec l'aval exprès du Parlement et les Indiens n'ont le droit d'utiliser les pêcheries publiques qu'aux mêmes conditions que les Blancs et sous réserve de l'*Acte des pêcheries* et de son règlement d'application. Il n'est pas possible, en droit, d'interdire au public de pêcher dans ces eaux du seul fait que ces privilèges de pêche auraient été cédés par les agents des Indiens ou du fait que notre ministère ne les a pas aliénés de quelque autre façon — ce qu'il n'avait aucune intention de faire avant d'avoir examiné de manière approfondie toutes les circonstances propres à chaque cas.

(A. W. McLelan, ministre suppléant de la Marine et des Pêcheries, à Sir John A. Macdonald, surintendant général des Affaires indiennes, 30 janvier 1882, aux Archives nationales du Canada, Fonds d'archives fédérales 10, volume 3766, n° de dossier 32876.)

En conséquence, lorsqu'on apprécie ce qu'a fait le commissaire O'Reilly, il importe de bien comprendre les limites qu'il devait respecter. C'est probablement le passage suivant d'une lettre qu'a écrite Lawrence Vankoughnet, surintendant général adjoint des Affaires indiennes, à Sir John A. Macdonald, qui cumulait alors les fonctions de sur-

Indian Affairs, to Sir John A. Macdonald, who was then Superintendent General of Indian Affairs as well as Prime Minister. In the letter, dated February 27, 1882, the Deputy Superintendent states:

With regard to the authority under which Mr. O'Reilly acted in designating fishing stations which it might be advisable to have reserved for Indian Bands in British Columbia . . . the Reserve Commissioner had been instructed while engaged in assigning lands to Indian Bands in that Province, to mark off the fishing grounds which should be kept for their exclusive use, and the Acting Minister was informed that it would be desirable that the fisheries "recommended" for allotment to the Indians should not be otherwise disposed of without the consent of this Department having been first obtained. . . . The designation of these fishing limits as being desirable for the exclusive use of Indian Bands, no more assigns the fishing grounds thus designated to them permanently, without the consent of the Government having been obtained, than does Mr. O'Reilly's allotment of Indian Reserve lands assign the latter to the same Indians without similar approval.

Mr. O'Reilly's allotments are only recommendatory; and may be curtailed or increased; as, after consultation and mature deliberation by the Officers of the Department of Marine and Fisheries and the Department of Indian Affairs, may be considered advisable. [Emphasis in original.]

(National Archives of Canada, Record Group 10, Volume 3766, File No. 32876.)

The Statements of Commissioner O'Reilly

Commissioner O'Reilly was clearly instructed that his role was limited to making recommendations. In light of these instructions it is apparent that his statements and actions do not disclose an attempt to grant control of the fishery. Rather, at most, they represent a recommendation that a fishery be allotted.

On the day before Commissioner O'Reilly recommended the allotment of Moricetown Indian

intendant général des Affaires indiennes et de premier ministre, qui résume le mieux les pouvoirs du commissaire O'Reilly et les instructions qu'il avait reçues. Dans sa lettre datée du 27 février 1882, le surintendant adjoint a déclaré ce qui suit:

[TRADUCTION] En ce qui concerne le pouvoir en vertu duquel M. O'Reilly a agi pour désigner les postes de pêche qu'il était peut-être souhaitable de réserver pour les bandes indiennes de la Colombie-Britannique, [. . .] le commissaire des réserves avait reçu instruction de déterminer, dans le cours de l'attribution des terres aux bandes indiennes de cette province, les secteurs de pêche qui devaient être réservés à leur usage exclusif; le ministre suppléant a été avisé qu'il serait souhaitable que les pêcheries dont l'attribution aux Indiens est «recommandée» ne soient pas aliénées de quelque autre manière sans le consentement préalable de notre ministère. [. . .] La détermination de ces territoires de pêche, dont il est jugé souhaitable de réserver l'usage exclusif aux bandes indiennes, n'a pas davantage pour effet de céder de façon permanente à ces bandes les secteurs de pêche ainsi désignés, sans le consentement du gouvernement, que ne le fait l'attribution des terres formant les réserves indiennes par M. O'Reilly aux mêmes Indiens sans cette approbation.

Les attributions de terres faites par M. O'Reilly ne sont que des recommandations, qui peuvent faire l'objet de diminutions ou d'augmentations, si, après consultations et délibérations approfondies, les fonctionnaires du ministère de la Marine et des Pêcheries et du ministère des Affaires indiennes jugent la chose souhaitable. [Je souligne.]

(Archives nationales du Canada, Fonds d'archives fédérales 10, volume 3766, n° de dossier 32876.)

Les déclarations du commissaire O'Reilly

Le commissaire O'Reilly a clairement reçu des instructions lui indiquant que son rôle se limitait à formuler des recommandations. À la lumière de ces instructions, il est évident que ses déclarations et ses actions ne révèlent aucune tentative d'accorder le contrôle de la pêcherie. Au contraire, elles constituent tout au plus une recommandation en faveur de l'attribution d'une pêcherie.

La veille de sa recommandation favorable à l'attribution de la réserve indienne n° 1 de Morice-

Reserve No. 1 (Lach-kal-tsap), he made the following statements to the band in a discussion concerning the allotment of the reserve:

The Gov. is anxious land shd be set apart for you as it has been in the rest of B.C. A reserve when made protects the land from trespass by others, but the Indian still has the right to hunt, fish or gather berries outside. The Gov. does not wish to confine you on the reserve. . . .

Later in the same discussion he stated that:

I never make a promise without seeing the land I am reserving. The reserve will be for the tribe, not for individuals. Allotments may be made by the Agent. Surveyors will be sent to define the exact boundaries, and plans will be sent to the Chiefs. [Emphasis added.]

(Transcript of meeting with Chief Le goul, two other Chiefs, Fr. Morris & Commissioner, September 18, 1891.)

These comments reveal that Commissioner O'Reilly made it apparent that he was not making the final decision with respect to the reserve boundaries, and that in any event he was concerned with reserving the land, not the fishery.

His position was made still clearer in his conversations with the neighbouring Indians of New Kitseguela, about 30 miles downstream from Moricetown, less than two weeks after the allotment of the Moricetown Reserve. Commissioner O'Reilly stated:

I hope you will not ask an unreasonable extent of country, but only for that which would be useful to you. It is not necessary that the berrying or hunting grounds shd be reserved. It would be an impossibility to define them as you go over hundreds of miles. You will not be confined to the reserves, but can hunt, fish or gather berries where you will as heretofore. [Emphasis added.]

He continued:

town (Lach-kal-tsap), le commissaire O'Reilly a fait les déclarations suivantes à la bande, au cours d'une discussion concernant l'attribution de la réserve:

[TRADUCTION] Le gouvernement tient à ce que des terres soient mises de côté à votre intention comme ce fut le cas dans le reste de la Colombie-Britannique. La création d'une réserve permet de protéger les terres qui la composent contre les intrus, mais les Indiens conservent toutefois le droit de chasser, de pêcher ou de cueillir des baies à l'extérieur de celle-ci. Le gouvernement ne souhaite pas vous confiner à la réserve . . .

Plus tard, durant la même discussion, il a déclaré ceci:

[TRADUCTION] Je ne fais jamais de promesse sans avoir vu les terres que je réserve. La réserve est destinée à la tribu et non aux individus. L'agent peut attribuer les terres. Des arpenteurs seront envoyés pour établir les limites exactes, et les plans seront transmis aux chefs. [Je souligne.]

(Transcription de la réunion avec le chef Le goul, deux autres chefs, le père Morris et le commissaire, le 18 septembre 1891.)

Il ressort de ces commentaires que le commissaire O'Reilly a clairement indiqué qu'il ne prenait pas la décision finale relativement aux limites de la réserve et que, de toute façon, son rôle était de réserver les terres, non la pêche.

Moins de deux semaines après l'attribution de la réserve de Moricetown, il a précisé davantage sa position au cours de ses conversations avec les Indiens de New Kitseguela, à environ 30 milles en aval de Moricetown. Le commissaire O'Reilly a dit ceci:

[TRADUCTION] J'espère que vous ne demanderez pas une étendue déraisonnable de territoire, mais plutôt uniquement ce qui vous est utile. Il n'est pas nécessaire de réserver des territoires de cueillette de baies et de chasse. Il serait impossible de délimiter de tels territoires puisque vous parcourez des centaines de milles. Vous ne serez pas confinés aux réserves, vous pourrez chasser, pêcher ou cueillir des baies où vous le voulez, comme vous l'avez fait jusqu'à maintenant. [Je souligne.]

Il a poursuivi ainsi:

You not only have good land, you have a good salmon river at your door, and good hunting and berrying mountains close at hand. When the reserves are defined the land belongs exclusively to the Indians. [Emphasis added.]

[TRADUCTION] Non seulement avez-vous de bonnes terres, mais vous avez également tout près une rivière riche en saumon et, à portée de la main, des montagnes qui regorgent de gibier et de baies. Une fois les réserves délimitées, le territoire appartient alors exclusivement aux Indiens. [Je souligne.]

54

Commissioner O'Reilly certainly believed the reserve consisted of the land but not the river. His concern was to reserve a fishing station on the bank of the river and not with reserving control of the fishery itself. This is made clear later in the conversation, when in response to a request for the reservation of a portion of the stream, Commissioner O'Reilly stated:

I cannot see the necessity of making such a large reserve. You cannot use it. It is necessary you shd have timber, and that I will give you, and your village and agricultural land, but it is not necessary to give you seven miles of fishing ground, that cannot be used by anyone else. [Emphasis added.]

Il ne fait pas de doute que le commissaire O'Reilly estimait que la réserve était constituée des terres mais non de la rivière. Il tenait à réserver un poste de pêche sur la berge de la rivière, non à réserver le contrôle de la pêcherie même. Cela ressort clairement de la réponse qu'il a donnée, plus tard dans la conversation, lorsqu'on lui a demandé de réserver une partie du cours d'eau:

[TRADUCTION] Je ne vois pas la nécessité d'établir une si vaste réserve. Vous ne pourrez pas l'utiliser. Vous avez besoin de bois, ce que je vous donnerai, ainsi que de votre village et de terres agricoles, mais il n'est pas nécessaire de vous donner un secteur de pêche de sept milles qui ne pourrait être utilisé par personne d'autre. [Je souligne.]

(Transcript of O'Reilly Commission Meeting at New Kitseguela, September 30, 1891. National Archives of Canada, Record Group 10, Volume 3571, File 126, pt. A; Provincial Archives of British Columbia microfilm reel B-274.)

(Transcription de la réunion du commissaire O'Reilly à New Kitseguela, 30 septembre 1891. Archives nationales du Canada, Fonds d'archives fédérales 10, volume 3571, dossier 126, partie A; Archives provinciales de la Colombie-Britannique, bobine de microfilm B-274.)

Was an Exclusive Fishery Included in the Grant?

Y-a-t-il eu attribution d'une pêcherie exclusive?

55

The Minutes of Decision of Commissioner O'Reilly, dated September 19, 1891 referred to the allotment of the Moricetown Reserve in the following terms:

Lach kal tsap, a reserve of twelve hundred and ninety (1290) acres, situated on the Hagwilget river about 35 [miles] southeast of Hazelton.

Commencing on the right bank of the Hagwilget river at a Poplar tree marked Indian reserve and running East ninety (90) chains; thence North one hundred and twenty (120) chains; thence West one hundred and twenty (120) chains; thence South one hundred and twenty (120) chains; and thence East thirty (30) chains to the place of commencement.

Dans le procès-verbal de la décision du commissaire O'Reilly, en date du 19 septembre 1891, il est fait état de l'attribution de la réserve de Moricetown dans les termes suivants:

[TRADUCTION] Lach kal tsap, réserve de mille deux cent quatre-vingt-dix (1290) acres, située le long de la rivière Hagwilget, à environ 35 [milles] au sud-est de Hazelton.

Commencant sur la rive droite de la rivière Hagwilget, à l'endroit où se trouve un peuplier sur lequel est inscrit réserve indienne, et vers l'est sur une distance de quatre-vingt-dix (90) chaînes; de là, cent vingt (120) chaînes vers le nord; de là, cent vingt (120) chaînes vers l'ouest; de là, cent vingt (120) chaînes vers le sud; et de là, trente (30) chaînes vers l'est, jusqu'au point de départ.

(Indian Lands Registry (Registry No. B-64652), Department of Indian and Northern Affairs, Hull, P.Q.)

The appellant urged that this metes and bounds description was clear and cogent evidence that Commissioner O'Reilly intended that the Reserve include the Hagwilget River and with it an exclusive fishery.

It is true that the metes and bounds description does not exclude the river. Yet, it must be remembered that the Commissioner had explained to the Indians, that this was only a rough allocation of land which would later be more accurately surveyed. More importantly, with regard to the alleged allotment of an exclusive fishery, it is certainly significant that the letter from Commissioner O'Reilly of January 21, 1892 forwarding the Minutes of Decision makes no mention of any fisheries being reserved for the Indians.

Commissioner O'Reilly did refer to a fishery adjacent to the proposed reserve in his report to the Superintendent General of Indian Affairs on March 26, 1892. When, on May 13, 1892, the Deputy Superintendent General of Indian Affairs sent a copy of the recommended allotment of the Moricetown Reserve and others to the Department of Marine and Fisheries, he asked that the fishing grounds adjacent to the reserves be reserved for the Indians who had been allocated the lands adjacent to those fishing grounds. This request confirms that Indian Affairs understood its powers and that of its Commissioners to be limited to the allocation of land to the Indians, and that any allocation of fishing grounds would have to be approved by the Department of Marine and Fisheries.

When the Department of Marine and Fisheries forwarded the request for fishing grounds to the Dominion Inspector of Fisheries in British Columbia for comment, that official stated:

(Registre des terres indiennes (n° B-64652), ministère des Affaires indiennes et du Nord canadien, Hull (Qc).)

L'appelant a prétendu avec insistance que cette description par mesurage et délimitation était une preuve claire et convaincante que le commissaire O'Reilly entendait que la réserve comprenne la rivière Hagwilget et avec elle une pêcherie exclusive.

Bien qu'il soit vrai que cette description par mesurage et délimitation n'exclut pas la rivière, il faut néanmoins rappeler que, comme le commissaire l'avait expliqué aux Indiens, il ne s'agissait que d'une attribution approximative de terres, qui serait par la suite arpentée de façon plus précise. Fait plus important en ce qui concerne la prétendue attribution d'une pêcherie exclusive, il est certes significatif que la lettre datée du 21 janvier 1892 du commissaire O'Reilly, accompagnant le procès-verbal de sa décision, ne renferme aucune mention de quelque pêcherie que ce soit réservée en faveur des Indiens.

Le commissaire O'Reilly a effectivement fait état d'une pêcherie adjacente à la réserve proposée dans son rapport au surintendant général des Affaires indiennes le 26 mars 1892. Lorsque, le 13 mai 1892, le surintendant général adjoint des Affaires indiennes a fait parvenir au ministère de la Marine et des Pêcheries une copie de la recommandation d'attribuer la réserve de Moricetown et d'autres réserves, il a demandé que les secteurs de pêche adjacents aux réserves soient réservés aux Indiens à qui avaient été attribuées les terres adjacentes à ces secteurs. Cette demande confirme que le ministère des Affaires indiennes comprenait que ses pouvoirs et ceux de ses commissaires se limitaient à l'attribution de terres aux Indiens, et que toute attribution de secteurs de pêche devait être approuvée par le ministère de la Marine et des Pêcheries.

Lorsque le ministère de la Marine et des Pêcheries a transmis la demande de secteurs de pêche à l'inspecteur fédéral des pêcheries en Colombie-Britannique afin d'obtenir ses commentaires, ce dernier a répondu ceci:

56

1996 CanLII 245 (SCC)

57

58

59

I beg to respectfully, but in the strongest way possible to recommend that no salmon fishing grounds be reserved for the use of Indians.

[TRADUCTION] Je recommande respectueusement, mais de la façon la plus vigoureuse possible, qu'aucun secteur de pêche au saumon ne soit réservé pour l'usage des Indiens.

In my opinion the Dept. of Fisheries should not grant, or acknowledge any exclusive rights of Indians to any waters in British Columbia.

À mon avis, le ministère des Pêcheries ne devrait ni accorder ni reconnaître aux Indiens de droits exclusifs sur quelque étendue d'eau en Colombie-Britannique.

(John McNab, Dominion Inspector of Fisheries, British Columbia, to William Smith, Deputy Minister of Marine and Fisheries, May 26, 1892 in Indian Lands Registry (Registry No. B-64648), Department of Indian and Northern Affairs, Hull, P.Q.)

(John McNab, inspecteur fédéral des Pêcheries, Colombie-Britannique, à William Smith, sous-ministre de la Marine et des Pêcheries, 26 mai 1892, Registre des terres indiennes (n° B-64648), ministère des Affaires indiennes et du Nord canadien, Hull (Qc).)

60

This letter was in turn forwarded to Indian Affairs by the Department of Marine and Fisheries on June 4, 1892. In reply, R. Sinclair of the Department of Indian Affairs wrote the Minister of Marine and Fisheries to ask whether he concurred with the recommendation of the Inspector of Fisheries not to allocate salmon fishing grounds to the Indians. In this letter of June 9, 1892 he reiterated that the Department of Indian Affairs claimed no right to allot fishery reserves to the Indians, and that it was for the Department of Marine and Fisheries to decide whether any or all of the recommended allotments of fishing grounds was to be approved.

Cette lettre a à son tour été transmise aux Affaires indiennes par le ministère de la Marine et des Pêcheries le 4 juin 1892. En réponse, R. Sinclair, du ministère des Affaires indiennes, a écrit au ministre de la Marine et des Pêcheries pour lui demander s'il était d'accord avec la recommandation de l'inspecteur des Pêcheries de ne pas attribuer aux Indiens de secteurs de pêche au saumon. Dans cette lettre du 9 juin 1892, il a réitéré que le ministère des Affaires indiennes ne prétendait aucunement avoir le droit d'attribuer des réserves de pêche aux Indiens, et qu'il appartenait au ministère de la Marine et des Pêcheries de décider si toutes les attributions de secteurs de pêche recommandées ou certaines seulement devaient être approuvées.

61

The clear reply of the Deputy Minister of Marine and Fisheries on July 14, 1892 was that his Department would not sanction any reservation of fishing grounds. He repeated the long-standing position of the Department that exclusive fisheries would not be granted, and suggested instead that:

Le 14 juillet 1892, le sous-ministre de la Marine et des Pêcheries a clairement répondu que son ministère ne sanctionnerait aucune réservation de secteurs de pêche. Il a répété la position de longue date du ministère qu'aucune pêcherie exclusive ne serait accordée, et il a plutôt proposé ceci:

... it would be far better to have such waters as you may deem to be necessary for the support and maintenance of these Indians, licensed to them under similar conditions as licenses are issued to other Bands of Indians in Ontario. This would place them on a footing of equality with White fishermen, and enable them to dispose of their fish in the same manner as the latter do.

[TRADUCTION] ... il me semble de loin préférable que les étendues d'eau que vous estimez nécessaires à la subsistance de ces Indiens leur soient accordées au moyen de licences assorties de conditions semblables à celles qui sont imposées à d'autres bandes indiennes de l'Ontario. Ils seraient ainsi sur un pied d'égalité avec les pêcheurs blancs et ils pourraient disposer de leur poisson de la même manière que ces derniers.

1996 CanLII 245 (SCC)

(William Smith, Deputy Minister of Marine and Fisheries, to Deputy Superintendent General of Indian Affairs, July 14, 1892 in Indian Lands Registry (Registry No. B-64648), Department of Indian and Northern Affairs, Hull, P.Q.)

The only conclusion which can be reached on this evidence is that there was never any intention on the part of the Crown to allot an exclusive fishery for the Moricetown Band.

The Application of the Ad Medium Filum Aquae Presumption

The appellant argued that the intention of the Crown to allot fishery rights to the band as part of the reserve was to a large extent irrelevant in this case. The basis for the argument is that the Crown only intended to reserve the fishery in navigable waters, and that in non-navigable waters, which the appellant contends includes the Bulkley River at the reserve, the presumption *ad medium filum aquae* applies, and accordingly the river surrounded, as it is on both sides by the reserve, would be presumptively part of the reserve.

Assuming without deciding that the doctrine of *ad medium filum aquae* should apply to Indian Reserves, it is not applicable in this case for three reasons. First, it must be remembered that the doctrine is only applicable in cases where the river forming the boundary is not navigable. The Bulkley River is navigable above and below the Moricetown gorge and should be considered a navigable river. This in itself is a sufficient basis for determining that the river did not form part of the reserve and that the presumption of ownership to the middle of the river cannot arise. Secondly, at the time the reserve was created the English common law provided that the fishery was a right which was severable from the title to the river bed itself. Thus, even if the presumption *ad medium filum aquae* were to apply to pass title to the bed of the river to the band, the presumption has no effect

(William Smith, sous-ministre de la Marine et des Pêcheries, au surintendant général adjoint des Affaires indiennes, 14 juillet 1892, Registre des terres indiennes (n° B-64648), ministère des Affaires indiennes et du Nord canadien, Hull (Qc).)

La seule conclusion qu'il est possible de tirer de cette preuve est que la Couronne n'a jamais eu l'intention d'accorder de pêche exclusive à la bande de Moricetown.

L'application de la présomption ad medium filum aquae

L'appelant a fait valoir que l'intention de la Couronne d'accorder à la bande des droits sur la pêche, en tant que partie de la réserve, est dans une large mesure sans pertinence en l'espèce. À l'appui de cet argument, l'appelant affirme que la Couronne entendait uniquement réserver la pêche dans les eaux navigables, et que, dans les eaux non navigables — la rivière Bulkley étant, de prétendre l'appelant, formée de telles eaux à la hauteur de la réserve —, la présomption *ad medium filum aquae* s'applique, de sorte que, comme la rivière est bordée des deux côtés par la réserve, elle ferait partie de celle-ci par l'effet de la présomption.

À supposer, sans toutefois se prononcer sur la question, que la doctrine *ad medium filum aquae* s'applique aux réserves indiennes, elle ne s'applique cependant pas en l'espèce, et ce pour trois raisons. Premièrement, il faut se rappeler que la doctrine n'est applicable que dans les cas où la rivière qui forme la limite n'est pas navigable. Or, comme la rivière Bulkley est navigable en amont et en aval de la gorge de Moricetown, elle devrait être considérée comme une rivière navigable. En soi, il s'agit d'une raison suffisante pour conclure qu'elle ne fait pas partie de la réserve et que la présomption relative au droit de propriété sur la rivière jusqu'à son milieu ne peut alors naître. Deuxièmement, lorsque la réserve a été créée, la pêche était, en vertu de la common law d'Angleterre, un droit séparable du titre relatif au lit de la rivière. Donc, même si la présomption *ad*

on the fishery as the Crown specifically refused to allot an exclusive fishery to the band. It was the clear intention of the Crown to reserve all of the fishery to itself. It follows that any by-law with respect to fishing would therefore be beyond the band's authority as control of this riparian right remained with the Crown. Thirdly, if the presumption could possibly be said to apply it was rebutted in light of the evidence that the Crown never intended to grant nor did it grant the bed of the river to the band. It will be necessary to say a little more with regard to each of these aspects.

medium filum aquae s'appliquait et transférait à la bande le titre sur le lit de la rivière, elle ne produirait aucun effet à l'égard de la pêche, étant donné que la Couronne a expressément refusé d'accorder à la bande une pêche exclusive. La Couronne avait clairement l'intention de se réserver l'ensemble de la pêche. Il s'ensuit que tout règlement administratif régissant la pêche outrepasserait les pouvoirs de la bande, puisque la Couronne a conservé le contrôle de ce droit riverain. Troisièmement, même s'il était possible d'affirmer que la présomption s'applique, elle a été réfutée compte tenu de la preuve que la Couronne n'a jamais eu l'intention d'accorder le lit de la rivière à la bande et qu'elle ne l'a jamais accordé dans les faits. Il est nécessaire d'explicitier un peu plus chacun de ces aspects.

When Does the *Ad Medium Filum Aquae* Presumption Apply?

Quand la présomption *ad medium filum aquae* s'applique-t-elle?

65

In British Columbia, the civil and criminal laws of England were adopted as at November 19, 1858 "so far as the same [were] not by local circumstances inapplicable": *The English Law Ordinance, 1867*, S.B.C. 1867, No. 70, s. 2 (now *Law and Equity Act*, R.S.B.C. 1979, c. 224, s. 2). Similar language also introduced the common law of England into Manitoba and Alberta, although in other provinces, such as Ontario, no allowance was made for "local circumstances".

En Colombie-Britannique, les lois civiles et criminelles d'Angleterre ont été adoptées, telles qu'elles existaient le 19 novembre 1858, [TRADUCTION] «dans la mesure où elles [n'étaient] pas inapplicables en raison de conditions locales»: *The English Law Ordinance, 1867*, S.B.C. 1867, No. 70, art. 2 (maintenant *Law and Equity Act*, R.S.B.C. 1979, ch. 224, art. 2). Un texte analogue a également introduit la common law d'Angleterre au Manitoba et en Alberta, quoique, dans d'autres provinces, telle l'Ontario, il n'y a pas de réserve fondée sur les «conditions locales».

66

As La Forest explained in his book *Water Law in Canada — The Atlantic Provinces*, *supra*, at pp. 241-42, the English rule was that:

Ainsi que La Forest l'a expliqué dans son ouvrage intitulé *Water Law in Canada — The Atlantic Provinces*, *op. cit.*, aux pp. 241 et 242, la règle anglaise était la suivante:

... the owner of land through which a non-tidal stream flows owns the bed of the stream unless it has been expressly or impliedly reserved; and if the stream forms the boundary between lands owned by different persons, each proprietor owns the bed of the river *ad medium filum aquae* — to the centre thread of the stream.

[TRADUCTION] ... le propriétaire d'un bien-fonds traversé par un cours d'eau sans marée est également propriétaire du lit de ce cours d'eau sauf s'il a expressément ou implicitement été réservé; si le cours d'eau délimite des biens-fonds appartenant à des personnes différentes, chacune d'elles est propriétaire du lit de la rivière *ad medium filum aquae* — c'est-à-dire jusqu'à la ligne médiane du cours d'eau.

67

While this rule expressed the common law as it existed in England, the courts in western Canada

Bien que cette règle exprimait la common law sur ce point à l'époque en Angleterre, les tribunaux

have not applied this rule to navigable rivers. Thus in the case of *Re Iverson and Greater Winnipeg Water District* (1921), 57 D.L.R. 184 (Man. C.A.), Dennistoun J.A. wrote, at pp. 202-3:

These references to the common law of England indicate clearly to my mind that they are not and never were applicable to conditions in this Province. Here the public right in navigable waters whether under the Hudson's Bay tenure or since 1869 under the title vested in the Crown, was prior to, and superseded all private rights acquired by grant or settlement, upon the banks of a navigable stream. In a country occupied from the earliest days by hunters, trappers, fishers and traders whose main and almost exclusive highways were the rivers and streams, such laws were contrary to the requirements and necessities of the whole community.

The applicability of the common law of England to navigable rivers in respect to the *ad medium* rule may be doubted when it is remembered that the importance of public rights in non-tidal navigable waters was not recognised in England when title to land upon their banks was acquired.

In this country the public right of navigation and of fishery in all navigable waters has always existed and been recognised.

Similarly, in the same year the Alberta Court of Appeal in the case of *Flewelling v. Johnston* (1921), 59 D.L.R. 419, held that the English common law presumption did not apply in the very different circumstances which existed in Canada. In short, the "local circumstances" which existed in Canada rendered the common law inapplicable with respect to navigable rivers. As Beck J.A. stated in his reasons at pp. 422-23:

In *Barthel v. Scotten* (1895), 24 Can. S.C.R. 367, it was held that a grant of land bounded by the bank of a navigable river or an international waterway does not extend *ad medium filum aquae*.

In *re Provincial Fisheries* (1896), 26 Can. S.C.R. 444, Gwynne, J., said that the rule that riparian proprietors

de l'ouest canadien ne l'ont pas appliquée aux rivières navigables. Ainsi, dans l'affaire *Re Iverson and Greater Winnipeg Water District* (1921), 57 D.L.R. 184 (C.A. Man.), le juge Dennistoun a écrit ceci, aux pp. 202 et 203:

[TRADUCTION] À mon avis, ces renvois à la common law d'Angleterre indiquent clairement que ces règles de droit ne s'appliquent pas et ne se sont jamais appliquées aux conditions dans la province. Ici, que ce soit en vertu de la tenure de la Baie d'Hudson ou, depuis 1869, en vertu du titre dévolu à la Couronne, les droits publics sur les eaux navigables ont précédé et remplacé tous droits privés acquis, par concession ou colonisation, à l'égard des rives d'un cours d'eau navigable. Dans un pays occupé dès le départ par des chasseurs, des trappeurs, des pêcheurs et des commerçants, qui avaient pour principales — et pour ainsi dire uniques — voies de transport les rivières et autres cours d'eau, de telles règles de droit étaient contraires aux besoins et aux exigences de la collectivité toute entière.

Il est possible de douter de l'applicabilité de la common law d'Angleterre aux rivières navigables, pour ce qui est de la règle *ad medium*, si on se rappelle que l'importance des droits publics sur les eaux sans marée navigables n'était pas reconnue en Angleterre lorsqu'un titre foncier était acquis à l'égard des rives de ces eaux.

Dans notre pays, le droit du public de naviguer et de pêcher dans toutes les eaux navigables existe, et il est reconnu depuis toujours.

De même, au cours de la même année, dans *Flewelling c. Johnston* (1921), 59 D.L.R. 419, la Cour d'appel de l'Alberta a conclu que la présomption prévue par la common law d'Angleterre ne s'appliquait pas aux conditions fort différentes existant au Canada. Bref, les «conditions locales» qui existaient au Canada rendaient la common law inapplicable aux rivières navigables. Comme le juge Beck l'a écrit dans ses motifs, aux pp. 422 et 423:

[TRADUCTION] Dans l'arrêt *Barthel c. Scotten* (1895), 24 R.C.S. Can. 367, il a été jugé qu'en cas d'attribution d'un bien-fonds délimité par la rive d'une rivière navigable ou d'une voie d'eau internationale, le bien-fonds ainsi attribué ne s'étend pas *ad medium filum aquae*.

In *re Provincial Fisheries* (1896), 26 R.C.S. Can. 444, le juge Gwynne a déclaré que la règle portant que les

own ad medium filum aquae does not apply to the great lakes or navigable rivers.

In *Keewatin Power Co. v. Kenora* (1906), 13 O.L.R. 237, Anglin, J. held, as stated in the head note, that: —

“The restriction of the presumption of the common law, as administered in England, in favour of Crown ownership of the alveus of navigable waters, for the protection of public rights of navigation and fishery therein, to navigable tidal waters, is apparently due to the non-recognition in early times of the necessity of protecting such public rights in other navigable waters, and an acquiescence in the right of riparian owners of land bordering thereon to the bed of such waters ad medium filum aquae; whereas in this Province such public rights in all rivers navigable in fact have been deemed always existent in the Crown ex jure naturae, so that the title in the bed thereof remained in the Crown after it had made grants of land bordering upon the banks of such rivers, the doctrine of ad medium filum aquae not applying thereto.”

This Court has declared in *Rex v. Cyr* (1917), 38 D.L.R. 601, 29 Can. Cr. Cas. 77, 12 Alta. L.R. 320 at p. 325, that where resort is to be had to the common law the applications of its principles are not necessarily to result in same decisions as have been or may be given by the English Courts, but that account must be taken of the different conditions prevailing in this country, not merely physical conditions but the general conditions of our public affairs and the general attitude of the community in regard to the particular matter in question.

The decision of Anglin, J., was reversed by the Ontario Court of Appeal (1908), 16 O.L.R. 184, but explicitly on the ground of the precise wording of the statute of the Province, R.S.O. 1897, ch. 111, sec. 1, enacting that “In all matters of controversy relative to property and civil rights, resort shall continue to be had to the laws of England as they stood on the said 15th of October, 1792, as the rule for the decision of the same. . . . except so far as the said laws may have been repealed by any Act of the late Province of Upper Canada . . . still having the force of law in Ontario, or by these Revised Statutes.”

propriétaires riverains sont propriétaires ad medium filum aquae ne s'applique pas aux grands lacs ni aux rivières navigables.

Suivant le texte du sommaire de l'arrêt *Keewatin Power Co. c. Kenora* (1906), 13 O.L.R. 237, le juge Anglin a tiré la conclusion suivante:

«Si la présomption de common law — appliquée en Angleterre et en vertu de laquelle la Couronne est propriétaire du lit des eaux navigables, en vue de la protection des droits publics de navigation et de pêche dans ces eaux — ne vise que les eaux à marée navigables, c'est apparemment parce que, à l'origine, on ne reconnaissait pas la nécessité de protéger ces droits publics dans les autres eaux navigables, et que l'on acceptait que les propriétaires riverains avaient sur le lit de ces eaux un droit ad medium filum aquae; attendu que, dans notre province, ces droits publics dans toutes les rivières navigables ont, dans les faits, toujours été réputés appartenir à la Couronne ex jure naturae, celle-ci a conservé son titre sur le lit des rivières, même après avoir accordé des biens-fonds en bordure de leurs rives, la doctrine ad medium filum aquae ne s'y appliquant pas.»

Notre Cour a déclaré, dans *Rex c. Cyr* (1917), 38 D.L.R. 601, 29 Can. Cr. Cas. 77, 12 Alta. L.R. 320, à la p. 325, que si l'application des principes de common law s'avère nécessaire, elle ne doit pas pour autant donner lieu à des décisions identiques à celles qui ont été rendues par les tribunaux anglais ou qui pourraient l'être; il faut plutôt tenir compte des conditions différentes qui existent dans notre pays, non seulement de la géographie, mais également de l'état général de nos affaires publiques et de l'attitude générale de la collectivité à l'égard de la question soulevée.

La décision du juge Anglin a été infirmée par la Cour d'appel de l'Ontario (1908), 16 O.L.R. 184, mais explicitement sur le fondement du texte même de la disposition législative provinciale pertinente, R.S.O. 1897, ch. 111, art. 1, qui était ainsi rédigée: «Relativement à toute question litigieuse concernant la propriété et les droits civils, on continuera d'avoir recours aux lois d'Angleterre, suivant leur texte au 15 octobre 1792, à titre de règles régissant ce genre de questions [. . .] sauf dans la mesure où les lois en question ont été abrogées soit par une loi de l'ancienne province du Haut-Canada [. . .] toujours en vigueur en Ontario, soit par les présentes lois révisées.»

Beck J.A. then went on to cite s. 11 of the *North-West Territories Act*, R.S.C. 1886, c. 50,

Le juge Beck a ensuite cité l'art. 11 de l'*Acte des territoires du Nord-Ouest*, S.R.C. 1886, ch. 50,

which is to the same effect as s. 2 of the British Columbia *English Law Ordinance Act*. He observed at p. 424:

The words which I have quoted do not appear in the Ontario Act. The quoted word “applicable” means “suitable”, “properly adapted to the conditions of the country”. *Brand v. Griffin* (1908) 1 Alta. L. R. 510, I accept then, for this Province at least the view propounded by Anglin, J. In that view the doctrine that in non-tidal waters prima facie the title to the bordering lands runs ad medium filum aquae is not in force in the Province so far as to affect waters — lakes or rivers — which are in fact navigable. [Emphasis added.]

I am in complete agreement with the reasoning and conclusions of the Manitoba and Alberta Courts of Appeal. The wording of the Manitoba, Alberta, and British Columbia statutes leads inexorably to the conclusion that the decisions of the Manitoba and Alberta Courts of Appeal are correct and applicable to British Columbia.

This conclusion is further supported by the statements of La Forest J. in *Friends of the Oldman River Society v. Canada (Minister of Transport)*, [1992] 1 S.C.R. 3, at p. 54, where he said:

The common law of England has long been that the public has a right to navigate in tidal waters, but though non-tidal waters may be navigable in fact the public has no right to navigate in them, subject to certain exceptions not material here. Except in the Atlantic provinces, where different considerations may well apply, in Canada the distinction between tidal and non-tidal waters was abandoned long ago; see *In Re Provincial Fisheries* (1896), 26 S.C.R. 444; for a summary of the cases, see my book on *Water Law in Canada* (1973), at pp. 178-80. Instead the rule is that if waters are navigable in fact, whether or not the waters are tidal or non-tidal, the public right of navigation exists. That is the case in Alberta where the Appellate Division of the Supreme Court, applying the *North-West Territories Act*, R.S.C. 1886, c. 50, rightly held in *Flewelling v. Johnston* (1921), 59 D.L.R. 419, that the English rule was not suitable to the conditions of the province. There is

qui est au même effet que l’art. 2 de l’*English Law Ordinance Act* de la Colombie-Britannique. Il a fait l’observation suivante, à la p. 424:

[TRADUCTION] Les termes que j’ai cités ne figurent pas dans la loi de l’Ontario. Le mot «applicable» signifie «approprié», «bien adapté aux conditions existant dans le pays». *Brand c. Griffin* (1908), 1 Alta. L.R. 510. J’adhère donc, à tout le moins pour ce qui est de notre province, à l’opinion exprimée par le juge Anglin. À son avis, la doctrine portant que le titre sur les biens-fonds qui bordent des eaux sans marée s’étend à première vue ad medium filum aquae, ne s’applique pas, dans la province, aux eaux — lacs et rivières — qui dans les faits sont navigables. [Je souligne.]

Je suis en parfait accord avec le raisonnement et les conclusions des cours d’appel du Manitoba et de l’Alberta. Le texte des lois du Manitoba, de l’Alberta et de la Colombie-Britannique amène inexorablement à conclure que les décisions des cours d’appel du Manitoba et de l’Alberta sont correctes et s’appliquent à la Colombie-Britannique.

Cette conclusion est étayée également par les propos du juge La Forest dans l’arrêt *Friends of the Oldman River Society c. Canada (Ministre des Transports)*, [1992] 1 R.C.S. 3, à la p. 54, où il a déclaré ceci:

La common law d’Angleterre prévoit depuis longtemps que le public a un droit de navigation dans les eaux de marée; toutefois, bien que les eaux sans marée puissent être navigables, le public n’a pas le droit d’y naviguer, sous réserve de certaines exceptions qui ne sont pas pertinentes en l’espèce. Au Canada, la distinction entre les eaux de marée et les eaux sans marée a été abandonnée il y a longtemps, sauf dans les provinces de l’Atlantique où des considérations différentes pourraient bien s’appliquer; voir l’arrêt *In Re Provincial Fisheries* (1896), 26 R.C.S. 444; pour un sommaire des arrêts applicables, voir mon ouvrage intitulé *Water Law in Canada* (1973), aux pp. 178 à 180. La règle est plutôt la suivante: si les eaux sont navigables, que ce soient des eaux de marée ou sans marée, il existe un droit public de navigation. C’est le cas en Alberta où la Division d’appel de la Cour suprême, dans l’application de l’*Acte des territoires du Nord-Ouest*, S.R.C. 1886, ch. 50, a à bon droit statué dans l’arrêt *Flewelling c. Johnston* (1921), 59 D.L.R. 419, que la règle anglaise ne

no issue between the parties that the Oldman River is in fact navigable.

What is the Correct Test for Navigability, and Is the Bulkley River a Navigable River?

pouvait être appliquée à la province. Les parties ne contestent pas que la rivière Oldman est en fait navigable.

Quel est le critère applicable pour statuer sur la navigabilité, et la rivière Bulkley est-elle une rivière navigable?

It is clear that the *ad medium filum aquae* presumption has no application to navigable rivers in British Columbia. From the earliest times the Courts and legislatures of this country have refused to accept the application of a rule developed in England which is singularly unsuited to the vast non-tidal bodies of water in this country. It is therefore necessary to determine whether the Bulkley River can properly be considered to be a navigable river.

Il est évident que la présomption *ad medium filum aquae* ne s'applique pas aux rivières navigables de la Colombie-Britannique. Dès le départ, les législatures et les tribunaux du Canada ont refusé d'appliquer une règle élaborée en Angleterre et singulièrement peu adaptée à nos vastes étendues d'eau sans marée. Il est par conséquent nécessaire de déterminer si la rivière Bulkley peut, à juste titre, être considérée comme une rivière navigable.

To assess navigability, the entire length of the river from its mouth to the point where its navigability terminates must be considered. On this issue I am in agreement with the reasoning and conclusions of Wallace J.A. in the Court of Appeal. In particular I would adopt the statements of Anglin J. (as he then was) in the case of *Keewatin Power Co. v. Kenora (Town)* (1906), 13 O.L.R. 237 (H.C.). There the navigability of the Winnipeg River was in question. It was a river not unlike the Bulkley River in that various falls and rapids necessitated numerous portages between stretches of good water. Anglin J. wrote at p. 263:

Pour apprécier la navigabilité d'une rivière, il faut examiner tout son cours, de son embouchure jusqu'à l'endroit où la navigabilité prend fin. Sur cette question, je souscris au raisonnement et aux conclusions du juge Wallace de la Cour d'appel. Plus particulièrement, je fais miens les propos formulés par le juge Anglin (plus tard Juge en chef de notre Cour) dans l'affaire *Keewatin Power Co. c. Kenora (Town)* (1906), 13 O.L.R. 237 (H.C.), où il était question de la navigabilité de la rivière Winnipeg. Cette rivière n'était pas sans présenter des similitudes avec la rivière Bulkley, puisqu'elle comportait plusieurs chutes et rapides exigeant de nombreux portages entre les étendues d'eau praticables. Le juge Anglin a écrit ceci, à la p. 263:

But it is argued that in any event the *ad medium* rule should apply to such parts of navigable rivers as are in their natural state non-navigable owing to impediments such as falls or rapids. Such is not my opinion. Once the navigable character of the river is established, up to the point at which navigability entirely ceases the stream must be deemed a public highway, though above that point it is private property: *The Queen v. Robertson*, 6 S.C.R. 52.

[TRADUCTION] Or, l'on soutient que, de toute façon, la règle *ad medium* devrait s'appliquer aux parties des rivières navigables qui, à leur état naturel, ne sont pas navigables en raison d'obstacles tels que des chutes ou des rapides. Je ne suis pas d'accord. Une fois que la navigabilité de la rivière a été établie, celle-ci doit être considérée comme une voie publique jusqu'à l'endroit où sa navigabilité cesse entièrement, même si en amont de ce point elle est une propriété privée: *The Queen c. Robertson*, 6 R.C.S. 52.

The inconvenience which would ensue were the soil of the bed of the same river in alternate stretches vested in the Crown, *juris publici*, and in the riparian owners, *juris privati*, affords strong ground for the belief that the law is not in a condition which would produce such results. Then again, though navigation at the falls in the

Étant donné les problèmes qui découleraient du fait que différentes parties du lit d'une même rivière appartiendraient à la Couronne *juris publici* et aux propriétaires riverains *juris privati*, il y a de fortes raisons de croire que l'état du droit n'est pas tel que cela puisse se produire. Par ailleurs, bien que la navigation soit à

east branch of the Winnipeg river is presently impossible, the engineers say that a canal to overcome the natural obstacle which the falls present is quite possible. Is not the stream even at this point navigable *in posse*? I think it is.

There is judicial authority for the proposition that a natural interruption of navigation in a river, in its general character navigable, does not change its legal characteristics in that respect at the point of interruption, and that riparian owners are not at such point presumed to own the bed *ad medium filum*: *Re State Reservation at Niagara Falls* (1884), 16 Abbott's N. C. (N.Y.) 159, 187; 37 Hun 507, 547-8. [Emphasis added.]

Similarly, Henry J. in *Re Coleman and Attorney-General for Ontario* (1983), 143 D.L.R. (3d) 608 (Ont. H.C.), at p. 614 (cited with approval by Wallace J.A. at the Court of Appeal) found that:

Interruptions to navigation such as rapids on an otherwise navigable stream which may, by improvements such as canals be readily circumvented, do not render the river or stream non-navigable in law at those points. . . .

Finally, La Forest in his book *Water Law in Canada — The Atlantic Provinces*, *supra*, states at p. 181:

Thus the whole of a river or lake may be regarded as navigable even though at some point navigation may be impossible or possible only for small craft by reason of rapids or shoals.

The Bulkley River is navigable both above and below the Moricetown Canyon and should be considered a navigable river. The fact that it is not navigable at the Moricetown gorge cannot alter that conclusion. Since the *ad medium filum aquae* presumption has no application to navigable rivers in British Columbia, it has no application to the Bulkley River in its passage through the Moricetown Reserve. On this basis alone it can be concluded that reserve does not include the river.

l'heure actuelle impossible là où tombent les chutes dans le bras est de la rivière Winnipeg, les ingénieurs affirment qu'un canal pourrait très bien permettre de vaincre cet obstacle naturel. Le cours d'eau n'est-il pas, même à cet endroit, navigable *in posse*? Je crois que oui.

Il existe des décisions permettant d'avancer qu'un obstacle naturel à la navigation sur une rivière qui, de par sa nature générale, est navigable, ne change pas le caractère juridique de cette rivière à l'endroit de l'interruption, et que les propriétaires riverains ne sont pas, à cet endroit, présumés être les propriétaires du lit *ad medium filum*: *Re State Reservation at Niagara Falls* (1884), 16 Abbott's N. C. (N.Y.) 159, 187; 37 Hun 507, 547 et 548. [Je souligne.]

De même, le juge Henry dans l'arrêt *Re Coleman and Attorney-General for Ontario* (1983), 143 D.L.R. (3d) 608 (H.C. Ont.), à la p. 614 (cité et approuvé par le juge Wallace de la Cour d'appel), a conclu ainsi:

[TRADUCTION] Les obstacles à la navigation — des rapides, par exemple — sur un cours d'eau par ailleurs navigable, qui peuvent être facilement contournés au moyen d'améliorations — comme des canaux — ne rendent pas ce cours d'eau non navigable, au sens juridique, à ces endroits. . .

Enfin, La Forest, dans son ouvrage intitulé *Water Law in Canada — The Atlantic Provinces*, *op. cit.*, dit ceci, à la p. 181:

[TRADUCTION] Ainsi, l'ensemble de la rivière ou du lac peut être jugé navigable même si, à un certain endroit, la navigation peut se révéler impossible ou possible uniquement au moyen de petites embarcations en raison de la présence de rapides ou de hauts-fonds.

La rivière Bulkley étant navigable tant en amont qu'en aval du canyon de Moricetown, elle devrait être considérée comme une rivière navigable. Sa non-navigabilité à la gorge de Moricetown ne peut modifier cette conclusion. Étant donné que la présomption *ad medium filum aquae* ne s'applique pas aux rivières navigables en Colombie-Britannique, elle ne s'applique donc pas à la partie de la rivière Bulkley qui traverse la réserve de Moricetown. Pour ce seul motif, il est possible de conclure que la réserve n'inclut pas la rivière.

The Fishery is Separate from Ownership of the Bed

La pêche est dissociable de la propriété du lit

75 The appellant contends that the *ad medium filum aquae* presumption became applicable in British Columbia on November 18, 1858, when the common law of England was explicitly adopted as the law except to the extent that it was inapplicable. Accordingly, it is argued that when the Crown granted land to the Indians it implicitly included the title to the river *ad medium filum aquae*. Where, as in this case, the river is bordered on both sides by the reserve, the principle would act to give title to the entire river bed to the reserve. Accordingly, the river would be "on the reserve", subject only to the Crown's ability to demonstrate that such a grant was not intended. I cannot accept that position.

L'appelant prétend que la présomption *ad medium filum aquae* est devenue applicable en Colombie-Britannique le 18 novembre 1858, date à laquelle la common law d'Angleterre a été explicitement adoptée comme étant le droit en vigueur sauf dans la mesure où elle était inapplicable. Par conséquent, on plaide que, lorsque la Couronne a attribué des terres aux Indiens, elle a implicitement inclus le titre sur la rivière, *ad medium filum aquae*. Dans les cas où, comme en l'espèce, la rivière est bordée des deux côtés par la réserve, l'application du principe aurait pour effet de donner à la réserve le titre sur le lit entier de la rivière. Ainsi, la rivière se trouverait «on the reserve» («dans la réserve»), à moins seulement que la Couronne réussisse à démontrer qu'elle n'avait pas l'intention d'accorder un tel titre. Je ne peux souscrire à cette thèse.

76 To understand why the presumption does not apply requires a review of the common law rules concerning water. H. J. W. Coulson and Urquhart A. Forbes in *The Law relating to Waters* (2nd ed. 1902), at p. 100, explain the application of the *ad medium filum aquae* presumption in the following terms:

Afin de bien comprendre pourquoi la présomption ne s'applique pas, il convient d'examiner les règles de common law relatives aux eaux. H. J. W. Coulson et Urquhart A. Forbes dans *The Law relating to Waters* (2^e éd. 1902), décrivent ainsi l'application de la présomption *ad medium filum aquae*, à la p. 100:

When the lands of two conterminous proprietors are separated from each other by a running non-tidal stream of water, each proprietor is *primâ facie* owner of the soil of the *alveus*, or bed of the river, *ad medium filum aquae*. The soil of the *alveus* is not the common property of the two proprietors, but the share of each belongs to him in severalty Where the same person is the proprietor of the ground on both sides of the stream, he is *primâ facie* the proprietor of the whole of the channel. . . .

[TRADUCTION] Les propriétaires de biens-fonds adjacents, séparés par un cours d'eau sans marée, sont jusqu'à preuve du contraire propriétaires du sol de l'*alveus*, ou lit de la rivière, *ad medium filum aquae*. Le sol de l'*alveus*, n'est pas la propriété commune des propriétaires, mais chacun d'eux détient plutôt sa part individuellement [. . .] Lorsque les biens-fonds se trouvant de chaque côté d'un cours d'eau appartiennent à la même personne, celle-ci est, jusqu'à preuve du contraire, propriétaire de tout le lit. . . .

The presumption that, by a conveyance describing the land thereby conveyed as bounded by a river, it is intended that the bed of the river, *usque ad medium filum*, should pass, may be rebutted by proof of surrounding circumstances in relation to the property in question, which negative the possibility of such having been the intention.

La présomption voulant que, dans les cas où un acte de transfert indique que les terres visées sont délimitées par une rivière ce fait témoigne de l'intention de transférer également le lit de la rivière *usque ad medium filum*, peut être repoussée en apportant la preuve de circonstances relatives aux biens-fonds en question réfutant que telle ait pu être l'intention.

One of the rights that flow from this possession of the bed is the right to the fishery. This is explained by the authors, at p. 104, in the following terms:

The right of fishery being a right of property, the presumption is that each owner of land abutting on a non-tidal stream has the right of fishing in front of his land, *usque ad medium filum aquae*; and where a man possesses land on both sides of the water, he has the sole right of fishing.

However, the authors go on to explain that this right of fishery is severable from the title, with the result that the right can be granted to another, or reserved from a grant. As Wightman J. stated in *Marshall v. Ulleswater Steam Navigation Co.* (1863), 3 B. & S. 732, 122 E.R. 274, at p. 278 E.R.:

... it is clear upon the authorities that the soil of land covered with water may, together with the water and the right of fishery therein, be specially appropriated to a third person, whether he have land or not on the borders thereof or adjacent thereto.

This point is explained very clearly by La Forest in *Water Law in Canada — The Atlantic Provinces*, *supra*, at p. 236, where he states:

Though the right of fishing is usually enjoyed as an incident to the bed, it may of course be transferred to others by lease or licence. Moreover it can be granted, or reserved from a grant, and exist as a separate property right severed from the ownership of the soil.

Clearly the fishery, even where the *ad medium filum aquae* presumption otherwise applies, can be severed from the ownership of the river bed. The evidence presented clearly establishes that there was no intent on the part of the Crown to grant an exclusive fishery. As a result, any grants of title to land adjacent to rivers, navigable or otherwise, must be taken as excluding the fishery, even if it was accepted that the *ad medium filum aquae* presumption was otherwise applicable. The conse-

Un des droits qui découle de la possession du lit est le droit de pêche. Les auteurs expliquent ce droit dans les termes suivants, à la p. 104:

[TRADUCTION] Comme le droit de pêche est un droit de propriété, suivant la présomption, chaque propriétaire d'un bien-fonds attenant à un cours d'eau sans marée a le droit de pêcher à la hauteur de son bien-fonds, *usque ad medium filum aquae*; de plus, si la même personne est propriétaire des biens-fonds se trouvant des deux côtés du cours d'eau, elle possède alors en exclusivité le droit de pêche.

Cependant, les auteurs poursuivent leurs explications en disant que, comme le droit de pêche est séparable du titre, il peut être accordé à quelqu'un d'autre ou encore être réservé dans un acte de transfert. Ainsi que le juge Wightman l'a déclaré dans *Marshall c. Ulleswater Steam Navigation Co.* (1863), 3 B. & S. 732, 122 E.R. 274, à la p. 278 E.R.:

[TRADUCTION] ... il est évident, à la lumière de la jurisprudence et de la doctrine, que le sol de terres submergées, ainsi que l'eau et le droit d'y pêcher, est susceptible d'appropriation particulière par un tiers, que celui-ci possède ou non des terres bordant le sol en question ou adjacentes à celui-ci.

G. V. La Forest a très clairement expliqué ce point dans *Water Law in Canada — The Atlantic Provinces*, *op. cit.*, à la p. 236, où il écrit:

[TRADUCTION] Bien que l'on jouisse généralement du droit de pêche en tant qu'attribut de la propriété du lit du cours d'eau, ce droit peut évidemment être transféré à des tiers au moyen d'un bail ou d'un permis. De plus, il peut être accordé ou réservé en cas de transfert, et exister en tant que droit de propriété distinct, disjoint de la propriété du sol.

Il va de soi que, même dans les cas où la présomption *ad medium filum aquae* s'applique par ailleurs, la pêcherie peut être disjointe de la propriété du lit de la rivière. La preuve présentée établit clairement que la Couronne n'avait pas l'intention d'accorder de pêcherie exclusive. En conséquence, il faut considérer que la pêcherie n'est pas comprise en cas de cession de tout titre sur un bien-fonds adjacent à une rivière, navigable ou non, même s'il était admis que la présomption

77

1996 CanLII 245 (SCC)

80

quence for this appellant is obvious. Even if the *ad medium filum aquae* should make the soil of the river bed part of the reserve, the explicit reservation of the fishery from the grant makes any by-law with respect to the fishery *ultra vires* the band's authority.

The Presumption is Rebutted

Any intent to grant the bed of the river has been conclusively rebutted. It will be remembered that the acreage of the reservation indicates an intention to exclude the river. In addition, the retention of the fishery by the Crown leads to the presumption that the bed of the river was retained by the Crown. As Coulson and Forbes point out at p. 368 in *The Law relating to Waters, supra*, the cases of *Marshall v. Ulleswater Steam Navigation Co., supra*, and *Holford v. Bailey* (1846), 8 Q.B. 1000, 115 E.R. 1150 (reversed in the Exchequer Chamber on other grounds (1850), 13 Q.B. 426, 116 E.R. 1325), stand for the proposition that:

No doubt the allegation of a several fishery, *primâ facie*, imports ownership of the soil, though they are not necessarily united.

ad medium filum aquae était par ailleurs applicable. La conséquence pour l'appelant en l'espèce est évidente. Même si la présomption *ad medium filum aquae* avait pour effet de faire du lit de la rivière une partie de la réserve, la réservation explicite de la pêche dans le transfert rend tout règlement administratif de pêche *ultra vires* des pouvoirs de la bande.

La présomption est réfutée

L'existence de toute intention d'accorder le lit de la rivière a été réfutée de façon décisive. On se rappellera que la superficie de la réserve témoigne de l'intention d'exclure la rivière de celle-ci. En outre, le fait que la Couronne conserve la pêche fait naître la présomption qu'elle a également conservé le lit de la rivière. Comme le soulignent Coulson et Forbes, dans *The Law relating to Waters, op. cit.*, à la p. 368, les arrêts *Marshall c. Ulleswater Steam Navigation Co.*, précité, et *Holford c. Bailey* (1846), 8 Q.B. 1000, 115 E.R. 1150 (infirmer par la Chambre de l'Échiquier pour d'autres motifs (1850), 13 Q.B. 426, 116 E.R. 1325), appuient la thèse suivante:

[TRADUCTION] Il ne fait aucun doute que l'existence d'une pêche distincte implique, à première vue, la propriété du sol, même si ces deux éléments ne sont pas nécessairement réunis.

En conséquence, il semble que les règles de la common law, telles qu'elles existaient à l'époque de l'attribution de la réserve, portent à conclure que la présomption que le titre sur le lit de la rivière serait transmis du fait de l'attribution de la rive a été réfutée. Il ne fait pas de doute que la Couronne avait l'intention de conserver la possession de la pêche. Par conséquent, il est impossible de présumer que l'attribution de la rive incluait le titre sur le lit de la rivière *ad medium filum aquae*. Au contraire, suivant la présomption, le titre sur la pêche suit le titre sur le lit de la rivière. L'appelant n'a pas réussi à démontrer quelque intention ou action de la Couronne réfutant cette présomption.

It may now be helpful to summarize what I consider to be the relevant evidence and the applicable principles of law which determine the first issue.

1. The Crown in all of its manifestations was consistently clear in its statements that no exclusive fishery should be granted to Indian bands in British Columbia. This is consistent with the fact that the Crown had no power to grant an exclusive fishery, and that after Confederation this would involve the grant of provincial property.
2. The correct test for an assessment of navigability is to consider the entire length of the river. A section of the river which is non-navigable in fact does not necessarily render either the river as a whole or that section non-navigable in law if it is found to be substantially navigable throughout. The Bulkley River is navigable both above and below the Moricetown Canyon, and is therefore a navigable river.
3. The presumption *ad medium filum aquae* does not apply on the facts of this case because:
 - a. Correctly considered the river is navigable, and the application of *ad medium filum aquae* to navigable rivers was not adopted into the common law of British Columbia since it was unsuited to local conditions.
 - b. Fishing as a right can be the subject of a separate grant or reservation. On the facts of this case it is clear that the fishery was reserved from the allotment.

It follows that the band by-law does not apply to the Bulkley River.

It is now necessary to determine whether the appellant's s. 35 rights were infringed by the licensing requirement of the Department of Fisheries and Oceans. If they were not, it still must be considered whether the conditions of the licence

Il pourrait être utile, à ce moment-ci, de résumer ce que j'estime être les éléments de preuve pertinents et les principes de droit applicables pour trancher la première question:

1. Chaque fois qu'elle s'est exprimée, la Couronne a toujours clairement indiqué qu'aucune pêche exclusive ne devait être accordée aux bandes indiennes en Colombie-Britannique. Cette constatation est compatible avec le fait que la Couronne n'avait pas le pouvoir d'accorder de pêche exclusive, et qu'après la Confédération, une telle mesure aurait impliqué la cession d'un bien provincial.
2. Le bon critère pour apprécier la navigabilité d'une rivière consiste à considérer ce cours d'eau dans son ensemble. Si une partie de la rivière n'est pas navigable dans les faits, cela n'a pas pour effet de rendre l'ensemble de la rivière ou la partie en question non navigable au sens juridique, s'il est jugé que la rivière est en grande partie navigable sur toute sa longueur. La rivière Bulkley étant navigable tant en amont qu'en aval du canyon de Moricetown, elle est donc une rivière navigable.
3. Compte tenu des faits de l'espèce, la présomption *ad medium filum aquae* ne s'applique pas, et ce pour les raisons suivantes:
 - a. Suivant l'examen approprié, la rivière est navigable; de plus, le principe de l'application de la présomption *ad medium filum aquae* aux rivières navigables n'a pas été adopté dans la common law de la Colombie-Britannique puisque cette règle n'était pas adaptée aux conditions locales.
 - b. Le droit de pêche peut faire l'objet d'une attribution ou réservation distincte. Il ressort clairement des faits de l'espèce que la pêche a été réservée au moment de l'attribution.

Il s'ensuit que le règlement administratif de la bande ne s'applique pas à la rivière Bulkley.

Il est maintenant nécessaire de décider si l'obligation d'obtenir un permis qui est imposée par le ministère des Pêches et des Océans a porté atteinte aux droits garantis à l'appelant par l'art. 35. Dans la négative, il faut ensuite se demander si les con-

infringe the s. 35 rights and if so whether they can be justified.

Was the Appellant's Section 35 Right to Fish for Food Violated by the Licensing Requirement of the Department of Fisheries and Oceans?

Does Licensing Constitute a *Prima Facie* Violation of Section 35?

The appellant contends that the mere requirement of a licence constitutes a *prima facie* infringement of his s. 35 aboriginal rights. This section of the *Constitution Act, 1982* provides:

35. (1) The existing aboriginal and treaty rights of the aboriginal peoples of Canada are hereby recognized and affirmed.

It was held in *Sparrow, supra*, at p. 1112, that the onus of establishing a *prima facie* infringement of an aboriginal right rests on the claimant of that right.

The first step in this process is to establish the existence and the extent of the aboriginal right. I am satisfied that the appellant has successfully demonstrated an aboriginal right to fish for food and ceremonial purposes. The Summary Conviction Appeal Judge, Millward J., specifically found in oral reasons from judgment dated July 12, 1990 that:

... the aboriginal right includes the right to choose the period of time, whether early in the year when the ice is still in the river, or after the end of August, up to a date in September, when steelhead are normally taken, the right to select persons intended to be the recipients of the fish for ultimate consumption, the right to select the purpose for which the fish is to be used, that is, for food or ceremonial or religious purposes, and the method or manner of fishing. ...

(*R. v. Nikal*, [1991] 1 C.N.L.R. 162, at p. 167.)

ditions du permis portent atteinte à ces droits et, si oui, si cette atteinte peut être justifiée.

L'obligation d'obtenir un permis qui est imposée par le ministère des Pêches et des Océans a-t-elle porté atteinte au droit de pêcher pour se nourrir garanti à l'appelant par l'art. 35?

La délivrance de permis constitue-t-elle à première vue une atteinte à l'article 35?

L'appelant prétend que le seul fait d'exiger un permis constitue à première vue une atteinte aux droits ancestraux que lui garantit l'art. 35. Cette disposition de la *Loi constitutionnelle de 1982* prévoit ceci:

35. (1) Les droits existants — ancestraux ou issus de traités — des peuples autochtones du Canada sont reconnus et confirmés.

Dans l'arrêt *Sparrow*, précité, à la p. 1112, il a été jugé qu'il incombe à la personne revendiquant un droit ancestral d'établir qu'il a été porté atteinte à première vue à ce droit.

La première étape de cette analyse consiste à établir l'existence et la portée du droit ancestral. Je suis convaincu que l'appelant a réussi à démontrer l'existence d'un droit ancestral de pêcher à des fins alimentaires et rituelles. Le juge d'appel Millward des poursuites sommaires a explicitement conclu ainsi, dans un jugement oral rendu le 12 juillet 1990:

[TRADUCTION] ... le droit ancestral inclut le droit de choisir la période de pêche, que ce soit au début de l'année lorsque la rivière est encore gelée, ou après le mois d'août, jusqu'à une date donnée au mois de septembre, lorsque les truites arc-en-ciel sont normalement prises, le droit de désigner les personnes à qui on entend remettre le poisson pour qu'elles le consomment en bout de ligne, le droit de choisir à quelles fins le poisson servira — savoir à des fins alimentaires, rituelles ou religieuses — et la façon de pêcher ou les méthodes utilisées. ...

(*R. c. Nikal*, [1991] 1 C.N.L.R. 162, à la p. 167.)

This, based on the evidence, is an appropriate finding as to the scope of the aboriginal rights of the Wet'suwet'en people with respect to the fishery

À la lumière de la preuve, il s'agit là d'une conclusion appropriée pour ce qui est de la portée des droits ancestraux du peuple Wet'suwet'en sur la

subject to one qualification. Specifically, the selection of the ultimate recipients of the fish is not an unqualified right. Rather, the evidence adduced went no farther than establishing that the appellant as a Wet'suwet'en had the right to provide to other members of the band those fish that are necessary for their personal food and ceremonial needs. I take no position as to whether the right extends beyond that.

I cannot accept Millward J.'s finding that the appellant has a right not to comply with the directions of the Department of Fisheries and Oceans. This finding is not supported by the evidence, nor is it sustainable in law. Moreover, this conclusion, if not conceded, was not seriously contested by the appellant.

With respect to licensing, the appellant takes the position that once his rights have been established, anything which affects or interferes with the exercise of those rights, no matter how insignificant, constitutes a *prima facie* infringement. It is said that a licence by its very existence is an infringement of the aboriginal right since it infers that government permission is needed to exercise the right and that the appellant is not free to follow his own or his band's discretion in exercising that right.

This position cannot be correct. It has frequently been said that rights do not exist in a vacuum, and that the rights of one individual or group is necessarily limited by the rights of another. The ability to exercise personal or group rights is necessarily limited by the rights of others. The government must ultimately be able to determine and direct the way in which these rights should interact. Absolute freedom in the exercise of even a *Charter* or constitutionally guaranteed aboriginal right has never been accepted, nor was it intended. Section 1 of the *Canadian Charter of Rights and Freedoms* is perhaps the prime example of this principle. Absolute freedom without any restriction necessarily infers a freedom to live without any laws. Such a concept is not acceptable in our society. On this issue the reasons of Blair J.A. in *R. v. Agawa* (1988), 65 O.R. (2d) 505 (C.A.), at p. 524, are per-

pêcherie, à une réserve près toutefois. En effet, le droit de décider quelles sont les personnes qui recevront le poisson en bout de ligne n'est pas un droit absolu. Au contraire, la preuve présentée a simplement permis d'établir que l'appelant, en tant que Wet'suwet'en, a le droit de fournir à d'autres membres de la bande le poisson nécessaire pour satisfaire leurs besoins alimentaires et rituels. Je n'exprime aucune opinion quant à la question de savoir si ce droit a une portée plus large.

Je ne peux souscrire à la constatation du juge Millward que l'appelant a le droit de ne pas se conformer aux ordres du ministère des Pêches et des Océans. Cette constatation n'est pas étayée par la preuve et elle n'est pas soutenable en droit. En outre, même si l'appelant n'a pas concédé ces conclusions, il ne les a pas sérieusement contestées.

En ce qui concerne le régime de délivrance de permis, l'appelant prétend que, une fois que l'existence de ses droits a été établie, tout ce qui en entrave ou en gêne l'exercice, ne serait-ce que de façon négligeable, constitue à première vue une atteinte. On affirme que l'existence même du permis porte atteinte au droit ancestral en ce qu'elle implique que la permission du gouvernement est nécessaire pour exercer ce droit, et que l'appelant n'est pas libre de s'en remettre au pouvoir discrétionnaire de la bande ou au sien pour l'exercer.

Cette thèse ne peut être fondée. Il a fréquemment été déclaré que les droits n'existent pas dans l'abstrait et que les droits d'un individu ou d'un groupe sont nécessairement limités par les droits d'autrui. La capacité d'exercer des droits individuels ou collectifs est nécessairement restreinte par les droits d'autrui. Le gouvernement doit, en dernier ressort, être capable d'établir ou de régir la façon dont ces droits devraient interagir. La liberté absolue d'exercer un droit, même un droit ancestral protégé par la *Charte* ou garanti par la Constitution, n'a jamais été reconnue ni voulue. L'article premier de la *Charte canadienne des droits et libertés* est peut-être la meilleure illustration de ce principe. La liberté absolue, sans restriction aucune, implique nécessairement la liberté de vivre en marge des lois. Un tel concept est inacceptable dans notre société. Sur ce point, les motifs du juge

suasive and convincing. He recognized the need for a balanced approach to limitations on treaty rights, stating:

... Indian treaty rights are like all other rights recognized by our legal system. The exercise of rights by an individual or group is limited by the rights of others. Rights do not exist in a vacuum and the exercise of any right involves a balancing with the interests and values involved in the rights of others. This is recognized in s. 1 of the *Canadian Charter of Rights and Freedoms* which provides that limitation of Charter rights must be justified as reasonable in a free and democratic society.

93 This conclusion is consistent with the approach to interpreting s. 35 rights as set out in *Sparrow*, *supra*, at p. 1110:

The constitutional recognition afforded by the provision therefore gives a measure of control over government conduct and a strong check on legislative power. While it does not promise immunity from government regulation in a society that, in the twentieth century, is increasingly more complex, interdependent and sophisticated, and where exhaustible resources need protection and management, it does hold the Crown to a substantive promise. [Emphasis added.]

94 This case provides an example of the wisdom of the reasoning referred to in *Sparrow* and *Agawa*. Here, the aboriginal right to fish must be balanced against the need to conserve the fishery stock. The existence of an aboriginal right to fish cannot automatically deny the ability of the government to set up a licensing scheme or program since the exercise of the right itself is dependant on the continued existence of the resource. The very right to fish would in time become meaningless if the government could not enact a licensing scheme which could form the essential foundation of a conservation program.

Blair dans l'arrêt *R. c. Agawa* (1988), 65 O.R. (2d) 505 (Ont.), à la p. 524, sont persuasifs et convainquants. Il y a reconnu la nécessité d'appliquer une analyse équilibrée en matière de restriction des droits issus de traités, déclarant ceci:

[TRADUCTION] ... les droits issus de traités des Indiens ne diffèrent pas de tous les autres droits reconnus par notre système juridique. L'exercice d'un droit par une personne ou un groupe est restreint par les droits d'autrui. Les droits n'existent pas dans l'abstrait et, dans l'exercice de tout droit, il faut trouver un juste équilibre avec les intérêts et les valeurs qui sous-tendent les droits d'autrui. Ce fait est reconnu à l'article premier de la *Charte canadienne des droits et libertés*, qui énonce que toute restriction des droits garantis par la Charte doit être justifiée comme étant raisonnable dans le cadre d'une société libre et démocratique.

Cette conclusion est compatible avec l'approche applicable pour interpréter les droits garantis par l'art. 35, qui a été formulée dans l'arrêt *Sparrow*, précité, à la p. 1110:

La reconnaissance constitutionnelle exprimée dans la disposition en cause permet donc, dans une certaine mesure, de contrôler la conduite du gouvernement et de limiter fortement le pouvoir du législateur. Bien qu'elle ne constitue pas une promesse d'immunité contre la réglementation gouvernementale dans une société qui, au XX^e siècle, devient de plus en plus complexe et interdépendante et où il est nécessaire de protéger et de gérer les ressources épuisables, cette reconnaissance représente un engagement important de la part de la Couronne. [Je souligne.]

La présente affaire illustre bien la sagesse du raisonnement énoncé dans les arrêts *Sparrow* et *Agawa*. En l'espèce, il faut mettre en équilibre le droit ancestral de pêcher et la nécessité de conserver les ressources halieutiques. L'existence d'un droit ancestral de pêcher ne peut automatiquement priver le gouvernement de la capacité de mettre sur pied un régime ou programme de délivrance de permis, car l'exercice du droit lui-même dépend de la survie de ces ressources. Le droit même de pêcher perdrait avec le temps tout son sens si le gouvernement ne pouvait adopter un régime de délivrance de permis susceptible de constituer l'assise essentielle d'un programme de conservation.

It must also be remembered that aboriginal rights, by definition, can only be exercised by aboriginal peoples. Moreover, the nature and scope of aboriginal rights will frequently be dependant upon membership in particular bands who have established particular rights in specific localities. In this context, a licence may be the least intrusive way of establishing the existence of the aboriginal right for the aboriginal person as well as preventing those who are not aboriginals from exercising aboriginal rights.

The situation presented in this case pertaining to s. 35 aboriginal rights is analogous to the mobility rights guaranteed under s. 6(1) of the *Charter*. That section guarantees the right of every citizen of Canada to enter, remain in and leave Canada. This right, by definition, is limited to citizens of Canada, and its enforcement requires some means of identifying Canadian citizens. Accordingly, a requirement that citizens present a passport to enter Canada would not be an infringement of their mobility rights since the passport serves to identify those who can exercise the rights of Canadian citizens.

This is not to say that there are not conditions of the licence which could constitute infringements of s. 35 rights. Even a simple licence could constitute an infringement if it could only be obtained with great difficulty or expense. The test for this assessment has been set out clearly in *Sparrow*, beginning at p. 1111:

The first question to be asked is whether the legislation in question has the effect of interfering with an existing aboriginal right. If it does have such an effect, it represents a *prima facie* infringement of s. 35(1).

The questions which must be resolved in order to determine whether a *prima facie* infringement has occurred are set out at p. 1112:

To determine whether the fishing rights have been interfered with such as to constitute a *prima facie* infringement of s. 35(1), certain questions must be

Il faut également se rappeler que, par définition, les droits ancestraux ne peuvent être exercés que par les peuples autochtones. En outre, la nature et la portée des droits ancestraux dépendent fréquemment de l'appartenance à une bande particulière ayant établi l'existence de certains droits dans une localité donnée. Dans ce contexte, un permis peut constituer le moyen le moins attentatoire d'établir l'existence du droit ancestral en faveur des autochtones et d'empêcher les non-autochtones d'exercer des droits ancestraux.

La situation qui se présente en l'espèce relativement aux droits ancestraux protégés par l'art. 35 est analogue à la liberté de circulation garantie au par. 6(1) de la *Charte*. Ce paragraphe garantit à tout citoyen canadien le droit de demeurer au Canada, d'y entrer ou d'en sortir. Par définition, ce droit est limité aux citoyens canadiens et, pour en assurer le respect, il est nécessaire d'appliquer certains moyens permettant d'identifier les citoyens canadiens. Par conséquent, exiger des citoyens qu'ils présentent leur passeport pour entrer au Canada ne serait pas une atteinte à leur liberté de circulation, puisque le passeport sert à identifier ceux qui peuvent exercer les droits appartenant aux citoyens canadiens.

Cela ne revient pas à dire que l'une ou l'autre des conditions prévues par le permis ne pourrait pas constituer une atteinte aux droits garantis par l'art. 35. Même un simple permis pourrait constituer une atteinte, s'il n'est possible de l'obtenir qu'à grands frais ou avec beaucoup de difficultés. Le critère applicable pour apprécier l'existence d'une telle atteinte a été énoncé clairement dans l'arrêt *Sparrow*, à partir de la p. 1111:

La première question à poser est de savoir si la loi en question a pour effet de porter atteinte à un droit ancestral existant. Dans l'affirmative, elle constitue une violation à première vue du par. 35(1).

Les questions qu'il faut trancher pour déterminer s'il y a atteinte à première vue sont formulées à la p. 1112:

Pour déterminer si les droits de pêche ont subi une atteinte constituant une violation à première vue du par. 35(1), on doit poser certaines questions. Premièrement,

95

1996 CanLII 245 (SCC)

96

97

98

asked. First, is the limitation unreasonable? Second, does the regulation impose undue hardship? Third, does the regulation deny to the holders of the right their preferred means of exercising that right? The onus of proving a *prima facie* infringement lies on the individual or group challenging the legislation.

la restriction est-elle déraisonnable? Deuxièmement, le règlement est-il indûment rigoureux? Troisièmement, le règlement refuse-t-il aux titulaires du droit le recours à leur moyen préféré de l'exercer? C'est au particulier ou au groupe qui conteste la mesure législative qu'il incombe de prouver qu'il y a eu violation à première vue.

99 Applying these tests to the facts of this case reveals that the licence itself, as distinct from its conditions, does not constitute an infringement of s. 35(1). The simple requirement of a licence is not in itself unreasonable; rather, it is necessary for the exercise of the right itself. Accordingly the first question, is licensing unreasonable, must be answered in the negative.

L'application de ces critères aux faits de l'espèce révèle que le permis lui-même, par opposition aux conditions dont il est assorti, ne constitue pas une atteinte au par. 35(1). La simple obligation d'être titulaire d'un permis n'est pas en soi déraisonnable, mais au contraire nécessaire à l'exercice du droit lui-même. En conséquence, il faut répondre par la négative à la première question, soit celle de savoir si la délivrance de permis est une mesure déraisonnable.

100 The second question is whether the regulation imposes an undue hardship. The term "undue hardship" implies that a situation exists which imposes something more than mere inconvenience. It follows that a licence which is freely and readily available cannot be considered an undue hardship. The situation might be different if, for example, the licence could only be obtained at locations many kilometres away from the reserve and accessible only at great inconvenience or expense.

La seconde question consiste à déterminer si le règlement est indûment rigoureux. Pour qu'une situation soit «indûment rigoureuse», elle doit causer plus qu'un simple inconvénient. Il s'ensuit qu'un permis gratuit et facile à obtenir ne peut être considéré comme étant une mesure indûment rigoureuse. La situation pourrait être différente si, par exemple, il n'était possible de se procurer le permis que dans des endroits situés à de nombreux kilomètres de la réserve et accessibles uniquement à grands frais ou au prix de sérieux inconvénients.

101 The final question is whether the right holder is denied the preferred means of exercising the right. The licence by itself, without its conditions, cannot affect the preferred means of exercising the right since at its most basic it is nothing more than a form of identification. Requiring identification so as to assist fisheries officers in distinguishing rights holders from non-rights-holders cannot be an interference with the preferred means of exercising the right. It follows that the licence itself, without considering its conditions, cannot be said to constitute an infringement of the aboriginal right to fish. Thus the mere requirement of a licence in the circumstances of this case does not amount to an infringement of the appellant's s. 35 rights.

La dernière question est de savoir si le règlement prive le titulaire du droit en cause de la possibilité de recourir à ses moyens préférés pour l'exercer. Le permis lui-même, indépendamment de ses conditions, ne peut gêner l'exercice du droit par les moyens préférés puisque, essentiellement, il n'est rien d'autre qu'un moyen d'identification. Le fait d'obliger les pêcheurs à s'identifier, de façon à permettre aux agents des pêches de distinguer ceux qui sont titulaires du droit de ceux qui ne le sont pas, ne peut constituer une entrave à l'exercice de ce droit par les moyens préférés. Il s'ensuit qu'il est impossible d'affirmer que, indépendamment de ses conditions, le permis lui-même constitue une atteinte au droit ancestral de pêcher. Ainsi, dans les circonstances de l'espèce, le simple fait d'exiger un permis ne constitue pas une atteinte aux droits garantis à l'appelant par l'art. 35.

Indeed as a general rule it can be said that the simple requirement of a licence will seldom constitute a *prima facie* infringement of the s. 35 aboriginal right to fish. If the salmon fishery is to survive, there must be some control exercised by a central authority. It is the federal government which will be required to manage the fishery and see to the improvement and the increase of the stock of that fishery. It is for the federal government to ensure that all users who are entitled to partake of the salmon harvest have the opportunity to obtain an allotment pursuant to the scheme of priorities set out in *Sparrow*. Any system of control must commence with a licensing scheme. It is through the issuing of licences to the various type of users that the department will be able to know at least the numbers of fishers and the categories of those that are fishing. This will provide the first rough basis from which the department can make the estimates necessary to manage the fishery resource. The licence is the essential first step in the preservation and management of this fragile resource. This need to manage the stock goes far further than simply preventing the elimination of the salmon. Management imports a duty to maintain and increase reasonably the resource. The licence assists this duty by providing a means of identification that helps to ensure that only those permitted to do so are fishing in the authorized areas. It serves as a means of control by eliminating those that do not have a licence from fishing.

The Specific Terms of this Licence

Although licensing by itself will not as a rule constitute a *prima facie* infringement of the aboriginal right to fish, the government will be required to justify those conditions of a licence which on their face infringe the s. 35 right to fish. The 1986 licence at issue in this case contains several conditions. Some of these printed on the licence itself are mandatory. Others are completed

De fait, il est possible d'affirmer que, en règle générale, le seul fait d'exiger l'obtention d'un permis constituera rarement une atteinte à première vue au droit ancestral de pêche garanti par l'art. 35. Pour que la pêche au saumon survive, il faut qu'une autorité centrale exerce une certaine forme de surveillance. C'est au gouvernement fédéral qu'il incombera de gérer la pêcherie et de voir à l'amélioration et à l'augmentation des stocks de poisson dans celle-ci. Il appartient au gouvernement fédéral de faire en sorte que tous les utilisateurs ayant droit à une part de la récolte de saumon aient la possibilité de l'obtenir, conformément à l'ordre de priorité établi dans l'arrêt *Sparrow*. Tout mécanisme de surveillance s'appuie normalement sur un régime de délivrance de permis. La délivrance de permis aux différentes catégories d'utilisateurs permet au ministère de savoir à tout le moins combien il y a de pêcheurs dans ces catégories. Par ce moyen, le ministère recueille les données de base à partir desquelles il peut faire les estimations nécessaires à la gestion des ressources de la pêcherie. Le permis est la première étape essentielle en vue de la conservation et de la gestion de cette ressource fragile. La nécessité de gérer les stocks exige beaucoup plus que le simple fait d'empêcher la disparition du saumon. En effet, la gestion emporte l'obligation de maintenir les stocks de cette ressource et de les accroître raisonnablement. Le permis aide à s'acquitter de cette obligation en offrant un moyen d'identification qui permet de veiller à ce que seules les personnes autorisées à le faire pêchent dans les endroits prévus. Il sert de mécanisme de surveillance en empêchant celles qui ne sont pas titulaires d'un permis de pêche de pratiquer cette activité.

Les conditions particulières du permis en question

Bien que, en règle générale, la délivrance de permis ne constitue pas en soi une atteinte à première vue au droit ancestral de pêcher, le gouvernement est tenu de justifier les conditions prévues par un permis qui, à la simple lecture de leur texte, portent atteinte au droit de pêche garanti par l'art. 35. Le permis de 1986, en litige dans le présent cas, comporte plusieurs conditions. Certaines des

by the issuing fishery officer and are discretionary. Of the mandatory conditions printed on the face of the licence, some are clearly *prima facie* infringements of the aboriginal right of the appellant as properly found by the courts below. The infringing conditions are:

- (i) the restriction of fishing to fishing for food only;
- (ii) notes 4 and 5 of the licence, which provide:

- 4. Fishing Time Subject to Change by Public Notice.
- 5. Indian Food Fishing before July 1st and after September 30th must be licenced by the Provincial Fish & Wildlife Conservation Officer.

- (iii) the restriction to fishing for the fisher and his family only;
- (iv) the restriction to fishing for salmon only.

104 These conditions are *prima facie* infringements of the appellant's aboriginal rights, which were specifically and correctly found to include:

- (i) the right to determine who within the band will be the recipients of the fish for ultimate consumption;
- (ii) the right to select the purpose for which the fish will be used, i.e. food, ceremonial, or religious purposes;
- (iii) the right to fish for steelhead;
- (iv) the right to choose the period of time to fish in the river.

Since those conditions of the licence set out above clearly impinge upon these aspects of the appel-

conditions figurant sur le permis ont un caractère obligatoire, alors que d'autres, qui y sont ajoutées par l'agent des pêches qui délivre le permis, ont un caractère discrétionnaire. Parmi les conditions obligatoires figurant sur le permis certaines sont clairement des atteintes à première vue au droit ancestral de l'appellant, comme l'ont à juste titre conclu les juridictions inférieures. Les conditions attentatoires sont les suivantes:

- (i) la pêche ne peut être pratiquée qu'à des fins alimentaires;
- (ii) les remarques 4 et 5 figurant sur le permis, qui sont rédigées ainsi:

[TRANSDUCTION]

- 4. La période de pêche peut être modifiée par avis public.
- 5. Les Indiens qui pratiquent la pêche à des fins alimentaires entre le 30 septembre et le 1^{er} juillet doivent détenir un permis délivré par l'agent provincial de conservation de la faune et du poisson.

- (iii) le pêcheur ne peut pratiquer la pêche que pour lui-même et sa famille;
- (iv) seule la pêche au saumon peut être pratiquée.

Ces conditions constituent à première vue des atteintes aux droits ancestraux de l'appellant, qui ont à juste titre été spécifiquement définis comme incluant les aspects suivants:

- (i) le droit de désigner les membres de la bande qui recevront le poisson pour le consommer en bout de ligne;
- (ii) le droit de décider à quelles fins sera utilisé le poisson, savoir à des fins alimentaires, rituelles ou religieuses;
- (iii) le droit de pêcher la truite arc-en-ciel;
- (iv) le droit de décider à quel moment pêcher dans la rivière.

Comme les conditions du permis décrites précédemment empiètent clairement sur ces aspects des

lant's s. 35 rights, they must constitute *prima facie* infringements.

In addition, there are other terms of the licence which could be infringements if they contradicted the appellant's aboriginal rights. These terms provide for:

- (i) the prescribed waters in which fishing can take place;
- (ii) the type of gear which can be used;
- (iii) the fishing times and days.

With respect to these conditions, whether they will constitute an infringement depends on whether the particular conditions written in by the fishery officer contradict the appellant's s. 35 rights. I would note that Millward J. did find that the appellant's aboriginal rights include the right to determine when fishing will occur and the method and manner of fishing. Accordingly, these conditions may, depending on their terms, infringe the appellant's aboriginal rights.

There was little or no argument directed to the other conditions attached to the licence. Accordingly, I have not reached any conclusions nor made any comments concerning them.

Before turning to the issue of justification, I must address the respondent's argument that these conditions are valid since they were not enforced. I cannot accept this argument. It has long been recognized that the holder of a constitutional right need not rely upon the exercise of prosecutorial discretion and restraint for the protection of the right. That submission cannot therefore be accepted. See for example *R. v. Bain*, [1992] 1 S.C.R. 91, at pp. 103-4. Indeed, counsel for the respondent conceded that there might be some problems with the conditions that were attached to the 1986 licence and reserved his strongest submissions for the position that the requirement of a

droits garantis à l'appelant par l'art. 35, elles doivent constituer à première vue des atteintes à ces droits.

En outre, le permis est assorti d'autres conditions qui pourraient être attentatoires si elles entraînent en conflit avec les droits ancestraux de l'appelant. Ces conditions portent sur les aspects suivants:

- (i) la désignation des eaux où la pêche peut être pratiquée;
- (ii) le type d'engins de pêche pouvant être utilisés;
- (iii) les jours et les heures de pêche.

En ce qui concerne ces conditions, la question de savoir si elles constitueront une atteinte dépend de celle de savoir si les conditions particulières inscrites par l'agent des pêches entrent en conflit avec les droits garantis à l'appelant par l'art. 35. Je tiens à souligner que le juge Millward a bel et bien conclu que les droits ancestraux de l'appelant incluent celui de choisir à quel moment la pêche sera pratiquée, ainsi que la façon de le faire et les méthodes qui seront utilisées. Par conséquent, ces conditions peuvent, selon leur libellé, porter atteinte aux droits ancestraux de l'appelant.

Très peu d'arguments, voire aucun, ont été présentés relativement aux autres conditions assortissant le permis. En conséquence, je n'ai formulé ni observation ni conclusion à leur égard.

Avant d'aborder la question de la justification, je dois examiner l'argument de l'intimée que ces conditions sont valides puisqu'elles n'ont pas été appliquées. Je ne peux accepter cet argument. Il est depuis longtemps reconnu que le titulaire d'un droit constitutionnel n'a pas, pour jouir de la protection de ce droit, à compter que le ministère public fera montre de retenue dans l'exercice de son pouvoir discrétionnaire de poursuivre. Cet argument ne peut donc être retenu. Voir, par exemple, *R. c. Bain*, [1992] 1 R.C.S. 91, aux pp. 103 et 104. De fait, l'avocat de l'intimée a concédé qu'il était possible que les conditions dont était assorti le permis de 1986 soulèvent certains

105

1996 CanLII 245 (SCC)

106

107

108

licence in itself did not constitute a *prima facie* infringement of the s. 35 aboriginal right to fish. In that submission he was correct.

Justification

109

In *Sparrow*, *supra*, it was held, at p. 1113, that in considering whether an infringement of aboriginal or treaty rights could be justified, the following questions should be addressed sequentially:

First, is there a valid legislative objective? Here the court would inquire into whether the objective of Parliament in authorizing the department to enact regulations regarding fisheries is valid. The objective of the department in setting out the particular regulations would also be scrutinized.

At p. 1114, the next step was set out in this way:

If a valid legislative objective is found, the analysis proceeds to the second part of the justification issue. Here, we refer back to the guiding interpretive principle derived from *Taylor and Williams* and *Guerin*, *supra*. That is, the honour of the Crown is at stake in dealings with aboriginal peoples. The special trust relationship and the responsibility of the government vis-à-vis aboriginals must be the first consideration in determining whether the legislation or action in question can be justified.

Finally, at p. 1119, it was noted that further questions might also arise depending on the circumstances of the inquiry:

These include the questions of whether there has been as little infringement as possible in order to effect the desired result; whether, in a situation of expropriation, fair compensation is available; and, whether the aboriginal group in question has been consulted with respect to the conservation measures being implemented. The aboriginal peoples, with their history of conservation-consciousness and interdependence with natural resources, would surely be expected, at the least, to be informed regarding the determination of an appropriate scheme for the regulation of the fisheries.

We would not wish to set out an exhaustive list of the factors to be considered in the assessment of justifica-

problèmes, et il s'est surtout attaché à plaider que l'obligation de détenir un permis ne constitue pas en soi une atteinte à première vue au droit ancestral de pêche garanti par l'art. 35. Sur ce point, il avait raison.

Justification

Dans *Sparrow*, précité, à la p. 1113, il a été jugé que, pour déterminer s'il est possible de justifier une atteinte à des droits ancestraux ou issus de traités, il faut se poser les questions suivantes, dans l'ordre indiqué:

En premier lieu, il faut se demander s'il existe un objectif législatif régulier. À ce stade, la cour se demanderait si l'objectif visé par le Parlement en autorisant le ministre à adopter des règlements en matière de pêche est régulier. Serait également examiné l'objectif poursuivi par le ministère en adoptant le règlement en cause.

À la page 1114, l'étape suivante a été décrite ainsi:

Si on conclut à l'existence d'un objectif législatif régulier, on passe au second volet de la question de la justification. Ici, nous nous référons au principe directeur d'interprétation qui découle des arrêts *Taylor and Williams* et *Guerin*, précités. C'est-à-dire, l'honneur de Sa Majesté est en jeu lorsqu'Elle transige avec les peuples autochtones. Les rapports spéciaux de fiduciaire et la responsabilité du gouvernement envers les autochtones doivent être le premier facteur à examiner en déterminant si la mesure législative ou l'action en cause est justifiable.

Enfin, à la p. 1119, on a signalé que d'autres questions peuvent également se soulever, selon les circonstances de l'enquête:

Il s'agit notamment des questions de savoir si, en tentant d'obtenir le résultat souhaité, on a porté le moins possible atteinte à des droits, si une juste indemnisation est prévue en cas d'expropriation et si le groupe d'autochtones en question a été consulté au sujet des mesures de conservation mises en œuvre. On s'attendrait certainement à ce que les peuples autochtones, traditionnellement sensibilisés à la conservation et ayant toujours vécu dans des rapports d'interdépendance avec les ressources naturelles, soient au moins informés relativement à la conception d'un régime approprié de réglementation de la pêche.

Nous ne nous proposons pas de présenter une énumération exhaustive des facteurs à considérer dans l'appré-

tion. Suffice it to say that recognition and affirmation requires sensitivity to and respect for the rights of aboriginal peoples on behalf of the government, courts and indeed all Canadians.

It can, I think, properly be inferred that the concept of reasonableness forms an integral part of the *Sparrow* test for justification. For example, in these last questions reasonableness will be a necessary aspect of the inquiry as to justification. For instance, when considering whether there has been as little infringement as possible, the infringement must be looked at in the context of the situation presented. So long as the infringement was one which in the context of the circumstances presented could reasonably be considered to be as minimal as possible then it will meet the test. The mere fact that there could possibly be other solutions that might be considered to be a lesser infringement should not, in itself, be the basis for automatically finding that there cannot be a justification for the infringement. So too in the aspects of information and consultation the concept of reasonableness must come into play. For example, the need for the dissemination of information and a request for consultations cannot simply be denied. So long as every reasonable effort is made to inform and to consult, such efforts would suffice to meet the justification requirement. This is no more than recognizing that regulations pertaining to conservation may have to be enacted expeditiously if a crisis is to be avoided. On occasion, strict and expeditious conservation measures will have to be taken if potentially catastrophic situations are to be avoided. The nature of the situation will have to be taken into account in assessing the conservation measures taken. The greater the urgency and the graver the situation the more reasonable strict measures may appear.

In the case at bar, the government did not adduce any evidence which might justify the conditions of the licence and accordingly has not met the onus which rests upon it. It follows that the government has failed to justify those conditions

de la justification. Qu'il suffise de souligner que la reconnaissance et la confirmation exigent que le gouvernement, les tribunaux et même l'ensemble des Canadiens soient conscients des droits des peuples autochtones et qu'ils les respectent.

À mon avis, on peut à juste titre inférer que le concept du caractère raisonnable fait partie intégrante du critère de justification établi dans l'arrêt *Sparrow*. Ainsi, dans ces dernières questions, le caractère raisonnable sera un aspect nécessaire de l'analyse de la justification. Par exemple, pour décider si on a porté atteinte le moins possible aux droits en cause, il faut examiner l'atteinte dans le contexte de la situation qui se présente. Dans la mesure où, compte tenu de ces circonstances, il est raisonnablement possible de considérer qu'on a porté atteinte le moins possible aux droits en cause, alors cette atteinte respecte le critère. Le simple fait qu'il pourrait y avoir d'autres solutions susceptibles d'être jugées moins attentatoires ne devrait pas en soi être une raison de conclure automatiquement que l'atteinte ne peut être justifiée. Le concept du caractère raisonnable doit également entrer en jeu pour ce qui est des aspects qui concernent l'information et la consultation. Par exemple, on ne peut se contenter de faire abstraction de la nécessité de diffuser des renseignements ni de l'existence d'une demande de consultation. Dans la mesure où tous les efforts raisonnables ont été déployés pour informer et consulter, on a alors satisfait à l'obligation de justifier. On ne fait là tout au plus que reconnaître la possibilité que des règlements en matière de conservation doivent être pris rapidement afin d'éviter une crise. En effet, des mesures de conservation strictes devront à l'occasion être prises de manière expéditive pour éviter des situations potentiellement catastrophiques. Il faudra tenir compte de la nature de la situation dans l'appréciation des mesures de conservation ainsi prises. Plus la situation sera grave et urgente, plus des mesures strictes paraîtront raisonnables.

En l'espèce, comme le gouvernement n'a présenté aucune preuve susceptible de justifier les conditions fixées par le permis, il ne s'est pas acquitté du fardeau qui lui incombe. Il n'a donc pas justifié les conditions que j'ai mentionnées et

110

1996 CanLII 245 (SCC)

111

that I have referred to which infringe the appellant's aboriginal rights.

qui portent atteinte aux droits ancestraux de l'appelant.

112

What then is the appropriate disposition of this appeal? It is clear that the federal government may validly require aboriginal people to obtain a fishery licence pursuant to s. 4(1) of the *British Columbia Fishery (General) Regulations*. It is also apparent that at least four of the mandatory conditions of the licence infringe the s. 35(1) rights of the appellant. The conditions make the 1986 licence invalid. They are an integral and essential part of the licence. They stipulate the conditions or terms upon which the licence is issued and the holder may use it. A licence holder is required to abide by the conditions. The licence is issued on that basis. The conditions are unconstitutional. As a result of the conditions the licence is invalid. It follows that there cannot be an offence created of fishing without a licence in 1986. The licence as issued in 1986 pursuant to s. 4(1) of the *British Columbia Fishery (General) Regulations* is as invalid as any other act or regulation which is found to be unconstitutional or *ultra vires*. It has always been held that an invalid act or regulation cannot create an offence. See for example *R. v. Sharma*, [1993] 1 S.C.R. 650, and *R. v. Bob* (1991), 88 Sask. R. 302 (C.A.). This dictates the result that there must be an acquittal.

En conséquence, quel doit être le dispositif du présent pourvoi? Il est évident que le gouvernement fédéral peut valablement obliger les autochtones à se procurer un permis de pêche conformément au par. 4(1) du *Règlement de pêche général de la Colombie-Britannique*. Il est également évident qu'au moins quatre des conditions obligatoires figurant sur le permis portent atteinte aux droits garantis à l'appelant par le par. 35(1). Ces conditions rendent le permis de 1986 invalide. Elles sont une partie intégrante et essentielle de celui-ci. Elles précisent les modalités de délivrance du permis et de son utilisation par le titulaire, qui doit se conformer à ces conditions. Le permis est délivré sur ce fondement. Les conditions en question sont inconstitutionnelles. En raison de ces conditions, le permis est invalide. Il s'ensuit qu'il ne peut y avoir eu création de l'infraction d'avoir pêché sans permis en 1986. Le permis délivré en 1986, conformément au par. 4(1) du *Règlement de pêche général de la Colombie-Britannique*, est invalide au même titre que le serait toute autre mesure législative ou réglementaire jugée inconstitutionnelle ou *ultra vires*. Il a constamment été jugé qu'une mesure législative ou réglementaire invalide ne peut créer d'infraction. Voir, par exemple, *R. c. Sharma*, [1993] 1 R.C.S. 650, et *R. c. Bob* (1991), 88 Sask. R. 302 (C.A.). Cette conclusion commande un acquittement.

113

The licence and its integral conditions are so inextricably bound together that they cannot be considered separately. They are part of an indivisible whole. If I am correct in this conclusion it is not necessary to consider whether the conditions are in fact severable. If I am in error, however, on this I would hold that the conditions were not severable. Section 52 of the *Constitution Act, 1982* provides that:

Le permis et les conditions qui en font partie intégrante sont si inextricablement liés qu'ils ne peuvent être examinés séparément. Ils forment un tout indivisible. Si ma conclusion sur ce point est juste, il n'est alors pas nécessaire de décider si les conditions sont, en fait, dissociables. En revanche, si j'ai tort, je suis d'avis que les conditions n'étaient pas dissociables. L'article 52 de la *Loi constitutionnelle de 1982* prévoit ce qui suit:

52. (1) The Constitution of Canada is the supreme law of Canada, and any law that is inconsistent with the provisions of the Constitution is, to the extent of the inconsistency, of no force or effect.

52. (1) La Constitution du Canada est la loi suprême du Canada; elle rend inopérantes les dispositions incompatibles de toute autre règle de droit.

In *Schachter v. Canada*, [1992] 2 S.C.R. 679, at p. 697. Lamer C.J. interpreted the section as meaning:

Where the offending portion of a statute can be defined in a limited manner it is consistent with legal principles to declare inoperative only that limited portion. In that way, as much of the legislative purpose as possible may be realized. However, there are some cases in which to sever the offending portion would actually be more intrusive to the legislative purpose than the alternate course of striking down provisions which are not themselves offensive but which are closely connected with those that are. This concern is reflected in the classic statement of the test for severance in *Attorney-General for Alberta v. Attorney-General for Canada*, [1947] A.C. 503, at p. 518:

The real question is whether what remains is so inextricably bound up with the part declared invalid that what remains cannot independently survive or, as it has sometimes been put, whether on a fair review of the whole matter it can be assumed that the legislature would have enacted what survives without enacting the part that is ultra vires at all.

In my view, when the purpose of this particular licence is considered together with the number of mandatory conditions which infringe the appellant's aboriginal rights, severability can be seen to be an unacceptable option. The invalid conditions are numerous. They are mandatory and form an integral part of the licence itself. The licence required that the conditions be met, which is to say that the holder of the licence was required to comply with its conditions. I cannot see that this licence can be severed from its invalid mandatory conditions. Further, from a practical point of view it is significant that the licences at issue were created and used before the government had the benefit of this Court's judgment in *Sparrow*. Crown counsel advised that as a result these particular licences are no longer in use. Accordingly, a declaration that the entire licence is invalid is appropriate both legally and practically.

There can be no question that an enactment that breaches the Constitution is invalid and cannot impose any enforceable duties. See for example *Norton v. Shelby County*, 118 U.S. 425 (1886), at

Dans l'arrêt *Schachter c. Canada*, [1992] 2 R.C.S. 679, à la p. 697, le juge en chef Lamer a interprété ainsi cette disposition:

Si la partie irrégulière d'une loi peut être isolée, il est conforme aux principes juridiques de déclarer inopérante seulement cette partie. On peut ainsi réaliser autant que possible l'objectif législatif. Toutefois, dans certains cas, la dissociation de la partie fautive sera plus attentatoire à l'objectif législatif que l'annulation possible des dispositions qui ne sont pas fautives, mais qui sont étroitement liées à celles qui le sont. Cette préoccupation se reflète dans l'énoncé classique du critère applicable en cas de dissociation mentionné dans l'arrêt *Attorney-General for Alberta c. Attorney-General for Canada*, [1947] A.C. 503, à la p. 518:

[TRADUCTION] La véritable question qui se pose est de savoir si le reste n'est pas si inextricablement lié à la partie déclarée invalide qu'il ne saurait subsister indépendamment, ou comme on l'a dit parfois, si, après un examen impartial de toute la question, on peut présumer que le législateur n'aurait jamais adopté ce qui subsiste sans adopter la partie qui est ultra vires.

À mon avis, si on examine l'objet du permis en cause en corrélation avec les différentes conditions obligatoires y figurant qui portent atteinte aux droits ancestraux de l'appelant, la dissociation peut être considérée comme une solution inacceptable. Les conditions invalides sont nombreuses. Elles sont obligatoires et font partie intégrante du permis lui-même. Le permis exigeait que ces conditions soient respectées, ce qui revient à dire que son titulaire devait s'y conformer. Je ne vois pas comment ce permis pourrait être dissocié de ses conditions obligatoires invalides. En outre, d'un point de vue pratique, il importe de signaler que les permis en cause ont été créés et utilisés avant que le gouvernement ait pu profiter de l'arrêt de notre Cour dans *Sparrow*. L'avocat du ministère public a indiqué que, par suite de cet arrêt, ce genre de permis n'est plus utilisé. En conséquence, il convient, tant sur le plan juridique que sur le plan pratique, de déclarer le permis au complet invalide.

Il ne saurait faire de doute qu'un texte de loi portant atteinte à la Constitution est invalide et ne peut imposer d'obligations exécutoires. Voir, par exemple, *Norton c. Shelby County*, 118 U.S. 425

p. 442; *Air Canada v. British Columbia*, [1989] 1 S.C.R. 1161, at p. 1195.

(1886), à la p. 442; *Air Canada c. Colombie-Britannique*, [1989] 1 R.C.S. 1161, à la p. 1195.

117 Accordingly, the appellant must be acquitted of the charge of fishing without a licence contrary to s. 4(1) since the licence conditions infringed his aboriginal rights and the licence was therefore unconstitutional.

En conséquence, l'appelant doit être acquitté de l'accusation d'avoir pêché sans permis, en contravention du par. 4(1), étant donné que les conditions du permis portaient atteinte à ses droits ancestraux, et que le permis était par conséquent inconstitutionnel.

Disposition

Dispositif

118 In the result, the appeal is allowed. The question as to whether the band's fishing by-law applies to the Bulkley River at Moricetown must be answered in the negative. The question as to whether the licence requirement under s. 4(1) is an infringement of the appellant's aboriginal rights contrary to s. 35 must also be answered in the negative. As a result of my answer to these two questions, and for the reasons given above, the constitutional question must be answered as follows:

En conséquence, le pourvoi est accueilli. Il faut répondre non à la question de savoir si le règlement administratif de pêche de la bande s'applique à la rivière Bulkley, à la hauteur de Moricetown. Il faut également répondre non à la question de savoir si l'obligation de détenir un permis qui est prévue au par. 4(1) constitue une atteinte aux droits ancestraux de l'appelant, incompatible avec l'art. 35. Étant donné ma réponse à ces questions, et pour les motifs prononcés précédemment, la question constitutionnelle doit recevoir la réponse suivante:

Question: Is s. 4(1) of the *British Columbia Fishery (General) Regulations*, SOR/84-248, as it read in July of 1986, and licences issued thereunder, of no force or effect with respect to the appellant in the circumstances of these proceedings, by virtue of s. 52 of the *Constitution Act, 1982*, by reason of the aboriginal rights within the meaning of s. 35 of the *Constitution Act, 1982* invoked by the appellant?

Question: Le paragraphe 4(1) du *Règlement de pêche général de la Colombie-Britannique*, DORS/84-248, tel qu'il se lisait en juillet 1986, et les permis délivrés en vertu de ce paragraphe sont-ils, dans les circonstances de la présente affaire, inopérants à l'égard de l'appelant en vertu de l'art. 52 de la *Loi constitutionnelle de 1982*, en raison des droits ancestraux au sens de l'art. 35 de la *Loi constitutionnelle de 1982*, qu'il invoque?

Answer: Section 4(1) of the *British Columbia Fishery (General) Regulations* is not invalid by virtue of s. 52 of the *Constitution Act, 1982*, by reason of the aboriginal rights within the meaning of s. 35 of the *Constitution Act, 1982* invoked by the appellant. However, the mandatory conditions affixed to the 1986 licence infringe the appellant's aboriginal rights and are not severable and the licence is therefore invalid.

Réponse: Le paragraphe 4(1) du *Règlement de pêche général de la Colombie-Britannique* n'est pas invalide par application de l'art. 52 de la *Loi constitutionnelle de 1982* en raison des droits ancestraux au sens de l'art. 35 de la *Loi constitutionnelle de 1982* invoqués par l'appelant. Toutefois, les conditions obligatoires figurant sur le permis de 1986 portent atteinte aux droits ancestraux de l'appelant et ne sont pas dissociables, de sorte que le permis est invalide.

The order of the Court of Appeal of British Columbia convicting the appellant must be set aside and his acquittal restored. There will be no costs to either party.

The reasons of L'Heureux-Dubé and McLachlin JJ. were delivered by

MCLACHLIN J. (dissenting) — The issue in this case is whether the requirement that the appellant have a licence for fishing was *per se* unconstitutional. I agree with the majority of the Court of Appeal and with Justice Cory in this Court that the requirement of a licence did not constitute a *prima facie* infringement of the appellant's constitutionally protected right to fish for food.

This leaves the issue of whether the conditions attached to the licence are unconstitutional. In my view, this issue is not properly before us. The appellant was not charged with violation of the conditions of the licence, but with fishing without a licence. The trial proceeded on the basis that it was the licensing scheme as a whole which was invalid. The issue, as Hutcheon J.A. stated expressly in the Court of Appeal, was whether the act of licensing *per se* was unconstitutional, not the terms of the particular licence at issue.

This court, *per* Cory J., today endorses the view of the trial judge and the majority of the Court of Appeal below that the state is entitled to impose a licensing scheme on the aboriginal fishing and consequently require that the appellant obtain a licence as a condition of fishing. However, the majority goes on to conclude that because four of the conditions attached to the licence infringe his aboriginal rights, the requirement for the particular licence in this case is unconstitutional and that the appellant's conviction for failure to have a licence must be set aside.

I do not share this conclusion. The fact that four of the conditions are invalid does not excuse the

L'ordonnance de la Cour d'appel de la Colombie-Britannique déclarant l'appelant coupable doit être annulée, et l'acquittement de ce dernier doit être rétabli. Aucune des parties n'aura droit aux dépens.

Version française des motifs des juges L'Heureux-Dubé et McLachlin rendus par

LE JUGE MCLACHLIN (dissidente) — La question en l'espèce est de savoir si l'obligation faite à l'appelant d'obtenir un permis de pêche était en soi inconstitutionnelle. Je suis d'accord avec les juges de la majorité de la Cour d'appel de même qu'avec le juge Cory de notre Cour que cette obligation ne constitue pas à première vue une atteinte au droit de pêcher pour se nourrir qui est garanti à l'appelant par la Constitution.

Il reste à se demander si les conditions dont est assorti le permis sont inconstitutionnelles. À mon avis, nous n'avons pas été saisis de cette question. L'appelant n'a pas été accusé d'avoir enfreint les conditions prévues par le permis, mais plutôt d'avoir pêché sans permis. Au procès, la thèse examinée était que le régime de délivrance de permis dans son ensemble était invalide. La question en litige, ainsi que l'a dit expressément le juge Hutcheon en Cour d'appel, était de savoir si le fait de délivrer des permis, et non les conditions assortissant ces permis, était en soi inconstitutionnel.

Notre Cour, sous la plume du juge Cory, souscrit aujourd'hui à l'opinion du juge de première instance et des juges de la majorité de la Cour d'appel que l'État a le droit d'assujettir à un régime de délivrance de permis les activités de pêche autochtones et, par conséquent, d'exiger de l'appelant qu'il obtienne un permis de pêche. Cependant, la majorité poursuit en concluant que, comme quatre des conditions dont est assorti le permis portent atteinte aux droits ancestraux de l'appelant, l'obligation d'obtenir le permis visé en l'espèce est inconstitutionnelle et la déclaration de culpabilité prononcée contre l'appelant pour avoir pêché sans permis doit être annulée.

Je ne partage pas cette conclusion. Le fait que quatre des conditions prévues soient invalides

119

121

122

123

appellant on a charge of fishing without a licence. If the charge had been violation of one of the conditions of the licence, proof that the condition was unconstitutional would have afforded a defence to that charge. But the unconstitutionality of a condition of a licence does not, in my view, absolve the appellant from the need to obtain a licence at all.

n'excuse pas l'appellant relativement à l'accusation d'avoir pêché sans permis. S'il avait été accusé d'avoir enfreint une des conditions du permis, la preuve que la condition en question était inconstitutionnelle aurait constitué un moyen de défense contre cette accusation. Cependant, je suis d'avis que l'inconstitutionnalité d'une condition du permis ne dispense aucunement l'appellant de l'obligation d'obtenir un permis.

124

Cory J. asserts that the invalidity of licence conditions excuses a person from obtaining the licence required by law, provided the condition is "integral" to the licence. I cannot accept this proposition. Can a chemical plant be excused from obtaining a licence to emit a polluting chemical merely because it can show that one or more of the conditions imposed by the licence are invalid? Can a person over a certain age be excused from obtaining a licence to drive a motor vehicle merely because he or she deems an age-related restriction to violate the provincial Human Rights Code? I think not. And if we say that the conditions are "integral" to the licence, does the situation change? Again I think not.

Le juge Cory affirme que l'invalidité des conditions prévues par un permis dispense une personne de l'obligation d'obtenir le permis requis par la loi, si ces conditions font «partie intégrante» du permis. Je ne peux accepter cette proposition. Peut-on exempter une entreprise fabriquant des produits chimiques de l'obligation d'obtenir un permis autorisant l'émission d'un polluant chimique simplement parce qu'elle est en mesure d'établir qu'une ou plusieurs des conditions fixées par le permis sont invalides? Peut-on, passé un certain âge, dispenser une personne d'obtenir un permis de conduire simplement parce qu'elle estime que la restriction fondée sur l'âge porte atteinte au code des droits de la personne de la province? Je ne le crois pas. Par ailleurs, le fait de dire que les conditions en cause font «partie intégrante» du permis change-t-il la situation? Encore une fois, je ne le crois pas.

125

It is important, in my view, to distinguish between the charge of failing to obtain a licence required by a valid licensing scheme, and breach of one of the conditions of the licence. This appeal presents us with a quasi-criminal offence. The appellant has been charged with failing to obtain a licence required by law. His defence is that the state has no right to require him to obtain a licence. The trial judge, the majority of the Court of Appeal, and this Court unanimously have ruled that the state does have the right to require him to obtain a licence. That issue having been resolved against him, the appellant stands properly convicted of fishing without the required licence.

Il est, à mon sens, important de distinguer entre l'accusation de ne pas détenir le permis requis par un régime valide de délivrance de telles autorisations et celle d'avoir enfreint une des conditions du permis. En l'espèce, nous sommes en présence d'une infraction quasi criminelle. L'appellant a été accusé de ne pas s'être procuré le permis requis par la loi. En défense, il fait valoir que l'État n'a pas le droit de l'obliger à se procurer un permis. Le juge de première instance, la Cour d'appel à la majorité et notre Cour à l'unanimité ont statué que l'État a bel et bien le droit de l'obliger à obtenir un permis. Cette question ayant été tranchée à l'encontre de l'appellant, c'est à juste titre qu'il a été déclaré coupable d'avoir pêché sans le permis requis.

126

The situation would have been different had the appellant been charged with violating one of the

La situation aurait été différente si l'appellant avait été accusé d'avoir enfreint une des conditions

1996 CanLII 215 (SCC)

conditions of the licence. It would then have been open to him to raise the defence that the condition he is alleged to have breached is unconstitutional. The constitutionality of the condition would have become the focus of the trial and of the appeals. In the event the condition was found to have been unconstitutional, it would fall. Severance would be automatic. The issue raised in *Schachter v. Canada*, [1992] 2 S.C.R. 679, of whether to strike out a portion or the whole of the licence would not arise. The licence would stand, together with such conditions as remain valid. The right of the state to require a licence for monitoring purposes would remain constitutional.

The position advocated by Cory J. has important practical consequences. Having ruled that the state is entitled to require persons engaged in fishing to obtain licences for the purpose of monitoring the fishery, he would deprive the state of the right to do so where conditions attached to the licence, not put in issue on the facts, fail to pass abstract constitutional scrutiny. Persons who object to conditions of a licence will be encouraged not to apply for a licence, thus undermining the monitoring function of the licensing scheme. The validity of state requirements for licences of all sorts may be called into question. These results are avoided if one confines the decision to the allegation contained in the charge — the failure to obtain a licence.

Jurisprudential considerations also support this approach. Courts determining guilt or innocence of an accused should confine themselves to the issues raised by the charge. The validity of conditions of a licence are better considered in the context of facts which raise them than in the abstract. Similarly, appeal courts reviewing trial decisions are generally well advised to confine themselves to the defences and issues raised in the decisions under review. In the case at bar, the only issue at trial and before the Court of Appeal was the right of the state to require the appellant to obtain a

du permis. Il aurait alors pu plaider, en défense, que la condition qu'on l'accusait d'avoir enfreint était inconstitutionnelle. La constitutionnalité de la condition serait alors devenue l'aspect central du procès et des appels. Si la condition avait été jugée inconstitutionnelle, elle aurait été écartée. La dissociation serait automatique. Ne se poserait alors pas la question, énoncée dans l'arrêt *Schachter c. Canada*, [1992] 2 R.C.S. 679, de savoir s'il y a lieu d'invalidier l'ensemble ou une partie seulement du permis. Le permis subsisterait, de même que les autres conditions toujours valides. Le droit de l'État d'exiger, à des fins de surveillance, l'obtention d'un permis demeurerait constitutionnel.

La thèse préconisée par le juge Cory a des conséquences pratiques importantes. Après avoir statué que, dans le but de surveiller les pêcheries, l'État a le droit d'exiger des personnes qui pratiquent la pêche qu'elles obtiennent un permis, il priverait l'État du droit de le faire dans les cas où des conditions dont est assorti le permis, conditions qui suivant les faits ne sont pas en litige en l'espèce, ne résistent pas à une analyse constitutionnelle abstraite. Cela aurait pour effet d'encourager les personnes qui s'opposent aux conditions d'un permis à ne pas demander ce permis, sapant ainsi le rôle de surveillance du régime de délivrance de permis. La validité des différentes obligations faites par l'État relativement à l'obtention de permis de toutes sortes pourrait être mise en question. Ces conséquences sont évitées si la décision se limite à l'allégation figurant dans l'accusation — savoir l'omission d'obtenir un permis.

Des considérations d'ordre jurisprudentiel appuient également ce point de vue. Les tribunaux appelés à statuer sur la culpabilité ou l'innocence d'un accusé devraient se limiter aux questions soulevées par l'accusation portée. Il est préférable d'examiner la validité des diverses conditions d'un permis dans le contexte de faits donnant lieu à leur application, plutôt que dans l'abstrait. De même, les cours d'appel chargées de contrôler les décisions des tribunaux de première instance sont généralement bien avisées de se confiner aux questions et moyens de défense qui sont soulevés dans

licence. Accordingly, I would prefer to confine this Court's decision to that issue.

ces décisions. En l'espèce, l'unique question en litige au procès et devant la Cour d'appel était le droit de l'État d'obliger l'appelant à obtenir un permis. En conséquence, je préférerais limiter la décision de notre Cour à cette question.

In conclusion, the question before us, as before the courts below, is whether the obligation on the appellant to obtain a licence to fish, whatever its terms, is constitutional. The answer to that question is yes. The appellant freely admits that he did not have the licence that the law validly required. It follows that he was properly convicted of the charge. The issue of whether the conditions of the licence are valid should await a case where their validity arises.

En conclusion, la question dont nous sommes saisis, à l'instar des juridictions inférieures, est de savoir si l'obligation faite à l'appelant d'obtenir un permis de pêche, quelles qu'en soient les conditions, est constitutionnelle. La réponse à cette question est oui. L'appelant admet volontiers qu'il n'avait pas le permis valablement requis par la loi. Il a donc à juste titre été déclaré coupable de l'accusation portée contre lui. La question de savoir si les conditions du permis sont valides devrait être tranchée dans une affaire où elle se souleva.

The constitutional question stated by the Chief Justice was as follows:

Is s. 4(1) of the *British Columbia Fishery (General) Regulations*, SOR/84-248, as it read in July of 1986, and licences issued thereunder, of no force or effect with respect to the appellant in the circumstances of these proceedings, by virtue of s. 52 of the *Constitution Act, 1982*, by reason of the aboriginal rights within the meaning of s. 35 of the *Constitution Act, 1982* invoked by the appellant?

Voici le texte de la question constitutionnelle formulée par le juge en chef:

Le paragraphe 4(1) du *Règlement de pêche général de la Colombie-Britannique*, DORS/84-248, tel qu'il se lisait en juillet 1986, et les permis délivrés en vertu de ce paragraphe sont-ils, dans les circonstances de la présente affaire, inopérants à l'égard de l'appelant en vertu de l'art. 52 de la *Loi constitutionnelle de 1982*, en raison des droits ancestraux au sens de l'art. 35 de la *Loi constitutionnelle de 1982*, qu'il invoque?

I would answer the question as follows:

Je répondrais ainsi à cette question:

Section 4(1) of the *British Columbia Fishery (General) Regulations* and licences issued thereunder are not of no force and effect, with respect to the appellant in the circumstances of these proceedings, by virtue of s. 52 of the *Constitution Act, 1982*, by reason of the aboriginal rights within the meaning of s. 35 of the *Constitution Act, 1982* invoked by the appellant.

Le paragraphe 4(1) du *Règlement de pêche général de la Colombie-Britannique* et les permis délivrés en vertu de cette disposition ne sont pas, dans les circonstances de la présente affaire, inopérants à l'égard de l'appelant par application de l'art. 52 de la *Loi constitutionnelle de 1982* en raison des droits ancestraux au sens de l'art. 35 de la *Loi constitutionnelle de 1982* invoqués par l'appelant.

I would dismiss the appeal and affirm the conviction.

Je suis d'avis de rejeter le pourvoi et de confirmer la déclaration de culpabilité.

EN APPEL DE LA COUR D'APPEL DE LA COLOMBIE-BRITANNIQUE

Droit constitutionnel — Droits ancestraux — Droits de pêche — Indien reconnu coupable d'avoir pêché avec un filet plus long que celui autorisé par le permis de la bande — La restriction quant à la longueur du filet est-elle incompatible avec l'art. 35(1) de la Loi constitutionnelle de 1982? — Loi constitutionnelle de 1982, art. 35(1), 52(1) — Loi sur les pêcheries, S.R.C. 1970, ch. F-14, art. 34 — Règlement de pêche général de la Colombie-Britannique, DORS/84-248, art. 4, 12, 27(1), (4).

* Le juge McIntyre n'a pas pris part au jugement.

Indians — Aboriginal rights — Fishing rights — Interpretation — Indian convicted of fishing with net larger than permitted by Band's licence — Whether or not net length restriction inconsistent with s. 35(1) of Constitution Act, 1982.

Appellant was charged in 1984 under the *Fisheries Act* with fishing with a drift net longer than that permitted by the terms of his Band's Indian food fishing licence. He admitted that the facts alleged constitute the offence, but defended the charge on the basis that he was exercising an existing aboriginal right to fish and that the net length restriction contained in the Band's licence was invalid in that it was inconsistent with s. 35(1) of the *Constitution Act, 1982*.

Appellant was convicted. The trial judge found that an aboriginal right could not be claimed unless it was supported by a special treaty and that s. 35(1) of the *Constitution Act, 1982* accordingly had no application. An appeal to County Court was dismissed for similar reasons. The Court of Appeal found that the trial judge's findings of facts were insufficient to lead to an acquittal. Its decision was appealed and cross-appealed. The constitutional question before this Court queried whether the net length restriction contained in the Band's fishing licence was inconsistent with s. 35(1) of the *Constitution Act, 1982*.

Held: The appeal and cross-appeal should be dismissed. The constitutional question should be sent back to trial to be answered according to the analysis set out in these reasons.

Section 35(1) applies to rights in existence when the *Constitution Act, 1982* came into effect; it does not revive extinguished rights. An existing aboriginal right cannot be read so as to incorporate the specific manner in which it was regulated before 1982. The phrase "existing aboriginal rights" must be interpreted flexibly so as to permit their evolution over time.

The Crown failed to discharge its burden of proving extinguishment. An aboriginal right is not extinguished merely by its being controlled in great detail by the regulations under the *Fisheries Act*. Nothing in the *Fisheries Act* or its detailed regulations demonstrated a clear and plain intention to extinguish the Indian

Indiens — Droits ancestraux — Droits de pêche — Interprétation — Indien reconnu coupable d'avoir pêché avec un filet plus long que celui autorisé par le permis de la bande — La restriction quant à la longueur du filet est-elle incompatible avec l'art. 35(1) de la Loi constitutionnelle de 1982?

En 1984, l'appelant a été accusé, en vertu de la *Loi sur les pêcheries*, d'avoir pêché avec un filet dérivant plus long que celui autorisé par le permis de pêche de subsistance de la bande indienne à laquelle il appartenait. Il a reconnu les faits à l'origine de l'infraction, mais il a soutenu en défense qu'il exerçait un droit ancestral existant de pêcher et que la restriction imposée dans le permis de la bande quant à la longueur du filet était invalide pour cause d'incompatibilité avec le par. 35(1) de la *Loi constitutionnelle de 1982*.

L'appelant a été déclaré coupable. Le juge de première instance a conclu qu'on ne pouvait revendiquer un droit ancestral à moins que celui-ci ne soit étayé par un traité particulier, et que le par. 35(1) de la *Loi constitutionnelle de 1982* ne s'appliquait donc pas. Un appel devant la Cour de comté a été rejeté pour des motifs semblables. La Cour d'appel a statué que les conclusions de fait du juge de première instance étaient insuffisantes pour justifier un acquittement. Son arrêt fait l'objet d'un pourvoi et d'un pourvoi incident. La question constitutionnelle soumise à la Cour est de savoir si la restriction imposée dans le permis de pêche de la bande quant à la longueur des filets est incompatible avec le par. 35(1) de la *Loi constitutionnelle de 1982*.

Arrêt: Le pourvoi et le pourvoi incident sont rejetés. La question constitutionnelle doit être renvoyée en première instance afin de recevoir une réponse conformément à l'analyse exposée dans les présents motifs.

Le paragraphe 35(1) s'applique aux droits qui existaient au moment de l'entrée en vigueur de la *Loi constitutionnelle de 1982*; il ne vient pas rétablir des droits éteints. Un droit ancestral existant ne saurait être interprété de façon à englober la manière précise dont il était réglementé avant 1982. L'expression «droits ancestraux existants» doit recevoir une interprétation souple de manière à permettre à ces droits d'évoluer avec le temps.

Le ministère public ne s'est pas acquitté de son fardeau de prouver l'extinction du droit. Un droit ancestral n'est pas éteint du seul fait que son exercice fasse l'objet d'une réglementation très minutieuse en vertu de la *Loi sur les pêcheries*. Ni la *Loi sur les pêcheries* ni ses règlements d'application détaillés ne font état d'une

aboriginal right to fish. These fishing permits were simply a manner of controlling the fisheries, not of defining underlying rights. Historical policy on the part of the Crown can neither extinguish the existing aboriginal right without clear intention nor, in itself, delineate that right. The nature of government regulations cannot be determinative of the content and scope of an existing aboriginal right. Government policy can, however, regulate the exercise of that right but such regulation must be in keeping with s. 35(1).

Section 35(1) of the *Constitution Act, 1982*, at the least, provides a solid constitutional base upon which subsequent negotiations can take place and affords aboriginal peoples constitutional protection against provincial legislative power. Its significance, however, extends beyond these fundamental effects. The approach to its interpretation is derived from general principles of constitutional interpretation, principles relating to aboriginal rights, and the purposes behind the constitutional provision itself.

Section 35(1) is to be construed in a purposive way. A generous, liberal interpretation is demanded given that the provision is to affirm aboriginal rights. The provision is not subject to s. 1 of the *Canadian Charter of Rights and Freedoms*. Any law or regulation affecting aboriginal rights, however, will not automatically be of no force or effect by the operation of s. 52 of the *Constitution Act, 1982*. Legislation that affects the exercise of aboriginal rights will be valid if it meets the test for justifying an interference with a right recognized and affirmed under s. 35(1).

Section 35(1) does not explicitly authorize the courts to assess the legitimacy of any government legislation that restricts aboriginal rights. The words "recognition and affirmation", however, incorporate the government's responsibility to act in a fiduciary capacity with respect to aboriginal peoples and so import some restraint on the exercise of sovereign power. Federal legislative powers continue, including the right to legislate with respect to Indians pursuant to s. 91(24) of the *Constitution Act, 1867*, but must be read together with s. 35(1). Federal power must be reconciled with federal duty and the best way to achieve that reconciliation is to demand the justification of any government regulation that infringes upon or denies aboriginal rights.

intention claire et expresse de mettre fin au droit ancestral des Indiens de pêcher. Ces permis de pêche constituaient simplement une façon de contrôler les pêcheries et non de définir des droits sous-jacents. La politique historique de Sa Majesté ne permet pas d'éteindre le droit ancestral existant en l'absence d'intention claire en ce sens ni ne permet en soi de délimiter ce droit. La nature de règlements gouvernementaux ne saurait être déterminante quant au contenu et à la portée d'un droit ancestral existant. La politique gouvernementale peut toutefois réglementer l'exercice de ce droit, mais cette réglementation doit être conforme au par. 35(1).

Le paragraphe 35(1) de la *Loi constitutionnelle de 1982* procure, tout au moins, un fondement constitutionnel solide à partir duquel des négociations ultérieures peuvent être entreprises et accorde aux autochtones une protection constitutionnelle contre la compétence législative provinciale. Son importance va toutefois au-delà de ces effets fondamentaux. La méthode à adopter pour l'interpréter est dérivée des principes généraux d'interprétation constitutionnelle, des principes relatifs aux droits ancestraux et des objets sous-jacents à la disposition constitutionnelle elle-même.

Il y a lieu d'interpréter le par. 35(1) en fonction de l'objet qu'il vise. Une interprétation généreuse et libérale s'impose étant donné que cette disposition vise à confirmer les droits ancestraux. La disposition n'est pas assujettie à l'article premier de la *Charte canadienne des droits et libertés*. Cependant, toute loi ou tout règlement portant atteinte aux droits ancestraux des autochtones ne sera pas automatiquement inopérant en vertu de l'art. 52 de la *Loi constitutionnelle de 1982*. Un texte législatif qui touche l'exercice de droits ancestraux sera valide s'il satisfait au critère applicable pour justifier une atteinte à un droit reconnu et confirmé au sens du par. 35(1).

Le paragraphe 35(1) n'autorise pas explicitement les tribunaux à apprécier la légitimité d'une mesure législative gouvernementale qui restreint des droits ancestraux. L'expression «reconnaissance et confirmation» comporte cependant la responsabilité qu'a le gouvernement d'agir en qualité de fiduciaire à l'égard des peuples autochtones et implique ainsi une certaine restriction à l'exercice du pouvoir souverain. Les pouvoirs législatifs fédéraux subsistent, y compris le droit de légiférer relativement aux Indiens en vertu du par. 91(24) de la *Loi constitutionnelle de 1867*, mais ces pouvoirs doivent être rapprochés du par. 35(1). Le pouvoir fédéral doit être concilié avec l'obligation fédérale et la meilleure façon d'y parvenir est d'exiger la justification de tout règlement gouvernemental qui porte atteinte à des droits ancestraux.

1990 CanLII 104 (SCC)

The test for justification requires that a legislative objective must be attained in such a way as to uphold the honour of the Crown and be in keeping with the unique contemporary relationship, grounded in history and policy, between the Crown and Canada's aboriginal peoples. The extent of legislative or regulatory impact on an existing aboriginal right may be scrutinized so as to ensure recognition and affirmation. Section 35(1) does not promise immunity from government regulation in contemporary society but it does hold the Crown to a substantive promise. The government is required to bear the burden of justifying any legislation that has some negative effect on any aboriginal right protected under s. 35(1).

The first question to be asked is whether the legislation in question has the effect of interfering with an existing aboriginal right. The inquiry begins with a reference to the characteristics or incidents of the right at stake. Fishing rights are not traditional property rights. They are rights held by a collective and are in keeping with the culture and existence of that group. Courts must be careful to avoid the application of traditional common law concepts of property as they develop their understanding of the "*sui generis*" nature of aboriginal rights. While it is impossible to give an easy definition of fishing rights, it is crucial to be sensitive to the aboriginal perspective itself on the meaning of the rights at stake.

To determine whether the fishing rights have been interfered with such as to constitute a *prima facie* infringement of s. 35(1), certain questions must be asked. Is the limitation unreasonable? Does the regulation impose undue hardship? Does the regulation deny to the holders of the right their preferred means of exercising that right? The onus of proving a *prima facie* infringement lies on the individual or group challenging the legislation.

Here, the regulation would be found to be a *prima facie* interference if it were found to be an adverse restriction on the exercise of the natives' right to fish for food. The issue does not merely require looking at whether the fish catch has been reduced below that needed for the reasonable food and ceremonial needs. Rather the test involves asking whether either the purpose or the effect of the restriction on net length unnecessarily infringes the interests protected by the fishing right.

Le critère de la justification exige qu'un objectif législatif soit réalisé d'une manière qui préserve l'honneur de Sa Majesté et qui soit conforme aux rapports contemporains uniques, fondés sur l'histoire et les politiques, qui existent actuellement entre la Couronne et les peuples autochtones du Canada. La mesure dans laquelle une loi ou un règlement a un effet sur un droit ancestral existant doit être examinée soigneusement de manière à assurer la reconnaissance et la confirmation de ce droit. Le paragraphe 35(1) ne constitue pas une promesse d'immunité contre la réglementation gouvernementale dans la société contemporaine, mais il représente un engagement important de la part de la Couronne. En effet, le gouvernement se voit imposer l'obligation de justifier toute mesure législative qui a un effet préjudiciable sur un droit ancestral protégé par le par. 35(1).

La première question à poser est de savoir si la loi en question a pour effet de porter atteinte à un droit ancestral existant. L'analyse commence par un examen des caractéristiques ou des attributs du droit en question. Les droits de pêche ne sont pas des droits de propriété au sens traditionnel. Il s'agit de droits qui appartiennent à un groupe et qui sont en harmonie avec la culture et le mode de vie de ce groupe. Les tribunaux doivent prendre soin d'éviter d'appliquer les concepts traditionnels de propriété propres à la common law en tentant de saisir la nature «*sui generis*» des droits ancestraux. S'il est impossible de donner une définition simple des droits de pêche, il est crucial de se montrer ouvert au point de vue des autochtones eux-mêmes quant à la nature des droits en cause.

Pour déterminer si les droits de pêche ont subi une atteinte constituant une violation à première vue du par. 35(1), on doit poser certaines questions. La restriction est-elle déraisonnable? Le règlement est-il indûment rigoureux? Le règlement refuse-t-il aux titulaires du droit le recours à leur moyen préféré de l'exercer? C'est au particulier ou au groupe qui conteste la mesure législative qu'il incombe de prouver qu'il y a eu violation à première vue.

En l'espèce, le règlement serait jugé constituer une atteinte à première vue si on concluait qu'il impose une restriction néfaste à l'exercice par les autochtones de leur droit de pêcher à des fins de subsistance. La question en litige n'exige pas simplement qu'on examine si la prise autorisée de poissons a été réduite au-dessous de ce qui est requis pour subvenir aux besoins alimentaires et rituels raisonnables. Le critère nécessite plutôt qu'on se demande si, de par son objet ou son effet, la restriction imposée quant à la longueur des filets porte atteinte inutilement aux intérêts protégés par le droit de pêche.

If a *prima facie* interference is found, the analysis moves to the issue of justification. This test involves two steps. First, is there a valid legislative objective? Here the court would inquire into whether the objective of Parliament in authorizing the department to enact regulations regarding fisheries is valid. The objective of the department in setting out the particular regulations would also be scrutinized. The "public interest" justification is so vague as to provide no meaningful guidance and so broad as to be unworkable as a test for the justification of a limitation on constitutional rights. The justification of conservation and resource management, however, is uncontroversial.

If a valid legislative objective is found, the analysis proceeds to the second part of the justification issue: the honour of the Crown in dealings with aboriginal peoples. The special trust relationship and the responsibility of the government vis-à-vis aboriginal people must be the first consideration in determining whether the legislation or action in question can be justified. There must be a link between the question of justification and the allocation of priorities in the fishery. The constitutional recognition and affirmation of aboriginal rights may give rise to conflict with the interests of others given the limited nature of the resource.

Guidelines are necessary to resolve the allocational problems that arise regarding the fisheries. Any allocation of priorities after valid conservation measures have been implemented must give top priority to Indian food fishing.

The justificatory standard to be met may place a heavy burden on the Crown. However, government policy with respect to the British Columbia fishery, regardless of s. 35(1), already dictates that, in allocating the right to take fish, Indian food fishing is to be given priority over the interests of other user groups. Section 35(1) requires the Crown to ensure that its regulations are in keeping with that allocation of priority and guarantees that those plans treat aboriginal peoples in a way ensuring that their rights are taken seriously.

Within the analysis of justification, there are further questions to be addressed, depending on the circumstances of the inquiry. These include: whether there has

Si on conclut à l'existence d'une atteinte à première vue, l'analyse porte ensuite sur la question de la justification. Ce critère comporte deux étapes. En premier lieu, il faut se demander s'il existe un objectif législatif régulier. À ce stade, la cour se demanderait si l'objectif visé par le Parlement en autorisant le ministère à adopter des règlements en matière de pêche est régulier. Serait également examiné l'objectif poursuivi par le ministère en adoptant le règlement en cause. La justification fondée sur «l'intérêt public» est si vague qu'elle ne fournit aucune ligne directrice utile et si large qu'elle est inutilisable comme critère applicable pour déterminer si une restriction imposée à des droits constitutionnels est justifiée. La justification de la conservation et de la gestion des ressources ne soulève cependant aucune controverse.

Si on conclut à l'existence d'un objectif législatif régulier, on passe au second volet de la question de la justification: l'honneur de Sa Majesté lorsqu'Elle transige avec les peuples autochtones. Les rapports spéciaux de fiduciaire et la responsabilité du gouvernement envers les autochtones doivent être le premier facteur à examiner en déterminant si la mesure législative ou l'action en cause est justifiable. Il doit y avoir un lien entre la question de la justification et l'établissement de priorités dans le domaine de la pêche. La reconnaissance et la confirmation des droits ancestraux, prévues dans la Constitution, peuvent donner lieu à des conflits avec les intérêts d'autrui étant donné la nature limitée de la ressource.

On a besoin de lignes directrices qui permettront de résoudre les problèmes de répartition de ressources qui surgissent dans le domaine des pêcheries. Dans l'établissement des priorités suite à la mise en œuvre de mesures de conservation valides, il faut accorder la priorité absolue à la pêche par les Indiens à des fins de subsistance.

La norme de justification à respecter est susceptible d'imposer un lourd fardeau à Sa Majesté. Toutefois, la politique gouvernementale relativement à la pêche en Colombie-Britannique commande déjà, et ce, indépendamment du par. 35(1), que, dans l'attribution du droit de prendre du poisson, le droit des Indiens de pêcher à des fins d'alimentation ait la priorité sur les intérêts d'autres groupes d'utilisateurs. Le paragraphe 35(1) exige que Sa Majesté assure que Ses règlements respectent cette attribution de priorité et garantit que les plans de conservation et de gestion réservent aux peuples autochtones un traitement qui assure que leurs droits sont pris au sérieux.

Il y a, dans l'analyse de la justification, d'autres questions à aborder selon les circonstances de l'enquête. Il s'agit notamment des questions de savoir si, en tentant

been as little infringement as possible in order to effect the desired result; whether, in a situation of expropriation, fair compensation is available; and whether the aboriginal group in question has been consulted with respect to the conservation measures being implemented. This list is not exhaustive.

POURVOI et POURVOI INCIDENT contre un arrêt de la Cour d'appel de la Colombie-Britannique (1986), 9 B.C.L.R. (2d) 300, 36 D.L.R. (4th) 246, [1987] 2 W.W.R. 577, qui a accueilli l'appel interjeté contre un jugement du juge Lamperson de la Cour de comté, [1986] B.C.W.L.D. 599, qui avait rejeté l'appel d'une déclaration de culpabilité prononcée par le juge Goulet de la Cour provinciale. Pourvoi et pourvoi incident rejetés. La question constitutionnelle doit être renvoyée en première instance afin de recevoir une réponse conformément à l'analyse exposée dans les présents motifs.

Marvin R. V. Storrow, Q.C., Lewis F. Harvey and Joanne Lysyk, for the appellant.

Thomas R. Braidwood, Q.C., and James E. Dorsey, for the respondent.

Harry A. Slade, Arthur Pape and Louise Mandell, for the intervener the National Indian Brotherhood / Assembly of First Nations.

Christopher Harvey, for the interveners the B.C. Wildlife Federation, the Steelhead Society of British Columbia, the Pacific Fishermen's Defence Alliance, Northern Trollers' Association, the Pacific Gillnetters' Association, the Gulf Trollers' Association, the Prince Rupert Fishing Vessel Owners' Association, the Fishing Vessel Owners' Association of British Columbia, the Pacific Coast Fishing Vessel Owners' Guild, the Prince Rupert Fishermen's Cooperative Association, the Co-op Fishermen's Guild and the Deep Sea Trawlers' Association of B.C.

J. Keith Lowes, for the intervener the Fisheries Council of British Columbia.

Ian Donald, Q.C., for the intervener the United Fishermen and Allied Workers' Union.

J. T. S. McCabe, Q.C., and Michel Hélie, for the intervener the Attorney General for Ontario.

René Morin and Robert Décary, Q.C., for the intervener the Attorney General of Quebec.

E. Robert A. Edwards, Q.C., and Howard R. Eddy, for the intervener the Attorney General of British Columbia.

Kenneth J. Tyler and Robert G. Richards, for the intervener the Attorney General for Saskatchewan.

Robert J. Normey, for the intervener the Attorney General for Alberta.

S. Ronald Stevenson, for the intervener the Attorney General of Newfoundland.

The judgment of the Court was delivered by

THE CHIEF JUSTICE AND LA FOREST J.—This appeal requires this Court to explore for the first time the scope of s. 35(1) of the *Constitution Act*,

Marvin R. V. Storrow, c.r., Lewis F. Harvey et Joanne Lysyk, pour l'appellant.

Thomas R. Braidwood, c.r., et James E. Dorsey, pour l'intimée.

Harry A. Slade, Arthur Pape et Louise Mandell, pour l'intervenante la Fraternité des Indiens du Canada / Assemblée des premières nations.

Christopher Harvey, pour les intervenants la B.C. Wildlife Federation, la Steelhead Society of British Columbia, la Pacific Fishermen's Defence Alliance, Northern Trollers' Association, la Pacific Gillnetters' Association, la Gulf Trollers' Association, la Prince Rupert Fishing Vessel Owners' Association, la Fishing Vessel Owners' Association of British Columbia, la Pacific Coast Fishing Vessel Owners' Guild, la Prince Rupert Fishermen's Cooperative Association, la Co-op Fishermen's Guild et la Deep Sea Trawlers' Association of B.C.

J. Keith Lowes, pour l'intervenant le Fisheries Council of British Columbia.

Ian Donald, c.r., pour l'intervenant le Syndicat des pêcheurs et travailleurs assimilés.

J. T. S. McCabe, c.r., et Michel Hélie, pour l'intervenant le procureur général de l'Ontario.

René Morin et Robert Décary, c.r., pour l'intervenant le procureur général du Québec.

E. Robert A. Edwards, c.r., et Howard R. Eddy, pour l'intervenant le procureur général de la Colombie-Britannique.

Kenneth J. Tyler et Robert G. Richards, pour l'intervenant le procureur général de la Saskatchewan.

Robert J. Normey, pour l'intervenant le procureur général de l'Alberta.

S. Ronald Stevenson, pour l'intervenant le procureur général de Terre-Neuve.

Version française du jugement de la Cour rendu par

LE JUGE EN CHEF ET LE JUGE LA FOREST—Le présent pourvoi nous oblige à examiner pour la première fois la portée du par. 35(1) de la *Loi*

1982, and to indicate its strength as a promise to the aboriginal peoples of Canada. Section 35(1) is found in Part II of that Act, entitled "Rights of the Aboriginal Peoples of Canada", and provides as follows:

35. (1) The existing aboriginal and treaty rights of the aboriginal peoples of Canada are hereby recognized and affirmed.

The context of this appeal is the alleged violation of the terms of the Musqueam food fishing licence which are dictated by the *Fisheries Act*, R.S.C. 1970, c. F-14, and the regulations under that Act. The issue is whether Parliament's power to regulate fishing is now limited by s. 35(1) of the *Constitution Act, 1982*, and, more specifically, whether the net length restriction in the licence is inconsistent with that provision.

Facts

The appellant, a member of the Musqueam Indian Band, was charged under s. 61(1) of the *Fisheries Act* of the offence of fishing with a drift net longer than that permitted by the terms of the Band's Indian food fishing licence. The fishing which gave rise to the charge took place on May 25, 1984 in Canoe Passage which is part of the area subject to the Band's licence. The licence, which had been issued for a one-year period beginning March 31, 1984, set out a number of restrictions including one that drift nets were to be limited to 25 fathoms in length. The appellant was caught with a net which was 45 fathoms in length. He has throughout admitted the facts alleged to constitute the offence, but has defended the charge on the basis that he was exercising an existing aboriginal right to fish and that the net length restriction contained in the Band's licence is inconsistent with s. 35(1) of the *Constitution Act, 1982* and therefore invalid.

The Courts Below

Goulet Prov. Ct. J., who heard the case, first referred to the very similar pre-*Charter* case of *R. v. Derriksan* (1976), 71 D.L.R. (3d) 159 (S.C.C.),

constitutionnelle de 1982 et à indiquer la force qu'il peut avoir en tant que promesse faite aux peuples autochtones du Canada. Le paragraphe 35(1), qui se trouve à la partie II de cette loi sous la rubrique «Droits des peuples autochtones du Canada», porte:

35. (1) Les droits existants—ancestraux ou issus de traités—des peuples autochtones du Canada sont reconnus et confirmés.

Le contexte de ce pourvoi est une allégation de violation des conditions du permis de pêche de subsistance des Musqueams, lesquelles conditions sont fixées par la *Loi sur les pêcheries*, S.R.C. 1970, ch. F-14, et par ses règlements d'application. La question est de savoir si le pouvoir du Parlement de réglementer la pêche est maintenant restreint par le par. 35(1) de la *Loi constitutionnelle de 1982* et, plus précisément, de savoir si la restriction imposée dans le permis quant à la longueur du filet est incompatible avec cette disposition.

Les faits

L'appellant, un membre de la bande indienne des Musqueams, a été accusé en vertu du par. 61(1) de la *Loi sur les pêcheries* d'avoir pêché avec un filet dérivant plus long que celui autorisé par le permis de pêche de subsistance de la bande indienne. L'infraction remonte au 25 mai 1984 alors que l'appellant pêchait dans le passage Canoe qui fait partie de la zone visée par le permis de la bande. Le permis, délivré pour une période d'un an à compter du 31 mars 1984, établissait un certain nombre de restrictions dont celle qui prévoyait que les filets dérivants ne devaient pas avoir plus de 25 brasses de longueur. L'appellant a été trouvé en possession d'un filet qui avait 45 brasses de longueur. Il a toujours reconnu les faits à l'origine de l'infraction, mais il a soutenu en défense qu'il exerçait un droit ancestral existant de pêcher et que la restriction imposée dans le permis de la bande quant à la longueur du filet était incompatible avec le par. 35(1) de la *Loi constitutionnelle de 1982* et, par conséquent, invalide.

Les décisions des tribunaux d'instance inférieure

Le juge Goulet qui a entendu l'affaire en Cour provinciale a d'abord mentionné une affaire très semblable survenue avant l'adoption de la *Charte*,

where this Court held that the aboriginal right to fish was governed by the *Fisheries Act* and regulations. He then expressed the opinion that he was bound by *Calder v. Attorney-General of British Columbia* (1970), 74 W.W.R. 481 (B.C.C.A.), which held that a person could not claim an aboriginal right unless it was supported by a special treaty, proclamation, contract or other document, a position that was not disturbed because of the divided opinions of the members of this Court on the appeal which affirmed that decision ([1973] S.C.R. 313). Section 35(1) of the *Constitution Act, 1982* thus had no application. The alleged right here was not based on any treaty or other document but was said to have been one exercised by the Musqueam from time immemorial before European settlers came to this continent. He, therefore, convicted the appellant, finding it unnecessary to consider the evidence in support of an aboriginal right.

An appeal to Lamperson J. of the County Court of Vancouver, [1986] B.C.W.L.D. 599, was dismissed for similar reasons.

The British Columbia Court of Appeal (1986), 9 B.C.L.R. (2d) 300, found that the courts below had erred in deciding that they were bound by the Court of Appeal decision in *Calder, supra*, to hold that the appellant could not rely on an aboriginal right to fish. Since the pronouncement of the Supreme Court of Canada judgment, the Court of Appeal's decision has been binding on no one. The court also distinguished *Calder* on its facts.

The court then dealt with the other issues raised by the parties. On the basis of the trial judge's conclusion that Mr. Sparrow was fishing in ancient tribal territory where his ancestors had fished "from time immemorial", it stated that, with the other circumstances, this should have led to the conclusion that Mr. Sparrow was exercising an existing aboriginal right. It rejected the Crown's contention that the right was no longer existing by reason of its "extinguishment by regulation". An aboriginal right could continue, though regulated.

savoir l'arrêt *R. v. Derriksan* (1976), 71 D.L.R. (3d) 159 (C.S.C.), où notre Cour a conclu que le droit ancestral de pêcher était régi par la *Loi sur les pêcheries* et ses règlements d'application. Il a ensuite exprimé l'avis qu'il était lié par l'arrêt *Calder v. Attorney General of British Columbia* (1970), 74 W.W.R. 481 (C.A.C.-B.), dans lequel on avait conclu qu'une personne ne peut revendiquer un droit ancestral à moins que celui-ci ne soit étayé par un traité, une proclamation, un contrat ou un autre document particulier, une position qui n'a pas été contredite en raison des opinions partagées des membres de notre Cour qui ont confirmé l'arrêt ([1973] R.C.S. 313). Le paragraphe 35(1) de la *Loi constitutionnelle de 1982* ne s'appliquait donc pas. Le droit invoqué en l'espèce n'était pas fondé sur un traité ou un autre document, mais on a affirmé qu'il était exercé par les Musqueams depuis des temps immémoriaux, bien avant la venue des colons européens sur le continent. Le juge a donc déclaré l'appelant coupable et jugé qu'il n'était pas nécessaire d'examiner la preuve à l'appui de l'existence d'un droit ancestral.

Le juge Lamperson de la Cour de comté de Vancouver, [1986] B.C.W.L.D. 599, a rejeté l'appel pour des motifs semblables.

La Cour d'appel de la Colombie-Britannique (1986), 9 B.C.L.R. (2d) 300, a conclu que les tribunaux d'instance inférieure avaient commis une erreur en décidant qu'ils étaient liés par l'arrêt *Calder*, précité, de la Cour d'appel et que l'appelant ne pouvait invoquer un droit de pêche ancestral. Depuis le jugement de la Cour suprême du Canada, l'arrêt de la Cour d'appel ne lie plus personne. La cour a également distingué les faits de l'affaire *Calder* de ceux du présent pourvoi.

La cour a ensuite examiné les autres questions soulevées par les parties. Se fondant sur la conclusion du juge de première instance que M. Sparrow pêchait dans un territoire ancien de la tribu où ses ancêtres avaient pêché «depuis des temps immémoriaux», la cour a affirmé que, compte tenu des autres circonstances, cet élément aurait dû conduire à la conclusion que M. Sparrow exerçait un droit ancestral existant. Elle a rejeté la prétention de Sa Majesté que le droit n'existait plus en raison de son [TRADUCTION] «extinction par règlement».

The court also rejected textual arguments made to the effect that s. 35 was merely of a preambular character, and concluded that the right to fish asserted by the appellant was one entitled to constitutional protection.

The issue then became whether that protection extended so far as to preclude regulation (as contrasted with extinguishment which did not arise in this case) of the exercise of that right. In its view, the general power to regulate the time, place and manner of all fishing, including fishing under an aboriginal right, remains. Parliament retained the power to regulate fisheries and to control Indian lands under ss. 91(12) and (24) of the *Constitution Act, 1867* respectively. Reasonable regulations were necessary to ensure the proper management and conservation of the resource, and the regulations under the *Fisheries Act* restrict the right of all persons including Indians. The court observed, at p. 330:

Section 35(1) of the Constitution Act, 1982 does not purport to revoke the power of Parliament to act under Head 12 or 24. The power to regulate fisheries, including Indian access to the fisheries, continues, subject only to the new constitutional guarantee that the aboriginal rights existing on 17th April 1982 may not be taken away.

The court rejected arguments that the regulation of fishing was an inherent aspect of the aboriginal right to fish and that such regulation must be confined to necessary conservation measures. The right had always been and continued to be a regulated right. The court put it this way, at p. 331:

The aboriginal right which the Musqueam had was, subject to conservation measures, the right to take fish for food and for the ceremonial purposes of the band. It was in the beginning a regulated, albeit self-regulated, right. It continued to be a regulated right, and on 17th April 1982, it was a regulated right. It has never been a fixed right, and it has always taken its form from the circumstances in which it has existed. If the interests of the Indians and other Canadians in the fishery are to be protected, then reasonable regulations to ensure the

Un droit ancestral peut toujours exister même s'il est réglementé. La cour a également rejeté des arguments textuels selon lesquels l'art. 35 tenait simplement d'un préambule et elle a conclu que le droit de pêche invoqué par l'appelant pouvait bénéficier d'une protection constitutionnelle.

Il fallait donc alors déterminer si cette protection allait jusqu'à interdire la réglementation (par opposition à l'extinction qui n'a pas été soulevée en l'espèce) de l'exercice de ce droit. De l'avis de la cour, le pouvoir général de réglementer les périodes, les lieux et les méthodes de pêche, y compris la pêche en vertu d'un droit ancestral, existait toujours. Le Parlement a conservé le pouvoir de réglementer les pêcheries et de contrôler les terres réservées aux Indiens en vertu des par. 91(12) et (24) respectivement de la *Loi constitutionnelle de 1867*. Une réglementation raisonnable était nécessaire pour assurer la gestion et la conservation judicieuses des ressources et les règlements pris en application de la *Loi sur les pêcheries* restreignent le droit de tous, y compris les Indiens. La cour fait remarquer, à la p. 330:

[TRADUCTION] Le paragraphe 35(1) de la Loi constitutionnelle de 1982 n'a pas pour but de révoquer le pouvoir que possède le Parlement en vertu des par. 12 ou 24. Le pouvoir de réglementer les pêcheries, y compris l'accès des Indiens aux pêcheries, existe toujours, sous réserve seulement de la nouvelle garantie constitutionnelle que les droits ancestraux existants le 17 avril 1982 ne peuvent être supprimés.

La cour a rejeté les arguments selon lesquels la réglementation de la pêche constituait un aspect inhérent du droit de pêche ancestral et que cette réglementation devait être restreinte aux mesures de conservation nécessaires. Ce droit avait toujours été réglementé et continuait de l'être. Voici comment la cour s'exprime, à la p. 331:

[TRADUCTION] Le droit ancestral des Musqueams était, sous réserve de mesures de conservation, de prendre du poisson à des fins d'alimentation et aux fins rituelles de la bande. À l'origine, le droit était réglementé, bien que autoréglementé. Il a continué d'être réglementé et, le 17 avril 1982, c'était un droit réglementé. Ce droit n'a jamais été figé et sa forme a toujours été fonction des circonstances de son existence. S'il faut protéger les intérêts des Indiens et des autres Canadiens en matière de pêcheries, une réglementation

proper management and conservation of the resource must be continued.

The court then went on to particularize the right still further. It was a right for a purpose, not one related to a particular method. Essentially, it was a right to fish for food and associated traditional band activities:

The aboriginal right is not to take fish by any particular method or by a net of any particular length. It is to take fish for food purposes. The breadth of the right should be interpreted liberally in favour of the Indians. So "food purposes" should not be confined to subsistence. In particular, this is so because the Musqueam tradition and culture involves a consumption of salmon on ceremonial occasions and a broader use of fish than mere day-to-day domestic consumption.

That right, the court added, has not changed its nature since the enactment of the *Constitution Act, 1982*. What has changed is that the Indian food fishery right is now entitled to priority over the interests of other user groups and that that right, by reason of s. 35(1), cannot be extinguished.

The Court of Appeal found that the trial judge's findings of facts were insufficient to lead to an acquittal. Observing that the conviction was based on an erroneous view of the law and could not stand, the court further remarked upon the existence of unresolved conflicts in the evidence, including the question whether a change in the fishing conditions was necessary to reduce the catch to a level sufficient to satisfy reasonable food requirements, as well as for conservation purposes.

The Appeal

Leave to appeal to this Court was then sought and granted. On November 24, 1987, the following constitutional question was stated:

Is the net length restriction contained in the Musqueam Indian Band Indian Food Fishing Licence dated March 30, 1984, issued pursuant to the *British Columbia Fishery (General) Regulations* and the *Fisheries Act*, R.S.C.

raisonnable s'impose toujours pour assurer la gestion et la conservation judicieuses des ressources.

La cour a poursuivi en précisant ce droit encore davantage. C'était un droit lié à un objet et non à une méthode particulière. Essentiellement, il s'agissait d'un droit de pêche lié à la subsistance et aux activités connexes traditionnelles de la bande:

[TRADUCTION] Le droit ancestral n'est pas de prendre du poisson d'une manière particulière ou au moyen d'un filet d'une longueur particulière. C'est le droit de prendre du poisson à des fins d'alimentation. L'étendue de ce droit devrait être interprétée libéralement en faveur des Indiens. Ainsi, l'expression «à des fins de subsistance» ne devrait pas être restreinte à la survie. Il en est ainsi plus particulièrement parce que, selon la tradition et la culture des Musqueams, on consomme du saumon à l'occasion de cérémonies rituelles et le poisson ne sert pas seulement à la consommation familiale quotidienne.

La cour a ajouté que la nature de ce droit n'avait pas changé depuis l'adoption de la *Loi constitutionnelle de 1982*. Ce qui a changé, c'est que le droit de pêche des Indiens à des fins d'alimentation peut maintenant bénéficier d'une priorité sur les intérêts d'autres groupes qui font usage du poisson et que ce droit, en raison du par. 35(1), ne peut être éteint.

Selon la Cour d'appel, les conclusions de fait du juge de première instance étaient insuffisantes pour justifier un acquittement. Soulignant que la déclaration de culpabilité était fondée sur une conception erronée du droit applicable et ne pouvait être maintenue, la cour a fait d'autres remarques sur l'existence de contradictions non résolues dans la preuve, y compris sur la question de savoir si les conditions de pêche devaient être modifiées pour réduire les prises à un niveau suffisant pour répondre aux demandes raisonnables de nourriture ainsi qu'à des fins de conservation.

Le pourvoi

L'autorisation de pourvoi devant cette Cour a ensuite été demandée et accordée. Le 24 novembre 1987, on a formulé la question constitutionnelle suivante:

La limite de la longueur des filets contenue dans le permis de pêche de subsistance des Indiens de la bande des Musqueams, délivré le 30 mars 1984 conformément au *Règlement de pêche général de la Colombie-Britan-*

1970, c. F-14, inconsistent with s. 35(1) of the *Constitution Act, 1982*?

The appellant appealed on the ground that the Court of Appeal erred (1) in holding that s. 35(1) of the *Constitution Act, 1982* protects the aboriginal right only when exercised for food purposes and permits restrictive regulation of such rights whenever "reasonably justified as being necessary for the proper management and conservation of the resource or in the public interest", and (2) in failing to find the net length restriction in the Band's food fish licence was inconsistent with s. 35(1) of the *Constitution Act, 1982*.

The respondent Crown cross-appealed on the ground that the Court of Appeal erred in holding that the aboriginal right had not been extinguished before April 17, 1982, the date of commencement of the *Constitution Act, 1982*, and in particular in holding that, as a matter of fact and law, the appellant possessed the aboriginal right to fish for food. In the alternative, the respondent alleged, the Court of Appeal erred in its conclusions respecting the scope of the aboriginal right to fish for food and the extent to which it may be regulated, more particularly in holding that the aboriginal right included the right to take fish for the ceremonial purposes and societal needs of the Band and that the Band enjoyed a constitutionally protected priority over the rights of other people engaged in fishing. Section 35(1), the respondent maintained, did not invalidate legislation passed for the purpose of conservation and resource management, public health and safety and other overriding public interests such as the reasonable needs of other user groups. Finally, it maintained that the conviction ought not to have been set aside or a new trial directed because the appellant failed to establish a *prima facie* case that the reduction in the length of the net had unreasonably interfered with his right by preventing him from meeting his food fish requirements. According to the respondent, the Court of Appeal had erred in shifting the

nique et à la Loi sur les pêcheries, S.R.C. 1970, ch. F-14, est-elle incompatible avec le par. 35(1) de la *Loi constitutionnelle de 1982*?

^a L'appellant se pourvoit devant nous pour le motif que, selon lui, la Cour d'appel a commis une erreur (1) en décidant que le par. 35(1) de la *Loi constitutionnelle de 1982* ne protège les droits ancestraux que lorsque ceux-ci sont exercés à des fins d'alimentation et permet une réglementation restrictive de ces droits lorsque [TRADUCTION] «cela est raisonnablement justifié comme nécessaire pour la gestion et la conservation judicieuses des ressources ou dans l'intérêt public», et (2) en refusant de conclure que la limite de la longueur des filets imposée dans le permis de pêche de subsistance de la bande était incompatible avec le par. 35(1) de la *Loi constitutionnelle de 1982*.

Sa Majesté intimée a formé un pourvoi incident pour le motif que la Cour d'appel aurait commis une erreur en décidant que le droit ancestral n'avait pas été éteint avant le 17 avril 1982, date d'entrée en vigueur de la *Loi constitutionnelle de 1982*, et, en particulier, en décidant, en fait et en droit, que l'appellant détenait le droit ancestral de pêcher à des fins de subsistance. Subsidiairement, l'intimée a allégué que la Cour d'appel a commis une erreur dans ses conclusions concernant la portée du droit ancestral de pêcher à des fins de subsistance et la mesure dans laquelle ce droit peut être réglementé, plus particulièrement, en décidant que le droit ancestral comprenait le droit de pêcher à des fins rituelles et sociales de la bande et que la bande bénéficiait d'une priorité, garantie par la Constitution, sur les droits d'autres gens qui s'adonnent à la pêche. Selon l'intimée, le par. 35(1) n'invalidait pas les mesures législatives adoptées à des fins de conservation et de gestion des ressources, de santé et de sécurité publiques et d'autres intérêts publics primordiaux comme les besoins raisonnables des autres groupes qui font usage du poisson. Enfin, elle a soutenu qu'on n'aurait pas dû annuler la déclaration de culpabilité ni ordonner la tenue d'un nouveau procès parce que l'appellant n'a pas prouvé, de façon suffisante à première vue, que la réduction de la longueur des filets avait porté atteinte de façon déraisonnable à

burden of proof to the Crown on the issue before the appellant had established a *prima facie* case.

The National Indian Brotherhood / Assembly of First Nations intervened in support of the appellant. The Attorneys General of British Columbia, Ontario, Quebec, Saskatchewan, Alberta and Newfoundland supported the respondent, as did the B.C. Wildlife Federation and others, the Fisheries Council of British Columbia and the United Fishermen and Allied Workers' Union.

The Regulatory Scheme

The *Fisheries Act*, s. 34, confers on the Governor in Council broad powers to make regulations respecting the fisheries, the most relevant for our purposes being those set forth in the following paragraphs of that section:

34. ...

(a) for the proper management and control of the seacoast and inland fisheries;

(b) respecting the conservation and protection of fish;

(c) respecting the catching, loading, landing, handling, transporting, possession and disposal of fish;

(e) respecting the use of fishing gear and equipment;

(f) respecting the issue, suspension and cancellation of licences and leases;

(g) respecting the terms and conditions under which a lease or licence may be issued;

Contravention of the Act and the regulations is made an offence under s. 61(1) under which the appellant was charged.

Acting under its regulation-making powers, the Governor in Council enacted the *British Columbia Fishery (General) Regulations*, SOR/84-248. Under these Regulations (s. 4), everyone is, *inter alia*, prohibited from fishing without a licence, and

son droit en l'empêchant de répondre à ses besoins en matière de pêche pour fins d'alimentation. Selon l'intimée, la Cour d'appel a commis une erreur en déplaçant le fardeau de la preuve de manière à l'imposer à Sa Majesté avant que l'appelant n'ait présenté une preuve suffisante à première vue.

La Fraternité des Indiens du Canada / Assemblée des premières nations est intervenue à l'appui de l'appelant. Les procureurs généraux de la Colombie-Britannique, de l'Ontario, du Québec, de la Saskatchewan, de l'Alberta et de Terre-Neuve ont appuyé l'intimée tout comme l'ont fait la B.C. Wildlife Federation et autres, le Fisheries Council of British Columbia et le Syndicat des pêcheurs et travailleurs assimilés.

Le système de réglementation

L'article 34 de la *Loi sur les pêcheries* confère au gouverneur en conseil de larges pouvoirs de réglementation en matière de pêcheries, dont les plus pertinents en l'espèce sont ceux reproduits aux alinéas suivants de cet article:

34. ...

a) concernant la gestion et la surveillance judicieuses des pêches côtières et des pêches de l'intérieur;

b) concernant la conservation et la protection du poisson;

c) concernant la prise, le chargement, le débarquement, la manutention, le transport, la possession et l'écoulement du poisson;

e) concernant l'utilisation des appareils et accessoires de pêche;

f) concernant la délivrance, la suspension et l'annulation des permis et baux;

g) concernant les modalités et conditions auxquelles un permis ou un bail doit être délivré;

Le fait de contrevenir à la Loi et à ses règlements d'application constitue une infraction aux termes du par. 61(1) et c'est en vertu de ce paragraphe que l'appelant a été accusé.

Dans l'exercice de son pouvoir de réglementation, le gouverneur en conseil a adopté le *Règlement de pêche général de la Colombie-Britannique*, DORS/84-248. En vertu de ce règlement (art. 4), il est notamment interdit de pêcher sans

then only in areas and at the times and in the manner authorized by the Act or regulations. That provision also prohibits buying, selling, trading or bartering fish other than those lawfully caught under the authority of a commercial fishing licence. Section 4 reads:

4. (1) Unless otherwise provided in the Act or in any Regulations made thereunder in respect of the fisheries to which these Regulations apply or in the *Wildlife Act* (British Columbia), no person shall fish except under the authority of a licence or permit issued thereunder.

(2) No person shall fish for any species of fish in the Province or in Canadian fisheries waters of the Pacific Ocean except in areas and at times authorized by the Act or any Regulations made thereunder in respect of the fisheries to which these Regulations apply.

(3) No person who is the owner of a vessel shall operate that vessel or permit it to be operated in contravention of these Regulations.

(4) No person shall, without lawful excuse, have in his possession any fish caught or obtained contrary to the Act or any Regulations made thereunder in respect of the fisheries to which these Regulations apply.

(5) No person shall buy, sell, trade or barter or attempt to buy, sell, trade or barter fish or any portions thereof other than fish lawfully caught under the authority of a commercial fishing licence issued by the Minister or the Minister of Environment for British Columbia.

The Regulations make provision for issuing licences to Indians or a band "for the sole purpose of obtaining food for that Indian and his family and for the band", and no one other than an Indian is permitted to be in possession of fish caught pursuant to such a licence. Subsections 27(1) and (4) of the Regulations read:

27. (1) In this section "Indian food fish licence" means a licence issued by the Minister to an Indian or a band for the sole purpose of obtaining food for that Indian and his family or for the band.

(4) No person other than an Indian shall have in his possession fish caught under the authority of an Indian food fish licence.

permis, et encore, seulement dans les secteurs, aux heures et de la façon prévus par la Loi ou ses règlements d'application. Cette disposition interdit également d'acheter, de vendre et d'échanger du poisson autre que celui pris légalement en vertu d'un permis de pêche commerciale. L'article 4 prévoit:

4. (1) Sauf disposition contraire de la Loi, de ses règlements d'application concernant les pêches visées par le présent règlement, ou de la loi dite *Wildlife Act* de la Colombie-Britannique, il est interdit à quiconque de pêcher sans détenir un permis, délivré en vertu de l'un des règlements ou lois précités.

(2) Il est interdit, dans les eaux de la province ou les eaux des pêcheries canadiennes de l'océan Pacifique, de pêcher une espèce de poisson en dehors des heures et des secteurs autorisés par la Loi ou ses règlements d'application concernant les pêches visées par le présent règlement.

(3) Il est interdit au propriétaire d'un bateau d'exploiter ou de permettre à quiconque d'exploiter le bateau en contravention du présent règlement.

(4) Il est interdit à quiconque d'avoir en sa possession, sans excuse légitime, du poisson qui a été pris ou obtenu d'une manière non conforme à la Loi ou à ses règlements d'application concernant les pêches visées par le présent règlement.

(5) Il est interdit à quiconque d'acheter, de vendre, d'échanger ou de tenter d'acheter, de vendre ou d'échanger du poisson ou des parties de poisson, autre que du poisson pris légalement aux termes d'un permis de pêche commerciale délivré par le Ministre ou le *Minister of Environment* de la Colombie-Britannique.

Le Règlement prévoit que des permis peuvent être délivrés à un Indien ou à une bande «aux seules fins de l'alimentation de l'Indien ou de sa famille ou de celle de la bande», et que seul un Indien peut avoir en sa possession du poisson pris en vertu d'un tel permis. Les paragraphes 27(1) et (4) du Règlement prévoient:

27. (1) Aux fins du présent article, «permis de pêche de subsistance des Indiens» désigne un permis délivré par le Ministre à un Indien ou à une bande aux seules fins de l'alimentation de l'Indien ou de sa famille ou de celle de la bande.

(4) Il est interdit à quiconque sauf un Indien d'avoir en sa possession du poisson pris en vertu d'un permis de pêche de subsistance des Indiens.

As in the case of other licences issued under the Act, such licences may, by s. 12 of the Regulations, be subjected to restrictions regarding the species and quantity of fish that may be taken, the places and times when they may be taken, the manner in which they are to be marked and, most important here, the type of gear and equipment that may be used. Section 12 reads as follows:

12. (1) Subject to these Regulations and any regulations made under the Act in respect of the fisheries to which these Regulations apply and for the proper management and control of such fisheries, there may be specified in a licence issued under these Regulations

(a) the species of fish and quantity thereof that is permitted to be taken;

(b) the period during which and the waters in which fishing is permitted to be carried out;

(c) the type and quantity of fishing gear and equipment that is permitted to be used and the manner in which it is to be used;

(d) the manner in which fish caught and retained for educational or scientific purposes is to be held or displayed;

(e) the manner in which fish caught and retained is to be marked and transported; and

(f) the manner in which scientific or catch data is to be reported.

(2) No person fishing under the authority of a licence referred to in subsection (1) shall contravene or fail to comply with the terms of the licence.

Pursuant to these powers, the Musqueam Indian Band, on March 31, 1984, was issued an Indian food fishing licence as it had since 1978 "to fish for salmon for food for themselves and their family" in areas which included the place where the offence charged occurred, the waters of Ladner Reach and Canoe Passage therein described. The licence contained time restrictions as well as the type of gear to be used, notably "One Drift net twenty-five (25) fathoms in length".

The appellant was found fishing in the waters described using a drift net in excess of 25 fathoms.

Comme dans le cas des autres permis délivrés en vertu de la Loi, l'art. 12 du Règlement prévoit que ces permis peuvent faire l'objet de restrictions concernant les espèces et les quantités de poisson qui peuvent être prises, les lieux où le poisson peut être pris et les périodes pendant lesquelles il peut l'être, la façon dont le poisson doit être marqué et, qui plus est en l'espèce, le type d'engins et d'équipement qui peuvent être utilisés. L'article 12 se lit ainsi:

12. (1) Sous réserve du présent règlement et des autres règlements établis en vertu de la Loi relativement aux pêches visées par le présent règlement, un permis délivré en vertu du présent règlement peut indiquer, aux fins de la gestion et de la surveillance judicieuses de ces pêches,

a) quelles espèces et quelles quantités de poisson peuvent être prises;

b) dans quelles eaux et pendant quelle période la pêche peut être pratiquée;

c) quel type et quelle quantité d'engins et d'équipement de pêche peuvent être utilisés et de quelle façon ils doivent l'être;

d) de quelle façon le poisson pris et gardé à des fins éducatives ou scientifiques doit être gardé en captivité ou exposé;

e) de quelle façon le poisson pris et gardé doit être marqué et transporté; et

f) de quelle façon les données à caractère scientifique ou concernant les prises doivent être soumises.

(2) Il est interdit à quiconque pêche en vertu d'un permis visé au paragraphe (1) de déroger aux conditions de ce permis.

Conformément à ces pouvoirs, le 31 mars 1984, on a délivré à la bande indienne des Musqueams un permis de pêche de subsistance comme on le faisait depuis 1978 [TRADUCTION] «pour pêcher le saumon aux fins de leur alimentation et de celle de leurs familles» dans des secteurs dont celui où l'infraction reprochée a été commise, les eaux de Ladner Reach et du passage Canoe décrites dans le permis. Le permis comportait des restrictions quant à la période de pêche et quant au type d'engins à utiliser, notamment [TRADUCTION] «Un filet dérivant de vingt-cinq (25) brasses de longueur».

L'appelant a été surpris en train de pêcher dans les eaux décrites précédemment au moyen d'un

He did not contest this, arguing instead that he had committed no offence because he was acting in the exercise of an existing aboriginal right which was recognized and affirmed by s. 35(1) of the *Constitution Act, 1982*.

Analysis

We will address first the meaning of "existing" aboriginal rights and the content and scope of the Musqueam right to fish. We will then turn to the meaning of "recognized and affirmed", and the impact of s. 35(1) on the regulatory power of Parliament.

"Existing"

The word "existing" makes it clear that the rights to which s. 35(1) applies are those that were in existence when the *Constitution Act, 1982* came into effect. This means that extinguished rights are not revived by the *Constitution Act, 1982*. A number of courts have taken the position that "existing" means "being in actuality in 1982": *R. v. Eninew* (1983), 7 C.C.C. (3d) 443 (Sask. Q.B.), at p. 446, aff'd (1984), 12 C.C.C. (3d) 365 (Sask. C.A.) See also *Attorney-General for Ontario v. Bear Island Foundation* (1984), 49 O.R. (2d) 353 (H.C.); *R. v. Hare and Debassige* (1985), 20 C.C.C. (3d) 1 (Ont. C.A.); *Re Steinhauer and The Queen* (1985), 15 C.R.R. 175 (Alta. Q.B.); *Martin v. The Queen* (1985), 17 C.R.R. 375 (N.B.Q.B.); *R. v. Agawa* (1988), 28 O.A.C. 201.

Further, an existing aboriginal right cannot be read so as to incorporate the specific manner in which it was regulated before 1982. The notion of freezing existing rights would incorporate into the Constitution a crazy patchwork of regulations. Blair J.A. in *Agawa, supra*, had this to say about the matter, at p. 214:

Some academic commentators have raised a further problem which cannot be ignored. The **Ontario Fishery Regulations** contained detailed rules which vary for different regions in the province. Among other things, the **Regulations** specify seasons and methods of fishing, species of fish which can be caught and catch limits. Similar detailed provisions apply under the comparable

filet dérivant de plus de 25 brasses. Il ne conteste pas ce fait, mais soutient plutôt qu'il n'a commis aucune infraction parce qu'il exerçait alors un droit ancestral existant qui a été reconnu et confirmé par le par. 35(1) de la *Loi constitutionnelle de 1982*.

Analyse

Nous aborderons en premier lieu le sens de l'expression droits ancestraux «existants» ainsi que le contenu et la portée du droit de pêche des Musqueams. Nous examinerons ensuite le sens des mots «reconnus et confirmés» et l'effet du par. 35(1) sur le pouvoir réglementaire du Parlement.

«Existants»

Il ressort clairement du mot «existants» que les droits auxquels s'applique le par. 35(1) sont ceux qui existaient au moment de l'entrée en vigueur de la *Loi constitutionnelle de 1982*. D'où il s'ensuit que cette loi ne vient pas rétablir des droits éteints. Un certain nombre de tribunaux ont adopté le point de vue que le terme «existants» signifie «qui étaient exercés en 1982»: *R. v. Eninew* (1983), 7 C.C.C. (3d) 443 (B.R. Sask.), à la p. 446, conf. (1984), 12 C.C.C. (3d) 365 (C.A. Sask.) Voir également les arrêts *Attorney-General for Ontario v. Bear Island Foundation* (1984), 49 O.R. (2d) 353 (H.C.); *R. v. Hare and Debassige* (1985), 20 C.C.C. (3d) 1 (C.A. Ont.); *Re Steinhauer and The Queen* (1985), 15 C.R.R. 175 (B.R. Alb.); *Martin v. The Queen* (1985), 17 C.R.R. 375 (B.R.N.-B.); *R. v. Agawa* (1988), 28 O.A.C. 201.

De plus, un droit ancestral existant ne saurait être interprété de façon à englober la manière précise dont il était réglementé avant 1982. L'idée que le droit a été figé de cette façon aurait pour effet d'introduire dans la Constitution un ensemble de règlements disparates. Voici ce que le juge Blair de la Cour d'appel affirme à ce sujet dans l'arrêt *Agawa*, précité, à la p. 214:

[TRADUCTION] Certains auteurs ont soulevé un autre problème qui ne peut être ignoré. Le **Règlement de pêche de l'Ontario** comporte des règles détaillées qui varient d'une région à l'autre dans la province. Le **règlement** précise notamment les saisons et les méthodes de pêche, les espèces de poisson qui peuvent être prises et le nombre de prises. Des dispositions détaillées du

fisheries **Regulations** in force in other provinces. These detailed provisions might be constitutionalized if it were decided that the existing treaty rights referred to in s. 35(1) were those remaining after regulation at the time of the proclamation of the **Constitution Act, 1982**.

As noted by Blair J.A., academic commentary lends support to the conclusion that "existing" means "unextinguished" rather than exercisable at a certain time in history. Professor Slaterry, "Understanding Aboriginal Rights" (1987), 66 *Can. Bar Rev.* 727, at pp. 781-82, has observed the following about reading regulations into the rights:

This approach reads into the Constitution the myriad of regulations affecting the exercise of aboriginal rights, regulations that differed considerably from place to place across the country. It does not permit differentiation between regulations of long-term significance and those enacted to deal with temporary conditions, or between reasonable and unreasonable restrictions. Moreover, it might require that a constitutional amendment be enacted to implement regulations more stringent than those in existence on 17 April 1982. This solution seems unsatisfactory.

See also Professor McNeil, "The Constitutional Rights of the Aboriginal People of Canada" (1982), 4 *Supreme Court L.R.* 255, at p. 258 (q.v.); Pentney, "The Rights of the Aboriginal Peoples of Canada in the Constitution Act, 1982, Part II, Section 35: The Substantive Guarantee" (1988), 22 *U.B.C. L. Rev.* 207.

The arbitrariness of such an approach can be seen if one considers the recent history of the federal regulation in the context of the present case and the fishing industry. If the *Constitution Act, 1982* had been enacted a few years earlier, any right held by the Musqueam Band, on this approach, would have been constitutionally subjected to the restrictive regime of personal licences that had existed since 1917. Under that regime, the Musqueam catch had by 1969 become minor or non-existent. In 1978 a system of band licences was introduced on an experimental basis which permitted the Musqueam to fish with a 75 fathom

même genre s'appliquent en vertu de **règlements** de pêche comparables en vigueur dans d'autres provinces. Ces dispositions détaillées pourraient être constitutionalisées si l'on décidait que les droits existants issus de traités et mentionnés au par. 35(1) étaient ceux qui subsistaient après avoir été réglementés à l'époque de l'entrée en vigueur de la **Loi constitutionnelle de 1982**.

Comme le souligne le juge Blair, la doctrine tend à étayer la conclusion que le mot «existants» signifie «non éteints» plutôt que «pouvant être exercés à une certaine époque passée». Le professeur Slaterry, dans son article intitulé «Understanding Aboriginal Rights» (1987), 66 *R. du B. can.* 727, aux pp. 781 et 782, fait observer ceci au sujet de l'utilisation de textes réglementaires pour déterminer le sens des droits:

[TRADUCTION] Cette interprétation introduit dans la Constitution une foule de règlements qui portent atteinte à l'exercice des droits des autochtones et qui diffèrent considérablement d'un endroit à l'autre au pays. Elle ne permet aucune distinction entre les règlements applicables à long terme et ceux qui sont adoptés pour faire face à des conditions temporaires, ou entre des restrictions raisonnables et déraisonnables. En outre, elle pourrait exiger l'adoption d'une modification constitutionnelle pour mettre en œuvre des règlements plus sévères que ceux qui existaient le 17 avril 1982. Cette solution ne semble pas satisfaisante.

Voir également l'article du professeur McNeil, intitulé «The Constitutional Rights of the Aboriginal Peoples of Canada» (1982), 4 *Supreme Court L.R.* 255, à la p. 258 (q.v.); Pentney, «The Rights of the Aboriginal Peoples of Canada in the Constitution Act, 1982, Part II, Section 35: The Substantive Guarantee» (1988), 22 *U.B.C. L. Rev.* 207.

On perçoit le caractère arbitraire d'une telle interprétation lorsque l'on examine l'histoire récente de la réglementation fédérale dans le contexte de la présente affaire et de l'industrie de la pêche. Si la *Loi constitutionnelle de 1982* avait été adoptée quelques années plus tôt, tout droit détenu par la bande des Musqueams aurait, selon cette interprétation, été soumis constitutionnellement au régime sévère des permis personnels qui existait depuis 1917. Sous ce régime, en 1969, les prises des Musqueams étaient devenues négligeables ou non existantes. En 1978, un système mis sur pied sur une base expérimentale et selon lequel un

net for a greater number of days than other people. Under this regime, from 1977 to 1984, the number of Band members who fished for food increased from 19 persons using 15 boats, to 64 persons using 38 boats, while 10 other members of the Band fished under commercial licences. Before this regime, the Band's food fish requirement had basically been provided by Band members who were licensed for commercial fishing. Since the regime introduced in 1978 was in force in 1982, then, under this approach, the scope and content of an aboriginal right to fish would be determined by the details of the Band's 1978 licence.

The unsuitability of the approach can also be seen from another perspective. Ninety-one other tribes of Indians, comprising over 20,000 people (compared with 540 Musqueam on the reserve and 100 others off the reserve) obtain their food fish from the Fraser River. Some or all of these bands may have an aboriginal right to fish there. A constitutional patchwork quilt would be created if the constitutional right of these bands were to be determined by the specific regime available to each of those bands in 1982.

Far from being defined according to the regulatory scheme in place in 1982, the phrase "existing aboriginal rights" must be interpreted flexibly so as to permit their evolution over time. To use Professor Slattery's expression, in "Understanding Aboriginal Rights," *supra*, at p. 782, the word "existing" suggests that those rights are "affirmed in a contemporary form rather than in their primeval simplicity and vigour". Clearly, then, an approach to the constitutional guarantee embodied in s. 35(1) which would incorporate "frozen rights" must be rejected.

permis était délivré à la bande permettait aux Musqueams de pêcher au moyen d'un filet de 75 brasses pendant une période plus longue que celle applicable aux autres personnes. Sous ce régime, de 1977 à 1984, le nombre de membres de la bande qui ont pêché à des fins de subsistance est passé de 19 personnes utilisant 15 bateaux à 64 personnes utilisant 38 bateaux alors que 10 autres membres de la bande pêchaient en vertu de permis de pêche commerciale. Avant ce régime, c'était essentiellement les membres de la bande qui détenaient un permis de pêche commerciale qui approvisionnaient celle-ci en poisson à des fins de subsistance. Puisque le régime mis en place en 1978 était en vigueur en 1982, alors, en vertu de cette interprétation, la portée et le contenu d'un droit ancestral de pêcher seraient déterminés par les modalités du permis de 1978 de la bande.

Il est également possible de percevoir le caractère inadéquat de cette interprétation sous un autre angle. Quatre-vingt-onze autres tribus d'Indiens comprenant plus de 20 000 personnes (par opposition aux 540 Musqueams qui habitent la réserve et aux 100 autres à l'extérieur de la réserve) s'approvisionnent en poisson pour des fins d'alimentation dans le fleuve Fraser. Peut-être que certaines ou même que toutes ces bandes ont un droit ancestral de pêcher à cet endroit. Un mélémé constitutionnel résulterait si le droit constitutionnel de ces bandes devait être établi en fonction du régime spécifique applicable à chacune d'elles en 1982.

Loin d'être définie selon le régime de réglementation en vigueur en 1982, l'expression «droits ancestraux existants» doit recevoir une interprétation souple de manière à permettre à ces droits d'évoluer avec le temps. Pour reprendre l'expression du professeur Slattery, dans «Understanding Aboriginal Rights,» précité, à la p. 782, le mot «existants» laisse supposer que ces droits sont [TRADUCTION] «confirmés dans leur état actuel plutôt que dans leurs simplicité et vigueur primitives». Il est alors évident qu'il faut rejeter une interprétation de la garantie constitutionnelle énoncée au par. 35(1) qui engloberait des «droits figés».

The Aboriginal Right

We turn now to the aboriginal right at stake in this appeal. The Musqueam Indian Reserve is located on the north shore of the Fraser River close to the mouth of that river and within the limits of the City of Vancouver. There has been a Musqueam village there for hundreds of years. This appeal does not directly concern the reserve or the adjacent waters, but arises out of the Band's right to fish in another area of the Fraser River estuary known as Canoe Passage in the South Arm of the river, some 16 kilometres (about 10 miles) from the reserve. The reserve and those waters are separated by the Vancouver International Airport and the Municipality of Richmond.

The evidence reveals that the Musqueam have lived in the area as an organized society long before the coming of European settlers, and that the taking of salmon was an integral part of their lives and remains so to this day. Much of the evidence of an aboriginal right to fish was given by Dr. Suttles, an anthropologist, supported by that of Mr. Grant, the Band administrator. The Court of Appeal thus summarized Dr. Suttles' evidence, at pp. 307-308:

Dr. Suttles was qualified as having particular qualifications in respect of the ethnography of the Coast Salish Indian people of which the Musqueams were one of several tribes. He thought that the Musqueam had lived in their historic territory, which includes the Fraser River estuary, for at least 1,500 years. That historic territory extended from the north shore of Burrard Inlet to the south shore of the main channel of the Fraser River, including the waters of the three channels by which that river reaches the ocean. As part of the Salish people, the Musqueam were part of a regional social network covering a much larger area but, as a tribe, were themselves an organized social group with their own name, territory and resources. Between the tribes there was a flow of people, wealth and food. No tribe was wholly self-sufficient or occupied its territory to the complete exclusion of others.

Dr. Suttles described the special position occupied by the salmon fishery in that society. The salmon was not only an important source of food but played an important part in the system of beliefs of the Salish people,

Le droit ancestral

Nous passons maintenant au droit ancestral présentement en cause. La réserve indienne des Musqueams est située sur la rive nord du fleuve Fraser, près de son embouchure et dans les limites de la ville de Vancouver. Un village de Musqueams y est établi depuis des centaines d'années. Le présent pourvoi ne concerne pas directement la réserve ou les eaux adjacentes, mais découle du droit de la bande de pêcher dans un autre secteur de l'estuaire du fleuve Fraser, appelé passage Canoe, situé dans le bras sud du fleuve, à quelque 16 kilomètres (environs 10 milles) de la réserve. L'aéroport international de Vancouver et la municipalité de Richmond séparent la réserve de ces eaux.

La preuve révèle que les Musqueams vivaient dans la région comme société organisée bien avant la venue des colons européens et que la prise du saumon faisait partie intégrante de leur vie et le demeure encore aujourd'hui. La preuve de l'existence d'un droit de pêche ancestral provient en grande partie de M. Suttles, un anthropologue, dont le témoignage est confirmé par celui de M. Grant, l'administrateur de la bande. Voici comment la Cour d'appel résume le témoignage de M. Suttles, aux pp. 307 et 308:

[TRADUCTION] Monsieur Suttles est reconnu comme ayant des compétences particulières en ce qui concerne l'ethnographie du peuple indien Salish de la côte, composé de plusieurs tribus dont celles des Musqueams. Selon lui, les Musqueams vivent dans leur territoire ancestral, qui comprend l'estuaire du fleuve Fraser, depuis au moins 1 500 ans. Ce territoire ancestral s'étendait de la rive nord du passage Burrard à la rive sud du bras principal du fleuve Fraser et comprenait les eaux des trois bras par lesquels ce fleuve se jette dans l'océan. Parce que les Musqueams faisaient partie du peuple Salish, ils faisaient partie d'un réseau social régional qui s'étendait sur une bien plus grande région mais, comme tribu, ils formaient eux-mêmes un groupe social organisé ayant un nom, un territoire et des ressources en propre. Entre les tribus, il y avait circulation de personnes, de biens et de nourriture. Aucune tribu n'était tout à fait autosuffisante ni n'occupait son territoire à l'exclusion totale des autres.

Monsieur Suttles a décrit la place privilégiée de la pêche au saumon dans cette société. Le saumon était non seulement une source d'alimentation importante, mais encore il jouait un rôle important dans les croyan-

and in their ceremonies. The salmon were held to be a race of beings that had, in "myth times", established a bond with human beings requiring the salmon to come each year to give their bodies to the humans who, in turn, treated them with respect shown by performance of the proper ritual. Toward the salmon, as toward other creatures, there was an attitude of caution and respect which resulted in effective conservation of the various species.

While the trial for a violation of a penal prohibition may not be the most appropriate setting in which to determine the existence of an aboriginal right, and the evidence was not extensive, the correctness of the finding of fact of the trial judge "that Mr. Sparrow was fishing in ancient tribal territory where his ancestors had fished from time immemorial in that part of the mouth of the Fraser River for salmon" is supported by the evidence and was not contested. The existence of the right, the Court of Appeal tells us, was "not the subject of serious dispute". It is not surprising, then, that, taken with other circumstances, that court should find, at p. 320, that "the judgment appealed from was wrong in . . . failing to hold that Sparrow at the relevant time was exercising an existing aboriginal right".

In this Court, however, the respondent contested the Court of Appeal's finding, contending that the evidence was insufficient to discharge the appellant's burden of proof upon the issue. It is true that for the period from 1867 to 1961 the evidence is scanty. But the evidence was not disputed or contradicted in the courts below and there is evidence of sufficient continuity of the right to support the Court of Appeal's finding, and we would not disturb it.

What the Crown really insisted on, both in this Court and the courts below, was that the Musqueam Band's aboriginal right to fish had been extinguished by regulations under the *Fisheries Act*.

The history of the regulation of fisheries in British Columbia is set out in *Jack v. The Queen*, [1980] 1 S.C.R. 294, especially at pp. 308 *et seq.*, and we need only summarize it here. Before the

ces du peuple Salish et leurs cérémonies. On considérait le saumon comme une espèce vivante qui, à une «époque mythique», avait établi des liens avec l'espèce humaine; le saumon devait donc venir chaque année et offrir sa chair aux hommes qui, à leur tour, le traitaient avec respect dans l'accomplissement du rite approprié. À l'égard du saumon, comme à l'égard d'autres créatures, il y avait une attitude de prudence et de respect qui a permis de conserver efficacement les diverses espèces.

Bien que le procès concernant la violation d'une interdiction pénale ne constitue pas le cadre idéal pour déterminer l'existence d'un droit ancestral et bien que la preuve ne soit pas considérable, l'exactitude de la conclusion de fait du juge de première instance portant [TRADUCTION] «que M. Sparrow pêchait dans un territoire ancien de la tribu où ses ancêtres avaient pêché depuis des temps immémoriaux dans cette partie de l'embouchure du fleuve Fraser» est confirmée par la preuve et n'est pas contestée. Selon la Cour d'appel, l'existence de ce droit [TRADUCTION] «n'a pas vraiment été contestée». Il n'est donc pas surprenant que, compte tenu d'autres circonstances, la cour ait conclu, à la p. 320, que [TRADUCTION] «la décision qui fait l'objet de l'appel était erronée parce qu'on [. . .] n'a pas conclu que Sparrow exerçait à l'époque en question un droit ancestral existant».

Devant cette Cour cependant, l'intimée a contesté la conclusion de la Cour d'appel, prétendant que la preuve était insuffisante pour libérer l'appelant de son fardeau de preuve en la matière. Il est vrai qu'en ce qui concerne la période de 1867 à 1961 la preuve est sommaire. Mais la preuve n'a pas été contestée ni contredite devant les tribunaux d'instance inférieure et il y a preuve d'un exercice ininterrompu suffisant du droit pour justifier la conclusion de la Cour d'appel et nous n'y toucherons pas.

Ce sur quoi Sa Majesté a vraiment insisté, devant notre Cour et les tribunaux d'instance inférieure, c'est que le droit de pêche ancestral des Musqueams a été éteint par les règlements pris en vertu de la *Loi sur les pêcheries*.

L'historique de la réglementation des pêcheries en Colombie-Britannique est établi dans l'arrêt *Jack c. La Reine*, [1980] 1 R.C.S. 294, particulièrement aux pp. 308 et suiv., et il nous suffit de le

province's entry into Confederation in 1871, the fisheries were not regulated in any significant way, whether in respect of Indians or other people. The Indians were not only permitted but encouraged to continue fishing for their own food requirements. Commercial and sport fishing were not then of any great importance. The federal *Fisheries Act* was only proclaimed in force in the province in 1876 and the first *Salmon Fishery Regulations for British Columbia* were adopted in 1878 and were minimal.

The 1878 regulations were the first to mention Indians. They simply provided that the Indians were at all times at liberty, by any means other than drift nets or spearing, to fish for food for themselves, but not for sale or barter. The Indian right or liberty to fish was thereby restricted, and more stringent restrictions were added over the years. As noted in *Jack v. The Queen, supra*, at p. 310:

The federal Regulations became increasingly strict in regard to the Indian fishery over time, as first the commercial fishery developed and then sport fishing became common. What we can see is an increasing subjection of the Indian fishery to regulatory control. First, the regulation of the use of drift nets, then the restriction of fishing to food purposes, then the requirement of permission from the Inspector and, ultimately, in 1917, the power to regulate even food fishing by means of conditions attached to the permit.

The 1917 regulations were intended to make still stronger the provisions against commercial fishing in the exercise of the Indian right to fish for food; see P.C. 2539 of Sept. 11, 1917. The Indian food fishing provisions remained essentially the same from 1917 to 1977. The regulations of 1977 retained the general principles of the previous sixty years. An Indian could fish for food under a "special licence" specifying method, locale and times of fishing. Following an experimental program to be discussed later, the 1981 regulations provided for the entirely new concept of a Band food fishing licence, while retaining comprehensive

résumer en l'espèce. Avant l'entrée de la province dans la Confédération en 1871, il n'existait aucune réglementation appréciable de la pêche pour les Indiens ou pour les autres personnes. Les Indiens étaient non seulement autorisés, mais encouragés à pêcher pour se nourrir. La pêche commerciale et la pêche sportive n'avaient pas encore acquis une grande importance. Ce n'est qu'en 1876 que la loi fédérale, la *Loi sur les pêcheries*, est entrée en vigueur en Colombie-Britannique, et le premier règlement dit *Salmon Fishery Regulations for British Columbia* a été adopté en 1878 et sa portée était très limitée.

C'est en 1878 que les Indiens ont été mentionnés pour la première fois dans le Règlement. Celui-ci prévoyait simplement que les Indiens avaient en tout temps le droit de pêcher pour leur alimentation, mais non pour fins de vente, de troc ou de trafic, par tout moyen sauf le filet dérivant ou le harpon. Le droit ou la liberté des Indiens de pêcher était donc restreint, et des restrictions plus sévères ont été apportées au fil des ans. Tel que souligné dans l'arrêt *Jack c. La Reine*, précité, à la p. 310:

Face à la popularité de la pêche commerciale puis de la pêche sportive, la réglementation fédérale est, avec le temps, devenue de plus en plus sévère à l'égard des Indiens. On a assisté à l'assujettissement croissant de la pêche par les Indiens au contrôle réglementaire. Cela a commencé par la réglementation de l'usage de filets dérivants qui a été suivie d'une restriction du droit de pêche à des fins d'alimentation, puis de l'obligation d'obtenir un permis de l'inspecteur et enfin, en 1917, du pouvoir de réglementer même la pêche à des fins d'alimentation au moyen de conditions spécifiées dans le permis.

Le règlement de 1917 avait pour but de rendre encore plus sévères les dispositions interdisant la pêche commerciale dans l'exercice du droit des Indiens de pêcher à des fins alimentaires; voir C.P. 2539 du 11 septembre 1917. Les dispositions relatives à la pêche de subsistance des Indiens sont demeurées essentiellement les mêmes de 1917 à 1977. Le règlement de 1977 reprenait les principes généraux des soixante dernières années. Un Indien pouvait pêcher à des fins alimentaires en vertu d'un «permis spécial» précisant la méthode, le lieu et les périodes de pêche. À la suite d'un programme expérimental dont il sera question plus

specification of conditions for the exercise of licences.

It is this progressive restriction and detailed regulation of the fisheries which, respondent's counsel maintained, have had the effect of extinguishing any aboriginal right to fish. The extinguishment need not be express, he argued, but may take place where the sovereign authority is exercised in a manner "necessarily inconsistent" with the continued enjoyment of aboriginal rights. For this proposition, he particularly relied on *St. Catherine's Milling and Lumber Co. v. The Queen* (1888), 14 App. Cas. 46 (P.C.); *Calder v. Attorney-General of British Columbia*, *supra*; *Baker Lake (Hamlet) v. Minister of Indian Affairs and Northern Development*, [1980] 1 F.C. 518 (T.D.); and *Attorney-General for Ontario v. Bear Island Foundation*, *supra*. The consent to its extinguishment before the *Constitution Act, 1982* was not required; the intent of the Sovereign could be effected not only by statute but by valid regulations. Here, in his view, the regulations had entirely displaced any aboriginal right. There is, he submitted, a fundamental inconsistency between the communal right to fish embodied in the aboriginal right, and fishing under a special licence or permit issued to individual Indians (as was the case until 1977) in the discretion of the Minister and subject to terms and conditions which, if breached, may result in cancellation of the licence. The *Fisheries Act* and its regulations were, he argued, intended to constitute a complete code inconsistent with the continued existence of an aboriginal right.

At bottom, the respondent's argument confuses regulation with extinguishment. That the right is controlled in great detail by the regulations does not mean that the right is thereby extinguished. The distinction to be drawn was carefully explained, in the context of federalism, in the first

loin, le règlement de 1981 portait sur une notion tout à fait nouvelle d'un permis de pêche à des fins de subsistance d'une bande tout en conservant le régime complet des conditions pour l'exercice du permis.

Selon l'avocat de l'intimée, ce sont ces restrictions progressives et la réglementation détaillée du droit de pêche qui ont eu pour effet d'éteindre tout droit de pêche ancestral. Selon lui, il n'est pas nécessaire que l'extinction soit formulée expressément, elle peut avoir lieu lorsque l'autorité souveraine est exercée d'une manière [TRADUCTION] «nécessairement incompatible» avec la jouissance continue de droits ancestraux. À l'appui de cette affirmation, il a surtout invoqué les arrêts *St. Catherine's Milling and Lumber Co. v. The Queen* (1888), 14 App. Cas. 46 (C.P.), *Calder c. Procureur général de la Colombie-Britannique*, précité, *Baker Lake (Hamlet) c. Ministre des Affaires indiennes et du Nord canadien*, [1980] 1 C.F. 518 (D.P.I.), et *Attorney-General for Ontario v. Bear Island Foundation*, précité. Avant l'adoption de la *Loi constitutionnelle de 1982*, le consentement à l'extinction n'était pas requis; le souverain pouvait réaliser son intention non seulement par une loi mais aussi par un règlement valide. De l'avis de l'avocat, en l'espèce, le règlement avait totalement supplanté tout droit ancestral. Il affirme qu'il existe une incompatibilité fondamentale entre le droit collectif de pêche enchâssé dans le droit ancestral, et le droit de pêche en vertu d'un permis spécial ou d'un permis délivré à des Indiens pris individuellement (comme c'était le cas jusqu'en 1977) par le Ministre dans l'exercice de son pouvoir discrétionnaire et sous réserve de conditions qui, si elles étaient violées, pouvaient entraîner l'annulation du permis. Il a poursuivi en affirmant que la *Loi sur les pêcheries* et ses règlements d'application avaient pour but d'établir un code complet incompatible avec l'existence ininterrompue d'un droit ancestral.

En réalité, l'intimé confond dans son argumentation la réglementation et l'extinction. Que l'exercice du droit fasse l'objet d'une réglementation très minutieuse, cela ne signifie pas que ce droit est par le fait même éteint. La distinction à faire a été expliquée soigneusement, dans le contexte du fédé-

fisheries case, *Attorney-General for Canada v. Attorney-General for Ontario*, [1898] A.C. 700. There, the Privy Council had to deal with the interrelationship between, on the one hand, provincial property, which by s. 109 of the *Constitution Act, 1867* is vested in the provinces (and so falls to be regulated *qua* property exclusively by the provinces) and, on the other hand, the federal power to legislate respecting the fisheries thereon under s. 91(12) of that Act. The Privy Council said the following in relation to the federal regulation (at pp. 712-13):

... the power to legislate in relation to fisheries does necessarily to a certain extent enable the Legislature so empowered to affect proprietary rights. An enactment, for example, prescribing the times of the year during which fishing is to be allowed, or the instruments which may be employed for the purpose (which it was admitted the Dominion Legislature was empowered to pass) might very seriously touch the exercise of proprietary rights, and the extent, character, and scope of such legislation is left entirely to the Dominion Legislature. The suggestion that the power might be abused so as to amount to a practical confiscation of property does not warrant the imposition by the Courts of any limit upon the absolute power of legislation conferred. The supreme legislative power in relation to any subject-matter is always capable of abuse, but it is not to be assumed that it will be improperly used; if it is, the only remedy is an appeal to those by whom the Legislature is elected.

In the context of aboriginal rights, it could be argued that, before 1982, an aboriginal right was automatically extinguished to the extent that it was inconsistent with a statute. As Mahoney J. stated in *Baker Lake*, *supra*, at p. 568:

Once a statute has been validly enacted, it must be given effect. If its necessary effect is to abridge or entirely abrogate a common law right, then that is the effect that the courts must give it. That is as true of an aboriginal title as of any other common law right.

See also *Attorney-General for Ontario v. Bear Island Foundation*, *supra*, at pp. 439-40. That in Judson J.'s view was what had occurred in *Calder*, *supra*, where, as he saw it, a series of statutes evinced a unity of intention to exercise a sovereignty inconsistent with any conflicting interest,

ralisme, dans le premier arrêt portant sur les pêcheries, *Attorney General for Canada v. Attorney General for Ontario*, [1898] A.C. 700. Dans cet arrêt, le Conseil privé devait se pencher sur la corrélation entre, d'une part, les biens situés dans la province, qui, en raison de l'art. 109 de la *Loi constitutionnelle de 1867*, appartiennent aux provinces (et qui, à ce titre, sont réglementés exclusivement par la province) et, d'autre part, le pouvoir fédéral de légiférer en matière de pêcheries en vertu du par. 91(12) de cette loi. Le Conseil privé affirme ceci au sujet de la réglementation fédérale, aux pp. 712 et 713:

[TRADUCTION] ... le pouvoir de légiférer en matière de pêcheries permet en toute logique au législateur titulaire d'un tel pouvoir de toucher dans une certaine mesure aux droits de propriété. Par exemple, une disposition qui fixe la saison où il est permis de pêcher ou le genre d'attirail que l'on peut employer pour pêcher (disposition que, de l'aveu de tous, le Parlement du Dominion a le pouvoir d'adopter) pourrait très sérieusement toucher à l'exercice des droits de propriété et l'étendue, la force et la portée d'une telle loi ressortissent entièrement au Parlement du Dominion. L'idée qu'on puisse abuser du pouvoir de sorte qu'en pratique le droit de propriété soit confisqué ne justifie pas les tribunaux d'imposer des restrictions au pouvoir absolu conféré dans la loi. Il est toujours possible d'abuser du pouvoir suprême de légiférer dans un domaine donné, mais il ne faut pas présumer qu'il sera exercé de façon inadmissible; le cas échéant, le seul recours consiste à s'adresser à l'électorat.

Dans le contexte des droits ancestraux, on pourrait faire valoir qu'avant 1982 un droit ancestral était automatiquement éteint dans la mesure où il était incompatible avec une loi. Comme le juge Mahoney l'a affirmé dans l'arrêt *Baker Lake*, précité, aux pp. 568 et 569:

Une fois qu'une loi a été régulièrement adoptée, il faut lui donner effet; s'il est nécessaire pour lui donner effet d'altérer voire d'abroger entièrement un droit de *common law* alors c'est l'effet que les tribunaux doivent lui donner. Cela est tout aussi vrai d'un titre aborigène que de tout autre droit de *common law*.

Voir également l'arrêt *Attorney-General for Ontario v. Bear Island Foundation*, précité, aux pp. 439 et 440. De l'avis du juge Judson, c'est ce qui s'était produit dans l'affaire *Calder*, précitée, où, selon lui, une série de lois avait mis fin à la volonté d'exercer une souveraineté incompatible

including aboriginal title. But Hall J. in that case stated (at p. 404) that "the onus of proving that the Sovereign intended to extinguish the Indian title lies on the respondent and that intention must be 'clear and plain'". (Emphasis added.) The test of extinguishment to be adopted, in our opinion, is that the Sovereign's intention must be clear and plain if it is to extinguish an aboriginal right.

There is nothing in the *Fisheries Act* or its detailed regulations that demonstrates a clear and plain intention to extinguish the Indian aboriginal right to fish. The fact that express provision permitting the Indians to fish for food may have applied to all Indians and that for an extended period permits were discretionary and issued on an individual rather than a communal basis in no way shows a clear intention to extinguish. These permits were simply a manner of controlling the fisheries, not defining underlying rights.

We would conclude then that the Crown has failed to discharge its burden of proving extinguishment. In our opinion, the Court of Appeal made no mistake in holding that the Indians have an existing aboriginal right to fish in the area where Mr. Sparrow was fishing at the time of the charge. This approach is consistent with ensuring that an aboriginal right should not be defined by incorporating the ways in which it has been regulated in the past.

The scope of the existing Musqueam right to fish must now be delineated. The anthropological evidence relied on to establish the existence of the right suggests that, for the Musqueam, the salmon fishery has always constituted an integral part of their distinctive culture. Its significant role involved not only consumption for subsistence purposes, but also consumption of salmon on ceremonial and social occasions. The Musqueam have always fished for reasons connected to their cultural and physical survival. As we stated earlier, the right to do so may be exercised in a contemporary manner.

avec tout intérêt contradictoire, y compris un titre aborigène. Mais le juge Hall a affirmé dans cet arrêt (à la p. 404) «qu'il incombe à l'intimé d'établir que le Souverain voulait éteindre le titre indien, et que cette intention doit être «claire et expresse»». (Nous soulignons.) Le critère de l'extinction qui doit être adopté, à notre avis, est que l'intention du Souverain d'éteindre un droit ancestral doit être claire et expresse.

La *Loi sur les pêcheries* ou ses règlements d'application détaillés ne font état d'aucune intention claire et expresse de mettre fin au droit ancestral des Indiens de pêcher. Le fait qu'une disposition autorisant explicitement les Indiens à pêcher à des fins de subsistance ait pu s'appliquer à tous les Indiens et que la délivrance des permis ait pendant longtemps été discrétionnaire et effectuée sur une base individuelle plutôt que collective n'indique aucunement une intention claire d'éteindre le droit. Ces permis constituaient simplement une façon de contrôler les pêcheries et non de définir des droits sous-jacents.

Nous sommes donc d'avis que le ministère public ne s'est pas acquitté de son fardeau de prouver l'extinction du droit. Nous estimons que la Cour d'appel n'a commis aucune erreur en décidant que les Indiens ont un droit de pêche ancestral existant dans le secteur où M. Sparrow pêchait au moment de l'infraction. Ce point de vue est compatible avec le principe voulant qu'un droit ancestral ne doive pas être défini en fonction des façons dont il a été réglementé dans le passé.

Il nous faut maintenant préciser la portée du droit de pêche existant des Musqueams. D'après la preuve anthropologique produite pour établir l'existence de ce droit, la pêche au saumon a toujours fait partie intégrante de la culture distinctive des Musqueams. Le rôle important qu'elle joue ne se résume pas à la consommation à des fins de subsistance, mais il comprend également la consommation de saumon dans le cadre d'activités rituelles et sociales. Les Musqueams ont toujours pêché pour des raisons liées à leur survie culturelle et matérielle. Comme nous l'avons déjà affirmé, le droit d'agir ainsi peut s'exercer de manière contemporaine.

The British Columbia Court of Appeal in this case held that the aboriginal right was to fish for food purposes, but that purpose was not to be confined to mere subsistence. Rather, the right was found to extend to fish consumed for social and ceremonial activities. The Court of Appeal thereby defined the right as protecting the same interest as is reflected in the government's food fish policy. In limiting the right to food purposes, the Court of Appeal referred to the line of cases involving the interpretation of the Natural Resources Agreements and the food purpose limitation placed on the protection of fishing and hunting rights by the *Constitution Act, 1930* (see *R. v. Wesley*, [1932] 2 W.W.R. 337, *Prince and Myron v. The Queen*, [1964] S.C.R. 81; *R. v. Sutherland*, [1980] 2 S.C.R. 451).

The Court of Appeal's position was attacked from both sides. The respondent for its part, argued that, if an aboriginal right to fish does exist, it does not include the right to take fish for the ceremonial and social activities of the Band. The appellant, on the other hand, attacked the Court of Appeal's restriction of the right to a right to fish for food. He argued that the principle that the holders of aboriginal rights may exercise those rights according to their own discretion has been recognized by this Court in the context of the protection of treaty hunting rights (*Simon v. The Queen*, [1985] 2 S.C.R. 387) and that it should be applied in this case such that the right is defined as a right to fish for any purpose and by any non-dangerous method.

In relation to this submission, it was contended before this Court that the aboriginal right extends to commercial fishing. While no commercial fishery existed prior to the arrival of European settlers, it is contended that the Musqueam practice of bartering in early society may be revived as a modern right to fish for commercial purposes. The presence of numerous interveners representing commercial fishing interests, and the suggestion on the facts that the net length restriction is at least

La Cour d'appel de la Colombie-Britannique a décidé en l'espèce que le droit ancestral en cause est celui de pêcher à des fins d'alimentation, mais que ces fins ne doivent pas être restreintes à la simple survie. On a conclu, au contraire, que ce droit s'étend au poisson consommé dans le cadre d'activités sociales et rituelles. La Cour d'appel a ainsi défini le droit comme protégeant le même intérêt que celui que traduit la politique du gouvernement en matière de pêche à des fins de subsistance. En limitant à des fins de subsistance l'exercice de ce droit, la Cour d'appel s'est fondée sur un courant de jurisprudence portant sur l'interprétation des conventions sur les ressources naturelles et sur la restriction relative à la subsistance apportée par la *Loi constitutionnelle de 1930* à la protection des droits de pêche et de chasse (voir *R. v. Wesley*, [1932] 2 W.W.R. 337, *Prince and Myron v. The Queen*, [1964] R.C.S. 81, *R. c. Sutherland*, [1980] 2 R.C.S. 451).

Les deux parties ont contesté la position de la Cour d'appel. D'une part, l'intimée a soutenu que si le droit ancestral de pêcher existe, ce droit ne comprend pas celui de prendre du poisson pour des cérémonies ou des activités sociales de la bande. D'autre part, l'appelant a contesté la restriction apportée par la Cour d'appel au droit de pêcher à des fins de subsistance. Il a soutenu que le principe suivant lequel les titulaires de droits ancestraux peuvent exercer ces droits comme bon leur semble a reçu l'aval de notre Cour dans le contexte de la protection de droits de chasse issus d'un traité (*Simon c. La Reine*, [1985] 2 R.C.S. 387), et qu'il devrait être appliqué dans la présente instance de manière à ce que le droit en question soit défini comme un droit de pêcher à quelque fin que ce soit, au moyen de toute méthode non dangereuse.

En ce qui concerne cet argument, on a soutenu devant notre Cour que le droit ancestral englobe la pêche commerciale. Bien qu'il n'y ait pas eu de pêche commerciale avant l'arrivée des colons européens, on prétend que le troc pratiqué jadis par les Musqueams peut être rétabli sous la forme d'un droit moderne de pêcher à des fins commerciales. La présence de nombreux intervenants représentant les intérêts des pêcheurs commerciaux et l'idée, se dégageant des faits, que la restriction

in part related to the probable commercial use of fish caught under the Musqueam food fishing licence, indicate the possibility of conflict between aboriginal fishing and the competitive commercial fishery with respect to economically valuable fish such as salmon. We recognize the existence of this conflict and the probability of its intensification as fish availability drops, demand rises and tensions increase.

Government regulations governing the exercise of the Musqueam right to fish, as described above, have only recognized the right to fish for food for over a hundred years. This may have reflected the existing position. However, historical policy on the part of the Crown is not only incapable of extinguishing the existing aboriginal right without clear intention, but is also incapable of, in itself, delineating that right. The nature of government regulations cannot be determinative of the content and scope of an existing aboriginal right. Government policy can however regulate the exercise of that right, but such regulation must be in keeping with s. 35(1).

In the courts below, the case at bar was not presented on the footing of an aboriginal right to fish for commercial or livelihood purposes. Rather, the focus was and continues to be on the validity of a net length restriction affecting the appellant's food fishing licence. We therefore adopt the Court of Appeal's characterization of the right for the purpose of this appeal, and confine our reasons to the meaning of the constitutional recognition and affirmation of the existing aboriginal right to fish for food and social and ceremonial purposes.

"Recognized and Affirmed"

We now turn to the impact of s. 35(1) of the *Constitution Act, 1982* on the regulatory power of Parliament and on the outcome of this appeal specifically.

quant à la longueur des filets est liée, du moins en partie, à l'usage commercial qui est probablement fait du poisson pris en vertu du permis de pêche de subsistance des Musqueams indiquent une possibilité de conflit entre la pêche par des autochtones et la pêche commerciale concurrentielle relativement à un poisson d'une grande valeur économique comme le saumon. Nous reconnaissons l'existence de ce conflit ainsi que la probabilité qu'il s'aggrave à mesure que les quantités de poisson diminuent, que la demande augmente et que les tensions montent.

Depuis plus de cent ans, les règlements gouvernementaux régissant l'exercice du droit des Musqueams de pêcher décrit plus haut ne reconnaissent que le droit de pêcher à des fins de subsistance. Cela peut expliquer la position actuelle. Cependant, non seulement la politique historique de Sa Majesté ne permet pas d'éteindre le droit ancestral existant en l'absence d'intention claire en ce sens, mais elle ne permet pas non plus en soi de délimiter ce droit. La nature de règlements gouvernementaux ne saurait être déterminante quant au contenu et à la portée d'un droit ancestral existant. La politique gouvernementale peut toutefois réglementer l'exercice de ce droit, mais cette réglementation doit être conforme au par. 35(1).

Devant les tribunaux d'instance inférieure, la présente affaire n'a pas été débattue en fonction de l'existence d'un droit ancestral de pêcher à des fins commerciales ou de subsistance. Les débats ont plutôt porté, et portent encore, sur la validité d'une restriction quant à la longueur des filets qui touche le permis de pêche de subsistance de l'appelant. Nous adoptons donc, pour les fins du présent pourvoi, la caractérisation de ce droit donnée par la Cour d'appel et limitons nos motifs au sens de la reconnaissance et de la confirmation constitutionnelles du droit ancestral existant de pêcher à des fins de subsistance et à des fins sociales et rituelles.

«Reconnus et confirmés»

Nous passons maintenant à l'effet du par. 35(1) de la *Loi constitutionnelle de 1982* sur le pouvoir réglementaire du Parlement et, en particulier, sur l'issue du présent pourvoi.

Counsel for the appellant argued that the effect of s. 35(1) is to deny Parliament's power to restrictively regulate aboriginal fishing rights under s. 91(24) ("Indians and Lands Reserved for the Indians"), and s. 91(12) ("Sea Coast and Inland Fisheries"). The essence of this submission, supported by the intervener, the National Indian Brotherhood / Assembly of First Nations, is that the right to regulate is part of the right to use the resource in the Band's discretion. Section 35(1) is not subject to s. 1 of the *Canadian Charter of Rights and Freedoms* nor to legislative override under s. 33. The appellant submitted that, if the regulatory power continued, the limits on its extent are set by the word "inconsistent" in s. 52(1) of the *Constitution Act, 1982* and the protective and remedial purposes of s. 35(1). This means that aboriginal title entails a right to fish by any non-dangerous method chosen by the aboriginals engaged in fishing. Any continuing governmental power of regulation would have to be exceptional and strictly limited to regulation that is clearly not inconsistent with the protective and remedial purposes of s. 35(1). Thus, counsel for the appellant speculated, "in certain circumstances, necessary and reasonable conservation measures might qualify" (emphasis added)—where for example such measures were necessary to prevent serious impairment of the aboriginal rights of present and future generations, where conservation could only be achieved by restricting the right and not by restricting fishing by other users, and where the aboriginal group concerned was unwilling to implement necessary conservation measures. The onus of proving a justification for restrictive regulations would lie with the government by analogy with s. 1 of the *Charter*.

In response to these submissions and in finding the appropriate interpretive framework for s. 35(1), we start by looking at the background of s. 35(1).

L'avocat de l'appellant soutient que l'effet du par. 35(1) est de nier le pouvoir du Parlement de réglementer restrictivement les droits de pêche des autochtones en vertu du par. 91(24) («les Indiens et les terres réservées aux Indiens») et du par. 91(12) («des pêcheries des côtes de la mer et de l'intérieur»). L'essence de cet argument, appuyé par l'intervenante, la Fraternité des Indiens du Canada / Assemblée des premières nations, est que le droit de réglementer fait partie du droit de la bande d'utiliser la ressource comme bon lui semble. Le paragraphe 35(1) n'est pas assujéti à l'article premier de la *Charte canadienne des droits et libertés*, ni à la dérogation législative prévue à l'art. 33. L'appellant fait valoir que si le pouvoir de réglementation continue de s'appliquer, les limites de son étendue sont établies par le terme «incompatibles» contenu au par. 52(1) de la *Loi constitutionnelle de 1982* et les fins protectrices et réparatrices du par. 35(1). Cela signifie qu'un titre aborigène comporte le droit de pêcher au moyen de toute méthode non dangereuse choisie par les pêcheurs autochtones. Tout pouvoir de réglementation que le gouvernement continuerait à exercer devrait être exceptionnel et strictement limité à une réglementation nettement compatible avec les fins protectrices et réparatrices du par. 35(1). L'avocat de l'appellant a donc supposé que [TRA-
DUCTION] «dans certains cas, des mesures de conservation nécessaires et raisonnables pourraient être adoptées» (nous soulignons) si, par exemple, de telles mesures étaient nécessaires pour éviter qu'on porte sérieusement atteinte aux droits ancestraux des générations actuelles et futures, si les objectifs de conservation ne pouvaient être atteints que par une restriction de ce droit et non de la pêche pratiquée par d'autres pêcheurs, et si le groupe autochtone visé refusait de mettre en œuvre les mesures de conservation nécessaires. Par analogie avec l'article premier de la *Charte*, il incomberait au gouvernement de justifier l'adoption de règlements restrictifs.

Afin de répondre à ces arguments et de trouver le cadre d'interprétation approprié pour le par. 35(1), nous commençons par examiner l'historique de ce paragraphe.

It is worth recalling that while British policy towards the native population was based on respect for their right to occupy their traditional lands, a proposition to which the Royal Proclamation of 1763 bears witness, there was from the outset never any doubt that sovereignty and legislative power, and indeed the underlying title, to such lands vested in the Crown; see *Johnson v. M'Intosh* (1823), 8 Wheaton 543 (U.S.S.C.); see also the Royal Proclamation itself (R.S.C., 1985, App. II, No. 1, pp. 4-6); *Calder, supra, per* Judson J., at p. 328, Hall J., at pp. 383 and 402. And there can be no doubt that over the years the rights of the Indians were often honoured in the breach (for one instance in a recent case in this Court, see *Canadian Pacific Ltd. v. Paul*, [1988] 2 S.C.R. 654. As MacDonald J. stated in *Pasco v. Canadian National Railway Co.*, [1986] 1 C.N.L.R. 35 (B.C.S.C.), at p. 37: "We cannot recount with much pride the treatment accorded to the native people of this country."

For many years, the rights of the Indians to their aboriginal lands — certainly as legal rights — were virtually ignored. The leading cases defining Indian rights in the early part of the century were directed at claims supported by the Royal Proclamation or other legal instruments, and even these cases were essentially concerned with settling legislative jurisdiction or the rights of commercial enterprises. For fifty years after the publication of Clement's *The Law of the Canadian Constitution* (3rd ed. 1916), there was a virtual absence of discussion of any kind of Indian rights to land even in academic literature. By the late 1960s, aboriginal claims were not even recognized by the federal government as having any legal status. Thus the *Statement of the Government of Canada on Indian Policy* (1969), although well meaning, contained the assertion (at p. 11) that "aboriginal claims to land . . . are so general and undefined that it is not realistic to think of them as specific claims capable of remedy except through a policy and program that will end injustice to the Indians as members of the Canadian community". In the same general period, the James Bay development by Quebec Hydro was originally initiated without regard to

Il convient de rappeler que bien que la politique britannique envers la population autochtone fût fondée sur le respect de leur droit d'occuper leurs terres ancestrales, comme en faisait foi la Proclamation royale de 1763, dès le départ, on n'a jamais douté que la souveraineté et la compétence législative, et même le titre sous-jacent, à l'égard de ces terres revenaient à Sa Majesté; voir l'arrêt *Johnson v. M'Intosh* (1823), 8 Wheaton 543 (C.S.É.-U.); voir également la Proclamation royale elle-même (L.R.C. (1985), app. II, n° 1, pp. 4 à 6); *Calder*, précité, le juge Judson, à la p. 328, le juge Hall aux pp. 383 et 402. Et il n'y a pas de doute qu'au fil des ans les droits des Indiens ont souvent été reconnus par suite d'une violation (voir, par exemple l'arrêt *Canadien Pacifique Ltée c. Paul*, [1988] 2 R.C.S. 654). Comme le juge MacDonald l'a affirmé dans la décision *Pasco v. Canadian National Railway Co.*, [1986] 1 C.N.L.R. 35 (C.S.C.-B.), à la p. 37: [TRADUCTION] «Ce n'est pas avec beaucoup de fierté que nous pouvons rappeler le traitement réservé aux autochtones de notre pays».

Pendant plusieurs années les droits des Indiens à leurs terres ancestrales — certainement à titre de droits reconnus en common law — ont été à toutes fins pratiques ignorés. Les arrêts de principe qui ont défini les droits des Indiens au début du siècle portaient sur des revendications étayées par la Proclamation royale ou d'autres documents juridiques et, même dans ces cas, les tribunaux étaient essentiellement intéressés à établir la compétence législative ou les droits des entreprises commerciales. Au cours des cinquante années qui ont suivi la publication de l'ouvrage de Clement, *The Law of the Canadian Constitution* (3^e éd. 1916), on constate une absence quasi totale d'analyse des droits territoriaux des Indiens, et ce, même dans les ouvrages de doctrine. À la fin des années soixante, le gouvernement fédéral n'accordait même pas de valeur juridique aux revendications des autochtones. Ainsi, même si elle procédait d'une intention louable, *La politique indienne du gouvernement du Canada* (1969), contenait (à la p. 12) l'affirmation que «les droits aborigènes [...] sont tellement généraux qu'il n'est pas réaliste de les considérer comme des droits précis, susceptibles d'être réglés excepté par un ensemble de politiques et de mesu-

the rights of the Indians who lived there, even though these were expressly protected by a constitutional instrument; see *The Quebec Boundaries Extension Act, 1912*, S.C. 1912, c. 45. It took a number of judicial decisions and notably the *Calder* case in this Court (1973) to prompt a reassessment of the position being taken by government.

In the light of its reassessment of Indian claims following *Calder*, the federal Government on August 8, 1973 issued "a statement of policy" regarding Indian lands. By it, it sought to "signify the Government's recognition and acceptance of its continuing responsibility under the British North America Act for Indians and lands reserved for Indians", which it regarded "as an historic evolution dating back to the Royal Proclamation of 1763, which, whatever differences there may be about its judicial interpretation, stands as a basic declaration of the Indian people's interests in land in this country". (Emphasis added.) See *Statement made by the Honourable Jean Chrétien, Minister of Indian Affairs and Northern Development on Claims of Indian and Inuit People*, August 8, 1973. The remarks about these lands were intended "as an expression of acknowledged responsibility". But the statement went on to express, for the first time, the government's willingness to negotiate regarding claims of aboriginal title, specifically in British Columbia, Northern Quebec, and the Territories, and this without regard to formal supporting documents. "The Government", it stated, "is now ready to negotiate with authorized representatives of these native peoples on the basis that where their traditional interest in the lands concerned can be established, an agreed form of compensation or benefit will be provided to native peoples in return for their interest."

res qui mettront fin aux injustices dont les Indiens ont souffert comme membres de la société canadienne». Au cours de la même période générale, Hydro Québec a entrepris le développement de la Baie James sans d'abord tenir compte des droits des Indiens qui y vivaient, et ce, même si ces droits bénéficiaient d'une protection constitutionnelle expresse; voir la *Loi de l'extension des frontières de Québec, 1912*, S.C. 1912, ch. 45. Il aura fallu un bon nombre de décisions judiciaires et notamment l'arrêt *Calder* de notre Cour (1973) pour que le gouvernement reconsidère sa position.

Compte tenu de sa nouvelle évaluation des revendications des Indiens à la suite de l'arrêt *Calder*, le gouvernement fédéral public, le 8 août 1973, «une déclaration de principe» concernant les terres indiennes. Par cette déclaration, le gouvernement veut montrer qu'il «reconnaît et accepte sa responsabilité permanente, aux termes de l'Acte de l'Amérique du Nord britannique, en ce qui a trait aux Indiens et aux territoires réservés à leur intention», qu'il considère «comme le résultat d'une évolution historique remontant à la Proclamation royale de 1763, laquelle demeure comme une déclaration fondamentale des intérêts fonciers des Indiens du pays, quelles que soient les différences intervenues quant à son interprétation légale». (Nous soulignons.) Voir la *Déclaration par l'honorable Jean Chrétien, ministre des Affaires indiennes et du Nord canadien, au sujet des revendications des Indiens et Inuit*, en date du 8 août 1973. Les remarques au sujet de ces terres se voulaient «une attestation de [...] responsabilité.» Mais, pour la première fois, le gouvernement y exprime sa volonté de négocier concernant les revendications d'un titre aborigène de propriété, particulièrement en Colombie-Britannique, dans le Nouveau-Québec et les Territoires, et ce, indépendamment de tout document officiel. «Le gouvernement», dit-on, «est maintenant prêt à négocier avec les représentants mandatés par ces groupes, en partant du principe que, dans les cas où leurs droits traditionnels aux terres revendiquées peuvent être établis, les autochtones recevront, en retour de ces intérêts, une indemnité ou un avantage convenus.»

It is obvious from its terms that the approach taken towards aboriginal claims in the 1973 statement constituted an expression of a policy, rather than a legal position; see also *In All Fairness: A Native Claims Policy — Comprehensive Claims* (1981), pp. 11-12; Slattey, "Understanding Aboriginal Rights" *op. cit.*, at p. 730. As recently as *Guerin v. The Queen*, [1984] 2 S.C.R. 335, the federal government argued in this Court that any federal obligation was of a political character.

It is clear, then, that s. 35(1) of the *Constitution Act, 1982*, represents the culmination of a long and difficult struggle in both the political forum and the courts for the constitutional recognition of aboriginal rights. The strong representations of native associations and other groups concerned with the welfare of Canada's aboriginal peoples made the adoption of s. 35(1) possible and it is important to note that the provision applies to the Indians, the Inuit and the Métis. Section 35(1), at the least, provides a solid constitutional base upon which subsequent negotiations can take place. It also affords aboriginal peoples constitutional protection against provincial legislative power. We are, of course, aware that this would, in any event, flow from the *Guerin* case, *supra*, but for a proper understanding of the situation, it is essential to remember that the *Guerin* case was decided after the commencement of the *Constitution Act, 1982*. In addition to its effect on aboriginal rights, s. 35(1) clarified other issues regarding the enforcement of treaty rights (see Sanders, "Pre-existing Rights: The Aboriginal Peoples of Canada," in Beaudoin and Ratushny, eds., *The Canadian Charter of Rights and Freedoms*, 2nd ed., especially at p. 730).

In our opinion, the significance of s. 35(1) extends beyond these fundamental effects. Professor Lyon in "An Essay on Constitutional Interpretation" (1988), 26 *Osgoode Hall L.J.* 95, says the following about s. 35(1), at p. 100:

Il ressort clairement du texte que l'attitude adoptée à l'égard des revendications des autochtones dans la déclaration de 1973 exprimait une politique plutôt qu'une prise de position sur le plan juridique; voir également *En toute justice: Une politique des revendications des autochtones: revendications globales* (1981), pp. 11 et 12; Slattey, «Understanding Aboriginal Rights», *op. cit.*, à la p. 730. Aussi récemment que dans l'affaire *Guerin c. La Reine*, [1984] 2 R.C.S. 335, le gouvernement fédéral a soutenu devant notre Cour que toute obligation fédérale était de nature politique.

Il est donc clair que le par. 35(1) de la *Loi constitutionnelle de 1982* représente l'aboutissement d'une bataille longue et difficile à la fois dans l'arène politique et devant les tribunaux pour la reconnaissance de droits ancestraux. La forte représentation des associations autochtones et d'autres groupes soucieux du bien-être des peuples autochtones du Canada a rendu possible l'adoption du par. 35(1) et il est important de souligner que cette disposition s'applique aux Indiens, aux Inuit et aux Métis. Le paragraphe 35(1) procure, tout au moins, un fondement constitutionnel solide à partir duquel des négociations ultérieures peuvent être entreprises. Il accorde également aux autochtones une protection constitutionnelle contre la compétence législative provinciale. Nous sommes évidemment conscients que cela découlerait de toute façon de l'arrêt *Guerin*, précité, mais pour bien comprendre la situation, il est essentiel de se rappeler que l'arrêt *Guerin* a été rendu après l'entrée en vigueur de la *Loi constitutionnelle de 1982*. En outre, en plus de son effet sur les droits ancestraux, le par. 35(1) a clarifié d'autres points concernant l'application des droits issus de traités (voir Sanders, «Pre-existing Rights: The Aboriginal Peoples of Canada», dans Beaudoin et Ratushny (éd.), *The Canadian Charter of Rights and Freedoms*, 2^e éd., particulièrement à la p. 730).

À notre avis, l'importance du par. 35(1) va au-delà de ces effets fondamentaux. Dans «An Essay on Constitutional Interpretation» (1988), 26 *Osgoode Hall L.J.* 95, à la p. 100, le professeur Lyon dit ceci au sujet du par. 35(1):

... the context of 1982 is surely enough to tell us that this is not just a codification of the case law on aboriginal rights that had accumulated by 1982. Section 35 calls for a just settlement for aboriginal peoples. It renounces the old rules of the game under which the Crown established courts of law and denied those courts the authority to question sovereign claims made by the Crown.

The approach to be taken with respect to interpreting the meaning of s. 35(1) is derived from general principles of constitutional interpretation, principles relating to aboriginal rights, and the purposes behind the constitutional provision itself. Here, we will sketch the framework for an interpretation of "recognized and affirmed" that, in our opinion, gives appropriate weight to the constitutional nature of these words.

In *Reference re Manitoba Language Rights*, [1985] 1 S.C.R. 721, this Court said the following about the perspective to be adopted when interpreting a constitution, at p. 745:

The Constitution of a country is a statement of the will of the people to be governed in accordance with certain principles held as fundamental and certain prescriptions restrictive of the powers of the legislature and government. It is, as s. 52 of the *Constitution Act, 1982* declares, the "supreme law" of the nation, unalterable by the normal legislative process, and unsuffering of laws inconsistent with it. The duty of the judiciary is to interpret and apply the laws of Canada and each of the provinces, and it is thus our duty to ensure that the constitutional law prevails.

The nature of s. 35(1) itself suggests that it be construed in a purposive way. When the purposes of the affirmation of aboriginal rights are considered, it is clear that a generous, liberal interpretation of the words in the constitutional provision is demanded. When the Court of Appeal below was confronted with the submission that s. 35 has no effect on aboriginal or treaty rights and that it is merely a preamble to the parts of the *Constitution Act, 1982*, which deal with aboriginal rights, it said the following, at p. 322:

[TRADUCTION] ... le contexte de l'année 1982 nous fournit assurément une indication suffisante qu'il ne s'agit pas d'une simple codification de la jurisprudence portant sur les droits ancestraux qui existait en 1982. L'article 35 exige un règlement équitable en faveur des peuples autochtones. Il écarte les anciennes règles du jeu en vertu desquelles Sa Majesté établissait des cours de justice auxquelles elle refusait le pouvoir de mettre en doute Ses revendications souveraines.

La méthode qu'il convient d'adopter pour interpréter le par. 35(1) est dérivée des principes généraux d'interprétation constitutionnelle, des principes relatifs aux droits ancestraux et des objets sous-jacents à la disposition constitutionnelle elle-même. Nous allons ici ébaucher le cadre d'une interprétation de l'expression «reconnus et confirmés» qui, selon nous, accorde au caractère constitutionnel de ces mots l'importance qui lui revient.

Dans le *Renvoi relatif aux droits linguistiques au Manitoba*, [1985] 1 R.C.S. 721, notre Cour affirme ceci au sujet de l'optique dans laquelle il faut aborder l'interprétation d'une constitution, à la p. 745:

La Constitution d'un pays est l'expression de la volonté du peuple d'être gouverné conformément à certains principes considérés comme fondamentaux et à certaines prescriptions qui restreignent les pouvoirs du corps législatif et du gouvernement. Elle est, comme le déclare l'art. 52 de la *Loi constitutionnelle de 1982*, la «loi suprême» de notre pays, qui ne peut être modifiée par le processus législatif normal et qui ne tolère aucune loi incompatible avec elle. Il appartient au pouvoir judiciaire d'interpréter et d'appliquer les lois du Canada et de chacune des provinces et il est donc de notre devoir d'assurer que la loi constitutionnelle a préséance.

La nature même du par. 35(1) laisse supposer qu'il y a lieu de l'interpréter en fonction de l'objet qu'il vise. Si on considère les objectifs de la confirmation des droits ancestraux, il est évident qu'une interprétation généreuse et libérale du texte de cette disposition constitutionnelle s'impose. Devant l'argument voulant que l'art. 35 n'ait aucun effet sur les droits ancestraux ou issus de traités et qu'il ne soit qu'un préambule aux parties de la *Loi constitutionnelle de 1982* qui portent sur les droits des autochtones, la Cour d'appel en l'espèce dit ceci, à la p. 322:

This submission gives no meaning to s. 35. If accepted, it would result in denying its clear statement that existing rights are hereby recognized and affirmed, and would turn that into a mere promise to recognize and affirm those rights sometime in the future To so construe s. 35(1) would be to ignore its language and the principle that the Constitution should be interpreted in a liberal and remedial way. We cannot accept that that principle applies less strongly to aboriginal rights than to the rights guaranteed by the Charter, particularly having regard to the history and to the approach to interpreting treaties and statutes relating to Indians required by such cases as *Nowegijick v. R.*, [1983] 1 S.C.R. 29

In *Nowegijick v. The Queen*, [1983] 1 S.C.R. 29, at p. 36, the following principle that should govern the interpretation of Indian treaties and statutes was set out:

... treaties and statutes relating to Indians should be liberally construed and doubtful expressions resolved in favour of the Indians.

In *R. v. Agawa*, *supra*, Blair J.A. stated that the above principle should apply to the interpretation of s. 35(1). He added the following principle to be equally applied, at pp. 215-16:

The second principle was enunciated by the late Associate Chief Justice MacKinnon in *R. v. Taylor and Williams* (1981), 34 O.R. (2d) 360. He emphasized the importance of Indian history and traditions as well as the perceived effect of a treaty at the time of its execution. He also cautioned against determining Indian rights "in a vacuum". The honour of the Crown is involved in the interpretation of Indian treaties and, as a consequence, fairness to the Indians is a governing consideration. He said at p. 367:

"The principles to be applied to the interpretation of Indian treaties have been much canvassed over the years. In approaching the terms of a treaty quite apart from the other considerations already noted, the honour of the Crown is always involved and no appearance of 'sharp dealing' should be sanctioned."

This view is reflected in recent judicial decisions which have emphasized the responsibility of Government to protect the rights of Indians arising from the special trust relationship created by history, treaties and legisla-

[TRANSCRIPTION] Cet argument ne donne aucun sens à l'art. 35. En le retenant, on se trouverait à nier la déclaration non équivoque de cet article que les droits existants sont reconnus et confirmés et à n'en faire qu'une simple promesse de reconnaître et de confirmer ces droits à une époque future [...] Une telle interprétation du par. 35(1) ferait abstraction à la fois de ses termes et du principe selon lequel la Constitution doit recevoir une interprétation libérale et réparatrice. Nous ne pouvons accepter que ce principe s'applique avec moins de force aux droits ancestraux qu'à ceux garantis par la Charte, compte tenu particulièrement de l'histoire et de la méthode d'interprétation des traités et des lois concernant les Indiens commandée par des arrêts comme *Nowegijick c. La Reine*, [1983] 1 R.C.S. 29 . . .

Dans l'arrêt *Nowegijick c. La Reine*, [1983] 1 R.C.S. 29, à la p. 36, on énonce le principe qui doit régir l'interprétation des traités et des lois concernant les Indiens:

... les traités et les lois visant les Indiens doivent recevoir une interprétation libérale et [...] toute ambiguïté doit profiter aux Indiens.

Dans l'arrêt *R. v. Agawa*, précité, le juge Blair affirme que ce principe devrait s'appliquer à l'interprétation du par. 35(1). Aux pages 215 et 216, il ajoute comme tout aussi applicable le principe suivant:

[TRANSCRIPTION] Le second principe a été énoncé par feu le juge en chef adjoint MacKinnon dans l'arrêt *R. v. Taylor and Williams* (1981), 34 O.R. (2d) 360. Soulignant l'importance de l'histoire et des traditions indiennes ainsi que ce qu'on croyait être l'effet du traité au moment de sa signature, il a en outre fait une mise en garde contre la détermination des droits des Indiens «dans l'abstrait». L'interprétation de traités avec les Indiens met en cause l'honneur de la Couronne et, par conséquent, l'équité envers les Indiens est un facteur dominant. Il dit, à la p. 367:

«Les principes applicables à l'interprétation de traités visant les Indiens ont fait l'objet de nombreuses discussions au fil des ans. Lorsqu'il s'agit d'interpréter les conditions d'un traité, tout à fait indépendamment des autres considérations déjà évoquées, il y va toujours de l'honneur de la Couronne et aucune apparence de «manœuvres malhonnêtes» ne doit être tolérée.»

Ce point de vue se reflète dans de récentes décisions judiciaires insistant sur la responsabilité qu'a le gouvernement de protéger les droits des Indiens, laquelle responsabilité résulte des rapports fiduciaires spéciaux

tion: see **Guerin v. The Queen**, [1984] 2 S.C.R. 335; 55 N.R. 161; 13 D.L.R. (4th) 321.

In *Guerin*, *supra*, the Musqueam Band surrendered reserve lands to the Crown for lease to a golf club. The terms obtained by the Crown were much less favourable than those approved by the Band at the surrender meeting. This Court found that the Crown owed a fiduciary obligation to the Indians with respect to the lands. The *sui generis* nature of Indian title, and the historic powers and responsibility assumed by the Crown constituted the source of such a fiduciary obligation. In our opinion, *Guerin*, together with *R. v. Taylor and Williams* (1981), 34 O.R. (2d) 360, ground a general guiding principle for s. 35(1). That is, the Government has the responsibility to act in a fiduciary capacity with respect to aboriginal peoples. The relationship between the Government and aboriginals is trust-like, rather than adversarial, and contemporary recognition and affirmation of aboriginal rights must be defined in light of this historic relationship.

We agree with both the British Columbia Court of Appeal below and the Ontario Court of Appeal that the principles outlined above, derived from *Nowegijick*, *Taylor and Williams* and *Guerin*, should guide the interpretation of s. 35(1). As commentators have noted, s. 35(1) is a solemn commitment that must be given meaningful content (Lyon, *op. cit.*; Pentney, *op. cit.*; Schwartz, "Unstarted Business: Two Approaches to Defining s. 35—'What's in the Box?' and 'What Kind of Box?'"', Chapter XXIV, in *First Principles, Second Thoughts: Aboriginal Peoples, Constitutional Reform and Canadian Statecraft*; Slattery, *op. cit.*; and Slattery, "The Hidden Constitution: Aboriginal Rights in Canada" (1984), 32 *Am. J. of Comp. Law* 361).

In response to the appellant's submission that s. 35(1) rights are more securely protected than the rights guaranteed by the *Charter*, it is true that s. 35(1) is not subject to s. 1 of the *Charter*. In our

créés par l'histoire, par des traités et par des textes législatifs: voir **Guerin c. La Reine**, [1984] 2 R.C.S. 335; 55 N.R. 161; 13 D.L.R. (4th) 321.

Dans l'affaire *Guerin*, précitée, la bande indienne Musqueam avait cédé des terres réservées à Sa Majesté pour que celle-ci les loue à un club de golf. Les conditions du bail consenti par Sa Majesté étaient beaucoup moins favorables que celles approuvées par la bande à l'assemblée de la cession. Notre Cour a statué que Sa Majesté a envers les Indiens une obligation de fiduciaire en ce qui concerne leurs terres. La nature *sui generis* du titre indien de même que les pouvoirs et la responsabilité historiques de Sa Majesté constituent la source de cette obligation de fiduciaire. À notre avis, l'arrêt *Guerin*, conjugué avec l'arrêt *R. v. Taylor and Williams* (1981), 34 O.R. (2d) 360, justifie un principe directeur général d'interprétation du par. 35(1), savoir, le gouvernement a la responsabilité d'agir en qualité de fiduciaire à l'égard des peuples autochtones. Les rapports entre le gouvernement et les autochtones sont de nature fiduciaire plutôt que contradictoire et la reconnaissance et la confirmation contemporaines des droits ancestraux doivent être définies en fonction de ces rapports historiques.

Nous partageons l'avis de la Cour d'appel de la Colombie-Britannique en l'espèce et de la Cour d'appel de l'Ontario que, dans l'interprétation du par. 35(1), on doit se laisser guider par les principes exposés ci-dessus qui découlent des arrêts *Nowegijick*, *Taylor and Williams* et *Guerin*. Comme les auteurs l'ont souligné, le par. 35(1) constitue un engagement solennel qui doit avoir un sens utile (Lyon, *op. cit.*; Pentney, *op. cit.*; Schwartz, "Unstarted Business: Two Approaches to Defining s. 35—'What's in the Box?' and 'What Kind of Box?'"', chapitre XXIV, dans *First Principles, Second Thoughts: Aboriginal Peoples, Constitutional Reform and Canadian Statecraft*; Slattery, *op. cit.*, et Slattery, "The Hidden Constitution: Aboriginal Rights in Canada" (1984), 32 *Am. J. of Comp. Law* 361).

Pour répondre à l'argument de l'appelant que les droits visés au par. 35(1) bénéficient d'une protection plus sûre que ceux garantis par la *Charte*, il est vrai que le par. 35(1) n'est pas assujéti à

opinion, this does not mean that any law or regulation affecting aboriginal rights will automatically be of no force or effect by the operation of s. 52 of the *Constitution Act, 1982*. Legislation that affects the exercise of aboriginal rights will nonetheless be valid, if it meets the test for justifying an interference with a right recognized and affirmed under s. 35(1).

There is no explicit language in the provision that authorizes this Court or any court to assess the legitimacy of any government legislation that restricts aboriginal rights. Yet, we find that the words "recognition and affirmation" incorporate the fiduciary relationship referred to earlier and so import some restraint on the exercise of sovereign power. Rights that are recognized and affirmed are not absolute. Federal legislative powers continue, including, of course, the right to legislate with respect to Indians pursuant to s. 91(24) of the *Constitution Act, 1867*. These powers must, however, now be read together with s. 35(1). In other words, federal power must be reconciled with federal duty and the best way to achieve that reconciliation is to demand the justification of any government regulation that infringes upon or denies aboriginal rights. Such scrutiny is in keeping with the liberal interpretive principle enunciated in *Nowegijick, supra*, and the concept of holding the Crown to a high standard of honourable dealing with respect to the aboriginal peoples of Canada as suggested by *Guerin v. The Queen, supra*.

We refer to Professor Slattery's "Understanding Aboriginal Rights", *op. cit.*, with respect to the task of envisioning a s. 35(1) justificatory process. Professor Slattery, at p. 782, points out that a justificatory process is required as a compromise between a "patchwork" characterization of aboriginal rights whereby past regulations would be read into a definition of the rights, and a characterization that would guarantee aboriginal rights in their original form unrestricted by subsequent regulation. We agree with him that these

l'article premier de la *Charte*. Cela ne veut pas dire, selon nous, que toute loi ou tout règlement portant atteinte aux droits ancestraux des autochtones sera automatiquement inopérant en vertu de l'art. 52 de la *Loi constitutionnelle de 1982*. Un texte législatif qui touche l'exercice de droits ancestraux sera néanmoins valide s'il satisfait au critère applicable pour justifier une atteinte à un droit reconnu et confirmé au sens du par. 35(1).

Le paragraphe en question ne contient aucune disposition explicite autorisant notre Cour ou n'importe quel autre tribunal à apprécier la légitimité d'une mesure législative gouvernementale qui restreint des droits ancestraux. Nous estimons pourtant que l'expression «reconnaissance et confirmation» comporte les rapports de fiduciaire déjà mentionnés et implique ainsi une certaine restriction à l'exercice du pouvoir souverain. Les droits qui sont reconnus et confirmés ne sont pas absolus. Les pouvoirs législatifs fédéraux subsistent, y compris évidemment le droit de légiférer relativement aux Indiens en vertu du par. 91(24) de la *Loi constitutionnelle de 1867*. Toutefois, ces pouvoirs doivent maintenant être rapprochés du par. 35(1). En d'autres termes, le pouvoir fédéral doit être concilié avec l'obligation fédérale et la meilleure façon d'y parvenir est d'exiger la justification de tout règlement gouvernemental qui porte atteinte à des droits ancestraux. Une telle vérification est conforme au principe d'interprétation libérale énoncé dans l'arrêt *Nowegijick*, précité, et avec l'idée que la Couronne doit être tenue au respect d'une norme élevée — celle d'agir honorablement—dans ses rapports avec les peuples autochtones du Canada, comme le laisse entendre l'arrêt *Guerin c. La Reine*, précité.

Nous nous référons à «Understanding Aboriginal Rights», *op. cit.*, du professeur Slattery pour ce qui est d'envisager un processus de justification au par. 35(1). Le professeur Slattery souligne, à la p. 782, qu'un processus de justification s'impose à titre de compromis entre une caractérisation «composée» des droits ancestraux qui ferait entrer dans la définition de ceux-ci les règlements antérieurs et une caractérisation qui garantirait les droits ancestraux sous leur forme initiale sans aucune restriction apportée par des règlements ultérieurs. Nous

two extreme positions must be rejected in favour of a justificatory scheme.

Section 35(1) suggests that while regulation affecting aboriginal rights is not precluded, such regulation must be enacted according to a valid objective. Our history has shown, unfortunately all too well, that Canada's aboriginal peoples are justified in worrying about government objectives that may be superficially neutral but which constitute *de facto* threats to the existence of aboriginal rights and interests. By giving aboriginal rights constitutional status and priority, Parliament and the provinces have sanctioned challenges to social and economic policy objectives embodied in legislation to the extent that aboriginal rights are affected. Implicit in this constitutional scheme is the obligation of the legislature to satisfy the test of justification. The way in which a legislative objective is to be attained must uphold the honour of the Crown and must be in keeping with the unique contemporary relationship, grounded in history and policy, between the Crown and Canada's aboriginal peoples. The extent of legislative or regulatory impact on an existing aboriginal right may be scrutinized so as to ensure recognition and affirmation.

The constitutional recognition afforded by the provision therefore gives a measure of control over government conduct and a strong check on legislative power. While it does not promise immunity from government regulation in a society that, in the twentieth century, is increasingly more complex, interdependent and sophisticated, and where exhaustible resources need protection and management, it does hold the Crown to a substantive promise. The government is required to bear the burden of justifying any legislation that has some negative effect on any aboriginal right protected under s. 35(1).

In these reasons, we will outline the appropriate analysis under s. 35(1) in the context of a regula-

sommes d'accord avec lui pour dire que ces deux positions extrêmes doivent être rejetées au profit d'un système de justification.

^a Il semble se dégager du par. 35(1) que, si la réglementation des droits ancestraux n'est pas exclue, une telle réglementation doit être adoptée conformément à un objectif régulier. Notre histoire démontre, trop bien malheureusement, que ^b les peuples autochtones du Canada ont raison de s'inquiéter au sujet d'objectifs gouvernementaux qui, bien que neutres en apparence, menacent en réalité l'existence de certains de leurs droits et intérêts. En accordant aux droits ancestraux le ^c statut et la priorité propres aux droits constitutionnels, le Parlement et les provinces ont sanctionné les contestations d'objectifs de principe socio-économiques énoncés dans des textes législatifs, dans ^d la mesure où ceux-ci portent atteinte à des droits ancestraux. Ce régime constitutionnel comporte implicitement une obligation de la part du législateur de satisfaire au critère de la justification. La façon de réaliser un objectif législatif doit préserver l'honneur de Sa Majesté et doit être conforme ^e aux rapports contemporains uniques, fondés sur l'histoire et les politiques, qui existent entre la Couronne et les peuples autochtones du Canada. La mesure dans laquelle une loi ou un règlement a ^f un effet sur un droit ancestral existant doit être examinée soigneusement de manière à assurer la reconnaissance et la confirmation de ce droit.

La reconnaissance constitutionnelle exprimée ^g dans la disposition en cause permet donc, dans une certaine mesure, de contrôler la conduite du gouvernement et de limiter fortement le pouvoir du législateur. Bien qu'elle ne constitue pas une promesse d'immunité contre la réglementation gouvernementale dans une société qui, au XX^e siècle, ^h devient de plus en plus complexe et interdépendante et où il est nécessaire de protéger et de gérer les ressources épuisables, cette reconnaissance ⁱ représente un engagement important de la part de la Couronne. Le gouvernement se voit imposer l'obligation de justifier toute mesure législative qui a un effet préjudiciable sur un droit ancestral protégé par le par. 35(1).

^j Dans les présents motifs, nous entendons exposer l'analyse appropriée aux fins du par. 35(1)

tion made pursuant to the *Fisheries Act*. We wish to emphasize the importance of context and a case-by-case approach to s. 35(1). Given the generality of the text of the constitutional provision, and especially in light of the complexities of aboriginal history, society and rights, the contours of a justificatory standard must be defined in the specific factual context of each case.

Section 35(1) and the Regulation of the Fisheries

Taking the above framework as guidance, we propose to set out the test for *prima facie* interference with an existing aboriginal right and for the justification of such an interference. With respect to the question of the regulation of the fisheries, the existence of s. 35(1) of the *Constitution Act, 1982*, renders the authority of *R. v. Derriksan*, *supra*, inapplicable. In that case, Laskin C.J., for this Court, found that there was nothing to prevent the *Fisheries Act* and the Regulations from subjecting the alleged aboriginal right to fish in a particular area to the controls thereby imposed. As the Court of Appeal in the case at bar noted, the *Derriksan* line of cases established that, before April 17, 1982, the aboriginal right to fish was subject to regulation by legislation and subject to extinguishment. The new constitutional status of that right enshrined in s. 35(1) suggests that a different approach must be taken in deciding whether regulation of the fisheries might be out of keeping with constitutional protection.

The first question to be asked is whether the legislation in question has the effect of interfering with an existing aboriginal right. If it does have such an effect, it represents a *prima facie* infringement of s. 35(1). Parliament is not expected to act in a manner contrary to the rights and interests of aboriginals, and, indeed, may be barred from doing so by the second stage of s. 35(1) analysis. The inquiry with respect to interference begins with a reference to the characteristics or incidents of the right at stake. Our earlier observations

dans le contexte d'un règlement pris en vertu de la *Loi sur les pêcheries*. Nous tenons à souligner relativement au par. 35(1) l'importance du contexte et d'un examen cas par cas. Étant donné la généralité du texte de la disposition constitutionnelle en cause et compte tenu surtout des complexités que présentent l'histoire, la société et les droits des autochtones, les limites d'une norme justificative doivent être fixées dans le contexte factuel particulier de chaque cas.

Le paragraphe 35(1) et la réglementation des pêcheries

Nous servant du cadre que nous venons de décrire, nous nous proposons d'énoncer le critère applicable pour déterminer s'il y a atteinte à première vue à un droit ancestral existant, d'une part, et pour justifier cette atteinte, d'autre part. En ce qui a trait à la question de la réglementation des pêcheries, l'existence du par. 35(1) de la *Loi constitutionnelle de 1982* fait en sorte que l'arrêt *R. v. Derriksan*, précité, ne s'applique pas. Dans cette affaire, le juge en chef Laskin a statué, au nom de notre Cour, que rien n'empêchait la *Loi sur les pêcheries* et ses règlements d'application d'assujettir aux contrôles y prévus le droit ancestral, qu'on revendiquait, de pêcher dans une zone déterminée. Comme le fait remarquer la Cour d'appel en l'espèce, il ressort du courant de jurisprudence établi par l'arrêt *Derriksan* qu'avant le 17 avril 1982, le droit de pêche ancestral était soumis à une réglementation par voie législative et était susceptible d'extinction. Or, le nouveau statut constitutionnel de ce droit consacré au par. 35(1) laisse entendre qu'on doit procéder différemment en décidant si la réglementation des pêcheries pourrait être incompatible avec la protection constitutionnelle.

La première question à poser est de savoir si la loi en question a pour effet de porter atteinte à un droit ancestral existant. Dans l'affirmative, elle constitue une violation à première vue du par. 35(1). Le Parlement n'est pas censé agir d'une manière contraire aux droits et aux intérêts des autochtones et, en réalité, il peut être empêché de le faire par la seconde étape de l'analyse fondée sur le par. 35(1). L'analyse portant sur l'atteinte commence par un examen des caractéristiques ou des attributs du droit en question. Nos observa-

regarding the scope of the aboriginal right to fish are relevant here. Fishing rights are not traditional property rights. They are rights held by a collective and are in keeping with the culture and existence of that group. Courts must be careful, then, to avoid the application of traditional common law concepts of property as they develop their understanding of what the reasons for judgment in *Guerin*, *supra*, at p. 382, referred to as the "*sui generis*" nature of aboriginal rights. (See also Little Bear, "A Concept of Native Title," [1982] 5 *Can. Legal Aid Bul.* 99.)

While it is impossible to give an easy definition of fishing rights, it is possible, and, indeed, crucial, to be sensitive to the aboriginal perspective itself on the meaning of the rights at stake. For example, it would be artificial to try to create a hard distinction between the right to fish and the particular manner in which that right is exercised.

To determine whether the fishing rights have been interfered with such as to constitute a *prima facie* infringement of s. 35(1), certain questions must be asked. First, is the limitation unreasonable? Second, does the regulation impose undue hardship? Third, does the regulation deny to the holders of the right their preferred means of exercising that right? The onus of proving a *prima facie* infringement lies on the individual or group challenging the legislation. In relation to the facts of this appeal, the regulation would be found to be a *prima facie* interference if it were found to be an adverse restriction on the Musqueam exercise of their right to fish for food. We wish to note here that the issue does not merely require looking at whether the fish catch has been reduced below that needed for the reasonable food and ceremonial needs of the Musqueam Indians. Rather the test involves asking whether either the purpose or the effect of the restriction on net length unnecessarily infringes the interests protected by the fishing right. If, for example, the Musqueam were forced to spend undue time and money per fish caught or if the net length reduction resulted in a hardship to

tions précédentes concernant la portée du droit de pêche ancestral sont pertinentes à ce propos. Les droits de pêche ne sont pas des droits de propriété au sens traditionnel. Il s'agit de droits qui appartiennent à un groupe et qui sont en harmonie avec la culture et le mode de vie de ce groupe. Les tribunaux doivent donc prendre soin d'éviter d'appliquer les concepts traditionnels de propriété propres à la common law en tentant de saisir ce qu'on appelle, dans les motifs de jugement de l'affaire *Guerin*, précitée, à la p. 382, la nature «*sui generis*» des droits ancestraux. (Voir aussi Little Bear, «A Concept of Native Title,» [1982] 5 *Can. Legal Aid Bul.* 99.)

S'il est impossible de donner une définition simple des droits de pêche, il est possible et même crucial de se montrer ouvert au point de vue des autochtones eux-mêmes quant à la nature des droits en cause. Il serait artificiel, par exemple, de tenter d'établir une distinction nette entre le droit de pêche et la manière précise dont ce droit est exercé.

Pour déterminer si les droits de pêche ont subi une atteinte constituant une violation à première vue du par. 35(1), on doit poser certaines questions. Premièrement, la restriction est-elle déraisonnable? Deuxièmement, le règlement est-il indûment rigoureux? Troisièmement, le règlement refuse-t-il aux titulaires du droit le recours à leur moyen préféré de l'exercer? C'est au particulier ou au groupe qui conteste la mesure législative qu'il incombe de prouver qu'il y a eu violation à première vue. En ce qui concerne les faits du présent pourvoi, le règlement serait jugé constituer une atteinte à première vue si on concluait qu'il impose une restriction néfaste à l'exercice par les Musqueams de leur droit de pêcher à des fins de subsistance. Nous tenons à souligner ici que la question en litige n'exige pas simplement qu'on examine si la prise autorisée de poissons a été réduite au-dessous de ce qui est requis pour subvenir aux besoins alimentaires et rituels raisonnables des Musqueams. Le critère nécessite plutôt qu'on se demande si, de par son objet ou son effet, la restriction imposée quant à la longueur des filets porte atteinte inutilement aux intérêts protégés par

the Musqueam in catching fish, then the first branch of the s. 35(1) analysis would be met.

If a *prima facie* interference is found, the analysis moves to the issue of justification. This is the test that addresses the question of what constitutes legitimate regulation of a constitutional aboriginal right. The justification analysis would proceed as follows. First, is there a valid legislative objective? Here the court would inquire into whether the objective of Parliament in authorizing the department to enact regulations regarding fisheries is valid. The objective of the department in setting out the particular regulations would also be scrutinized. An objective aimed at preserving s. 35(1) rights by conserving and managing a natural resource, for example, would be valid. Also valid would be objectives purporting to prevent the exercise of s. 35(1) rights that would cause harm to the general populace or to aboriginal peoples themselves, or other objectives found to be compelling and substantial.

The Court of Appeal below held, at p. 331, that regulations could be valid if reasonably justified as "necessary for the proper management and conservation of the resource or in the public interest". (Emphasis added.) We find the "public interest" justification to be so vague as to provide no meaningful guidance and so broad as to be unworkable as a test for the justification of a limitation on constitutional rights.

The justification of conservation and resource management, on the other hand, is surely uncontroversial. In *Kruger v. The Queen*, [1978] 1 S.C.R. 104, the applicability of the B.C. *Wildlife Act*, S.B.C. 1966, c. 55, to the appellant members

le droit de pêche. Si, par exemple, les Musqueams se voyaient astreints à des pertes injustifiables de temps et d'argent par poisson pris ou si la restriction quant à la longueur des filets faisait en sorte qu'il serait difficile aux Musqueams de prendre du poisson, cela suffirait pour satisfaire aux exigences du premier volet de l'analyse fondée sur le par. 35(1).

Si on conclut à l'existence d'une atteinte à première vue, l'analyse porte ensuite sur la question de la justification. C'est là le critère qui touche la question de savoir ce qui constitue une réglementation légitime d'un droit ancestral garanti par la Constitution. L'analyse de la justification se déroulerait comme suit. En premier lieu, il faut se demander s'il existe un objectif législatif régulier. À ce stade, la cour se demanderait si l'objectif visé par le Parlement en autorisant le ministère à adopter des règlements en matière de pêche est régulier. Serait également examiné l'objectif poursuivi par le ministère en adoptant le règlement en cause. L'objectif de préserver, par la conservation et la gestion d'une ressource naturelle par exemple, des droits visés au par. 35(1) serait régulier. Seraient également réguliers des objectifs visant apparemment à empêcher l'exercice de droits visés au par. 35(1) lorsque cet exercice nuirait à l'ensemble de la population ou aux peuples autochtones eux-mêmes, ou d'autres objectifs jugés impérieux et réels.

La Cour d'appel en l'espèce a décidé, à la p. 331, qu'une réglementation pourrait être valide si elle était raisonnablement justifiée comme [TRANSLATION] «nécessaire pour la gestion et la conservation judicieuses des ressources ou dans l'intérêt public». (Nous soulignons.) Nous considérons que la justification fondée sur «l'intérêt public» est si vague qu'elle ne fournit aucune ligne directrice utile et si générale qu'elle est inutilisable comme critère applicable pour déterminer si une restriction imposée à des droits constitutionnels est justifiée.

Par contre, la justification de la conservation et de la gestion des ressources ne constitue sûrement pas un sujet de controverse. Dans l'affaire *Kruger c. La Reine*, [1978] 1 R.C.S. 104, notre Cour s'est penchée sur la question de l'applicabilité de la

of the Penticton Indian Band was considered by this Court. In discussing that Act, the following was said about the objective of conservation (at p. 112):

Game conservation laws have as their policy the maintenance of wildlife resources. It might be argued that without some conservation measures the ability of Indians or others to hunt for food would become a moot issue in consequence of the destruction of the resource. The presumption is for the validity of a legislative enactment and in this case the presumption has to mean that in the absence of evidence to the contrary the measures taken by the British Columbia Legislature were taken to maintain an effective resource in the Province for its citizens and not to oppose the interests of conservationists and Indians in such a way as to favour the claims of the former.

While the "presumption" of validity is now outdated in view of the constitutional status of the aboriginal rights at stake, it is clear that the value of conservation purposes for government legislation and action has long been recognized. Further, the conservation and management of our resources is consistent with aboriginal beliefs and practices, and, indeed, with the enhancement of aboriginal rights.

If a valid legislative objective is found, the analysis proceeds to the second part of the justification issue. Here, we refer back to the guiding interpretive principle derived from *Taylor and Williams* and *Guerin, supra*. That is, the honour of the Crown is at stake in dealings with aboriginal peoples. The special trust relationship and the responsibility of the government vis-à-vis aboriginals must be the first consideration in determining whether the legislation or action in question can be justified.

The problem that arises in assessing the legislation in light of its objective and the responsibility of the Crown is that the pursuit of conservation in a heavily used modern fishery inevitably blurs with the efficient allocation and management of this scarce and valued resource. The nature of the constitutional protection afforded by s. 35(1) in this context demands that there be a link between

Wildlife Act de la Colombie-Britannique, S.B.C. 1966, ch. 55, aux appelants membres de la bande indienne Penticton. En analysant cette loi, on affirme au sujet de l'objectif de conservation (à la

a p. 112):

Les lois sur la conservation de la faune ont pour but la protection du gibier. On peut soutenir que sans mesure de protection, l'anéantissement de la faune rendrait théorique la question du droit des Indiens ou d'autres personnes de chasser pour se nourrir. Il faut présumer que le texte législatif en cause est valide. En l'espèce, cela signifie qu'en l'absence d'une preuve à l'effet contraire, il faut aussi présumer que les mesures adoptées par la Législature de la Colombie-Britannique ont pour but la protection efficace de la faune de la province, pour ses habitants, et ne visent pas à opposer les intérêts des écologistes à ceux des Indiens en favorisant les revendications des premiers.

Bien que la «présomption» de validité soit maintenant désuète étant donné le statut constitutionnel des droits ancestraux en cause, il est évident que l'importance des objectifs de conservation est reconnue depuis longtemps en matière de législation et d'action gouvernementales. De plus, la conservation et la gestion de nos ressources sont compatibles avec les croyances et les pratiques des autochtones et, en fait, avec la mise en valeur des droits de ces derniers.

Si on conclut à l'existence d'un objectif législatif régulier, on passe au second volet de la question de la justification. Ici, nous nous référons au principe directeur d'interprétation qui découle des arrêts *Taylor and Williams* et *Guerin*, précités. C'est-à-dire, l'honneur de Sa Majesté est en jeu lorsqu'Elle transige avec les peuples autochtones. Les rapports spéciaux de fiduciaire et la responsabilité du gouvernement envers les autochtones doivent être le premier facteur à examiner en déterminant si la mesure législative ou l'action en cause est justifiable.

Le problème qui se pose en évaluant la mesure législative en fonction de son objectif et de la responsabilité de la Couronne, est que les efforts de conservation dans une industrie de la pêche moderne fortement exploitée se heurtent inévitablement à la répartition et à la gestion efficaces d'une ressource à la fois peu abondante et très prisée. La nature de la protection constitutionnelle

the question of justification and the allocation of priorities in the fishery. The constitutional recognition and affirmation of aboriginal rights may give rise to conflict with the interests of others given the limited nature of the resource. There is a clear need for guidelines that will resolve the allocation-
a problems that arise regarding the fisheries. We refer to the reasons of Dickson J., as he then was, in *Jack v. The Queen, supra*, for such guidelines.

In *Jack*, the appellants' defence to a charge of fishing for salmon in certain rivers during a prohibited period was based on the alleged constitutional incapacity of Parliament to legislate such as to deny the Indians their right to fish for food. They argued that art. 13 of the *British Columbia Terms of Union* imposed a constitutional limitation on the federal power to regulate. While we recognize that the finding that such a limitation had been imposed was not adopted by the majority of this Court, we point out that this case concerns a different constitutional promise that asks this Court to give a meaningful interpretation to recognition and affirmation. That task requires equally meaningful guidelines responsive to the constitutional priority accorded aboriginal rights. We therefore repeat the following passage from *Jack*, at p. 313:

Conservation is a valid legislative concern. The appellants concede as much. Their concern is in the allocation of the resource after reasonable and necessary conservation measures have been recognized and given effect to. They do not claim the right to pursue the last living salmon until it is caught. Their position, as I understand it, is one which would give effect to an order of priorities of this nature: (i) conservation; (ii) Indian fishing; (iii) non-Indian commercial fishing; or (iv) non-Indian sports fishing; the burden of conservation measures should not fall primarily upon the Indian fishery.

qu'offre le par. 35(1) dans ce contexte commande l'existence d'un lien entre la question de la justification et l'établissement de priorités dans le domaine de la pêche. La reconnaissance et la confirmation des droits ancestraux, prévues dans la Constitution, peuvent donner lieu à des conflits avec les intérêts d'autrui étant donné la nature limitée de la ressource. De toute évidence, on a besoin de lignes directrices qui permettront de résoudre les problèmes de répartition des ressources qui surgissent dans le domaine des pêcheries. Pour de telles lignes directrices, nous renvoyons aux motifs du juge Dickson (maintenant Juge en chef) dans l'affaire *Jack c. La Reine*, précité.

Dans l'affaire *Jack*, les appelants, accusés d'avoir pêché le saumon pendant une période et en un endroit prohibés, ont invoqué comme moyen de défense la prétendue absence de compétence constitutionnelle du Parlement pour légiférer de manière à priver les Indiens du droit de pêcher pour se nourrir. Ils ont fait valoir que l'art. 13 des *Conditions de l'adhésion de la Colombie-Britannique* imposait une limite constitutionnelle au pouvoir réglementaire fédéral. Tout en reconnaissant que la conclusion qu'une telle limite avait été imposée n'a pas été adoptée par la majorité dans notre Cour, nous soulignons qu'il s'agit en l'espèce d'une promesse constitutionnelle différente, par suite de laquelle notre Cour est appelée à donner un sens utile aux notions de reconnaissance et de confirmation. C'est là une tâche dont l'accomplissement nécessite des lignes directrices tout aussi utiles qui tiennent compte de la priorité constitutionnelle accordée aux droits ancestraux. En conséquence, nous reprenons le passage suivant de l'arrêt *Jack*, à la p. 313:

La protection des ressources constitue une considération législative valide. Les appelants l'admettent. Ce qui les préoccupe c'est plutôt la répartition des ressources après la détermination et l'application des mesures de protection raisonnables et nécessaires. Ils ne réclament pas le droit de pêcher jusqu'au dernier saumon. Ils préconisent plutôt, me semble-t-il, l'ordre de priorité suivant: (i) la protection de la ressource; (ii) la pêche par les Indiens; (iii) la pêche commerciale par les non-Indiens; ou (iv) la pêche sportive par les non-Indiens; les Indiens ne devraient pas subir en premier lieu le fardeau des mesures de protection.

I agree with the general tenor of this argument With respect to whatever salmon are to be caught, then priority ought to be given to the Indian fishermen, subject to the practical difficulties occasioned by international waters and the movement of the fish themselves. But any limitation upon Indian fishing that is established for a valid conservation purpose overrides the protection afforded the Indian fishery by art. 13, just as such conservation measures override other taking of fish.

The constitutional nature of the Musqueam food fishing rights means that any allocation of priorities after valid conservation measures have been implemented must give top priority to Indian food fishing. If the objective pertained to conservation, the conservation plan would be scrutinized to assess priorities. While the detailed allocation of maritime resources is a task that must be left to those having expertise in the area, the Indians' food requirements must be met first when that allocation is established. The significance of giving the aboriginal right to fish for food top priority can be described as follows. If, in a given year, conservation needs required a reduction in the number of fish to be caught such that the number equalled the number required for food by the Indians, then all the fish available after conservation would go to the Indians according to the constitutional nature of their fishing right. If, more realistically, there were still fish after the Indian food requirements were met, then the brunt of conservation measures would be borne by the practices of sport fishing and commercial fishing.

The decision of the Nova Scotia Court of Appeal in *R. v. Denny* (1990), 55 C.C.C. (3d) 322, addresses the constitutionality of the Nova Scotia Miqmaq Indians' right to fish in the waters of Indian Brook and the Afton River, and does so in a way that accords with our understanding of the constitutional nature of aboriginal rights and the link between allocation and justification required for government regulation of the exercise of the

J'accepte cet argument dans ses grandes lignes [...] En ce qui concerne la pêche du saumon, les pêcheurs indiens doivent avoir priorité, sous réserve des difficultés pratiques relatives aux eaux internationales et aux déplacements du poisson. Mais toute restriction à la pêche par les Indiens établie conformément à un objectif valide de protection des ressources l'emporte sur la protection de la pêche par les Indiens prévue à l'art. 13, au même titre que ces mesures de protection l'emportent sur les autres genres de pêche.

La nature constitutionnelle du droit des Musqueams de pêcher à des fins de subsistance fait en sorte que, dans l'établissement des priorités suite à la mise en œuvre de mesures de conservation valides, il faut accorder la priorité absolue à la pêche par les Indiens à des fins de subsistance. Si l'objectif visé se rapportait à la conservation des ressources, le plan de conservation serait examiné en vue de déterminer les priorités. Bien que la répartition détaillée de ressources maritimes soit une tâche devant être confiée aux experts dans le domaine, on doit satisfaire d'abord aux besoins alimentaires des Indiens en procédant à cette répartition. L'importance d'accorder la priorité absolue au droit ancestral de pêcher pour se nourrir peut s'expliquer ainsi. Si, au cours d'une année donnée, il s'avérait nécessaire pour les besoins de la conservation de réduire le nombre de prises de poisson et que ce nombre soit égal à celui requis par les Indiens pour leur alimentation, alors il résulterait de la nature constitutionnelle de leur droit de pêche que c'est aux Indiens que reviendrait la totalité des poissons pouvant être pris suite aux mesures de conservation. Si, d'une manière plus réaliste, il restait encore du poisson après que les besoins alimentaires des Indiens eurent été satisfaits, ce seraient alors les pêcheurs sportifs et les pêcheurs commerciaux qui feraient les frais de ces mesures de conservation.

Dans l'arrêt *R. v. Denny* (1990), 55 C.C.C. (3d) 322, la Cour d'appel de la Nouvelle-Écosse se penche sur la constitutionnalité du droit des Indiens Miqmacs de la Nouvelle-Écosse de pêcher dans les eaux du ruisseau Indian et de la rivière Afton et elle le fait d'une manière conforme à notre compréhension de la nature constitutionnelle des droits ancestraux et du lien entre la répartition et la justification qui est requis pour que le gouverne-

rights. Clarke C.J.N.S., for a unanimous court, found that the Nova Scotia *Fishery Regulations* enacted pursuant to the federal *Fisheries Act* were in part inconsistent with the constitutional rights of the appellant Micmac Indians. Section 35(1) of the *Constitution Act, 1982*, provided the appellants with the right to a top priority allocation of any surplus of the fisheries resource which might exist after the needs of conservation had been taken into account. With respect to the issue of the Indians' priority to a food fishery, Clarke C.J.N.S. noted that the official policy of the federal government recognizes that priority. He added the following, at p. 339:

I have no hesitation in concluding that factual as well as legislative and policy recognition must be given to the existence of an Indian food fishery in the waters of Indian Brook, adjacent to the Eskasoni Reserve, and the waters of the Afton River after the needs of conservation have been taken into account . . .

To afford user groups such as sports fishermen (anglers) a priority to fish over the legitimate food needs of the appellants and their families is simply not appropriate action on the part of the federal government. It is inconsistent with the fact that the appellants have for many years, and continue to possess an aboriginal right to fish for food. The appellants have, to employ the words of their counsel, a "right to share in the available resource". This constitutional entitlement is second only to conservation measures that may be undertaken by federal legislation.

Further, Clarke C.J.N.S. found that s. 35(1) provided the constitutional recognition of the aboriginal priority with respect to the fishery, and that the regulations, in failing to guarantee that priority, were in violation of the constitutional provision. He said the following, at pp. 340-41:

Though it is crucial to appreciate that the rights afforded to the appellants by s. 35(1) are not absolute, the impugned regulatory scheme fails to recognize that this section provides the appellants with a priority of allocation and access to any surplus of the fisheries resource once the needs of conservation have been taken into account. Section 35(1), as applied to these appeals, provides the appellants with an entitlement to fish in the waters in issue to satisfy their food needs, where a

ment puisse réglementer l'exercice de ces droits. Le juge en chef Clarke a décidé, au nom d'une cour unanime, que les *Fishery Regulations* de la Nouvelle-Écosse pris en vertu de la *Loi sur les pêcheries* fédérale étaient incompatibles en partie avec les droits constitutionnels des Micmacs appelants. Le paragraphe 35(1) de la *Loi constitutionnelle de 1982* conférait aux appelants le droit d'obtenir la priorité absolue sur tout surplus de poisson pouvant exister après la prise en considération des besoins en matière de conservation. Quant à la question de la priorité du droit des Indiens de pêcher pour se nourrir, le juge en chef Clarke fait remarquer que le gouvernement fédéral reconnaît officiellement cette priorité. Il ajoute, à la p. 339:

[TRADUCTION] Je conclus sans hésitation que l'existence du droit des Indiens, sous réserve des exigences de la conservation, de pêcher à des fins de subsistance dans les eaux du ruisseau Indian, adjacentes à la réserve Eskasoni, et dans les eaux de la rivière Afton, doit être reconnue aussi bien dans les faits que sur les plans de la législation et des politiques . . .

Il ne convient simplement pas que le gouvernement fédéral accorde à des groupes d'usagers tels que les pêcheurs sportifs (les pêcheurs à la ligne) une priorité en matière de pêche qui l'emporte sur les besoins alimentaires légitimes des appelants et de leurs familles. Cela est inconciliable avec le fait que les appelants jouissent depuis bien des années d'un droit ancestral de pêcher à des fins de subsistance. Les appelants, pour reprendre la formule de leur avocat, ont «droit à une part de la ressource disponible». Ce droit constitutionnel ne cède le pas qu'aux mesures de conservation pouvant être prévues dans des lois fédérales.

Le juge en chef Clarke a conclu en outre que le par. 35(1) énonçait la reconnaissance constitutionnelle de la priorité des autochtones en matière de pêche et que le règlement, du fait qu'il ne garantissait pas cette priorité, violait cette disposition constitutionnelle. Il dit, aux pp. 340 et 341:

[TRADUCTION] Quoiqu'il importe au plus haut degré de comprendre que les droits conférés aux appelants par le par. 35(1) ne sont pas absolus, le règlement contesté pêche par l'omission de reconnaître que ce paragraphe accorde aux appelants la priorité dans la répartition de tout surplus de poisson ainsi que l'accès en priorité à ce surplus après qu'ont été pris en considération les besoins en matière de conservation. Appliqué aux présents appels, le paragraphe 35(1) accorde aux appelants le

surplus exists. To the extent that the regulatory scheme fails to recognize this, it is inconsistent with the Constitution. Section 52 mandates a finding that such regulations are of no force and effect.

In light of this approach, the argument that the cases of *R. v. Hare and Debassige*, *supra*, and *R. v. Eninew*, *R. v. Bear* (1984), 12 C.C.C. (3d) 365 (Sask. C.A.), stand for the proposition that s. 35(1) provides no basis for restricting the power to regulate must be rejected, as was done by the Court of Appeal below. In *Hare and Debassige*, which addressed the issue of whether the *Ontario Fishery Regulations*, C.R.C. 1978, c. 849, applied to members of an Indian Band entitled to the benefit of the Manitoulin Island Treaty which granted certain rights with respect to taking fish, Thorson J.A. emphasized the need for priority to be given to measures directed to the management and conservation of fish stocks with the following observation (at p. 17):

Since 1867 and subject to the limitations thereon imposed by the Constitution, which of course now includes s. 35 of the *Constitution Act, 1982*, the constitutional authority and responsibility to make laws in relation to the fisheries has rested with Parliament. Central to Parliament's responsibility has been, and continues to be, the need to provide for the proper management and conservation of our fish stocks, and the need to ensure that they are not depleted or imperilled by deleterious practices or methods of fishing.

The prohibitions found in ss. 12 and 20 of the Ontario regulations clearly serve this purpose. Accordingly, it need not be ignored by our courts that while these prohibitions place limits on the rights of all persons, they are there to serve the larger interest which all persons share in the proper management and conservation of these important resources.

In *Eninew*, Hall J.A. found, at p. 368, that "the treaty rights can be limited by such regulations as are reasonable". As we have pointed out, management and conservation of resources is indeed an important and valid legislative objective. Yet, the fact that the objective is of a "reasonable" nature cannot suffice as constitutional recognition and affirmation of aboriginal rights. Rather, the regu-

droit de pêcher dans les eaux en cause pour répondre à leurs besoins alimentaires lorsqu'il existe un surplus. Dans la mesure où le règlement ne reconnaît pas cela, il est incompatible avec la Constitution. L'article 52 requiert qu'un tel règlement soit déclaré inopérant.

Compte tenu de ce point de vue, l'argument voulant que les arrêts *R. v. Hare and Debassige*, précité, et *R. v. Eninew*, *R. v. Bear* (1984), 12 C.C.C. (3d) 365 (C.A. Sask.), établissent que le par. 35(1) ne justifie aucunement la restriction du pouvoir réglementaire doit être rejeté, comme l'a fait la Cour d'appel en l'espèce. Dans l'arrêt *Hare and Debassige*, où l'on aborde la question de savoir si le *Règlement de pêche de l'Ontario*, C.R.C. 1978, ch. 879, s'applique aux membres d'une bande indienne visée par le traité de l'île Manitoulin, qui est attributif de certains droits relatifs à la prise de poissons, le juge Thorson souligne la nécessité de donner la priorité aux mesures de gestion et de conservation des stocks de poisson en faisant remarquer (à la p. 17):

[TRADUCTION] Depuis 1867 et sous réserve des restrictions imposées par la Constitution qui, bien entendu, comprend maintenant l'art. 35 de la *Loi constitutionnelle de 1982*, le pouvoir et la responsabilité constitutionnels de légiférer en matière de pêcheries reviennent au Parlement. La nécessité d'assurer la saine gestion et conservation de nos stocks de poisson ainsi que la nécessité de veiller à ce qu'ils ne soient réduits et que leur existence ne soit pas compromise par des pratiques ou des méthodes de pêche délétères, ont constitué, et constituent encore, des aspects fondamentaux de la responsabilité du Parlement à cet égard.

Les interdictions énoncées aux art. 12 et 20 du règlement ontarien servent manifestement cette fin. Par conséquent, il est loisible à nos tribunaux de tenir compte du fait que, si ces interdictions imposent des restrictions aux droits de tous, leur raison d'être est de servir l'intérêt plus général qu'a tout le monde à ce qu'il y ait une saine gestion et conservation de ces ressources importantes.

Dans l'arrêt *Eninew*, le juge Hall de la Cour d'appel conclut, à la p. 368, que [TRADUCTION] «les droits issus de traités peuvent être limités par une réglementation raisonnable». Comme nous l'avons déjà fait remarquer, la gestion et la conservation de ressources constituent vraiment un objectif législatif important et régulier. Pourtant, le fait que cet objectif soit «raisonnable» ne saurait suffire

lations enforced pursuant to a conservation or management objective may be scrutinized according to the justificatory standard outlined above.

We acknowledge the fact that the justificatory standard to be met may place a heavy burden on the Crown. However, government policy with respect to the British Columbia fishery, regardless of s. 35(1), already dictates that, in allocating the right to take fish, Indian food fishing is to be given priority over the interests of other user groups. The constitutional entitlement embodied in s. 35(1) requires the Crown to ensure that its regulations are in keeping with that allocation of priority. The objective of this requirement is not to undermine Parliament's ability and responsibility with respect to creating and administering overall conservation and management plans regarding the salmon fishery. The objective is rather to guarantee that those plans treat aboriginal peoples in a way ensuring that their rights are taken seriously.

Within the analysis of justification, there are further questions to be addressed, depending on the circumstances of the inquiry. These include the questions of whether there has been as little infringement as possible in order to effect the desired result; whether, in a situation of expropriation, fair compensation is available; and, whether the aboriginal group in question has been consulted with respect to the conservation measures being implemented. The aboriginal peoples, with their history of conservation-consciousness and interdependence with natural resources, would surely be expected, at the least, to be informed regarding the determination of an appropriate scheme for the regulation of the fisheries.

We would not wish to set out an exhaustive list of the factors to be considered in the assessment of justification. Suffice it to say that recognition and affirmation requires sensitivity to and respect for the rights of aboriginal peoples on behalf of the government, courts and indeed all Canadians.

comme reconnaissance et confirmation constitutionnelles de droits ancestraux. Au contraire, les règlements appliqués conformément à un objectif de conservation ou de gestion peuvent être examinés selon la norme de justification énoncée plus haut.

Nous reconnaissons que la norme de justification à respecter est susceptible d'imposer un lourd fardeau à Sa Majesté. Toutefois, la politique gouvernementale relativement à la pêche en Colombie-Britannique commande déjà, et ce, indépendamment du par. 35(1), que, dans l'attribution du droit de prendre du poisson, le droit des Indiens de pêcher à des fins d'alimentation ait la priorité sur les intérêts d'autres groupes d'utilisateurs. Le droit constitutionnel énoncé au par. 35(1) exige que Sa Majesté assure que Ses règlements respectent cette attribution de priorité. Cette exigence ne vise pas à miner la capacité et la responsabilité du Parlement de créer et d'administrer des plans globaux de conservation et de gestion concernant la pêche au saumon. L'objectif est plutôt de garantir que ces plans réservent aux peuples autochtones un traitement qui assure que leurs droits sont pris au sérieux.

Il y a, dans l'analyse de la justification, d'autres questions à aborder, selon les circonstances de l'enquête. Il s'agit notamment des questions de savoir si, en tentant d'obtenir le résultat souhaité, on a porté le moins possible atteinte à des droits, si une juste indemnisation est prévue en cas d'expropriation et si le groupe d'autochtones en question a été consulté au sujet des mesures de conservation mises en œuvre. On s'attendrait certainement à ce que les peuples autochtones, traditionnellement sensibilisés à la conservation et ayant toujours vécu dans des rapports d'interdépendance avec les ressources naturelles, soient au moins informés relativement à la conception d'un régime approprié de réglementation de la pêche.

Nous ne nous proposons pas de présenter une énumération exhaustive des facteurs à considérer dans l'appréciation de la justification. Qu'il suffise de souligner que la reconnaissance et la confirmation exigent que le gouvernement, les tribunaux et même l'ensemble des Canadiens soient conscients des droits des peuples autochtones et qu'ils les respectent.

Application to this Case—Is the Net Length Restriction Valid?

The Court of Appeal below found that there was not sufficient evidence in this case to proceed with an analysis of s. 35(1) with respect to the right to fish for food. In reviewing the competing expert evidence, and recognizing that fish stock management is an uncertain science, it decided that the issues at stake in this appeal were not well adapted to being resolved at the appellate court level.

Before the trial, defence counsel advised the Crown of the intended aboriginal rights defence and that the defence would take the position that the Crown was required to prove, as part of its case, that the net length restriction was justifiable as a necessary and reasonable conservation measure. The trial judge found s. 35(1) to be inapplicable to the appellant's defence, based on his finding that no aboriginal right had been established. He therefore found it inappropriate to make findings of fact with respect to either an infringement of the aboriginal right to fish or the justification of such an infringement. He did, however, find that the evidence called by the appellant "[c]asts some doubt as to whether the restriction was necessary as a conservation measure. More particularly, it suggests that there were more appropriate measures that could have been taken if necessary; measures that would not impose such a hardship on the Indians fishing for food. That case was not fully met by the Crown."

According to the Court of Appeal, the findings of fact were insufficient to lead to an acquittal. There was no more evidence before this Court. We also would order a re-trial which would allow findings of fact according to the tests set out in these reasons.

The appellant would bear the burden of showing that the net length restriction constituted a *prima facie* infringement of the collective aboriginal right

Application à la présente affaire—La limitation de la longueur des filets est-elle valide?

La Cour d'appel a conclu en l'espèce à l'absence d'éléments de preuve suffisants pour permettre de procéder à une analyse du par. 35(1) dans le contexte du droit de pêcher à des fins de subsistance. Après avoir examiné les témoignages contradictoires des experts et reconnaissant que la gestion des stocks de poisson est une science approximative, on a jugé que les questions en litige se prêtaient mal à une décision d'une cour d'appel.

Avant le procès, l'avocat de la défense a prévenu le ministère public de son intention d'invoquer les droits ancestraux comme moyen de défense et lui a fait savoir que la position de la défense serait qu'il incombait au ministère public de prouver que la restriction imposée quant à la longueur des filets était justifiable à titre de mesure de conservation nécessaire et raisonnable. Le juge de première instance a décidé que le par. 35(1) était inapplicable au moyen de défense soulevé par l'appellant, vu sa conclusion qu'on n'avait pas établi l'existence d'un droit ancestral. Il a en conséquence décidé qu'il ne convenait pas de tirer des conclusions de fait relativement à une atteinte possible au droit de pêche ancestral ou à la justification d'une telle atteinte. Il a toutefois estimé que la preuve produite par l'appellant [TRADUCTION] «[l]aisse planer des doutes quant à savoir si la restriction s'imposait à titre de mesure de conservation. Plus particulièrement, elle laisse entendre qu'il existait des mesures plus appropriées qui auraient pu être prises au besoin, des mesures qui seraient moins rigoureuses pour les Indiens qui pêchent à des fins de subsistance. C'est là une preuve qui n'a pas été pleinement réfutée par le ministère public.»

D'après la Cour d'appel, les conclusions de fait étaient insuffisantes pour justifier un acquittement. Il n'y avait pas plus d'éléments de preuve devant notre Cour. Nous sommes également d'avis d'ordonner un nouveau procès qui permettrait de tirer des conclusions de fait conformément aux critères énoncés dans les présents motifs.

Il incomberait à l'appellant de démontrer que la restriction imposée quant à la longueur des filets constitue une atteinte à première vue au droit

to fish for food. If an infringement were found, the onus would shift to the Crown which would have to demonstrate that the regulation is justifiable. To that end, the Crown would have to show that there is no underlying unconstitutional objective such as shifting more of the resource to a user group that ranks below the Musqueam. Further, it would have to show that the regulation sought to be imposed is required to accomplish the needed limitation. In trying to show that the restriction is necessary in the circumstances of the Fraser River fishery, the Crown could use facts pertaining to fishing by other Fraser River Indians.

In conclusion, we would dismiss the appeal and the cross-appeal and affirm the Court of Appeal's setting aside of the conviction. We would accordingly affirm the order for a new trial on the questions of infringement and whether any infringement is nonetheless consistent with s. 35(1), in accordance with the interpretation set out here.

For the reasons given above, the constitutional question must be answered as follows:

Question Is the net length restriction contained in the Musqueam Indian Band Indian Food Fishing Licence dated March 30, 1984, issued pursuant to the *British Columbia Fishery (General) Regulations* and the *Fisheries Act*, R.S.C. 1970, c. F-14, inconsistent with s. 35(1) of the *Constitution Act, 1982*?

Answer This question will have to be sent back to trial to be answered according to the analysis set out in these reasons.

Appeal and cross-appeal dismissed. The constitutional question should be sent back to trial to be answered according to the analysis set out in these reasons.

Solicitors for the appellant: Blake, Cassels & Graydon, Toronto.

ancestral collectif de pêcher à des fins de subsistance. Si on concluait à l'existence d'une atteinte, le fardeau de la preuve passerait au ministère public qui devrait alors démontrer que le règlement est justifiable. Pour ce faire, il lui faudrait prouver l'absence de tout objectif inconstitutionnel sous-jacent, comme celui d'attribuer une part plus importante de la ressource en question à un groupe d'utilisateurs qui prend rang après les Musqueams. Il lui faudrait en outre démontrer que le règlement qu'on cherchait à imposer était nécessaire pour réaliser la restriction requise. En tentant d'établir que cette restriction s'imposait dans les circonstances de la pêche sur le fleuve Fraser, le ministère public pourrait se servir de faits relatifs à la pêche par d'autres Indiens du fleuve Fraser.

En conclusion, nous sommes d'avis de rejeter le pourvoi et le pourvoi incident et de confirmer l'annulation de la déclaration de culpabilité, prononcée par la Cour d'appel. En conséquence, nous sommes d'avis de confirmer l'ordonnance de nouveau procès quant à la question de l'atteinte et à celle de savoir si une atteinte est néanmoins compatible avec le par. 35(1), conformément à l'interprétation exposée dans les présents motifs.

Pour les motifs que nous venons d'exposer, la question constitutionnelle doit recevoir la réponse suivante:

Question La limite de la longueur des filets contenue dans le permis de pêche de subsistance des Indiens de la bande des Musqueams, délivré le 30 mars 1984 conformément au *Règlement de pêche général de la Colombie-Britannique* et à la *Loi sur les pêcheries*, S.R.C. 1970, ch. F-14, est-elle incompatible avec le par. 35(1) de la *Loi constitutionnelle de 1982*?

Réponse Cette question devra être renvoyée en première instance afin de recevoir une réponse conformément à l'analyse exposée dans les présents motifs.

Pourvoi et pourvoi incident rejetés. La question constitutionnelle doit être renvoyée en première instance afin de recevoir une réponse conformément à l'analyse exposée dans les présents motifs.

Dorothy Marie Van der Peet Appellant

v.

Her Majesty The Queen Respondent

and

The Attorney General of Quebec, the Fisheries Council of British Columbia, the British Columbia Fisheries Survival Coalition and the British Columbia Wildlife Federation, the First Nations Summit, Delgamuukw et al., Howard Pamajewon, Roger Jones, Arnold Gardner, Jack Pitchenese and Allan Gardner Interveners

INDEXED AS: R. v. VAN DER PEET

File No.: 23803.

1995: November 27, 28, 29; 1996: August 21.

Present: Lamer C.J. and La Forest, L'Heureux-Dubé, Sopinka, Gonthier, Cory, McLachlin, Iacobucci and Major JJ.

ON APPEAL FROM THE COURT OF APPEAL FOR BRITISH COLUMBIA

Constitutional law — Aboriginal rights — Right to sell fish on non-commercial basis — Fish caught under native food fish licence — Regulations prohibiting sale or barter of fish caught under that licence — Fish sold to non-aboriginal and charges laid — Definition of "existing aboriginal rights" as used in s. 35 of Constitution Act, 1982 — Whether an aboriginal right being exercised in the circumstances — Constitution Act, 1982, s. 35(1) — Fisheries Act, R.S.C. 1970, c. F-14, s. 61(1) — British Columbia Fishery (General) Regulations, SOR/84-248, s. 27(5).

The appellant, a native, was charged with selling 10 salmon caught under the authority of an Indian food fish licence, contrary to s. 27(5) of the *British Columbia Fishery (General) Regulations*, which prohibited the sale or barter of fish caught under such a licence. The restrictions imposed by s. 27(5) were alleged to infringe the appellant's aboriginal right to sell fish and accord-

Dorothy Marie Van der Peet Appelante

This is Exhibit VV referred to in the Affidavit of Tanny Nguyen sworn before me at Vancouver, BC this 6th day of July, 2019.

Sa Majesté la Reine Intimée

et A Commissioner for taking affidavits for British Columbia

RÉPERTORIÉ: R. c. VAN DER PEET

N° du greffe: 23803.

1995: 27, 28, 29 novembre; 1996: 21 août.

Présents: Le juge en chef Lamer et les juges La Forest, L'Heureux-Dubé, Sopinka, Gonthier, Cory, McLachlin, Iacobucci et Major.

EN APPEL DE LA COUR D'APPEL DE LA COLOMBIE-BRITANNIQUE

Droit constitutionnel — Droits ancestraux — Droit de vendre du poisson à des fins non commerciales — Poisson pris en vertu d'un permis de pêche de subsistance des Indiens — Règlement interdisant la vente et l'échange du poisson pris en vertu d'un tel permis — Poisson vendu à des non-autochtones et dépôt d'accusations — Définition de «droits ancestraux existants» à l'art. 35 de la Loi constitutionnelle de 1982 — S'agissait-il, dans les circonstances, de l'exercice d'un droit ancestral? — Loi constitutionnelle de 1982, art. 35(1) — Loi sur les pêcheries, S.R.C. 1970, ch. F-14, art. 61(1) — Règlement de pêche général de la Colombie-Britannique, DORS/84-248, art. 27(5).

L'appelante, une autochtone, a été accusée d'avoir vendu 10 saumons pris en vertu d'un permis de pêche de subsistance des Indiens, contrairement au par. 27(5) du *Règlement de pêche général de la Colombie-Britannique*, qui interdisait la vente et l'échange du poisson pris en vertu d'un tel permis. On a plaidé que les restrictions imposées par le par. 27(5) portent

ingly were invalid because they violated s. 35(1) of the *Constitution Act, 1982*. The trial judge held that the aboriginal right to fish for food and ceremonial purposes did not include the right to sell such fish and found the appellant guilty. The summary appeal judge found an aboriginal right to sell fish and remanded for a new trial. The Court of Appeal allowed the Crown's appeal and restored the guilty verdict. The constitutional question before this Court queried whether s. 27(5) of the Regulations was of no force or effect in the circumstances by reason of the aboriginal rights within the meaning of s. 35 of the *Constitution Act, 1982*.

Held (L'Heureux-Dubé and McLachlin JJ. dissenting): The appeal should be dismissed.

The Aboriginal Right

Per Lamer C.J. and La Forest, Sopinka, Gonthier, Cory, Iacobucci and Major JJ.: A purposive analysis of s. 35(1) must take place in light of the general principles applicable to the legal relationship between the Crown and aboriginal peoples. This relationship is a fiduciary one and a generous and liberal interpretation should accordingly be given in favour of aboriginal peoples. Any ambiguity as to the scope and definition of s. 35(1) must be resolved in favour of aboriginal peoples. This purposive analysis is not to be limited to an analysis of why a pre-existing doctrine was elevated to constitutional status.

Aboriginal rights existed and were recognized under the common law. They were not created by s. 35(1) but subsequent to s. 35(1) they cannot be extinguished. They can, however, be regulated or infringed consistent with the justificatory test laid out in *R. v. Sparrow*.

Section 35(1) provides the constitutional framework through which the fact that aboriginals lived on the land in distinctive societies, with their own practices, customs and traditions, is acknowledged and reconciled with the sovereignty of the Crown. The substantive rights which fall within the provision must be defined in light of this purpose. The French version of the text, prior jurisprudence of this Court and the courts of

atteinte au droit ancestral de l'appelante de vendre du poisson et qu'elles sont en conséquence invalides parce qu'elles violent le par. 35(1) de la *Loi constitutionnelle de 1982*. Le juge du procès a statué que le droit ancestral de pêcher à des fins alimentaires et rituelles n'inclut pas le droit de vendre le poisson ainsi pris et a déclaré l'appelante coupable. Le juge d'appel des poursuites sommaires a estimé qu'il existait un droit ancestral de vendre du poisson et ordonné la tenue d'un nouveau procès. La Cour d'appel a fait droit à l'appel du ministère public et rétabli le verdict de culpabilité. La question constitutionnelle que la Cour était appelée à trancher portait sur le point suivant: le par. 27(5) du Règlement était-il, dans les circonstances de la présente affaire, inopérant en raison de l'existence de droits ancestraux au sens de l'art. 35 de la *Loi constitutionnelle de 1982*?

Arrêt (les juges L'Heureux-Dubé et McLachlin sont dissidentes): Le pourvoi est rejeté.

Le droit ancestral

Le juge en chef Lamer et les juges La Forest, Sopinka, Gonthier, Cory, Iacobucci et Major: L'analyse du par. 35(1) en fonction de son objet doit être faite à la lumière des principes généraux applicables aux rapports juridiques entre l'État et les peuples autochtones. L'État a, envers les peuples autochtones, une obligation de fiduciaire qui a pour conséquence que les dispositions concernant les peuples autochtones doivent recevoir une interprétation généreuse et libérale. Les doutes ou ambiguïtés concernant la portée et la définition des droits visés par le par. 35(1) doivent être résolus en faveur des peuples autochtones. Il ne faut pas limiter l'analyse de l'objet de cette disposition aux raisons pour lesquelles une doctrine juridique préexistante s'est vue conférer un statut constitutionnel.

Les droits ancestraux existaient déjà et ils étaient reconnus en common law. Le paragraphe 35(1) n'a pas créé les droits ancestraux, mais à la suite de l'adoption du par. 35(1), ils ne peuvent pas être éteints. Ils peuvent, toutefois, être réglementés ou violés en conformité avec le critère de justification énoncé dans *R. c. Sparrow*.

Le paragraphe 35(1) établit le cadre constitutionnel qui permet de reconnaître que les autochtones vivaient sur le territoire en sociétés distinctives, possédant leurs propres coutumes, pratiques et traditions, et de concilier ce fait avec la souveraineté de Sa Majesté. Les droits substantiels visés par cette disposition doivent être définis à la lumière de cet objet. Cette façon d'analyser le par. 35(1) trouve également appui dans le texte français de cette disposition, dans des décisions antérieures de notre Cour et des tribunaux australiens et américains,

Australia and the United States, academic commentators and legal literature support this approach.

To be an aboriginal right an activity must be an element of a practice, custom or tradition integral to the distinctive culture of the aboriginal group claiming the right. A number of factors must be considered in applying the "integral to a distinctive culture" test. The court must take into account the perspective of the aboriginal peoples, but that perspective must be framed in terms cognizable to the Canadian legal and constitutional structure.

In assessing a claim to an aboriginal right a court must first identify the nature of the right being claimed in order to determine whether a claim meets the test of being integral to the distinctive culture of the aboriginal group claiming the right. To characterize an applicant's claim correctly, a court should consider such factors as the nature of the action which the applicant is claiming was done pursuant to an aboriginal right, the nature of the governmental regulation, statute or action being impugned, and the practice, custom or tradition being relied upon to establish the right. The activities must be considered at a general rather than specific level. They may be an exercise in modern form of a pre-contact practice, custom or tradition and the claim should be characterized accordingly.

To be integral, a practice, custom or tradition must be of central significance to the aboriginal society in question — one of the things which made the culture of the society distinctive. A court cannot look at those aspects of the aboriginal society that are true of every human society (e.g., eating to survive) or at those aspects of the aboriginal society that are only incidental or occasional to that society. It is those distinctive features that need to be acknowledged and reconciled with the sovereignty of the Crown.

The practices, customs and traditions which constitute aboriginal rights are those which have continuity with the practices, customs and traditions that existed prior to contact with European society. Conclusive evidence from pre-contact times about the practices, customs and traditions of the community in question need not be produced. The evidence simply needs to be directed at

chez des commentateurs universitaires et dans la littérature juridique.

Pour constituer un droit ancestral, une activité doit être un élément d'une coutume, pratique ou tradition faisant partie intégrante de la culture distinctive du groupe autochtone qui revendique le droit en question. Un certain nombre de facteurs doivent être pris en considération dans l'application du critère de la «partie intégrante d'une culture distinctive». Le tribunal doit tenir compte du point de vue des autochtones, mais il faut que ce point de vue soit exprimé d'une manière compatible avec l'organisation juridique et constitutionnelle du Canada.

Dans l'appréciation de la revendication d'un droit ancestral, le tribunal doit d'abord déterminer la nature du droit revendiqué, pour juger si la revendication satisfait au critère de la partie intégrante de la culture distinctive du groupe autochtone qui revendique ce droit. Pour bien caractériser la revendication du demandeur, le tribunal doit tenir compte de facteurs tels que la nature de l'acte qui, d'affirmer le demandeur, a été accompli en vertu d'un droit ancestral, la nature du règlement, de la loi ou de l'autre mesure gouvernementale contestée, ainsi que la coutume, pratique ou tradition invoquée pour établir l'existence du droit. Il doit examiner ces activités d'un point de vue général et non spécifique. Il est possible que les activités en question soient l'exercice, sous une forme contemporaine, d'une coutume, pratique ou tradition qui existait avant le contact avec les Européens, auquel cas il doit adapter sa caractérisation de la revendication en conséquence.

Pour faire partie intégrante d'une culture distinctive, une coutume, pratique ou tradition doit avoir une importance fondamentale pour la société autochtone concernée — être l'une des choses qui rendaient la culture de la société distinctive. Le tribunal ne peut tenir compte des aspects de la société autochtone qui sont communs à toutes les sociétés humaines (p. ex. le fait de manger pour survivre), ni des aspects de la société autochtone qui n'ont qu'un caractère secondaire ou occasionnel. Ce sont ces caractéristiques distinctives qui doivent être reconnues et conciliées avec la souveraineté de Sa Majesté.

Constituent des droits ancestraux les coutumes, pratiques et traditions qui marquent la continuité avec les coutumes, pratiques et traditions qui existaient avant le contact avec les Européens. Il n'est pas nécessaire de produire, relativement aux coutumes, pratiques et traditions de la collectivité, une preuve concluante, datant de l'époque antérieure au contact avec les Européens.

demonstrating which aspects of the aboriginal community and society have their origins pre-contact. The concept of continuity is the means by which a "frozen rights" approach to s. 35(1) will be avoided. It does not require an unbroken chain between current practices, customs and traditions and those existing prior to contact. A practice existing prior to contact can be resumed after an interruption.

Basing the identification of aboriginal rights in the period prior to contact is not inconsistent with the inclusion of the Métis in the definition of "aboriginal peoples of Canada" in s. 35(2) of the *Constitution Act, 1982*. The history of the Métis and the reasons underlying their inclusion in the protection given by s. 35 are quite distinct from those relating to other aboriginal peoples in Canada. The manner in which the aboriginal rights of other aboriginal peoples are defined is not necessarily determinative of the manner in which the aboriginal rights of the Métis are defined.

A court should approach the rules of evidence, and interpret the evidence that exists, conscious of the special nature of aboriginal claims, and of the evidentiary difficulties in proving a right which originates in times where there were no written records of the practices, customs and traditions and customs engaged in. The courts must not undervalue the evidence presented by aboriginal claimants simply because that evidence does not conform precisely with the evidentiary standards applied in other contexts.

Courts considering a claim to the existence of an aboriginal right must focus specifically on the practices, customs and traditions of the particular aboriginal group claiming the right. Claims to aboriginal rights are not to be determined on a general basis.

In identifying those practices, customs and traditions that constitute the aboriginal rights recognized and affirmed by s. 35(1), a court must ensure that the practice, custom or tradition relied upon in a particular case is independently significant to the aboriginal community claiming the right. The practice, custom or tradition cannot exist simply as an incident to another practice, custom or tradition. Incidental practices, customs and traditions cannot qualify as aboriginal rights through a

Il suffit que cette preuve tende à démontrer lesquels des aspects de la collectivité et de la société autochtones datent d'avant le contact avec les Européens. Le concept de continuité est le moyen qui permet d'éviter une interprétation du par. 35(1) fondée sur la notion de «droits figés». Il n'exige pas la preuve d'une continuité parfaite entre les coutumes, pratiques et traditions actuelles et celles qui existaient avant le contact avec les Européens. Une pratique qui existait avant le contact avec les Européens peut être reprise après une interruption.

Le fait de se reporter à la période antérieure au contact avec les Européens pour identifier les droits ancestraux n'est pas incompatible avec le fait que, aux termes du par. 35(2) de la *Loi constitutionnelle de 1982*, les Métis sont compris dans la définition de «peuples autochtones du Canada». L'histoire des Métis et les raisons qui sous-tendent leur inclusion pour qu'ils bénéficient de la protection accordée par l'art. 35 diffèrent considérablement de celles qui concernent les autres peuples autochtones du Canada. La manière dont les droits ancestraux des autres peuples autochtones sont définis n'est pas nécessairement déterminante en ce qui concerne la manière dont sont définis ceux des Métis.

Le tribunal doit appliquer les règles de preuve et interpréter la preuve existante en étant conscient de la nature particulière des revendications des autochtones et des difficultés que soulève la preuve d'un droit qui remonte à une époque où les coutumes, pratiques et traditions n'étaient pas consignées par écrit. Les tribunaux doivent se garder d'accorder un poids insuffisant à la preuve présentée par les demandeurs autochtones simplement parce que cette preuve ne respecte pas de façon précise les normes qui seraient appliquées dans d'autres contextes.

Le tribunal saisi d'une revendication fondée sur l'existence d'un droit ancestral doit s'attacher spécifiquement à l'examen des coutumes, pratiques et traditions du groupe autochtone qui revendique ce droit. Les revendications de droits ancestraux ne peuvent pas être tranchées de manière générale.

Le tribunal appelé à identifier les coutumes, pratiques et traditions qui constituent les droits ancestraux reconnus et confirmés par le par. 35(1) doit s'assurer que la coutume, pratique ou tradition invoquée dans un cas donné revêt une importance particulière pour la collectivité autochtone qui revendique le droit. Il ne doit pas s'agir d'une coutume, pratique ou tradition simplement accessoire d'une autre coutume, pratique ou tradition. Les coutumes, pratiques et traditions accessoires ne peu-

process of piggybacking on integral practices, customs and traditions.

A practice, custom or tradition, to be recognized as an aboriginal right need not be distinct, meaning "unique", to the aboriginal culture in question. The aboriginal claimants must simply demonstrate that the custom or tradition is a defining characteristic of their culture.

The fact that that practice, custom or tradition continued after the arrival of Europeans, and adapted in response to their arrival, is not relevant to determination of the claim; European arrival and influence cannot be used to deprive an aboriginal group of an otherwise valid claim to an aboriginal right. A practice, custom or tradition will not meet the standard for recognition of an aboriginal right, however, where it arose solely as a response to European influences.

The relationship between aboriginal rights and aboriginal title (a sub-category of aboriginal rights dealing solely with land claims) must not confuse the analysis of what constitutes an aboriginal right. Aboriginal rights arise from the prior occupation of land, but they also arise from the prior social organization and distinctive cultures of aboriginal peoples on that land. In considering whether a claim to an aboriginal right has been made out, courts must look both at the relationship of an aboriginal claimant to the land and at the practices, customs and traditions arising from the claimant's distinctive culture and society. Courts must not focus so entirely on the relationship of aboriginal peoples with the land that they lose sight of the other factors relevant to the identification and definition of aboriginal rights.

The first step in the application of the integral to a distinctive culture test requires the Court to identify the precise nature of the appellant's claim to have been exercising an aboriginal right. Here, the appellant claimed that the practices, customs and traditions of the Sto:lo include as an integral element the exchange of fish for money or other goods. The significance of the practice, tradition or custom is relevant to the determination of whether that practice, custom or tradition is integral, but cannot itself constitute the claim to an aboriginal right. The claim must be based on the actual practices, customs and traditions related to the fishery,

vent être considérées comme des droits ancestraux du fait qu'elles se greffent sur des coutumes, pratiques et traditions faisant partie intégrante d'une culture.

Pour être reconnue comme un droit ancestral, une coutume, pratique ou tradition n'a pas à être distincte, c'est-à-dire «propre» à la culture autochtone en cause. Les demandeurs autochtones doivent simplement montrer que la coutume, pratique ou tradition en cause est une caractéristique déterminante de leur culture.

Le fait que cette coutume, pratique ou tradition se soit poursuivie après l'arrivée des Européens et se soit adaptée en réaction à cet événement, n'est pas pertinent pour l'appréciation de la revendication; l'arrivée et l'influence des Européens ne peuvent être invoquées pour rejeter la revendication, par ailleurs valide, d'un droit ancestral présentée par un groupe autochtone. En revanche, si la coutume, pratique ou tradition n'est que le fruit des influences européennes, alors elle ne respecte pas la norme applicable pour la reconnaissance d'un droit ancestral.

Le rapport entre le titre aborigène (une sous-catégorie de droits ancestraux qui concerne seulement les revendications de droits fonciers) et les droits ancestraux ne doit pas embrouiller l'analyse de ce qui constitue un droit ancestral. Les droits ancestraux découlent non seulement de l'occupation antérieure du territoire, mais aussi de l'organisation sociale antérieure et des cultures distinctives des peuples autochtones habitant ce territoire. Pour déterminer si le bien-fondé de la revendication d'un droit ancestral a été établi, les tribunaux doivent considérer et les rapports qu'entretient le demandeur autochtone avec le territoire, et les coutumes, pratiques et traditions de la société à laquelle il appartient et de la culture distinctive de cette société. Ils ne doivent pas se concentrer sur les rapports qu'entretiennent les peuples autochtones avec le territoire au point de négliger les autres facteurs pertinents pour l'identification et la définition des droits ancestraux.

Conformément à la première étape de l'application du critère de la partie intégrante d'une culture distinctive, notre Cour doit identifier la nature précise de la prétention de l'appelante qu'elle exerçait un droit ancestral. En l'espèce, l'appelante soutient que les coutumes, pratiques et traditions des Sto:lo incluent, en tant que partie intégrante de leur culture, l'échange de poisson contre de l'argent ou d'autres biens. L'importance de cette coutume, pratique ou tradition est pertinente pour décider si celle-ci fait partie intégrante de la culture, mais elle ne peut à elle seule justifier le bien-fondé de la revendication d'un droit ancestral. La revendication doit plutôt

here the custom of exchanging fish for money or other goods.

The trial judge made no clear and palpable error which would justify an appellate court's substituting its findings of fact. These findings included: (1) prior to contact exchanges of fish were only "incidental" to fishing for food purposes; (2) there was no regularized trading system amongst the appellant's people prior to contact; (3) the trade that developed with the Hudson's Bay Company, while of significance to the Sto:lo of the time, was qualitatively different from what was typical of Sto:lo culture prior to contact; and, (4) the Sto:lo's exploitation of the fishery was not specialized and that suggested that the exchange of fish was not a central part of Sto:lo culture. The appellant failed to demonstrate that the exchange of fish for money or other goods was an integral part of the distinctive Sto:lo culture which existed prior to contact and was therefore protected by s. 35(1) of the *Constitution Act, 1982*.

Per L'Heureux-Dubé J. (dissenting): Aboriginal rights find their origin in the historic occupation and use of native ancestral lands. These rights relate not only to aboriginal title but also to the component elements of this larger right, such as aboriginal rights to hunt, fish or trap, and their accompanying practices, customs and traditions. They also include other matters, not related to land, that form part of a distinctive aboriginal culture.

Aboriginal rights can exist on reserve lands, aboriginal title lands, and aboriginal right lands. Reserve lands are reserved by the federal government for the exclusive use of Indian people. Title to aboriginal title lands — lands which the natives possess for occupation and use at their own discretion — is founded on common law and is subject to the Crown's ultimate title. It exists when the bundle of aboriginal rights is large enough to command the recognition of a *sui generis* proprietary interest to occupy and use the land. Aboriginal title can also be founded on treaties. Finally, aboriginal right lands are those lands on which only specific aboriginal rights exist (e.g., the right to hunt for food, social and ceremonial purposes) because the occupation and use by the particular group of aboriginal people is too limited

être fondée sur les coutumes, pratiques et traditions se rattachant concrètement à la pêche, en l'occurrence la coutume d'échanger du poisson contre de l'argent ou d'autres biens.

Le juge du procès n'a commis aucune erreur manifeste et dominante qui justifierait une cour d'appel de substituer ses conclusions de fait aux siennes. Parmi ces conclusions, on peut relever les suivantes: (1) avant le contact avec les Européens, les échanges de poisson n'étaient qu'un aspect «accessoire» de la pêche pratiquée à des fins alimentaires; (2) il n'existait pas, avant le contact avec les Européens, de système de commerce organisé chez le peuple auquel appartient l'appelante; (3) le commerce entre les Sto:lo et la Compagnie de la Baie d'Hudson, même s'il était important pour la société sto:lo de cette époque, était qualitativement différent de celui qui était typique de la culture sto:lo d'avant le contact avec les Européens; (4) l'absence de spécialisation dans l'exploitation des ressources de la pêche chez les Sto:lo tend à indiquer que l'échange de poisson n'était pas un élément fondamental de la culture sto:lo. L'appelante n'a pas démontré que l'échange de poisson contre de l'argent ou d'autres biens faisait partie intégrante de la culture sto:lo distinctive qui existait avant le contact avec les Européens et était en conséquence protégé par le par. 35(1) de la *Loi constitutionnelle de 1982*.

Le juge L'Heureux-Dubé (dissidente): La source des droits ancestraux est l'occupation et l'utilisation historiques par les autochtones de leurs terres ancestrales, et ces droits comprennent non seulement le titre aborigène, mais aussi les éléments constitutifs de ce droit plus large — tels les droits de chasse, de pêche et de piégeage ancestraux, et les coutumes, pratiques et traditions connexes — ainsi que d'autres éléments qui font partie intégrante de la culture autochtone distinctive visée, mais ne se rapportent pas au territoire.

Les droits ancestraux peuvent se rattacher aux terres des réserves, aux terres visées par un titre aborigène et aux terres visées par un droit ancestral. Les terres des réserves sont réservées par le gouvernement fédéral pour l'usage exclusif des Indiens. Les terres visées par un titre aborigène, fondé sur la common law, sont les terres que possèdent les autochtones et qu'ils peuvent occuper et utiliser à leur gré, sous réserve du fait que c'est Sa Majesté qui, en dernier ressort, en détient le titre. Le titre aborigène existe lorsque l'ensemble des droits ancestraux est suffisamment important pour commander la reconnaissance d'un droit foncier *sui generis* d'occupation et d'utilisation des terres visées. Un titre aborigène peut également être fondé sur un traité. Enfin, les terres visées par un droit ancestral sont les terres

and, as a result, does not meet the criteria for the recognition, at common law, of aboriginal title. These types of lands are not static or mutually exclusive.

Prior to 1982, aboriginal rights were founded only on the common law and they could be extinguished by treaty, conquest and legislation as they were "dependent upon the good will of the Sovereign". Now, s. 35(1) of the *Constitution Act, 1982* protects aboriginal interests arising out of the native historic occupation and use of ancestral lands through the recognition and affirmation of "existing aboriginal and treaty rights of the aboriginal peoples of Canada".

The *Sparrow* test deals with constitutional claims of infringement of aboriginal rights. This test involves three steps: (1) the assessment and definition of an existing aboriginal right (including extinguishment); (2) the establishment of a *prima facie* infringement of such right; and, (3) the justification of the infringement.

Section 35(1) must be given a generous, large and liberal interpretation and ambiguities or doubts should be resolved in favour of the natives. Aboriginal rights must be construed in light of the special trust relationship and the responsibility of the Crown *vis-à-vis* aboriginal people. Most importantly, aboriginal rights protected under s. 35(1) must be interpreted in the context of the history and culture of the specific aboriginal society and in a manner that gives the rights meaning to the natives. It is not appropriate that the perspective of the common law be given an equal weight with the perspective of the natives.

The issue of the nature and extent of aboriginal rights protected under s. 35(1) is fundamentally about characterization. Two approaches have emerged.

The first approach focuses on the particular aboriginal practice, custom or tradition. It considers that what is common to both aboriginal and non-aboriginal cultures is non-aboriginal and hence not protected by s. 35(1).

auxquelles ne peuvent se rattacher que des droits ancestraux spécifiques (p. ex., le droit de chasser à des fins alimentaires, sociales et rituelles), parce que l'occupation et l'utilisation des terres par le groupe autochtone concerné sont trop limitées et, en conséquence, ne respectent pas le critère applicable en vue de la reconnaissance, en common law, d'un titre aborigène. Le classement d'une terre dans un type donné n'est pas immuable. De plus, une terre peut appartenir à plus d'un type.

Avant 1982, la doctrine des droits ancestraux n'était fondée que sur la common law, et les droits ancestraux pouvaient en conséquence être éteints par traité, par conquête et par voie législative puisqu'ils «dépendaient de la bonne volonté du Souverain». Désormais, le par. 35(1) de la *Loi constitutionnelle de 1982* protège les intérêts des autochtones qui découlent de l'occupation et de l'utilisation historiques par ceux-ci de leurs terres ancestrales, en reconnaissant et en confirmant «[l]es droits existants — ancestraux ou issus de traités — des peuples autochtones du Canada».

Le test énoncé dans *Sparrow* est le cadre d'analyse des affaires constitutionnelles dans lesquelles on demande qu'un droit soit protégé en tant que droit ancestral. Il comporte trois étapes: (1) l'évaluation et la définition d'un droit ancestral existant (y compris son extinction), (2) l'établissement d'une atteinte *prima facie* à ce droit, et (3) la justification de cette atteinte.

Le paragraphe 35(1) doit recevoir une interprétation généreuse, large et libérale et les ambiguïtés, doutes ou incertitudes doivent être résolus en faveur des autochtones. Les droits ancestraux doivent être interprétés à la lumière des rapports spéciaux de fiduciaire et de la responsabilité de Sa Majesté vis-à-vis des autochtones. La règle la plus importante est que les droits ancestraux protégés par le par. 35(1) doivent être interprétés dans le contexte de l'histoire et de la culture de la société autochtone concernée, de manière à leur donner un sens pour les autochtones. Il n'est pas approprié d'affirmer que, dans la définition des droits ancestraux, la perspective de la common law importe autant que celle des autochtones.

La question de la nature et de l'étendue des droits ancestraux protégés par le par. 35(1) est fondamentalement une question de caractérisation. Deux méthodes d'analyse se sont dégagées.

La première est axée sur la coutume, pratique ou tradition en cause. Suivant ce point de vue, ce qui est commun aux cultures autochtones et non autochtones est non autochtone et donc n'est pas protégé par le

This approach should not be adopted. This approach misconstrues the words "distinctive culture", used in *Sparrow*, by interpreting it as if it meant "distinct culture". It is also overly majoritarian. Finally, this approach is unduly restrictive as it defines aboriginal culture and aboriginal rights as that which is left over after features of non-aboriginal cultures have been taken away.

The second approach describes aboriginal rights in a fairly high level of abstraction and is more generic. Its underlying premise is that the notion of "integral part of [aboriginals'] distinctive culture" constitutes a general statement regarding the purpose of s. 35(1). Section 35(1) should be viewed as protecting, not a catalogue of individualized practices, customs or traditions but the "distinctive culture" of which aboriginal activities are manifestations. The emphasis is on the significance of these activities to natives rather than on the activities themselves. These aboriginal activities should be distinguished from the practices or habits which were merely incidental to the lives of a particular group of aboriginal people and, as such, would not warrant protection under s. 35(1).

The criterion of "distinctive aboriginal culture" should not be limited to those activities that only aboriginal people have undertaken or that non-aboriginal people have not. Rather, all practices, customs and traditions which are connected enough to the self-identity and self-preservation of organized aboriginal societies should be viewed as deserving the protection of s. 35(1). A generous, large and liberal construction should be given to these activities in order to give full effect to the constitutional recognition of the distinctiveness of aboriginal culture. What constitutes a practice, custom or tradition distinctive to native culture and society must be examined through the eyes of aboriginal people.

The question of the period of time relevant to the recognition of aboriginal rights relates to whether the practice, custom or tradition has to exist prior to a specific date, and also to the length of time necessary for an aboriginal activity to be recognized as a right under s. 35(1). Two basic approaches exist: the "frozen right" approach and the "dynamic right" approach. The latter should be preferred.

par. 35(1). Cette méthode ne devrait pas être adoptée. Elle décrit mal l'expression «culture distinctive» utilisée dans l'arrêt *Sparrow*, en lui donnant le sens de «culture distincte». C'est une analyse qui accorde beaucoup trop d'importance au point de vue de la majorité. Enfin, elle est une interprétation par trop rigide qui revient à définir la culture autochtone et les droits ancestraux comme étant ce qu'il en reste après qu'on en ait retranché les caractéristiques des cultures non autochtones.

La deuxième méthode est plus générale et décrit les droits ancestraux avec un degré d'abstraction assez élevé. Le principe sur lequel elle repose est que la notion de «partie intégrante de la culture distinctive [des autochtones visés]» constitue un énoncé général de l'objet du par. 35(1). Il faudrait considérer que le par. 35(1) protège non pas une liste de coutumes, pratiques ou traditions propres, mais plutôt la «culture distinctive» dont les activités autochtones sont des manifestations. L'accent serait mis sur l'importance de ces activités pour les autochtones plutôt que sur les activités elles-mêmes. Il faudrait distinguer ces activités autochtones des pratiques ou habitudes qui étaient simplement des aspects accessoires de la vie d'un groupe particulier d'autochtones et qui, en tant que telles, ne commanderaient pas la protection du par. 35(1).

Le critère de la «culture autochtone distinctive» ne devrait pas être restreint aux activités exercées uniquement par les autochtones et non par les non-autochtones. Au contraire, toutes les coutumes, pratiques et traditions ayant un lien suffisant avec le sentiment d'identité et le désir de préservation des sociétés autochtones organisées devraient être considérées comme valant d'être protégées en vertu du par. 35(1). Qui plus est, il faudrait interpréter ces activités de façon généreuse, large et libérale afin de donner plein effet à la reconnaissance constitutionnelle du caractère distinctif de la culture autochtone. Ce qui constitue une coutume, pratique ou tradition distinctive pour une culture et une société autochtones doit être examiné avec les yeux des autochtones.

La question de la période pertinente pour la reconnaissance de droits ancestraux amène à se demander si la coutume, pratique ou tradition doit avoir existé avant une date spécifique, et quelle est la période nécessaire pendant laquelle une activité autochtone doit avoir été exercée pour être reconnue comme un droit visé au par. 35(1). Deux méthodes principales ont été préconisées: la méthode fondée sur les «droits figés» et celle fondée sur le «caractère dynamique des droits». Il y a lieu de préférer la dernière.

The "frozen right" approach would recognize practices, customs and traditions that existed from time immemorial and that continued to exist at the time of British sovereignty. This approach overstates the impact of European influence on aboriginal communities, crystallizes aboriginal practice as of an arbitrary date, and imposes a heavy burden on the persons claiming an aboriginal right even if evidentiary standards are relaxed. In addition, it embodies inappropriate and unprovable assumptions about aboriginal culture and society and is inconsistent with *Sparrow* which refused to define existing aboriginal rights so as to incorporate the manner in which they were regulated in 1982.

Underlying the "dynamic right" approach is the premise that "existing aboriginal rights" must be interpreted flexibly so as to permit their evolution over time. Aboriginal rights must be permitted to maintain contemporary relevance in relation to the needs of the natives as their practices, customs and traditions change and evolve with the overall society in which they live. This generous, large and liberal interpretation of aboriginal rights protected under s. 35(1) would ensure their continued vitality. Practices, customs and traditions need not have existed prior to British sovereignty or European contact. British sovereignty, instead of being considered the turning point in aboriginal culture, would be regarded as having recognized and affirmed practices, customs and traditions which are sufficiently significant and fundamental to the culture and social organization of aboriginal people. This idea relates to the "doctrine of continuity".

The aboriginal activity must have formed an integral part of a distinctive aboriginal culture for a substantial continuous period of time. This period should be assessed based on: (1) the type of aboriginal practices, customs and traditions; (2) the particular aboriginal culture and society; and, (3) the reference period of 20 to 50 years. This approach gives proper consideration to the perspective of aboriginal people on the meaning of their existing rights.

As regards the delineation of the aboriginal right claimed, the purposes of aboriginal practices, customs and traditions are highly relevant in assessing if they are sufficiently significant to the culture for a substantial continuing period of time. The purposes should not be

Suivant la méthode fondée sur les «droits figés», seraient reconnues les coutumes, pratiques et traditions qui existaient de temps immémorial au moment de la souveraineté britannique. Cette méthode exagère l'incidence de l'influence européenne sur les collectivités autochtones, cristallise les pratiques autochtones à une date arbitraire et, sur le plan de la preuve, impose aux autochtones un fardeau lourd que ne permet pas d'atténuer l'assouplissement des normes de preuve. Ce critère intègre des hypothèses inappropriées et improuvables en ce qui concerne la culture et la société autochtones et est incompatible avec l'arrêt *Sparrow* qui a refusé de définir les droits ancestraux existants de façon à intégrer la manière dont ils étaient réglementés en 1982.

La méthode fondée sur le «caractère dynamique des droits» repose sur le principe que l'expression «droits ancestraux existants» doit recevoir une interprétation souple de manière à permettre à ces droits d'évoluer avec le temps. Il faut permettre aux droits ancestraux de conserver une pertinence contemporaine par rapport aux besoins des autochtones, au fur et à mesure que leurs coutumes, pratiques et traditions changent et évoluent en même temps que l'ensemble de la société dans laquelle ils vivent. Cette interprétation généreuse, large et libérale des droits ancestraux protégés en vertu du par. 35(1) garantirait leur vitalité continue. Il n'est pas impératif que les coutumes, pratiques et traditions aient existé avant l'affirmation de la souveraineté britannique ou avant le contact avec les Européens. Au lieu d'être perçue comme le point tournant pour la culture autochtone, la souveraineté britannique serait plutôt considérée comme ayant reconnu et confirmé les coutumes, pratiques et traditions qui sont suffisamment importantes et fondamentales pour l'organisation sociale et la culture des autochtones. Cette idée se rattache à la «doctrine de la continuité».

L'activité autochtone doit avoir fait partie intégrante d'une culture autochtone distinctive pendant une période considérable et ininterrompue. Cette période devrait être appréciée en fonction des critères suivants: (1) le type de coutumes, pratiques et traditions autochtones en cause, (2) la culture et la société autochtones particulières visées, et (3) la période de référence de 20 à 50 ans. Cette méthode permet de tenir compte, comme il se doit, de la perspective des autochtones en ce qui concerne la signification de leurs droits existants.

Pour ce qui est de la définition du droit ancestral revendiqué, les fins pour lesquelles sont exercées les activités en cause sont considérées comme hautement pertinentes dans l'examen de la question de savoir si les coutumes, pratiques et traditions autochtones ont été

strictly compartmentalized but rather should be viewed on a spectrum, with aboriginal activities undertaken solely for food at one extreme, those directed to obtaining purely commercial profit at the other extreme, and activities relating to livelihood, support and sustenance at the centre.

An aboriginal activity does not need to be undertaken for livelihood, support and sustenance purposes to benefit from s. 35(1) protection. Whether an activity is sufficiently significant and fundamental to the culture and social organization for a substantial continuing period of time will have to be determined on the specific facts giving rise to each case, as proven by the Crown, in view of the particular aboriginal culture and the evidence supporting the recognition of such right.

Nevertheless, the facts did not support framing the issue in this case in terms of commercial fishing. Appellant did not argue that her people possessed an aboriginal right to fish for commercial purposes but only the right to sell, trade and barter fish for their livelihood, support and sustenance. Finally, the legislative provision under constitutional challenge was not only aimed at commercial fishing but also at the non-commercial sale, trade and barter of fish.

The trial judge and the Court of Appeal erred in framing the issue and in using a "frozen right" approach. The trial judge, since he asked himself the wrong questions and erred as to the proper evidentiary basis necessary to establish an aboriginal right under s. 35(1), made no finding of fact, or insufficient findings of fact, as regards the Sto:lo's distinctive aboriginal culture relating to the sale, trade and barter of fish for livelihood, support and sustenance purposes. An appellate court, given these palpable and overriding errors affecting the trial judge's assessment of the facts, is accordingly justified in intervening in the trial judge's findings of fact and substituting its own assessment of the evidence presented at trial.

The fishery always provided a focus for life and livelihood for the Sto:lo and they have always traded salmon for the sustenance and support of themselves and their families. These activities formed part of the

suffisamment importantes pour la culture d'un groupe particulier d'autochtones, et ce pendant une période considérable et ininterrompue. Ces fins ne devraient pas être compartimentées de manière stricte, mais plutôt être considérées comme les divers éléments d'une gamme sur laquelle les activités autochtones exercées seulement à des fins alimentaires se trouveraient à une extrémité et celles visant des fins purement commerciales à l'autre extrémité, alors que les activités faites à des fins de subsistance occuperaient le centre.

Il n'est pas nécessaire qu'une activité autochtone soit accomplie à des fins de subsistance pour bénéficier de la protection du par. 35(1). La question de savoir si une activité est suffisamment importante et fondamentale pour l'organisation sociale et la culture pendant une période considérable et ininterrompue doit être tranchée à partir des faits propres à chaque cas et prouvés par le ministère public, compte tenu de la culture autochtone en cause et de la preuve étayant la reconnaissance du droit revendiqué.

Toutefois, les faits de l'espèce ne permettent pas de formuler la question sous l'angle de la pêche commerciale. L'appelante n'a pas plaidé que son peuple possède un droit ancestral de pêcher à des fins commerciales, mais seulement le droit de vendre et d'échanger du poisson à des fins de subsistance. Enfin, la disposition législative visée par la présente contestation constitutionnelle ne concernait pas seulement la pêche commerciale, mais aussi la vente et l'échange du poisson à des fins non commerciales.

Le juge du procès et la Cour d'appel ont commis une erreur en formulant la question en litige et en appliquant la méthode des «droits figés». Le juge du procès s'est posé les mauvaises questions et a fait erreur quant à la preuve requise pour établir l'existence d'un droit ancestral visé au par. 35(1). En conséquence, il n'a pas tiré de conclusion de fait — ou celles qu'il a tirées étaient insuffisantes — au sujet de la culture autochtone distinctive des Sto:lo en ce qui a trait à la vente et à l'échange de poisson à des fins de subsistance. Vu ces erreurs manifestes et dominantes, qui ont faussé l'appréciation des faits par le juge du procès, une cour d'appel est justifiée de modifier les conclusions de fait du juge de première instance et de substituer son appréciation de la preuve présentée au procès à celle du juge de première instance.

La pêche a toujours été un aspect central de la vie et de la subsistance des Sto:lo, qui ont toujours échangé du saumon afin d'assurer leur subsistance et celle de leur famille. Ces activités ont fait partie de la culture autoch-

Sto:lo's distinctive aboriginal culture for a substantial continuous period of time — for centuries before the arrival of Europeans — and continued in modernized forms until the present day. The criteria regarding the characterization and the time requirement of aboriginal rights protected under s. 35(1) of the *Constitution Act, 1982* were met.

Per McLachlin J. (dissenting): A court considering the question of whether a particular practice is the exercise of a s. 35(1) constitutional aboriginal right must adopt an approach which: (1) recognizes the dual purposes of s. 35(1) (to preclude extinguishment and to provide a firm foundation for settlement of aboriginal claims); (2) is liberal and generous toward aboriginal interests; (3) considers the aboriginal claim in the context of the historic way of life of the people asserting it; and (4) above all, is true to the Crown's position as fiduciary for the first peoples. The legal perspectives of both the European and the aboriginal societies must be incorporated and the common law being applied must give full recognition to the pre-existing aboriginal tradition.

The sale at issue should not be labelled as something other than commerce. One person selling something to another is commerce. The critical question is not whether the sale of the fish is commerce or non-commerce, but whether the sale can be defended as the exercise of a more basic aboriginal right to continue the aboriginal people's historic use of the resource.

An aboriginal right must be distinguished from the exercise of an aboriginal right. Rights are generally cast in broad, general terms and remain constant over the centuries. The exercise of rights may take many forms and vary from place to place and from time to time. The principle that aboriginal rights must be ancestral rights is reconciled with this Court's insistence that aboriginal rights not be frozen by the determination of whether the modern practice at issue may be characterized as an exercise of the right. The rights are ancestral: their exercise takes modern forms.

History is important. A recently adopted practice would generally not qualify as being aboriginal. A practice, however, need not be traceable to pre-contact times for it to qualify as a constitutional right. Aboriginal

tone distinctive des Sto:lo pendant une période considérable et ininterrompue — pendant des siècles avant l'arrivée des Européens — et continuent d'être pratiquées de nos jours, quoique sous des formes modernes. Le critère applicable afin de caractériser les droits ancestraux protégés par le par. 35(1) de la *Loi constitutionnelle de 1982*, ainsi que l'exigence de durée pertinente, ont été respectés.

Le juge McLachlin (dissidente): Le tribunal qui est appelé à décider si une pratique donnée est l'exercice d'un droit ancestral protégé par la Constitution en vertu du par. 35(1) doit adopter une méthode (1) qui reconnaît les deux objets du par. 35(1) (savoir empêcher l'extinction des droits ancestraux et constituer une assise solide en vue du règlement des revendications autochtones), (2) qui soit libérale et généreuse envers les intérêts des autochtones, (3) qui considère le droit ancestral revendiqué dans le contexte du mode de vie historique du peuple qui l'invoque; (4) et, par-dessus tout, qui soit respectueuse du rôle de fiduciaire que l'État joue auprès des premiers habitants du pays. Les points de vue juridiques des sociétés européennes et autochtones doivent être intégrés et la common law appliquée doit reconnaître pleinement la tradition autochtone préexistante.

La vente faite en l'espèce ne devrait pas être qualifiée autrement que d'acte de commerce. Quand une personne vend quelque chose à autrui, c'est du commerce. La question cruciale qui se pose n'est pas de savoir si, en l'espèce, la vente du poisson est ou non un acte de commerce, mais bien si elle peut être justifiée en tant qu'exercice d'un droit ancestral plus fondamental, qui serait la poursuite, par les autochtones concernés, de l'utilisation historique de la ressource.

Il est nécessaire de faire une distinction entre un droit ancestral et l'exercice d'un tel droit. Les droits sont généralement énoncés en termes larges et généraux et ne changent pas au fil des siècles. L'exercice des droits peut prendre diverses formes et varier selon les lieux et les époques. C'est en déterminant si la pratique moderne en cause peut être qualifiée d'exercice du droit visé que l'on concilie le principe que les droits des peuples autochtones doivent être des droits ancestraux et l'insistance de notre Cour sur le principe que les droits ancestraux ne sont pas figés. Il s'agit de droits ancestraux: cependant, l'exercice de ces droits prend des formes modernes.

L'histoire est un facteur important. Une pratique d'adoption récente ne saurait généralement être qualifiée d'ancestrale. Toutefois, il n'est pas essentiel qu'une pratique remonte à l'époque qui a précédé le contact avec

rights do not find their source in a magic moment of European contact, but in the traditional laws and customs of the aboriginal people in question, which existed prior to the imposition of European law and which often dated from time immemorial.

Continuity — a link — must be established between the historic practice and the right asserted. The exercise of a right can lapse, however, for a period of time. Aboriginal rights under s. 35(1) are not confined to rights formally recognized by treaty or the courts before 1982.

Neither the “integral part” nor the “dynamic rights” approach provides a satisfactory test for determining whether an aboriginal right exists, even though each captures important facets of aboriginal rights. The “integral-incident” test is too broad, too indeterminate and too categorical.

Aboriginal rights should be defined through an empirical approach. Inferences as to the sort of things which may qualify as aboriginal rights under s. 35(1) should be drawn from history rather than attempting to describe *a priori* what an aboriginal right is.

The common law predicated dealings with aboriginals on two fundamental principles: (1) that the Crown asserted title subject to existing aboriginal interests in their traditional lands and adjacent waters, and (2) that those interests were to be removed only by solemn treaty with due compensation to the people and its descendants. This right to use the land and adjacent waters as the people had traditionally done for their sustenance is a fundamental aboriginal right which is supported by the common law and by the history of this country and which is enshrined in s. 35(1) of the *Constitution Act, 1982*.

The aboriginal right to fish may be defined as the right to continue to obtain from the river or the sea in question that which the particular aboriginal people have traditionally obtained therefrom. If the aboriginal people show that they traditionally sustained themselves from the river or sea, then they have a *prima facie* right to continue to do so, absent a treaty exchanging that right for other consideration. The right is not the right to

les Européens pour être reconnue comme un droit constitutionnel. Les droits ancestraux ont leur origine non pas dans le moment magique du contact avec les Européens, mais dans les lois et coutumes traditionnelles que respectait le peuple en question avant que ne lui soient imposées celles des Européens et qui souvent existaient de temps immémorial.

Il faut établir qu'il y a continuité — un lien — entre la pratique historique et le droit revendiqué. Il peut arriver, cependant, qu'un droit cesse d'être exercé pendant un certain temps. Les droits ancestraux visés au par. 35(1) ne se limitent pas aux droits reconnus formellement par traité ou par les tribunaux avant 1982.

Ni l'approche fondée sur la notion de «partie intégrante», ni celle fondée sur le caractère «dynamique des droits» ne constituent un critère satisfaisant pour déterminer si un droit ancestral existe, même si ces deux approches tiennent compte de certaines facettes importantes des droits ancestraux. Le critère de la «partie intégrante ou accessoire» est trop large, trop indéterminé et trop catégorique.

Il convient de définir les droits ancestraux selon une approche empirique. Plutôt que d'essayer de définir *a priori* ce qu'est un droit ancestral, nous devons étudier l'histoire pour en tirer des inférences sur ce qui peut constituer un droit ancestral visé au par. 35(1).

En common law, les rapports avec les autochtones étaient fondés sur deux principes fondamentaux: (1) Sa Majesté prenait possession du territoire sous réserve des droits existants des autochtones sur les terres qu'ils avaient traditionnellement occupées et sur les eaux y adjacentes; (2) les droits des peuples autochtones d'utiliser les terres et les eaux y adjacentes pour assurer leur subsistance ne devaient leur être enlevés que par traité solennel et moyennant octroi à ceux-ci et à leurs descendants d'une juste indemnité. Ce droit des autochtones d'utiliser les terres et les eaux y adjacentes comme ils l'avaient fait traditionnellement pour assurer leur subsistance est un droit ancestral fondamental qui trouve appui dans la common law et dans l'histoire du pays, et qui est constitutionnalisé au par. 35(1) de la *Loi constitutionnelle de 1982*.

Le droit de pêche ancestral peut être défini comme étant le droit de continuer à tirer du fleuve, de la rivière ou de la mer en question ce que les autochtones concernés en ont traditionnellement tiré. Si les autochtones démontrent qu'ils ont traditionnellement tiré leur subsistance du fleuve, de la rivière ou de la mer, ils ont alors à première vue le droit de continuer à le faire, s'ils n'ont pas, par traité, échangé ce droit contre autre chose. Ce

trade, but the right to continue to use the resource in the traditional way to provide for traditional needs, albeit in their modern form. If the people demonstrate that trade is the only way of using the resource to provide the modern equivalent of what they traditionally took, it follows that the people should be permitted to trade in the resource to the extent necessary to provide the replacement goods and amenities. In this context, trade is but the mode or practice by which the more fundamental right of drawing sustenance from the resource is exercised.

The right to trade the products of the land and adjacent waters for other goods is not unlimited. The right stands as a continuation of the aboriginal people's historical reliance on the resource. There is therefore no justification for extending it beyond what is required to provide the people with reasonable substitutes for what they traditionally obtained from the resource — basic housing, transportation, clothing and amenities — over and above what was required for food and ceremonial purposes. Beyond this, aboriginal fishers have no priority over non-aboriginal commercial or sport fishers.

All aboriginal rights to the land or adjacent waters are subject to limitation on the ground of conservation. Any right, aboriginal or other, also carries with it the obligation to use it responsibly. The Crown must establish a regulatory regime which respects these objectives.

The evidence conclusively established that over many centuries the fishery was used not only for food and ceremonial purposes but also for a variety of other needs. The scale of fishing here fell well within the limit of the traditional fishery.

Extinguishment

Per L'Heureux-Dubé J. (dissenting): The question of the extinguishment of the right found to exist must be remitted to trial since there was insufficient evidence to enable this Court to decide it.

n'est pas le droit de faire du commerce, mais le droit de continuer d'utiliser la ressource de la manière traditionnelle, afin de pourvoir aux besoins traditionnels, quoique sous leur forme moderne. Si les autochtones démontrent que le commerce est la seule manière d'utiliser la ressource de façon à leur permettre de se procurer l'équivalent moderne de ce qu'ils ont traditionnellement tiré de celle-ci, il s'ensuit qu'ils devraient être autorisés à faire le commerce de cette ressource dans la mesure nécessaire pour obtenir des biens et des commodités de remplacement. Dans ce contexte, le commerce n'est rien d'autre que la méthode ou la pratique par laquelle est exercé le droit plus fondamental qui consiste à tirer sa subsistance de la ressource.

Le droit d'échanger les produits du territoire et des eaux y adjacentes contre d'autres biens n'est pas illimité. Ce droit est la poursuite de l'exploitation historique de la ressource par les autochtones visés. Il n'y a donc rien qui justifie d'élargir le droit au-delà de ce qui est nécessaire pour permettre aux autochtones de se procurer des biens de remplacement raisonnables à la place de ceux qu'ils ont traditionnellement obtenus pour la ressource — pour pourvoir aux besoins de base en matière de logement, de transport, d'habillement et de commodités de la vie — en sus de leurs besoins alimentaires et rituels. Au-delà de ces besoins, les pêcheurs autochtones n'ont aucun droit de priorité sur les non-autochtones qui pratiquent la pêche commerciale ou sportive.

Tous les droits ancestraux sur les terres et les eaux y adjacentes sont assujettis aux restrictions imposées pour des fins de conservation. Tout droit — ancestral ou autre — emporte l'obligation de l'utiliser de façon responsable. Il incombe à l'État d'établir un régime de réglementation qui respecte ces objectifs.

La preuve a établi décisivement que, pendant des siècles, les Sto:lo ont pêché non seulement à des fins alimentaires et rituelles, mais aussi pour satisfaire divers autres besoins. L'ampleur des activités de pêche en l'espèce restait bien en deçà des limites de la pêche traditionnelle.

Extinction

Le juge L'Heureux-Dubé (dissidente): La question de l'extinction du droit dont l'existence a été reconnue doit être renvoyée au tribunal de première instance en vue de la tenue d'un nouveau procès, étant donné que la preuve est insuffisante pour permettre à notre Cour de statuer sur celle-ci.

Per McLachlin J. (dissenting): For legislation or regulation to extinguish an aboriginal right, the intention to extinguish must be "clear and plain". No government of the day considered either the aboriginal right or the effect of its proposed action on that right, as required by the "clear and plain" test, in effecting any regulations which allegedly had the effect of extinguishing the aboriginal right to fish commercially.

Prima Facie Infringement

Per L'Heureux-Dubé J. (dissenting): The question of *prima facie* infringement must be remitted to trial since there was insufficient evidence to enable this Court to decide it.

Per McLachlin J. (dissenting): The inquiry into infringement involves two stages: (1) the person charged must show that he or she had a *prima facie* right to his or her actions, and (2) the Crown must then show that the regulatory scheme satisfied the particular aboriginal entitlement to fish for sustenance. The second requirement was not met.

Justification

Per L'Heureux-Dubé J. (dissenting): The question of justification must be remitted to trial since there was insufficient evidence to enable this Court to decide it.

Per McLachlin J. (dissenting): A large view of justification which cuts back the aboriginal right on the ground that this is required for reconciliation and social harmony should not be adopted. It runs counter to the authorities, is indeterminate and ultimately more political than legal. A more limited view of justification, that the Crown may prohibit exploitation of the resource that is incompatible with its continued and responsible use, should be adopted.

A government limitation on an aboriginal right may be justified, provided the limitation is directed to ensuring the conservation and responsible exercise of the right. Limits beyond this cannot be saved on the ground that they are required for societal peace or reconciliation. Limits that have the effect of transferring the

Le juge McLachlin (dissidente): Pour qu'une mesure législative ou réglementaire éteigne un droit ancestral, cette intention doit être «claire et expresse». Aucun gouvernement antérieur n'a, en prenant de règlement qui aurait, affirme-t-on, éteint tout droit ancestral de pêche commerciale, pris en considération, comme l'exige le critère de l'intention «claire et expresse», le droit ancestral ou encore l'effet sur ce droit de la mesure qu'il se proposait de prendre.

Atteinte à première vue

Le juge L'Heureux-Dubé (dissidente): La question de l'atteinte *prima facie* doit être renvoyée au tribunal de première instance en vue de la tenue d'un nouveau procès, étant donné que la preuve est insuffisante pour permettre à notre Cour de statuer sur celle-ci.

Le juge McLachlin (dissidente): L'examen de la question de l'atteinte comporte deux étapes: (1) la personne accusée doit établir qu'elle avait, à première vue, le droit de faire ce qu'elle a fait; (2) il incombe alors au ministère public de prouver que le régime de réglementation respecte le droit particulier des autochtones de pêcher à des fins de subsistance. La deuxième condition n'a pas été remplie.

Justification

Le juge L'Heureux-Dubé (dissidente): La question de la justification doit être renvoyée au tribunal de première instance en vue de la tenue d'un nouveau procès, étant donné que la preuve est insuffisante pour permettre à notre Cour de statuer sur celle-ci.

Le juge McLachlin (dissidente): Il ne convient pas d'adopter une conception large de la justification, qui ampute le droit pour le motif que cela est nécessaire à des fins de réconciliation et d'harmonie sociales. Une telle conception est contraire à la jurisprudence, indéterminée et, en dernière analyse, plus politique que juridique. Il y a lieu d'adopter une conception plus limitée de la justification, savoir qu'il est loisible à l'État d'interdire l'exploitation de la ressource qui est incompatible avec son utilisation continue et responsable.

La restriction par le gouvernement d'un droit ancestral peut être justifiée, pourvu qu'elle vise à assurer la conservation de la ressource et l'exercice responsable du droit. La validité de restrictions qui iraient plus loin ne saurait être sauvegardée pour le motif que celles-ci sont nécessaires pour assurer la réconciliation ou la paix sociales. Des restrictions ayant pour effet de retirer à des autochtones la jouissance de la ressource pour la transférer à d'autres, et ce sans conclure de traité avec les pre-

resource from aboriginal people without treaty or consent cannot be justified.

Subject to the limitations relating to conservation and prevention of harm to others, the aboriginal people have a priority to fish for food, ceremony and supplementary sustenance defined in terms of the basic needs that the fishery provided to the people in ancestral times. Non-aboriginal peoples may use the resource subject to these conditions.

The regulation at issue was not justified.

miers ou obtenir leur consentement, ne sauraient être justifiées.

Sous réserve des limites justifiées par la conservation de la ressource et la prévention des activités nuisibles à autrui, les autochtones ont la priorité pour pêcher à des fins alimentaires et rituelles, ainsi qu'à des fins supplémentaires de subsistance, c'est-à-dire pour satisfaire les besoins fondamentaux que la pêche permettait à leurs ancêtres de combler. Sous réserve de ces conditions, les non-autochtones peuvent exploiter la ressource.

La disposition réglementaire en cause n'était pas justifiée.

THE CHIEF JUSTICE —

I. Introduction

¹ This appeal, along with the companion appeals in *R. v. N.T.C. Smokehouse Ltd.*, [1996] 2 S.C.R. 672, and *R. v. Gladstone*, [1996] 2 S.C.R. 723, raises the issue left unresolved by this Court in its judgment in *R. v. Sparrow*, [1990] 1 S.C.R. 1075: How are the aboriginal rights recognized and affirmed by s. 35(1) of the *Constitution Act, 1982* to be defined?

² In *Sparrow*, Dickson C.J. and La Forest J., writing for a unanimous Court, outlined the framework for analyzing s. 35(1) claims. First, a court must determine whether an applicant has demonstrated that he or she was acting pursuant to an aboriginal right. Second, a court must determine whether that right has been extinguished. Third, a court must determine whether that right has been infringed. Finally, a court must determine whether the infringement is justified. In *Sparrow*, however, it was not seriously disputed that the Musqueam had an aboriginal right to fish for food, with the result that it was unnecessary for the Court to answer the question of how the rights recognized and affirmed by s. 35(1) are to be defined. It is this question and, in particular, the question of whether s. 35(1)

LE JUGE EN CHEF —

I. Introduction

Le présent pourvoi, ainsi que les pourvois connexes *R. c. N.T.C. Smokehouse Ltd.*, [1996] 2 R.C.S. 672 et *R. c. Gladstone*, [1996] 2 R.C.S. 723, soulèvent la question que notre Cour n'a pas tranchée dans l'arrêt *R. c. Sparrow*, [1990] 1 R.C.S. 1075: Comment faut-il s'y prendre pour définir les droits ancestraux reconnus et confirmés par le par. 35(1) de la *Loi constitutionnelle de 1982*?

Dans l'arrêt *Sparrow*, le juge en chef Dickson et le juge La Forest, qui ont rédigé la décision unanime de la Cour, ont donné les grandes lignes du cadre d'analyse des demandes fondées sur le par. 35(1). Premièrement, le tribunal doit déterminer si le demandeur a prouvé qu'il avait agi en vertu d'un droit ancestral. Deuxièmement, il doit décider s'il y a eu extinction de ce droit. Troisièmement, il doit déterminer s'il y a eu atteinte à ce droit. Enfin, le tribunal doit décider si l'atteinte est justifiée. Dans *Sparrow*, toutefois, l'existence du droit ancestral des Musqueams de pêcher à des fins alimentaires n'était pas sérieusement contestée, de sorte que notre Cour n'avait pas à trancher la question de savoir comment il faut s'y prendre pour définir les droits reconnus et confirmés par le par. 35(1). C'est à cette question et, en particulier, à celle de savoir si le par. 35(1) reconnaît et confirme le droit

recognizes and affirms the right of the Sto:lo to sell fish, which must now be answered by this Court.

In order to define the scope of aboriginal rights, it will be necessary first to articulate the purposes which underpin s. 35(1), specifically the reasons underlying its recognition and affirmation of the unique constitutional status of aboriginal peoples in Canada. Until it is understood why aboriginal rights exist, and are constitutionally protected, no definition of those rights is possible. As Dickson J. (as he then was) said in *R. v. Big M Drug Mart Ltd.*, [1985] 1 S.C.R. 295, at p. 344, a constitutional provision must be understood "in the light of the interests it was meant to protect". This principle, articulated in relation to the rights protected by the *Canadian Charter of Rights and Freedoms*, applies equally to the interpretation of s. 35(1).

This judgment will thus, after outlining the context and background of the appeal, articulate a test for identifying aboriginal rights which reflects the purposes underlying s. 35(1), and the interests which that constitutional provision is intended to protect.

II. Statement of Facts

The appellant Dorothy Van der Peet was charged under s. 61(1) of the *Fisheries Act*, R.S.C. 1970, c. F-14, with the offence of selling fish caught under the authority of an Indian food fish licence, contrary to s. 27(5) of the *British Columbia Fishery (General) Regulations*, SOR/84-248. At the time at which the appellant was charged s. 27(5) read:

27. . . .

(5) No person shall sell, barter or offer to sell or barter any fish caught under the authority of an Indian food fish licence.

The charges arose out of the sale by the appellant of 10 salmon on September 11, 1987. The salmon had been caught by Steven and Charles Jimmy under the authority of an Indian food fish

des Sto:lo de vendre du poisson, que notre Cour doit maintenant répondre.

Pour définir la portée des droits ancestraux, il sera d'abord nécessaire d'énoncer les objets qui sous-tendent le par. 35(1), en particulier les raisons pour lesquelles on y reconnaît et confirme le statut constitutionnel unique des peuples autochtones au Canada. En effet, tant que l'on n'a pas saisi pourquoi les droits ancestraux existent et sont protégés par la Constitution, il est impossible de les définir. Comme le juge Dickson (plus tard Juge en chef) l'a dit dans l'arrêt *R. c. Big M Drug Mart Ltd.*, [1985] 1 R.C.S. 295, à la p. 344, les textes constitutionnels doivent être interprétés «en fonction des intérêts qu'ils visent à protéger». Ce principe, énoncé à l'égard des droits protégés par la *Charte canadienne des droits et libertés*, s'applique également à l'interprétation du par. 35(1).

En conséquence, après un bref exposé du contexte du présent pourvoi, le présent jugement fera état, en vue de l'identification des droits ancestraux, d'un critère reflétant les objets visés au par. 35(1) et les intérêts que cette disposition constitutionnelle est censée protéger.

II. Exposé des faits

L'appelante Dorothy Van der Peet a été accusée, en application du par. 61(1) de la *Loi sur les pêcheries*, S.R.C. 1970, ch. F-14, de l'infraction d'avoir vendu du poisson pris en vertu d'un permis de pêche de subsistance des Indiens, contrairement au par. 27(5) du *Règlement de pêche général de la Colombie-Britannique*, DORS/84-248. À la date où l'appelante a été inculpée, le par. 27(5) était ainsi rédigé:

27. . . .

(5) Il est interdit à quiconque de vendre, d'échanger ou d'offrir de vendre ou d'échanger du poisson pris en vertu d'un permis de pêche de subsistance des Indiens.

Les accusations découlaient de la vente par l'appelante de 10 saumons le 11 septembre 1987. Ces poissons avaient été pris par Steven et Charles Jimmy en vertu d'un permis de pêche de subsis-

licence. Charles Jimmy is the common law spouse of the appellant. The appellant, a member of the Sto:lo, has not contested these facts at any time, instead defending the charges against her on the basis that in selling the fish she was exercising an existing aboriginal right to sell fish. The appellant has based her defence on the position that the restrictions imposed by s. 27(5) of the Regulations infringe her existing aboriginal right to sell fish and are therefore invalid on the basis that they violate s. 35(1) of the *Constitution Act, 1982*.

tance des Indiens. Charles Jimmy est le conjoint de fait de l'appelante. Celle-ci, membre des Sto:lo, n'a jamais contesté ces faits, invoquant plutôt pour sa défense qu'en vendant ces poissons elle exerçait un droit ancestral existant de vendre du poisson. L'appelante a fondé sa défense sur la thèse que les restrictions imposées par le par. 27(5) du Règlement portent atteinte à son droit ancestral existant de vendre du poisson et qu'elles sont donc invalides parce qu'elles violent le par. 35(1) de la *Loi constitutionnelle de 1982*.

III. Judgments Below

III. Les décisions des juridictions inférieures

Provincial Court, [1991] 3 C.N.L.R. 155

La Cour provinciale, [1991] 3 C.N.L.R. 155

7 Scarlett Prov. Ct. J. rejected the appellant's argument that she sold fish pursuant to an aboriginal right. On the basis of the evidence from members of the appellant's band, and anthropological experts, he found that, historically, the Sto:lo people clearly fished for food and ceremonial purposes, but that any trade in salmon that occurred was incidental and occasional only. He found, at p. 160, that there was no trade of salmon "in any regularized or market sense" but only "opportunistic exchanges taking place on a casual basis". He found that the Sto:lo could not preserve or store fish for extended periods of time and that the Sto:lo were a band rather than a tribal culture; he held both of these facts to be significant in suggesting that the Sto:lo did not engage in a market system of exchange. On the basis of these findings regarding the nature of the Sto:lo trade in salmon, Scarlett Prov. Ct. J. held that the Sto:lo's aboriginal right to fish for food and ceremonial purposes does not include the right to sell such fish. He therefore found the accused guilty of violating s. 61(1) of the *Fisheries Act*.

Le juge Scarlett de la Cour provinciale a rejeté l'argument de l'appelante voulant qu'elle ait vendu du poisson en vertu d'un droit ancestral. S'appuyant sur les témoignages de membres de la bande et d'anthropologues, il a conclu que, historiquement, les Sto:lo avaient clairement pratiqué la pêche à des fins alimentaires et rituelles, mais que les échanges de saumons qui se produisaient avaient un caractère uniquement accessoire et occasionnel. Il a statué, à la p. 160, qu'il n'y avait pas de commerce du saumon [TRADUCTION] «au sens d'un commerce organisé ou d'un marché», mais seulement des «échanges découlant d'occasions fortuites». Il a conclu que les Sto:lo n'étaient pas en mesure de conserver ou d'emmagasiner le poisson durant de longues périodes, et que leur culture était celle d'une bande plutôt que d'une tribu. Il a estimé que ces deux faits étaient importants en ce qu'ils tendaient à indiquer que les Sto:lo ne faisaient pas d'échanges dans le cadre d'un système de marché. Sur la foi de ces conclusions concernant la nature des échanges de saumon faits par les Sto:lo, le juge Scarlett a statué que le droit ancestral de ceux-ci de pêcher à des fins alimentaires et rituelles n'inclut pas le droit de vendre le poisson ainsi pris. Il a donc déclaré l'accusée coupable d'avoir contrevenu au par. 61(1) de la *Loi sur les pêcheries*.

Supreme Court of British Columbia (1991), 58 B.C.L.R. (2d) 392

Selbie J. of the Supreme Court of British Columbia held that Scarlett Prov. Ct. J. erred when he looked at the evidence in terms of whether or not it demonstrated that the Sto:lo participated in a market system of exchange. The evidence should not have been considered in light of “contemporary tests for ‘marketing’” (at para. 15) but should rather have been viewed so as to determine whether it “is more consistent with the aboriginal right to fish including the right to sell, barter or exchange than otherwise” (at para. 16). He held, at para. 16, that the evidence in this case was consistent with an aboriginal right to sell fish because it suggested that aboriginal societies had no stricture or prohibition against the sale of fish, with the result that “when the first Indian caught the first salmon he had the ‘right’ to do anything he wanted with it — eat it, trade it for deer meat, throw it back or keep it against a hungrier time”. Selbie J. therefore held that the Sto:lo had an aboriginal right to sell fish and that the trial judge’s verdict against the appellant was inconsistent with the evidence. He remanded for a new trial on the questions of whether this right had been extinguished, whether the regulations infringed the right and whether any infringement of the right had been justified.

The Court of Appeal (1993), 80 B.C.L.R. (2d) 75

The British Columbia Court of Appeal allowed the Crown’s appeal and restored the guilty verdict of Scarlett Prov. Ct. J. Macfarlane J.A. (Taggart J.A. concurring) held, at para. 20, that a practice will be protected as an aboriginal right under s. 35(1) of the *Constitution Act, 1982* where the evidence establishes that it had “been exercised, at the time sovereignty was asserted, for a sufficient length of time to become integral to the aboriginal society”. To be protected as an aboriginal right, however, the practice cannot have become “preva-

La Cour suprême de la Colombie-Britannique (1991), 58 B.C.L.R. (2d) 392

Le juge Selbie de la Cour suprême de la Colombie-Britannique a statué que le juge Scarlett de la Cour provinciale avait commis une erreur en se demandant si la preuve établissait que les Sto:lo avaient fait des échanges dans le cadre d’un système de marché. La preuve n’aurait pas dû être examinée à la lumière des [TRADUCTION] «critères contemporains de «commercialisation»» (par. 15), mais plutôt en vue de déterminer si «elle [était] davantage compatible avec l’existence d’un droit de pêche ancestral incluant le droit de vendre ou d’échanger le produit de la pêche, que le contraire» (par. 16). Le juge a conclu, au par. 16, que, en l’espèce, la preuve était compatible avec l’existence d’un droit ancestral de vendre du poisson parce qu’elle tendait à indiquer que les sociétés autochtones ne faisaient l’objet d’aucune restriction ou interdiction en ce qui concerne la vente du poisson, de sorte que [TRADUCTION] «quand le premier Indien a pris le premier saumon il avait le «droit» d’en faire ce qu’il voulait — le manger, l’échanger contre de la viande de chevreuil, le remettre à l’eau ou le garder pour les temps plus difficiles». En conséquence, le juge Selbie a statué que les Sto:lo possédaient un droit ancestral de vendre du poisson et que la décision rendue par le juge du procès contre l’appelante était incompatible avec la preuve. Il a ordonné la tenue d’un nouveau procès sur les questions de savoir si ce droit avait été éteint, si le règlement portait atteinte à ce droit et, si oui, si la violation était justifiée.

La Cour d’appel (1993), 80 B.C.L.R. (2d) 75

La Cour d’appel de la Colombie-Britannique a accueilli à l’appel du ministère public et rétabli la déclaration de culpabilité prononcée par le juge Scarlett de la Cour provinciale. Le juge Macfarlane (avec l’appui du juge Taggart), a conclu, au par. 20, qu’une pratique est protégée par le par. 35(1) de la *Loi constitutionnelle de 1982* en tant que droit ancestral si la preuve établit qu’elle a [TRADUCTION] «été exercée, au moment de l’affirmation de la souveraineté, pendant une période suffisamment longue pour devenir partie intégrante

lent merely as a result of European influences" (para. 21) but must rather arise from the aboriginal society itself. On the basis of this test Macfarlane J.A. held that the Sto:lo did not have an aboriginal right to sell fish. The question was not, he held at para. 30, whether the Sto:lo could support a right to dispose of surplus food fish on a casual basis but was rather whether they had a right to "sell fish allocated for food purposes on a commercial basis" which should be given constitutional priority in the allocation of the fishery resource. Given that this was the question, Macfarlane J.A. held that the assessment of the evidence by the trial judge was correct. The evidence, while indicating that surplus fish would have been disposed of or traded, did not establish that the "purpose of fishing was to engage in commerce" (para. 41). While the Sto:lo did trade salmon with the Hudson's Bay Company prior to the British assertion of sovereignty in a manner that could be characterized as commercial, this trade was "not of the same nature and quality as the aboriginal traditions disclosed by the evidence" (para. 41) and did not, therefore, qualify for protection as an aboriginal right under s. 35(1).

de la société autochtone». Cependant, pour être protégée en tant que droit ancestral, la pratique ne doit pas s'être [TRADUCTION] «répandue du seul fait des influences européennes» (au par. 21), mais bien émaner de la société autochtone elle-même. Sur le fondement de ce critère, le juge Macfarlane a statué, au par. 30, que les Sto:lo n'avaient pas de droit ancestral de vendre du poisson. Il a conclu que la question n'était pas de savoir si les Sto:lo étaient en mesure d'établir l'existence du droit d'aliéner du poisson excédentaire à l'occasion, mais bien de savoir s'ils avaient le droit de [TRADUCTION] «vendre commercialement du poisson attribué à des fins alimentaires», droit qui doit bénéficier de la priorité garantie par la Constitution en ce qui concerne la répartition de cette ressource. Puisque c'était là la question à trancher, le juge Macfarlane a statué que le juge du procès avait bien apprécié la preuve qui — même si elle indiquait qu'on aliénait le poisson excédentaire, notamment par voie d'échanges — n'établissait pas que [TRADUCTION] «le but de la pêche était de faire le commerce du poisson» (par. 41). Bien que, avant l'affirmation de la souveraineté par les Britanniques, les Sto:lo échangeaient effectivement du saumon à la Compagnie de la Baie d'Hudson contre d'autres biens, d'une manière qui pourrait être qualifiée de commerciale, ces échanges ne participaient «pas de la même nature et de la même qualité que les traditions autochtones dont l'existence avait été établie par la preuve» (par. 41), et ils ne bénéficiaient donc pas de la protection du par. 35(1) en tant que droit ancestral.

10 In his concurring judgment Wallace J.A. articulated a test for aboriginal rights similar to that of Macfarlane J.A. in so far as he too held, at para. 78, that the practices protected as aboriginal rights by s. 35(1) are those "traditional and integral to the native society pre-sovereignty". Wallace J.A. emphasized that s. 35(1) should not be interpreted as having the purpose of enlarging the pre-1982 concept of aboriginal rights; instead it should be seen as having the purpose of protecting from legislative encroachment those aboriginal rights that existed in 1982. Section 35(1) was not enacted so as to facilitate the current objectives of the aboriginal community but was rather enacted so as to pro-

Dans son jugement concordant, le juge Wallace a énoncé, à l'égard des droits ancestraux, un critère analogue à celui du juge Macfarlane, dans la mesure où il a lui aussi statué, au par. 78, que sont protégées par le par. 35(1) en tant que droits ancestraux les pratiques [TRADUCTION] «traditionnelles qui faisaient partie intégrante de la société autochtone avant l'affirmation de la souveraineté». Le juge Wallace a souligné qu'il ne faut pas considérer que le par. 35(1) a pour but d'élargir la notion de droits ancestraux telle qu'elle existait avant 1982, mais plutôt qu'il vise à protéger contre les atteintes législatives les droits ancestraux qui existaient en 1982. Le paragraphe 35(1) n'a pas été

tect "traditional aboriginal practices integral to the culture and traditional way of life of the native community" (para. 78). Wallace J.A. held, at para. 104, that rights should not be "determined by reference to the economic objectives of the rights-holders". He concluded from this analytical framework that the trial judge was correct in determining that the commercial sale of fish is different in nature and kind from the aboriginal right of the Sto:lo to fish for sustenance and ceremonial purposes, with the result that the appellant could not be said to have been exercising an aboriginal right when she sold the fish.

Lambert J.A. dissented. While he agreed that aboriginal rights are those aboriginal customs, traditions and practices which are an integral part of a distinctive aboriginal culture, he added to that proposition the proviso that to determine whether a practice is in fact integral it is necessary first to describe it correctly. In his view, the appropriate description of a right or practice is one based on the significance of the practice to the particular aboriginal culture. As such, in determining the extent to which aboriginal fishing is a protected right under s. 35(1) a court should look not to the purpose for which aboriginal people fished, but should rather look at the significance of fishing to the aboriginal society; it is the social significance of fishing which is integral to the distinctive aboriginal society and which is, therefore, protected by s. 35(1) of the *Constitution Act, 1982*. Lambert J.A. found support for this proposition in this Court's judgment in *Sparrow, supra*, in the American case law arising out of disputes over the terms of treaties signed with aboriginal people in the Pacific northwest (see, e.g., *Washington v. Washington State Commercial Passenger Fishing Vessel Association*, 443 U.S. 658 (1979)), and in the general principle that the definition of aboriginal rights must take into account the perspective of aboriginal people. Lambert J.A. held that the social significance of fishing for the Sto:lo was that fishing was the means by which they provided themselves with a moderate livelihood; he therefore

édicte pour faciliter la réalisation des objectifs actuels de la collectivité autochtone, mais bien pour protéger [TRADUCTION] «les pratiques autochtones traditionnelles qui font partie intégrante du mode de vie traditionnel et de la culture de la collectivité autochtone» (par. 78). Le juge Wallace a statué, au par. 104, que les droits ne doivent pas être [TRADUCTION] «déterminés eu égard aux objectifs économiques de leurs titulaires». À partir de ce cadre d'analyse, il a conclu que le juge du procès avait à juste titre statué que la vente de poisson à des fins commerciales diffère de par sa nature du droit ancestral des Sto:lo de pêcher à des fins alimentaires et rituelles, de sorte qu'il était impossible d'affirmer que l'appelante exerçait un droit ancestral lorsqu'elle a vendu le poisson.

Le juge Lambert a exprimé sa dissidence. Tout en convenant que les droits ancestraux sont les coutumes, pratiques et traditions autochtones qui font partie intégrante d'une culture autochtone distinctive, il a ajouté la réserve que, pour décider si une pratique fait effectivement partie intégrante de cette culture, il faut d'abord la décrire correctement. Selon lui, pour bien décrire un droit ou une pratique il faut se fonder sur son importance pour la culture autochtone concernée. À cette fin, pour déterminer dans quelle mesure la pêche autochtone constitue un droit protégé par le par. 35(1), le tribunal doit tenir compte non pas du but dans lequel les autochtones pêchaient, mais plutôt de l'importance de la pêche pour la société autochtone. Ce n'est pas la pêche mais son importance sociale qui fait partie intégrante de la société autochtone distinctive et qui, de ce fait, est protégée par le par. 35(1) de la *Loi constitutionnelle de 1982*. À l'appui de cette proposition, le juge Lambert a invoqué l'arrêt *Sparrow* de notre Cour, précité, ainsi qu'un arrêt américain touchant un différend concernant les conditions de traités signés avec les autochtones du nord-ouest de la côte du Pacifique (voir, p. ex., *Washington c. Washington State Commercial Passenger Fishing Vessel Association*, 443 U.S. 658 (1979)), et le principe général que, dans la définition des droits ancestraux, il faut tenir compte du point de vue des autochtones. Le juge Lambert a conclu que l'importance de la pêche sur le plan social pour les Sto:lo était le fait que cette

held at para. 150 that the Sto:lo had an aboriginal right protected by s. 35(1)

to catch and, if they wish, sell, themselves and through other members of the Sto:lo people, sufficient salmon to provide all the people who wish to be personally engaged in the fishery, and their dependent families, when coupled with their other financial resources, with a moderate livelihood. . . . [Emphasis in original.]

Lambert J.A. rejected the position of the majority that the commercial dimension of the fishery was introduced by Europeans and therefore outside of the protection of s. 35(1). The key point, he suggested, is not that the Europeans introduced commerce, but is rather that as soon as the Europeans arrived the Sto:lo began trading with them. In doing so the Sto:lo were not breaking with their past; the trade with the Hudson's Bay Company "represented only a response to a new circumstance in the carrying out of the existing practice" (para. 180). Lambert J.A. went on to hold that the Sto:lo right to fish for a moderate livelihood had not been extinguished and that it had been infringed by s. 27(5) of the Regulations in a manner not justified by the Crown. He would thus have dismissed the appeal of the Crown and entered a verdict of acquittal.

activité était le moyen qui leur permettait de s'assurer une subsistance convenable. Il a par conséquent statué, au par. 150, que les Sto:lo possédaient le droit ancestral, protégé par le par. 35(1):

[TRADUCTION] *de prendre et, s'ils le désirent, de vendre eux-mêmes et par l'entremise d'autres Sto:lo, suffisamment de saumon pour assurer à tous ceux qui souhaitent pêcher — ainsi qu'aux personnes à leur charge — compte tenu de leurs autres ressources financières, une subsistance convenable. . . .* [En italique dans l'original.]

Le juge Lambert a rejeté la position de la majorité que la dimension commerciale de la pêche a été introduite par les Européens et qu'elle ne bénéficie donc pas de la protection du par. 35(1). Le point essentiel, a-t-il affirmé, n'est pas que les Européens aient introduit le commerce, mais bien que, dès l'arrivée de ceux-ci, les Sto:lo ont commencé à faire du commerce avec eux. Ce faisant, ils ne rompaient pas avec leur passé. Le commerce avec la Compagnie de la Baie d'Hudson [TRADUCTION] «n'était qu'une réaction à une nouvelle circonstance dans l'exercice de la pratique existante» (par. 180). Le juge Lambert a ajouté que le droit des Sto:lo de pêcher pour s'assurer une subsistance convenable n'avait pas été éteint, et qu'il avait été violé par le par. 27(5) du Règlement, d'une manière qui n'a pas été justifiée par le ministère public. Il aurait donc rejeté l'appel de ce dernier et inscrit un acquittement.

12

Hutcheon J.A. also dissented. He did so on the basis that there is no authority for the proposition that the relevant point for identifying aboriginal rights is prior to contact with Europeans and European culture. Hutcheon J.A. held that the relevant historical time is instead 1846, the time of the assertion of British sovereignty in British Columbia. Since it is undisputed that by 1846 the Sto:lo were trading commercially in salmon, the Sto:lo can claim an aboriginal right to sell fish protected by s. 35(1) of the *Constitution Act, 1982*. Hutcheon J.A. held further that this right had not been extinguished prior to 1982. In the result, he would have remanded for a new trial on the issues of infringement and justification.

Le juge Hutcheon a lui aussi exprimé sa dissidence. Il l'a fait sur le fondement que rien n'appuie la thèse que le moment pertinent pour l'identification des droits ancestraux est la période antérieure aux contacts avec les Européens et leur culture. Il a jugé que le moment historique pertinent est plutôt 1846, date de l'affirmation de la souveraineté britannique sur la Colombie-Britannique. Comme il n'est pas contesté qu'en 1846 les Sto:lo faisaient le commerce du saumon, ils peuvent revendiquer un droit ancestral de vendre du poisson protégé par le par. 35(1) de la *Loi constitutionnelle de 1982*. Le juge Hutcheon a en outre conclu que ce droit n'avait pas été éteint avant 1982. En conséquence, il aurait ordonné la tenue d'un nouveau procès sur les questions de l'atteinte à ce droit et de la justification.

IV. Grounds of Appeal

Leave to appeal to this Court was granted on March 10, 1994. The following constitutional question was stated:

Is s. 27(5) of the *British Columbia Fishery (General) Regulations*, SOR/84-248, as it read on September 11, 1987, of no force or effect with respect to the appellant in the circumstances of these proceedings, in virtue of s. 52 of the *Constitution Act, 1982*, by reason of the aboriginal rights within the meaning of s. 35 of the *Constitution Act, 1982*, invoked by the appellant?

The appellant appealed on the basis that the Court of Appeal erred in defining the aboriginal rights protected by s. 35(1) as those practices integral to the distinctive cultures of aboriginal peoples. The appellant argued that the Court of Appeal erred in holding that aboriginal rights are recognized for the purpose of protecting the traditional way of life of aboriginal people. The appellant also argued that the Court of Appeal erred in requiring that the Sto:lo satisfy a long-time use test, in requiring that they demonstrate an absence of European influence and in failing to adopt the perspective of aboriginal peoples themselves.

The First Nations Summit intervened in support of the appellant as did Delgamuukw et al. and Pamajewon et al. The Fisheries Council of British Columbia, the Attorney General of Quebec, the British Columbia Fisheries Survival Coalition and the British Columbia Wildlife Federation intervened in support of the respondent Crown.

V. Analysis

Introduction

I now turn to the question which, as I have already suggested, lies at the heart of this appeal: How should the aboriginal rights recognized and affirmed by s. 35(1) of the *Constitution Act, 1982* be defined?

In her factum the appellant argued that the majority of the Court of Appeal erred because it defined the rights in s. 35(1) in a fashion which

IV. Moyens d'appel

L'autorisation de pourvoi devant notre Cour a été accordée le 10 mars 1994. La question constitutionnelle suivante a été formulée:

Le paragraphe 27(5) du *Règlement de pêche général de la Colombie-Britannique*, DORS/84-248, tel qu'il se lisait le 11 septembre 1987, est-il, dans les circonstances de la présente affaire, inopérant à l'égard de l'appelante en vertu de l'art. 52 de la *Loi constitutionnelle de 1982*, en raison des droits ancestraux au sens de l'art. 35 de la *Loi constitutionnelle de 1982*, qu'elle invoque?

L'appelante a interjeté appel pour le motif que la Cour d'appel aurait fait erreur en définissant les droits ancestraux protégés par le par. 35(1) comme étant les pratiques qui font partie intégrante des cultures distinctives des peuples autochtones. Elle a prétendu que la Cour d'appel a commis une erreur en statuant que les droits ancestraux sont reconnus dans le but de protéger le mode de vie traditionnel des autochtones. Elle a de plus affirmé que la Cour d'appel avait fait erreur en exigeant que les Sto:lo satisfassent à un critère exigeant la preuve d'une longue période d'utilisation, en exigeant qu'ils démontrent l'absence d'influence européenne et en ne retenant pas le point de vue des autochtones eux-mêmes.

Le First Nations Summit, Delgamuukw et autres ainsi que Pamajewon et autres sont intervenus pour appuyer l'appelante. Le Fisheries Council of British Columbia, le procureur général du Québec, la British Columbia Fisheries Survival Coalition et la British Columbia Wildlife Federation sont intervenus au soutien de l'intimée Sa Majesté la Reine.

V. Analyse

Introduction

J'aborde maintenant la question qui, comme je l'ai déjà indiqué, est au cœur du présent pourvoi: Comment faut-il s'y prendre pour définir les droits ancestraux reconnus et confirmés par le par. 35(1) de la *Loi constitutionnelle de 1982*?

Dans son mémoire, l'appelante a prétendu que la Cour d'appel à la majorité avait commis une erreur en définissant les droits visés au par. 35(1) d'une

13

1996 CanLII 216 (SCC)

14

15

16

“converted a Right into a Relic”; such an approach, the appellant argued, is inconsistent with the fact that the aboriginal rights recognized and affirmed by s. 35(1) are rights and not simply aboriginal practices. The appellant acknowledged that aboriginal rights are based in aboriginal societies and cultures, but argued that the majority of the Court of Appeal erred because it defined aboriginal rights through the identification of pre-contact activities instead of as pre-existing legal rights.

manière qui [TRADUCTION] «a transformé un droit en une relique». Une telle façon de voir, d'affirmer l'appelante, est inconciliable avec le fait que les droits ancestraux reconnus et confirmés par le par. 35(1) sont des droits et non simplement des pratiques autochtones. L'appelante a reconnu que les droits ancestraux tirent leur origine des sociétés et cultures autochtones, mais elle a soutenu que la Cour d'appel à la majorité a commis une erreur parce qu'elle a défini les droits ancestraux en s'attachant à identifier des activités antérieures au contact avec les Européens plutôt que des droits légaux préexistants.

17 While the appellant is correct to suggest that the mere existence of an activity in a particular aboriginal community prior to contact with Europeans is not, in itself, sufficient foundation for the definition of aboriginal rights, the position she would have this Court adopt takes s. 35(1) too far from that which the provision is intended to protect. Section 35(1), it is true, recognizes and affirms existing aboriginal rights, but it must not be forgotten that the rights it recognizes and affirms are aboriginal.

Même si l'appelante a raison de dire que la simple existence d'une activité dans une collectivité autochtone donnée avant le contact avec les Européens n'est pas, en soi, un fondement suffisant pour définir des droits ancestraux, la thèse qu'elle voudrait que notre Cour adopte éloigne trop la protection du par. 35(1) de ce qu'elle est censée protéger. Il est vrai que le par. 35(1) reconnaît et confirme les droits ancestraux existants, mais il ne faut pas oublier que les droits qu'il reconnaît et confirme sont des droits autochtones.

18 In the liberal enlightenment view, reflected in the American Bill of Rights and, more indirectly, in the *Charter*, rights are held by all people in society because each person is entitled to dignity and respect. Rights are general and universal; they are the way in which the “inherent dignity” of each individual in society is respected: *R. v. Oakes*, [1986] 1 S.C.R. 103, at p. 136; *R. v. Big M Drug Mart Ltd.*, *supra*, at p. 336.

Selon la philosophie libérale du Siècle des Lumières, qui a inspiré le Bill of Rights des États-Unis et, plus indirectement, la *Charte*, les droits appartiennent à tous les membres de la société, étant donné que chacun a droit à la dignité et au respect. Les droits sont généraux et universels; ils constituent la manière dont la «dignité inhérente» à chaque individu dans la société est respectée: *R. c. Oakes*, [1986] 1 R.C.S. 103, à la p. 136; *R. c. Big M Drug Mart Ltd.*, précité, à la p. 336.

19 Aboriginal rights cannot, however, be defined on the basis of the philosophical precepts of the liberal enlightenment. Although equal in importance and significance to the rights enshrined in the *Charter*, aboriginal rights must be viewed differently from *Charter* rights because they are rights held only by aboriginal members of Canadian society. They arise from the fact that aboriginal people are aboriginal. As academic commentators have noted, aboriginal rights “inhere in the very meaning of aboriginality”, Michael Asch and Patrick Macklem, “Aboriginal Rights and Cana-

Toutefois, les droits ancestraux ne peuvent être définis par l'application des préceptes de cette philosophie. Même s'ils ont une portée et une importance égales aux droits inscrits dans la *Charte*, les droits ancestraux doivent être considérés différemment des droits garantis par la *Charte*, parce qu'ils sont détenus seulement par les autochtones au sein de la société canadienne. Les droits ancestraux tirent leur origine du fait que les peuples autochtones sont des autochtones. Comme l'ont souligné des commentateurs universitaires, les droits ancestraux [TRADUCTION] «participent de l'essence

dian Sovereignty: An Essay on *R. v. Sparrow*" (1991), 29 *Alta. L. Rev.* 498, at p. 502; they are the rights held by "Indians *qua* Indians", Brian Slaterry, "Understanding Aboriginal Rights" (1987), 66 *Can. Bar Rev.* 727, at p. 776.

The task of this Court is to define aboriginal rights in a manner which recognizes that aboriginal rights are rights but which does so without losing sight of the fact that they are rights held by aboriginal people because they are aboriginal. The Court must neither lose sight of the generalized constitutional status of what s. 35(1) protects, nor can it ignore the necessary specificity which comes from granting special constitutional protection to one part of Canadian society. The Court must define the scope of s. 35(1) in a way which captures both the aboriginal and the rights in aboriginal rights.

The way to accomplish this task is, as was noted at the outset, through a purposive approach to s. 35(1). It is through identifying the interests that s. 35(1) was intended to protect that the dual nature of aboriginal rights will be comprehended. In *Hunter v. Southam Inc.*, [1984] 2 S.C.R. 145, Dickson J. explained the rationale for a purposive approach to constitutional documents. Courts should take a purposive approach to the Constitution because constitutions are, by their very nature, documents aimed at a country's future as well as its present; the Constitution must be interpreted in a manner which renders it "capable of growth and development over time to meet new social, political and historical realities often unimagined by its framers": *Hunter, supra*, at p. 155. A purposive approach to s. 35(1), because ensuring that the provision is not viewed as static and only relevant to current circumstances, will ensure that the recognition and affirmation it offers are consistent with the fact that what it is recognizing and affirming are "rights". Further, because it requires the court to analyze a given constitutional provision "in the light of the interests it was meant to protect"

même de l'«autochtonité», Michael Asch et Patrick Macklem, «Aboriginal Rights and Canadian Sovereignty: An Essay on *R. v. Sparrow*» (1991), 29 *Alta. L. Rev.* 498, à la p. 502; il s'agit de droits détenus par [TRADUCTION] «les Indiens en tant qu'Indiens», Brian Slaterry, «Understanding Aboriginal Rights» (1987), 66 *R. du B. can.* 727, à la p. 776.

Notre Cour a pour tâche de définir les droits ancestraux d'une manière qui reconnaisse qu'il s'agit bien de droits, mais de droits détenus par les autochtones parce qu'ils sont des autochtones. Notre Cour ne doit pas perdre de vue le statut constitutionnel généralisé des droits protégés par le par. 35(1), mais elle ne peut pas non plus faire abstraction de la nécessaire spécificité qui résulte de la protection constitutionnelle spéciale accordée à un segment de la société canadienne. Notre Cour doit définir la portée du par. 35(1) d'une manière qui permette de cerner à la fois l'aspect «ancestral» et l'aspect «droit» dans l'expression «droits ancestraux».

Comme il a été indiqué au début, la façon d'accomplir cette tâche est d'appliquer au par. 35(1) une analyse fondée sur l'objet. C'est par la détermination des intérêts que le par. 35(1) vise à protéger qu'il est possible d'appréhender la dualité des droits ancestraux. Dans l'arrêt *Hunter c. Southam Inc.*, [1984] 2 R.C.S. 145, le juge Dickson a expliqué la raison d'être de l'analyse fondée sur l'objet des textes constitutionnels. Ainsi, les tribunaux doivent donner à la Constitution une interprétation fondée sur l'objet parce que les constitutions sont, de par leur nature même, des documents conçus autant en fonction de l'avenir que du présent. La Constitution doit être interprétée de telle sorte qu'elle soit «susceptible d'évoluer avec le temps de manière à répondre à de nouvelles réalités sociales, politiques et historiques que souvent ses auteurs n'ont pas envisagées», *Hunter*, précité, à la p. 155. Parce qu'une telle approche assure que la disposition n'est pas considérée comme statique, et pertinente seulement par rapport aux circonstances présentes, l'application au par. 35(1) d'une analyse fondée sur l'objet garantit que la reconnaissance et la confirmation prévues par celui-ci sont compa-

(*Big M Drug Mart Ltd.*, *supra*, at p. 344), a purposive approach to s. 35(1) will ensure that that which is found to fall within the provision is related to the provision's intended focus: aboriginal people and their rights in relation to Canadian society as a whole.

22

In *Sparrow*, *supra*, Dickson C.J. and La Forest J. held at p. 1106 that it was through a purposive analysis that s. 35(1) must be understood:

The approach to be taken with respect to interpreting the meaning of s. 35(1) is derived from general principles of constitutional interpretation, principles relating to aboriginal rights, and the purposes behind the constitutional provision itself. [Emphasis added.]

In that case, however, the Court did not have the opportunity to articulate the purposes behind s. 35(1) as they relate to the scope of the rights the provision is intended to protect. Such analysis is now required to be undertaken.

General Principles Applicable to Legal Disputes Between Aboriginal Peoples and the Crown

23

Before turning to a purposive analysis of s. 35(1), however, it should be noted that such analysis must take place in light of the general principles which apply to the legal relationship between the Crown and aboriginal peoples. In *Sparrow*, *supra*, this Court held at p. 1106 that s. 35(1) should be given a generous and liberal interpretation in favour of aboriginal peoples:

When the purposes of the affirmation of aboriginal rights are considered, it is clear that a generous, liberal interpretation of the words in the constitutional provision is demanded. [Emphasis added.]

24

This interpretive principle, articulated first in the context of treaty rights — *Simon v. The Queen*, [1985] 2 S.C.R. 387, at p. 402; *Nowegijick v. The Queen*, [1983] 1 S.C.R. 29, at p. 36; *R. v. Horseman*, [1990] 1 S.C.R. 901, at p. 907; *R. v. Sioui*, [1990] 1 S.C.R. 1025, at p. 1066 — arises from the

tibles avec le fait que ce qui est reconnu et confirmé ce sont des «droits». De plus, parce qu'elle oblige le tribunal à analyser des textes constitutionnels donnés «en fonction des intérêts qu'ils visent à protéger» (*Big M Drug Mart Ltd.*, précité, à la p. 344), cette analyse du par. 35(1) fait en sorte que ce qui est jugé comme relevant de cette disposition se rapporte à son objet: les peuples autochtones et leurs droits par rapport à la société canadienne dans son ensemble.

Dans *Sparrow*, précité, le juge en chef Dickson et le juge La Forest ont statué, à la p. 1106, qu'il faut interpréter le par. 35(1) en fonction de l'objet qu'il vise:

La méthode qu'il convient d'adopter pour interpréter le par. 35(1) est dérivée des principes généraux d'interprétation constitutionnelle, des principes relatifs aux droits ancestraux et des objets sous-jacents à la disposition constitutionnelle elle-même. [Je souligne.]

Toutefois, dans cette affaire-là, notre Cour n'a pas eu l'occasion de dégager les objets sous-jacents au par. 35(1) eu égard à la portée des droits qu'il vise à protéger. Il faut faire cette analyse dans le présent cas.

Principes généraux applicables aux litiges entre les peuples autochtones et l'État

Toutefois, avant d'analyser le par. 35(1) en fonction de son objet, il convient de signaler qu'une telle analyse doit être faite à la lumière des principes généraux applicables aux rapports juridiques entre l'État et les peuples autochtones. Dans l'arrêt *Sparrow*, précité, notre Cour a statué, à la p. 1106, que le par. 35(1) doit recevoir une interprétation généreuse et libérale en faveur des autochtones:

Si on considère les objectifs de la confirmation des droits ancestraux, il est évident qu'une interprétation généreuse et libérale du texte de cette disposition constitutionnelle s'impose. [Je souligne.]

Ce principe d'interprétation, qui a d'abord été énoncé dans le contexte des droits issus de traités — *Simon c. La Reine*, [1985] 2 R.C.S. 387, à la p. 402; *Nowegijick c. La Reine*, [1983] 1 R.C.S. 29, à la p. 36; *R. c. Horseman*, [1990] 1 R.C.S. 901, à la p. 907; *R. c. Sioui*, [1990] 1 R.C.S. 1025, à la

nature of the relationship between the Crown and aboriginal peoples. The Crown has a fiduciary obligation to aboriginal peoples with the result that in dealings between the government and aboriginals the honour of the Crown is at stake. Because of this fiduciary relationship, and its implication of the honour of the Crown, treaties, s. 35(1), and other statutory and constitutional provisions protecting the interests of aboriginal peoples, must be given a generous and liberal interpretation: *R. v. George*, [1966] S.C.R. 267, at p. 279. This general principle must inform the Court's analysis of the purposes underlying s. 35(1), and of that provision's definition and scope.

The fiduciary relationship of the Crown and aboriginal peoples also means that where there is any doubt or ambiguity with regards to what falls within the scope and definition of s. 35(1), such doubt or ambiguity must be resolved in favour of aboriginal peoples. In *R. v. Sutherland*, [1980] 2 S.C.R. 451, at p. 464, Dickson J. held that paragraph 13 of the Memorandum of Agreement between Manitoba and Canada, a constitutional document, "should be interpreted so as to resolve any doubts in favour of the Indians, the beneficiaries of the rights assured by the paragraph". This interpretive principle applies equally to s. 35(1) of the *Constitution Act, 1982* and should, again, inform the Court's purposive analysis of that provision.

Purposive Analysis of Section 35(1)

I now turn to a purposive analysis of s. 35(1).

When the court identifies a constitutional provision's purposes, or the interests the provision is intended to protect, what it is doing in essence is explaining the rationale of the provision; it is articulating the reasons underlying the protection that the provision gives. With regards to s. 35(1), then, what the court must do is explain the rationale and foundation of the recognition and affirmation of the special rights of aboriginal peoples; it must identify the basis for the special status that aboriginal peoples have within Canadian society as a whole.

p. 1066 — découle de la nature des rapports entre l'État et les peuples autochtones. L'État a, envers les peuples autochtones, une obligation de fiduciaire qui a pour conséquence de mettre son honneur en jeu lorsqu'il traite avec eux. En raison de cette obligation de fiduciaire et de l'incidence de cette obligation sur l'honneur de l'État, les traités, le par. 35(1) et les autres dispositions législatives et constitutionnelles protégeant les droits des peuples autochtones doivent recevoir une interprétation généreuse et libérale: *R. c. George*, [1966] R.C.S. 267, à la p. 279. Ce principe général doit guider la Cour dans l'analyse des objets qui sous-tendent le par. 35(1), ainsi que dans l'analyse de la définition et de la portée de cette disposition.

L'existence des rapports de fiduciaire qui existent entre l'État et les peuples autochtones emporte en outre que les doutes ou ambiguïtés concernant la portée et la définition des droits visés par le par. 35(1) doivent être résolus en faveur des peuples autochtones. Dans *R. c. Sutherland*, [1980] 2 R.C.S. 451, à la p. 464, le juge Dickson a affirmé, relativement à la clause 13 de la Convention entre le Manitoba et le Canada, un document constitutionnel, qu'il «faut l'interpréter de façon à résoudre tout doute en faveur des Indiens, les bénéficiaires des droits ainsi garantis». Ce principe d'interprétation s'applique également au par. 35(1) de la *Loi constitutionnelle de 1982* et, je le répète, il devrait guider la Cour dans son analyse de l'objet de cette disposition.

Analyse de l'objet du par. 35(1)

Je vais maintenant analyser l'objet du par. 35(1).

Quand le tribunal dégage les objets visés par une disposition constitutionnelle ou les intérêts que celle-ci est censée protéger, ce qu'il fait c'est essentiellement expliquer la raison d'être de cette disposition et énoncer les raisons sous-jacentes de la protection qu'elle offre. En ce qui concerne le par. 35(1), le tribunal doit donc expliquer la raison d'être et le fondement de la reconnaissance et de la confirmation des droits spéciaux des peuples autochtones, et identifier le fondement du statut particulier des peuples autochtones au sein de l'ensemble de la société canadienne.

28

In identifying the basis for the recognition and affirmation of aboriginal rights it must be remembered that s. 35(1) did not create the legal doctrine of aboriginal rights; aboriginal rights existed and were recognized under the common law: *Calder v. Attorney-General of British Columbia*, [1973] S.C.R. 313. At common law aboriginal rights did not, of course, have constitutional status, with the result that Parliament could, at any time, extinguish or regulate those rights: *Kruger v. The Queen*, [1978] 1 S.C.R. 104, at p. 112; *R. v. Derriksan* (1976), 71 D.L.R. (3d) 159 (S.C.C.), [1976] 2 S.C.R. v; it is this which distinguishes the aboriginal rights recognized and affirmed in s. 35(1) from the aboriginal rights protected by the common law. Subsequent to s. 35(1) aboriginal rights cannot be extinguished and can only be regulated or infringed consistent with the justificatory test laid out by this Court in *Sparrow*, *supra*.

Dans la détermination du fondement de la reconnaissance et de la confirmation des droits ancestraux, il ne faut pas oublier que le par. 35(1) n'a pas créé la doctrine juridique des droits ancestraux. En effet, ces droits existaient déjà et ils étaient reconnus en common law: *Calder c. Procureur général de la Colombie-Britannique*, [1973] R.C.S. 313. Évidemment, comme les droits ancestraux n'avaient pas, en common law, de statut constitutionnel, le législateur fédéral pouvait à tout moment les éteindre ou les réglementer: *Kruger c. La Reine*, [1978] 1 R.C.S. 104, à la p. 112; *R. v. Derriksan* (1976), 71 D.L.R. (3d) 159 (C.S.C.), [1976] 2 R.C.S. v; c'est ce qui distingue les droits ancestraux reconnus et confirmés par le par. 35(1) de ceux protégés par la common law. À la suite de l'adoption du par. 35(1), les droits ancestraux ne peuvent pas être éteints et ils ne peuvent être réglementés ou violés qu'en conformité avec le critère de justification énoncé par notre Cour dans *Sparrow*, précité.

29

The fact that aboriginal rights pre-date the enactment of s. 35(1) could lead to the suggestion that the purposive analysis of s. 35(1) should be limited to an analysis of why a pre-existing legal doctrine was elevated to constitutional status. This suggestion must be resisted. The pre-existence of aboriginal rights is relevant to the analysis of s. 35(1) because it indicates that aboriginal rights have a stature and existence prior to the constitutionalization of those rights and sheds light on the reasons for protecting those rights; however, the interests protected by s. 35(1) must be identified through an explanation of the basis for the legal doctrine of aboriginal rights, not through an explanation of why that legal doctrine now has constitutional status.

Le fait que les droits ancestraux sont antérieurs à l'édiction du par. 35(1) pourrait amener à conclure qu'il faudrait limiter l'analyse de l'objet de cette disposition aux raisons pour lesquelles une doctrine juridique préexistante s'est vue conférer un statut constitutionnel. Il faut s'abstenir de tirer pareille conclusion. La préexistence des droits ancestraux est un élément pertinent pour l'analyse du par. 35(1), parce qu'elle indique que l'importance et l'existence de ces droits sont antérieures à la constitutionnalisation de ceux-ci et qu'elle éclaire sur les raisons justifiant la protection qui leur est accordée. Toutefois, il faut identifier les intérêts protégés par le par. 35(1) en expliquant le fondement de la doctrine juridique des droits ancestraux, et non les raisons pour lesquelles cette doctrine a aujourd'hui un statut constitutionnel.

30

In my view, the doctrine of aboriginal rights exists, and is recognized and affirmed by s. 35(1), because of one simple fact: when Europeans arrived in North America, aboriginal peoples were already here, living in communities on the land, and participating in distinctive cultures, as they had done for centuries. It is this fact, and this fact above all others, which separates aboriginal peo-

À mon avis, la doctrine des droits ancestraux existe et elle est reconnue et confirmée par le par. 35(1), et ce pour un fait bien simple: quand les Européens sont arrivés en Amérique du Nord, les peuples autochtones s'y trouvaient déjà, ils vivaient en collectivités sur ce territoire et participaient à des cultures distinctives, comme ils l'avaient fait pendant des siècles. C'est ce fait, par-

ples from all other minority groups in Canadian society and which mandates their special legal, and now constitutional, status.

More specifically, what s. 35(1) does is provide the constitutional framework through which the fact that aboriginals lived on the land in distinctive societies, with their own practices, traditions and cultures, is acknowledged and reconciled with the sovereignty of the Crown. The substantive rights which fall within the provision must be defined in light of this purpose; the aboriginal rights recognized and affirmed by s. 35(1) must be directed towards the reconciliation of the pre-existence of aboriginal societies with the sovereignty of the Crown.

That the purpose of s. 35(1) lies in its recognition of the prior occupation of North America by aboriginal peoples is suggested by the French version of the text. For the English "existing aboriginal and treaty rights" the French text reads "[l]es droits existants — ancestraux ou issus de traités". The term "ancestral", which *Le Petit Robert 1* (1990) dictionary defines as "[q]ui a appartenu aux ancêtres, qu'on tient des ancêtres", suggests that the rights recognized and affirmed by s. 35(1) must be temporally rooted in the historical presence — the ancestry — of aboriginal peoples in North America.

This approach to s. 35(1) is also supported by the prior jurisprudence of this Court. In *Calder*, *supra*, the Court refused an application by the Nishga for a declaration that their aboriginal title had not been extinguished. There was no majority in the Court as to the basis for this decision; however, in the judgments of both Judson J. and Hall J. (each speaking for himself and two others) the existence of aboriginal title was recognized. Hall J. based the Nishga's aboriginal title in the fact that the land to which they were claiming title had "been in their possession from time immemorial" (*Calder*, *supra*, at p. 375). Judson J. explained the origins of the Nishga's aboriginal title as follows, at p. 328:

dessus tout, qui distingue les peuples autochtones de tous les autres groupes minoritaires du pays et qui commande leur statut juridique — et maintenant constitutionnel — particulier.

Plus précisément, le par. 35(1) établit le cadre constitutionnel qui permet de reconnaître que les autochtones vivaient sur le territoire en sociétés distinctives, possédant leurs propres cultures, pratiques et traditions, et de concilier ce fait avec la souveraineté de Sa Majesté. Les droits substantiels visés par cette disposition doivent être définis à la lumière de cet objet. Les droits ancestraux reconnus et confirmés par le par. 35(1) doivent tendre à concilier la préexistence des sociétés autochtones et la souveraineté de Sa Majesté.

La conclusion que le par. 35(1) a pour objet de reconnaître l'occupation antérieure de l'Amérique du Nord par les peuples autochtones ressort du texte français de cette disposition. L'expression anglaise «*existing aboriginal and treaty rights*» est rendue en français par «[l]es droits existants — ancestraux ou issus de traités». Le terme «ancestral», qui est défini ainsi dans le dictionnaire *Le Petit Robert 1* (1990): «[q]ui a appartenu aux ancêtres, qu'on tient des ancêtres», tend à indiquer que les droits reconnus et confirmés par le par. 35(1) doivent, sur le plan temporel, tirer leur origine de la présence historique — des ancêtres — des peuples autochtones de l'Amérique du Nord.

Cette façon d'analyser le par. 35(1) trouve également appui dans des décisions antérieures de notre Cour. Dans *Calder*, précité, la Cour a refusé une demande des Nishgas qui sollicitaient une déclaration portant que leur titre aborigène n'avait pas été éteint. Aucune majorité ne s'est dégagée quant au fondement de la décision dans cet arrêt. Toutefois, dans leurs motifs respectifs, les juges Judson et Hall (chacun parlant aussi au nom de deux autres juges) ont reconnu l'existence du titre aborigène. Le juge Hall a basé le titre aborigène des Nishgas sur le fait que ceux-ci avaient «pos-sédé[.] de temps immémorial» (*Calder*, précité, à la p. 375) les terres dont ils revendiquaient le titre. Le juge Judson a expliqué ainsi les origines du titre aborigène des Nishgas, à la p. 328:

Although I think that it is clear that Indian title in British Columbia cannot owe its origin to the Proclamation of 1763, the fact is that when the settlers came, the Indians were there, organized in societies and occupying the land as their forefathers had done for centuries. This is what Indian title means and it does not help one in the solution of this problem to call it a "personal or usufructuary right". What they are asserting in this action is that they had a right to continue to live on their lands as their forefathers had lived and that this right has never been lawfully extinguished. [Emphasis added.]

The position of Judson and Hall JJ. on the basis for aboriginal title is applicable to the aboriginal rights recognized and affirmed by s. 35(1). Aboriginal title is the aspect of aboriginal rights related specifically to aboriginal claims to land; it is the way in which the common law recognizes aboriginal land rights. As such, the explanation of the basis of aboriginal title in *Calder, supra*, can be applied equally to the aboriginal rights recognized and affirmed by s. 35(1). Both aboriginal title and aboriginal rights arise from the existence of distinctive aboriginal communities occupying "the land as their forefathers had done for centuries" (p. 328).

34

The basis of aboriginal title articulated in *Calder, supra*, was affirmed in *Guerin v. The Queen*, [1984] 2 S.C.R. 335. The decision in *Guerin* turned on the question of the nature and extent of the Crown's fiduciary obligation to aboriginal peoples; because, however, Dickson J. based that fiduciary relationship, at p. 376, in the "concept of aboriginal, native or Indian title", he had occasion to consider the question of the existence of aboriginal title. In holding that such title existed, he relied, at p. 376, on *Calder, supra*, for the proposition that "aboriginal title as a legal right derived from the Indians' historic occupation and possession of their tribal lands". [Emphasis added.]

35

The view of aboriginal rights as based in the prior occupation of North America by distinctive aboriginal societies, finds support in the early American decisions of Marshall C.J. Although the

Je crois qu'il est clair qu'en Colombie-Britannique, le titre indien ne peut pas avoir pour origine la Proclamation de 1763, mais il reste que lorsque les colons sont arrivés, les Indiens étaient déjà là, ils étaient organisés en sociétés et occupaient les terres comme leurs ancêtres l'avaient fait depuis des siècles. C'est ce que signifie le titre indien et en l'appelant «droit personnel de la nature d'un usufruit», la solution du problème n'en devient pas plus facile. Ils affirment dans la présente action qu'ils avaient le droit de continuer à vivre sur leurs terres comme l'avaient fait leurs ancêtres et que ce droit n'a jamais été juridiquement éteint. [Je souligne.]

La position des juges Judson et Hall quant au fondement du titre aborigène est applicable aux droits ancestraux reconnus et confirmés par le par. 35(1). Le titre aborigène est l'aspect des droits ancestraux qui se rapporte spécifiquement aux revendications territoriales des autochtones; c'est le moyen par lequel la common law reconnaît les droits fonciers des autochtones. Ainsi, l'explication donnée dans l'arrêt *Calder*, précité, relativement au fondement du titre aborigène peut être appliquée également aux droits ancestraux reconnus et confirmés par le par. 35(1). Tant le titre aborigène que les droits ancestraux découlent de l'existence de collectivités autochtones distinctives, occupant «les terres comme leurs ancêtres l'avaient fait depuis des siècles» (p. 328).

Le fondement du titre aborigène énoncé dans *Calder*, précité, a été confirmé dans *Guerin c. La Reine*, [1984] 2 R.C.S. 335. Cet arrêt concernait la nature et l'étendue de l'obligation de fiduciaire de Sa Majesté envers les peuples autochtones. Cependant, comme il a fondé ce rapport de fiduciaire, à la p. 376, sur le «concept du titre aborigène, autochtone ou indien», le juge Dickson a eu l'occasion d'étudier la question de l'existence du titre aborigène. Pour conclure à l'existence d'un tel titre, il a invoqué, à la p. 376, l'arrêt *Calder*, précité, dans lequel «le titre aborigène [a été reconnu] comme un droit, en common law, découlant de l'occupation et de la possession historiques par les Indiens de leurs terres tribales». [Je souligne.]

Le point de vue selon lequel les droits ancestraux sont fondés sur l'occupation antérieure de l'Amérique du Nord par des sociétés autochtones distinctives trouve appui dans de vieilles décisions

constitutional structure of the United States is different from that of Canada, and its aboriginal law has developed in unique directions, I agree with Professor Slattery both when he describes the Marshall decisions as providing “structure and coherence to an untidy and diffuse body of customary law based on official practice” and when he asserts that these decisions are “as relevant to Canada as they are to the United States” — “Understanding Aboriginal Rights”, *supra*, at p. 739. I would add to Professor Slattery’s comments only the observation that the fact that aboriginal law in the United States is significantly different from Canadian aboriginal law means that the relevance of these cases arises from their articulation of general principles, rather than their specific legal holdings.

In *Johnson v. M’Intosh*, 21 U.S. (8 Wheat.) 543 (1823), the first of the Marshall decisions on aboriginal title, the Supreme Court held that Indian land could only be alienated by the U.S. government, not by the Indians themselves. In the course of his decision (written for the court), Marshall C.J. outlined the history of the exploration of North America by the countries of Europe and the relationship between this exploration and aboriginal title. In his view, aboriginal title is the right of aboriginal people to land arising from the intersection of their pre-existing occupation of the land with the assertion of sovereignty over that land by various European nations. The substance and nature of aboriginal rights to land are determined by this intersection (at pp 572-74):

On the discovery of this immense continent, the great nations of Europe were eager to appropriate to themselves so much of it as they could respectively acquire. Its vast extent offered an ample field to the ambition and enterprise of all; and the character and religion of its inhabitants afforded an apology for considering them as a people over whom the superior genius of Europe might claim an ascendancy. The potentates of the old world found no difficulty in convincing themselves that they made ample compensation to the inhabitants of the

américaines rendues par le juge en chef Marshall. Bien que l’organisation constitutionnelle des États-Unis soit différente de celle du Canada et que le droit américain relatif aux autochtones ait évolué d’une manière propre, je suis d’accord avec le professeur Slattery quand il dit des décisions du juge Marshall qu’elles donnent [TRADUCTION] «une structure et une cohésion à un ensemble désorganisé et diffus de règles de droit coutumier basées sur les pratiques officielles», et quand il affirme que ces décisions sont «aussi pertinentes au Canada qu’aux États-Unis» — «Understanding Aboriginal Rights», *loc. cit.*, à la p. 739. J’ajouterais simplement aux observations du professeur Slattery que, en raison des différences importantes qui existent entre le droit américain relatif aux autochtones et le droit canadien sur la question, l’intérêt de ces arrêts tient davantage aux principes généraux qui y sont énoncés qu’aux décisions spécifiques qui y sont prononcées.

Dans *Johnson c. M’Intosh*, 21 U.S. (8 Wheat.) 543 (1823), première des décisions du juge Marshall sur le titre aborigène, la Cour suprême a statué que les terres des Indiens ne pouvaient être aliénées que par le gouvernement des États-Unis et non par les Indiens eux-mêmes. Dans sa décision (rédigée pour la cour), le juge en chef Marshall a fait l’historique de l’exploration de l’Amérique du Nord par les pays européens et établi le lien entre cette exploration et le titre aborigène. À son avis, le titre aborigène est le droit que possèdent les peuples autochtones sur le territoire et qui découle de l’intersection de leur occupation préexistante de ce territoire et de l’affirmation par les diverses nations européennes de leur souveraineté sur celui-ci. L’essence et la nature des droits fonciers ancestraux sont déterminées par cette intersection (aux pp. 572 à 574):

[TRADUCTION] Lorsqu’elles ont découvert cet immense continent, les grandes nations européennes tenaient chacune à s’en approprier la plus grande partie possible. Dans ces vastes étendues, tous avaient amplement l’occasion de manifester leur ambition et leur esprit d’initiative; les caractères distinctifs et la religion des habitants du continent fournissaient une justification permettant de les considérer comme un peuple sur lequel le génie supérieur européen pouvait prétendre exercer un ascendant. Les potentats du vieux monde

new, by bestowing on them civilization and Christianity, in exchange for unlimited independence. But, as they were all in pursuit of nearly the same object, it was necessary, in order to avoid conflicting settlements, and consequent war with each other, to establish a principle, which all should acknowledge as the law by which the right of acquisition, which they all asserted, should be regulated as between themselves. This principle was, that discovery gave title to the government by whose subjects, or by whose authority, it was made, against all other European governments, which title might be consummated by possession.

The exclusion of all other Europeans, necessarily gave to the nation making the discovery the sole right of acquiring the soil from the natives, and establishing settlements upon it. It was a right with which no Europeans could interfere. It was a right which all asserted for themselves, and to the assertion of which, by others, all assented.

Those relations which were to exist between the discoverer and the natives, were to be regulated by themselves. The rights thus acquired being exclusive, no other power could interpose between them.

In the establishment of these relations, the rights of the original inhabitants were, in no instance, entirely disregarded; but were necessarily, to a considerable extent, impaired. They were admitted to be the rightful occupants of the soil, with a legal as well as just claim to retain possession of it, and to use it according to their own discretion; but their rights to complete sovereignty, as independent nations, were necessarily diminished, and their power to dispose of the soil at their own will, to whomsoever they pleased, was denied by the original fundamental principle, that discovery gave exclusive title to those who made it.

While the different nations of Europe respected the right of the natives, as occupants, they asserted the ultimate dominion to be in themselves; and claimed and exercised, as a consequence of this ultimate dominion, a power to grant the soil, while yet in possession of the natives. These grants have been understood by all, to convey a title to the grantees, subject only to the Indian right of occupancy. [Emphasis added.]

n'ont éprouvé aucune difficulté à se convaincre qu'ils compensaient amplement les habitants du nouveau continent en leur apportant la civilisation et le christianisme en échange de l'indépendance absolue. Mais, comme ces potentats étaient tous à la recherche du même objectif ou à peu près, il était nécessaire, en vue d'éviter les conflits de colonisation et les guerres qui s'ensuivraient, d'établir un principe que tous reconnaîtraient comme constituant le droit en vertu duquel le droit d'acquisition, qu'ils revendiquaient tous, devrait être régi entre eux. Ce principe était que la découverte conférait le titre au gouvernement dont les sujets avaient fait la découverte ou sous l'autorité duquel la découverte était faite, et ce titre qui était opposable à tous les autres gouvernements européens pouvait être rendu parfait par la possession.

L'exclusion de tous les autres pays européens conférait nécessairement à la nation qui faisait la découverte le droit exclusif d'acquérir les terres des autochtones et d'y établir des colonies. Il s'agissait là d'un droit qu'aucun Européen ne pouvait entraver. C'est un droit que chacun faisait valoir pour lui-même, tout en le respectant quand il était affirmé par d'autres.

Les relations qui devaient exister entre découvreur et autochtones devaient se régler entre eux. Les droits ainsi acquis étant exclusifs, aucun autre pouvoir ne pouvait s'interposer.

Dans l'établissement de ces relations, on n'a, en aucun cas, entièrement omis de tenir compte des droits des autochtones; mais ces droits se sont trouvés nécessairement restreints dans une large mesure. On reconnaissait que les autochtones étaient les occupants de plein droit des terres, et pouvaient juridiquement et légitimement demeurer en possession de celles-ci, et les utiliser à leur gré; mais leurs droits à la souveraineté complète, en leur qualité de nations indépendantes, ont été nécessairement diminués, et leur pouvoir de disposer des terres en faveur de n'importe qui a été nié en vertu du principe initial de base selon lequel la découverte conférait à ceux qui l'avait faite un titre exclusif.

Les différentes nations européennes respectaient le droit d'occupation des autochtones, qu'ils pouvaient exercer à leur gré, mais elles revendiquaient la propriété suprême; elles revendiquaient et exerçaient, par suite de ce droit suprême, un pouvoir d'octroyer les terres, alors que celles-ci étaient encore en possession des autochtones. Ces octrois ont été interprétés par tous comme accordant au cessionnaire un titre, sous réserve uniquement du droit d'occupation indien. [Je souligne.]

It is, similarly, the reconciliation of pre-existing aboriginal claims to the territory that now constitutes Canada, with the assertion of British sovereignty over that territory, to which the recognition and affirmation of aboriginal rights in s. 35(1) is directed.

In *Worcester v. Georgia*, 31 U.S. (6 Pet.) 515 (1832) the U.S. Supreme Court invalidated the conviction under a Georgia statute of a non-Cherokee man for the offence of living on the territory of the Cherokee Nation. The court held that the law under which he was convicted was *ultra vires* the State of Georgia. In so doing the court considered the nature and basis of the Cherokee claims to the land and to governance over that land. Again, it based its judgment on its analysis of the origins of those claims which, it held, lay in the relationship between the pre-existing rights of the "ancient possessors" of North America and the assertion of sovereignty by European nations (at pp. 542-43 and 559):

America, separated from Europe by a wide ocean, was inhabited by a distinct people, divided into separate nations, independent of each other and of the rest of the world, having institutions of their own, and governing themselves by their own laws. It is difficult to comprehend the proposition, that the inhabitants of either quarter of the globe could have rightful original claims of dominion over the inhabitants of the other, or over the lands they occupied; or that the discovery of either by the other should give the discoverer rights in the country discovered, which annulled the pre-existing rights of its ancient possessors.

After lying concealed for a series of ages, the enterprise of Europe, guided by nautical science, conducted some of her adventurous sons into this western world. They found it in possession of a people who had made small progress in agriculture or manufactures, and whose general employment was war, hunting, and fishing.

Did these adventurers, by sailing along the coast, and occasionally landing on it, acquire for the several governments to whom they belonged, or by whom they were commissioned, a rightful property in the soil, from

De la même façon, la reconnaissance et la confirmation des droits ancestraux au par. 35(1) visent à concilier les droits préexistants des autochtones sur le territoire formant aujourd'hui le Canada avec l'affirmation de la souveraineté Britannique sur ce territoire.

Dans l'arrêt *Worcester c. Georgia*, 31 U.S. (6 Pet.) 515 (1832), la Cour suprême des États-Unis a invalidé la déclaration de culpabilité qui avait été prononcée en vertu d'une loi de l'État de la Géorgie contre un non-Cherokee, parce qu'il avait habité sur le territoire de la nation cherokee. La cour a conclu que la loi en vertu de laquelle il avait été déclaré coupable outrepassait les pouvoirs de l'État de la Géorgie. Pour arriver à cette conclusion, elle a examiné la nature et le fondement des revendications des Cherokees quant à la propriété du territoire et à sa régie. Encore une fois, la cour a fondé son jugement sur son analyse des origines de ces revendications qui, selon elle, découlent du rapport entre les droits préexistants des «anciens possesseurs» de l'Amérique du Nord et l'affirmation de la souveraineté par les nations européennes (aux pp. 542, 543 et 559):

[TRADUCTION] L'Amérique, séparée de l'Europe par un vaste océan, était habitée par un peuple différent, divisé en nations distinctes, indépendantes l'une de l'autre et vis-à-vis du reste du monde; elles avaient leurs propres institutions et se gouvernaient elles-mêmes en vertu de leurs propres lois. Il est difficile de comprendre que les habitants d'une partie du globe pouvaient avoir des revendications originales légitimes de suprématie sur les habitants de l'autre ou sur les terres qu'ils occupaient; ou que celui qui découvrirait des terres acquerrait des droits sur le pays découvert, droits qui annulaient les droits préexistants de ceux qui en avaient antérieurement eu la possession.

Après être demeurée chez elle durant des siècles, l'Europe, guidée par la science nautique, a mené, grâce à son esprit d'entreprise, certains de ses fils aventuriers au nouveau monde. Ils ont trouvé celui-ci en la possession d'un peuple qui avait fait peu de progrès dans le domaine agricole ou industriel et qui passait le gros de leur temps à chasser, pêcher et guerroyer.

En naviguant le long de la côte et en mettant à l'occasion pied à terre, ces aventuriers ont-ils acquis, pour le compte des divers gouvernements auxquels ils appartenaient ou qui leur avaient donné une commission, la

the Atlantic to the Pacific; or rightful dominion over the numerous people who occupied it? Or has nature, or the great Creator of all things, conferred these rights over hunters and fishermen, on agriculturists and manufacturers?

But power, war, conquest, give rights, which, after possession, are conceded by the world; and which can never be controverted by those on whom they descend. We proceed, then, to the actual state of things, having glanced at their origin; because holding it in our recollection might shed some light on existing pretensions.

The Indian nations had always been considered as distinct, independent political communities, retaining their original natural rights, as the undisputed possessors of the soil, from time immemorial, with the single exception of that imposed by irresistible power, which excluded them from intercourse with any other European potentate than the first discoverer of the coast of the particular region claimed. [Emphasis added.]

Marshall C.J.'s essential insight that the claims of the Cherokee must be analyzed in light of their pre-existing occupation and use of the land — their "undisputed" possession of the soil "from time immemorial" — is as relevant for the identification of the interests s. 35(1) was intended to protect as it was for the adjudication of Worcester's claim.

The High Court of Australia has also considered the question of the basis and nature of aboriginal rights. Like that of the United States, Australia's aboriginal law differs in significant respects from that of Canada. In particular, in Australia the courts have not as yet determined whether aboriginal fishing rights exist, although such rights are recognized by statute: *Halsbury's Laws of Australia* (1991), vol. 1, paras. 5-2250, 5-2255, 5-2260 and 5-2265. Despite these relevant differences, the analysis of the basis of aboriginal title in the landmark decision of the High Court in *Mabo v. Queensland [No. 2]* (1992), 175 C.L.R. 1, is persuasive in the Canadian context.

propriété légitime des terres situées entre l'Atlantique et le Pacifique; ou ont-ils légitimement soumis les nombreux peuples qui occupaient celles-ci à leur autorité? Ou encore, la nature ou le grand créateur de toutes choses ont-ils conféré aux agriculteurs et industriels ces droits sur des chasseurs ou pêcheurs?

Mais la puissance, la guerre, la conquête, confèrent des droits qui, après la possession, sont reconnus par tous et qui ne peuvent jamais être contestés par ceux sur lesquels ils s'exercent. Nous passons à l'état actuel des choses après avoir jeté un coup d'œil sur leurs origines, le rappel de ces origines pouvant éclairer les prétentions actuelles.

Les nations indiennes avaient toujours été considérées comme des communautés politiques distinctes, indépendantes, conservant leurs droits naturels initiaux, parce qu'ils avaient la possession incontestée du sol, de temps immémorial, sous réserve seulement des droits imposés par la puissance irrésistible, qui leur interdisait tout rapport avec quelque potentat européen autre que le premier découvreur de la côte de la région particulière revendiquée. [Je souligne.]

L'idée essentielle du juge en chef Marshall que les revendications des Cherokees doivent être analysées en fonction de leur occupation et utilisation préexistantes du territoire — leur possession «incontestée» du territoire, «de temps immémorial» — est aussi pertinente pour identifier les intérêts que le par. 35(1) vise à protéger qu'elle l'était pour statuer sur les prétentions de Worcester.

La Haute Cour d'Australie a elle aussi étudié la question du fondement et de la nature des droits ancestraux. Comme aux États-Unis, le droit relatif aux autochtones en Australie diffère sous des aspects importants du droit canadien. En particulier, les tribunaux australiens ne se sont pas encore prononcés sur l'existence de droits de pêche ancestraux, quoique ces droits soient reconnus par la loi: *Halsbury's Laws of Australia* (1991), vol. 1, par. 5-2250, 5-2255, 5-2260 et 5-2265. Malgré ces différences importantes, l'analyse du fondement du titre aborigène qui est faite dans l'arrêt de principe de la Haute Cour *Mabo c. Queensland [No. 2]* (1992), 175 C.L.R. 1, est convaincante dans le contexte canadien.

1996 CanLII 216 (SCC)

The *Mabo* judgment resolved the dispute between the Meriam people and the Crown regarding who had title to the Murray Islands. The islands had been annexed to Queensland in 1879 but were reserved for the native inhabitants (the Meriam) in 1882. The Crown argued that this annexation was sufficient to vest absolute ownership of the lands in the Crown. The High Court disagreed, holding that while the annexation did vest radical title in the Crown, it was insufficient to eliminate a claim for native title; the court held at pp. 50-51 that native title can exist as a burden on the radical title of the Crown: "there is no reason why land within the Crown's territory should not continue to be subject to native title. It is only the fallacy of equating sovereignty and beneficial ownership of land that gives rise to the notion that native title is extinguished by the acquisition of sovereignty".

From this premise, Brennan J., writing for a majority of the Court, went on at p. 58 to consider the nature and basis of aboriginal title:

Native title has its origin in and is given its content by the traditional laws acknowledged by and the traditional customs observed by the indigenous inhabitants of a territory. The nature and incidents of native title must be ascertained as a matter of fact by reference to those laws and customs. The ascertainment may present a problem of considerable difficulty, as Moynihan J. perceived in the present case. It is a problem that did not arise in the case of a settled colony so long as the fictions were maintained that customary rights could not be reconciled "with the institutions or the legal ideas of civilized society", *In re Southern Rhodesia*, [1919] A.C., at p. 233, that there was no law before the arrival of the British colonists in a settled colony and that there was no sovereign law-maker in the territory of a settled colony before sovereignty was acquired by the Crown. These fictions denied the possibility of a native title recognized by our laws. But once it is acknowledged that an inhabited territory which became a settled colony was no more a legal desert than it was "desert uninhabited" in fact, it is necessary to ascertain by evidence the nature and incidents of native title. [Emphasis added.]

L'arrêt *Mabo* a réglé le différend entre les Meriams et Sa Majesté concernant le titre sur les îles Murray. Ces îles avaient été annexées au Queensland en 1879, mais réservées aux aborigènes (les Meriams) en 1882. Sa Majesté a soutenu que cette annexion suffisait pour lui conférer la propriété absolue des terres. La Haute Cour a exprimé son désaccord, statuant que même si l'annexion avait effectivement conféré un titre absolu à Sa Majesté elle était insuffisante pour écarter la revendication d'un titre aborigène. La cour a conclu, aux pp. 50 et 51, que le titre aborigène peut exister à titre de charge grevant le titre absolu de Sa Majesté: [TRADUCTION] «il n'y a aucune raison pour que des terres comprises dans le territoire de Sa Majesté ne continuent pas d'être assujetties au titre aborigène. La notion que le titre aborigène est éteint par l'acquisition de la souveraineté procède du raisonnement faux qui assimile souveraineté et propriété bénéficiaire des terres».

À partir de cette prémisse, le juge Brennan, qui a rédigé les motifs de la majorité, a poursuivi, à la p. 58, en analysant la nature et le fondement du titre aborigène:

[TRADUCTION] Le titre aborigène tire son origine et son contenu des coutumes et des lois traditionnelles observées et reconnues par les habitants autochtones d'un territoire. La nature et les attributs du titre aborigène doivent être déterminés en tant que question de fait, eu égard à ces coutumes et à ces lois. Cette tâche peut présenter des difficultés considérables, comme l'a fait remarquer le juge Moynihan dans le présent cas. C'est un problème qui ne s'est pas posé dans le cas d'une colonie tant qu'ont été maintenues les fictions selon lesquelles les droits fondés sur la coutume ne pouvaient pas être conciliés «avec les institutions ou les conceptions juridiques des sociétés civilisées», *In re Southern Rhodesia*, [1919] A.C., à la p. 233, qu'il n'existait aucune loi avant l'arrivée des colons britanniques et qu'il n'y avait aucun législateur souverain dans le territoire d'une colonie avant l'affirmation de la souveraineté par Sa Majesté. Ces fictions ont empêché la reconnaissance d'un titre aborigène dans nos lois. Mais dès l'instant où il est reconnu qu'un territoire habité, devenu une colonie, n'était pas davantage un désert au sens de la loi qu'il n'était dans les faits un «désert», il est nécessaire de déterminer, selon la preuve, la nature et les attributs du titre aborigène. [Je souligne.]

This position is the same as that being adopted here. "Traditional laws" and "traditional customs" are those things passed down, and arising, from the pre-existing culture and customs of aboriginal peoples. The very meaning of the word "tradition" — that which is "handed down [from ancestors] to posterity", *The Concise Oxford Dictionary* (9th ed. 1995), — implies these origins for the customs and laws that the Australian High Court in *Mabo* is asserting to be relevant for the determination of the existence of aboriginal title. To base aboriginal title in traditional laws and customs, as was done in *Mabo*, is, therefore, to base that title in the pre-existing societies of aboriginal peoples. This is the same basis as that asserted here for aboriginal rights.

Cette position est identique à celle qui est adoptée dans le présent pourvoi. Les «coutumes traditionnelles» et les «lois traditionnelles» sont ces choses qui sont transmises de génération en génération et qui émanent de la culture et des coutumes préexistantes des peuples autochtones. Le sens même du mot «tradition» — ce qui est [TRADUCTION] «transmis [par les ancêtres] à leurs descendants», *The Concise Oxford Dictionary* (9^e éd. 1995) — suppose, dans le cas des coutumes et des lois, les origines que la Haute Cour d'Australie dans *Mabo* déclarent pertinentes pour la détermination de l'existence du titre aborigène. Baser le titre aborigène sur les lois et les coutumes traditionnelles, comme l'a fait la cour dans l'arrêt *Mabo*, revient donc à fonder ce titre dans les sociétés préexistantes des peuples autochtones. Il s'agit du même fondement que celui qui est avancé en l'espèce pour les droits ancestraux.

41

Academic commentators have also been consistent in identifying the basis and foundation of the s. 35(1) claims of aboriginal peoples in aboriginal occupation of North America prior to the arrival of Europeans. As Professor David Elliott, at p. 25, puts it in his compilation *Law and Aboriginal Peoples of Canada* (2nd ed. 1994), the "prior aboriginal presence is at the heart of the concept of aboriginal rights". Professor Macklem has, while also considering other possible justifications for the recognition of aboriginal rights, described prior occupancy as the "familiar" justification for aboriginal rights, arising from the "straightforward conception of fairness which suggests that, all other things being equal, a prior occupant of land possesses a stronger claim to that land than subsequent arrivals": Patrick Macklem, "Normative Dimensions of an Aboriginal Right of Self-Government" (1995), 21 *Queen's L.J.* 173, at p. 180. Finally, I would note the position of Professor Pentney who has described aboriginal rights as collective rights deriving "their existence from the common law's recognition of [the] prior social organization" of aboriginal peoples: William Pentney, "The Rights of the Aboriginal Peoples of Canada in the *Constitution Act, 1982, Part II* —

Les commentateurs universitaires ont constamment indiqué que les droits des peuples autochtones visés au par. 35(1) tiraient leur origine et leur fondement de l'occupation de l'Amérique du Nord par les autochtones avant l'arrivée des Européens. Comme le dit le professeur David Elliott, à la p. 25 de son recueil *Law and Aboriginal Peoples of Canada* (2^e éd. 1994) la [TRADUCTION] «présence antérieure des autochtones est au cœur du concept des droits ancestraux». Le professeur Macklem, tout en examinant aussi d'autres justifications possibles pour la reconnaissance des droits ancestraux, a décrit l'occupation antérieure comme étant la justification [TRADUCTION] «usuelle» des droits ancestraux, qui découle de la «conception simple de l'équité selon laquelle, toutes choses égales d'ailleurs, le premier occupant d'un territoire possède sur celui-ci un droit supérieur à faire valoir que ceux qui arrivent plus tard»: Patrick Macklem, «Normative Dimensions of an Aboriginal Right of Self-Government» (1995), 21 *Queen's L.J.* 173, à la p. 180. Finalement, je tiens à souligner la position du professeur Pentney, qui a décrit les droits ancestraux comme étant des droits collectifs tirant [TRADUCTION] «leur existence de la reconnaissance en common law de l'organisation sociale antérieure» des peuples autochtones: William Pentney,

Section 35: The Substantive Guarantee" (1988), 22 *U.B.C. L. Rev.* 207, at p. 258.

I would note that the legal literature also supports the position that s. 35(1) provides the constitutional framework for reconciliation of the pre-existence of distinctive aboriginal societies occupying the land with Crown sovereignty. In his comment on *Delgamuukw v. British Columbia* ("British Imperial Constitutional Law and Aboriginal Rights: A Comment on *Delgamuukw v. British Columbia*" (1992), 17 *Queen's L.J.* 350), Mark Walters suggests at pp. 412-13 that the essence of aboriginal rights is their bridging of aboriginal and non-aboriginal cultures:

The challenge of defining aboriginal rights stems from the fact that they are rights peculiar to the meeting of two vastly dissimilar legal cultures; consequently there will always be a question about which legal culture is to provide the vantage point from which rights are to be defined. . . . a morally and politically defensible conception of aboriginal rights will incorporate both legal perspectives. [Emphasis added.]

Similarly, Professor Slaterry has suggested that the law of aboriginal rights is "neither English nor aboriginal in origin: it is a form of intersocietal law that evolved from long-standing practices linking the various communities" (Brian Slaterry, "The Legal Basis of Aboriginal Title", in Frank Cassidy, ed., *Aboriginal Title in British Columbia: Delgamuukw v. The Queen* (1992), at pp. 120-21) and that such rights concern "the status of native peoples living under the Crown's protection, and the position of their lands, customary laws, and political institutions" ("Understanding Aboriginal Rights", *supra*, at p. 737).

The Canadian, American and Australian jurisprudence thus supports the basic proposition put forward at the beginning of this section: the aboriginal rights recognized and affirmed by

«The Rights of the Aboriginal Peoples of Canada in the *Constitution Act, 1982*, Part II — Section 35: The Substantive Guarantee» (1988), 22 *U.B.C. L. Rev.* 207, à la p. 258.

Je signale également que la littérature juridique appuie aussi la thèse selon laquelle le par. 35(1) fournit le cadre constitutionnel permettant de concilier la souveraineté de Sa Majesté avec la préexistence de sociétés autochtones distinctives occupant le territoire. Dans son commentaire sur l'arrêt *Delgamuukw c. Colombie-Britannique* («British Imperial Constitutional Law and Aboriginal Rights: A Comment on *Delgamuukw v. British Columbia*» (1992), 17 *Queen's L.J.* 350), Mark Walters émet l'avis, aux pp. 412 et 413, que l'essence des droits ancestraux est que ceux-ci établissent un rapprochement entre les cultures autochtones et non autochtones:

[TRADUCTION] La difficulté que pose la définition des droits ancestraux tient au fait que ce sont des droits particuliers à la rencontre de deux cultures juridiques extrêmement dissemblables; par conséquent, il faudra toujours se demander à partir de laquelle de ces cultures les droits doivent être définis [. . .] une conception moralement et politiquement défendable des droits ancestraux intégrer ces deux points de vue juridiques. [Je souligne.]

De même, le professeur Slaterry a avancé que le droit relatif aux droits ancestraux n'est [TRADUCTION] «ni d'origine anglaise, ni d'origine autochtone: il s'agit d'une forme de droit intersociétal, découlant de l'évolution de pratiques de longue date liant les diverses collectivités» (Brian Slaterry, «The Legal Basis of Aboriginal Title» dans Frank Cassidy, dir., *Aboriginal Title in British Columbia: Delgamuukw v. The Queen* (1992), aux pp. 120 et 121) et que ces droits concernent [TRADUCTION] «le statut des peuples autochtones vivant sous la protection de Sa Majesté, ainsi que la place faite à leurs terres, à leurs règles de droit coutumier et à leurs institutions politiques» («Understanding Aboriginal Rights», *loc. cit.*, à la p. 737).

La jurisprudence et la doctrine canadiennes, américaines et australiennes étayent donc la thèse fondamentale suivante, avancée au début de la présente section: la meilleure façon de décrire les

s. 35(1) are best understood as, first, the means by which the Constitution recognizes the fact that prior to the arrival of Europeans in North America the land was already occupied by distinctive aboriginal societies, and as, second, the means by which that prior occupation is reconciled with the assertion of Crown sovereignty over Canadian territory. The content of aboriginal rights must be directed at fulfilling both of these purposes; the next section of the judgment, as well as that which follows it, will attempt to accomplish this task.

droits ancestraux reconnus et confirmés par le par. 35(1) est de dire qu'ils sont, premièrement, le moyen par lequel la Constitution reconnaît le fait qu'avant l'arrivée des Européens en Amérique du Nord le territoire était déjà occupé par des sociétés autochtones distinctives, et, deuxièmement, le moyen de concilier cette occupation antérieure avec l'affirmation par Sa Majesté de sa souveraineté sur le territoire canadien. Le contenu des droits ancestraux doit viser la réalisation de ces deux objets. Dans la prochaine partie du jugement, ainsi que dans celle qui suivra, c'est la tâche que l'on tente d'accomplir.

The Test for Identifying Aboriginal Rights in Section 35(1)

Le critère d'identification des droits ancestraux visés au par. 35(1)

44 In order to fulfil the purpose underlying s. 35(1) — i.e., the protection and reconciliation of the interests which arise from the fact that prior to the arrival of Europeans in North America aboriginal peoples lived on the land in distinctive societies, with their own practices, customs and traditions — the test for identifying the aboriginal rights recognized and affirmed by s. 35(1) must be directed at identifying the crucial elements of those pre-existing distinctive societies. It must, in other words, aim at identifying the practices, traditions and customs central to the aboriginal societies that existed in North America prior to contact with the Europeans.

Pour réaliser l'objet qui sous-tend le par. 35(1) — c'est-à-dire la protection et la conciliation des intérêts découlant du fait que, avant l'arrivée des Européens en Amérique du Nord, les peuples autochtones vivaient en sociétés distinctives, possédant leurs propres coutumes, pratiques et traditions —, le critère d'identification des droits ancestraux reconnus et confirmés par le par. 35(1) doit viser à reconnaître les éléments fondamentaux de ces sociétés distinctives préexistantes. Autrement dit, ce critère doit tendre à identifier les coutumes, pratiques et traditions fondamentales des sociétés autochtones qui existaient en Amérique du Nord avant le contact avec les Européens.

45 In *Sparrow*, *supra*, this Court did not have to address the scope of the aboriginal rights protected by s. 35(1); however, in their judgment at p. 1099 Dickson C.J. and La Forest J. identified the Musqueam right to fish for food in the fact that:

Dans l'arrêt *Sparrow*, précité, notre Cour n'a pas eu à étudier la portée des droits ancestraux protégés par le par. 35(1). Toutefois, dans leur jugement, à la p. 1099, le juge en chef Dickson et le juge La Forest ont dégagé le droit des Musqueams de pêcher à des fins alimentaires du fait suivant:

The anthropological evidence relied on to establish the existence of the right suggests that, for the Musqueam, the salmon fishery has always constituted an integral part of their distinctive culture. Its significant role involved not only consumption for subsistence purposes, but also consumption of salmon on ceremonial and social occasions. The Musqueam have always fished for reasons connected to their cultural and physical survival. [Emphasis added.]

D'après la preuve anthropologique produite pour établir l'existence de ce droit, la pêche au saumon a toujours fait partie intégrante de la culture distinctive des Musqueams. Le rôle important qu'elle joue ne se résume pas à la consommation à des fins de subsistance, mais il comprend également la consommation de saumon dans le cadre d'activités rituelles et sociales. Les Musqueams ont toujours pêché pour des raisons liées à leur survie culturelle et matérielle. [Je souligne.]

The suggestion of this passage is that participation in the salmon fishery is an aboriginal right because it is an "integral part" of the "distinctive culture" of the Musqueam. This suggestion is consistent with the position just adopted; identifying those practices, customs and traditions that are integral to distinctive aboriginal cultures will serve to identify the crucial elements of the distinctive aboriginal societies that occupied North America prior to the arrival of Europeans.

In light of the suggestion of *Sparrow*, *supra*, and the purposes underlying s. 35(1), the following test should be used to identify whether an applicant has established an aboriginal right protected by s. 35(1): in order to be an aboriginal right an activity must be an element of a practice, custom or tradition integral to the distinctive culture of the aboriginal group claiming the right.

I would note that this test is, in large part, consistent with that adopted by the judges of the British Columbia Court of Appeal. Although the various judges disagreed on such crucial questions as how the right should be framed, the relevant time at which the aboriginal culture should be examined and the role of European influences in limiting the scope of the right, all of the judges agreed that aboriginal rights must be identified through the practices, customs and traditions of aboriginal cultures. Macfarlane J.A. held at para. 20 that aboriginal rights exist where "the right had been exercised . . . for a sufficient length of time to become integral to the aboriginal society" (emphasis added); Wallace J.A. held at para. 78 that aboriginal rights are those practices "traditional and integral to the native society" (emphasis added); Lambert J.A. held at para. 131 that aboriginal rights are those "custom[s], tradition[s], or practice[s] . . . which formed an integral part of the distinctive culture of the aboriginal people in question" (emphasis added). While, as will become apparent, I do not adopt entirely the position of any of the judges at the Court of Appeal, their shared position that aboriginal rights lie in those practices,

L'idée qui ressort de ce passage est que la participation à la pêche au saumon est un droit ancestral parce que cette activité fait «partie intégrante» de la «culture distinctive» des Musqueams. Cette idée est compatible avec la position qui vient d'être adoptée; le fait de déterminer les coutumes, pratiques et traditions qui font partie intégrante des cultures autochtones distinctives permettra d'identifier les éléments fondamentaux des sociétés autochtones distinctives qui occupaient l'Amérique du Nord avant l'arrivée des Européens.

À la lumière de l'idée exprimée dans *Sparrow*, précité, et des objets qui sous-tendent le par. 35(1), le critère suivant devrait être appliqué pour déterminer si le demandeur a établi l'existence d'un droit ancestral protégé par le par. 35(1): pour constituer un droit ancestral, une activité doit être un élément d'une coutume, pratique ou tradition faisant partie intégrante de la culture distinctive du groupe autochtone qui revendique le droit en question.

Je tiens à souligner que ce critère est, dans une large mesure, conforme à celui adopté par les juges de la Cour d'appel de la Colombie-Britannique. Quoique ceux-ci n'aient pas tous été d'accord sur des questions cruciales telles que la manière de formuler ce droit, la période pertinente pour l'examen de la culture autochtone et le rôle des influences européennes dans la limitation de la portée de ce droit, ils ont par ailleurs tous été d'accord pour dire que les droits ancestraux doivent être identifiés au moyen des coutumes, pratiques et traditions des cultures autochtones. Le juge Macfarlane a conclu, au par. 20, que des droits ancestraux existent lorsqu'ils [TRADUCTION] «sont exercés [. . .] depuis assez longtemps pour être devenus partie intégrante de la société autochtone» (je souligne). Pour sa part, le juge Wallace a statué, au par. 78, que les droits ancestraux sont les pratiques [TRADUCTION] «traditionnelles faisant partie intégrante de la société autochtone» (je souligne). Le juge Lambert a affirmé, au par. 131, que les droits ancestraux sont [TRADUCTION] «les coutume[s], pratique[s] et tradition[s . . .] qui faisaient partie intégrante de la culture distinctive du peuple autochtone en question» (je souligne). Même si,

customs and traditions that are integral is consistent with the test I have articulated here.

Factors to be Considered in Application of the Integral to a Distinctive Culture Test

48

The test just laid out — that aboriginal rights lie in the practices, customs and traditions integral to the distinctive cultures of aboriginal peoples — requires further elaboration with regards to the nature of the inquiry a court faced with an aboriginal rights claim must undertake. I will now undertake such an elaboration, concentrating on such questions as the time period relevant to the court's inquiry, the correct approach to the evidence presented, the specificity necessary to the court's inquiry, the relationship between aboriginal rights and the rights of aboriginal people as Canadian citizens, and the standard that must be met in order for a practice, custom or tradition to be said to be "integral".

Courts must take into account the perspective of aboriginal peoples themselves

49

In assessing a claim for the existence of an aboriginal right, a court must take into account the perspective of the aboriginal people claiming the right. In *Sparrow*, *supra*, Dickson C.J. and La Forest J. held, at p. 1112, that it is "crucial to be sensitive to the aboriginal perspective itself on the meaning of the rights at stake". It must also be recognized, however, that that perspective must be framed in terms cognizable to the Canadian legal and constitutional structure. As has already been noted, one of the fundamental purposes of s. 35(1) is the reconciliation of the pre-existence of distinctive aboriginal societies with the assertion of Crown sovereignty. Courts adjudicating aboriginal rights claims must, therefore, be sensitive to the aboriginal perspective, but they must also be aware

comme cela deviendra manifeste, je n'adopte pas entièrement la position de l'un ou l'autre des juges de la Cour d'appel, leur position commune que les droits ancestraux résident dans les coutumes, pratiques et traditions qui font partie intégrante de la culture en cause est compatible avec le critère que j'ai énoncé en l'espèce.

Facteurs à prendre en considération dans l'application du critère de la partie intégrante d'une culture distinctive

Il convient de préciser davantage le critère énoncé plus haut — savoir que les droits ancestraux résident dans les coutumes, pratiques et traditions qui font partie intégrante des cultures distinctives des peuples autochtones — pour ce qui concerne la nature de l'examen que doit faire le tribunal saisi de la revendication de droits ancestraux. Je vais maintenant donner ces précisions, en me concentrant sur des questions telles que la période pertinente pour cet examen, la bonne façon d'apprécier la preuve présentée, le caractère spécifique de l'examen du tribunal, le rapport entre les droits ancestraux et les droits des autochtones en tant que citoyens canadiens et, enfin, la norme à laquelle une coutume, une pratique ou une tradition doit satisfaire pour être considérée comme une «partie intégrante».

Les tribunaux doivent tenir compte du point de vue des autochtones eux-mêmes

Dans son appréciation d'une revendication invoquant l'existence d'un droit ancestral, le tribunal doit tenir compte du point de vue des autochtones qui revendiquent ce droit. Dans *Sparrow*, précité, le juge en chef Dickson et le juge La Forest ont décidé, à la p. 1112, qu'il est «crucial de se montrer ouvert au point de vue des autochtones eux-mêmes quant à la nature des droits en cause». Toutefois, il faut également reconnaître que ce point de vue doit être exprimé d'une manière compatible avec l'organisation juridique et constitutionnelle du Canada. Comme il a déjà été signalé, un des objets fondamentaux du par. 35(1) est la conciliation de la préexistence de sociétés autochtones distinctives avec l'affirmation de la souveraineté de Sa Majesté. Les tribunaux appelés à statuer sur des

that aboriginal rights exist within the general legal system of Canada. To quote again Walters, at p. 413: “a morally and politically defensible conception of aboriginal rights will incorporate both [aboriginal and non-aboriginal] legal perspectives”. The definition of an aboriginal right must, if it is truly to reconcile the prior occupation of Canadian territory by aboriginal peoples with the assertion of Crown sovereignty over that territory, take into account the aboriginal perspective, yet do so in terms which are cognizable to the non-aboriginal legal system.

It is possible, of course, that the Court could be said to be “reconciling” the prior occupation of Canada by aboriginal peoples with Crown sovereignty through either a narrow or broad conception of aboriginal rights; the notion of “reconciliation” does not, in the abstract, mandate a particular content for aboriginal rights. However, the only fair and just reconciliation is, as Walters suggests, one which takes into account the aboriginal perspective while at the same time taking into account the perspective of the common law. True reconciliation will, equally, place weight on each.

Courts must identify precisely the nature of the claim being made in determining whether an aboriginal claimant has demonstrated the existence of an aboriginal right

Related to this is the fact that in assessing a claim to an aboriginal right a court must first identify the nature of the right being claimed; in order to determine whether a claim meets the test of being integral to the distinctive culture of the aboriginal group claiming the right, the court must first correctly determine what it is that is being claimed. The correct characterization of the appellant’s claim is of importance because whether or not the evidence supports the appellant’s claim will depend, in significant part, on what, exactly, that evidence is being called to support.

revendications de droits ancestraux doivent donc se montrer ouverts au point de vue des autochtones, tout en étant conscients que les droits ancestraux existent dans les limites du système juridique canadien. Pour citer de nouveau Mark Walters, à la p. 413: [TRADUCTION] «une conception moralement et politiquement défendable des droits ancestraux intégrera les deux points de vue juridiques [autochtone et non autochtone]». Pour concilier véritablement l’occupation antérieure du territoire canadien par les peuples autochtones avec l’affirmation par Sa Majesté de sa souveraineté sur celui-ci, un droit ancestral doit être défini d’une manière qui, tout en tenant compte du point de vue des autochtones, soit néanmoins compatible avec le système juridique non autochtone.

Évidemment, il est possible que l’on dise que la Cour «concilie» l’occupation antérieure du pays par les peuples autochtones avec la souveraineté de Sa Majesté suivant une conception soit restrictive, soit libérale des droits ancestraux; la notion de «conciliation» ne commande pas, dans l’abstrait, que l’on donne un contenu particulier aux droits ancestraux. Cela dit, toutefois, la seule façon juste et équitable de faire cette conciliation est, comme le propose Mark Walters, de tenir compte à la fois du point de vue des autochtones et de la common law. La conciliation véritable accorde, également, de l’importance à chacun de ces éléments.

Les tribunaux doivent déterminer avec précision la nature de la revendication en cause lorsqu’il décide si le requérant autochtone a établi l’existence d’un droit ancestral

Se rattache à cette question le fait que, dans l’appréciation de la revendication d’un droit ancestral, le tribunal doit d’abord déterminer la nature du droit revendiqué. Pour juger si une revendication satisfait au critère de la partie intégrante de la culture distinctive du groupe autochtone qui revendique ce droit, le tribunal doit d’abord délimiter correctement ce qui est revendiqué. Il est important de bien caractériser la revendication de l’appelante, car la réponse à la question de savoir si la preuve étaye sa revendication dépend, dans une large mesure, de la nature précise de ce que la preuve vise à établir.

52

I would note here by way of illustration that, in my view, both the majority and the dissenting judges in the Court of Appeal erred with respect to this aspect of the inquiry. The majority held that the appellant's claim was that the practice of selling fish "on a commercial basis" constituted an aboriginal right and, in part, rejected her claim on the basis that the evidence did not support the existence of such a right. With respect, this characterization of the appellant's claim is in error; the appellant's claim was that the practice of selling fish was an aboriginal right, not that selling fish "on a commercial basis" was. It was however, equally incorrect to adopt, as Lambert J.A. did, a "social" test for the identification of the practice, tradition or custom constituting the aboriginal right. The social test casts the aboriginal right in terms that are too broad and in a manner which distracts the court from what should be its main focus — the nature of the aboriginal community's practices, customs or traditions themselves. The nature of an applicant's claim must be delineated in terms of the particular practice, custom or tradition under which it is claimed; the significance of the practice, custom or tradition to the aboriginal community is a factor to be considered in determining whether the practice, custom or tradition is integral to the distinctive culture, but the significance of a practice, custom or tradition cannot, itself, constitute an aboriginal right.

53

To characterize an applicant's claim correctly, a court should consider such factors as the nature of the action which the applicant is claiming was done pursuant to an aboriginal right, the nature of the governmental regulation, statute or action being impugned, and the practice, custom or tradition being relied upon to establish the right. In this case, therefore, the Court will consider the actions which led to the appellant's being charged, the fishery regulation under which she was charged and the practices, customs and traditions she invokes in support of her claim.

Je ferai remarquer ici, à titre d'exemple, qu'à mon sens tant les juges de la majorité que les dissidents en Cour d'appel ont fait erreur sur cet aspect de l'examen. Les juges de la majorité ont conclu que l'appelante soutenait que la pratique consistant à vendre du poisson «commerciallement» constituait un droit ancestral, et ils ont en partie rejeté sa revendication pour le motif que la preuve n'appuyait pas l'existence d'un tel droit. Avec égards, cette caractérisation de la revendication de l'appelante est erronée. L'appelante prétendait que la pratique qui consiste à vendre du poisson est un droit ancestral, et non que le fait de vendre «commerciallement» du poisson est un tel droit. Toutefois, il était tout aussi inexact d'adopter, comme l'a fait le juge Lambert, un critère «social» afin d'identifier la coutume, pratique ou tradition qui constitue le droit ancestral. Le critère social a pour effet de décrire le droit ancestral dans des termes trop larges et d'une façon qui éloigne le tribunal de ce qui doit être l'aspect principal de son examen — la nature des coutumes, pratiques ou traditions mêmes de la collectivité autochtone. La nature de la revendication du demandeur doit être définie en fonction de la coutume, pratique ou tradition particulière invoquée au soutien de celle-ci. L'importance de la coutume, pratique ou tradition pour la collectivité autochtone est un facteur qui doit être pris en considération pour décider si cette coutume, pratique ou tradition fait partie intégrante de la culture distinctive, mais l'importance d'une coutume, pratique ou tradition ne peut, en soi, faire de celle-ci un droit ancestral.

Pour bien caractériser la revendication du demandeur, le tribunal doit tenir compte de facteurs tels que la nature de l'acte qui, d'affirmer le demandeur, a été accompli en vertu d'un droit ancestral, la nature du règlement, de la loi ou de l'autre mesure gouvernementale contestée, ainsi que la coutume, pratique ou tradition invoquée pour établir l'existence du droit. Par conséquent, dans la présente espèce, notre Cour prendra en considération les actes qui ont conduit à l'inculpation de l'appelante, le règlement de pêche en vertu duquel elle a été inculpée et les coutumes, pratiques et traditions qu'elle invoque à l'appui de sa revendication.

It should be acknowledged that a characterization of the nature of the appellant's claim from the actions which led to her being charged must be undertaken with some caution. In order to inform the court's analysis the activities must be considered at a general rather than at a specific level. Moreover, the court must bear in mind that the activities may be the exercise in a modern form of a practice, custom or tradition that existed prior to contact, and should vary its characterization of the claim accordingly.

In order to be integral a practice, custom or tradition must be of central significance to the aboriginal society in question

To satisfy the integral to a distinctive culture test the aboriginal claimant must do more than demonstrate that a practice, custom or tradition was an aspect of, or took place in, the aboriginal society of which he or she is a part. The claimant must demonstrate that the practice, custom or tradition was a central and significant part of the society's distinctive culture. He or she must demonstrate, in other words, that the practice, custom or tradition was one of the things which made the culture of the society distinctive — that it was one of the things that truly made the society what it was.

This aspect of the integral to a distinctive culture test arises from fact that aboriginal rights have their basis in the prior occupation of Canada by distinctive aboriginal societies. To recognize and affirm the prior occupation of Canada by distinctive aboriginal societies it is to what makes those societies distinctive that the court must look in identifying aboriginal rights. The court cannot look at those aspects of the aboriginal society that are true of every human society (e.g., eating to survive), nor can it look at those aspects of the aboriginal society that are only incidental or occasional to that society; the court must look instead to the defining and central attributes of the aboriginal society in question. It is only by focusing on the aspects of the aboriginal society that make that society distinctive that the definition of aboriginal

Il convient de reconnaître qu'il faut faire preuve de prudence en caractérisant la revendication de l'appelante à partir des actes qui ont conduit à son inculpation. Pour se guider dans son analyse, le tribunal doit examiner ces activités d'un point de vue général et non spécifique. De plus, le tribunal ne doit pas perdre de vue qu'il est possible que les activités en question soient l'exercice, sous une forme contemporaine, d'une coutume, pratique ou tradition qui existait avant le contact avec les Européens, auquel cas il doit adapter sa caractérisation de la revendication en conséquence.

Pour faire partie intégrante d'une culture distinctive, une coutume, pratique ou tradition doit avoir une importance fondamentale pour la société autochtone concernée

Pour satisfaire au critère de l'élément faisant partie intégrante d'une culture distinctive, le demandeur autochtone doit non seulement démontrer qu'une coutume, pratique ou tradition était un aspect de la société autochtone à laquelle il appartient ou qu'elle y était exercée, mais en outre qu'elle était un élément fondamental et important de la culture distinctive de cette société. Autrement dit, il doit établir que la coutume, pratique ou tradition était l'une des choses qui rendaient la culture de la société distinctive — que c'était l'une des choses qui véritablement faisait de la société ce qu'elle était.

Cet aspect du critère de la partie intégrante d'une culture distinctive découle du fait que les droits ancestraux sont fondés sur l'occupation antérieure du Canada par des sociétés autochtones distinctives. Pour reconnaître et confirmer l'occupation antérieure du pays par des sociétés autochtones distinctives, le tribunal doit, dans l'identification des droits ancestraux, s'attacher à ce qui rend ces sociétés distinctives. Il ne peut tenir compte des aspects de la société autochtone qui sont communs à toutes les sociétés humaines (p. ex. le fait de manger pour survivre), ni des aspects de la société autochtone qui n'ont qu'un caractère secondaire ou occasionnel; le tribunal doit plutôt s'attacher aux attributs fondamentaux de la société autochtone concernée, qui la définissent. Ce n'est que si elle s'attache aux aspects de la

rights will accomplish the purpose underlying s. 35(1).

société autochtone qui rendent celle-ci distinctive que la définition des droits ancestraux permettra la réalisation de l'objet qui sous-tend le par. 35(1).

Moreover, the aboriginal rights protected by s. 35(1) have been said to have the purpose of reconciling pre-existing aboriginal societies with the assertion of Crown sovereignty over Canada. To reconcile aboriginal societies with Crown sovereignty it is necessary to identify the distinctive features of those societies; it is precisely those distinctive features which need to be acknowledged and reconciled with the sovereignty of the Crown.

Qui plus est, les droits ancestraux protégés par le par. 35(1) ont pour objet, a-t-on affirmé, de concilier les sociétés autochtones préexistantes avec l'affirmation par Sa Majesté de sa souveraineté sur le Canada. Pour ce faire, il est nécessaire d'identifier les caractéristiques distinctives de ces sociétés, car ce sont précisément ces caractéristiques distinctives qui doivent être reconnues et conciliées avec la souveraineté de Sa Majesté.

As was noted earlier, Lambert J.A. erred when he used the significance of a practice, custom or tradition as a means of identifying what the practice, custom or tradition is; however, he was correct to recognize that the significance of the practice, custom or tradition is important. The significance of the practice, custom or tradition does not serve to identify the nature of a claim of acting pursuant to an aboriginal right; however, it is a key aspect of the court's inquiry into whether a practice, custom or tradition has been shown to be an integral part of the distinctive culture of an aboriginal community. The significance of the practice, custom or tradition will inform a court as to whether or not that practice, custom or tradition can be said to be truly integral to the distinctive culture in question.

Comme il a été indiqué précédemment, le juge Lambert a commis une erreur en se servant de l'importance d'une coutume, pratique ou tradition comme moyen d'identifier cette coutume, pratique ou tradition. Toutefois, il a eu raison de reconnaître que l'importance de la coutume, pratique ou tradition est un facteur clé. L'importance de la coutume, pratique ou tradition ne sert pas à identifier la nature de la prétention du demandeur qu'il a agi en vertu d'un droit ancestral. Cependant, il s'agit d'un aspect essentiel de l'examen du tribunal sur la question de savoir si la preuve établit qu'une coutume, pratique ou tradition fait partie intégrante de la culture distinctive d'une collectivité autochtone. L'importance de la coutume, pratique ou tradition guidera le tribunal dans son analyse de la question de savoir s'il est possible d'affirmer qu'elle fait vraiment partie intégrante de la culture distinctive en cause.

A practical way of thinking about this problem is to ask whether, without this practice, custom or tradition, the culture in question would be fundamentally altered or other than what it is. One must ask, to put the question affirmatively, whether or not a practice, custom or tradition is a defining feature of the culture in question.

Une façon pratique d'aborder ce problème est de se demander si, sans cette coutume, pratique ou tradition, la culture en cause serait fondamentalement modifiée ou différente. Reformulée affirmativement, cette question consiste à se demander si la coutume, pratique ou tradition est une caractéristique déterminante de la culture en cause.

The practices, customs and traditions which constitute aboriginal rights are those which have continuity with the practices, customs and traditions that existed prior to contact

Constituent des droits ancestraux les coutumes, pratiques et traditions qui marquent la continuité avec les coutumes, pratiques et traditions qui existaient avant le contact avec les Européens

The time period that a court should consider in identifying whether the right claimed meets the

La période que doit prendre en considération le tribunal pour décider si le droit revendiqué satisfait

standard of being integral to the aboriginal community claiming the right is the period prior to contact between aboriginal and European societies. Because it is the fact that distinctive aboriginal societies lived on the land prior to the arrival of Europeans that underlies the aboriginal rights protected by s. 35(1), it is to that pre-contact period that the courts must look in identifying aboriginal rights.

The fact that the doctrine of aboriginal rights functions to reconcile the existence of pre-existing aboriginal societies with the sovereignty of the Crown does not alter this position. Although it is the sovereignty of the Crown that the pre-existing aboriginal societies are being reconciled with, it is to those pre-existing societies that the court must look in defining aboriginal rights. It is not the fact that aboriginal societies existed prior to Crown sovereignty that is relevant; it is the fact that they existed prior to the arrival of Europeans in North America. As such, the relevant time period is the period prior to the arrival of Europeans, not the period prior to the assertion of sovereignty by the Crown.

That this is the relevant time should not suggest, however, that the aboriginal group claiming the right must accomplish the next to impossible task of producing conclusive evidence from pre-contact times about the practices, customs and traditions of their community. It would be entirely contrary to the spirit and intent of s. 35(1) to define aboriginal rights in such a fashion so as to preclude in practice any successful claim for the existence of such a right. The evidence relied upon by the applicant and the courts may relate to aboriginal practices, customs and traditions post-contact; it simply needs to be directed at demonstrating which aspects of the aboriginal community and society have their origins pre-contact. It is those practices, customs and traditions that can be rooted in the

au critère de la partie intégrante de la culture distinctive de la collectivité autochtone qui revendique le droit en cause est la période qui a précédé le contact entre les sociétés autochtones et européennes. Comme c'est le fait que des sociétés autochtones distinctives vivaient sur le territoire avant l'arrivée des Européens qui est le fondement des droits ancestraux protégés par le par. 35(1), c'est à cette période antérieure au contact que les tribunaux doivent s'attacher dans l'identification des droits ancestraux.

Le fait que la doctrine des droits ancestraux sert à concilier la souveraineté de Sa Majesté avec l'existence de sociétés autochtones préexistantes n'y change rien. Bien que ce soit avec la souveraineté de Sa Majesté que les sociétés autochtones préexistantes sont conciliées, c'est à l'examen de ces sociétés préexistantes que doivent s'attacher les tribunaux dans la définition des droits ancestraux. Ce n'est pas le fait que des sociétés autochtones existaient avant l'affirmation de la souveraineté par Sa Majesté qui est pertinente mais le fait qu'elles existaient avant l'arrivée des Européens en Amérique du Nord. En conséquence, la période pertinente est celle qui a précédé l'arrivée des Européens, et non celle qui a précédé l'affirmation par Sa Majesté de sa souveraineté.

Le fait qu'il s'agisse là de la période pertinente n'emporte cependant pas que le groupe autochtone revendiquant le droit en cause doit s'acquitter de la tâche pratiquement impossible de produire, relativement aux coutumes, pratiques et traditions de sa collectivité, une preuve concluante, datant de l'époque antérieure au contact avec les Européens. Il serait tout à fait contraire à l'esprit et au but du par. 35(1) de définir les droits ancestraux d'une manière qui, dans la pratique, vouerait à l'échec toute revendication de l'existence de tels droits. La preuve sur laquelle s'appuient le demandeur et les tribunaux peut se rapporter aux coutumes, pratiques et traditions autochtones postérieures au contact avec les Européens. Il suffit que cette preuve tende à démontrer lesquels des aspects de la collectivité et de la société autochtones datent d'avant le contact avec les Européens. Constitueront des droits ancestraux les coutumes, pratiques

pre-contact societies of the aboriginal community in question that will constitute aboriginal rights.

63

I would note in relation to this point the position adopted by Brennan J. in *Mabo, supra*, where he holds, at p. 60, that in order for an aboriginal group to succeed in its claim for aboriginal title it must demonstrate that the connection with the land in its customs and laws has continued to the present day:

... when the tide of history has washed away any real acknowledgment of traditional law and any real observance of traditional customs, the foundation of native title has disappeared. A native title which has ceased with the abandoning of laws and customs based on tradition cannot be revived for contemporary recognition.

The relevance of this observation for identifying the rights in s. 35(1) lies not in its assertion of the effect of the disappearance of a practice, custom or tradition on an aboriginal claim (I take no position on that matter), but rather in its suggestion of the importance of considering the continuity in the practices, customs and traditions of aboriginal communities in assessing claims to aboriginal rights. It is precisely those present practices, customs and traditions which can be identified as having continuity with the practices, customs and traditions that existed prior to contact that will be the basis for the identification and definition of aboriginal rights under s. 35(1). Where an aboriginal community can demonstrate that a particular practice, custom or tradition is integral to its distinctive culture today, and that this practice, custom or tradition has continuity with the practices, customs and traditions of pre-contact times, that community will have demonstrated that the practice, custom or tradition is an aboriginal right for the purposes of s. 35(1).

64

The concept of continuity is also the primary means through which the definition and identification of aboriginal rights will be consistent with the

et traditions dont l'origine peut être attribuée aux ancêtres de la collectivité autochtone en cause, qui vivaient avant le contact avec les Européens.

Sur ce point, je tiens à souligner la position adoptée par le juge Brennan dans l'arrêt *Mabo*, précité, où il a statué, à la p. 60, que pour avoir gain de cause le groupe autochtone qui revendique un titre aborigène doit établir que le lien rattachant ses coutumes et ses lois au territoire s'est perpétué jusqu'à nos jours:

[TRADUCTION] ... quand, par suite de la marche du temps, les coutumes et les lois traditionnelles ont, dans les faits, cessé d'être observées, le fondement du titre aborigène a disparu. Il est impossible de faire renaître, en vue d'une reconnaissance contemporaine, un titre aborigène qui s'est éteint par suite de l'abandon des coutumes et des lois fondées sur la tradition.

La pertinence de cette observation pour l'identification des droits visés au par. 35(1) ne réside pas dans les propos concernant l'effet de la disparition d'une coutume, d'une pratique ou d'une tradition sur une revendication autochtone (je ne me prononce pas sur ce point), mais dans l'idée qui y est avancée relativement à l'importance de tenir compte, dans l'appréciation des revendications de droits ancestraux, de la continuité des coutumes, pratiques et traditions des collectivités autochtones. Ce sont précisément les coutumes, pratiques et traditions actuelles, à l'égard desquelles il est possible d'établir qu'elles marquent une continuité avec les coutumes, pratiques et traditions qui existaient avant le contact avec les Européens, qui serviront de fondement pour l'identification et la définition des droits ancestraux visés au par. 35(1). Quand une collectivité autochtone peut démontrer qu'une coutume, pratique ou tradition particulière fait partie intégrante de sa culture distinctive aujourd'hui et marque une continuité avec les coutumes, pratiques et traditions de l'époque antérieure au contact avec les Européens, cette collectivité aura fait la preuve que cette coutume, pratique ou tradition est un droit ancestral au sens du par. 35(1).

Le concept de continuité est aussi le principal moyen d'assurer que la définition et l'identification des droits ancestraux respectent la mise en

admonition in *Sparrow, supra*, at p. 1093, that “the phrase ‘existing aboriginal rights’ must be interpreted flexibly so as to permit their evolution over time”. The concept of continuity is, in other words, the means by which a “frozen rights” approach to s. 35(1) will be avoided. Because the practices, customs and traditions protected by s. 35(1) are ones that exist today, subject only to the requirement that they be demonstrated to have continuity with the practices, customs and traditions which existed pre-contact, the definition of aboriginal rights will be one that, on its own terms, prevents those rights from being frozen in pre-contact times. The evolution of practices, customs and traditions into modern forms will not, provided that continuity with pre-contact practices, customs and traditions is demonstrated, prevent their protection as aboriginal rights.

I would note that the concept of continuity does not require aboriginal groups to provide evidence of an unbroken chain of continuity between their current practices, customs and traditions, and those which existed prior to contact. It may be that for a period of time an aboriginal group, for some reason, ceased to engage in a practice, custom or tradition which existed prior to contact, but then resumed the practice, custom or tradition at a later date. Such an interruption will not preclude the establishment of an aboriginal right. Trial judges should adopt the same flexibility regarding the establishment of continuity that, as is discussed, *infra*, they are to adopt with regards to the evidence presented to establish the prior-to-contact practices, customs and traditions of the aboriginal group making the claim to an aboriginal right.

Further, I would note that basing the identification of aboriginal rights in the period prior to contact is not inconsistent with the fact that s. 35(2) of the *Constitution Act, 1982* includes within the defi-

garde faite dans *Sparrow*, précité, à la p. 1093, savoir que «l'expression «droits ancestraux existants» doit recevoir une interprétation souple de manière à permettre à ces droits d'évoluer avec le temps». En d'autres mots, le concept de continuité est le moyen qui permet d'éviter une interprétation du par. 35(1) fondée sur la notion de «droits figés». Comme les coutumes, pratiques et traditions que protège le par. 35(1) sont celles qui existent aujourd'hui, sous réserve seulement de l'obligation de démontrer qu'elles marquent une continuité avec les coutumes, pratiques et traditions qui existaient avant le contact avec les Européens, il faut que la définition elle-même des droits ancestraux évite que ces droits soient figés dans l'état où ils se trouvaient avant cette époque. L'évolution des coutumes, pratiques et traditions, jusque dans leur forme actuelle, ne les empêchera pas d'être protégées en tant que droits ancestraux, pourvu qu'on démontre qu'elles marquent une continuité avec les coutumes, pratiques et traditions d'avant le contact avec les Européens.

Je tiens à faire remarquer que le concept de continuité n'exige pas que les groupes autochtones fassent la preuve d'une continuité parfaite entre leurs coutumes, pratiques et traditions actuelles et celles qui existaient avant le contact avec les Européens. Il est possible que, pour une raison ou pour une autre, un groupe autochtone ait, pendant une certaine période, cessé de respecter une coutume, pratique ou tradition qui existait avant le contact avec les Européens, mais qu'il l'ait reprise ultérieurement. Une telle interruption n'empêche pas l'établissement d'un droit ancestral. Les juges qui entendent les procès devraient faire montre de la même souplesse relativement à la preuve de la continuité qu'en ce qui concerne, comme il est expliqué plus loin, la preuve présentée dans le but d'établir l'existence, avant le contact avec les Européens, des coutumes, pratiques et traditions du groupe autochtone qui revendique un droit ancestral.

Qui plus est, je tiens aussi à souligner que le fait de se reporter à la période antérieure au contact avec les Européens pour identifier les droits ancestraux n'est pas incompatible avec le fait que, aux

nition of "aboriginal peoples of Canada" the Métis people of Canada.

67

Although s. 35 includes the Métis within its definition of "aboriginal peoples of Canada", and thus seems to link their claims to those of other aboriginal peoples under the general heading of "aboriginal rights", the history of the Métis, and the reasons underlying their inclusion in the protection given by s. 35, are quite distinct from those of other aboriginal peoples in Canada. As such, the manner in which the aboriginal rights of other aboriginal peoples are defined is not necessarily determinative of the manner in which the aboriginal rights of the Métis are defined. At the time when this Court is presented with a Métis claim under s. 35 it will then, with the benefit of the arguments of counsel, a factual context and a specific Métis claim, be able to explore the question of the purposes underlying s. 35's protection of the aboriginal rights of Métis people, and answer the question of the kinds of claims which fall within s. 35(1)'s scope when the claimants are Métis. The fact that, for other aboriginal peoples, the protection granted by s. 35 goes to the practices, customs and traditions of aboriginal peoples prior to contact, is not necessarily relevant to the answer which will be given to that question. It may, or it may not, be the case that the claims of the Métis are determined on the basis of the pre-contact practices, customs and traditions of their aboriginal ancestors; whether that is so must await determination in a case in which the issue arises.

Courts must approach the rules of evidence in light of the evidentiary difficulties inherent in adjudicating aboriginal claims

68

In determining whether an aboriginal claimant has produced evidence sufficient to demonstrate that her activity is an aspect of a practice, custom or tradition integral to a distinctive aboriginal cul-

termes du par. 35(2) de la *Loi constitutionnelle de 1982*, les Métis sont compris dans la définition de «peuples autochtones du Canada».

Même si les Métis sont compris dans la définition de «peuples autochtones du Canada» à l'art. 35 et que, de ce fait, leurs revendications semblent rattachées à celles des autres peuples autochtones, sous la rubrique générale «droits ancestraux», l'histoire des Métis et les raisons qui sous-tendent leur inclusion pour qu'ils bénéficient de la protection accordée par l'art. 35 diffèrent considérablement de celles qui concernent les autres peuples autochtones du Canada. Comme telle, la manière dont les droits ancestraux des autres peuples autochtones sont définis n'est pas nécessairement déterminante en ce qui concerne la manière dont sont définis ceux des Métis. Lorsque notre Cour sera saisie d'une revendication présentée par des Métis en vertu de l'art. 35, elle sera alors à même, grâce aux arguments des avocats, du contexte factuel et du fait que la revendication touche spécifiquement les Métis, d'examiner la question des objets qui sous-tendent la protection accordée par l'art. 35 aux droits ancestraux des Métis et de déterminer le genre de revendications qui relèvent du par. 35(1) dans les cas où les demandeurs sont des Métis. Le fait que, en ce qui concerne d'autres peuples autochtones, l'art. 35 protège leurs coutumes, pratiques et traditions qui existaient avant le contact avec les Européens n'est pas nécessairement pertinent pour ce qui est de la réponse qui sera donnée à cette question. Il est possible qu'il soit statué sur les revendications des Métis sur la base des coutumes, pratiques et traditions de leurs ancêtres autochtones avant le contact avec les Européens, mais il se peut aussi que non. Il faudra attendre une affaire où cette question se posera avant de connaître la réponse.

Dans l'application des règles de preuve, les tribunaux doivent tenir compte des difficultés inhérentes à l'examen des affaires concernant des revendications autochtones

Pour déterminer si un demandeur autochtone a produit une preuve suffisante pour établir que ses activités sont un aspect d'une coutume, pratique ou tradition qui fait partie intégrante d'une culture

ture, a court should approach the rules of evidence, and interpret the evidence that exists, with a consciousness of the special nature of aboriginal claims, and of the evidentiary difficulties in proving a right which originates in times where there were no written records of the practices, customs and traditions engaged in. The courts must not undervalue the evidence presented by aboriginal claimants simply because that evidence does not conform precisely with the evidentiary standards that would be applied in, for example, a private law torts case.

Claims to aboriginal rights must be adjudicated on a specific rather than general basis

Courts considering a claim to the existence of an aboriginal right must focus specifically on the practices, customs and traditions of the particular aboriginal group claiming the right. In the case of *Kruger, supra*, this Court rejected the notion that claims to aboriginal rights could be determined on a general basis. This position is correct; the existence of an aboriginal right will depend entirely on the practices, customs and traditions of the particular aboriginal community claiming the right. As has already been suggested, aboriginal rights are constitutional rights, but that does not negate the central fact that the interests aboriginal rights are intended to protect relate to the specific history of the group claiming the right. Aboriginal rights are not general and universal; their scope and content must be determined on a case-by-case basis. The fact that one group of aboriginal people has an aboriginal right to do a particular thing will not be, without something more, sufficient to demonstrate that another aboriginal community has the same aboriginal right. The existence of the right will be specific to each aboriginal community.

For a practice, custom or tradition to constitute an aboriginal right it must be of independent

autochtone distinctive, le tribunal doit appliquer les règles de preuve et interpréter la preuve existante en étant conscient de la nature particulière des revendications des autochtones et des difficultés que soulève la preuve d'un droit qui remonte à une époque où les coutumes, pratiques et traditions n'étaient pas consignées par écrit. Les tribunaux doivent se garder d'accorder un poids insuffisant à la preuve présentée par les demandeurs autochtones simplement parce que cette preuve ne respecte pas de façon précise les normes qui seraient appliquées dans une affaire de responsabilité civile délictuelle par exemple.

Les revendications de droits ancestraux doivent être tranchées de manière spécifique et non générale

Le tribunal saisi d'une revendication fondée sur l'existence d'un droit ancestral doit s'attacher spécifiquement à l'examen des coutumes, pratiques et traditions du groupe autochtone qui revendique ce droit. Dans *Kruger*, précité, notre Cour a rejeté l'idée que les revendications de droits ancestraux pouvaient être tranchées de manière générale. Cette position est bien fondée. L'existence d'un droit ancestral dépend entièrement des coutumes, pratiques et traditions de la collectivité autochtone qui revendique le droit. Comme il a été dit plus tôt, même si les droits ancestraux sont des droits constitutionnels, cela n'enlève rien au fait capital que les intérêts que les droits ancestraux sont censés protéger se rapportent à l'histoire spécifique du groupe qui revendique le droit. Les droits ancestraux n'ont pas un caractère général et universel. Leur portée et leur contenu doivent être déterminés au cas par cas. Le fait qu'un groupe autochtone possède le droit ancestral de faire une chose donnée ne permet pas, à lui seul, d'établir qu'une autre collectivité autochtone a le même droit. L'existence du droit en question dépendra de la situation spécifique de chaque collectivité autochtone.

Pour qu'une coutume, une pratique ou une tradition constitue un droit ancestral, elle doit avoir

significance to the aboriginal culture in which it exists

une importance particulière pour la culture autochtone où elle existe

70

In identifying those practices, customs and traditions that constitute the aboriginal rights recognized and affirmed by s. 35(1), a court must ensure that the practice, custom or tradition relied upon in a particular case is independently significant to the aboriginal community claiming the right. The practice, custom or tradition cannot exist simply as an incident to another practice, custom or tradition but must rather be itself of integral significance to the aboriginal society. Where two customs exist, but one is merely incidental to the other, the custom which is integral to the aboriginal community in question will qualify as an aboriginal right, but the custom that is merely incidental will not. Incidental practices, customs and traditions cannot qualify as aboriginal rights through a process of piggybacking on integral practices, customs and traditions.

Le tribunal appelé à identifier les coutumes, pratiques et traditions qui constituent les droits ancestraux reconnus et confirmés par le par. 35(1) doit s'assurer que la coutume, la pratique ou la tradition invoquée dans un cas donné revêt une importance particulière pour la collectivité autochtone qui revendique le droit. Il ne doit pas s'agir d'une coutume, pratique ou tradition simplement accessoire d'une autre coutume, pratique ou tradition, mais elle doit plutôt présenter elle-même une importance fondamentale pour la société autochtone concernée. Lorsqu'il existe deux coutumes, mais que l'une d'elles est simplement un accessoire de l'autre, la coutume qui fait partie intégrante de la culture de la collectivité autochtone en cause sera considérée comme un droit ancestral, mais pas celle qui a simplement un caractère accessoire. Les coutumes, pratiques et traditions accessoires ne peuvent être considérées comme des droits ancestraux du fait qu'elles se greffent sur des coutumes, pratiques et traditions faisant partie intégrante d'une culture.

1996 CanLII 210 (2000)

The integral to a distinctive culture test requires that a practice, custom or tradition be distinctive; it does not require that that practice, custom or tradition be distinct

Le critère de la partie intégrante d'une culture distinctive exige qu'une coutume, pratique ou tradition soit distinctive, non pas qu'elle soit distincte

71

The standard which a practice, custom or tradition must meet in order to be recognized as an aboriginal right is not that it be distinct to the aboriginal culture in question; the aboriginal claimants must simply demonstrate that the practice, custom or tradition is distinctive. A tradition or custom that is distinct is one that is unique — “different in kind or quality; unlike” (*Concise Oxford Dictionary, supra*). A culture with a distinct tradition must claim that in having such a tradition it is different from other cultures; a claim of distinctness is, by its very nature, a claim relative to other cultures or traditions. By contrast, a culture that claims that a practice, custom or tradition is distinctive — “distinguishing, characteristic” — makes a claim that is not relative; the claim is rather one about the culture's own practices, customs or traditions considered apart from the prac-

La norme qui doit être respectée par une coutume, pratique ou tradition pour être reconnue comme un droit ancestral n'est pas qu'elle soit une coutume, pratique ou tradition distincte, propre à la culture autochtone en cause. Les demandeurs autochtones doivent simplement montrer que la coutume, pratique ou tradition en cause est distinctive. Est une coutume, pratique ou tradition distincte une coutume, pratique ou tradition qui est unique — [TRADUCTION] «qui se distingue par sa nature ou sa qualité; différente» (*Concise Oxford Dictionary, loc. cit.*) Une culture qui possède une tradition distincte doit affirmer que, du fait de cette tradition, elle est différente des autres cultures. Une prétention à la différence appelle, de par sa nature même, une comparaison avec d'autres cultures ou traditions. Par contraste, la culture qui prétend qu'une coutume, pratique ou tradition est dis-

tices, customs or traditions of any other culture. It is a claim that this tradition or custom makes the culture what it is, not that the practice, custom or tradition is different from the practices, customs or traditions of another culture. The person or community claiming the existence of an aboriginal right protected by s. 35(1) need only show that the particular practice, custom or tradition which it is claiming to be an aboriginal right is distinctive, not that it is distinct.

That the standard an aboriginal community must meet is distinctiveness, not distinctness, arises from the recognition in *Sparrow, supra*, of an aboriginal right to fish for food. Certainly no aboriginal group in Canada could claim that its culture is "distinct" or unique in fishing for food; fishing for food is something done by many different cultures and societies around the world. What the Musqueam claimed in *Sparrow, supra*, was rather that it was fishing for food which, in part, made Musqueam culture what it is; fishing for food was characteristic of Musqueam culture and, therefore, a distinctive part of that culture. Since it was so it constituted an aboriginal right under s. 35(1).

The influence of European culture will only be relevant to the inquiry if it is demonstrated that the practice, custom or tradition is only integral because of that influence

The fact that Europeans in North America engaged in the same practices, customs or traditions as those under which an aboriginal right is claimed will only be relevant to the aboriginal claim if the practice, custom or tradition in question can only be said to exist because of the influence of European culture. If the practice, custom or tradition was an integral part of the aboriginal community's culture prior to contact with Europe-

tinutive — «qui permet de distinguer, caractéristique» — ne fait pas de comparaison. Sa prétention se rapporte plutôt à ses propres coutumes, pratiques et traditions, considérées indépendamment de celles de toute autre culture. La culture en question prétend que cette coutume, pratique ou tradition fait d'elle ce qu'elle est, et non que la coutume, pratique ou tradition est différente de celles d'une autre culture. La personne ou la collectivité qui prétend à l'existence d'un droit ancestral protégé par le par. 35(1) n'a qu'à démontrer que la coutume, pratique ou tradition particulière qu'elle revendique comme un droit ancestral est distinctive, et non qu'elle est distincte.

Le fait que la norme à laquelle doit satisfaire une collectivité autochtone est celle du caractère distinctif et non du caractère distinct découle de la reconnaissance, dans *Sparrow*, précité, de l'existence d'un droit ancestral de pêcher à des fins alimentaires. Il est certain qu'aucun groupe autochtone au Canada ne saurait prétendre que sa culture est «distincte» ou unique du fait qu'il pêche à des fins alimentaires. La pêche à des fins alimentaires est en effet pratiquée par bon nombre de cultures et de sociétés différentes aux quatre coins du monde. Ce que les Musqueams soutenaient dans *Sparrow*, précité, c'était plutôt que cette pêche contribuait à faire de la culture musqueam ce qu'elle est. La pêche à des fins alimentaires était caractéristique de la culture musqueam et, par conséquent, un élément distinctif de cette culture. De ce fait, elle constituait un droit ancestral visé au par. 35(1).

L'influence de la culture européenne n'est pertinente, dans le cadre de l'examen, que s'il est démontré que la coutume, la pratique ou la tradition ne fait partie intégrante de la culture qu'en raison de cette influence

Le fait que les Européens aient eu, en Amérique du Nord, des coutumes, pratiques ou traditions identiques à celles invoquées pour revendiquer un droit ancestral n'est pertinent pour l'appréciation de la revendication autochtone que s'il est possible d'affirmer que la coutume, pratique ou tradition en question n'existe qu'en raison de l'influence de la culture européenne. Si la coutume, pratique ou tradition faisait partie intégrante de la culture d'une

ans, the fact that that practice, custom or tradition continued after the arrival of Europeans, and adapted in response to their arrival, is not relevant to determination of the claim; European arrival and influence cannot be used to deprive an aboriginal group of an otherwise valid claim to an aboriginal right. On the other hand, where the practice, custom or tradition arose solely as a response to European influences then that practice, custom or tradition will not meet the standard for recognition of an aboriginal right.

Courts must take into account both the relationship of aboriginal peoples to the land and the distinctive societies and cultures of aboriginal peoples

collectivité autochtone avant le contact avec les Européens, le fait que cette coutume, pratique ou tradition se soit poursuivie après l'arrivée de ceux-ci et se soit adaptée en réaction à cet événement, n'est pas pertinent pour l'appréciation de la revendication. L'arrivée et l'influence des Européens ne peuvent être invoquées pour rejeter la revendication, par ailleurs valide, d'un droit ancestral présentée par un groupe autochtone. En revanche, si la coutume, pratique ou tradition n'est que le fruit des influences européennes, alors elle ne respecte pas la norme applicable pour la reconnaissance d'un droit ancestral.

Les tribunaux doivent tenir compte à la fois des rapports qu'entretiennent les peuples autochtones avec le territoire et des cultures et sociétés distinctives de ces peuples

74 As was noted in the discussion of the purposes of s. 35(1), aboriginal rights and aboriginal title are related concepts; aboriginal title is a subcategory of aboriginal rights which deals solely with claims of rights to land. The relationship between aboriginal title and aboriginal rights must not, however, confuse the analysis of what constitutes an aboriginal right. Aboriginal rights arise from the prior occupation of land, but they also arise from the prior social organization and distinctive cultures of aboriginal peoples on that land. In considering whether a claim to an aboriginal right has been made out, courts must look at both the relationship of an aboriginal claimant to the land and at the practices, customs and traditions arising from the claimant's distinctive culture and society. Courts must not focus so entirely on the relationship of aboriginal peoples with the land that they lose sight of the other factors relevant to the identification and definition of aboriginal rights.

Comme il a été dit durant l'examen des objets du par. 35(1), les droits ancestraux et le titre aborigène sont des notions connexes. En effet, le titre aborigène est une sous-catégorie de droits ancestraux qui concerne seulement les revendications de droits fonciers. Toutefois, le rapport entre le titre aborigène et les droits ancestraux ne doit pas embrouiller l'analyse de ce qui constitue un droit ancestral. Les droits ancestraux découlent non seulement de l'occupation antérieure du territoire, mais aussi de l'organisation sociale antérieure et des cultures distinctives des peuples autochtones habitant ce territoire. Pour déterminer si le bien-fondé de la revendication d'un droit ancestral a été établi, les tribunaux doivent considérer et les rapports qu'entretient le demandeur autochtone avec le territoire et les coutumes, pratiques et traditions de la société à laquelle il appartient et de la culture distinctive de cette société. Ils ne doivent pas se concentrer sur les rapports qu'entretiennent les peuples autochtones avec le territoire au point de négliger les autres facteurs pertinents pour l'identification et la définition des droits ancestraux.

75 With these factors in mind I will now turn to the particular claim made by the appellant in this case to have been acting pursuant to an aboriginal right.

Conscient de ces facteurs, je vais maintenant aborder la prétention particulière avancée par l'appelante en l'espèce, savoir qu'elle a agi en vertu d'un droit ancestral.

Application of the Integral to a Distinctive Culture Test to the Appellant's Claim

The first step in the application of the integral to a distinctive culture test requires the court to identify the precise nature of the appellant's claim to have been exercising an aboriginal right. In this case the most accurate characterization of the appellant's position is that she is claiming an aboriginal right to exchange fish for money or for other goods. She is claiming, in other words, that the practices, customs and traditions of the Sto:lo include as an integral part the exchange of fish for money or other goods.

That this is the nature of the appellant's claim can be seen through both the specific acts which led to her being charged and through the regulation under which she was charged. Mrs. Van der Peet sold 10 salmon for \$50. Such a sale, especially given the absence of evidence that the appellant had sold salmon on other occasions or on a regular basis, cannot be said to constitute a sale on a "commercial" or market basis. These actions are instead best characterized in the simple terms of an exchange of fish for money. It follows from this that the aboriginal right pursuant to which the appellant is arguing that her actions were taken is, like the actions themselves, best characterized as an aboriginal right to exchange fish for money or other goods.

Moreover, the regulations under which the appellant was charged prohibit all sale or trade of fish caught pursuant to an Indian food fish licence. As such, to argue that those regulations implicate the appellant's aboriginal right requires no more of her than that she demonstrate an aboriginal right to the exchange of fish for money (sale) or other goods (trade). She does not need to demonstrate an aboriginal right to sell fish commercially.

Application à la revendication de l'appelante du critère de la partie intégrante d'une culture distinctive

Conformément à la première étape de l'application du critère de la partie intégrante d'une culture distinctive, le tribunal doit identifier la nature précise de la prétention de l'appelante qu'elle exerçait un droit ancestral. En l'espèce, la façon la plus précise de décrire la position de l'appelante consiste à dire qu'elle revendique un droit ancestral d'échanger du poisson contre de l'argent ou d'autres biens. Autrement dit, elle soutient que les coutumes, pratiques et traditions des Sto:lo incluent, en tant que partie intégrante de leur culture, l'échange de poisson contre de l'argent ou d'autres biens.

Cette description de la nature de la revendication de l'appelante ressort à la fois des actes spécifiques qui ont conduit à son inculpation et du règlement en vertu duquel elle a été inculpée. Madame Van der Peet a vendu 10 saumons pour 50 \$. Compte tenu particulièrement de l'absence de preuve indiquant que l'appelante avait déjà vendu du saumon ou qu'elle en vendait régulièrement, il est impossible d'affirmer qu'il s'agit d'une vente «commerciale» ou sur le marché. La meilleure façon de décrire ces actions est plutôt de les qualifier simplement d'échange de poisson contre de l'argent. Il s'ensuit que la meilleure façon de caractériser tant le droit ancestral en vertu duquel l'appelante prétend avoir accompli ces actions, que les actions elles-mêmes, est de les qualifier de droit ancestral d'échanger du poisson contre de l'argent ou d'autres biens.

De plus, le règlement en application duquel l'appelante a été inculpée interdit complètement la vente ou l'échange de poisson pris en vertu d'un permis de pêche de subsistance des Indiens. En conséquence, pour établir que ce règlement met en jeu son droit ancestral, l'appelante n'a qu'à démontrer l'existence d'un droit ancestral d'échanger du poisson contre de l'argent (vente) ou d'autres biens (échange). Elle n'a pas à établir l'existence d'un droit ancestral de vendre du poisson commercialement.

76

1996 CanLII 216 (SCC)

77

78

79 The appellant herself characterizes her claim as based on a right "to sufficient fish to provide for a moderate livelihood". In so doing the appellant relies on the "social" test adopted by Lambert J.A. at the British Columbia Court of Appeal. As has already been noted, however, a claim to an aboriginal right cannot be based on the significance of an aboriginal practice, custom or tradition to the aboriginal community in question. The definition of aboriginal rights is determined through the process of determining whether a particular practice, custom or tradition is integral to the distinctive culture of the aboriginal group. The significance of the practice, custom or tradition is relevant to the determination of whether that practice, custom or tradition is integral, but cannot itself constitute the claim to an aboriginal right. As such, the appellant's claim cannot be characterized as based on an assertion that the Sto:lo's use of the fishery, and the practices, customs and traditions surrounding that use, had the significance of providing the Sto:lo with a moderate livelihood. It must instead be based on the actual practices, customs and traditions related to the fishery, here the custom of exchanging fish for money or other goods.

80 Having thus identified the nature of the appellant's claim, I turn to the fundamental question of the integral to a distinctive culture test: Was the practice of exchanging fish for money or other goods an integral part of the specific distinctive culture of the Sto:lo prior to contact with Europeans? In answering this question it is necessary to consider the evidence presented at trial, and the findings of fact made by the trial judge, to determine whether the evidence and findings support the appellant's claim that the sale or trade of fish is an integral part of the distinctive culture of the Sto:lo.

81 It is a well-settled principle of law that when an appellate court reviews the decision of a trial judge that court must give considerable deference to the

L'appelante elle-même soutient que sa revendication est fondée sur le droit à [TRANSDUCTION] «suffisamment de poisson pour assurer une subsistance convenable». Ce faisant, elle s'appuie sur le critère «social» adopté par le juge Lambert de la Cour d'appel de la Colombie-Britannique. Toutefois, comme il a été dit précédemment, la revendication d'un droit ancestral ne peut pas être fondée sur l'importance d'une coutume, pratique ou tradition autochtone pour la collectivité autochtone en cause. Pour définir des droits ancestraux, il faut déterminer si une coutume, pratique ou tradition donnée fait partie intégrante de la culture distinctive du groupe autochtone concerné. L'importance de cette coutume, pratique ou tradition est pertinente pour décider si celle-ci fait partie intégrante de la culture, mais elle ne peut à elle seule justifier le bien-fondé de la revendication d'un droit ancestral. Par conséquent, la revendication de l'appelante ne saurait être fondée sur l'assertion que l'utilisation de la pêche par les Sto:lo ainsi que les coutumes, pratiques et traditions rattachées à cette utilisation étaient importantes en ce qu'elles assuraient aux Sto:lo une subsistance convenable. Elle doit plutôt être fondée sur les coutumes, pratiques et traditions se rattachant concrètement à la pêche, en l'occurrence la coutume d'échanger du poisson contre de l'argent ou d'autres biens.

Après avoir identifié de la sorte la nature de la revendication de l'appelante, j'aborde maintenant la question fondamentale que pose le critère de la partie intégrante d'une culture distinctive: La pratique d'échanger du poisson contre de l'argent ou d'autres biens faisait-elle partie intégrante de la culture distinctive spécifique des Sto:lo avant le contact avec les Européens? Pour répondre à cette question, il est nécessaire d'examiner la preuve présentée au procès ainsi que les conclusions de fait tirées par le juge du procès afin de déterminer si cette preuve et ces conclusions étayaient l'affirmation de l'appelante que la vente ou l'échange de poisson font partie intégrante de la culture distinctive des Sto:lo.

Selon un principe juridique bien établi, lorsqu'une cour d'appel examine la décision du juge du procès, elle doit faire montre d'une retenue con-

trial judge's findings of fact, particularly where those findings of fact are based on the trial judge's assessment of the testimony and credibility of witnesses. In *Stein v. The Ship "Kathy K"*, [1976] 2 S.C.R. 802, Ritchie J., speaking for the Court, held at p. 808 that absent a "palpable and overriding error" affecting the trial judge's assessment of the facts, an appellate court should not substitute its own findings of fact for those of the trial judge:

These authorities are not to be taken as meaning that the findings of fact made at trial are immutable, but rather that they are not to be reversed unless it can be established that the learned trial judge made some palpable and overriding error which affected his assessment of the facts. While the Court of Appeal is seized with the duty of re-examining the evidence in order to be satisfied that no such error occurred, it is not, in my view, a part of its function to substitute its assessment of the balance of probability for the findings of the judge who presided at the trial.

This principle has also been followed in more recent decisions of this Court: *Beaudoin-Daigneault v. Richard*, [1984] 1 S.C.R. 2, at pp. 8-9; *Laurentide Motels Ltd. v. Beauport (City)*, [1989] 1 S.C.R. 705, at p. 794; *Hodgkinson v. Simms*, [1994] 3 S.C.R. 377, at p. 426. In the recently released decision of *Schwartz v. Canada*, [1996] 1 S.C.R. 254, La Forest J. made the following observation at para. 32, with which I agree, regarding appellate court deference to findings of fact:

Unlimited intervention by appellate courts would greatly increase the number and the length of appeals generally. Substantial resources are allocated to trial courts to go through the process of assessing facts. The autonomy and integrity of the trial process must be preserved by exercising deference towards the trial courts' findings of fact... This explains why the rule applies not only when the credibility of witnesses is at issue, although in such a case it may be more strictly applied, but also to all conclusions of fact made by the trial judge...

I would also note that the principle of appellate court deference has been held to apply equally to findings of fact made on the basis of the trial

sidérable à l'égard des conclusions de fait du juge, en particulier lorsque ces conclusions de fait sont fondées sur son appréciation des témoignages et de la crédibilité des témoins. Dans l'arrêt *Stein c. Le navire «Kathy K»*, [1976] 2 R.C.S. 802, le juge Ritchie, au nom de la Cour, a conclu, à la p. 808, que, en l'absence d'«erreur manifeste et dominante» ayant faussé l'appréciation des faits par le juge du procès, une cour d'appel ne doit pas substituer ses propres conclusions sur les faits à celles tirées par ce dernier:

On ne doit pas considérer que ces arrêts signifient que les conclusions sur les faits tirées en première instance sont intangibles, mais plutôt qu'elles ne doivent pas être modifiées à moins qu'il ne soit établi que le juge du procès a commis une erreur manifeste et dominante qui a faussé son appréciation des faits. Bien que la Cour d'appel ait l'obligation de réexaminer la preuve afin de s'assurer qu'aucune erreur de ce genre n'a été commise, j'estime qu'il ne lui appartient pas de substituer son appréciation de la prépondérance des probabilités aux conclusions tirées par le juge qui a présidé le procès.

Ce principe a également été suivi dans des arrêts plus récents de notre Cour: *Beaudoin-Daigneault c. Richard*, [1984] 1 R.C.S. 2, aux pp. 8 et 9; *Laurentide Motels Ltd. c. Beauport (Ville)*, [1989] 1 R.C.S. 705, à la p. 794; *Hodgkinson c. Simms*, [1994] 3 R.C.S. 377, à la p. 426. Dans l'arrêt récent *Schwartz c. Canada*, [1996] 1 R.C.S. 254, le juge La Forest a, au par. 32, fait l'observation suivante, à laquelle je souscris, au sujet de la retenue dont doivent faire montre les cours d'appel à l'égard des conclusions de fait:

Une intervention illimitée des cours d'appel ferait augmenter considérablement le nombre et la durée des appels en général. D'importantes ressources sont mises à la disposition des tribunaux de première instance pour qu'ils puissent évaluer les faits. Il faut préserver l'autonomie et l'intégrité du procès en faisant preuve de retenue à l'égard des conclusions de fait des tribunaux de première instance; [...] Cela explique pourquoi la règle s'applique non seulement lorsque la crédibilité des témoins est en cause, quoiqu'elle puisse alors s'appliquer plus strictement, mais également à toutes les conclusions de fait tirées par le juge de première instance...

Je souligne également qu'il a été décidé que le principe de la retenue par les cours d'appel s'applique aussi aux conclusions de fait du juge de pre-

judge's assessment of the credibility of the testimony of expert witnesses, *N.V. Bocimar S.A. v. Century Insurance Co. of Canada*, [1987] 1 S.C.R. 1247, at pp. 1249-50.

mière instance qui sont fondées sur son appréciation de la crédibilité des témoignages d'experts: *N.V. Bocimar S.A. c. Century Insurance Co. of Canada*, [1987] 1 R.C.S. 1247, aux pp. 1249 et 1250.

82 In the case at bar, Scarlett Prov. Ct. J., the trial judge, made findings of fact based on the testimony and evidence before him, and then proceeded to make a determination as to whether those findings of fact supported the appellant's claim to the existence of an aboriginal right. The second stage of Scarlett Prov. Ct. J.'s analysis — his determination of the scope of the appellant's aboriginal rights on the basis of the facts as he found them — is a determination of a question of law which, as such, mandates no deference from this Court. The first stage of Scarlett Prov. Ct. J.'s analysis, however — the findings of fact from which that legal inference was drawn — do mandate such deference and should not be overturned unless made on the basis of a "palpable and overriding error". This is particularly the case given that those findings of fact were made on the basis of Scarlett Prov. Ct. J.'s assessment of the credibility and testimony of the various witnesses appearing before him.

Dans le cas qui nous occupe, le juge Scarlett de la Cour provinciale, juge du procès, a tiré des conclusions de fait fondées sur les témoignages et les autres éléments de preuve qui lui ont été présentés, puis il s'est demandé si ces conclusions de fait étayaient l'existence du droit ancestral revendiqué par l'appelante. Dans la deuxième étape de son analyse — la détermination de la portée des droits ancestraux de l'appelante à la lumière de ses conclusions de fait — le juge Scarlett tranche une question de droit qui, en tant que telle, ne commande aucune retenue de la part de notre Cour. Toutefois, la première étape de son analyse — savoir les conclusions de fait à partir desquelles cette inférence juridique est tirée — commande une telle retenue, et ces conclusions ne doivent pas être modifiées, sauf si elles résultent d'une «erreur manifeste et dominante». C'est particulièrement le cas, en l'espèce, étant donné que ces conclusions de fait sont fondées sur l'appréciation qu'a faite le juge Scarlett de la crédibilité des divers témoins qui ont comparu devant lui et de leurs dépositions.

83 In adjudicating this case Scarlett Prov. Ct. J. obviously did not have the benefit of direction from this Court as to how the rights recognized and affirmed by s. 35(1) are to be defined, with the result that his legal analysis of the evidence was not entirely correct; however, that Scarlett Prov. Ct. J. was not entirely correct in his legal analysis of the facts as he found them does not mean that he made a clear and palpable error in reviewing the evidence and making those findings of fact. Indeed, a review of the transcript and exhibits submitted to this Court demonstrate that Scarlett Prov. Ct. J. conducted a thorough and compelling review of the evidence before him and committed no clear and palpable error which would justify this Court, or any other appellate court, in substituting its findings of fact for his. Moreover, I would note that the appellant, while disagreeing with Scarlett Prov. Ct. J.'s legal analysis of the facts, made no

Il va de soi que, lorsqu'il a statué sur la présente affaire, le juge Scarlett ne disposait pas des indications de notre Cour sur la façon dont il faut s'y prendre pour définir les droits reconnus et confirmés par le par. 35(1), de sorte que son analyse juridique de la preuve n'était pas entièrement exacte. Cependant, le fait que l'analyse juridique des faits par le juge Scarlett n'ait pas été entièrement exacte ne signifie pas qu'il a fait une erreur manifeste en examinant la preuve et en tirant ces conclusions de fait. De fait, il ressort de l'examen de la transcription des débats et des pièces soumises à notre Cour que le juge Scarlett a fait une analyse approfondie et convaincante de la preuve qui lui a été présentée, et qu'il n'a commis aucune erreur manifeste qui justifierait notre Cour, ou toute autre cour d'appel, de substituer ses conclusions de fait aux siennes. De plus, je tiens à souligner que, même si elle a exprimé son désaccord

arguments suggesting that in making findings of fact from the evidence before him Scarlett Prov. Ct. J. committed a palpable and overriding error.

Scarlett Prov. Ct. J. carefully considered all of the testimony presented by the various witnesses with regards to the nature of Sto:lo society and came to the following conclusions at p. 160:

Clearly, the Sto:lo fish for food and ceremonial purposes. Evidence presented did not establish a regularized market system in the exchange of fish. Such fish as were exchanged through individual trade, gift, or barter were fish surplus from time to time. Natives did not fish to supply a market, there being no regularized trading system, nor were they able to preserve and store fish for extended periods of time. A market as such for salmon was not present but created by European traders, primarily the Hudson's Bay Company. At Fort Langley the Sto:lo were able to catch and deliver fresh salmon to the traders where it was salted and exported. This use was clearly different in nature and quantity from aboriginal activity. Trade in dried salmon with the fort was clearly dependent upon Sto:lo first satisfying their own requirements for food and ceremony.

This court was not satisfied upon the evidence that aboriginal trade in salmon took place in any regularized or market sense. Oral evidence demonstrated that trade was incidental to fishing for food purposes. Anthropological and archaeological evidence was in conflict. This Court accepts the evidence of Dr. Stryd and John Dewhurst [*sic*] in preference to Dr. Daly and therefore, accepts that the Sto:lo were a band culture as opposed to tribal. While bands were guided by siem or prominent families, no regularized trade in salmon existed in aboriginal times. Such trade as took place was either for ceremonial purposes or opportunistic exchanges taking place on a casual basis. Such trade as did take place was incidental only. Evidence led by the Crown that the Sto:lo had no access to salt for food preservation is accepted.

avec l'analyse juridique des faits du juge Scarlett, l'appelante n'a aucunement prétendu que le juge Scarlett aurait, en tirant ses conclusions de fait de la preuve qui lui a été soumise, commis une erreur manifeste et dominante.

Le juge Scarlett de la Cour provinciale a soigneusement étudié les dépositions des divers témoins quant à la nature de la société sto:lo et il a tiré les conclusions suivantes, à la p. 160:

[TRADUCTION] De toute évidence, les Sto:lo pêchent à des fins alimentaires et rituelles. La preuve présentée n'a pas établi l'existence d'un système de marché organisé d'échange du poisson. Le poisson qui changeait de mains par suite d'échange, de don ou de troc individuel était le poisson excédentaire disponible à l'occasion. Les autochtones ne pêchaient pas pour approvisionner un marché, puisqu'il n'existait aucun système de marché organisé, et qu'ils n'étaient pas capables de conserver et d'emmagasiner le poisson durant de longues périodes. Il n'existait pas comme tel de marché pour le saumon, celui-ci a été créé par les marchands européens, principalement la Compagnie de la Baie d'Hudson. À Fort Langley, les Sto:lo pouvaient prendre et livrer du saumon frais aux marchands, qui le salaient et l'exportaient. Cette utilisation de la ressource était manifestement différente des activités autochtones, tant de par sa nature que de par les quantités en cause. Le commerce du saumon séché avec le fort était manifestement subordonné à la satisfaction par les Sto:lo, en premier lieu, de leurs propres besoins alimentaires et rituels.

La présente cour n'est pas convaincue, à la lumière de la preuve, que le commerce du saumon existait chez les autochtones au sens d'un commerce organisé d'un marché. Il ressort des témoignages oraux que le commerce était un aspect accessoire de la pêche pratiquée à des fins alimentaires. Les éléments de preuve anthropologique et archéologique étaient contradictoires. La présente cour préfère les témoignages de M. Stryd et de John Dewhurst [*sic*] à celui de M. Daly et, en conséquence, accepte que la culture des Sto:lo était celle d'une bande plutôt que d'une tribu. Même si les bandes étaient guidées par des siem ou familles importantes, il n'y avait pas de commerce organisé du saumon au temps des aborigènes. Le commerce qui se faisait résultait soit d'échanges faits à des fins rituelles soit d'échanges découlant d'occasions fortuites. Ces échanges avaient seulement un caractère accessoire. La preuve présentée par le ministère public que les Sto:lo ne disposaient pas de sel permettant de conserver le poisson est acceptée.

Exchange of fish was subject to local conditions of availability, transportation and preservation. It was the establishment by the Hudson's Bay Company at the fort at Langley that created the market and trade in fresh salmon. Trade in dried salmon in aboriginal times was, as stated, minimal and opportunistic.

I would add to Scarlett Prov. Ct. J.'s summation of his findings only the observation, which does not contradict any of his specific findings, that the testimony of the experts appearing before him indicated that such limited exchanges of salmon as took place in Sto:lo society were primarily linked to the kinship and family relationships on which Sto:lo society was based. For example, under cross-examination Dr. Daly described trade as occurring through the "idiom" of maintaining family relationships:

The medium or the idiom of much trade was the idiom of kinship, of providing hospitality, giving gifts, reciprocating in gifts. . . .

Similarly, Mr. Dewhirst testified that the exchange of goods was related to the maintenance of family and kinship relations.

85

The facts as found by Scarlett Prov. Ct. J. do not support the appellant's claim that the exchange of salmon for money or other goods was an integral part of the distinctive culture of the Sto:lo. As has already been noted, in order to be recognized as an aboriginal right, an activity must be of central significance to the culture in question — it must be something which makes that culture what it is. The findings of fact made by Scarlett Prov. Ct. J. suggest that the exchange of salmon for money or other goods, while certainly taking place in Sto:lo society prior to contact, was not a significant, integral or defining feature of that society.

86

First, Scarlett Prov. Ct. J. found that, prior to contact, exchanges of fish were only "incidental" to fishing for food purposes. As was noted above, to constitute an aboriginal right, a custom must

Les échanges de poisson étaient tributaires des conditions locales sur le plan de la disponibilité, du transport et de la conservation. C'est l'établissement de la Compagnie de la Baie d'Hudson au fort situé à Langley qui a créé le marché et le commerce du saumon frais. Les échanges de saumon séché au temps des aborigènes n'avaient, comme il a été dit plus tôt, qu'un caractère minimal et fortuit.

J'ajouterais uniquement au résumé que le juge Scarlett fait de ses conclusions l'observation suivante, qui ne contredit aucune de ses conclusions spécifiques, savoir que les dépositions des experts qui ont comparu devant lui ont indiqué que ces échanges limités de saumon dans la société sto:lo étaient reliés principalement aux rapports familiaux et de parenté sur lesquels cette société était fondée. Par exemple, au cours de son contre-interrogatoire, M. Daly a dit que les échanges survenaient par l'intermédiaire de l'[TRADUCTION] «idiome» du maintien des rapports familiaux:

[TRADUCTION] La plupart des échanges survenaient par l'intermédiaire de l'idiome de la parenté, de l'hospitalité de l'échange de cadeaux. . . .

De même, M. Dewhirst a témoigné que l'échange de biens se rattachait au maintien des rapports familiaux et de parenté.

Les faits constatés par le juge Scarlett de la Cour provinciale n'appuient pas la prétention de l'appelante que l'échange de saumon contre de l'argent ou d'autres biens faisait partie intégrante de la culture distinctive des Sto:lo. Comme il a été indiqué précédemment, pour être reconnue comme un droit ancestral, une activité doit avoir une importance fondamentale pour la culture concernée — elle doit être quelque chose qui fait de cette culture ce qu'elle est. Les conclusions de fait du juge Scarlett tendent à indiquer que les échanges de saumon contre de l'argent ou d'autres biens, quoiqu'il y en ait certainement eu dans la société sto:lo avant le contact avec les Européens, n'étaient pas une caractéristique déterminante ou importante de cette société, ni une partie intégrante de celle-ci.

Premièrement, le juge Scarlett a conclu que, avant le contact avec les Européens, les échanges de poisson n'étaient qu'un aspect «accessoire» de la pêche pratiquée à des fins alimentaires. Comme

itself be integral to the distinctive culture of the aboriginal community in question; it cannot be simply incidental to an integral custom. Thus, while the evidence clearly demonstrated that fishing for food and ceremonial purposes was a significant and defining feature of the Sto:lo culture, this is not sufficient, absent a demonstration that the exchange of salmon was itself a significant and defining feature of Sto:lo society, to demonstrate that the exchange of salmon is an integral part of Sto:lo culture.

For similar reasons, the evidence linking the exchange of salmon to the maintenance of kinship and family relations does not support the appellant's claim to the existence of an aboriginal right. Exchange of salmon as part of the interaction of kin and family is not of an independent significance sufficient to ground a claim for an aboriginal right to the exchange of fish for money or other goods.

Second, Scarlett Prov. Ct. J. found that there was no "regularized trading system" amongst the Sto:lo prior to contact. The inference drawn from this fact by Scarlett Prov. Ct. J., and by Macfarlane J.A. at the British Columbia Court of Appeal, was that the absence of a market means that the appellant could not be said to have been acting pursuant to an aboriginal right because it suggests that there is no aboriginal right to fish commercially. This inference is incorrect because, as has already been suggested, the appellant in this case has only claimed a right to exchange fish for money or other goods, not a right to sell fish in the commercial marketplace; the significance of the absence of regularized trading systems amongst the Sto:lo arises instead from the fact that it indicates that the exchange of salmon was not widespread in Sto:lo society. Given that the exchange of salmon was not widespread it cannot be said that, prior to contact, Sto:lo culture was defined by trade in salmon; trade or exchange of salmon took place, but the

il a été dit précédemment, pour constituer un droit ancestral, une coutume doit elle-même faire partie intégrante de la culture distinctive de la collectivité autochtone en cause, et ne pas être simplement un aspect accessoire d'une coutume qui serait partie intégrante de la culture concernée. En conséquence, même si la preuve a clairement démontré que la pêche à des fins alimentaires et rituelles était une caractéristique importante et déterminante de la culture sto:lo, ce fait n'est pas suffisant, en l'absence de preuve que l'échange de saumon était en soi une caractéristique importante et déterminante de la société sto:lo, pour établir que l'échange de saumon fait partie intégrante de la culture sto:lo.

Pour des motifs analogues, la preuve rattachant l'échange de saumon au maintien de rapports familiaux et de parenté n'étaye pas l'existence du droit ancestral revendiqué par l'appelante. Les échanges de saumon qui surviennent dans le cadre des rapports entre les membres de la famille et la parenté ne revêtent pas en soi une importance suffisante pour fonder la revendication d'un droit ancestral d'échanger du poisson contre de l'argent ou des biens.

Deuxièmement, le juge Scarlett a conclu qu'il n'existait pas de [TRADUCTION] «système de commerce organisé» chez les Sto:lo avant le contact avec les Européens. L'inférence qu'ont tirée de ce fait le juge Scarlett de la Cour provinciale et le juge Macfarlane de la Cour d'appel de la Colombie-Britannique était que, vu l'absence d'un marché, il était impossible d'affirmer que l'appelante avait agi en vertu d'un droit ancestral, étant donné que ce fait tend à indiquer qu'il n'existe pas de droit ancestral de pêcher à des fins commerciales. Cette inférence est incorrecte parce que, comme il a déjà été indiqué, en l'espèce l'appelante a revendiqué seulement le droit d'échanger du saumon contre de l'argent ou d'autres biens, et non le droit de vendre du poisson sur le marché. L'importance de l'absence de systèmes de commerce organisés chez les Sto:lo découle plutôt du fait que cette absence indique que l'utilisation du poisson comme monnaie d'échange n'était pas un phénomène répandu dans la société sto:lo. Comme les

absence of a market demonstrates that this exchange did not take place on a basis widespread enough to suggest that the exchange was a defining feature of Sto:lo society.

échanges de saumon n'étaient pas une activité répandue, il est impossible d'affirmer que, avant le contact avec les Européens, la culture sto:lo était définie par l'utilisation du saumon comme monnaie d'échange. Il y avait bien des échanges de saumon, mais l'absence de marché pour ce produit démontre que ces échanges n'étaient pas suffisamment répandus pour indiquer qu'ils étaient une caractéristique déterminante de la société sto:lo.

(SCC)
T-66-00001-17

89

Third, the trade engaged in between the Sto:lo and the Hudson's Bay Company, while certainly of significance to the Sto:lo society of the time, was found by the trial judge to be qualitatively different from that which was typical of the Sto:lo culture prior to contact. As such, it does not provide an evidentiary basis for holding that the exchange of salmon was an integral part of Sto:lo culture. As was emphasized in listing the criteria to be considered in applying the "integral to" test, the time relevant for the identification of aboriginal rights is prior to contact with European societies. Unless a post-contact practice, custom or tradition can be shown to have continuity with pre-contact practices, customs or traditions, it will not be held to be an aboriginal right. The trade of salmon between the Sto:lo and the Hudson's Bay Company does not have the necessary continuity with Sto:lo culture pre-contact to support a claim to an aboriginal right to trade salmon. Further, the exchange of salmon between the Sto:lo and the Hudson's Bay Company can be seen as central or significant to the Sto:lo primarily as a result of European influences; activities which become central or significant because of the influence of European culture cannot be said to be aboriginal rights.

Troisièmement, le commerce entre les Sto:lo et la Compagnie de la Baie d'Hudson, même s'il était certainement important pour la société sto:lo de cette époque, a été jugé par le juge du procès qualitativement différent de celui qui était typique de la culture sto:lo d'avant le contact avec les Européens. En conséquence, il ne constitue pas un élément de preuve permettant de conclure que l'échange de saumon faisait partie intégrante de la culture sto:lo. Comme il a été souligné dans l'énumération des facteurs à prendre en considération pour appliquer le critère de la «partie intégrante», la période pertinente pour l'identification des droits ancestraux est celle qui a précédé le contact avec les sociétés européennes. Sauf s'il est possible d'établir qu'une coutume, pratique ou tradition postérieure au contact avec les Européens marque une continuité avec les coutumes, pratiques ou traditions antérieures à cette période, la coutume, pratique ou tradition en question ne sera pas déclarée être à un droit ancestral. Le commerce du saumon entre les Sto:lo et la Compagnie de la Baie d'Hudson ne marque pas la continuité nécessaire avec la culture sto:lo antérieure au contact avec les Européens pour étayer la revendication d'un droit ancestral de faire le commerce du saumon. En outre, il est possible d'affirmer que le commerce du saumon entre les Sto:lo et la Compagnie de la Baie d'Hudson est devenu une activité fondamentale ou importante pour les Sto:lo principalement par suite des influences européennes. Les activités qui deviennent fondamentales ou importantes en raison de l'influence de la culture européenne ne peuvent être considérées comme des droits ancestraux.

90

Finally, Scarlett Prov. Ct. J. found that the Sto:lo were at a band level of social organization

Finalement, le juge Scarlett a conclu que l'organisation sociale des Sto:lo était celle d'une bande

rather than at a tribal level. As noted by the various experts, one of the central distinctions between a band society and a tribal society relates to specialization and division of labour. In a tribal society there tends to be specialization of labour — for example, specialization in the gathering and trade of fish — whereas in a band society division of labour tends to occur only on the basis of gender or age. The absence of specialization in the exploitation of the fishery is suggestive, in the same way that the absence of regularized trade or a market is suggestive, that the exchange of fish was not a central part of Sto:lo culture. I would note here as well Scarlett Prov. Ct. J.'s finding that the Sto:lo did not have the means for preserving fish for extended periods of time, something which is also suggestive that the exchange or trade of fish was not central to the Sto:lo way of life.

For these reasons, then, I would conclude that the appellant has failed to demonstrate that the exchange of fish for money or other goods was an integral part of the distinctive Sto:lo society which existed prior to contact. The exchange of fish took place, but was not a central, significant or defining feature of Sto:lo society. The appellant has thus failed to demonstrate that the exchange of salmon for money or other goods by the Sto:lo is an aboriginal right recognized and affirmed under s. 35(1) of the *Constitution Act, 1982*.

The Sparrow Test

Since the appellant has failed to demonstrate that the exchange of fish was an aboriginal right of the Sto:lo, it is unnecessary to consider the tests for extinguishment, infringement and justification laid out by this Court in *Sparrow, supra*.

VI. Disposition

Having concluded that the aboriginal rights of the Sto:lo do not include the right to exchange fish for money or other goods, I would dismiss the

plutôt que d'une tribu. Comme l'ont indiqué les divers experts, l'une des distinctions principales entre les sociétés tribales et celles organisées en bande concerne la spécialisation et la division des tâches. Dans les sociétés tribales, il tend à y avoir spécialisation des tâches — par exemple, spécialisation dans la pêche et l'échange du poisson — alors que dans les sociétés organisées en bande, la division des tâches tend à refléter seulement le sexe ou l'âge des participants. Tout comme l'absence de commerce organisé ou de marché, l'absence de spécialisation dans l'exploitation des ressources de la pêche tend à indiquer que l'échange de poisson n'était pas un élément fondamental de la culture sto:lo. Je tiens à également souligner ici la conclusion du juge Scarlett que les Sto:lo n'avaient pas de moyens de conserver le poisson pendant de longues périodes, autre élément qui tend à indiquer que les échanges de poisson n'étaient pas un aspect fondamental du mode de vie des Sto:lo.

Pour ces motifs, je conclurais donc que l'appelante n'a pas démontré que l'échange de poisson contre de l'argent ou d'autres biens faisait partie intégrante de la société sto:lo distinctive qui existait avant le contact avec les Européens. Il y avait des échanges de poisson, mais il ne s'agissait pas d'une caractéristique fondamentale, importante ou déterminante de la société sto:lo. L'appelante n'a donc pas démontré que l'échange de saumon contre de l'argent ou d'autres biens par les Sto:lo est un droit ancestral reconnu et confirmé par le par. 35(1) de la *Loi constitutionnelle de 1982*.

Le critère établi dans Sparrow

Comme l'appelante n'a pas établi que l'échange de poisson était un droit ancestral des Sto:lo, il n'est pas nécessaire d'analyser les critères relatifs à l'extinction, à l'atteinte et à la justification énoncés par notre Cour dans l'arrêt *Sparrow*, précité.

VI. Dispositif

Comme j'ai conclu que les droits ancestraux des Sto:lo ne comprennent pas le droit d'échanger du poisson contre de l'argent ou d'autres biens, je suis

appeal and affirm the decision of the Court of Appeal restoring the trial judge's conviction of the appellant for violating s. 61(1) of the *Fisheries Act*. There will be no order as to costs.

d'avis de rejeter le pourvoi et de confirmer la décision de la Cour d'appel qui a rétabli la déclaration de culpabilité prononcée contre l'appelante par le juge du procès à l'égard de la violation du par. 61(1) de la *Loi sur les pêcheries*. Il n'y aura pas d'ordonnance concernant les dépens.

94

For the reasons given above, the constitutional question must be answered as follows:

Pour les motifs qui précèdent, la question constitutionnelle doit recevoir la réponse suivante:

Question Is s. 27(5) of the *British Columbia Fishery (General) Regulations*, SOR/84-248, as it read on September 11, 1987, of no force or effect with respect to the appellant in the circumstances of these proceedings, in virtue of s. 52 of the *Constitution Act, 1982*, by reason of the aboriginal rights within the meaning of s. 35 of the *Constitution Act, 1982*, invoked by the appellant?

Question Le paragraphe 27(5) du *Règlement de pêche général de la Colombie-Britannique*, DORS/84-248, tel qu'il se lisait le 11 septembre 1987, est-il, dans les circonstances de la présente affaire, inopérant à l'égard de l'appelante en vertu de l'art. 52 de la *Loi constitutionnelle de 1982*, en raison des droits ancestraux au sens de l'art. 35 de la *Loi constitutionnelle de 1982*, qu'elle invoque?

Answer No.

Réponse Non.

The following are the reasons delivered by

Les motifs suivants ont été rendus par

95

L'HEUREUX-DUBÉ J. (dissenting) — This appeal, as well as the appeals in *R. v. N.T.C. Smokehouse Ltd.*, [1996] 2 S.C.R. 672, and *R. v. Gladstone*, [1996] 2 S.C.R. 723, in which judgment is handed down concurrently, and the appeal in *R. v. Nikal*, [1996] 1 S.C.R. 1013, concern the definition of aboriginal rights as constitutionally protected under s. 35(1) of the *Constitution Act, 1982*.

LE JUGE L'HEUREUX-DUBÉ (dissidente) — Le présent pourvoi ainsi que les pourvois *R. c. N.T.C. Smokehouse Ltd.*, [1996] 2 R.C.S. 672 et *R. c. Gladstone*, [1996] 2 R.C.S. 723, dans lesquels jugement est rendu en même temps, et l'arrêt *R. c. Nikal*, [1996] 1 R.C.S. 1013 portent sur la définition des droits ancestraux qui bénéficient de la protection de la Constitution en vertu du par. 35(1) de la *Loi constitutionnelle de 1982*.

96

While the narrow issue in this particular case deals with whether the Sto:lo, of which the appellant is a member, possess an aboriginal right to fish which includes the right to sell, trade and barter fish for livelihood, support and sustenance purposes, the broader issue is the interpretation of the nature and extent of constitutionally protected aboriginal rights.

Bien que la question restreinte qui se pose en l'espèce soit de savoir si les Sto:lo, dont l'appelante fait partie, possèdent un droit de pêche ancestral incluant le droit de vendre et d'échanger du poisson à des fins de subsistance, la question plus générale porte sur l'interprétation de la nature et de l'étendue des droits ancestraux protégés par la Constitution.

97

The Chief Justice concludes that the Sto:lo do not possess an aboriginal right to exchange fish for money or other goods and that, as a result, the appellant's conviction under the *Fisheries Act*, R.S.C. 1970, c. F-14, should be upheld. Not only do I disagree with the result he reaches, but I also diverge from his analysis of the issue at bar, spe-

Le Juge en chef conclut que les Sto:lo ne possèdent pas le droit ancestral d'échanger du poisson contre de l'argent ou d'autres biens et que, en conséquence, la déclaration de culpabilité prononcée contre l'appelante en vertu de la *Loi sur les pêcheries*, S.R.C. 1970, ch. F-14 devrait être confirmée. Je suis non seulement en désaccord avec ce résul-

cifically as to his approach to defining aboriginal rights and as to his delineation of the aboriginal right claimed by the appellant.

The Chief Justice has set out the facts and judgments and I will only briefly refer to them for a better understanding of what follows.

Dorothy Van der Peet, the appellant, was charged with violating s. 27(5) of the *British Columbia Fishery (General) Regulations*, SOR/84-248, and, thereby, committing an offence contrary to s. 61(1) of the *Fisheries Act*. These charges arose out of the appellant's sale of 10 salmon caught by her common law spouse and his brother under the authority of an Indian food fish licence, issued pursuant to s. 27(1) of the Regulations. Section 27(5) of the *British Columbia Fishery (General) Regulations*, is the provision here under constitutional challenge; it provides:

27. . . .

(5) No person shall sell, barter or offer to sell or barter any fish caught under the authority of an Indian food fish licence.

The appellant, her common law husband and his brother are all members of the Sto:lo Band, part of the Coast Salish Nation. Both parties to this dispute accept that the appellant sold the fish, that the sale of the fish was contrary to the Regulations and that the fish were caught pursuant to a recognized aboriginal right to fish. The parties disagree, however, as to the nature of the Sto:lo's relationship with the fishery, particularly whether their right to fish encompasses the right to sell, trade and barter fish.

Scarlett Prov. Ct. J., the trial judge found on the evidence, [1991] 3 C.N.L.R. 155, that trade by the Sto:lo was incidental to fishing for food and was either for ceremonial purposes or opportunistic exchanges taking place on a casual basis. He held,

tat, mais également avec l'analyse que fait le Juge en chef de la question en litige, tout particulièrement avec sa façon de définir les droits ancestraux et la définition qu'il donne du droit ancestral revendiqué par l'appelante.

Le Juge en chef a exposé les faits et les jugements, et je ne les rappellerai que brièvement, pour permettre une meilleure compréhension de ce qui suit.

L'appelante, Dorothy Van der Peet, a été accusée d'avoir contrevenu au par. 27(5) du *Règlement de pêche général de la Colombie-Britannique*, DORS/84-248, et d'avoir ainsi commis une infraction au par. 61(1) de la *Loi sur les pêcheries*. Le fait à l'origine des accusations est la vente par l'appelante de 10 saumons qui avaient été pris par son conjoint de fait et le frère de celui-ci en vertu d'un permis de pêche de subsistance des Indiens délivré conformément au par. 27(1) du *Règlement*. Le paragraphe 27(5) du *Règlement de pêche général de la Colombie-Britannique*, disposition qui fait l'objet de la contestation constitutionnelle en l'espèce, se lit ainsi:

27. . . .

(5) Il est interdit à quiconque de vendre, d'échanger ou d'offrir de vendre ou d'échanger du poisson pris en vertu d'un permis de pêche de subsistance des Indiens.

L'appelante, son conjoint de fait et le frère de celui-ci sont tous des membres de la bande des Sto:lo, qui fait partie de la nation des Salish de la côte. Les deux parties au présent pourvoi conviennent que l'appelante a vendu du poisson, que cette vente contrevenait au *Règlement* et que les poissons ont été pris conformément à un droit de pêche ancestral reconnu. Cependant, elles ne s'entendent pas sur la nature des rapports qu'entretiennent les Sto:lo avec la pêche, et tout particulièrement sur la question de savoir si le droit de pêche inclut le droit de vendre et d'échanger du poisson.

Le juge du procès, le juge Scarlett de la Cour provinciale, a conclu que, à la lumière de la preuve, [1991] 3 C.N.L.R. 155, les échanges faits par les Sto:lo étaient un aspect accessoire de la pêche pratiquée à des fins alimentaires et qu'ils

therefore, that the aboriginal right to fish for food and ceremonial purposes did not include the right to sell and found the appellant guilty as charged.

étaient effectués soit à des fins rituelles soit dans le cadre d'occasions fortuites. Il a en conséquence statué que le droit ancestral de pêcher à des fins alimentaires et rituelles n'incluait pas le droit de vendre le poisson, et il a déclaré l'appelante coupable des accusations dont elle faisait l'objet.

102 On appeal to the British Columbia Supreme Court, (1991), 58 B.C.L.R. (2d) 392, Selbie J., the summary appeal judge, gave a different interpretation to the oral testimony, expert evidence and archaeological records. In his view, the evidence demonstrated that the Sto:lo's relationship with the fishery was broad enough to include the trade of fish since the Sto:lo who caught fish in their original aboriginal society could do whatever they wanted with that fish. He overturned the appellant's conviction and entered an acquittal.

En appel devant la Cour suprême de la Colombie-Britannique (1991), 58 B.C.L.R. (2d) 392, le juge d'appel Selbie des poursuites sommaires a interprété différemment les dépositions orales, la preuve offerte par les experts et les documents archéologiques. À son avis, la preuve établissait que les rapports qu'entretenait la bande des Sto:lo avec la pêcherie étaient suffisamment larges pour inclure le commerce du poisson puisque les premiers Sto:lo pouvaient faire ce qu'ils voulaient avec ce poisson. Le juge Selbie a écarté la déclaration de culpabilité et acquitté l'appelante.

103 At the British Columbia Court of Appeal (1993), 80 B.C.L.R. (2d) 75, the findings and verdict of the trial judge were restored. The majority of the Court of Appeal, *per* Macfarlane J.A. (Taggart J.A. concurring) and Wallace J.A., found that the Sto:lo engaged only in casual exchanges of fish and that this was entirely different from fishing for commercial and market purposes. Lambert J.A., dissenting, held that the best description of the aboriginal practices, traditions and customs of the Sto:lo was one which included the sale, trade and barter of fish. Also dissenting, Hutcheon J.A. focused on the evidence demonstrating that by 1846, the date of British sovereignty, trade in salmon was taking place in the Sto:lo community.

La Cour d'appel de la Colombie-Britannique (1993), 80 B.C.L.R. (2d) 75, a rétabli les conclusions et la décision du juge du procès. La Cour d'appel à la majorité — les juges Macfarlane (avec l'appui du juge Taggart) et Wallace — a conclu que les Sto:lo ne faisaient que des échanges fortuits de poisson, activité complètement différente de la pêche qui est pratiquée à des fins commerciales, pour approvisionner un marché. Le juge Lambert, dissident, a conclu que la meilleure façon de décrire les coutumes, pratiques et traditions autochtones des Sto:lo était de dire qu'elles incluaient les activités de vente et d'échange de poisson. Le juge Hutcheon, également dissident, s'est attaché à la preuve établissant que, en 1846, date d'affirmation de la souveraineté britannique, on faisait le commerce du saumon dans la collectivité Sto:lo.

104 Leave to appeal was granted by this Court and the Chief Justice stated the following constitutional question:

Notre Cour a accueilli la demande d'autorisation de pourvoi et le Juge en chef a formulé la question constitutionnelle suivante:

Is s. 27(5) of the *British Columbia Fishery (General) Regulations*, SOR/84-248, as it read on September 11, 1987, of no force or effect with respect to the appellant in the circumstances of these proceedings, in virtue of s. 52 of the *Constitution Act, 1982*, by reason of the aboriginal rights within the meaning of s. 35 of the *Constitution Act, 1982*, invoked by the appellant?

Le paragraphe 27(5) du *Règlement de pêche général de la Colombie-Britannique*, DORS-84-248, tel qu'il se lisait le 11 septembre 1987, est-il, dans les circonstances de la présente affaire, inopérant à l'égard de l'appelante en vertu de l'art. 52 de la *Loi constitutionnelle de 1982*, en raison des droits ancestraux au sens de l'art. 35 de la *Loi constitutionnelle de 1982*, qu'elle invoque?

In my view, the definition of aboriginal rights as to their nature and extent must be addressed in the broader context of the historical aboriginal reality in Canada. Therefore, before going into the specific analysis of aboriginal rights protected under s. 35(1), a review of the legal evolution of aboriginal history is in order.

I. Historical and General Background

It is commonly accepted that the first aboriginal people of North America came from Siberia, over the Bering terrestrial bridge, some 12,000 years ago. They found a *terra nullius* and gradually began to explore and populate the territory. These people have always enjoyed, whether as nomadic or sedentary communities, some kind of social and political structure. Accordingly, it is fair to say that prior to the first contact with the Europeans, the native people of North America were independent nations, occupying and controlling their own territories, with a distinctive culture and their own practices, traditions and customs.

In that regard, it is useful to acknowledge the findings of Marshall C.J. of the United States Supreme Court in the so-called trilogy, comprised of *Johnson v. M'Intosh*, 21 U.S. (8 Wheat.) 543 (1823), *Cherokee Nation v. Georgia*, 30 U.S. (5 Pet.) 1 (1831), and *Worcester v. Georgia*, 31 U.S. (6 Pet.) 515 (1832). Particularly in *Worcester*, Marshall C.J.'s general description of aboriginal societies in North America is apropos (at pp. 542-43):

America, separated from Europe by a wide ocean, was inhabited by a distinct people, divided into separate nations, independent of each other and of the rest of the world, having institutions of their own, and governing themselves by their own laws.

This passage was quoted, with approval, by Hall J. in *Calder v. Attorney-General of British Columbia*, [1973] S.C.R. 313, at p. 383. Also in *Calder*,

À mon avis, la détermination de la nature et de l'étendue des droits ancestraux doit se faire dans le contexte plus général de la réalité historique autochtone au Canada. En conséquence, avant d'entamer l'analyse spécifique des droits ancestraux protégés par le par. 35(1), il convient d'examiner l'évolution juridique de l'histoire autochtone.

I. Le contexte historique général

Il semble généralement reconnu que les premiers habitants de l'Amérique du Nord sont venus de Sibérie, il y a quelque 12,000 ans, par le pont terrestre de Béring. Ils ont trouvé une *terra nullius*, qu'ils ont progressivement explorée et peuplée. Ces gens ont toujours possédé, autant comme communautés nomades que comme communautés sédentaires, une certaine forme d'organisation sociale et politique. En conséquence, il est juste d'affirmer que les peuples autochtones d'Amérique du Nord étaient, avant les premiers contacts avec les Européens, des nations indépendantes qui occupaient et contrôlaient leur propre territoire et possédaient une culture distinctive ainsi que leurs propres coutumes, pratiques et traditions.

À cet égard, il est utile de faire état des conclusions du juge en chef Marshall de la Cour suprême des États-Unis dans ce qu'on appelle la trilogie, savoir les arrêts suivants: *Johnson c. M'Intosh*, 21 U.S. (8 Wheat.) 543 (1823), *Cherokee Nation c. Georgia*, 30 U.S. (5 Pet.) 1 (1831) et *Worcester c. Georgia*, 31 U.S. (6 Pet.) 515 (1832). Dans *Worcester*, tout particulièrement, le juge en chef Marshall a donné une description générale pertinente des sociétés autochtones d'Amérique du Nord (aux pp. 542 et 543):

[TRADUCTION] L'Amérique, séparée de l'Europe par un vaste océan, était habitée par un peuple différent, divisé en nations distinctes, indépendantes l'une de l'autre et vis-à-vis du reste du monde; elles avaient leurs propres institutions et se gouvernaient elles-mêmes en vertu de leurs propres lois.

Cet extrait a été cité et approuvé par le juge Hall dans l'arrêt *Calder c. Procureur général de la Colombie-Britannique*, [1973] R.C.S. 313, à la

105

1996 CanLII 216 (SCC)

106

107

Judson J., for the majority in the result, made the following observations at p. 328:

Although I think that it is clear that Indian title in British Columbia cannot owe its origin to the Proclamation of 1763, the fact is that when the settlers came, the Indians were there, organized in societies and occupying the land as their forefathers had done for centuries. [Emphasis added.]

See also, regarding the independent character of aboriginal nations, the remarks of Lamer J. (as he then was) in *R. v. Sioui*, [1990] 1 S.C.R. 1025, at p. 1053.

108 At the time of the first formal arrival of the Europeans, in the sixteenth century, most of the territory of what is now Canada was occupied and used by aboriginal people. From the earliest point, however, the settlers claimed sovereignty in the name of their home country. Traditionally, there are four principles upon which states have relied to justify the assertion of sovereignty over new territories: see Brian Slattery, *The Land Rights of Indigenous Canadian Peoples, as Affected by the Crown's Acquisition of Their Territories* (1979). These are: (1) conquest, (2) cession, (3) annexation, and (4) settlement, i.e., acquisition of territory that was previously unoccupied or is not recognized as belonging to another political entity.

109 In the eyes of international law, the settlement thesis is the one rationale which can most plausibly justify European sovereignty over Canadian territory and the native people living on it (see Patrick Macklem, "Normative Dimensions of an Aboriginal Right of Self-Government" (1995), 21 *Queen's L.J.* 173) although there is still debate as to whether the land was indeed free for occupation. See Brian Slattery, "Aboriginal Sovereignty and Imperial Claims" (1991), 29 *Osgoode Hall L.J.* 681, and Michael Asch, *Home and Native Land: Aboriginal Rights and the Canadian Constitution* (1984).

110 In spite of the sovereignty proclamation, however, the early practices of the British recognized

p. 383. Dans ce même arrêt, le juge Judson, s'exprimant au nom de la majorité, a fait les observations suivantes, à la p. 328:

Je crois qu'il est clair qu'en Colombie-Britannique, le titre indien ne peut pas avoir pour origine la Proclamation de 1763, mais il reste que lorsque les colons sont arrivés, les Indiens étaient déjà là, ils étaient organisés en sociétés et occupaient les terres comme leurs ancêtres l'avaient fait depuis des siècles. [Je souligne.]

En ce qui concerne le caractère indépendant des nations autochtones, voir aussi les remarques du juge Lamer (maintenant Juge en chef) dans l'arrêt *R. c. Sioui*, [1990] 1 R.C.S. 1025, à la p. 1053.

Au seizième siècle, à l'époque de l'arrivée officielle des Européens, la majeure partie du territoire qui est aujourd'hui le Canada était occupée et utilisée par les peuples autochtones. Cependant, dès leur arrivée, les colons ont affirmé la souveraineté de leur mère patrie sur ce territoire. Traditionnellement, quatre principes ont été invoqués par les États pour affirmer leur souveraineté sur de nouveaux territoires: voir Brian Slattery, *The Land Rights of Indigenous Canadian Peoples, as Affected by the Crown's Acquisition of Their Territories* (1979). Ces principes sont: (1) la conquête, (2) la cession, (3) l'annexion, et (4) la colonisation, c'est-à-dire l'acquisition d'un territoire qui n'était pas occupé auparavant ou qui n'était pas reconnu comme appartenant à une autre entité politique.

En droit international, c'est le principe de la colonisation qui permet de justifier de la façon la plus plausible la souveraineté européenne sur le territoire canadien et les autochtones qui l'habitaient (voir Patrick Macklem, «Normative Dimensions of an Aboriginal Right of Self-Government» (1995), 21 *Queen's L.J.* 173), quoique la question de savoir s'il s'agissait d'un territoire libre qui pouvait être occupé continue d'être débattue. (Voir Brian Slattery, «Aboriginal Sovereignty and Imperial Claims» (1991), 29 *Osgoode Hall L.J.* 681, et Michael Asch, *Home and Native Land: Aboriginal Rights and the Canadian Constitution* (1984).

Malgré la proclamation de souveraineté, cependant, par les pratiques qu'ils ont appliquées au

aboriginal title or rights and required their extinguishment by cession, conquest or legislation: see André Émond, "Existe-t-il un titre indien originaire dans les territoires cédés par la France en 1763?" (1995), 41 *McGill L.J.* 59, at p. 62. This tradition of the British imperial power (either applied directly or after French capitulation) was crystallized in the *Royal Proclamation of 1763*, R.S.C., 1985, App. II, No. 1.

In *R. v. Sparrow*, [1990] 1 S.C.R. 1075, Dickson C.J. and La Forest J. wrote the following regarding Crown sovereignty and British practices *vis-à-vis* aboriginal people at p. 1103:

It is worth recalling that while British policy towards the native population was based on respect for their right to occupy their traditional lands, a proposition to which the Royal Proclamation of 1763 bears witness, there was from the outset never any doubt that sovereignty and legislative power, and indeed the underlying title, to such lands vested in the Crown. . . .

See also André Émond, "Le sable dans l'engrenage du droit inhérent des autochtones à l'autonomie gouvernementale" (1996), 30 *R.J.T.* 1, at p. 1.

As a result, it has become accepted in Canadian law that aboriginal title, and aboriginal rights in general, derive from historic occupation and use of ancestral lands by the natives and do not depend on any treaty, executive order or legislative enactment: see *Calder v. Attorney-General of British Columbia*, *supra*, at p. 390, *per* Hall J., confirmed in *Guerin v. The Queen*, [1984] 2 S.C.R. 335, at p. 379, *per* Dickson J. (as he then was), and *Sparrow*, *supra*; see also the decision of the High Court of Australia in *Mabo v. Queensland [No. 2]* (1992), 175 C.L.R. 1. See also Brian Slattery, "The Constitutional Guarantee of Aboriginal and Treaty Rights" (1983), 8 *Queen's L.J.* 232, at p. 242, and Peter W. Hogg, *Constitutional Law of Canada* (3rd ed. 1992) at p. 679. This position is known as the "inherent theory" of aboriginal rights, as contrasted with the "contingent theory" of aboriginal rights: see Michael Asch and Patrick Macklem,

départ les Britanniques reconnaissaient les titres autochtones ou droits ancestraux et ils exigeaient qu'ils aient été éteints par cession, conquête ou législation: voir André Émond, «Existe-t-il un titre indien originaire dans les territoires cédés par la France en 1763?» (1995), 41 *R.D. McGill* 59, à la p. 62. La *Proclamation royale de 1763*, L.R.C. (1985), app. II, n° 1, a cristallisé cette tradition du pouvoir impérial britannique (qui s'est appliquée soit directement, soit après la capitulation de la France).

Dans *R. c. Sparrow*, [1990] 1 R.C.S. 1075, le juge en chef Dickson et le juge La Forest ont écrit ce qui suit relativement à la souveraineté de Sa Majesté et aux pratiques britanniques vis-à-vis des peuples autochtones (à la p. 1103):

Il convient de rappeler que bien que la politique britannique envers la population autochtone fût fondée sur le respect de leur droit d'occuper leurs terres ancestrales, comme en faisait foi la Proclamation royale de 1763, dès le départ, on n'a jamais douté que la souveraineté et la compétence législative, et même le titre sous-jacent, à l'égard de ces terres revenaient à Sa Majesté. . .

Voir aussi André Émond, «Le sable dans l'engrenage du droit inhérent des autochtones à l'autonomie gouvernementale» (1996), 30 *R.J.T.* 1, à la p. 1.

En conséquence, il est maintenant reconnu en droit canadien que le titre autochtone et les droits ancestraux en général découlent de l'occupation et de l'utilisation historiques des terres ancestrales par les autochtones et qu'ils ne sont pas tributaires de quelque traité, décret ou mesure législative: *Calder c. Procureur général de la Colombie-Britannique*, précité, à la p. 390, le juge Hall; confirmé dans *Guerin c. La Reine*, [1984] 2 R.C.S. 335, à la p. 379, le juge Dickson (plus tard Juge en chef) et *Sparrow*, précité; voir également l'arrêt *Mabo c. Queensland [No. 2]* (1992), 175 C.L.R. 1 de la High Court of Australia. Voir aussi Brian Slattery, «The Constitutional Guarantee of Aboriginal and Treaty Rights» (1983), 8 *Queen's L.J.* 232, à la p. 242, et Peter W. Hogg, *Constitutional Law of Canada* (3^e éd. 1992), à la p. 679. Cette position est la [TRADUCTION] «théorie du caractère inhérent» des droits ancestraux, par

“Aboriginal Rights and Canadian Sovereignty: An Essay on *R. v. Sparrow*” (1991), 29 *Alta. L. Rev.* 498, Patrick Macklem, “First Nations Self-Government and the Borders of the Canadian Legal Imagination” (1991), 36 *McGill L.J.* 382, and Kent McNeil, *Common Law Aboriginal Title* (1989).

opposition à la «théorie du caractère conditionnel» des droits ancestraux: voir Michael Asch and Patrick Macklem, «Aboriginal Rights and Canadian Sovereignty: An Essay on *R. v. Sparrow*» (1991), 29 *Alta. L. Rev.* 498, Patrick Macklem, «First Nations Self-Government and the Borders of the Canadian Legal Imagination» (1991), 36 *R.D. McGill* 382, et Kent McNeil, *Common Law Aboriginal Title* (1989).

113 Aboriginal people's occupation and use of North American territory was not static, nor, as a general principle, should be the aboriginal rights flowing from it. Natives migrated in response to events such as war, epidemic, famine, dwindling game reserves, etc. Aboriginal practices, traditions and customs also changed and evolved, including the utilisation of the land, methods of hunting and fishing, trade of goods between tribes, and so on. The coming of Europeans increased this fluidity and development, bringing novel opportunities, technologies and means to exploit natural resources: see Brian Slattery, “Understanding Aboriginal Rights” (1987), 66 *Can. Bar Rev.* 727, at pp. 741-42. Accordingly, the notion of aboriginal rights must be open to fluctuation, change and evolution, not only from one native group to another, but also over time.

L'occupation et l'utilisation du territoire de l'Amérique du Nord par les peuples autochtones n'étaient pas statiques et, en règle générale, les droits ancestraux en découlant ne devraient pas l'être non plus. Poussés par divers événements telles des guerres, des épidémies, des famines et la rareté du gibier, les autochtones migraient. De même, leurs coutumes, pratiques et traditions changeaient et évoluaient, notamment l'utilisation des terres, les méthodes de chasse et de pêche, l'échange de biens entre tribus. L'arrivée des Européens a accru ces déplacements et ces changements, créant de nouvelles occasions et introduisant de nouvelles techniques et méthodes d'exploitation des ressources naturelles: voir Brian Slattery, «Understanding Aboriginal Rights» (1987), 66 *R. du B. can.* 727, aux pp. 741 et 742. En conséquence, la notion de droits ancestraux doit pouvoir fluctuer, changer et évoluer, non seulement d'un groupe autochtone à l'autre, mais aussi dans le temps.

114 Aboriginal interests arising out of natives' original occupation and use of ancestral lands have been recognized in a body of common law rules referred to as the doctrine of aboriginal rights: see Brian Slattery, “Understanding Aboriginal Rights”, *supra*, at p. 732. These principles define the terms upon which the Crown acquired sovereignty over native people and their territories.

Les intérêts autochtones découlant de leur occupation et utilisation originales des terres ancestrales ont été reconnus dans un ensemble de règles de common law appelées doctrine des droits ancestraux; voir Brian Slattery, «Understanding Aboriginal Rights», *loc. cit.*, à la p. 732. Ces principes définissent les conditions auxquelles Sa Majesté a acquis la souveraineté sur les autochtones et leur territoire.

115 The traditional and main component of the doctrine of aboriginal rights relates to aboriginal title, i.e., the *sui generis* proprietary interest which gives native people the right to occupy and use the land at their own discretion, subject to the Crown's ultimate title and exclusive right to purchase the land: see *St. Catherine's Milling and Lumber Co. v. The*

La principale composante traditionnelle de la doctrine des droits ancestraux concerne le titre aborigène, c'est-à-dire le droit foncier *sui generis* qui confère aux autochtones le droit d'occuper et d'utiliser à leur gré les terres visées, sous réserve du fait que c'est Sa Majesté qui, en dernier ressort, en détient le titre et possède le droit exclusif

Queen (1888), 14 A.C. 46 (P.C.), at p. 54, *Calder v. Attorney-General of British Columbia*, *supra*, at p. 328, *per* Judson J., and at p. 383, *per* Hall J., and *Guerin*, *supra*, at pp. 378 and 382, *per* Dickson J. (as he then was).

The concept of aboriginal title, however, does not capture the entirety of the doctrine of aboriginal rights. Rather, as its name indicates, the doctrine refers to a broader notion of aboriginal rights arising out of the historic occupation and use of native ancestral lands, which relate not only to aboriginal title, but also to the component elements of this larger right — such as aboriginal rights to hunt, fish or trap, and their accompanying practices, traditions and customs — as well as to other matters, not related to land, that form part of a distinctive aboriginal culture: see W. I. C. Binnie, “The Sparrow Doctrine: Beginning of the End or End of the Beginning?” (1990), 15 *Queen’s L.J.* 217, and Douglas Sanders, “The Rights of the Aboriginal Peoples of Canada” (1983), 61 *Can. Bar Rev.* 314.

This brings me to the different type of lands on which aboriginal rights can exist, namely reserve lands, aboriginal title lands, and aboriginal right lands: see Brian Slattery, “Understanding Aboriginal Rights”, *supra*, at pp. 743-44. The common feature of these lands is that the Canadian Parliament and, to a certain extent, provincial legislatures have a general legislative authority over the activities of aboriginal people, which is the result of the British assertion of sovereignty over Canadian territory. There are, however, important distinctions to draw between these types of lands with regard to the legislation applicable and claims of aboriginal rights.

Reserve lands are those lands reserved by the Federal Government for the exclusive use of Indian people; such lands are regulated under the *Indian Act*, R.S.C., 1985, c. I-5. On reserve lands, federal legislation, pursuant to s. 91(24) of the

d’acheter les terres en question: voir *St. Catherine’s Milling and Lumber Co. c. The Queen* (1888), 14 A.C. 46 (C.P.), à la p. 54, *Calder c. Procureur général de la Colombie-Britannique*, précité, à la p. 328, le juge Judson et à la p. 383, le juge Hall, et *Guerin*, précité, aux pp. 378 et 382, le juge Dickson (plus tard Juge en chef).

Cependant, le titre aborigène ne représente pas l’ensemble de la doctrine des droits ancestraux. Au contraire, comme son nom l’indique, cette doctrine vise un ensemble plus grand de droits fondés sur l’occupation et l’utilisation historiques par les autochtones de leurs terres ancestrales, qui comprend non seulement le titre aborigène, mais aussi les éléments constitutifs de ce droit plus large — tels les droits de chasse, de pêche et de piégeage ancestraux, et les coutumes, pratiques et traditions connexes — ainsi que d’autres éléments qui font partie intégrante de la culture autochtone distinctive visée, mais ne se rapportent pas au territoire: voir W. I. C. Binnie, «The Sparrow Doctrine: Beginning of the End or End of the Beginning?» (1990), 15 *Queen’s L.J.* 217, et Douglas Sanders, «The Rights of the Aboriginal Peoples of Canada» (1983), 61 *R. du B. can.* 314.

Cela m’amène aux différents types de terres auxquelles peuvent se rattacher des droits ancestraux: les terres des réserves, les terres visées par un titre aborigène et les terres visées par un droit ancestral: voir Brian Slattery, «Understanding Aboriginal Rights», *loc. cit.*, aux pp. 743 et 744. Ces terres ont en commun le fait que le législateur fédéral et, dans une certaine mesure, les assemblées législatives provinciales possèdent un pouvoir général de légiférer à l’égard des activités des autochtones, pouvoir qui découle de l’affirmation de la souveraineté britannique sur le territoire canadien. Cependant, des distinctions importantes doivent être faites entre ces divers types de terres quant aux lois qui leur sont applicables et aux droits ancestraux qui peuvent y être revendiqués.

Les terres des réserves sont les terres qui sont réservées par le gouvernement fédéral pour l’usage exclusif des Indiens. Ces terres sont régies par la *Loi sur les Indiens*, L.R.C. (1985), ch. I-5. S’applique sur ces terres et les lois fédérales, conformé-

Constitution Act, 1867, as well as provincial laws of general application, pursuant to s. 88 of the *Indian Act*, are applicable. However, under s. 81 of the *Indian Act*, band councils can enact by-laws, for particular purposes specified therein, which supplant incompatible provincial legislation — even that enacted under s. 88 of the Act — as well as incompatible federal legislation — in so far as the Minister of Indian Affairs has not disallowed the by-laws pursuant to s. 82 of the Act. The latter scenario was the foundation of the claims in *R. v. Lewis*, [1996] 1 S.C.R. 921, and partly in *R. v. Nikal*, *supra*.

ment au par. 91(24) de la *Loi constitutionnelle de 1867*, et les lois provinciales d'application générale, conformément à l'art. 88 de la *Loi sur les Indiens*. Cependant, les conseils de bande peuvent, en vertu de l'art. 81 de la *Loi sur les Indiens*, décréter des règlements administratifs pour les fins particulières précisées dans cette disposition. Ces règlements administratifs remplacent les lois provinciales incompatibles — même celles édictées en vertu de l'art. 88 de la Loi — ainsi que les lois fédérales incompatibles — dans la mesure où le ministre des Affaires indiennes ne désavoue pas les règlements administratifs en question conformément à l'art. 82 de la Loi. Ce dernier scénario était le fondement des réclamations à l'origine de l'arrêt *R. c. Lewis*, [1996] 1 R.C.S. 921, et il l'était en partie dans *R. c. Nikal*, précité.
